Prevent Home Electrical Fires

Did you know?

Electrical malfunction is a leading cause of home fires year after year.

Share these electrical fire safety tips in your community:

- Electrical work should only be done by a qualified electrician.
- Check your electrical cords. If they are cracked or damaged, replace them. Don’t try to repair them.
- Don’t overload extension cords or wall outlets.
- Never use extension cords with appliances. Plug them directly into wall outlets.
