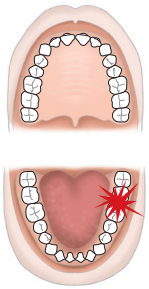
Oral Diseases

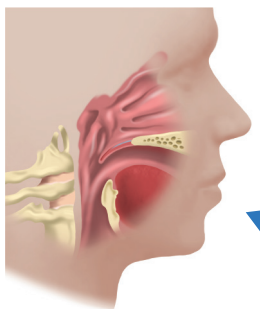
Caries



↑ Carbachia, Clostridium, Poryphyromonas, Helicobacter, Actinomycetes, Eugenia, Tanella, Hurdella, Micromonas and Streptococcus pneumoniae

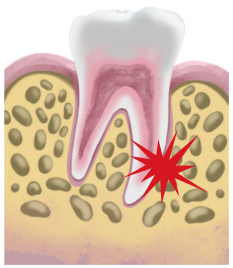
↓ Neisseria, Corynebacterium, Carbonophillic genus, Actinomycetes

Oral Cancer



↑ Gingival carbon dioxide phagocytic bacteria, prednisone and streptococcus mutants (both in saliva and tissues near tumors)

Periodontis

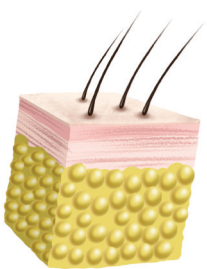


↑ Prevotella spp., Lactobacillus spp, Dialister spp, Fillifactor spp., S. acidophilus

Systematic Diseases

↑ Plasmodium, S. genus, and Streptococcus mutants
↓ Haemophilus, Corynebacterium, Carbonophillic phage and Staphylococcus

↑ Fusobacterium nucleatum: Transfer from mouth to gut



Obesity

↑ Streptococcush, Actinomyces, Neisseria
↓ Bifodobacterium, Eubacterium

Diabetes

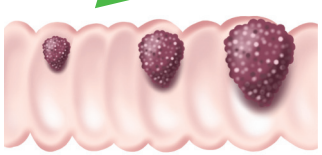
↑ Clostridium, Oribacterium, Cillate, Actinomyces and Campylobacter

Liver Diseases

↓ Haemophilus, Streptococcus and Pseudomonas

Pancreatic Cancer

↑ Helicobacter pylori and P. gingivalis Actinobacillus actinomycete



Colon Cancer
