Key Programming Software Update
SUBARU® - ADS2255

December 2021

Advanced Diagnostics is pleased to announce a free update for ADS2255 Subaru. The new update adds the capability to program proximity keys in lost key situations.

What does the software do?

ADS2255 programs keys for late model Subaru® vehicles with bladed ('G' key type) ignitions without the need of an existing key. Models with Proximity keys (push to start) can now be programmed in lost key situations. The software also covers remote (RKE) programming and is designed to be very fast and easy to use. A maximum of 4 keys / remotes can be programmed. This capability added in this software update is available on Smart Pro only.

Note: This software is available for Smart Pro only.

What else will I need?

Smart Pro

OFFER DETAILS	
Cable	ADC2000B
Smart Aerial required	No
Software category	C
Other accessories required	No
