2023

GENESIS GV60

THE FUTURE IS NOW

With the first-ever GV60, Genesis introduces our first all-electric vehicle. As you might expect from Genesis, it's not just all-electric. It is a total transformation of what luxury is today.

It's about design that is athletic without sacrificing elegance. Power that is nearly silent, but speaks volumes about how the GV60 driver is absolutely in charge. Safety that is based on gathering intelligence in real time – then assisting you in being a more alert, responsive and confident driver. And technology that lets you personalize your experience – not only with your GV60, but also with Genesis.

These are the elements we are using to create the future of luxury. And with the new GV60 SUV, that future starts now.

SHAPE YOUR DESTINY

At Genesis, our vision has never been limited by tradition. It was created out of a belief that it was time to define luxury in a new way. For a new generation.

Since then, our destiny has been shaped around the intersection of design and technology. Emboldened by innovations like our Electric-Global Modular Platform – which facilitates high-speed charging and Vehicle-to-Load capabilities while accommodating abundant interior space – Genesis is accelerating change by offering a new level of personal interaction between you and your SUV.

One example: Face Connect, which uses an outward-facing camera in the B-pillar to recognize your face and unlock your GV60's doors without keys.[1] Behind the wheel of the GV60, the future has never looked better.

POWER THAT'S ALWAYS READY

The all-electric GV60 is a luxury SUV, ready to indulge your appetite for smooth, quiet and confident power. Its Advanced AWD uses electric motors at each axle to generate up to 314 horsepower and 446 lb-ft of torque – with an EPA-estimated driving range of up to 248 miles.[2]

Want more power? Check out the GV60 Performance AWD. Engage its Boost Mode, and up to 483 peak horsepower flows in a torrent from two electric motors. Once the 10-second power surge of Boost Mode subsides, the motors default to a robust peak output of 429 horsepower.

So how long does the GV60 take to charge? With a 350 kW DC Fast Charger, the battery can be charged from 10 percent to 80 percent in just 18 minutes.[3] In a hurry? In just 5 minutes, your GV60 can be charged for a range of approximately 60 miles.[3] Lights inside of the charging port illuminate to show your charging status.

There's even a battery heating system onboard that maintains an ideal temperature for optimal charging speeds and battery performance in colder weather.

ADVANCED AWD

314 HP	446 LB-FT	248 MI
Maximum Power Output	Maximum Torque	Driving Range[2]

PERFORMANCE AWD

429 HP	516 LB-FT	235 MI
Maximum Power Output	Maximum Torque	Driving Range[2]

PERFORMANCE YOU CAN TAKE PERSONALLY

What does the GV60 feel like to drive? The answer is totally up to you. Press a button on the steering wheel, and you can select your preferred driving mode: ECO, Comfort, Sport or Snow.

Instantly, your GV60 recalibrates a range of variables to create the performance feedback you desire. From its steering, braking and throttle response to an available Electronically Controlled Suspension, your GV60 alters its personality to satisfy your mood.

On the GV60 Performance AWD model, an Electronic Limited Slip Differential helps manage the higher torque output. You can confidently summon its power, knowing you'll have ample traction where the rubber meets the road.

And with a technology called Road Preview, the road surface is no problem. Your GV60 Performance AWD scans the road ahead looking for potholes or speed bumps, then adjusts its Electronically Controlled Suspension to react with an ideal balance of comfort and control.

YOU CHARGE IT –
IT RECHARGES YOU

IF SUVS HAD AN IQ, THE GV60 WOULD BE OFF THE CHARTS

How smart is the GV60? Its Smart Cruise Control is augmented by a Highway Driving Assist feature that assists the driver in maintaining the center of the lane, at an appropriate speed, while keeping a safe distance from the vehicle ahead.[4]

Entering a curve? Your GV60 automatically reduces its cruise control speed appropriately and resumes the previously set speed after exiting the curve. Entering an area where the posted speed limit changes? An Intelligent Speed Limit Assist feature uses the navigation system's map data and front camera sign detection to alert the driver to speed limit changes. You can accept the change of speed with the press of a button on your steering wheel.[5]

It's all part of an array of advanced safety technologies that form one of the most sophisticated mobile protection systems ever offered in an automobile.

01

02

03

04

05

01 LANE FOLLOWING ASSIST

Using the GV60's front camera to detect lane markers on the pavement, this feature engages subtle steering corrections to help avoid unintentional lane departures. Even when lane markings aren't visible, Lane Following Assist can determine a virtual path based on movements of the preceding vehicle.[6]

02 FORWARD COLLISION-AVOIDANCE ASSIST

As you move down the road, accident-avoidance features like Forward Collision-Avoidance Assist (FCA) stand guard,[7] helping avert collisions with slowed or stopped cars, cyclists or pedestrians in front of your GV60. FCA can also assess the risk of colliding with oncoming traffic while turning left in an intersection, and bring your vehicle to a stop.[8]

03 BLIND-SPOT VIEW MONITOR AND BLIND-SPOT COLLISION-AVOIDANCE ASSIST

Activate your turn signal, and the GV60's Blind-Spot View Monitor displays video in the instrument cluster from its side-view camera.[9] Like an extra set of eyes when you approach the line markings for your lane change, the GV60 engages differential braking automatically to help avoid collisions if a vehicle is detected in the rear blind spot.[10]

04 REMOTE SMART PARKING ASSIST

How smart is this? With its Remote Smart Parking Assist, you can park your GV60 using the key fob as a simple remote control. Your vehicle effortlessly moves into or out of tight parking spots. No need for shifting gears or turning the steering wheel – it's all handled automatically.[11]

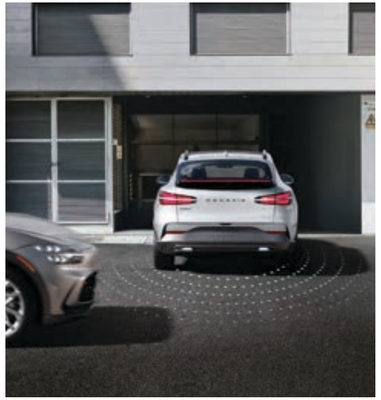
05 SURROUND VIEW MONITOR

If you can see trouble, you stand a better chance of avoiding it. The GV60's Surround View Monitor helps manage tricky parking maneuvers with 360-degree views around your vehicle. Another technology monitors for vehicles that are approaching from behind to help prevent collisions when you are exiting a parallel parking spot.[12]

IT'S NICE TO BE RECOGNIZED

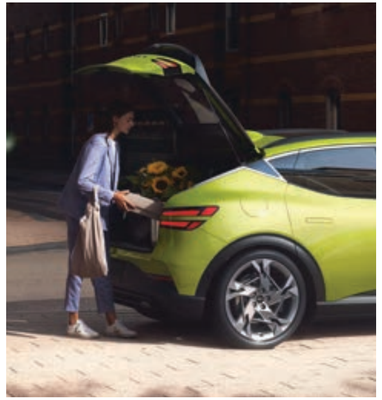
With the GV60, Genesis introduces a facial recognition system called Face Connect. Touch the driver's door handle, and a camera integrated into the B-pillar recognizes your face, unlocking the doors without a key fob. Once inside, touching the Fingerprint Reader starts your GV60 and loads your preferences for the position of the driver's seat, steering wheel and side mirrors – as well as your presets for the infotainment system and Head-Up Display.

An advanced version of our revolutionary Genesis Digital Key is also available, which lets you open and start your GV60 using a compatible smartphone. Ultra-wideband sensors can detect your phone and extend the GV60's flush door handles as you approach.[13] Custom driver presets can be saved to the cloud and pushed to your vehicle, and you can share your Digital Key with up to three people.



REAR CROSS-TRAFFIC COLLISION-AVOIDANCE ASSIST AND PARKING COLLISION-AVOIDANCE ASSIST

Your GV60 can warn of vehicles approaching from the side while you are exiting a parking space in reverse gear.[14] Another feature – Parking Collision-Avoidance Assist – uses the vehicle's camera and ultrasonic sensors to warn of pedestrians or obstacles while entering or exiting a parking space. If necessary, both features apply emergency braking automatically to help prevent a mishap from occurring.[15]



POWER HANDS-FREE SMART LIFTGATE WITH AUTO OPEN

Headed back to your GV60 with your hands full of luggage or shopping bags? No problem. Stand at the rear of your GV60 for three seconds, and the power liftgate recognizes the Genesis key in your pocket or purse, unlocking and opening wide automatically.[16] The liftgate's opening height can be set to your preference.

SAFE EXIT ASSIST AND ADVANCED REAR OCCUPANT ALERT

After parking, Safe Exit Assist issues an alert when a vehicle is detected to be approaching from behind, letting the driver know it is not safe for passengers to open the street-side door.[17] Advanced Rear Occupant Alert uses radar sensors to recognize children in the back seat or pets in the cargo area, helping to ensure your family's safety even after you've exited your GV60.[18]

PLUG INTO
YOUR SENSES

MAKE YOUR SPHERE OF INFLUENCE CRYSTAL CLEAR

For a luxury electric vehicle as advanced as the new GV60, no ordinary shift lever would suffice.

So Genesis Design created a crystal-like illuminated sphere. Enter your GV60, and it illuminates – creating an instant, emotional connection.

Switch on the power, and with a precisely choreographed movement, the sphere rotates to reveal an electronic shifter.

RISE ABOVE THE ORDINARY

Located in a floating center console, the crystal sphere gear shifter appears to hover in the air. The GV60's stylish cockpit, flat floor and Vision Roof accentuate a spacious interior appointed with rich materials and flush with a wealth of high-tech features.

Rest assured, all-electric power isn't the only thing about the GV60 that reflects our commitment to sustainability. The seats, door armrests, console armrests and lower instrument panel are crafted with polymers extracted from corn. The seat covers and door center trims feature fabrics made with yarns extracted from recycled water bottles and fish nets.

01

02

03

01 ERGO MOTION SEAT

Air cells inside of the GV60's available Ergo Motion Seat create precise support for the driver. How firm or how relaxed the seat's side support is depends on which Drive Mode you choose and how fast your GV60 is traveling. There's even a Stretch Mode to help keep you relaxed and alert on long journeys.

02 V2L CHARGING

The GV60 can be a source for powering your personal electronic devices – not just small items like a smartphone, but larger ones like your laptop or e-bike. Simply plug into the Vehicle-to-Load (V2L) two-way charger located in the second row, or the GV60's charge port for exterior V2L access, and you are good to go.[19]

03 TOUCH-TYPE DUAL ZONE CLIMATE CONTROL

No two people are alike, right? What's comfortable for one person may be too warm or too chilly for another. That's why, inside the GV60, the driver and front passenger can each set their own temperature and airflow for the climate control system.

WIDEN YOUR WORLD

The GV60 offers a sophisticated approach to mobility with cutting-edge infotainment and a variety of connected car services designed specifically for electric vehicles.

Settle into the driver's seat, and your focal point is a wide digital instrument cluster that can display navigation maps or the status of advanced driver-assist safety features in addition to your speed, EV battery charge levels, range and other driving vitals.

It's part of the GV60's Connected Car Integrated Cockpit – an innovative cloud-based multimedia platform that links the instrument cluster, audio and navigation systems into a fluid panoramic display. Content is seamlessly shared between the two 12.3″ displays and a Head-Up Display that you can project onto the windshield.

HEAD-UP DISPLAY

Among the data projected onto the windshield as part of the GV60's Head-up Display is this bit of useful information: The location of the nearest charging station. Things like navigation, safety alerts and speed are displayed in fighter-jet fashion to assist with at-a-glance decision making.

OVER-THE-AIR UPDATES

A new level of Over-the-Air Vehicle Software and Map Updates helps ensure your GV60 is constantly improving the precision of its systems. It not only sends updates for navigation data, but also for software integrated into the GV60's advanced suspension, braking and steering features.[20]

DYNAMIC VOICE RECOGNITION

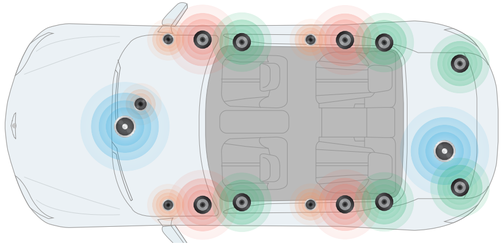
The GV60's Dynamic Voice Recognition system responds to a wide range of commands. No need to take your hands off the steering wheel. Just speak naturally to your GV60 for things like "Find a Thai food restaurant nearby" or "Turn on the air conditioning" or "How's the stock market doing today?"[21]

FOCUS ON HOW YOU WANT TO FEEL

The GV60 is naturally so quiet, we offer Active Sound Design to help you feel the thrill of its performance with three distinct modes. Futuristic mode emits a modern vibe. G-Engine mode replicates the throaty growl of a sporty engine, while E-Motor mode enhances the seamless thrust of torque from the all-electric engine.

A Bang & Olufsen® Premium Audio System offers the perfect musical accompaniment. Custom-designed for the interior's unique acoustics, this 17-speaker system includes an external coupled subwoofer embedded into the GV60's frame for crisp, deep bass tones that are precisely controlled rather than boomy and fatiguing.

With the tap of a finger, the system's BeoSonic User Interface lets you control your sonic atmosphere based on four characteristic moods: Relax, Energetic, Bright and Warm.



GENESIS CONNECTED SERVICES

With the Genesis Intelligent Assistant® app on your mobile device, you can remotely check to see if you left your GV60's doors unlocked or a window open.[22] Want your GV60's cabin to be the perfect temperature when you enter? From the comfort of your couch or office, your Genesis app or Amazon Echo®/Google Home™ device lets you remotely start your GV60 and activate the climate controls.[23] The app even lets you check battery charging and includes a valet alert to help you keep tabs on your vehicle.

Lost in a sea of cars outside of a shopping mall or long-term parking lot at the airport? We've all been there. Thankfully, the Genesis app can locate your vehicle using your smartphone. You can also use your phone to pinpoint your next destination and send driving directions to your GV60's navigation system before you get behind the wheel.[22]

It's all part of Genesis Connected Service's wide range of remote, safety and car care features that include monthly vehicle health reports and maintenance reminders, automatically calling for assistance in an emergency,[24] and much more.[25] For information on all of the services available to GV60 owners, visit genesis.com.

GENESIS EXPERIENCE

Our thoughtfully crafted suite of owner benefits is designed to enhance not just the way you drive, but the way you live. It reflects our profound commitment to meeting your needs and wants precisely. And while we can't create more time, our convenience-minded features will help you spend the time you have where it matters most.

COMPLIMENTARY SERVICE VALET

You may never set foot in our service center. With Genesis Service Valet (complimentary for 3 years or 36,000 miles, whichever comes first), we'll perform a remote diagnostic check, pick up your vehicle, send a Courtesy Loaner Vehicle and return your GV60 when the scheduled maintenance or warranty repair is complete.[26]

24/7 ENHANCED ROADSIDE ASSISTANCE

Peace of mind is another essential luxury. Should your travel plans take an unexpected turn, five-year complimentary Roadside Assistance provides tire changes or transportation to the nearest Genesis retailer. Reimbursement for an overnight stay is included if needed.[28]

SIRIUSXM ALL ACCESS SATELLITE RADIO

Complimentary for your first three months, SiriusXM® All Access offers one of the widest varieties of entertainment anytime, anywhere. Enjoy every channel available on your satellite radio – including personalized online stations powered by Pandora® – and listen in your GV60 or on your computer, smartphone or tablet with the SiriusXM app.[29]

COMPLIMENTARY SCHEDULED MAINTENANCE

Enjoy a worry-free Genesis ownership experience with Complimentary Scheduled Maintenance for 3 years or 36,000 miles, whichever comes first. Complimentary tire rotations, cabin air filter and wiper inserts are included at factory-recommended scheduled intervals.[27]

GENESIS CONNECTED SERVICES

Every new GV60 includes a complimentary subscription to Genesis Connected Services. It's an exclusive suite of safety, car care, guidance and remote features that help keep you connected to your digital life and the things you need on the go.[25]

NAVIGATION AND MULTIMEDIA UPDATES

To ensure you're accessing up-to-date driving directions, your GV60 navigation system includes annual map updates – complimentary for three years during routine maintenance visits with Genesis.[30] Over-the-Air Updates are available through Genesis Connected Services.[20]

GENESIS CONCIERGE

The newest and easiest way to shop for a vehicle, our Genesis Cares program offers complimentary personal shopping services. Connect with your Genesis Concierge agent to ask questions, book an at-home test drive,[34] request information or even check inventory. Whatever you need. On your terms.

FOOTNOTES

[1]Face Connect may not function correctly if sensors are damaged, dirty or covered, or if weather conditions (heavy rain, snow or fog) are interfering with sensor operation. [2]Estimated driving range based on a fully charged battery pack and combined MPGe rating. All figures are EPA estimates for comparison purposes only. Actual range will vary with options, driving conditions and habits, the vehicle and battery's condition and other factors.[3]Estimates based on a 350 kW, 800V DC EV Fast Charger. Charging rate/time estimates vary based on factors including current battery charge level, output of the charging unit, vehicle/battery settings and outside temperature. [4]Highway Driving Assist (HDA), when used in conjunction with Lane Following Assist and Smart Cruise Control, is for highway use only and can help keep the vehicle centered in its lane while maintaining a safe distance from the vehicle ahead when the lane markings are clearly visible on the road. It should not be used in poor weather, heavy or varying traffic, or on winding or slippery roads. HDA will not work under all circumstances and will not prevent loss of control. Driver remains responsible to slow or stop the vehicle to avoid a collision. See Owner's Manual for details and limitations. [5]Intelligent Speed Limit Assist (ISLA) can help the driver maintain cruise control speed limit using navigation system map data and speed limit sign recognition. ISLA cannot detect all speed limit signs, including when speed limit signage is obscured or beyond the camera's field of view. Driver is responsible for observing posted speed limits. See Owner's Manual for details and limitations. [6]Lane Following Assist (LFA) will not work under all circumstances and will not prevent loss of control. LFA is a supplemental assist and does not replace the need for extreme care and attention by the driver. LFA uses a camera in the upper windshield area, and it is imperative this area be free of blockage such as stickers, dirt, snow, tinting material, markings and labels. Avoid putting objects on the dashboard that may reflect light or images onto the system camera area. See Owner's Manual for details and limitations. [7]Forward Collision-Avoidance Assist (FCA) with Pedestrian and Cyclist Detection helps detect pedestrians and cyclists, but not in all conditions. FCA is designed to assist drivers to avoid, or reduce the severity of, collisions with cars, cyclists or pedestrians that have slowed or stopped in front of them. The system is not designed to detect certain stationary objects such as trees or poles, and may not detect all vehicles, pedestrians or cyclists under certain road, weather and vehicle conditions. It is a supplemental assist and does not replace the need for extreme care and attention by the driver. FCA may not stop the vehicle completely and will not avoid all collisions. The driver is responsible for being attentive and maintaining control of the vehicle, and should not wait for the system's alerts before braking as there may not be sufficient time to brake safely. See Owner's Manual for details and limitations. [8]Junction Turning helps the driver avoid collisions involving turning left at an intersection by applying the opposing front brake only when an oncoming vehicle is detected in the opposing lane. There are limitations to the function, detection, range and clarity of the system. Junction Turning may not function correctly if one or more of the sensors is damaged, dirty or covered, or if weather conditions (heavy rain, snow or fog) are interfering with the sensor operation. It will not prevent loss of control. This driver assistance system is not a substitute for safe driving. See Owner's Manual for details and limitations. [9]The Blind-Spot View Monitor (BVM) assists the driver in changing lanes by providing a live view of the blind spots on either side of the vehicle and an audible alert if another vehicle is detected. Turn signal must be activated, and other system limitations apply. Do not rely exclusively on BVM. It is the driver's responsibility to be aware of the surroundings and ensure it is clear before changing lanes or directions. See Owner's Manual for details and limitations. [10]Blind-Spot Collision-Avoidance Assist (BCA) assists the driver by warning of other cars in the rear blind-spot region. There are limitations to the function, range, detection and clarity of the system. BCA may not operate if sensors are obscured in any way. Do not rely exclusively on BCA – it is a supplemental system, and the driver must be attentive and exercise caution when driving. It is important to always signal, look over your shoulder and through your mirrors before changing lanes. See Owner's Manual for details and limitations. [11]Remote Smart Parking Assist (RSPA) can help remotely park the vehicle. However, several factors can impact RSPA performance. RSPA may not function correctly if one or more of the parking sensors is damaged, dirty or covered or if weather conditions (heavy rain, snow or fog) interfere with sensor operation. Always inspect the parking area with your own eyes. See Owner's Manual for details and limitations. [12]The Surround View Monitor's Surround View Camera System (SVCS) is a parking support system. SVCS cannot completely eliminate blind spots, may not detect every object and does not warn of moving objects. Always check your surroundings before moving your vehicle. Remote image capture requires an active Genesis Connected Services account. Parking Exit Assist (PEA) helps prevent collisions when exiting parallel parking spots. It can alert the driver of a potential hazard. Never rely exclusively on PEA when exiting a parking space, as it is not a substitute for attentive driving. Always look over your shoulder and use your mirrors to confirm clearance. There are limitations to the function, detection, range and clarity of the system. PEA may not function correctly if one or more of the parking sensors is damaged, dirty or covered or if weather conditions (heavy rain, snow or fog) are interfering with the sensor operation. See Owner's Manual for details and limitations. [13]Near Field Communication (NFC) digital smartphone key requires a compatible smartphone. Not all Android, Apple or Samsung devices are compatible. Passive entry functionality requires compatible Apple or Samsung smartphone. See your Owner's Manual for details and limitations. Apple® is a registered trademark of Apple Inc. Samsung® is a registered trademark of Samsung Electronics Inc. [14]Rear Cross-Traffic Collision-Avoidance Assist (RCCA) is designed to notify drivers of approaching cross traffic behind their vehicle. When another vehicle is detected while you are backing out of a parking spot, it provides audible and visual display warnings and applies braking if it senses a collision is imminent. RCCA is active when the vehicle is in reverse gear and backing at a speed less than 6 mph. It only engages during the first activation of reverse gear from park and may not detect all vehicles, depending on the size, angle, distance and speed of the other vehicle. Never rely exclusively on RCCA. See Owner's Manual for details and limitations. [15]Parking Collision-Avoidance Assist (PCA-R) can alert the driver of a potential hazard by providing an audible warning and, if deemed necessary, applying light braking. PCA-R is active when the vehicle is in reverse gear and operating at low speeds. Never rely exclusively on PCA-R when exiting a parking space, as it is not a substitute for attentive driving. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection, range and clarity of the system. See Owner's Manual for details and limitations. [16]The smart liftgate will open when your Proximity Key is within 40 inches of the detection area for at least 3 seconds. Radio transmitters and other vehicle smart keys may interfere with the normal operation of this feature. See Owner's Manual for details and limitations. [17]When your vehicle is parked, Safe Exit Assist (SEA) can alert occupants planning to exit when a vehicle is approaching from behind. When Child Locks are active, SEA prevents the rear doors from opening if a vehicle approaching from behind is detected. SEA is not a substitute for attentive driving. See Owner's Manual for details and limitations. [18]When the vehicle is parked and the engine has been turned off, Advanced Rear Occupant Alert (AROA) can help alert the driver if it detects movement from a child or pet. Upon exiting and locking the vehicle, the AROA may provide visual, audible and/or Genesis Connected Services (GCS) alerts if interior sensors detect movement. AROA is not a substitute for driver attentiveness. Never leave a child or pet unattended in a vehicle. GCS notification requires a properly equipped vehicle with an active GCS account. See Owner's Manual for details and limitations. [19]Vehicle-to-Load two-way charging will deplete battery and become inoperable once battery discharge limit reaches 20%. Not all electrical appliances will operate properly when using this feature. Do not use products that require a continuous power supply, and only use appliance under 16 amps. Additional limitations may apply. See Owner's Manual for more details. [20]Over-the-Air Updates require a Genesis Connected Services subscription. [21]Dynamic Voice Recognition varies by unit. Speak in a normal voice and minimize background noise for best results. See Owner's Manual for details and limitations. [22]Remote features are subject to adequate cellular coverage, signal strength and battery power, and only available in the 50 United States. You must be an active subscriber or within the initial complimentary trial period to receive Genesis Connected Services. [23]Amazon, Alexa and all related logos and motion marks are trademarks of Amazon.com, Inc. or its affiliates. Google Home and Google Assistant are trademarks of Google Inc. [24]Genesis Connected Services agents will contact existing emergency service responders. [25]Genesis Connected Services require an active subscription agreement subject to the Connected Services Terms and Conditions. Complimentary subscription term starts from the new vehicle date-of-first-use and is available for new 2023 model-year vehicle purchases and leases, and is transferable to subsequent owners subject to the Terms and Conditions. Only use Genesis Connected Services and corresponding devices when safe to do so. Cellular and GPS coverage is required. Features, specifications, and fees are subject to change. For more on details and limitations, visit genesis.com or an authorized retailer of Genesis branded products. [26]Genesis Service Valet is available for original purchaser of the vehicle from Authorized Genesis Retailers during the scheduled maintenance period which includes scheduled maintenance and normal wear, parts replacement or warranty repairs to your vehicle for 3 years or 36,000 miles, whichever comes first. Coverage area varies by retailer. Charges and fees may apply. Contact your Genesis Retailer for details. [27]Genesis Complimentary Maintenance is for 2023 model-year vehicles for factory-recommended scheduled maintenance for 3 years/36,000 miles, whichever comes first. Ownership limitations and exclusions may apply. See your Genesis Retailer for details. [28]Genesis Roadside Assistance is a limited and complimentary service for 5 years/unlimited miles from date of first use. Coverage is effective from the date the vehicle is delivered to the first retail buyer, or otherwise put into service (in-service date), whichever is earlier. Mileage and ownership limitations may apply. See your Genesis Retailer for details. [29]All SiriusXM services require a subscription sold separately, or as a package, by Sirius XM Radio Inc. after the trial period has elapsed. The subscription plan you choose will automatically renew, and you will be charged according to your chosen payment method at then-current rates. Fees and taxes apply. To cancel, you must call SiriusXM at 1-866-635-2349. See SiriusXM Customer Agreement for complete terms at siriusxm.com. All fees and programming subject to change. Satellite and outside-the-car lineups vary slightly. Sirius, XM, SiriusXM and all related marks and logos are trademarks of Sirius XM Radio Inc. [30]Multimedia and Navigation Map Care updates are available annually for 2023 model-year vehicles for 3 years after purchase with a regularly scheduled maintenance appointment. Availability timing of software updates may vary. Ownership limitations may apply. See your Genesis Retailer for details. [31]MPGe is the EPA-equivalent measure of gasoline fuel efficiency for electric mode operation. Use for comparison purposes only. Mileage may vary depending on driving conditions, driving habits, the vehicle's condition, the age/condition of the lithium-ion polymer battery, and other factors. [32]Powertrain Limited Warranty available for original retail owner only. See Genesis retailer for Limited Warranty details. [33]For further details and limitations regarding the Genesis Brand Warranty, contact your Genesis retailer or visit genesis.com. [34]Subject to retailer and concierge availability. May not be available in your area. Please reach out to a Genesis Concierge for details.
