8. Collection System Lateral Prioritization Program 19

Appendix A: Recorded sewer complaints
Appendix B: Closed CMMS work orders
Appendix C: Routine cleaning locations
Appendix D: Completed FSE inspections and enforcement actions
Appendix E: Limited access manholes
Appendix F: Work performed on laterals

1. Introduction

This Annual Report is submitted pursuant to Paragraph 13 of the Modified Consent Decree (Civil Action No. JFM-02-1524). The report provides an update of the City of Baltimore Department of Public Works' (DPW's) wastewater operation and maintenance (O&M) activities and an analysis of the activities that were conducted during the reporting period. In accordance with the Modified Consent Decree (MCD), the report includes:

i. A list of complaints related to the Collection System
ii. A list of completed work orders for the calendar year
iii. A list of outstanding work orders
iv. Current preventive maintenance schedules (task description, location, frequency), description of changes made to the schedules during the calendar year
v. A list of tests performed of new sewer installations and rehabilitations (location, date, description of new installation and/or rehabilitation)
vi. An evaluation of the efficacy of the grease control program (summary of grease-related blockages identified, corrective action taken, preventive action taken, monthly rate of grease-related blockages and (if available) comparison of current and previous year performance, list of referrals to pretreatment staff, identification of remaining persistent and chronic blockage areas)
vii. A list of the inspections conducted during the reporting year of establishments subject to the grease control program, specifying any re-inspections and enforcement actions taken after the initial inspection
viii. An evaluation of the efficacy of the root control program (summary of root-related blockages identified, corrective action taken, preventive action taken, monthly rate of root-related blockages and (if available) comparison of current and previous year performance, identification of remaining persistent and chronic blockage areas)
ix. An evaluation of the efficacy of the program to address problems in Collection System laterals causing Building Backups (summary of laterals identified under the program, corrective action taken, comparison of current and previous year performance, identification of persistent and chronic problems): and
x. An updated list of known locations where Baltimore does not have ready physical and/or legal access to the Collection System and the strategies Baltimore is employing to improve and secure such access to the Collection System

2. Customer Complaints

The City of Baltimore's 311 system allows customers to report sewer-related complaints. The service is available at any time of the day via phone, online and mobile application. Each complaint in the 311 system is assigned a Customer Service Request (CSR) number and a corresponding service request is created in DPW's computerized maintenance management system (CMMS).

After a DPW investigator inspects the area and determines corrective actions, a work order is generated, and the appropriate resources are mobilized to complete the work. In cases when multiple complaints in the 311 system are made by customers for the same problem, all complaints are forwarded to the CMMS and one service request is created for investigation. Repeat service requests are attached to one work order. The table below shows the number of sewer complaints since the beginning of the MCD.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
Sewer complaints	7,595	9,227	9,867	9,142	9,421	9,250	8,692	8,519

A list of all sewer complaints recorded during the reporting period is attached in Appendix A.

2.1. Completed Work Orders

When a complaint has been resolved, the work order status is updated to close in the CMMS. A list of closed work orders that were recorded during the reporting period is provided in Appendix B.

The number of completed sewer-related work orders since the beginning of the MCD is shown in the table below.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
Completed work orders	16,753	16,300	17,001	16,751	14,901	23,339	11,078	11,490

2.2. Outstanding Work Orders

The number of outstanding sewer-related work orders since the beginning of the MCD is provided below.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
Open work orders	198	481	631	661	970	3,496	82	257

3. Sewer Preventive Maintenance Program

DPW maintains various sewer preventive maintenance programs to maintain the current level of service.

3.1. Targeted Sewer Cleaning/Inspection Program

DPW developed and maintains a targeted cleaning program to identify and regularly clean and/or inspect sewers that have experienced reoccurring blockages. Sewer inspections may be completed in lieu of cleaning to determine if cleaning work is needed. The targeted pipes are identified and prioritized based on number of recurring blockages and dry weather SSOs.

The targeted areas are scheduled to be cleaned and/or inspected within 3 years.

The table and figure below show the completed sewer cleaning/inspection footage since the beginning of the MCD and the location of the sewers that were cleaned and/or inspected during the reporting period, respectively.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
Sewer cleaning/inspection (linear feet)	165,567	331,190	88,181	500,305	102,533	124,194	122,099	54,855

3.2. Routine Sewer Cleaning Program

DPW maintains a routine sewer cleaning program to clean sewers with recurring maintenance issues. Cleaning frequency is determined for each sewer on an as needed basis. Routine cleaning supplements the targeted sewer cleaning/inspection program.

A list of all routine cleaning locations is included in Appendix C.

3.3. Comprehensive Sewer Inspection Program

DPW developed and maintains a comprehensive sewer inspection program to determine current structural/operational conditions and assess remaining service life. The program includes all sewers that are 10-inch diameter and larger. The figure below show the location of the sewers that were inspected during the reporting period.

4. New Sewer Installation and Rehabilitation

DPW evaluates the collection system's hydraulic capacity and maintenance work orders to identify potential improvements to eliminate sanitary sewer overflows. Below are the new sewer installations and rehabilitation during the past fiscal year.

Sewer Replacement (LF)	CIPP (LF)	Point Repair (LF)	Point Repair (EACH)
2,798	93,532	308	90

Once construction is complete, new and rehabilitated sewers are tested in accordance with the City's specification standards. Typical testing includes:

- Low-pressure air testing is typically performed on all gravity sewers, including house connections. Testing will commence when no more than 1,000 linear feet of sewer has been installed. Sewers that do not pass the test may be repaired, replaced or the pipe installation may be modified, accordingly
- Hydraulic testing is typically performed on sewers that are 27-inch diameter and larger. Manholes are also hydraulicly tested if an air test is not possible
- Closed circuit television (CCTV) inspections are typically required for post-sewer rehabilitation projects and for post-sewer cleaning work.

5. Fats, Oils and Grease Control Program

DPW maintains a fats, oils and grease (FOG) control program that consists of:

- Grease removal in sewers
- Food Service Establishment (FSE) inspection

The grease abatement program was implemented in 2008 to address areas of FOG accumulation in the collection system. In 2012, DPW developed the FSE inspection program and commenced inspections in 2014. In 2014, the FSE inspections were incorporated into Baltimore City's Industrial Pretreatment Program under the authority of Article 25 of the Baltimore City Code.

5.1. Evaluation of Maintenance (Reactive) Work Orders

DPW reviews the CMMS data to identify sewers with FOG-related issues. The DPW Pollution Control Section is notified of grease-related blockages so that FSEs that are located upstream of the blockage can be inspected for proper FOG best management practices.

5.2. Grease Abatement Program

The grease abatement program consists of:

- Reviewing work orders and CCTV to identify FOG removal locations
- Removing grease in sewers that are experiencing FOG accumulation

The table below shows the completed footage of sewers on the FOG Program since the beginning of the MCD.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
Treated sewer (linear feet)	58,878	62,391	29,342	11,038	115,802	0	17,654	16,094

The location of the sewers that were cleaned during the reporting period is shown in the graphic below.

5.3. Food Service Establishment Inspections

All FSEs that discharge or have the potential to discharge FOG to the sanitary sewer must comply with the City of Baltimore Plumbing Code and their individual Wastewater Discharge permit, which is issued and enforced by the DPW Pollution Control Section. The Pollution Control Section also inspects FSEs to confirm compliance with City code and discharge permit. A list of FSE inspection violation types and the corresponding number of violations during the reporting period is provided in the table below.

Violation	**Total**
Baffles Installed Incorrectly	0
Baffles Missing	2
Bypass of Treatment System (GCD)	1
Enzymes Used	0
Enzymes Used Directly in GCD	0
Expired WWDP	188
Failed 25% Rule	107
GCD Inaccessible	6
GCD Installed Backwards	0
GCD Leaking	0
GCD Unauthorized Discharge	115
GCD Operating Improperly	3
Grease Disposal Inadequate	4
Inlet and/or Outlet T Missing	0
Maintenance Log Not Up to Date	36
No GCD	6
No Maintenance Log	139
No WWDP	21

Pre-rinse Sink Not Connected to GCD	2
Pre-rinse Wash Station Drain Not Connected to GCD	0
Refused Admittance	18
Solids Interceptor Trough Not Connected to GCD	0
Three-compartment Sink and Pre-rinse Sink/Wash Station Not Connected to GCD	1
Three-compartment Sink Not Connected to GCD	1
Tilt Skillet and Kettle Trough Not Connected to GCD	0
Tilt Skillet Not Connected to GCD	0
Wok Station Not Connected to GCD	1
Total	**651**

A list of completed FSE inspections and associated enforcement actions is provided in Appendix D.

5.4. Performance of Fats, Oils and Grease Control Program

The table below shows that the number of FOG-related work orders has decreased since the beginning of the MCD. The decreasing trend indicates that DPW's FOG control program continues to be effective in preventing FOG-related operational issues in the collection system.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
FOG-related work orders	954	444	532	328	321	214	200	160

The location of the FSEs that were inspected during the reporting period is shown in the graphic below.

6. Root Control Program

DPW's root control program identifies sewers with root blockages that have caused a sanitary sewer overflow or basement backups and removing such blockages.

6.1. Evaluation of Customer Complaint Records and Maintenance Work Orders

DPW evaluates sewer overflow and basement backup customer complaint records to identify laterals and sewer segments that should be added to the Root Control Program or referred for repair.

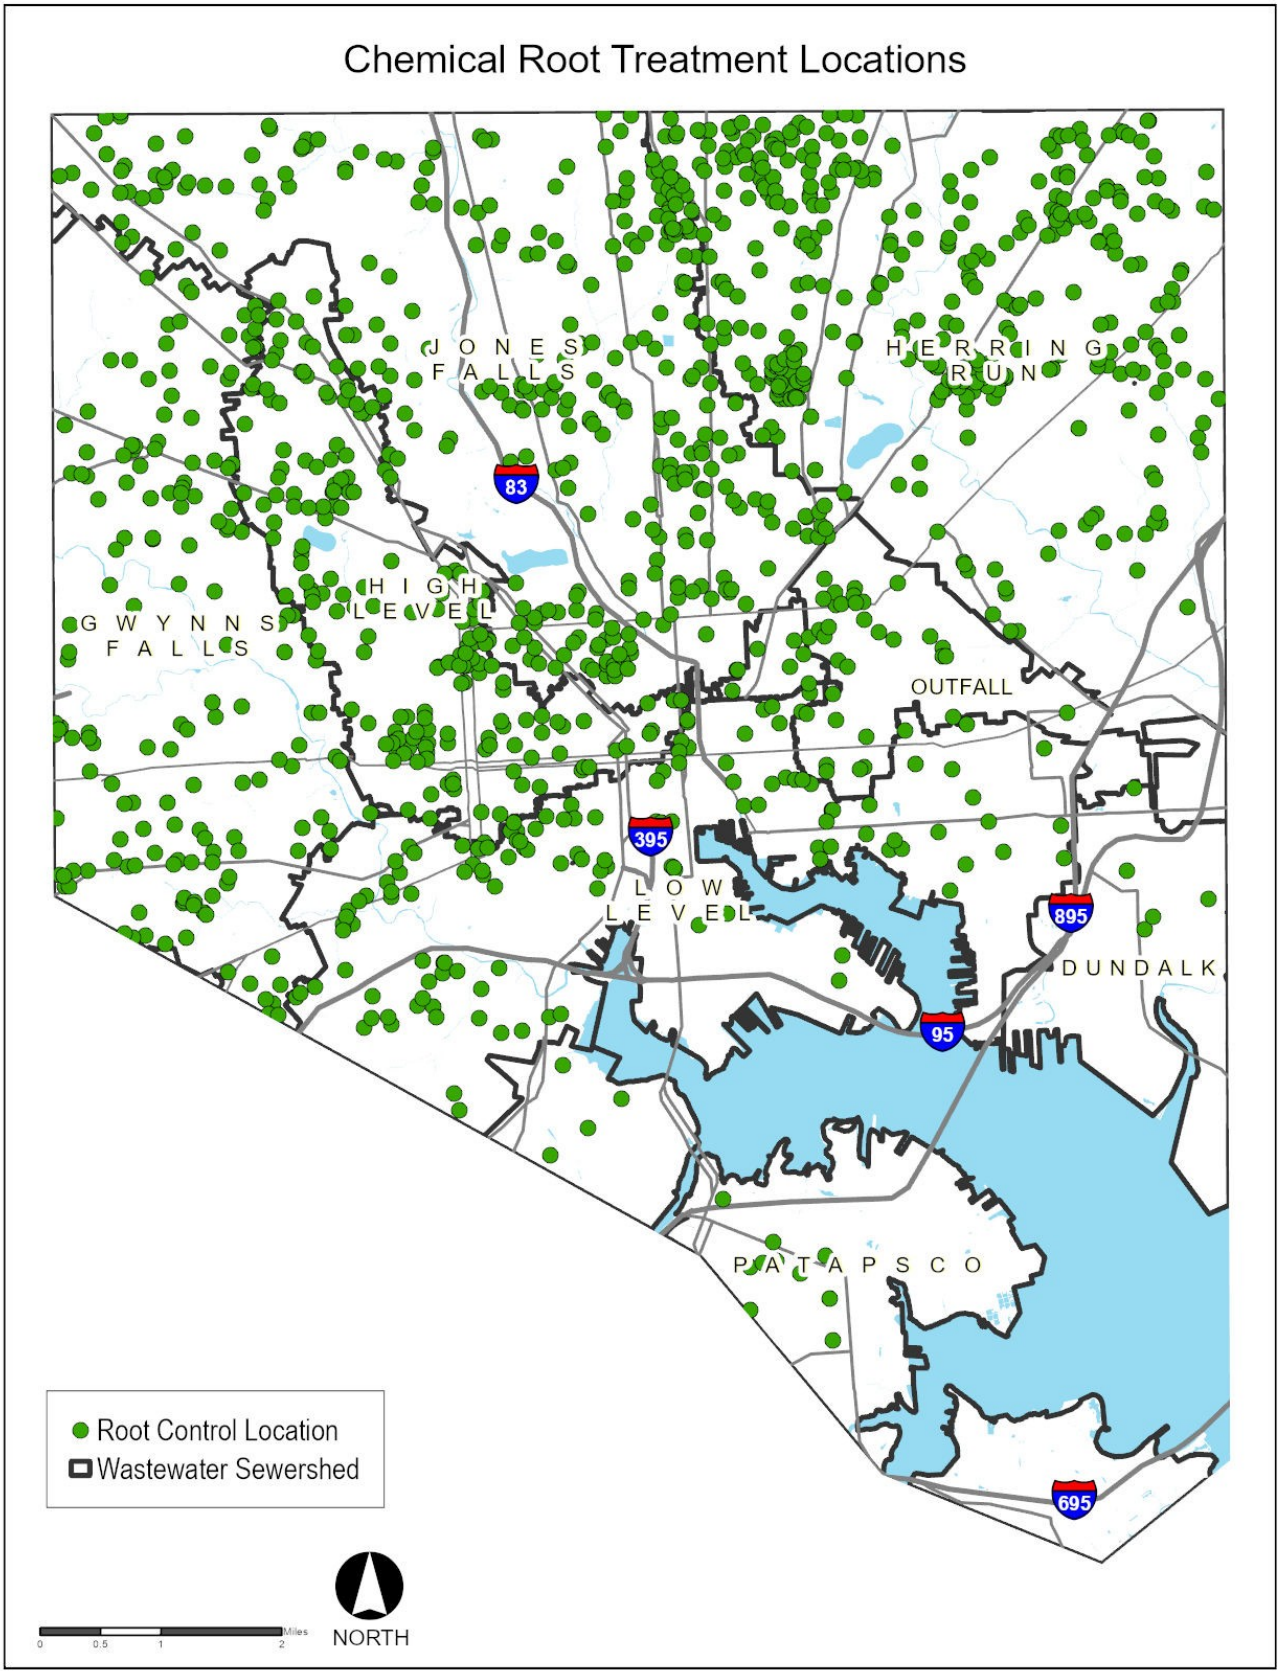
6.2. Chemical Root Control Program

The table below shows the footage of chemically treated sewers since the beginning of the MCD.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
Treated sewers (linear feet)	408,324	227,223	438,689	294,057	109,487	544,947	63,455	88,171

The location of the sewers that were treated for root intrusion during the reporting period is shown in the graphic below.

Chemical Root Treatment Locations



6.3. Performance of Root Control Program

The table below shows that the number of root-related work orders has decreased since the beginning of the MCD.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
Root-related work orders	2,918	2,741	2,392	2,200	2,198	1,860	1,323	1,514

The decreasing trend indicates that DPW's root control program continues to be effective in preventing root-related operational issues in the collection system.

7. Limited Access Areas

A list of manholes with limited access is provided in Appendix E. DPW will address the access issues and amend the list, as needed.

8. Collection System Lateral Prioritization Program

The Modified Consent Decree requires the City to address new or reoccurring Building Backups. DPW tracks the number of backups based on address and the frequency of backups. Corrective actions are prioritized based on the severity of the sewer defect that is causing the backup and backup frequency.

The table below reflects the total number of laterals that were inspected due to a basement backup since the beginning of the MCD. Appendix F lists all work performed on laterals during the reporting period.

Fiscal year	**2019**	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**	**2026**
No. of basement backups	3,911	5,395	5,979	5,007	5,063	4,375	3,591	3,323
No. of backups due to private property issue	0	4	184	1,185	1,636	1,153	942	663
No. of backups due to sewer issue	3	11	188	312	351	248	269	297
No. of lateral inspections due to basement backup	416	559	273	497	211	153	170	508
No. of lateral cleanings due to basement backup	1,248	1,728	1,825	1,430	1,576	1,425	1,216	1,280
