Quarterly Information (ITR) and Review Report of Independent Accountants

September 30, 2010

(A free translation of the original in Portuguese)

Review Report of Independent Accountants

To the Management and Shareholders
Porto Seguro S.A.

1 We have reviewed the accounting information included in the Quarterly Information (ITR) (parent company and consolidated) of Porto Seguro S.A. (the "Company") and subsidiaries for the quarter ended September 30, 2010, comprising the balance sheet and the statements of income, comprehensive income, changes in equity and cash flows, explanatory notes and the performance report. This Quarterly Information is the responsibility of the Company's management.

2 Our review was carried out in accordance with specific standards established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Council (CFC), and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Company with regard to the main criteria adopted for the preparation of the Quarterly Information; and (b) a review of information and of subsequent events which have, or could have, significant effects on the financial position and operations of the Company and its subsidiaries.

3 Based on our limited review, we are not aware of any material modifications that should be made to the quarterly information of the parent company referred to above in order that it be stated in accordance with the accounting standard CPC 21, Interim Financial Reporting, of the Brazilian Accounting Pronouncements Committee (CPC), applicable to the preparation of the Quarterly Information, consistent with the standards issued by the Brazilian Securities Commission (CVM).

4 Based on our limited review, we are not aware of any material modifications that should be made to the consolidated quarterly information referred to above in order that it be stated in accordance with CPC 21 and International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB) applicable to the preparation of Quarterly Information, in accordance with the standards issued by the Brazilian Securities Commission (CVM).

5 We have also reviewed the parent company and consolidated interim statements of value added for the quarter ended September 30, 2010, which are required to be presented in accordance with standards issued by the Brazilian Securities Commission (CVM) applicable to the preparation of Quarterly Information (ITR) and are considered supplementary information under IFRS, which does not require the presentation of the statement of value added. These statements have been submitted to the same review procedures described above and, based on our review, we are not aware of any fact that leads us to believe that they are not properly prepared, in all material respects, in relation to the parent company and consolidated interim accounting information taken as a whole.

6 As mentioned in Note 2, the Brazilian Securities Commission (CVM), through CVM Resolution 603/09, permitted companies to present their Quarterly Information during 2010 based on the accounting standards effective until December 31, 2009, provided that this Quarterly Information was subsequently restated, including comparative figures, to comply with the new standards. Accordingly, this Quarterly Information (ITR) differs from that originally disclosed by the Company.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

1. Operations and General Information

Porto Seguro S.A. (the "Company") is a publicly-held corporation with headquarters and main office in Alameda Ribeiro da Silva, 275 - 1o. andar, in the city and State of São Paulo, Brazil, established to participate, as a shareholder or partner, in other domestic or foreign companies that operate in:

(a) all lines of insurance;

(b) activities restricted to financial institutions and equivalent companies, including, without limitation, consortium management;

(c) provision of services and sale of equipment for electronic surveillance of asset protection systems; and

(d) services related, connected or supplementary to insurance and the other aforementioned activities.

The issue of these financial statements was authorized by the Board of Directors on October 28, 2010.

The activities of the Company's subsidiaries are as follows:

(a) Insurance

(i) Porto Seguro Companhia de Seguros Gerais ("Porto Seguro") - A direct subsidiary of the Company (all shares, except one), established on September 6, 1945, and authorized to operate by Decree No 20138 of December 6, 1945. Its objective is to operate in casualty and personal insurance.

(ii) Porto Seguro Vida e Previdência S.A. ("Porto Seguro Vida") - Controlled by Porto Seguro (99.97%), this corporation was established on December 23, 1986 to operate in personal insurance and annuity and lump-sum pension plans.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(iii) Porto Seguro - Seguros del Uruguay S.A. ("Porto Seguro Uruguay") - A wholly-owned subsidiary of Porto Seguro since December 22, 1994 which operates mainly in automobile insurance.

(iv) Porto Seguro - Seguro Saúde S.A. ("Porto Seguro Saúde") - Controlled by Porto Seguro (99.98%), this corporation was established on June 12, 2001 to operate as a specialized insurer in the health insurance line.

(v) Azul Companhia de Seguros Gerais ("Azul Seguros") - A direct subsidiary of the Company (99.71%) since November 28, 2003 which operates in the casualty and personal insurance lines.

(vi) Itaú Seguros de Auto e Residência S.A. ("ISa+r") – A direct subsidiary of the Company (99.99%) since November 30, 2009. Its objective is to operate in the casualty insurance line.

(b) Finance companies and consortiums

(i) Porto Seguro Administradora de Consórcios Ltda. ("Porto Consórcio") - A direct subsidiary of the Company (99.99%), established on July 20, 1976 to manage consortiums for the acquisition of assets and properties.

(ii) Portoseg S.A. - Crédito, Financiamento e Investimento ("Portoseg") - A direct subsidiary of the Company (99.98%), established on November 9, 2001. Its main objective is to finance the acquisition of assets, services, working capital and credit card operations.

(iii) Portopar Distribuidora de Títulos e Valores Mobiliários Ltda. ("Portopar") - A direct subsidiary of the Company (99.99%), established on April 8, 1991 basically to manage investment funds and financial assets.

(c) Service providers

(i) Porto Seguro Proteção e Monitoramento Ltda. ("Porto Seguro Proteção e Monitoramento") – A direct subsidiary of the Company (99.98%), established on January 9, 1998, with the main purpose of rendering services related to electronic protection and surveillance.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

2. Summary of Significant Accounting Policies

The principal accounting policies used in the preparation of this quarterly information are set out below. These policies were consistently applied to all periods presented, unless otherwise stated.

2.1. Basis of preparation

The quarterly information has been prepared under the historical cost convention, as modified by the fair value adjustments for the "available for sale" and "measured at fair value through profit or loss" categories. The quarterly information has been prepared assuming that the Company will continue to operate as a going concern.

The preparation of quarterly information requires management to make use of judgment to determine and record accounting estimates. Significant assets and liabilities subject to these estimates and assumptions include, among others, adjustments to the provision for impairment of trade receivables, deferred income tax and social contribution, technical reserves and provisions for contingencies. These estimates may differ from actual results due to the uncertainty inherent to their determination process. The Company reviews these estimates and assumptions on a periodical basis.

(a) Restatement of Quarterly Information (ITR) for the quarters of 2010

In accordance with Brazilian Securities Commission (CVM) Deliberation No 656 of January 25, 2011, which amended CVM Deliberation No 603 of November 10, 2009, article 2, item II, the publicly-held corporations must “restate the Quarterly Information (ITR) for the quarters of 2010, on a comparison basis with the quarters of 2009, also adjusted based on the 2010 standards, on or before the presentation of the Quarterly Information of the first quarter of 2011”.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(b) Consolidated and parent company quarterly information

The parent company quarterly information has been prepared and is being presented in accordance with Technical Pronouncement CPC 21, "Interim Financial Reporting", of the Brazilian Accounting Pronouncements Committee (CPC), and the consolidated quarterly information in accordance with CPC 21 and International Accounting Standard (IAS) 34, "Interim Financial Reporting", issued by the International Accounting Standards Board (IASB), applicable to the preparation of the Quarterly Information (ITR), and presented in accordance with the standards issued by the Brazilian Securities Commission (CVM).

The main differences between the accounting practices previously adopted in Brazil (former BR GAAP) and CPCs/IFRS, including the reconciliation of equity and comprehensive income, are described in Note 37.

2.1.1. Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Company

• IFRS 9 "Financial instruments" (issued in November 2009). This standard is the first step in the process to replace IAS 39, "Financial instruments: recognition and measurement". IFRS 9 introduces new requirements for classifying and measuring financial assets and is likely to affect the Company's accounting for its financial assets. The standard is not applicable until January 1, 2013 but is available for early adoption.

• IAS 24 (Revised), "Related party disclosures" (issued in November 2009). This standard supersedes IAS 24, "Related party disclosures", issued in 2003. IAS 24 (revised) is mandatory for periods beginning on or after January 1, 2011. Earlier application, in whole or in part, is permitted.

• "Classification of rights issues" (amendment to IAS 32), issued in October 2009. The amendment applies to annual periods beginning on or after February 1, 2010. Earlier application is permitted. The amendment addresses the accounting for rights issues that are denominated in a currency other than the functional currency of the issuer. Provided certain conditions are met, such rights issues are now classified as equity regardless of the currency in which the exercise price is denominated. Previously, these issues had to be accounted for as derivative liabilities. The amendment applies retrospectively in accordance with IAS 8 "Accounting policies, changes in accounting estimates and errors".

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

• IFRIC 19, “Extinguishing financial liabilities with equity instruments”, effective July 1, 2010. The interpretation clarifies the accounting by an entity when the terms of a financial liability are renegotiated and result in the entity issuing equity instruments to a creditor of the entity to extinguish all or part of the financial liability (debt for equity swap). It requires a gain or loss to be recognized in profit or loss, which is measured as the difference between the carrying amount of the financial liability and the fair value of the equity instruments issued. If the fair value of the financial instruments issued cannot be reliably measured, the equity instruments should be measured to reflect the fair value of the financial liability extinguished.

• “Prepayments of a minimum funding requirement” (amendments to IFRIC 14). The amendments correct an unintended consequence of IFRIC 14, IAS 19 – “The limit on a defined benefit asset, minimum funding requirements and their interaction”. Without the amendments, entities are not permitted to recognize as an asset some voluntary prepayments for minimum funding contributions. This was not intended when IFRIC 14 was issued, and the amendments correct this. The amendments are effective for annual periods beginning January 1, 2011. Earlier application is permitted. The amendments should be applied retrospectively to the earliest comparative period presented.

2.2. Consolidation

(a) Consolidated financial statements

Subsidiaries are all entities over which the Company has the power to govern the financial and operating policies, generally reflecting a shareholding of more than one half of the voting rights. The existence and impact of potential voting rights, if any, which are currently exercisable are considered when assessing whether the Company controls a certain entity. Subsidiaries are consolidated from the date on which control is transferred to the Company and deconsolidated from the date that control ceases.

When necessary, the subsidiaries' accounting policies were altered to be consistent with the policies adopted by the Company in the preparation of the financial statements, in conformity with IFRS and the new CPCs.

The consolidation process of balance sheet and statement of income accounts corresponds to the horizontal sum of asset, liability, income and expense account balances, according to their nature, considering the following eliminations and procedures:

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(i) Elimination of participations in capital and reserves between the companies;

(ii) Elimination of current account balances and other assets and/or liabilities between consolidated companies;

(iii) Elimination of income and expenses arising from intercompany transactions;

(iv) Non-controlling interests are shown separately in the consolidated financial statements;

(v) The financial statements of Porto Seguro Uruguay are prepared in accordance with the accounting practices adopted in Uruguay, which do not differ significantly from the accounting practices adopted by the Company, except for the balance sheet monetary restatement, which was eliminated upon consolidation to align accounting practices with those of the Company.

The Company treats transactions with non-controlling interests as transactions with equity owners of the Company. For purchases from non-controlling interests, the difference between any consideration paid and the portion acquired of the carrying amount of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the Company ceases to have control, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Company had directly disposed of the related assets or liabilities. Accordingly amounts previously recognized in other comprehensive income are reclassified to profit or loss.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(b) Parent company financial statements

In the parent company financial statements, subsidiaries are recorded based on the equity accounting method. The same adjustments are made in the parent company and consolidated financial statements to reach the same profit or loss and equity attributable to the holders of the parent company. In the case of the Company, the accounting practices adopted in Brazil applicable to the parent company financial statements differ from IFRS applicable to the separate financial statements only in relation to the measurement of investments in subsidiaries and associates based on the equity accounting method, while this is based on cost or fair value in accordance with IFRS.

2.3. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, responsible for allocating resources and assessing performance of the operating segments, has been identified as the Executive Board that makes the Company's strategic decisions.

The Company adopted IFRS 8 (“Operating segments”) and selected the following segments based on IFRS qualitative and quantitative criteria in determining reportable segments:

- Written premiums - automobile;
- Written premiums - Porto Seguro Saúde;
- Written premiums - personal and pension plan contributions;
- Revenues from consortiums;
- Lending operations;
- Other.

IFRS 8 quantitative guidelines establish separate disclosure for segments with absolute profit or loss, combined revenue or total segment assets that exceed 10% up to at least 75% of the Company's combined revenue be reported. According to this standard, the Company takes into consideration the financial reports on performance assessment of each operating segment used by the Management in the Company's business. The detailed information on operating segments is disclosed in Note 5.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

2.4. Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of the Company's subsidiaries are measured using the currency of the primary economic environment in which the entity operates (the entity's functional currency). The functional currency of each subsidiary was defined taking into consideration which more significantly affects the prices of products and most of the costs of sales and services. The Company's consolidated financial statements are presented in Reais (R$), which is the functional and presentation currency of the Company and its subsidiaries, except for Porto Seguro Uruguay (see item (c) below).

(b) Translation and balances denominated in foreign currency

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Gains and losses on translation of foreign currency balances resulting from the settlement of such transactions and from the translation of balances at the reporting date are recognized in the statement of income.

(c) Translation of assets, liabilities, income and expenses of subsidiary located abroad

The statement of income and balance sheet of the subsidiary Porto Seguro Uruguay (whose functional currency is the Uruguayan peso and is not in an hyper-inflationary economy) are translated into the Company's presentation currency as follows: (a) assets and liabilities are translated at the closing exchange rate at the reporting date; (b) income and expenses are translated at the average exchange rate of the period (unless this average is not a reasonable approximation for such purpose); and (c) all balance sheet translation differences are recognized as a separate component of equity.

2.5. Cash and cash equivalents

Cash and cash equivalents, considering the characteristics of the Company's financial assets, include cash in hand and bank accounts. When necessary, overdraft accounts should be considered to reconcile cash and cash equivalents in the balance sheet to the consolidated statement of cash flows, since cash resources are managed in this manner.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

2.6. Financial assets

(a) Financial assets - classification and measurement

The Company classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables, available for sale and held to maturity. There were no financial assets held to maturity during the periods presented. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at initial recognition.

(i) Financial assets at fair value through profit or loss

These financial assets are divided into two subcategories: held for trading and measured at fair value through profit or loss at the initial acquisition date.

The Company classifies in this category the financial assets for active and frequent trading. Derivatives are also classified as held for trading and included in the category. Assets in this category are generally classified as current assets. Gains or losses arising from changes in the fair value of “financial assets at fair value through profit or loss” are immediately recognized in the statement of income within “Revenues from financial assets” in the period in which they occur. The Company did not designate any financial asset or liability at fair value through the use of an option included in the IAS 39 "Fair Value Option" at the first-time adoption of IFRS and during the periods presented. Although the Company uses derivatives to protect and mitigate financial risks, it does not adopt hedge accounting as defined in IAS 39.

(ii) Loans and receivables

These include loans granted and receivables that are non-derivative financial assets with fixed or determinable payments not quoted in an active market. The Company's loans and receivables comprise lending operations with customers, premiums receivable from policyholders and other receivables. Loans and receivables are carried at amortized cost using the effective interest method and assessed for impairment at each reporting date (see accounting policy for “Impairment of financial assets”). Receivables from insurance contracts, such as premiums receivable from policyholders, are classified in this category and evaluated for impairment, in compliance with the policy, using a methodology similar to that used for impairment evaluation of other financial assets classified under the same category.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(iii) Available-for sale financial assets

Available-for-sale financial assets are non-derivative financial instruments that are either designated in this category or not classified in any of the other categories. These are initially and subsequently recognized at fair value (plus directly attributed transaction costs). Interest on available-for-sale securities calculated using the effective interest method is recognized in the statement of income as part of finance income. Dividends in this category which are received from investments in shares are recognized in the statement of income in the period when the right to receive the dividend is established.

The portion relating to changes in the fair value (unrealized gains or losses) is recorded in equity, under 'Carrying value adjustments', and recorded in the statement of income upon effective settlement or permanent write-down in the balance sheet (see accounting policy for “Impairment of financial assets”).

(iv) Determination of financial asset and liability fair value

The fair values of quoted investments are based on bid prices. For financial assets without an active market or public quotation, the Company establishes the fair value through valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

2.7. Analysis of impairment of financial and non-financial assets

(a) Financial assets recognized at amortized cost (including premiums receivable from policyholders)

The Company evaluates, at each reporting date, whether there is evidence that a certain asset or group of assets classified as loans or receivables is impaired.

If a financial asset is deemed impaired, the Company recognizes a loss in the statement of income only when there is objective evidence of impairment resulting from one or more events after the initial recognition of the financial asset in this category, and when the amount can be

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

reliably measured by the management. Losses are recorded and controlled in an adjustment account of the financial asset. The Company uses several observable factors for impairment analysis, including:

• previous losses and default;

• significant financial difficulty of the customer/policyholder or borrower due to unemployment;

• a breach of contract, such as a default or delinquency in interest or principal payments;

• the probability that the borrower will enter bankruptcy or creditor protection status due to an economic crisis that may affect their business segment;

• observable information indicating that there is a measurable decrease in future cash flows of a group of assets (for collective impairment), although this decrease cannot be attributed to individually insignificant assets.

For evaluation of impairment of financial assets classified in this category, the Company uses the incurred loss model, which considers whether there is objective evidence of impairment for individually significant assets. Should the Company consider that there is no evidence of impairment of an individually significant asset, the Company will include this asset in a group of credit risk assets with similar characteristics and consider this asset together with other financial assets that are tested on a collective basis. For this impairment calculation, the Company groups the assets according to their credit risk characteristics (such as internal ratings, industry or types of insurance contracts, and others for evaluation of premiums receivable) in which another methodology named 'Roll Rate Model' is used to determine percentages of historical losses, through analysis of cash from lending operations based on an observable period of up to twelve months until all collection efforts have been exhausted. These characteristics are relevant for determination of cash flows of the analyzed groups.

Individually significant assets evaluated for impairment on an individual basis are not included in the collective impairment calculation basis. The Company designates premiums receivable for impairment in this category, and economic studies on realized losses consider prior-year issues and exclude cancellations of policies not directly associated with losses arising from credit risk factors, such as recissions, write-off of assets due to losses, incorrect issues or changes in policies required by brokers that result in write-off of the asset. The Company

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

prepared discounted cash flows based on the effective interest rate (as established in contract, according to IAS 39), taking into consideration the fair value of guarantees linked to contracts for individual and group impairment tests, when applicable.

For held-to-maturity assets, impairment is evaluated as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the asset's effective interest rate. If the asset is impaired, the loss is recognized in an adjustment account (provision) in the statement of income. When the asset is quoted in the market, the Company uses the market value as basis for the impairment calculation.

(b) Financial assets at fair value

The Company evaluates at each reporting date if there is objective evidence that an asset classified as available for sale is individually impaired. In the case of investments in equity instruments (shares), the Company evaluates whether there is a significant or prolonged reduction in the asset's market value. If such evidence exists, the cumulative loss (being the difference between the acquisition cost and the current market value, less any impairment loss previously recognized) is removed from equity and immediately recognized in the statement of income. Losses on impairment of equity instruments recorded in the statement of income cannot be reversed in subsequent periods. For debt instruments, impairment losses are reversed when the fair value of the financial instrument increases and if the increase can be directly related to an event occurring after the initial recognition of the impairment loss.

(c) Non-financial assets

Non-financial assets that have an indefinite useful life, such as goodwill and brands, are not subject to amortization and are tested annually for impairment. Assets subject to depreciation (including intangible assets not arising from insurance contracts) are evaluated for impairment whenever events or circumstances indicate that the carrying amount of an asset is not recoverable. An impairment loss is recognized in the statement of income when the asset's carrying amount exceeds its recoverable amount. The recoverable amount is defined by IFRS as the higher between the value in use and the fair value of an asset (less cost on sales of assets). For impairment tests of non-financial assets, assets are grouped at the lowest level for which the Company can identify individual cash flows generated from assets, defined as cash generating units (CGUs) which are determined based on geographical criteria of operations of branches in various regions.

2.8. Derivative financial instruments and embedded derivatives

All the Company's derivative financial instruments were classified in the 'financial assets at fair value through profit or loss' category and held for trading.

The Company also analyzes all service contracts, financial instruments, insurance contracts and reinsurance contracts to identify embedded derivatives. When an embedded derivative is identified, the Company first evaluates whether the main instrument (or host contract) is stated at fair market value (in which the derivative financial instrument is not divided and recorded separately at fair market value in the financial statements). Should the instrument not be evaluated at fair value (instruments recorded at amortized cost), the Company analyzes whether the embedded derivative complies with the IAS 39 definition of a derivative, and whether the embedded derivative is economically related to host contract (in which the embedded derivative is not divided and recorded separately at market value). If the embedded derivative is not economically related to the host contract, it is recorded separately and recognized at fair value at each reporting date. The Company issues pension plan contracts that meet the definition of an insurance contract, in which the participants have interest rate guarantee and options for redemption of their reserve. These embedded guarantees comply with the definition of an embedded derivative; however, the Company uses the exemption established in IFRS 4, which states that, if the embedded derivative complies with the definition of an insurance contract, the Company does not separate the embedded derivative in this contract. These embedded guarantees are considered in the Liability Adequacy Test (LAT), because they modify estimated cash flows of contracts.

All derivative financial instruments are recognized at fair value upon initial recognition and subsequent evaluation, with changes in fair value immediately recorded in the statement of income.

2.9. Offsetting (net presentation) of financial assets and liabilities

Financial assets and liabilities are only presented at the net amount in the balance sheet when there is a legal and irrevocable right to offset assets and liabilities with the counterparty and when the Company intends to settle the instruments on a net basis or realize the asset and settle the financial liability simultaneously.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

2.10. Valuation of reinsurance contract assets

Reinsurance assets are presented as current and non-current receivables from reinsurance companies, depending on the estimated period of realization (or receipt) of reinsurance assets with reinsurance companies. Reinsurance assets are valued in a manner consistent with the balances associated with insurance liabilities subject to reinsurance and in accordance with terms and conditions of each contract. Liabilities payable to reinsurance companies comprise mainly premiums payable in reinsurance agreements. Any gains or losses on initial reinsurance contracting are amortized during the term of the contract risks.

The Company tests reinsurance assets for impairment on a regular basis and, at least, at each reporting date. When there is objective evidence of impairment, the Company reduces the reinsurance asset's carrying amount to its estimated recoverable value and recognizes any loss immediately in the statement of income. As permitted by IFRS 4, the Company uses a methodology similar to that used for held-to-maturity financial assets to determine whether there is objective evidence of impairment of a reinsurance asset (see methodology described in accounting policy 2.7). Consequently, impairment losses are evaluated using a methodology similar to that used for financial assets, as permitted by IFRS 4. This methodology also takes into consideration disputes and specific cases which are analyzed by management as to the documentation and progress of the recovery process with reinsurance companies.

2.11. Intangible assets

(a) Goodwill

Goodwill on acquisition of companies comprises the excess of the acquisition cost over the fair value of net assets acquired at each business combination date. Goodwill is tested annually for impairment and recorded at cost less any loss for impairment identified in this test. Any losses recorded cannot be reversed.

(b) Trademarks - ISa+r

Trademarks recorded in a business combination are recognized at fair value on the acquisition date, with indefinite useful life (Note 12).

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(c) Trademarks and patents

Trademark and patent costs are recognized at fair value on the acquisition date, with defined useful life.

(d) Customer relationship

Intangible assets arising from customer relationships acquired in a business combination are recognized at fair value at the acquisition date. The customer relations have a finite useful life and are carried at cost less accumulated amortization. Amortization is calculated using the straight-line method over the expected life of the relationship.

(e) Distribution channel

Distribution channels acquired in a business combination are recognized at fair value at the acquisition date. The distribution channel has a finite useful life and is carried at cost less accumulated amortization. Amortization is calculated using the straight-line method over the expected life of the relationship.

(f) Value of Business Acquired (VOBA)

The value of business acquired in a business combination is recognized at fair value on the acquisition date. The VOBA has a finite useful life and is carried at cost less accumulated amortization. Amortization is calculated using the straight-line method over the expected life.

(g) Computer software

Costs associated with maintenance of computer software are recognized as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Company are recognized as intangible assets when the following criteria are met:

(i) it is technically feasible to complete the software product so that it will be available for use;

(ii) management intends to complete the software product and use or sell it;

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(iii) the software product can be used or sold;

(iv) the software product will generate probable future economic benefits, which can be demonstrated;

(v) adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and

(vi) the expenditure attributable to the software product during its development can be reliably measured.

Directly attributable costs that are capitalized as part of the software product include the software development employee costs and an appropriate portion of related overheads.

Other development expenditures that do not meet these criteria are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

Software development costs recognized as assets are amortized during their estimated useful life (defined useful life), which cannot exceed five years, and are allocated to their related CGUs and tested for impairment on a regular basis by the Company.

(h) Acquired computer software licenses

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortized over their estimated useful lives up to five years.

(i) Other intangible assets

The Company acquired certain rights to sell its products in various retail sales channels. The amount paid for these rights, plus additional direct transaction costs, were recorded by the Company as intangible assets of defined useful life and amortized over the contractual term according to IAS 36.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(j) Deferred acquisition costs

Commissions and other acquisition costs are deferred and amortized over the life of the insurance policy or the estimated period policyholders remain in the plan, and are reflected in the "Deferred acquisition costs" account.

2.12. Investment properties

Fixed assets (buildings and land) not classified as property for the Company's own use and those leased to third parties to earn income are classified as investment properties, according to IAS 40. Investment properties are stated at acquisition cost less depreciation. These fixed assets comprise properties leased to third parties and are classified according to IAS 17 as operating leases.

Since the Company uses the cost model permitted by IAS 40 for investment properties, these assets are tested for impairment and allocated to the corresponding CGUs, in accordance with IAS 36 (see accounting policy in 2.7 (c)).

2.13. Fixed assets for own use

Fixed assets for own use comprise properties for own use, equipment, furniture, machinery, fittings and vehicles used in the Company' business. Fixed assets for own use are stated at historical cost revalued up to December 31, 2007 (land and buildings are stated at revalued amounts up to December 31, 2007, based on appraisals made on December 22, 2006 by independent experts). This cost was used as deemed cost in the adoption of IFRS and new CPCs under the voluntary exemption permitted by IFRS 1/CPC 37 for first-time adoption of IFRS. The cost of fixed assets is reduced by accumulated depreciation of the asset (except for land, which is not depreciated) up to the date of preparation of the financial statements. The historical cost of fixed assets includes costs directly attributable to the acquisition of capitalized items and to bringing them into use.

Subsequent costs are capitalized as part of the asset's carrying amount or recognized as a separate asset, only when it is probable that future economic benefits associated with the item will flow to the Company and cost of the item can be measured reliably. When a certain asset or part of it is replaced, the replaced item is derecognized, as appropriate. All other repair or maintenance costs are recognized in the statement of income as incurred.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

Depreciation of other fixed assets is calculated using the straight-line method over their estimated useful lives (land is not depreciated). Depreciation rates used by the Company are disclosed in Note 12. According to the Company's analysis of useful lives, depreciation rates do not differ significantly from those used in accordance with current tax legislation.

Residual value and useful life of assets are reviewed, and adjusted as necessary, at each reporting date. An asset's carrying amount is written down immediately if the asset's carrying amount is greater than its recoverable value.

2.14. Lease agreements

Lease agreements in which a significant portion of the risks and rewards of the assets are retained by the Company are classified as operating leases. Payments made by the Company for operating leases (net of any incentive received from the lessor) are recognized in the statement of income over the term of the lease.

In IFRS, according to IAS 17, lease agreements should be classified as finance or operating lease agreements based on a combination of certain indicators defined in IFRS, such as:

(i) the agreement transfers ownership of the leased asset at the end of the agreement;

(ii) the lessor has the option to purchase the asset for an amount deemed to be sufficiently lower than its market fair value, at the date on which the purchase option can be exercised and the exercise of which is reasonably certain when the agreement is signed;

(iii) the term of the lease corresponds approximately to the economic useful life of the leased asset, even when the ownership of the asset is not transferred to the lessee;

(iv) at the inception of the lease, the present value of minimum rentals to be paid substantially corresponds to the fair market value of the asset; and

(v) the nature of the leased asset is so specific that only the lessee can use it without significant modifications.

When the agreement is classified as a finance lease under IFRS, the lessee records the leased asset and a corresponding liability at the present value of minimum rentals to be paid under the agreement. After initial recognition, fixed assets are depreciated over the term of the

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

agreement, and obligations are recognized on the effective interest method with a finance cost recorded in the statement of income. When the agreements transfer substantially all risks and rewards of leased assets to the Company, these agreements are classified as finance leases and, consequently, the Company recognizes a liability at the present value of future minimum rentals due under the agreement and an asset corresponding to the lower between the present value of future minimum rentals and the asset's fair value at the date on which the agreement is signed. The Company appropriates financial interest over the term of the agreement and the asset is depreciated over the life of the rental agreement. When the Company is the lessee in rental agreements classified as operating leases, rental expenses are recorded in the statement of income over the term of the agreement.

In addition, the Company carries out an analysis to identify any other contracts related to services, supply or outsourcing, which meet the definition of a lease contract according to IFRIC 4 “Determining whether a contract contains a lease”.

During the periods presented, there were no lease agreements classified in the "finance lease" category.

2.15. Non-financial assets held for sale

The Company has certain assets held for sale, arising from the recovery of assets which were pledged in guarantee of lending operations (loans and financing) granted to customers, as well as inventories of salvages recovered after the payment of claims to policyholders. These assets are stated at fair value, less costs directly related to the sale of the asset and which are necessary for the transfer of ownership of the asset to third parties in normal conditions of operation. Expenses payable by the customer, such as auction expenses, are not deducted from the asset's fair value.

When the Company carries out the liability adequacy test (LAT) of insurance contracts, estimated recoveries of salvages relating to future payment of claims (excluding recovered assets maintained in salvage inventories on the test base date) are considered in the cash flow (see accounting policy 2.17.2).

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

2.16. Insurance contracts and investment contracts - classification

The Company issues several types of general insurance contracts and benefit products (open pension plans) which transfer insurance and/or financial risks. The Company classifies contracts issued as insurance contracts when significant risks are transferred. In general, the Company defines significant insurance risk as the possibility of paying significant benefits to policyholders if an insured event occurs (with commercial significance) which are higher than the benefits paid if the insured event does not occur. Investment contracts are those which do not transfer insurance risk or transfer insignificant insurance risk. At the date of adoption of IFRS, the Company did not identify any contracts classified as investment contracts.

Contracts for support to policyholders in which the Company engages outsourced employees (or allocates its own employees) to provide services related to, for example, residences and automobiles, 24-hour support, windows, among other risks, are also evaluated for classification purposes, and are classified as insurance contracts under IFRS when a significant portion of insurance risk is transferred between the counterparties of the contract.

The Company issues collective health insurance contracts for companies of different sizes in which the Company has the irrevocable and contractual right to increase future premiums or assumes the obligation to return certain amounts of 'technical excesses', if certain claims ratios or predetermined factors in the contract (according to a predetermined formula) are met. These contracts do not have a Discretionary Participation Feature (DPF, according to IFRS 4), because the Company does not determine the amounts to be refunded in collective policies (should losses or results from the policy be a benefit for the Company). These contracts were classified as insurance contracts because the results from policies may not be favorable to the Company. The policyholder has the option to cancel a contract effective for at least twelve months upon 60 days' notice (according to Normative Resolution (RN) 195 of July 14, 2009 - ANS) without the obligation of paying any penalty to the Company; accordingly, this is a probable scenario with commercial substance for retention of significant insurance risk for the Company based on prior experiences.

Reinsurance contracts are also classified according to the insurance risk transfer principles of IFRS 4. Reinsurance contracts not classified as an insurance contract according to IFRS 4 are classified as financial assets.

2.17. Evaluation of liabilities arising from insurance contracts

2.17.1. Liabilities of insurance contracts

The Company uses IFRS 4 guidelines to evaluate insurance contracts and adjust the consolidated financial statements in conformity with IFRS. Under IFRS 4, the Company is allowed to adopt the previous accounting policies, that is, BR GAAP (accounting policies and practices generally accepted in Brazil, presented below), used for evaluation of liabilities arising from insurance contracts and assets arising from reinsurance contracts. In addition to using this exemption, the Company applied the minimum procedure standards for evaluation of insurance contracts, such as: (i) liability adequacy test, (ii) review of prudence level considered in evaluation of insurance contracts, among other applicable policies.

The Company did not use the Shadow Accounting principles, since it does not have contracts for which the evaluation of liabilities, or benefits to policyholders, are impacted by unrealized gains or losses on available-for-sale securities according to IAS 39, recorded in an equity reserve. The Company also did not identify situations in which excess prudence was used, as defined by IFRS 4, in the evaluation of insurance contracts under BR GAAP. The Company did not identify reserves for catastrophes not permitted by IFRS 4 on the date of adoption of this standard.

According to BR GAAP, technical reserves are constituted according to determinations of the National Council of Private Insurance (CNSP), Private Insurance Agency (SUSEP) and ANS, whose criteria, parameters and formulas are documented in technical actuarial notes, described as follows:

Casualty (automobile, transportation, property, etc.), life without a surviving beneficiary clause and health insurance lines

(i) The unearned premium reserve (PPNG) is calculated on a daily pro rata basis, based on issued premiums, and is intended to provide for the portion of the latter corresponding to the unexpired risk period, starting on the calculation base date, for casualty, group life and personal accidents insurance lines.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(ii) The unexpired risk reserve (PRNE) is calculated on a daily pro rata basis, based on net premiums issued, and is intended to provide for the portion of the latter corresponding to the unexpired risk period, starting on the calculation base date, for individual life insurance.

(iii) The unearned premium reserve for risks in effect but not issued (PPNG - RVNE) is intended to estimate the portion of unearned premiums related to risks assumed by the Company, which are already effective and in the process of being issued, in accordance with the methodology provided for in the technical actuarial notes in the casualty, group life and personal accidents insurance lines.

(iv) The unexpired risk reserve for risks in effect but not issued (PRNE - RVNE) is intended to estimate the portion of unexpired risks related to risks assumed by the Company, which are already effective and in the process of being issued, in accordance with the methodology provided for in the technical actuarial notes for individual life insurance.

(v) The reserve for unsettled claims (PSL) is based on estimates of indemnities payable, made upon the receipt of notices of claims, net of coinsurance adjustments. An additional reserve for unsettled claims (IBNER) is recorded to cover reported claims whose amounts are subject to changes during the claim analysis process. This reserve is calculated using statistical and actuarial techniques based on the historical behavior of claims, in accordance with the methodology provided for in the technical actuarial notes in the life and casualty insurance lines. For health insurance, PSL is constituted based on claims payable calculated upon the receipt of the claim notice, through the presentation of the medical bill or the service provider's advice.

(vi) The reserve for claims incurred but not reported (IBNR) for the casualty, life and health lines is calculated using statistical and actuarial techniques based on the historical behavior observed between the occurrence of claims and their being reported, in accordance with a technical actuarial note. The IBNR reserve for the DPVAT (mandatory insurance against personal injury caused by automotive vehicles) line is recognized pursuant to CNSP Resolution No 192/08.

(vii) The premium deficiency reserve (PIP) for the life insurance portfolio is recognized to cover the insufficiency arising from the impossibility of applying the fee adjustment in the existing contracts due to a court decision. This reserve is calculated based on technical actuarial notes, considering the difference between the amount effectively paid by the policyholders and the risk to which they are subject.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(viii) The risk fluctuation reserve (POR) is recognized for the purpose of stabilizing the result and reducing impacts on risk rates, upon the occurrence of atypical and major claims, in the business, residential and condominium, and national and international transport insurance lines. This reserve is calculated based on a technical actuarial note.

(ix) Mathematical reserves for vested benefits (PMBC) for the health insurance line are recognized based on the estimate of future medical and hospital expenses of the beneficiaries who are receiving a remission benefit (death of policyholder with maintenance of insurance of dependents without payment of premiums). This reserve is calculated in accordance with the methodology provided for in the technical actuarial notes, based on the present value of the related estimated expenses with a discount rate of 6% p.a.

(x) The reserve for administrative expenses (PDA) is recorded for the purpose of covering the administrative deficit, through the resources originating from the administrative results of the DPVAT computed monthly.

Pension plan and life insurance with a surviving beneficiary clause

(i) The mathematical reserves for unvested benefits (PMBaC) and vested benefits (PMBC) represent the amount of obligations assumed with the participants of annuity and lump-sum pension plans, structured under the capitalization and allocation of coverage capitals financial methods, and of life insurance with a surviving beneficiary clause. These reserves are calculated based on technical actuarial notes.

(ii) The contribution deficiency reserve (PIC), calculated based on an actuarial valuation, is recognized to cover deviations related to technical bases of mathematical reserves for PMBaC and PMBC and is calculated based on the present value of the difference between contractual technical bases and estimated technical bases, in accordance with methodology provided for in technical actuarial notes, taking into consideration a realistic assumption of 6% interest p.a. and the mortality table AT-2000.

(iii) The reserve for administrative expenses (PDA) is recognized to meet future operating expenses when benefits are paid to participants. This reserve is also recorded for plans which are still in the contribution stage, assuming a certain rate of conversion into future income. The reserve is calculated in accordance with the methodology provided for in technical actuarial notes, taking into account the present value of estimated future expenses, discount rate of 6% p.a. and mortality table AT-2000.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(iv) The unexpired risk reserve (PRNE) is calculated on a daily pro rata basis, based on net contributions received in the month, and is intended to accrue the portion of the contribution corresponding to the unexpired risk period, starting on the calculation base date.

(v) The unexpired risk reserve for risks in effect but not issued (PRNE - RVNE) is intended to estimate the portion of unexpired risks related to risks assumed by the Company, which are already effective and in the process of being issued, in accordance with the methodology provided for in the technical actuarial notes.

(vi) The reserve for claims incurred but not reported (IBNR) is calculated for these estimated unreported claims according to criteria established by SUSEP Circular Letter No 288/05. The IBNR reserve for the DPVAT line is recognized pursuant to CNSP Resolution No 192/08.

(vii) The reserve for benefits to regularize (PBAR) is recorded due to the report of an event and is based on pending lump-sum and annuity amounts.

(viii) The reserve for financial surplus (PEF) comprises the amounts to be used in accordance with the pension plan's regulations.

(ix) The reserve for risk fluctuation (POR) is recorded to cover possible changes in expected commitments, based on technical actuarial notes.

2.17.2. Liability Adequacy Test (LAT)

As required by IFRS 4, the Company, at each reporting date, prepares the Liability Adequacy Test (LAT) of all contracts in effect on the test date. This test is prepared based on the net carrying amount of all liabilities arising from insurance contracts as permitted by IFRS 4, less intangible assets directly related to insurance contracts that include deferred acquisition expenses and value of business acquired (VOBA) arising from business combinations. For this test, the Company prepared a methodology based on its best estimate of all future cash flows, which also include additional and claim settlement expenses, using current assumptions for the test. For determination of estimated future cash flows, the contracts are grouped together based on similar features (or similar risk characteristics) as the related insurance risks are managed collectively by management. Cash flows are brought to present value, based on assumptions of risk-free interest rates.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

Should any deficiency be identified in the test, the Company immediately records the loss in the statement of income, initially reducing the deferred acquisition cost (DAC) or other intangible assets and, subsequently, records additional reserves for insurance liabilities already recorded at the test date. Any intangible asset, such as DAC, which was written down due to this test cannot be reinstated by the Company when the test shows favorable results for the Company and its subsidiaries.

Some contracts allow the Company to acquire ownership of the asset or the right to sell a damaged asset that has been recovered (such as salvages). The Company also has the contractual right to seek or collect reimbursements from third parties, such as subrogation of rights, for payment of partial or total damages covered by an insurance contract. Consequently, as permitted by IFRS 4, estimates of recovery of salvages and reimbursements arising from subrogation of rights are included as a deduction in the evaluation (estimate of insurance contract payment flow) and, as a result, in liability adequacy tests. When the asset is recovered on a date subsequently to the claim event, the Company classifies it under 'other assets', stated at fair value, less costs to bring the asset to a condition of sale for use by third parties. For expired risk lines, the Company takes into consideration the observed earned premiums to make the best estimate of revenues from premiums in the period subsequent to the calculation base date.

For benefit products (pension plan), also classified as insurance contracts, the Company uses a methodology based on elements that directly impact the cash flow of these contracts, such as the periods participants remain in the plan rates of conversion into income, return on assets guaranteed to the participants during the accumulation phase and concession of benefits (financial surplus), options of guaranteed interest rates (General Market Price Index (IGPM) inflation rate or realized assets gains above this rate for traditional products) and redemption options.

No deficiencies were identified in the tests of the groups for the periods presented.

2.18. Financial liabilities

2.18.1. Loans and financing

Loan and financing liabilities are initially recognized at fair value, net of additional transaction costs directly attributable to the financial liability. These liabilities are subsequently measured based on the effective interest method, including on transaction costs, and the interest on the

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

contracts is recorded up to the maturity of the contracts. The Company evaluates any early redemption options or special debt settlement rules with the purpose of identifying embedded derivatives in these contracts according to IFRS. For floating-rate loans, the effective interest rate is revised periodically, when the impact of a change in the effective interest rate of the contracts is significant.

2.18.2. Other financial liabilities

Other payables are initially recognized at fair market value, and any significant effects from adjustment to present value are recognized in accordance with the effective interest method up to the settlement date, whenever the effect of such adjustment to present value is material. For this calculation, whenever financial liabilities do not have a predetermined interest rate (or explicitly established in contract), the Company uses a market rate similar to the reference interest rate that would be hypothetically charged by a banking institution in the market, for financing or purchase of a similar asset, also considering the Company's credit risk for such purpose.

2.19. Employee benefits

The Company sponsors the Portoprev plan, which is classified as a defined contribution plan, according to IAS 19 criteria. Actuarial gains and losses are recorded in the statement of comprehensive income for the period in which they occur. The Company also offers post-employment benefits related to health and life insurance and benefits calculated using a benefit policy that determines a certain score for its employees according to their period of service. The liability of these obligations was calculated in accordance with a specific actuarial methodology based on turnover rates, interest rates for determination of current cost of service and interest costs, as defined in IAS 19. Other dismissal benefits, such as fine or provision for Government Severance Indemnity Fund for Employees (FGTS), were also calculated following this methodology for retired employees for whom this right has been already established.

Other labor provisions are calculated in accordance with the labor laws in effect on the date the financial statements are prepared, and are recorded on the accrual basis, as the services are rendered by the employees.

(All amounts in thousands of reais unless otherwise indicated)

2.20. Other provisions, contingent assets and liabilities

The Company recognizes a provision only when there is a present obligation (either of a legal or social responsibility nature) as a result of past events, it is probable that the payment of resources will be required to settle the obligation and a reliable estimate of the provision can be made. Should none of these characteristics be met, the Company does not recognize a provision. The provisions are discounted to present value when the effect is significant.

The Company records provisions to cover future disbursements that may arise from civil, tax and labor litigation. Provisions are recorded based on an individual analysis, made by the legal counsel of the Company and its subsidiaries, of lawsuits in progress and expectations of unfavorable outcomes requiring future disbursements. Taxes which are being disputed in court are recorded based on the "legal obligation" concept. Legal obligations (tax and social security) arise from lawsuits related to tax obligations, whose legality or constitutionality is being challenged, and which, regardless of the evaluation of the likelihood of a favorable outcome, are fully recognized in the financial statements and monetarily restated in accordance with current tax legislation (Special System for Settlement and Custody (SELIC) interest rate).

Judicial deposits are monetarily restated and presented as a deduction from the corresponding liability, if any, providing offsetting criteria are met.

When the offsetting criteria are not met, the judicial deposits are recorded under assets.

2.21. Share capital

The Company's shares are classified as a component of equity when the Company is not obliged to transfer cash or other assets to third parties. Incremental costs, directly attributable to the issue of the Company's shares, are recorded in equity as deductions from the funds received.

When the Company buys back its shares (treasury shares), the amount paid, including incremental costs directly attributable to the transaction, is deducted from equity. When the shares are subsequently sold, any amount received is included in equity, net of any incremental costs directly attributable to the transaction.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

2.22. Revenue recognition accounting policy

2.22.1. Recognition of premiums issued under insurance contracts

Revenues from premium of insurance contracts are recognized on a proportional basis, over the period of policy risk coverage. For investment contracts, if applicable, the Company does not recognize premiums received (or paid, for reinsurance premiums) in the statement of income, but uses the deposit method of accounting applicable to financial assets and liabilities. Contributions from participants in the pension plan segment are recognized in the statement of income at the time they are effectively received by the Company, for contracts that meet the definition of an insurance contract according to IFRS 4. The Tax on Financial Transactions (IOF) on premiums receivable is recorded in liabilities and is withheld and paid when the premium is received.

2.22.2. Interest and dividends received

Revenues from interest on financial instruments (including revenues from interest on instruments stated at fair value through profit or loss) are recognized in the statement of income, in accordance with the amortized cost method and the effective rate of return. When a financial asset becomes impaired, the Company reduces the asset's carrying amount to its recoverable value, corresponding to the estimated future cash flows discounted using the effective interest method, and continues to recognize interest on these financial assets as revenue from interest in the statement of income. Interest charged on insurance premiums paid in installments is deferred for appropriation to the statement of income over the same term of such installments.

Revenues from dividends on financial asset investments represented by equity instruments (shares) are recognized in the statement of income when the right to receive the dividend payment is established.

2.22.3. Revenues from rental of properties

Revenues from rental of investment properties (classified as operating leases) are recognized in the statement of income for the period based on the straight-line method and proportionally to the rent period. Any incentives or rental expenses are recognized in accordance with the same method used for the revenue recognition.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

2.22.4. Revenues from consortiums

Revenues from administration fees are recognized as the plan management services are rendered by the Company. Commissions on consortium share sales are recognized in the statement of income when consortium shares are sold and the sale is concluded (or performed).

2.22.5. Loyalty programs

According to IFRIC 13, when an entity sells products or renders services and the sales contract includes multiple elements, the entity should appropriate revenue to the various elements in the contract based on the fair value of the consideration received in the transaction. In this respect, the Company evaluates situations in which the insurance contracts sold to policyholders include components of a significant financial amount, where the price of a part of the revenue or premium is increased to cover benefits that can be used by the Company's customers at third party merchants during the effectiveness of the insurance contracts. The Company evaluates the significance of these components and whether the revenue recognition standard (for example, the standard for use of these benefits) would differ significantly from that applied to the recognition of insurance premium issued based on the expiry term of the contract risk.

The Company also issues credit cards which offer various benefit programs to its customers. These programs include bonus payments based on frequent use or other loyalty parameters. The Company estimates its obligations related to the cost of future bonus, based on the fair value of these benefits, and takes into account several current assumptions for the valuation of this component in its financial statements. These assumptions include the manner in which the customers use the benefits, the type of benefit and estimate of benefits not claimed by the customer during the bonus exercise period.

2.22.6. Revenues from service rendering and sale of surveillance equipment

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Company's activities. Revenue is shown net of taxes, returns, rebates and discounts and after eliminating intercompany sales.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

The Company recognizes revenue when the amount thereof can be reliably measured, it is probable that future economic benefits will flow to the Company and when specific criteria have been met for each of the Company's activities. The Company bases its estimates on past experience, taking into consideration the type of customer, the type of transaction and the specifications of each arrangement.

2.23. Distribution of dividends and interest on capital

Dividend and interest on capital distributions to the Company's shareholders are recognized as a liability in the financial statements at year-end based on the Company's bylaws. Any amount that exceeds the minimum required is only provided on the date it is approved by the shareholders.

The tax benefit of interest on capital is recognized in the statement of income.

The rate used to calculate interest on capital is limited to the variation of the Long-term Interest Rate (TJLP) for the applicable period and the higher of: (i) 50% of the Company's profit (after deducting the Social Contribution on Net Income (CSLL) and before considering the aforementioned allocation and any deductions related to income tax); or (ii) 50% of the Company's retained earnings and revenue reserves.

2.24. Income tax and social contribution

The income tax and social contribution expense for the periods presented includes current tax expenses and deferred tax effects. The Company recognizes in the statement of income for the period the income tax and social contribution effects, except for tax effects of items which were directly recognized in equity; in these cases, the tax effects are also recognized in equity.

Current taxes are calculated based on tax laws and rules in effect on the date the balance sheet is prepared. In Brazil, current income tax is calculated at the base rate of 15% plus a 10% surtax on annual taxable income exceeding R$ 240. The provision for social contribution is calculated at the rate of 15% for insurance and financial companies and 9% for other subsidiaries and the Company (parent company). The provisions for deferred income tax and social contribution on temporary differences are recorded, and the amounts are transferred to taxes payable in current liabilities upon the realization or disposal of the corresponding assets.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

Deferred taxes are recognized based on the liability method (IAS 12) on temporary differences between the asset and liability tax bases and the carrying amounts of these assets and liabilities in the financial statements. Rates used to calculate deferred taxes are those enacted or substantively enacted on the date of preparation of the balance sheet. Deferred tax assets are recognized to the extent it is probable that future taxable income will be available to realize the credits.

3. Accounting Estimates and Judgments

Accounting estimates and judgments are continually reviewed and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Estimates and judgments used in evaluation of insurance liabilities

Management is required to make significant judgments and use estimates for the calculation of the Company's insurance liabilities. Several sources of uncertainties should be considered in the estimation of liabilities to be ultimately settled by the Company. The Company uses all available internal and external information sources for past experience and indicators that may affect the decision-making of the Company's management and actuaries to define actuarial assumptions and the best estimate of claim settlement amounts for contracts whose insured event has already occurred. Consequently, the provisions may differ from the amounts actually paid in the future. The provisions that are affected the most by judgment and uncertainties are those related to high risk insurance contracts (for example, special risks) and life insurance contracts.

(b) Estimates and judgments used in evaluation of provisions for tax, civil and labor contingencies

The Company has a large number of labor, tax and civil lawsuits in progress on the date of preparation of these consolidated financial statements in accordance with IFRS. Consequently, the process used by management to determine and record the accounting estimates takes into consideration the legal advice of experts, progress of the lawsuits and judgment status (or court) of each specific case. In addition, the Company uses its best judgment on these cases and historical information about losses, in which there is a high level of judgment used, to record the provisions in accordance with IAS 37.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(c) Estimates used in the calculation of impairment of financial assets

As required by IFRS, the Company applies the rules for analysis of impairment of individually significant receivables, as well as assumptions for evaluation of impairment for assets of similar risks on a group basis. In this respect, the Company uses a high level of judgment to determine the level of uncertainty about the realization of estimated contractual flows of financial assets, including premiums receivable from policyholders and credits receivable from loans granted to customers. This judgment considers the type of contract, industry, segment, localization of the debtor, payment history, and other relevant factors that may affect the recording of impairment losses on financial assets.

(d) Estimates used in the calculation of tax assets

Deferred tax assets are recognized to the extent it is probable that future taxable income will be available to realize the credits. This requires a high level of judgment by the Company's management for determination of estimates as to the expected generation and timing of future taxable income.

(e) Estimated fair value of financial instruments

The fair value of financial instruments that are not traded in an active market (for example, shares of closely-held companies) is determined by using valuation techniques. The Company uses its judgment to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. The Company has used discounted cash flow analysis for various available-for-sale financial assets that are not traded in active markets.

4 Management of Risks Arising from Financial Instruments and Insurance Contracts

The sensitive analysis process is carried out by Management on a semiannual basis, in June and December.

For the third quarter of 2010, the analyses refer to tests carried out in June 2010.

4.1 Insurance risk management

The Company offers to individuals, corporations and public entities in Brazil and Uruguay, through its direct and indirect subsidiaries (Porto Seguro, Porto Seguro Saúde, Porto Seguro Vida, Azul Seguros, Itaú Seguros de Auto e Residência and Porto Seguro Uruguay), a wide range of insurance products, including automobile, health, property, life, transportation and pension plan. The Company seeks to invest in the most modern and best risk selection and pricing processes. The key elements of the Company's underwriting policy are, and will continue to be, the following: (i) maintenance of centralized underwriting control, to ensure that the Company's policies and procedures are consistently and properly followed; (ii) ongoing monitoring of the quality of business proposed by the brokers; and (iii) use of techniques for the development of its own database referring to underwriting, claims and other statistical data, so that the Company can select and evaluate risks in a technical and commercially precise manner.

The Company defines insurance risk as the risk transferred through any contract in which there is the future possibility of loss and uncertainty as to the amount of indemnification resulting therefrom. Insurance contracts with transfer of significant risk are those in which the Company is obliged to pay a significant additional benefit to its policyholders in commercial scenarios, classified based on the comparison between the scenarios in which the event occurs, adversely affecting the policyholders, and scenarios in which the event does not occur. Because of the intrinsic nature of an insurance contract, the risk is, in a way, accidental and consequently subject to variations. For an insurance contract group to which the probability theory is applied for pricing and provision, the Company understands that the main risk transferred to the Company is that the risk of claims reported and the payment of benefits resulting from these events exceed the amounts recorded for insurance contract liabilities. In practice, these situations occur when the frequency and severity of claims and benefits to policyholders are higher than the amounts previously estimated, according to the methodology of calculation of these liabilities. Past experience demonstrates that the larger the group of similar risk insurance contracts, the lower the fluctuation in cash outflows to cover claim events will be. The Company uses risk diversification strategies and reinsurance programs with reinsurance companies having a high-quality credit risk rating, so that the adverse effect of atypical and major events can be minimized. Also, part of the credit and underwriting risks to which the Company is exposed is minimized because a relatively small portion of risks accepted have high insured amounts. Consequently, the possibilities of differences in severity of claims observed and recovery insufficiency or losses are minimized. This is evidenced by the fact that reinsurance premiums ceded totaled approximately 1.04% of written insurance premiums from January to September 2010.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

In addition, retentions established in reinsurance contracts are equal to SUSEP's technical limits or lower, in conformity with current legislation.

The factors that increase the insurance risk include the inability to diversify risk, type of risk, geographical issues and the type of business segment, which is a relevant factor for special risk lines in which the Company operates. The Company's insurance risk management structure considers the similarity of risks transferred through the various contracts and lines in which the Company operates, as well as experience obtained over the years to deal with specific or special risks, and how they were managed in the past. The main insurance risk management segments are structured as follows:

- Private and commercial automobiles
- Health
- Life
- Property and credit
- Transportation
- Pension plans

The Company's risk underwriting objective is to develop its insurance business portfolio on a conservative and profitable basis. The Company believes that its risk underwriting techniques offer additional advantage in proper identification and understanding of risk and definition of insurance prices, mainly in relation to the automobile insurance line. The Company's risk underwriting policies are defined solely by the head office, through its technical departments. The unit in the actuarial department responsible for the calculation of tariffs analyzes the appropriateness of the premium and uses exclusive data gathered and analyzed by the Company relative to each business line. Consequently, different prices are determined for asset insurance policies, in accordance with several variables applicable to each specific risk, such as in the case of automobile insurance, factors relating to automobile (age, make, model, etc.) and other factors relating to the policyholder's profile. This methodology has the purpose of maintaining the quality of risk underwriting and price discipline. The Company pays special attention to general training for employees, outsourced employees and brokers, risk selection and continuous monitoring. In addition, the Company monitors the quality of business obtained through brokers and regional offices, in order to evaluate and improve their performance. Risks are underwritten by the Company after the review of experience with losses and automobile pricing reports, among others, and after considering all complaints, physical conditions and the replacement value of the property.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

4.1.1 Private and commercial automobile insurance

The Company is the Brazilian leader in the automobile insurance segment, establishing its reputation based on the innovation of products, customer service, relationship with brokers and, mainly, based on the level of sophistication of risk analysis. The Company offers automobile insurance to individuals and corporations that use the vehicle for private and/or commercial purposes. Automobile insurance provides coverage of one or more of the following risks: body, civil liability and personal damage resulting from the use of the automobile.

Policyholders pay a deductible in case of a claim, except for full indemnification. The deductible varies according to the type of vehicle. Porto Seguro offers its automobile insurance policies for periods from 30 days up to three years.

Insurance of automobiles for commercial purposes offers coverage for cars, pick-ups and trucks, and the same coverage options are provided. Insurance of automobiles for commercial purposes was developed to protect companies against losses resulting for partial or total loss due to accident, robbery or theft of the vehicle, optional civil liability, tangible and moral damages to third parties, personal accidents to passengers, civil liability of the transportation company in international journeys and damages to the vehicle in South American countries which are not part of the Mercosur (Southern Common Market).

Since 1996 the Company offers automobile insurance policies with tariffs based on the risk profile of users that meet certain selective underwriting criteria, based on factors such as age, marital status, gender, parking habits and geographical area in which the automobile is used.

As part of its insurance risk management policy, the Company uses components that significantly reduce robbery or larceny of insured automobiles: (i) vehicle tracking and localization equipment; and (ii) recording of the chassis number in several parts of the internal vehicle body, which helps in the identification of stolen vehicles. In accordance with the insurance risk premium and for high-value vehicles, the Company installs on a freelease agreement basis tracking equipment which helps in a possible recovery.

The process used by management to determine certain actuarial assumptions consists mainly of identifying the risk to be insured, the object to be insured, the maximum amount at risk and the availability of data necessary for establishment of tariffs and underwriting.

Subsequently, management determines the actuarial assumptions relevant to the risk to be insured and the origin and reference of data to be used for establishment of tariffs and underwriting.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

Accordingly, for the Automobile Portfolio, management used the following for actuarial assumptions:

- Company's database to determine prices of insured risks and underwriting criteria, the use of externally-generated data not being necessary;

- Database comprising information on a period of at least 24 months, as from the analysis base date;

- For sensitivity test purposes, management uses as actuarial assumptions the frequency of partial collision, frequency of robbery and larceny, market reference value - Economic Research Institute (FIPE) table, salvages and expenses with settlement of claims due to their impact on pricing of the risk to be insured.

The results of the sensitivity tests, net of tax effects, are the following:

	Impact on profit or loss and equity			
	September 2010		June 2010	
Actuarial assumptions	Gross of reinsurance	Net of reinsurance	Gross of reinsurance	Net of reinsurance
Increase of 5% in frequency of claims	(78,219)	(78,198)	(77,409)	(77,387)
Increase of 15% in administrative expenses	(12,269)	(12,266)	(12,109)	(12,106)
Increase of 15% in claim expenses	(17,838)	(17,833)	(17,587)	(17,582)
Increase of 10% in percentage of recovery of salvages	25,795	25,783	24,297	24,285
Decrease of 5% in percentage of recovery of salvages and reimbursements	(13,562)	(13,555)	(12,790)	(12,784)

4.1.2 Health

Porto Seguro Saúde has operated in the health insurance market since 1992. It has more than 4 thousand insured companies, approximately 467 thousand insured individuals and 11 thousand service providers, including hospitals, laboratories and medical clinics. It sells Heath and Dental Plan products in the Corporate and Small and Medium-Sized Entities versions.

Accredited network: The Company makes available to its policyholders an accredited network, including doctors, hospitals and laboratories. When determining its accredited network, Porto Seguro Saúde enters into contracts with service providers located in different geographical regions, in accordance with its needs, which are selected based on several

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

factors, including specialization, experience, location, quality and cost of services. In order to maintain a high standard of customer service, service providers are subject to monitoring, through constant medical audit so as to maintain quality, conformity of the services rendered and control of costs of medical services.

Should the policyholder use the services rendered by a professional from the medical area who is not part of the accredited network, they can pay directly to the professional and subsequently request a reimbursement, in accordance with Porto Seguro's reimbursement table. Also, in places where the accredited network does not exist, Porto Seguro Saúde operates in partnership with other insurance companies.

Optional co-participation: When contracting the Corporate Porto Seguro Saúde insurance plan, the customer may opt for co-participation, which helps to encourage proper use of the plan, resulting in a better control over claims. In this case, the employee pays a small part of medical and hospital expenses only when the plan is used. When opting for co-participation, the customer receives a monthly discount on the premium.

Products:

Health - Porto Seguro Saúde has 11 medical plans with different amounts and conditions, in order to meet customers' different needs:

- Small and Medium-sized Entities: serves companies with from 20 to 99 individuals, including employees and their dependents;

- Corporate: serves companies with over 100 individuals, including employees and their dependents.

Dental plan - The policyholder of this plan, which covers approximately 84 thousand individuals, may choose any dentist; if they opt for a professional who is not part of the accredited network, the policyholder may require reimbursement, in accordance with the contracted plan.

- Small and Medium-sized Entities: serves companies with from 10 to 99 individuals, including employees and their dependents;

01.01 - IDENTIFICATION

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

• Corporate: serves companies with over 100 individuals, including employees and their dependents.

Medical assistance products comply with the procedures established by ANS and offer benefits which vary according to the contracted plan.

As part of its insurance risk management, Porto Seguro Saúde uses the increasing number of policyholders of its health insurance plans to negotiate contracts at favorable prices with service providers. Porto Seguro Saúde seeks to evaluate the quality and conformity of medical services provided by its network through surveys conducted with policyholders, audits and interviews with doctors and policyholders in hospitals and other medical service units.

General medical procedures do not require the prior approval of Porto Seguro Saúde. However, services such as hospitalization and time of hospitalization require previous approval by the medical audit team of Porto Seguro Saúde. This medical audit team also reviews retrospectively the procedures carried out by each health service provider, with the purpose of analyzing conformity and quality. The review of procedures usually involves the review of medical examinations and types of treatment and procedures carried out in an event.

The process used by management to determine certain actuarial assumptions consists mainly of identifying the risk to be insured, the object to be insured, and the availability of data necessary for establishment of tariffs and underwriting.

Subsequently, management determines the actuarial assumptions relevant to the risk to be insured and the origin and reference of data to be used for establishment of tariffs and underwriting.

Accordingly, for the Health Portfolio, management used the following for actuarial assumptions:

- Company's database to determine prices of insured risks and underwriting criteria, the use of externally-generated data not being necessary;

- Database comprising information on a period of at least 24 months, as from the analysis base date;

01.01 - IDENTIFICATION

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

- For sensitivity test purposes, management uses as actuarial assumptions the Portfolio Risk Premium, H+Ob (Hospital and Obstetric Coverage) plan Risk Premium, A+H+Ob (Outpatient, Hospital and Obstetric Coverage) plan Risk Premium, Claim Expenses and Dental Plan Portfolio Risk Premium due to their impact on insurance risk pricing.

Notwithstanding, management can maintain and/or decrease Portfolio Risk Premiums, as a result of improvements in the pricing processes. Accordingly, sensitivity tests were made with percentages lower than those used in the other Portfolios.

The results of the sensitivity tests, net of tax effects, are the following:

	Impact on profit or loss and equity			
	September 2010		June 2010	
Actuarial assumptions	Gross of reinsurance	Net of reinsurance	Gross of reinsurance	Net of reinsurance
Increase of 2.5% in portfolio risk premium	(4,767)	(4,767)	(4,748)	(4,748)
Increase of 2.5% in risk premium of H+Ob plans	(24)	(24)	(24)	(24)
Increase of 2.5% in risk premium of A+H+Ob plans	(4,709)	(4,709)	(4,690)	(4,690)
Increase of 2.5% in claim expense risk	(268)	(268)	(267)	(267)
Increase of 2.5% in dental plan risk premium	(74)	(74)	(74)	(74)

H+Ob* Hospital and Obstetric Coverage
A+H+Ob* Outpatient, Hospital and Obstetric Coverage

4.1.3 Life insurance without a surviving beneficiary clause

The Company offers individual and corporate life insurance plans, with several types of coverage.

Corporate life insurance plans are acquired by small, medium and large entities as part of benefit plans offered to their employees.

The sale of individual insurance plans is based on the consulting sale concept, in order to protect the customer and family.

In this segment, underwriting is centralized, which ensures the proper and consistent application of policies and procedures concerning the product. The Company is constantly seeking the improvement of the risk selection and pricing processes.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

The Company's policies include traditional life insurance, which are available with a wide range of additional coverage, such as death and disability by accident. Life insurance products sold by Porto Seguro offer as the main coverage indemnifications which will be paid in case of death of the policyholder, in exchange for payment of monthly premiums, sold on a simple allocation or coverage capital allocation basis.

The process used by management to determine certain actuarial assumptions consists mainly of identifying the risk to be insured, the object to be insured, the maximum amount at risk and the availability of data necessary for establishment of tariffs and underwriting.

Subsequently, management determines the actuarial assumptions relevant to the risk to be insured and the origin and reference of data to be used for establishment of tariffs and underwriting.

Accordingly, for the Life Portfolio, management uses the following for actuarial assumptions:

- Database comprising information on a period of at least 24 months, as from the analysis base date;

- Use of Biometric Tables approved by current legislation that represent the best estimate of mortality for insured lives;

- For sensitivity test purposes, management uses as actuarial assumptions the portfolio risk premium, death coverage risk premium, additional coverage risk premium, claim expenses and amounts insured due to their impact on risk pricing.

The results of the sensitivity tests, net of tax effects, are the following:

	Impact on profit or loss and equity			
	September 2010		June 2010	
Actuarial assumptions	Gross of reinsurance	Net of reinsurance	Gross of reinsurance	Net of reinsurance
Increase of 5% in portfolio risk premium	(1,947)	(1,958)	(1,939)	(1,951)
Increase of 5% in death coverage risk premium	(647)	(1,307)	(645)	(1,302)
Increase of 5% in other coverage risk premium	(647)	(651)	(645)	(649)
Increase of 5% in claim expenses	(132)	(133)	(132)	(132)
Increase of 5% in insured amount	(3,145)	(3,054)	2,202	2,139

4.1.4 Property, civil liability and credit insurance

The Company is the leader in the Brazilian residential insurance segment and offers property insurance (except for automobile insurance), which are divided into seven groups:

1. **Property** – (i) Residential Insurance - residential insurance offers protection against damage to properties and their contents. Porto Seguro, Azul Seguros and Itaú Seguros de Auto e Residência issue policies for residential and vacation homes. Indemnification criteria are based on replacement up to the limit established in the policy. In some cases, a mandatory policyholder portion (POS) is applied, that is, a co-participation in losses to be indemnified in the case of a claim. Coverage amounts can be adjusted at the policyholder's request. Premiums are established in accordance with Porto Seguro's database, reflecting the experience relating to underwriting and pricing policy obtained over the past 12 months, including renewals. The main underwriting requirements refer to the state of use and condition of the property. Discount on premiums may be given based on the policyholder's profile, experience with the Company, whether the property is located in a condominium or not and whether there is a security system monitored by specialized companies. (ii) Corporate Insurance - corporate insurance of Porto Seguro is designed for companies, public entities, independent contractors and owners of non-residential properties. It is focused on small and medium-sized industries, stores and services, ensuring protection against damages to property and its contents. In addition to the basic coverage (fire, explosion, smoke damage and aircraft crashes), the product offers the option to contract additional coverage, such as: electrical damages, theft of assets, loss of profit, civil liability, among others. Premiums are established on an individual basis in accordance with Porto Seguro's database and the activity involved, for example: offices, retail stores, restaurants, drugstores, schools, etc. Discounts are given on policies comprising several places, groups of coverage, establishments located in shopping malls and with installed monitoring alarms. (iii) Condominium Insurance - Porto Seguro offers special plans for residential, commercial and mixed-use buildings and hotels. In addition to the basic coverage (fire, explosion, smoke damage and aircraft crashes), the product offers the option to contract additional coverage, such as: electrical damages, civil liability of the building manager, civil liability of the condominium, employee accident, theft of condominium assets, flood, among others.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

For corporate insurance, the Company also makes available a network of services/benefits that can be contracted by the policyholder, such as locksmith service, hydraulic and electric repairs, IT check-up and repairs of white goods (gas oven, refrigerator and microwave oven).

2. **Major Risks** – (i) Multi risk - offers insurance to companies, public entities, independent contractors and owners of non-residential properties of the large industrial, commercial and service segments. In addition to providing protection against damage to the property and its contents, in accordance with the basic coverage (fire, explosion, smoke damage and aircraft crashes), the product provides the option to contract additional coverage, such as electrical damages, theft of assets, loss of profit, civil liability, among others. In this group, the Company makes available insurance for car dealers, destined to automobile stores (car dealers or multibrand car stores) and also for hotels, motels and lodges - which covers the assets of the establishment and of its guests. (ii) Engineering Risks - Porto Seguro Engineering Risks provides security in construction, expansions or refurbishment. It covers risks relating to construction, including fire, error in execution, larceny and robbery, damages caused to third parties, etc.

   For Major Risks insurance, the Company also makes available a network of services/benefits that can be contracted by the policyholder, such as locksmith service, hydraulic and electric repairs, IT check-up and repairs of white goods (gas oven, refrigerator and microwave oven).

3. **Mass market insurance** – (i) Micro-insurance - this group includes micro-insurance that is sold through third parties. Porto Seguro operates in the extended guarantee line, which is sold in stores of electronic devices and housewares (department stores). Insurance for loss or theft of a card is also available, which ensures the payment of the bill to the third-party. (ii) Porto Real Estate Office - sold through real estate offices or real estate managers, this insurance covers leased residential and non-residential properties.

4. **Rural (Agribusiness)** – This provides agricultural insurance, covering hailstorm damages to fruits (plum, atemoya, kaki, fig, guava, apple, mango, nectarine, pear, peach and grape) and vegetables (eggplant, cucumber and tomato), and diseases (citrus canker and citrus greening disease) for citrus fruits (orange, lemon and

tangerine). Insurance premiums can be subsidized by federal and state governments to farmers who contract agricultural insurance in up to 100% of the total, and the payment is made directly to the Company.

5. **Contractual Obligation Guarantees (GOC)** - This plan is offered by Porto Seguro to indemnify losses caused by the non-compliance with contracts. It is used in connection with requirements of public agencies or private companies, such as in the case of public bids or contract guarantee.

6. **Lease Guarantee Deposit** - Porto Seguro Rental is the lessor's guarantee deposit insurance destined to real estate owners, real estate offices and tenants, replacing the guarantor and other guarantees. It ensures to the real estate owner the receipt of rentals and charges, in the case of non-payment by the tenant. The insurance also has the Porto Seguro Services: free-of-charge services for maintenance of real estate in case of repairs.

7. **Other Lines** – (i) Civil Liability - the Company operates with the following types of insurance, among others: civil liability in service rendering in third-party properties, civil liability in surveillance operations, civil liability in civil construction / assembling and disassembling. (ii) Sundry Risks - this covers damages resulting from external causes to small, medium and large equipment. The Company currently insures portable equipment, such as semi-pro or professional cameras and camcorders, notebooks, smartphones and iPads. Movable equipment (only used in the urban zone) comprises tractors, backhoe loader, forklifts, among others. (iii) Events - destined to individuals and corporate entities which provide services relating to events, in the organization, promotion or presentation, and it can also be contracted by the final customers.

Property insurance contract risks are reinsured through several types of reinsurance contracts, such as reinsurance of excess of liability of damages, excess of damages and/or portion. The type and retentions of the risk and other technical variables of this product are determined based on characteristics of each product and the availability in the local and foreign reinsurance market.
The process used by management to determine certain actuarial assumptions consists mainly of identifying the risk to be insured, the object to be insured, the maximum amount at risk and the availability of data necessary for establishment of tariffs and underwriting.

(All amounts in thousands of reais unless otherwise indicated)

Subsequently, management determines the actuarial assumptions relevant to the risk to be insured and the origin and reference of data to be used for establishment of tariffs and underwriting.

Accordingly, for the property risk, civil liability, financial risks and rural risks portfolios, management uses the following for actuarial assumptions:

- The Company's database to determine prices of insured risks and underwriting criteria, the use of externally-generated data not being necessary, except for Rural Risks and Financial Guarantees, since they require statistical experience of reinsurance companies that provide protection in these portfolios;

- Database comprising information on a period of at least 24 months, as from the analysis base date;

- The occurrence of claims from policies with high amounts insured and/or the occurrence of several claims arising from the same event may increase significantly the amount of average claims and/or frequency of claims of portfolios under analysis and, therefore, the Company acquired reinsurance protection, which also includes protection against catastrophe risk.

- For sensitivity test purposes, management uses the actuarial assumptions below, due to their impact on risk pricing.

The results of the sensitivity tests, net of tax effects, are the following:

Actuarial assumptions	Impact on profit or loss and equity			
	September 2010		June 2010	
	Gross of reinsurance	Net of reinsurance	Gross of reinsurance	Net of reinsurance
Increase of 5% in severity of lessor's guarantee deposit claims	(1,982)	(1,977)	(1,974)	(1,969)
Increase of 5% in frequency of lessor's guarantee deposit claims	(1,982)	(1,977)	(1,974)	(1,969)
Decrease of 10% in expenses with settlement and/or regulation of claims in property risks	1,534	1,452	1,528	1,447
Decrease of 5% in property risk premium	3,643	3,450	3,628	3,436

4.1.5 Transportation

Porto Seguro Transportation offers products that meet specific needs of shippers (owners of goods) and highway transport companies, in accordance with the company's size and characteristics of the goods transported.

Products designed for cargo owners:

• More simple transports: destined to micro and small companies, the premiums are determined based on the type of merchandise, can be paid in installments and does not require communication of shipments, which is the great advantage of the product.

• National Transport - registered shipments: this coverage is available to companies operating in various segments, where the policyholder informs shipments through the electronic registration system (via Internet) and pays the premium in monthly installments, based on origin and destination of the transport.

• International Transport: insurance for import or export made by air, water or land. The policyholder has appropriate coverage for transportation risks and depending on the negotiated sales conditions may contract specific insurance (coverage for one sole shipment) or insurance for registered shipments.

Products designed for road transport companies:

• Civil liability of the road transport company (RCTR-C): this insurance ensures the payment of reimbursements due to material damages to assets or goods pertaining to third parties under the carrier's responsibility in case of accidents caused by collision, rollover, ramming, overturning, fire or explosion of the transport vehicle.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

• Optional civil liability - disappearance of goods (RCF-DC): with the purpose of protecting the transport companies, this coverage ensures the indemnification of losses and damages to transported goods, in case of robbery or disappearance of cargo. It can only be contracted if the policyholder already has the RCTR-C insurance offered by the Company.

• Unified / Total Transports: this insurance includes in one sole policy the RCTR-C and RCF-DC coverage and the possibility of contracting other additional coverage. The cost is calculated based on the region of origin and destination of each transport, charged through monthly bills.

The process used by management to determine certain actuarial assumptions consists mainly of identifying the risk to be insured, the object to be insured, the maximum amount at risk and the availability of data necessary for establishment of tariffs and underwriting.

Subsequently, management determines the actuarial assumptions relevant to the risk to be insured and the origin and reference of data to be used for establishment of tariffs and underwriting.

Accordingly, for the transport portfolio, management uses the following for actuarial assumptions:

- Company's database to determine prices of insured risks and underwriting criteria, the use of externally-generated data not being necessary;

- Database comprising information on a period of at least 24 months, as from the analysis base date;

- The occurrence of claims from policies with high amounts insured and/or the occurrence of several claims arising from the same event may increase significantly the amount of average claims and/or frequency of claims of portfolios under analysis and, therefore, the Company acquired reinsurance protection, which also includes protection against catastrophe risk.

The results of the sensitivity tests, net of tax effects, are the following:

Actuarial assumptions	Impact on profit or loss and equity			
	September 2010		June 2010	
	Gross of reinsurance	Net of reinsurance	Gross of reinsurance	Net of reinsurance
Increase of 10% in frequency of claims	(2,219)	(2,219)	(2,211)	(2,211)
Increase of 8% in claim expenses	(372)	(372)	(370)	(370)
Increase of 12% in claim expenses	(558)	(558)	(555)	(555)
Decrease of 15% in recovery of salvages	(9)	(9)	(9)	(9)
Decrease of 9% in revenues from reimbursement	(10)	(10)	(5)	(5)
Simulation of an atypical and major event, not yet observed by the Company, covered by Reinsurance and related to the risk of Robbery of Cargo	(2,541)	(813)	(2,702)	(865)

4.1.6 Pension plan and life insurance with a surviving beneficiary clause

Currently, Porto Seguro Vida e Previdência sells pension plans to individuals and corporate entities, exclusively of the PGBL and VGBL types, offering guarantees against risk of death and disability, including options for income payment to spouses and children.

The sale of these insurance plans is based on the consulting sale concept, in order to plan retirement and protect the customer and family. These contracts transfer significant insurance and financial risk to the Company and were classified as insurance contracts, in accordance with IFRS.

The Company assumes insurance risk in pension plan contracts due to the possibilities of additional benefits, to be paid to participants. The characteristics of these possibilities are the following: the risk of the policyholder living more than the period estimated at the beginning of the contract; the commitment of paying a return on financial assets linked to future contingent payment of benefits to participants as income; or the possibility of paying lump-sum and/or annuity amounts, due to events covered by guarantees of death and/or disability, sold as a complement and option for pension plans. In addition, the Company provides the non-discretionary credit of gains on financial assets which are higher than those established in contract.

The traditional plans, with guaranteed profitability, are no longer sold by the Company; however, there are contracts still in effect under these conditions. Financial guarantees included in these contracts affect the future cash flows of payments of benefits to participants,

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

where the Company uses the Asset Liability Management (ALM) model for acquisition and maintenance of assets and analysis and mitigation of financial and insurance risk for contracts in effect.

The main characteristic of this model is the reinvestment of contributions paid by participants in assets linked to the contractual obligations, with term and return compatible with the pattern of future benefit payments. The Company's insurance and financial risk management takes into consideration the maintenance levels of current and future costs for payment of benefits, as well as revenues from services charged from the participants, to cover these costs. It is worth mentioning that these plans have redemption options that may be exercised by the customer at any time. This enables the Company to constantly evaluate the respective persistence levels based on past experience, taking into consideration this study in the acquisition of financial assets, avoiding possible adverse effects and maintaining appropriate cash levels to meet all future contractual obligations.

Section 4.2 below presents the Company's liquidity analysis based on the ALM model used for insurance and financial risk management of these contracts. The process used by management to determine actuarial assumptions consists mainly of identifying the insurance risk and the availability of data necessary for establishment of tariffs and underwriting.

Subsequently, management determines the actuarial assumptions relevant to the risk to be insured and the origin and reference of data to be used for establishment of tariffs and underwriting.

Accordingly, for the pension plan portfolio, management used the following for actuarial assumptions:

- Biometric Tables approved by current legislation that represent the best estimate of mortality and/or survival for insured lives;

- An interest rate that is equal to or lower than the Brazilian base interest rate;

- Database comprising information on a period of at least 36 months, as from the analysis base date;

4.2 Financial risk management

The Company is exposed to financial risks associated with its investment portfolio. In order to mitigate these risks, the ALM time model is used, in addition to considering the regulatory requirements and economic environment in which the Company operates and the financial assets are invested. This model is aligned with the analysis requirements established by IFRS and the capital management economic concept necessary to ensure solvency and availability of cash for the operation.

Financial risk management comprises the following categories: a) market risk, which is associated with the possibility of incurring losses due to variations in market prices of positions maintained in the portfolio; b) liquidity risk, which is related to possible lack of cash to cover the Company's future obligations; c) credit risk, associated with the possibility of non-performance by a counterparty on a contract as established between the parties.

The Company's risk management policy has the purpose of ensuring that appropriate limits are respected to avoid losses derived from price variations which may adversely impact the results. According to this policy, the Company seeks to diversify investments in several markets, in order to obtain capital returns during a sustainable period, instead of concentrating exposures to risk factors that may adversely affect the business value.

The Company uses a series of sensitivity analyses and stress tests for financial risk management. The results of these analyses are used to mitigate risks and understand the impact on the Company's profit or loss and equity under normal and stress conditions. These tests take into consideration historical scenarios and market condition scenarios estimated for future periods and the results are used in the planning and decision-making processes, as well as in identification of specific risks originated from the financial assets and liabilities held by the Company.

(1) Estimated cash flows based on management's judgment and studies of the persistence of pension plan policyholders who have the redemption option, expiration of risk of insurance contracts, and the best management expectation as to the date of settlement of estimated claims. This flow was estimated up to the expected date of payment.

(2) Floating-rate financial assets and liabilities were distributed in these tables based on contractual cash flows, and balances were projected based on the expected interest curve and rates of the Interbank Deposit Certificate (CDI) and foreign exchange rates disclosed for future periods on or near the settlement dates (rates were estimated for periods in which there were none available on a date near to the estimated date for settlement of the liability).

(3) See Note 14.

The Company's risk management policy has the purpose of ensuring that appropriate limits are respected to avoid losses derived from variations in prices which may adversely impact the results. According to this policy, the Company seeks to diversify investments in several markets, in order to obtain capital returns instead of concentrating exposures to risk factors that may adversely affect the business value.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

Certain contracts with service providers and others are periodically adjusted based on inflation or general consumer price indexes.

The Company uses a series of sensitivity analyses and stress tests for financial risk management. The results of these analyses are used to manage risks and understand the impact on the Company's profit or loss and equity under normal and stress conditions. These tests take into consideration historical scenarios and market condition scenarios estimated for future periods and the results are used in the decision-making and planning processes, as well as in identification of specific risks originated from the financial assets and liabilities held by the Company.

The table below presents a sensitivity analysis of financial risks of the Company's financial assets and liabilities, taking into consideration management's best estimate of a reasonable expected change in these variables and possible impacts on the Company's profit or loss and equity.

September 2010

The sensitivity analyses in this section were estimated based on probable scenarios. It is worth mentioning that there are various limitations as to alignment or not between the expected changes and the future actual results (realized or not); these results may differ significantly from the results estimated based on the sensitivity analyses presented in these financial statements.

4.3 Credit risk management

Credit risk is the risk of incurring a loss on financial and reinsurance assets, due to the total or partial non-performance of the counterparty under a contract signed with the Company and its subsidiaries. Management has policies to ensure that limits or certain exposures to credit risk are not exceeded, implemented through monitoring and compliance with the credit risk policy for individual or collective financial assets which share similar risks and taking into consideration the financial capacity of the counterparty to meet its obligations and dynamic market factors. The Company also issues lessor's guarantee deposit insurance contracts to its policyholders, who are subject to significant credit risk due to the characteristics of this product.

Credit risk limits are determined based on the counterparty's credit rating, in order to ensure that the overall exposure to credit risk is managed and controlled in compliance with the established policies. When certain counterparties are not rated by recognized credit rating

agencies, management uses market information and experience to classify them under a credit risk rating; these situations, however, are widely discussed and evaluated before the Company purchases certain assets, and restrictions are placed on operating areas, in order to limit credit risk exposure in the case of assets acquired from counterparties which are not rated.

The table below presents all financial and reinsurance assets held by the Company and its subsidiaries distributed by credit rating disclosed by well-known rating agencies. "Unrated" assets comprise mainly receivables from policyholders who do not have individual credit ratings. The maximum credit risk exposure originated from premiums to be received from policyholders is significantly reduced since, in certain circumstances, the coverage of claims may be canceled (according to Brazilian legislation), if the premiums are not paid by the due dates. The policy on issuance of insurance contracts takes into consideration all the aspects and policies of quality in acceptance of insurance risk, as well as a stringent analysis of the policyholders' credit risk, in which the Company confirmed the policyholders' credit profile through credit agencies for individuals and corporate entities and historical data on unusual situations and payments of premiums from policyholders derived from renewal of contracts. Based on this approach, liquidity risk management considers the collection of premiums of all contracts issued to reinvest these funds, and consistency with the capital management policy, to be an essential part of the operating cycle.

4.4 Capital risk management

The Company carries out its capital risk management based on a centralized management model, with the main purpose of meeting the requirements of minimum regulatory capital for the insurance and financial segments, in accordance with capital requirements defined by CNSP, SUSEP, ANS and the Brazilian Central Bank (BACEN). The Company's strategy and model consider both "regulatory capital" and "economic capital" in accordance with the capital risk management view adopted by the Company and its subsidiaries.

The capital risk management strategy is to continue to maximize the Company's capital value through optimization and diversification of available capital sources. The decisions about allocation of capital are made as part of the periodical review of the Company's strategic planning.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

The main objectives of the Company's capital management are: (i) maintain levels of capital sufficient to meet the minimum regulatory requirements determined by CNSP, SUSEP, ANS and BACEN; (ii) maintain or increase the Company's credit rating over time and related risk credit strategy; and (iii) optimize returns on capital for the shareholders.

During the periods presented and prior periods, the Company's capital exceeded the minimum regulatory requirements.

4.4.1 Additional capital based on the underwriting risk of insurance companies

On December 26, 2006 SUSEP disclosed the CNSP Resolutions No 155 and No 158, which established the capital allocation rules of underwriting risks of the various insurance lines, and also established the criteria of the regulatory agency concerning a possible capital deficiency of insurance companies, to be effective as from January 2008.

In December 2007 SUSEP issued CNSP Resolution No 178 and SUSEP Circular Letter No 355 revoking Resolution No 158 and increasing the period for attaining the minimum capital from three to four years.

For the mentioned Resolutions, the following concepts will be considered:

- Minimum required capital: capital amount which the insurance company should maintain, at any time, to guarantee its operations, equivalent to the sum of the Base Capital and the Additional Capital;

- Base capital: fixed amount of capital which the insurance company should maintain, at any time. The Base Capital to guarantee the insurance companies' operations in the whole country is R$ 15,000,000.00 (fifteen million reais).

- Additional capital: variable amount of capital which the insurance company should maintain, at any time, to guarantee the risks inherent to its operations.

4.4.2 Summary of the report describing the risk management structure

The risk management structure comprises principles, policies, responsibilities, procedures and actions. It includes market, liquidity, operating and credit risks.

To mitigate these risks, the structure is compatible with the nature and complexity of products, services, processes and systems of the subsidiaries Portopar and Portoseg. Accordingly, management reviews this strategy, as well as its policies, annually, or earlier if extraordinary events or adverse situations occur.

The complete report describing risk management is available at Porto Seguro's corporate website, at the area relating to investments - Porto Seguro Investments and Portoseg.

5 Operating Segments

The Company offers to individuals, corporations and public entities in Brazil and Uruguay, through its direct and indirect subsidiaries, a wide range of insurance products, including:

(i) Insurance - automobile, health, property, transportation, financial risks, personal and rural;

(ii) Financial and consortium of assets - financing for the acquisition of assets and services for working capital and credit card transactions, management of consortium groups of assets and property;

(iii) Services - services for the protection and electronic surveillance of properties and vehicles;

(iv) Private pension plan - pension plans and similar products.

The main revenue items in the operating segments are:

- Premiums earned - earned premiums comprise insurance premiums issued, net of cancellations, refunds, and premiums ceded to other insurance companies;

- Pension plan contributions - the pension plan contributions arise from the monthly contributions made by each participant in the pension plans;

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

- Service rendering - service rendering derives from several segments in which the Company operates;

- Lending operations - income from lending operations represents the interest charged on the loans, financing and credit cards used in revolving credit arrangements or payment of bills in installments.

Segments were grouped by products, in accordance with the classification used in the financial statements and in the Executive Board's decision-making process.

The criteria for allocation of assets and liabilities to each segment were the proportion to total revenue (sum of all earned premiums, pension plan contributions, service rendering and lending operations). The Company does not have any significant concentration of revenue by customer or economic group.

Breakdown of available-for-sale securities comparing the amortized cost value to the market value

	September 2010			June 2010		
	Amortized cost	Market value adjustment	Market value	Amortized cost	Market value adjustment	Market value
Private securities	353,877	1,813	355,690	270,851	1,780	272,631
Financial Treasury Bills (LFTs)	268,000	(707)	267,293	434,642	(508)	434,134
National Treasury Note (NTNs) - series C	-	-	-	23,503	-	23,503
Investment in IRB (i)	8,428	-	8,428	8,428	-	8,428
Other investments (i)	1,921	-	1,921	1,995	-	1,995
Total	632,226	1,106	633,332	739,419	1,272	740,691

(i) Investments stated at cost of acquisition, less any impairment, when applicable. The Company opted for the exemption permitted by IAS 39, whereby the investment was stated at cost because the difference between the minimum and maximum quotations for this asset in the market is very wide and disperse.

6.2 Financial assets by level

IFRS 7 requires the disclosure by level, relating to measurement at fair value, based on the following levels:

• Quoted prices (unadjusted) in active markets for identical assets (level 1).
• Classified in this category when discounted cash flow or another methodology is used to determine the asset price based on market data and when all this data can be observed in the open market (level 2).
• Asset which is not based on data observed in the market and the Company uses internal assumptions to determine its methodology and classification (level 3).
The table below shows all the Company's financial assets measured at fair value:

	September 2010			June 2010		
	Level 1	Level 2	Consolidated	Level 1	Level 2	Consolidated
At fair value through profit or loss						
Open funds

(i) Repurchase agreements backed by government securities are included in level 2.

The market value of government securities is based on the "unit market price" disclosed by the Brazilian Association of Financial and Capital Markets Entities (ANBIMA) at the balance sheet dates, and the government securities related to Seguradora Líder are valued at PU 550 of SELIC disclosed daily by BACEN.

Investment fund quotas are valued based on the price of the quota disclosed by the fund's manager at the balance sheet dates.

Private securities are valued at market through the same pricing methodology adopted by the manager of investment funds included in the portfolios.

The fair value of instruments traded in an active market (such as trading and available-for-sale instruments) is based on quoted market prices at the balance sheet date. The quoted price used for financial assets held by the Company is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The Company uses several methodologies and assumptions based on current market conditions at the reporting date.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

The Company uses market prices quoted for similar instruments to estimate the fair value of long-term debts for disclosure purposes. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. Fair value of interest swaps is calculated as the present value of estimated future cash flows.

6.3 Derivative financial instruments

1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(b) Notes and credits receivable

	Consolidated	
	September 2010	**June 2010**
Credit card transactions (ii)	630,454	572,888
Provision for impairment of receivables	(3,152)	(2,864)
	627,302	570,024

(ii) Refer to receivables from holders of credit cards not yet due or not billed. These amounts are classified as credits with loan characteristics with a corresponding entry in payables to merchants.

6.7 Impairment of financial assets

Changes in the provision for impairment for all classes of financial assets are shown in the table below:

	Consolidated				
	Loans	**Financing**	**Cards**	**Premiums receivable**	**Total**
At June 30, 2010	**3,925**	**10,723**	**50,271**	**17,833**	**82,752**
Provisions for the period	246	668	303	670	1,887
Reversal of provisions for impairment	(388)	(1,955)	(4,604)	(124)	(7,071)
At September 30, 2010	**3,783**	**9,436**	**45,970**	**18,379**	**77,568**
Total credits individually significant classified as impaired	**1,009**	**2,246**	**11,383**	**-**	**14,638**

Impairment losses were recorded in 'Other operating expenses', in the statement of income. The release of the present value adjustment is included in 'Revenues from lending operations', in the statement of income. Amounts recorded in provisions as impairment losses are usually written off when management no longer expects the recovery of the financial asset.

COFINS	-	-	50,959	20,195
	12,423	-	80,442	32,159

(*) The provision for tax losses was reversed, considering the estimate presented in the technical study on expectation of tax credit realization.

(i) FINSOCIAL

The subsidiary Porto Seguro filed a claim for refund of overpayment of amounts collected by and paid to the Federal Government as FINSOCIAL. The lawsuit resulted in a final favorable judgment and the Federal Government was ordered to refund the overpayment in ten installments, through a bond to pay court-ordered debt. Four installments were released up to date. The installments 5 through 8 were attached for PIS purposes. The subsidiary is pleading the release of these installments.

1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(ii) National Institute of Social Security (INSS) - independent contractors

The subsidiary Porto Seguro filed a claim for refund of overpayment because of the 20% contribution to the National Social Security Institute (INSS) levied on payments to independent contractors, day workers, and officers. The lawsuit resulted in a final favorable judgment and the Federal Government was ordered to refund the overpayment in ten installments, through a bond to pay court-ordered debt. Up to date, seven installments were released, and the installment 7 was attached for PIS purposes. The subsidiary awaits release of installment 8, and installment 9 was paid.

(iii) Supplementary State Income Tax (AIRE)

The subsidiaries Porto Seguro, Porto Seguro Vida and Porto Consórcio filed a claim for refund of overpayment because of the amounts collected by and paid to the State of São Paulo as AIRE. The lawsuit resulted in a favorable judgment, and the State Government was ordered to refund the overpayment in ten installments, through a bond to pay court-ordered debt. Six installments were released up to date.

(b) Taxes and contributions payable

	Parent		Consolidated	
	September 2010	June 2010	September 2010	June 2010
Current liabilities				
IOF on insurance premiums	-	-	116,404	108,358
Contributions to INSS and FGTS	13	13	16,815	15,514
Income tax	418	318	53,895	34,048
Social contribution	151	115	41,481	26,957
Withholding Income Tax (IRRF)	12	11	5,766	6,671
Services Tax (ISS) withheld at source	-	-	4,386	3,526

Other (i)	-	-	10,672	11,223
	596	459	256,581	213,192

(i) Refers mainly to taxes of the subsidiary Porto Seguro Uruguay of R$ 5,662 (June 2010 - R$ 5,463).

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(c) Deferred income tax and social contribution - non-current

Deferred taxes are calculated on income tax and social contribution losses and the temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements. The currently enacted rates of 25% for income tax and 15% for social contribution are used to calculate deferred taxes.

Deferred tax assets are recognized to the extent that it is probable that future taxable profit will be available to offset temporary differences and/or tax losses, considering projections of future results based on internal assumptions and future economic scenarios, which may, therefore, suffer changes.

Long-term receivables	**Consolidated**	
Temporary differences (i)	**September 2010**	**June 2010**
Provision for legal obligations – COFINS	370,924	358,185
Provision for legal obligations – PIS and INSS	51,930	50,434
Provision - other (ii)	89,702	67,056
Provision - civil contingencies	6,638	6,586
	519,194	482,261

(i) Tax credits are recorded in assets and were determined according to current legislation. Management, based on estimated tax results and other factors, expects the realization of tax credits according to the following assumptions:

(a) Provision for legal obligations: realized considering lawsuits basically involving tax claims, which realization estimate depends on the outcome of the lawsuit;

(b) Provision for impairment of trade receivables: realized depending on the legal deductibility terms, in accordance with Law No 9430/96, after legal measures for collection have been exhausted. Possible recoveries of or reduction in the loss are recorded as decreases in the provision and are excluded for tax purposes;

01.01 - IDENTIFICATION

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(c) Provision for contingent liabilities: realized considering lawsuits basically involving labor claims, which realization estimate depends on the progress of the lawsuit.

Should all lawsuits be concluded, in accordance with a technical study, the credits would be totally realized within 5 years.

(ii) Refers mainly to provision for impairment of receivables and labor claims.

Long-term liabilities — **Consolidated**

(b) Negative goodwill

On November 28, 2003, the Company acquired the ownership control of Azul Seguros, with a negative goodwill of R$ 23,831. In accordance with IFRS 3 (see Note 37 (g)), residual negative goodwill originated from a transaction which qualifies as a business combination should be recognized as a gain immediately in the statement of income.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

Intangible assets arising from acquisition of insurance contracts (DAC) are comprised as follows:

	Consolidated	
	September 2010	**June 2010**
Automobile	503,648	484,564
Property	80,797	77,101
Financial risks	27,439	26,100
Personal	18,363	17,244
Health	1,225	1,172
Transportation	738	893
Liability	800	642
Other	4,628	1,706
	637,638	609,422

DAC and intangible assets directly related to insurance contracts are considered in the adequacy test of insurance liabilities, in accordance with IFRS 4, in which the net amount of the percentage charged on insurance contracts for administrative expenses is reduced by the DAC (see accounting policy 2.17.2).

12.2 Leased assets

The Company leases several assets (mainly third-party properties through operating lease contracts) to conduct its business in the branches located in various regions of Brazil, where the Company and its subsidiaries are lessees of the properties. Total future minimum rentals payable in accordance with these contracts is shown in the table below:

Future minimum rentals payable	September 2010	June 2010
- Up to 1 year	11,079	10,023
- 1 to 5 years	25,677	18,485
- Over 5 years	-	-
Total	**36,756**	**28,508**

13 Investment Properties

The Company has certain commercial properties which are leased to third parties through contracts classified as operating lease contracts, according to IAS 17. The Company uses the cost model (IAS 40) to record these assets. The tables below present the changes in carrying amount of these assets and other significant financial information for investment properties:

	Consolidated	
	September 2010	June 2010
At the beginning of the period	9,100	9,144
Depreciation	(45)	(44)
Transfers	-	-
Fair value of investment properties at end of period	**9,055**	**9,100**
Cost	12,066	12,066
Accumulated depreciation	(3,011)	(2,966)

(All amounts in thousands of reais unless otherwise indicated)

	Consolidated			
	2010		2009	
	3rd Qtr.	Jan to Sep	3rd Qtr.	Jan to Sep
Income from rentals - investment properties	587	1,764	577	1,741

Investment properties are depreciated on the straight-line method, using an annual depreciation rate of 2%. Most of rental contracts carry an option to renew for 4 years and rentals are adjusted by the IGP-M/FGV index.

Since the revaluation was carried out on a date relatively close to that of the preparation of these financial statements, management believes the fair value of these assets does not differ significantly from the values adopted as deemed cost.

Investment properties were revalued by independent and qualified external appraisers on December 22, 2006. Revaluations were made based on prices of assets in an active market where possible. When market prices were not available, the independent appraisers used projections of discounted cash flows. The revaluation amount was used as deemed cost for adoption of IFRS, in accordance with voluntary exemption permitted by IFRS 1.

Total future minimum rentals receivable in accordance with these contracts is shown in the table below:

Future minimum rentals receivable	September 2010	June 2010
- Up to 1 year	2,188	2,188
- 1 to 5 years	4,393	4,940
Total	**6,581**	**7,128**

(All amounts in thousands of reais unless otherwise indicated)

The table below shows the development of claims payments. The line "Cumulative excess (deficiency)" reflects the difference between the last recalculated reserve amount and the reserve amount originally established. The purpose of this table is to show the consistency of the Company's' policy related to reserves for claims.

Reserves and Payments – gross of reinsurance (in R$ millions)

18 Financial Liabilities

Fund raising and borrowings and onlendings mature as follows:

	September 2010	June 2010
	Total	Total
Funds from acceptance and issue of securities	86,849	59,419
Loans (i)	-	42,910
Interbank deposits	188,247	193,080
Total	**275,096**	**295,409**

(i) Refers to a contract denominated in US dollar at the nominal value of R$ 34,421 related to a derivative instrument to hedge against exchange risk exposure, whereby the effective cost remains linked to CDI rate variation, settled on 7/30/2010.

19 Contingent Liabilities and Legal Obligations – Tax and Social Security

The Company and its subsidiaries are parties to lawsuits involving tax contingencies and labor and civil claims. Provisions for losses arising from these lawsuits are estimated and periodically updated by management, based on the opinion of the Company's legal department and external legal advisors.

(i) The balances of the provisions constituted are as follows:

	Parent		Consolidated	
	September 2010	June 2010	September 2010	June 2010
a) Legal obligations	58,216	57,132	1,814,574	1,748,320

COFINS

With the enactment of Law No 9718/98, insurance and pension plan companies, among others, became subject to Social Contribution on Revenues (COFINS) levied on their revenues, at the rate of 3% as from February 1999, and at the rate of 4% after the enactment of Law No 10684/03. The subsidiaries Porto Seguro, Porto Seguro Vida, Porto Seguro Saúde, Azul Seguros and ISa+r challenged this taxation in court, as well as the tax basis established by Law No 9718/98, which considered billings to be equivalent to gross revenue.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

In June 28, 2006, in a lawsuit filed by the subsidiaries Porto Seguro and Porto Seguro Vida, the Federal Supreme Court (STF) rendered a final decision, disallowing the levy of COFINS on revenues other than those from services provided and sales of goods. Accordingly, in October 2006, the subsidiaries reversed the portion of the provisions related to COFINS on financial revenues. Considering the appeals filed by the Federal Government, which are pending judgment, the subsidiaries maintain the provisions on insurance premium revenues.

The lawsuit filed by Porto Seguro Saúde had an unfavorable outcome, against which the subsidiary filed special and extraordinary appeals, currently pending judgment. The amount discussed in this lawsuit has their enforceability suspended in view of judicial deposits.

In the lawsuit filed by Azul Seguros, the subsidiary currently awaits decision on the request for clarification of the decision which denied the appeal filed by the subsidiary in the recordings of the aforementioned extraordinary appeal.

In the lawsuit filed by the subsidiary ISa+r, the appeal filed against the decision which deemed the claim groundless is pending judgment.

With the enactment of Law No 11941, of May 27, 2009, which revoked Law No 9718/98 in relation to the increase of PIS and COFINS calculation basis, the subsidiary Porto Seguro Saúde, as from May 2009, and the subsidiary ISa+r, as from December 2009, no longer provide the amounts related to COFINS on other revenues.

PIS

The subsidiaries Porto Seguro, Porto Seguro Vida, Porto Seguro Saúde and Azul Seguros are challenging the levy of the Social Integration Program (PIS) contribution, introduced under the provisions of Constitutional Amendments 01/94, 10/96 and 17/97 and Law No 9718/98, changing the tax basis and the rate, which began to be calculated on gross operating revenue.

In the lawsuit discussing the Constitutional Amendment 01/94, all provision for the period discussed by the subsidiary Porto Seguro was reversed, and the statute of limitations was recognized in court. The lawsuit filed by the subsidiary Porto Seguro Vida is in court of appeals awaiting judgment. The subsidiary opted for the tax debt installments program in November 2009; therefore, it partially discontinued the lawsuit in relation to 1995. The lawsuit filed by the subsidiary Azul Seguros is pending judgment of appeal.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

In the lawsuit discussing the Constitutional Amendment 10/96, in relation to the subsidiary Porto Seguro, the provision related to the period from March/99 to May/99 was reversed, and the statute of limitations was recognized. The subsidiaries Porto Seguro and Porto Seguro Vida await judgment as to special and extraordinary appeals filed by the subsidiaries and the Federal Government, due to decision partially favorable. The amounts have their enforceability suspended in view of judicial deposits. In the lawsuit filed by the subsidiary Azul Seguros, the decision deems all claims valid. Currently, the appeals filed by the Federal Government await judgment.

In the lawsuit discussing the Constitutional Amendment 17/97, the subsidiaries Porto Seguro and Porto Seguro Vida await judgment of special and extraordinary appeals filed by the subsidiaries and the Federal Government, due to decision partially favorable. In the lawsuit filed by the subsidiary Azul Seguros, the decision deemed the claims valid. Currently the lawsuit is pending judgment of special and extraordinary appeals filed by the Federal Government.

In the lawsuit discussing the Law No 9718/98 filed by the subsidiaries Porto Seguro and Porto Seguro Vida, the decision deemed the claims valid and determined that the recordings return to the lower court for a new judgment, which was published on February 28, 2008, recognizing that the subsidiaries may pay PIS without the increase in calculation basis introduced by article 3, paragraph 1, of Law No 9718/98, in effect as from the base period of 2000. Currently, the appeals filed by the subsidiaries are pending judgment, and the amounts discussed are being deposited in court. In the lawsuit of Porto Seguro Saúde, the decision deemed the claim groundless. Special and extraordinary appeals were filed and, currently, are awaiting judgment. The amounts have their enforceability suspended in view of judicial deposits. In the lawsuit filed by the subsidiary Azul Seguros, the decision deemed the claims partially valid. The Federal Government filed special and extraordinary appeals against such decision, which are pending judgment.

In the lawsuit filed by the subsidiary ISa+r, the appeal filed against the decision which deemed the claim groundless is pending judgment.

With the enactment of Law No 11941 on May 27, 2009, paragraph 1 of article 3 of Law No 9718/98 was revoked in relation to the PIS and COFINS calculation basis increase. Accordingly, as from May 2009, the subsidiaries Porto Seguro, Porto Seguro Vida, Porto

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

Seguro Saúde and Azul Seguros, and the subsidiary ISa+r as from December 2009, no longer provide the amounts related to PIS on other revenues.

PIS and COFINS - revenues from interest on capital

The Company has filed a lawsuit to challenge the legality and constitutionality of sole paragraph of article 1 of Decree No 5164/04, which addresses the levy of PIS and COFINS on amounts received as interest on capital. This lawsuit was deemed groundless and the Company has filed an appeal on the merits of the case, which is pending judgment. The enforceability of the amounts involved is suspended in view of judicial deposits.

National Institute of Social Security (INSS) - independent contractors

The subsidiaries Porto Seguro and Portopar are discussing in court social security contribution amounts, and requesting the suspension of this contribution on the compensation of independent contractors, proprietors and day workers, under Law No 9876/99, since they understand that the additional 2.5% payment, instituted only for financial institutions, is improper. The claims were deemed groundless and, currently, the lawsuits are in the appeals stage pending judgment. In the lawsuits of the subsidiaries Porto Vida and Porto Saúde, the provision related to January 2010 was reversed, due to statute of limitations.

In the lawsuit filed by the subsidiary Azul Seguros, the amounts related to the contribution are being deposited in court for tax suspension purposes. The subsidiary filed an appeal on the merits of the case against the unfavorable decision, and is awaiting judgment. With the enactment of Law 11941/2009, the subsidiary enrolled in REFIS in November 2009 for payment of INSS on amounts paid to insurance brokers, and currently awaits approval of partial discontinuation of this lawsuit, with entitlement to the benefits established in the fiscal amnesty. The lawsuit referring to the additional 2.5% payment is still in progress.

Social Contribution on Net Income
(deductibility from the Corporate Income
Tax (IRPJ) calculation basis)

The subsidiaries Porto Seguro, Porto Seguro Vida and Porto Seguro Saúde are challenging the legality and constitutionality of Law 9316/96, which prohibited the deduction of social contribution on net income from the Corporate Income Tax (IRPJ) calculation basis.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

The lawsuit filed by the subsidiaries Porto Seguro and Porto Seguro Vida obtained a favorable sentence and an unfavorable decision. The subsidiaries filed special and extraordinary appeals, which are currently pending judgment. The enforceability of the tax is suspended in view of the interlocutory injunction up to the end of judgment of the appeals.
In the lawsuit filed by Porto Seguro Saúde, the appeal filed by the Federal Government was deemed valid. Currently, the subsidiary awaits judgment of request for clarification of decision. The amounts under discussion are being deposited in court.

Social contribution (rate difference - 9% to 15% of CSLL)

The subsidiaries Porto Seguro, Porto Seguro Vida, Porto Seguro Saúde, Azul Seguros, Portoseg and Portopar have been challenging the legality and constitutionality of Provisional Measure No 413/2008 which increased the social contribution rate for financial institutions and insurance companies from 9% to 15%.

With the enactment of Law 11941/2009, the subsidiaries opted for the debt payment in installments program in November 2009. The requests for discontinuation of the lawsuits, with entitlement to the benefits established in the fiscal amnesty, were approved and the subsidiaries are currently awaiting the court decision as to the amount to be paid.

Deductibility of taxes and contributions from the IRPJ and CSLL calculation bases

The subsidiaries Porto Seguro, Porto Seguro Vida, Porto Seguro Saúde and Portopar are challenging the constitutionality of the law which prohibited the deduction of taxes and contributions being discussed in court from the IRPJ and CSLL calculation bases on the accrual method.

In the lawsuit filed by the subsidiaries Porto Seguro and Porto Seguro Vida, the action was deemed groundless, denying the injunctions pleaded. The subsidiaries are currently awaiting judgment of the appeals.

The lawsuits filed by the subsidiary Porto Seguro Saúde were deemed groundless, against which special and extraordinary appeals pending judgment were filed.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

The lawsuits filed by the subsidiary Portopar were deemed groundless. The subsidiary awaits judgment of the appeals.

Employee Food Benefit Program (PAT)

The subsidiaries Porto Seguro, Porto Seguro Vida, Porto Seguro Saúde, Porto Consórcio and Azul Seguros filed for a writ of mandamus in order to discuss in court the limit of maximum cost per meal established by a non-statutory regulation and the change in system described in Law 6321/76, which established the deduction of expenses with PAT from the IR calculation basis (taxable income), not directly from IR payable, thus not considering the IR surtax.

The lawsuits filed by the subsidiaries Porto Seguro, Porto Seguro Vida, Porto Seguro Saúde and Porto Consórcio were deemed valid. Currently, the appeals filed by the Federal Government await judgment.

In the lawsuit filed by the subsidiary Azul Seguros, the preliminary injunction was rejected. The subsidiary filed an appeal on the merits of the case against such decision, which is pending judgment.

Since the issuance of Declaratory Act 13/2008 by the National Treasury Legal Department, the subsidiaries no longer provide for the amounts under discussion as to the maximum limit allowed for deduction of meal costs.

Tax loss offset

The subsidiary Porto Seguro discussed provisions established by Law No 8981/95, exclusively as to the limitation of tax loss offset in 30% of adjusted profit, and deposited in court the related amount.

With the enactment of Law 11941/2009, the subsidiary opted for the debt payment in installments program in November 2009 and currently awaits approval of discontinuation of the lawsuits, with entitlement to the benefits established in the fiscal amnesty.

(b) Labor claims

The subsidiaries Porto Seguro, Porto Seguro Vida, Porto Seguro Saúde, ISa+r, Azul Seguros, Porto Seguro Proteção e Monitoramento, Porto Consórcio, Serviços Médicos and Portoseg are parties to various labor lawsuits. The most frequent claims refer to overtime, overtime effects and weekly remunerated rest period, termination pay, salary equalization and undue deductions.

In addition to the provisions recorded, there are other contingent liabilities, amounting to R$ 7,179, for which no provision is necessary, according to the expectations of the subsidiaries' legal advisors (possible loss).

(c) Civil claims

The subsidiaries Porto Seguro, Porto Seguro Vida, Azul Seguros, Porto Consórcio, Portoseg, Porto Seguro Saúde and ISa+r are parties to various civil lawsuits with several different objectives, directly or indirectly related to the subsidiaries' business.

In addition to the provisions recorded, there are other contingent liabilities, amounting to R$ 39,313, for which no provision is necessary, according to the expectations of the subsidiaries' legal advisors (possible loss).

20 Equity - Parent Company

(a) Share capital

At September 30, 2010, subscribed and paid-up share capital is R$ 1,870,000, comprising 327,641,730 common nominative book-entry shares, with no par value.

(b) Reserves

(i) Capital reserves

In November and December 2004, 6,881,216 shares were issued at the unit value of R$ 18.75, of which R$ 6.89 were allocated to the "Share premium" account, totaling R$ 47,412.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(ii) Legal reserve

The legal reserve, established through the appropriation of 5% of profit for the year, has the purpose of ensuring the integrity of capital, in accordance with article 193 of Law No 6404/76.

(iii) Statutory reserve

The reserve for capital maintenance of equity investments has the purpose of preserving the integrity of equity and the Company's investment in its subsidiaries and associates, avoiding the capital loss resulting from distribution of unrealized income. In each year, unrealized profit exceeding the amount allocated to the unrealized income reserve established by article 197 of Law No 6404/76 will be appropriated to this reserve.

(iv) Treasury shares and share repurchase program

On March 27, 2009 the Extraordinary General Meeting approved the cancellation of 1,293,600 common shares, with no par value, held in treasury up to February 2009, in the amount of R$ 23,462, already deducted from revenue reserves. After the cancellation the Company has 229,349,211 common shares.

On February 3, 2010 the Board of Directors approved a new share repurchase program, with the same conditions of the prior program, for a period of up to 365 days as from February 18, 2010 and the limit of 4,900,000 common shares, corresponding to 4.96% of the total shares of this class outstanding in the market, which is 98,699,841. To date, there was no repurchase.

(c) Dividends

Pursuant to the Company's by-laws, shareholders are entitled to receive minimum mandatory dividends of 25% of adjusted profit for the year. The payment of mandatory dividends can be limited to the amount of profit realized financially, under the terms of the law. The payment of interest on capital is imputed to the minimum mandatory dividends.

29 Related Parties

The commercial transactions between the Company and its subsidiaries are carried out under usual market prices and conditions, and have been eliminated on consolidation. The main transactions are the following:

(i) Administrative fees charged by the subsidiary Porto Seguro for the use of physical structure and personnel;
(ii) Rentals of buildings charged by the subsidiaries Porto Seguro and Porto Seguro Vida;
(iii) Rendering of health insurance services by the subsidiary Porto Saúde;
(iv) Rendering of monitoring services by the subsidiary Porto Seguro Proteção e Monitoramento;
(v) Agreement of apportionment of administrative costs of the subsidiary ISa+r with the companies of Itaú Unibanco Conglomerate, mainly due to the use of common structure and personnel expenses.
(vi) Rendering of portfolio management services contracted by the subsidiary Portopar.
(vii) Funding made by the subsidiary Portoseg with Itaú BBA.

30 Employee Benefits

(a) Pension plan

On October 1, 1994 Porto Seguro and the subsidiaries Porto Seguro Vida e Previdência, Porto Seguro Saúde, Porto Seguro Serviços Médicos, Porto Seguro Proteção e Monitoramento, Portopar, Portoseg, Crediporto and Porto Consórcio implemented a variable contribution pension plan for their employees, through Portoprev - Porto Seguro Previdência Complementar, a nonprofit, private pension fund.

Under this plan's regulations, the main funds are represented by contributions from the plan's sponsors and participants, and the yield on the related investments. Contributions made by participants vary from 1% to 6% of each participant's salary, and the sponsor's contribution corresponds to 100% of the participant's contribution.

At September 30, 2010, the entity had 2,769 (2,399 in 2009) active participants who contributed with a total of R$ 4,341 (R$ 3,274 in 2009).

(b) Other benefits

31 Business Combinations

On August 23, 2009, the Company signed an association agreement with Itaú Unibanco Holding S.A. ("Itaú Unibanco"), with the purpose of merging their residential and automobile insurance operations, as well as establishing an operational agreement with Itaú Unibanco for exclusive offer and distribution of residential and automobile insurance products to customers of the Itaú Unibanco network in Brazil and Uruguay ("Association").

On November 30, 2009, Porto Seguro S.A. and Itaú Unibanco approved the merger of Isar Holding Ltda. ("Isar Holding") into Porto Seguro S.A. Up to the merger, Isar Holding was the parent company of ISa+r, which received the assets and liabilities of Itaú Seguros S.A. related to residential and automobile insurance activities.

On the same date, the companies of the Itaú Unibanco Group became shareholders of Porto Seguro Itaú Unibanco Participações ("Psiupar"), to which all shares issued by Porto Seguro S.A. received due to the merger were transferred. Accordingly, Itaú Unibanco Group now holds approximately 43% of the capital of Psiupar and, indirectly, 30% of the capital of Porto Seguro S.A.

Porto Seguro S.A. now holds directly 100% of the capital of ISa+r.

Goodwill of R$ 347 million on acquisition is attributable to expected future profitability arising from the combination of the operations of the Company and ISa+r.

The table below summarizes the consideration paid and the amounts of assets acquired and liabilities assumed at fair value, recognized on the acquisition date (November 30, 2009), based on a report of independent appraisers.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

32 Other Information - Consolidated

(a) Insurance coverage

The insurance practices of the Company and its subsidiaries contemplate mainly the concentration of risks and their significance, and insurance coverage is considered sufficient by management taking into account the nature of operations. The insurance coverage is as follows:

		Amount insured	
		September	
Items	**Types of coverage**	**2010**	**2009**
Buildings	Any damage to buildings, installations and machines and equipment	166,574	188,103
Vehicles	Fire, theft and collision - optional civil liability	8,260	11,280
		174,834	199,383

(b) Subsequent event - interest on capital

On October 28, 2010, the Board of Directors approved the credit of interest on capital to shareholders, totaling R$ 113,200. Interest on capital corresponds to R$ 0.345499335 per share, the income tax on which will be withheld at the rate of 15%, except for shareholders who are provenly exempt. Interest on capital, net of withholding income tax, amounts to R$ 0.293674435 per share.

The credit approved will be recorded in the books on October 29, 2010, based on the shareholding position on that date; the payment date will be determined at the Ordinary General Meeting to be held on April 30, 2011.

36 Earnings per Share - Parent Company

Basic earnings per share of the Company for the periods presented is calculated by dividing the profit attributable to shareholders by the weighted average number of shares outstanding during the period, excluding shares held in treasury repurchased by the Company and classified as treasury shares in the financial statements under IFRS, as a deduction from the Company's equity. During the period, the Company did not have liability financial instruments convertible into shares of the Company or transactions that would generate a dilutive or anti-dilutive effect (as defined in IAS 33) on earnings per share. Accordingly, basic earnings per share for the period are the same as diluted earnings per share, in accordance with IAS 33. The calculation of basic earnings per share is shown in the table below:

	2010		2009	
	3rd Qtr.	Jan to Sep	3rd Qtr.	Jan to Sep
Profit for the quarter attributable to the shareholders of the Company	194,002	442,750	72,952	208,482
Weighted average number of shares outstanding during the period	327,642	327,642	229,673	229,673
Basic (and diluted) earnings per share - in R$	0.59	1.35	0.32	0.91

37 Disclosure on Transition to IFRS

The consolidated financial statements for the year ended December 31, 2010 are the first annual statements prepared in conformity with CPCs and IFRSs.

The Company adopted CPCs 37 and 43 and IFRS 1 for the preparation of these consolidated financial statements.

The parent company financial statements for the year ended December 31, 2010 are the first annual individual financial statements prepared in conformity with the new CPCs. The Company adopted CPCs 37 and 43 for the preparation of these financial statements.

Transition date is January 1, 2009. Management prepared the opening balance sheets according to the new CPCs and IFRSs on that date.

In preparing these financial statements, the Company applied the relevant compulsory exceptions and certain voluntary exemptions to full retrospective application.

In addition, the Company evaluated the applicability of retrospective exceptions established by IFRS 1. Based on this analysis, the Company applied the following mandatory exception:

Exemption for estimates - Estimates used in the preparation of these financial statements as at January 1, 2009 and December 31, 2009 are consistent with the estimates as at the same dates made in conformity with the accounting practices previously adopted in Brazil (former BR GAAP).

The other compulsory exceptions have not been applied as there were no significant differences with former BR GAAP:

. Derecognition of financial assets and financial liabilities; and
. Non-controlling interests.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

Voluntary exemptions and compulsory exceptions to retrospective application of IFRS standards used by the Company in the preparation of the consolidated financial statements

In the first-time adoption of IFRS in the preparation of the annual financial statements, the Company has the option of applying IFRS 1, which will be used with an unreserved statement of IFRS application. In general, IFRS 1 establishes the standards in respect of each one of the IFRS current accounting standards for the preparation of the first financial statements under IFRS. IFRS 1 grants limited exemptions to application of its requirements in specific areas where the cost to generate the information could exceed the benefits to the users of the initial financial statements. IFRS 1 also prohibits the retrospective application of certain IFRS accounting standards in some areas, mainly those in which the Company's judgment of situations in the past and after the knowledge of transactions that have already occurred are required. The Company's transition date to IFRS for the preparation of the complete and consolidated financial statements is January 1, 2009.

Exemptions used by management in the initial transition to IFRS are summarized below:

Business combinations that took place prior to the date of transition to IFRS

According to IFRS 1, business combinations that occurred prior to the transition date do not have to be revalued in conformity with IFRS 3-R (Business combinations). This exemption releases first-time adopters of IFRS from having to gather financial information which had not been obtained for business combinations with an acquisition date prior to the transition date. The Company applied the exemption of business combinations in IFRS 1 and, consequently, applied IFRS 3-R to recognize all business combinations that occurred after January 1, 2009.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

Cost or revaluation as deemed cost of fixed assets

According to IFRS 1, an entity may, at the date of transition to IFRS, measure an item of fixed assets at its cost value, or use the revaluation value of Property, Plant and Equipment (PP&E), which, as from this date, becomes the new cost of the asset. The Company used this IFRS 1 exemption and the revalued amount of fixed assets was used as the deemed cost at the date of transition to IFRS. Land and buildings were revalued up to December 31, 2007, based on evaluations dated December 22, 2006 carried out by independent appraisers. This cost was used as deemed cost in the adoption of IFRS as a voluntary exemption permitted by IFRS 1 for first-time adoption of IFRS.

Evaluation of insurance contracts

The Company adopted the requirements of IFRS 4, “Insurance Contracts”, which made it possible for certain accounting practices used in previous BR GAAP to remain unchanged, after meeting minimum requirements of the IFRS standards, such as the classification of contracts and the Liability Adequacy Test, as defined in IFRS 4, mandatory for the contracts that meet the definition of insurance contract under IFRS. Management adopted the transition provisions of IFRS 4, “Insurance Contracts”, to limit the disclosure of information on development of claims to those over the last five years.

Immediate recognition of accumulated actuarial gains or losses on defined benefit plans sponsored by the Company

The Company elected to cumulatively recognize all actuarial gains and losses as at January 1, 2009.

01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

In addition, the Company evaluated the applicability of retrospective exceptions established by IFRS 1. Based on this analysis, the Company did not have to apply any of these four exceptions:

- Write-off of financial investments
- Hedge accounting
- Use of estimates
- Non-controlling interests

(a) Accounting treatment of security devices

In the financial statements under BR GAAP, the expenses incurred with security devices (assets owned by the Company) were charged to profit or loss on the date on which they were incurred and installed. As from 2007, the Company started to defer the expenses incurred with security devices in accordance with IAS 16 in its financial statements under BR GAAP. For IFRS purposes, the security devices are recognized pursuant to IAS 16 (Property, Plant & Equipment) and depreciated over the economic useful life of this equipment, which approximates the average period the policyholder remains with the Company (36 months), directly related to the period over which future economic benefits will flow to the Company. Inventories pending deferral in the years prior to 2007 were fully deferred up to November 30, 2009; therefore this adjustment ceased to exist at December 31, 2009.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(b) Complementary Provision for Premiums (PCP)

In accordance with regulations of SUSEP, the Complementary Provision for Premiums (PCP) is recorded in order to supplement the Unearned Premium Reserve (PPNG), considering all the risks, issued or not, under the terms of current legislation. This provision is estimated based on the insurance line and its calculation basis is the initial and final date of the risk validity and the retained commercial premium. The amount of this provision, if positive, will be the difference between the average sum of the daily amounts for the month in which they are recorded and the recorded PPNG.

Although IFRS 4 permits the Company to continue to use excessive prudence in the measurement of insurance contracts at the date of transition to IFRS, which sometimes occurs under BR GAAP, on a consistent basis, according to IFRS the recording of provisions for potential losses arising from contracts not effective at the closing date of the balance sheet or provisions for equalization of risks for contracts whose risk has already expired is not allowed. Accordingly, the mentioned provision was reversed for IFRS purposes.

(c) Legal Obligation Reserve (POL)

In accordance with local regulations, the Legal Obligations Reserve (POL) for the life insurance portfolio is recorded for the purpose of covering a tariff adjustment not characterized as a deficiency in the existing contracts subject to this possibility, showing the use of excessive prudence in the evaluation of these contracts.

Under IFRS 4, an insurer does not need to change the accounting practices adopted under BR GAAP to eliminate effects arising from the use of excessive prudence in the measurement of insurance contracts. However, an insurer may change its BR GAAP accounting practices for insurance contracts only if this change makes the financial statements more relevant and not less reliable to the needs involved in the decision-making of the users of the financial statements. Consequently, management decided to change the accounting practice used in the calculation of the POL recorded for the life insurance portfolio to eliminate this excess of prudence in the measurement of the contracts.

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(d) Costs and revenues at the origination of transaction costs

Under BR GAAP the Company recognizes revenues from fees charged for the origination of credit transactions for customers and the costs related to these transactions directly in the statement of income for the period, on the date the credit is granted to customers.

IFRS requires the use of the effective interest method, where the effective interest rate is the rate that discounts the cash flows of future payments or receipts over the term of the contract. The Company included all the revenues, transaction costs and other premiums or discounts which will be paid or received between the parties to the contract and are an integral part of the effective interest rate (as required by IAS 39). Consequently, all transaction costs and revenues were considered in the calculation of the effective interest rate and deferred in accordance with IFRS standards.

(e) Reversal of proposed dividends exceeding the minimum mandatory dividend, pending approval by the General Meeting

Under BR GAAP dividends proposed by management are immediately accrued in the financial statements regardless of approval at the Annual Shareholders' Meeting.

Under IFRS, proposed dividends may only be recognized as liabilities and accrued if they meet the criterion of a present obligation under IAS 37 - Provisions, Contingent Liabilities and Contingent Assets. Consequently, considering that proposed dividends and interest on capital are usually approved at the Annual General Meeting in the year subsequent to the issue of the financial statements, for IFRS purposes only the minimum dividend provided for in the Company's by-laws is subject to accrual.

01.01 - IDENTIFICATION		
1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

(f) Reversal of goodwill on the acquisition of investments

In accordance with BR GAAP, up to December 31, 2008, goodwill originated from business combinations, based on expectation of future results, should be amortized.

According to IFRS 3 - Business Combinations, the goodwill originated from business combinations (as defined in the international standard) should not be amortized and should be evaluated for impairment on each reporting date, or when there is objective evidence (or indicators) that the test should be carried out.

On January 2, 2008 the Company acquired 100.00% of the capital of the subsidiary Integração, through the payment of R$ 5,000 (at market value). The shareholding of this subsidiary was transferred to the Company on January 2, 2008, when assets and liabilities at fair market value, totaling R$ 60, were assumed. The transaction was considered a business combination according to IFRS 3 with IFRS goodwill of R$ 4,940. The effect of the reversal of goodwill amortization recorded under BR GAAP during the year ended December 31, 2008 is included as a reconciliation item of equity.

(g) Reversal of negative goodwill on acquisition of investments

Under BR GAAP, negative goodwill is not amortized. This negative goodwill is only realized upon sale/write-off or extinguishment of the investment.

In accordance with IFRS 3 - Business Combinations, the negative goodwill recorded in the balance sheet of January 1, 2005 should be fully written-off and, therefore, the corresponding adjustment was made to the opening IFRS balance sheet against the retained earnings account. Negative goodwill (as defined in IFRS) does not meet the definition of a present obligation of IAS 37 - Provisions, Contingent Liabilities and Contingent Assets. Furthermore, IFRS 3 requires that the residual negative goodwill arising from a transaction that qualifies as a business combination (as defined in IFRS 3) be recorded as a gain directly in the statement of income for the year, after the revaluation and identification of the assets, liabilities and contingent liabilities of the acquired company and an evaluation of the cost of the business combination.

01.01 - IDENTIFICATION		
1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

The effect of the negative goodwill determined under BR GAAP in 2003 on the acquisition of the subsidiary Azul Seguros is included as a reconciliation item of equity. In 2010, this adjustment no longer exists, in accordance with current standards.

(h) Deferred taxes on IFRS adjustments

IAS 12 requires the recognition of deferred income tax and social contribution on all taxable or deductible temporary differences, except for deferred taxes arising from the initial recognition of goodwill, or the initial recognition of a liability or asset which does not qualify as a business combination and, at the transaction date, does not affect the statement of income or the profit (or loss) for tax purposes.

The deferred income tax and social contribution calculated on the IFRS adjustments were reflected in the reconciliation.

(i) Deferred taxes on land revaluation

Under BR GAAP, the provision for taxes on the Revaluation Reserve is not recorded for assets that will not be realized through depreciation, amortization or depletion, or without expected realization through write-off or sale.

Under IFRS, through SIC Interpretation 21, “Recovery of Revalued Non-depreciable Assets”, a deferred tax asset or liability arising from the revaluation of a non-depreciable asset, pursuant to IAS 16, ”Property, Plant and Equipment”, should be measured on the basis of the tax consequences that would follow from the recovery of the carrying amount of the asset through sale, regardless of the basis used to value it, and, consequently, deferred taxes should be recognized on the revaluation of non-depreciable assets.

The tax effect on the land revaluation was included as a reconciliation item of equity.

1 - CVM CODE	**2 - COMPANY NAME**	**3 - Federal Corporate Taxpayers' Registration Number (CNPJ)**
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

06.01 - Notes to the Quarterly Information
(All amounts in thousands of reais unless otherwise indicated)

(j) Non-controlling interests in subsidiaries

Under BR GAAP, the balance of non-controlling interests in subsidiaries is disclosed separately in liabilities, as an intermediary account between the deferred income account and equity.

IFRS, IAS 27, “Consolidated and separate financial statements”, and IAS 1, “Presentation of financial statements”, require the balance of non-controlling interests in subsidiaries to be presented as an integral part of equity in the consolidated IFRS financial statements. Consequently, the Company included the balance of non-controlling interests as a reconciliation item of equity to IFRS.

07.01 - Comments on Company Performance during the Quarter

Analysis of the Result for the Third Quarter of 2010 in Comparison to that of the Third Quarter of 2009 (Parent Company)

In the topics below, the expressions "in 2010" and "in 2009" refer to the balances and indices computed by the Company in the periods from **July 1 to September 30, 2010 and 2009**, respectively.

The results for the third quarter of 2010 presented the following performance in relation to the third quarter of 2009:

Equity in the Earnings of Investees

In 2010 the equity in the earnings totaled R$ 182.6 million, an increase of R$ 109.9 million or 151.2% over the amount of R$ 72.7 million in 2009. Excluding ISa+r, the equity in the earnings totaled R$ 118.6 million in 2010, an increase of R$ 45.9 million or 63.1% in relation to R$ 72.7 million in 2009.

General and Administrative Expenses

The general and administrative expenses of the Company totaled R$ 15.5 million in 2010, an increase of R$ 15.1 million over R$ 0.4 million in 2009, mainly due to the amortization of intangible assets arising from the acquisition of ISa+r, totaling R$ R$ 15.0 million.

Finance Income and Costs

- In 2010, finance income totaled R$ 11.0 million, an increase of R$ 10.2 million over R$ 0.8 million in 2009, arising mainly from the increase of average financial investments to R$ 345.9 thousand in 2010 in relation to the R$ 36.2 thousand in 2009, and the increase in effective interest rate from 2.21% in 2009 to 3.18% in 2010.

- In 2010, finance costs totaled R$ 41.0 thousand, a decrease of R$ 3.0 thousand or 6.8% in relation to R$ 44.0 thousand in 2009. The variation is mainly due to the reduction of the liability related to the purchase of Integração.

Profit

In 2010 profit totaled R$ 194.0 million, an increase of 165.8% over R$ 73.0 million in 2009. Excluding ISa+r, profit totaled R$ 130.0 million in 2010, an increase of 78.1% over 2009.

In 2010, earnings per share was R$ 0.59 considering 327,642 shares; in 2009, earnings per share was R$ 0.32 considering 229,349 shares.

01.01 - IDENTIFICATION

07.01 - Comments on Company Performance during the Quarter

Analysis of the Result for the Period from January to September 2010 in Comparison to that of the Period from January to September 2009 (Parent Company)

In the topics below, the expressions "in 2010" and "in 2009" refer to the balances and indices computed by the Company in the periods from **January 1 to September 30, 2010 and 2009**, respectively.

The results for the period from January to September 2010 presented the following performance in relation to the period from January to September 2009:

Equity in the Earnings of Investees

In 2010 the equity in the earnings totaled R$ 438.1 million, an increase of R$ 234.7 million or 115.4% over the amount of R$ 203.4 million in 2009. Excluding ISa+r, the equity in the earnings totaled R$ 287.7 million in 2010, an increase of R$ 84.3 million or 41.5% in relation to R$ 203.4 million in 2009.

General and Administrative Expenses

The general and administrative expenses of the Company totaled R$ 47.3 million in 2010, an increase of R$ 45.8 million over R$ 1.5 million in 2009. The variation is mainly due to:

(i) the increase of R$ 0.6 million in outsourcing services related to the financial advisory in the merger of ISa+r; and

(ii) the amortization of intangible assets due to the acquisition of ISa+r, totaling R$ 44.9 million.

Finance Income and Costs

- In 2010, finance income totaled R$ 27.6 million, an increase of R$ 19.2 million or 228.6% over R$ 8.4 million in 2009, arising mainly from the increase of average financial investments to R$ 362.7 thousand in 2010 in relation to the R$ 100.7 thousand in 2009, offset by the decrease in effective interest rate from 8.34% in 2009 to 7.61% in 2010.

- In 2010, finance costs totaled R$ 108.0 thousand, a decrease of R$ 54.0 thousand or 33.3% in relation to R$ 162.0 thousand in 2009. The variation is mainly due to the reduction of the liability related to the purchase of Integração.

Profit

In 2010 profit totaled R$ 442.8 million, an increase of 112.4% over R$ 208.5 million in 2009. Excluding ISa+r, profit totaled R$ 292.4 million in 2010, an increase of 40.2% over 2009.

In 2010, earnings per share was R$ 1.35 considering 327,642 shares; in 2009, earnings per share was R$ 0.91 considering 229,349 shares.

12.01 - Comments on Consolidated Performance during the Quarter

Porto Seguro S.A. (the "Company") is a publicly-held corporation established to participate, as a shareholder or partner, in other domestic or foreign companies that operate in: (a) all types of insurance activities; (b) activities restricted to financial institutions and equivalent companies, including, without limitation, consortium management; (c) rendering of services and sale of equipment for electronic surveillance of asset protection systems; and (d) activities related or supplementary to insurance activities and the other activities described above.

The Company offers to individuals, families, companies and public entities in Brazil, through its direct and indirect subsidiaries, a wide range of insurance products, including:

i) Insurance - automobile, health, property, transportation, financial risks, personal and rural;

ii) Financial and consortium of assets - financing for the acquisition of assets and services for working capital and credit card transactions, management of consortium groups of assets and property;

iii) Services - services for the protection and electronic surveillance of properties and vehicles;

iv) Private pension plan - pension plans and similar products.

The main items in the financial statements of the subsidiaries are:

Total Revenues

Written Premiums

Written premiums comprise the following: (i) insurance premiums issued, net of cancellations, refunds, premiums ceded to other insurance entities and (ii) estimates of premium revenues for the policies in process of issuance.

Pension Plan Contributions

The pension plan contributions arise from the amount of the monthly contribution made by each participant of the pension plans.

Surveillance Services

Income from surveillance services arises from the protection and electronic surveillance services rendered by Porto Seguro Proteção e Monitoramento.

Provision of services – Franco

Revenues from rendering of technical services related to insurance brokerage and management.

Lending Operations

Revenues from lending operations represent the interest charged on the loans, financing and credit cards used in revolving credit or payment of bills in installments.

Other Revenues - Portopar

Other revenues arise from the management of funds administered by Portopar.

Net Finance Income

Net finance income arises from the investment of available funds, net of financial expenses.

Costs and Expenses

Reinsurance Premiums Ceded

The subsidiaries (Porto Seguro, Porto Seguro Vida, ISa+r and Azul Seguros) reinsure part of their risks with IRB - Brasil Resseguros S.A., ceding reinsurance mainly to: (a) reduce the net risk related to individual risks; (b) mitigate the effects of individual losses; (c) stabilize the underwriting results; and (d) increase the Company's underwriting capacity.

Changes in Technical Reserves

The change in technical reserves basically consists of: a) expense with the constitution of an unearned premium reserve; (b) expense with the constitution of a reserve for unvested pension plan benefits; and (c) income with the reversal of these reserves.

Retained Claims

Retained claims comprise the expenses of the subsidiaries with indemnities and the regulation and settlement of claims, net of recoveries of reinsurance and coinsurance, salvages and reimbursement.

Amortization of deferred acquisition costs

Amortization of deferred acquisition costs refer to the commissions that the subsidiaries pay to the brokers, expenses of subsidiaries with the sponsorship of campaigns and cost allowances they provide to the brokers, as well as selling expenses related to the other products and services.

12.01 - Comments on Consolidated Performance during the Quarter

- *Automobile Segment - Porto Seguro*: written premiums in the automobile segment totaled R$ 760.7 million in 2010, an increase of R$ 16.9 million or 2.3% over R$ 743.8 million in 2009, which arises from (i) the increase of 1.3% in the quantity of items issued in the quarter and (ii) the increase of 0.9% in the average premium. The fleet insured in September 2010 totaled 1,807.6 thousand vehicles, an increase of 6.1% in relation to 1,704.4 thousand in September 2009.

- *Automobile Segment - Azul Seguros:* written premiums in the automobile segment totaled R$ 243.7 million in 2010, an increase of R$ 43.2 million or 21.5% over R$ 200.5 million in 2009, which arises from the increase of 25.7% in the quantity of items issued in the quarter, partially offset by the 3.3% reduction in the average premium. The fleet insured in September 2010 totaled 729.7 thousand vehicles, an increase of 24.2% in relation to 587.4 thousand in September 2009.

- *Health Segment* – written premiums in the health segment totaled R$ 186.1 million in 2010, an increase of R$ 22.6 million or 13.8% in relation to R$ 163.5 million in 2009, which arises from the increase of 20.0% in the number of lives insured, from 379.5 thousand in September 2009 to 455.4 thousand in September 2010, partially offset by the 3.1% reduction in the annual average premium.

- *Personal Segment* – written premiums in the personal segment totaled R$ 85.7 million in 2010, an increase of R$ 15.3 million or 21.7% in relation to R$ 70.4 million in 2009, which arises from the increase of 15.0% in the number of lives insured, from 2,688.0 thousand in September 2009 to 3,090.0 thousand in September 2010, and the 8.2% increase in the annual average premium.

Income from VGBL Contributions and Premiums – Pension Plan

- Pension plan contributions and VGBL premiums totaled R$ 66.9 million in 2010, an increase of R$ 12.0 million or 21.9% in relation to R$ 54.9 million in 2009, which arises from the increase of 9.9% in the annual average contribution. The number of participants of the pension plan increased 6.9%, totaling 139.9 thousand in September 2010 in relation to 130.9 thousand in September 2009.

Provision of Services - Monitoramento

- Revenues from electronic surveillance services totaled R$ 15.3 million in 2010, a decrease of R$ 0.9 million or 5.6% in relation to R$ 16.2 million in 2009, which arises from the discontinuation of one of the operations, partially offset by the 17.4% increase in average revenue and the 16.4% increase in the number of new insured clients to 1,746 in 2010 in relation to 1,500 in 2009.

12.01 - Comments on Consolidated Performance during the Quarter

Provision of Services - Consórcio

- Revenues from consortium management services totaled R$ 34.4 million in 2010, an increase of R$ 4.7 million or 15.8% in relation to the R$ 29.7 million in 2009. The number of consortium shares managed increased 12.2%, to 60.9 thousand in September 2010 from 54.3 thousand in September 2009.

Lending Operations

- Revenues from lending operations totaled R$ 42.6 million in 2010, an increase of R$ 4.3 million or 11.2% in relation to R$ 38.3 million in 2009, which arises mainly from the 24.2% increase in new lending operations, from R$ 36.4 million in 2009 to R$ 45.2 million in 2010. The portfolio of lending operations managed decreased 5.2%, from R$ 448.1 million in September 2009 to R$ 424.7 million in September 2010.

Other Revenues

- The revenues of Portopar arising from financial management totaled R$ 8.6 million in 2010, an increase of R$ 5.8 million or 207.1% in relation to R$ 2.8 million in 2009, arising mainly from the increase of 96.3% in the revenues from fund management, which went from R$ 2.7 million in 2009 to R$ 5.3 million in 2010, and from the inclusion of a new source of revenue from portfolio management, totaling R$ 0.9 million in 2010.

Reinsurance Premiums Ceded

Expenses with reinsurance premiums ceded totaled R$ 48.1 million in 2010, an increase of R$ 34.0 million or 241.1% over the R$ 14.1 million in 2009.

Changes in the Expenses with Technical Reserves

Expenses with technical reserves varied as follows:

	3rd quarter		**Variation - %**
Technical Reserves (R$ Million)	**2010**	**2009**	**2009 -2010**
Unearned premium reserve	125.0	127.6	(2.0)

12.01 - Comments on Consolidated Performance during the Quarter

Amortization of deferred acquisition costs

In 2010, amortization of deferred acquisition costs amounted to R$ 388.8 million, an increase of R$ 112.7 million or 40.8% over the R$ 276.1 million recorded in 2009. Excluding ISa+r, amortization of deferred acquisition costs in 2010 amounted to R$ 305.9 million, an increase of R$ 29.8 million or 10.8% over R$ 276.1 million in 2009.

In 2010, amortization of deferred acquisition costs - insurance amounted to R$ 376.9 million, an increase of R$ 111.8 million or 42.2% over the R$ 265.1 million recorded in 2009. Excluding ISa+r, amortization of deferred acquisition costs - insurance in 2010 amounted to R$ 293.9 million, an increase of R$ 28.8 million or 10.9% over R$ 265.1 million in 2009.

In 2010, the percentage on earned premiums was 20.4%, against 21.3% in 2009, a reduction of 0.9 percentage point. Excluding ISa+r, the percentage on earned premiums is 20.8%, a reduction of 0.5 percentage point in relation to 2009.

Administrative and Tax Expenses

The Company's administrative expenses totaled R$ 356.4 million in 2010, an increase of R$ 111.7 million or 45.6% over the R$ 244.7 million in 2009, mainly due to:

(i) increase of R$ 46.7 million or 38.5% in personnel expenses due to the increase of 5.0% from the collective wage agreement and the increase of some 28.1% in the number of employees;

(ii) increase of R$ 28.0 million or 52.7% in expenses with facilities and operations, due to the business expansion;

(iii) increase of R$ 23.0 million or 66.8% in expenses with outsourced services; and

(iv) the amortization of intangible assets arising from the acquisition of ISa+r, totaling R$ 15.0 million.

Excluding ISa+r, administrative expenses totaled R$ 314.2 million in 2010, an increase of R$ 69.5 million or 28.4% over the R$ 244.7 million in 2009, mainly due to the following:

(i) increase of R$ 25.1 million or 20.7% in personnel expenses due to the increase of 5.0% from the collective wage agreement and the increase of some 14.2% in the number of employees;

(ii) increase of R$ 16.3 million or 47.5% in expenses with outsourced services; and

(iii) the amortization of intangible assets arising from the acquisition of ISa+r, totaling R$ 15.0 million.

01.01 - IDENTIFICATION

12.01 - Comments on Consolidated Performance during the Quarter

Tax expenses totaled R$ 50.2 million in 2010, an increase of R$ 11.4 million or 29.4% over the amount of R$ 38.8 million in 2009. Excluding ISa+r, tax expenses totaled R$ 42.2 million in 2010, an increase of R$ 3.4 million or 8.8% over R$ 38.8 million in 2009.

In 2010, the percentage of tax and administrative expenses of the insurance companies over earned premiums was 17.8%, a decrease of 1.7 percentage point in relation to the 19.5% in 2009. Excluding ISa+r, the percentage of tax and administrative expenses totaled 19.8% in 2010, an increase of 0.3 percentage point in relation to 2009.

Finance Result

Finance income totaled R$ 283.1 million in 2010, an increase of R$ 117.3 million or 70.7% in relation to R$ 165.8 million in 2009. Excluding ISa+r, finance income totaled R$ 206.3 million in 2010, an increase of R$ 40.5 million or 24.4% in relation to R$ 165.8 million in 2009 due to:

(i) In 2010, income from financial investments totaled R$ 214.2 million, an increase of R$ 98.1 million or 84.5% in relation to the R$ 116.1 million in 2009, mainly as a result of the increase in effective rate from 2.71% in 2009 to 3.11% in 2010 and of the 60.8% increase in average financial investments to R$ 6,887.5 million in 2010 in relation to the R$ 4,284.1 million in 2009. Excluding ISa+r, income from financial investments totaled R$ 159.2 million in 2010, an increase of R$ 43.1 million or 37.1% in relation to the R$ 116.1 million in 2009, which is mainly due to the increase in effective rate from 2.71% in 2009 to 3.23% in 2010, and to the increase of 15.0% in average financial investments to R$ 4,928.8 million in 2010 over the R$ 4,284.1 million in 2009.

Income from financial investments (excluding Porto Seguro Vida e Previdência) totaled R$ 156.1 million in 2010, an increase of R$ 85.6 million or 121.4% in relation to the R$ 70.5 million in 2009, which is mainly due to the increase in effective rate from 2.30% in 2009 to 2.89% in 2010, and to the increase of 76.2% in average financial investments to R$ 5,401.4 million in 2010 over the R$ 3,065.2 million in 2009.

(ii) the R$ 19.2 million or 38.6% increase in other finance income, which totaled R$ 68.9 million, in relation to the R$ 49.7 million in 2009, mainly as a result of the increase of R$ 20.7 million in insurance operations to R$ 56.6 million in 2010 in relation to the R$ 35.9 million in 2009. Excluding ISa+r, the other finance income totaled R$ 47.1 million in 2010, a decrease of R$ 2.6 million or 5.2% in relation to R$ 49.7 million in 2009.

Finance costs totaled R$ 76.9 million in 2010, an increase of R$ 26.4 million or 52.3% in relation to R$ 50.5 million in 2009. Excluding ISa+r, finance costs totaled R$ 71.9 million in 2010, an increase of R$ 21.4 million or 42.4% in relation to R$ 50.5 million in 2009.

Other Operating Income and Expenses

- Other operating income totaled R$ 147.4 million in 2010, an increase of R$ 75.6 million or 105.3% over the R$ 71.8 million in 2009. This variation is mainly due to: (a) the increase in revenues from policy costs of R$ 57.7 million or 114.0%; and (b) the increase in other income related to credit card transactions of R$ 10.6 million.

- Other operating expenses totaled R$ 113.3 million in 2010, an increase of R$ 35.5 million or 45.6% over the R$ 77.8 million in 2009. This variation is mainly due to: (a) the increase in expenses with provision for credit risk of R$ 26.1 million or 287.2%; (b) the increase in expenses with risk inspection and preventive actions of R$ 2.8 million or 26.9%; and (c) the increase in expenses with bonus of R$ 1.8 million or 20.4%.

Other Operating Income and Expenses - Excluding ISa+r

- Other operating income totaled R$ 105.7 million in 2010, an increase of R$ 33.9 million or 47.2% over the R$ 71.8 million in 2009. This variation is mainly due to: (a) the increase in revenues from policy costs of R$ 14.0 million or 27.7%; and (b) the increase in other income related to credit card transactions of R$ 10.6 million.

- Other operating expenses totaled R$ 82.4 million in 2010, an increase of R$ 4.6 million or 5.9% over the R$ 77.8 million in 2009. This variation is mainly due to the increase in expenses with bonus of R$ 4.7 million or 52.7% and to the increase in expenses with risk inspection and preventive actions of R$ 1.9 million or 18.3%.

IRPJ (Corporate Income Tax) and CSLL (Social Contribution on Net Income)

The expenses with IRPJ and CSLL totaled R$ 112.4 million in 2010, an increase of R$ 70.9 million or 170.8% over the R$ 41.5 million in 2009. The effective rates of IRPJ and CSLL in 2010 and 2009 were 32.5% and 35.6%, respectively.

12.01 - Comments on Consolidated Performance during the Quarter

Profit

In 2010 profit totaled R$ 194.0 million, an increase of 165.8% over R$ 73.0 million in 2009. Excluding ISa+r, profit totaled R$ 130.0 million in 2010, an increase of 78.1% over 2009.

In 2010, earnings per share was R$ 0.59 considering 327,642 shares; in 2009, earnings per share was R$ 0.32 considering 229,349 shares.

Combined Index - Insurance

The combined index (retained claims, amortization of deferred acquisition costs, administrative and tax expenses compared to premiums earned) was 94.4% in 2010, a decrease of 4.8 percentage points over the 99.2% in 2009. The variation is mainly due to the decrease of: 2.2 percentage points in claims ratio, 1.7 percentage point in administrative and tax expenses and 0.9 percentage point in amortization of deferred acquisition costs.

The combined index, which also considers other operating income and expenses, was 93.6% in 2010, representing a decrease of 7.0 percentage points in relation to the 2009 index, which was 100.6%.

The amplified combined index, which also considers the finance result, was 85.7% in 2010, a decrease of 5.6 percentage points in relation to the index of 91.3% in 2009.

Combined Index - Excluding ISa+r

The combined index (retained claims, amortization of deferred acquisition costs, administrative and tax expenses compared to premiums earned) was 95.5% in 2010, a decrease of 3.7 percentage points over the 99.2% in 2009. This index varied mainly as a result of the decrease of 3.5 percentage points in claims ratio, 0.5 percentage point in amortization of deferred acquisition costs, offset by the increase in administrative and tax expenses of 0.3 percentage point.

The combined index, which also considers other operating income and expenses, was 95.3% in 2010, representing a decrease of 5.3 percentage points in relation to the 2009 index, which was 100.6%.

The amplified combined index, which also considers the finance result, was 88.1% in 2010, a decrease of 3.2 percentage points in relation to the index of 91.3% in 2009.

12.01 - Comments on Consolidated Performance during the Quarter

- *Automobile Segment - Porto Seguro*: written premiums in the automobile segment totaled R$ 2,205.7 million in 2010, an increase of R$ 174.7 million or 8.6% over R$ 2,031.0 million in 2009, which arises from (i) the increase of 4.4% in the quantity of items issued in the period and (ii) the increase of 4.0% in the average premium. The fleet insured in September 2010 totaled 1,807.6 thousand vehicles, an increase of 6.1% in relation to 1,704.4 thousand in September 2009.

- *Automobile Segment - Azul Seguros:* written premiums in the automobile segment totaled R$ 660.4 million in 2010, an increase of R$ 137.8 million or 26.4% over R$ 522.6 million in 2009, which arises from the increase of 30.4% in the quantity of items issued in the period, partially offset by the 3.1% reduction in the average premium. The fleet insured in September 2010 totaled 729.7 thousand vehicles, an increase of 24.2% in relation to 587.4 thousand in September 2009.

- *Health Segment* – written premiums in the health segment totaled R$ 520.3 million in 2010, an increase of R$ 19.6 million or 3.9% in relation to R$ 500.7 million in 2009, which arises from the increase of 20.0% in the number of lives insured, from 379.5 thousand in September 2009 to 455.4 thousand in September 2010, partially offset by the 16.6% reduction in the annual average premium.

- *Personal Segment* – written premiums in the personal segment totaled R$ 231.2 million in 2010, an increase of R$ 18.9 million or 8.9% in relation to R$ 212.3 million in 2009, which arises from the increase of 15.0% in the number of lives insured, from 2,688.0 thousand in September 2009 to 3,090.0 thousand in September 2010, partially offset by the 4.0% reduction in the average premium.

Income from VGBL contributions and premiums – pension plan

- Pension plan contributions and VGBL premiums totaled R$ 181.6 million in 2010, an increase of R$ 23.8 million or 15.1% in relation to R$ 157.8 million in 2009, which arises from the increase of 5.1% in the annual average contribution. The number of participants of the pension plan increased 6.9%, totaling 139.9 thousand in September 2010 in relation to 130.9 thousand in September 2009.

Provision of Services - Monitoramento

- Revenues from electronic surveillance services totaled R$ 42.7 million in 2010, a decrease of R$ 2.9 million or 6.4% in relation to R$ 45.6 million in 2009, which arises from the discontinuation of one of the operations, partially offset by the 9.2% increase in average revenue and the 22.5% increase in the number of new insured clients to 3,675 in 2010 in relation to 3,000 in 2009.

12.01 - Comments on Consolidated Performance during the Quarter

Provision of Services - Consórcio

- The revenues from consortium management services totaled R$ 98.1 million in 2010, an increase of R$ 13.8 million or 16.4% in relation to the R$ 84.3 million in 2009. The number of managed consortium quotas increased 12.2% to 60.9 thousand in September 2010 from 54.3 thousand in September 2009.

Lending Operations

- Revenues from lending operations totaled R$ 124.1 million in 2010, an increase of R$ 25.2 million or 25.5% in relation to R$ 98.9 million in 2009, which arises mainly from the 17.6% increase in new lending operations, from R$ 109.3 million in 2009 to R$ 128.5 million in 2010. The portfolio of lending operations managed decreased 5.2%, from R$ 448.1 million in September 2009 to R$ 424.7 million in September 2010.

Other Revenues

- The revenues of Portopar arising from financial management totaled R$ 22.5 million in 2010, an increase of R$ 15.4 million or 216.9% in relation to R$ 7.1 million in 2009, arising from the increase of 129.0% in the revenues from fund management, which went from R$ 6.2 million in 2009 to R$ 14.2 million in 2010, and from the inclusion of a new source of revenue from portfolio management, totaling R$ 3.1 million in 2010, partially offset by the 66.7% reduction in service revenues – discounts.

Reinsurance Premiums Ceded

Expenses with reinsurance premiums ceded totaled R$ 59.3 million in 2010, an increase of R$ 33.9 million or 133.5% over the R$ 25.4 million in 2009.

Changes in the Expenses with Technical Reserves

Expenses with technical reserves were as follows:

	JAN TO SEP		**Variation - %**
Technical Reserves (R$ Million)	**2010**	**2009**	**2009 -2010**
Unearned premium reserve	139.0	204.0	(31.9)

12.01 - Comments on Consolidated Performance during the Quarter

Amortization of deferred acquisition costs

In 2010, amortization of deferred acquisition costs amounted to R$ 1,126.6 million, an increase of R$ 305.0 million or 37.1% over the R$ 821.6 million recorded in 2009. Excluding ISa+r, amortization of deferred acquisition costs in 2010 amounted to R$ 881.3 million, an increase of R$ 59.7 million or 7.3% over R$ 821.6 million in 2009.

In 2010, amortization of deferred acquisition costs - insurance amounted to R$ 1,091.4 million, an increase of R$ 300.7 million or 38.0% over the R$ 790.7 million recorded in 2009. Excluding ISa+r, amortization of deferred acquisition costs - insurance in 2010 amounted to R$ 846.0 million, an increase of R$ 55.3 million or 7.0% over R$ 790.7 million in 2009.

In 2010, the percentage on earned premiums was 20.1%, against 21.7% in 2009, a reduction of 1.6 percentage point. Excluding ISa+r, the percentage on earned premiums is 20.5%, a reduction of 1.2 percentage point in relation to 2009.

Administrative and Tax Expenses

The Company's administrative expenses totaled R$ 1,037.7 million in 2010, an increase of R$ 320.5 million or 44.7% over the R$ 717.2 million in 2009, mainly due to:

(i) increase of R$ 126.6 million or 34.9% in personnel expenses due to the increase of 5.0% from the collective wage agreement and the increase of some 28.1% in the number of employees;

(ii) increase of R$ 39.9 million or 22.2% in expenses with facilities and operations, due to the business expansion;

(iii) increase of R$ 55.3 million or 59.1% in expenses with outsourced services; and

(iv) the amortization of intangible assets arising from the acquisition of ISa+r, totaling R$ 44.8 million.

Excluding ISa+r, administrative expenses totaled R$ 898.1 million in 2010, an increase of R$ 180.9 million or 25.2% over the R$ 717.2 million in 2009, mainly due to:

(i) increase of R$ 61.4 million or 16.9% in personnel expenses due to the increase of 5.0% from the collective wage agreement and the increase of some 14.2% in the number of employees;

(ii) increase of R$ 40.4 million or 43.2% in expenses with outsourced services; and

(iii) the amortization of intangible assets arising from the acquisition of ISa+r, totaling R$ 44.8 million.

12.01 - Comments on Consolidated Performance during the Quarter

Tax expenses totaled R$ 154.9 million in 2010, an increase of R$ 41.6 million or 36.7% over the amount of R$ 113.3 million in 2009. Excluding ISa+r, tax expenses totaled R$ 139.8 million in 2010, an increase of R$ 26.5 million or 23.4% over R$ 113.3 million in 2009.

In 2010, the percentage of tax and administrative expenses of the insurance companies over earned premiums was 18.1%, a decrease of 1.6 percentage point in relation to the 19.7% in 2009. Excluding ISa+r, the percentage of tax and administrative expenses totaled 20.1% in 2010, an increase of 0.4 percentage point in relation to 2009.

Finance Result

Finance income totaled R$ 733.7 million in 2010, an increase of R$ 199.5 million or 37.3% in relation to R$ 534.2 million in 2009. Excluding ISa+r, finance income totaled R$ 543.5 million in 2010, an increase of R$ 9.3 million or 1.7% in relation to R$ 534.2 million in 2009 due to:

(i) the R$ 144.0 million or 37.7% increase in income from financial investments, which totaled R$ 525.6 million in 2010 in relation to R$ 381.6 million in 2009, arising from the 58.9% increase in average financial investments to R$ 6,394.2 million in 2010, in relation to R$ 4,025.3 million in 2009, offset by the decrease in effective rate from 9.48% in 2009 to 8.22% in 2010. Excluding ISa+r, income from financial investments totaled R$ 392.2 million in 2010, an increase of R$ 10.6 million or 2.8% in relation to the R$ 381.6 million in 2009, which is mainly due to the decrease in effective rate to 8.61% in 2010 over 9.48% in 2009, offset by the 13.2% increase in average financial investments to R$ 4,555.2 million in 2010 over the R$ 4,025.3 million in 2009.

Income from financial investments (excluding Porto Seguro Vida e Previdência) totaled R$ 382.4 million in 2010, an increase of R$ 121.4 million or 46.5% over the R$ 261.0 million in 2009, which arises from the 79.5% increase in average financial investments to R$ 5,181.6 million in 2010 in relation to the R$ 2,887.2 million in 2009, offset by the decrease in effective rate to 7.38% in 2010 over 9.04% in 2009.

(ii) the R$ 55.5 million or 36.4% increase in other finance income, which totaled R$ 208.1 million, in relation to the R$ 152.6 million in 2009, mainly as a result of the increase of R$ 65.7 million in insurance operations to R$ 169.1 million in 2010 in relation to the R$ 103.4 million in 2009. Excluding ISa+r, the other finance income totaled R$ 151.3 million in 2010, a decrease of R$ 1.3 million or 0.9% in relation to R$ 152.6 million in 2009.

Finance costs totaled R$ 192.3 million in 2010, an increase of R$ 61.8 million or 47.4% in relation to R$ 130.5 million in 2009. Excluding ISa+r, finance costs totaled R$ 173.2 million in 2010, an increase of R$ 42.7 million or 32.7% in relation to R$ 130.5 million in 2009.

Total finance costs – excluding ISa+r	**173.2**	**130.5**	**32.7**
ISa+r	19.1	-	-
Total finance costs	**192.3**	**130.5**	**47.4**

Other Operating Income and Expenses

- Other operating income totaled R$ 373.2 million in 2010, an increase of R$ 173.5 million or 86.9% over the R$ 199.7 million in 2009. This variation is mainly due to: (a) the increase in revenues from policy costs of R$ 119.3 million or 83.2%; and (b) the increase in other income related to credit card transactions of R$ 36.1 million.

- Other operating expenses totaled R$ 340.3 million in 2010, an increase of R$ 90.5 million or 36.2% over the R$ 249.8 million in 2009. This variation is mainly due to: (a) the increase in expenses with supervision and collection of R$ 18.2 million or 71.3%; (b) the increase in expenses with risk inspection and preventive actions of R$ 8.7 million or 29.1%; (c) the increase in expenses with anti-theft devices of R$ 2.8 million or 2.9%; and (d) the increase in expenses with provision for impairment of trade receivables of R$ 15.3 million or 345.7%.

Other Operating Income and Expenses - Excluding ISa+r

- Other operating income totaled R$ 296.5 million in 2010, an increase of R$ 96.8 million or 48.5% over the R$ 199.7 million in 2009. This variation is mainly due to: (a) the increase in revenues from policy costs of R$ 42.8 million or 29.8%; and (b) the increase in other income related to credit card transactions of R$ 36.1 million.

- Other operating expenses totaled R$ 270.6 million in 2010, an increase of R$ 20.8 million or 8.3% over the R$ 249.8 million in 2008. This variation is mainly due to: (a) the increase in expenses with supervision and collection of R$ 7.7 million or 30.1%; and (b) the increase in expenses with risk inspection and preventive actions of R$ 4.6 million or 15.3%.

IRPJ (Corporate Income Tax) and CSLL (Social Contribution on Net Income)

The expenses with IRPJ and CSLL totaled R$ 261.1 million in 2010, an increase of R$ 151.1 million or 137.4% over the R$ 110.0 million in 2009. The effective rates of IRPJ and CSLL in 2010 and 2009 were 32.8% and 32.1%, respectively.

12.01 - Comments on Consolidated Performance during the Quarter

Profit

In 2010 profit totaled R$ 442.8 million, an increase of 112.4% over R$ 208.5 million in 2009. Excluding ISa+r, profit totaled R$ 292.4 million in 2010, an increase of 40.2% over 2009.

In 2010, earnings per share was R$ 1.35 considering 327,642 shares; in 2009, earnings per share was R$ 0.91 considering 229,349 shares.

Combined Index - Insurance

The combined index (retained claims, amortization of deferred acquisition costs, administrative and tax expenses compared to premiums earned) was 95.6% in 2010, a decrease of 4.5 percentage points over the 100.1% in 2009. This index varied mainly as a result of the decrease of 1.6 percentage point in amortization of deferred acquisition costs, administrative and tax expenses and of 1.3 percentage point in claims ratio.

The combined index, which also considers other operating income and expenses, was 96.0% in 2010, representing a decrease of 6.1 percentage points in relation to the 2009 index, which was 102.1%.

The amplified combined index, which also considers the finance result, was 87.6% in 2010, a decrease of 3.1 percentage points in relation to the index of 90.7% in 2009.

Combined Index - Excluding ISa+r

The combined index (retained claims, amortization of deferred acquisition costs, administrative and tax expenses compared to premiums earned) was 96.9% in 2010, an increase of 3.2 percentage points over the 100.1% in 2009. This index varied mainly as a result of the decrease of 2.4 percentage points in claims ratio, 1.2 percentage points in amortization of deferred acquisition costs, offset by the increase in administrative and tax expenses of 0.4 percentage point.

The combined index, which also considers other operating income and expenses, was 97.5% in 2010, representing a decrease of 4.6 percentage points in relation to the 2009 index, which was 102.1%.

The amplified combined index, which also considers the finance result, was 89.7% in 2010, a decrease of 1.0 percentage point in relation to the index of 90.7% in 2009.

21.01 - Report on Special Review - Without Exceptions

Review Report of Independent Accountants

To the Management and Shareholders
Porto Seguro S.A.

1 We have reviewed the accounting information included in the Quarterly Information (ITR) (parent company and consolidated) of Porto Seguro S.A. (the "Company") and subsidiaries for the quarter ended September 30, 2010, comprising the balance sheet and the statements of income, comprehensive income, changes in equity and cash flows, explanatory notes and the performance report. This Quarterly Information is the responsibility of the Company's management.

2 Our review was carried out in accordance with specific standards established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Council (CFC), and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Company with regard to the main criteria adopted for the preparation of the Quarterly Information; and (b) a review of information and of subsequent events which have, or could have, significant effects on the financial position and operations of the Company and its subsidiaries.

3 Based on our limited review, we are not aware of any material modifications that should be made to the quarterly information of the parent company referred to above in order that it be stated in accordance with the accounting standard CPC 21, Interim Financial Reporting, of the Brazilian Accounting Pronouncements Committee (CPC), applicable to the preparation of the Quarterly Information, consistent with the standards issued by the Brazilian Securities Commission (CVM).

4 Based on our limited review, we are not aware of any material modifications that should be made to the consolidated quarterly information referred to above in order that it be stated in accordance with CPC 21 and International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB) applicable to the preparation of Quarterly Information, in accordance with the standards issued by the Brazilian Securities Commission (CVM).

1 - CVM CODE	2 - COMPANY NAME	3 - Federal Corporate Taxpayers' Registration Number (CNPJ)
01665-9	PORTO SEGURO S.A.	02.149.205/0001-69

21.01 - Report on Special Review - Without Exceptions

5 We have also reviewed the parent company and consolidated interim statements of value added for the quarter ended September 30, 2010, which are required to be presented in accordance with standards issued by the Brazilian Securities Commission (CVM) applicable to the preparation of Quarterly Information (ITR) and are considered supplementary information under IFRS, which does not require the presentation of the statement of value added. These statements have been submitted to the same review procedures described above and, based on our review, we are not aware of any fact that leads us to believe that they are not properly prepared, in all material respects, in relation to the parent company and consolidated interim accounting information taken as a whole.

6 As mentioned in Note 2, the Brazilian Securities Commission (CVM), through CVM Resolution 603/09, permitted companies to present their Quarterly Information during 2010 based on the accounting standards effective until December 31, 2009, provided that this Quarterly Information was subsequently restated, including comparative figures, to comply with the new standards. Accordingly, this Quarterly Information (ITR) differs from that originally disclosed by the Company.

23.01 – Description of Altered Information

Restatement of Quarterly Information (ITR) for the quarters of 2010

In accordance with Brazilian Securities Commission (CVM) Deliberation No 656 of January 25, 2011, which amended CVM Deliberation No 603 of November 10, 2009, article 2, item II, the publicly-held corporations must “restate the Quarterly Information (ITR) for the quarters of 2010, on a comparison basis with the quarters of 2009, also adjusted based on the 2010 standards, until the presentation of the Quarterly Information of the first quarter of 2011”.
