Technology

Climatronic® Three-Zone Automatic Climate Control

Keep everyone cool with available Climatronic climate control. Help everyone—driver, front passenger, and rear passengers—stay comfortable with three separate temperature zones. There's no reason your adventures need to be uncomfortable.

Available Head-Up Display

Add this to the ways the Tiguan has got you on the road. Navigation directions, alerts, and other important notifications are projected on the windshield just in your line of sight.

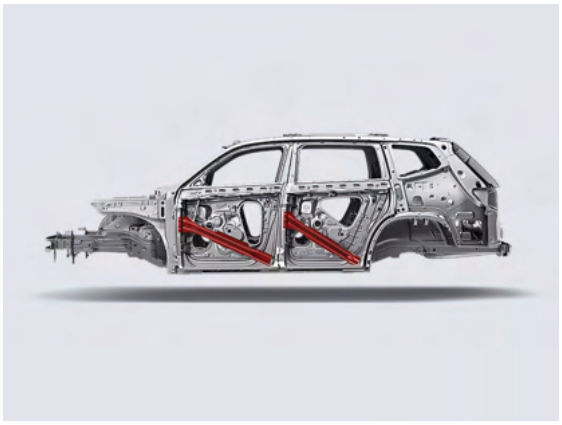
Volkswagen Digital Cockpit Pro

The Digital Cockpit Pro is an excellent way to stay informed about what's going on when you're behind the wheel. You can customize the driving and vehicle information displayed, select the look of the digital gauges, and even save settings to multiple driving profiles. That's staying in the loop, solved.

Technology

Rear View Camera System

Benefit from the view of a wide lens when you want it. It can help you see obstacles when backing up, a feature so helpful you'll wonder how you ever managed without it.



Safety Cell

Front and rear crumple zones help absorb crash energy, while a rigid safety cell helps distribute forces away from the driver and passengers.

Intelligent Crash Response System (ICRS)

In the event of a collision that deploys the airbags, the ICRS can turn off the fuel pump, unlock the doors, and activate the hazard lights. It helps react if you might not be able to.

Automatic Post-Collision Braking System

Not every collision brings a car to stop. That's why our vehicles include the Automatic Post-Collision Braking System. It can also help slow the vehicle down after a collision, helping reduce the chance of any additional impacts.

Six stability-enhancing systems

From Electronic Brake-pressure Distribution (EBD), which helps maintain appropriate stopping power during a hard-braking situation, to Electronic Stability Control (ESC), which can adjust engine throttle and apply corrective forces to the wheels that need them most, your vehicle is equipped with a total of six stability-enhancing systems.
