CHAMP®

10-Ton Pulling Post Kit

SKU: 1808691

Get serious pulling power in a proven, shop ready design.

When frame damage demands controlled, dependable pulling power, the *CHAMP*® 10-Ton Pulling Post Kit delivers. With a full 10 tons of pulling power and a 10-inch hydraulic stroke, this heavy-duty system is designed to help collision repair professionals tackle demanding frame and structural pulling jobs with confidence.

- **10 tons of pulling power** The 10-inch stroke provides substantial pulling travel, helping technicians make effective pulls while reducing the need for constant repositioning.
- **Balanced for one-person operation** The CHAMP pulling post is designed with balance and usability in mind, allowing a technician to set up and operate the system efficiently without requiring a second person.
- **Hydraulic power included** The kit includes the essential hydraulic components needed to put the pulling post to work: Blackhawk hydraulic pump, Blackhawk hydraulic ram, hydraulic hose, (2) 10-foot chains, Grab hooks
- **Simple chain routing** The pulling system is designed for straightforward setup. The pull chain routes through the floating pulley assembly and chain retarder before connecting to the power lever arm.
- **Made in the USA**

Everything you need to start pulling
