"If we want our students to be actively involved in our instructional strategies, then we must model basic student success principles in how we prepare and how we teach. Let's show our students how "active involvement" will help them focus on their sense of purpose, reflect on and strengthen their internal locus of control, and build connections that will help them socially, academically, physically, and emotionally."
Steve Piscitelli has dedicated himself to the processes of teaching and learning

for more than three decades. An award-winning teacher, he is a:

Speaker. Energetic. Humorous. Relevant. Steve knows how to connect with his audiences. He has worked with people from every state of the nation as well as Canada and Puerto Rico. His audiences have included students, secondary and post-secondary faculty and administrators, and corporate managers and their team members. Steve is also a seasoned webinar developer and facilitator.

Author. In addition to his ninth book, Study Skills: Do I Really Need This Stuff? 3rd edition (Pearson Education, 2013), Pearson Education published Choices for College Success (second edition, 2011). Steve, also, has written, recorded, and produced two music CDs. He uses the music with many of his programs and with his students in class. He writes a weekly blog (now in its third year) and has a YouTube Channel with more than 16,000 views.

Teacher. Steve has more than 30 years of direct (face-to-face) classroom experience. He has taught at the middle school, high school, and college level. As a tenured professor, Steve knows the importance of connecting with the people in front of him.

When facilitating a professional development session, Steve's goal is simple:

- Talk with the audience about real issues-issues that matter to them. In other words, don't waste the audience's time.
- Provide simple, useable, and practical suggestions to help participants improve their lives.
- Give the audience an experience-not a speech.

Steve lives in Atlantic Beach, Florida with his wife Laurie and canine companion, Buddy.

Subject: FORMAL NOTICE: Keohane Distinguished Visiting Professorship Request for Proposals

---

Faculty and administrators at The University of North Carolina at Chapel Hill and Duke University are asked to nominate outstanding scholars, artists, or practitioners for the Nannerl Keohane Distinguished Visiting Professorship. Nominations are welcome for academic year 2014-15. Nominations are due by Monday, April 1, 2013.

The Keohane Professorship recognizes the remarkable contributions of Dr. Nannerl Keohane during her term as President of Duke University, and the unprecedented level of collaboration she and former UNC Chancellor James Moeser created between these two great institutions. The award was created in 2004 by then Chancellor Moeser and is funded by Carolina graduate and his wife, , of New York (parents of '98) and the William R. Kenan, Jr. Charitable Trust.

Goals of the Professorship:

(1) Promote inter-institutional collaboration and the enhancement of intellectual life at both universities by strengthening established or encouraging new collaborations;

(2) Contribute to the teaching missions of both UNC and Duke, and in particular to the undergraduate curriculum, through a self-standing course or the co-teaching of one or more courses, or through a carefully planned series of guest appearances in a number of courses;

(3) Provide at least one major public lecture or performance.

Structure and Activities of the Professorship:

Past recipients have typically spent a semester or the equivalent of a semester in the program; however, proposals will be accepted for residencies of varying lengths based upon the schedule of the nominee and the collaborations proposed. Past recipients have catalyzed cross-campus undergraduate and graduate programs, conducted joint projects with Carolina and Duke research centers, taught joint Carolina and Duke courses, and delivered major public addresses.

Funding:

Two recipients may be selected each year. Each recipient is entitled to a payment of $60,000 US dollars (before taxes) for a full semester residency or $30,000 for a half semester residency (or its equivalent). The recipient may request reimbursement for a maximum amount of $20,000 US dollars ($10,000 for a half semester residency) for costs associated with the Professorship which could include housing, travel (including dependents), research, and other related expenses. In order to be reimbursed, the award recipient would need to provide the necessary documentation and receipts of the expenses within 30 days of the conclusion of the Professorship. The award is contingent on the ability of the recipient to receive the funds. International recipients are responsible for obtaining the necessary visa in order to receive

payment.

Responsibilities of the nominating units:

The Department(s) hosting the recipient is responsible for all other costs related to instruction, office, and clerical support (copying, space, office phone, etc.). All arrangements should be handled by the host Department(s). Such arrangements could include (though are not limited to) helping the recipient access resources such as IT support, University libraries, equipment, campus parking, as well as providing any appropriate advice on housing and living in the local community. For international recipients, the Department(s) hosting the recipient must assure that the visa process is appropriately handled by the recipient. The nominating Department at UNC-CH will be responsible for making all expense reimbursements and payroll arrangements for the recipient during the term of the professorship.

Nomination Process:

Nominations must address the institutional purpose of the Professorship - the advancement of inter-institutional collaboration and intellectual life - and should state explicitly the specific institutional purpose for which the person is being nominated followed by a description of qualifications and the activities that the nominee will undertake to fulfill that goal.

Nominations may be made by any faculty member or administrator of either institution, but must be accompanied by the signature of the Department Chairs or appropriate Institute Directors at both institutions. Students who wish to make a nomination will need to do so through a faculty member or administrator. The joint advisory committee shall make its final nominations to the Provosts of each institution by April 30, 2013. The two Provosts shall make the final selection.

Nomination letters should be as specific as possible and:

- state how the nominee will advance inter-institutional collaboration and intellectual life at Duke and UNC-Chapel Hill;

- describe the nominee's qualifications including how s/he has demonstrated the ability to work across departmental or institutional boundaries;

- identify what programmatic benefits would arise from his or her appointment as well as a plan for assessment of impact;

- demonstrate the enthusiasm of groups on both campuses and make clear how the nominee will help to create new initiatives that will serve both
UNC and Duke; and

- include the nominee's CV.

Nominations must be received no later than Monday, April 1, 2013 and should be sent electronically to susan.booth@duke.edu. Questions about the Professorship may be addressed to Carol Tresolini (carol_tresolini@med.unc.edu) or Noah Pickus (noah.pickus@duke.edu), Co-Chairs of the Nannerl Keohane Distinguished Visiting Professorship Joint Advisory Committee.

Subject: INFORMATIONAL: Nominate a Faculty or Staff Member as Honorary Coach

The Honorary Coach of the Game program is designed to recognize outstanding members of the UNC community who go above and beyond the call of duty each day. Is there a person you know that fits this description? If so, please log onto GoHeels.com go to the promotions tab and click on the UnitedHealthcare Honorary Coach tab.

How to make a Nomination:
Nominate a UNC faculty or staff member (UNC Hospital included) to be the Honorary Coach of the Game. The top nominee will all receive 2 courtside tickets to the UNC vs. Florida State men's basketball game on Sunday, March 3, 2013 and a prize pack.

How the Honorary Coach is selected:
The Honorary Coach will be selected based on number of individual nominations and reason for being nominated. The winner will be contacted a week prior to the game by email/phone and will be posted on this splash page the week of the UNC vs. Florida State men's basketball game.

How you can win:
Don't worry you could win something too! Just for telling us about an outstanding UNC faculty/staff member, you are eligible to win a UNC/UnitedHealthcare prize package. Each week during the nomination period, a name will be drawn from the website entries to win these prizes. A total of 4 prizes will be given away throughout the season.

USAA®

Higher education at a lower rate.

Save on money for college with a USAA discount on a student loan.

- Discounted member rates
- Flexible payment terms

Get Started

If you need money for college, your USAA discount can help. We've teamed up with a leading educational loan provider to bring you student loans at a discounted interest rate.[1]

- **Lower your interest rate by up to .75% (including .25% just for being a USAA member).[2]**
- **Make no payments for six months after you leave school.[3]**
- **Pay for tuition, room and board, books, a computer, and other educational expenses.**
- **Improve your chances of approval and further lowering of your interest rate by adding a co-signer.**

Honoring your commitment to education. Expect USAA to always be there with the financial solutions you need to reach your goals — from your diploma to your degree and beyond.

More financial aids from USAA Bank
Managing expenses is easy and convenient with USAA Bank checking accounts and a low-rate USAA Bank World MasterCard®.

Please do not reply to this e-mail. To contact USAA, visit our secure contact page.

USAA will never ask for sensitive personal information such as a Social Security number, a PIN, account numbers or a password in an e-mail. To ensure delivery to your inbox, please add offers@e.usaa.com to your address book.

1 Wells Fargo private student loans are subject to credit qualification; completion of a loan application/consumer agreement; verification of application information; and, if applicable, a self-certification form and/or school certification of loan amount and student's enrollment at a Wells Fargo participating school.

2 Reduce interest rate by a total of up to 0.75% depending on a combination of the following discounts, as applicable: you or your co-signer have a USAA relationship (USAA number required: There is no obligation to purchase or maintain any USAA product to qualify for the discount) — 0.25% discount; you qualify for the Wells Fargo Student Graduation Benefit℠ program — 0.25% discount; or you authorize automatic payments from any personal checking or savings account — 0.25% discount (this rate reduction will be effective the day after the first automatic withdrawal is made). You will automatically receive the highest applicable relationship discount. For variable interest rate loans, if the qualifying relationship resulting in the discount ends, the interest rate may be reset to reflect the removal of the discount. Wells Fargo reserves the right to modify or discontinue interest rate discount program(s) for future loans or to discontinue loan programs at any time without notice.

3 Students are not required to make payments while in school; repayment begins six months after you graduate or leave school. The maximum in-school period varies by loan program. Repayment begins after funds are disbursed for the Wells Fargo Student Loan for Parents and the Wells Fargo Private Consolidation℠ loan. Allopathic and osteopathic medical students have a grace period of 36 months designed for residency completion that may be followed by up to 24 months of internship/residency forbearance, for a total deferment period of up to 60 months after graduation. All other students begin repayment six months after leaving school, or five to seven years after the first disbursement date (depending on discipline), whichever comes first.

Credit cards provided by USAA Savings Bank, other bank products by USAA Federal Savings Bank, both Member FDIC.

Use of the term "member" or "membership" does not convey any legal, eligibility or ownership rights. Availability restrictions apply. Purchase of a bank product does not establish eligibility for or membership in USAA property and casualty insurance companies.

Free Resources

- A Closer Look at College Students
- Self-Efficacy: Helping Students Believe in Themselves
- Problem Internet Use and Locus of Control Among College Students
- Helping First Year Students Help Themselves
- 21st Century Campus Culture

Webinar Overview

As educators, we often hesitate to involve ourselves in the emotional lives of our students. Many of us think it's too messy and we fear it may be a Pandora's box - once it is opened, we may never get it closed again. When we think of student success, we may first think of tutoring, developmental courses, or reading and writing skills. While each of these skills is essential, a student's emotional state is, in many ways, a very important precursor because it can affect one of the most influential and adaptable tools in their college success toolbox: their desire to succeed!

Join us to discover the relationships between attrition risk factors and non-cognitive barriers to success. Faculty and staff on your campus will explore the issues of self-efficacy, social capital, and locus of control. Participants will leave with practical strategies they can begin using immediately to help students develop emotional skills that lead to success.

Webinar Objectives

Participants will learn how to develop a service-learning course via seven steps:

- Define student learning outcomes
- Define scholarship and/or creative activity outcomes
- Plan community collaboration
- Design the course
- Handle logistics, contracts, and risk management
- Incorporate pedagogical tools (reflection, analysis, delivery and display)
- Perform meaningful assessment

Webinar Speaker(s)

Dr. Adam Peck serves as the Dean of Student Affairs at Stephen F. Austin State University (SFA) in Nacogdoches, Texas. He also serves as adjunct faculty in the graduate program for Student Affairs and in the department of Communication and Contemporary Culture at SFA. He has worked in higher education for over seventeen years. Adam writes and speaks frequently on topics as varied as cultivating creativity, critical thinking, and assessment methodologies.

Webinar Overview

Critical thinking is a concept that is widely used and has high visibility in the accreditation and mission statements of educational institutions across the world. However, many educators and institutions have difficulty clarifying the concept and infusing it within curriculum and instruction. This three-part workshop focuses on explicating those concepts and principles that inform a foundational, cross-disciplinary conception of critical thinking as well as how these fundamentals translate into concrete teaching and learning strategies that, when done well, help our students improve the quality of their thinking.

Session Titles & Descriptions:
Part 1: Introduction To Foundational Critical Thinking Concepts & Principles
In this first segment, participants will be introduced to a robust, cross-disciplinary conception of critical thinking. We will discuss what critical thinking is and explore how it can be substantively infused into our content areas and instructional contexts. It will be argued that critical thinking is not something that is merely added to our existing curriculum and workload, but should be the way we teach and learn. When critical thinking is treated as the organizing idea of teaching and learning, substantive understanding will naturally result.

Part 2: Question-Generating Concepts
The critical mind is the questioning mind. The extent to which students ask genuine questions and seek to answer them reflects the extent to which students take content seriously and think it through. The problem is that our students rarely know how to systematically ask questions that probe content by searching for assumptions, concepts, purposes, information, inferences and solutions, points of view, or implications. They rarely seek out intellectual standards to evaluate the quality of their thought and the thoughts of others: questions that target clarity, depth, relevance, validity, significance, and accuracy. We want to create a classroom culture where students actively, reflectively, and fair-mindedly question the content and each other. Such a culture cultivates important intellectual skills and abilities as well as virtuous dispositions like intellectual flexibility, empathy, humility, integrity, open-mindedness, and perseverance, to name a few. This session will focus on the relationship between our ability to question and our ability to think critically. Participants will explore various ways to help students develop questions that analyze and evaluate content and their thinking.

Part 3: Focus On Instructional Strategies That Promote Critical Thought
This session will build on the foundational critical thinking concepts and principles addressed in the first session. In doing so, participants will explore the intimate relationship between what it means to think critically and how we can design instruction to promote critical thought. Based on best practices in teaching and learning, participants will engage and discuss specific instructional strategies designed to foster critical thought and the cultivation of higher order thinking skills. The instructional strategies act as examples of what instructors can do on a typical day of class. At the end of this session participants will have a short list of practical strategies they can immediately incorporate into their instruction.

Why Emotions Matter: Helping Students Develop Non-Cognitive Skills That Lead To Success

Dr. Enoch Hale has been a Fellow at the Foundation for Critical Thinking since 2004, and he is now the executive director of the Institute for Critical and Integrated Thinking. He has over fifteen years of instructional experience in secondary, post-secondary and graduate education. For close to a decade, Dr. Hale has worked with faculty and administrators, nationally and internationally, from primary schools, secondary schools, graduate schools, businesses and government agencies in the design and facilitation of professional development workshops. This work focuses on infusing critical thinking into curriculum, instruction and classroom/organizational culture. Dr. Hale has published work on various dimensions of critical thinking in multiple peer-reviewed journals including the Journal of College Teaching and Learning, Action Learning Research and Practice, and the International Journal of Human Resources Development and Management (IJHRDM). His research interests focus on the practical application and assessment of critical thinking, meta-cognition, and professional development studies. His PhD dissertation, entitled "A Critical Analysis of Richard Paul's Substantive Trans-disciplinary Conception of Critical Thinking" is, to date, the most comprehensive analysis of Paul's conception of critical thinking.

From:	Chancellor's Task Force on Technology Commercialization <noreply@qemailserver.com>
Sent:	Saturday, February 9, 2013 1:37 PM
To:	Bridger, Beth <bridgerb@email.unc.edu>
Subject:	UNC Faculty Commercialization Survey

Dear Carolina Faculty Member,

Chancellor Thorp has assembled a Task Force on Technology Commercialization that is charged "to develop an integrated strategy and plan of action for commercialization of technology at UNC". Your views on what can be done to enhance technology development and commercialization at the university will be invaluable to the Task Force.

The Task Force wishes to learn about your experience on this campus and your experiences at your previous institutions with respect to technology commercialization. We ask you to fill out a short survey that will take about 10 minutes to complete. The survey is designed to gain a broad representation of campus views on technology development and commercialization in the context of the mission of the university.

Follow this link to the Survey:
Take the Survey

Or copy and paste the URL below into your internet browser:
https://unc.qualtrics.com/WRQualtricsSurveyEngine/?Q_SS=6heD6V5bEY4wBpP_dmPcvT1TUYYBgd7&_=1

This data generated from this survey will be incorporated in the Task Force's report to the Chancellor. All responses are confidential and will be used in aggregate statistical analysis. No particular individual will ever be identified in any report, presentation, or publication in which the data from this survey are used. This survey is conducted under an approve IRB.

The Task Force sincerely appreciates your efforts in completing this survey.

Sincerely,

Dhiren Thakker

Maryann Feldman (please address questions to feldmanm@email.unc.edu)

PLEASE COMPLETE THE SURVEY BY FEBRUARY 22, 2013.

Colleagues,
I am sharing this list of student-athletes who have received academic progress reports through the Connect Carolina Early Warning system (see attached excel file).
Please note any students assigned to you and respond with your usual care and attention. Also, check for any discrepancies between this list and information generated through our own progress report system and information self-reported to you by students.
Take care and please let me know if you have questions.
Harold

Hi everyone,

I hope you all had a great weekend! Below is this week's newsletter - enjoy!

Get Active!

- Are you a Campus Recreation member? We have a lot to offer this semester to help you stay active and have fun! Visit this website for more information: http://campusrec.unc.edu/special-events on these events:
  - The Rec Experience (Feb. 1st - March 8th)
  - Fit Campus (Feb. 11th - May 7th)
  - Eating for Exercise: The Recipe for Fitness (Feb. 25th, 5:30-7:00 pm)
  - Reaching for Excellence! (March 27th, 5:30 pm)
- Are you a fan of The Biggest Loser? Join CUAB and Campus Recreation in welcoming **Biggest Loser winner Ken Canion** TOMORROW, Tuesday, at 5:15 pm (SRC A). Ken will be giving a brief talk and will then lead a workout.
- **Kids ROCK! Basketball** (featuring the UNC women's club basketball team) is coming soon - Saturday, , 10 am - noon. To register your child(ren), visit https://docs.google.com/spreadsheet/viewform?formkey=dGNKMFlYTnpjS3RWSU5tc281QkJQcGc6MA#gid=0 .

This Week in Health

- Continuing our theme of **American Heart Month**, this week we are focusing on Cardiovascular Disease Prevention and stroke. Follow these links for more information: http://yourethecure.org/aha/advocacy/issuedetails.aspx?IssueId=CVD%20Prevention , http://yourethecure.org/aha/advocacy/issuedetails.aspx?IssueId=Stroke .

- If you are interested in joining a free Heart Health Program, take a look at this information from SparkPeople: http://www.sparkpeople.com/resource/health_conditions.asp?condition=15 .

- This week's exercise is a "6-minute Upper Body Workout with Ball". Follow this link to access the video: http://www.sparkpeople.com/resource/videos-detail.asp?video=72 [*If clicking the link above does not work, copy and paste it into your browser by (1) highlighting the entire link above, (2) right-clicking "Copy", (3) opening your internet browser, and (4) right-clicking "Paste" into the website address space at the top of the toolbar.*]

To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: Reminder: University Will Test Sirens Tuesday

Dear Students, Faculty and Staff:

You may hear the University's emergency sirens on Tuesday, February 12, between noon and 1 p.m. during a TEST that is part of Alert Carolina, our ongoing safety awareness campaign. No action is required.

The sirens sound only for a major emergency or an immediate safety or health threat, such as an armed and dangerous person on or near campus; a major chemical spill or hazard; tornado warning for the Chapel Hill-Carrboro area issued by the National Weather Service; or a different emergency, as determined by the Department of Public Safety. Be prepared to go inside or take cover immediately in a real emergency.

The University also sends test text messages to anyone who has registered a cell phone number in the online campus directory. For more information, including audio samples of the siren tones, see http://alertcarolina.unc.edu

About Informational Messages: The University sends an Informational Message to inform the campus community about a situation that is not an emergency, but is expected to be of significant interest to the campus. An Informational Message is one of three tiers of communication under the University's revised emergency communications plan. Emergency Warning refers to a siren activation for a significant emergency. And a Timely Warning is issued if there is a continuing danger AND notification will not compromise law enforcement efforts.Sponsored by the UNC Department of Public Safety

Free Web Seminar!
UPK Beyond Oracle, and Beyond Training

Oracle University invites you to join us for a **Free** one-hour Web Seminar delivered by **Beth Renstrom**. In this Seminar, Beth will explain how UPK can be an excellent tool to create enablement content and training for Oracle and non-Oracle applications. Beth will also discuss how other organizations have done this effectively using UPK.

This Web Seminar includes:

- Understand how UPK can be used for any application
- How does UPK provide value throughout the software lifecycle
- Expand your UPK usage beyond training to Conference Room Pilots and System Testing
- Get examples of how UPK can be used for non-application training

See how you can learn locally when you take your Oracle training
Oracle University features Live Virtual Classes, online learning with live delivery of lectures and labs. The trainers are Oracle University expert instructors who deliver an educational experience that is comparable to our traditional in-class training—without the need for expensive travel. In this Web Seminar, you will see online learning in action.

You won't want to miss this Free seminar!

Attendance is limited.

Creating the Right Recruiting "Beat" for Your Recruits

(No, this is not Dan Tudor dancing. You wouldn't want to see Dan dance. It's scary.

Ever listen to a song and start tapping your foot to the tune...even though you've never heard it before?

It's probably because its using a beat that's been used before in other songs. Dozens and dozens and dozens of other songs you've listed to in your life, and have probably forgotten about.

You've just fallen for a secret tactic in the music industry: They want to get you sucked-in to a new song by giving you a taste of something that you're already familiar with.

What I'd like to suggest to you today is that you employ the same subtle messaging in your communication with prospects.

Here's why it works...

Our brains (your teenage prospect's brain, included) loves to be able to predict what's coming next. We do it all the time: Try to guess the end to a movie, guess the next play in a football game we're watching...we love to be one step ahead. As I mentioned a moment ago, so do your teenage prospects.

And, like us, they also want to be intrigued by new, exciting information. Actually, let me rephrase that: They don't "want" it, they need it.

The challenge, of course, is giving them those two ingredients: Something new and exciting, as well as something familiar and comfortable. However, if you can mix those two things effectively - like we try to do for **our clients** - then the results can be stunning.

So let's aim for "stunning" today...here are a few important rules as you begin the process of creating the delicate mix of these two critical parts of any good recruiting communication piece...

What Brand Message Is Your College Athletic Program Sending?

by Alison Vincent, ***NCSA Recruiting***

Companies spend millions of dollars creating and cultivating their image and developing their brand. What do you do to shape the image of your program and develop your brand? Branding may not be on the agenda of your weekly staff meetings, but it certainly should be.

Let's try an experiment: go to each of the other coaches on your staff and ask them what your team's brand is. See if anyone can clearly articulate it and if you have several people on the same page. Chances are, most of you have never thought about creating your brand.

Your first step is to define what your brand should be, identify what your brand currently is and how to bring those two together. Ask questions of your current staff, student-athletes and alumni about what they would think of as the image of your program, what your brand looks like. Make sure the focus is on the image of the team as a whole or the program as a historical entity.

Recruits in this generation are brand-savvy individuals who have had branding in every realm in their life since infancy. They are sensitive to brand-identities and will judge you on your image and your brand long before they take a step on your campus...

On-Campus Workshop

Dan Tudor to Teach Special Four Hour Message Session at 2013 NCRC

2012 NCRC

On the last morning of this year's **National Collegiate Recruiting Conference**, Dan Tudor will teach a special four hour session on creating a smarter, more strategic recruiting message. This special session will incorporate the new NCAA recruiting contact rules and timelines, which are "game changers" for college recruiters.

That's in addition to the incredible line-up of coaches, speaker and recruiting experts from around the country that are going to be a part of this annual event.

If you're serious about upgrading your recruiting skills heading into the new year, you need to be at this one-of-a-kind event, coming up this June 7-9 in wonderful Charlotte, North Carolina.

RESERVE YOUR SEAT NOW AND SAVE!

UPDATE: Discounted hotel rooms are still available for early registrations!

It's going to be our best event ever, and we want you there to hear from the best minds in the business!

How Much Should Coaches Weigh Character When Recruiting Athletes?

by Rachel Cohen, NBC Sports

The high school janitor could be one of the most important people in college football recruiting. Coaches must evaluate more than just 40-yard dash times and tackling technique when they decide whether to offer a scholarship.

A player's success often rests as much on whether he works hard in practice and stays out of trouble off the field. "It's a big deal because the character and quality of the person directly correlates to how much better that guy will get in your program," Rutgers coach Kyle Flood said.

And the people who offer the best takes on that guy's character may be the folks he passes in the hallway every day. And the people who offer the best takes on that guy's character may be the folks he passes in the hallway every day.

"We obviously want kids who can play, but we'd much rather have a little less talent and more character," Mississippi coach Hugh Freeze said.

On Wednesday, high school stars around the country will sign their letters of intent to play college football, as fans breathlessly await the final decisions and pore over the rankings. Yet look back four or five years, and many of the highly rated recruiting classes will have produced more busts than All-Americans...

Will New NCAA Rules Will Turn Recruiting Into "The Wild, Wild West"?

College football recruiting

by Mike Bianchi, Orlando Sentinal

If you think it's bad now, just wait.

If you think college football recruiting has become too big and too time-consuming and too insanely excessive, just wait.

If you think 17-year-old high school football players have become too self-important, too entitled and too overindulged, just wait.

If you think confused recruits committing, decommitting and recommitting is bad now, just wait.

Just wait until the new recruiting rules kick in and college coaches begin inundating Billy Bluechip with phone calls, text message, smoke signals and love letters.

These respected college and high school coaches are referring to the new recruiting rules that take effect Aug. 1 when college coaches will be permitted by the NCAA to make unlimited phone calls and send unlimited text messages to high school recruits...

National Signing Day Is Only The Beginning Of Another Recruiting Year

by WBIC.com

Wednesday was essentially Christmas for the die hard college football fan, National Signing Day. It's when recruits across the country finally announce where they will play.

Former college basketball coach and author of "Recruiting Game Changers" says this is technically the end of the recruiting process and the culmination of years of work for some coaches, and possibly years of agonizing over a school for the players.

He says "It is when the young man and his parents put their names on the dotted line committing then to an institution, and the institution commits to a scholarship for one year and you can't break the letter of intent because you'll be ineligible to play for at least a year."

Lovell says a "verbal commitment" formerly used to be the end of the process, but those times are long gone. Now some coaches are known for "flipping" players to their schools, even as late as National Signing Day. "Many people say, well it's just a verbal commitment it really doesn't mean anything, I think we get lost in that." Lovell adds, "It's an important thing for people to remember that when you say something it ought to be a binding commitment, but when it comes to recruiting I think all's fair, the classic love and war, and recruiting it seems like it's all fair."...

Remarks from the President

Since our last newsletter, the holiday season has come and gone with the new year off to a busy start! We are charging full steam ahead here at Texthelp and will be releasing several exciting new products and upgrades in the coming months. Watch your email or the Texthelp website for more details!

We just returned from ATIA in Orlando where it was great to see so many of our customers. The Exhibit Hall was busy and attendees seemed very pleased with the sessions including several given by Texthelp's Jason Carroll and Martin McKay. We are looking forward to CSUN this month and catching up with our west coast friends!

On another note, we'd like to welcome **Nora Trentacoste** to the Texthelp team. She will be managing the sales efforts in Alaska, California, Oregon, Washington, and Western Canada. Nora is excited about getting to know everyone in her new territory and providing solutions to meet their needs. If you want to reach out to Nora, please email her at n.trentacoste@texthelp.com.

Sincerely,

Jack Dolan, President, Texthelp Inc.

Read&Write GOLD IEP

One thing that has many people excited these days is our **special Read&Write GOLD pricing for K-12 students with IEPs**. For many of these students, getting the right assistive technology is the missing piece to their success and our goal is to make this happen. Single copies of Read&Write GOLD (PC or Mac, DVD or USB) cost **only $295** when purchased by schools or authorized agencies for students with IEPs.

Download the order form or call 888-248-0652 today to learn more!

Read&Write for Google Docs News

Read&Write for Google Docs, available **free on the Chrome Web Store** or with Web Apps for SMS customers, is generating some great buzz! The Read&Write for Google Docs toolbar makes Google Documents accessible with Text-to-Speech, Dictionary, Picture Dictionary, Translator, and Study Skills. Best of all, writing support features are on the way!

One AT and Educational Consultant states that Read&Write for Google Docs is "***A must have tool for any student using Google Docs. This is huge; an amazing benefit for our struggling readers, writers, and researchers.***" Check out what others are saying.

Read&Write GOLD for PC Update - 10.0.6

Have you got the **latest update of Read&Write 10 GOLD for PC**? Version 10.0.5 was released in October to support Windows 8 and Version 10.0.6 was released in November to support Adobe Reader and Acrobat XI.

Not sure if you have the latest version? To check, click on the down arrow next to the Texthelp button on the toolbar and then click "About...". If you do not have 10.0.6, click

on check for updates and follow the instructions.

New Content Added to Fluency Tutor

More non-fiction passages for both elementary and secondary levels were recently added to Fluency Tutor! Readers of all ages can access interesting, on target, grade appropriate passages for practice reading or assessment. **Try our interactive demo or request a free 90-day trial of Fluency Tutor today!**

Corporate News

Atomic Leaning Partners with Texthelp

Atomic Learning and Texthelp have partnered to offer **free training tutorials** on Read&Write GOLD. The training tutorials for Read&Write GOLD for PC and Read&Write GOLD for Mac walk learners through all of the reading, writing and self-editing, study skills, and research features found on the Read&Write GOLD toolbar.

Fluency Tutor chosen as one of Readers' Choice Top 100 Products!

District Administration has selected Fluency Tutor as one of the **Readers' Choice Top 100 Products**! The award is based on nominations from readers who submit products which have made a positive difference in the operation of their schools and classrooms as well as programs that help improve student reading, writing, science, and math comprehension.
We are honored to have Fluency Tutor included in this group of products!

Customer News

New Hampshire Audio Book Initiative Includes Read&Write GOLD

The New Hampshire Audio Book Initiative for elementary and secondary schools was developed by the NH DOE to help schools provide audio versions of books and learning materials to students who qualify so that every student has access to the same books and learning materials as their peers.
A copy of **Read&Write GOLD will be installed in every public school in NH** to scan books, handouts, and other learning materials for students to have in an accessible format. We are very excited to be part of such a wonderful initiative!

Boston University Students are Benefiting from Read&Write GOLD

An article in BU Today, "***Reading Made Easier - Free Software for Anyone at BU with Dyslexia, Learning Disabilities***", discusses Read&Write GOLD and how it is helping Boston University students.
One student states, ***"This is a game changer for my college career. You have to manage your time and treasure those 15 minutes you have. It's all about being efficient, and Read&Write GOLD makes your life more efficient."***
Read&Write GOLD is available as a free download to everyone at Boston University. ***"It's not just a little piece of assistive technology in the corner,"*** says Office of Disability Services Assistant Director Lorraine Norwich. ***"It's something that everyone can use and can benefit from."*** Read more...

Customer Spotlight - Professional Studio Glass Artist, Paul Stankard

We recently caught up with one of our customers, **Paul Stankard**. He is a gifted artist with an international reputation. His glass art work is represented in over 60 Museums around the world. We spoke to him about his art and how Read&Write GOLD has helped him in his active career.
"Because of my Dyslexia reading and writing had always been laborious. But when I discovered and installed Read&Write GOLD, I was 'fast forwarded.' With noticeably less effort, I'm reading and writing much easier, in fact better than most non-dyslexics."
"With the help of Read&Write GOLD, I wrote an autobiography, No Green Berries or Leaves: A Creative Journey of an Artist in Glass, and am currently writing a second book celebrating excellence in glass art. Read&Write GOLD gives me the confidence to share my writing with the world because, with the "Read" feature, I can listen to what I've typed, make corrections, and refine the ideas until it says exactly what I want it to say."
Learn more about Paul and his beautiful artwork by visiting his website.

How Mobile is Your MOBILE Contest Winners

We want to thank everyone who participated in the **How Mobile is Your MOBILE contest.** It was fun to see the pictures that were sent in. The winners are:

Bill Ziegler (left), an AT Specialist from Bucks County, PA, took his MOBILE to "Space"! **He wins for "traveling" furthest with his MOBILE**!
Diane Conner's son stayed "mobile" in Louisiana by using the Web Apps in a duck blind. **He wins the GRAND PRIZE for Most Unique!**

- Next Generation of Online Learning Systems Faces Barriers to Adoption
- What's Next in Online Learning?
- Distance Learning Survey Shows Growing Concern for Student Services

Webinar Overview

The challenge of keeping online students motivated and engaged is an area of concern for all types of institutions and courses. As online courses grow in offerings and popularity, it is important to address the concerns that arise via this still-new medium of instruction. Online learners are statistically a very varied group in terms of study habits, personal schedules, work commitments, and family. It is essential for faculty to be aware of their students' demands outside of the online environment in order to better tailor their curriculum and offer an experience that encourages retention.

This webinar will review the most common problems that keep online learners from completing their coursework successfully. Participants will have the opportunity to discuss, in-depth, the role of motivation from the perspective of human development, as well as its role in the online learning environment. Participants will also learn how to tap into their students' motivation and promote it in a way that addresses all learning styles.

Webinar Objectives

Participants will be able to:

- Identify common problems that keep online learners from succeeding
- Develop best practices for motivating students in the online environment
- Learn how to tailor their curriculum to create an environment that encourages retention
- Gain an understanding of how motivation impacts student retention
- Apply key principles of human motivation to promote student motivation in the online environment

Webinar Speaker(s)

Dr. Lashun Aron holds a doctoral degree in Higher Education Administration and Education Leadership from Argosy University. She has worked in both traditional and proprietary school environments. Lashun's love for education was sparked on road trips where student work groups formed organically. Her commitment to education as a lifelong career came from working in Higher Education as an Administrator. Dr. Aron has worked with many youth organizations, campaigning students to experience personal development and educational attainment. She found this to be challenging and incredibly rewarding. She believes that one critical component in becoming a truly effective leader is learning to serve and help the people you lead. Although she has worn many educational hats, serving as a (Tutor, T.A., Faculty Mentor, Instructor, Department Chair, Academic Dean, Director of Education, and Online Education Supervisor) - there have been no moments more satisfying than when student learning is evident.

Lashun has delivered numerous campus workshops and presentations focused on student success in higher education. She is currently working for an online for-profit college as an education supervisor whose mission is to promote student success in the online environment.

LaRuth A. Ensley earned an Education Specialist degree from The George Washington University in Washington, DC with an emphasis in Educational

Subject: Emergency Siren TEST Begins

Dear Students, Faculty and Staff:

You received this email as part of a TEST of the University's emergency sirens. The message coincided with the beginning of the siren test. There may be delays in delivery of campus-wide email. In an emergency, we plan to use all available communication methods including email as part of a multi-layered strategy to reach as many people, including those who may not be on campus when a real siren occurs, as quickly as possible. For more information, see alertcarolina.unc.edu.

Sent: Tuesday, February 12, 2013 12:50 PM
To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: ALL CLEAR; RESUME NORMAL ACTIVITIES

Dear Students, Faculty and Staff:

The University has issued an "all clear." Now it's safe to resume your normal activities.

See alertcarolina.unc.edu for updates and more information about the University's emergency communications.

ABOUT THIS EMAIL: Campus-wide email is not an instant source of information as part of the University's emergency warning notification process. The sirens and the text messages sent to registered cell phone users are the fastest way for the University to notify you. That's why email messages like this one will always include a timestamp to indicate when the message was sent. The University's Emergency Notification System is activated using a strategy that is based on redundancy, using multiple methods to communicate. The best, most up-to-date source of information will always be the Alert Carolina website, http://alertcarolina.unc.edu.

John Stephenson Named President & CEO of the College Football Hall of Fame

Atlanta native brings a strong track record of success and a deep understanding of all the local forces in the region.

IRVING, Texas - Feb. 12, 2013 - The National Football Foundation (NFF) announced today that **John Stephenson** has been named the president and chief executive officer of Atlanta Hall Management, Inc., (AHM) the Georgia not-for-profit corporation tasked with constructing and operating the national College Football Hall of Fame in Atlanta. The announcement was made locally last week by AHM after its board of directors unanimously approved a three-year contract for Stephenson in late January.

"We are very fortunate that John has agreed to lead the Hall in Atlanta. His presence puts us on a trajectory for success now and well into the future," said **Steve Hatchell**, the president & CEO of the NFF, which launched the College Football Hall of Fame in 1951 and controls its rights. "John has clearly established himself as a tireless worker with amazing connections. He was the key person in getting everybody on board, throughout Atlanta and the state, including the support of all of the major CEOs headquartered in the region. He's done a great job, and we are fortunate to have him in this role."

An Atlanta native and previously an attorney with the law firm of Troutman Sanders, Stephenson had been serving in the role on an interim basis since December 15, 2011, and he played a critical role in taking the final steps in securing the funds for the $66.5 million project, which is being built in downtown Atlanta near Centennial Park. Troutman Sanders has served as counsel since the project's earliest stages, ultimately "loaning"

Stephenson out as the interim chief in 2011.

"John's leadership of the Hall of Fame project has been nothing short of phenomenal," said **Archie Manning**, chairman of the board of the National Football Foundation. "His guidance has taken a shared vision and ushered it to the point where we can all see the finish line. There is no question in my mind that he is the right man to continue leading this endeavor."

As president and CEO of Atlanta Hall Management, Stephenson will be responsible for guiding the broader efforts to construct and operate the Hall attraction. Continual construction began Jan. 28, and the 94,256 square foot facility is scheduled to open in the fall of 2014. Stephenson has been at Troutman Sanders LLP since graduating from the University of Georgia School of Law in 2000. He has been a partner at the firm since 2007. Having served as counsel to a number of clients in the hospitality, sports and entertainment industry, he was retained by the project organizers in 2009 to assist with efforts to move the Hall to Atlanta.

"I'm honored to have this opportunity, and I'm blessed to be surrounded by a remarkable team of stakeholders and partners that have never wavered in their commitment to bring the Hall to Atlanta," said Stephenson. "We have a lot of work to do, but I'm thrilled to be part of such an exciting project here in my hometown. Everyone involved is focused on ensuring that this facility exceeds expectations as the Hall's home, as a marketing and community asset for the city and state, and most importantly as an unforgettable experience for fans from across the country."

In addition to his law degree, Stephenson also holds his undergraduate degree from the University of Georgia, and he played football at the Lovett School, growing up in Atlanta. He currently lives in Atlanta with his wife, Megan, and children, May and Jack.

John Stephenson has been named the president and chief executive officer of Atlanta Hall Management, Inc., (AHM) the Georgia not-for-profit corporation tasked with constructing and operating the national College Football Hall of Fame in Atlanta.

Construction has begun on an artists' rendering of the new College Football Hall of Fame in Atlanta. The building is scheduled to open in the fall of 2014.

ABOUT ATLANTA HALL MANAGEMENT

Atlanta Hall Management (AHM) is a Georgia nonprofit corporation, designated as a 501(c)3/509(a)2 charitable organization, established to build and operate the College Football Hall Fame in Atlanta. AHM has been tasked with the responsibility of delivering a highly-immersive, interactive and engaging experience to Hall of Fame visitors. Slated to open in the fall of 2014, the new College Football Hall of Fame will be a 94,256 square foot facility adjacent to the Georgia World Congress Center and Centennial Olympic Park in downtown Atlanta. For more information, please visit www.cfbhall.com.

ABOUT THE NATIONAL FOOTBALL FOUNDATION & COLLEGE HALL OF FAME

Founded in 1947 with early leadership from General Douglas MacArthur, legendary Army coach Earl "Red" Blaik and immortal journalist Grantland Rice, The National Football Foundation & College Hall of Fame is a non-profit educational organization that runs programs designed to use the power of amateur football in developing scholarship, citizenship and athletic achievement in young people. With 120 chapters and 12,000 members nationwide, NFF programs include the College Football Hall of Fame, the NFF Scholar-Athlete Award presented by Fidelity Investments, Play It Smart, the NFF Hampshire Honor Society, the NFF National Scholar-Athlete Alumni Association, and scholarships of more than $1.3 million for college and high school scholar-athletes. The NFF presents the MacArthur Bowl, the William V. Campbell Trophy endowed by HealthSouth, and releases the Bowl Championship Series (BCS) Standings. NFF corporate partners include the Allstate Sugar Bowl, the BCS, Fidelity Investments, Herff Jones, Liberty Mutual Insurance, NCAA Football, and Under Armour. Dear Beth,
Bradley, and Beth:

Thank you again for getting together earlier this month.

I'm writing to see if you'd be willing to get together for a working lunch sometime in March. The main goal, at least as far as I'm concerned, would be to hear any concerns you might have, as well as your advice about how the admissions office and UNC
 in general can do a better job of serving your students.

Here are a few other things I'd be interested in talking over with you, if you'd be willing.

<ul style="font-family: Tahoma; font-size: 10pt;">
Since we should know a little more about the shape of the 2013 entering class by the time we get together, and I'd appreciate your perspective on the group and on how we might try to do better for 2014.
I'd also be grateful for your thoughts on how we can bring our current 1-2-3 groupings more in line with your own way of thinking about students.
I'd be interested in knowing what information about athletics admissions you think we should report regularly to the campus community and to the public. It seems to me that we might head off some misinformation and speculation
 if we provided more information ourselves. But I don't want us to do anything that would stigmatize students or treat them unfairly.

Of course, I'd be glad to set all this aside if there are other things you'd rather discuss.

I would understand if you're too busy to get together. But if you're willing, here are a few dates that would work for me:

Thank you very much for considering this request, and thank you also for all you're doing.

Steve

Webinar Overview

At many colleges and universities, the number of students with Asperger's Disorder continues to increase. While these students have the intellectual abilities to be successful, they often struggle with understanding social cues and comprehending unwritten rules and procedures. They may be teased or laughed at by other students. As a result, these students pose unique challenges to faculty members, administrators, and other students during their college careers. Working successfully with Asperger's students requires an understanding of their behavior and knowledge of how to communicate with them.

In this webinar, Brian Van Brunt, Ed.D., will offer recommendations for helping these students succeed. Participants will better understand the behaviors and needs of students with Asperger's Disorder. They will also learn strategies to build awareness, understanding, empathy, and tolerance in the classroom and campus-wide.

Webinar Objectives

Participants will:

- Understand the various departments and locations where students with Asperger's Disorder may come into conflict
- Better understand students with Asperger's Disorder, including their behaviors and needs
- Learn strategies to build understanding, empathy, and tolerance when communicating with other students about Asperger's Disorder
- Come away with an improved understanding of how to better communicate with Asperger's students so they can focus on course content (faculty) and ultimately help these students succeed (advisors, student services staff, other students)

Webinar Speaker(s)

Dr. Brian Van Brunt , past president of the American College Counseling Association, is Senior Vice President for Professional Development Programs at the National Center for Higher Education Risk Management (NHCERM, www.ncherm.org). He is the president-elect of the National Behavioral Intervention Team Association (NaBITA, www.nabita.org), current president of the School and College Organization for Prevention Educators (SCOPE, www.wearescope.org) and the managing editor for Student Affairs eNews (SAeN, www.studentaffairsenews.com). Over the past thirteen years Brian has taught counseling theory, ethics, program evaluation, statistics and sociology topics at both public and private schools for both graduate and undergraduate students at five different colleges and universities. Brian has served as the director of counseling at New England College and Western Kentucky University. He is the author of several books including: Ending Campus Violence: New Approaches in Prevention and A Faculty Guide to Addressing Disruptive and Dangerous Behavior in the Classroom. Brian is an expert on campus violence and has been interviewed by the New York Times, National Pubic Radio, LA Times, USA Today and has appeared on Headline News and Anderson Cooper 360.

Good Afternoon,

Thank you for this note. We cannot confirm that you have reserved a space in the orientation reservation system at this time. Please reply with your PID when you have completed and paid for an orientation date (you may pick anyone that is available to you) so that we may switch you into the August session.

Please let us know if you have any further question.

Thank you,

NSCPP

Hi Ms. Bridger,

I am emailing you regarding my plans for CTOPS. I have reviewed the dates, and my father has contacted NSCPP and has also talked to Scarlett about coming down on Thursday and Friday for the orientation. Do to various commitments, this is the only date I can make. Please feel free to contact me with any questions or concerns.

Sincerely,

Subject: RE: Last minute items...

Hi Beth: I need 17 tickets total. And the dept staff just went outside to take a high resolution photo for me. I am happy to pay for the extra tickets. And I deeply appreciate you working that out for me.

I will email the PHOTO to you in a few minutes.

Best, Altha

Professor Cravey-

If you could, by 2pm, I will need your final count for tickets and head shot if you have one. I have to get this information to our ticket person and marketing person for tonight's game.

Thanks so much!

To: Bridger, Beth <bridgerb@email.unc.edu>; ePro Users <epro_users@listserv.unc.edu>
Subject: [epro_users] Agilent Technologies Available in eProcurement

---

Agilent Technologies Available in eProcurement

Effective today, the Agilent Technologies catalog is available as an eProcurement Vendor Catalog. You will be able to log in to eProcurement, place your order with Agilent, and have it billed to your University account. All future purchases from Agilent need to be made through ePro. Orders can **only** be placed with this vendor through Vendor Catalog.

ONYEN and password caution

If a vendor's ePro site asks for your username and password, **DO NOT ENTER** them because you think it is a required step to access the ePro vendors – it is not. This usually indicates an issue with the vendor's punchout site. If this occurs, please close the browser and place a remedy ticket by calling 962-HELP, or going to help.unc.edu. **The ticket should be addressed to CONNECTCAROLINA-EPRO.**

Window Shopping with Two Vendors

Users are still experiencing issues when window shopping using one Internet browser. This has led to two different vendors' parts/items being included on the same purchase order. To prevent this from happening, please follow the steps listed below if window shopping or comparing two vendors:

1. Two different browsers should be utilized (i.e. Internet Explorer and Mozilla/Firefox).
2. Once the vendor is chosen, close the other browser before placing the order with the selected vendor.
3. Click **Create Order** on the menu on the left hand side of the page under **eProcurement**.
4. Follow normal procedures to place order in chosen vendor catalog.

Developing An Effective Peer Mentoring Program Supporting First-Generation College Students
Wednesday, March 6 ~ 1:00-2:30pm EDT

Registration - http://www.innovativeeducators.org/product_pi/1019.htm

Innovative Educators

Free Resources

- **NEW ~ Have a higher ed question? AskIE!**
  - How can peer advising help with retention?
  - How can I support first generation students?
- The Role of Academic and Non-Academic Factors in Improving College Retention
- Peer Mentoring Resource Book
- Peer Mentors - University of Michigan
- Why Peer Tutoring Might Be Helpful for Your College Student

Webinar Overview

In these difficult economic times of budget cuts and limited resources determining best practices for making the most of existing assets while continuing to serve students effectively is critical. First-generation college-goers experience a variety of challenges as they enter and move through higher education. In fact, much of the existing research indicates that students whose parents did not attend college are more likely than their non first-generation counterparts to be less academically prepared for college, to have less knowledge of how to apply for college and for financial assistance, and to have more difficulty in acclimating themselves to college once they enroll (Tym, et al., 2005). As Vargas (2004) explains, low-income, minority, and first-generation students are especially likely to lack specific types of "college knowledge." Zimmerman (2000) asserts that at-risk students are less likely to seek help when they need it. As such, educational institutions must provide students with specific types of resources and support to insure that they move through college successfully. Peer mentoring programs like the one to be described here can serve to supplement existing programmatic and institutional efforts to support first-generation students, while building capacity and empowering students through the development of critical college knowledge.

Webinar Objectives

Participants will:

- Gain a better understanding of the role peer mentoring can play in supporting first-generation college students to degree completion;
- Learn about best practices for identifying and selecting peer mentors;
- Determine which peer mentoring services are appropriate for your campus and student population;
- Learn best practices for delivery of peer mentoring services;
- Learn how to empower peer mentors and mentees through the peer mentoring relationship;
- Acquire knowledge and skills to build programmatic and institutional capacity through the use of peer mentors;
- Discuss various methods for evaluating the outcomes and effectiveness of your peer mentoring program.

Subject: Final S-A Missing Book List

Attach: Final Book List_2.14.13.xlsx

All,

Please find attached the final list of all student-athlete books that need to be turned in to Nate immediately. I appreciate your patience as our department has been working diligently all week to obtain the necessary information to determine the status of all S-A books. This has been a learning process for all of us and going forward we will be able to make the return process easier and more efficient. All student-athletes that are on the attached list did sign and pick up the books listed. I have copies of the receipts from the book store as proof that the books were picked up. Please make sure that these student-athletes have returned the necessary books to Nate by tomorrow afternoon! Charges will be placed on their accounts at the beginning of next week.

Please feel free to contact me with any questions. Thank you all for your help.

Samantha

Subject: Re: Training Meeting on Study Skills
Good morning,
Over the years, I've found that "study strategies" are one of the main "contents" in tutor training. Like in SI and other CLA, we are helping with learning _*strategies*_.
So, that has meant that I have broken up "study strategies" into the general areas of time management, reading, lecture notes, memory, and so on – the very categories one would find in Walter Pauk's various editions of *How to Study in College* and/or the various chapters in any number of first-year seminar books that have study strategies.
The trainer's task then, can be, to read up on a number of topics on, say, reading strategies or time management and look for the common elements. Online handouts and information are abundant, and helpful. But, as a master teacher, look for the common elements. Create that as an overarching schema – for a handout, for writing on the board. **(and I'll give one at the end, in case you need one to do, quickly ☺).**
Then, ask your tutors "what do you do (when you are reading; to take notes, to manage your time. . . . whatever topic you've centered on). They can simply give them, or they can work in pairs and then share – whatever you like. List those on the board or paper or some way, for whole-group sharing. IF you have shared your schema in advance, you can direct the categories. If you save it for later, you can do the grouping/creating of categories after you elicit the strategies. BTW, tutors often have fantastic strategies – I've learned a lot – PLUS, it's really good for them to hear that other good students use a multitude of strategies, successfully. Go ahead and make the point that tutees will use different strategies, too, and that no one strategy is the only "right" one.
If time permits, it's fun to practice a strategy-not-your-own preferred method in the session, as that is instructive in how to help someone who does not use your own strategy. I often assign one-two pages of one of the books I've mentioned above, but you can use anything you find online as well. Use an article on the study strategy you've chosen for this it IS your "content".
So yes, this means that I will do sessions on reading, note taking, and on test taking (and anxiety) at the very least for training.
So, as promised, here is the very simple nutshell idea for reading. I am using reading because SO OFTEN, it boils down to the tutee hasn't read actively, does not understand (is trying to memorize) what she has read, does not know that reading is the act of making/creating meaning. So, the activity is called BEFORE, DURING AND AFTER reading strategies. Please UNDERSTAND that I am simplifying on purpose – this is and must be a task for tutors to remember easily and to SHARE easily with others. There is more going on. Of course.

1) Ask your tutors: What do you do when you read a textbook? What about a math textbook? What about an article or collection of readings?
2) Gather that all up. See if it can be put into the simple categories of before reading strategies (survey, question, look over, use the table of contents to create organization of the reading. . . . at least, see how many pages!); During reading (take notes, make note cards, highlight, check to see if I understand, stop to read it over, be sure I understand, and so on) CAVEAT here: It is much better to highlight or take notes just after reading a small section rather than as you are reading. You will highlight less. AFTER reading (highlight, take notes, [yes, I have these twice}. RECITE and REVIEW – look at them again, within 24 hours, don't wait until the test ORGANIZE – put together with class notes, make or clean up the map or outline. RECITE – actively make up potential test questions, put stars next to important material.
3) Ask if they have found a strategy they don't do. One that is intriguing – one they might try out.
4) Ask if they have heard of a strategy they might use with a particular student (do not share names). Why might that work? HOW might that work (see above, and if time permits, do the practice, on some handout on reading strategies.).
5) As you repeat this activity, you too will learn more strategies that the best and brightest are using – your tutors. So will they. You and they will enlarge your "toolkit" of strategies to use/suggest with struggling students. You'll also find that certain strategies are used more frequently in particular subjects. . . ah, yes, there is research on that.

Cheers,

Subject: Training Meeting on Study Skills
Hello All,
I'm planning my next PAL training meeting on incorporating study skills into study sessions and I wonder if anyone has any good activities or handouts they can share. I do have some SI materials on the subject but I'm hoping to find something a little more "hands-on" to present. Anything you have to share would be greatly appreciated...thank you!

Subject:	A great question from one of our PAL Leaders

Hello again,
As I am preparing for my training meeting on study skills, one of my PAL leaders commented "it would be nice to learn some techniques to let students know that getting 67% is never "good.'" Does anyone have any thoughts about how to help students who are unmotivated or unrealistic about what it takes to succeed? The old adage "You can lead a horse to water but you can't make him drink" comes to mind but maybe there are some ideas out there to encourage them to strive to do better. Thanks so much…

Subject:	Re: Motivating students to attend SI

Something to consider....I was just told by our Tutoring coordinator that a student who comes to our Learning Assistance Center regularly for math tutoring said she doesn't go to her PAL sessions because she "needs help, not more work." She said the PAL leader announced that she had some activities to do in sessions but somehow that translated to more work in this student's mind. I've asked the PAL leader to be sure to explain the reason why activities are planned and that the students *will* receive "help."

To: SINET@LISTSERV.UMKC.EDU
Subject: Re: Motivating students to attend SI
Hi Hilary.

We are experiencing the same problem with one of our ECON classes. We are working on making the leaders' emails announcing the sessions more 'interesting' putting some more information about difficult topics she will go over, jazzing them up a bit. We are also thinking of three more actions we may take if better emails do not have the desired effect: 1) asking the teacher to allow the leader to give a 5-10 minute demonstration of how an SI session works, at the beginning of class; 2) 3 distributing more detailed information about how and why SI works; 3) re administering the survey with new times (sometimes students change their schedules a couple of weeks into the semester and the first survey results become 'deceiving').

We did #3 in the past, but have never done #1 and #2. I will welcome all your opinions and advice.

Thanks,

Subject: Motivating students to attend SI

Hello everyone,
We have just started SI this semester in our mathematics courses (College Algebra through Diff Eq). Our issue is that we are having trouble motivating students in some of the lower level classes to attend the SI sessions. Here are some things that the SI leaders are currently doing to encourage attendance.

1. Write the dates and times of SI on the board each class period
2. Post information about what will be covered in SI on a website the students can access
3. Send e-mails to remind students about upcoming test dates and relevant SI sessions
4. Personally invite students they sit near in class to SI sessions

We piloted SI in a course last fall (Calc 2). The attendance at SI sessions was quite good. Much better in fact than attendance this semester in the lower level courses. We don't want to use a stick (e.g. requiring attendance) to try and get struggling students to attend SI because we feel that it will change how they perceive it and consequently how effective it is. Does anyone have any ideas how we might encourage them to attend?
Thanks for the help,
Hilary

Attach: Observation Form.doc

Here's the one that KSU uses. I like the bottom of the 3rd page – it sets up strengths, goals, and ways to actually reach the goals. For example, if the goal is to improve wait time, ways to reach the goal would include: singing "Twinkle Twinkle", thinking of a follow-up question, looking through the class notes to find the answer (so that you can direct the students to the answer), etc. One way to improve wait time cannot be "wait longer." Page 4 is nice as it allows the observer to have more space for qualitative observations.

Happy Friday Jeanne!

Hope all is well.

Congratulations on your new student success initiative with Supplemental Instruction!

Attached is a rubric the Center for Learning And Student Success at Florida Atlantic University uses to evaluate our SI sessions. Not only do we evaluate sessions as professional staff, but we make it mandatory for our SI Leaders/Tutors to do 2 peer observations. I have attached that document also. Additionally, in the training binder from UMKC under the Supervisors Guide (page 30-31) there are some additional observation guides you can utilize.

If you have any questions or need more information, please do not hesitate contact us.

Have a great day!

Hello,

Our department is holding our first SI sessions this spring and are considering ways to evaluate SI sessions. Ideally, I would like to observe a few sessions each semester and provide SI leaders with feedback to help build their skills and make sessions more effective and helpful to students. Does anyone have a rubric that they use to evaluate sessions that they would like to share? Any advice is welcome!

Thank you,

Goals for Future Sessions (Brainstorm together)

Goal 1:

2 or 3 Ways to reach Goal 1:

Goal 2:

2 or 3 Ways to reach Goal 2:

Questions for the Observer:

What are some processes you think worked well in this session?

What are some teaching techniques that you would like to try in your own sessions?

What are some processes that you think didn't work as well as they could have? Provide tips to help this leader in these areas.

How can this leader improve as an SI leader? What can he/she continue to work on?

Comments/notes:

*After discussing with leader, please make **3** copies of this completed observation. Keep one for your own improvement as an SI Leader (last page especially), give one to the leader you observed, and turn **2** in to the SI Coordinator for both of your files.

Subject: Re: Motivating students to attend SI

Hello,
In a conversation with my Director the other day about at-risk populations, it was discussed that sometimes there are more underlined problems going on with students that are keeping them disconnected from their studies. Yes, we need to explain our purpose and reasons that lead to student success, but if we "see" that it is greater than "laziness" announcements about counseling services on campus is not a bad suggestion. I would suggest speaking with your particular department on your campus to see if they can give any information that you can send out as a "tip" to your students to just let them know..."we are here for you."

Subject: Re: Motivating students to attend SI
Something to consider....I was just told by our Tutoring coordinator that a student who comes to our Learning Assistance Center regularly for math tutoring said she doesn't go to her PAL sessions because she "needs help, not more work." She said the PAL leader announced that she had some activities to do in sessions but somehow that translated to more work in this student's mind. I've asked the PAL leader to be sure to explain the reason why activities are planned and that the students *will* receive "help."

Subject: Re: Motivating students to attend SI
Hi Hilary.

We are experiencing the same problem with one of our ECON classes. We are working on making the leaders' emails announcing the sessions more 'interesting' putting some more information about difficult topics she will go over, jazzing them up a bit. We are also thinking of three more actions we may take if better emails do not have the desired effect: 1) asking the teacher to allow the leader to give a 5-10 minute demonstration of how an SI session works, at the beginning of class; 2) 3 distributing more detailed information about how and why SI works; 3) re administering the survey with new times (sometimes students change their schedules a couple of weeks into the semester and the first survey results become 'deceiving').

We did #3 in the past, but have never done #1 and #2. I will welcome all your opinions and advice.

Thanks,

Subject: Motivating students to attend SI

Hello everyone,
We have just started SI this semester in our mathematics courses (College Algebra through Diff Eq). Our issue is that we are having trouble motivating students in some of the lower level classes to attend the SI sessions. Here are some things that the SI leaders are currently doing to encourage attendance.

1. Write the dates and times of SI on the board each class period
2. Post information about what will be covered in SI on a website the students can access
3. Send e-mails to remind students about upcoming test dates and relevant SI sessions
4. Personally invite students they sit near in class to SI sessions

We piloted SI in a course last fall (Calc 2). The attendance at SI sessions was quite good. Much better in fact than attendance this semester in the lower level courses. We don't want to use a stick (e.g. requiring attendance) to try and get struggling students to attend SI because we feel that it will change how they perceive it and

consequently how effective it is. Does anyone have any ideas how we might encourage them to attend?
Thanks for the help,
Hilary

Webinar Overview

Online learning is a growing trend. Instructors need to be prepared to develop an online course that increases student engagement and learning. How do you decide which delivery mode is best suited for your course: face-to-face, online, or hybrid? What are the benefits of online and hybrid courses? Are some subjects more suited to one style of delivery over the other? What are the best practices for developing and delivering online and hybrid courses?

This webinar will answer some of the most pressing questions about course delivery today. Participants will discover how to create online learning environments that lead to student success based on best practices and trends nationwide.

Webinar Objectives

- Articulate the benefits of online or hybrid delivery methods
- Explore best practices and nationwide trends
- Describe strategies for developing and delivering an online or hybrid course
- Identify tools for assessing whether a course fits comfortably into a face-to-face, online, or hybrid delivery mode
- Discover how to create online learning environments that lead to student success

Webinar Speaker(s)

Debra Runshe is an Instructional Development Specialist at Indiana University. She assists staff and faculty in addressing complex teaching and learning issues relating to teaching methods, assessment, and the use of instructional technology. Her dedication to quality teaching, has led to her involvement in many national endeavors. As a member of the Carnegie Foundation's CASTL Program: Scholarly Inquiry about Active Pedagogies cluster group, she explored active learning pedagogies in universities across the nation and presented the findings nationally. She has been involved in several grant projects funded by: Fund for the Improvement of Post Secondary Education (FIPSE), National Science Foundation (NSF), and Department of Education (DOE). Presently, as a member of Cohort VI of the Inter/National Coalition for Electronic Portfolio Research she is exploring the use and best practices in portfolio learning. She is also participating in the FIPSE project: "Connect to Learning: ePortfolio, Engagement, and Student Success," a nationwide educational innovation project focused on exploring and strengthening best practices in ePortfolio pedagogy.

Subject: Drive In Conference Save the Date
Attach: Save the Date.pdf

Greetings Academic Professionals,

It is time for NC State's ASPSA to announce the theme of the12th Annual Drive-In Conference------

Lights, Camera, Action: The Spotlight is on Academic Support for Student Athletes!

The theme is in reference to the myriad of academic controversies appearing in the media. We are extremely excited for the event, and would like invite you and your staff to join us. Please see the attached 'Save the Date' and pass it along to your staff and campus colleagues. The conference will feature presentations from three ACC institutions - N.C. State, Clemson, and Virginia - as well as a panel discussion including the Directors of Academic Support from N.C. State, Georgia, UNC Charlotte, North Carolina Central, Elon, and Richmond.

No need to RSVP now; a formal invitation will be headed your way.

Don't forget to save the date and spread the word! See you in April.

Inclement Weather Causes Game Cancellations

Sunday Baseball and Softball Events Cancelled

Due to the snow storm currently blanketing the Greenville, N.C. area, which is expected to continue through Sunday with freezing temperatures, the baseball game against Virginia and the final day of games in softball's Pirate Clash originally scheduled for Sunday have been cancelled.

Anyone who has purchased an individual game ticket for the Sunday baseball game against Virginia may exchange the ticket for a future Pirate Baseball home game this season, with the exception of the NC State contest on April 2nd.

The women's basketball team, which defeated Conference USA's top-ranked squad from SMU this past Thursday, is still scheduled to play the Southern Miss Golden Eagles on Sunday at 1:00 p.m. inside Williams Arena at Minges Coliseum. Adult tickets are $5 each and youth ages 17 and under receive free admission.

From:	Chancellor's Task Force on Technology Commercialization <noreply@qemailserver.com>
Sent:	Sunday, February 17, 2013 10:53 AM
To:	Bridger, Beth <bridgerb@email.unc.edu>
Subject:	Reminder: UNC Faculty Commercialization Survey

Dear Carolina Faculty Member,

Chancellor Thorp has assembled a Task Force on Technology Commercialization that is charged "to develop an integrated strategy and plan of action for commercialization of technology at UNC". Your views on what can be done to enhance technology development and commercialization at the university will be invaluable to the Task Force.

The Task Force wishes to learn about your experience on this campus and your experiences at your previous institutions with respect to technology commercialization. We ask you to fill out a short survey that will take about 10 minutes to complete. The survey is designed to gain a broad representation of campus views on technology development and commercialization in the context of the mission of the university.

Follow this link to the Survey:
Take the Survey

Or copy and paste the URL below into your internet browser:
https://unc.qualtrics.com/WRQualtricsSurveyEngine/?Q_SS=3t839PCqB5DzoMt_dmPcvT1TUYYBgd7&_=1

This data generated from this survey will be incorporated in the Task Force's report to the Chancellor. All responses are confidential and will be used in aggregate statistical analysis. No particular individual will ever be identified in any report, presentation, or publication in which the data from this survey are used. This survey is conducted under an approve IRB.

The Task Force sincerely appreciates your efforts in completing this survey.

Sincerely,

Dhiren Thakker

Maryann Feldman (please address questions to feldmanm@email.unc.edu)

PLEASE COMPLETE THE SURVEY BY FEBRUARY 22, 2013.

Subject:	FORMAL NOTICE: Message from Chancellor Thorp

Dear Carolina students, faculty and staff,

Earlier today, Washington University in St. Louis announced that I will become the provost and hold an endowed professorship in the departments of chemistry and medicine. The appointments are effective July 1.

When I announced my decision last September to step down as chancellor, I was humbled and flattered by your outpouring of support. This exciting new opportunity represents the best of both worlds. My new positions will enable me to return to my passions of teaching and research while, at the same time, as the chief academic officer, will allow me to continue many of the administrative duties that I've enjoyed as chancellor.

For more than two years, there is no question that we have faced some of the most difficult issues to come before the University in decades. We have met those challenges head on and put much-needed reforms in place. It's been painful, but we've become a better university as a result.

I'm proud of the University's recent accomplishments, including making our first top 10 appearance in federal funding for research and development; growing undergraduate admissions applications by 43 percent - the largest five-year gain in recent campus history; positioning Carolina as a leader in our country's debate about college costs, retention and attainment; bringing the national spotlight to our efforts to promote innovation and entrepreneurship; and working successfully with our local community partners, especially the Town of Chapel Hill.

I'm confident that Carolina is in a better place, and the next chancellor will continue to build on the progress we've made working together. I expect a seamless transition this summer and pledge to continue to do everything that I can until the day I leave South Building to make sure that my successor is in the best possible position to succeed.

I will always love Carolina. This University and this community have been my home for more than 25 years, and have meant more to me personally and professionally than I can measure or describe.

With great respect and appreciation for all of you and what you do for Carolina,

- Holden Thorp

Tip: Sometimes we must take a detour before we can get to our destination!

Have you ever been on a trip and suddenly seen a detour sign ahead of you? Perhaps it was placed there because of an accident or road construction. In any case, your journey was about to turn in a different direction. Having to go in a different direction may have been upsetting to you; especially if you were in a hurry or if you were trying to reach your destination to meet a deadline. But, detours in traffic, and in life, are a fact that no one can deny.

As I look back on my own personal journey, I am amazed at some of the detours I have taken that have led me to where I am today. I started my aspirations to success as an assistant paperboy. A few years later I got a job as a life-guard. Next I was a construction worker and then later became a delivery driver for the company for which I worked. I eventually became a full-time student and after college, the youth director of a church. After that, I was a school teacher and then a school principal. My life took another turn and I became an associate pastor and later became a pastor. Then I moved into the world of speaking and became a motivational speaker. And finally I reached my current destination of business owner and entrepreneur. All of those experiences have shaped my life, and you know what? I am grateful for each one of them. There is no way that I could understand or be where I am today if I had not had the opportunities that I have had to take detours in life.

If you have been fortunate enough to have had one job for forty years, are now retired and living on a nice pension with lots of benefits, then I have one word for you: Congratulations! But, I think all of us would agree that scenario is more of a rarity now than it was just a few decades ago.

The fact is that we all learn and grow on a daily basis. If every person reading this Tip could share their story, they would reveal that many times they have ended up in places they never imagined they would have gone. But, detours are not all bad. A detour can cause us to slow down in life. Sometimes we all need to stop and smell the roses. Detours cause us to see new scenes as we travel roads we perhaps would never have traveled otherwise. And, it is on those roads that we see sights, meet people, and have experiences that we would have missed if we had not been on the detour.

Just last year I took a detour and ended up on the backside of nowhere. But, I stopped at a roadside restaurant that had the best peach pie I've ever had in my whole life. What a great detour *that* was!

Detours can also help us find shortcuts. It is amazing to me how much traffic gets log-jammed on the road when there may be a shortcut only a couple of blocks away that we could take if we only knew our way around. A detour helps us to find new ways to get to where we are going.

Detours can happen in our personal relationships as well. I would venture to guess that none of us who have children realized the extent or cost of the commitment we were making when we became parents. Having a family certainly changes the direction of almost everything we wanted to do in life. Hopefully, it turned us in a better direction than we would have been going otherwise. Yet, even in families, sometimes relationships end. But still those kinds of painful detours can lead us to do things better at our next given opportunity.

The older I get, the more I appreciate having to take a detour.

Although it is forced upon us at times, it pays rich dividends because it does things for us that we would otherwise have missed. Anyone who has lived long enough to see the power that a detour can bring into a person's life has no doubt come to a place in the road where they simply could not go on the route they had originally intended any longer. The detour becomes necessary, and ultimately it becomes a blessing because it leads them to their final destination.

The next time you are traveling and come to a detour in the road, rather than being frustrated and upset, why not ask yourself where this experience could take you? It may be something as simple as finding a great piece of peach pie, or it may mean a new job opportunity, or perhaps running into the love of your life. Let a detour become your friend because it is on that journey that you may find everything that you are looking for without realizing that was the purpose of the detour all along!

Tip: Sometimes we must take a detour before we can get to our destination!

Have a great week! God bless you!

Subject: FORMAL NOTICE: Payment Card Industry Data Security Standard (PCI DSS) Online Training

---

To: Credit Card Merchants
University Business Managers

From: CERTIFI Committee

The University's credit card policies as well as Payment Card Industry Data Security Standards stipulate that everyone involved in the credit card environment is required to complete PCI training on an annual basis. Since credit card information is considered to be sensitive information, everyone involved in the credit card environment must also complete the ITS Security Awareness Training. These trainings apply not only to those who have access to full credit card numbers, but also to those who have access to truncated credit card numbers that can be found in credit card receipts, payment gateways, and merchant statements. These trainings also apply to IT support/ developers of applications and software that access or process credit card information or interface with credit card payment gateways.

In order to provide education and training about protecting payment card data with the PCI Data Security Standards, an online training portal has been developed with Vigitrust. A guide for registering and using the portal is available on the Finance Training web site at http://finance.unc.edu/finance-division/training/training-overview.html#merchant. Two online training courses, PCI Basic 2013 and PCI DSS Comprehensive 2013, are now available at http://pci.vigitrust.com/unc. Please have all individuals in the credit card environment register through this link using their University email address.

-The course titled "PCI DSS Comprehensive 2013" should be completed by the following:
1. The individual who completes the annual Self-Assessment Questionnaire.
2. Individuals who are the IT support of payment applications and software.
3. All CERTIFI (Compliant Electronic Receipt Transactions through Innovation and Financial Integrity) committee members.

-All others involved in the credit card environment is required to complete the course titled "PCI Basic 2013."

ITS Security Awareness Training is located at https://itsapps.unc.edu/ITSSelfStudy/.

It is the responsibility of the department's Credit Card Merchant Contact to make sure that everyone involved in the credit card environment in their area completes the appropriate PCI training course and ITS Security Awareness Training in a timely manner. The deadline for completing the PCI training and ITS Security Awareness Training is March 15th, 2013.

The CERTIFI Committee appreciates your support to complete this training program. If you have any questions, please email pci_training@unc.edu or jenacton@unc.edu.

15 Effective Ways to Recruit the Coaches of Your Prospects

It's no secret that the current high school and club coaches are holding more and more power over the recruiting process, especially since so many college coaches are being forced to keep up with their competition by going through those prep and club coaches to arrange conversations with younger and younger athletes.

The result? Saavy college coaches are realizing they need to systematically recruit the coaches of their prospects.

Of course, that's a much more difficult challenge:

Recruiting a prospect and his or her parents has a pay-off for them, in that they will receive scholarship money or at least the opportunity to have sports be a part of their college experience. Their coaches, on the other hand, are (at their best) feeling a sense of needing to protect and shield their young athletes from college recruiters, or (at their worst) bent on guiding their young athletes towards the program that will bring the most notoriety and prestige to the high school or club program that they play for currently.

No matter their motives, they are now a major player in the battle for the best recruits. And, how you "sell"

them on your program is going to be an increasingly important piece in the overall recruiting puzzle - and how successful you are at it.

With that in mind, we compiled data from our **On-Campus Workshop** focus groups and our other **research** and came up with a list of the most successful ways to effectively recruit the coaches of your current high school and club prospects. I don't see it as being critical that you are...

Hey Coach: Got "Lagniappe"?

*by **John Brubaker**, Author & Performance Consultant*

Coach Brubaker will be one of our featured speakers at the upcoming National Collegiate Recruiting Conference in Charlotte, North Carolina. To find out more about the event, click here.

The Super Bowl just witnessed by millions took place in New Orleans, Louisiana. While the game and its pageantry were the main attraction, the experience of New Orleans itself is a close second.

Why? Quite simply because *lagniappe* is part of their culture. The word *Lagniappe* (pronounced Lan-Yap) is a creole word, that originated in Louisiana which means something extra or a little more. It's that little something extra someone gives you as their way of saying thank you or expressing appreciation.

I can assure you there was a lot of *lagniappe* going around New Orleans during Super Bowl week; everyone from store owners to street vendors make it a best practice. It isn't just during Super Bowl week though, "a little more" is the norm in Louisiana and the exception most other places.

Recruiting is big business and in every business there is a line where exceptional service and profitability meet but I would argue losing prospects because you don't...

Youngest Head Coach in NCAA Takes on Challenge of Rebuilding Program

by Doug Roberson, Atlanta Journal Constitution

Two years ago, Oliver Reynolds was a senior at Samford, leading the Bulldogs to the NCAA men's tennis tournament.

Now, Reynolds, just 24 years old, may be the youngest head coach in any Division I sport (those records aren't kept).

An Atlanta native, Reynolds is in charge of The Citadel's program, which like Samford plays in the Southern Conference.

"Everybody said as long as you know what you are doing and get the job done, it doesn't matter what age you are," he said.

Reynolds took over a program that hadn't had much success. The Bulldogs hadn't won a conference match since March 23, 2010.

Kemper Baker, who coached Reynolds at Samford and brought him with him to The Citadel as an assistant coach, left for the College of Coastal Georgia in late January and Reynolds was promoted to interim coach on Feb. 4. This year's team has yet to start conference play, but under Reynolds it is 5-1.

"I've been able to learn as much as I can about college tennis in the past year and a half," he said. "I'm not nervous. Everything is going smoothly since everything happened. I'm just trying to keep the guys focused"...

Watch Our Latest Free Webinar: "Creative Ways to Get Your Prospect to Talk"

Last week, Dan Tudor taught over 100 college coaches how to interact their prospects more effectively in our "Creative Ways to Get Your Prospect to Talk" webinar class, hosted by NCSA Athletic Recruiting.

If you weren't able to attend live, you can view the recorded 20-minute special educational workshop this week!

CLICK HERE TO WATCH THE WEBINAR

You can also view our most recent series of webinar sessions when you click that link.

In this age of overcoming complacent recruits who are thirsty for an original message from college coaches who are recruiting them, this is must-have information.

Looking for more recruits to build your next recruiting class? More and more coaches are using **NCSA Athletic Recruiting** to help construct great classes. If you haven't registered to see the incoming 2014 and 2015 prospects they have listed in their database, **click here** to get your free access.

Dan Tudor to Teach Special Four Hour Message Session at 2013 NCRC

On the last morning of this year's

National Collegiate Recruiting Conference, Dan Tudor will teach a special four hour session on creating a smarter, more strategic recruiting message. This special session will incorporate the new NCAA recruiting contact rules and timelines, which are "game changers" for college recruiters.

That's in addition to the incredible line-up of coaches, speaker and recruiting experts from around the country that are going to be a part of this annual event.

If you're serious about upgrading your recruiting skills heading into the new year, you need to be at this one-of-a-kind event, coming up this June 7-9 in wonderful Charlotte, North Carolina.

RESERVE YOUR SEAT NOW AND SAVE!

UPDATE: Discounted hotel rooms are still available for early registrations!

It's going to be our best event ever, and we want you there to hear from the best minds in the business!

College Swim Coaches Look To Stand Against Recruiting High School Juniors

by Swimming World Total Access

Recently, the NCAA approved a boatload of recruiting deregulation that opened the floodgates for communication between coaches and recruits beginning this summer. The NCAA has, however, tabled the possibility of opening the door even wider by allowing high school juniors to also be contacted.

The College Swim Coaches Association of America looks to stand against this tabled rule from ever going into the rulebook. CSCAA Executive Director Joel Shinofield recently sent an open letter to his membership calling for all college coaches to fight to keep high school juniors from entering the recruiting pool in this way.

To put that in perspective, Olympic gold medalist Katie Ledecky (pictured above) would have been thrown into the recruiting pool this summer after completing her sophomore year at Stone Ridge. So, Ledecky, who will turn 16 in March, would see her incoming communication from coaches skyrocket heading into her junior year of school.

Here is Shinofield's letter in full...

Are Colleges Stalking Student Athletes?

by Kayla Faria, The Daily Record

A university that stalks or bans student-athletes' Facebook and Twitter accounts may be legally out of bounds, sports law experts say.

University athletic departments are following the trend set by professional sports teams to regulate social media. But university officials who ask student-athletes for social media passwords or registered handles to monitor their activity or prohibit them from using social networking sites are violating freedom of speech rights and exposing schools to lawsuits by increasing legal liability, law experts said at a recent sports law symposium.

At a global leaders forum in Toledo, Ohio, on Feb. 1, University of Michigan Athletic Director Dave Brandon admitted that the university hired consulting firms that would "friend" and "follow" student-athletes using a bogus account, then monitor their activity on Facebook and Twitter - essentially "catfishing," before the term became synonymous with Notre Dame linebacker Manti Te'o, who maintains that he was duped into an online relationship with a woman who never existed...

10 Year Olds Being Recruited Now May Not Be Able To Play In High School

by Bob Cook

About every state high school athletic association has rules regulating the recruitment of tween and teen students for the purpose of athletics. Thanks to a story that appeared Jan. 26 in The Times of Northwest Indiana, I know now high schools in that state are worried about recruitment of

athletes who have just reached double-digits - not in basketball scoring average, but in age.

Basically, what the bylaw, which went into effect for the 2012-13 school year, does is extends rules governing sports-related transfers during high school way, way back to the latter stage of elementary school. Here is bylaw 20-2 in full:

It's a shame a 10-year-old and his or her family, and a state high school athletic association, has to worry about pre-pre-teen recruiting, but as long as coach's fortunes and jobs depend on a won-loss record, it's going to be hard to stop anyone from doing it...

Information for Employees

2012 Total Compensation Statements

FROM: Ashley Nicklis, Benefits & Work/Life Programs
Office of Human Resources

This week, staff and faculty members will receive an exciting piece of mail – their personalized Total Compensation Statement from the Office of Human Resources.

The statement provides each employee's total annualized salary and benefits contributions, leave earnings, and the amount the University contributes to individual benefits. All amounts shown are as of Dec. 31, 2012.

OHR is committed to ensuring that employees have all of the information that's necessary to make their employment experiences as positive as possible. These statements are just part of our effort to ensure that all employees understand their compensation and benefits, as well as the value of the University's financial commitment to each employee.

We encourage employees to carefully review this information. Having these figures readily available is essential to understanding how employees and the University share these costs.

MetLife Group Term Life Insurance Special Enrollment

FROM: Ashley Nicklis, Benefits & Work/Life Programs
Office of Human Resources

In January 2013 we experienced a 5 percent decrease in MetLife Group Term Life Insurance rates! Now it's time to ask, "Has your life insurance coverage kept up with your life?"

The University of North Carolina at Chapel Hill realizes that life insurance is an important part of your benefits program, and we have arranged for MetLife to offer a special enrollment opportunity that allows you to:

- Enroll in life insurance or increase your coverage with fewer health questions
    - Enroll your spouse and/or domestic partner (subject to full evidence of insurability)
    - Enroll eligible children with no questions asked
- Benefit from a variety of special features including will preparation and estate resolution services that can be used today and in the future
- Pay premiums through convenient payroll deduction

Starting the week of Feb. 25, MetLife Group Term Life Insurance information and enrollment instructions will be delivered to each employee's campus mailbox address. ***The materials will show the MetLife logo – please do not discard them.*** Employees should receive reminder post-cards and a customized packet showing current coverage and/or available coverage options available as a result of this enrollment period.

Life Insurance benefits from the University of North Carolina are convenient and affordable. **Take advantage of this opportunity to update and view your current coverage online from March 4–22 at www.metlife.com/mybenefits.** First-time users will need to click on the "Register Now" link to create a unique user name and password.

If you are currently enrolled and wish to maintain coverage, no action is required.

If you have questions about your MetLife Group Term Life Insurance, contact a MetLife Customer Service Consultant toll-free at **877-638-4671**, Monday–Friday, from 8 a.m.–11 p.m.

University Leadership Education and Development (ULEAD) Program Accepting Applications

FROM: Verita Murrill, Training & Talent Development
Office of Human Resources

The Office of Human Resources is accepting applications for its University Leadership Education and Development (ULEAD) program, which helps University managers strengthen quality leadership competencies and skills through collaboration, strong curriculum and knowledgeable faculty.

For more information on the program, including eligibility, a video featuring recent ULEAD graduates, and the schedule of interest meetings, visit hr.unc.edu/training-talent-development/specialized-programs-and-resources/ulead/.

The program is designed to help high performing, highly motivated managers meet the challenges of the changing higher education environment.

Whether you want to become a stronger leader, advance in your career or simply learn innovative techniques that will enhance the performance of your unit, speak with your manager today about enrolling in ULEAD. This program provides an opportunity to develop the skills necessary to understand, embody and model the mission, vision, values and goals of the University.

ULEAD participants are nominated by their managers to take part in a rigorous curriculum composed of several core classes, a comprehensive assessment, peer coaching and team

projects that are designed to have a significant impact on improving institutional effectiveness. Class topics include crucial conversations, negotiation, leading change, strategic thinking, appreciative leadership and the business of higher education.

This program is free for all participants, but only a limited number of applicants are accepted. Applications will be accepted through March 15, and are available online at http://hr.unc.edu/form-finder/training-and-talent-development-forms/ulead-application-form/ or by contacting William Frey (will_frey@unc.edu) in OHR at 962-9685.

ULEAD

University Leadership Education And Development

Are you ready for your next step? Whether you want to become a stronger leader, advance in your career or simply learn innovative techniques that will enhance the performance of your unit, take a look at the ULEAD program!

ULEAD provides an opportunity to develop the skills necessary to understand, embody and model the University's mission, vision, values and goals. Challenge your abilities with this competitive four-month program.

Participants are nominated by their managers to take part in a rigorous curriculum composed of core classes, a 360-degree assessment, peer coaching and team projects that are designed to have a significant impact on improving University effectiveness.

This program is free for all participants, but only a limited number of applicants are accepted. Apply online at http://hr.unc.edu/training-talent-development/.

UNC HUMAN RESOURCES

Career Development of Student-Athletes: Assessment Components

The researchers are hoping to collect data on the following variables in order to obtain a comprehensive view of the career development of student-athletes at a Division I institution. Any feedback on additional variables to consider or existing tools that examine career development would be greatly appreciated!

- Career readiness of student-athletes
  - Perceived career readiness (*Note: a person who responds low in each of the following categories has high career readiness)
    - Career choice anxiety
    - General indecisiveness
    - Need for career information (before choosing/entering a career)
    - Need for self-knowledge (before choosing/entering a career)
  - Perceived possession of career-related skills
    - Career-related skills (in consideration)
      - Resume writing; interviewing skills; career planning / setting career goals; experience in career field; knowledge of career field; performance in classroom; communication (written; oral); leadership; work on a team; work independently; critical thinking; analytic skills; problem solving; motivation; prioritization; detail-orientation

- Factors influencing career readiness of student-athletes
  - Awareness of available career development services
  - Motivation to utilize career development services
  - Degree of utilization of available career development services
  - Time availability

- Demographics
  - Sport
  - Academic major
  - GPA
  - Gender
  - Age
  - Academic year
  - Ethnicity/Race

About the Instructor

Ron Weisinger has been in software consulting for over 25 years. He has worked with manufacturing, distribution, and consumer product companies during that time. Ron joined Oracle in 1994 and for the last 6 years has been with Oracle University as a Senior Principal Instructor teaching the Supply Chain products including the Agile Collaboration and Administration products.

Save the date

Free Web Seminar!
Introduction to Agile

Oracle University invites you to join us for a Free **one-hour** Web Seminar delivered by **Ron Weisinger**. In this Seminar, Ron introduces Agile's Product Lifecycle Management (PLM) core module – Product Collaboration. Product Collaboration serves as the centerpiece of your PLM system, and interfaces seamlessly with Product Quality Management (PQM), Product Portfolio Management (PPM), Product Cost Management (PCM) and Product Governance & Compliance (PG&C). Ron also describes how Agile's object-oriented approach enables Users to take full advantage of the solution's 'tailorability'. Key features of the User Interface are reviewed and some core functionality is also presented.

This Web Seminar Includes:

- Product Collaboration Basics
- The User Interface
- Lifecycles & Workflow
- Other Interesting Features

See how you can learn locally when you take your Oracle training
Oracle University features Live Virtual Classes, online learning with live delivery of lectures and labs. The trainers are Oracle University expert instructors who deliver an educational experience that is comparable to our traditional in-class training—without the need for expensive travel. In this Web Seminar, you will see online learning in action.

You won't want to miss this Free seminar!

Attendance is limited.

- Higher Education's 9/11: Crisis Management
- Campus Crisis Management Plan (Purdue)
- Emergency Management Plan (Washington and Lee)

Webinar Overview

With so many serious campus incidents in the news, from assaults to shootings to student deaths, higher education administrators are formulating plans on how to communicate, respond, and reach out specifically to parents and families during a campus crisis. This program will present two case studies and, during one scenario, invite the participants to formulate their responses to each stage of a crisis. The presenters will also report on the results of their survey of 33 institutions of higher education about how they communicate with parents in crisis. The purpose of this session is to present best practices in the area of crisis communication with parents, based on literature review as well as real-life experiences of higher education parent programs' professionals.

Webinar Objectives

Participants will:

- Learn to relate the benchmark elements of successful communication with parents and family members during a campus crisis
- Be able to determine what constitutes a good communication plan
- Discover which practices work well and which don't, from the perspective of two parent programs' professionals
- Learn about the interdepartmental partnerships that are necessary for building a successful communication plan

Webinar Speaker(s)

Branka Kristic joined Hofstra University in January 2007 as the inaugural director of the Parent and Family Programs. Before coming to Hofstra, Branka was the Assistant Director of Academic Affairs and Special Programs at Columbia University. Her work with students, parents, and families has convinced her that parents can be essential partners to college administrators in supporting student academic and personal success. Branka holds a Master of Arts in Education from Columbia University, Teachers College, and a Bachelor of Arts from Queens College. Three of her four children are in college or have recently finished it, offering her first-hand opportunities to experience and deal with many frustrations and joys of being a college parent.

Donna Krivoski began working part-time with parents at Lafayette College in 1990 and was assigned the task of developing a full parent services program. Now, as Director of Parent Relations, she oversees a variety of parent publications, committees, and programs. Donna has a Bachelor of Science degree from Shippensburg University. Her experiences in teaching high school, guiding her children through college and working with students, parents, faculty, and administrators in the college setting for over 20 years has given her insight to some of the most effective ways to communicate with parents and collaborate with other campus departments.

Donna Krivoski and Branka Kristic presented at the AHEPPP (Association of Higher Education Parent/Family Programs Professionals) Conference 2010 on the topic of

From:	Chancellor's Task Force on Technology Commercialization <noreply@qemailserver.com>
Sent:	Wednesday, February 20, 2013 3:29 PM
To:	Bridger, Beth <bridgerb@email.unc.edu>
Subject:	Reminder: UNC Faculty Commercialization Survey

Dear Carolina Faculty Member,

Chancellor Thorp has assembled a Task Force on Technology Commercialization that is charged "to develop an integrated strategy and plan of action for commercialization of technology at UNC". Your views on what can be done to enhance technology development and commercialization at the university will be invaluable to the Task Force.

The Task Force wishes to learn about your experience on this campus and your experiences at your previous institutions with respect to technology commercialization. We ask you to fill out a short survey that will take about 10 minutes to complete. The survey is designed to gain a broad representation of campus views on technology development and commercialization in the context of the mission of the university.

Follow this link to the Survey:
Take the Survey

Or copy and paste the URL below into your internet browser:
https://unc.qualtrics.com/WRQualtricsSurveyEngine/?Q_SS=3t839PCqB5DzoMt_dmPcvT1TUYYBgd7&_=1

This data generated from this survey will be incorporated in the Task Force's report to the Chancellor. All responses are confidential and will be used in aggregate statistical analysis. No particular individual will ever be identified in any report, presentation, or publication in which the data from this survey are used. This survey is conducted under an approved IRB.

The Task Force sincerely appreciates your efforts in completing this survey.

Sincerely,

Dhiren Thakker

Maryann Feldman (please address questions to feldmanm@email.unc.edu)

PLEASE COMPLETE THE SURVEY BY FEBRUARY 22, 2013.

Follow the link to opt out of future emails:

Dr. Hallowell Newsletter

www.drhallowell.com **February 2013**

Greetings!

It is a hallmark of the Hallowell approach to ADHD that families impacted by ADHD understand the positives, and the risks, as they work to manage ADHD issues.

Dr. Hallowell's response to a parent concerned about explaining ADHD to her children is a wonderful example of the power of the positive approach. What child wouldn't get excited by his words?!

As always, this month's newsletter provides a healthy "diet" of helpful tips, resources and information. Enjoy!

Melissa Orlov, editor

Dr. Hallowell Explains the Risks of Over-Prescribing Adderall on the Dr. Oz Show

Hallowell Centers Strength-Based Philosophy:

First we search for what is good, strong and healthy in a person, then what is in need of remediation.

The Hallowell Centers integrate the latest research on brain, body and heart. We help people with emotional issues and learning disabilities lead happier, more productive lives through a positive, balanced treatment approach.

FAQ

Q: Our daughter's kindergarten teacher spoke with us about the signs she saw in our 6 year old. We have her 1st appointment coming up and we have filled out the forms. How do we approach the subject of appointments and tests with her? Also, how do we explain this to our 8 year old child who is very inquisitive and will also be tested soon?

A: Any child old enough to go through psychological testing is old enough to be told the test results (though younger children need less detail than older kids). I start with asking them simple questions: "You know how you sometimes have trouble paying attention in school?" Jed nods. "That's because your mind is zipping around all over the place, bursting with new ideas. And that's great! That's why you'll do amazing things and have fun all your life. But you need help taking care of your race-car brain, so I'm going to teach you how to put on the brakes."

SKYPE coaching is available at each Center

Dr. Hallowell Presenter Topics

CONNECT: THE OTHER VITAMIN C - We live under the influence of a dangerous paradox: while we are far more connected electronically than ever before in history, we are disconnecting with each other as well as with the many other connections that give meaning to our lives.
Connection, is as essential for health, success, joy, and longevity as ascorbic acid. Living

Dr. Hallowell on the Dr. Oz Show - The Dangers of Over-Prescribed Medication
Kids who want an "A" in class are now taking medications? "These medications are not M&Ms", says Dr. Hallowell. The casual belief, of taking medications for better focus or to "be number one", is creating dependencies in our young adults. Watch this Dr. Oz video to learn more.

ADHD Diagnosis and Treatment - Do you think you or someone in your family may have ADHD? Read Dr. Hallowell's recommendations on the Dr. Oz website.

Young People with ADHD Earn Less and are More Likely to be Unemployed - A recent study indicates that Young Adults with ADHD have greater difficulty in their careers than those who do not have ADHD. This reinforces how important it is that families directly and aggressively deal with helping children with ADHD develop strategies for success as early in life as possible, using all means that are known to be effective for managing symptoms. Read more here.

ADHD Diagnosis Up Substantially -
Children are being diagnosed with ADHD at a higher rate in recent years. This may be contributed by heightened awareness among parents and physicians. Read more here.

Can ADHD be Confirmed and Predicted by DNA? - A Spanish researcher believes that a DNA chip can help confirm diagnosis, predict how it will evolve and recommend treatment, for people with ADHD. Read More at PsychCentral.

Are Sensory Processing Difficulties an actual "Disorder" or a Characteristic of Another Disorder? - Difficulties tolerating and processing sensory information can be a characteristic of Autism spectrum disorder, ADHD, developmental coordination disorders and childhood anxiety disorders. The use of sensory-based therapies may include activities that stimulate the vestibular, auditory, proprioceptive and tactile systems, and can be helpful as one of the components of a comprehensive treatment plan. Read the article in its entirety in Pediatrics.

ADHD and Adults

Dr. Hallowell 10 Tips on Forgiveness
- Do yourself a favor and practice forgiveness, is Dr. Hallowell's advice during a Sunday Service in Charlotte. Read all the tips here.

The Role of Neuropsychological Assessment in the Evaluation and Treatment of ADHD -
Find out what should go into an ADHD evaluation, who should be doing it, and how to pick the right professional? Listen to the audio file and view the accompanying PowerPoint at CHADD NYC.

Was Your Valentine's Day "Picture Perfect"? - Too many couples find that Valentine's Day is a yearly reminder of what they don't have - the "picture perfect" marriage. Read the four tips for reinforcing that you care every day of the year at adhdmarriage.com.

CrazyBusy Tip

The Importance of a Good Night's Sleep

without enough of it can cause low-grade depression, lethargy, lack of get-up-and-go a demoralizing feeling of purposelessness, and can even lead to an early death.

However, the problem is eminently solvable. In this presentation, I will give you the practical steps you can take to experience the full and marvelous powers of connection.

Best of all, unlike most steps we might take to improve health and well-being, creating a connected life is fun!

I'm eager to share not only what I've learned but what science has proven: connection, the other vitamin C, is the most transformative force for good in all of human existence.

Learn More on Engaging Dr. Hallowell's Speaking Services here.

According to the Division of Sleep Medicine at Harvard Medical School, your body requires sleep the same way it needs to eat, drink, and breathe. Extensive research has been done on the effects of sleep and shows that it plays a vital role in promoting physical health and emotional well-being.

This explains why, after a good night's sleep, you feel better, your thoughts are clearer, and your emotions are less fragile. Without adequate sleep, judgment, mood, and ability to learn and retain information are weakened.

HOW MUCH SLEEP DO YOU NEED?

* Pre-schoolers (3-5 years old) 11-13 Hours
* Children (5-10 years old) 10-11 Hours
* Teens (11-17 years old) 8-9 Hours
* Adults 7-9 Hours

Chances are you are you are like most Americans and aren't getting the recommended amount.

CrazyBusy Tips are available in book, CD, MP3 format and as an iPhone App

Subject: Turnitin Academy - Best Practice: Multiple Submissions

Turnitin Academy

Having trouble? View as Webpage

Best Practice:

Multiple Submissions

Allowing students to submit each draft multiple times before the due date helps them foster the development of their own writing.

Create an incentive to start and submit work early. Students who turn in their work early will have a chance to look at their OriginalityCheck feedback to see if they've adequately integrated their sources and then make changes as appropriate before resubmitting by the due date. There is a 24-hour waiting period before the next report will be processed to prevent devious students from resubmitting their assignments too often to prevent them from trying to iteratively bring down their similarity score.

Enabling multiple submissions also shows that you trust your students, allowing them to see their feedback immediately and take corrective action. This also alleviates some of the anxiety students may have around the use of Turnitin by using it in a non-threatening and supportive way.

This strategy is great at the beginning of a course when students are still adjusting to the new coursework and instructor, and as a way to reinforce the importance of proper source integration. As stakes increase later in the term, you can start to raise expectations as well and not allow the multiple submissions, though formal draft assignments are still recommended.

Learn more about this classroom strategy and more by joining the on-demand Turnitin Academy class, "Best Practices for Teaching with Turnitin."

WHEN TO GENERATE ORIGINALITY REPORTS

There are three options for choosing when Originality reports are generated. These options are accessible when creating or editing an assignment under Optional Settings. Here's what each one means:

Generated Originality Report Settings

Immediately (first report is final) - Originality Reports for all submissions will be generated immediately. Students cannot resubmit papers. Submissions must be deleted by the instructor to enable resubmission.

Immediately (can overwrite reports until due date) - Originality Reports for the initial submission by each student user to this assignment will be generated immediately. Students may resubmit as often as the student wishes until the assignment due date. Originality Reports for the second or subsequent submission will require a 24-hour delay before the Originality Report begins processing. Only the latest submission is available to the instructor or student. Previous versions are removed. Originality Reports will regenerate within an hour of the due date and time to allow student submissions to compare against one another within the assignment. A change in the Originality Report similarity index may result from the regeneration of the reports. This option is typically used when students are self-

reviewing and revising their submissions and able to view the Originality Report. No resubmissions are allowed after the due date and time of the assignment.

On due date - Originality Reports will not be generated for any submission until the due date and time of the assignment. Students may resubmit as many times as needed until the due date and time without receiving reports. Resubmissions may not be made after the due date and time of the assignment.

The NFF California Showcase: Opening New Doors to College

Free events in Houston have set the stage for the inaugural NFF California Showcase, which will provide student-athletes in the region a new opportunity to connect with divisional college coaches from around the country.

IRVING, Texas - Feb. 21, 2013 – Building on the success of similar events in Houston and El Paso, Texas, the inaugural National Football Foundation (NFF) California Showcase, which will take place this weekend at the Home Depot Center in Carson, Calif., has attracted phenomenal interest with more than 600 student-athletes and 30 colleges registered to attend.

"This is going to be a huge success," said **Terry Donahue**, the College Football Hall of Fame coach at UCLA who has organized the Feb. 23 event in conjunction with the NFF Newport Beach Chapter. "It is an incredible opportunity for the kids to continue their education and play the great game of college football, and it's free. It's free to the players, and it's free to the colleges, and nobody is making a dime."

Participants, who all have to meet minimum academic standards, will compete in a series of athletic drills at the event designed to let divisional college coaches assess each player's potential, including a 40-yard dash and several agility tests. Academically, participants must meet at least one of the three following criteria: a GPA of 2.5 or higher; a rank in the top half of his graduating class; or an SAT score of 1000 (math and verbal only) or higher, or an ACT score of 18 or higher.

"We are excited about the outcomes of these events," said NFF President & CEO **Steve Hatchell**. "They are providing hundreds of student-athletes the opportunity to go to college where the path previously did not exist. The local organizers have been very successful at attracting the support required to stage these events. We are really appreciative of Coach Donahue's leadership in making the event happen in California."

Traditional combines charge student-athletes a fee to participate and colleges a fee to attend, but the organizers at the events in California and Texas realized that the fees create a barrier for student-athletes of limited means and colleges with tight budgets.

"There are so many combines and showcases, but this one really has legs to it because it's totally free for the players and the colleges. All they have to do is register and show up," said Donahue. "We hope that others areas of the country will follow Houston, El Paso and now us, and say let's do one here. This is going to be a huge success, and we're fired up."

Five years ago, the NFF Touchdown Club of Houston Chapter began hosting a similar event, which was quickly replicated in El Paso, Texas. The Houston organizers place the cost to run the event around $7,500 per year in their community, and they estimate that their event produces more than $8 million in annual scholarships. Donahue heard about the success of the Houston and El Paso initiatives and knew that Southern California had a similar void in providing student-athletes an opportunity to earn academic and participation scholarships at the divisional level. He set to work, leveraging his connections to make the event a reality in Southern California.

"Partnering with the National Football Foundation and having their brand on the event has been a big help," said Donahue. "The NFF chapters, the California Interscholastic Federation and the local news outlets have all been very helpful in promoting the event. Our only concern now is the weather."

The hopefuls at the NFF California Showcase will vie for academic and participation scholarships from NCAA

division II, III and NAIA schools, including institutions from Arkansas, California, Colorado, Florida, Illinois, Iowa, Kansas, Missouri, Nebraska, New Mexico, North Dakota, Ohio, Oregon, South Dakota, Tennessee, Texas and Wisconsin. The event allows the schools a unique opportunity to evaluate a large number of academically and athletic qualified student-athletes in a short period of time while minimizing their travel costs. The event is not open to student-athletes who have already signed Division I letters of intent.

"One of the things that has always bugged me about combines and camps is that they say they provide kids exposure to colleges," said **Chris Vaughan**, a key organizer of the Houston event and a board member of the NFF Touchdown Club of Houston Chapter. "I always felt like people were taking advantage of parents and kids, and this was something that we felt we could do without having to charge anybody anything. We just want kids who want to go to college and play football to have a chance to be exposed. After the first year, we knew that we were onto something good."

Click here for more details on the NFF California Showcase.

Click here for news coverage with quotes from the participants at the NFF Houston Showcase.

High school seniors test their skills in the vertical jump at the NFF Houston Showcase, measuring lower-body explosion and power. The National Football Foundation Touchdown Club of Houston Chapter hosted the Fifth Annual Greater Houston Senior Football Showcase February 9 at the Methodist Training Center, inspiring the NFF California Showcase, which will take place this weekend at the Home Depot Center in Carson, Calif.

ABOUT THE NATIONAL FOOTBALL FOUNDATION & COLLEGE HALL OF FAME
Founded in 1947 with early leadership from General Douglas MacArthur, legendary Army coach Earl "Red" Blaik and immortal journalist Grantland Rice, The National Football Foundation & College Hall of Fame is a non-profit educational organization that runs programs designed to use the power of amateur football in developing scholarship, citizenship and athletic achievement in young people. With 120 chapters and 12,000 members nationwide, NFF programs include the College Football Hall of Fame, the NFF Scholar-Athlete Award presented by Fidelity Investments, Play It Smart, the NFF Hampshire Honor Society, the NFF National Scholar-Athlete Alumni Association, and scholarships of more than $1.3 million for college and high school scholar-athletes. The NFF presents the MacArthur Bowl, the William V. Campbell Trophy endowed by HealthSouth, and releases the Bowl Championship Series (BCS) Standings. NFF corporate partners include the Allstate Sugar Bowl, the BCS, Fidelity Investments, Herff Jones, Liberty Mutual Insurance, NCAA Football, and Under Armour. ---

There will be a brief unplanned outage of ConnectCarolina TONIGHT (Feb. 21) from 6:00pm to 7:00pm. We apologize for any inconvenience.

ConnectCarolina will be down during this time frame. In addition, the following functions may experience limited and/or no functionality due to their use of Person Services which is impacted by this outage:

- UNC Directory (lookups available, but not updates)
- UNC Online Application (Summer School, Nursing, Part-time Studies, etc.)
- UNC Guest ID creations
- TouchNet (Online Application fees only)
- Affiliate
- InDEPTh
- Check Request
- Web Travel
- Web Vendor
- Friday Center Applications (CPPSReg, PDEPReg, CEU, FCCPS)
- EPAWeb (New Hire Actions Only)
- Applicant Web (Employees cannot update their PID under their Applicant Profile)
- HRIS
- FACS II Administration
- Onyen Services
- PID Create
- PID Inquiry
- ConnectCarolina reporting environment (HRRPT)
- Reporting tools (OBIEE, EPM and WebFocus)
- ImageNow
- Student Stores applications (i.e., ordering textbooks)

We appreciate your cooperation and support as we continue to make ConnectCarolina more efficient for our users.

Data Warehouse Project

- New reporting environment – Enterprise Performance Management (EPM)
- New reporting tool -- Oracle Business Intelligence Enterprise Edition (OBIEE)
- Initial release includes the 7 interactive reports in the Student Records (SR) Dashboard
- Future expansion will encompass data from financial systems, human resources and several additional areas

Connect CAROLINA

Project Team

- PeopleSoft EPM/OBIEE Data Warehouse Project Team:
  - Sharron Bouquin (Team Manager)
  - Prakash Balakrishnan (Technical Analyst, OBIEE Dev/Security)
  - Jennifer Turpin (Functional Analyst)
  - Michael Nichols (Data Modeler / Architect)
  - Prakash Gadde (ETL Developer)
  - Premnath Bagahiagari (ETL Developer)
  - Mechelle Clayton / Jerri Bland (ITS Management Support)

Connect CAROLINA

What is a Data Warehouse?

- An online repository of information that is used for reporting and analysis
- Data from PeopleSoft is incorporated into a data warehouse, providing an institution-wide view of available data
- Users are then able to view, filter, and search the information using intuitive dashboards

Connect CAROLINA

Project Approach

- Requirements – What reports are needed by when
- Analysis – Delivered product vs. UNC needs
- Design – Customize product as needed
- Test – Unit test, System Test, End to End Testing, Performance Testing
- Deployment – Go-Live (release to Users)
- Post Production Support – Enhancements and additional subject areas and data marts

Connect CAROLINA

Campus Reports

Data marts are logical divisions within the Campus Solutions Warehouse and are comprised of subject-specific dimensional data models designed around a specific institutional process.

Connect CAROLINA

Access

How Do I Get Access?

- Access to all UNC-Chapel Hill dashboards is based on your role at the University and corresponding authorization to the appropriate source system (i.e. PeopleSoft Campus Solutions)
- Appropriate roles are:
  - Course scheduling
  - Student enrollment
  - Advisors
- If you do not have access, submit a request to:

OBIRegistrarReports@unc.edu

Connect CAROLINA

Restricted Student Data

- The Federal Family Educational Rights and Privacy Act (FERPA) governs disclosure of information from student records. Some of the reports in the Student Records Data Warehouse include either personally identifiable information (FERPA protected data) or records that are restricted because students have invoked their right to privacy under FERPA
- It is critical that anyone who has access to or produces reports out of the Student Records Data Warehouse understands the University's responsibilities to protect student data under FERPA
- If you have any questions, email ferpa@unc.edu

Connect CAROLINA

Overview of Student Records Dashboard Reports

Associate University Registrar

Records and Reporting

Connect CAROLINA

Dashboard

- A grouping of data warehouse information based upon specific criteria
- Dashboards are created by the campus for specific needs, such as the Student Records Dashboard, which allows the user to query against:
  - term/class enrollment data
  - student program/plan/sub-plan data
  - class/instructor information data

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Welcome to the UNC Reporting Warehouse!

The Data Warehouse was last updated on: 2/20/2013 2:48:59 PM

ANNOUNCEMENTS

Check back here often for information on:

- New Dashboards or Reports
- Updates to Dashboards or Reports
- System maintenance and downtime
- And much more...

Help / Support

Each dashboard and set of related reports is "owned" by one or more University departments. Please see each individual dashboard's corresponding help page for contact information and FAQs specific to the data being reported.

Supported Browsers

- Internet Explorer 9 in Compatibility View

Security Access

The goal of the Data Warehouse security is to protect sensitive data while allowing approved users access to information needed to do their job.

Access to all UNC-Chapel Hill dashboards is based on your role at the University and corresponding authorization to the appropriate source system.

If you do not have the appropriate access, submit a Help request to ConnectCarolina at https://www.unc.edu/ar-bin/websub/index.pl or by calling **919-962-HELP (919-962-4357)**.

If this is your first time visiting the Warehouse, you will have access to one or more dashboards (based upon your role with the University). The instructions for accessing your dashboard(s) are shown at the bottom of this message.

We are in the early stages of implementation, but are excited at the information that is already available – and for that which is still to come. Our phased roll-out schedule means that you will be informed of new dashboards and reports – or updates to existing reports – as they are made public. Those announcements will be listed in the Announcements section to the left of this page.

Don't miss out – be sure to check for Announcements each time you log in to the Data Warehouse.

Thanks for visiting us today – and happy reporting!

Navigating between different Dashboards

From any page, select the "Dashboards" drop-down menu at the top of the page:

A list of your available dashboards will be displayed. Simply click the name of the dashboard you wish to view, and the selected dashboard will load to your screen.

Student Records Dashboard Reports

- Reports allow users to obtain information on various aspects of student enrollment, graduation, and class/instructor data
- All data is housed in PeopleSoft Campus Solutions
- Any legacy data (i.e. Instructor data) that was not converted into Campus Solutions will not be available in the Warehouse at this time
- Unless otherwise noted, the data returned represents the current status of that student
- Historical data is available in these 7 reports, with the exception that Instructor data only goes back to Fall 2010. In addition, historical term enrollment data will be available at a later date

Connect CAROLINA

Available Reports

The following reports are currently available for the Student Records Data Warehouse:

- Class – All course sections for a term. This report returns only one row for each class scheduled in the term
- Class Instructor – Only classes that currently, or previously, had instructors assigned are included in this report. This report includes all classes scheduled in the term with separate rows for each instructor and each meeting pattern
- Class Meeting – The Class Meeting report shows course section information including classes' dates, times, buildings and rooms. Only course sections with meeting days and times are listed

Connect CAROLINA

Available Reports, cont'd.

- Class TBA – This report shows any course sections for a term that do not have a meeting pattern
- Degree Candidates – The Degree Candidates report lists students that have applied to graduate
- Degree Recipients – The Degree Recipients report lists students that have been awarded a degree
- Term Enrollment - The Term Enrollment report lists the bio-demographical and academic information for all students eligible to enroll for a term. The report shows the student academic program and the academic plan (major) as of one business day ago.

Subject: Informational Message from Alert Carolina -- Student death

---

Dear Carolina community:

I am saddened to inform you that one of our students has died. The Chapel Hill Police Department is investigating the death of , a junior from Wilmington. Police said his body was discovered late Friday night at his off-campus residence. The cause of death has not been determined, but Chapel Hill Police do not suspect any foul play.

I have offered my support to Stedman's parents in this time of grief. Please keep Stedman's family and friends in your thoughts as we mourn this latest loss.

Counseling resources have been made available over the weekend to the students most immediately affected by the death. Students who feel they need assistance may call Counseling and Wellness Services at (919) 966-2281 during regular operating hours. Employees may contact the Employee Assistance Program at (877) 314-5841.

Sincerely,

Holden Thorp

About Informational Messages: The University sends an Informational Message to inform the campus community about a situation that is not an emergency, but is expected to be of significant interest to the campus. An Informational Message is one of three tiers of communication under the University's revised emergency communications plan. Emergency Warning refers to a siren activation for a significant emergency. And a Timely Warning is issued if there is a continuing danger AND notification will not compromise law enforcement efforts.

Tip: Inspiration without information leads to frustration!

I love inspiration! There is nothing better to me than to have my spirits lifted and to feel motivated and energized inside. It causes me to have a lift in my step and an air of excitement about my day. However, I have learned painfully over the years that inspiration can only take me so far. I also have to have information to help me complete whatever journey I am on or task I am doing. Maybe a story will illustrate my point.

Years ago, I went to Dallas, Texas for a huge motivational seminar. There were over 2,000 people in attendance and it was an exciting time. The speakers were loud and lively. People were up in their chairs. The air was electric. Everywhere you looked, you could see people who were filled with excitement and enthusiasm. The seminar lasted an entire weekend and I can honestly say that by the time I got to the Dallas airport to head back home, I was exhausted. There was something wrong inside of me that I couldn't quite understand and I remember trying to get to the bottom of the feeling, but just wasn't able to tell what it was.

While standing in line to board the plane, a girl about 30 or 40 feet away from me started waving and jumping up and down as she headed in my direction. Since I did not recognize her, I couldn't understand why she was waving to me. When she got close, the guy in front of me, who had been standing there rather subdued, reached out and hugged her. I realized then that she had been waving to him all along. She said in an excited voice, "Wasn't it a *great* weekend? Didn't we have a great time? Aren't you glad you came?!" He said, "Yes, it was an exciting weekend and I had a great time, but in terms of actually having something that I can take back home and use on a daily basis, I am no better off now than when I arrived on Friday afternoon." They both sort of laughed it off and then she turned and went her way.

When he said those words, it was as though he put his finger right on what I had been feeling inside and was not able to verbalize to myself. We had been given plenty of inspiration, but we had not been given any information. It was just a lot of talk. Now, please understand and hear me well...I know that words are powerful and talk can be one of the most useful mediums of communication in the world today. However, the words must have some sort of concrete meaning to them to give direction, guidance, and purpose.

All the way home I thought about what the gentleman at the airport had said. It was then that I decided that as an inspirational and motivational speaker, I also want to always have good information that people can use and apply on a daily basis.

I'm sure you have heard of the sales concept of "steak and sizzle". Restaurants get their steaks sizzling hot so they will make a lot of noise and really look good, but the steak itself has to be tender and juicy and come through as well. While the sizzle is important, it takes both in order to make a delicious meal. In this case, the inspiration is the sizzle and the information is the steak.

I think excitement is a powerful tool. Excitement and energy

get us started on our journey, but good information helps us reach our final destination. This is especially true in the world of business. We need to be excited about our business, our lives and our future, and we also need to have some good information from those who have gone before us to help us find our way. Having a mentor or someone who has actually accomplished something in life is an excellent way to gain good information to go along with the inspiration.

Life is a tricky experience. Billboards, magazines, television commercials and seminar leaders are trying to tell you how life works. They are all calling for your attention. I can help you with that by reminding you that there are two things that you need to succeed in whatever you do. First, you need inspiration in order to give you the motivation to do something with your life. And, then you need information that will give you the specific steps on how to go about doing it. Those two together make a powerful, powerful combination!

If you are lopsided today with one of those, let me encourage you to become a little more balanced. I can assure you that if you have those two together, you will be a winner and succeed in all that you do.

Tip: Inspiration without information leads to frustration!

Have a great week! God bless you!

Subject: [campusrec] National Eating Disorders Awareness Week at UNC Campus Rec

---

In honor of National Eating Disorder Awareness week (February 24th – March 2nd), UNC Campus Rec is launching its *Body Beautiful Campaign* to encourage UNC students and community members to value their bodies and celebrate social, physical, and mental well-being.

Thank you to the acapella groups: the UNC Loreleis, UNC Anchordants, Cadence, and Tarheel Voices for recording this amazing song!

Join Campus Rec in celebrating National Eating Disorders Awareness Week by participating in these special events!

Monday, February 25th

Eating for Exercise: The Recipe for Fitness (5:30-7:00pm in SRC)

Tuesday, February 26th

Mirrorless Tuesday: All Campus Rec Group Fitness Classes in the SRC will be mirror free in order to emphasize to participants that it is not how you look, but how you feel.

Eating Disorders Myth Busters (11:30am – 1:00pm in RHRC)

Embody Carolina Premiere Training (5 – 9pm in Carolina Union 3408; reception to follow from 9:00-10:00pm)

Wednesday, February 27th

Eating Disorders Information and Research Fair (11:00am – 1:00pm in the Pit)

Hip Hop Master Class taught by Joseph Nontanovan (6:30 – 7:45pm in SRC)

Thursday, February 28th

Greek Groove (7:00pm in Memorial Hall)

If you are interested in learning more about National Eating Disorders Awareness Week, please visit www.nationaleatingdisorders.org. If you would like to learn more about UNC's participation in and special events related to NEDA, please visit www.unceatingdisorders.org.

For more information about UNC Campus Recreation Special Events, contact
ı at @unc.edu.

Subject: FORMAL NOTICE: Campus Telephone Service Transition

Interoffice Memorandum

To: All Campus Telephone Customers

From: Rick Harden, Director, ITS Communication Technologies

Date: February 25, 2013

Subject: UNC-Chapel Hill Campus Telephone Service Transition

As you may recall, ITS is in the process of transitioning campus telephone services from the current AT&T Centrex to Verizon's Voice Over Internet Protocol (VOIP). The transition has been necessitated by the need to replace decades old legacy telephony equipment and AT&T's decision to discontinue traditional Centrex service within the next few years. The change marks the first major telephone system upgrade for the University in over 30 years. The process for replacing all Centrex phones is expected to take the better part of the next two years.

While the change has in part provided some immediate advantages (e.g., lower telephony costs for the University), one consequence has been a required change in dialing habits. Calling new VOIP lines from a phone on the old AT&T system requires the use of 10-digits plus the current Centrex dial prefix (i.e., 7+919+7-digit telephone number). I am aware of the confusion caused by this change, however, it is a change mandated by the North Carolina Utilities Commission and the local exchange telephone companies as of March 31, 2012, for all of North Carolina.

As of this writing, it is recommended that everyone on campus begin using 10-digit dialing for all calls. Specifically if you dial a number and do not reach your intended party or receive an error message, please try the full 10 digit number.

In order to better explain some of the dialing changes, please see the information below:
* If you are dialing from an AT&T Centrex phone to another campus phone use the number: 7+919+7-digit telephone number
* If you are dialing from a Verizon VoIP phone to another campus phone number: 919+7-digit telephone number

Note: The "7" dial prefix is only required for legacy Centrex telephones. No dial prefix is required for VoIP.

To-date, the following UNC campus buildings or locations have been transitioned to Verizon VoIP service:

* Koury Oral Health Sciences Building
* Genome Science Building
* ITS Franklin
* ITS Manning
* WUNC (Goodman and American Tobacco Campus)
* RENCI (100 Europa Drive)
* Brauer Hall
* Tarrson Hall

* Old Dental
* Baity Environmental Lab
* Hooker Hall
* McGavran-Greenberg Hall
* Rosenau Hall
* Kenan Labs

New phone line requests will be fulfilled with Verizon VoIP service--legacy Centrex service is no longer available for new installations.

For the schedule of additional buildings and more information about the UNC VoIP transition, please visit http://its.unc.edu/voip or call 919-962-HELP and select option 1 for ITS Communication Technologies Customer Support.

If I can personally answer any additional questions or concerns about the project, please contact me at rmharden@email.unc.edu. Thank you for attention in this important matter.

Subject: Unplanned GroupWise outage

Hello Everyone,

This evening around 8:30 pm one of our GroupWise servers went down unexpectedly. When the node crashed it also took down the GroupWise post office. You may have still been able to access your email during this time, however email was not being sent or from GroupWise until I was able to get the post office services and the failed server back online at 11:30 pm.

If you sent any email from GroupWise during this outage, it should be going through now and you should be receiving any email that were sent to you during that time.

If there are any questions or problems please contact me at

Thank you for your patience with this outage.

The Top 5 Ways to Effectively Brag About Yourself and Your Program

Babe Ruth said it best:

"It ain't braggin' if you can do it."

So, should you want to brag about your yourself and your program?

Absolutely!

As a society, we're surrounded by people who confidently promote their ideas. And for the most part, we're drawn to those individuals. They inspire us, challenge us, and make it impossible to ignore their message.

From the world of politics, you have an individual - Barrack Obama - on one side of the aisle who used confident bragging to win back-to-back Presidential elections. On the other side of the political aisle, you have an individual - Rush Limbaugh - who uses confidence and bragging to build the nation's largest talk radio audience. Both men have power, and both have used a certain degree of "bragging" to win us over (or enrage us, depending upon your political point

of view).

Sometimes, that confidence and bragging happens with non-verbal communication. If you remember New Orleans' big Super Bowl win a couple of years ago, Saints' coach Sean Payton started the second half unconventionally with an onside kick, which his team recovered. Commentators, and the opposing coach, called that a "statement" play that ultimately swung the momentum in the Saints' favor.

And that's what bragging does...

Frown, And You Frown Alone...Smile, And The Whole World Smiles With You

by Sean Devlin, ***Front Rush***

We are all adults here. We've been on this planet long enough to know that a sincere smile can go a long way.

We know the qualities that a good smile can carry. It makes you happy, it relieves stress, it makes you feel good, happy etc. But it also induces these sensations and emotions on others...like when you are face to face with a recruit. Boom!

Is your facial expression more often a smile or a frown? Are you embodying all that is positive? Are you showing the best that you've got? My assumption is that you are certainly trying to...

NCSA'S Verified ID: The Recruiting Game Changer

*by Ellen Sawin, **NCSA** College Relations*

The world of athletic recruiting is evolving faster than ever. With technology constantly growing, coaches from all across the country can recruit nationwide, whether they have a large recruiting budget or not. However, there are some new challenges that accompany digital recruiting, things that coaches did not have to have to worry about in the past.

Whether you're a football coach looking at a player's height and weight, a volleyball coach looking at height and reach, or a swimming coach looking at arm span, you need athletes that meet specific standards. But as you meet less recruits in person, and more via email and pictures, I'm sure you've crossed athletes that have exaggerated by 3 inches or 20 lbs. I'm sure you've also run into athletes whose stats fit your standards, and they're telling the truth. But once you see them in person, they're nothing like you had imagined. And as you run into this problem more and more, you're getting frustrated with digital recruiting - but don't!...

VIDEO: The Backbone Of Good Recruiting Is Your Current Players

By FootballScoop.com

Excellent video here from Miami's signing day and "the backbone" of their recruiting efforts. As Al Golden explains, the backbone of any great recruiting effort lies in your current players.

"On signing day, I know there's always a lot of talk about who the good recruiters are, but the background of any organization, as it relates to recruits, are our players."

"It's really one of the most overlooked aspects of the recruiting process. Players connecting with recruits," Golden explains. "The relationships that they establish and the communication in which they answer recruits questions is invaluable to a recruit and their parents, and ultimately has a great impact on what happens on signing day."

You can see the excitement in the players faces when recruits announce their decisions in the clip because they have invested their time and energy in the process as well. There are a lot of great things about incorporating your players into the process. And we are including information here that every program can take note of and benefit from...

Specialization Brings Additional Challenges To Recruiting

by Keith Arnold, NBCSports.com

As we dig deeper into the talented class that Brian Kelly and his staff reeled in, some trends are starting to emerge in a group widely accepted to be among the best in the nation. We will spend the next few weeks talking about the 24 athletes that comprise the class of 2013, but athlete specialization is an interesting topic that Chuck Martinand, UND.com's Jack Nolan touched on during the Signing Day webcast.

For college coaches, dealing with a new breed of athlete is nothing new. As the world of sports gets more competitive and selective, athletes are coming into college more ready than ever, being trained at a younger age for sport-specific skills. This is hardly limited to the world of football.

With the recruiting industry playing a more prominent role in the world of college football, the summer months have now been taken over by combines and camps, a development not dissimilar to the early days of AAU basketball.

With Nike's foray into the world with The Opening, ESPN, Rivals and 247 staking their claims, and more and more All-Star games taking place in December, football is turning into a twelve-month endeavor, a big change from even ten years ago.

That brings with it new challenges for football coaches. And after building a career on evaluating athletes that may only work on football skills from August to November, identifying the changes that come from specialization is key...

Big 12 Commissioner Addresses Latest Changes in Collegiate Athletics

Bob Bowlsby

by Berry Tramel, NewOK.com

Big 12 commissioner Bob Bowlsby spoke Wednesday at the OSU Spears School of Business' Executive Management Briefings luncheon at the Cox Convention Center

Bowlsby staged a press conference beforehand and was informative as always. But his speech was even better, which means what was on his mind was more advanced than what was on our minds.

For the Thursday *Oklahoman*, I wrote about Bowlsby's desire to change the culture of college basketball. You can read that here.

But over the next few days, I'll be sharing a series of blogs on Bowlsby's comments in a variety of areas. Today, we'll start off with Bowlsby's general take on the place of college athletics...

Tuesday Baseball Game Cancelled
GREENVILLE, N.C. - East Carolina officials have announced that tonight's non-conference baseball game between ECU and VCU at Lewis Field inside Clark-LeClair Stadium has been postponed due to inclement weather in the area. The two teams will attempt to make-up the game at a future date.

Anyone who has purchased an individual game ticket for the Tuesday baseball game against VCU may exchange the ticket for a future Pirate Baseball home game this season, with the exception of the NC State contest on April 2nd.

ECU (3-3) will be back on the diamond Wednesday, Feb. 27 when it plays host to Liberty (4-2). First pitch is scheduled for 5 p.m. (EST).

Free Resources

- Consortium for Research on Emotional Intellegence in Organization
- Emotional Intelligence and College Success
- The Role of Emotional Intelligence in College Students' Success
- Emotional Intelligence and Academic Performance
- Four Keys to Emotional Intelligence

Webinar Overview

Emotional Intelligence (EI) is a unique repertoire of emotional skills and competencies that a person uses to navigate everyday challenges of life. EI skills can assist students in adapting to the demands and pressures of the college environment, promoting effective student learning, and contributing to college success.

This session will highlight an innovative and collaborative approach that significantly contributes to student success and college retention. College employees (staff, faculty, and administrators) utilize their leadership and EI skills to make a meaningful difference in the lives of college students. In their role as 'College Coach,' they encourage students to develop those EI skills that are paramount for being academically successful. In doing so, college employees expand their own personal repertoire of EI skills that leads to personal and professional growth.

Webinar Objectives

Participants will:

- Gain an understanding of emotional intelligence and the value of utilizing a coaching approach
- Identify specific Emotional Intelligence (EI) competencies related to student success
- Learn and explore strategies and techniques that encourage students to cultivate emotional intelligence competencies
- Explore an approach that is cost-effective, highly transferable to any post-secondary institution, requires minimal employee time commitment, and produces significant impact within the college community

Webinar Speaker(s)

Lisa Decandia and **Steve Fishman** are the creators and facilitators of the College Coach Approach that they continue to oversee as part of the award winning (EPI, 2009) SUCCESS@Seneca program at Seneca College, Toronto, Canada.

An unwavering passion for student success has lead them to research, develop, and

Subject: Reporting Outside Income
Attach: Outside Income forms.pdf

All,
Per NCAA Bylaw 11.2.2, staff members must report any income from an outside source to UNC on an annual basis. The bylaw below references some, though not all, sources of income which must be reported. UNC policy requires a list of all planned outside activities for an upcoming academic year, per the attached letter from Bubba this past June, along with an estimate of likely outside income for the year. At the end of each academic year, UNC requires that you submit the actual amounts of outside income earned in the previous year. All required paperwork may be submitted to Kathy Griggs at the appropriate time.
If you have any questions, just let us know. Thanks!!
Lance

Lance Markos
Director of Compliance

University of North Carolina
Department of Athletics
Phone: (919) 843-7259
Fax: (919) 962-6002
markos@uncaa.unc.edu

11.2.2 Athletically Related Income.

Contractual agreements, including letters of appointment, between a full-time or part-time athletics department staff member (excluding secretarial or clerical personnel) and an institution shall include the stipulation that the staff member is required to provide a written detailed account annually to the president or chancellor for all athletically related income and benefits from sources outside the institution. In addition, the approval of all athletically related income and benefits shall be consistent with the institution's policy related to outside income and benefits applicable to all full-time or part-time employees. Sources of such income shall include, but are not limited to, the following: *(Revised: 1/10/92, 1/11/94, 1/10/95, 4/26/01 effective 8/1/01, 3/8/06)*

(a) Income from annuities;

(b) Sports camps;

(c) Housing benefits (including preferential housing arrangements);

(d) Country club memberships;

(e) Complimentary ticket sales;

(f) Television and radio programs; and

(g) Endorsement or consultation contracts with athletics shoe, apparel or equipment manufacturers.

Memorandum

TO: Head and Assistant Coaches

FROM: Bubba Cunningham

DATE: June 26, 2012

RE: 2012-2013 Notice of Intent Forms

Attached, please find the 2012-2013 Notice of Intent Form for you to complete and sign, along with a copy of a memo referencing the External Professional Activities for Pay policy.

It is IMPERATIVE (per NCAA,By-law 11.2.2, and University regulations) that you complete a form for each and every outside activity in which you plan to participate for the upcoming fiscal year, (July 1, 2012-June 30, 2013). Since these activities have not yet occurred, please remember that the income you report at this time is just an estimate.

If you have any questions as to whether an activity falls under this policy and should be included on this form, please contact Larry Gallo or Amy Herman. **For administrators and coaches with endorsements, or consultation/media contracts, please provide contractual income information (if you know it at this time).**

Please complete your form(s) carefully before signing- incomplete forms will be returned. If you do not expect to receive any outside income, please indicate this on the form, sign and return.

Thanks you in advance for your prompt attention to this very important matter. Please return all forms to Kathy Griggs as soon as possible

MEMORANDUM

TO: Head Coaches, Assistant Coaches, and EPA Non-Faculty Staff Members
FROM: Bubba Cunningham
DATE: May 29, 2012
RE: **External Pay Policies**

This memorandum outlines Departmental and NCAA Policy regarding supplemental income and benefits **for the fiscal year July 1, 2012 through June 30, 2013**. It is important that you clearly understand all the issues involved and comply with the stipulations indicated.

Per NCAA Bylaw 11.2.2, you must receive **annual prior written approval** from the Chancellor for **all athletically-related income and benefits** from sources outside the University. Sources of such income shall include, BUT are not limited to the following:

a). Income from annuities;
b). Sports camps;
c). Private lessons that are permissible per NCAA guidelines;
d). Housing benefits (including preferential housing arrangements);
e). Country club memberships;
f). Complimentary ticket sales;
g). Television and radio programs; and
h). Endorsement or consultation contracts with athletics shoe, apparel, or equipment manufacturers.

The Board of Governors' Policy on External Professional Activities for Pay similarly requires that you receive prior written approval for all your external professional activities for pay.

To make sure that we are in compliance with both sets of rules, I am reminding you of the necessity to adhere to the following sequence in managing your athletically-related income and benefits.

First, you should not enter into **any** agreement with a private entity for any athletically-related income or benefits until after you receive the Chancellor's **written** approval of the agreement. This process is necessitated by the NCAA rule referenced above. Further, if you **propose** to enter into such an agreement or to otherwise agree to receive pay for athletically-related external activities, you must fill out the "Notice of Intent to Engage in External Professional Activity for Pay" and receive my or my designee's written approval before you actually engage in the outside activity or sign the outside agreement. In addition, the approval of all athletically-related income and benefits shall be consistent with the institution's policy related to outside income and benefits applicable to all full-time and part-time employees.

I will continue to be the administrative official responsible for transmitting your requests for approval of your outside activities and your agreements. My written approval and indication of the Chancellor's approval will be addressed to you.

Please contact me if you have any questions. Thank you for your prompt attention to this.

Notice of Intent to Engage in External Professional Activities for Pay Department of Athletics In Accordance with NCAA bylaw 11.2.2

1. INDIVIDUAL PERFORMING ACTIVITY
   Last Name:_____ First Name:_____
   Email: _____

2. CONTRACTING ORGANIZATION
   Name: _____
   Address: _____
   _____

3. Please describe the nature of the proposed activity including if it is a single time or repeating event.
   _____

4. BEGINNING DATE of your proposed activity (the dates must fall within a single fiscal year).
   _____

5. ENDING DATE of your proposed activity (the dates must fall within a single fiscal year).
   _____

6. Total number of hours to be devoted to activity: _____

7. Estimated duration of activity (check one box):
   Less than a month ☐ 1-4 months ☐ More than 4 months ☐

8. Will the activity entail the use of any University resources (see UNC Policy Manual, 300.2.2, Section I, Item I)?
   Yes ☐ No ☐

9. To your knowledge, does the contracting organization above provide funding which directly supports any of your University duties or activities?
   Yes ☐ No ☐

10. Which of the following best describes the contracting organization:
    - Private industry or firm ☐
    - Non-profit organization ☐
    - Federal ☐
    - School district ☐
    - Other state/local government agency ☐
    - University ☐
    - Other ☐

11. To be completed if contracting organization is a private firm:
    a. Do you or any member of your immediate family own an equity interest in the contracting organization?
       Yes ☐ No ☐
    b. Do you hold an office in the contracting organization?
       Yes ☐ No ☐

12. Please input any additional information that is relevant to this request.
    _____

13. Performance of the above described activity is consistent with the Board of Governors Policy on External Professional Activities.

14. What income do you expect to receive for participation in this activity? _____

Signature:_____ Date: _____

Job Title:_____ Department: Athletics

Notice of Intent to Engage in External Professional Activities for Pay Department of Athletics In Accordance with NCAA bylaw 11.2.2

1. Reviewed, activity determined to be consistent with University policy:

_____ _____

Date Department Head Signature

Other action (as required): _____

_____

_____ _____

Date Chancellor

---

2. Reviewed: activity determined not to be consistent with University Policy:

_____ _____

Date Department Head Signature

Action on appeal (if any):

_____ _____

Date Action taken:

_____

Chancellor

Any administrative action approving a "Notice of Intent" shall be effective only for the remaining balance of the fiscal year (in the case of 12-month employees) or for the balance of the academic year (for 9-month employees); see Policy Section 3.b.

From: ITS Response Center <help@unc.edu>
Sent: Thursday, February 28, 2013 2:51 AM
To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: Password for Onyen 'bridgerb' expires soon.

The password for the Onyen 'bridgerb' is set to expire
at this date and time: Thu Mar 7 10:11:15 2013

Visit the following web site to change your password or for
information on how to have it reset if it was forgotten:

https://onyen.unc.edu/cgi-bin/unc_id/chpw.pl

After your password expires, you can still access the above site
to change your password, though you will not be able to use your
Onyen to access any other Onyen-authenticated services until you
change your password.

Once you change your password, it will work for another 90 days
before it expires again. If you never use your Onyen, then
disregard this notice.

Your new Onyen password will be copied automatically to the
AD.UNC.EDU domain. If you have any Laptop, Desktop, or handheld
device which uses your old Onyen password to automatically login
or re-authenticate to services using the AD.UNC.EDU domain
(Exchange, for example), be sure to logout of those services and
login again with your new Onyen password within 10 minutes of
changing it. If you don't, and your devices continue to attempt
to re-authenticate using your old Onyen password, your
AD.UNC.EDU account will be locked for 10 to 20 minutes, just as
if you repeatedly tried to login with a bad password. During
that time you will not be able to login.

If you think you might forget your password, consider setting up
a "Challenge/Response" where you answer a few personal questions
BEFORE you forget your password. Later, if you can answer these
questions again, you can get a new password without having to
visit one of the password reset sites on campus. Just click
"Challenge-Response" at the top of the page mentioned above and
follow the instructions.

Answers to many common questions and a list of some Onyen
related services can be found by visiting the web site:

http://help.unc.edu/3247

If you have questions or need additional assistance with this
issue, contact the ITS Response Center at 919-962-HELP and we'll
be glad to assist you.

We send out these Password Expiration Notices via email
at 2 weeks, 1 week, and 2 days prior to the expiration.

This message is being sent to the electronic mail address
associated with the Onyen 'bridgerb' in the UNC Campus Directory.
If this address is not your preferred electronic mail address,
you may change it by visiting the Campus Directory web site:

http://dir.unc.edu/dir/home/

---

INFORMATIONAL MESSAGE FROM ALERT CAROLINA: Message from Campus Health

February 28, 2013

Dear Carolina Community,

Increased numbers of students with nausea, vomiting and diarrhea are being seen at Campus Health Services and other healthcare facilities. Campus Health Services is working very closely with the Orange County Health Department to identify the cause of these illnesses.

To keep healthy in the meantime, please take the following preventive steps:

- Wash your hands frequently with soap and warm running water for at least 20 seconds, especially after using the toilet and before eating or preparing food.
- Alcohol-based sanitizers may not always be effective.

If you are sick or are around others who are sick:

- Do not go to work or school and stay at home if at all possible.
- Wash and rinse fruits and vegetables carefully before consuming them.
- Thoroughly clean and disinfect contaminated surfaces immediately after an episode of illness. First spray the area with a bleach-based disinfectant or diluted household bleach; then clean with the disinfectant wearing disposable gloves. Diluted bleach should be mixed with 1:10 water and mixed daily.
- Cleanup waste should be placed in a plastic bag, which should be tied and placed in the trash receptacle.
- Immediately remove and wash clothing or linens in hot water and detergent. They may be contaminated after an episode of illness.
- Flush or discard any vomitus and/or stool in the toilet and make sure that the surrounding area is kept clean and disinfected.
- If you are ill, prevent dehydration by frequently sipping a non-alcoholic beverage.

Students with questions should contact Campus Health Services at (919) 966-6573 to speak directly with a registered nurse. University employees with questions, especially housekeepers who want specific guidance, should contact the Department of Environment, Health & Safety at (919) 962-5507.

Sincerely,

Mary Covington
Executive Director for Campus Health Services

About Informational Messages: The University sends an Informational Message to inform the campus community about a situation that is not an emergency, but is expected to be of significant interest to the campus. An Informational Message is one of three tiers of communication under the University's revised emergency communications plan. Emergency Warning refers to a siren activation for a significant emergency. And a Timely Warning is issued if there is a continuing danger AND notification will not compromise law enforcement efforts.Sponsored by the UNC Department of Public Safety

Career Development of Student-Athletes: Assessment Components

The researchers are hoping to collect data on the following variables in order to obtain a comprehensive view of the career development of student-athletes at a Division I institution. Any feedback on additional variables to consider or existing tools that examine career development would be greatly appreciated!

- Career readiness of student-athletes
  - Perceived career readiness (*Note: a person who responds low in each of the following categories has high career readiness)
    - Career choice anxiety
    - General indecisiveness
    - Need for career information (before choosing/entering a career)
    - Need for self-knowledge (before choosing/entering a career)
  - Perceived possession of career-related skills
    - Career-related skills (in consideration)
      - Resume writing; interviewing skills; career planning / setting career goals; experience in career field; knowledge of career field; performance in classroom; communication (written; oral); leadership; work on a team; work independently; critical thinking; analytic skills; problem solving; motivation; prioritization; detail-orientation

- Factors influencing career readiness of student-athletes
  - Awareness of available career development services
  - Motivation to utilize career development services
  - Degree of utilization of available career development services
  - Time availability

- Demographics
  - Sport
  - Academic major
  - GPA
  - Gender
  - Age
  - Academic year
  - Ethnicity/Race

MARCH MADNESS POOLS REMINDER

With the NCAA men's and women's basketball tournaments right around the corner, all athletics department staff members, student-athletes, and others associated with college athletics (e.g., FAR, Chancellor) are reminded that gambling is strictly prohibited by NCAA regulations. **This precludes ALL TOURNAMENT POOLS, regardless of the cost involved (e.g., $5.00 pools).** In addition, this prohibition includes, but is not limited to, UNC office pools, as well as online tournament challenges and March Madness "Pick'em" contests in which there is a cost to enter and an opportunity to win cash or a prize at the completion of the contest.

PARTICIPATION AWARDS FOR STUDENT-ATHLETES

An institution may provide participation awards for participation in a special event to any student-athlete who is eligible to represent the institution in the event, even if the student-athlete does not travel to the event or represent the institution in competition (e.g., injured student-athlete, travel squad or participation limit). It is not permissible, however, to provide special event participation awards to student-athletes who are not eligible for competition (e.g., academically ineligible, transfers serving a year in residence).

PUBLICITY AND PROMOTION OF PROSPECTIVE STUDENT-ATHLETES

Remember that the process to recruit prospective student-athletes to become Tar Heels should be left up to the coaches! However, when a prospective student-athlete comes on campus for a visit, the only people allowed to interact with them are coaches, student-athletes, and institutional staff members. In addition, we may not permit outside entities to participate in the recruiting process.

There should **never** be public communication via Twitter, Facebook, or other social media outlets with prospective student-athletes, at any time. This includes messages to express excitement about him/her becoming a Tar Heel, or in anticipation of an upcoming official visit. As an institution we can only confirm that we are recruiting a prospective student-athlete. It is not permissible to publicize or promote campus visits, the prospective student-athlete's abilities or the impact they could have as a future student-athlete. It is also not permissible to arrange or produce any personalized recruiting aids (e.g. personalized jerseys, video/audio presentations, or decorative items/additions to any locations he/she will visit) during an official visit.

Please contact the Compliance Office (919-962-6000 or compliance@uncaa.unc.edu) if you have any questions regarding the promotion and publicity of prospective student-athletes.

FACEBOOK TIPS

Below are some helpful tips regarding what is permissible and impermissible when using Facebook, Twitter or other social media.

Permissible:

- Send a private message to a prospect (i.e., inbox to inbox), provided the prospect is of age to receive email
- Accept or initiate a friend request **after** the following dates:
  Men's Basketball: June 15 following prospect's sophomore year
  Other Sports: September 1 of prospect's junior year**
- Send recruiting materials via the email function (pursuant to the dates outlined in Bylaw 13.4.1)

Impermissible:

- Post messages on the "wall" of a prospect's page
- Publically Tweet out information regarding a prospect
- Accept or initiate a friend request **prior to** the following dates:
  Men's Basketball: June 15 following prospect's sophomore year
  Other Sports: September 1 of prospect's junior year**
- Post a link to a permissible recruiting item (per Bylaw 13.4.1) on the "wall" of a prospect

**If your program has created a "fan page", it is permissible for anyone (regardless of age) to become a "fan" of the page. However, any direct communication with prospects via the fan page would be limited to that which is outlined as permissible in the above chart. General updates could be published, but the updates would go to everyone who is a fan and cannot be prospect-specific.

Free Resources

- IONA College - Understanding Unhealthy Relationships
- State University of New York - College Students and Relationships
- Healthy vs Unhealthy Relationships
- Red River College - Healthy Dating Relationships
- Am I in a Healthy Relationship?
- Go Ask Alice - Healthy vs Unhealthy Relationships

Webinar Overview

The destructive college romantic relationship. It's a common storyline in the campus setting. Whether you are a Resident Assistant or work in Student Affairs, you've probably had a student come to you wondering, "What should I do about this bad relationship I'm in?" You give them advice. You try to help. You talk with them about the consequences of staying in an unhealthy relationship when they should be focusing on school. You hope they realize that a break might be the best answer. But nothing works and you're left feeling helpless. What can you do? What should you do?

This webinar will offer suggestions and guidelines for Student Affairs staff on how to best advise students seeking relationship help. Based on decades of working with college students in difficult dating relationships, Dr. MJ Raleigh and Dr. Brian Van Brunt will discuss warning signs that can help identify problematic relationships that have the potential to turn violent and/or dangerous. They will offer practical solutions to help students move away from these relationships and move forward to make better dating decisions. Participants will also learn how to utilize the positive signs of a healthy relationship when talking with students about their choices.

The main focus of this webinar will be on relationships that are currently unproductive or problematic but have not crossed over into violence or sexual assault. However, Dr. Raleigh and Dr. Van Brunt will discuss more serious signs of relationship violence and the importance of proper referrals to judicial affairs, counseling, and campus police.

Webinar Objectives

Participants will:

- Become familiar with the most common challenges presented to front line staff as it relates to FERPA and being compliant
- Learn basic FERPA concepts and receive an overview of the most important aspects of the law to know and uphold
- Discuss ways to respond to challenging FERPA issues using sample scenarios common to the front line environment
- Be able to decipher when to handle a situation themselves and when it is time to refer elsewhere

Webinar Speaker(s)

Dr. Brian Van Brunt, past president of the American College Counseling Association, is Senior Vice President for Professional Development Programs at the National Center for Higher Education Risk Management (NHCERM, www.ncherm.org). He is the president-elect of the National Behavioral Intervention Team Association (NaBITA, www.nabita.org), current president of the School and College Organization for Prevention Educators (SCOPE, www.wearescope.org) and the managing editor for Student Affairs eNews (SAeN, www.studentaffairsenews.com). Over the past thirteen years Brian has taught counseling theory, ethics, program evaluation, statistics and sociology topics at both public and private schools for both graduate and undergraduate students at five different colleges and universities. Brian has served as the director of counseling at New England College and Western Kentucky University. He is the author of several books including: Ending Campus Violence: New Approaches in Prevention and A Faculty Guide to Addressing Disruptive and Dangerous Behavior in the Classroom. Brian is an expert on campus violence and has been interviewed

Subject: [campusrec] March Announcements!

Stay up to date with Campus Rec programs and events with our monthly **Campus Rec Report**! Check out the March edition today.

GENERAL

The Body Beautiful Project – Campus Rec is celebrating self-acceptance! We have launched a new initiative focused on encouraging the University community to enjoy the body they have, and to celebrate social, physical, and mental well-being. Look for our posters and ads around campus!

Facility Hours and Closures – All facilities will operate on an altered schedule from March 8th - 17th. Please note the changes to the Campus Recreation facility hours:

- March 8: All facilities close at 7pm
- March 9-10: SRC and Fetzer hall open on break schedule
- March 11-15: SRC, Fetzer Hall, and Woollen Gym open on break schedule
- March 16-17: SRC and Fetzer Hall open on break schedule.

For the Spring Holiday, all facilities will be closed on March 29 and will operate on Break Hours from March 30-31. Click here for our Hours of Operations page.

Employee Interest Meetings –Interested in joining the Campus Rec team?Don't miss your chance to pick up an application and hear more about available positions for the upcoming semesters. Meetings will be held in Fetzer Hall 109 on March 19th and 20th at 5:30pm. Interested students must attend one of the interest meetings in order to receive an application.

Relay for Life–Join Campus Recreation's Relay for Life team and help fight cancer! Raise $100 for this outstanding cause and receive a free t-shirt. Click here for more information about joining our team.

SOCIAL MEDIA

Stay Connected– For the best way to get updated information on programs, events, and altered facility hours, "friend" UNC Campus Recon Facebook.

Read our Blog– Subscribe to Campus Rec's entertaining and informational blog! "Anything, but Run", "The Best Fitness Magazines" and "Planning for Spring Break" are just a couple of this month's featured posts.

New Albums Posted– February's events, Neon Night and Eating for Exercise: The Recipe for Fitness were a success! Click here to view our albums on Flickr.

PROGRAMS & EVENTS

Kids ROCK! Basketball (March 2) – Join us on Saturday from 10am-2pm at Rams Head Rec Center for Kids ROCK! Basketball. Participants will play with members of the Women's UNC Club Basketball team in a variety of fun games and contests.

Reaching for Excellence! (March 27)– Legendary runner and motivational speaker Dick Beardsley is guaranteed to energize you, and have you leave this event knowing that anything is possible, despite any road block! This FREE event will take place in the Carolina Union Auditorium at 5:30p. RSVP is required.

For more information on anything you see here, including how to register or RSVP for an event, visit the Special Events webpage.

FITNESS

Commit Today 5K– Back by popular demand, registration is now open for this 5K training program. Beginner runners will turn into 5K veterans in just 6 weeks! The cost is $15 and includes a t-shirt. Are you an experienced runner? Volunteers are still needed to help lead the groups.

H.I.I.T. with BOSU / TRX Suspension Training– Spice up your weekly workout routine with one of our Specialty Fitness Programs! *H.I.I.T with BOSU* focuses on High Intensity Interval Training (H.I.I.T.) exercises, which are proven to be the most effective way to see results. *TRX Suspension Training* improves power, strength and calorie expenditure. Make sure to register early – these classes fill up quickly! Registration closes March 22.

Fit Campus– Win prizes for working out in Campus Rec facilities! Simply register at fitcampus.com, log at least 2.5 hours of exercise per week, and be eligible to win weekly prizes. Start logging your workout today!

For information on any of these programs, including how to cost and how to register, visit our Specialty Fitness Programs webpage.

***NEW* Indoor Cycling Policy** – Due to the popularity of our Cycle Classes, Campus Rec has established a new Indoor Cycling Policy to make your experience more enjoyable. Cycle Passes are now required in order to gain access into the Cycle Room. For more details on this policy, visit our Group Fitness Class webpage.

INTRAMURAL SPORTS

Last chance to sign up for**Primetime Basketball** and**Street Hockey!** Registration for these sports close on March 5.

March IM Sports– Registration opens in March for NCAA Basketball, Spikeball, Golf Tournament, Sand Volleyball, Co-Rec Kickball, and Badminton Doubles.

For more information on these sports, including rules and registration, visit our Intramural Sports webpage.

OUTDOOR EDUCATION

Upcoming Expeditions – There are still spots available on upcoming March expeditions! Don't miss your chance to experience an adventure of a lifetime with the Outdoor Education Center:

- March 2, **Kayak Rocky River** ($40)
- March 3, **Climb Pilot Mountain**($50)
- March 22 – 24, **Mount RogersBackpacking**($100)

Cost includes food, transportation and equipment. Visit the Campus Rec Main Office to register. For a complete list of spring trips, visit the Expeditions webpage.

SPORT CLUBS

Sport Club Spotlight– Get to know the *Women's Water Polo Club*! They are host to the annual Tar Heel Invitational tournament, which brings in 30 men's and women's teams from around the country. Water Polo competes in the Mid-Atlantic division of the Collegiate Water Polo Association against Penn State, Virginia Tech, Duke, James Madison University, and other high caliber club teams. For more information on Women's Water Polo or any of our 49 Sport Clubs, visit our Sport Clubs Directory webpage.

Get Scores, Pictures & More– The new and improved Carolina Sport Clubs website provides everything you want to know about Sport Clubs! Get the most up-to-date tournament results, cool team pictures, as well as a calendar of upcoming events.

Upcoming Events–

- March 2: Men's Volleyball Tournament in Fetzer Gyms A & B (All-Day)
- March 4: Women's Lacrosse vs. ECU at 7pm on Ehaus

- March 6: Men's Basketball vs. Duke at 7:30pm in Woollen Gym Practice Court
- March 24: Softball vs. Campbell at 10am, 12pm, and 2pm at Varsity Softball Field
- March 29-31: Water Polo Tournament in Koury Pool

CLIMBING

Get Your Climb On! – Harness up, tie-in and prepare to start climbing again! The Climbing Program will have its Grand Re-opening on Monday, March 11th at the Rams Head Climbing Wall. Additional details coming soon!

New Climbing Coordinator– We are pleased to welcome Chance Van Noppen to the Campus Rec team as the new Climbing Program Coordinator. Chance received a B.S. in Business Administration from Elon University and a M.A. in Parks and Recreation Management from The University of Mississippi. Chance's office is located in the Rams Head Rec Center.

Visit our Climbing webpage for all of the most accurate and current information.

Subject: RE: Tuesday?

Hi Beth,

Yes, you are still scheduled to present and we have been approved to go into closed session to discuss specific students' experiences with LEEP. I have secured permission to bring Bradley, so please let him know he should come prepared to discuss specific examples of how LEEP has impacted students.

They also want to hear about our tutoring program, so I have asked Susan to be prepared to discuss how tutorials have been organized and run since last fall.

Thanks again for your help with this.

Subject: [epro_users] ePro Vendor Catalog Update - Applied Industrial Technologies Available in Epro

---

ePro Vendor Catalog

Update– March 04, 2013

. . . . . .

Applied Industrial Technologies Available in eProcurement
Effective today, the Applied Industrial Technologies catalog is available as an eProcurement Vendor Catalog. You will be able to log in to eProcurement, place your order with Applied Industrial, and have it billed to your University account. All future purchases from Applied Industrial need to be made through ePro. Orders can **only** be placed with this vendor through Vendor Catalog.

How to compare vendors using two browsers

Users continue to window shop using one Internet browser, which has led to two different vendors' parts/items being included on the same purchase order. To prevent this from happening, please follow the steps listed below if window shopping or comparing two vendors:

1. Two different browsers should be utilized (i.e. Internet Explorer and Mozilla).

2. Once the vendor is chosen, close the other browser before placing the order with the selected vendor.

3. Click **Create Order** on the menu on the left hand side of the page under **eProcurement**.

4. Follow normal procedures to place order in chosen vendor catalog.

Images for SOP documents reminder

Before clicking the "Submit for Approval in ePro", click on the "View Invoice Image" link and review the fax documents to ensure the documentation is correct and viewable. Click the "Accept Image" button if the images are acceptable or the Delete Images if the documents need to be refaxed.

ONYEN and password caution

If a vendor's ePro site asks for your username and password, **DO NOT ENTER** them because you think it is a required step to access the ePro vendors – it is not. This usually indicates an issue with the vendor's punchout site. If this occurs, please close the browser and place a remedy ticket by calling 962-HELP or going to help.unc.edu and address the ticket to CONNECTCAROLINA-EPRO

If you have problems with or questions about ePro, contact the Help Desk by calling 962-HELP or by creating a help request from the UNC website. In the "Type of Help Needed" field, choose CONNECTCAROLINA_ePROCUREMENT so that your request is routed correctly.

To view a variety of training options and materials, visit the ConnectCarolina ePro training page https://finance.unc.edu/training/#epro.

Subject: Faculty Athletic Committee Meeting
Attach: Faculty Athletic Committee - Spring 2013 Presentation.pptx

---

Hey Guys,
Attached is a Power Point that I have put together for the meeting tomorrow with the Faculty Athletic Committee after consulting with Brent regarding the data pieces. Since we have 30 minutes to present, it might be a good idea for all of us to meet tomorrow to have a plan. Could we possibly meet around lunch time tomorrow? Beth, Brad said that you have a few slides regarding the LEEP program that I would like to insert into the attached if you don't mind. Can you send that to me?
I have shared the attached with Harold already, and he is comfortable with the content.
Thank you,
Susan

ASPSA Tutorial Program

Susan Maloy
Tutorial Coordinator

PROGRAM STRUCTURE

- Academic Center Hours
  - Sunday 6pm-11pm
  - Monday-Thursday 8am-11pm
  - Friday 8am-5pm
- Content Tutor Sessions
  - Sunday-Thursday 6pm-10pm & some daytime
- Study Strategy Sessions
  - Monday-Friday – daytime hours

PROGRAM STRUCTURE

- Monitors
  - 4 employed 6-11pm
  - 1 employed 7-9pm (Football)
- Full-Time Staff Presence until 9pm
- Part-time assistance
  - 1 employed to process paperwork (i.e. Feedback Forms before and after sessions) and record student and tutor attendance
- Tutors – Graduate Students and community members
- Graduate Learning Assistants (GLA)
- Learning Assistants (LA)

PROGRAM STRUCTURE

TERM	TUTORS	LA	GLA	TOTAL
Fall 2011	84	28	0	112
Spring 2012	75	9	0	84
Fall 2012	43	4	4	51
Spring 2013	47	4	6	57

SCHEDULING

- All appointments are scheduled by the Tutorial Coordinator at the end of the first week of class.
- Additional sessions whether initiated by the counselor, tutor, or student must be approved by the Tutorial Coordinator.
- Cancelations are communicated through the Tutorial Coordinator

SCHEDULING

- Requests for tutorial sessions are made through the database by each academic counselor either upon the counselors recommendation or student's request.

TUTORIAL SESSIONS

- One-on-One Content Tutor Sessions
- One-on-One Study Strategy Sessions
- Small Group – No more than 5 students
- Drop-in Sessions
    - Fall 2012 – Avg. 8 sessions per night
    - Spring 2013 – Avg. 9 sessions per night
    - Writing Lab – ~2 Tutors per hour
- Exam Review Sessions
- Final Exam Review Sessions

303/414 tutoring hours are one-on-one in Spring 2013
84/303 are strategy sessions
110 are small group

HOW MANY STUDENTS DO WE SERVICE?

TERM	# APPTS.	# STUDENTS SERVED w/ APPTS.	% OF TOTAL STUDENT-ATHLETES	# STUDENTS W/ 8 OR MORE APPTS.
Fall 2011	1110	397	53.9%	19

Subject:	FORMAL NOTICE: Message from the Chancellor: Thursday Night Football Game

Dear Faculty and Staff,

The ACC 2013 football schedule was released last week. Coach Fedora is already working hard to prepare the team for the year ahead, and I'm sure our fans share my excitement for the upcoming season. Among our home games this year, we will play a Thursday night game during fall break for the second time in school history. We will welcome Miami to Kenan Stadium on Oct. 17 for a televised 8 p.m. game, to be shown on ESPN. This is a great opportunity to showcase our University on national television.

Those of you who were here in 2009 remember that we held our first Thursday night game during fall break that year. We hope to repeat the success of that event, but we're going to do a few things differently this year.

Most importantly, we will not end the workday early. Since the game occurs during fall break, most of our faculty and students will not be on campus, but it is a regular workday for staff.

We expect a lot of traffic coming into Chapel Hill that afternoon, and people may want to head out before things become too congested. But that's a choice I want our employees to be able to make. In conjunction, I want to encourage supervisors to be flexible with employees' needs and schedules if they would like to leave work early that day and arrange to make up the time.

In addition, leaders at UNC Hospitals are working on plans to ensure that patient care will not be disrupted at our on-campus hospitals and clinics. We know that traffic in and around the hospital area will become heavy that afternoon and we will do everything we can to keep the hospital and campus operating as smoothly as possible.

As we work out the details for game day, you will receive additional information from our Office of Human Resources and Department of Public Safety. We want to make this a successful event for everyone on campus.

Sincerely,

Holden Thorp

Subject: Password for Onyen 'bridgerb' expires soon.

The password for the Onyen 'bridgerb' is set to expire
at this date and time: Thu Mar 7 10:11:15 2013

Visit the following web site to change your password or for
information on how to have it reset if it was forgotten:

https://onyen.unc.edu/cgi-bin/unc_id/chpw.pl

After your password expires, you can still access the above site
to change your password, though you will not be able to use your
Onyen to access any other Onyen-authenticated services until you
change your password.

Once you change your password, it will work for another 90 days
before it expires again. If you never use your Onyen, then
disregard this notice.

Your new Onyen password will be copied automatically to the
AD.UNC.EDU domain. If you have any Laptop, Desktop, or handheld
device which uses your old Onyen password to automatically login
or re-authenticate to services using the AD.UNC.EDU domain
(Exchange, for example), be sure to logout of those services and
login again with your new Onyen password within 10 minutes of
changing it. If you don't, and your devices continue to attempt
to re-authenticate using your old Onyen password, your
AD.UNC.EDU account will be locked for 10 to 20 minutes, just as
if you repeatedly tried to login with a bad password. During
that time you will not be able to login.

If you think you might forget your password, consider setting up
a "Challenge/Response" where you answer a few personal questions
BEFORE you forget your password. Later, if you can answer these
questions again, you can get a new password without having to
visit one of the password reset sites on campus. Just click
"Challenge-Response" at the top of the page mentioned above and
follow the instructions.

Answers to many common questions and a list of some Onyen
related services can be found by visiting the web site:

http://help.unc.edu/3247

If you have questions or need additional assistance with this
issue, contact the ITS Response Center at 919-962-HELP and we'll
be glad to assist you.

We send out these Password Expiration Notices via email
at 2 weeks, 1 week, and 2 days prior to the expiration.

This message is being sent to the electronic mail address
associated with the Onyen 'bridgerb' in the UNC Campus Directory.
If this address is not your preferred electronic mail address,
you may change it by visiting the Campus Directory web site:

http://dir.unc.edu/dir/home/

Subject:	FORMAL NOTICE: Executive Vice Chancellor and Provost Search

---

Dear Faculty, Staff and Students,

In alignment with the Chancellor search, the search for a new Executive Vice Chancellor and Provost is moving ahead. We have begun to recruit for the position but with an understanding that potential candidates will probably want to know who the Chancellor is before they engage too deeply in the process.

Advertising is about to begin. We will start with an ad in the Chronicle of Higher Education; other ads will soon follow. Both the ad and a Leadership Statement which more fully describes the Executive Vice Chancellor and Provost position may be viewed here https://provost.unc.edu/provost_search/. We strongly encourage you to suggest potential candidates to our search consultants, who can be reached at UNCProvost@wittkieffer.com. Please provide names, contact information, and any additional observations you would like to offer, for either internal or external prospects. The consultants will follow up on all suggestions.

Thank you for your interest in this important project.

Kristen M. Swanson, RN, PhD, FAAN
Dean and Alumni Distinguished Professor

- Promising Practices

Webinar Overview

This webinar will provide an overview of how integrated student services, also known as a "One Stop Shop," can provide your college or university with seamless student services, as well as collaborative and challenging work environments for your staff. The presenter will discuss student services integration across several dimensions including virtual, physical, and organizational integration. By deconstructing operational silos, streamlining processes, and cross-training staff, operational efficiencies can be gained and students can be provided with holistic counseling experiences.

The presenter will discuss the "One Stop" approach to service, which has been successful for many institutions and will also highlight the University of Minnesota's successful One Stop Student Services Office. Participants will leave with a thorough understanding of various approaches on creating a One Stop Shop on their campus and will be provided with several handouts including: job descriptions, organizational charts, and a training matrix.

Webinar Objectives

Participants will learn:

- Considerations for developing a "One Stop" student services model including staffing, training, branding, and physical/facilities
- Physical, organizational, and virtual integration
- Various models to streamline student services organizations
- The One Stop Student Services model at the University of Minnesota from the visionary stages through successful post-implementation
- How to leverage technology into seamless self-service Web applications that bring students from "in line" to "online"

Webinar Speaker(s)

Julie Selander has worked in higher education administration and finance for over 24 years. Her experience includes student loan servicing operations, tuition payment plan sales and marketing, organizational leadership, as well as various management

Subject: [forum-div1] Employee Forum Delegate Nominations

CALL FOR NOMINATIONS

Nominate yourself or someone else for the Forum Delegate Elections at http://forum.unc.edu/nomination/

March 7, 2013

Dear Fellow UNC-Chapel Hill Employee:

It's time to elect new delegates to the Employee Forum. The Forum, which began in 1992, is the collective voice for SPA and EPA non-faculty employees on our campus, and its effectiveness depends on your participation and support. Chancellor Thorp has expressed his support for the Forum and its work on behalf of the University's staff, stating that he believes:

"For Carolina to be the best place to teach, learn and discover it must be a great place to work for our employees. Serving on the Employee Forum is an opportunity to contribute to that process and make a difference on behalf of your fellow workers."

Please talk with your colleagues about participation in the Forum, and send us the names of those you would like to represent your interests. Each of nine electoral divisions elects representatives based on the proportional number of employees in the division (see table below).

The process of electing delegates begins in March to allow time for new delegate orientation prior to the assumption of duties. In April, you will receive a ballot asking you to vote for your new Forum representatives.

Delegate Responsibility

Employee Forum meetings are held on the first Wednesday of each month, and there is an attendance policy designed to encourage participation and true representation. If a delegate misses three unexcused consecutive meetings or five in a nine-month period, he or she is automatically replaced. **Term in office is from May 2013-June 2015.** Delegate participation will be considered work time.

It is an honor and a privilege to serve as a Forum delegate. Effective service requires dedication, enthusiasm, and time. Monthly meetings are two and a half hours in length. In addition, delegates are likely to spend additional time up to six hours per month on committee and other essential work (more for officers and committee chairs). Employees who accept nominations should verify that their managers will approve the time to support this important service to the University.

Nominations

We need your help in identifying people who are willing to serve on the Forum. You may nominate any permanent UNC-Chapel Hill employee, including yourself, from any electoral division. Please verify that your nominees are willing to serve.

Nominations must be received **by March 22**.

Elections

The Forum will be composed of approximately 60 elected delegates. This year we will elect 36 new delegates from across all

nine electoral divisions.

If you have any questions about the nomination or election process or about Forum issues, please feel free to contact the Forum office at 962-3779 or the Forum Web site at ***http://forum.unc.edu***

Sincerely,
Jackie Overton, Forum Chair

Subject: FORMAL NOTICE: Retroactively Adjusted CommTech Core Data Charges

---

Retroactively Adjusted CommTech Core Data Charges

TO: Deans, Directors, Department Heads, Campus Business and Financial Managers

FROM: Stan Waddell, AVC, Infrastructure and Operations and CTO, ITS

RE: Programmatic Correction on Retroactively Adjusted CommTech Core Data Charges
==========

Dear Colleagues,

ITS Communication Technology core services charges have not "followed" retroactive salary source changes. Therefore, when a unit retroactively changes the salary source to a different account, the core services charges have remained on the original account.

ITS has been working to analyze and correct this. Our aim is to ensure core data services charges move to the appropriate account when the salary source changes. We realize that it is of utmost importance that this be corrected well in advance of fiscal year-end processing. We do apologize that this has yet to be satisfactorily resolved.

We are anticipating resolution of this via a programmatic solution by March 22.

In the meantime, we ask that departments NOT initiate journal entries to move the core data charges based on retro funding source changes.

Below, you will find information on:
* The background of this problem
* Action items, including what you should do now
* When we expect this to be resolved

Again, we apologize for this problem. If you have any questions or concerns, please feel free to contact me.

Thank you.

BACKGROUND
ITS Communication Technology core services charges have not moved to the correct accounts after retroactive salary source changes. As such, when a unit retroactively changes the salary source to a different account, the core services charges have remained on the original account. While this was done to prevent shifting charges onto Contracts & Grants sources, it orphaned a number of charges that require correction.

We are working with our colleagues in the Office of Sponsored Research, Accounting Services, Information Technology Services, and Payroll Services, both to correct the orphaned charges, and also to prevent the issue moving forward.

Our goal is to ensure core data services charges move with the salary source change:

* For changes effective after 1/1/2013, a move from a non-Contracts & Grants source onto a Contracts & Grants source, and vice versa, will simply move the charges.
* For changes effective between 7/1/2012 and 12/31/2012, our intent is to ensure a change from a Contracts & Grants source onto a non-Contracts & Grants source will calculate and apply the correct core data services charge; and a change from a non-Contracts & Grants source will remove and refund the core data services charge.

ACTION ITEMS:
* Departments should NOT initiate journal entries for correction of the core data portion of the retro funding source changes (please do NOT make any adjustments to the transaction) and instead should wait for ITS to make this change
* ITS has created a report of historical actions that is being tested this week
* ITS will create the FRS file this week and Accounting Services will test next week

PROJECTED TIMEFRAME:
Barring unforeseen issues with the testing, we expect to complete this change no later than March 22.

Best Regards,

Stan Waddell
Interim Assistant Vice Chancellor for Infrastructure and Operations and CTO

Subject:	FORMAL NOTICE: From the Chancellor: Continuing the Campus Conversation About Sexual Assault

---

Dear Students, Faculty and Staff:

The conversation on campus surrounding sexual assault is growing louder and more passionate. Let's talk about it.

To make meaningful changes that will improve how sexual assault is addressed at Carolina, we must have an open and honest dialogue. Those conversations are taking place across campus. Informally and formally. In small groups and large. Among students, faculty, administrators, staff and other members of our campus community.

Sexual assault is one of the greatest challenges facing campuses across the nation, including Carolina, and it is an issue that I am committed to addressing before I leave office. We're focused on the safety of our students, as well as faculty and staff, and have an obligation to do everything we can to provide the care and support they need if a sexual assault occurs. In those instances, we must act promptly to thoroughly investigate and address any misconduct.

This week, as expected, we were notified by the U.S. Department of Education's Office for Civil Rights that it has opened an investigation about our handling of sexual assault complaints. The University is cooperating fully with this investigation. In fact, we welcome it. Our response will show how the University has made significant changes in the past 18 months about how sexual assault complaints are handled. They include removing sexual assault cases from the jurisdiction of the Honor System and implementing a new process that involves students, faculty and staff who are specially trained to deal with the complexities of these cases. In addition, we continue to build on our existing relationships with the University's Department of Public Safety, local law enforcement officials and rape crisis counselors to provide a comprehensive range of support services to students who experience sexual assault.

We began making many of these changes long before the Office for Civil Rights complaint was filed several weeks ago. In fact, much of this work is in response to guidelines and recommendations issued by the Office for Civil Rights to universities nationwide in 2011.

Our system is still not perfect.

There is more work to be done, and we are committed to making additional changes that will improve the way sexual assault cases are handled at the University. This month, we brought on board two new employees to investigate sexual assault allegations and help survivors of sexual assault get the information and resources they need.

Gina Smith, a nationally recognized expert on sexual assault issues, continues to work closely with the University. She returned to campus this week to meet with students and engage in open discussions about these issues. Her work will elicit important feedback and produce clear recommendations to help us strengthen our processes.

We are also gathering valuable feedback from students and faculty in

other ways. I recently received a letter from Dr. Joanne Hershfield, chair of the Department of Women's and Gender Studies, offering suggestions on how to address sexual assault issues on campus. I look forward to evaluating those recommendations and working with Dr. Hershfield and other faculty members to continue the dialogue about how we can do better.

Additional feedback from students, faculty, staff, alumni and other members of our campus community is being collected through an online suggestion box at http://campusconversation.web.unc.edu/suggestion-box/. It's a website where you can learn more about the steps we are taking, find the latest news about this issue, and confidentially share your thoughts about the important work that still needs to be done.

While our students and faculty take a well-deserved break for rest and reflection next week, let me assure you that we will be hard at work, mindful that the ultimate goal is to eradicate sexual violence and misconduct from our campus. Our students and this community deserve no less.

Enjoy your Spring Break. Be safe. I look forward to continuing this conversation when you return.

Sincerely,

Holden Thorp

- Evaluating the Impact of Faculty Embedded Tutor Training Programs Factors
- Outcome and Performance Measurement for Tutoring Programs

Webinar Overview

Are you ready to build a tutor program or committed to growing one already in existence? How would you like to benefit from someone with 30 years of experience in exactly that? Imagine avoiding mistakes, saving time, and beginning with a successful, proven model. This webinar will review the tenets that have made the learning center at Stephen F. Austin State University a leader in retention and the winner of several outstanding awards:

- College Reading and Learning Association (CRLA) Certification at all three levels
- Distinguished Certification from National Association of Developmental Education (NADE)
- Star Award from the Texas Higher Education Coordinating Board
- Best Program, Texas Association of Developmental Education
- John Champaign Memorial Award for Outstanding Developmental Education Program

Participants of this webinar will learn how to implement the major touchstones of a successful tutor program. We will discuss budget, management and hiring practices, training, customer service, how to identify your target market, and assessing plans once in place. We will also learn how important it is to inform your practice through current research and trends.

Webinar Objectives

Participants will cover the major touchstones of a successful tutor program:

- Centralize: Creating a healthy management team linked by a common mission
- Budget: Getting the money and keeping the money
- Hire: Recruiting and complying with HR
- Train: Aligning with CRLA certification
- Schedule: Using Tutor Trac or a similar program

Subject: FORMAL NOTICE: Administrative Review of Leslie C. Strohm, JD, Vice Chancellor & General Counsel

---

MEMORANDUM
DATE: March 14, 2013
TO: Members of the UNC-Chapel Hill Faculty, Staff, Students and Alumni
FROM: H. Holden Thorp

RE: Administrative Review of Leslie C. Strohm, JD, Vice Chancellor and General Counsel

I am pleased to invite your participation in the review process on behalf of the committee appointed to review the performance of Leslie C. Strohm, JD, Vice Chancellor and General Counsel.

This review, required by University regulations, will focus on Ms. Strohm's performance during the five years since her last review. The committee consists of:

* Barbara K. Rimer, DrPH, Dean and Alumni Distinguished Professor, Gillings School of Global Public Health (Committee Chair),
* Gena Carter, BS, Senior Director, Employee and Management Relations, OHR
* Glenn George, JD, Chief of Staff, Senior Vice President and General Counsel, UNC Health Care System
* Jonathan Hartlyn, PhD, Senior Associate Dean for Social Sciences and Global Programs & Kenneth J. Reckford Professor of Political Science, CAS
* Steve Lerner, PhD, Member, UNC Board of Trustees; Blue Hill Group (Founder and Managing Partner)
* Dwayne Pinkney, PhD, Vice Provost, Finance & Academic Planning
* Erin Schuettpelz, BA, Chief of Staff & University Secretary
* Stan Waddell, CISSP, C/CISO, PMP, ABD, Interim Assistant Vice Chancellor for IT Infrastructure & CTO

The committee invites your comments on Ms. Strohm's leadership. It is important for the committee to understand how Ms. Strohm is viewed by her peers at UNC-Chapel Hill and as a colleague and citizen of the University community. The primary responsibility of the review committee is to serve as a conduit and organizing mechanism for feedback concerning Ms. Strohm's performance.

In that context, we encourage you to contribute to this review in the following different ways:

1. SHARE YOUR COMMENTS WITH THE COMMITTEE AT THE SCHEDULED OPEN SESSION on April 15, 2013 from 9:00-11:00 in room 105 South Building
If you wish to meet with the committee, please contact Ramona Womble in the Chancellor's Office at: (919) 962-7237, or by email at: LS_Admin_Review@unc.edu and she will schedule a 15-minute session. While all comments received during these sessions will be kept strictly confidential, a master list of attendees will be retained as part of Ms. Strohm's personnel file. Requests to meet must be received no later than April 11, 2013.

2. PROVIDE WRITTEN COMMENTS TO THE CHAIR (email or postal or campus mail). The review committee will treat your comments as strictly confidential. However, by law, all written communications, whether paper or email, become a confidential part of Ms. Strohm's personnel file and as such, are open to examination by her. Oral communications (by telephone or in person) and the committee's notes generated from these conversations do not become part of Ms. Strohm's personnel file, but may be reflected in the committee's report without identifiers. If you wish to provide oral comments, please contact the Chair or any member of the committee. University regulations prohibit consideration of anonymous letters in the review process. All written comments should be sent by April 5, 2013, to: Dean Barbara K. Rimer, committee chair c/o Ramona R. Womble, 103 South Building, CB # 9100, or by email at: LS_Admin_Review@unc.edu

3. You may speak with any of the committee members privately by telephone or in person. Oral communications (by telephone or in person) and the committee's notes generated from these conversations do not become part of Ms. Strohm's personnel file. The deadline for meeting with committee members is April 5, 2013.

Thank you very much for your help in this important task.

Subject: FORMAL NOTICE: Antivirus Software on personally owned devices

---

March 15, 2013

Greetings:

In response to customer feedback about Symantec antivirus software and the changing needs of the University, the decision has been made to change vendors for antivirus software. To comply with the UNC-Chapel Hill license agreement with Symantec, all UNC-Chapel Hill-provided Symantec antivirus software MUST be removed from your personally owned devices before the Symantec license expires on August 1, 2013.

Although you may use any antivirus program on your personally owned devices, Information Technology Services (ITS) has tested and recommends some free options that are available from the Shareware site at shareware.unc.edu. The recommended software is free to all UNC-Chapel Hill students, faculty and staff and can be retained on your personally-owned device even after you leave UNC-Chapel Hill.

As the University license with Symantec is set to expire soon, you are required to remove Symantec and install a replacement antivirus software program as soon as possible. Help documentation to guide you through the uninstall process for Symantec and the installation of the new antivirus software is available and listed below.

The recommended antivirus product for Windows devices is:
* Microsoft Security Essentials
* https://help.unc.edu/help/migration-from-symantec-to-microsoft-antivirus/

The recommended antivirus product for Apple Macintosh devices is:
* ClamX Antivirus
* https://help.unc.edu/help/clamx-antivirus/

If you have any questions or encounter any problems as you make this antivirus switch, please call 962-HELP for assistance.

Sincerely,

Ramon Padilla Jr.

Eat Right

Food, Nutrition and Health Tips from the Academy of Nutrition and Dietetics

Power Up with Breakfast

Breakfast gives you energy to start the day. A healthy breakfast is important for everyone. Get the morning nutrition you need with these quick breakfast ideas.

- Make instant oatmeal with low-fat milk instead of water. Toss in raisins or dried cranberries and chopped walnuts.
- Layer low-fat plain yogurt with your favorite crunchy cereal and blueberries.
- Blend a breakfast smoothie with low-fat milk, frozen strawberries and a banana.
- Make one packet of microwave oatmeal with low-fat milk. Mix in 1/4 cup unsweetened applesauce. Sprinkle with apple pie spice or cinnamon.
- Top a toaster waffle with low-fat yogurt and peach slices.
- Stuff a whole-wheat pita with a sliced, hard-cooked egg and low-fat shredded cheese.
- Spread a flour tortilla with peanut butter. Add a whole banana and roll it up.
- Spread low-fat cream cheese on a whole-grain toasted bagel. Top with sliced strawberries.
- Add lean ham and low-fat Swiss cheese to a toasted whole-grain English muffin.

Springtime Cereal
Makes 2 servings

¾ cup wheat and barley nugget cereal
¼ cup 100% bran cereal
2 tsp toasted sunflower seeds
2 tsp toasted almonds, sliced
1 tbsp raisins
½ cup bananas, sliced
1 cup strawberries, sliced
1 cup raspberry or strawberry yogurt, low-fat

Mix the wheat and barley nugget cereal, bran cereal, sunflower seeds and almonds in a medium bowl. Add raisins, bananas and half of the strawberries. Gently stir in the yogurt and divide between two bowls. Scatter the remaining strawberries over the top and enjoy!

Nutrition Information per serving:
Calories: 352
Fat: 6 g
Saturated fat: 1 g
Carbohydrate: 69 g
Sodium: 272 mg
Fiber: 8 g

Find more healthy eating tips at:
www.kidseatright.org
www.eatright.org/nutritiontipsheets

If your taste buds just don't crave breakfast foods, try these:

- Peanut butter and banana sandwich on whole-grain bread
- Leftover veggie pizza
- Deli turkey, a slice of low-fat cheese and lettuce wrapped in a tortilla
- Leftover rice mixed with low-fat yogurt, dried fruit and nuts. Sprinkle with cinnamon.

Power up with a healthy breakfast and you're off to a great start!

Subject: ASPSA STAFF MEETING AGENDA

Beth,
Please place the following questions for academic counselors under my name on the agenda. Actually, it would be great if counselors could come to the meeting with their answers to these questions.
Thanks.
Harold
What are the two best times during the week of March 25th where a number of advisors could hold walk-in hours in Loudermilk for pre-registration advising.
How many of your first year students have not completed their first year advising appointment or attended an advising group workshop? We need to determine quickly if there is a need for an additional group advising workshop for our ASPSA students.
Who would be willing to help lead training workshop for academic advisers on NCAA rules and guidelines regarding student-athletes' eligibility requirements?

Subject:	FORMAL NOTICE: Director of Academic Support Program for Student-Athletes

Dear Students, Faculty and Staff:

We are pleased to announce the appointment of Dr. Michelle Brown, who has an outstanding record of success in leading academic support services with student-athletes, as director of the University's Academic Support Program for Student-Athletes (ASPSA), effective May 6, 2013. She was selected following a national search led by a committee chaired by Dr. Steve Matson, dean of the Graduate School.

Dr. Brown will lead a talented ASPSA staff that serves the University's nearly 800 student-athletes. Those colleagues include four associate directors, a learning specialist, a reading, writing and learning specialist, five academic counselors, and a tutor coordinator. They are joined by six part-time learning assistants (who are graduate students, an undergraduate alumnus, a local school teacher and a professional tutor) and 57 part-time tutors (who are graduate students, local school teachers, and retired faculty).

Dr. Brown has more than 15 years of professional experience working with student-athletes, most since 2005 as director of the Student-Athlete Center for Academic Excellence and associate athletic director for academics and student services at Florida Atlantic University. She was associate director of the academic excellence center, as well as assistant director of campus-wide advising and academic support services for first-year students, at Florida Atlantic. She has demonstrated strong leadership skills, spearheaded several new initiatives, and implemented a data-driven approach in encouraging the academic and personal well-being of student-athletes.

Dr. Brown earned her Bachelor of Arts degree in International Studies and French with magna cum laude honors in 1992 at West Virginia University, where she played Division I volleyball as a scholarship student-athlete and received all-conference honors. Between her sophomore and junior years, she earned a certificate in French at the Universiti de Paris, Sorbonne. While pursuing her Master of Arts degree in French/Teachers of English to Speakers of Other Languages (TESOL), she received a second certificate in French from the Universiti du Quebic ` Chicoutimi. She completed her Ed. D. in higher education administration at Florida Atlantic in 2002 while working full time.

Dr. Brown's perspective as an accomplished academic and successful administrator who has competed as a student-athlete makes her an excellent fit for our University. She has the professional and personal experiences to work effectively with our faculty, administrators, student-athletes, and athletic department colleagues. Her hiring marks a significant milestone toward making the changes in the ASPSA that Chancellor Thorp announced last August as part of the campus-wide steps we have taken to strengthen the relationship between academics and athletics. At that time, the chancellor emphasized the opportunity to move forward in ASPSA with a fresh perspective, building on his conversations involving College of Arts and Sciences Dean Karen Gil, Athletic Director Bubba Cunningham, and the Board of Trustees.

When Dr. Brown arrives, the program will move to the Office of the Executive Vice Chancellor and Provost from the College of Arts and

Sciences, where the program has been housed since the early 1980s. This change reflects the important role that ASPSA plays in advancing the academic mission of the entire University, as well as the recommended growth in the program resulting from a strategic planning process completed in 2011. Dr. Brown will report directly to the provost, the University's chief academic officer. She will also convene the Provost's Roundtable, a working group that will bring together colleagues from across the University who are responsible for fostering the academic success of student-athletes.

The shift in reporting responsibility definitively addresses the proper separation of academic and athletic responsibilities for student-athletes because the provost is ultimately responsible for academic oversight across the entire campus. It follows Chancellor Thorp's removal last fall of a secondary dotted reporting line from the ASPSA to the athletics department. Our plans for the ASPSA already had been informed by ideas from the faculty and were consistent with recommendations for all UNC campuses in the 2011 Task Force on Academics and Athletics report commissioned by President Tom Ross. President Ross since directed all UNC chancellors to take steps to ensure that academic support services and tutoring for student-athletes are under the purview and responsibility of Academic Affairs or another appropriate unit outside the athletic department. The athletics department will continue to fully fund the ASPSA.

As we announce Dr. Brown's selection, we recognize the work of dedicated faculty, staff, and administrators in the College to promote the academic success of all students, including student-athletes. We also acknowledge the contributions of Dean Harold Woodard, who became interim director of ASPSA last year and has served ably in that role, even as he has continued to fulfill his other duties in the College.

Please join us in welcoming Dr. Brown to Carolina. She is excited about the opportunity to contribute to our campus community.

Sincerely,

Bruce Carney, Executive Vice Chancellor and Provost

and

Bobbi Owen, Senior Associate Dean for Undergraduate Education

The Question to Ask If Your Recruit is Waiting For Money

Waiting on money for college

The Spring is an odd time of year for coaches who aren't able to offer full athletic scholarships to their prospects (which includes the vast majority of college coaches around the country).
You have the interest of your recruit, they've applied to your school, they know you want them. And so now, you wait.
You're waiting for either one of two things: Either your prospects are finishing-up their Senior seasons and are quietly hoping for other amazing offers from schools who have somehow missed them up to this point, or they are submitting their FAFSA information and are now waiting to get the "official" word from financial aid across campus as to what their "final number" is. And the wait can be excruciating.
You have decisions to make, but of course you understand and appreciate why it's a tough decision to make at this point in the early Spring without all of the "official" financial aid information in place.
The result? Most coaches in this situation choose to wait - albeit somewhat impatiently - for the process to run it's course and eventually get their answer right before the start of Summer. That's stressful for the coach, and doesn't do much to solidify your recruiting class as early as possible.
I'm not claiming that the following advice will be the cure for everything that ails you when it comes to this tricky scenario, but there is a question I'd recommend asking that might just give you the answers you're looking for (even if financial aid isn't done crunching numbers yet).
Here's what to ask...

What Marketing Experts Can Teach Us About Recruiting Materials

by Sean Devlin, ***Front Rush***
People like to look at other people.
More specifically, people like to look at other people's faces. It's true...we are drawn to them.
We are drawn to other people's faces regardless if they are actual pictures or if they are cartoons or simply a circle with a few lines. We are psychologically predisposed to it. Our brain 'lights up' when we recognize something as a face or even if something resembles a face.
How many times have you seen Abraham Lincoln in a rock formation or in a cloud? It's true and now you recognize it...and so do marketers. There is a reason that many ads have big pictures of faces. You are more likely to interact with it. Eye tracking studies (which are studies where websites track what part of the page you look at) show that users will focus on the parts of the page that have pictures of faces.

So that's cool. You know what else is cool?...

On-Campus Workshop

Recruits Wary Of Deregulation Rules

By Mitch Sherman, ESPN
Just as football prospects in the Class of 2014 were beginning to understand the ramifications of recruiting legislation passed in January, the NCAA is suddenly retreating like the Confederate army out of Gettysburg.
Much intrigue has followed the Jan. 19 vote by the Division I Board of Directors to adopt seismic changes that essentially throw out the rule book as it applies to regulation in recruiting.
Unlimited contact from college coaches to prospects? Unregulated staff sizes with no checks on the recruiting materials mailed to prospects? Sure, why not?...

---

Good morning,
Last week the Work Well, Live Well employee wellness committee hosted a wellness expo at the Rams Head Recreation Center, Wednesday, March 13, 2013. If you were able to attend the expo, please take a moment to let us know what you think--
http://studentvoice.com/uncch/2013wellnessexpo

If you were not able to attend, it would be helpful to know why. The purpose of the wellness expo was to provide UNC employees with information related to health and wellness resources available on campus and in the community. For more information about the Work Well, Live Well employee wellness committee visit--
http://hr.unc.edu/benefits/wellness-programs/

Feel free to email your comments to Lauren Mangili (lmangili@email.unc.edu)

In health,
Lauren Mangili

Passion for College Football Remains Robust

Impressive ratings and attendance figures signal the sport's relevance in every corner of the country.

IRVING, Texas, March 19, 2013- The National Football Foundation & College Hall of Fame (NFF) showcased today three impressive facts from the 2012 college football season that emphasize the strong interest in the sport by millions of fans across the country, including:

Exceptional Attendance Figures: The sport produced the third highest attendance figure ever with 48.96 million fans attending a game, including 1.7 million spectators for the bowl games.

Outstanding Television Viewership: More than 216 million viewers tuned in to watch the regular season with another 126 million watching the bowl games.

Powerful Bowl Ratings: The Discover BCS National Championship Game on ESPN between Alabama and Notre Dame produced the second most-viewed program in cable

television history with 26.4 million viewers, only behind the 2011 BCS National Championship Game. The five BCS bowl games averaged 15.1 million viewers up 7 percent from last year.

"In every instance, whether it's the regular or the bowl season, the numbers for college football show strong interest," said NFF President & CEO **Steve Hatchell**. "College football fans have an unmatched passion for their sport, and the options for them to connect with their teams have never been greater. We are grateful to the conferences, bowl games and the media for their creativity and commitment in delivering a first-class product that allows fans to experience the game in every imaginable way."

College football attracted its **third-highest attendance total ever with 48,958,547 fans** turning out to watch a home, neutral-site or postseason game in 2012 at the 644 NCAA schools, according to the NCAA. The number represents a slight drop (1.49 percent) from the record set last year when 49,699,419 attended a game, and the numbers symbolize a phenomenal increase of 156 percent from the 19,134,159 fans that the NCAA reported when they first started collecting attendance figures in 1948*. During the past sixty years, total attendance has only dropped more than 2 percent on two occasions, including in 2004 when the NCAA capped 12-game seasons and in 1995 when a 2.25 percent decrease occurred.

The 35 **bowl games this season attracted 1,722,833 spectators to the stands** (49,224 per contest), slightly less than the record mark of 1,813,215, which was set after the 2010 regular season, and a majority of the contests, 18, experienced increases in attendance from last year.

College football bowl game viewership across all networks also remained extremely strong, attracting **126 million viewers to television screens to watch the 35 bowl games** and complimenting the more than **216 million people who tuned into the regular season**. The ESPN family of outlets alone reached more than 187 million viewers during the telecasts of its regular season games, and ESPN's presentation of the **five BCS bowl games averaged 15,131,000 viewers, up 7 percent from last year**.

The game has benefited enormously from the commitment of every major media sports outlet, including the Big Ten Network, BYUtv, CBS, CBS Sports Network, ESPN, ESPN on ABC, ESPN2, ESPNU, ESPN3, ESPN3D, Fox College Sports, Fox Sports, Fox Sports Net, FX, the Longhorn Network, NBC, NBC Sports Network, Pac-12 Network, and multiple regional and local outlets. Throughout the regular and bowl seasons these outlets continue to capitalize on college football's ever-increasing popularity to produce an increasingly dynamic product that engages fans on new levels. IMG reports that the entire industry has committed $25.5 billion in college rights fees over the next 15 years.

Ranked among the top most popular sports in the United States along with the National Football League and Major League Baseball, NCAA Football counts 103 million adults as fans** or 44 percent of all U.S. adults. Among adult college football fans, 61 percent are male and 39 percent female. Twelve percent are between the ages 18-24, 18 percent are 25-34, 19 percent are 35-44, 20 percent are 45-54, 16 percent are 55-64 and 16 percent are age 65 or over. Sixty-one percent have an annual household income of $50,000 or more, with 42 percent at $75,000 or more, and 25 percent at $100,000 or more. Thirty-two percent are college graduates and 61 percent are married, according to Scarborough Sports Marketing.

Regular Season Attendance Highlights

- 48,958,547 fans attended college football games at all 644 NCAA schools in 2012, marking the third-highest total in history.
- The Football Bowl Subdivision (FBS) drew 37,170,235 spectators or an average of 45,440 fans per game. The Football Championship Subdivision (FCS) pulled in 5,967,272 fans, followed by Division II (3,006,297) and Division III (2,361,687).
- The SEC, which added Missouri and Texas A&M, became the first conference in history to break the seven million fan barrier with an all-time conference attendance record of 7,478,304 fans attending games in 2012 for an average of 75,538 spectators per game. The total extends the SEC's streak of 15 consecutive seasons with the highest average fan attendance.
- The top-five conferences for average-home-game attendance included the SEC (75,538), Big Ten (70,040), Big 12 (59,004), Pac-12 (53,679) and ACC (49,910).
- The Pac-12 Conference set a high water mark for total attendance with 4,240,632 fans attending a game as did the Sun Belt with 1,008,084 spectators attending a game. At the FCS level the Big South, Missouri Valley Football, and Northeast conferences all set new records.
- Michigan averaged 112,252 fans per home game, eclipsing its own record set in 2011 and marking their 15th consecutive attendance title.
- Alabama led all teams with 1,299,659 fans watching its 14 regular season games in 2012. Eight other teams played in front of more than one million fans this season: Florida, Georgia, LSU, Michigan, Nebraska, Ohio St, Texas and Wisconsin.
- Michigan (112,252), Ohio State (105,330), Alabama (101,722), and Texas (100,884) all averaged more than 100,000 fans per home game in 2012. The other FBS programs in the top ten for average home attendance included Penn State (96,730), Georgia (92,703), LSU (92,626), Tennessee (89,965), Southern California (87,945) and Florida (87,597).
- Four FBS teams enjoyed crowd increases of more than 10,000 fans per game in 2012: California (18,219-person increase per game), Southern California (13,139), TCU (12,361) and UCLA (11,838). (Stadium renovations at Cal and TCU played a role in their increases.)

- Appalachian State claimed its fifth FCS attendance title in six years with an average of 26,358 fans per game, followed by Montana (25,236), James Madison (22,783) and Old Dominion (20,037).
- Grand Valley State (MI) captured the Division II attendance title by averaging 12,034 fans per game, followed by Miles (AL) with 11,117, Tuskegee (AL) with 10,869, Kentucky State (10,534), West Texas A&M (10,379) and Pittsburg State (KS) with 10,055.
- St. John's (Minnesota) netted the Division III attendance title with an average of 7,948 fans per game, followed by Wisconsin-Whitewater with 7,552, Hampden-Sydney (VA) with 6,723, Wabash (OH) with 4,873 and Concordia-Morehead (MN) with 4,839.

Regular Season Ratings Highlights

- More than 216 million viewers tuned in to watch a regular season telecast.
- College football posted either the No. 1 or No. 2 Saturday primetime-rated show for 14 consecutive weeks this past fall, including seven times at No. 1, according to IMG.
- ESPN's Saturday Night Football on ABC averaged an impressive 6,518,000 viewers and a 4.0 rating, making it the highest-rated and most-viewed college football series in the same time slot during the 2012 season. For 6 of its 12 broadcasts this season, the show was the most-watched program of the night.
- CBS Sports' national coverage of the SEC ON CBS for the 2012 season averaged a national household rating/share of 3.9/9, making it the highest-rated regular-season college football package in multiple windows on any network for the fourth consecutive season.
- Notre Dame football on NBC scored its most-watched season in seven years, averaging 4.4 million viewers and a 2.8 household rating for their seven games on NBC, up 69% and 67%, respectively, from last year.
- The Alabama-Georgia SEC Championship Game on CBS produced the highest-rated and most-watched college football telecast of the 2012 regular season, producing a 9.8/20 ratings/share and 16.2 million viewers.
- The ESPN on ABC Saturday Night Football broadcast of Notre Dame and USC produced the outlet's second most-viewed and second highest-rated regular-season game since 1991, averaging 16,059,000 viewers and a 9.4 rating. It was the most viewed primetime college football game in 2012.
- The November 3 game on CBS between Alabama and LSU produced the second most watched primetime game in 2012 with a 6.8/12 rating/share and 11.4 million viewers, and the November 10 CBS game between Texas A&M and Alabama also notched an impressive 6.1/13 ratings/share with 9.6 million viewers.
- The ABC Saturday Night Football broadcast on Nov. 17 of Stanford upsetting then-undefeated Oregon 17-14 in overtime averaged 8,347,000 viewers, a 5.1 rating and 5,855,000 households, garnering the night's largest audience among all networks.
- The four Notre Dame games on ABC in 2012 averaged 8,839,000 viewers, 6,100,000 households, and a 5.3 rating.
- Notre Dame's Sept. 22 primetime game against Michigan was the most-watched and highest-rated game of the year on NBC with 6.4 million viewers and a 4.0 household rating.
- Primetime telecasts for FOX's first Regular Season of College Football averaged a 2.1/4 with 3.2 million viewers, representing an 11% increase over last year's comparable 1.9/3 (3.1 million viewers) for entertainment programming, and the key male demos for Men 18-34 were up +50%, Men 18-49 up +36%, and Men 25-54 up +31%.

- The Army-Navy game drew a 4.1 rating on CBS, the highest rating for the game since 2009 and the 12th highest rated regular season game in 2012.
- The Heisman Trophy Presentation on ESPN marked the event's second most-viewed and second highest-rated telecast ever, averaging 4,902,000 viewers and a 3.5 rating, only eclipsed by the 2009 announcement.
- For the season, ABC, ESPN, ESPN2, ESPNU and ESPN3 covered 306 regular-season Football Bowl Subdivision games, involving teams from all 11 conferences, plus independents Army, BYU, Navy, and Notre Dame. The telecasts on ABC, ESPN and ESPN2 combined to reach more than 187,000,000 viewers.
- ESPN college football digital platforms logged an average minute audience of 163,000 on college football Saturdays.
- The new ESPN College Football app for Android and iOS devices received 3.4 million downloads this season. On Saturdays, the app averaged 972,000 unique visitors, 1,800,000 visits, and 10,600,000 page views.
- For the 12th consecutive year, Birmingham was the highest-rated metered market for ESPN's regular-season telecasts, averaging an 8.9 rating, followed by No. 2 Greenville (4.7), Knoxville (4.6), New Orleans (3.7), Jacksonville (3.6), Columbus (3.6), Atlanta (3.5), Oklahoma City (3.4), Nashville (3.3), and Memphis (3.1).
- Ivy League football received unprecedented national television coverage in 2012 with seven football games on the NBC Sports Network and one on the CBS Sports Network.
- The NBC and the NBC Sports Network carried a total of 32 college football games in 2012, including seven Notre Dame games, 10 Mountain West Conference games, six Colonial Athletic Association games, seven Ivy League games, plus the Bayou Classic and Atlanta Football Classic.

Post-Season Attendance Highlights

- The 35 bowl games this season attracted 1,722,833 spectators to the stands (49,224 per contest), slightly less than the record mark of 1,813,215, which was set after the 2010 regular season.
- The Discover BCS National Championship Game drew 80,120 fans, the largest crowd to ever view an event at Sun Life Stadium, surpassing the 78,468 for Florida-Oklahoma in the 2009 BCS National Championship Game. The largest crowd to watch a non-football event at Sun Life was 78,363 for WWE WrestleMania 28.
- The Rose Bowl Game presented by VIZIO attracted the largest crowd for a bowl game with 93,359 fans in attendance to watch Stanford play Wisconsin, continuing the longest sellout streak in college football dating back to 1947.
- The AT&T Cotton Bowl Classic had its second-largest crowd in the game's 77-year history with 87,025 on hand to watch Texas A&M and Oklahoma.
- The Valero Alamo Bowl between Texas and Oregon State produced a standing-room-only crowd of 65,277, the fourth largest attendance in the game's history and its fifth sellout in the last seven years.
- The Chick-fil-A Bowl between LSU and Clemson sold out for the 16th consecutive year with 68,027 in attendance.
- The BBVA Compass Bowl drew a record crowd of 59,135 with Ole Miss selling more than 21,000 tickets for the game against Pitt.
- The New Era Pinstripe Bowl set a record with 39,098 attending the game between West Virginia and Syracuse.
- The San Diego County Credit Union Poinsettia Bowl saw its attendance increase 31 percent with 35,442 fans in the stands.
- Fourteen bowl games had crowds in excess of 50,000.

- A majority of the bowl games, 18, experienced increases in attendance from last year.
- The R+L Carriers New Orleans Bowl set an attendance record with 48,828 fans in the seats for the East Carolina and Louisiana-Lafayette match-up.
- The Kraft Fight Hunger Bowl, between Navy and Arizona State with attendance of 34,172 produced the 5th highest mark in the history of the game.
- The Famous Idaho Potato Bowl between Utah State and Toledo attracted 29,243 fans to the stadium, the fourth-best attendance in the game's history.
- Coupling the 48,127 fans who attended the Russell Athletic Bowl and the 59,712 spectators at the Capital One Bowl, nearly 108,000 people passed through the gates of Florida Citrus Bowl Stadium in the span of five days.
- The Liberty Bowl crowd of 53,687 included more than 25,000 Iowa State vs. Tulsa fans.
- The FCS National Championship Game in Frisco, Texas, between North Dakota State and Sam Houston State produced a sellout crowd of 21,411, the largest crowd ever for a football game at FC Dallas Stadium.
- The Division I FCS playoff attracted 227,415 spectators for an average of 11,969 fans at each of its 19 playoff games. The Division II playoff totaled 98,231 fans or an average of 4,271 for each of the 23 games. The Division III playoff drew 56,309 fans for a 1,816 average for 31 games.

Bowl Season Ratings Highlights

- The Discover BCS National Championship Game between Alabama and Notre Dame on ESPN produced the second most-viewed program in cable television history with 26,380,012 viewers, only behind the Auburn-Oregon match-up in the 2011 BCS Championship on ESPN with 27,316,000 viewers.
- ESPN's presentation of the five BCS bowl games averaged 15,131,000 viewers, up 7 percent from last year (14,080,000).
- The Chick-fil-A Bowl between LSU and Clemson became the most-viewed non-BCS bowl on ESPN in history with 8,557,462 viewers, which also represented a 39 percent increase in viewership from the previous season.
- ESPN averaged 15,131,000 viewers for its five BCS bowl game telecasts, a viewership increase of 7 percent over last season's 14,080,000.
- The Outback Bowl between South Carolina and Michigan scored ESPN's fourth most-viewed non-BCS bowl in history with an average of 7,582,532 viewers.
- The Valero Alamo Bowl between Texas and Oregon State averaged an impressive 6,756,916 viewers on a 4.8 rating, making it ESPN's 14th most-viewed non-BCS bowl game telecast in history.
- The 2013 Rose Bowl Game averaged 17,023,715 viewers based on a 10.9 coverage rating, making it the most-viewed program on cable television outside of the NFL and BCS national championship games on ESPN since last year's Rose Bowl.
- The Rose Bowl Game and the Discover Orange Bowl combined for an average 13,736,000 viewers, marking an increase of 11 percent from last year for the two-game average on ESPN.
- The Discover Orange Bowl was the most-viewed program the night of Jan. 1 - broadcast or cable - with an average of 10,562,000 viewers, marking a 47 percent viewer increase from the previous year.
- The Allstate Sugar Bowl averaged 10,124,796 viewers with a 7.2 rating, a 4 percent viewer increase from last year.
- The Capital One Bowl on ABC averaged 10,954,000 viewers, marking a 35 percent increase over the network's coverage of last year's Outback Bowl, which occurred in

the same time slot in 2012 on New Year's Day. The game earned a 6.6 household rating, up 130 percent from 2011-12, the largest percentage improvement of any bowl game in 2012-13 and seventh-best among all bowls.

- The AT&T Cotton Bowl on FOX averaged an exceptionally strong 7.2/12 rating with 11.9 million viewers, ranking the game as the highest-rated and most watched Cotton Bowl ever on FOX and a 43 percent increase in viewers from last year.
- The 10th edition of the Bell Helicopter Armed Forces Bowl between Rice and Air Force drew the largest audience in the game's history with an average of 2,583,848 households (or a 61 percent increase from last year) and the telecast's second highest rating with a 2.6 average household coverage rating, or a 59 percent increase from last year.
- The New Era Pinstripe Bowl achieved a 60 percent increase in viewers from last year, going from 3,218,730 to 5,147,970.
- The MAACO Bowl Las Vegas between Boise State and Washington produced a 41 percent increase in viewership from last season with 4,433,640 fans watching on television this year.
- The BBVA Compass Bowl produced a 33 percent increase in viewers over last year with 2,671,624 fans tuning in to watch the game.
- The R+L Carriers New Orleans Bowl saw a 12 percent increase in viewers from 2,346,886 last year to 2,635,967 this season.
- The 28 non-BCS bowl telecasts on the ESPN outlets averaged 3,661,000 viewers or an increase of five percent over last season.
- 28 of the 35 bowl games each attracted more than 2.2 million viewers with the top ten contests each drawing more than 6.7 million fans, and 24 bowl games garnered a 2.1 or better household rating.
- Birmingham, Ala., averaged an impressive 10.3 metered market rating for the 29 ESPN bowl game telecasts.

Notable Bowl Facts and Milestones

- The SEC has won seven consecutive BCS National Championships and nine of the 14 BCS National Championships that have been played since its inception in 1998.
- Alabama became the first back-to-back winner of the BCS National Championship Games; the first school to win three BCS titles; and only the third school to win three titles in four years since the advent of the polls in 1936 (last accomplished by Nebraska from 1994-97).
- Northern Illinois became the first Mid-American Conference team to play in a BCS bowl with an appearance in the Discover Orange Bowl. Nine conferences and Notre Dame have now appeared in a BCS bowl game.
- The Allstate Sugar Bowl hosted the 8th Annual NFF National Hall of Fame Salute, featuring the 2012 College Football Hall of Fame Class.
- Georgia's victory in the Capital One Bowl gave the school 12 wins for the third time in school history.
- The Louisville victory in the Allstate Sugar Bowl produced a 11-win season for only the fourth time in school in history.
- The Northwestern victory in the TaxSlayer.com Gator Bowl marked the Wildcats first bowl game win since the 1949 Rose Bowl, giving the school a 10 win season for only the third time in school history. The win ended a nine-game losing streak in bowl games for Northwestern.
- Vanderbilt's victory in the Franklin American Mortgage Music City Bowl gave the school a 9-4 record for Commodores best season since 1915.

- Rice won only its second bowl game since 1958.
- The Texas A&M victory in the AT&T Cotton Bowl gave the Aggies 11 wins for only the fourth time in school history. The victory also ended a six game losing streak in the Cotton Bowl for the Aggies with their last win coming in 1988.
- Tulsa's Liberty Bowl victory over Iowa State marked their first win in a bowl game against a major conference team since 1964 while also giving the school its first 11-win season ever.
- San Jose State's victory in the Military Bowl gave the school its first 11 win season since 1940 and their first national ranking since 1975.
- Nevada and Arizona set an NCAA Bowl record, combining for the most plays in a game with 188 snaps during the Gildan New Mexico Bowl.
- TCU appeared in a bowl game for the eighth straight season and 11th time in Patterson's 12 seasons as head coach.
- Louisiana-Monroe appeared in their first bowl game ever, playing Ohio in the AdvoCare V100 Independence Bowl.
- Western Kentucky played in its first bowl game in school history, facing Central Michigan in the Little Caesars Pizza Bowl.
- Arizona won their first bowl game since 2008 with a victory in the Glidan New Mexico Bowl.
- Oregon has participated in four consecutive BCS bowl games.
- Stanford won its first Rose Bowl Game in 41 years, having last defeated Michigan on Jan. 1, 1972. The victory gave the Cardinal a 12-win season for only the second time in school history. This was their third straight BCS Bowl appearance.
- Northwestern set a bowl record with four interceptions, defeating Mississippi State 34-20 in the TaxSlayer.com Gator Bowl.
- Conference USA at 4-1 (.800) posted the best winning percentage in bowl games, and the SEC had the most wins with six during the 2012-13 bowl season.
- Florida State's win in the Discover Orange Bowl was its first BCS bowl victory since 1999, giving it 12 wins on the season and tying the 1993 and 1999 national championship teams for the most wins in Seminole history.
- Florida State played in a bowl game this year for the 31st consecutive year, the longest current streak in the nation, which started with the 1982 season.
- Texas coach Mack Brown and Virginia Tech Coach Frank Beamer have directed their teams to 20 consecutive bowls games since 1993, tying for the longest active streak by a coach.
- Wisconsin became the first Big Ten team to appear in three straight Rose Bowl games since Michigan accomplished the feat from 1976-78.
- The Big 12's 90% bowl-participation mark in 2012 is the highest in college football history.
- West Virginia made a school record 11th consecutive bowl appearance in 2012.
- SMU played in a school-record fourth consecutive bowl game with an appearance in the Sheraton Hawaii Bowl.
- The Rose Bowl will become the first post season game to host its 100th edition next year while the Rose Bowl Parade stages its 125th anniversary. The following week, the organization will host the BCS National Championship Game in the Rose Bowl on Jan. 6, 2014.
- Arizona State set or tied 30 individual and team Kraft Fight Hunger Bowl records in a 62-28 victory over Navy. Sun Devils scored on nine consecutive possessions, and their 62 points established a new mark for Pac-10/12 bowl history.
- The Beef 'O' Brady's Bowl St. Petersburg featured two 9-win teams (Ball State 9-3, vs UCF 9-3) for the first time, breaking 23 bowl game records during the game and hosting its first MAC school ever.
- The 54th AutoZone Liberty Bowl celebrated St. Jude Children's Research Hospital's

50th Anniversary.
- The AutoZone Liberty Bowl and Iowa State celebrated the 40th anniversary of the Cyclones last appearance in the bowl, recognizing head coach Johnny Majors and fifteen players from the 1972 Iowa State team.
- The Outback Bowl has the longest running title sponsorship of any college bowl.

The NFF would like to thank the following people for providing information for this release, including ESPN's Ben Baker, FOX Sports' Dan Bell, The Big Ten Network's Elizabeth Conlisk, NFF Correspondent Bo Carter, the NCAA's Gary Johnson, ESPN's Michael Humes, ESPN's Josh Krulewitz, NBC's Christopher McCloskey, Scarborough Research's Allyson Mongrain, ESPN's Dave Nagle, CBS' Jen Sabatelle, and CBS' Dan Sabreen.

**The NCAA began keeping national home football attendance in 1948 (including non-NCAA teams) and started keeping NCAA-only teams in 1978.*

*** Fan is defined as those adults who are "very, somewhat or a little bit interested" in college football.*

The Rose Bowl will become the first post-season game to host its 100th edition while the Rose Bowl Parade will celebrate its 125th anniversary. The following week, the organization will host the final BCS National Championship Game in the Rose Bowl on Jan. 6, 2014.

ABOUT THE NATIONAL FOOTBALL FOUNDATION & COLLEGE HALL OF FAME

Founded in 1947 with early leadership from General Douglas MacArthur, legendary Army coach Earl "Red" Blaik and immortal journalist Grantland Rice, The National Football Foundation & College Hall of Fame is a non-profit educational organization that runs programs designed to use the power of amateur football in developing scholarship, citizenship and athletic achievement in young people. With 120 chapters and 12,000 members nationwide, NFF programs include the College Football Hall of Fame, the NFF Scholar-Athlete Award presented by Fidelity Investments, Play It Smart, the NFF Hampshire Honor Society, the NFF National Scholar-Athlete Alumni Association, and scholarships of more than $1.3 million for college and high school scholar-athletes. The NFF presents the MacArthur Bowl, the William V. Campbell Trophy endowed by HealthSouth, and releases the Bowl Championship Series (BCS) Standings. NFF corporate partners include the Allstate Sugar Bowl, the BCS, Fidelity Investments, Herff Jones, Liberty Mutual Insurance, NCAA Football, and Under Armour. For more information, please visit www.footballfoundation.org.

Subject: March Madness - Don't Bet On it!

All,
Please see below for the timely reminder from the NCAA enforcement staff that student-athletes, athletic department staff members and institutional staff members who have responsibilities within or over the athletics department are prohibited from participating in a March Madness bracket pool or the like where something is put at risk (i.e., money, entry fee or tangible item) for the opportunity to win something.
Please contact us if you have any questions.

Don't Bet On It March Madness®

Don't Bet On It March Madness® Reminder. Did you know that the Federal Bureau of Investigations estimates that more than $2.5 billion is illegally wagered on March Madness each year? Did you know that some sports wagering industry experts estimate the number to be as high as $7-10 billion annually? Did you know that last year it was reported that wagering at Nevada sportsbooks on March Madness had surpassed wagering on the Super Bowl? (March Madness Betting Now Tops Super Bowl; USA Today, March 27, 2012)?
With March Madness on the horizon, the NCAA enforcement staff would like to remind the membership about the prohibition of participating in a March Madness bracket pools, fantasy leagues or the like where something is put at risk (i.e., money, entry fee or tangible item) for the opportunity to win something. This prohibition applies to all student-athletes, conference office staff members, athletics department staff members and institutional staff members who have responsibilities within or over the athletics department.
The enforcement staff would like to stress the importance of educating all of these individuals on this prohibition.In this regard, the enforcement staff has created a Don't Bet On It poster (see a small version below) geared towards student-athletes for institutions to display in its athletics facilities and on campus.The poster is available in two sizes (8.5 x 11 and 11 x 17) under the "Additional Multi-Media" section on the Don't Bet On It Sports Wagering Resource Page.

Subject: Ram Rules: Don't Bet On It!

All,

Please see below the Ram Rules that was sent to all UNC student-athletes this morning. Make sure that you understand all the necessary rules regarding sports wagering and then reiterate this information to your student-athletes. With March Madness starting tomorrow it is imperative that all UNC student-athletes and staff understand the NCAA bylaws related to Sports Wagering/Gambling. If you have any questions, please contact the Compliance office at 919-962-6000.

Thanks!
Samantha Kirby

The Ram Rules
UNC Department of Athletics
Vol XII * No. 3 * March 20, 2013

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. *As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.*

Dear UNC Student-Athletes,

With the NCAA basketball tournaments beginning this week, the UNC Compliance office would like to remind you that NCAA rules (bylaw 10.3) prohibit athletics department staff members, student-athletes, and other individuals associated with intercollegiate athletics (e.g., Chancellors, Faculty Athletics Representatives) from participating in any gambling activities. **This includes participating in any type of March Madness bracket pools or fantasy leagues where something is put at risk (e.g. money, entry fee, tangible items) for the chance to win something.** This is against NCAA rules and you could lose your eligibility.

Please note that this prohibition does not apply to contests held by certain websites(e.g., www.espn.com), which has a bracket contest that is free of charge. Since there is no fee associated with this contest, it would be permissible for you to participate, even though there is the opportunity for a prize at the end.

Take a few minutes to check out this website created by the NCAA and remember, **DON'T BET ON IT**!

http://dontbetonit.org/

10.02.1 Sports Wagering. Sports wagering includes placing, accepting or soliciting a wager (on a staff member's or student-athlete's own behalf or on the behalf of others) of any type with any individual or organization on any intercollegiate, amateur or professional team or contest. Examples of sports wagering include, but are not limited to, the use of a bookmaker or parlay card; Internet sports wagering; auctions in which bids are placed on teams, individuals or

contests; and pools or fantasy leagues in which an entry fee is required and there is an opportunity to win a prize. *(Adopted: 4/26/07 effective 8/1/07)*

10.3 Sports Wagering Activities. The following individuals shall not knowingly participate in sports wagering activities or provide information to individuals involved in or associated with any type of sports wagering activities concerning intercollegiate, amateur or professional athletics competition: *(Adopted: 4/26/07 effective 8/1/07)*

(a) Staff members of an institution's athletics department;
(b) Non athletics department staff members who have responsibilities within or over the athletics department (e.g., chancellor or president, faculty athletics representative, individual to whom athletics reports);
(c) Staff members of a conference office; and
(d) Student-athletes.

10.3.1 Scope of Application. The prohibition against sports wagering applies to any institutional practice or any competition (intercollegiate, amateur or professional) in a sport in which the Association conducts championship competition, in bowl subdivision football and in emerging sports for women. *(Adopted: 4/26/07 effective 8/1/07)*

10.3.2 Sanctions. The following sanctions for violations of Bylaw10.3shall apply: *(Adopted: 4/27/00 effective 8/1/00, Revised: 4/26/07 effective8/1/07)*

(a) A student-athlete who engages in activities designed to influence the outcome of an intercollegiate contest or in an effort to affect win-loss margins ("point shaving") or who participates in any sports wagering activity involving the student-athlete's institution shall permanently lose all remaining regular-season and postseason eligibility in all sports. *(Revised: 4/26/07 effective 8/1/07)*
(b) A student-athlete who participates in any sports wagering activity through the Internet, a bookmaker or a parlay card shall be ineligible for all regular-season and postseason competition for a minimum period of one year from the date of the institution's determination that a violation occurred and shall be charged with the loss of a minimum of one season of eligibility. If the student-athlete is determined to have been involved in a later violation of any portion of Bylaw10.3, the student-athlete shall permanently lose all remaining regular-season and postseason eligibility in all sports. *(Revised: 4/26/07effective 8/1/07)*

The Ram Rules Bottom Line:

It is your responsibility to understand NCAA and UNC rules. You can find all UNC Department of Athletics' policies and other NCAA resources at goheels.com underthe "Inside Athletics" tab and the "Compliance" link. Please contact the Compliance Office (919-962-6000 or compliance@uncaa.unc.edu) if you have any questions about contact with prospective student-athletes.

Subject: Holds Report
Attach: sp13 holds list 3 21.xlsx

Good morning,
Attached is today's report and the advisor holds are now reflecting (we have 30 students remaining with that hold). That said, I DO NOT believe the probation holds are being reflected. Give me a name of someone who has it so I can get the code. That will allow me to go back to the programmer and have it added.
Let me know if you have questions/concerns,
B

Webinar Overview

Are you interested in flipping your classroom but not sure where to begin? Are you curious about this trend and how it can be applied to your college classroom? This webinar will take a close look at what happens when the traditional method of lecturing and assigning homework is reversed; when students receive lectures through video outside of class and use class time to complete homework, solve problems, and collaborate with the instructor and other students.

In this webinar we will prove that flipping college courses is an excellent way to address some of the major concerns in today's institutions of higher learning. A flipped course can enhance student engagement by maximizing time for problem solving and student-student/ student -teacher interaction. In addition, providing opportunities for off-campus content delivery can address the attendance and scheduling issues experienced by many adult learners. Participants will gain practical suggestions, effective strategies, and a checklist of helpful items to use in developing a flipped format.

Webinar Objectives

NOTE: The issues addressed during the webinar will be universal. Both 2 and 4-year institutions will benefit from the content.

- Be able to define and describe the flipped class model in a community college setting
- Learn how flipping a course can overcome course management issues
- Discuss advantages of the blended format in a flipped classroom
- Gain practical insight from experienced classroom faculty
- Improve alignment of course content to course objectives and/or outcomes
- Distinguish which types of course content are best suited for on-campus rather than off-campus presentations
- Learn how to adapt course materials for flipped format
- Consider strategies for encouraging student engagement in the flipped classroom
- Explore software and technology that enhances course content for off-campus presentation
- Identify resources for off-campus lectures

Webinar Speaker(s)

Anne Distler graduated with a BS in Chemistry from the University of Notre Dame in 1999 and a PhD in Chemistry from Michigan State University in 2003. At both universities, Dr. Distler served as an instructor and teaching assistant. After completing a post-doctoral fellowship at Case Western Reserve University, Dr. Distler continued her work at the university as a member of the research faculty in the Department of Pharmacology. In 2009, she accepted a tenure-track faculty position at Cuyahoga Community College. Since returning to teaching, Dr. Distler has taught multiple levels of chemistry in traditional, online, and blended formats, utilizing a number of new technologies in the classroom and Blackboard course sites. By utilizing technology, students have access to the course materials presented in multiple formats, accommodating different learning styles and increasing student engagement. Dr. Distler also serves as a subject matter expert with McGraw-Hill publishers, collaborating on the LearnSmart program available with the publisher's Chemistry textbooks.

"If you've ever had too much instructional material to cover and too little class time, then you should consider flipping your course"

Terri Pope graduated with a BS in Nutrition from Case Western Reserve University in 1980 and a Ph.D in Nutritional Biochemistry from The Ohio State University in 1984. She began teaching at Cuyahoga Community College following a post-doctoral fellowship at Yale University. A tenured Professor with over 26 years of teaching experience, she has seen the college classroom move from podium to podcast. A recent recipient of the Ralph Besse Award for teaching excellence, Dr. Pope uses active learning strategies to teach a wide variety of courses to a diverse student population in traditional, online, and blended formats. She has been teaching online for 10 years and was an early adopter of the blended format. Dr. Pope has written several Laboratory manuals and has used a BlackBoard site to create a Virtual Biology Study Lab to provide students 24/7 access to laboratory image collection. She has been using technology to blend, flip, and shake up her science curriculum.

Click to view web version of this message. **March 2013**

Liberal Arts 2.0

A new "Super Course" co-taught by Chancellor Thorp is one example of learning opportunities across the College that are engaging, experiential and entrepreneurial. Read about some of them in our spring magazine. Stories and video.

Pat Pukkila's Legacy

Two-thirds of undergraduates will gain experience in research by the time they leave Carolina, thanks to Pat Pukkila's leadership. During 14 years as the founding director of the Office for Undergraduate Research, she made our program a national model. She retires in June after 34 years at UNC as a teacher, scholar and leader.

Carolina Coursera

The University has joined the MOOCs bandwagon through a new partnership with Coursera. Carolina's four "massive, open on-line courses" include: Fundamentals of Rehearsing Music Ensembles, Introduction to Environmental Law and Policy, Metadata, and Epidemiology.

Standing tall as a long leaf pine

Public Policy Professor Daniel Gitterman was tapped for the Order of the Long Leaf Pine, one of the state's highest honors. UNC President Tom Ross presented the award to Gitterman last

month, recognizing his service to N.C. as a health policy adviser during the Perdue administration.

Seventh Super Sawyer

When Raymond Sawyer graduates in May, he will be the last of seven Sawyers who came to Carolina on major scholarships and played in the Tar Heel marching band. Sawyers have won two Morehead-Cain scholarships, one Robertson, two Pogues, a Gates Millenium and a Rotary International.

Women's Studies Trailblazer

Alumna Rachel Burton (women's studies '96) didn't just land a great job, she invented one. As the pioneering co-founder of Piedmont Biofuels in Pittsboro N.C., she has won national recognition as a leader in the biodiesel world.

Webinar Overview

With an increased pressure on institutions of higher learning to substantiate their course offerings with respect to employability, now more than ever, experiential learning programs are a viable way to prepare the student and close the "skills gap" that exists in the job market today.

In a survey from Marketplace from American Public Media and The Chronicle of Higher Education, employers said what matters most to them is what actually happens outside the classroom. "Internships came back as the most important thing that employers look for when evaluating a recent college graduate," says Dan Berrett, senior reporter at The Chronicle.

Imagine then, having quantitative and qualitative data obtained through the student's internship experience to help your institution gauge the effectiveness of its course content as is relates to graduate employability? Or, having a tool that helps students substantiate the need for specific soft-skill enhancement for an individual or group categorized as "less employable" by future employers?

Join highly-rated speakers Martha Lanaghen and Ann Cross for this interactive and engaging presentation about the benefits of incorporating experiential learning metrics to predict employment outcomes, measure your students' employability probability, and improve your course content. This webinar will focus on practical, tactical ideas and tools that can be implemented quickly. You'll hear stories of success, see data that supports outcomes, and leave with tools that you can take back to the campus and use to improve employment outcomes.

Webinar Objectives

Participants will:

- Review the effects of recent regulatory, legislative, and marketplace changes and the impact on higher education
- Learn which reporting metrics are needed
- Learn how internship data can be transferred to actionable measures that will improve graduate employability
- Discuss how using quantitative and qualitative data collected from internships can help improve course content
- Identify tools to manage experiential learning programs and collect data for reporting

Webinar Speaker(s)

The Sparrow Group, led by Martha Lanaghen, is a high-impact consulting firm based in Colorado. All of the practitioners on our team have on-campus operating experience in student affairs, retention, employment, and campus strategy. This practical experience, combined with extensive speaking and training experience, makes us uniquely qualified to present compelling, practical workshops that are packed with actionable information that can be put to use immediately.

Martha & Ann Cross have spoken at dozens of conferences across the United States, including APSCU, Pearson's CITE, The Center for Customer Driven Quality, Call Center Week, and others. Their most recent APSCU webinar saw over 500 logins, and their APSCU presentation in July was attended by more than 125 participants and received outstanding ratings. Attendees from their workshops

Subject: Fwd: [ctc] Inadvertent Mobile Device Quarantine Messages

---

Important information about mobile devices and the email sent earlier. This also explains the new policy for out of date mobile devices.

Please read the following message.

Thanks,
CHS

-------- Original Message --------
Subject: [ctc] Inadvertent Mobile Device Quarantine Messages
From: "McGuire, Tim" <tim_mcguire@unc.edu>
To: "LSRV_ctc.con" <ctc@listserv.unc.edu>
CC:

Happy Friday Everyone,
First let me apologize for confusion today and especially the erroneous messages this afternoon. We were preparing to put in the block on the IOS 6.1 and 6.1.1 devices which we tested thoroughly for a good bit of the day and an erroneous button click applied a GLOBAL policy instead of policy targeted to offending devices. It was immediately (less than 1 Minute) undone, but unfortunately a lot of messages went out to folks (~2600). NO ONE is currently blocked.
Given the current state of affairs and the time of day and week – NO ONE WILL BE BLOCKED TODAY. We will monitor for the IOS situation we found this morning and will block individual users as they offend. This series of events does not affect the need to upgrade IOS devices running 6.1 or 6.1.1. We will regroup on Monday and send a note on any IOS blocks that might occur.
As I do not have a way to notify only the users that received the automated message, I am also sending a note out to all Exchange users explaining that if they received a quarantine note to disregard it.
It will look like this:
<MSG>
Dear Colleagues,
Please be advised that an automated note was inadvertently sent to many mobile device users regarding device quarantines. The note indicated that mobile devices were being blocked from accessing the campus's exchange system. This note was not accurate and no quarantine is currently enabled. If you received the notice of quarantine please disregard. There is no action for you to take. I apologize for the confusion and inconvenience. An example message is provided below.
Best Regards,
Tim McGuire
Director, Campus Infrastructure Services
440 W. Franklin St.

Subject: FORMAL NOTICE: Spending Guidelines from Governor McCrory

---

March 25, 2013

MEMORANDUM

TO: Deans, Directors, Department Chairs and Division Heads

FROM: Bruce W. Carney, Executive Vice Chancellor and Provost
Karol Kain Gray, Vice Chancellor for Finance and Administration

SUBJECT: Spending Guidelines for the Remainder of FY 2012-13

Governor Pat McCrory recently directed all State agencies to implement spending restrictions for the remainder of FY 2012-13. We have received clarification from the Office of State Budget and Management that the University System is included in this directive.

This link, http://finance.unc.edu/files/2013/03/12_13_spending_guidelines.pdf, will take you to the memo from the Chief Operating Officer of The University of North Carolina, Charles Perusse, which offers more information on the restrictions. This directive applies to General Fund appropriations for salary adjustments, travel and purchasing transactions, and will remain in effect until June 30, 2013.

More information will be provided as it becomes available. Thank you for your assistance with meeting these directives.

From: nobody@notify.unc.edu on behalf of hr@unc.edu
Sent: Monday, March 25, 2013 12:48 PM
To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: FORMAL NOTICE: Governors Salary Increase Guidelines for Remainder of FY 2012/2013

TO: Deans, Directors, Department Heads
School/Division HR Officers
HR Facilitators
Business Officers

FROM: Bruce Carney, Executive Vice Chancellor and Provost and Brenda R. Malone, Vice Chancellor for Human Resources

SUBJECT: Governor's Salary Increase Guidelines for Remainder of FY 2012/2013

Effective immediately, the Governor has directed that any salary increases on State-appropriated funds will not be permitted to be processed through the remainder of the fiscal year with the exception of increases for promotions (e.g., higher faculty rank or a new non-faculty position with greater responsibilities), a documented temporary or permanent increase in the duties of an employee's current position, or a retention situation. Increases based on equity, market rate, or employee competency adjustment (for SPA) will not be permitted on State-appropriated funds; salary supplements or lump sum payments will be unaffected if used to compensate non-permanent additional duties, administrative titles, or as part of an approved faculty special pay plan (e.g., faculty practice plans, SoM basic science pay plan, etc.). In the case of a retention-related increase, the Department Head must have reasonable knowledge that an employee is either currently or soon to be considered for a specific position with an outside entity, except for SPA positions where a documented offer must be in-hand per OSP guidelines.

These restrictions apply to all categories of temporary and permanent employees, as well as post-doc and student employees. For the purpose of these guidelines, State-appropriated funds are those on accounts 2-XXXXX-1XXX. Salary increases on all other sources of funds (e.g., overhead/F&A, contracts and grants, trust, etc.) are not affected and may be processed per normal salary increase procedures. For the remainder of the fiscal year, please include a notation on the SPA Salary Recommendation Form (SRF) that indicates whether a proposed increase is supported by State-appropriated funds or not so that we can confirm compliance with these special restrictions. The EPA salary increase form already includes this information and no added notation is necessary.

Salary increases with an effective date prior to April 1st using State-appropriated funds that are either in-process in HRIS or EPAWeb and/or already submitted for BOG or BOT pre-approval will be honored and may proceed. All other planned salary increases on State-appropriated funds not meeting one of the permitted circumstances must be either delayed or accomplished using an alternative source of funds. Proposed actions effective April 1st or beyond that have already been formally communicated to an employee should be discussed with the relevant central office HR approver.

If you have any questions regarding these guidelines, please contact one of the following offices:

Faculty actions: Office of the Provost - Academic Personnel;
SPA actions: OHR - Classification and Compensation;
EPA non-faculty actions: OHR - EPA Non-Faculty Human Resources

cc: Chancellor Holden Thorp

  - How do you encourage active learning?
  - How can I get students to think about learning strategies?
  - How can Bloom's taxonomy be used to enhance student learning?

Webinar Overview

Mindset. You might have heard something about this term and Carol Dweck, the world-renowned Stanford University psychologist that discovered it:
In a fixed mindset, people believe their basic qualities, like their intelligence or talent, are simply fixed traits. They spend their time documenting their intelligence or talent instead of developing them. They also believe that talent alone creates success-without effort. They're wrong.

In a growth mindset, people believe that their most basic abilities can be developed through dedication and hard work-brains and talent are just the starting point. This view creates a love of learning and a resilience that is essential for great accomplishment. Virtually all great people have had these qualities. - mindsonline.com

What makes "Growth Mindset" a popular new approach higher education? What does the research say about its success with college students? How can campuses work to recognize the power of this theory and develop principles for practice? This webinar will present a framework for examining mindset theory and related research. Together we will use TRPP (theory, research, principles, and practice) to foster an understanding of how a growth mindset is more conducive to achievement and goal setting than a fixed mindset. The Mindset theory and research of Carol Dweck and others will be explored and linked directly to the development of a set of principles for practice. Participants will leave with a toolbox of strategies for integrating the development of growth mindset on their campus.

Webinar Objectives

Participants will:

- Understand mindset theory and the distinction between growth and fixed mindsets
- Examine the research related to mindset theory and its application to college students
- Learn how to integrate theory and research related to Mindset in order to develop principles for practice
- Develop at least one strategy for promoting a growth mindset in their students
- Become aware of specific feedback techniques that promote a growth mindset
- Apply growth mindset approaches with relevant case studies

5 Reasons Why Inciting Your Prospects is a Great Idea

Indiana Jones

Any good movie that you've ever seen has had one key element. And, its something that youneed to add in to all of your recruiting messages.
I'm going to teach you how to do it today.
I'm talking about inciting your prospects when they're reading one of your letters or emails. If you've ever seen a really good movie, one that keeps your attention from start to finish, you'll know what I'm talking about.
The legendary Indiana Jones movie series is a great example of "inciting" moviegoers. If you've seen the start to any of them, you know it's action and an important event that kicks off the story. Whether he's being chased by a giant ball down a cave, stealing an ancient artifact, or hiding in a refrigerator to survive a nuclear explosion, you've been hooked to watch the rest of the movie.
Some of the best movie writers use this technique to write blockbuster stories that we just can't resist: The ask the question, "What is the big event, or the big moment, that really gets this story rolling?"
That usually comes at the beginning of a film (a good one, anyway), and it keeps you glued to the screen from that point forward.
So, how does all this apply to your recruiting message? What techniques can you use from this tried-and-true screenwriting trick to construct better recruiting letters and emails?
Glad you asked...

NCSA Athletic Recruiting

Why Habits Are For the Short Run

*by Ellen Sawin, **NCSA Athletic Recruiting***

What do John Wooden, Anson Dorrance, Bill Bowerman, Sue Enquist and Russ Rose have in common?

All of these coaches established historic programs in their respective sports.

They established brands: UCLA Basketball, UNC Soccer, Oregon Track & Field, UCLA Softball and Penn State Volleyball.

Seth Godin, one of America's greatest marketing experts, publishes a daily marketing blog with tips and tricks for people trying to establish a brand, something those coaches were and are experts at. As a college coach, you need to think like a marketing guru:

How are you going to establish a brand, and how are you going to establish your team?

How are you going to reach the hundreds of thousands of athletes online that might be perfect for your program?...

Notre Dame Reaching Sports Fans, Recruits With Spotify Playlists

by Samantha Murphy, Mashable.com
Music is a part of any athlete's routine leading up to a big game - in the locker room, on the bus, at the gym and so on. It's a natural fit then that the University of Notre Dame wants fans to get in on that experience with a series of hand-picked playlists for music-streaming service Spotify.
Although team marching bands and a cappella groups have had a presence on Spotify before, this the first time a collegiate athletics department has joined forces with the streaming platform. The move is a part of an effort to get fans and even player recruits more pumped up about the school's teams.

The playlists feature favorite songs from players and coaches across various teams, such as men's basketball - which is currently competing in the NCAA "March Madness" championships - men's soccer, women's soccer, baseball, softball and fencing. The school plans to have all 26 of the university's teams and their coaches make at least one playlist in the near future...

Recruiting Rules: The Coaches Have Spoken - NCAA Suspends Two Proposals

NCAA headquarters

by Brandon Cavanaugh, SB Nation
If you want something done correctly, you've got to do it yourself.

I'm no big city athletic director, but you know and I know that once proposals that would essentially strip all major rules and regulations of college football recruiting were on the table as legitimate options, some people were gonna get angry.

And they did. And the NCAA did what was best for itself. It listened.
Remember all the talk of recruiting war rooms? Gone. As is the power to recruit for the new Grand Poobahs of Recruiting at individual schools. For now, at least...

How A School's Basketball Team Can Impact College Football Recruiting

Basketball influencing football recruiting

By Andrew Kulha, Bleacher Report
Hype is everything on the college football recruiting trail, and a smart program will take that hype any way that it can get it-even from the school's basketball team.
Football and basketball are obviously two very different sports, and they're played in two different seasons, but a school's basketball team can indeed have a big-time impact on the recruiting trail for the football team.
It may not seem conventional, but believe me, having a good basketball program can really help the football coach.
Like I said, it's all about hype in recruiting, and it doesn't really matter where you get it from.
Name recognition and branding is everything...

Fans Mock Fashion Forward Basketball Uniforms

ugly bb uniforms

By Samantha Critchell, Houston Chronicle

It seems an unpopular position in college basketball is fashion forward.

The neon-colored jerseys and camouflage-covered shorts debuted by six teams in their postseason conference championships ahead of the NCAA men's basketball tournaments weren't well received in the press or social media, with critics particularly targeting UCLA, Kansas and Notre Dame because of the schools' tradition-rich athletic histories. Louisville, Cincinnati and Baylor also got uniform makeovers from Adidas, and they didn't go over so well, either.

They were called Underoos, Fruit Stripes and costumes. Some people just called them ugly - and you can search for them online that way...

Subject: [n4a] Academic Assistant position pay range

Hello everyone,

We are in the process of creating an Academic Assistant position within our program. This person would be responsible for working as the primary coordinator for a handful of our Olympic sports teams, as well as occasional front desk monitoring responsibilities and general office duties. We would be looking for someone with a bachelor's degree. This position will be between a .5 FTE and 1.0 FTE.

I am wondering if you employ this type of position/employee in your respective programs and if so, could you please provide a pay range for this employee (hourly preferable)?

Thank you kindly for your time. Have a great day!

Best,

Subject:	FORMAL NOTICE: From the Chancellor: Update on the Campus Conversation about Sexual Assault

---

Dear Students, Faculty and Staff:

Our ongoing conversation about sexual assault represents one of the most important issues I have faced at Carolina. And rightly so.

It is clear that our students, both men and women, are passionate about this issue. In our conversations over the past two months, our campus community has raised meaningful questions: How can we address the root causes of sexual assault? How we can better support students who experience sexual assault? What is the most appropriate way for the University to handle these complex issues?

I hear your concerns, and I share them.

One issue that has attracted your attention is an Honor Court case involving a student who has spoken out about sexual assault issues on campus. In connection with that case, we understand that a claim of retaliation may have been filed with the U.S. Department of Education's Office for Civil Rights against the University.

For several weeks, the University has grappled with how best to respond to a public claim of retaliation against the University while maintaining the autonomy and integrity of our Honor Court proceedings and the privacy of the individuals involved. Recognizing the potential conflicts that may exist by allowing both processes to continue, we have asked the Student Attorney General to suspend the Honor Court proceeding pending an external review of these allegations of retaliation. The University takes all allegations of retaliation seriously, whether against an individual or an institution, and this allegation is no exception.

In the meantime, we will continue our important work to address the issues of sexual harassment and sexual violence that affect all college campuses. For several weeks, we have participated in a period of community engagement and education. Throughout this process, the University has continued a long tradition of encouraging students to exercise their right to speak out. That's how most important social change occurs. The University will continue to encourage frank and candid dialogue among our community members and to create a safe space for that conversation.

We brought one of the nation's leading experts on this issue to Carolina in January. Gina Smith has since met with dozens of campus groups and talked with hundreds of students. She wanted to hear directly from you, and your input has been valuable in helping her identify ways to improve how sexual assault cases are handled by the University.

These conversations are important. They keep your concerns top of mind as we address these challenges.

I've said before that our system is not perfect -- but it's important to recognize that we have made many significant and positive improvements in recent years. Most recently, we hired two new staff members to investigate sexual assault complaints and provide students with the

compassion, support and resources they need if a sexual assault does occur.

We continue to look for additional ways we can address your concerns in a responsible and meaningful way.

As we move forward, we will continue to seek your input and ideas. We will continue to cooperate with investigations into our handling of sexual assault cases and our campus security program. And we will continue to do everything we can to support our students.

Thank you for being part of the positive changes we are making. If you have additional ideas or concerns regarding these matters, do not hesitate to contact me personally or to submit your feedback to our online suggestion box at the Campus Conversation website. Refer to http://campusconversation.web.unc.edu/suggestion-box/.

Sincerely,

Holden

Webinar Overview

American college freshmen are increasingly underprepared for college-level work in the critical foundational areas of math, English, and reading. To further complicate the matter, many other students lack academic confidence, regardless of their core skills.

These challenges, combined with shrinking college budgets and increasingly competitive recruiting environments, mean that institutions are compelled to build scalable programs that minimize the cost to serve these inherently at-risk students. Unfortunately, many of these "scalable" programs exacerbate the risks presented in this population and result in increased student attrition, confound student academic success, and in their worst iterations lead to negative student experiences that cost the institution brand equity and reputation.

Flash forward to "mass-customization" and journey with us as we explore several exciting models that are beginning to prove effective in the world of one-to-many communication. You'll see specific examples of models that are being put to work today, and learn about important resources that can assist you in persuading key stakeholders to explore these models.

This highly interactive workshop will give you practical tools that you can take back to your office and immediately put to work.

Webinar Objectives

Participants will:

- Receive a high-level review of current articles and statistics regarding developmental students
- Gain an understanding of "mass customization" and one-to-many concepts in student services
- Review two exciting models for high-touch, high-success developmental support models
- Receive an implementation checklist, including mistakes and lessons learned from schools that have been there
- Get tips for evaluating "Buy or Build" decisions for implementing these models
- Learn specific steps for preparing business cases and proposals for piloting high-touch remediation programs

The New "At-Risk" Student Seminar: Increasing Retention, Success & Institutional Support

Webinar Speaker(s)

The Sparrow Group, led by Martha Lanaghen, is a high-impact consulting firm based in Colorado. All of the practitioners on our team have on-campus operating experience in student affairs, retention, employment, and campus strategy. This practical experience, combined with extensive speaking and training experience, makes us uniquely qualified to present compelling, practical workshops that are packed with actionable information that can be put to use immediately.

Martha & Ann Cross have spoken at dozens of conferences across the United States, including APSCU, Pearson's CITE, The Center for Customer Driven Quality, Call Center Week, and others. Their most recent APSCU webinar saw over 500 logins, and their APSCU presentation in July was attended by more than 125 participants and received outstanding ratings. Attendees from their workshops say: "This was the best workshop of the entire conference," and, "The information I learned will be put to work immediately when I return."

Dr. Hallowell Newsletter

www.drhallowell.com March 2013

Greetings!
Information everywhere! Sometimes it feels as if we will all be buried with it! With this newsletter we try to accomplish two things. First, we want to let you know that we are there to answer your questions about your family's health. We really do want you to feel free to contact us with questions.

Second, we try hard to bring you the most actionable, interesting and relevant information about ADHD and mental health. We hope we can lighten a bit of your information overload by pointing you to some of the best resources out there!

Though it is last minute, don't miss our link to an ADDA seminar on ADHD and financial management TONIGHT, as well our FAQ on the same topic.

Dr. Hallowell Biography Video

Hallowell Centers Strength-Based Philosophy:

First we search for what is good, strong and healthy in a person, then what is in need of remediation.

The Hallowell Centers integrate the latest research on brain, body and heart. We help people with emotional issues and learning

A Note from Ned

I recently began a correspondence with a smart, sophisticated New Yorker who happens to have ADD. She told told me that since the Newtown tragedy, she senses more of a tone of forgiveness and a desire to understand, than the tone of anger and blame that we've grown accustomed to. I wonder how many of you who receive this newsletter agree. I'd love to hear from you. My email is **drhallowell@gmail.com**

disabilities lead happier, more productive lives through a positive, balanced treatment approach.

Coaching via SKYPE is available at each Center

Trouble focusing? - Check this Working Memory Quiz to see if your score warrants further investigation. Rebecca Shafir M.A.CCC, speech/language pathologist and neurotherapist is offering free 15 minute phone inquiry sessions to discuss how Cogmed Working Memory Training (a very powerful executive function) can help you. Contact the Hallowell Center or call 978 287 0810.

One of the reasons I collect email addresses at my talks and send out this newsletter is to connect with you all. We live in what I call "the modern paradox," namely, we are more connected electronically than ever before in human history, but we are disconnecting interpersonally. This newsletter is part of my small effort to combat disconnection and promote connection. I'd love to hear your thoughts on that, as well. **Read More Here.**

FAQ

Q: My granddaughter has difficulty managing her money. Is this common for people with ADHD? Do you have suggestions on how I can help her with money management skills?

A: Spending money impulsively is common in people with ADHD. I suggest you see this as similar to someone with a reading problem. She needs a tutor to regularly show her how to manage her money. If she has trouble balancing her checkbook, deal only in cash for now and close out her checking account if she keeps overdrawing. Let her know this is not a punishment, but a safeguard against herself. Just as you do not want to drive a car until you can drive it without getting into an accident every drive, you do not want to have a checking account until you can manage it without overdrawing regularly. Work on the issue with a sense of humor, but also with the realistic knowledge that money management is an important life skill, a skill that you, or whoever tutors her, intends to work on with her until she is able to handle it on her own.

This may take a year or two. Don't give up, and above all, don't turn it into a struggle full of anger and reproach. Think of it as a problem you can solve together, which you can!!!
- Dr. Hallowell

P.P.S. Read about the Emotional Currency of Money below in the Presenter Topic of the Month.

Pediatrics Study: ADHD Effects into Adulthood - Dr. Hallowell Responds

Edward Hallowell, M.D.

A recent study indicates that ADHD diagnosed in childhood often persists into adulthood, and often brings with it various other negative conditions, such as substance abuse, bi-polar disorder, major depression, anti-social personality disorder, and anxiety disorders.

A very important piece of research, this landmark study shows how critical it is to diagnose ADHD as early as possible, and to follow the person who has it well into adulthood. To prevent the severe ravages of untreated ADHD, including an increased risk of incarceration and even suicide, it is imperative that parents join with doctors and teachers in an organized effort to diagnose and then treat and follow indefinitely all who have this potentially devastating condition. **Learn More**

Afraid of "No"? A Dose of Rejection Therapy May Do the Trick

Rebecca Shafir M.A.CCC

NYC Center

CrazyBusy Workshop April 8 - May 13 - Reduce stress, anxiety, and physical/mental distress through the use of mindfulness, breath-work, sound, movement and visualization techniques so that you can listen to your innate intelligence and slow down and unsnarl your frantic life. Learn more here.

He has expertise on a wide range of topics relevant to parents, couples, children, educators, doctors, managers and people with ADHD. Click here to book Dr. Hallowell

Presenter Topic of the Month:

The Emotional Currency of Money- This presentation is based upon Dr. Hallowell's first published book, What Are You Worth?: Coming to Terms With Your Feelings About Money. Most people have deep feelings about money. While we all want more money, we do not all feel the same way about it. Some of us feel guilty when we get near money. Others of us feel excitement, even frenzy. Some of us feel guilty when we get paid; others of us feel cheated, no matter how much we're given. Read more here.

Dr. Hallowell Professional Programs:

ADHD For Teachers
ADHD For Chiropractors

How to Find an ADHD Therapist - Are you looking for a therapist that can help you manage your ADHD symptoms? Learn what questions to ask, what experience to look for and how to spot the red flags at psychcentral.com.

11 Clues Your Partner Does NOT have ADHD - Terry Matlen makes us laugh out loud as we recognize ourselves and our partners in this humorous blog post at ADDConsults.com.

Tips for Keeping The Cost of ADHD Treatments Low - Being without insurance or a well-padded wallet doesn't have to mean you can't make progress against ADHD. These two articles contain valuable information to help keep the cost of treatment as low as possible: adhdmarriage.com and ADDitude Magazine.

CrazyBusy Tips

Taxes and Organization

Do you dread tax season? Kitchen tables around the country are piling up with documents and folders as the April 15th scramble approaches.

21 hours is the amount of time the average person spends assembling and completing his or her annual tax return. Add 11 hours to that if they own a business or rental property.

Avoid mistakes and missed deductions by keeping all of your tax documents in an envelope throughout the year. As you get closer to tax time, separate the documents into categories such as business expenses, charitable donations and office supplies to make everything easier to find later. You can also scan paperwork - it takes more time on the front end, but could save you time when you file.

If by the beginning of April you still have an unwieldy pile, you could probably use some organizational help. The CrazyBusy iPhone app pro-version has a new "To-Do" feature that will help you tackle this problem, save time, and possibly avoid missing out on a big deduction. Using the right tools to organize your taxes could mean the difference between sending hundreds, or even thousands, of extra dollars to Uncle Sam.

Download the FREE CrazyBusy Tips iPhone app for CrazyBusy advice tailored just for you. The Pro Version, for $1.99, includes the helpful TO DO list to help you tackle your life.

CrazyBusy Tips are available in book, CD, MP3 format and as an iPhone App
Click here to learn more

Quote of the Month:

"Most teachers and adults could benefit from pretending that all kids in their class have ADHD - what is good for kids with ADHD is good for all kids."

- Edward M. Hallowell, M.D.

Coaching Education Minor

Application Form

In order to be approved for the COAC minor, please answer the questions below. Be advised that the Coaching Education minor has a limited enrollment due to the teaching load of the faculty. Return to Dr. Sherry Salyer (209 Fetzer or salyer@email.unc.edu). You will be notified via email of your application status. Dr. Salyer will send a letter to the Academic Advising program (in Steele Building) regarding your approval. At that time, you may return to Steele Building and formally declare the minor. After your acceptance, make an appointment with Dr. Salyer so we can further discuss the minor. (Academic Advising in Steele Building -- http://advising.unc.edu/advising/scheduleanappt or visit her during Fetzer walk-in advising hours.)

Name:

PID:

Email address:

What is your major?

Anticipated graduation date?

Have you already satisfied your EE requirement?

Which of the following COAC classes have you already completed (circle)

- EXSS 205—must take either 205 or 206
- EXSS 206—must take either 205 or 206
- EXSS 188--required
- EXSS 181
- EXSS 141
- EXSS 211
- EXSS 221
- EXSS 380
- EXSS 385
- EXSS 376
- EXSS 408
- RECR 430

List your coaching experience (dates, organization, sport, age coached) and describe your role with the team.

Compose a ONE page typed essay describing your desire to be a coach.

Subject: Lunch Tomorrow

Hey Beth: Christy and I wanted to see if you'd still be available for lunch tomorrow? We'd like to do something around 11:30am, possibly Top of the Hill or 411. Please let me know.

Thanks much Beth!

Subject: [epro_sop_users] SOP changes effective April 1, 2013

Effective Monday, April 1, 2013, users will **no longer be able to "SAVE"** a SOP document containing a Vendor Catalog vendor. All vendor catalog orders with S numbers must be paid for using a PCARD.

Reminder - Small Order Process

Images for SOP documents

Before clicking the "Submit for Approval in ePro", click on the "View Invoice Image" link and review the fax documents to ensure the documentation is correct and viewable. Click the "Accept Image" button if the images are acceptable or the Delete Images if the documents need to be refaxed.

- Dealing with Suicidal Students on College Campuses

Webinar Overview

Should suicidal students stay on campus or should they go? If they stay, how should a school address suicidal behavior on campus? If they go, under what circumstances can they return?

The Department of Education's Office of Civil Rights (OCR) made significant changes in policy that leave colleges and universities in a catch-22 when managing suicidal students on campus or addressing requests for re-entry for students who continue to struggle with active suicidal thoughts. Remove these students from campus through a forced medical withdrawal and face an ADA lawsuit for discrimination against the student. Leave the student on campus struggling with suicidal ideations and be sued for not having the services available to adequately treat the student's medical condition.

Found under Title II of the Americans with Disabilities Act (ADA), the revised regulation now deems it unlawful to involuntarily separate, suspend, or expel a student on the basis of self-harmful or suicidal behaviors.

As suicide continues to be a leading cause of death among U.S. college students age 18-24, this new regulation leaves schools and administrators struggling with some important questions regarding both institutional legal risk and student safety:

- How do you handle a chronically suicidal student who is vocal about his/her intentions?
- How do you address a student who engages in high-risk eating disorder behavior?
- How do you work with a student who has had a public overdose attempt and demands to return to school after a hospital stay?
- How do you address a student who is engaging in cutting and self-mutilation and is discovered by a roommate?
- How do you deal with a student who presents delusional speech and odd behavior that is disruptive and concerning to other students?
- How do you handle these potentially dangerous situations without running afoul of the new OCR standards?

This webinar will present a variety of creative solutions that aim to reduce institutional legal risk and increase student safety. The presenters will discuss how to address suicidal and self-harm behaviors on campus through the Behavioral Intervention Team (BIT), counseling services and the student conduct office. They will also address critical dos and don'ts when working with sensitive students in crisis situations.

Webinar Objectives

Participants will learn:

- To address the issues of suicide, self-harm and delusional/psychotic behavior through counseling, conduct, and administrative interventions
- The importance of addressing behavior through case management, team meetings, and parental involvement
- How to pursue an involuntary medical withdrawal with a student through tuition refunds, incompletes, and housing refunds
- When to pursue inpatient hospital admissions, partial day treatment, and

Webinar Speaker(s)

Dr. Brian Van Brunt , past president of the American College Counseling Association, is Senior Vice President for Professional Development Programs at the National Center for Higher Education Risk Management (NHCERM, www.ncherm.org). He is the president-elect of the National Behavioral Intervention Team Association (NaBITA, www.nabita.org), current president of the School and College Organization for Prevention Educators (SCOPE, www.wearescope.org) and the managing editor for Student Affairs eNews (SAeN, www.studentaffairsenews.com). Over the past thirteen years Brian has taught counseling theory, ethics, program evaluation, statistics and sociology topics at both public and private schools for both graduate and undergraduate students at five different colleges and universities. Brian has served as the director of counseling at New England College and Western Kentucky University. He is the author of several books including: Ending Campus Violence: New Approaches in Prevention and A Faculty Guide to Addressing Disruptive and Dangerous Behavior in the Classroom. Brian is an expert on campus violence and has been interviewed by the New York Times, National Pubic Radio, LA Times, USA Today and has appeared on Headline News and Anderson Cooper 360.

Laura Bennett, M.Ed. is a student conduct and campus behavioral intervention practitioner. She currently serves as the Student Conduct Officer at Harper College, where she also coordinates the campus threat assessment and behavioral intervention team. Prior to her role in the community college setting, she worked in student conduct at the University of California, Berkeley, and in residential life at the Colorado College. In addition to student conduct and behavioral intervention, Laura has over 10 years of experience as a student affairs administrator including the areas of: policy analysis and development, gender & LGBT studies, preventing and addressing sexual misconduct/harassment, supporting students with disabilities and mental health conditions, conducting investigations, staff supervision/management, classroom management, academic integrity, residential life/housing, organizational change, privilege and social justice, crisis response, assessment and marketing, and strategic planning.

Laura received her Master's degree in College Student Services Administration from Oregon State University and her Bachelor's degree in English from the University of Kansas. She serves on the Board of Directors for the Association for Student Conduct Administration (ASCA), is an active member of the National Behavioral Intervention Team Association (NaBITA), and recently conducted research on threat assessment and behavioral intervention in four-year public and community college settings.

Subject: A Sneak Peek at Cabaret!

If you are having trouble viewing this message, see it in your browser.

Cabaret Opens Next Week!

A Sneak Peek Backstage: in the Costume Shop

Excitement is mounting as director Joe Haj and an outstanding company of actors, musicians and creative artists transform the Paul Green Theatre into the tantalizing, decadent world of the Kit Kat Klub in 1930s Berlin.

Take a sneak peek at a sample of some of the wonderful costumes being built in the PlayMakers costume shop. Costume designer Jennifer Caprio (who also did the costumes for *The Making of a King: Henry IV & V*) did extensive research of cabaret and nightclub acts of the period.

Jennifer drew this fun, flirty rendering of a dress for chanteuse Sally Bowles to flounce around in. *(Left)*

Then, the drawing comes to life as the costume shop runs with the design. *(Right)*

This pink, feathered wig created by our costume crafts artisans will appear in one of *Cabaret's* dazzling musical numbers. The photo of an actual 1930s cabaret performer was one of Jennifer's finds and served as inspiration for this snazzy headgear.

If you're interested in seeing more backstage glimpses, check out our blog!

Join us!

Previews begin Wednesday, April 3, and Opening Night is April 6, with the gala post-show cast party included in the price of your ticket.

Tickets are going fast, so book today! Click here to purchase online.

We'll see you soon at *Cabaret*!

PlayMakers Box Office

P.S. Best seats are still available for our added performance on Sunday, April 7 at 7:30!

Subject: [h.e.e.l.s.forhealth] Weekly Newsletter -

Hi everyone,

Happy Monday! Below is this week's newsletter - enjoy!

Get Active!

- **Heels for Homes 5K!** - The UNC Kenan-Flagler Business School partners with Habitat for Humanity to bring together students, faculty, and staff across the school to serve the community of Chapel Hill. Habitat for Humanity provides affordable housing for individuals in need, and since 2005, Kenan-Flagler has helped provide hope and stability for many local families. In an effort to augment our impact we are organizing an inaugural event, the Heels for Homes 5K, to be held on to benefit our UNC Kenan-Flagler - Habitat for Humanity partnership.
    - Different from other races, the Heels for Homes 5K will finish inside the Kenan Memorial Football Stadium, and our celebrity starter will be UNC's very own head football coach, Larry Fedora. Given the unique venue and guest appearance, we expect a large number of students and alumni, as well as the local Chapel Hill and Carrboro communities, to participate in this special event.
    - This year, our school's goal is to contribute to the $50,000 fundraising target, which will help Habitat for Humanity provide housing for the family of Yoe Moo, Paw Ku, and their three young sons. The family, originally from Burma, arrived in the US in 2008 after living nearly 20 years in refugee camps on the Thailand border.
    - You can learn more about the event and register here: http://tinyurl.com/Heels4Homes

- **2013 Spring Fling** is right around the corner! Join Campus Recreation on a 2.7 mile fun run or 1.5 mile walk, open to all UNC-Chapel Hill faculty and staff. This is a great opportunity to get out of the office for some physical activity with your department and enjoy the great spring weather! In previous years, over 500 participants have completed the Spring Fling individually or as part of a departmental team. This event promotes health and well-being and provides employees a wonderful opportunity to give back to the community by making canned food donations to the Glenwood Elementary Family Assistance Program and pet donations to the Orange County Animal Shelter. Prizes for the Most Creative Costumes and Most Participants will be rewarded following the run/walk.
    - **Date**: **Friday,** ; **Time**: **12:15 pm**
    - **Location**: front of the Student Recreation Center
    - **Check-in**: 11:30 am - 12:00 pm
    - **Registration**: If you are not on a department team, fill out the Individual Registration Form online. Those participating on a department team must fill out the Team Registration Form, printed out, and signed by all team members, and turned back into Campus Rec at the SRC Main Office or by fax at 962.3621 ATTN: Spring Fling. Registration opens Monday, and closes Wednesday, . On-site registration will also be accepted from 11:30am to 12:00pm race day for individual runners only.

This Week in Health

- April is **Stress Awareness Month,** and we are starting the month off with "The Stress Test" and an article about high-stress personality characteristics. Take a look at these websites for more information: http://www.sparkpeople.com/resource/wellness_articles.asp?id=496 and http://www.sparkpeople.com/resource/wellness_articles.asp?id=499 . These articles do a great job in making you aware of how vulnerable you are to stress. In the coming weeks, we will discover ways to minimize stress.

- This week's exercise is a "**Wall Sit with Lateral Dumbbell Raises**". This is a great stabilization and strength exercises for your quadriceps (front of thighs) and shoulders. Follow this link to learn

more: http://www.sparkpeople.com/resource/exercises.asp?exercise=52 [*If clicking the link above does not work, copy and paste it into your browser by (1) highlighting the entire link above, (2) right-clicking "Copy", (3) opening your internet browser, and (4) right-clicking "Paste" into the website address space at the top of the toolbar.*]

Please let me know if you have any questions. Have a great week!

Subject: INFORMATIONAL MESSAGE FROM ALERT CAROLINA: Robbery Reported near Campus

---

INFORMATIONAL MESSAGE FROM ALERT CAROLINA: Robbery Reported near Campus

Chapel Hill Police is investigating the belated report of a strong-arm robbery which occurred around 3:30 a.m. Sunday, March 31, in a parking lot near off West Rosemary Street near South Columbia Street. The victim, who was not affiliated with UNC, was approached by two black males who shoved him against a car and demanded his watch and cash. The suspects then fled the scene on foot heading west. No weapons were reportedly seen.
The two suspects were described as around six feet tall with average builds; one was wearing a doo-rag.

Chapel Hill Police reported Monday morning that they are asking anyone with information about this incident, please call the Chapel Hill Police Department at 919-968-2760 or contact the Chapel Hill-Carrboro-UNC CrimeStoppers at (919) 942-7515. Calls are confidential and anonymous. You can also submit information to Crime Stoppers online at www.crimestoppers-chcunc.org.

Continue to monitor Alert Carolina website (alertcarolina.unc.edu) for any updates in the investigation into this incident. Call 911 immediately to report any and all suspicious activity on campus. For a list of safety tips, see the following link through the Alert Carolina page:

http://www.alertcarolina.unc.edu/go/doc/1395/158078/

About Informational Messages: The University sends an Informational Message to inform the campus community about a situation that is not an emergency, but is expected to be of significant interest to the campus. An Informational Message is one of three tiers of communication under the University's revised emergency communications plan. Emergency Warning refers to a siren activation for a significant emergency. And a Timely Warning is issued if there is a continuing danger AND notification will not compromise law enforcement efforts. Sponsored by the UNC Department of Public Safety.

To:	Bridger, Beth <bridgerb@email.unc.edu>
Subject:	FORMAL NOTICE: Message from the Chancellor: Hunter Rawlings Panel to Convene April 19

Dear Students, Faculty and Staff:

The University will convene a panel of distinguished leaders in higher education and athletics for the first time next month to consider the role of athletics in the life of Carolina. This idea originated in a report produced last year by a Faculty Executive Committee, and I was pleased to accept that advice.

We previously announced that the panel chair would be Hunter Rawlings, president of the Association of American Universities, which represents 62 leading research universities including Carolina. A former university president and successful student-athlete, Dr. Rawlings spoke here last fall about the future of research universities. (See http://tinyurl.com/ccgum7k on YouTube). He is a member of the American Academy of Arts and Sciences.

Joining him on the panel are:

* James Delany, longtime commissioner of the Big Ten Conference and a former NCAA enforcement officer. He holds bachelor's and law degrees from Carolina, where he was a tri-captain on the men's basketball team.

* Bob Malekoff, associate professor and sport studies chair at Guilford College and a former athletics director and head coach. He has written about athletics and sports management at the collegiate and professional levels.

* Amy Perko, executive director of the Knight Commission on Intercollegiate Athletics, and previously an NCAA employee and athletics administrator at the University of Kansas. She earned academic honors as a Wake Forest student-athlete.

* Patricia Timmons-Goodson, former associate justice of the N.C. Supreme Court who holds two UNC-Chapel Hill degrees and served on the N.C. Court of Appeals. She serves on Guilford College's Board of Trustees.

On Friday, April 19, I will address the panel, which will meet from 1 p.m. to 3 p.m. in the Carolina Inn, Hill Ballroom South. We've invited five other speakers as part of a roundtable discussion: Jay Bilas, ESPN broadcaster, attorney and a former Duke basketball player, as well as UNC colleagues Bubba Cunningham, director of athletics; Joy Renner, Faculty Athletics Committee Chair and clinical associate professor of allied health sciences; Jay Smith, professor of history; and Richard Southall, associate professor of sport administration and director of the College Sport Research Institute. The campus community will also have an opportunity to share comments.

I don't expect this panel to solve in a short time what the Knight Commission has been addressing for more than 20 years. But this is a good opportunity to engage in a conversation that could lead to new ideas for best practices moving forward. I will leave it up to Dr. Rawlings and the panelists to decide how to proceed with this work after the first meeting.

The issues we face here are not unique to Carolina, and we hope other campuses around the nation will benefit in some way from the panel's work.

Sincerely,

Holden Thorp

Building Anticipation Instead of Anxiety When You're Recruiting

Think about it:
If we can define anxiety as "experiencing failure in advance of it happening", then the opposite definition must be true also, right?
I'm talking about anticipation. When you're anticipating something, it's usually because you just can't wait for it to happen. Buying your first new home, moving in, re-decorating and having your first family gathering there all involves anticipation. You're excited about seeing those things come to fruition.
On the other hand, for families that are experiencing financial difficulties and are in risk of losing their home to foreclosure, they are experiencing anxiety. Lots of anxiety.
Why? Because they are experiencing that failure in advance of it happening.
So, how does this all apply to recruiting? More than you probably think it does, actually...

The Coaching Life

The Zen Of The Games Coaches Play

by ***Dr. Mike Davenport***

Coaches play games. I don't mean that in a bad, derogatory sense. But the truth is we coaches play games. Two games in fact. Two games that make a difference.

James Carse wrote about those two games at length in his book, *Finite and Infinite Games, A Vision of Life as Play and Possibility*. He details how those games are the essence of what every coach does, and has done, since the first coach started hollering.

Understanding these two games can have a significant impact on how you coach, how well you coach, how long you coach, and the enjoyment you derive from your coaching.

Something to think about, and Carse's book might be a worthwhile read if you plan on staying in coaching any length of time.

SO WHAT? Why should you care?...

USA Today College Columnist Signs On to be Featured Speaker at 2013 NCRC

Dan Wolken, USA Today

One of the rising national voices in college sports media will be one of the featured speakers at this June's **National Collegiate Recruiting Conference**, and the founder of the event - Dan Tudor - is excited.

USA Today's Dan Wolken is one of the slated experts joining our line-up at the 2013 NCRC in Charlotte, NC.

"If there's one guy I love reading every day on Twitter, it's Dan Wolken", says Tudor. "He has great insights, a fantastic read on the trends and culture shifts in college sports, and is a pro at telling a great story. I think the college coaches who attend our weekend conference are going to see why I'm such a big fan."

Want to follow him on Twitter? He's at @DanWolken.

Want to make sure you get to hear him, plus the rest of our experts, AND get to network and steal ideas from your fellow college recruiters around the country? Register for this year's conference today!

RESERVE YOUR SEAT NOW AND SAVE!

UPDATE: Discounted hotel rooms are still available for early registrations!

It's going to be our best event ever, and we want you there to hear from the best minds in the business!

Inside the Right Way to Connect Through Social Media

Later this week, our **TRS Clients** and **Premium Members** will be getting the latest trends we've tracked for how best to communicate with prospects by social media.
There's a big trend by coaches to communicate through Twitter, Facebook and other social media websites. Over this past year, we've conducted focus groups with athletes who are being contacted by coaches through social media. **We'll give you an exclusive look** at what we're finding out, and what they say you should be doing differently!

The Big Picture of Twitter Recruiting

by Mike Carvell, AJC.com
Twitter is one of the hottest trends in college football recruiting.
Why? Because most of the big-time recruits have a presence on the social media platform. And wherever the recruits are, the college scouts soon will follow.
Within the last month, Georgia Tech coach Paul Johnson has activated his Twitter account. Georgia's Mark Richt, fully aware of the recruiting potential, is a Twitter veteran of four years but has ramped up his activity since last summer.
The new football coaches at Tennessee and Auburn made Twitter a priority soon after being hired. Alabama's Nick Saban doesn't have official account, but it's likely only a matter of time.
College coaches around the country are signing up for Twitter because of the recruiting opportunities. It's being on the cutting edge of recruiting

technology and it's also free - which is a big help for cash-strapped athletic departments desperately seeking publicity...

Should There Be A "Gentleman's Agreement" In Recruiting?

by Michael Carvell, AJC.com
Does Steve Spurrier think there should be a "gentlemen's agreement" among coaches to not recruit players committed to other colleges?
That got a good laugh from the Ol' Ball Coach.
"No," Spurrier told the AJC. "Because the situation could change for a young man. Then all of the sudden, maybe (the college where he's committed) is maybe not the best place for him - whereas six months ago, it looked like the best place for him."
This past year, Georgia had nearly 200 high school seniors sign with FBS (formerly known as NCAA Div. I) schools. More than a fourth of the kids changed their commitment at least once during the recruiting process.

"Sometime things change from when a kid commits in the summer and by the end of his senior season," Spurrier said. "Sometimes the coach may get fired, or whatever. Something may happen - this, that or the other. Maybe a kid gets a better offer. It's going to happen when you commit six months before signing day...

What Is The Impact Of Current Academic Standard Changes?

By Mitch Sherman, ESPN

The NCAA is considering changes to pending legislation that promises to impact recruiting in football and other sports like no other set of rules implemented over the past generation.

The much-publicized battle over recruiting deregulation, text messages and staff assignments, right?

Wrong.

Another issue of greater scope looms quietly, with the potential to shake the recruiting world in a way that an extra round of electronic communication can't touch. It involves initial-eligibility standards. Academic requirements are on the rise for prospective Division I athletes, starting with the Class of 2016 that's now just weeks away from the end of its freshman year of high school.

If you haven't heard about it, you're not alone. Neither have some of the parents, coaches and counselors of the students who will be affected.

Even among the growing legions of people who know it's coming, many have yet to do anything, which is arguably the most irresponsible action of all...

LONGHORNS PICK UP FIRST 2015 RECRUIT AT SOPHOMORE DAY

Sherman offensive tackle Aaron Garza gave the Longhorns a verbal commitment Saturday, becoming the first member of the 2015 recruiting class. Yes, you read that right. Mack Brown has aggressively begun recruiting sophomores. Saturday marks Texas' first Sophomore Day, another step in the evolution of Brown's recruiting policies. Let us know what you think about recruiting sophomores. **CLICK HERE**

Is NCAA Facing 'Crisis Of Confidence' From Its Own Membership?

By Blair Kerkhoff, Kansas City Star

Critics have taken swings at the NCAA since President Theodore Roosevelt influenced its formation more than a century ago to curb violence in football games.

Volumes have been devoted to college athletics' ills. Even the NCAA's original leader, Walter Byers, attacked the organization in a book written nearly 20 years ago.

As March Madness carries on, culminating in the 75th Final Four celebration in Atlanta next weekend, it's easy to lose sight of the weighty issues confronting college sports.

But they're there, bubbling beneath the surface. The very foundation of college athletics shows cracks, and more are asking if the NCAA is working for its membership and what shape a future college sports governance structure might take...

GENERAL

Facility Hours and Closures – All facilities will operate on a Normal Hours Schedule from April 1 - 28. From April 29 – May 7, all facilities will operate on Finals Hours Schedule. Click here for our Hours of Operations page.

SOCIAL MEDIA

Stay Connected – If you haven't "friended" UNC Campus Rec on Facebook yet, then what are you waiting for? It is the best way to get updated information on programs, events, and altered facility hours. Add us as a friend today!

Read our Blog – Subscribe to Campus Rec's entertaining and informational blog! "Prepare to Climb", "Run the Distance" and "April's Expeditions" are just a couple of this month's featured posts.

PROGRAMS & EVENTS

Spring Fling (Friday, May 3) – Take advantage of the warm spring weather and join Campus Recreation for a 2.7 mile fun run or 1.5 mile walk, open to all UNC-Chapel Hill faculty and staff. This is a great opportunity to get out of the office and exercise with your co-workers, while giving back to the community through donations. For more information including how to register visit the Spring Fling webpage.

Relay for Life – It isn't too late to join Campus Recreation's Relay for Life team on April 5-6! This is your chance to help fight cancer! Participants that raise $100 for this outstanding cause will receive a free t-shirt. Click here for more information about joining our team.

For more information on anything you see here visit the Special Events webpage.

FITNESS

Campus Run – Join Campus Rec, Fleet Feet, and NIKE every Tuesday at 6:00pm at Rams Head Rec Center for an evening of running. Runs will be 3 and 5 miles in distance, at varying paces. NIKE will be giving away swag after the run so stick around! This is a FREE event and registration is not necessary! For more information visit Fleet Feet Carrboro's website.

INTRAMURAL SPORTS

Last chance to sign-up for an Intramural Sport this semester! Registration closes for **Co-Rec Kickball** and **Badminton Doubles** today! So what are you waiting for? Get involved!

For more information on these sports, including rules and registration, visit our Intramural Sports webpage.

OUTDOOR EDUCATION

***NEW* Eno River Yoga and Hiking** – Connect your mind, body, and spirit with a rejuvenating day of hiking and yoga on a brand new expedition out at Eno River. The OEC will take participants out on a hike to a relaxing wilderness setting and use the power of nature and yoga to enhance your outdoor experience. Sign-up for this amazing adventure today!

Our **April Expeditions** include:

- April 4-7, **White Oak River Kayaking** ($120)
- April 13, **Eno River Yoga and Hiking** ($40)
- April 14, **Rhode's Pond Kayaking** ($40)
- April 19-21, **Brown's Island Kayaking** ($120)

Cost includes food, transportation and equipment. Visit the Campus Rec Main Office to register. For a complete list of spring trips, visit the Expeditions webpage.

SPORT CLUBS

USA Team Handball Collegiate Nationals – UNC Campus Recreation's Team Handball Club in conjunction with USA Team Handball will host the USA Team Handball Collegiate National Tournament from April 19th – 21st. The tournament will feature both Men's and Women's club teams from all over the country to compete. The event will be held in Fetzer Hall Gyms A and B and is open to spectators. Come support the Team Handball Club as they take on highly ranked teams from across the country!

Sport Club Spotlight – This month, get to know the *Wrestling and Women's Lacrosse Clubs*!

The **Wrestling Club** competes in an open mat-style of wrestling that encourages anyone to join, regardless of experience. To acquire all of the necessary training to compete at any level, the team practices twice a week and implements those skills during competition against rival teams such as NC State and Duke.

The **Women's Lacrosse Club** has a lot at stake being the defending National Champions and the preseason overall #1 ranked team in the country. This club has the opportunity to repeat the success of last year's team, but the journey to the tourney will be challenging, taking on teams from Georgia to Maryland to Colorado.

Upcoming Events

- April 6th: Club Swimming Meet: Koury Pool at 12pm
- April 6-7th: Men's Club Basketball Tournament: Fetzer Gyms A & B
- April 7th: Club Softball: Varsity Softball Practice Field at 10am, 12pm, and 2pm vs. Winthrop

- April 13-14th: Men's Ultimate White Conference Tournament on Hooker Fields
- April 14th: Club Softball: Varsity Softball Practice Field at 10am, 12pm, and 2pm vs. NC State
- April 19th-21st: USA Team Handball National Championships: Fetzer Gyms A & B
- April 20-21st: Women's Soccer White 7v7 Tournament: Hooker Fields

Get Scores, Pictures & More – Stay up-to-date with all UNC Sport Clubs on Carolina Sport Clubs website. This new website provides tournament results, upcoming events, team photos, and feature articles on the success of the players and clubs.

CLIMBING

Rams Head Climbing Wall – We are excited to have the Rams Head Climbing Wall open and climbers back in action! All students wanting to climb must be belay certified by the UNC Climbing Wall Staff. Below are the current climbing wall hours.

- Monday – Thursday, 4:00 – 8:00pm
- Friday, 1:00 – 6:00pm
- Sunday, 1:00 – 6:00pm (Weekend hours begin April 13th)

Fetzer Climbing Wall – We are proud to announce the reopening of the Fetzer Climbing Wall on Monday, April 8th. This will provide more opportunities for students to get their climb on! Below are the hours that the Fetzer Climbing Wall will be open.

- Monday – Thursday, 6:00 – 10:00pm
- Friday, 4:00 – 8:00pm
- Saturday, 1:00 – 6:00pm (Weekend hours begin April 13th)

For more information on climbing programs, equipment rental, and facility hours please visit the Climbing Wall webpage.

Therapy, Companion & Service Animals On Campus: Managing Requests & Understanding The Law
Tuesday, April 30 – 2:00-4:30pm EDT
Registration - http://www.innovativeeducators.org/product_p/1043.htm

Innovative Educators

Free Resources

- Accommodating Service and Assistance Animals on Campus
- Lawsuit Raises Questions About Therapy Dogs at Colleges
- Policy on Service Animals in College Owned Housing - Grinnell College
- ADA - Service Animals
- Service/Assistance Animals - Government of New Hampshire
- Federal Case Over Banning a Student's Therapy Dog Illustrates Thicket of Disability Rules
- Have a Higher Ed question? AskIE
  - What accommodations are required for students with mental health issues?
  - What should I do if I suspect that a student has mental health issues?

Webinar Overview

Animals assist humans in many ways. Often, as in the case of Therapy, Companion, and Service animals, they play an important role in facilitating the independence of people living with physical and mental difficulties and disabilities. When animals are brought onto campus and into the classroom for this purpose, what is the protocol? What does the law say about allowing these types of animals to assist students on campus?
Today, there is some confusion about how to handle these animals and incoming requests from students. This webinar will offer some clarity as schools review their decision-making process. Join legal expert, Attorney Saundra (Saunie) Schuster, and Director of Counseling at Western Kentucky University, Dr. Brian Van Brunt, to discuss some of the recent controversy and conflict in the area of Service, Therapy, and Companion animal requests.
Attorney Schuster will review pertinent legal cases while Dr. Van Brunt will discuss the related psychology and medical issues of students. He will also offer some proactive suggestions and alternatives for students whose requests cannot be accommodated.
We will review:

- The differences and similarities between Service, Therapy, and Companion animals
- The case of the University of Nebraska at Kearney and HUD
- The case of an Ohio University student who sued an Athens apartment complex
- How Title II and III define animals who perform an actual "service" and the limiting of these animals to a dog or small horse
- The conflict between HUD/Fair Housing and Department of Justice
- Several existing college and university policies

Webinar Objectives

Participants will:

- Understand the foundational definitions of Service, Companion, and Therapy animals
- Review the common psychological and medical reasons for requests
- Discuss how recent court cases provide insight into current policy
- Discover alternatives to requests that are not allowed

Webinar Speaker(s)

Dr. Brian Van Brunt , past president of the American College Counseling Association, is Senior Vice President for Professional Development Programs at the National Center for Higher Education Risk Management (NHCERM, www.ncherm.org). He is the president-elect of the National Behavioral Intervention

Team Association (NaBITA, www.nabita.org), current president of the School and College Organization for Prevention Educators (SCOPE, www.wearescope.org) and the managing editor for Student Affairs eNews (SAeN, www.studentaffairsenews.com). Over the past thirteen years Brian has taught counseling theory, ethics, program evaluation, statistics and sociology topics at both public and private schools for both graduate and undergraduate students at five different colleges and universities. Brian has served as the director of counseling at New England College and Western Kentucky University. He is the author of several books including: Ending Campus Violence: New Approaches in Prevention and A Faculty Guide to Addressing Disruptive and Dangerous Behavior in the Classroom. Brian is an expert on campus violence and has been interviewed by the New York Times, National Pubic Radio, LA Times, USA Today and has appeared on Headline News and Anderson Cooper 360.

Saundra (Saunie) Schuster is a Partner with the National Center for Higher Education Risk Management (NCHERM), a national risk management legal consulting firm. Ms. Schuster is a recognized expert in preventive law for education, notably in the fields of Sexual Misconduct, First Amendment, Risk Management, Student Discipline and Campus Conduct, Intellectual Property and Employment Issues. Her higher education legal experience includes serving as the General Counsel for Sinclair Community College; as Senior Assistant Attorney General for the State of Ohio, representing public colleges and universities; and as the Associate General Counsel for the University of Toledo.

In addition to her legal work in higher education, Ms. Schuster has over twenty years experience in college administration and teaching. Prior to practicing law, she was the Associate Dean of Students at The Ohio State University and served as a faculty member at The Ohio State University, Miami University and Columbus State Community College and created the Developmental Education Program for Miami University. She has presented extensively on legal issues in higher education, and provides consultation on many legal issues to colleges and universities throughout the country. She has provided assistance with policy review and development of sexual harassment and sexual misconduct for students and employees for many institutions across the country, including a recent invitation by the Iowa Board of Regents to develop student sexual misconduct policies for all the State of Iowa higher education institutions. Ms. Schuster is co-author of "The First Amendment: A Guide for College Administrators", and contributing author to "Campus Conduct Practice".

Ms. Schuster is a former President of the Association for Student Conduct Administration (ASCA, formerly ASJA), and held many board positions within the organization. She is a long time member of the National Association of College and University Attorneys (NACUA) and served on the conference planning committee. Ms. Schuster is on the Board of Advisors for the Report on Campus Safety and Student Development, published by the Civic Research Institute. She also serves on several Boards of Directors in her community. Ms. Schuster holds Masters degrees in counseling and higher education administration from Miami University, completed her coursework for her Ph.D. in Organizational Development at Ohio State University, and was awarded her juris doctorate degree from the Moritz College of Law, The Ohio State University.

Subject: 2013 NCLCA Conference in Charleston

NCLCA Conference!

Because of multiple requests to still turn in Conference Proposals, we are extending the deadlineuntil Monday, May 6. We want everyone to have an opportunity to submit the best proposals possible and not feel rushed to get them in today or tomorrow.

If you would still like to submit a proposal for the 2013 NCLCA Conference, Weaving a Legacy of Student Success, in Charleston on Sept 25-28, please submit your proposal to:

http://www.nclca.org/2013conference/2013cfp.html

Jennifer Pippen
Assistant Director of Academic Support
NCLCA Professional Development Officer
Certified Learning Center Professional - Level Two

To search past discussions on the SI-Net, visit our archive at http://groups.google.com/group/si-net

To add or remove from this mailing list, please go to <http://listserv.umkc.edu/scripts/wa.exe?SUBED1=SINET&A=1> or send an email message to the address listserv@listserv.umkc.edu, with the text SIGNOFF SINET in the body of the message.

You are subscribed to the SINET list as &*TO;.
Problems or questions should be directed to manager@listserv.umkc.edu.

Subject: The New "At-Risk" Student Seminar: Strategies To Increase Retention

---

The New "At-Risk" Student Seminar:
Increasing Retention, Success & Institutional Support
Wednesday, May 1 ~ 1:00-2:30pm EDT

Registration - http://www.innovativeeducators.org/product_p/1030.htm

Innovative Educators

Free Resources

- Advising Academically Underprepared Students (NACADA)
- Community College Retention and Recruitment of "At Risk" Students
- College Forward - College Persistence
- Student Retention Resources (NACADA)
- Factors Influencing Student Retention in Higher Education
- Have a Higher Ed question? AskIE
  - How is this generation of at-risk students different than other generations?
  - How can I help a student that is on academic probation?
  - How should I set up a bridge program?

Webinar Overview

During the last three decades numerous programs and activities have been designed to work with students identified as "at-risk." Most often these programs have centered on college readiness and preparedness, economic issues, and institutional climate and fit. It is time to expand the definition of "at-risk" to include psychosocial issues, such as students and parents holding unrealistic expectations of the collegiate experience, diminished accountability in the educational process, and an underdeveloped work ethic.
In this webinar, we will address this new definition of "at-risk" students and discover strategies to increase the retention of this often misunderstood group. Participants will discuss ways to increase program success and seek institutional support when necessary. Sample documents, resources, and recommended reading will be provided allowing participants to leave with plans for student meetings, workshops, and tracking data.

Webinar Objectives

Participants will:

- Review the spectrum of "at-risk" students and their campus' current definition of the population
- Investigate the importance of student engagement and academic coaching from the perspective of working with "at-risk" students
- Be provided with assistance in reviewing and examining their current retention-focused programming
- Discuss appropriate and effective advising and assistance models that can be utilized when working with at-risk student populations
- Understand the importance and impact of responsibility-focused intrusive advising
- Examine promising practices to providing retention-based services in the era of decreasing funding

Webinar Speaker(s)

Trent Ball currently serves as the Associate Dean of Students at Southeast Missouri State University and provides leadership and management of the Academic Support Centers. This includes the administration of programs, hiring, training, supervision, and evaluation of the staff and activities of Educational Access Programs, Learning Assistance Programs, The Ronald E. McNair Scholars Program (TRiO), and Student Support Services (TRiO). Mr. Ball is the current President-Elect of the Mid-America Association of Educational Opportunity Program Personnel (MAEOPP) for TRIO and Educational Opportunity Program professionals serving a ten state region. Mr. Ball also serves as the Public Institution Representative to the Missouri College Personnel Association's (MoCPA) Board and works with the NASPA Region IV-West Knowledge Community for Graduate and Professional Student Services. He has presented numerous programs at the local, state, regional and national level and has over 15 years of professional experience in Higher Education.
Valdis Zalite currently serves as the Director of the TRIO/Student Support Services Program at Southeast Missouri State University. Mr. Zalite is a key player in the collaborative efforts and programming of the Academic Support Centers

THE COMPLIANCE NEWSLETTER

UNC Department of Athletics

APRIL 3, 2013 ***VOLUME XVIV, NUMBER 9***

AWARDS BANQUETS

As the end of the year approaches and you are planning your banquets, please remember that, with few exceptions, family members and friends of student-athletes must pay the per person cost for attending the banquet. NCAA legislation (Bylaw 16.6.1.6) allows us to cover banquet costs only for student-athletes and their spouses and children. We may also provide complimentary admission to parents or legal guardians of *senior* student-athletes who are in their final year of athletics eligibility. All other relatives and friends must pay to attend. The price to attend must include the cost of the meal, as well as linen rental, serving fees, cost of paper goods, catering charges, gratuities, etc. In order to calculate a per-person fee, divide the total cost for the event by the number of attendees.

NLI SIGNING PERIOD

The spring NLI signing period for all sports other than basketball, field hockey, football, soccer, and track and field **begins April 17th** and runs through August 1st. Coaching staff members from sports utilizing this signing period may make **unlimited** telephone calls to prospects from April 17th through April 19th.

Please note that the sports associated with this NLI signing period are in a dead period from Monday, April 15th through Thursday, April 18th.

Men's and women's basketball spring signing period **begins April 17th** and ends May 15th. Basketball coaches may make **unlimited** phone calls to a prospect from April 17th through April 19th. **Please note that the sport of basketball is in a dead period from Monday, April 15th through Thursday, April 18th.**

During a dead period, it is not permissible to make in-person recruiting contacts or evaluations on or off the UNC campus. **This also prohibits any prospect visits to UNC's campus, as well as the provision of complimentary admissions to prospects for campus athletics contests.** Please see Bylaw 13.02.5.5 for more details.

CONTACT RESTRICTIONS AFTER SIGNING NATIONAL LETTER OF INTENT

After prospects have signed NLI's, coaching and administrative staff members are permitted to contact them through unlimited phone calls.

On the calendar day **after** a prospective student-athlete signs an NLI, coaches are also permitted unlimited text messaging, as well as unlimited contacts with or evaluations of the prospect, subject to several exceptions noted in Bylaw 13.1.5.8.1 .

NEW INTERPRETATIONS

SPREAD ON BAGELS: It is now permissible to provide spreads on bagels. Some permissible spreads include: butter/margarine, jelly/jam, cream cheese, honey, vegemite, and peanut butter. The spread must be able to be spread and does not include other toppings such as eggs or meats. For clarification, the term "bagels" also encompasses other breads/pastries/muffins.

Apparently, it is now the NCAA's position that there was never any prohibition regarding this legislation. Rather, it appears that, nationally, institutions operated under an incorrect interpretation for the past four years.

ICING ON COOKIES: During an official visit, if you provide cookies as a reasonable snack for a prospect, it is permissible for the cookie to be iced in school colors as well as for the icing to be a rendering of your school logo. Other reasonable snacks that come in small bags may have tissue paper and ribbon in school colors and/or feature the school logo. Snacks may not be personalized.

Subject: FORMAL NOTICE: Background Checks for Staff of Residential Programs Serving Minors

---

MEMORANDUM

TO: Vice Chancellors, Deans, Directors, and Department Heads

FROM: Bruce Carney, Executive Vice Chancellor and Provost

DATE: April 1, 2013

RE: Background Checks for Staff of Residential Programs Serving Minors

Recent issues involving alleged harm to minors (persons under the age of 18) on some other college campuses have highlighted for us our responsibility to provide a safe and secure environment for minors we welcome to campus. In August 2012, therefore, I charged a special University task force led by Vice Provosts Carol Tresolini and Taffye Benson Clayton to catalog existing University-sponsored or third-party programs that bring minors to campus, examine processes for approving such programs, identify best practices for these programs, and develop recommendations regarding University policies and processes for overseeing programs for minors. As part of its work, the task force has conducted an initial survey to catalog University programs serving minors who are not current UNC-Chapel Hill students. So far, we have learned of more than 125 such programs, some residential and some non-residential; visit https://provost.unc.edu/files/2013/04/Final-Minors-on-the-Campus-information-12-6-2012.pdf to see a listing of these programs. The task force's work continues in earnest, and I expect that we will adopt a comprehensive policy later this year along with other recommendations to strengthen the practices of these programs. The policy being developed is intended to implement new safeguards for any programs (camps, academic enrichment, etc.) that serve minors, whether operated directly by a University department or by an outside third party that operates such a program using University facilities.

Pending development of the full policy, the task force has made an initial recommendation, which I have accepted, to require that any overnight residential program that serves minors conduct comprehensive criminal background checks for all program staff, whether paid or volunteer. This requirement is for all residential programs serving minors (hereafter "Residential Programs") that are conducted on or after June 1, 2013. I expect that background checks will be required for all paid and volunteer staff of all programs serving minors--whether residential or non-residential--in 2014.

Specific guidelines are as follows:

1) Frequency, Timing, and Applicability of background checks

A) Every Residential Program must have documentation of a background check performed within the last year (measured from the last day of the
program) on each program staff member, whether paid or volunteer.

B) Background checks must be completed prior to a program staff member having any contact with minors as part of the Residential Program.

C) This annual check applies to currently active University faculty,

staff, volunteers, or interns who will serve as program staff in a Residential Program, regardless of any prior background check(s) that have been conducted by the University. This means that in some instances, a new background check on an existing University faculty member, staff member, volunteer, or intern may need to be conducted with the OHR Background Check unit.

2) Costs and Scope of background checks

A) The Residential Program will be responsible for bearing the cost of all required background checks.

B) The background check must be equivalent to the one performed by the University on its prospective employees.

i) UNC-CH Departments that sponsor a Residential Program must use the standard background check process operated by the University's Office of Human Resources (OHR) to satisfy the background check requirement for any current University employees, students, or volunteers. The University's newly revised Background Check Form includes a specific category for checks related to protection of minors.

ii) Programs operated by an outside third party using University facilities will satisfy this background requirement using a qualified background check vendor of their own selection that is a member of the National Association of Professional Background Screeners. The University does not conduct nor take responsibility for background checks for third-party entities or organizations. However, if the outside entity does not otherwise have an arrangement in place with an outside background check vendor, OHR has arranged for referral to the University's background check vendor (Castle Branch), which can provide information on available services. As a courtesy to the University, Castle Branch has agreed to conduct background checks to satisfy the University's Residential Programs requirement. Interested parties may call Castle Branch/CertifiedBackground.com at 888-666-7788 (extension) or send email to candyh@certifiedbackground.com and reference background check package code UF32.

C) Regardless of the source of the background check, any such check must include the following elements:

i) nationwide federal courts criminal convictions;

ii) national sex offender registry;

iii) criminal convictions in all states and counties where a staff member has previously lived or worked;

iv) a residential history check to confirm that a program staff member has truthfully disclosed all prior cities and counties of residence; and

v) if the program staff member's responsibilities include transporting minors participating in the residential program, a mandatory driver's license check.

3) Reviewing the results of a background check

A) Outside third-party residential programs

i) The responsibility for vetting program staff for outside entities is entirely the responsibility of that entity and its management. If the outside third-party entity or its management has questions or concerns about the results of any program staff member's background check, they should consult their own in-house human resources professionals or legal counsel for advice as appropriate.

ii) The University does not have a role or responsibility in reviewing or interpreting background check results for individuals of such outside third-party entities.

B) University Residential Programs

i) If proposed program staff are found to have prior criminal convictions, University Departments must contact their assigned Employment and Staffing Consultant in OHR for assistance in reviewing these situations

C) Effect of certain convictions or violations

i) Any proposed program staff member whose background check reveals prior criminal convictions that involve a sex offense, crimes against children, or a serious violent crime involving assault or injury to others may not be permitted to have contact with minors in Residential Programs.

ii) Proposed program staff members whose duties including driving and who demonstrate a past pattern of serious driving-related convictions may not be permitted to drive minors as part of their duties.

4) Reporting on completion of background checks

A) Outside, third-party Residential Programs

i) A representative of the University department that authorizes use of University facilities for the program or sponsors the program must register the program via an online registration system, available at http://ehs.unc.edu/minors/2013.shtml and verify that background checks have been completed.

B) University Residential Programs

ii) The sponsor of the program must register the program via an online registration system, available at http://ehs.unc.edu/minors/2013.shtml and verify that background checks have been completed.

I ask for your diligence in ensuring the prompt and comprehensive adoption of these new requirements within your areas of responsibility. To that end, please assure that this memorandum is distributed to all individuals who have involvement in operating or planning any University Residential Programs serving minors within your areas of responsibility. If your department or unit sponsors or facilitates the use of University facilities for outside third-parties operating a Residential Program subject to these recommendations, please provide this information to these entities in a timely manner and ensure that these entities comply.

If you have any questions regarding these new background check recommendations or the task force's work, please contact Vice Provost Carol Tresolini or Vice Provost Taffye Benson Clayton.

- Have a Higher Ed question? AskIE
  - How can I support the success of African American male students?
  - How do you recruit African-American students?
  - How is this generation of at-risk students different than other generations?
  - How can I help a student that is on academic probation?
  - How should I set up a bridge program?

Webinar Overview

Reaching men of color during their first year of college is essential to secure the academic future of the United States. According to the College Board Advocacy and Policy Center, "If present levels of education and current population trends hold, the United States will see a decline in the educational attainment of the country as a whole. The goal of ensuring the future global competitiveness of the U.S. cannot be met without the full participation of our nation's young men of color."

This webinar will present methods for implementing a targeted First-Year Experience Success Course for Men of Color. By rearranging course content based on student self-assessments, and using tools such as a Common Reader targeted toward the interests and needs of the students, co-curricular activities, a customized textbook, and study and accountability teams, colleges can be more successful in capturing this high-risk group during a vulnerable stage of life. We will cover the history and expansion of a First-Year Experience Success Course for African-American males. Participants will gain information about the unique features of this program that promotes engagement and success. We will discuss data gathered for assessment purposes, including attendance, test scores, timeliness, quality of assignments, class preparation, retention, and grades. We will also compare the success of students enrolled in this specialized course compared to students enrolled in the regular First-Year Experience Course.

Webinar Objectives

Student workers will learn:

- Construct a plan for implementing a targeted First-Year Experience Success Course for Men of Color
- Identify key elements that help promote student engagement
- Learn how to incorporate a Common Reader and other specialized engagement methods
- Examine an unofficial early alert system embedded within the course
- Learn about a student accountability tool

Webinar Speaker(s)

Derek Moore is a student success coach and instructor of FYE courses at Pulaski Technical College in North Little Rock, Arkansas. Derek is currently a co-chair on the college's institutional research committee and is a member of the Achieving the Dream initiative. He has contributed to and presented at several venues focusing on student success. Derek has also provided professional development workshops for faculty, community groups, youth programs, and workforce associations. For the past four years, Derek has presented at the annual The First Year Experience conference highlighting strategies for men of color. He, along with other colleagues, was previously selected to present at the NCA Higher Learning Commission's national conference where he focused on the track, "Programs and Structures that Support Student Success." Derek has been a contributing author on customized textbooks for student success courses. He co-authored a recently released book, The College Experience for Men of Color, which is being utilized

Subject: Foreign tour - Incoming Freshmen eligibility

I did some checking to get clarification on the question if incoming SA's are eligible for a foreign tour if they have started summer school. The answer is that they are not unless the foreign tour and practices for the tour are on or after the first permissible practice date for your sport: or on or after the first day of classes of the student-athlete's first regular academic term at UNC.
The reason is that the following new legislation:

13-1	RECRUITING -- PROSPECTIVE STUDENT-ATHLETE -- EXCEPTION -- AFTER SIGNING NATIONAL LETTER OF INTENT	To specify that an individual who has signed a National Letter of Intent (or, for an institution that does not use the National Letter of Intent in a particular sport, the institution's written offer of admission and/or financial aid) shall no longer be considered a prospective student-athlete for purposes of NCAA Bylaw 13	Prospects can be treated like student-athlete to Bylaw 13 after a signed NLI (recruiting reg longer apply, except activities that would be bylaw 13.2.1 can be considered an extra

Is only applicable to bylaw 13. This means is cleans up any of the rules we have now, that say when and when not we can have contact with a prospect after they sign a nli until they start practicing or start school. Since it is not applicable to bylaw 17 (playing and practice) they will not be able to compete in a May tour.
Let me know if you have any questions,

- Have a Higher Ed question? AskIE
  - What qualities are important for a leader in higher education?
  - What are three strategies that will help new faculty thrive?
  - How do you develop a vision statement for your campus or department?
  - What can managers do to motivate staff?

Webinar Overview

At the end of the day, do you find that you have more "not done's" than "did's"? Did you fall asleep last night cuddling a laptop? How many tabs are open on your browser right now? How many emails are unanswered? How many texts are waiting in the queue?

We teach our students how to manage time, but we could probably use a lesson ourselves. We hold great promise in new technology like smart phones and iPads. We depend on these devices to increase productivity, but no particular gadget saves time or makes time. Sanity and productivity remain born of choices. This workshop will share the choices great managers make to increase both productivity at work and fulfillment at home.

Webinar Objectives

Participants will learn to use these precepts to drive time management:

- Jiro and Bill: Living to work or working to live
- Thoreau's Thumbnail: Minimizing without sacrifice
- The Fireman and The Fool: Not doing what you should be doing
- Quilt of Many Colors: One-Picture Planning
- A.M. vs. P.M.: Making the most of the morning
- Eat the Elephant: Doing what you dread, one bite at a time
- Serve It Up: Overcoming perfection-fixation
- Controlled Communication: Reducing wasteful interactions
- In Your Face: Remembering errands and bills and "stuff"
- Bamming: Responding to overwhelming stress

INFORMATIONAL MESSAGE FROM ALERT CAROLINA: Police Seeking Information, Identity of Suspect in Area Vandalisms

UNC Police and Chapel Hill Police are partnering with the local community in their ongoing investigations into recent acts of vandalism / graffiti at numerous locations. In most cases, graffiti in bright pink paint caused significant damage to local property. Areas vandalized were widespread, including New East and McIver Residence Halls, campus monuments and landmarks, vehicles and buildings in the vicinity of the Swain lot parking area on northwestern campus, and the Chapel of the Cross on Franklin Street. Video surveillance cameras at the Swain Lot yielded the photos shown at the following links:

Subject:	Re: SI Support for Summer classes

Hi Lauralee,

We offered SI to 3 courses last summer and are planning to support 1 course this semester. We too, during the regular school year, offer 3 hours of sessions for the 3 hour classes. There are 3, one hour sessions each week. What we did in the summer is instead of having three one hour sessions we had two 1.5 hour sessions. We only had funding to offer the 3 hours of sessions, since the leaders do sit in class they were paid 8 hours of class time, 3 hours of session time, 2 hours of planning time and 30 minutes of one on one meetings with me per week.

We only had one course that had any attendance, it was our organic chemistry class. The other courses we tried to support were Anatomy and Physiology (2 separate courses at UNCG). Anatomy and Physiology had lengthy labs each week. Students spent 8 hours in class (2 hours, 4 days a week) and 3-4 hours in lab (once a week). After that, they weren't willing to go to anything else for any amount of time. My leaders tried everything to get students to come and they said it was just too much of one subject each week to go to an actual session. A lot of the students enrolled in those classes were regulars at SI during the year too and knew the value of it.

We did have great attendance at our Organic Chemistry sessions. Students didn't have a lab to attend during the summer and loved the extra help. There were about 90 students enrolled in the summer class there were always students coming in and out of the sessions.

This summer we are going to attempt to just offer Organic Chemistry, mainly due to funding limitations. We will look to see the number of session hours. But overall because of less classes there weren't too many conflicts with the session times. And since my leaders had very open schedules we were able to schedule sessions at the times when the most students were available.

Emily

> We are considering offering SI support for a few summer classes, and I am curious to know if other schools are doing this, how the sessions are set and how successful it has been. Currently, for regular semesters, we offer 3 hours of session time for 3 hours of class time. Since summer classes meet more hours during the week, I would draw the natural conclusion that we should also offer more session time. Any input about the pros and cons of summer SI would be greatly appreciated.

Subject: Re: SI Support for Summer classes

Hi, We have 2 six week sessions - one in the winter and one in the summer and we have been providing SI for both of these for the past 15 years or so. It works. The only caveat: We do not hire "new" tutors. We only hire experienced tutors since there is not enough time in this short span to train and get tutors ready. Our tutors provide 5 hours a week of tutoring (a minimum) and do re-attend the class which is usually double the hours of our fall and spring semesters (which are each 12 weeks long.) If you want more information, check out our website: www.lagcc.cuny.edu/api or contact me directly. Good luck! Joyce

INFORMATIONAL MESSAGE FROM ALERT CAROLINA: Police File Charges for False Report of Recent Sexual Assault

The UNC Department of Public Safety has charged a non-UNC student with filing a false report about an alleged sexual assault early Saturday morning (April 6) on the UNC campus.

No Alert Carolina notification was made in the wake of the alleged incident because there was no imminent threat to the University community and because issuing such a notice would have compromised the integrity of the investigation.

The Department of Public Safety takes all reports of sexual assault seriously, however a thorough investigation determined that the testimony provided by the reporting party was false, and charges were filed on Monday (April 8).

About Informational Messages: The University sends an Informational Message to inform the campus community about a situation that is not an emergency, but is expected to be of significant interest to the campus.

Plagiarism Education Week

Plagiarism Education Week was started to help educators foster an understanding among their students that Originality Matters. How do we engage students in thinking critically, conducting better online research, using sources appropriately, and doing work that reflects their original thought? During this week, Turnitin is partnering with The International Center for Academic Integrity (ICAI), The School for Ethical Education (SEE), and Plagiarism Today to present a series of free, live webcasts that delve into key issues, each day. Attendees will also receive additional resources to help continue the dialogue in their classrooms and at their institutions.

Monday: *Causes of Plagiarism*

Tuesday: *Types of Plagiarism*

Wednesday: *Responses to Plagiarism*

Thursday: *Approaches to Plagiarism*

Friday: *Originality and Creativity*

GETTING STARTED on the INSTRUCTOR DASHBOARD

The instructor dashboard provides you with an overview of recent activity within your classes, showing notifications on submissions, high similarity, and GradeMark reviews. You can also track submissions and your grading progress for recent assignments to help you keep track of that virtual stack of papers you need to get through.

Instructor Dashboard Screenshot

Now you can even set the dashboard as your default homepage when you log into Turnitin by simply clicking the settings icon and checking **Make this my instructor homepage** and then **Apply**.

Subject: Quality Assurance Survey for Connect Carolina

Dear Colleague:

As part of the efforts involving the upcoming launch of the HR and Finance portions of ConnectCarolina (http://ccinfo.unc.edu) in January 2014, the project sponsors commissioned a quality assurance (QA) assessment of the project. This assessment included dozens of interviews with key campus stakeholders to "take the pulse" of the project, to assess the efficiency and effectiveness of project activities, and identify opportunities for improvement.

Part of the QA effort includes soliciting feedback regarding the project from the user community to understand expectations and determine how well the ConnectCarolina efforts have been communicated. A brief questionnaire has been prepared to help determine the effectiveness of ConnectCarolina efforts and planning. Please take a few minutes of your time to answer this brief questionnaire. Your answers will be anonymous unless you choose to disclose your identity as part of the questionnaire. Your participation is extremely important to the QA effort and will aid the University in achieving a successful launch of the new HR and Finance administrative systems.

The questionnaire is located at https://unc.qualtrics.com/SE/?SID=SV_eE9eP15Snl7TurX.

Thank you in advance for your participation.

- National Center for Developmental Education - Resources and Research
- Teaching and Learning Centers in the 21st Century

Webinar Overview

In the mid 1990s, the focus of academic institutions began shifting from what is taught by the faculty to what is learned by the students. This new focus on learning resulted in renewed interest in establishing campus learning centers. Learning centers have the potential to become the nucleus of initiatives that focus the entire institution on improving learning. However, to realize this potential, learning center leaders must identify stakeholders and partners, establish a campus wide presence for the learning center, and implement effective strategies for expanding the learning center's sphere of influence.
This webinar will provide strategies to enable the learning center to achieve significant campus-wide impact. The discussion will include specific strategies that will help you improve student learning and successfully move your learning center to a leadership position on campus.

Webinar Objectives

Participants will:

- Identify the departments, administrative units, and individuals that will be allies on the journey to campus leadership
- Describe the local, national, and international initiatives necessary for campus leadership
- Discuss specific strategies that will successfully move the learning center to a leadership position
- Develop an action plan for expanding the learning center's sphere of influence

Webinar Speaker(s)

Dr. Saundra Yancy McGuire is Professor of Chemistry and Assistant Vice Chancellor at Louisiana State University. She is the former director of LSU's Center for Academic Success, the winner of the 2004 National College Learning Center Association (NCLCA) Frank L. Christ Outstanding Learning Center Award. She served as a mentor at the 2011 and 2007 NCLCA Summer Institutes and at the 2006 Winter Institute. Most recently, in 2010, she became one of only seven individuals in the nation to achieve NCLCA's Level Four Lifetime Learning Center Leadership Certification.

In 2012 Dr. McGuire was elected a fellow of The Council of Learning Assistance and Developmental Education Associations (CLADEA). In 2011 she was named a Fellow of the American Association for the Advancement of Science (AAAS), and in 2010 she was named a Fellow of the American Chemical Society. She received the Presidential Award for Excellence in Science, Mathematics, and Engineering Mentoring in a 2006 White House Oval Office Ceremony.

Dr. McGuire has been teaching chemistry and working in the area of learning support for the past 43 years and has presented her widely praised workshop, "Teaching Students How to Learn", at over 150 colleges and universities.

Subject: Job Posting - Associate Vice Chancellor for Research - Research Development

---

Please feel free to forward this announcement to anyone who may be qualified for and interested in the position.

The University of North Carolina at Chapel Hill invites applications and nominations for the position of Associate Vice Chancellor for Research (AVCR), Office of the Vice Chancellor for Research.

The University of North Carolina at Chapel Hill (UNC) seeks a dynamic and collaborative Associate Vice Chancellor for Research (AVCR). As a member of the Vice Chancellor's cabinet, the AVCR advises the Vice Chancellor in strategic planning for research development and participates in the design of new research and administrative initiatives and strategies. The AVCR advances the research mission of the University by promoting research excellence, creating research partnerships in the public and private sectors, supporting the development of interdisciplinary research teams, and developing and nurturing the research workforce.

UNC is a highly collaborative and international research environment. It is routine for researchers to collaborate on research projects across academic boundaries, and the University also partners with a large and diverse group of outside organizations in the United States and around the world. This approach reflects the University's emphasis on interdisciplinary teaching and scholarship between and among the health, natural and social sciences, as well as the arts and humanities. A major goal is to grow and diversify the portfolio.

Preference will be given to those who currently hold or would qualify for a faculty position at UNC Chapel Hill. The position requires a terminal degree in an academic or professional discipline, a track record of extramural funding as a Principal Investigator and a minimum of ten years of professional experience.

The successful candidate will have a sophisticated understanding of the role and importance of sponsored research in a modern, entrepreneurial, research-intensive university. This may be evidenced by experience as a researcher and faculty member, a history of successful leadership within higher education, governmental agencies, foundations, or other settings with robust research activity. The AVCR will be a person of high energy and high personal integrity, will exhibit a strong commitment to service, possess outstanding communication and interpersonal skills, excel both as a leader and a team member, and have a record of proven managerial success.

Candidates should apply online at http://unc.peopleadmin.com/postings/21830. Applications must include a cover letter that addresses their qualifications for the position, a current curriculum vitae, a statement of administrative philosophy and/or vision for advancing research development and training and the names, addresses, and telephone numbers of three professional references. References will not be contacted until candidates have reached the final round of consideration.

Nominations may be addressed to Dr. Steve Matson, Chair, AVCR Search Committee, CB# 4010, The University of North Carolina at Chapel Hill, Chapel Hill, NC 27599-4010, or smatson@bio.unc.edu. Consideration of candidates will begin on April 22, 2013. Applications will be accepted until the position is filled. The expected start date is July 1, 2013.

The University of North Carolina is an equal opportunity employer and encourages applications from members of minority groups and women.

Instructions on the 2013-2014 Electronic Employee Parking Registration Form

1. Employees that have an onyen and password will need to utilize the following screen to access the online registration form:

Auxiliary departments (listed on the below example) that have employees with just a PID will need to utilize the following screen to access the online registration form:

2. Select the appropriate choices as indicated on the screen. If you work for one of the departments listed above, The department number begins with the "U" and four digit number. Just enter the four(4) digit number.
If you do not know your department number, you will need to contact your Department Parking Coordinator to assist you with that information.

3. Select your 1st choice from the zones in the pull down menu. Provide your 2nd choice as well as 3rd choice. You can make your waitlist option the same as your first choice if you feel certain you may not obtain it during the registration selection by your department. The waitlist choice is optional and you do not have to fill in this information.

4. Once you have entered your choices and click “Submit” you will then be able to print your confirmation.

If you have any questions, on how to complete the form or need to find computer access, please speak with your Department Parking Coordinator to assist you.

Webinar Overview

Part-time faculty bring tremendous benefits to institutions of higher learner, especially the community college environment. They offer a cost-effective solution to institutional budget cuts and are often leaders in their field. But how do you train part-time faculty for success teaching at the community college level? How do you meet their needs and offer support that does not offset or hinder their intrinsic value to your institution?

This webinar will present an online course developed specifically for training part-time faculty at community colleges. Participants will leave with the tools needed to launch an online course that will cover training concepts such as: the history and role of community colleges, governance and organizational structures, accreditation process, support services, copyright law and how it pertains to syllabus creation, adult learning theories, and various teaching and learning styles. We will also discuss the teaching-learning-assessing-reflecting cycle and how to best relay its importance to part-time instructors. The importance of building a sense of community and responding to faculty's technology gaps will also be covered. The training course materials presented during this webinar can be adapted and implemented at other community colleges.

Webinar Objectives

Participants will:

- Review a successful online training course for part-time faculty at community colleges
- Leave with the tools needed to launch an online course at their institution
- Explore strategies to build a sense of community in an online environment
- Be able to explain the history, role, and importance of community colleges
- Understand the definition and role of a community college instructor
- Discuss why understanding curriculum and copyright law is necessary for faculty constructing a course syllabus
- Discuss previously held concepts about community college students, adult learning theories, and teaching and learning styles
- Analyze the teaching-learning-assessing-reflecting cycle and explain the importance and purpose of evaluating student learning as well as different methods to measure academic achievement

Webinar Speaker(s)

Dr. Carolyn Miller earned her doctorate degree in Educational Leadership through the University of Phoenix, a program that was completed completely online. Prior to higher education, she taught in the K-8 setting as a regular education teacher and special education. She has been studying learning behaviors and theories since 1994. She hopes to share these tips and tricks with other instructors as they develop their courses.

Dr. Miller teaches a hybrid and two online courses each semester. Since 2006, she has developed educational curriculum for hybrid and online formats for the seven courses she can teach. Her current role as an Instructional Designer, for Paradise Valley Community College, has afforded her the opportunity to work with hundreds of diverse faculty with various teaching and learning styles. Though she has passion for technology, she understands the demands placed on today's faculty to maintain their expertise in their field, which often doesn't afford them too much time to learn new technology skills.

Subject: FORMAL NOTICE: Carolina Family Scholarship Application - 2013

Dear Carolina Faculty and Staff,

The UNC-Chapel Hill Family Scholarship committee is pleased to announce that the Fall 2013 scholarship applications for children of UNC-Chapel Hill employees are now being accepted. To apply, go to www.unc.edu/familyfund and select the Scholarship Application & Renewal Application option on the left side of the screen (it may take a minute to retrieve the application).

This need-based scholarship fund was created by Carolina employees to provide financial support to the children of our full-time colleagues to attend ANY of the 16 UNC campuses as well as any of the accredited community and technical colleges in North Carolina.

PLEASE NOTE:
* Applicants must file the necessary financial aid forms with the institution they wish to attend and notify the Office of Scholarships and Student Aid at UNC-Chapel Hill with the contact information for that institution's financial aid office, as well as provide a detailed summary of the financial aid package offered by that institution.
* The application deadline is June 1, 2013.

For previous press about the scholarship, see
http://gazette.unc.edu/archives/09apr01/fundraising.html

Respectfully,

UNC-Chapel Hill Family Scholarship Fund committee --

INFORMATIONAL MESSAGE FROM ALERT CAROLINA: Carrboro Police investigate assault on RR tracks

The Carrboro Police Department is seeking information about a reported assault that occurred on the railroad tracks that run behind Harris Teeter and Estes Park Apartments. The assault occurred sometime during the early morning hours of Thursday, April 11.

The suspect – described as a male, approximately 6 feet tall with a thin build, race unknown – assaulted a woman (not a UNC student) who was walking alone.

This general area is frequented by many Carrboro residents, including UNC students. Police encourage people to avoid walking alone at night, be aware of your surroundings, inform others as to your plans and to call 911 for help, if needed.

Anyone with any information on this incident should call Sgt. Webster at (919) 918-7417.

About Informational Messages: The University sends an Informational Message to inform the campus community about a situation that is not an emergency, but is expected to be of significant interest to the campus.

Subject:	FORMAL NOTICE: Celebrate Our Chancellor-Elect Friday, April 12, at 4 p.m.

Dear Carolina Students, Faculty and Staff:

The University of North Carolina's Board of Governors is scheduled to elect Carolina's 11th chancellor during a special meeting on Friday, April 12, at 2 p.m.

Details will be reported on www.unc.edu shortly after the election.

You are invited to help us celebrate this important day for the University. Come greet the Chancellor-Elect at a campus reception Friday, April 12, at 4 p.m. in the FedEx Global Education Center, located at 301 Pittsboro Street.

(For our staff employees, attendance will be considered work time. You are encouraged to seek advance approval from your supervisors.)

I hope to see you at the reception.

Sincerely,

Wade Hargrove, Chair
Chancellor Search Committee and the University's Board of Trustees

Subject: Timely Warning: Orange County under tornado watch

Dear Students, Faculty and Staff:

The National Weather Services has issued a TORNADO WATCH IN ORANGE COUNTY.

That means conditions are favorable for tornadoes and severe thunderstorms in and close to the watch area. The weather service says people in these areas should be on the lookout for threatening weather conditions and listen for later statements and possible warnings.

Remain alert for approaching storms.

The weather service updates this information regularly, so be sure to check the National Weather Service website listing the current status of watches, warnings or advisories for Orange County at http://alerts.weather.gov/cap/wwaatmget.php?x=NCC135.

The University will not send additional text, email or other notifications to the campus community about a tornado watch since the status of those often change frequently during a weather event. If a new weather pattern enters the area that prompts a fresh watch after a 24-hour period, the University plans to reissue the watch notice as part of ongoing monitoring efforts for potential serious weather conditions.

If the weather service issues a tornado warning for Chapel Hill and Carrboro, the University will activate the emergency sirens. A tornado warning means that a tornado has been spotted, or that radar indicates a thunderstorm circulation that can spawn a tornado, according to the National Weather Service. The University will activate the sirens for a significant emergency or immediate health or safety threat, send a text message to registered cell phones and start other notifications including campus email.

For more information refer to http://www.alertcarolina.unc.edu/go/doc/1395/1075683/About-Tornado-Warnings-and-Watches

ABOUT THIS EMAIL: Campus-wide email is not an instant source of information as part of the University's timely warning notification process. Text messages sent to registered cell phone users are the fastest way for the University to notify you. That's why email messages like this one will always include a timestamp to indicate when the message was sent. The University's Emergency Notification System is activated using a strategy that is based on redundancy, using multiple methods to communicate. The best, most up-to-date source of information will always be the Alert Carolina website, http://alertcarolina.unc.edu.

Free Resources

- CLEP Test Saves Time, Money
- How to Graduate in Three Years
- How to Get a Degree with Free Credit
- CLEP, DSST, and AP Tests Let You Earn College Credit - and Cash In On Savings
- Free Course, Inexpensive Exam
- Who Gets the Credit?

Webinar Overview

As college students are faced with higher and higher tuition rates because of the current financial climate, Challenge Exams offer a cost-effective alternative for earning traditional college credit. Challenge Exams permit students to meet requirements, earn credit, and receive advanced placement by taking an examination instead of a full course. By helping students complete their degrees in a more affordable manner, Challenge Exams have the potential to increase retention and persistence. So, why aren't we using them more?

Thousands of students across the nation can take advantage of Challenge Exams, yet too few are given the information they need in a timely manner to help them save money and graduate on time. This webinar will focus on the many options available to institutions and their students. Participants will learn about CLEP, DSST, Excelsior, AP, IB, and more. Participants will learn how to effectively communicate with students about their options. We will also discuss policy development and implementation. Who is responsible for setting policy? How often are policies evaluated? How do students process Credit for Prior Learning transcripts? We will begin this discussion and provide participants with an opportunity to network with others across the nation and take home ideas for best practices.

Webinar Objectives

Participants will:

- Acquire knowledge of Credit for Prior Learning (CPL)/Challenge Exam options
- Discuss a possible plan for implementation of CPL polices
- Identify road blocks for students
- Identify key leaders for implementation of a new plan
- Evaluate current methodology
- Identify recommendations for changes in policy
- Identify resources for implementation

from Colorado State University with a M.Ed. in Counseling and Career Development. Deborah is a recent retiree from Front Range Community College in Fort Collins, Colorado. She worked at FRCC from 1979-2010. Deborah held numerous positions during her 31 years at FRCC including Financial Aid Director (1979-1981), adjunct faculty (1979-2003), part-time advisor (1992-1996), and Director of Testing (1996-2010). She taught study skills courses for 10 years, served as the chair of new student orientation, served as chair of the Basic Skills Task Force (a state liaison committee for the community college system in Colorado), and worked with the local school district as a member of the 21st Century Graduation Requirements board.

Deborah was a leader in the state of Colorado during the legislation of mandatory placement and assessment from 1998-2000. Her expertise in the assessment process for students in the Colorado Community College System was key in implementing many of the current policies impacting students as they enter community colleges in Colorado. Deborah has presented at numerous national conventions related to the testing field. She presents annually at the National Accuplacer Conference and has presented five times for the National College Testing Association annual conference. Deborah also presented at the College Board Western Forum 2009 Conference, National Association for Developmental Education 2008, and several local conferences in Colorado. Deborah continues her work with college educators and students as a consultant for The College Board and American Education Corporation. Deborah's passion for assisting college students in all aspects of their college career is reflected in her work as a consultant and her past performance as an administrator and educator at Front Range Community College.

Subject: Hurry Time Is Running Out To Take Advantage Of Bella Trio's April Specials!

Get Your Skin and Body Ready For The Summer Months!

Bella Trio is excited to offer two new services to our guests! Both the Poly Organic Peel and Perfect Slim Effect will help you look your very best just in time for swimsuit season!

- **Poly Organic Peel** – an innovative treatment that penetrates the outer layer of skin (epidermis) to brighten and lighten. Especially good for reducing scarring and dark spots (hyperpigmentation), this peel combines several types of acid for a truly effective treatment. Book a consultation today with any of our estheticians to learn more!

- **Perfect Slim Effect** – this vigorous cellulite reduction treatment targets specific zones of the body (hips, buttocks, thighs, stomach, etc) while associating the power and pleasure of essential oils with slimming. The deep therapeutic massage techniques of the Perfect Slim Effect help to balance the body as well as refine contours and smooth fatty deposits. Book your treatment soon to prepare your body for bikini season!

Keep an eye out for our Mother's Day Specials coming in mid April!

Have You Purchased Any Of The Bella Combos or Mini-Combo Specials Over The Last Year?

This is a friendly reminder... have you purchased one of our Bella Combo or Mini-Combo Specials over the last year?
All Combo Specials will expire on May 31st, so please call to schedule your treatments at **(919) 484-1221** or **click here!**

Featured Service: Balayage Face Frame Highlights

Hand painted highlights frame the face to add brightness for spring and freshen your color – **10% off for the month of April!**

Featured Product: L'Oreal Serie Expert Lumino Contrast Shampoo and Conditioner

Great for repairing, brightening and enhancing multi-dimensional blondes and highlights. **10% off for the month of April!**

Bella Trio Beauty Tip

Did you know the number one cause of wrinkles is sun damage? Even in the winter months, it's important to use a minimum of SPF 30 to protect your skin, even on cloudy days, and especially now that spring is approaching. The earlier in life you start this habit the better, as sun damage is cumulative. Our Rx Systems SPF 35 Moisturizer covers both your sun protection needs and provides a healthy dose of moisture – try it today!
~ Beauty tip from one of our amazing estheticians, Sheila Adriano

FREE 45 Minute Styling Lesson With Renee!

How many times have you purchased a styling tool and then had difficulty figuring out how to use it effectively? Renee Dube, one of our hair designers, is offering a special for her clients who purchase any Bio-Ionic tool (hairdryer, flat iron, curling iron or brush) you will be eligible for a **FREE 45 minute styling lesson** with Renee! Any clients who previously purchased a Bio-Ionic tool from Renee are eligible for the free styling session as well.

Special Guest Artist: Sherry McDonald

Bella Trio is excited to announce our upcoming guest artist, Sherry McDonald, a world renowned hair designer who specializes in cutting techniques. Sherry believes that true inspiration comes with the knowledge of something that you can believe in. All of the Bella Trio hair stylists will be attending a special class taught by Sherry on April 28th. Check with your favorite stylist to see what's new in cuts!

- How Much "Student" is in Student-Athlete?
- Punting the Problem: When Athletes Struggle as Students
- The Education of Dasmine Cathey
- Making the Grade: Academic Success in Today's Athlete

Webinar Overview

Transitioning from high school to college can be difficult for any student, but student-athletes often face even greater challenges. Although many students come to college unprepared for the academic rigors, student-athletes often come under lower admission standards and face the normal psychological and academic obstacles of adjusting to college life in addition to the full-time job of preparing for success in their sport and facing scrutinizing fans. Although there are benefits to being a student-athlete, the pressures can weigh heavy.
Administrators noticed a daunting trend in 2008: Student-athletes were coming in at alarmingly low reading levels. Specifically, within one sport in 2007, an average student-athlete entered with a grade-equivalent reading level of 11.3. This average dropped to 10.7 in 2008 and 7.62 in 2009. In January of 2009, a first grade teacher who was working on her master's degree in reading began working part-time in the evenings with two student-athletes who were reading at the fourth grade level. The progress this teacher was able to make with these two student-athletes convinced administrators to begin a full-time Reading Enhancement Program for the athletic department in August of 2009.
This webinar will outline the development and success of a Division I University Athletics Department Reading Enhancement Program, including assessment, documentation, and curricular decisions. We will discuss the unique academic needs of student-athletes and learn how reading specialists can achieve impressive results when working with collegiate athletics programs. Participants will also receive a guide to implementing a successful reading program for student-athletes at their own institution.

Webinar Objectives

Participants will:

- Discuss unique academic needs of student-athletes
- Learn how a specific athletics program is addressing these needs
- Define the unique role of the reading specialist and how it differs from a learning specialist in a collegiate athletics program
- Explore how similar programs can be implemented in their school
- Strategize how to modify the program based on needs in other places, the resources you have, and with different populations
- Attain an understanding of how solid reading philosophy at any level can be applied to adult learners

Webinar Speaker(s)

Meredith Breitling joined the Texas A&M Athletic Department in 2009, establishing the Reading Enhancement Program as part of the Center for Student-Athlete Services. She conducts independent study sessions with student athletes to enhance academic learning.

A 2007 graduate of Texas A&M with a bachelor's degree in interdisciplinary studies, she also earned a master's degree in curriculum and instruction from Texas A&M in 2010. Breitling, who joined the staff with two years of public school teaching experience in College Station ISD, is a member of the College Reading and Learning Association.

Subject:	FORMAL NOTICE: Volunteers for Carolina Family Scholarship

---

Dear Carolina faculty and staff,

An email was recently sent out announcing that applications for the Carolina Family Fund scholarships for the 2013/2014 academic year are now being accepted.

The Carolina Family Scholarship is a need-based scholarship for children of full-time UNC-Chapel Hill employees. The scholarship provides financial support for our children to attend ANY of the campuses in the UNC system, as well as state community and technology colleges.

The scholarship selections are made by a committee which changes membership every year, and consists of two faculty and two staff members. It is led by a representative from the UNC-Chapel Hill Office of Scholarships and Student Aid.

We are looking for two faculty and two staff members who would be willing to commit to two 1-hour meetings to review
and select the scholarship winners for the coming academic year.

Please email me at glover@unc.edu if you are interested in volunteering to be on the committee which will meet during the month of June.

More information about the Carolina Family Scholarship can be found at www.unc.edu/familyfund and
http://gazette.unc.edu/archives/09apr01/fundraising.html

Thank you!

4 Ways to Pump Some Life Into Your Recruiting Message

Words mean things.
It's a simple mantra, but often overlooked even by experienced recruiters.
Why does it matter? Because the first chance you have to get a recruit's attention - whether you are a Division I coach who has a program in the national spotlight, or a coach from a small Division III school - is through an email or a letter. Great copywriting is an essential part of a successful recruiting campaign, it's the life-blood of your entire recruiting message. Here are some of the recommendations I shared with a Division II coach I'm working with as a new client. We're helping them develop a series of messages that will go to recruits after they visit their campus, and agreed to share just a few of the things we're using to develop their campaign. Can any of these tips help you be a more effective communicator?
Send mail in different looking envelopes. I don't usually open "junk mail" but two years ago I remember receiving a letter and small brochure booklet in a clear, see-through envelope. It looked cool, I got a glimpse of what was inside because...

USA Today College Columnist Signs On to be Featured Speaker at 2013 NCRC

Dan Wolken, USA Today

One of the rising national voices in college sports media will be one of the featured speakers at this June's **National Collegiate Recruiting Conference**, and the founder of the event - Dan Tudor - is excited.
USA Today's Dan Wolken is one of the slated experts joining our line-up at the 2013 NCRC in Charlotte, NC.
"If there's one guy I love reading every day on Twitter, it's Dan Wolken", says Tudor. "He has great insights, a fantastic read on the trends and culture shifts in college sports, and is a pro at telling a great story. I think the college coaches who attend our weekend conference are going to see why I'm such a big fan."
Want to follow him on Twitter? He's at @DanWolken.
Want to make sure you get to hear him, plus the rest of our experts, AND get to network and steal ideas from your fellow college recruiters around the country? Register for this year's conference today!
RESERVE YOUR SEAT NOW AND SAVE!
UPDATE: Discounted hotel rooms are still available for early registrations!
It's going to be our best event ever, and we want you there to hear from the best minds in the business!

The Coaching Life

Three Ways An Exit Plan Can Make You A Better Coach

by Dr. Mike Davenport
Jack is standing in line at the supermarket, waiting to pay for his bananas. He knows exactly what he is going to do as soon as he gets his change. He has a plan.
Barb, a fifth grader, is watching the calendar slowly move toward summer vacation. She has big plans when school is over.
Both Jack and Barb have what is commonly known as an "exit-plan." They know what they are going to do after they have finished what they are currently doing. They know "what's next."
It amazes me how few coaches do.
Sooner or later every coach leaves their current job. Either holding a pink slip after the first year, with a gold plated wrist watch after 45 years, or somewhere in between - we all leave. Right now, just down the hall, or up the street is a coach who is getting ready to move on. But to what?...

Two-Part Video Webinar Training:
The New NCAA Contact Rules

The new NCAA contact rules that are going into effect will drastically change how a coach and their program are able to recruit.
To be blunt, it could be a game changer.
To help with the transition, we've issued a two-part training session through our educational partner at **NCSA Athletic Recruiting** that outlines what the new rules mean, and how to come-up with a plan for succeeding in this brave new world of recruiting communication.
Take time to watch each of these training sessions, Coach. We think you'll really get a better understanding of what you need to do to be successful moving forward.
WATCH PART I
WATCH PART II

AT SPELMAN, THEY'RE DROPPING NCAA SPORTS FOR FITNESS
Officials at the college, whose 2,100 students make it the size of some high schools, decided last year to eliminate the athletic department. This unusual move comes when few institutions seem to be able to resist the lure of intercollegiate sports. The plan is to reallocate the money devoted to sports toward establishing a wellness program for all students. **CLICK HERE**

Greenshirting: Some Athletes Are Debating About Starting College Early

by Darren Cooper, North Jersey.com
Andrew Trumbetti followed his heart and picked Notre Dame. Now the Demarest junior football standout has to decide when to go.

Trumbetti gave his verbal commitment to Notre Dame last month at Junior Day in South Bend, Ind. The Fighting Irish coaches are no doubt thrilled to have such a gifted and multi-talented athlete coming - besides being a havoc-raising defensive end, he could win the state title in the shot put - and they want him to come sooner rather than later and enroll in January.

This relatively new trend in recruiting is called "greenshirting," (green means go) in which an athlete graduates from high school early and enrolls in college for the spring semester. One of the best examples of this is current Detroit Lions quarterback Matthew Stafford, who enrolled at Georgia in January and started as a true freshman. The student is eligible to participate in spring drills, gets acclimated to the campus, and since NCAA rules give you five years to play four, it doesn't hurt your so-called "clock" since football is a fall sport.

There is also a system called "grayshirting" in which an athlete delays enrolling in school for one semester, so he/she doesn't count against that school's scholarship limit for the year. The more common "redshirting," where a student-athlete just sits out a year of play while maintaining studies, still exists as well...

Beware: The Swag-O-Meter, Mississippi's "You're A Baller" Artist Speaks Out

by Steven Godfrey, SBNation

Meet the budding icon of postmodern college football recruiting art. SB Nation talked to the man behind the now-famous "Can of SWAG" and "You're a Baller" recruiting notes, and his head coach.

There's a whole book on his desk, plastic sleeves holding some of his most famous works. Lying on top is a recent sketch - the Mississippi State banner M logo shining over a cityscape like Gotham City's Bat-Signal, with a note imploring a potential recruit that only he can help the Bulldogs save the day.

"Here's a personal favorite. The original 'You're a Baller,'" he says while pointing to a photocopied picture of himself with a magic marker word bubble displaying his now-famous mantra.

He won't allow pictures taken of his collection, ever the discriminating artist (also there's a bunch of current and former recruit names on each page, so that's a NCAA violation and stuff). He professes to have never taken a single drawing class in his life - "Nope, not one!" he happily assures - allowing his natural talent to evolve unencumbered by the gauche restrictions of conventional instruction...

College Basketball's New Recruiting Epicenter: Washington D.C.?

By Pete Thamel, Sports Illustrated

One of the great college basketball debates arose in locker rooms around the Verizon Center this week. And not long after that, it ended. The question: "What is the best area of the country for producing college basketball players?"

Using the last 15 years as a prism, it's hard to argue there's been a better area for producing top-flight basketball players than D.C.-Baltimore. The numbers back up the argument, too. Telep's former intern Drew Cannon, now a graduate manager at Butler, did a geographic breakdown study in 2011. While the data isn't broken up by region, per se, it's obvious where the players are...

Subject: FW: New Park & Ride Fees

From: Parking Services [mailto:null@exchangeunc]
Sent: Monday, April 15, 2013 5:35 PM
To: Harris, Stacey Elaine
Subject: New Park & Ride Fees
Importance: High

Attention Parking Coordinators: (please forward to all in your department)

UNC will begin implementing fees* for the UNC Park & Ride lots (Friday Center, Hedrick Bldg., Hwy. 54, Chatham, Franklin St., 725 MLK) on August 15, 2013, as approved in the 5-Year Plan.

The Town of Chapel Hill is also implementing fees for Town Park & Ride lots (Eubanks, Jones Ferry, Southern Village). UNC Park & Ride permits will be honored in Town lots. At this time, no fees are planned for the commercial lot at Lowe's in Pittsboro, and Chapel Hill Transit is still negotiating with Carrboro Plaza.

For those of you who currently use a UNC Park & Ride lot and want to consider other alternatives which are available for daily commuting, please consider the range of options available to eligible CAP members:

- FREE Regional Park & Ride lots are available to ride Triangle Transit. Permanent employees and eligible commuting students, who live off campus (within a Triangle Transit route) and do not have an on-campus permit, can get a GoPass to ride for free! (Popular Park & Ride's: Southpoint Mall in Durham, Regional Transit Center near RTP, and District Drive in Raleigh)
- Vanpool through Triangle Transit and PART. Monthly fares cover the cost of gas, maintenance and insurance, and parking is free! Plus, permanent employees and eligible commuting full-time students get a $20 monthly subsidy!
- Carpool through Zimride and ShareTheRideNC. These free ride-matching websites may help you find a new friend to share stories and commuting costs.
- Bike to a Park & Ride lot (or another transit stop) and lock up your bike or put your bike on the bus.

Please hold questions until the final update is provided. Updates will continue to be sent as details become available. Visit our website for more information.

* Please note that Chapel Hill Transit remains fare-free at boarding, and eligible students and permanent employees will still be able to obtain a free GoPass or PX Annual Pass. Vanpool Park & Ride lots will be free, and eligible riders will get the $20 subsidy.

Webinar Overview

Training student employees on the importance of providing excellent customer service is essential to any department. This workshop will outline the basic principles of excellent customer service and demonstrate how students can apply these principles to their current role as student employees. The speaker will explain how student employees fit into the mission and goals of the institution and walk students through appropriate and inappropriate behaviors. She will also explain how students can use the skills they learn on the job to help them succeed professionally outside of school. This training is intended for student employees, however, administrators who supervise student employees may also find it useful.

Webinar Objectives

Participants will learn strategies for "Cutting the Cheese":

- Start with I
- Give good face
- Do the power-pause
- Speak with a pass-the-butter voice
- Swim from positive to negative
- No buts
- Hold back
- Let them talk themselves out
- Restate and find the hole
- Eat some compromise pie
- Be the broken record
- Pod weekly
- Create a culture of civility

Webinar Speaker(s)

Bitsy Cohnis the Director of Learning Opportunity Center Services at Front Range Community College in Fort Collins, Colorado and an adjunct faculty member in the Developmental Studies Department. She holds a BA in English with Minors in

Subject:	FORMAL NOTICE: Message from the Chancellor: Announcement On New Title IX Coordinator Position

---

Dear Students, Faculty and Staff:

As we continue our campus conversation about the issue of sexual assault, I want to update you on the positive steps the University is taking to strengthen our policies and procedures and expand the resources available to students.

An important part of our work includes making sure we have a dedicated team in place to help us address the challenges that face Carolina -- and all universities -- regarding issues of sexual harassment, discrimination and violence.

With that in mind, we have created a new position for a full-time Title IX Coordinator, and we will begin a national search for a candidate to fill that role permanently. In the meantime, I am pleased to announce that Christi Hurt, director of the Carolina Women's Center, has agreed to serve in that position on an interim basis.

Ms. Hurt is a Carolina alumna (B.A. '93, M.P.A. '98) who demonstrates a lifelong commitment to preventing sexual violence and supporting those who experience it. Her background includes work on the local, state and national level in nonprofit organizations that advocate for an end to gender violence. She is attuned to issues of diversity and inclusion and well positioned to steer Carolina's efforts with a firm and steady hand that is sensitive to all members of our campus community. In this new role, she will lead our initial efforts to improve the campus climate, ensure we have effective resources in place for students, faculty and staff who are affected by sexual harassment, discrimination or violence, and implement policies and practices that are prompt, equitable and in compliance with federal mandates including Title IX. She will report to Ann Penn, the director of our Equal Opportunity/ADA Office, and have regular communication and "dotted line" reporting to the Office of the Chancellor.

Ms. Hurt will work closely with several Deputy Title IX Coordinators across campus. We previously announced the appointment of Ew Quimbaya-Winship as Deputy Title IX Coordinator in Student Affairs. (Ew also serves as the Student Complaint Coordinator). We expect to appoint additional Deputy Title IX Coordinators in areas such as Human Resources and Athletics. These individuals will be designated from existing University personnel and will serve as an important resource to help educate, train and support campus community members.

What is Title IX?

For those of you unfamiliar with Title IX, it is a federal law that prohibits sex discrimination in educational programs and activities at most schools, colleges and universities. Title IX is commonly associated with the concept of gender equity in athletics - a goal that has supported the growth and strength of women's athletics programs. In reality, Title IX is far broader in its scope and protections, including a prohibition on sexual harassment, sexual violence and all forms of sexual misconduct.

University Involvement in Sexual Violence Cases

Under Title IX, the University (and any college or university that receives federal funding) must have a process in place for responding to allegations of sexual discrimination, harassment or sexual violence. Placing these responsibilities under the auspices of an educational institution is a sensitive subject. Many people feel that complaints of sexual violence should be handled exclusively by the police.

Let me be clear: Individuals are encouraged to report criminal behavior to local law enforcement.

However, even when local law enforcement is involved, universities are required to provide an alternative process for resolving complaints within our community. Our processes are designed to provide the affected individuals with more support and resources than they might find in the criminal justice system.

Looking Ahead

We continue to work diligently to make sure our policies, training, processes and resources are designed to best serve our students, faculty and staff. As part of that effort, we brought Gina Smith, a leading expert on sexual assault issues, to campus in February. Over the past two months, she has been a regular presence on our campus. Ms. Smith has met with numerous groups and individuals in an effort to seek feedback

from a broad cross-section of our community. Your candid responses and willingness to openly engage in frank conversation on these difficult issues has framed her understanding - and in turn, our understanding - of our challenges, strengths and campus climate so that we may best assess, revise and improve the way we respond to these issues.

In the coming weeks, Ms. Penn will appoint a task force to review student-on-student complaints of sexual harassment or discrimination, including sexual misconduct. The task force will be chaired by Ms. Hurt and will include representatives from our students, faculty, staff and community.

The task force will begin meeting next month with a goal of finishing its review and presenting recommendations before the fall semester begins in August. I want to thank the future task force members in advance for the work and time commitment they will dedicate to this important issue for our campus community.

We will continue to promote and add to the information available on this issue at our Campus Conversation About Sexual Assault website, http://campusconversation.web.unc.edu/. I especially encourage you to review the key facts/frequently asked questions article featured in this link, http://campusconversation.web.unc.edu/faq/. It details University personnel and resources available to help students in all aspects of this issue. I also want to remind you about where to find the current University policy, http://campusconversation.web.unc.edu/policy/.

As the semester draws to a close, I want you to know that we remain laser focused on addressing these issues and doing everything we can to make Carolina a safe and welcoming place for you and everyone else who calls Carolina home.

Sincerely,

Holden

Subject: 2013 Employee Forum Elections (Division 1)

April 17, 2013

Dear Frances Bridger,

Welcome to the 2013 Employee Forum elections! This message is being sent to you because you are a staff member at UNC-Chapel Hill. The annual Employee Forum elections gives you an opportunity to have a voice in shared governance and make an impact on issues affecting staff across the university.

Voting begins today and closes on Friday, April 19, 2013 at midnight. To be sure that your ballot is counted, please observe the deadline.

Candidate Information is provided within the ballot. For each vacancy, you will see the name(s) of the person running, his/her years of service and a biography (if one was provided by the candidate). On the next screen, you will be given the option to vote. You may use the back arrow to return to a previous page and the forward arrow to move to the next. You will not be able to change any of your votes once you have completed the survey and submitted your ballot.

To Vote:

Please click the link below to access your ballot. Your ballot is unique to you and may be used only once.

Employee Forum Division 1 Ballot

Or copy and paste the URL below into your internet browser:

Subject:	FORMAL NOTICE: Location changes to Murray Hall for first meeting of the Rawlings panel

---

Dear Students, Faculty and Staff:

On April 1, I sent you a campus-wide email about a meeting this Friday, April 19, that will launch the work of a distinguished panel of higher education and athletics leaders who will consider the role of athletics in campus life. The panel is chaired by Hunter Rawlings, president of the Association of American Universities.

The meeting is from 1 p.m. to 3 p.m. We have moved the location to Lecture Hall G202, Murray Hall, to better accommodate interest in this discussion. This room is located next to the brick archway where Murray Hall and Venable Hall meet. Both are part of the Carolina Physical Science Complex. Members of the campus community will have an opportunity to share public comments after invited speakers and I address the panel.

For details, please see the story on the University's homepage, www.unc.edu under Campus Updates.

Greetings!

Rates of diagnosis for ADHD in children continue to rise. This month Dr. Hallowell shares his views on whether or not ADHD is overdiagnosed. He also talks about the relationship between electronics and ADHD-like symptoms.

The Hallowells (and Orlovs) live in the Boston area. It has been a time of reflection here as we think about the senseless violence committed at the Boston Marathon. Dr. Hallowell shares his thoughts.

Finally, we are VERY excited to announce that a new Hallowell Center will be opening in the San Francisco Bay area. The center is now taking appointments that will commence May 1.

We wish you all the best this month as Spring finally unfolds.

Melissa Orlov, editor

A Note from Ned
How to Make Sense of the Boston Marathon Tragedy?

"Regarding the recent senseless and horrific tragedy..." How many times have we read those words since Columbine? Columbine wasn't the first, of course, but it did seem to mark the beginning of a string of terrors the like of which our world was not accustomed to before then but, sadly, has become all too accustomed to since.

How do we make sense of the latest terrible event, the one in my home state, in Boston, on the day of one of our most cherished, joyful, and glorious holidays? And the running of our most celebrated athletic event, the Boston Marathon?

Not knowing who committed the terrible act, or why, I am unable to make sense of any sort out of what little I know. I am, however, able to feel an avalanche of emotion, as I'm sure most everybody is. I feel anger, sorrow, fear, and bewilderment. I feel deep frustration that this kind of terror keeps on happening, like a dread drumbeat while the world lurches toward chaos and confusion. **Read More Here.**

FAQ

Q: (Excerpted from Family Circle Magazine, March 2013) My 13 year old son is an extremely bright kid who scores A's on his tests, but loses his homework assignments. I've tried everything to get him organized- nothing works. He was on ADD medication for a couple of years, but it was effective only for a while. How can he develop better skills?

A: This question is complicated because you have the everyday challenges of helping a teen get his act together combined with a possible medical issue. So I called my colleague Patty manning, director of the Kelly O'Leary Center for Autism Spectrum Disorders at Cincinnati Children's Medical Center, for some guidance. We both agree kids need a method for staying organized that they can implement at home as well as at school, like a checklist system or a chart. But she also points out that it's not uncommon for medication to appear to stop working when kids outgrow their dosage or develop a different problem that impacts their performance. Please go back to the doctor to review your son's prescription. You might also consider putting additional organizational tools in place. A great resource for new ideas is Edward Hallowell's book *Superparenting for ADD: An Innovative Approach to Raising Your Distracted Child*. - Rosalind Wiseman

Dr. Hallowell in The New York Times: ADHD Diagnosis is Handed out too Freely

Dr. Hallowell in the NY Times article on ADHD maintains that while he still thinks that many children with A.D.H.D. continue to go unrecognized and untreated, he said the high rates demonstrate how the diagnosis is being handed out too freely. **Learn More**

Webinar Overviews & Objectives

Building A Cost-Effective Online Orientation: Best Practices, Essential Components & Practical Applications
An online orientation program can be an innovative, cost-effective, and practical way of facilitating transitions into higher education for many different populations. Drawing from relevant theories to substantiate online orientation as an authentic learning environment, this webinar will highlight the utility of using online orientation for multiple institutional audiences (freshmen, transfers, parents, international students, traditional students, and non-traditional students). Presenters will provide an introduction to online orientations including relevant learning theories and best practices, as well as a preliminary planning document for use following the seminar. This session will also showcase a variety of successful online orientations that bridge populations and institutional types.
Participants will:

- Become familiar with the history and current online orientation practices
- Draw from relevant theories to substantiate online orientation as an authentic learning environment
- Identify best practices and typical components for an online orientation
- Discuss the implications for utilizing online orientation with diverse populations
- View/tour a variety of different online orientation applications
- Receive a preliminary planning document

Creating & Implementing An Online Orientation Program From The Ground Up
You know that an online orientation program is the way to go. It saves money and resources and offers an innovative service to your new students. But how do you build and launch a successful program from the ground up? This session is designed to help orientation professionals develop and implement successful online orientation programs. Participants will be guided through the implementation process and engage in dialog with other participants and experienced professionals. This webinar will also provide participants the opportunity to begin the process of creating an action plan for initiating an online orientation at their institution.
Participants will:

- Engage in a discussion of the key components of online orientation creation including goals, process and timelines, assessment and evaluation, maintenance and revision
- Be able to identify key players and collaborators specific to their institution
- Understand stakeholder buy-in
- Interact with and learn from orientation professionals who have experience with successful online orientation programs
- Create an implementation action plan

Webinar Objectives

Participants will:

Attention NODA Members!
You will receive an additional $50 discount. Please enter the NODA coupon code when registering. If you do not know the coupon code, please contact NODA at 1.866.521.NODA or noda@umn.edu

Webinar Speaker(s)

Clay Adams serves as the Assistant Dean for New Student Programs at Duke University. Clay joined the Duke family full-time in the summer of 2003 as a Residence Coordinator. He graduated from Virginia Tech with a B.A. in Interdisciplinary Studies, a B.S. in Business Management, and a M.A. Ed. in Educational Leadership and Policy Studies. Clay directs all new student transition programs including: the Student Transition Series, pre-orientation programs, orientation welcome week, communications and student group advisement. In 2008 he led a project team, which ultimately developed Duke's online orientation program known on-campus as the Summer Transition Series. Clay's research interests include: international education, student transition, higher education finance, and online education.

Jessica Hale is a faculty member in the Academic Skills department at Washtenaw Community College (Ann Arbor, Michigan) and is an educational consultant. Prior to working with transitioning students in the classroom, Jessica coordinated WCC's orientation program. In this capacity Jessica welcomed more than 15,000 students to WCC's campus and participated in the development and implementation of a successful online orientation. Jessica served as the co-chair of the Two Year College Network for the National Orientation Directors Association from 2007-11. In addition, she has presented at numerous national and international conferences on topics related to online orientation, educational technology, and transitional programming for students and parents. Jessica holds an M.A. in Higher Education from the University of Michigan and completed her Ed.D. in Educational Leadership at Eastern Michigan University.

Katie Granholm serves as the Associate Director for New Student Programs at DePaul University. In this role, Katie oversees orientation programming for incoming DePaul students. Prior to serving in this role, she worked at the University of Minnesota in New Student and Family Engagement for six years, where she collaborated with a team to streamline, enhance, and assess online orientation programming. Katie holds a M.S.Ed. from Illinois State University and has been an active NODA member, serving in a variety of leadership rolls, since 2006.

Subject: Reminder: 2013 Employee Forum Elections (Division 1)

Frances, this is a reminder to please take a minute to vote.

Voting closes at midnight. To be sure that your ballot is counted, please observe the deadline.

Candidate Information is provided within the ballot. For each vacancy, you will see the name(s) of the person running, his/her years of service and a biography (if one was provided by the candidate). On the next screen, you will be given the option to vote. You may use the back arrow to return to a previous page and the forward arrow to move to the next. You will not be able to change any of your votes once you have completed the survey and submitted your ballot.

To Vote

Please click the link below to access your ballot. Your ballot is unique to you and may be used only once.

Vote Now!

Or copy and paste the URL below into your internet browser:
https://unc.qualtrics.com/WRQualtricsSurveyEngine/?Q_SS=4YeMsjLPvpRbHOR_babAHd4uTtlYI3r&_=1

If you have technical problems accessing your ballot, please email: forum-elections@unc.edu for assistance.

Thank you in advance for your participation and support of shared governance at UNC!

You received this message because you are a staff member at UNC-Chapel Hill. The annual Employee Forum elections gives you an opportunity to have a voice in shared governance and make an impact on issues affecting staff across the university.

ATHLIFE FOUNDATION - CALL FOR PROPOSALS

The Athlife Foundation would like to extend an invitation to all N4A members to submit proposals to be presented at the 2013 Conference for Secondary Education Professionals. The Athlife Foundation has created a national platform for high schools to develop the Academic-Athletic Support profession, and to create powerful programming aimed at student-athletes to promote academic achievement, and the development of life and leadership skills.

This year's conference will be held **July 17-21 at the Sheraton Suites in Alexandria, VA**. The Washington Redskins Charitable Foundation's Coaches in the Classroom program will serve as host. We are seeking a range of presentation topics relating to academic-athletic support aimed at the high school level and beyond, **open areas for professionals to be creative** to seek relevant and topical issues that are prevalent in student-athlete development, as well as areas that can aid in the establishment of a stronger bridge from high school level professional to college level professional.

Eligibility for Submission: Any N4A member involved in academic-advising (administration, faculty, full-time advisors, and administrative staff) is invited to submit a proposal. Proposals should include your presentation title, learning objectives, and desired format (break out or topic presentation). Please include a brief abstract describing your presentation, an outline, the desired learning objectives, and any other pertinent information. Abstracts will be included in the conference program. Please limit abstracts to 125 words.

Format options: Breakout sessions, paper or topic presentations 60-75 minutes in length.

- Breakout sessions can be highly participatory sessions, and presenters should plan to include some lecture as well as possible small and large group activities, and a question and answer period. Breakout sessions should be very hands-on and issue specific with strategies and techniques that the high school staff participants can draw from to potentially incorporate into their own programs.
- Paper or topic presentations discuss current issues in academic-athletic support that will resonate with the high school profession. Some are based on research, some share best practices, and some are developmental, while others are theoretical. The format may be mostly lecture with a discussion following or a more informal discussion.

All sessions are to be proposed 60-75 minutes in length. For questions, or to submit a proposal, please contact Jeff McCann, Executive Director: jmccann@athlife.org - We will accept proposals from April 15, 2013, to May 24th, 2013. **Selected Presenters will be notified via email by the end of May 2013.** Conference registration fees will be waived for selected presenters.

Registration information for those interested in this attending this professional development opportunity will follow. The conference will have presentation topics relevant for the college level professional, and is aimed at the college level professional that has a strong desire to assist the high school professional population more formally. Learn more at www.athlife.org

Sent: Friday, April 19, 2013 2:10 PM
To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: Timely Warning: Orange County under tornado watch

Dear Students, Faculty and Staff:

The National Weather Services has issued a TORNADO WATCH IN ORANGE COUNTY.

That means conditions are favorable for tornadoes and severe thunderstorms in and close to the watch area. The weather service says people in these areas should be on the lookout for threatening weather conditions and listen for later statements and possible warnings.

Remain alert for approaching storms.

The weather service updates this information regularly, so be sure to check the National Weather Service website listing the current status of watches, warnings or advisories for Orange County at http://alerts.weather.gov/cap/wwaatmget.php?x=NCC135.

The University will not send additional text, email or other notifications to the campus community about a tornado watch since the status of those often change frequently during a weather event. If a new weather pattern enters the area that prompts a fresh watch after a 24-hour period, the University plans to reissue the watch notice as part of ongoing monitoring efforts for potential serious weather conditions.

If the weather service issues a tornado warning for Chapel Hill and Carrboro, the University will activate the emergency sirens. A tornado warning means that a tornado has been spotted, or that radar indicates a thunderstorm circulation that can spawn a tornado, according to the National Weather Service. The University will activate the sirens for a significant emergency or immediate health or safety threat, send a text message to registered cell phones and start other notifications including campus email.

For more information refer to http://www.alertcarolina.unc.edu/go/doc/1395/1075683/About-Tornado-Warnings-and-Watches

ABOUT THIS EMAIL: Campus-wide email is not an instant source of information as part of the University's timely warning notification process. Text messages sent to registered cell phone users are the fastest way for the University to notify you. That's why email messages like this one will always include a timestamp to indicate when the message was sent. The University's Emergency Notification System is activated using a strategy that is based on redundancy, using multiple methods to communicate. The best, most up-to-date source of information will always be the Alert Carolina website, http://alertcarolina.unc.edu.

- When parents are too hands-on
- How a Difficult Parents Look From the Counselor's Side of the Desk
- John Byrne's Aggression Management program

Webinar Overview

Parents worry. Some are concerned about their children's relationships, academic stand, or living arrangements. And some parents bring their concerns to bear when speaking with faculty members - sometimes at the top of their lungs. So what should you do? Brian Van Brunt, Ed.D., suggests that you see this type of situation as a "teachable moment" for the parent.

As advocates for their college-aged students, some parents resort to pushy, demanding or downright aggressive behavior. These so-called "helicopter parents" can be the stuff of legend around the water cooler, but they also take a toll on morale and productivity.

In this webinar, we will:

- Learn about the costs associated with taking a "hard line" approach with overprotective and aggressive parents in efforts to shift them away from these behaviors.
- Learn practical skills and theories and review case examples of how parents engage in pushy, needy and aggressive behavior.
- Learn the art of referral and redirection as a way to manage aggressive and overly involved parents.
- Receive a guide for addressing the top 20 parent concerns, suitable to use for training. Each example uses natural language, and offers suggestions of alternative explanations and answers to parents' questions and demands.

Webinar Objectives

Participants will:

- Learn what drives these particular parents to act this way
- Think about why and how parents may have been rewarded for aggressive behavior in the past
- Understand why a hardline response doesn't work
- Receive a practical list of do's and don'ts when working with parents who are frustrated and aggressive
- Review motivational interviewing, Rationale Emotive Behavioral Therapy (REBT), and the art of persuasion from aggression management
- Receive a primer in the techniques of referral and redirection-effective ways to respond to insistent, over-involved parents
- Review a list of 10 best practice concepts, including a sample staff policy statement
- Receive a guide for addressing the top 20 parent concerns, suitable to use for training. Each example uses natural language, and offers suggestions of alternative explanations and answers to parents' questions and demands

Webinar Speaker(s)

Dr. Brian Van Brunt , past president of the American College Counseling Association, is Senior Vice President for Professional Development Programs at the National Center for Higher Education Risk Management (NHCERM, www.ncherm.org). He is the president-elect of the National Behavioral Intervention Team Association (NaBITA, www.nabita.org), current president of the School and College Organization for Prevention Educators (SCOPE, www.wearescope.org) and the managing editor for Student Affairs eNews (SAeN, www.studentaffairsenews.com). Over the past thirteen years Brian has taught counseling theory, ethics, program evaluation, statistics and sociology topics at both public and private schools for both graduate and undergraduate students at five different colleges and universities. Brian has served as the director of

Subject:	FORMAL NOTICE: Administrative Review of

FROM: Carol Tresolini, Associate Provost for Academic Initiatives

April 18, 2013

RE: Administrative Review of

On behalf of the committee appointed to review the performance of I am pleased to invite your participation in the review process.

The committee is being chaired by Peter White, Chair, Director, NC Botanical Garden. Other members include Katharine Lee Reid, Ackland National Advisory Board member, Terry Rhodes, Senior Associate Dean for the Arts and Humanities and Professor of Music, Bernie Herman, Chair and Professor, American Studies, Lyneise Williams, Associate Professor, Art and Gordon Merklein, Executive Director of Real Estate Development.

As required by University regulations, the Provost has requested a review of performance as over the last five years. Areas for review include vision, long-range planning, day-to-day management of the Center, and leadership in actualizing the ideals and goals of the Center. The committee invites your comments on these and related issues. It is important for the committee to learn how her performance as director is viewed by students, staff, and faculty at UNC-Chapel Hill.

We encourage you to contribute to this review in the following different ways:

1. The committee has scheduled an open session to receive comments.

May 3 - 2:00-4:00 - 104-D South Building

If you wish to meet with the committee, please contact Debbie Stevenson in the Office of the Executive Vice Chancellor and Provost (debbie_stevenson@unc.edu or 962-7882), and she will schedule a specific time (usually about 10-15 minutes) within that time period.

All requests should be received no later than April 29, 2013.

Note that while all comments during these sessions will be kept strictly confidential, a master list of attendees will be kept as part of personnel file.

2. You may provide written comments to the chair or other committee members. The review committee will treat your comments as strictly confidential. By law, all written communication - whether on paper or by email - becomes a confidential part of personnel file. As such, comments are open to examination by her. University regulations prohibit considerations of anonymous letters in the review process. All written comments should be sent to: Dr. Peter White, c/o Debbie Stevenson, 104 South Building, CB # 3000, or by emailing debbie_stevenson@unc.edu

3. You may telephone or meet privately in person with committee members. Oral communications (by telephone or in person) and the committee's notes generated from these conversations do not become part of personnel file but may be reflected in the committee's report without identifiers.

The deadline for submitting comments regarding performance to the committee is May 17, 2013.
Thank you very much for your help in this important task.

Plagiarism Education Week

YOUR GUIDE TO PLAGIARISM EDUCATION WEEK APRIL 22nd - 26th

Turnitin is partnering with premier experts, educators, and organizations to bring you a full week of plagiarism education and awareness. Our goal is to help educators foster an understanding among their students that *Originality Matters*.

Each day, we'll have a new live webcast progressively covering key topics on plagiarism education and academic integrity. All webcasts will be available live and on-demand shortly afterwards.

Special thanks to the sponsors of Plagiarism Education Week:

The International Center for Academic Integrity | PT PlagiarismToday | see

Monday, April 22: Causes of Plagiarism

Plagiarism and cheating among students occur for a variety of specific reasons - you've likely come across more than a few by now. But at the core, plagiarism breaks down to three root motivations according to educational psychologist, Jason Stephens - students are *under pressure*, *under-interested*, or *unable*.

Jason Stephens, Educational Psychologist at University of Connecticut

REGISTER

Tuesday, April 23: Types of Plagiarism

From a forgotten footnote to wholesale copy-and-pasting, plagiarism rears its head in a variety of forms and with varied intent. It is important to identify and understand the various types of plagiarism, knowing that it's never black and white but a spectrum.

Webcast: Plagiarism Spectrum Drill Down
Renee Swensen, Professor of English at Saddleback College

REGISTER

Wednesday, April 24: Responses to Plagiarism

Most instructors seem to respond to plagiarism in their own way that typically can include elements of education, sanctions, and at times ignorance. With appropriate response to the type and intent of the act, and in being considerate and consistent with academic policies, instructors can be more successful in addressing plagiarism.

Webcast: Responding to Plagiarism: Lesson Plans and Strategies

Lynn Lampert, Chair of Reference & Instructional Services at California State University Northridge

REGISTER

Thursday, April 25: Approaches to Plagiarism

Programmatically addressing plagiarism education and its consequences is important in presenting a unified message and process across the school or institution.

Webcast: Policy to Practice: Developing Effective Academic Integrity Policies

Teddi Fishman, Director at International Center for Academic Integrity

REGISTER

Friday, April 26: Originality and Creativity

Originality and creativity go hand-in-hand. While originality consists of the production of new ideas, creativity is the useful and worthwhile application of these new ideas. On Friday, we'll explore this concept of originality and creativity, and to that end we'll announce the winner of the "Originality Matters" poster contest.

Webcast: Teaching Originality, Creativity, and Critical Thinking

Kelly McBride, Senior Faculty, Ethics, Reporting and Writing at Poynter

REGISTER

How Can I Get Involved?

There are many ways for you to participate in raising awareness for plagiarism education among your colleagues and students this week and throughout the year. Here are a few:

1. Join a live or on-demand webinar above.
2. Share Plagiarism Education Week with your friends and colleagues on Facebook, Twitter, Google+, or your blog. We're using the hashtag #PlagEdWeek
3. Voice your thoughts and opinions on the Turnitin Blog. Throughout this week we're highlighting blog posts specifically around each day's theme.
4. Send us your story - whether it's a story of challenge, triumph, frustration, or joy - you've no doubt experienced a pivotal plagiarism problem. Simply email us at PEW@turnitin.com and be sure to include your name, title, school and 2-3 sentences about yourself.
5. Take 5 minutes in your classes to talk to your students about your expectations of citation and original work.

Subject: [cccs_staffusers] Solution to ConnectCarolina menu display issues -- browser compatibility mode
Attach: Compatibility View Issue.pdf

Good morning. As you may be aware, there was an upgrade to ConnectCarolina over the weekend. There have been reports this morning of some problems with menus appearing, particularly in Faculty Center. It appears that this is an issue involving Internet Explorer (version 9) and the need to use compatibility mode.

If you are using IE9, you must be in compatibility mode. You can click on the compatibility mode button from your tool bar, or go to Tools, and click compatibility mode. A brief tutorial is attached. The University Registrar also has tips and tutorials on browser configuration for ConnectCarolina: http://registrar.unc.edu/training/document-repository/browser-basics/

Here are some tips for other issues you may encounter as a result of the upgrade: http://ccinfo.unc.edu/possible-issues-after-march-upgrade/?doing_wp_cron=1366638501.8569350242614746093750

If you have any problems with ConnectCarolina, please submit a ticket at help.unc.edu or call the Help Desk at 919-962-HELP. Thank you.

Compatibility View Issue

Monday, April 22, 2013
8:46 AM

When you log into ConnectCarolina with Internet Explorer, you are not able to get past the following screen.

To resolve this issue, you have to turn on compatibility view.

Go to the following menu through the tools option.

Turn compatibility mode on by adding unc.edu to the list of those that will come up using compatibility mode.

Your screen will look like this.

Click Close and close your browser.

Try again.

'Redshirt' Chemistry Students Score Big

First-year students with less science experience get boost from introductory chemistry class

March 27, 2013 | *Ashley Yeager*

print |

ARTICLE

Instructor Dorian Canelas works with a student in her introductory chemistry class. Credit: Miguel Bordo, Duke Media Services.

DURHAM, NC - Quarterback Johnny Manziel "redshirted" his first year at Texas A&M, delaying his playing time by one year while he got the hang of the college game. The next year, he took home the 2012 Heisman Trophy.

Duke senior Eduardo Pascual isn't that much different than Manziel in some ways.

Pascual was a "redshirt" in chemistry his first semester at Duke. He took an extra, introductory chemistry course, which he said gave him the skills and confidence to spend his first year after graduation in a research lab at a New York hospital and then apply to medical school.

Subject: FORMAL NOTICE: Change in EPA Non-Faculty Categories for Admissions and Financial Aid Positions

---

To: Deans, Directors, and Department Heads

From: Brenda R. Malone, Vice Chancellor for Human Resources

Over the last several years, UNC General Administration (GA) has been working closely with individual system campuses, including UNC-Chapel Hill, to review how certain EPA Non-Faculty positions in the areas of admissions and financial aid are categorized in our EPA Non-Faculty personnel system.

In an effort to reduce the number of EPA Non-Faculty Senior Academic and Administrative Officers (SAAO), most positions having involvement in admissions and financial aid administration and decision-making have been be re-categorized by GA as EPA Research, Instructional, and Public Service positions instead of SAAO Tier II positions.

GA made these changes effective January 1, 2013, and has asked the campuses to reflect these changes formally in their personnel systems and reporting no later than April. Accordingly, your School/Division HR Officer is notifying affected employees by letter, and the EPA non-faculty categories of these positions will be updated by the Office of Human Resources in EPAWeb. You do not need to take any action regarding this change.

Individual employee terms and conditions of employment are *not* affected by this change. There is *no* effect regarding compensation, benefits, leave eligibility, or policies governing termination, disciplinary action, or grievance rights. The letters notifying employees of this change emphasize the above points. These changes primarily relate to campus HR reporting.

We wanted to make all department heads aware of this change and the notifications that will be made to impacted employees.

If you have any questions about this change, please feel free to contact your School/Division HR Officer or the OHR EPA Non-Faculty Human Resources Office at (919) 962-2897.

TUDOR TCS COLLEGIATE STRATEGIES

College Recruiting Weekly

April 23, 2013 Volume 9, Issue 17

Should You Use Assimilation or Differentiation, Beth?

All of us have the need to be included in a group.

Your prospects are no different.

It all goes back to our primary need for **two basic psychological drives**: Assimilation and differentiation.

Assimilation is our basic longing to be included in a group, while differentiation is the pleasure we derive from being "set apart" as special. Both are important for coaches to keep in mind as they are recruiting.

So, let me ask you a question:

How are you incorporating those two basic psychological principles in your recruiting strategy?

Most coaches aren't. And those that are usually do so by mistake...getting great results, but not quite sure why.

So, I wanted to share some of the reasons incorporating answers to your recruit's basic psychological need to be included, or set apart, are so effective in getting them to take a serious look at you and your program.

Here are three fairly common recruiting scenarios, and how this strategy can work to help overcome an obstacle you might be facing with a future prospect…

Former College Coach Ready to Teach Recruiting Lessons at 2013 NCRC

Among the line-up of coaches and experts slated to speak at the **National Collegiate Recruiting Conference**, John Brubaker is unique.

He's a former college lacrosse coach who left the profession and **successfully reinvented himself** as a rising motivational speaker, business and sales consultant. Now, he adds the title of author of his second book...one that will resonate with attendees to this Summer's NCRC, he says.

"When I began my first job as an assistant coach in 1996, my head coach sent me to visit what he called The Three Wise Men", says Brubaker. "They were a Marine Corps recruiter, the CEO of a multi-media corporation and a preacher. I spent three days interviewing and learning from each of these wise men and I learned that the best ideas you get as a coach come from outside your own industry (athletics). Life is the curriculum and everyone has a lesson to teach." Brubaker's latest book, The Seeds of Success, focuses on that story - and the lessons for college coaches that followed...

The Early Bird Gets the Worm

by Ellen Sawin,
NCSA Athletic Recruiting

This mantra seems to be taking over the world of collegiate athletics.

Many coaches from the nation's top teams have started offering scholarships to athletes who haven't even started high school yet. Just this past summer, LSU offered a scholarship to Dylan Moses, a football player who hadn't even started the 8th grade. As the best Division I programs begin offering scholarships to middle school athletes, coaches at other levels will no doubt feel the need to follow suit and start offering their recruits at earlier times, as well.

With the advanced recruiting timeline, coaches will be scouting and communicating with more players all at once than they have in the past. After all, coaches can't simply ignore the athletes that have given verbal commitments, no matter what their age is. Working with more student-athletes at a time, requires more time and money from teams.

And as many schools have tighter recruiting budgets than 5 years ago, this presents a serious problem. So, how can motivated, competitive college coaches recruit more athletes, at younger ages, without breaking your bank (or the rules)? Here are several ideas we see working for coaches around the country...

The Tricky Task of "De-Recruiting"

by Pat Dooley, Gainesville Sun

He was like so many before him and who have come after his career ended.

He was a big-time recruit who had all kinds of stars and power ratings next to his name. He was recruited with pats on the back and warm smiles.

And then he showed up.

"The love affair definitely ends when you step on campus."

That is Kevin Carter, the former All-American at Florida, speaking about the culture shock that so many athletes face when they go from recruited star to one of the pack. High school athletes are wooed and romanced by college coaches in all sports, some to obscene levels.

But then comes the reality of being coached hard and not being far and away the best player on the field or court.

"Everybody goes through it," former Duke star and ESPN analyst Jay Bilas said. "You have to be able to take criticism. It comes faster and it can be harsh. You're held accountable for things that you weren't held accountable for in high school.

"In high school, you don't have to play every possession."

College coaches refer to it as "de-recruiting." After spending years building an athlete up in an effort to bring him to your school, you almost have to break him or her down once practices begin...

Two-Part Video Webinar Training: The New NCAA Contact Rules

The new NCAA contact rules that are going into effect will drastically change how a coach and their program are able to recruit.

To be blunt, it could be a game changer.

To help with the transition, we've issued a two-part training session through our educational partner at **NCSA Athletic Recruiting** that outlines what the new rules mean, and how to come-up with a plan for succeeding in this brave new world of recruiting communication.

Take time to watch each of these training sessions, Coach. We think you'll really get a better understanding of what you need to do to be successful moving forward.

Subject: Re: Various Names for SI
Attach: Final_SI_SanDiego_May2012.pdf

Fresno City College coined the name Extending the Class (ETC) about five years ago. There was some concern on my campus about using the term Supplemental Instruction since there are some related terms in the California Community College regulations.
After a semester or two of traditional SI, we modified our program, which coincided with the name change. Last year I presented on ETC at the SI conference in San Diego. See attached PPT which highlights the distinguishing characteristics of ETC.

ray.sanchez@fresnocitycollege.edu

What is SI?

→ Definition:
→ Purpose:
→ Participants:

How much is too much?

Ten (plus one) Essential Components

1. Targets subjects not students (high-risk classes, not high-risk students)
2. Program is evaluated
3. Regularly scheduled sessions
4. SI Leaders receive training
5. SI sessions are peer-facilitated
6. SI sessions integrate study skills and content
7. SI sessions are collaborative/cooperative, involve active learning & group activities
8. Faculty engaged and supportive
9. SI program is supervised
10. SI Leader attends targeted class lectures/labs
11. SI Leaders serve as model students

More?

Which of These are Non-Negotiable?

1. Targets subjects not students
2. Program is evaluated
3. Regularly scheduled sessions
4. SI Leaders receive training
5. SI sessions are peer-facilitated
6. SI sessions integrate study skills and content
7. SI sessions are collaborative/cooperative, involve active learning & group activities
8. Faculty engaged and supportive
9. SI program is supervised
10. SI Leaders attend targeted class lectures/labs
11. SI Leaders serve as model students

12. Institutional support
13. SI Leaders are faculty recommended
14. SI Leaders have passed course
15. SI sessions are voluntary
16. SI Leader has (paid?) planning time

Which of These are Non-Negotiable?

1. Targets subjects not students
2. Program is evaluated
3. Regularly scheduled sessions
4. SI Leaders receive training
5. SI sessions are peer-facilitated
6. SI sessions integrate study skills and content
7. SI sessions are collaborative/cooperative, involve active learning & group activities

14. SI Leaders have passed course
15. SI sessions are voluntary
16. SI Leaders have planning time

Semester	Number of Instructors	Number of Sections	FTC Student Attendance	Contact Hours	Visits
Spring 2007	7	8	61	146.92	136
Fall 2007	6	12	78	198.15	195
Spring 2008	8	18	143	831.78	706
Fall 2008	8	22	386	2486	3081
Spring 2009	10	16	466	4335.87	3458
Fall 2009	6	14	275	2383.5	1832
Spring 2010	11	22	465	5315.3	3850
Fall 2010	10	29	510	4856.9	3900
Spring 2011	9	23	686	6358.37	5595
Fall 2011	10	25	674	6857.82	6732
Spring 2012	15	45	1160	9901	8696

Semester	Number of Instructors	Number of Sections	ETC Student Attendance	Contact Hours	Visits
Fall 2011	10	25	674	6857.82	6732

Fall 2011

There were 9 course sections in the Social Sciences Division: Sociology 1A, Political Science 2, and Psychology 2. There were 14 course sections in the Math, Science, and Engineering Division: Math 101, Math 103, Math 4A, Chemistry, and Biology 5. There were 2 course sections in Fine and Performing Arts Division: Art 2.

The total final graded enrollment for these courses was 1,720 with 674 students (39%) participating in the ETC program.

Four Categories

1. Key People & Roles (Leader, Supervisor, Students, Faculty Member)

#4 – SI Leaders receive training | #5 – SI sessions are peer-facilitated

#6 – SI sessions integrate study skills and content | #7 – SI sessions are collaborative/cooperative, involve active learning & group activities

#8 – Faculty engaged and supportive | #9 – SI program is supervised

#10 – SI Leaders attend targeted class lectures/labs | #11 – SI Leaders serve as model students

2. Course & Class Selection

#1 – Targets subjects not students (high-risk classes, not high-risk students)

3. Evaluation and Reporting

#2 – Program is evaluated

4. Review Session Focus & Dynamics

#3 – Regularly scheduled sessions | #4 – SI Leaders receive training

#5 – SI sessions are peer-facilitated | #6 – SI sessions integrate study skills and content

#7 – SI sessions are collaborative/cooperative, involve active learning & group activities

#11 – SI Leaders serve as model students

<u>CAN'T</u> MODIFY:

1. Targets subjects, not students
2. Program is evaluated
4. SI Leaders receive training
5. SI sessions are peer-facilitated
6. SI sessions integrate study skills and content
8. Faculty engaged and supportive
9. SI program is supervised

12. *Institutional support*
13. *SI Leaders are faculty recommended*
14. *SI Leaders have passed course*
16. *SI Leaders have planning time*

CAN MODIFY:

3. Regularly scheduled sessions

But allow for drop-in, not simply 50-minute structured sessions

7. SI sessions are collaborative

Allow for occasional presentation without smaller groupings, unique session strategies, or major activities.

10. SI Leaders attend targeted class

Every class meeting?

11. SI Leaders are model students

But more than a model in the classroom with the instructor

15. SI sessions are voluntary

Extra credit?

3. SI Sessions are Regularly Scheduled

--How do you define “sessions”?
50 minutes? Can’t come late?
Open entry, open exit?

7. SI sessions are collaborative ...

A. **Groupings** (clusters, think-pair-share, assigned discussion leader)

B. **Session Strategies** (matrix, one-minute quiz, mapping, lecture review, flip charts, time lines, muddiest point)

C. **Major Activities** (jeopardy, essay prep, text quest, carousel, lecture note reviews)

10. SI Leaders attend targeted class

--But every class? Why or why not?

Number of weekly hours (per section):

Review Session Time :

- Lecture/Lab = 4 hours
- LGI = 5 hours
- Non-LGI = 3 hours

Prep = 1 hour

Instructor Meeting= 1 hour

In Class = 1 hour per each section

11. SI Leaders are Model Students

15. SI sessions are voluntary

--extra credit, SLA – Structured Learning Assistance
--instructors don’t know who is attending (in traditional SI)

ETC at Fresno City College

Snapshot of Change

	Pilot - Spring 2007	Current Program
Leader Weekly Hrs.	Varied Wasn't Random, Wasn't Fixed	Specific Criteria for Number of Hours
Sections	One Section. One Year into the Program we Encouraged up to Two Sections	All Sections of the Same Course Taught by the Same Instructor (as many sections as possible)
Training	Beginning of Semester	Prior to Semester & Ongoing
Attendance	Log Sheets	TutorTrac; Now using SARS
In-Class Presentation	First Week of School	Throughout Semester (even ETC sessions in class)
Assessment	Leader Observations, Survey Students in supported courses, Instructor Survey, Grade Sheets	
Data Collection	Attendance, Grade Sheets, Baseline Data	Trend Analysis, Statistical Analysis

Snapshot of Course Selection Criteria

Available Funding

Tutorial Center

External Funding (e.g. Division Sponsored)

Statistical Measure

40% or higher rate of unsuccessful completion (D/F final grade)

Instructor Course Load

Instructor Works Collaboratively with the ETC Program

Minimum of 2 courses taught within a semester

Additional Criteria (one needed)

30% or higher Withdrawal

LGI

1st in a sequence

Meets: GE, CSU Transfer Req.

Basic Skills

Original Course Selection Criteria

Spring 2007 – Spring 2010

Sociology 1A

- 10 Sections
- 1,157 Total Enrollment
- 300 ETC Participants

Math 101

- 10 Sections
- 421 Total Enrollment
- 175 ETC Participants

Political Science 2

- 12 Sections
- 1601 Total Enrollment
- 572 ETC Participants

Project Measure #1

70% of ETC students successfully complete the class

** Baseline data was retrieved from the SCCCD Department of Institutional Research Website (http://ir.scccd.com/)*

Project Measure #3

15 percent increase ETC to baseline comparison

** Baseline data was retrieved from the SCCCD Department of Institutional Research Website (http://ir.scccd.com/)*

  - How can peer advising help with retention?

Webinar Overview

Institutions across the country have struggled to create initiatives that lead to increased retention rates for students on probation. This webinar will focus on two initiatives at the University of South Carolina-one focused on individual advising and the other on a special section of University 101-that empower students to achieve good standing. The first is a programmatic initiative that helps students on probation and/or financial aid probation to devise and implement an academic plan for success. The Academic Centers for Excellence (ACE) employ graduate students to serve as academic coaches for students experiencing academic difficulty. Participants will learn how ACE coaches translate the Appreciative Advising theory to practice.

In addition, participants will discover how a special section of University 101 was created for students who had failed University 101 the previous semester and/or students who were on academic probation. We will review how the six phases of Appreciative Advising were infused throughout the curriculum and intentionally embedded into the design of the course.

Webinar Objectives

Participants will:

- Understand the theoretical infrastructure behind Appreciative Advising
- Review the six phases of Appreciative Advising: Disarm, Discover, Dream, Design, Deliver, and Don't Settle
- Learn how to infuse the six phases of Appreciative Advising into one-on-one meetings with students on probation as well as in a University 101 setting
- Explore how Academic Centers for Excellence (ACE) coaches use Appreciative Advising in practice
- Receive suggestions about how to start either or both of these Appreciative Advising-inspired initiatives at their own campuses

Webinar Speaker(s)

"The six phases of Appreciative Advising can be easily adapted in curricular and co-curricular settings to help increase the retention rates for students on probation."
~ Jennifer Bloom and Claire Robinson

Jennifer Bloom is a Clinical Professor and Director of the Master's degree program in the Higher Education & Student Affairs Program housed in the Department of Educational Leadership and Policies at the University of South Carolina. Prior to her appointment at the University of South Carolina in August 2007, she served as the Associate Dean for Student Affairs & the Medical Scholars Program at the University of Illinois College of Medicine at Urbana-Champaign. She earned her doctorate in Higher Education Administration from the University of Illinois at Urbana-Champaign in 1995.
Dr. Bloom served as the 2007-08 President of the National Academic Advising Association (NACADA). She received the NACADA Outstanding Advising Administrator Award in 2005 and University of Illinois' Campus Academic Professional Excellence Award in 2007.
Dr. Bloom has co-authored four books. The first book, Career Aspirations & Expeditions: Advancing Your Career in Higher Education Administration, was released in 2003 and co-authored by Nancy Archer-Martin. The second book, The Appreciative Advising Revolution, was released earlier in September 2008 and is co-authored by Bryant Hutson and Ye He. The third is co-authored with Bryant Hutson, Ye He, and Claire Robinson and it is titled Appreciative College Instruction: Becoming a Force for Positive Change in the Student Success Courses (2011). The fourth was released in 2012 and is titled Increasing Persistence: Research-based Strategies for College Student Success. The co-authors are Wes Habley and Steve Robbins. Her research interests include appreciative advising, academic advising, career paths in higher education administration, leadership, and change management.

Claire Robinson serves as the Associate Director of the Student Success Center (SSC) at the University of South Carolina. In her role, she oversees several academic support programs including tutoring, the student success call center, and academic recovery initiatives. In addition, Claire coordinates the unit's planning and performance document-the Blueprint for Strategic Excellence. She has been a member of the university's Planning, Assessment, and Innovation Council since 2009 and works with various units across the Division of Student Affairs and Academic Support to assist in their strategic planning and assessment. Claire has directed the academic success coaching program since 2007. Using the Appreciative Advising framework, Claire trains graduate students who serve as academic coaching offering individualized student support on campus. She has consulted at several institutions on academic success coaching, succeeded in getting the ACE program CRLA level-three certified, and awarded program winner of a NASPA Excellence Bronze Award in academic support. Claire has written articles on academic coaching, appreciative advising, and co-authored the book Appreciative College Instruction: Becoming a Force for Positive Change in Student Success Courses. She also previously taught an academic recovery course and currently teaches a section of a freshmen seminar course.

Webinar Overviews & Objectives

Exceptional Front-Line Customer Service In Higher Ed
How do you define customer service? We may all define this differently, but there are basic principles and proven tips and techniques that can assist front-line staff in providing exceptional customer service to our students and their families. This session will provide participants an overview of different philosophies of customer service and why exceptional service is critical for institutions of higher education. How do our customers (our students and their families) want to be treated? What makes serving students in higher education unique? How do we know if we are living up to their customer service expectations? Learn about methods of benchmarking and setting customer service standards, as well how to evaluate your customers in order to assess the level of customer satisfaction. Explore techniques that can help you develop positive customer relationships with your students and get motivated and geared up with your staff to provide the exceptional service your students deserve.

Objectives:
Participants will learn more about:

- Customer service principles, tips and techniques that help provide exceptional service
- Benchmarking and setting service standards
- Methods of evaluating customers and assessing customer service satisfaction levels
- Motivating and preparing customer service staff for success

Exceptional Customer Service: A Training For Student Employees
Training student employees on the importance of providing excellent customer service is essential to any department. This workshop will outline the basic principles of excellent customer service and demonstrate how students can apply these principles to their current role as student employees. The speaker will explain how student employees fit into the mission and goals of the institution and walk students through appropriate and inappropriate behaviors. She will also explain how students can use the skills they learn on the job to help them succeed professionally outside of school. This training is intended for student employees, however, administrators who supervise student employees may also find it useful.

This workshop will address how to:

- Deal with difficult customers
- Incorporate the service model
- Recognize the importance of the student employee role
- Practice respect for yourselves and your customers
- Exhibit restraint when dealing with difficult people
- Understand the positive use of policy and rules
- Dress for the job
- Network and ask for help
- Embrace school pride

Objectives:
Student workers will learn:

Webinar Speaker(s)

Julie Selander has worked in higher education administration and finance for over 25 years. Her experience includes student loan servicing operations, tuition payment plan sales and marketing, organizational leadership, as well as various management positions in higher education student services including student accounts receivable, billing, collections, financial aid, and customer service.
Julie is the director of the One Stop Student Services Office at the University of Minnesota providing seamless and integrated student services in the areas of enrollment, registration, financial aid, billing, student accounts receivable, and student veterans services. Twenty-seven One Stop Counselors across three campus locations provide service via phone, e-mail, and in-person for over 51,000 students on the Twin Cities campus.
Julie presents frequently on various topics related to higher education student services and has written several articles for publication, including NACUBO's *Student Centered Financial Services: Innovations That Succeed*.

Bitsy Cohnis the Director of Learning Opportunity Center Services at Front Range Community College in Fort Collins, Colorado and an adjunct faculty member in the Developmental Studies Department. She holds a BA in English with Minors in Linguistics and Theatre Arts and is currently pursuing a Master's of Science degree in Organizational Leadership. Over the course of a 20-year career in Community College student affairs, teaching, tutoring and administration, she has become expert in customer service, student development, conflict management, post-secondary disability services, faculty training and development, at-risk retention strategies and at teaching all of the various tips, tricks, tools, and magic spells students need for academic success.

  - How to get faculty involved in retention?
  - Who should be on a retention committee?
  - What is your best kept retention secret?

Webinar Overview

Early intervention is critical to campus retention efforts. Early alert systems offer institutions systematic approaches to identifying and intervening with students exhibiting at-risk behaviors before the behaviors reach the acute stage. Many of these systems rely on a common format for student referral to a central receiving point. Systems at larger institutions use web-based technology to allow for a scalable approach to at-risk intervention. This presentation describes the development, implementation, and assessment of a web-based, fully integrated early alert referral system at a large, public university in the Southwest.
There are three sections to this webinar. First, we will review the development of the system from a conceptual perspective. This section includes how administrative, faculty, and student service input guided development. The second section details the technical aspects of system design, presented from the end-user perspective. We will emphasize the integration of the system into the campus student information system and conclude with a thorough description of the first term's experience implementing the system, including aggregated descriptive data for those using the system, the students referred, and the follow-up to the referrals. There will be ample opportunity for discussion of all aspects of the early alert project.

Webinar Objectives

Participants will:

- Engage in an audience-centered webinar that will explore the development of an early alert system
- Review the role early intervention plays in an overall student retention program
- Discuss the importance of faculty engagement at the design and testing stage of an early alert system
- Examine the essentials of integrating the early alert system with the student information system
- Consider training issues for faculty and student services staff
- Identify issues central to assessing the student retention outcomes the system supports
- Develop an awareness of the various applications of an early alert system
- Trace the growth and usage patterns through three years of system use
- Examine possible reservations about or challenges involved in the development and implementation of an early alert system
- Respond critically to the session's content and consider a possible action plan and timeline for developing a system at their home campus

LORMAN®
EDUCATION SERVICES

Dear Colleague,

Want to get away from the office for a couple of days?

Join your Human Resource peers in North Charleston, SC on **Thursday, May 9th** and **Friday, May 10th** from 9:00am-4:30pm for the **HR Compliance Roadmap: From Hiring Through Termination in 2013** seminar hosted by Lorman Education Services.

Register to Reserve Your Seat Today

Benefits for YOU:

- Prevent claims from the beginning – learn the right way to hire
- Avoid disability lawsuits by knowing exactly who the amended ADA covers
- Protect yourself and your company with up-to-date discrimination and harassment policies
- Stop pay claims before they start– keep your wage and hour policies in line with the law
- Click here to learn more

Earn Continuing Education Credits:
This program has been approved for 12.0 recertification credit hours toward general recertification through the HR Certification Institute.

Learn more about all the credits offered with this seminar and registration details here.

Why choose Lorman Education Services?
Lorman seminars have kept businesses, and the professionals who serve them, current in the rapidly changing regulatory environment for more than 25 years. We understand your need for concise, accurate and timely information. That understanding underlies each Lorman seminar. Lorman seminars provide you current information on the rules, regulations and best practices that impact the success of your business or the business of your clients. Our speakers are leading professionals who work daily on the subjects they address.

Sincerely,
Angie Slupe

Subject: Professional Development/Simon Silva
Attach: Testimonials.docx

Hello,

I'd like to introduce you to Mr. Silva's workshop which he has been doing around the country with different student programs
(LEAP, GEAR UP, HEP, 21st Century, CAMP, etc).

This is a fantastic workshop that can be done as part of a first year orientation session or as a professional development
workshop.

You'll find an attachment with testimonials from several places which have hosted the workshop with Mr. Silva.

If you have any questions please feel free to contact us via email or by phone at: (909) 260-8086

Thank you for your time.

Sincerely,

Francisco X. Silva

"I had the pleasure of hearing Simon Silva speak at the Washington Art Education Association (WAEA) Conference. It was an early evening keynote, and one that inspired, captivated, and stunned all in attendance with the story and images of Simon Silva's life, presented by the author and artist."
- AnneRene Joseph, Office of Superintendent of Public Instruction Arts Program Supervisor, WA State (2001-2011)

Professional Development:

This highly interactive workshop demonstrates how to use the arts on a daily basis, to enhance a child's creativity, communication skills, social, cognitive and developmental skills, while promoting positive self-esteem. In addition, students will find hidden talents and help in chipping away at the fear and doubt that has accumulated over the years. Teachers will practice methods of using the arts: drawing, design and be able to integrate these into their curriculum.

Parent Engagement Seminars:

This workshop will give parents important demonstrations of how creativity can be used to develop and nurture language and literacy skills, as well as promote cultural diversity and positive self-esteem. Mr. Silva willmodel how to use creativity to enhance early childhood learning skills. This workshop will help parents and students find fresh perspectives and new ideas to help meet the demands they will be facing in the future. This includes abetter understanding the role of culture, the arts and creativity play in finding hidden talents and making choices that will affect their future. The nurturing of curiosity and inventiveness will in fact lead them to become lifelong learners.

School Assemblies:

The Arts (creativity) is an exceptional learning tool! Creativity promotes every important aspect of a child's development. It sparks and enhances language, listening and cognitive skills, as well as motor and coordination skills. Creativity allows children the ability to learn faster and more effectively, especially when thinking, drawing and design are combined. Unlike formal teaching modalities, creativity is a non-threatening mode of learning, and skill retention is very high.
In his presentation, Simon Silva uses his art and his experiences to motivate students to fulfill their dreams. This personal presentation, in English and Spanish, will show how determination and the arts can be used as a vehicle to reaching their dreams, even when faced with countless obstacles.

Evening or Weekend Family Creative Workshop:

This workshop focuses on helping students and parents discover or rediscover, their creativity and expressing that creativity in various forms. Working under the guidance of world-renowned painter and author, Simon Silva, students and parents will learn various techniques and models to convey ideas, thoughts, and emotions through the use of traditional and modern art venues. The delivery model employs lecture and demonstrations to establish the required theoretical frameworks needed by students, and then employs a hands-on approach where students andparents put such theories into practice by having them create their own works of art. In this workshop parents and students will make meaningful and personal connections with their ideas, their work and each other.

Biography:

www.simonsilva.com

Simon Silva is a well-known artist, author and speaker who travels around the country to do presentations for educators, students, parents and business people. He knows firsthand the importance of education and it the only person in his family to have graduated from both high school and college. One of eleven children in a family of farmers, he grew up as a migrant student and relied heavily on his artistic skills and interest to cope with what was at times a difficult childhood. Simon was born in Mexicali, Mexico in 1961 and came to the United States when he was just over a year old. He worked to earn money to pay for his college tuition, and graduated from the prestigious Art Center College of Design in California with his Bachelor's Degree in Art.

“Mr. Silva spoke to a packed audience of Valley Center parents, students and community members as well as people from throughout North County. Mr. Silva spoke about his experiences and the importance of art, literature, education, and pride in one's self and culture. Mr. Silva engaged and challenged students to be resilient and use their multiple intelligences. When bullying is such an important topic in our schools, Mr. Silva inspired, captivated and stunned all in attendance with the story and images of Mr. Silva’s life delivering strategies to deal with low self-esteem and pride in cultivating each other’s uniqueness while never loosing the spark of creativity we were born with. Mr. Silva delivered a message that captivated parents, students and teachers unlike any that I have ever seen. A must for every school.”

To Whom It May Concern:

We had the pleasure of contracting with Simon Silva, artist, author, and speaker for our school. Del Norte Elementary had him as one of our contract consultants in the 2010-2011 school year for an “Artist in Residence” program. He spent four weeks on campus and worked with all students, teachers, and our parent program.

One of the perks of this partnership was the opportunity for our parents to work and develop a mural for our front office and as well a mural for our Multipurpose Room.

Please find those attached for your purposes. These murals have left a mark on our school of his time and presence. We have parents that come in and still share with friends, family members, and students the masterpiece they created with Mr. Silva.

He is a man of many talents but the best thing he has done for my parent community was place the importance of art and creativity in the actual hands of these folks. To see them work after school for hours creating this project was true magic. We had parents come together, work for hours, and forget about the reality of the day while losing themselves in a true collaboration of art and education.

One of the best outcomes has been the development of our PTO program, parent volunteers, and ongoing parent education classes. The lasting effects have made a true difference on our campus and in the academic growth of our school. I highly recommend him and look again to work with him in the near future.

If you have any questions, feel free to contact me,

Dr. Angela Robbins Maestas
Principal – Del Norte Elementary
angela.robbins@omsd.k12.ca.us

Subject: [h.e.e.l.s.forhealth] Weekly Newsletter -

Hi everyone,

I hope you all had a great weekend! Below is this week's newsletter.

Get Active!

- **2013 Spring Fling** is **THIS FRIDAY**! Join Campus Recreation on a 2.7 mile fun run or 1.5 mile walk, open to all UNC-Chapel Hill faculty and staff. This is a great opportunity to get out of the office for some physical activity with your department and enjoy the great spring weather! In previous years, over 500 participants have completed the Spring Fling individually or as part of a departmental team. This event promotes health and well-being and provides employees a wonderful opportunity to give back to the community by making canned food donations to the Glenwood Elementary Family Assistance Program and pet donations to the Orange County Animal Shelter. Prizes for the Most Creative Costumes and Most Participants will be rewarded following the run/walk.
    - **Date**: **Friday,** ; **Time**: **12:15 pm**
    - **Location**: front of the Student Recreation Center
    - **Check-in**: 11:30 am - 12:00 pm
    - **Registration**: If you are not on a department team, fill out the Individual Registration Form online. Those participating on a department team must fill out the Team Registration Form, printed out, and signed by all team members, and turned back into Campus Rec at the SRC Main Office or by fax at 962.3621 ATTN: Spring Fling. Registration opens Monday, and closes Wednesday, . On-site registration will also be accepted from 11:30am to 12:00pm race day for individual runners only.

This Week in Health

- This week, we are finishing up **Stress Awareness Month** by focusing on **7 Simple Stress Busters**. Visit this website for helpful hints: http://www.sparkpeople.com/resource/wellness_articles.asp?id=185 .

- This week's exercise is a "**Modified Seated Balance on Board**". This is a great exercise for your core! Follow this link to learn more: http://www.sparkpeople.com/resource/exercises.asp?exercise=348 . [*If clicking the link above does not work, copy and paste it into your browser by (1) highlighting the entire link above, (2) right-clicking "Copy", (3) opening your internet browser, and (4) right-clicking "Paste" into the website address space at the top of the toolbar.*]

Please let me know if you have any questions. Have a great wee, and hopefully I'll see most of you at **Spring Fling**!!

A Gathering Storm for College Recruiters

A gathering storm

For all the challenges college coaches face when it comes to recruiting - overcoming parents' cries of how far from home your campus is, or why that losing season was just a fluke, or the fact that your dorms don't include 42-inch flatscreen televisions like the other college they just visited - there is another gathering storm on the horizon.
And mark my words, it's going to become a challenge for a lot of college recruiters.
I'm talking about an idea that is now becoming a mainstream discussion among parents, students and the media:
Is a traditional four-year college worth it?…

Speaker Line-Up For 2013 Nat'l Collegiate Recruiting Conference Announced!

If you're attending the 2013 National Collegiate Recruiting Conference in Charlotte, North Carolina on June 7-9, you're going to hear the *best* collection of speakers and experts we've ever assembled.
We're proud to announce the line-up, and will update it if changes or additional speakers are added!
To attend the conference, **click here**.
FRIDAY
Dan Tudor - The founder of the NCRC event will kick-off the weekend with the annual "State of Recruiting" talk, setting the agenda for the weekend
Dan Wolken, USA Today - One of the rising stars in college sports reporting will talk about recruiting trends, coaches who are doing it right, and what he forecasts for the evolving world of college recruiting.
Dr. Mike Davenport - A successful rowing coach and expert in the intricacies of successful mentoring, Coach Davenport will talk about how to make sure your coaching career is strong and sustainable for the long haul. Be ready to be challenged in the way you approach your career!
Jan Stuebbe - Author of "How to Be a Lousy Leader", Coach Stuebbe will give insights from a unique athletic and coaching life that saw him in a leadership position since he was a Freshman in high school. He's always been a starter, a head coach, and leading a junior college program as athletic director. These lessons are unforgettable - you'll want him to talk to your team about leadership, too!
Rob Jones - Whatever obstacle you're facing as a coach, be prepared to be humbled and amazed at the story of Rob Jones. Featured earlier in Sports Illustrated this year, Jones' life journey - as a soldier and as an athlete - will amaze you. His session will touch every aspect of your coaching and recruiting life...
CLICK HERE TO SEE THE REST OF THE LINE-UP!
Want a sneak peek at the incredible learning experience our NCRC attendees get? Check out this special look-in at one of last year's popular speakers, Coach Adam Martel and his fascinating talk, "D1 Recruiting on a D3 Budget".

My Dad, His Outdated Computer, and the Lesson for College Coaches

Not Sean's dad, just for the record...

by Sean Devlin, Front Rush
This past weekend, I updated my fathers operating system on his computer.
It was a real pain because I couldn't just install the operating system, I had to install a previous version of the operating system, update that version, and then install a new version after downloading it, and then update that...woah!
Do you know what my father learned from the experience? Absolutely nothing! Do you know whatI learned from the experience? Absolutely nothing (I do this stuff all the time!)
So now the next time my father needs his computer fixed, he is going to call me and he is going to be inconvenienced because he has to wait for me and no comment on my my side because its never an inconvenience to do anything for my father...but you get the point.
So what can we all extract from this?...

On-Campus Workshop

College Basketball Coaches Weigh In on New College

Contact Rules

Coach Bo Ryan

On Saturday afternoon, Bo Ryan sat with his peers on the baseline of a gymnasium in the Minneapolis suburbs and reflected on the changes in recruiting he has witnessed in recent years.
They've all come in bursts.
In the 1970s, he'd contact highly touted recruits on Sunday night. That was the best day to catch them at home, he said. Ryan, then an assistant under Bill Cofield, drove to the basketball offices, because long-distance phone calls were too expensive to make from home.
He employed the same strategy each weekend, too. He would track down a top recruit and then filibuster the conversation so that his rivals couldn't get to him.
"The key was getting the kid on the phone on a Sunday night and never letting him off, because there was no call waiting and every other coach that was calling him kept getting a busy signal," Ryan said. "It's changed an awful lot"...

The Early Bird Gets the Worm

NCSA Athletic Recruiting

by Ellen Sawin,
NCSA Athletic Recruiting
This mantra seems to be taking over the world of collegiate athletics.
Many coaches from the nation's top teams have started offering scholarships to athletes who haven't even started high school yet. Just this past summer, LSU offered a scholarship to Dylan Moses, a football player who hadn't even started the 8th grade. As the best Division I programs begin offering scholarships to middle school athletes, coaches at other levels will no doubt feel the need to follow suit and start offering their recruits at earlier times, as well.
With the advanced recruiting timeline, coaches will be scouting and communicating with more players all at once than they have in the past. After all, coaches can't simply ignore the athletes that have given verbal commitments, no matter what their age is. Working with more student-athletes at a time, requires more time and money from teams.
And as many schools have tighter recruiting budgets than 5 years ago, this presents a serious problem. So, how can motivated, competitive college coaches recruit more athletes, at younger ages, without breaking your bank (or the rules)? Here are several ideas we see working for coaches around the country...

Webinar Overview

Since 1979, ACT has conducted four national surveys on "What Works in Student Retention." While one might think that things have changed since that first survey more than 30 years ago, in reality, the results have been remarkably consistent. We know that students who learn will succeed, students who are motivated will succeed, and students who enroll in programs consistent with abilities and interests will succeed. Unfortunately, we also know that while there has been a proliferation of interventions, retention rates have remained disappointingly stagnant.

This webinar will summarize the themes of attrition and intervention strategies identified in the four surveys and build a case that success in college cannot be characterized as linear and temporal. We will also discuss the need for policy makers to understand that the current retention paradigm where students enroll, are retained, and graduate from a single institution in a reasonable amount of time is both simplistic and counter-productive.

Webinar Objectives

Participants will:

- Review the themes of attrition and retention interventions cited in ACT's four national surveys on student retention
- Acquire a better appreciation for the differential paths that lead to student success in college
- Provoke thoughtful consideration of how students transition from learning experience to learning experience and from institution to institution
- Be challenged to explore the question "How would we do things differently if individual student success was our effectiveness metric rather than institutional retention and graduation rates?"
- Gain further substantiation for focusing retention efforts on advising, learning assistance, and first year transition programs.
- Better understand that college student success is neither confined to a single institution nor constrained by time

Webinar Speaker(s)

If our primary method for determining institutional effectiveness continues to be the percentage of students who enroll, persist, and graduate from a single institution, then we are not likely to see any improvement in college student success rates.

Dr. Wes Habley has held numerous positions at ACT, Inc. and is currently Assistant Vice President for Strategic Partnerships. He earned his BS in music education and M.Ed. in student personnel from the University of Illinois-Urbana/Champaign and his doctorate from Illinois State University in educational administration where he was inducted into the College of Education Hall of Fame. Prior to joining ACT, Habley served first as an academic advisor and later as the Director of the Academic Advisement Center at Illinois State. Habley also served as the Director of Academic and Career Advising at the University of Wisconsin-Eau Claire.

Habley is lead author of Increasing Persistence: Research -based Strategies for

Subject: FORMAL NOTICE: Performance Rating & Competency Assessment Data Entry Schedule

---

TO: Deans, Directors, Department Heads

FROM: Gena J. Carter, Senior Director, Employee & Management Relations, Office of Human Resources

Jessica Moore, Senior Director, Classification & Compensation, Office of Human Resources

DATE: April 30, 2013

Annual Performance Appraisals and Employee Competency Assessments must be completed for SPA permanent employees by May 31, 2013. Department HR Facilitators must enter ratings into HRIS between May 20 and June 28, 2013. A separate communication has been sent to the Facilitators.

THE IMPORTANCE OF THE PERFORMANCE MANAGEMENT PROCESS

The performance management program is a communications system designed to help the employee succeed. It provides the structure through which work unit objectives, manner of supervision, performance expectations, and performance results are defined and clarified. Proper application of the performance management program is essential in the proper execution of other personnel policies, including proper classification and compensation, defensible disciplinary action, and appropriate layoff determination.

Supervisors must meet individually with each employee to review the employee's performance appraisal. Performance appraisals must include ratings and comments for each principal function as well as overall comments and an overall rating. Final documents must include signatures from the employee, the supervisor, and the second-level supervisor. Employees should receive a copy of their work plan and performance appraisal for their own records once all signatures have been obtained.

NO SELF-REPORTING OF RATINGS

The individual who will enter the department's ratings into HRIS must not enter their own rating. Instead, that employee's supervisor must complete the Performance & Competency Rating Manual Entry Form (available on the Office of Human Resources website) and either fax (962-8658), email as a signed PDF (to emr@unc.edu) or mail to Employee & Management Relations in the Office of Human Resources, CB #1045 no later than June 28, 2013. Employee & Management Relations will enter the rating into HRIS.

WHO MUST RECEIVE PERFORMANCE APPRAISALS

All SPA permanent employees (including full-time, part-time, and time-limited) who are regularly scheduled to work 20 or more hours each work week and who by May 31, 2013 will have been working for at least three months under one or more work plans (this work may have been performed in more than one department) must have an annual performance appraisal.

Employees who began their permanent state SPA employment on or after March 1, 2013 will receive a rating of "I" (Insufficient Time). Work performed on or after March 1 will be considered part of the employee's 2013-2014 performance cycle. However, supervisors are encouraged to complete a mid-cycle review for these employees after the employee has completed three months of work at the time of the required 90-day competency assessment.
For employees who transferred into your department on or after March 1, 2013, an annual performance appraisal is still required. Supervisors have two options for addressing the appraisal:

Option 1: The supervisor may request that the employee's previous supervisor complete an annual performance appraisal for the period prior to the date of employee transfer. This rating would be entered as the employee's annual appraisal for this cycle. All work performed by the employee in the current position would be reflected in next year's performance appraisal. (This creates a slightly longer performance cycle for the employee for the coming cycle.)

Option 2: The supervisor may request a mid-cycle review or its equivalent from the previous supervisor for the current supervisor's consideration in determining the overall rating for the employee for this performance cycle.

WHO MUST RECEIVE COMPETENCY ASSESSMENTS

The 2013 overall employee competency assessment rating ratings must be entered into HRIS by June 28, 2013 for all SPA permanent employees (including full-time, part-time, and time-limited) who:

* are regularly scheduled to work 20 or more hours each work week, and
* by May 31, 2013 have been working for at least three months in the current position.

Even if the employee's overall or component competency rating(s) have not changed, comments should be added in section IX, Supervisor's Comments on Competency Assessment, that the assessment remains the same form the last review. The overall assessment rating must be entered into HRIS reflecting the current review date.

For employees who started in their position on or after March 1, 2013, the competency assessment must be completed at the time the employee has worked three months in the position.

QUESTIONS?

If you have questions about the performance management process or assigning appropriate ratings, contact your Employee & Management Relations Consultant.

If you have questions about the competency assessment process or assigning appropriate ratings, contact your Classification & Compensation Consultant.

Subject: Turnitin First Draft - Explore the Top Student Sources

Turnitin First Draft

Having trouble? View as Webpage

EXPLORE THE RATINGS FOR TOP STUDENT SOURCES

Turnitin created a new interactive website, "Ratings for Top Student Sources," which ranks the most popular online sources found in student papers.

Turnitin partnered with a team of educators who scored the online sources most frequently used by secondary and higher education students in six categories: academic, social media, paper mills, encyclopedias, news/portals, and shopping sites. The educators used the Source Educational Evaluation Rubric (SEER) to rate 197 sources on the level of their authority, educational value, intent, originality, and quality. Visitors to the interactive site can set their viewing preferences using combinations of these attributes.

PLAGIARISM EDUCATION WEEK IN REVIEW

Plagiarism Education Week proved to be a major success in the educational community. The five daily webcasts were attended and watched over 5,000 times. If you weren't able to join a live webcast, recordings are available for free on-demand.

Students and Plagiarism: Exploring the Disconnect Between Morals and Behavior
With Jason Stephens, Educational Psychologist at University of Connecticut

Plagiarism Spectrum Drill Down
With Renee Swensen, Professor of English at Saddleback College

Responding to Plagiarism: Lesson Plans and Strategies
With Lynn Lampert, Chair of Reference & Instructional Services and Coordinator of Information Literacy & Instruction at Cal State Northridge

Policy to Practice: Developing Effective Academic Integrity Policies
With Teddi Fishman, Director, International Center for Academic Integrity

Teaching Originality, Creativity, and Critical Thinking
With Kelly McBride, Senior Faculty, Ethics, Reporting and Writing, Poynter

Just because the week is over, it doesn't mean plagiarism education is over. Last week we helped to

foster discussion about plagiarism among educators by sharing teaching practices, policies, psychology, and pedagogy - we hope you'll take what you've learned and apply them to your classrooms and in your schools.

NOTEWORTHY

Plagiarism Today: Why the UK is Winning the War on Academic Plagiarism
With nearly 60% reduction in high similarity, the UK demonstrates results that can be expected if a country, industry or group make a commitment to both detect and educate about plagiarism.

Deseret News: Is educational technology a force for radical change...or a force multiplier?
With concerns looming over completely automated essay grading, Mary McConnell explains how technology should enhance, but not replace, traditional teaching skills.

Turnitin Blog: Making Academic Integrity Policies Work
Professor Thomas followed his university's plagiarism policy and found himself reprimanded for doing it. So he tried to change a strict and rigid policy into one that offered flexibility, remediation, and learning.

*SMS Software Maintenance includes free product upgrades, the Cloud Apps, and 25% off Professional Development, offer expires June 30, 2013.

Remarks from the President

As individuals, schools, universities, and corporations turn towards new devices (e.g. iPads, Chromebooks) and the Cloud, Texthelp's product strategy will continue to be not only adding new features and enhancements to our existing products but also creating support tools for these new platforms to make them accessible to all users. This strategy of providing anywhere, anytime access began years ago with the introduction of **Read&Write Gold Mobile** which runs from a USB on any computer. In 2011, we released our first **Web Apps** to give users access to support tools in the Cloud. The Apps were followed by **Read&Write for Google Docs**, a Chrome extension which makes Google Docs accessible and further expanded our cloud-based solutions. Finally, the recent introduction of **iReadWrite** made some of the most powerful Read&Write features available on the iPad.

All of this has led to the Read&Write family of products - **Read&Write Desktop**, **Read&Write Cloud**, and **Read&Write iPad.**
Our current offerings are:

- **Desktop –** Read&Write Gold for PC and Mac
- **Cloud –** Read&Write for Google Docs and Web Apps
- **iPad –** iReadWrite

In the coming months, you will see a **new Read&Write Gold release** (more on this below), exciting **additions to our Google offering**, and new **iPad Apps**.
We look forward to working with all of you to continue to make sure you have a range of solutions that meet your needs today and in the future.
Sincerely,

Jack Dolan
President, Texthelp Inc.

Read&Write Gold Version 11 Coming in May

Read&Write 11 Gold for PC will be **released May 29th** and we couldn't be more excited about it! In addition to our new Read&Write logo, there will be a new Windows 8 look and feel to the toolbar and icons (don't worry, the existing toolbar is still there for those who prefer it!) as well as new features and enhancements including:

- **New Text-to-Speech Voices –** New Nuance Vocalizer expressive male and female voices are included.
- **Voice Note –** Create and embed recorded voice notes within a Word document or save as .wav file.
- **Word Cloud –** Visual representation of Word Banks (150 subject-specific Word Banks are included) or selected text in list or word "cloud" format. Great for creative writing, vocabulary support, or completing assignments.
- **Enhanced Google Chrome and Firefox Support** – Use Read&Write Gold features directly from the toolbar within Chrome and Firefox including read the web, study skills highlighters, vocabulary builder, text and picture dictionaries, and more!
- **Support for Google Docs** (in Chrome only) from the Read&Write Gold toolbar including text-to-speech, word prediction, phonetic spell checker, dictionaries,

study skills highlighters, vocabulary builder, and more!
- **Enhancements** to Spell Checker, Speech Maker, Scanning, and more

New Software Delivery Process for Read&Write Gold

Effective May 29th, all new and upgrade software orders for Read&Write Gold PC and Mac will be delivered via download. With the exception of new Read&Write Gold Mobile orders, **no physical media will be sent**. When your order is placed, you will receive an email with a link to ***Read&Write Essentials,*** our new repository that contains all of the information needed for downloading and installing your software as well as additional support resources to get you started.
Note: Existing Read&Write 10 Gold Mobile customers who order an upgrade will receive instructions on downloading and updating their current Mobile USB device. They will NOT receive a new USB.

Order Your Version 11 Upgrade!

If you are **current on SMS** or **purchased Read&Write 10 Gold for PC after April 12, 2013,** you are entitled to a free upgrade to Version 11. Upgrades are sent upon request only. If you would like to request your free upgrade now, call or email us with your contact information and serial number and we will process your order when Version 11 is released. Order today and be one of the first to receive it!
If you are not eligible for a free upgrade, call 888-248-0652 or email u.s.info@texthelp.com for pricing.

Have you seen our new iPad App yet?

iReadWrite is an easy-to-use reading and writing App that runs on the iPad with no Wi-Fi or 3G access necessary.
For those of you who are already using iReadWrite, thank you for your great feedback and suggestions.
Version 1.0.1 update was just released with two of the most requested features:

- Printing is now supported on AirPrint compatible printers via the Export menu
- Speech rate can now be controlled via the Preferences menu

Watch for more updates in the future!
Watch the iReadWrite video or
get your copy on the App Store today for only $19.99!

Read&Write Gold and Fluency Tutor Named Finalists for CODiE Awards

We are pleased to announce that both Read&Write Gold with Web Apps and Fluency Tutor have been selected as finalists for the 2013 CODiE Awards in the following categories:

- **Read&Write Gold with Web Apps –** Best Solution for Special Needs Students
- **Fluency Tutor –** Best Reading/English/ELL Instructional Solution

//CODiE// 2013 SIIA CODiE FINALIST

We are especially excited to be chosen as finalists as the first-round reviews were done by educators and administrators. Winners will be announced on May 6th.

Texthelp Products Receive BESSIE Awards

BEST EDUCATIONAL SOFTWARE AWARDS – Winner of 19TH ANNUAL – BESSIE AWARDS ComputED Gazette, Carlsbad, CA

Read&Write Gold and Fluency Tutor have both won BESSIE Awards! ComputED Gazette's 19th Annual Best Educational Software Awards target innovative and content-rich programs and websites that provide parents and teachers with technology to foster educational excellence.

- **Read&Write Gold with Web Apps –** Multi-Level Language Arts Category
- **Fluency Tutor –** Early Elementary Reading Website Category

See what all the Buzz is About!

Lots of buzz is going around about our newest offerings - **Read&Write for Google Docs** and **iReadWrite**! Below are two recent reviews. Go to reviews, blogs, and videos to see more!

iReadWrite Review and Video from AssistiveTek

Brian Friedlander, author of AssistiveTek - a blog on assistive technology, eLearning, mind mapping, project management, visual learning, collaborative tools, and educational technology, just reviewed iReadWrite and even created a video to walk you through the product. Check out Brian's review and video!

A.T.TIPSCAST features Read&Write for Google Docs

The A.T.TIPSCAST (Assistive Technology Tools In Public Schools), hosted by Christopher Bugaj, is a podcast about using technology to help students meet their educational goals. Each episode features "A.T.TIPs" that can be used to differentiate and individualize the learning process. A.T.TIPSCAST's **Episode #107**

features **Read&Write for Google Docs** working in the Chrome browser and the ways students can benefit from using the extension. Listen to the broadcast now!

New Webinar - Vocabulary Building using Read&Write Gold

On **June 13th at 3pm** (EST), we invite you to attend this free one-hour webinar to learn more about building vocabulary using the literacy tools found in Read&Write Gold.

Register Now!

Kimberly Nix, Texthelp's Professional Development Manager, will show participants how to use a variety of Read&Write Gold tools to create different vocabulary strategies which can be adapted for the needs of every level of learner.

Texthelp Staff News

We are very happy to announce that **Jason Carroll** is the new **Product Marketing Manager** for the Read&Write family of products. Many of you know Jason who has worked for Texthelp as an Education Consultant for the last 2 years and is a well-known speaker at regional and national conferences.

In his new role, Jason will work closely with customers and industry experts as well as with Product Development on new and existing products. He will also be contributing tips and tricks to this newsletter to help users get the most out of Read&Write and will be starting a blog over the summer so watch for more from him in the coming months! Jason can be reached at j.carroll@texthelp.com.

2013 AT Champion Award Announced!

Maureen Joy, AT Facilitator in St. Charles Community Unit School District in Illinois, has been named the 2013 Texthelp AT Champion. This award is given annually by Texthelp to someone in the Assistive Technology/Special Education field who embodies the characters of a true champion - someone who inspires others, has a passion for what he or she does, and is always looking for new and better ways to use technology to help students, teachers, parents, and administrators.

Mo advocates tirelessly for students with disabilities and their families, works collaboratively with staff and other teams within the district, and is an avid promoter of the use of technology to help students. Mo has been a champion to the students she works with, their families, and many others who have been affected by her drive to improve the lives of individuals with disabilities. All of us at Texthelp are happy and proud to call her our **2013 Texthelp AT Champion**! Read more about Mo and the AT Champion Award.

West Fargo, ND Feature Videos

Recently, we came across two terrific Read&Write Gold videos that were produced by the West Fargo Public Schools from West Fargo, ND. These videos show how to:

- Open a Bookshare DAISY Book in Read&Write Gold
- Use Read&Write Gold's Vocabulary Tool

Social Media Contest Winners

We recently had a little fun with a couple of contests on Facebook and Twitter to celebrate our announcement of iReadWrite.

We kicked off with **Finish this phrase - "I Want iReadWrite for..."**. The winners were:

- **Louisa Johnson –** "*I want iReadWrite for my university degree course I'm about to start. I was only assessed last year at the grand old age of 35 and its been a very emotional time, realizing that my struggle with studying as a child and young adult was because of a specific reason and not because I was lazy or stupid. So here I am putting right the wrongs and hopefully with the correct support in place I will achieve my academic dreams.*"

- **Amber Aslakson –** "*I want iReadWrite for my student who works harder than anyone around to be the best student he can be but gets caught up in text when reading or writing.*"

We also asked our Fans and Followers to help us create a **Wordle for iReadWrite** by giving us one word/phrase to describe iReadWrite. The winners were:

- **Debra Fitzgibbons –** *"Independence"*
- **Jessica van Son –** *"Life Changing"*

Each winner won a FREE copy of iReadWrite. Watch for more contests in the future!

Share a Success Story

We love to hear **how people are successfully using our products**.
Share your stories on YouTube, Facebook, or Twitter!

Conference Connection

It was good to see so many of you at the **CSUN** and **IRA Conferences** as well as the many regional conferences we attended over the past few months.
We hope you will stop by and see us at an upcoming **event** near you including:

ISTE
June 24th – June 26th
Booth #7295 - Henry B. Gonzalez Convention Center in San Antonio, TX

AHEAD
July 10th – 12th
Booth #65 - Hilton Baltimore Hotel in Baltimore, MD
While at AHEAD, don't miss this hands-on lab:
Using Texthelp's Read&Write Gold eBook Reader? Qualified Students Signed Up With a Bookshare Membership? Cherie Miller, Bookshare & Jeff Greaves, Texthelp, Thursday, July 11th from 4pm – 5:30pm

MAY FACILITY HOURS & CLOSURES

Facility Hours and Closures – We will be running on altered facility hours during the month of May. All facilities, including the climbing walls, will be on reduced Summer Hours May 14 through July 26. For a complete list of facility hours this summer, visit the Hours of Operations page.

- May 1 – 3: All facilities open 6am – 9pm
- May 4: Fetzer, SRC open 9am – 6pm; Woollen open 12pm – 6pm; All other facilities closed
- May 5: Fetzer, SRC, Woollen open 12pm – 9pm; All other facilities closed
- May 6 – 7: All facilities open 6am – 9pm
- May 8 – 10: Fetzer, SRC, Woollen open 11am – 7pm; All other facilities closed
- May 11 – 12: All facilities closed
- May 13: Fetzer, SRC, Woollen open 11am – 7pm; All other facilities closed
- May 25 – 26: Fetzer, SRC, open 12pm – 6pm; All other facilities closed
- May 27: All facilities closed for Memorial Day

PROGRAMS & PERKS FOR UNC EMPLOYEES

Spring Fling (Friday, May 3) – Last chance to sign up for the Spring Fling this Friday! Spring Fling is a 3 mile fun run or 1.5 mile walk open to all UNC faculty and staff. Register as an individual or as part of a departmental team. There will be prizes, food, and fun! Remember to bring pet and/or food donations to help Campus Rec give back to the community. For more information, including how to register, visit the Spring Fling webpage.

Kerr Lake – Whether you are a water enthusiast or just like to relax, Kerr Lake is the right place for you to be this summer. This recreation area is perfect for swimming, fishing, water skiing, canoeing, sailing, and much more! For more information about facilities, memberships, and daily/annual use permits, visit the Kerr Lake webpage.

STEP UP YOUR WORKOUTS

Group Fitness Classes – Students may be on break, but the Group Fitness Program certainly is not! We will continue to offer a variety of classes all summer long. For a complete list of class schedules, visit the Group Fitness Classes webpage.

Specialty Fitness Programs – Looking to spice up your daily workout? Join a Specialty Fitness Program! See maximum results for a minimum fee. For more information on the programs we'll be offering this summer, visit the Specialty Fitness webpage.

Training Time – Not going to be on campus this summer, but still want to be able to work out with Campus Rec? Then check out our Campus Rec You Tube Channel! We have a wide array of workout videos like "Resistance Band Upper Body Workout" and "Total Body Workout", all of which can be done from the comfort of your own home.

REGISTER FOR INTRAMURALS

Join in on the summer action with Intramurals! During Session I, participate in **Softball, 3-on-3 Basketball, 4-on-4 Flag Football**, and **Tennis**. Registration is open from May 14 – 20.

For more information on these sports, including rules and registration, visit our Intramural Sports webpage.

YOUR GUIDE TO OUTDOOR EXPEDITIONS

Summer Day Trips – Explore the outdoors this summer with the Outdoor Education Center (OEC). The OEC offers a variety of expeditions throughout the summer months. Take a break from studying and clear your mind with a hiking or kayaking trip!

- May 25, **Kayak Haw River**
- June 7 – 9, **Backpacking Wilson Creek**
- June 15, **Kayak Three Rivers**

To register for a trip, visit the Campus Rec Main Office, located in the SRC. The trip cost includes food, transportation and equipment.

For a complete list of trips offered this summer, visit the Expeditions webpage.

SPORT CLUB SPOTLIGHTS: BALLROOM DANCE & BASEBALL

This month, get to know *Baseball and Ballroom Dance*!

The **Baseball Club** has gained national recognition winning the 2007 National Club Baseball Association World Series. More recently, the team won the 2013 Mid-Atlantic South Conference Championship and is ranked in the top 25. The club finished the regular season 17 – 5 heading into

the regional tournament in Virginia. Baseball faces powerhouse opponents such as NC State, ECU, Wake Forest, UGA, UVA, and Clemson throughout the regular and post seasons.

The **Ballroom Dance Club** has also risen to the national level wining bronze, silver, and gold national titles. With a variety of dance styles, including Samba, Cha Cha, Jive, Waltz, Tango, and Foxtrot, there is something for everyone. The club is open to any interested student, regardless of experience.

For more information on any of our clubs, visit the Sport Clubs Directory.

CLIMBING WITH CAMPUS REC

Facility Hours – The Climbing Walls are currently running on Finals Hours until May 7. Walls will be closed May 8 - 13.

Finals Hours – Rams Head Rec Center

- Monday – Friday, 1:00pm – 4:00pm
- Saturday – Sunday, CLOSED

Finals Hours – Fetzer Hall Climbing Wall

- Monday – Friday, 5:00pm – 8:00pm
- Saturday – Sunday, 1:00pm – 5:00pm

Summer Hours – The walls will be operating on the Summer Hours schedule from May 14 through July 26. For the most up-to-date facility hours, visit the Climbing Wall webpage.

Belay Certification Classes – All climbers must be belayed certified by UNC Climbing staff in order to climb on our walls. Whether you're a new climber or an experienced climber, we offer a variety of ways to become certified with our Climbing Program Classes. For more information on climbing programs, please visit the Climbing Wall webpage.

STAY CONNECTED

Stay Up To Date – Be sure to “friend” UNC Campus Rec on Facebook to have the best way to get updated information on programs, events, and altered facility hours. Add us as a friend today!

Read Our Blog – Subscribe to Campus Rec’s entertaining and informational blog! “Eat Healthy While Eating Out”, “Health Beyond College”, and “Campus Rec Bucket List” are just a couple of this month’s featured posts.

Embracing Technology To Promote Exceptional Student Services In Higher Education

Wednesday, June 5 - 3:00-4:30pm EDT

Registration - http://www.innovativeeducators.org/product_p/1038.htm

Innovative Educators

Free Resources

- Leveraging Technology to Improve Online Student Success
- Leveraging Technology to Provide Online Academic Advising
- Technology Helps Address Demands in Student Services
- An Introduction to Technologies Commonly Used by College Students
- College Using Technology to Engage More Students
- Support Services for the Net Generation
- Have a Higher Ed question? AskIE
  - How can technology be used to serve today's student?
  - How can I use technology to improve the quality of my courses?
  - How do I get academic help for my online students?
  - What is StudentLingo?

Webinar Overview

This webinar will offer participants an overview of the online self-services and other technology initiatives that higher education institutions are developing and providing for their students and their families. Learn more about how technology is shaping the student experience with financial aid, electronic billing and payments, graduation planning, and more. Through strategic design and implementation of technology tools, administrators can promote increased efficiencies, improve retention and graduation rates, and promote student success.

The presenter will discuss various online student self-services and web applications that have proved successful for students to help manage the business of being a student, including a look into student portals and mobile device initiatives that have been developed to provide personalized information and communications to students. Online views of various University of Minnesota web applications and technology tools that have been highly successful in terms of quality student services and creating efficiencies will also be reviewed.

Webinar Objectives

Participants will learn:

- Self-service options that institutions have developed to assist with customer service strategies including self-service financial aid planning, registration/graduation planning, and customer service relationship software
- How to leverage technology into seamless self-service Web applications that bring students from "in line" to "online"
- Examples of cutting-edge technology initiatives for student services including student portals and mobile device initiatives
- About specific web applications and technology tools that have been highly successful at the University of Minnesota

Webinar Speaker(s)

"Through my years working in higher education finance and student services, I have seen a great paradigm shift in student services over the past two decades. Not only is this shift related to the customer service expectations our students have of higher education, but also in the way higher education administrators have been able to meet that challenge by providing the technology and tools necessary to provide great service and promote student success."

Julie Selander has worked in higher education administration and finance for over 25 years. Her experience includes student loan servicing operations, tuition payment plan sales and marketing, organizational leadership, as well as various management positions in higher education student services including student accounts receivable, billing, collections, financial aid, and customer service.

A Step-By-Step Guide To

Julie is the director of the One Stop Student Services Office at the University of Minnesota providing seamless and integrated student services in the areas of enrollment, registration, financial aid, billing, student accounts receivable, and student veterans services. Twenty-seven One Stop Counselors across three campus locations provide service via phone, e-mail, and in-person for over 51,000 students on the Twin Cities campus.

Julie presents frequently on various topics related to higher education student services and has written several articles for publication, including NACUBO's Student Centered Financial Services: Innovations That Succeed. She serves as a board member for Minnesota's College Goal Sunday initiative and is a founding member and on the board of directors for the Institute for Student Services Professionals. She has undergraduate and master's degrees from the University of Minnesota and is currently working on her dissertation as a Ph.D. candidate at the University of Minnesota in the Higher Education Policy and Administration program. She is also an instructor at the University of Minnesota in the Organizational Leadership, Policy, and Administration department and teaches Customer Service Training to undergraduate students.

COACHES CERTIFICATION EXAM

The Coaches Certification Exam for the 2013-2014 academic year will be held on **Thursday, May 30, 2013 at 9:00 a.m. on the 2nd floor of the Loudermilk Center for Excellence in classroom 2301.** The session will begin with a review session by the ACC staff followed immediately by the exam at approximately 10:00a.m. Please bring your 2012-2013 NCAA manual and Laptop to the exam. The exam will be conducted electronically, which means that coaches will receive results immediately following exam completion. **UNC requires that all coaching staff members, including volunteer coaches and Directors of Operations, prepare for and take the exam, even if they do not recruit off-campus.**

ORIENTATION

Please notify all incoming student-athletes of the Orientation session for Varsity Student-Athletes and their parents. The presentation by Academics and Compliance will include topics such as NCAA Eligibility Center, Financial Aid, and services provided by the Academic Support Unit

SUMMER EVALUATIONS

Coaches, please remember that evaluations of prospects that occur outside of the prospect's academic year (summer only) DO NOT count against the annual number of recruiting opportunities. Contacts that occur with a prospect during this time period DO COUNT against the annual number of permissible recruiting opportunities and must be reported to the Compliance Office through ACS.

SUMMER CAMP DOCUMENTATION

At least one week prior to the start of each camp, coaches must complete and submit the following forms to Lance in the Compliance Office:

- **Student-Athlete Employment Roster**
- **Outside Coaches Employment Roster**
- **Free or Reduced Admission Roster**

These forms should be signed and submitted, even if they do not apply to your particular camps. For any camp conducted in June or July that is missing documentation, a hold will be placed on that sport's account with the business office in a manner consistent with other delinquent paperwork in August. Forms are located on the J: Drive in the Complaince/Camps and Clinics folder. Please contact Lance (3-7259) with any questions.

POST-SEASON CERTIFICATION

Spring Sports who will be competing in any championships after the completion of exams, be on the lookout for a post-season certification memo from Lance. The Registrar will be certifying student-athlete's post-season eligibility status based on the Spring 2013 semester.

PROSPECTS JOINING LOCAL SPORTS CLUB

Remember that prospects enrolling initially in the fall CANNOT relocate to Chapel Hill for the summer and join and work out with a local sports club with which one of our coaching staff members is involved. Please contact Tom if you have questions.

SUMMER EMPLOYMENT

Coaches: The Compliance Office is in the process of meeting with all student-athletes regarding various summer issues. Part of this presentation includes information on summer employment. **If any of your student-athletes obtain a summer job, please have them complete the Student-Athlete Employment Form.** This form is located on the J:/ drive.

NEW INTERPRETATION

RECRUITING CONVERSATIONS AT CAMPS AND CLINICS

Camps and clinics ARE considered an athletics competition or athletics event. Therefore, a host institution's coaching staff member may not engage in recruiting activities. Examples include: campus tours for recruiting purposes, meetings with faculty members, complimentary admissions, and extending written offers or aid. You may participate in recruiting conversations with prospective student-athletes participating in the institution's camp or clinic. **Any recruiting activities that occur after completion of the camp or clinic are subject to applicable recruiting calendar restrictions.**

2013 NFF Hampshire Honor Society Membership Announced

Record number of schools submitted nominations in the Society's seventh year.

DALLAS, May 2, 2013 - The National Football Foundation & College Hall of Fame (NFF) announced today the members of the 2013 NFF Hampshire Honor Society, which is comprised of college football players from all divisions of play who each maintained a cumulative 3.2 GPA or better throughout their college career. A total of 703 players from 259 schools qualified for membership in the society's seventh year, marking the highest school participation in the history of the program, which began in 2007.

"The growing number of schools involved in the Hampshire Honor Society each year shows that football student-athletes not only play at the highest level but that they are some of the best students on campus as well," said NFF President & CEO **Steve Hatchell**. "Congratulations to each of these young men for their commitment to education and their leadership on and off the football field."

The NFF Hampshire Honor Society capitalizes on the NFF's current National Scholar-Athlete program greatly expanding the number of scholar-athletes the NFF can recognize each year. The program further strengthens the organization's leadership role in encouraging academic performance by the student-athletes who play football at the more than 700 college and universities with football programs nationwide. The initiative has honored 4,081 student-athletes since its inception.

Jon F. Hanson, the chairman and founder of The Hampshire Companies, provided the endowment to launch the NFF Hampshire Honor Society in 2007. He made the contribution as part of his legacy to the organization after serving as NFF chairman from 1994-2006. He currently serves the organization as a chairman emeritus. Each player awarded with membership in this year's Honor Society will receive a certificate commemorating their achievement.

"We have honored more than 4,000 student-athletes in the last seven years thanks to Jon Hanson's generosity," said NFF Chairman **Archie Manning**, "We are humbled by his passionate belief in the scholar-athlete ideal, and the Hampshire Honor Society allows us to showcase the names of tomorrow's leaders while inspiring future generations to follow in their footsteps."

Qualifications for membership in the NFF Hampshire Honor Society include:

· Being a starter or a significant substitute in one's last year of eligibility at an accredited NCAA Football Bowl Subdivision, Football Championship Subdivision, Division II, Division III, or an NAIA college or university;
· Achieving a 3.2 cumulative grade point average throughout entire course of undergraduate study; and
· Meeting all NCAA-mandated progress towards degree requirements and graduation.

The Hampshire Honor Society represents a powerful component in the organization's rich history as an innovator in promoting the scholar-athlete ideal. Launched in 1959 with a donation from Hall of Fame coach Earl "Red" Blaik, the NFF's National Scholar-Athlete Awards, presented by Fidelity Investments, became the first initiative in history to grant postgraduate scholarships based on a player's combined academic success, football performance and community leadership. And, since its inception, the NFF National Scholar-Athlete Awards program has awarded $10.1 million to 771 top scholars and community leaders.

Currently, the NFF distributes more than $300,000 a year at the national level through the program to 16 individuals. Each winner of a National Scholar-Athlete Award receives an $18,000 post-graduate scholarship. Additionally, the William V.

Campbell Trophy, endowed by HealthSouth, is given to one member of each year's class as the absolute best. The winner of the Campbell Trophy, claimed by All-American center **Barrett Jones** (Alabama) in 2012, receives a total scholarship of $25,000 and a 24-inch, 25-pound bronze trophy. Through, its chapter network, the NFF also awards an additional $1 million to local high school student-athletes, bringing the NFF's annual scholarship distribution total to more than $1.3 million.

**2012 NFF National Scholar-Athlete*

2012 Campbell Trophy semifinalist Marquise Goodwin (Texas) is one of 703 players named to the 2013 NFF Hampshire Honor Society.

About the Hampshire Foundation:
The Hampshire Foundation is the charitable arm of The Hampshire Companies, a privately-held, fully-integrated real estate firm that has more than 50 years of hands-on, cycle-tested experience in acquiring, developing, leasing, repositioning, managing, financing and disposing of real estate. Founded by Jon F. Hanson, who served as NFF Chairman from 1994-2006, Hampshire is headquartered in Morristown, New Jersey, has 33 employees, and currently owns and operates a diversified portfolio of 224 properties in 31 states totaling more than 14.7 million square feet. Learn more at www.hampshireco.com.

ABOUT THE NATIONAL FOOTBALL FOUNDATION & COLLEGE HALL OF FAME
Founded in 1947 with early leadership from General Douglas MacArthur, legendary Army coach Earl "Red" Blaik and immortal journalist Grantland Rice, The National Football Foundation & College Hall of Fame is a non-profit educational organization that runs programs designed to use the power of amateur football in developing scholarship, citizenship and athletic achievement in young people. With 120 chapters and 12,000 members nationwide, NFF programs include the College Football Hall of Fame, the NFF Scholar-Athlete Award presented by Fidelity Investments, Play It Smart, the NFF Hampshire Honor Society, the NFF National Scholar-Athlete Alumni Association, and scholarships of

more than $1.3 million for college and high school scholar-athletes. The NFF presents the MacArthur Bowl, the William V. Campbell Trophy endowed by HealthSouth, and releases the Bowl Championship Series (BCS) Standings. NFF corporate partners include the Allstate Sugar Bowl, the BCS, Fidelity Investments, Herff Jones, Liberty Mutual Insurance, NCAA Football, and Under Armour. For more information, please visit www.footballfoundation.org.

Improving Online Student Services Accessibility: Compliance, Requirements & Innovative Tools

Thursday, June 6 - 3:00-4:30pm EDT

Registration - http://www.innovativeeducators.org/product_pr1090.htm

Innovative Educators

Free Resources

- Test your website's accessibility - WAVE Web Accessibility
- University of Minnesota - Accessibility
  - Accessible Documents
  - Web Content
- Making Mutimedia Section 508 Compliant and Accessible
- Have a Higher Ed question? AskIE
  - What accommodations are required for students with mental health issues?
  - How can technology be used to serve today's student?
  - How can I use technology to improve the quality of my courses?
  - How do I get academic help for my online students?
  - What is StudentLingo?

Webinar Overview

Everyone wins when Online Student Services are accessible to those with physical and cognitive disabilities. Imagine trying to understand a student orientation video on a college website when you cannot hear. Adding closed-captioning not only makes it more accessible, it makes the video easier to follow for diverse populations of students, from non-native English speakers to those with hearing impairments.

This webinar will address the challenges and barriers faced by students with disabilities when accessing digital content. We will introduce student testimonials and discuss accessibility as a basic civil right. By introducing digital documents, web applications, and other multimedia tools, we will demonstrate specific ways that the entire campus community can benefit from efforts to comply with accessibility requirements. Participants will learn about basic accessibility compliance requirements for digital content in student services including how to assess current programs and implement innovative, cost-effective tools. Participants will also receive accessibility checklists to help them navigate present and future needs.

Webinar Objectives

Participants will be able to:

- Locate closed-captioned videos via YouTube
- Use the WAVE tool to assess the accessibility of webpages
- Add an alternative description to an image in Microsoft Word
- Clearly name a hyperlink in a document or webpage
- Identify when a document or webpage relies on color to convey meaning or prompt a response
- Navigate accessibility checklists to determine present and future accessibility needs

Webinar Speaker(s)

Dr. Judy Baker has 25 years of work experience in higher education administrative and faculty positions. Currently, she manages the online learning and professional development programs at Foothill College in Los Altos Hills, CA as the Dean of Foothill Global Access. She directed the Community College Open Textbook Collaborative project grant project that was funded by The William and Flora Hewlett Foundation from 2008 - 2011 and received the 2010 WCET WOW Award. Formerly, she served as Executive Dean of the Virtual College in the Open Campus at Florida Community College at Jacksonville (FCCJ) where she managed the delivery of online courses and the call center. From 2001 - 2004, she was Dean of Online, Library and Technology Services at San Diego Miramar College, where she was responsible for faculty development, staff supervision, and budget management in the area of innovations in instructional technologies as well as the District's award-winning distance learning program.

Dr. Baker served as a professor, graduate program coordinator, undergraduate program coordinator, interim department chair, grant director, search committee

WHAT IS WELLNESS?

Wellness is defined as "an active process of becoming aware of and making choices towards a more successful existence."[1]

Because living a "successful existence" means something different to each individual, wellness can be many things, but it generally includes the pursuit of health, defined as "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity"[2] and working towards achieving one's full potential.

Your pathway to wellness can be:

- Good health
- Saving more money
- Healthy relationships
- Being good to yourself
- Showing gratitude
- Keeping good friends close
- Taking care of your community
- Eating one less cookie
- Looking for a new job
- Learning how to let go
- Walking instead of driving
- Playing with your pet
- A day at the spa
- Eating fresh fruit from your own garden
- Mastering a difficult yoga pose

Did you know?

- Connecting with others can help you to enjoy the times when you are alone.
- Staying positive can improve your mood and your health.
- If you quit smoking now, in 20 minutes your heart rate drops, and in 12 hours the carbon monoxide (a gas that can be toxic) in your blood drops to normal.
- Exercising in "spurts" can be just as effective as continuous exercise.
- Helping others may help you experience less depression.
- Drinking beverages with caffeine should be stopped 6-8 hours before bed to ensure a more restful sleep.
- Creating joy and satisfaction can be easy with little things such as making a gourmet meal while listening to your favorite music, treating yourself to a massage, or even taking a few moments to admire nature.
- What you drink is just as important as what you eat.
- Spirituality can give you a sense of purpose and meaning.
- Writing down your problems can help shift your thinking about the issue and ultimately improve your mood.
- It is essential to choose a provider who understands the importance of the both of you working collaboratively regarding your health care.
- Stress management techniques are important because chronic (long-lasting) stress can change your brain and the way you function.

Mental Health America

FOUR SIMPLE STEPS

Taking good care of your body and mind can make a difference in how well you do in your day-to-day life and how well you manage change. Exercising, eating right, getting enough rest and relaxing will not only set you on the right path to wellness, but also help you achieve and enjoy daily activities more and improve how you deal with life's challenges. Caring for yourself may take a little extra time, but you will feel better and more successful. Here's what you need and why it helps:

A healthy diet:

- Improves your ability to learn.
- Means eating a nutritious breakfast everyday. Skipping meals leads to a lack of energy.
- Includes eating something nutritious every time you have a meal. Try subsituting processed foods with a salad or swapping something fried for a piece of fruit.
- Requires limiting your alcohol intake.
- Avoids excessive amounts of caffeine. Caffeine dehydrates you. Drink at least 8 glasses of water a day to prevent dehydration.

Regular exercise:

- Elevates mood, reduces stress, increases energy level, improves appearance, and stimulates the release of endorphins and serotonin, which makes you happier.
- Increases alertness and creativity.
- Improves your overall mental and physical well-being. Even taking a 15-minute walk, 3 times a week, can help.
- Keeps you active and also creates more opportunities to meet new friends!
- Decreases stress. On days when you are feeling overwhelmed, hit the gym or do another type of exercise.

Relaxation:

- Means taking time each day to unwind, especially before sleeping. Listen to music, read or do whatever you enjoy. Alcohol or drugs are not the way to go.
- Offers a distraction from problems, a sense of competence and many other benefits.
- Means getting a good laugh. Laughing decreases pain, may help your heart and lungs, promotes muscle relaxation and can reduce anxiety.

Plenty of rest:

- Means getting at least 7-9 hours of sleep. This is essential and will make you more attentive and active. Inadequate sleep can lead to mood changes and lowered resistance to illness.
- Provides the physical and psychological resources to cope with everyday life. Without it, you have to work harder to get daily tasks done and you have less energy.
- Includes cutting back on alcohol consumption because it can disturb your sleep. Though you might fall asleep faster, you're body will not be as rested.

Mental Health America

UNDERSTANDING THE SOCIAL DETERMINANTS OF HEALTH

"Our zip code may be more important than our genetic code"[1]

What are the social determinants of health?

The social determinants of health are the conditions, in which children, youth, and families are born, grow up, live and work, as well as the quality and accessibility to health care (Shern, Steverman, Ahmed, & Shea, 2011). Where you live can be a significant indicator of how well you live as well as how long you live. Such non-medical factors influence health and well-being, including health-related knowledge, attitudes, beliefs, or behaviors.[2] Socioeconomic inequalities in health have been widening for decades. In the United States the data consistently show that people living in poverty, and particularly those who are minorities, bear a disproportionate burden of exposure to unhealthy environments and are at greater risk for mental and behavioral health-related conditions.[3] In addition to health literacy, gender, education, sexual orientation and geography; culture, acculturation, language, race, ethnicity, socioeconomic status, and social exclusion significantly influence overall health status as well.[4] These factors tend to be interrelated and contribute to disparities among, as well as within, groups.

Why address the social determinants of health?

Creating a framework that incorporates the social determinants of health can provide a more complete picture of why people become ill initially, and, moreover, what it will take to restore their health. It recognizes the value of equity and social justice as essential to staying healthy and accessing quality health care. Policy changes to alleviate the social determinants of health, such as poverty, racism, violence and access to resources, can have a far reaching impact on improving the health of a community, state or county. Addressing only the symptoms of illness and ignoring its root cause will not improve population health.

Facts at a glance

- Approximately 3.5. million individuals are homeless in America.[5]
- In the U.S., 44 million people are living in poverty and 41.3 million are using food stamps.[6]
- Children living in poverty are seven times more likely to have poor health than children in higher income households.[7]
- With a prison population of 2.3 million, we now have the highest rate of incarceration in the world.[8]
- Approximately 30 percent of LGBT youth report having been physically abused by family members because of their sexual orientation, gender identity or expression.[9]
- LGB individuals had a 1.5 times higher risk for depression and anxiety disorders over a period of 12 months or a lifetime than heterosexual individuals.[10]
- African Americans are 30 percent more likely to report having serious psychological distress than non-Hispanic Whites.[11]
- In 2007, Hispanics were 3 times more likely to be uninsured than non-Hispanics.[12]
- American Indians and Alaska Natives have an infant death rate 40 percent higher than the rate for Caucasians.[13]
- American Indian/Alaska Native adults were 2.3 times as likely as white adults to be diagnosed with diabetes.[14]
- In 2006, adults with less than a high school degree were 50 percent less likely to have visited a doctor in the past 12 months compared to those with a bachelor's degree.[15]
- Only 33 percent of disadvantaged fourth-graders are proficient readers at grade level.[16]
- Poor Mexican-American children ages 2 to 9 have the highest proportion of untreated decayed teeth (70.5 percent), followed by poor non-Hispanic black children (67.4 percent).[17]

ADDRESSING THE SOCIAL DETERMINANTS OF HEALTH

Who should address social determinants of health?

Social determinants of health should be addressed by groups of all different kinds, including but not limited to:

- Policy Makers
- State Health Directors
- Communities

Language of Social Determinants	
Health	a state of complete physical, mental, and social well-being and not just the absence of illness
Social Exclusion	a multidimensional process of progressive social rupture, detaching groups and individuals from social relations and institutions and preventing them from full participation in the normal, normatively prescribed activities of the society in which they live
Oppression	the exercise of authority or power in a burdensome, cruel, or unjust manner
Acculturation	cultural modification by an individual, group or community by adapting to or borrowing traits from another culture
Social Gradient	the extent of the difference in wealth and opportunity between those with the most and those with the least
Structural Racism	the differential access to the goods, services, and opportunities of society. Generally, there is no sole, true identifiable perpetrator; when racism is built into the institution, it appears as the collective action of the population
Social Capital	the fabric of a community and the community pool of human resources available
Income Inequality	unequal distribution of household or individual income across the various participants in an economy
Health Inequity	a difference or disparity in health outcomes that is systematic, avoidable, and unjust
Health Disparities	differences in health outcomes between groups that reflect social inequalities
Health Literacy	whether a person can obtain, process, and understand basic health information and services that are needed to make appropriate health decisions; also requires complex group of reading, listening, analytical, and decision-making skills

Key Messages for Everyone

- Social determinants of health are the primary determinants regarding whether individuals stay healthy or become ill
- The larger the gap in health disparities, the more the overall health status of entire populations is reduced
- The larger the difference in health status between the healthiest and least healthy in a community the lower the overall health status of the population.
- Assess the community with the community using a community-based participatory approach (community engagement)
- Significant health inequalities persist among and within minority groups
- Equity & social justice are the cornerstones of health

MHA
Mental Health America

Tips for Policymakers

1. Lawmakers should consider the impact of social determinants of health as a framework when developing policies.
2. Public policies should be developed that promote equitable access to important social and material resources.
3. Policies that promote social inclusion and acceptance of diverse communities should be pursued.
4. Consider the social determinants of health as a guide for the development of policies for behavioral health prevention that call for multi-agency partnerships or collaboration.
5. Key decision-makers can use this information to coordinate with foundations and other stakeholders in identifying solutions.

Tips for State Health Directors

1. Encourage state public health departments to partner with their state behavioral health program directors to guide implementation of evidence-based programs using the social determinants of health (e.g., parks, other recreational areas, the Good Behavior Game, et al).
2. Incorporate behavioral health into a broader public health state plan using social determinants of health to guide the drafting of the plan. The social determinants can be used as a frame of reference to get behavioral health folded into broader public health goal(s) of states.
3. To facilitate and provide support to the state health directors working with other agencies to be cognizant regarding the impact of the social determinants of health.
4. Address unequal access to health care in all aspects of policy including:
   - Location of clinical facilities
   - Culturally appropriate outreach to populations who are known to underutilize health care
   - Assure that lower income first-time mothers have access to a visiting nurse service
5. Educate political leadership regarding the importance of addressing problems of poverty, racism and social exclusion for the health and productivity of the population.
6. Reach out to the leadership of other components of state government to address the multiple social determinants (education, safe housing, healthful food) known to drive population health.

Tips for Communities

1. Raise awareness of the importance of the social determinants of health and their impact on individuals and communities.
2. Pursue policies to assure that healthful food, safe housing and living wages are available to everyone in the community.
3. Support community activities to build social networks among individuals who represent differing racial or ethnic groups.

Subject: [epro_users] Apple ePro Online Store - Down for Upgrade 5/10/13

Apple ePro Online Store - Down for Upgrade

Friday, May 10 @ 10:00pm PST (Saturday, 5/11 1am EST) to Sunday, May 12 @ 8:00am PST (11am EST)

The Apple online store will be down during the weekend of 5/10 for an upgrade. Users trying to launch the eProcurement online store will receive a message that the store is down. Any orders sent to Apple for processing will be put in a queue, and will be processed after the upgrade is complete.

If you have problems with or questions about ePro, contact the Help Desk by calling 962-HELP or by creating a help request from the UNC website. In the "Type of Help Needed" field, choose CONNECTCAROLINA_ePROCUREMENT so that your request is routed correctly.

To view a variety of training options and materials, visit the ConnectCarolina ePro training page at http://finance.unc.edu/training/#epro.

Webinar Overview

There are 38 million working-age Americans (22 percent) who have some college credits but no degree, currently placing the U.S. in 10th ranking in the numbers of its citizens earning two- and four-year degrees. At the same time, 60 percent of jobs in the U.S. will require a college degree by 2025. The pipeline of young college graduates will not meet workforce skills demands. The goal of this webinar is to present data and information on who these adults are, what the prospects are for attracting them back to college to finish what they began, and what steps colleges and universities must take to shape their marketing, programs, and services.

In this webinar, Carol Aslanian will present the findings and implications from several regional studies focusing on understanding the demands and preferences of adult students with some college credit but no degree. Participants will be able to apply the demographic profile and preference data to their marketing and outreach efforts to this market pool and advocate for adjustments to programs and services to better meet adult student demand.

Webinar Objectives

Participants will:

- Identify high-demand majors and non-degree options
- Create attractive and academically viable credit transfer/acceptance policies
- Plan innovative marketing and outreach techniques
- Launch an effective web strategy
- Discuss guiding principles that aid in serving adults (multiple class formats, transfer credit policies)
- Offer manageable admissions/enrollment processes
- Choose the right mix of course and program formats
- Offer the academic and student services most in need
- Focus messages on "time to completion"
- Learn about reasons adults had to leave their earlier studies and what would motivate them to return
- Identify institutional policies and practices that can help bring adults back

Webinar Speaker(s)

Carol Aslanian is known nationally as an authority on adult higher education. She has created market studies and institutional audits for colleges, and has developed partnerships between them and employers.

A Step-By-Step Guide To Creating A Quality Veterans

Carol served as director of the Office of Adult Learning Services at the College Board for more than 20 years, and also helped the Board enhance its services to community colleges. As principal of the Aslanian Group, founded in 2000, she worked with learners, corporate partners, and institutions to identify new educational options. Her market research studies have helped hundreds of colleges and educational consortia expand their programs to meet the educational needs of working adults.

The author of a number of landmark reports and professional papers on adult learning, Carol has received several national awards for her contributions to the fields of community service and continuing education. She has served on the boards or committees of such groups as the American Marketing Association, the Nontraditional Students Report Board of Advisors, and Elderhostel.

Carol Aslanian holds degrees from Cornell University and Harvard University.

Subject:	FORMAL NOTICE: 2014 Holiday Schedule

TO: Deans, Directors, and Department Heads
FROM: Brenda R. Malone, Vice Chancellor for Human Resources

The State Personnel Act provides all State employees a holiday schedule that cannot exceed 11 paid holidays per year, except in those years in which Christmas Day falls on a Tuesday, Wednesday or Thursday - when the schedule allows 12 paid holidays. For 2014, Christmas Day falls on a Thursday; therefore, we have three paid holidays at Christmas (a total of 12 for the year).

UNC System institutions are also allowed to adjust the dates of the annual holidays to accommodate the academic schedule. Traditionally, UNC-Chapel Hill has moved only the State's Veterans Day holiday into the winter break period (between Christmas holiday and the New Year's (Eve) holiday period). For next year, 2014, the University will observe Wednesday, December 31, as a holiday in lieu of Veterans Day.

It is noted that some departments have essential work that must be done on designated holidays. SPA employees who work on holidays are paid holiday premium pay, in addition to hour for hour compensatory time up to 8 hours.

The 2014 holiday schedule is as follows:

* New Year's Day -- Wednesday, January 1, 2014
* Martin Luther King Jr. Day -- Monday, January 20, 2014
* Spring Holiday -- Friday, April 18, 2014
* Memorial Day -- Monday, May 26, 2014
* Independence Day -- Friday, July 4, 2014
* Labor Day -- Monday, September 1, 2014
* Thanksgiving -- Thursday, November 27, and Friday, November 28, 2014
* Winter Break -- Wednesday, December 24, Thursday, December 25 and Friday, December 26, 2014
* New Year's Eve -- Wednesday, Dec. 31, 2014

11 Things You Need to Do Now That the NCAA Has Put Recruiting Reform On Hold

As has happened before, the NCAA has slammed on the breaks and skidded off to the shoulder of the road right before taking the proverbial exit towards recruiting communication reform.

The proposed rules would have allowed a greater variety of contact over longer periods of time, starting sooner. Some coaches and conferences objected to the new rules, and the NCAA **announced** that they were going to take a longer look at the impact of the proposed changes.

Of course, many upper division coaching staffs are already recruiting Freshmen and Sophomores and desperately trying to find better ways to communicate with them. This latest chapter in the ever-increasing trend of early recruiting just means that club and AAU coaches will continue to exert significant influence over the process as they maintain their cherished roles as gatekeepers in your quest to get verbal commitments from top quality pre-driver's license teenagers before your buddies down the street can get their commitment.

Regardless of your position on whether the reforms were good or bad for college sports, one fact

remains: You need to contact young recruits before you can tell your story in a traditional way through phone calls, emails and letters. With that in mind, here's a list of what we recommend for coaches who need to continue to recruit prospects using **Macgyver-like tricks** to lure the right kid to campus:

- **Pretend the new rules are in place.** Try to find creative, legal ways to brand your program early with a focus on prompting communication. Specifically, the younger prospects reaching out to contact you.
- **Social media is big, but it's not the secret formula.** It's a great way to reach out and have simple back-and-forth conversations with a recruit, but it currently has limits on how well it can give them the logical reasons to choose you. Use it to set-up contact, but continue to...

3 Tips for Managing Your Coaching Energy

by Mike Davenport, CoachingSportsToday.com

Time-management is everywhere.

Books and blog posts abound with a wealth of tricks to squeeze a few more workable minutes out of your day.

But none of those are any good to you if you sit down exhausted and your head bounces off your desk after a long day of coaching and managing your program. If you're blurry-eyed and nodding off at 4pm, you can imagine how good your afternoon practice is going to be.

So forget time-management. Let's talk energy-management instead. Personal energy - the type of energy you need to get through your coaching day...

Speaker Line-Up For 2013 Nat'l Collegiate Recruiting Conference Announced!

If you're attending the 2013 National Collegiate Recruiting Conference in Charlotte, North Carolina on June 7-9, you're going to hear the *best* collection of speakers and experts we've ever assembled.

We're proud to announce the line-up, and will update it if changes or additional speakers are added!

To attend the conference, **click here**.

FRIDAY

Dan Tudor - The founder of the NCRC event will kick-off

the weekend with the annual "State of Recruiting" talk, setting the agenda for the weekend

Dan Wolken, USA Today - One of the rising stars in college sports reporting will talk about recruiting trends, coaches who are doing it right, and what he forecasts for the evolving world of college recruiting.

Dr. Mike Davenport - A successful rowing coach and expert in the intricacies of successful mentoring, Coach Davenport will talk about how to make sure your coaching career is strong and sustainable for the long haul. Be ready to be challenged in the way you approach your career!

Jan Stuebbe - Author of "How to Be a Lousy Leader", Coach Stuebbe will give insights from a unique athletic and coaching life that saw him in a leadership position since he was a Freshman in high school. He's always been a starter, a head coach, and leading a junior college program as athletic director. These lessons are unforgettable - you'll want him to talk to your team about leadership, too!

Rob Jones - Whatever obstacle you're facing as a coach, be prepared to be humbled and amazed at the story of Rob Jones. Featured earlier in Sports Illustrated this year, Jones' life journey - as a soldier and as an athlete - will amaze you. His session will touch every aspect of your coaching and recruiting life...

CLICK HERE TO SEE THE REST OF THE LINE-UP!

Want a sneak peek at the incredible learning experience our NCRC attendees get? Check out this special look-in at one of last year's popular speakers, Coach Adam Martel and his fascinating talk, "D1 Recruiting on a D3 Budget".

New Verified Prospects Hit National Database Used by College Coaches

When one class graduates, thousands of other prospects enter the recruiting game.

That's what has happened over the last few weeks at **NCSA Athletic Recruiting**. Their databases of verified prospects have been swelling as new information pours in about 2014, 2015 and 2016 recruits. Likewise, the college coaches that are registered to use the free system have been getting a jump on their competition by contacting

those recruits first and evaluating younger prospects early to determine their Summer scouting itineraries.

Have you seen the upgrades to the NCSA Athletic Recruiting system for college coaches? It's impressive, Coach. Take a minute to see what new recruits are waiting in your sport...

O'Bannon Lawsuit Against the NCAA Gains Steam, Raises Serious Questions

Courtesy Bloomberg View

The storm that's slowly rolling toward Indianapolis quietly gained strength this week with the filing of several devastating documents in a federal court in California.

If it stays on course, it's going to hit with biblical force, reducing the National Collegiate Athletic Association to a heap of rubble.

This storm is also known as O'Bannon v. NCAA. It's an antitrust lawsuit filed in 2009 by former UCLA All-American basketball player Ed O'Bannon and a handful of other ex-college athletes, who don't think the NCAA should be profiting from their names and images without sharing the royalty payments...

NFF Proudly Announces Stellar 2013 College Football Hall of Fame Class

12 players and two coaches from the Football Bowl Subdivision to enter college football's ultimate shrine.

NEW YORK, May 7, 2013 – From the national ballot of 77 candidates and a pool of hundreds of eligible nominees, The National Football Foundation & College Hall of Fame announced today the 2013 College Football Hall of Fame Football Bowl Subdivision Class, which includes the names of 12 First-Team All-America players and two legendary coaches.

2013 COLLEGE FOOTBALL HALL OF FAME CLASS

ers
· **TED BROWN** – TB, North Carolina State (1975-78)
· **TEDY BRUSCHI** – DE, Arizona (1992-95)
· **RON DAYNE** – RB, Wisconsin (1996-99)
· **TOMMIE FRAZIER** – QB, Nebraska (1992-95)
· **JERRY GRAY** – DB, Texas (1981-84)
· **STEVE MEILINGER*** – E, Kentucky (1951-53)
· **ORLANDO PACE** – OT, Ohio State (1994-96)
· **ROD SHOATE (deceased)** – LB, Oklahoma (1972-74)
· **PERCY SNOW** – LB, Michigan State (1986-89)
· **VINNY TESTAVERDE** – QB, Miami, Fla. (1982, 1984-86)
· **DON TRULL** – QB, Baylor (1961-63)
· **DANNY WUERFFEL** – QB, Florida (1993-96)
* Selection from the FBS Veterans Committee

Coaches
· **WAYNE HARDIN** – 118-74-5 (61.2%); Navy (1959-64) and Temple (1970-82)
· **BILL McCARTNEY** – 93-55-5 (62.4%); Colorado (1982-94)

"We could not be more proud to announce the 2013 College Football Hall of Fame Class," said **Archie Manning**, NFF Chairman and a 1989 College Football Hall of Famer from Ole Miss. "These players and coaches are some of the greatest to have ever participated in our sport, and we offer our most sincere congratulations to each of them for this incredible achievement. **Gene Corrigan** and the NFF Honors Court deserve the utmost respect for selecting another tremendous group of inductees."

The 2013 College Football Hall of Fame Football Bowl Subdivision (FBS) Class will be inducted at the 56th NFF Annual Awards Dinner on December 10, 2013, at the Waldorf=Astoria in New York City. They will be honored guests at the National Hall of Fame Salute at the Allstate Sugar Bowl in New Orleans on January 2, 2014 and officially enshrined in the summer of 2014.

Today's announcement was made from The NASDAQ OMX MarketSite in Times Square, which has hosted the event for the past five consecutive years. XOS Digital produced the NFF digital broadcast for the third consecutive year, and ESPN3 carried the event live for the third year as well.

· **23** First-Team All-Americans coached (Hardin – 5, McCartney – 18)
VEN major award winners coached (Hardin – Joe Bellino, Steve Joachim, Roger Staubach; McCartney – Deon Figures, Chris Hudson, Rashaan Salaam, Alfred Williams)
REE NFF National Scholar-Athletes coached (Hardin – Joe Ince, Navy; McCartney – Jim Hansen (Campbell Trophy), Eric McCarty)

SELECTION CRITERIA

:st and foremost, a player must have received First Team All-America recognition by a selector organization that is recognized by the NCAA and utilized to comprise their consensus All-America teams.

2. A player becomes eligible for consideration by the Foundation's honors courts ten years after his final year of intercollegiate football played.

3. While each nominee's football achievements in college are of prime consideration, his post football record as a citizen is also weighed. He must have proven himself worthy as a citizen, carrying the ideals of football forward into his relations with his community and fellow man. Consideration may also be given for academic honors and whether or not the candidate earned a college degree.

4. Players must have played their last year of intercollegiate football within the last 50 years*. For example, to be eligible for the 2013 ballot, the player must have played his last year in 1963 or thereafter. In addition, players who are playing professionally and coaches who are coaching on the professional level are not eligible until after they retire.

5. A coach becomes eligible three years after retirement or immediately following retirement provided he is at least 70 years of age. Active coaches become eligible at 75 years of age. He must have been a head coach for a minimum of 10 years and coached at least 100 games with a .600 winning percentage*.

* Players that do not comply with the 50-year rule may still be eligible for consideration by the Football Bowl Subdivision and Divisional Honors Review Committees, which examine unique cases.

COLLEGE FOOTBALL HALL OF FAME QUICK FACTS

· Including the 2013 FBS class, only 930 players and 202 coaches, have been inducted into the College Football Hall of Fame from the nearly 4.92 million who have played or coached the game during the past 144 years. In other words, only two one-hundredths of one percent (.0002) of the individuals who have played the game have been deemed worthy of this distinction.

· Founded in 1947, The National Football Foundation & College Hall of Fame inducted its first class of inductees in 1951. The first class included 32 players and 19 coaches, including Illinois' Red Grange, Notre Dame's Knute Rockne, Amos Alonzo Stagg and Carlisle's Jim Thorpe.

· 294 schools are represented with at least one College Football Hall of Famer.

· Induction for this class of Hall of Famers will take place **December 10, 2013** at the 56th NFF Annual Awards Dinner in New York City's historic Waldorf=Astoria.

TED BROWN
North Carolina State
Tailback, 1975-78

One of the truly great runners of his era, Ted Brown dominated the Atlantic Coast Conference in the late 1970's. He becomes the fifth member of the Wolfpack to enter the College Football Hall of Fame.

Brown left Raleigh as the most accomplished rusher in ACC history, holding the league's career records for rushing yards (4,602) and touchdowns (51) – marks which he still holds today. The 1978 consensus First-Team All-America led N.C. State to three bowl games, including victories in the 1977 Peach Bowl and 1978 Tangerine Bowl, in which he garnered MVP honors. He capped off his senior year by rushing for his third consecutive 1,000-yard season and amassing 27 career 100-yard games. He was the first player in league history to earn First-Team All-ACC distinction all four years and was named

the conference's Rookie of the Year in 1975. Brown played under legendary Hall of Fame Coach Lou Holtz and coach Bo Rein.

The High Point, N.C., native was chosen in the first round of the 1979 NFL Draft by the Minnesota Vikings. He spent eight years in the professional ranks, all with the Vikings. He finished his career as the fifth-leading rusher in franchise history (4,546 yards and 53 TDs).

He currently works as a juvenile probation officer in the Ramsey County (Minn.) court system and enjoys helping at-risk youth throughout the state. Brown was a 1995 inductee into the North Carolina Sports Hall of Fame, and his No. 23 jersey was the first football jersey retired at N.C. State.

TEDY BRUSCHI
University of Arizona
Defensive End, 1992-95

One of the most feared defenders of his era as a member of the storied "Desert Swarm" defense, Tedy Bruschi concluded his career at Arizona tied for the NCAA FBS record in career sacks with 52 quarterback takedowns. He becomes the fourth Wildcat to enter the College Football Hall of Fame.

A two-time All-American (1994 – consensus, 1995 – unanimous), Bruschi's celebrated senior season included the 1995 Pac-10 Defensive Player of the Year title and winning the Morris Trophy as the league's best defensive lineman. He was a two-time finalist for the Lombardi Award and graduated with 74 tackles for loss, which ranked sixth in FBS history. Bruschi was named all-conference three times, and he led the Wildcats to three bowl berths under coach Dick Tomey.

The San Francisco native was a third-round selection by the New England Patriots in the 1996 NFL Draft. Bruschi enjoyed a 13-year career, winning three Super Bowls with the franchise. The Pro Bowler was named the *Associated Press'* Comeback Player of the Year in 2005 following a stroke.

A committed spokesman and advocate for stroke survivors, Bruschi founded Tedy's Team, in conjunction with the American Stroke Association, which has raised more than $1.5 million. He wrote a book, "Never Give Up: My Stroke, My Recovery, and My Return to the NFL," detailing his NFL comeback after his own stroke in 2005. Bruschi is also an active participant in the Make-A-Wish Foundation, granting wishes for numerous children through the organization. Bruschi currently works as an NFL analyst on ESPN.

RON DAYNE
University of Wisconsin
Running Back, 1996-99

Concluding his career with 7,125 career rushing yards, Wisconsin's Ron Dayne set a new standard for running backs when he became the all-time leading rusher and first player to reach the 7,000-yard plateau in FBS history during the 1999 season. Dayne becomes the eighth Badger to be inducted into the College Football Hall of Fame.

Dayne won the 1999 Heisman Trophy in a landslide, after topping the 2,000-yard mark for the second time in his career. The three-time First-Team All-America (1997, 1998 – consensus, 1999 – unanimous) also claimed the Walter Camp, Maxwell and Doak Walker awards, and he was named the National Player of the Year by numerous outlets his senior season. He led the Badgers to four consecutive bowl games, earning MVP honors in three of those appearances, including back-to-back Rose Bowl titles in 1999 and 2000. The Big Ten's first three-time rushing champion in league history, Dayne led Wisconsin to two conference titles under Hall of Fame Coach Barry Alvarez.

Drafted in the first round of the 2000 NFL Draft by the New York Giants, Dayne played seven seasons in the pro ranks with the Giants, Broncos and Texans. He helped New York to a 2001 Super Bowl appearance.

The Berlin, N.J., native was inducted into the Rose Bowl Hall of Fame in 2011, and he became a member of the University of Wisconsin Athletics Hall of Fame in 2009. Dayne actively volunteers in numerous community events and fundraisers, placing a special emphasis on initiatives involving children or children's groups and serving as an ambassador for the University of Wisconsin.

TOMMIE FRAZIER
University of Nebraska
Quarterback, 1992-95

A legend among legends in a long line of transcendent Big Eight quarterbacks, Tommie Frazier helped College Football Hall of Fame coach Tom Osborne and Nebraska to back-to-back perfect national championship seasons in 1994 and 1995. He becomes the 16th Cornhusker to enter the College Football Hall of Fame.

The 1995 consensus First-Team All-American and Johnny Unitas Award winner was runner-up for the 1995 Heisman Trophy and a finalist for the Walter Camp and Maxwell awards. Frazier led Nebraska to four consecutive bowl appearances, claiming MVP honors in the 1995 Orange and 1996 Fiesta bowls en route to the national title. Frazier missed seven games during the 1994 season due to blood clots, but the junior was able to return and direct Nebraska's come-from-behind win over Miami in the national title game. The 1995 Big Eight Player of the Year set a conference record with a 33-3 overall career record as a starter. Frazier won the Big Eight title in all four of his seasons, posting three straight years of undefeated league play.

Frazier played for the Montreal Alouettes of the Canadian Football League in 1996 before trying his hand at the coaching profession. He coached at Baylor and Nebraska before being named the 32nd head coach at Doane College (Neb.), spending two seasons at the school.

Coached by legendary Hall of Famer Tom Osborne, Frazier was named to *Sports Illustrated*'s All-Century Team, and his jersey has been retired by Nebraska. Following his football days, the Bradenton, Fla., native settled in Omaha, Neb., where he works for a healthcare foundation.

JERRY GRAY
University of Texas
Defensive Back, 1981-84

Known as one of the fiercest defensive stalwarts of the old Southwest Conference, Jerry Gray was instrumental in helping the Texas defense shut down some of the decade's most high-powered offenses. He becomes the 15th Longhorn to be selected to the College Football Hall of Fame.

A two-time First-Team All-American (consensus – 1983, unanimous – 1984), Gray led Texas to four consecutive bowl

games, including a 1982 Cotton Bowl victory and a No. 2 final national ranking. He was a two-time Southwest Conference Player of the Year (1983, 1984), and he helped the Longhorns win the 1983 conference title under coach Fred Akers. The two-time team MVP recorded 297 career tackles, 16 interceptions, and 20 pass breakups during his time in Austin.

Taken in the first round of the 1985 NFL Draft by the Los Angeles Rams, Gray enjoyed a nine-year career, playing for the Rams, Houston Oilers and Tampa Bay Buccaneers and appearing in four Pro Bowls. Following his playing days, Gray spent time as a position football coach in both the college and professional ranks. He has served as the defensive coordinator for the Tennessee Titans since the 2011 season.

The Lubbock, Texas, native established the Jerry Gray Foundation for underprivileged youth, which provides athletic and academic scholarships. He also founded and coordinated the Jerry Gray/Young Life Skills and Leadership Football Camp, and he is active in the Boys and Girls Club of Orchard Park and the United Way. Gray became a member of the Longhorn Hall of Honor in 1996.

STEVE MEILINGER
University of Kentucky
End, 1951-53

One of the most acclaimed two-way stars of the mid-20th century, Steve Meilinger gained fame as "Mr. Anywhere" for his versatility and value to the Kentucky football program. He becomes the fourth Wildcat to be inducted into the College Football Hall of Fame.

The two-time First-Team All-America (1952, 1953) selection, under Hall of Fame head coach Bear Bryant, Meilinger led Kentucky to victory in the 1952 Cotton Bowl over TCU. The three-year All-Southeastern Conference honoree played end, halfback and quarterback on offense, while covering end, linebacker and defensive back on defense. He also served as the Wildcats' two-year starting punter while returning punts and kickoffs.

A first round selection by the Washington Redskins in the 1954 NFL Draft, Meilinger played six seasons in the league for the Redskins, Green Bay Packers and Pittsburgh Steelers. He spent the entirety of his non-football life in military or public service. Immediately following his selection by the Redskins, Meilinger served two years as a tank commander in the U.S. Army's 100th Tank Battalion of the 1st Armored Division before embarking on his pro football career. From 1962-83, Meilinger was a United States Marshal, and he was one of the original six marshals who founded the U.S. Federal Witness Protection Program. He also served two stints as a property valuation officer for the state of Kentucky.

The Bethlehem, Pa., native is a member of the State of Kentucky Athletic Hall of Fame, the University of Kentucky Athletic Hall of Fame, the Fork Union Military Academy Hall of Fame, the Lehigh Valley (Penn.) Hall of Fame and the Liberty High School Hall of Fame.

ORLANDO PACE
Ohio State University
Offensive Tackle, 1994-96

Known as the "Pancake Man" for flattening his opponents with his exceptional blocking techniques, Orlando Pace finished fourth in the 1996 Heisman balloting, the highest finish for a lineman since 1980. Pace becomes the 24th Buckeye to be inducted into the College Football Hall of Fame.

A two-time unanimous First-Team All-American (1995, 1996), Pace was the first player in history to repeat as the Lombardi Trophy winner, earning the honors as a sophomore and junior. In addition, Pace claimed the 1996 Outland Trophy while leading Ohio State to a share of the Big Ten title. He did not allow a sack during his final two seasons, blocking for Hall of Fame and 1995 Heisman Trophy-winning running back Eddie George as well as NFF Campbell Trophy winner Bobby Hoying. The 1996 Big Ten Offensive Player of the Year started every game of his career, and he led the Buckeyes to three straight bowl appearances under Hall of Fame coach John Cooper.

Chosen with the first overall pick by the St. Louis Rams in the 1997 NFL Draft, Pace enjoyed a decorated 13 seasons in the league, culminating with the Rams' Super Bowl XXXIV Championship in 1999. Pace was named All-Pro five times, and he earned seven Pro Bowl selections.

The Sandusky, Ohio, native has been a spokesman for Our Little Haven's 'Safe & Warm' expansion project since 1998, and he assists with the efforts for the Diversity Awareness Partnership. Pace also regularly purchases NFL tickets for underprivileged youth.

ROD SHOATE
University of Oklahoma
Linebacker, 1972-74

Combining the speed of a running back with exceptional strength, Rod Shoate became a dominant defensive force at perennial football powerhouse Oklahoma in the early 1970s. Shoate becomes the 20th Sooner to enter the College Football Hall of Fame.

A two-time First-Team All-American (consensus – 1973, unanimous – 1974), Shoate guided OU to a perfect 11-0 season and the National Championship in 1974, building on a 10-0-1 record the year before. The Sooners went 29-4-1 during Shoate's career, never finishing with a national ranking lower than No. 3. He was twice named the Big Eight Defensive Player of the Year as the Sooners claimed the conference crown in each of those seasons. As a freshman, he led Oklahoma to a 14-0 shutout of Penn State in the 1972 Sugar Bowl.

Shoate led the Sooners in tackles for three straight seasons and currently ranks sixth in school history with 420 career tackles. He was the second player in OU annals to be named a three-time All-American (Second Team, 1972) while playing for coach Chuck Fairbanks and Hall of Fame coach Barry Switzer.

Picked by New England in the second round of the 1975 NFL Draft, Shoate enjoyed a six year career with the Patriots before playing two seasons in the USFL. The Spiro, Okla., native passed away on Oct. 4, 1999.

PERCY SNOW
Michigan State University
Linebacker, 1986-89

The first player in college football history to win both the Butkus and Lombardi trophies in the same season, Percy Snow served as the backbone of Michigan State's famed "Gang Green" defense in the late 1980s. Snow becomes the seventh Spartan to enter the College Football Hall of Fame.

Voted a unanimous First-Team All-American selection as a senior, Snow led the team in tackles for three consecutive seasons, and he still ranks second all-time in total tackles (473) at MSU. Snow was a three-time all-conference selection, helping the Spartans to the 1987 Big Ten title and a 1988 Rose Bowl win in which he earned MVP honors after recording 17 tackles against Southern California. He also led MSU to the Gator and Aloha bowls under head coach George Perles after the 1988 and 89 seasons, respectively. The winner of the MSU "Governor of Michigan" award as the team MVP, he reached double figures in tackles 11 times as a senior, including a career-high 23 versus Illinois.

Selected in the first round of the 1990 NFL Draft by Kansas City, Snow played in the NFL for four seasons with the Chiefs and Chicago Bears.

Active in the community, he has volunteered as an assistant coach for a little league tlag football team, and he has served as a longtime assistant coach in the Babe Stern Youth Baseball League. The Canton, Ohio, native was inducted into the Michigan State Hall of Fame in 2010.

VINNY TESTAVERDE
University of Miami
Quarterback, 1982, 1984-86

One of the most celebrated players in a Hurricane program stocked with mythical talent, Miami's Vinny Testaverde claimed virtually every major award during his senior season in 1986. He becomes the sixth Hurricane to be inducted into the College Football Hall of Fame.

As a senior, Testaverde earned unanimous First-Team All-American honors, and he won the Heisman Trophy, the Walter Camp Player of the Year, Maxwell, Davey O'Brien and UPI Player of the Year awards. He led the Canes to three consecutive bowls, including the 1987 Fiesta Bowl National Championship game. He finished his collegiate career with more than 6,000 passing yards and 48 touchdown passes, and he still ranks in the top five in virtually every passing category in school history. Testaverde, who was a redshirt on Miami's 1983 national championship team, went 23-3 as a starter playing for legendary coaches Howard Schnellenberger and Hall of Famer Jimmy Johnson.

Tampa Bay selected Testaverde as the No. 1 overall selection in the 1987 NFL Draft, and his pro career spanned 21 seasons with seven different teams. The 1998 All-Pro and two-time Pro Bowl selection finished his NFL career seventh all-time in passing yards (46,233) and eighth in touchdowns (275).

The Elmont, N.Y., native currently resides in Florida where he plays an active role with the Children's Cancer Center of Tampa. Testaverde remains among only four Hurricanes to have their jerseys retired at Miami.

DON TRULL
Baylor University
Quarterback, 1961-63

Passing for more than 4,000 yards and 27 touchdowns in his career, Don Trull left an indelible mark on the Baylor record books while becoming the school's first-ever NFF National Scholar-Athlete. Trull becomes the seventh Bear to enter the College Football Hall of Fame.

A 1963 First-Team All-American and First-Team All-Southwest Conference selection, Trull led the nation in touchdowns and passing yards his senior season. He was a two-time winner of the Sammy Baugh Award for leading the country in completions (1962, 1963), and he finished fourth in Heisman Trophy voting as a senior. A trailblazer on the field and off, Trull became Baylor's first two-time First-Team Academic All-American honoree in 1962 and 1963 as well as the school's first NFF National Scholar-Athlete (1963). Trull led the Bears to the 1961 Gotham Bowl and the 1963 Bluebonnet Bowl under coach John Bridges.

The Oklahoma City native enjoyed an eight-year career in the professional ranks, playing for the Houston Oilers and Boston Patriots as well as the CFL's Edmonton Eskimos. Following his playing days, he served as an assistant coach at Arkansas from 1972-74.

Trull is the 2013 president-elect for the NFF Touchdown Club of Houston Chapter. His many other roles include NFL Alumni Director, vice chairman of the Houston Livestock Show and Rodeo and a member of the Fort Bend County Water Board of Directors. Trull is a Baylor Hall of Fame inductee, and he was named to the school's all-decade team.

DANNY WUERFFEL
University of Florida
Quarterback, 1993-96

The first player in history to win the Heisman as well as the NFF's William V. Campbell Trophy, Danny Wuerffel dominated the college football landscape both athletically and academically during his senior season. He becomes the seventh Gator to enter the College Football Hall of Fame.

A two-time First-Team All-American, Wuerffel claimed the 1996 Heisman Trophy, Walter Camp Player of the Year, Maxwell Award, Davey O'Brien Award, Unitas Golden Arm and the Sammy Baugh Trophy. The two-time SEC Player of the Year and First-Team All-SEC selection posted a 45-6-1 career mark, leading the Gators to the 1996 National Championship. Wuerffel finished his career with nearly 11,000 passing yards and 33 school records, taking Florida to bowl games in each of his four seasons under coach Steve Spurrier (a 1986 Hall of Fame player inductee himself also at Florida). In addition to the 1996 Campbell Trophy, Wuerffel was named a two-time Academic All-American and two-time Scholar-Athlete of the Year. He now becomes the first winner of the Campbell Trophy to enter the College Football Hall of Fame.

The Ft. Walton, Fla., native was drafted in the fourth round of the 1997 NFL Draft by New Orleans, and spent six season in the league with the Saints, Packers, Bears and Redskins.

Wuerffel became executive director of Desire Street Ministries after Hurricane Katrina, currently leading the organization's various community outreach activities. He was a presidential appointee to the White House Council for Service and Civic Participation from 2006-08; a member of the Board of Directors for Professional Athletes Outreach; and a national spokesman for Caps Kids. As the quintessential student-athlete and humanitarian, the All Sports Association established the Wuerffel Trophy in 2005, which recognizes a college football player for his exemplary community service.

WAYNE HARDIN
United States Naval Academy, Temple University
Head Coach, 118-74-5 (61.2%)

The most successful coach in Temple football history and the coach of Navy's only two Heisman Trophy winners, Wayne Hardin created a Hall of Fame career, leading the Midshipmen and Owl programs to unprecedented accomplishments.

Navy's head coach from 1959-64 Hardin coached Hall of Famers and Heisman Trophy winners Joe Bellino (1960) and Roger Staubach (1963). Hardin ranks fifth all-time at Navy in wins (38), and his teams beat archrival Army in five of his six seasons. His five consecutive defeats of Army stood unsurpassed until 2007. He took Navy to the 1960 Orange Bowl and the 1963 Cotton Bowl, and he twice led the Midshipmen to a top five ranking (No. 4, 1960 and No. 2, 1963). He also coached NFF National Scholar-Athlete Joe Ince (1963).

The all-time leader in wins at Temple, Hardin served as head coach of the Owls from 1970-82. He led Temple to its only 10-win season in program history during the 1979 season, finishing at No. 17 in both major polls and beating favored California in the Garden State Bowl. Hardin also mentored Owl quarterback Steve Joachim who led the nation in total offense and won the Maxwell Trophy in 1973.

Hardin attended the College of the Pacific, playing football for College Football Hall of Fame coach Amos Alonzo Stagg. A 1998 Pacific Athletics Hall of Fame inductee, Hardin earned 11 varsity letters before graduating college in 1948.

BILL McCARTNEY
University of Colorado
Head Coach, 93-55-5 (62.4%)

The Colorado head coach from 1982-94, Bill McCartney guided the Buffaloes to their first national title and to more bowl games than any other coach in CU football history.

McCartney and the Buffs finished in the Top 20 in each of his last six seasons in Boulder, including the 1990 national crown and back-to-back appearances in the 1989 and 1990 title games. He claimed unanimous 1989 National Coach of the Year honors, and his extraordinary accomplishments include leading the Buffs to nine bowls in 13 seasons and to three Big Eight titles. His 1988-92 teams went 25 consecutive games (23-0-2) without a loss in league play, the fourth-longest streak in conference history.

McCartney coached 1994 Heisman Trophy winner Rashaan Salaam; Hall of Famer and 1990 Butkus winner Alfred Williams; two Jim Thorpe award winners, Deon Figures (1992) and Chris Hudson (1994); 1992 Campbell Trophy winner Jim Hansen; and 1987 NFF National Scholar-Athlete Eric McCarty.

The three-time Big Eight Coach of the Year was inducted into the Colorado Sports Hall of Fame in 1999, and he was enshrined in CU's Athletic Hall of Fame in 2006. Active in the Fellowship of Christian Athletes, he was voted the 1986 FCA's "Man-of-the-Year" in Colorado.

Heisman Trophy winners Ron Dayne, Vinny Testaverde and Danny Wuerffel were announced as members of the 2013 College Football Hall of Fame Class.

ABOUT THE NATIONAL FOOTBALL FOUNDATION & COLLEGE HALL OF FAME
Founded in 1947 with early leadership from General Douglas MacArthur, legendary Army coach Earl "Red" Blaik and immortal journalist Grantland Rice, The National Football Foundation & College Hall of Fame is a non-profit educational organization that runs programs designed to use the power of amateur football in developing scholarship, citizenship and athletic achievement in young people. With 120 chapters and 12,000 members nationwide, NFF programs include the College Football Hall of Fame, the NFF Scholar-Athlete Award presented by Fidelity Investments, Play It Smart, the NFF Hampshire Honor Society, the NFF National Scholar-Athlete Alumni Association, and scholarships of more than $1.3 million for college and high school scholar-athletes. The NFF presents the MacArthur Bowl, the William V. Campbell Trophy endowed by HealthSouth, and releases the Bowl Championship Series (BCS) Standings. NFF corporate partners include the Allstate Sugar Bowl, the BCS, Fidelity Investments, Herff Jones, Liberty Mutual Insurance, NCAA Football, and Under Armour. Webinar Overview

Institutions across the country are exploring ways to connect personally with new students in a way that will increase understanding of the institution's values, transition available resources, and develop true commitment to the academic experience. It marks an incredibly important attempt to positively impact retention and ease students' transition. One type of programming in particular is gaining popularity and results in these areas-the Extended Orientation.

Extended Orientation is defined as programming and services that supplement traditional new student orientations, providing an extension to the orientation and transition process. These are any programs outside of the traditional new student orientation including, but not limited to, spirit/tradition camps, outdoor orientations, and experiential orientation programs. This webinar will focus on the Extended Orientation initiatives at several different institutions. Participants will be able to identify key stakeholders for helping to establish, maintain, and expand their programs. We will also discuss how unique themes such as outdoor adventure are being used to excite and capture students.

Webinar Objectives

Participants will:

- Learn how and why several institutions started Extended Orientation spirit camps
- Discuss themes of retention and student transition and how a better understanding of and connection to the institution's values can affect success rates in these areas
- Determine which departments on campus are key stakeholders for establishing, maintaining, and expanding Extended Orientation programs
- Discover how an existing Extended Orientation program successfully expanded to include an outdoor adventure component

Webinar Speaker(s)

"Extended Orientation programs provide the unique opportunity to not only build on the information covered during a traditional orientation session, but also to dive into what it really means to be a member of the university community on a deeper level. Participants often leave camp with a shared vision of inspiring and initiating change within their community and understand his or her role in traditions, leadership, and the future of the institution."

Marc Mobley is the Assistant Director of Orientation and Parent Programs at Florida International University (FIU). In his role he serves as the Advisor of the FIU's Extended Orientation program, Panther Camp. Marc has been actively involved in Noda since 2007 when he served as a NODA Intern. Since then, Marc has served in numerous capacities with the association including participating in OPI, serving as a network chair, serving on 2 NODAC committees and hosting the Extended Orientation Network's annual institute (EOI).

"Increasingly, institutions are introducing expanded or new orientation models to replace or supplement their existing programs. The literature shows the impact these extended orientation and/or camp programs have on social development and academic engagement and persistence."

Rick Sparks currently serves as the Associate Dean of Students/Director, New Student Programs at Virginia Tech. Mr. Sparks provides leadership and management of New Student Programs including the transitional programming of New Student Orientation, Hokie Camp (a traditions based camp/extended orientation program) and the Hokie Hi Welcome Week. He is also the President-elect of NODA. He has presented numerous programs at the local, regional, and national level and has more than 10 years of professional experience in higher education.

"Extended Orientation and Camps are increasing in number across the nation; take this opportunity to hear about what it takes to add these programs to your campus."

Quincy Spencer serves as the Director of New Student & Family Programs at the University of Arkansas. In this role he oversees the four programmatic areas of New Student & Family Programs including Extended Orientation, Parent & Family Programs, Leadership & Late Night Programs and First Year Initiatives. Prior to working at the University of Arkansas, Quincy led student development efforts at the University of Texas M.D. Anderson Cancer Center and served as the Coordinator of New Student Programs at Northwestern State University. In NODA, Quincy has served on the Board of Directors and many other leadership roles and is currently serving as the 2013 NODA Annual Conference Host.

- Have a Higher Ed question? AskIE
  - How can I structure a first year experience course?
  - What is StudentLingo?

Webinar Overview

Many colleges and universities have adopted first-year seminars as the centerpiece of their approach to FYE. This webinar will explore innovative ideas and practical strategies for developing a multi-faceted yet cohesive FYE program that can include seminars but also focus on other strategies that fit your unique student and institutional context. We will explore the benefits of harnessing peer-to-peer education, experiential learning, out-of-class faculty interaction with students, learning portfolio development, and learning communities.

Insight into FYE's theoretical underpinnings and history, as well information on what works and doesn't work including solutions to common implementation barriers, will be provided. Participants will be encouraged to imagine new possibilities and potentials for their FYE programs/approach.

Webinar Objectives

Participants will:

- Gain insight into FYE's history and potential role in the 21st century collegiate experience
- Learn from examples of innovative first-year practices from seminars to co-curricular programs and how to implement them
- Receive a brief synopsis of theoretical underpinnings and perspectives on FYE
- Review practical suggestions for starting or strengthening an FYE program
- Learn about FYE's impact and links to mid-collegiate and capstone student experiences
- Leave with strategies for exploring untapped possibilities for FYE at their institution

Webinar Speaker(s)

Greg Metz is currently Assistant Dean of Academic Affairs at the University of Cincinnati Blue Ash College. Greg serves as a point person for a wide gamut of student issues and concerns, confers on student success and development initiatives across the college, and is charged with enhancing synergies across student and academic affairs. Previously, Greg served as the Assistant Director of University of Cincinnati's Center for First Year Experience and Learning Communities where his primary responsibilities included expansion and enhancement of an extensive and nationally regarded Peer Educator Program. Greg has a Ph.D. in Sociology from Rutgers University. Over a 25 year career in higher education, he has served as an Assistant Dean of Academic Policy at Rutgers, coordinated advising programs, designed and implemented college transition programs, and supervised educational opportunity programs for first generation college students. Greg has taught extensively at the undergraduate and graduate levels in both Education and Sociology, and also at the high school level. He is the co-author of a forthcoming book - Peer to Peer Leadership: Transforming Student Culture (Kendall-Hunt, 2013). He lives in Wyoming, Ohio with his wife Sharon and daughter Lauren, and enjoys basketball, playing guitar, and listening to a wide array of music.

Pamela F. Person was named the first permanent director of the University of Cincinnati's Office of Nationally Competitive Awards in January, 2012. She previously served for 10 years as UC's inaugural director for the Center for First-year Experience and Learning Communities. During her tenure the programs under her leadership emerged from fledgling, pilot initiatives to become large-scale, integral components of the UC undergraduate experience. Pam was a key contributor to the development of UC's signature approach to undergraduate education which encourages a comprehensive curriculum design connecting FYE with mid-collegiate and graduation capstone experiences. She is a recipient of the Outstanding First-year Student Advocate Award, presented by the National Resource Center for The First-year Experience and Students in Transition and Cengage, recognizing her for the impact of her efforts upon UC's culture and the success of our students.

Prior to her work at UC Pam held the directorship of the Career Center at The University of Alabama at Birmingham as well as leadership positions at Southeast Missouri State University, Southern Illinois University at Carbondale, Virginia Tech, and Radford University. Pam is an active contributor to applied research and scholarly practice in the field of higher education, particularly curriculum development and student transitions and success. She has authored articles on the University of Cincinnati's first-year experience program that have been published in various conference proceedings, monographs, journals, and newsletters and has served internationally as a consultant to colleges and universities.

Subject: FORMAL NOTICE: UNC-CH Patent and Invention Policy Update

---

Effective April 22, 2013 an updated version of the UNC Patent and Invention Policy was. The updates do not reflect any changes in policy. They were made solely to clarify process and procedure. The most notable changes are as follows:

(i) Section IV was modified to make clear that the transfer of rights to an Invention occurs at the time the Invention is made, a change necessary to address a technical, legal issue arising from the US Supreme Court's decision in Stanford v. Roche.

(ii) The preamble was modified in order to ensure that the policy is read in its entirety. There has been some confusion over process and procedure with regard to inventor owned inventions, most notably that after reading the preamble, assumptions were made that use of University facilities were the only criteria for determining whether an invention was inventor owned. In Section V, there are multiple criteria for determining whether an invention is inventor owned. These criteria are not new and remain unchanged.

(iii) A paragraph was added to the end of Section V describing the procedures to be followed in order to confirm that an invention is inventor owned.

These procedures had been standard practice at UNC and had been published for many year as part of the University System Patent and Copyright Policy. However, they had not previously been reproduced in the UNC policy. Links to the policies may be found at http://otd.unc.edu/PatInvPolicy.php.

Webinar Overview

This webinar is a 3-part workshop designed to facilitate your campus team's learning as you design programmatic assessment plans. The ultimate intention of this workshop is for you and your institutional team to walk away with a refined assessment plan and/or report, depending on where you are in your assessment process. Each session is designed to be highly interactive with activities that you complete and share with colleagues and other participants. This process offers a unique opportunity to share ideas and solutions across institutions.

Webinar Objectives

Participants will:

- Describe the history of Outcomes-Based Assessment (OBA)
- Explain the purpose for OBA
- Explain why OBA practice and documentation is so important
- Identify the necessary components of an Outcomes-Based Assessment Plan and report (OBAP)
- Align components of the OBAP with program review, annual planning, strategic planning, and budgeting processes
- Explain the importance of evaluating student learning
- Distinguish between learning goals and outcomes
- Identify characteristics of measurable and meaningful outcomes

Several incoming freshmen at Ocean State University (OSU) will be enrolling in classes this summer. Since they will be on campus, the sports communications staff would like for them to participate in a few promotional activities with the current student-athletes. Is this permissible?

Yes. **NCAA Staff Interpretation- 11/8/11- Prospective Student-Athlete Participating in Promotional Activities During Summer Prior to Initial Enrollment (I)**- states that a prospective student-athlete who officially registers, enrolls and attends classes at the certifying institution during the summer prior to initial enrollment may participate in a promotional activity.

THE UNIVERSITY OF NORTH CAROLINA

Institutional, Charitable, Educational, or Nonprofit Promotions Release Statement

In accordance with NCAA Bylaw 12.5.1.1, Institutional, Charitable, Educational, or Nonprofit Promotions, a member institution or recognized entity thereof (e.g., fraternity, sorority, or student government organization), a member conference, or a noninstitutional charitable, educational, or nonprofit agency may use a student-athlete's name, picture, or appearance to support its charitable or educational activities or to support activities considered incidental to the student-athlete's participation in intercollegiate athletics, provided the following conditions are met:

- The student-athlete receives written approval to participate from the director of athletics, subject to the limitations on participants in such activities as set forth in Bylaw 17;
- The specific activity or project in which the student-athlete participates does not involve cosponsorship, advertisement, or promotion by a commercial agency other than through the reproduction of the sponsoring company's officially registered regular trademark or logo on printed materials such as pictures, posters, or calendars. The company's emblem, name, address, and telephone number may be included with the trademark or logo. Personal names, messages, and slogans (other than an officially registered trademark) are prohibited;
- The name or picture of a student-athlete with remaining eligibility may not appear on an institution's printed promotional item (e.g., poster, calendar) that includes a reproduction of a product with which a commercial entity is associated if the commercial entity's officially registered regular trademark or logo also appears on the item;
- The student-athlete does not miss class;
- All moneys derived from the activity or project go directly to the member institution, member conference, or the charitable, educational, or nonprofit agency;
- The student-athlete may accept actual and necessary expenses from the member institution, member conference, or the charitable, educational or nonprofit agency related to participation in such activity;
- The student-athlete's name, picture, or appearance is not utilized to promote the commercial ventures of any nonprofit agency;
- Any commercial items with names, likenesses, or pictures of multiple student-athletes (other than highlight films or media guides per Bylaw 12.5.1.8) may be sold only at the member institution at which the student-athlete is enrolled, institutionally controlled (owned and operated) outlets, or outlets controlled by the charitable or educational organization (e.g., location of the charitable or educational organization, site of charitable event during the event). Items that include an individual student-athlete's name, picture, or likeness (e.g., name on jersey, name or likeness on a bobblehead doll), other than information items (e.g., media guide, schedule cards, institutional publications) may not be sold; and
- The student-athlete and an authorized representative of the charitable, educational, or nonprofit agency sign a release statement ensuring that the student-athlete's name, image, or appearance is used in a manner consistent with the requirements of this section.

We, _____ (Student-Athlete) and _____ (Representative), ensure that the student-athlete's name, image, or appearance has been used in a manner consistent with the requirements of NCAA Bylaw 12.5.1.1, Institutional, Charitable, Educational, or Nonprofit Promotions.

Exceptional Front-Line Customer Service In Higher Ed Overview

How do you define customer service? We may all define this differently, but there are basic principles and proven tips and techniques that can assist front-line staff in providing exceptional customer service to our students and their families. This session will provide participants an overview of different philosophies of customer service and why exceptional service is critical for institutions of higher education. How do our customers (our students and their families) want to be treated? What makes serving students in higher education unique? How do we know if we are living up to their customer service expectations? Learn about methods of benchmarking and setting customer service standards, as well how to evaluate your customers in order to assess the level of customer satisfaction. Explore techniques that can help you develop positive customer relationships with your students and get motivated and geared up with your staff to provide the exceptional service your students deserve.

Student Employees Overview

Training student employees on the importance of providing excellent customer service is essential to any department. This workshop will outline the basic principles of excellent customer service and demonstrate how students can apply these principles to their current role as student employees. The speaker will explain how student employees fit into the mission and goals of the institution and walk students through appropriate and inappropriate behaviors. She will also explain how students can use the skills they learn on the job to help them succeed professionally outside of school. This training is intended for student employees, however, administrators who supervise student employees may also find it useful.

Webinar Speaker(s)

Julie Selander has worked in higher education administration and finance for over 25 years. Her experience includes student loan servicing operations, tuition payment plan sales and marketing, organizational leadership, as well as various management positions in higher education student services including student accounts receivable, billing, collections, financial aid, and customer service.
Julie is the director of the One Stop Student Services Office at the University of Minnesota providing seamless and integrated student services in the areas of enrollment, registration, financial aid, billing, student accounts receivable, and student veterans services. Twenty-seven One Stop Counselors across three campus locations provide service via phone, e-mail, and in-person for over 51,000 students on the Twin Cities campus.
Julie presents frequently on various topics related to higher education student services and has written several articles for publication, including NACUBO's Student Centered Financial Services: Innovations That Succeed. She serves as a board member for Minnesota's College Goal Sunday initiative and is a founding member and on the board of directors for the Institute for Student Services Professionals. She has undergraduate and master's degrees from the University of Minnesota and is currently working on her dissertation as a Ph.D. candidate at the University of Minnesota in the Higher Education Policy and Administration program. She is also an instructor at the University of Minnesota in the Organizational Leadership, Policy, and Administration department and teaches Customer Service Training to undergraduate students.

Bitsy Cohn is the Director of Learning Opportunity Center Services at Front Range Community College in Fort Collins, Colorado and an adjunct faculty member in the Developmental Studies Department. She holds a BA in English with Minors in Linguistics and Theatre Arts and is currently pursuing a Master's of Science degree in Organizational Leadership. Over the course of a 20-year career in Community College student affairs, teaching, tutoring and administration, she has become expert in customer service, student development, conflict management, post-secondary disability services, faculty training and development, at-risk retention strategies and at teaching all of the various tips, tricks, tools, and magic spells students need for academic success.

Michael,

Here is some data from Everett Community College:

Fall 2011 Winter 2012 Spring 2012 Fall 2012 Winter 2013
Biology-211 83.3% 89% 66% 86%
Chem-121 83.3% 89% 66% 86$
Biology-221 68% 42.2%
Biology-222 68.8% 49%
Biology-223 28.6%
Biology- 232 81% 62%
Pre-Alg 19%
Intermediate Alg 16.2%
Elem. Alg 47%

We also Winter Quarter 2013 ran SI in 7 sections of our Elementary Algebra here are the attendance percents for those:
100%, 92.3%, 87.8%, 83.3%, 77.8%, 74.4% and 69.4%.
Students enrolled in these classes were told attendance at 10 SI sessions during the quarter was mandatory but there weren't any consequences and they figured that out but many still came.

The Biology-211 and Chem-121 is what we call "Fast Track" as students can co-enroll in both even though Chem-121 is a pre-req for the Bio-211. No mention of mandatory. The Biology-22,222, and 223 is our majors bio sequence so students typically take all three in consecutive quarters. Bio-232 is our Human Physiology course.

You can see our numbers are not just 10% but much higher. No article but hope it helps.

SI has been offered before 2011 but this was the data that I had at hand.

Sharon

> I am co-authoring an article about SI attendance, and I am looking for an article that points to average attendance rates for SI session in relation to the attendance in the target course. I have heard, anecdotally, that average attendance is around 10% (though I suspect it's higher) of the enrollees in the target course will attend SI sessions, but can find no proof. Can anyone point me in the right direction?

Recruiting Lessons From the Sticky Note on the Hotel Bed

When you're a tired traveler, and you're virtually immune to all forms of marketing that a hotel chain can throw out you, their sales message needs to be simple.
It needs to hit you over the head, and get straight to the point if they have any hope of making you remember them from the other two gazillion hotel options we have.
So I'm giving credit to the folks at Hampton Inn for playing by those rules with a simple, inexpensive and direct message when this weary traveler checked into one of their hotels on the East coast not to long ago.

The yellow sticky note caught my attention right when I walked into the room, mainly because it was out of place. I'm notgoing to lie, it alarmed me at first. When you see a sticky note on the headboard of a hotel bed, there's a flurry of frightening possibilities that rush through your mind as to what is written on the note awaiting you upon your arrival:
"Let us know if it still smells like a horse in here." Or, "Per the health department inspector, no free breakfast in the morning."
This one was a little more positive...

Countdown Begins for 2013 NCRC: Reserve Your Seat Before It's Too Late

If you're attending the 2013 National Collegiate Recruiting Conference in Charlotte, North Carolina on June 7-9, you're going to hear the *best* collection of speakers and experts we've ever assembled.
This is the biggest collection of recruiting experts in our history, along with some new technologies that will really expand your capabilities to effectively communication with this next generation of recruits!
And, there's just a few weeks left to be a part of it.
To attend the conference, **click here**.
FRIDAY
Dan Tudor - The founder of the NCRC event will kick-off the weekend with the annual "State of Recruiting" talk, setting the agenda for the weekend
Dan Wolken, USA Today - One of the rising stars in college sports reporting will talk about recruiting trends, coaches who are doing it right, and what he forecasts for the evolving world of college recruiting.
Dr. Mike Davenport - A successful rowing coach and expert in the intricacies of successful mentoring, Coach Davenport will talk about how to make sure your coaching career is strong and sustainable for the long haul. Be ready to be challenged in the way you approach your career!
Jan Stuebbe - Author of "How to Be a Lousy Leader", Coach Stuebbe will give insights from a unique athletic and coaching life that saw him in a leadership position since he was a Freshman in high school. He's always been a starter, a head coach, and leading a junior college program as athletic director. These lessons are unforgettable - you'll want him to talk to your team about leadership, too!
Rob Jones - Whatever obstacle you're facing as a coach, be prepared to be humbled and amazed at the story of Rob Jones. Featured earlier in Sports Illustrated this year, Jones' life journey - as a soldier and as an athlete - will amaze you. His session will touch every aspect of your coaching and recruiting life...
CLICK HERE TO SEE THE REST OF THE LINE-UP!
Want a sneak peek at the incredible learning experience our NCRC attendees get? Check out this special look-in at one of last year's popular speakers, Coach Adam Martel and his fascinating talk, "D1 Recruiting on a D3 Budget".

University of Florida's Social Media Campaign Is No Joke

by Derek Tyson, ESPN

It started innocently enough with a hashtag and an illustration tweeted by Florida wide receivers coach Joker Phillips. There was the Joker, the Batman villain portrayed by Heath Ledger, wearing a blue Gators blazer including the hashtag #ComePlayWRFortheJoker.

Others followed. An astronaut planting a Gators flag and a newspaper featuring the hashtag and Jeff Driskell watching the Kentucky Derby among them.
Not to be outdone, offensive coordinator Brent Pease posted his own masterpiece of Harry Potter flying over The Swamp with his three quarterbacks, Jeff Driskel, Tyler Murphy and Skyler Mornhinweg looking up at Potter on a broomstick. It was captioned with "Chasing #TheStandard."
While funny, the campaign is also serious business, helping Florida go on the offensive on the trail. Instead of just private messages to recruits, the Gators are proactively using Twitter, as well as Facebook and Instagram, as new outlets for reaching prospects...

Study Shows That Schools Are Fighting The "Dumb Jock" Stereotype

from ScienceDaily.com
College coaches who emphasize their players' academic abilities may be the best defense against the effects of "dumb jock" stereotypes, a Michigan State University study suggests. Researchers found that student-athletes were significantly more likely to be confident in the classroom if they believed their coaches expected high academic performance, not just good enough grades to be eligible for sports.
"Coaches spend a lot of time with their players, and they can play such an important role to build academic confidence in student-athletes," said lead author Deborah Feltz.
Feltz and her graduate students wanted to see what factors influence student-athletes' susceptibility to the "dumb jock" stereotype. The researchers surveyed

more than 300 student-athletes representing men's and women's teams from small and large universities and a range of sports, from basketball and football to cross-country and rowing...

Multisport Athletes Drawing The Attention Of Recruiters

by Chris Harlan, Trib Live
Mt. Lebanon's Alex Bookser has footwork nimble enough to impress college football coaches, partly because the 6-foot-6, 295-pounder can spin with ease.
Maybe turning around fast isn't always the mark of a good offensive tackle. But his ability to throw a discus with proper technique shows a certain coordination not always obvious for a lineman wearing cleats.
Many football stars have proven themselves multi-talented this spring. Along with Bookser, other top recruits from the 2014 class will be at Baldwin on Thursday for the track and field championships.

For most, track season provides an enjoyable yet competitive way to stay in shape. For others, like Nicholson in the hurdles, there are realistic hopes for winning gold.
And for all, it provides some athletic diversity...

Subject: Re: SI Session Average Attendance Rates

Michael,
Our attendance is not so outstanding percentage-wise since we service 13 huge, tough gateway courses (400 – 2,000 students in one course) with 22 leaders (1-3 in each course). In BIOL 110, for example, the leaders were seeing 35 – 50 students in one session. Obviously, if we had a 30- 50 % attendance, the leaders would need to be trained in crowd management, and it wouldn't look much like an SI session. We are pleased with the 16% overall attendance we had last semester. Purdue has many tutoring programs within each college. Consequently, we look at regular attendance as a measurement. Here's a chart we used in our last report which compares the number of sessions attended and the grade percentages compared:
Fall 12

Grade		3 or more	5 or more	8 or more	Zero
C or better		84%	88%	88%	71%
B or better		58%	62%	64%	45%
A		21%	23%	27%	19%
DFW		12%	9%	9%	23%
N=		607	393	227	8733
Total Distinct Participants	1637	15.7%			
Non Participants	8733

Fall 2011 Winter 2012 Spring 2012 Fall 2012 Winter 2013
Biology-211 83.3% 89% 66% 86%
Chem-121 83.3% 89% 66% 86$
Biology-221 68% 42.2%
Biology-222 68.8% 49%
Biology-223 28.6%
Biology- 232 81% 62%
Pre-Alg 19%
Intermediate Alg 16.2%
Elem. Alg 47%
We also Winter Quarter 2013 ran SI in 7 sections of our Elementary Algebra here are the attendance percents for those:
100%, 92.3%, 87.8%, 83.3%, 77.8%, 74.4% and 69.4%.
Students enrolled in these classes were told attendance at 10 SI sessions during the quarter was mandatory but there weren't any consequences and they figured that out but many still came.
The Biology-211 and Chem-121 is what we call "Fast Track" as students can co-enroll in both even though Chem-121 is a pre-req for the Bio-211. No mention of mandatory. The Biology-22,222, and 223 is our majors bio sequence so students typically take all three in consecutive quarters. Bio-232 is our Human Physiology course.
You can see our numbers are not just 10% but much higher. No article but hope it helps.
SI has been offered before 2011 but this was the data that I had at hand.
Sharon

Hi there.

Our attendance rate here has been between 50% and 59% over the last three years. This reflect students who have gone at least one time. If we look at 3 or more times, the percentage goes down to 47-48%, pretty steadily.
We support 17-18 classes in Accounting, Economics, Chemistry, Physics, Applied Calculus, Statistics.

Subject: Re: SI Session Average Attendance Rates
Sent by: Supplemental Instruction Discussion List <SINET@LISTSERV.UMKC.EDU>

Michael,

Our attendance is not so outstanding percentage-wise since we service 13 huge, tough gateway courses (400 □ 2,000 students in one course) with 22 leaders (1-3 in each course). In BIOL 110, for example, the leaders were seeing 35 □ 50 students in one session. Obviously, if we had a 30- 50 % attendance, the leaders would need to be trained in crowd management, and it wouldn□t look much like an SI session. We are pleased with the 16% overall attendance we had last semester. Purdue has many tutoring programs within each college. Consequently, we look at regular attendance as a measurement. Here□s a chart we used in our last report which compares the number of sessions attended and the grade percentages compared:

Fall 12

Grade		3 or more	5 or more	8 or more	Zero
C or better		84%	88%	88%	71%
B or better		58%	62%	64%	45%
A		21%	23%	27%	19%
DFW		12%	9%	9%	23%
N=		607	393	227	8733
Total Distinct Participants	1637	15.7%			
Non Participants	8733

CLOSING the GAP

– What Students Say About Instructor Feedback –

Do your students find your feedback helpful? What are the types of feedback that students are most apt to respond to?

Turnitin recently conducted a survey of 1,000 students to gather insights into how instructor feedback impacts the development of student writing. Specifically, the survey sought to uncover what students value most in terms of instructor feedback and how the timing of feedback affects the development of their writing skills.

Key findings from the survey include:

- Despite high rates of electronic submission, students do not report receiving electronic feedback at the same rate.
- Students find feedback on "thesis/development" the most valuable, but report receiving more feedback on grammar/mechanics and composition/structure.
- Though 66.5 percent of students reported receiving "general, overall comments" on their paper, less than half of those students rated that feedback as "very helpful."
- Forty-five percent of students rate voice/audio comments as helpful, but only 2.7 percent currently receive this type of feedback.
- Over 17 percent of students reported that their instructors would take more than 17 days to provide feedback on their papers.

Check out the infographic and for more information, read the white paper.

Subject: Daily Compliance Item - 5/15/13- 12.5.2.3.3 - Athletic Ability to Win a Prize

---

Good Morning -

Please see today's Daily Compliance Item.

As a reminder, while Bylaw 12.5.2.3.3 permits a prospective or current student-athlete (or their immediate families) to win a prize during a promotional activity provided the prize is won through a random drawing in which all members of the general public or the student body are eligible to participate, we should be cognizant of the perception of such an individual winning a prize. In many cases you may not be aware that the individual entrants in the activity are current/prospective student-athletes (or their immediate families). However, in instances when you ARE aware that the individual selected for participation is a current or prospective student-athlete - while it remains permissible under NCAA regulations - it is likely best to select an alternative person to participate to avoid a perception of impropriety.

Let us know if you have any questions or concerns.

Thank you.

DAILY COMPLIANCE ITEM
by Jen Condaras

Brought to you by the alliance of
jumpforward & BOND SCHOENECK & KING ATTORNEYS AT LAW

Ocean State University (OSU) conducts a promotional activity between the 4th and 5th innings of all its home baseball games. This activity includes hitting a ball from a pitching machine. If the person hits a home run, he/she wins $100. To participate in this activity, the person must fill out the designated card and drop it in the box. Any individual attending the game is permitted to enter and the participants are randomly selected. At today's game, a current football student-athlete was selected to be one of the participants. If he hits a home run, is he permitted to accept the $100 prize?

Yes. **NCAA Bylaw 12.5.2.3.3** states that receipt of a prize for winning an institutional or noninstitutional promotional activity (e.g., making a half-court basketball shot, being involved in a money scramble) by a prospective or enrolled student-athlete (or a member of his or her family) does not affect his or her eligibility, provided the prize is won through a random drawing in which all members of the general public or the student body are eligible to participate. *(Revised: 1/9/96 effective 8/1/96, 3/25/05, 6/12/07)*

- The Art and Science of Enrollment Planning

Webinar Overview

Is your institution ready for strategic enrollment planning? Are you prepared with the data you need to make real decisions and establish long-term goals regarding enrollment? Do you understand the most important factors in achieving success and optimal enrollment results?

Gain insight into assessing institutional readiness for enrollment planning and identifying the necessary planning antecedents through this comprehensive two-part webinar. Elements included in the planning cycle as well as a variety of planning constructs and structures will be examined. Dr. Jim Black will guide participants through a process for establishing data-driven enrollment goals, sample Key Performance Indicators (KPIs) and related metrics, common strategic opportunities, and a planning framework. Beyond these fundamental planning ingredients, we will discuss methods of moving from planning to implementation. We will also explore how to assess the impact of the plan so that strategies remain aligned with the internal and external environmental conditions and can be perfected over time.

Webinar Objectives

Participants will:

- Discover the importance of transitioning from tactical to strategic enrollment management
- Understand the foundational elements of enrollment planning
- Develop the ability to focus on what produces optimal enrollment results
- Be able to lead change in the enrollment planning and implementation process

Attracting 38 Million Adults With College Credit But No Degree: Increasing Your Market Share

The president and CEO of SEM Works, Dr. Jim Black, is an internationally recognized expert in enrollment management as well as in change management. He has published a monograph titled, Navigating Change in the New Millennium: Strategies for Enrollment Leaders, and four books, The Strategic Enrollment Management Revolution, considered to be a groundbreaking publication for the enrollment management profession, Gen Xers Return to College, Essentials of Enrollment Management: Cases in the Field, and Strategic Enrollment Intelligence. Among his other published works are numerous articles and book chapters including a feature article in College & University, Creating Customer Delight; a chapter, Creating a Student-Centered Culture, for a book on best practices in student services published by SCUP and sponsored by IBM; a chapter on enrollment management in a Jossey-Bass book on student academic services; as well as a bimonthly feature in The Greentree Gazette.

Dr. Black is the founder of the National Conference on Student Retention in Small Colleges and cofounder of the National Small College Admissions Conference and the National Small College Enrollment Conference. He formerly served as the director of AACRAO's Strategic Enrollment Management Conference.

Black was honored as the recipient of the 2005 AACRAO Distinguished Service Award. He has been interviewed by publications such as The Chronicle of Higher Education, Converge Magazine, The Enrollment Management Report, The Lawlor Review, and was interviewed for AACRAO's Data Dispenser. Black also was featured in an international teleconference on enrollment management sponsored by The Center for the Freshman Year Experience at the University of South Carolina, and a PBS broadcast on "Blending High Tech and High Touch Student Services." In 1999, Jim Black was named an IBM Best Practices Partner, one of only twenty-three in the world. He was invited by The College Board to Heidelberg, Germany, to evaluate the APIEL Exam and most recently was invited to lead conferences on enrollment management and student services in the United Kingdom and the Netherlands.

Dr. Black has served on the boards of several technology companies and has consulted with companies such as Microsoft, Blackboard, and the SAS Institute. Higher education clients have included over 400 two-year, four-year, public, and private institutions.

Jim earned a B.A. in English education and M.A. in higher education administration from the University of South Carolina, as well as a Ph.D. in higher education curriculum and teaching from The University of North Carolina at Greensboro. His doctoral experience provides our clients with unique perspectives into innovative pedagogical, curricular, and program opportunities that impact enrollment outcomes. Leveraging his educational background along with his many years as an associate provost, dean, and faculty member in a higher education environment, Dr. Black will provide your institution with strategic insights that are grounded in theory and are actionable

Subject: [forum-div1] Employee Forum Spring Community Meeting

---

Dear Staff Member:

I am writing to ask you to attend the Spring Community meeting with President Tom Ross and Chancellor Holden Thorp to take place Tuesday, May 21 from 9-11 a.m. in the Great Hall of the Student Union.

There are a number of legislative changes and pending bills under discussion in Raleigh that will affect the University and its employees. President Ross and Chancellor Thorp have a unique perspective on these changes.

You can submit questions ahead of time by e-mailing *forum_office@unc.edu*

If you cannot be present, you can attend virtually via streamed video at the Forum website at *http://forum.unc.edu*

Please remember that attendance at the community meeting counts as work time if it occurs during your regular schedule. Employees must get approval from their supervisor to attend.

Thank you.

Jackie Overton

Subject: Polling Students

Hi,
I was wondering what programs other schools use to survey students at the beginning of the semester to find times for SI sessions. We were using paper copies that we handed out in class, but it is rather time consuming. We did like that it guaranteed that most students submitted their availability. I'm aware of programs like Signupgenius, SurveyMonkey and Doodle, but we would like to have a way to guarantee students sign up without having to email them. Preferably, it would be something they could do while in class.
What has worked on your campus? Thank you for your feedback.

Hi Alex
WE use a survey, about 3 or 4 copies circulating around the room with the SL leader's potential times. We have tried clickers, online etc, but found that students kind of tune out of the process. The paper has given us the best result after 4 years so we are sticking to it...

UPK Proficiency Forum
Accelerate System Acceptance Testing with Oracle User Productivity Kit

Join **Oracle University** for the next UPK Forum on May 21, at 11 am Pacific. **Beth Renstrom** and **Kathryn Lustenberger** from UPK Product Management at Oracle will demonstrate how to create test scripts 50% faster with Oracle User Productivity Kit (UPK). UPK 11.1 ESP1 reduces testing time by enabling any user to easily capture test cases.

See how to enhance your implementation's testing phase with UPK, how to gain efficiencies in the overall testing cycle with the automatic capturing of process steps and eliminating errors that are typical in manually written test cases.

This session presents real-life examples of using Oracle User Productivity Kit for testing. Discover how UPK supports change management efforts and establishes the basis for reusable documentation, simulations, and end user performance support.

The UPK Forum is a free webinar series hosted by Oracle University connecting the UPK User Community with experts from UPK Product Management and UPK Development.

You won't want to miss this Free seminar!

Attendance is limited.

---

ePro Vendor Catalog

Update– May 16, 2013

. . . . . .

Storr Office Environments now available in eProcurement

Effective today, the Storr Office Environments catalog is available as an eProcurement Vendor Catalog. You will be able to log in to eProcurement, place your order with Storr, and have it billed to your University account. All future purchases from Storr need to be made through ePro or through a purchase requisition (for orders greater than $5,000). Orders can **only** be placed with this vendor through Vendor Catalog or Purchase Order.

Please note: some items in the Storr catalog have 5000 object codes. If you receive an Invalid value error message after clicking Save & preview approvals, expand each line of the order by clicking the white triangle icon, and click the magnifying glass to see a list of valid object codes for any object code highlighted in red.

If you have problems with or questions about ePro, contact the Help Desk by calling 962-HELP or by creating a help requestfrom the UNC website. In the "Type of Help Needed" field, choose CONNECTCAROLINA_ePROCUREMENT so that your request is routed correctly.

To view a variety of training options and materials, visit the ConnectCarolina ePro training page https://finance.unc.edu/training/#epro.

Subject: [cccs_staffusers] Reminder: ConnectCarolina System Outage May 17-18

There will be an outage affecting ConnectCarolina and other systems beginning at 5:00pm on Friday, May 17, and ending at approximately 8:00pm on Saturday, May 18.

The first outage is related to the Summer I session Census. Due to the need to "freeze" the database to take the census snapshot, users will not be able to access ConnectCarolina pages beginning at 5:00pm on Friday, May 17.

Immediately following the census outage, ITS has a planned maintenance outage, beginning at approximately 11:00pm on Friday, May 17, and ending at approximately 8:00pm on Saturday, May 18. ConnectCarolina and other applications will be down during this time frame.

View the complete list of affected systems here: http://ccinfo.unc.edu/system-status/

We appreciate your cooperation and support as we continue to make ITS applications more efficient for our users.

Anne Queen Room
The Y Court

Hosted by Summer School

The University of North Carolina at Chapel Hill established what was possibly the first residential summer school in America in 1877. "The Summer Normal School," as it was then called, enrolled 235 students in courses in more than 10 disciplines. About half the students were teachers; students came from 42 counties across North Carolina and neighboring states.

Summer School was the first school at UNC-Chapel Hill to enroll women, beginning in its first year and continuing thereafter. By 1925, records indicate that 19,983 students had enrolled in Summer School. From 1934 to 1987, these programs were administered by the Office of Summer Sessions. The traditional name of Summer School was reinstated in 1988.

The University has continued to provide a wide offering of annual summer academic opportunities to its students, the people of North Carolina, and other residents in this country and abroad. About 700 sections of courses are offered in about 60 disciplines. More than 7,000 students attend the summer sessions in Academic Affairs.

Subject: FORMAL NOTICE: UNC Injury Prevention Research Center Candidate Open Forums

---

The search committee for the Director, Injury Prevention Research Center is pleased to announce two candidates that have accepted our invitation for public interviews.

We invite you to attend the upcoming open forums. These forums are designed to give the campus community an opportunity to hear from the candidates about their experience for this position and their ideas for growth and enhancing the center.

The work of the UNC Injury Prevention Research Center (UNC IPRC) include activities that focus on research, program development and evaluation, technical assistance, training and the coordination and collaboration across multiple agencies and disciplines. UNC IPRC is one of 11 Centers of Excellence funding by the National Center for Injury Prevention and Control at the Centers for Disease Control and Prevention.

For the open forum, each candidate will present a brief talk on their qualifications and ideas for moving the center forward. Following the talk will be an open question and answer session.

Please join us for the public forums listed below:

Tuesday, June 5, 2012
STEPHEN W. MARSHALL, PhD
2:30PM-3:30PM
Freedom Forum Conference Center, Carroll Hall (Rm 305)

Monday, June 11, 2012

To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: Password for Onyen 'bridgerb' expires soon.

The password for the Onyen 'bridgerb' is set to expire
at this date and time: Tue Jun 12 15:10:06 2012

Visit the following web site to change your password or for
information on how to have it reset if it was forgotten:

https://onyen.unc.edu/cgi-bin/unc_id/chpw.pl

After your password expires, you can still access the above site
to change your password, though you will not be able to use your
Onyen to access any other Onyen-authenticated services until you
change your password.

Once you change your password, it will work for another 90 days
before it expires again. If you never use your Onyen, then
disregard this notice.

Your new Onyen password will be copied automatically to the
AD.UNC.EDU domain. If you have any Laptop, Desktop, or handheld
device which uses your old Onyen password to automatically login
or re-authenticate to services using the AD.UNC.EDU domain
(Exchange, for example), be sure to logout of those services and
login again with your new Onyen password within 10 minutes of
changing it. If you don't, and your devices continue to attempt
to re-authenticate using your old Onyen password, your
AD.UNC.EDU account will be locked for 10 to 20 minutes, just as
if you repeatedly tried to login with a bad password. During
that time you will not be able to login.

If you think you might forget your password, consider setting up
a "Challenge/Response" where you answer a few personal questions
BEFORE you forget your password. Later, if you can answer these
questions again, you can get a new password without having to
visit one of the password reset sites on campus. Just click
"Challenge-Response" at the top of the page mentioned above and
follow the instructions.

Answers to many common questions and a list of some Onyen
related services can be found by visiting the web site:

http://help.unc.edu/3247

If you have questions or need additional assistance with this
issue, contact the ITS Response Center at 919-962-HELP and we'll
be glad to assist you.

We send out these Password Expiration Notices via email
at 2 weeks, 1 week, and 2 days prior to the expiration.

This message is being sent to the electronic mail address
associated with the Onyen 'bridgerb' in the UNC Campus Directory.
If this address is not your preferred electronic mail address,
you may change it by visiting the Campus Directory web site:

http://dir.unc.edu/dir/home/

To: EHS Notifications <ehs_notifications@listserv.unc.edu>
Subject: Required Environment Health and Safety Orientation Training

---

North Carolina OSHA regulations and University policies require that you complete safety orientation training appropriate to your work here at UNC. This training is mandatory for all full-time, part-time, and temporary employees, including student/federal work study employees. Training is easy to complete. If you have access to the internet, take this training on-line at http://ehs.unc.edu; select Training and then go to "Online Orientation". Select the Work Environment that best describes your job activities. EHS will be automatically notified upon successful completion of the post test.

If the link does not open properly you may type in the address in your web browser address box. Once you have typed it in and arrived at the EHS website, click on Workplace Safety in the box to the left. Then click on safety trainings and then click online orientation. Select the orientation that best fits your job description. After reading the modules, be sure to take the test to receive credit for the training.

All of the following training is online.

If you are unsure which work environment you fall under, review the descriptions below and select the one that most closely describes your job activities.

Laboratory Environment: Work activities in laboratories in which chemicals, radioactive materials or biological agents are used or stored.

Clinic Environment: Duties involving patient contact or closely associated activities at ACC, SHS, UNCH, etc.

Office Environment: Work activities in an office environment, academic classroom, or library.

Support Services Environment: Work Activities involving Public Safety, Housekeeping, or Animal Handling.

IMAC Environment: Duties involving industrial, maintenance, and construction work.

For additional classroom dates, go to ehs.unc.edu and select Workplace Safety, then Safety Training, then Instructional Led Courses.

Please make sure that you complete your training as soon as possible either on-line or by attending an instructor-led class. Under the Enforcement Policy, EHS will be reporting compliance status to Deans, Directors, and Department Heads.

Safety orientation training is important for your safety as well as others.

Subject: FORMAL NOTICE: Service Order Freeze Announcement

FROM: ITS Telecommunications

In order to support the UNC-Chapel Hill transition from AT&T Centrex to Verizon Business Hosted IP Centrex (Voice over Internet Protocol, or VoIP) telephony services, Information Technology Services (ITS) Communication Technologies (Comm Tech) initiated a service order freeze of all moves, adds, and changes (MAC's) for AT&T phone service beginning April 11, 2012 that we estimated to end June 8, 2012. The service order freeze is required to port a block of UNC phone numbers from AT&T to Verizon. Unfortunately, due to a discrepancy between our records and AT&T records, and resulting efforts to resolve it (now accomplished), the freeze must unfortunately be extended an additional 2 weeks through June 22, 2012. Because the discrepancy was due to error on AT&T's part, we have asked that our porting request be expedited, so the extension through June 22, 2012, is a worst-case extension.

We appreciate the patience and support of all of our campus and UNC Healthcare customers during this time. We understand that this restriction presents challenges to some of our customers, and we apologize for the inconvenience. We can continue to honor requests for new phone lines with Verizon Business VoIP. Repair and voicemail requests will continue to be supported along with most requests to move phones within campus buildings.

Please contact 962-HELP and select option 1 for Telecommunications to consult with an analyst for questions and planning.

(Exchange, for example), be sure to logout of those services and
login again with your new Onyen password within 10 minutes of
changing it. If you don't, and your devices continue to attempt
to re-authenticate using your old Onyen password, your
AD.UNC.EDU account will be locked for 10 to 20 minutes, just as
if you repeatedly tried to login with a bad password. During
that time you will not be able to login.

If you think you might forget your password, consider setting up
a "Challenge/Response" where you answer a few personal questions
BEFORE you forget your password. Later, if you can answer these
questions again, you can get a new password without having to
visit one of the password reset sites on campus. Just click
"Challenge-Response" at the top of the page mentioned above and
follow the instructions.

Answers to many common questions and a list of some Onyen
related services can be found by visiting the web site:

http://help.unc.edu/3247

If you have questions or need additional assistance with this
issue, contact the ITS Response Center at 919-962-HELP and we'll
be glad to assist you.

We send out these Password Expiration Notices via email
at 2 weeks, 1 week, and 2 days prior to the expiration.

This message is being sent to the electronic mail address
associated with the Onyen 'bridgerb' in the UNC Campus Directory.
If this address is not your preferred electronic mail address,
you may change it by visiting the Campus Directory web site:

http://dir.unc.edu/dir/home/

Sent: Monday, June 11, 2012 12:14 AM
To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: Your Onyen 'bridgerb' password was changed

Dear Customer,

The password for your Onyen 'bridgerb' was changed on
Monday, June 11, 2012 at 0:14am.

To prevent account lockouts, please make sure you do the following:

* Log out and log back into your Windows Computer with your new Onyen password if it is connected to the AD.UNC.EDU Domain

* Update the password on any mobile devices that have your UNC Email Account configured (iPods, iPads, smart phones, etc.)

* Manually update your Password on Windows 7 Credentials Manager or Mac OS X Key Chain if you have any special server drives or printers configured

For more information, see http://help.unc.edu/3248

If you have any questions please contact the ITS Help Desk at 919-962-HELP or 1-866-962-4457.

Subject: FORMAL NOTICE: Finance and Administration Organizational Changes

---

TO: Deans, Directors and Department Heads

FROM: Karol Kain Gray, Vice Chancellor for Finance and Administration

SUBJECT: Organizational Changes in Finance and Administration

DATE: June 11, 2012

When I came to Carolina several months ago, I began a review of the Finance and Administration Division to become more familiar with the division's operations and to ensure that the organizational structure meets the University's complex needs. While this will be an ongoing process to provide continuous improvement, I have decided to move forward with several organizational changes now.

After more than two decades skillfully leading a vital component of Finance and Administration, and four decades at the University, Carolyn Elfland, associate vice chancellor for Campus Services, has decided to retire in June 2013. Carolyn's vast knowledge and proficiency in managing such a large, complex division are invaluable, and finding one person who could take over the post as it is currently structured is unrealistic. To accommodate this significant upcoming change, it is essential that we take a fresh look at the entire organizational structure and determine the best way to manage the large portfolio of services that traditionally have reported to Carolyn.

In addition, we have had several vacant leadership positions within our Facilities Services operation within the past year, including the executive director position and the director of Housekeeping Services. I am pleased that Darius Dixon joined the division in April as Housekeeping Services director. I do not plan to replace Van Dobson, former executive director of Facilities Services. Instead, as of July 1, I will consolidate our Facilities Services and Facilities Planning and Construction Division into a unified Facilities Services Division under the leadership of Associate Vice Chancellor Bruce Runberg. Given the close relationship between these units, consolidating them into one division makes good business sense.

Facilities Services Division:
Anna Wu, who currently is University architect, will manage this consolidated set of facilities functions under the guidance of Bruce Runberg. Anna will be promoted to assistant vice chancellor for facilities operations, planning and design, and will oversee the following departments: Facilities Planning; Design & Construction Services; Building Services; Grounds Services; Energy Management; and Housekeeping Services. Engineering Information Services, Historically Underutilized Businesses (HUB) and Construction Management will continue to report directly to Bruce. Bruce and I look forward to working with Anna in her new capacity and using her experience and expertise to help create a more efficient, streamlined organization.

I want to thank Ray DuBose for leading Facilities Services on an interim basis during this time of transition. He will continue in this role until July 1, when the new consolidated department structure becomes effective, and his knowledge will be instrumental as we make this next

transition.

Administration and Auxiliary Services:
I will soon conduct an internal search for the new position of associate vice chancellor for administration. This person will serve as my principal deputy in the Office of the Vice Chancellor and oversee Auxiliary Services, including the current operations as well as Student Stores, Trademark Licensing and University Mail Services. This position also will manage various shared internal business functions that will evolve over time to serve all units within the Finance and Administration Division. These functions will consolidate and address division-level needs in human resources, communications and planning, and information technology. Until this new post is filled, those units will continue to report to Carolyn Elfland.

Safety, Security and Sustainability:
During the next year, Carolyn will continue to manage Public Safety; Motor Pool; Environment, Health and Safety; Energy Services; Waste Reduction and Recycling; Sustainability; the Horace Williams Airport; and the Carolina Inn. I anticipate that most of these functions will report to a new associate vice chancellor when Carolyn retires, and I will make that final decision in the coming months.

I am very grateful to Carolyn for giving Finance and Administration a full year in which to make this transition. I am confident these changes will improve the efficiency of the Finance and Administration Division and have a positive long-term impact on the University as a whole. Managers will communicate directly with employees in the affected units to keep them informed, and I will issue further updates as other changes take effect.

Here is the new alignment of the current affected services:

FACILITIES SERVICES DIVISION (led by Bruce Runberg):
* Bruce Runberg: Engineering Information Services; Historically Underutilized Businesses; Construction Management; Capital Program Budgeting; and Carolina North.

* Anna Wu: Design & Construction; Building Services; Grounds Services; Housekeeping Services; Facilities Planning; and Energy Management.

AUXILIARY SERVICES (led by Carolyn Elfland until new associate vice chancellor is hired):
Auxiliary Services (Carolina Dining, Carolina Copy, UNC One Card, Laundry Services and Armored Car); Student Stores; Trademark Licensing; and University Mail Services.

SAFETY, SECURITY AND SUSTAINABILITY (led by Carolyn Elfland):
Public Safety (including Transportation & Parking); Motor Pool; Environment, Health and Safety; Energy Services; Waste Reduction and Recycling; Sustainability; the Horace Williams Airport; and the Carolina Inn.

Subject: [forum-div1] Creation of Employee Forum Divisional Listserv

---

Dear Fellow UNC-Chapel Hill Employee:
This message is to announce the creation of the Employee Forum's divisional listservs.

You are an EPA non-faculty member and so are a member of the Forum's **Division 1**. Your divisional representatives are Jennie Brooks, Tammy Cox, and David Schwartz.

This listserv is intended to be an informational one --for the one-way communication of information from the Employee Forum to you. It is not a conversational listserv. Your Forum rep will occasionally send you bulletins, progress reports, etc. that we hope will help keep you updated about what is going on at the University.

If you have comments or need more information, feel free to contact your Forum delegates (in a personal email to them) or the Forum Office at forum_office@unc.edu

If you wish to be unsubscribed from this listserv, please see the directions at the bottom of this e-mail.

Thank you.

Jackie Overton, Chair
Employee Forum

To:	Bridger, Beth <bridgerb@email.unc.edu>
Subject:	FORMAL NOTICE: Director, Carolina Women s Center

The University of North Carolina at Chapel Hill invites applications and nominations for the position of Director of the Carolina Women's Center. The Director will lead the Center in fulfilling its mission--to create an inclusive education and work environment where gender is not a barrier to success, difference and diversity are celebrated, and everyone is safe to live, learn, teach, and work without threat of harm or unequal treatment--through advocacy, education, outreach, and support in areas of concern to the women of UNC-Chapel Hill and their colleagues.

The Center, which was established in 1997, aims to improve the status of women and provide an infrastructure to represent women's interests on issues such as health, campus security, childcare, professional development, pay equity, and the campus climate for women students, faculty, and staff. It also works to increase awareness of the intersection of gender with a range of identities and issues.

The Director of the Carolina Women's Center has overall responsibility for the activities, programs, and operations of the Center. Specific responsibilities include the following:

Strategic planning (25%). The Director collaborates extensively with faculty, staff, administrators, and students from all areas of the campus as well as with alumni and community partners to identify needs, establish a shared vision and purpose, set directions for the Center, and stimulate responsive and innovative programs and activities. Collaborators include the Employee Forum, Human Resources, Student Affairs, the Office of Diversity and Multicultural Affairs, Campus Health Services, the Center for Faculty Excellence, student organizations, and various faculty and staff groups and committees.

Development, implementation, and evaluation of programs and services (50%). The Director oversees the planning, implementation, and evaluation of the Center's programs, initiatives, and activities to achieve strategic priorities focused on the separate and shared needs of faculty, staff, and students, with special attention to intersections among identities. Ongoing needs assessment and program evaluation are essential to ensure relevance, accountability, and documentation of achievements.

Fiscal and administrative management and oversight (25%). The Director is responsible for the sound financial management of the Center and its programs and for securing grants and gifts to support the goals of the Center. The Director effectively supervises staff, promotes effective teamwork, provides avenues of communication, fosters a culture of service and excellence, provides mechanisms for generating ideas and addressing concerns, evaluates performance, and provides opportunities for staff recognition and professional development. The Director works closely with the staff of the Unified Business Cluster to promote the financial well-being and stability of the Center and assure compliance with the policies and practices of the University.

The Director reports to the Vice Provost for Academic Initiatives and prepares and transmits an annual budget and annual assessments of the Center's and Director's activities. The Center's advisory boards support the Director in planning, decision-making, and fundraising.

The position requires a minimum of a Master's degree and progressively more responsible experience in developing, leading, and administering units like the Carolina Women's Center. The successful candidate will possess many of the following attributes: knowledge of issues affecting women and experience in addressing those issues; excellent skills in communication and in building positive working relationships with a wide variety of partners and constituents; expertise in program development and outcomes assessment; strong managerial, fiscal, and administrative abilities; and commitment to best practices. The Directorship is a full-time EPA Non-Faculty position. The Director may hold an adjunct faculty appointment.

The University of North Carolina at Chapel Hill is a comprehensive research university offering the highest academic quality and a culture of achievement and collaboration. Chartered in 1789, UNC is the oldest state university in the United States. The University enrolls 29,137 students, and is ranked in the top five public national universities by U.S. News and World Report. The University's fourteen colleges and schools provide instruction offering 73 baccalaureate, 112 master's, and 72 doctoral programs, as well as degrees in the health professions, law, social work, business, education, information and library science, and journalism and mass communication. The University is situated in the vibrant Town of Chapel Hill in the Research Triangle area of North

Carolina.

Inquiries and nominations may be addressed to Dr. Bettina Shuford, Chair, Carolina Women's Center Search Committee Chair, c/o Ms. Debbie Stevenson, 104 South Building, CB# 3000, The University of North Carolina at Chapel Hill, Chapel Hill, NC 27599-3000, or debbie_stevenson@unc.edu. Review of applications will begin July 1,2012 and will continue until the position is filled. The expected start date is October 1, 2012.

Candidates should submit a cover letter describing their interest in and qualifications for the position, a curriculum vitae, and the names, titles, addresses, phone numbers, and email addresses of three references. All inquiries will be kept confidential in the early stages of the search process. Applicants will be directly solicited for permission before references are contacted.

All applications must be submitted electronically. To apply, go to

https://unc.peopleadmin.com/postings/5372

For more information please visit:
http://provost.unc.edu/announcements/open-positions

The University of North Carolina at Chapel Hill is an equal opportunity employer. Minorities and women are encouraged to apply.

Subject:	FORMAL NOTICE: PeopleSoft and Departmental Systems

TO: All Deans, Directors, and Department Heads

copied to:
All HR Facilitators
All HR Administrative Advisory Committee Members
All Business Managers
ITS Applications Collaborative
All Finance Advisory Group Members

FROM:
Dwayne Pinkney, Vice Provost, Finance and Academic Planning
Matt Brody, Associate Vice Chancellor for Human Resources
Kevin Seitz, Associate Vice Chancellor for Finance
Jerri Bland, Assistant Vice Chancellor of Enterprise Applications

SUBJECT: PeopleSoft and Departmental Systems

Implementing PeopleSoft will change how departmental systems such as InfoPorte, MIS, and ITWorks access data from our enterprise systems. If your department uses a system that accesses data from the HR or Finance Data Warehouses or the legacy FRS, HRIS, EPAWeb or other enterprise systems, please read the Departmental Systems 101 document (link below). This document distills the key points from a Decision Document that was recently approved by the ConnectCarolina Project Sponsors covering this critical area.

The Departmental Systems 101 document:

-- introduces the principles that will guide interactions between PeopleSoft, its accompanying reporting tools, and departmental systems.

-- gives suggestions for what you can do to stay abreast of changes so your systems make a smooth transition to PeopleSoft.

Since departmental systems are a key component of your processes, it's important to be aware of all changes that affect your systems and to start planning for how you will address them so your systems work the first day after go-live.

Subject:	FORMAL NOTICE: Attention Current Electric Vehicle (EV) Owners or Anyone Considering EV Purchase

---

The increase in the number of campus departments and individuals who own electric vehicles has resulted in an opportunity to develop a framework for how to best meet the needs of campus departments and owners using this new technology.

According to the 2011 Sustainability Report (http://sustainability.unc.edu/Portals/Sustainability2009/Documents/2011%20Sustainability%20Report.pdf), more than one-third of the campus vehicle fleet runs on alternatives to fossil fuels. Flex-fuel vehicles (269) run on 85% ethanol fuel, some diesel vehicles (23/53) run on 20% biodiesel fuel, the campus operates 26 electric vehicles, and leases three hybrids.

There has also been an increase in the number of students, faculty, and staff who own and use electric vehicles. The Advisory Committee on Transportation (ACT) has created a working group to assess needs, and Christopher Payne who is Vice Chair of ACT is also serving to lead this effort. If you use an electric vehicle as a department or individual or if you are considering a purchase, please contact Christopher A. Payne, Associate Vice Chancellor for Student Affairs at cpayne@email.unc.edu so we can compile a list and invite you to participate in discussions and surveys regarding the needs of EV users.

Subject:	FORMAL NOTICE: Update on TIM Access

DT: June 20, 2012
TO: All Staff
FR: Dennis Press, University Controller, Finance Division
Jerri Bland, Assistant Vice Chancellor, Enterprise Applications, ITS
RE: Update on TIM Access

As some of our campus community may be aware, in April of this year Mozilla made a change to its Firefox browser that blocked the Java components of Thinstall - the UNCTIM application used by most campus personnel to access our Time Information Management system (TIM). Just prior to Mozilla making this change, the University learned the license costs for using Thinstall is increasing to $100,000 - five times the costs we have previously paid.

As a result of this cost increase and the challenges presented with the Mozilla change, Payroll Services and ITS have been evaluating the University's use of Thinstall. In addition, we are investigating whether there are other low cost solutions similar to Thinstall that may be able to meet our requirements for supporting TIM.

RECOMMENDED ACTION
While we are completing our evaluation, Payroll Services and ITS recommend and encourage campus users who are NOT TIM Administrators to use the HTML (non-Java) version of TIM, if at all possible. The HTML version of TIM avoids any potential Java conflicts and alleviates significant reliance upon Thinstall.

The HTML version of TIM can be accessed by navigating to (or clicking on) http://unctim.unc.edu/employee . While recognizing there are some visual and functional differences with the HTML version of TIM, campus users are able to enter time worked, leave taken, and, as staff or as a manager, approve time.

ALL TIM administrators, Managers who process advanced functions, (such as editing schedules and moving hours), or if you find the HTML version of TIM is not meeting your needs, should continue to use the latest version of UNCTIM Thinstall to access TIM. If you have not installed UNCTIM Thinstall since April 13, 2012, please make sure you delete the current version of UNCTIM5.1 or UNCTIMWIN7 from your desktop and then download the latest version of UNCTIM6.1 from the Shareware site, https://shareware.unc.edu/#t

We will continue to use Thinstall until our evaluation is complete and a final solution identified. Additional updates will be provided as they become known.

COMMENTS / CONCERNS / QUESTIONS
If you have any comments, concerns or questions about this recommendation, please contact Betsi Snipes (Betsi_Snipes@unc.edu) or Jerri Bland (Jerri_Bland@unc.edu).

Time Information Management (TIM) Non-Java User Manuals can be found here:
http://finance.unc.edu/finance-division/training/training-overview.html#tim

A Help Document on fixing the Java error that may occur when installing Thinstall can be found here:
http://help.unc.edu/unctim-javaerror

You may contact 919-962-HELP (962-4357) for further support.

Subject: FORMAL NOTICE: Minors on Campus

To: All Employees

From: Holden Thorp

Date: July 2, 2012

Re: Minors on Campus

UNC-Chapel Hill welcomes many visitors to campus during the summer, including young people who attend day and overnight camps that are sponsored by our employees, schools and units. We ask that you review the information in this memorandum because we all have a responsibility to provide a safe and secure environment for these children.

REPORTING:
If any employee reasonably suspects a child has been abused or neglected by a parent, guardian or caregiver, under North Carolina law, there is an obligation to report that suspicion to a county department of social services. The telephone number of the Orange County Department of Social Services is 919-249-2800 or 919-968-2000. Its web address is http://www.co.orange.nc.us/socsvcs/child_protective_services.asp. According to Orange County's website, "[r]eports of abuse and neglect are accepted 24 hours a day including weekends and holidays. If you are reporting a suspected case of abuse after hours, please call 911 and ask for the on-call social worker."

If there is a suspicion or observation of a child being harmed by anyone, Public Safety should be contacted by dialing 911. In addition, if an employee's report involves another University employee, a report should also be made to the University's Equal Opportunity/ADA Officer, Ann Penn (919-966-3576).

TRAINING:
Units that sponsor or have residential/overnight programs that involve minors are required to train staff who stay with minors in the overnight facility on the mandatory reporting requirement and to review the program's safety and security policies and procedures. A brief description of how to recognize signs of potential child abuse and neglect and the reporting requirements may be found at this website sponsored by the North Carolina Department of Social Services; see http://www.ncdhhs.gov/dss/cps/about.htm.

In addition:
* One organization that offers training resources is Prevent Child Abuse North Carolina; see http://www.preventchildabusenc.org/index.cfm?fuseaction=cms.page&id=1047.
* The American Camp Association's website contains recommendations on various topics related to operating youth programs; see http://www.acacamps.org/knowledge.

NO RETALIATION:
Under North Carolina law, persons who make reports to the county department of social services in good faith are immune from civil or criminal liability. Additionally, the University's policy against

retaliation also applies to this reporting.

Recent events that are being reported in the national media remind us that good faith reporting of suspected child abuse and neglect is everyone's responsibility. Please take some time to visit the websites and learn about this important issue and how to make the University's campus a welcoming and safe place for children.

Subject: FORMAL NOTICE: UNC Printing Operations Update

Deans, Directors and Department Heads:

I am writing to let you know that the University has reached agreement with Xerox to take over the current UNC Printing operations at the Homestead Road location, effective August 1, 2012. Maintaining a printing presence on campus to help departments obtain printing services and advice consistent with the University's graphic standards has been a priority since we announced the upcoming closure of UNC Printing at the end of this month. The agreement with Xerox ensures that the campus's printing needs will continue to be met without interruption.

Beginning next month, Xerox will manage on-campus printing services for University clients and will continue to provide all the services currently offered by UNC Printing. To make the transition as seamless as possible, Xerox plans to use the same web submission, procurement and billing system we now use for departments to request or submit work. Auxiliary Services will manage the departmental billing for Xerox through the current interface with FRS and University Accounting. There should be no change in the process for departments at this time.

In addition to providing the same careful attention to your printing jobs you've come to expect with UNC Printing, Xerox will expand the services offered. I will provide additional information as we make the transition to Xerox. In the meantime, if you have any questions, you can reach me at 919-962-2403.

Sincerely,

Mike Freeman
Director of Auxiliary Services

Subject:	FORMAL NOTICE: Message from the Chancellor: State Budget Update

---

Dear Carolina Faculty and Staff:

The North Carolina General Assembly last week took final action on a new state budget for fiscal 2012-2013. UNC President Tom Ross has characterized the budget as fair and sensitive to the highest priority needs of the UNC campuses. I agree with that assessment and share his gratitude for the consideration our legislators have given to public higher education in North Carolina under difficult circumstances.

This budget provides stability with no significant new cuts in our state appropriations and recognizes your hard work and contributions through a modest, but well-intentioned - and deserved - salary increase.

For the raises, the first in four years, the budget provides for a 1.2 percent increase for all staff employees covered under the State Personnel Act (SPA). For staff and faculty exempt from the personnel act (EPA), we will receive funding equivalent to a 1.2 percent increase. We will have flexibility to administer these EPA increases at the campus level, pending guidance from General Administration after the Board of Governors meet next month. In addition, all employees will be eligible to receive an additional five days of vacation leave for use in 2013.

Considering the current economic picture for the state, the fact that a raise made the final budget is a positive indication that our legislators value the contributions you make to the University and to North Carolina. Thank you for being patient during these challenging times since the downturn began. My colleagues and I in the administration are grateful for all that you do for Carolina and will continue advocating on your behalf when it comes to future pay increases and enhanced benefits.

The budget also includes funding for enrollment growth on other UNC campuses. As we had hoped, the campuses also will keep the revenue associated with the tuition increases previously approved by the UNC Board of Governors. Those funds will be particularly helpful to us in addressing UNC-Chapel Hill priorities approved by our Board of Trustees and the Board of Governors including need-based financial aid, retaining faculty who have received offers from other institutions, restoring courses eliminated through previous budget reductions, and graduate student aid.

We also expect to gain about $2.8 million for Carolina from among the $13 million allocated for repairs and renovations on UNC campuses. The Legislature will offset earlier reductions in need-based financial aid on UNC campuses with an additional $24 million funded primarily by excess state lottery receipts. The campuses also expect to absorb marginal cuts to meet a reduction created by the restoration of management flexibility provisions enacted last year by legislators.

We still have a lot of details to work through with General Administration to know the full impact of the new budget for UNC-Chapel Hill. Keep in mind that our state appropriations currently account for less than 20 percent of the University's total revenues. The state's investment is generally allocated to support instruction and key academic operations. Other key revenue sources, including faculty research grants and contracts and private gifts from our loyal alumni and friends, remain solid. Compared with other major public research universities around the country, we continue to be well positioned in part because of the generous state support we have received over the years.

We have done our part to help the state cope with the downturn. In all, we've taken more than $231 million in total state cuts since 2008. We have also identified and implemented $50 million in permanent administrative savings based on a study of campus operations by Bain & Company. Carolina Counts, the resulting campus initiative, has helped us streamline operations and eliminate unnecessary bureaucracy, thereby reallocating resources to support the academic mission.

I look forward to continuing our work with President Ross, his staff and the General Assembly to preserve the quality of a Carolina education for thousands of current and future students. Maintaining the strength of public higher education in North Carolina is absolutely vital to the economic future of our state.

For updates on the University budget, refer to universityrelations.unc.edu/budget.

Thanks again for all you do to serve our students and the University.

Sincerely,

Holden Thorp

Subject: FORMAL NOTICE: External Professional Activities for Pay

---

July 15, 2012

MEMORANDUM

TO: Deans, Directors, and Department Chairs
Human Resource Facilitators

FROM: Chancellor Holden Thorp

SUBJECT: External Professional Activities for Pay

Please be reminded that you should submit any remaining paper forms pursuant to the Board of Governors' Policy on External Professional Activities that may have been filed with you since July 1, 2011. Please do not send printouts of forms submitted electronically via http://epap.unc.edu. For fiscal year 2011-2012, most forms should've been submitted electronically in which case you may not have many forms, possibly none. However, if you have any paper forms, please direct them to the attention of Roberto Cofresi, Office of University Counsel, CB#9105 by August 15, 2012, and thank you for your help. Please direct any questions to Roberto Cofresi, Office of University Counsel, at 843-9953.

Fiscal year 2011-2012 will be the last fiscal year we will accept paper forms for EPAP requests. Starting with any requests for July 1, 2012 please direct all staff who wish to submit an EPAP request to do it on-line at http://epap.unc.edu. If they have already submitted a paper form to our office, the request must be entered thru the on-line system.

For procedures on filing reports of External Professional Activities for Pay as required by the Board of Governors' Policy on External Professional Activities, see http://intranet.northcarolina.edu/docs/legal/policymanual/300.2.2.1%5BR%5D.pdf (Regulations on External Professional Activities for Pay by Faculty and Non-Faculty EPA Employees).

Subject: FORMAL NOTICE: DDD-Interdepartmental Fee Requests for Fiscal Year 2013-14

To: Deans, Directors and Department Chairs

From: Interdepartmental Fees & Charges Committee Co-Chairs
Dennis Press, University Controller

Re: Interdepartmental Fee Requests for Fiscal Year 2013-14

This memorandum is the annual reminder regarding requests for interdepartmental fees and charges. In accordance with the Campus Interdepartmental Fees & Charges (IF&C) policies and procedures, requests for new interdepartmental fees, revisions to existing interdepartmental fees, and the elimination of interdepartmental fees that will go into effect during Fiscal Year 2013-14 must be submitted to the IF&C Committee no later than Monday, September 17, 2012. Rate increases and new fees received after the deadline will not be considered. The rate review and approval process must be completed and rate revisions and new fees announced to the campus no later than February 15, 2013, in advance of next year's Annual Budget Hearing Process.

All campus units that charge other departments a fee for goods and services should review the Determination of Fee Oversight Authority decision diagram on page 4 of the IF&C policies and procedures, and confirm to OSR's Cost Analysis and Compliance department of Office of Sponsored Research (OSR) your present oversight status in accordance with this decision diagram. Please confirm your oversight review status with Cost Analysis and Compliance by August 17, 2012.

If the decision diagram indicates your operation is a Research Service Center (RSC), the appropriate oversight body is the OSR. RSCs do not need to take further action based on this memorandum. OSR will contact you to establish the nature and timing of your next review. If the decision diagram indicates your operation is an Interdepartmental Service Center (ISC), then the appropriate oversight body is the Interdepartmental Fees & Charges Committee and this memorandum does apply.

Information about the IF&C policies and procedures and other important information is located at the following web site: http://finance.unc.edu/finance-division/about-us/finance-committees.html#comm_inter. The following information is available on the web site.

* List of Interdepartmental Fees and Charges
* Interdepartmental Fees and Charges Policies and Procedures
* Rate Development Form and Attachments

In summary, requests for interdepartmental fees and charges for fiscal year 2013-14 must be submitted by September 17, 2012 to me at dennis_press@unc.edu. Requests in Excel format are preferred.

Thank you.

Note: This memo is also being sent to University Business Managers.

Subject: FORMAL NOTICE: Required COI Training for Researchers Now Available On-line

---

To: All Faculty, Staff, Students and Trainees involved in Research

From: Joy Bryde, Conflict of Interest Officer
Assistant Director of Research Compliance

I am pleased to announce that the on-line conflict of interest (COI) training is now available at the website: https://apps.research.unc.edu/coi-training/.

Upon consultation with the Provost and the Vice Chancellor for Research, the Chancellor has determined the COI training should be completed by all individuals who are involved in research. Individuals can include faculty, staff, students or trainees. As part of the preparation for achieving compliance with the new federal regulations effective August 24th, we are making this training available now. Generally, completion of this training will be valid for four years and will be reflected, no later than August 24th, in the RAMSeS and IRBIS systems.

In particular, those individuals who receive funding from the Public Health Service (PHS) through the NIH, CDC, AHRQ, FDA, HRSA or others will
receive additional email training reminders to complete their training no later than August 24th.

For further information, please visit the Research Compliance Program website which has a page discussing the new federal regulations. The page is accessible at http://research.unc.edu/offices/research-compliance-program/index.htm. A summary of some major changes with the anticipated policy modifications are outlined along with a comparison of current regulations. Please continue to check the website as it will be updated with information and frequently asked questions (FAQs) that are received from members of the campus community.

I'd like to thank our faculty/administrator beta testers and those individuals on the RCP and ORIS teams who worked to make this site available now.

Subject:	FORMAL NOTICE: Director, World View

Director, World View: An International Program for Educators

The University of North Carolina at Chapel Hill invites applications and nominations for the position of Director of World View: An International Program for Educators. World View, a public service program established in 1998, helps K-12 schools, community colleges, and four-year colleges prepare students to succeed in an interconnected, diverse, and multicultural world. World View accomplishes this mission by helping educators:

1.develop a greater understanding of world regions, cultures, and global issues through professional learning opportunities and international study travel

2.integrate a global perspective into every subject area of the curriculum and at every grade level

3. respond to rapid cultural and demographic changes in our classrooms and communities.

World View organizes professional development programs year-round--seminars, workshops, symposia, online courses, and international study visits--that link educators with experts in international affairs and global education. Programs are held both in Chapel Hill and statewide. World View programs, which serve educators of all content areas and grade levels, provide content and best practices for integrating global education in all areas of the curriculum.

The Director of World View has overall responsibility for its activities, programs, and operations. Specific responsibilities include the following:

Strategic planning and partnership development. The Director works extensively with UNC faculty and administrators, state education officials, K-12 and college educators, and community partners to identify needs, establish a shared vision and purpose, set directions for the Program, and stimulate responsive and innovative programs and activities. Collaborators include the international Area Studies Centers at UNC-Chapel Hill and Duke; the School of Education at UNC-Chapel Hill; the NC Department of Public Instruction; the State Board of Education; and the Center for International Understanding.

Development, implementation, and evaluation of programs and services. The Director oversees the planning, implementation, and evaluation of World View's programs, initiatives, and activities. Ongoing needs assessment and program evaluation are essential to ensure relevance, accountability, and documentation of achievements. World View programs address the needs of students, faculty, and administrators in K-12 schools and colleges throughout North Carolina.

Fiscal and administrative management and oversight. The Director is responsible for the sound financial management of World View and its programs and for securing grants and gifts to support its goals. The Director effectively supervises staff, promotes effective teamwork, provides avenues of communication, fosters a culture of service, provides mechanisms for generating ideas and addressing concerns, evaluates performance, and provides opportunities for staff recognition and professional development. The Director works closely with the staff of the Unified Business Cluster to promote financial well-being and stability and assure compliance with the business policies and practices of the University.

The Director reports to the Vice Provost for Academic Initiatives and prepares and transmits an annual budget and annual assessments of World View's and the Director's activities. World View's advisory board supports the Director in planning and fundraising.

The position requires a minimum of a Master's degree and progressively more responsible experience in international affairs and/or international education and administrative leadership. The successful candidate will possess many of the following attributes: knowledge of international affairs; awareness of strategies for globalizing K-12 and community and four-year college curricula; excellent skills in communication and in building positive working relationships with a wide variety of partners and constituents; expertise in program development and outcomes assessment; strong managerial, fiscal, and administrative abilities; energy, drive, creativity, and ambition; and commitment to best practices. The Directorship is a full-time EPA Non-Faculty position. The Director may hold an adjunct faculty appointment.

The University of North Carolina at Chapel Hill is a comprehensive research university offering the highest academic quality and a culture of achievement and collaboration. Chartered in 1789, UNC is the oldest state university in the United States. The University enrolls 29,137 students and is ranked in the top five public national universities by U.S. News and World Report. The University's fourteen colleges and schools provide instruction offering 73 baccalaureate, 112 master's, and 72 doctoral programs, as well as degrees in the health professions, law, social work, business, education, information and library science, and journalism and mass communication. The University is situated in the vibrant Town of Chapel Hill in the Research Triangle area of North Carolina.

Inquiries should be addressed to Dr. Robert Bruce, World View Search Committee Chair, c/o Ms. Debbie Stevenson, 104 South Building, CB# 3000, The University of North Carolina at Chapel Hill, Chapel Hill, NC 27599-3000, or debbie_stevenson@unc.edu. Review of applications will begin August 1, 2012 and will continue until the position is filled. The expected start date is December 1, 2012.

Candidates should submit a cover letter describing their interest in and qualifications for the position and a curriculum vitae that includes the names, titles, addresses, phone numbers, and email addresses of three references. All inquiries will be kept confidential in the early stages of the search process. Applicants will be directly solicited for permission before references are contacted. All applications must be submitted electronically. To apply, go to

http://unc.peopleadmin.com/postings/5937

For more information please visit:

http://provost.unc.edu/announcements/open-positions

The University of North Carolina at Chapel Hill is an equal opportunity employer. Minorities and women are encouraged to apply.

Subject:	FORMAL NOTICE: Discontinuation of Special Salary Restrictions and Related Procedure Changes

---

TO: Deans, Directors and Department Heads
Human Resources Facilitators
Business Managers

FROM: Gwen Burston, Director of Academic Personnel, Office of the Provost
Jessica Moore, Senior Director, Classification and Compensation, OHR

SUBJECT: Discontinuation of FY 2011/12 Special Salary Increase Restrictions and Related Procedure Changes

Effective July 1, 2012, the special salary increase restrictions and pre-approvals mandated as part of last year's State Budget Act have now been discontinued. This means that we will return to the salary increase policies that were in place prior to the special budget restrictions, with a few minor changes. This memo contains some specific highlights and reminders, since we have not used these procedures in some time and since some of the forms will be changing.

It bears reminding that while the Legislature has lifted many of the special salary increase restrictions and pre-approval requirements that had been in place over the last several fiscal years, the requirement that our campus report all salary increases on a quarterly basis to various external oversight bodies - including UNC General Administration (GA) and the Legislature - remains in place. Therefore, Department Heads are reminded that they must continue to exercise significant care and prudence in proposing any salary increases in the new fiscal year.

Please refer to the compensation portions of the OHR and Academic Personnel websites for more detailed information regarding our regular compensation and pay policies and procedures. The relevant OHR policies are located at http://hr.unc.edu/classification-compensation/compensation-pols/index.htm and the Academic Personnel policies at http://academicpersonnel.unc.edu/faculty-policies-procedures/compensation-and-pay/index.htm.

***Salary Guidelines for All Permanent Employees

-- Prohibitions against granting certain types of salary increases such as equity or retention using State funds are no longer in effect.
-- Temporary salary adjustments such as acting pay or temporary additional duties are no longer subject to UNC President or Board of Governors (BOG) pre-approval.
-- Base salary adjustments for existing employees that result from a competitive recruitment for a new appointment no longer require UNC GA pre-approval.

All salary adjustments and supplemental payments remain subject to our regular compensation and salary administration policies, and must still be reviewed and approved through your management chain and established campus channels. If you have questions regarding these policies and procedures, please seek guidance from your School/Division HR Officer, OHR Classification and Compensation, or Academic Personnel before planning any salary increase.

***Salary Guidelines for EPA Permanent Employees

-- We have modified the "Recommendation for EPA Base Salary Adjustment or Supplement" form to reflect the lifting of the special budget restrictions, to exclude lump sum payments, and to no longer include SPA positions. The revised version of this form may be downloaded from http://hr.unc.edu/form-finder/epa-forms/index.htm. Prior versions of this form should no longer be used.
-- Completed "Recommendation for EPA Base Salary Adjustment or Supplement" forms for EPA Non-Faculty may once again be attached directly to an EPAWeb Salary/FTE Change action instead of being sent to OHR by e-mail. The only exceptions are forms for postdocs, which still must be sent via e-mail to epanfsalaryrequest@unc.edu since postdoc actions do not route to OHR in EPAWeb. The submission process for routing Faculty EPA salary increase forms to the Academic Personnel Office remains unchanged from how it was handled during this past fiscal year.
-- Base salary adjustments that result in a cumulative fiscal year-to-date increase that is 10% or greater than the prior 6/30 base salary are subject to Board of Trustees (BOT) pre-approval, as has been the University's longstanding policy. Base salary adjustments for existing employees that are the result of a competitive recruitment for a new appointment are excluded from this pre-approval requirement.
-- Base salary adjustments that result in a cumulative fiscal year-to-date increase that is both 15% and $10,000 above the prior 6/30

base salary are subject to BOG pre-approval, in accordance with longstanding UNC GA policies. Base salary adjustments for existing employees that are the result of a competitive recruitment for a new appointment are excluded from this pre-approval requirement.
-- Base salary adjustments that meet both of the above Board approval thresholds must first receive BOT approval and then be routed for BOG pre-approval.
-- Any actions requiring BOT or BOG approval may not be effective until the day after the final required Board approval is granted.
-- Any salary adjustment for an employee in a primary EPA Non-Faculty Senior Academic and Administrative Officer (SAAO) appointment may not result in a new base salary that exceeds the assigned UNC GA salary range for their job title without special OHR and BOG approval.
-- Consult EPAWeb position management for currently assigned salary ranges for SAAO positions. Some SAAO positions that do not have a specific salary range in EPAWeb will require consultation with the EPA Non-Faculty HR Office.
-- The implementation of the 1.2% annual salary increase as approved by the Legislature will not be subject to the SAAO salary range limit, in the event such increase is to be given to an SAAO employee as part of the Annual Raise Process (ARP). How and to which specific EPA employees this ARP increase will be given remains unanswered until ARP guidelines have been received from UNC GA sometime in mid-August.
-- Temporary salary supplements or lump sum payments will no longer require UNC GA pre-approval. These actions still must adhere to our established campus compensation guidelines and be reviewed and approved through regular campus channels.
-- Salary supplements will continue to be requested using the "Recommendation for EPA Base Salary Adjustment or Supplement" form, which is available at http://hr.unc.edu/form-finder/epa-forms/index.htm. Lump sum payments will be processed using the standard overload form unless special arrangements are otherwise approved by OHR or Academic Personnel.

***Salary Guidelines for SPA Permanent Employees

-- All SPA salary adjustments will be processed using the SPA Salary Recommendation Form (SRF), which is available at http://hr.unc.edu/form-finder/career-banding-forms/index.htm.
-- Any individual base salary adjustment that exceeds 20% or greater of the employee's current base salary requires pre-approval by the Office of State Personnel (OSP) in addition to our regular campus approvals.
-- Base salary adjustments that result in a cumulative fiscal year-to-date increase that is both 20% and $7,500 or greater of the employee's last June 30 base salary also require the direct signature of the relevant Dean or Vice Chancellor. This level of approval is also required for any individual salary increase that results in a new career banding market index (MI) of 120% or greater. No designee or facsimile signatures are permitted in these instances, unless previously authorized by the Vice Chancellor or Associate Vice Chancellor for Human Resources.
-- In accordance with OSP rules, career banding labor market increases are only permissible when the current salary does not result in a market index of 100% or greater.
-- Retention offers for SPA employees must have a documented offer from an outside entity.
-- Employee competency assessment (ECA) changes that result in an overall higher ECA rating may receive an increase that is appropriately aligned with the employee's assigned career banding branch/role, availability of funds, and equity for comparable positions in the work unit. Employee competency changes that result in only one or two ECA components changing, but not an overall ECA rating increase, should result only in a relatively modest increase. Such amounts typically will not exceed 5% except under very exceptional circumstances.
-- Internal equity-related increases will be reviewed on a case-by-case basis and should include a strong justification, citing details of the equity situation present given comparable positions within the work unit.
-- Employee movement that results in a lateral transfer will only be reviewed for an increase where the department can show higher-level duties and/or labor market issues, and where there are no equity concerns.
-- Employee movement that results in a demotion will only be reviewed for an increase where there are compelling labor market and/or equity issues. Salary increases in these circumstances will not routinely be approved without strong justification and rationale.

***Salary Guidelines for Student, Temporaries, and Postdocs

-- SPA and EPA student employee salary adjustments do not require OHR pre-approval but must still receive all appropriate approvals at the Department and the School/Division-level as required by your management chain.
-- Salary adjustments for existing SPA direct hire temporary employees in their present assignment will be subject to pre-approval by OHR Classification and Compensation using the SPA Salary Request Form (SRF). This form has been modified to accommodate salary adjustments for both permanent and temporary employees.
-- Salary adjustments for EPA Non-Faculty temporary employees and postdocs will be subject to pre-approval by the EPA Non-Faculty HR unit using the "Recommendation for EPA Base Salary Increase or Supplement"

form, which is available at
http://hr.unc.edu/form-finder/epa-forms/index.htm. Forms for postdocs should continue to be emailed to the EPA Non-Faculty HR unit by email at epanfsalaryrequest@unc.edu. All other forms for EPA Non-Faculty temporary employees should be attached to the EPAWeb Salary/FTE action.

***Processing Salary Increases Prior to SPA Legislative Increase and EPA Annual Raise Process

This memo outlines procedural changes resulting from the discontinuation of the special salary increase restrictions from the State Budget. This memo does not include guidelines related to the expected SPA legislative increase or the EPA ARP, which will be communicated separately to campus based on guidance issued by the Office of State Personnel and UNC GA.

Please note the following with regard to these anticipated annual salary increase processes:
-- OHR has now received guidelines from the Office of State Personnel (OSP) for the SPA legislative increase. We are currently working with Payroll and ITS to implement the 1.2% across-the-board increase in the very near future. Until the legislative increase is processed into Payroll, we would ask departments to avoid processing any new SPA salary increase actions unless they are particularly time-sensitive or essential. We are not implementing a mandatory freeze, but awaiting implementation of the SPA legislative increase in Payroll before processing additional actions will help minimize the potential for errors or re-work by OHR and departments.
-- OHR and Academic Personnel are not expected to receive guidelines from UNC GA on the EPA Annual Raise Process (ARP) until mid-August, at the earliest. Until we receive these guidelines from UNC GA and can then issue our own guidelines to campus, we will also ask Departments to avoid processing most new EPA base salary adjustments or salary source changes with the exception of job changes, retention, or acting appointments. Lump sum payments may also continue to be processed per normal procedures without delay. While we would strongly prefer salary adjustments related to higher-level or additional job duties as well as salary source changes be deferred until the ARP, we will accept these if the department indicates they are time-sensitive and cannot be delayed. We will not accept or process any additional 7/1 or later effective salary increase actions for equity, labor market, or any other reason not otherwise noted above, until we receive the ARP guidelines from UNC GA and the ARP process begins. It is expected, although not yet finalized by UNC GA, that the ARP process will permit retroactive actions to 7/1. In the meantime, if you have a special situation, please contact Academic Personnel or the EPA Non-Faculty HR Office for guidance.

As always, the period of time between when the new fiscal year begins and when the legislative increase and ARP processes are accomplished always presents special logistical and coordination issues. We appreciate your patience and understanding during this time as we work through these annual increase processes, especially since they have not been accomplished during the past several years. If you have any questions regarding any of these changes or our compensation guidelines in general, please contact one the following offices:

*Faculty Salary Increases: Academic Personnel Office at 962-1091
*EPA Non-Faculty Increases: EPA Non-Faculty HR unit at 962-2897
*SPA Salary Increases for Internal Promotions/Hires: Contact your assigned OHR Employment and Staffing Consultant
*All Other SPA Salary Increases: Contact your assigned OHR Classification and Compensation Consultant

Subject:	FORMAL NOTICE: Additional Special Leave for State Employees

---

TO: All Employees

FROM: Ashley Nicklis, Senior Director, Benefits & Work/Life Programs
Office of Human Resources

The 2012 General Assembly ratified SB 187, which provides a one-time additional five days of special (vacation) leave effective July 1, 2012, to permanent full-time, leave-earning employees. Since 9-month faculty do not earn leave, they are not eligible for this leave. The leave will be pro-rated for part-time employees.

The special leave, which is being referred to as FY13 leave, is being awarded as a one-time benefit and must be used by June 30, 2013. Any leave not used by June 30, 2013, will be forfeited. The FY13 leave should
be used prior to exhausting regular vacation leave, bonus leave and/or earned compensatory time (holiday comp, on-call comp, overtime comp, gap-hours comp, and travel comp). TIM has been modified to include a bucket entitled FY13 for this leave. FY13 leave will not be paid out upon separation unless the separation is due to retirement and the retirement occurs the day following the date of separation.

I advise all employees to read the full policy for details. The policy is available on the Human Resources website at http://hr.unc.edu/benefits/leave-and-holidays/index.htm. If you have questions, please contact the Benefits Office at 962-3071.

Information for Employees

Learning Opportunities – Conversation Circles Available

FROM: Verita Murrill, Training & Talent Development
Office of Human Resources

The Office of Human Resources would like to highlight several upcoming Conversation Circles offered by Training & Talent Development. Spaces are available in these sessions and there is still time to register. Each circle gathering allows participants at similar career levels and stages to discuss and develop their awareness of leadership and managerial issues. Circles meet once monthly for six months; participants are not required to attend all meetings, but are encouraged to do so. To register online, please visit the Training & Talent Development or contact Training & Talent Development at 962-2550 for more information.

Our new course catalog, listing classes for July – Dec. 2012, is available **online.** Also, visit our website for a complete course listing.

CONVERSATION CIRCLE – PROSPECTIVE SUPERVISORS & MANAGERS
The Prospective Supervisors & Managers Conversation Circle is an opportunity for faculty and staff with the desire to move into a management or supervisory role to connect with other individual contributors across campus to think and learn together and leverage their shared knowledge to develop their individual supervisory and management effectiveness.
Date: Wednesdays, Aug. 8, Sept. 12, Oct. 10, Nov. 14, Dec. 19
Time: 9 a.m. to 10:30 a.m.

CONVERSATION CIRCLE – NEW MANAGERS & SUPERVISORS
Individuals recently (less than one year) promoted or newly hired into a management or supervisory role are invited to join this circle.
Date: Wednesdays, Aug. 8, Sept. 12, Oct. 10, Nov. 14, Dec. 19
Time: 11 a.m. to 12:30 p.m.

CONVERSATION CIRCLE – MANAGERS' CIRCLE
The managers' circle is an opportunity for faculty and staff with management or supervisory responsibilities to connect with other managers across campus to think and learn together and leverage their shared knowledge to improve individual management effectiveness.
Date: August 16, Sept. 5, Oct. 16, Nov. 8, Dec. 4
Time: 9 a.m. to 10:30 a.m.

CONVERSATION CIRCLE – OPENING DOORS
The Opening Doors workshop (sponsored by UNC School of Medicine) is a prerequisite for this circle. The Opening Doors Conversation Circle is an opportunity for participants to continue the awareness-raising conversations initiated at the diversity appreciation workshop titled, *"Opening Doors: A Personal and Professional Journey"* sponsored by the UNC School of Medicine.
Date: Aug. 8, Sept. 19, Oct. 10, Nov. 14, Dec. 12
Time: 2 p.m. to 3:30 p.m.

OHR Personnel Announcement

FROM: Gena Carter, Employee & Management Relations
Office of Human Resources

Effective immediately, Sean Womack has been reassigned to the role of SPA Grievance Coordinator. Sean joined the Employee & Management Relations team earlier this year as an E&MR consultant. Upon Martha Fowler's retirement on April 1, Sean assumed the role of interim grievance coordinator. After rethinking the structure of the position, and in considering both Sean's background in handling investigations and employee disputes and his performance in the role, Sean was shown to be the perfect fit.

In addition to managing the grievance process, Sean will continue to serve as an E&MR consultant to his designated departments.

Subject: Additional Special Leave Time

FYI

The additional special leave for state employees, FY13 Leave, has been uploaded in the TIM system and will be effective as of **July 16, 2012**.

Because this leave **WILL NOT** carry forward, you **must** use the special leave before using your regular sick or vacation leave. It will be gone as of July 1, 2013.

Please keep this in mind when sending me your sick and/or vacation leave information.

Let me know if you have any questions.

Thanks,
Kim

Subject:	FORMAL NOTICE: Update on African and Afro-American Studies

---

Dear Carolina colleagues,

We sent this message to faculty last week, and I wanted you to have it, too.

Holden Thorp

Message from the Chancellor: Update on African and Afro-American Studies

July 20, 2012

Dear Carolina faculty colleagues,

I am writing with important updates about what we are doing to resolve the serious problems of academic integrity that arose in our Department of African and Afro-American Studies. I hope that all of you have read the review (go.unc.edu/Zb39D) that we released in May. It provides an account of highly unethical and unprofessional activity that is completely at odds with our values as a University community.

When I took the extraordinary step of publicly releasing our review, which contained confidential personnel information, I did so to protect the University's integrity, to share our findings publicly and, perhaps most important, to absolve dedicated faculty in the department, which is an important part of our teaching, research and service mission, who had done nothing wrong. We disclosed this academic fraud, and we are fixing it.

Throughout this ordeal, we have asked hard questions, and we have found answers that are humiliating and painful for a University built on a commitment to academic excellence. What happened was wrong. There is no excuse and no justification for it. As chancellor, I take responsibility for it. I also take responsibility for cleaning it up and making sure it never happens again.

We have put new policies and procedures in place for independent study courses in the department, the College of Arts and Sciences and in the Summer School. In the department, under new Chair Eunice Sahle's leadership, stronger procedures are in place for independent studies, course syllabi, exams and grading. In addition, the department has approved plans for a new curriculum and undergraduate major. In the College, teaching assignments and enrollments are being reviewed annually to ensure that standard practices are followed.

When we completed the reviews of courses and independent studies, we sent those reports to the NCAA and to the Southern Association of Colleges and Schools (SACS), our accrediting agency. As we expected, and as any first-rate accrediting body would do, SACS followed up with questions for us about the new academic policies and procedures, the kind of monitoring we have with our Academic Support Program for Student-Athletes and the qualifications of the people who lead our various departments. We feel good about the answers we will provide on

each of those issues.

Subsequently, just this week we received a letter from SACS with the news that our fifth-year interim report was accepted with no issues. That is the highest possible ranking we could get for a report submitted as part of the 10-year accreditation timeline.

Today, we are participating in the first meeting of a UNC Board of Governors panel that is reviewing our investigation and response. Our Board of Trustees, under the direction of Chairman Wade Hargrove, is working to retain an outside third party to review and certify the new academic controls. We also are cooperating fully with the State Bureau of Investigation's review of possible criminal activity related to how Professor Julius Nyang'oro, who stepped down as department chair last fall and has retired, taught and was paid for a 2011 summer school class.

With my support, Faculty Chair Jan Boxill and the Faculty Executive Committee appointed a three-member subcommittee to examine the reviews in response to impassioned feedback from concerned faculty. I look forward to working with the subcommittee, the FEC and the Faculty Council on the resulting recommendations. Among the possibilities are my appointing experts to help us examine the appropriate future relationship between academics and athletics at Carolina.

We welcome the involvement of the Board of Governors panel, our trustees, our faculty, and others who care about the University.

We do not know, and we may never know, what motivated Professor Nyang'oro and Deborah Crowder, the former department administrator who retired in 2009, to do what they did. Some speculate that it was about athletics because student-athletes were in most of the questionable classes. But it is not the percentage of athletes in these classes that was the problem. It is that they were not taught properly. Our professors should use a syllabus, meet face to face with students and give them the educational experience they deserve.

I would be remiss in not bringing to your attention some actions Athletic Director Bubba Cunningham has taken. In reorganizing his staff, he has hired two new senior-level administrators as part of a push to strengthen and coordinate the oversight of athletics with the College and University administration. We can expect additional efforts to better connect the athletics department with faculty on issues that affect academics.

I understand some faculty question the role of intercollegiate athletics at Carolina. I personally believe we can find the right balance, but I also know that it will be a challenge. Leaders in higher education, including our own Bill Friday and his distinguished colleagues on the Knight Commission, have been striving for 20 years to develop reforms to help all colleges and universities better integrate academics and athletics. Even after two decades, the Knight Commission acknowledges there is much work to be done. But we can do it. We have to get better. And we will.

Sincerely,

Holden Thorp

INFLUENCING CHILDREN'S SELF-EFFICACY AND SELF-REGULATION OF READING AND WRITING THROUGH MODELING

Dale H. Schunk

University of North Carolina at Greensboro, North Carolina, USA

Barry J. Zimmerman

Graduate Center, City University of New York, New York, USA

According to Bandura's social cognitive theory, self-efficacy and self-regulation are key processes that affect students' learning and achievement. This article discusses students' reading and writing performances using Zimmerman's four-phase social cognitive model of the development of self-regulatory competence. Modeling is an effective means of building self-regulatory and academic skills and of raising self-efficacy. Reading and writing research is discussed in which modeling was employed to enhance self-efficacy, skills, and self-regulation across multiple phases of Zimmerman's model. The article concludes by suggesting instructional applications based on social cognitive theory and research findings.

Recent years have witnessed an increasing emphasis on the development of students' literacy skills—especially reading and writing. Although these two literacy skills depend in part on students' verbal abilities, research shows that cognitive and motivational variables also play a significant role (Zimmerman & Bandura, 1994).

Two key cognitive and motivational variables in reading and writing are self-efficacy and self-regulation. *Self-efficacy* refers to learners' perceived capabilities for learning or performing actions at designated levels (Bandura, 1997), while *self-regulation* (or

Address correspondence to Dale Schunk, 329 Curry UNCG, 1000 Spring Garden Street, Greensboro, NC 27402, USA. E-mail: dhschunk@uncg.edu

self-regulated learning) refers to self-generated thoughts, feelings, and actions that are systematically designed to affect one's learning of knowledge and skills (Zimmerman, 2000, 2001). Modeling—an important variable in Bandura's (1986) social cognitive theory—is a means for promoting students' self-efficacy and self-regulation.

This article summarizes research supporting the idea that self-efficacy and self-regulation are critical influences on reading and writing achievement. The next section presents a brief theoretical background based on Bandura's (1986) social cognitive theory to include the key concepts of reciprocal interactions, self-efficacy, modeling, and self-regulation. Zimmerman's (1998) phases of self-regulation then are described, along with a model for the development of self-regulatory skill based on the writings of Zimmerman (2000) and Schunk (1999). Research interventions are discussed in which modeling was used to promote self-efficacy and self-regulation in reading and writing among children. The article concludes with suggested ways to apply research findings to instructional contexts to foster learners' reading and writing skills.

THEORETICAL BACKGROUND

Reciprocal Interactions

Our conceptual framework is based on Bandura's (1986, 2001) social cognitive theory, which construes human functioning as a series of *reciprocal interactions* between personal influences (e.g., thoughts, beliefs), environmental features, and behaviors (Fig. 1). For example, one's personal self-efficacy beliefs about writing an essay can influence one's writing behaviors, such as choice of literary topics, effort, and persistence. Self-efficacy beliefs also can affect a person's environment; for example, efficacious students who are trying to write in a noisy social or physical environment may redouble their personal concentration to avoid distractions.

Conversely, one's social environment can affect personal variables and behaviors. Students who receive encouraging feedback from teachers may feel more personally efficacious and work harder to succeed. Teachers can inspire students to write by creating a favorable classroom environment, such as by giving children adequate time to write and revise.

The influence of behavior on personal variables can be seen in the student who succeeds in reading a moderately difficult book and then experiences higher self-efficacy and motivation to try reading another book of comparable difficulty. Behaviors also can affect

Figure 1. Bandura's model of reciprocal interactions.

the environment, as when students eliminate distractions from their environments (e.g., turn off the television so they can read better).

Bandura (2001) noted that people seek to exert control over important aspects of their lives. The notion of reciprocal interactions illustrates how people can affect their behaviors and environments with their thoughts and beliefs. Important processes that people use to exert control are their self-efficacy and self-regulation.

Self-Efficacy

Self-efficacy is hypothesized to influence choice of activities, effort expenditure, persistence, and achievement (Bandura, 1997; Schunk, 2001). Compared with students who doubt their learning capabilities, those with high self-efficacy for acquiring a skill or performing a task participate more readily, work harder, persist longer when they encounter difficulties, and achieve at higher levels.

Learners obtain information to appraise their self-efficacy from their actual performances, vicarious (modeled) experiences, forms of persuasion, and physiological reactions. One's own performances offer reliable guides for assessing self-efficacy. In general, successes raise self-efficacy and failures lower it, although an occasional failure/success after many successes/failures may not have much effect.

Learners also acquire much self-efficacy information vicariously—primarily through exposure to models. Although adult models can teach children skills, children derive the best self-efficacy information from models who are similar to themselves (e.g., peers; Schunk,

1987). Observing similar others succeed at a task, such as reading aloud in front of the class, may raise observers' self-efficacy. Children are apt to believe that if the peers can succeed, they can as well. Children may not experience the same sense of self-efficacy from observing a competent adult read to the class. Conversely, observing similar peers have difficulty on a task may lead observers to believe that they also may have trouble, which can lower their self-efficacy.

Students also receive persuasive information from others that can influence their self-efficacy to engage in activities; for example, when teachers tell them, "You can do it," or, "Work hard and you'll do well." Such information can raise self-efficacy, but actual performance will validate or invalidate the information. The increased self-efficacy will be substantiated if learners subsequently succeed, but the effect will be short-lived if students subsequently attempt the task and perform poorly.

Finally, physiological reactions (e.g., sweating, heart rate) offer information to gauge self-efficacy. Children who notice that they are less anxious than usual while taking tests may interpret that to mean that they are more skillful, which can promote self-efficacy.

Self-efficacy, however, is not the only influence on achievement. High self-efficacy will not produce competent performance when requisite knowledge and skills are lacking. *Outcome expectations*, or anticipated consequences of actions (e.g., making a high grade on a test after studying hard), are influential because learners engage in activities they believe will lead to positive outcomes (Shell, Murphy, & Bruning, 1989). Even students with high self-efficacy are not apt to attempt a task if they believe that performance will not lead to positive outcomes. *Perceived value*, or the utility of the learning, affects behavior because learners show little interest in activities they do not value (Wigfield & Eccles, 2002). Conversely, students who value an activity and believe that it will lead to positive outcomes (e.g., playing sports leads to social status among peers) may attempt the activity even if they lack self-efficacy for performing well. Assuming that learners hold positive outcome expectations and value the activity, their self-efficacy is predicted to influence their effort, persistence, and achievement (Bandura, 1986).

The effects of self-efficacy also may depend on students' conceptions of ability. Dweck (1991, 1999) proposed that people may hold an entity or incremental theory of ability. Students with an entity theory believe that ability is relatively fixed and unchanging over time, whereas those holding an incremental view believe that ability can be improved with effort and learning. With some exceptions, students who hold an incremental theory are likely to adopt learning

goals, which can raise self-efficacy and motivate them to engage in self-regulation to learn. Those holding an entity theory are less likely to adopt learning goals because they believe that learning will not raise their ability. Their self-efficacy may be lower because they believe that their performance is limited by their ability. Thus, self-efficacy may exert its strongest effects on learning and self-regulation among students who espouse an incremental theory of ability.

Modeling

We noted earlier that models provide information about learners' self-efficacy. *Modeling* refers to the process in which observers pattern their thoughts, beliefs, and behaviors, after those displayed by one or more models (Schunk, 1987). Modeling is an important means for acquiring literacy skills, beliefs, attitudes, and behaviors (Rosenthal & Zimmerman, 1978). Adults and peers serve as key models in children's lives.

Observational learning through modeling occurs when observers display new behaviors that they could not perform prior to being exposed to the models (Schunk, 1987), such as learning to use examples to illustrate abstract concepts (e.g., honesty, fairness). Observational learning through modeling consists of four processes: attention, retention, production, and motivation (Bandura, 1986). Modeling will not occur unless observers attend to relevant environmental events. Retention requires that observers mentally code and transform modeled information to store in memory, as well as cognitively organize and rehearse information. Production involves observers translating their mental conceptions of modeled events into actual behaviors, such as when they translate their thoughts into written sentences and paragraphs. Motivation influences observational learning because when students believe that models possess a useful skill they are likely to attend to such models and attempt to retain what they learn.

Models can inform and motivate observers (Schunk, 2001). Observing competent models perform actions that result in success conveys information to observers about the sequence of actions to use to be successful. By watching models, observers form outcome expectations about the expected consequences of actions. Observers are more likely to perform modeled actions that have been successful and whose outcomes they value. Students who value doing well in school and who observe a teacher successfully model how to use an outline to write a paper are likely to try outlining before they write. Models also can influence observers' self-efficacy. Seeing a successful

model may lead observers to believe that if the model can learn they can as well. As students perform actions and note their learning progress their sense of self-efficacy is strengthened, which maintains their motivation for learning.

Self-Regulation

Along with self-efficacy, self-regulation helps to promote reading and writing achievement, and models can teach students self-regulation skills (Schunk & Zimmerman, 1997a). Zimmerman (1998) conceptualized self-regulation as consisting of three phases: forethought, performance control, and self-reflection. The forethought phase precedes actual performance and refers to processes that set the stage for action, such as goal setting and modeling. The performance control phase involves processes that occur during learning and affect attention and action, such as social comparisons, feedback, and use of learning strategies. During the self-reflection phase that occurs after performance, learners respond to their efforts by evaluating their goal progress and adjusting strategies as needed.

Zimmerman and Schunk (Schunk, 1999; Schunk & Zimmerman, 1997a, 1997b; Zimmerman, 2000) formulated a social cognitive model of the development of self-regulation (Table 1). This model postulates four levels of development—observational, emulative, self-controlled, self-regulated—that begin with social sources and subsequently shift to self-sources. Although there is some overlap, the first two levels (observational, emulative) rely primarily on social factors, whereas the second two (self-controlled, self-regulated) depend more on influence by the learner.

In the early stages of learning a skill, students benefit from observing models explain and demonstrate the skill. At this observational level, students learn the major features of skills and strategies cognitively, such as when an aspiring news announcer observes a veteran anchor on television and learns that one must pause and inflect one's voice to communicate more effectively.

Table 1. Social cognitive model of the development of self-regulation

Phase	Major feature
Observation	Cognitive acquisition of skill from modeled and verbal instruction
Emulation	Demonstration of skill with social guidance and feedback
Self-controlled	Internalization of skill and its independent demonstration
Self-regulated	Adaptation of skill to changes in personal and contextual conditions

An emulative level is attained when the learner's performance approximates the general form of the model's. The learner is not copying the model's actions but rather emulates the model's general pattern or style, such as when the aspiring news announcer practices pausing and inflecting his or her voice on news articles and receives feedback from others. The major difference between the first two levels is that observational learning involves acquisition only at an observational level, whereas emulative learning also includes a performance capability.

These two sources are primarily social because they require that students be exposed to models. Internalization (i.e., learner control) of the skill or strategy being learned has begun, but the process increases with the shift to the third and fourth sources that reside primarily within the learner.

The third, self-controlled level, represents the capability of learners to use the skill or strategy independently when performing related tasks. The skill or strategy becomes internalized (self-controlled) during this phase, although the learner's mental representation is patterned after the model's performance; for example, when the aspiring news announcer listens to recordings of his or her voice and compares these against his or her memory (archived representation) of the anchor's readings. Learners at this point have not developed a mental representation of the skill or strategy independent of that displayed by the models, nor have they mentally modified the skill or strategy based on what they believe will be most effective.

During the final self-regulated level, learners adapt their skills and strategies to changes in personal and contextual conditions. Now learners can initiate use of the skills and strategies, incorporate adjustments based on situational features, and maintain their motivation through personal goals and a sense of self-efficacy for attaining them. Thus, the aspiring news announcer will notice that he or she makes fewer errors when reading slightly slower.

Bandura's reciprocal interactions are evident throughout the phases. Environmental variables influence behaviors and personal variables, which in turn affect the environment. Teachers who observe problems in learners' performances provide correction, learners who do not fully comprehend how to perform a skill or strategy at the emulative level may ask teachers for help, and learners' performances affect their self-efficacy. At more-advanced levels, learners mentally and overtly practice skills and seek out teachers, coaches, and tutors to help them refine their skills.

Social influences (e.g., models) are most prevalent during the early phases but they never completely disappear. Self-controlled and self-regulated learners use social sources less frequently but they continue

to call upon them as needed (Zimmerman, 2000). It also is noteworthy that this is not a stage model and learners may not progress in this fashion. Learners without models in their environments may bypass these levels and learn largely on their own. Despite the frequent use of self-teaching, it fails to capitalize on the potential benefits of the social environment on learning. Also, not using models may limit the level of skill acquisition unless learners are exceptionally self-regulated and can develop effective learning strategies and maintain their motivation for learning.

The emphasis on internalization shares some overlap with Vygotsky's (1962) sociocultural theory, which postulates that socially-mediated activity is an important influence on thought. The social environment, along with personal factors, produced learning through its "tools"—cultural objects, language, social institutions. Cognitive change results from using cultural tools in social interactions and from internalizing and mentally transforming those interactions.

Our social cognitive model with its emphasis on internalization shares with Vygotsky's theory the key role played by cognitive and metacognitive mediation (Schunk, 1999). One difference is that Vygotsky stressed private (internal) speech (Tudge & Scrimsher, 2003), which is one means of promoting internalization but not the only means. In the social cognitive view, internalization also can be based on visual images, verbal meanings, and nonverbalized rules and strategies—all of which can be conveyed through modeling. Internalization produced through the latter means facilitates learning, given that private speech does not commonly occur in children (Schunk & Zimmerman, 1997b).

RESEARCH EVIDENCE

This section summarizes research on reading and writing achievement that highlights the key roles of modeling, self-efficacy and self-regulation, as explained in the preceding section. The research focus in this section is on intervention studies in which programs were implemented to improve students' academic skills. Space limits preclude summarizing non-intervention research. Readers interested in these studies should consult other sources (e.g., Pajares & Johnson, 1994; Shell et al., 1989; Zimmerman & Martinez-Pons, 1990).

Reading Achievement

Schunk and Rice (1989) worked with fourth- and fifth-grade children who had low reading comprehension skills but not excessive decoding

problems. Children were pretested on comprehension of main ideas (self-efficacy and achievement). They then were assigned to one of three conditions: process goal, product goal, general goal.

All children received 35-minute sessions each day for 15 consecutive school days. During these sessions an adult teacher modeled (explained and demonstrated) a strategy to answer questions involving main ideas. The strategy included five steps: read the questions; read the passage to find out what it is mostly about; think about what the details have in common; think about what would make a good title; reread the story if I don't know the answer to a question. Following the initial modeled demonstration, the model called on children to read and apply the strategy's steps to passages they were reading.

Treatment conditions were distinguished by the type of goal instructions provided to children at the start of each of the 15 sessions. Process-goal children were advised to try to learn how to use the steps to answer questions about what they read. Product-goal children were told to try to answer questions about what they read. General-goal students were encouraged to try to do their best. Posttest results showed that process- and product-goal children judged self-efficacy for answering comprehension questions higher than did general-goal students, and process-goal children demonstrated higher reading comprehension achievement.

The modeling that occurred in this study addressed the first two levels in self-regulatory skill development: observational and emulative. Students were able to apply the strategy on their own during the instructional sessions, as well as on the posttest, which suggests that they progressed to the self-controlled level. Although informative, this study did not explicitly address the self-regulated level.

A follow-up study used the same methodology with fifth-grade students with low comprehension skills but not excessive decoding problems (Schunk & Rice, 1991). Children were assigned to a product goal, a process goal, or a process goal plus progress feedback condition. The latter condition was similar to the process-goal condition except that the model periodically provided children with verbal feedback that linked their improved performance to strategy use (e.g., "You got it right because you followed the steps in order."). Goal-plus-feedback students demonstrated higher self-efficacy and comprehension than did process- and product-goal learners. Process-goal and goal-plus-feedback children evaluated their progress in strategy learning greater than did product-goal children. These remedial readers benefited from explicit feedback on their progress toward attainment of a process goal. As with the preceding study, modeling

was used at the observational and emulative levels, and students practiced strategy application to develop a self-controlled level of competence.

In another project that examined how feedback affected learners' achievement outcomes, Schunk and Rice (1987) found in two studies that multiple sources of information stressing the value of a strategy to identify main ideas raised achievement outcomes. The participants were elementary children who had been receiving remedial instruction because they scored below the 20th percentile on a standardized reading test. The methodology was similar to that of Schunk and Rice (1989). In the first study, children were assigned to one of four conditions: specific strategy value information, general strategy value information, specific plus general (combined) strategy value information, no strategy value information. Strategy value information was given to children at the start and finish of each of 15 instructional sessions. For specific strategy value children the teacher verbally linked using the strategy with answering questions about main ideas. For general strategy value information children the teacher linked strategy use with answering any type of questions about reading passages. Children in the combined group received both types of feedback, and children in the no strategy value information group received only modeled strategy instruction. In the second study some children received specific strategy value information, others periodically received strategy effectiveness feedback that linked their strategy use with successful performance (similar to the progress feedback condition in the Schunk and Rice (1991) study), and those in a third condition received both types of feedback.

In both studies, children's self-efficacy and skills showed the greatest improvements from the combined conditions. The combination may have led children to believe that they could improve their comprehension, which raises self-efficacy. As in the prior studies, modeling was used to teach the strategy and children were able to develop self-regulatory competence in strategy application at the self-controlled level.

Further information that poor readers benefit from strategy usefulness information was obtained in two studies by Schunk and Rice (1992). Children who regularly received remedial reading instruction because they scored in the lowest 30th percentile on a standardized reading test received comprehension instruction on main ideas (same methodology as Schunk and Rice (1989)). In the first study, some students received modeled strategy instruction, others received modeled strategy instruction plus strategy-value feedback linking strategy use with improved performance (similar to the progress feedback in the

Schunk and Rice (1991) study), and those in a third condition received instruction without the strategy. In the second study, children received modeled strategy instruction or instruction without strategy modeling; they then were given comprehension instruction on locating details. Some received modeled instruction on how to modify the strategy for the new comprehension task, whereas others did not employ the strategy on details. Children who received strategy-value feedback (Study 1) and strategy-modification instruction (Study 2) demonstrated the highest self-efficacy, comprehension, strategy use, and transfer of the strategy to the new comprehension task. Unlike the preceding studies, this study provides evidence that modeling with instruction on how to adapt a strategy for a different use facilitates children's strategy internalization that is necessary to advance to the self-regulated level.

In similar fashion, Schunk and Rice (1993) found that reading comprehension benefits from procedures that combine modeling with information about strategy usefulness and efforts to internalize the strategy. Children with the same qualifications as those in the Schunk and Rice (1992) study received instruction on locating main ideas. The methodology was similar to that of Schunk and Rice (1989) except that the teacher called on children to verbalize the strategy's steps as they performed them. With increased practice, some children were asked to fade their overt verbalizations to silent (inner) speech. Half of the children in the fading and no-fading conditions periodically received feedback linking strategy use with improved performance (similar to the progress feedback in the Schunk and Rice (1991) study). The no-fading/no-feedback condition scored lower than the other three conditions on self-efficacy and reading achievement. Fading plus feedback led children to judge that they used the strategy's steps more often when answering comprehension questions, compared with the fading-only and feedback-only conditions, and to higher comprehension compared with the feedback-only condition. The fading treatment helps to promote strategy internalization, with corresponding benefits for higher levels of self-regulatory skill development (noted above).

Using a similar methodology, Schunk and Rice (1985) also found that children who verbalized aloud the strategy's steps as they applied them to passages demonstrated higher reading comprehension and self-efficacy, compared with children who applied the strategy without verbalizing the steps. These results show that verbalization is an effective way to transition from social to self-influences.

The reading achievement literature contains many other examples of research projects in which adult or peer models were used to teach

children reading comprehension strategies (Pressley, El-Dinary, Wharton-McDonald, & Brown, 1998). In some cases the modeling was not systematic as in the preceding research studies but rather was provided by teachers as the need arose (e.g., to teach students a strategy for use on a specific task). These projects are not described here because they did not include measures of self-efficacy or self-regulation. Their results do support a central contention of this article—that modeling is an effective means of teaching reading strategies.

The research described in this section shows that observing models can raise children's self-efficacy for learning and motivate them to work diligently. Modeling is a key component of the first two (observational and emulative) levels of self-regulation development. Most of the research summarized in this section did not progress beyond the self-controlled level. Moving to the self-regulated level requires that students internalize strategies. Although students can internalize strategies on their own, much research shows that internalization can be accomplished through overt strategy verbalization and fading to a covert (silent) level.

Writing Achievement

Consistent with the results for reading comprehension discussed in the previous section, research on writing achievement also shows that modeling is an effective means of teaching self-regulatory skills and raising self-efficacy. Schunk and Swartz (1993a, 1993b) found that modeled strategy instruction combined with goal setting raised elementary children's writing skills and self-efficacy and helped them maintain and transfer use of the strategy beyond the instructional context. Average-ability and gifted students received instruction on writing paragraphs over 20 sessions that included five sessions each on descriptive, informative, narrative story, and narrative descriptive paragraphs. Students were taught a five-step strategy: choose a topic to write about; write down ideas about the topic; pick the main idea; plan the paragraph; write down the main idea and the other sentences. The teacher modeled and explained the strategy, after which the students received guided and independent practice. At the start of each session, some students received a learning (process) goal: The teacher advised them to try to use the strategy to write paragraphs. Other children received a product (outcome) goal: The teacher told them to try to write paragraphs. General-goal children were advised to work productively. During the sessions, half of the process-goal students periodically received verbal feedback from the teacher that linked their use of the strategy's steps with improved performance.

Across both average and gifted students, process-goal plus feedback students generally outperformed product- and general-goal children on self-efficacy and writing achievement, evaluated the effectiveness of the strategy the highest, and demonstrated the greatest strategy use. Gains made by process-goal plus feedback children were maintained after six weeks and generalized to types of paragraphs on which children received no instruction. These results suggest that modeling, practice, and feedback, combined with learning goals and evaluations of strategy effectiveness, moved children to a self-controlled level, and the results for transfer and maintenance suggest that they were operating at a self-regulated level.

Additional evidence on the effectiveness of goals in promoting self-regulation was provided by Zimmerman and Kitsantas (1999), who investigated the development of high-school students' self-regulatory writing revision skills. Students observed a modeled demonstration of a writing revision strategy. The three-step strategy was designed to teach students how to combine multiple sentences into a single sentence by eliminating redundancies and adding transitions. Students were assigned to a condition and practiced the strategy. Process-goal students were advised to concentrate on executing key steps in the revision strategy. Outcome-goal students were told to rewrite the sentences using a minimal number of words. Shifting-goal learners initially were asked to concentrate on properly performing the strategy's steps, but after a few minutes they were advised to shift to the outcome goal. Within each of these three conditions some of the students were asked to record the number of strategy steps done correctly (process goal) or the number of words in the sentence (outcome goal). No-goals students received the same modeling and feedback without goals or self-recording. The results showed that students who received the shifting goal demonstrated higher self-efficacy and writing skill compared with the other conditions, and that process-goals were more effective than outcome goals and no goals. Self-recording increased writing skill and self-efficacy.

This study has several noteworthy features. The modeling with practice was designed to address the first two self-regulation levels of observation and emulation, the process goals addressed the third, self-controlled level, and the outcome goals tapped the fourth, self-regulated level. The results showed that it was possible to move students to the fourth level but only after progressing through the third level. Those who skipped the third level (outcome goal group) showed poorer performance and lower self-efficacy compared with the process and shifting goal conditions. Despite our earlier contention that our

model was not a stage model, this study suggests that under some conditions there are benefits to not skipping phases.

In a series of studies, Graham and Harris (1989a, 1989b; Sawyer, Graham, & Harris, 1992) found that using modeling to teach children with learning disabilities a strategy for writing essays or stories improved self-efficacy and composition and that gains were maintained following instruction and generalized to other content and settings. The strategy was taught with a cognitive modeling procedure, in which models explained and demonstrated the strategy while applying its steps to write stories. The models also conveyed strategy value by stressing that strategy use would help students reach their learning goals. To enhance the perception of progress and thereby build self-efficacy, students were asked to monitor their writing performances and evaluate their progress by comparing their learning goals with their achievement. The fact that this research demonstrated maintenance and generalization suggests that the instructional procedure helped students advance to the self-regulated level.

Other research by Graham, Harris and their colleagues has yielded benefits of modeled instruction on writing performance and revision (De La Paz & Graham, 1997; Page-Voth & Graham, 1999; Sexton, Harris, & Graham, 1998; Troia, Graham, & Harris, 1999). Not all of these studies assessed self-efficacy or self-regulatory competence, although Page-Voth and Graham (1999) found that self-efficacy was not increased as a result of providing students with writing goals (e.g., including a specific number of reasons to support the writer's premise). It is possible that their participants—who had learning disabilities—did not have sufficient time to perceive their writing improvement because the study involved only three writing sessions.

Although this article focuses on children's reading and writing achievement, we will briefly summarize a study by Zimmerman and Kitsantas (2002), which explored the effects of modeling and social feedback on self-regulatory writing revision skill acquisition among college students. Students were assigned to one of six conditions. Mastery modeling students observed a model demonstrate the revision strategy flawlessly; coping-model students observed a model who initially made and corrected errors but gradually improved performance; no-model students were not exposed to a model. Within each of these conditions some students received feedback during the practice session that followed the modeling: Students were given feedback about the strategy steps that they performed correctly.

The results showed that observing a coping model led to greater increases in writing self-efficacy and skill compared with the other conditions, and that the mastery model improved outcomes more

than the no-model condition. Feedback also led to gains in self-efficacy and revision skill. These results suggest that the benefits of the coping model may have stemmed from the information conveyed about error corrections, which may help move students from the observational to emulative levels. Witnessing a flawless performance does not convey the same type of information. The benefits of feedback may derive from its capacity to help students move to the self-controlled and self-regulated levels.

In summary, research evidence shows that interventions that include modeling can effectively teach learners self-regulatory skills and raise their self-efficacy for applying them. For learners to move beyond the first two levels of skill development requires modeled instruction and practice on adapting the strategy for use on different tasks.

APPLICATIONS TO INSTRUCTION

Theory and research findings suggest potential applications to instruction. One suggestion is that to ensure that students acquire self-regulation skills they must be taught them and allowed to practice them. Teachers should teach self-regulation strategies along with content so that students understand how to apply the strategies. For example, to teach literary analysis a teacher might model on sample passages a strategy for finding similes, metaphors, irony, foreshadowing, and the like. While teaching reading comprehension a teacher might read a paragraph and them summarize it in his or her own words before moving to the next paragraph.

Another suggestion is that environments need to accommodate to differences in students' self-regulation skills. Like other cognitive skills, students will differ in their knowledge and use of strategies. Some may need teaching in basic comprehension strategies (e.g., summarizing), whereas others will be proficient in these. Some students may need instruction on writing strategy revision. Teachers may find it helpful to form students into small groups and tailor self-regulation instruction according to each group's needs. Most teachers understand how to differentiate instruction depending on students' learning capabilities, and they also need to practice differentiation with respect to students' self-regulation capabilities.

The theory and research summarized in this article suggest that to build students' self-efficacy teachers should ensure that students experience learning progress and success, expose them to successful models, and provide encouraging feedback substantiated by success. Teachers can incorporate these sources of self-efficacy information

into classrooms by teaching self-regulation strategies to use during reading and writing activities, employing adult and peer models, and providing persuasive information (i.e., progress feedback). Although actual performance successes constitute the best source of self-efficacy information, the vicarious and persuasive sources also are effective (Bandura, 1986). When using models it often is advantageous to expose students to multiple models, which can increase the likelihood that the students will perceive themselves as similar to at least one model (Schunk, 1987). Teachers often do this, as when they form students into groups to work on projects. Students who have encountered previous learning difficulties also may benefit from observing models who initially experience some problems but through effective coping methods gradually become successful. When students perceive the peer models as similar to themselves they are apt to feel self-efficacious for learning, believing that if the peers could learn they can as well.

CONCLUSION

Theory and research show that self-efficacy and self-regulation can be developed through exposure to models who explain and demonstrate strategies. In this article we have linked reading and writing instructional procedures with the four-phase self-regulation development model of Zimmerman and Schunk. This model is effective for teaching self-regulatory skills and it aligns well with a typical instructional sequence because it progresses from modeled demonstration to guided practice to independent practice. By linking self-regulatory strategies with instruction and allowing students to practice self-regulation skills, teachers provide an integrated instructional package that will benefit students and may generalize beyond the instructional setting.

Self-Regulated Strategy Development for Students with Learning Disabilities

Torri Ortiz Lienemann & Robert Reid

Abstract: *Self-Regulated Strategy Development (SRSD) is a well-established, thoroughly validated instructional model. In this article, we discuss the rationale and steps for implementing it. We also provide practical information for use in teaching and evaluating strategy instruction. This article is intended to guide teacher educators as they help future teachers develop a practical working knowledge of how to effectively implement strategy instruction in the classroom.*

Students with learning disabilities (LD) constitute by far the largest group of students with special needs. According to the U. S. Department of Education, in 2003 there were 2,858,000 children birth to age 21 served in federally supported programs for LD. The category of LD is the largest area of special education, students with LD constitute 4.3% of the total school enrollment according to recent figures (U.S. Department of Education, 2005). Over the last 25 years the number of students identified as LD and served in federally supported programs has showed a steady increase. Since 1976 the numbers have more than tripled. Although the rate of increase has slowed, the overall numbers continue to increase.

A learning disability affects nearly every aspect of a student's life and is a lifelong problem (Lerner, 2000). Students with LD are often caught in a spiral of school failure. Their learning difficulties lead to a lack of skills, which in turn impedes new learning and they fall farther and farther behind in school (Stanovich, 1986). According to the U. S. Department of Education, students with LD are at great risk for dropping out; around 70% of students with LD fail to graduate from high school with a standard diploma (U.S. Department of Education, 2005). Their academic problems also result in lower engagement rate (defined as being in post-secondary schooling, employment, or both) compared to typically achieving students (Murray, Goldstein, & Edgar, 1997). To stop the cycle of failure for these students, teacher educators must ensure that their graduates are proficient in the application of validated practices.

The No Child Left Behind Act (NCLB) mandates the use of effective, research-validated instructional methods in the schools. The question of what approaches are most effective for students with LD has been scientifically investigated using meta-analysis. Meta-analysis is a technique that allows researchers to combine the results of many individual studies and objectively assess the overall effectiveness of different instructional approaches. In the largest study of its kind, Swanson and his colleagues (Swanson, Hoskyn, & Lee, 1999) synthesized the findings of more than 260 studies of instructional interventions for stu-

This manuscript contains excerpts from the upcoming book "Strategy Instruction for Students with Learning Disabilities" by Robert Reid and Torri Ortiz Lienemann and is published with permission from Guilford.

dents with LD. The results of the meta-analysis were clear. One of the most effective instructional techniques for students with LD is strategy instruction. Graduates from personnel preparation programs for teachers of students with high incidence disabilities should be proficient in the use of strategy instruction, along with other validated interventions.

Teaching Teachers to Use Cognitive Strategy Instruction

There are many models for strategy instruction, but few are as well researched and "user friendly" or as focused on both academic and motivational aspects of students with learning problems, as the Self-Regulated Strategy Development (SRSD) model. SRSD is based on well-established theory and has been thoroughly validated (cf. Harris & Graham, 1996; 2005). Our experience also indicates that SRSD is a model that students in preservice programs find easy to learn and implement in student teaching and other application-settings.

The basic stages of the SRSD model are designed to ensure that all necessary aspects of strategy instruction are fully addressed. They are intended to be recursive and teachers loop back through stages and activities as needed. Revisiting stages helps students to rethink and develop metacognitive skills and abilities. We present the stages in a commonly used sequence; however, they can be reordered or combined as deemed appropriate or necessary by the teacher.

Stage 1: Develop and Activate Background Knowledge

Developing background knowledge sometimes seems so obvious, but in practice it is just this type of obvious task that it is often overlooked. It is critical that students master prerequisite skills to use a strategy effectively. For example, trying to teach a long division strategy to a student who had not mastered multiplication or subtraction would be a fruitless endeavor. At this stage there are two essential tasks: (1) defining the skills a child needs to perform a strategy, and (2) assessing the child's knowledge and/or ability to perform the skills.

Defining skills

While developing background knowledge, it is necessary to initially define the basic skills needed to perform the strategy. For example, to learn a long division strategy, students need to know basic subtraction, multiplication and division facts, and place value. It is also important to make certain that the students understand the components of the strategy. For example, some reading comprehension strategies involve the use of text structures that may not be familiar to students. The best way to identify the basic skills and strategy components necessary is to break down the task in terms of the knowledge needed for success. The task breakdown will help teachers to determine what the students need to know to perform the strategy. The easiest way to break down a task is to make two columns. Label one column Steps and the second Skills. In the first column list the steps the student would need to perform to accomplish the task. In the second list what a child would need to know to perform this step. The easiest way to break down a task is to actually do the task yourself, write down each step, and then ask yourself what you needed to know to perform the step.

Assessing knowledge

There are many ways that teachers can check students' knowledge. For example, for the long division strategy the teacher could simply use flash cards to assess the student's knowledge of basic multiplication and addition facts. Some commonly used methods include observing student performance, using curriculum-based measures, or simply asking students what they are doing (and how and why). Often, teachers will already be aware of student's knowledge. Skill deficits should be addressed prior to introducing the new strategy. This means teaching the skill to sufficient mastery for the student to perform the strategy successfully *or* providing a means for the student to compensate for a skill deficit. For example, if a student needed a long division strategy but had difficulty with multiplication facts, the teacher could provide a times table for the student to use. Note that the teacher should still work on building up the student's skill at multiplication in the interim.

Stage 2: Discuss the Strategy

Using a strategy is a more involved process than merely going through its steps. Remember that one major goal of SRSD is to help students develop into self-regulated learners. In order for this goal to be achieved, students need to be actively involved in and take ownership of the SRSD process. Discussing the strategy helps teachers to "sell" the strategy and get students to "buy" into it. Students need to believe that the strategy they are learning will help them perform better. This commitment enables them to be more actively involved and leads self-regulation. If a student does not want to use a strategy it is fair to assume that they will not use it. Teachers need to remember that motivational processes have significant effects on learning and effort. Throughout the SRSD process teachers need to be excited, committed and energized so that students will be too.

It is not difficult for teachers to sell a strategy when learning it results in improved academic performance. Teachers can provide students with examples of how this strategy or other strategies have improved student performance in the past and even how strategies have helped them in the past. It is helpful to know what motivates particular students. During this stage it is appropriate for the teachers to explain the benefits of using the strategy; while discussing and even providing examples of current performance. For example, teachers can create graphs to show current performance levels. The graphs can also be used to chart progress, which can help motivate students.

The final step of discussing a strategy involves introducing students to its steps. The teacher explains what each step of the strategy is for, how it is used, and where it is useful. This is also where teachers should stress that good performance is the result of effort and strategy use. During this stage, and those that follow, sensitivity to student feedback is very important. Teachers must match the strategy to the student. Strategies that are too easy or too difficult are of little use. Teachers should modify a strategy if a student doesn't understand it or is uncomfortable with part of it. Throughout this process closely monitoring students' understanding; ask questions on the steps and probe for understanding. Remember that strategy instruction is a reciprocal process. Students' aptitudes, deficits, and needs should mold the instruction process.

Stage 3: Model the Strategy

Good modeling allows the student to see an "expert" learner employing the strategy. A critical part of modeling is the "think-aloud" process, where teachers or students verbalize their thought processes as they perform a strategy. Modeling increases students' knowledge of the steps of the strategy and improves their cognitive and metacognitive knowledge of the strategy through exposure to the way a skilled learner implements and regulates strategy use. Note that a good think-aloud goes well beyond merely presenting the steps in a strategy—it provides students with the "why" and the "how" of various strategy steps (i.e., the knowledge and self-regulation processes associated with the performance of steps). Research clearly shows that without this knowledge students will not fully benefit from the strategy. Note that good modeling serves to teach students that using a strategy requires effort. It also addresses attributions (e.g., OK, that was easy. I can do this!) and establishes the value of strategy use—using the strategy results in better performance.

There are several ways to make the process of creating good think-alouds easier. One of the tools teachers can use is a "metacognitive task breakdown." This is a straightforward process. For each step in the task, identify knowledge or self-regulation processes by asking "Why, How, and What" questions:

1. Why am I doing this step in the task?
2. How did I know to do it?
3. What are the important actions, cues or questions?
4. What knowledge do I need?

Stage 4: Memorize the Strategy

Memorizing the steps that constitute the strategy is probably the quickest and easiest of the stages of SSRD. The goal is for students to identify the steps of the strategy and use them automatically. For fluent and effective use of a strategy, they must be able to focus their energy and attention on the task at hand not

on struggling to remember the steps of what they are doing. Students with LD often have problems remembering: Struggling to recall what to do next impedes performance. Note that this step may even be omitted for very simple strategies if students have no trouble remembering the steps.

To help students memorize the strategy many teachers make a game of practicing the steps by using round-robin activities or ball toss games. For example, a teacher says the first step of the strategy and then tosses the ball to a student who relates the second step and to on. Students can go to the next stage in the process before they have reached automaticity if they are provided with prompts or other types of supports (e.g., a card listing the steps in order). Before completing all stages students must memorize the strategy steps. Note that memorizing a strategy goes well beyond parroting the steps of the strategy. Students need to *know and understand* what is involved with each step in the process. This understanding is crucial if students are to use the strategy successfully.

Stage 5: Support the Strategy

In this stage, the teacher and student(s) work together collaboratively and practice using the strategy until the student is able to perform the strategy effectively and independently. During this stage, teachers and students repeatedly model strategy use and discuss how, when, and why to use the strategy.

A key aspect of supporting the strategy is the "scaffolding" or "scaffolded instruction" process. The process of scaffolding is analogous to teaching a child to ride a bike. No one would put a child on his or her first bike, give them a push and expect them to ride well. Instead, we normally use a process where we start with extensive supports (literally!), which are progressively removed. First, we would typically start with training wheels, and let the child practice with the training wheels. Then, we might move the training wheels up, for less support and more practice balancing and riding a little bit more independently. Next, we could take the training wheels off and run behind the child holding the seat. Finally, we would completely let go and let the child ride independently with out any support, just your supervision.

Scaffolding instruction works in much the same manner. Initially, teachers perform all or most of a task while modeling and soliciting student input. Over time, the teacher will increasingly shift responsibility for performance to the student. As students gain experience and confidence with the use of the strategy, teacher support is gradually withdrawn until the student is able to use the strategy independently. Note that the transfer of strategy performance from teacher to student is *gradual*. It's not realistic to expect a student to master a strategy the first time they try it. It's critically important for students to be given *adequate time and support* to master the strategy. Collaborative practice also gives the teacher an opportunity to check for student understanding, provide corrective feedback, and develop any necessary knowledge the student may be lacking. It's also useful in assessment. For example, teachers may discover though interacting with the student that the strategy should be modified, or that earlier SRSD stages need to be revisited. It also gives the teacher another opportunity to make sure that the students possess the skills necessary to complete the task successfully.

Exactly how the teacher goes about supporting strategy development through scaffolding and collaborative practice will depend upon the strategies and the needs of the students. There are some commonly used activities and supports used in the scaffolding process (Dickson, Collins, Simmons, & Kameenui, 1998):

- *Content Scaffolding:* Examples of content scaffolding techniques include: (1) Using content materials that are at an easy level. For example, for a reading comprehension strategy teaches might use text that was one grade below the student's current level. (2) Using content that the students are familiar with or interested in. Thus, content that featured cars or sports might be highly appropriate for adolescent males.(3) Teaching the easier steps of the strategy first, followed by the more difficult steps. Thus, during the initial practice sessions, the student would perform the easy steps while the teacher modeled how to perform the more difficult steps. The student gradually is given responsibility for the more difficult steps.

- *Task Scaffolding:* Ownership of the strategy is gradually transferred by allowing the student to do more and more of the strategy during collaborative practice. For example: (1) the teacher asks the student to name the strategy step that should be performed, then the teacher describes the step and models its use; (2) the teacher asks the student to name the step and describe the step, then the teacher models, (3) the student names, describes, and models the step.
- *Material Scaffolding:* This type of scaffolding uses prompts and cues to help the student use a strategy. This may take the form of posters or help sheets that list strategy steps. Students can use these as a reference or if they get confused. Typically these prompt and aids are faded over time.

Teachers can also use cooperative groups or peers to help scaffold instruction. For example, a teacher might create heterogeneous groups and have each group go through the steps of a strategy. The group as a whole would be responsible for completing the strategy and for making sure that all group members understood each step of the strategy.

The goal of this stage is for the students to be able to use the strategy effectively and independently. The time it takes for students to reach this level of skill may vary widely. When SRSD procedures are used with appropriate strategies, most students can master a strategy after two to four collaborative, scaffolded experiences. Cutting this stage short will likely mean that students will not fully master the strategy or may not reach mastery at all. This in turn means that both the teacher's and student's efforts have been for naught.

Stage 6: Independent Performance

In this stage, a student should be ready to use the strategy independently. The teacher's main task will be to monitor the student's performance and to check on proper and consistent strategy use. Monitoring academic performance is critical. Remember that the goal of strategy instruction is increased academic performance. The student's work should show a marked improvement, and it should also remain at a consistent level. There are a number of ways to monitor performance that we elaborate on in the next section. Monitoring strategy use is also very important as students sometimes distort the strategy or skip steps when using them independently. If a student modifies a strategy, but performance remains high, there is no cause for concern. Many students adapt the strategy to meet their needs. This is acceptable as long as the student is still successful in completing the task. Alternatively, if a student is performing the strategy correctly and consistently but a high level of performance is not attained (or maintained) then reteaching the strategy or considering a different strategy is probably in order.

Monitoring and Evaluating SRSD

With the advent of No Child Left Behind and the passage of IDEA 2004, accountability is receiving ever-increasing attention in schools and teachers must now be able to assess the effectiveness of the instructional interventions they have implemented. One additional benefit of SRSD is that evaluation is an integral component of the approach. Teachers must systematically assess the outcomes or there is no way of gauging the effect of strategy instruction. SRSD facilitates meaningful assessment: The interactive, collaborative nature of the process allows teachers to easily assess changes in students' cognition, affect, and performance. Harris and Graham (1996) offered basic principles for evaluating the methods and procedures used in strategy instruction. The list is not exhaustive, but provides sufficient knowledge of how to accomplish effective strategy evaluation.

Include Students as Co-Evaluators

Students should be encouraged to become partners in the strategy evaluation process. This increases students' sense of ownership in the strategy, reinforces progress, and provides a practical way to reduce a teacher's load. Students can help in many ways, such as learning to evaluate their final products or deciding if the necessary criteria for each step of a strategy have been met. Helping students ask appropriate self-questions (e.g., Am I ready to move on to the next step?) is another effective way to help students evaluate their own progress. Students can also graph or chart their progress.

Consider the Level of Evaluation Needed

The time and effort needed for evaluation depends on a number of factors. At a minimum, teachers should know if students are actually using the strategy, the effect of the strategy on task performance, and whether students see the strategy as being valuable and easily used. Teachers may also find that evaluating their instruction may be useful. The type of strategy used and previous experience with a strategy is also an important factor in evaluation. For example, strategies, methods, and procedures that have been previously used and which have demonstrated their effectiveness, will need less scrutiny than a first-time strategy. As a general rule, the amount of time and effort needed to evaluate the usefulness of a strategy depends on its established validity and teacher's experience with it. However, since interventions are not uniformly effective with students with disabilities, even validated strategies still require some evaluation.

Assess Changes in Performance, Attitudes, and Cognition

Motivation and emotion are important factors that are considered in SRSD. Changing a student's attitude toward a task and success are critical components of strategy instruction. As a result, the benefits of strategy instruction can go beyond improving academic performance, students' attitudes and cognition may also be affected. For example, after teaching a math strategy, a teacher might observe whether students' attitudes toward math and confidence in their abilities improve. The teacher might also check to see if the student performs the task outside the classroom. For example, after teaching a writing strategy check the amount of writing the student does outside of school. Spontaneous statements are also pertinent. For example, one student we worked with on a math strategy who had struggled previously, suddenly stopped in the middle of a problem and stated, "You know, this stuff is really easy!" The use of open-ended questions such as, "What is good writing?" or "What do you most like to say to yourself while answering history study question?" can also help determine if a strategy changed the students' perception of a task. It is important to remember that some changes (such as attitude improvements) take more time than others to obtain. It takes time to overcome years of previous frustration.

Assess While Instruction is in Progress

Most assessment occurs after instruction has occurred. However strategy instruction depends upon frequent and ongoing assessment. Assessment procedures for strategy instruction should reflect the developmental and ongoing process of learning to use a strategy. This means that teachers must evaluate success at learning the strategy. Establishing realistic performance criteria for each step of instruction is one way to facilitate this process. For example, if a student can tell you when and where it would be appropriate to use a strategy then one of the goals of Stage 2 has been accomplished. When the student can list and explain steps of the strategy then Stage 3 objectives have been met. By clearly defining what is expected at each stage of strategy instruction, both teachers and students know what needs to be accomplished and what standards will be used to measure progress.

Assess How Students Actually Use the Strategy

Students often modify their use of a strategy over time. Sometimes this is a natural effect and positive effect of becoming fluent with the strategy. Use of steps may become automatic and not readily observable (Alexander, Graham, & Harris, 1998). Students may also change things for the worse. Teachers should not automatically assume that students are using a strategy as intended. Some modifications allow the strategy to meet a student's unique needs, but others, such as eliminating a necessary step, may be detrimental. The best way for teachers to monitor strategy usage is to directly observe what students do as they use the strategy. Ask the student to work through a strategy. While the student does this, ask questions and discuss how things are working. Looking for evidence of strategy use in students' work is often useful. Often, students will leave "tracks" that indicate they are using a strategy. For example student will often write out mnemonics they use to remember a strategy.

Assess' Use of the Strategy Over Time and in New Situations

Teachers should not assume that students will continue to use a particular strategy or successfully adapt it to new situations. One of the common problems experienced by students LD is that they do not automatically generalize skills or strategies to new situations. Karen Harris tells the story of the student who had learned a comprehension strategy and effectively used it in one class. When asked about using it in other classes the child responded, "Was I supposed to?" If you wish for the strategy use to maintain and generalize you will need to prompt it. Therefore, it is beneficial to actively promote maintenance and generalization of strategy usage from the inception of strategy instruction. For example to promote maintenance, teachers could periodically have students explain the purpose of a strategy or have them share ways they have used the strategy. Students also can keep a record of each time they use a strategy or how they modify it for other tasks. It's also useful to chart performance (which hopefully has improved) review it at regular intervals, and relate improvements to the use of the strategy. Generalization may be tougher. It will often be necessary to involve other teachers who were not involved in the strategy instruction process. The teachers will need to be acquainted with the strategy and any procedures involved with its use (e.g. graphic organizers or prompts) and will at a minimum need to remind the student to use the strategy and encourage its use. One major goal of strategy instruction is generalization. Thus, it is necessary to determine if students need additional support to consistently apply the strategy in all appropriate situations. Note that if other teachers are involved these teachers should also be involved in evaluating strategy use and promoting its generalization.

Use Portfolio Assessment Procedures

Portfolio assessment is an excellent way to implement many of the recommendations we have presented for evaluation of strategy instruction. This type of assessment requires teachers to establish the credibility of, and become intimately involved in, the maintenance and evaluation of student portfolios. Portfolios offer many practical advantages. At a very basic level, portfolios can often help to graphically demonstrate progress. For example, collecting samples of writing over time can make improvements highly visible. It can also help to improve motivation and demonstrate the benefits of strategy use. For example, one junior high teacher collected pre- and post-strategy instruction examples of her students' stories. Pre-strategy stories were typically around one-half page long. Post-strategy stories averaged over three pages! Students were extremely proud of their obvious progress. Note that these examples can also be effective when used to try to get future students to "buy in" to using a strategy. Portfolios can also help students engage in reflective self-evaluation, understand that development is as important as achievement, and take greater responsibility for their own learning. Teachers will also gain new insights and understandings about assessment, teaching, and their students' development and learning. As an aside, it important to note that *teachers* will also receive some reinforcement since they can see that their instruction resulted in meaningful change.

Share Tips with Teachers

The SRSD model is powerful and effective, but it only works if done correctly. There are some common pitfalls; therefore, it is important that teacher educators be certain their students understand and avoid these pitfalls. Here are a few practical tips to help those implementing SRSD in classroom settings.

Take your time

Strategy instruction must be closely tailored to the needs of students; so, students, whether individuals or in groups, must proceed at their own pace. Therefore, it is not possible to set a precise time to expect mastery. Though there are some exceptions—it is critical for students to attain mastery at each stage before proceeding. Also, remember that "One swallow doesn't make a summer," using a strategy well one time does not mean the student has mastered the strategy. Students need to use the strategy correctly and consistently and develop the knowledge of 'why' and 'how' before they have *truly* mastered the strategy.

Start small and build on your success

Because strategy instruction is so powerful and practical there's a natural tendency to want to use it as much as possible. If using one strategy is good, two would be even better. At this point teachers might want to remember the old saying that "You can have too much of a good thing." The same is true of strategy instruction. We recommend using the "small is golden" principle advocated by Pressley (Pressley, Woloshyn, & Associates, 1995). Focus on a small number of strategies and support their use over a sufficient period of time. This will result in students developing a deeper understanding of the strategy and a realization of how strategy use can improve performance.

Plan for generalization

Generalized use of learning strategies must be prompted—it won't occur on its own. Many students who can benefit the most from strategy instruction will not spontaneously generalize a strategy across settings. Teachers in other settings or grades must know what strategies students have learned and how to encourage their continued development. Note also that getting another teacher to support the use of a strategy in his/her class may also involve a "buy in" process. One of the best ways to motivate other teachers to help in the generalization process is to show them (by using the evaluation materials such as portfolios) how much the strategy has improved performance.

Teach "strategically."

Deciding which strategies to use and which students to use them with are important decisions. First, begin with a relatively simple strategy in a content area where you are comfortable and can reasonably anticipate success. Particularly for beginning teachers, initially avoiding difficult curriculum areas where students are struggling the most allows teachers to become more acquainted with the instructional process, hone their skills, and build confidence. Remember that teachers need to develop mastery just as students do. Second, be sure to implement validated strategies. Some teachers think that because existing strategies look simple that it is easy to develop their own. Use electronic resources (http://www.unl.edu/csi/) to help teachers find proven strategies that match learners' needs.

Final Thoughts on Preparing Teachers to Use Self-Regulated Strategy Development

In closing we want to stress three things. First, strategy instruction should be seen as a *process*. It is the process that is powerful. Strategies themselves are useless unless the teacher utilizes an effective strategy instruction process that attends to instilling the metacognitive knowledge that students need and helps to change maladaptive motivational processes. Second, the strategy instruction process depends on *collaboration*. The teacher and students should work together to develop and evaluate new strategies. Remember that strategies are not "off the rack;" rather, they are custom made. Third, teachers should collaborate with other teachers, as well as their students during the strategy instruction process. Professional cooperation allows teachers to share their personal triumphs and challenges and serves to facilitate supportive feedback and problem solving. Teachers who use strategy instruction construct powerful new knowledge about what works for students.

There is now ample evidence that students with LD can be taught to utilize strategies and that these strategies do make a difference in these students' learning outcomes (e.g., Graham & Harris, 2005; Swanson, 1990). Note that the use of SRSD directly empowers both students with disabilities and their educators. It places the control of learning directly in the hands of students and teachers. Students can always learn new strategies, and educators can always teach them. Most importantly, this strategy approach has a *twenty-year track record* of success. Clearly, teacher educators, particularly at this time of emphases on the preparation of high quality special education teachers and accountability about the services delivered to students with disabilities and their families, must infuse mastery of validated practices into their preparation programs. We believe that SRSD should become one of those approaches that become part of the "core" in every program that prepares teachers of

students with high incidence disabilities. Given number of these students, new requirements of NCLB and IDEA '04, and our responsibilities to prepare the best future generation of special educators possible, we simply cannot afford to use anything less than the best methods we have for improving academic learning.

Subject: FORMAL NOTICE: Flexible Work Arrangements Policy for SPA and EPA Non-Faculty Employees

---

To: Deans, Directors and Department Heads,
HR Facilitators

From: Noreen Montgomery, Senior Director of Employment & Staffing,
Office of Human Resources

In response to an increasing number of questions regarding teleworking and flexible work arrangements, the Office of Human Resources (OHR), in collaboration with the HR Administrative Advisory Council (HRAAC), has revised the Flexible Work Arrangements policy for SPA and EPA Non-Faculty employees.

Flexible scheduling can benefit both employees and departments by helping employees balance their professional and personal responsibilities, and specifically by allowing additional commuting options. Flexible scheduling also can help departments by maximizing employee retention, helping morale, and minimizing employee tardiness and unscheduled absences. However, there are University units or operations that may not be conducive to alternative schedules, and, likewise, certain positions within units where operational needs make flexible schedules difficult or impractical. Units are encouraged to consider the available options, and to approve work schedules that benefit the employee, without detriment to the work unit.

The Flexible Work Arrangements policy includes the following key provisions:

* There are three major types of flexible work arrangements:
-- temporary change in work hours
-- flexible work schedule
-- flexible work location or "teleworking"

* SPA temporary employees are eligible for all flexible work arrangements except for "teleworking" arrangements.

* Departments are encouraged to be flexible in allowing for alternative work arrangements, with the understanding that this flexibility must still ensure appropriate employee accountability and be compatible with the operational needs of the work unit.

* All flexible work arrangements must be approved in advance by management and the Office of Human Resources (if required; see below).

* Teleworking arrangements lasting more than 90 calendar days require:
-- no less than four days per month of the employee's time is physically based within an official University office or facility
-- pre-approval from OHR before the arrangement begins
-- completion of the Supplemental Conditions of Employment form

* Flexible work arrangements may be revised or revoked by management at any time, with as much reasonable notice as possible.

This policy is effective August 1, 2012, and departments must comply with all provisions as of that date. For individuals who are already working in a teleworking arrangement prior to the effective date of this policy, departments must bring these individuals into compliance with the policy provisions no later than September 30, including submission of the necessary request forms.

We recognize that there may be existing arrangements within your areas and that there will be questions as departments implement these new procedures. OHR will work with you to address any questions and minimize inconvenience to the greatest extent possible.

For more information regarding flexible work arrangements, refer to the policy and related forms located at http://hr.unc.edu/policies-procedures-guidelines/spa-employee-policies/employment/CCM3_037554. If you have additional questions, please contact your HR representative or assigned OHR Employment Consultant.

Subject: GLA Traing and Orientation

Attach: GLA Training.pdf

Counselors,

I've attached the schedule for the GLA training and orientation. I have an introduction to the Olympic staff scheduled for Tuesday, August 14th, at 12:30. Please let me know if you can be there. I have only heard from two of you.

Also, you will note a session on academic motivation on Monday, August 13th, at 10 AM and a session on self-regulated learning the same day at 1 PM. There is also a session on literacy and identity that Wednesday at 10 AM. All three sessions will be conducted by faculty members and will be relevant for full-staff. I encourage you all to come.

bradley.bethel@unc.edu

Graduate Learning Assistant Orientation and Training
August 13 – 17, 2012

Tasks to complete prior to the first day of training:

1. Email Bradley your class schedule and UNC email address.
2. Complete hiring paperwork with Susan Maloy.
3. Finish reading the following articles:
    a. "Developmental Student Don't Know What They Don't Know"
    b. "Influencing Children's Self-Efficacy and Self-Regulation of Reading and Writing Through Modeling"
    c. "Self-Regulated Strategy Development for Students with Learning Disabilities"

Below is the week's schedule. Please arrive a few minutes early each day. Lunch will be provided on Wednesday and Friday.

	Monday	Tuesday	Wednesday	Thursday	Friday
9:30 – 10 AM	Welcome & Introductions	Introduction to Football Staff	Office Assignments	No training today.	SASB Tour
10:00 – 11:30	Motivation: Dr. Judith Meece	Assessing Motivation & SRL	Literacy & Identity: Dr. Leigh Hall		Learning Strategies
11:30 – 12:30	Lunch	Lunch	Lunch		Lunch
12: 30 – 1:00	Director & Dean's Welcome	Introduction to Olympic Staff	Introduction to Life Skills Staff		Fall Schedules
1:00 – 2:30	SRL*: Dr. Jeff Greene	Learning Disabilities and ADHD	Reading Strategies		Theory to Practice
2:30 – 4:00	Review & Application	Compliance	Honor Court		Professionalism & Expectations

*SRL: self-regulated learning

Additionally, there will be a single reading or a short homework assignment the first three nights.

We look forward to learning with you.

To: Bridger, Beth <bridgerb@email.unc.edu>
Subject: FORMAL NOTICE: TIM Upgrade

To: All Staff
From: TIM Support and ITS

The TIM System will be upgraded beginning on Saturday, August 4. The system will be down from Saturday, August 4 at 6 a.m. until Monday, August 6 at 6 a.m. During the downtime, users will not be able to log in. Teletime will remain down until Wednesday, August 8 at 6 a.m.

TIM functionality will not change in the upgraded version.

DURING THE DOWNTIME PERIOD
Employees using Time Stamp will not be able to log in to TIM to record their times worked.
*All times in and out worked during the downtime must be submitted to the Manager or TIM Administrator for manual entry on Monday, August 6. *

Employees using Badge Terminals will be able to swipe in and out for worked hours during the downtime. Functions such as View Timecard Totals, View Accrual Balances, and Time Off Notifications will not be available during the downtime period.
Times in and out should be checked by the Manager or TIM Administrator on Monday, August 6 to ensure they are correct.

Employees using Teletime will not be able to call in to the phone system to record times worked during the extended Teletime downtime period.
All times in and out worked during the extended downtime must be submitted to the Manager or TIM Administrator for manual entry by Wednesday, August 8.

SPA Non-Exempt Employees using Manual Time Entry and SPA and EPA Exempt employees will not be able to log into the TIM system during the downtime period.
SPA Non-Exempt and SPA and EPA Exempt employees will be able to enter all of their TIM data on Monday, August 6.

TIM ACCESS
Users will be able to access the Upgraded version of TIM on Monday, August 6, using the access methods currently used. This includes the HTML (non-Java) version for users who are not TIM Administrators, http://unctim.unc.edu/employee and UNCTIM 6.1 Thinstall for all TIM Administrators and Managers who process advanced functions in TIM.

Also, starting on Monday, August 6, TIM Administrators and Managers may access TIM by going to http://unctim.unc.edu in one of the following supported Internet Browsers: Internet Explorer, versions 7, 8, or 9, and Mozilla Firefox, version 4 or higher. Other Internet browsers should NOT be used to access TIM.

UPGRADE SUPPORT
Please contact 962-HELP (4357) for assistance with all technical issues related to TIM.

Subject: FORMAL NOTICE: News About Next Phase of ConnectCarolina Implementation

---

Deans, Directors and Department Heads:

As I'm sure you are aware, the University is engaged in a significant effort to fully implement the financial and human resources modules of PeopleSoft under the ConnectCarolina project. This creates many opportunities for the University's administrative offices to reassess and redesign business processes to assure that we take full advantage of the powerful capabilities of PeopleSoft. For this reason, I have created a new position, the associate vice chancellor for administrative systems and business transformation, reporting to me in the Division of Finance and Administration. Having someone in this position who can focus on these issues will fully leverage our ability to manage and support these new business applications.

Because our PeopleSoft implementation effort is far along and time is of the essence, I am appointing an experienced higher education leader to fill this critical role. I am pleased to announce that Chris Kielt will begin as associate vice chancellor for administrative systems and business transformation effective September 4. Chris has 25 years of extensive higher education administrative experience, including two decades at Yale University where he worked with a variety of integrated administrative systems in support of core business operations. In addition, he served four years as Yale's deputy chief information officer before heading to Stony Brook University where he was appointed as chief information officer. At Stony Brook, Chris worked with Bain & Company on a campus-wide strategic initiative to streamline administrative operations.

Chris has extensive experience with large-scale enterprise resources planning (ERP) implementations and project management, both of which will be invaluable as he partners with colleagues in Information Technology Services and other University offices to move us forward with the next phase of the ConnectCarolina implementation. He will also review all business systems in the Division of Finance and Administration to create efficiencies and streamline all other administrative applications. As Chris focuses on the transition to PeopleSoft, Kevin Seitz, the associate vice chancellor for finance, will continue to lead the University's finance operations.

Chris will also collaborate closely with colleagues in the Office of Human Resources to develop a seamless organization to consolidate end user support, documentation and training for the Human Resources, Payroll and Finance modules of PeopleSoft. For this reason, Chris will also have a dotted line reporting relationship to Vice Chancellor Brenda Malone in the Office of Human Resources.

I am excited that Chris Kielt has agreed to join us and ask you to welcome him as he begins to work with the campus community in carrying out his new responsibilities.

Sincerely,

Karol Kain Gray, Vice Chancellor for Finance and Administration

Subject: [cccs_staffusers] System outage Sat., Aug. 11, affecting ConnectCarolina and other systems

---

There will be an outage affecting ConnectCarolina, ePro and other systems on Sat., Aug. 11, 7am to approximately 1pm.

This planned maintenance outage means that ConnectCarolina and other systems will not be available during this time frame. View the list of affected systems here:
http://its.unc.edu/Enterprise/ConnectCarolina/SystemStatus/index.htm

We appreciate your cooperation and support as we continue to make ConnectCarolina more efficient for our users.

Subject: Vacation and Sick Leave

If you haven't done so, please send me your vacation and sick leave information for the month of July.

Also remember, you have an additional 40 hrs. of "special leave" that **MUST** be used by June 30, 2013. These hours WILL NOT transfer over.

Let me know how you want to use your leave hours (ex. 8 hrs on July 5th – special leave)

Thanks,
Kim

Subject: FORMAL NOTICE: DDD - Reminder: Interdepartmental Fee Requests for FY 2013-14

To: Deans, Directors and Department Chairs

From: Dennis Press, University Controller
Interdepartmental Fees & Charges Committee Co-Chair

Date: August 15, 2012

This memorandum provides a reminder regarding requests for interdepartmental fees and charges. In accordance with the Interdepartmental Fees & Charges (IF&C) policies and procedures; requests for new interdepartmental fees, revisions to existing interdepartmental fees, and elimination of interdepartmental fees that will go into effect during Fiscal Year 2013-14 must be submitted to the IF&C Committee no later than Monday, September 17, 2012. Rate increases and new fees received after the deadline will not be considered. The rate review and approval process must be completed and rate revisions and new fees announced to the campus no later than February 15, 2013, in advance of next year's Annual Budget Hearing Process.

All campus units that charge other departments a fee for goods and services should review the Determination of Fee Oversight Authority decision diagram on page 4 of the IF&C policies and procedures, and confirm to OSR's Cost Analysis and Compliance department of the Office of Sponsored Research (OSR) your present oversight status in accordance with this decision diagram. If not have not already done so, please confirm your oversight review status with Cost Analysis and Compliance by August 24, 2012.

If the decision diagram indicates your operation is a Research Service Center (RSC), the appropriate oversight body is the OSR. RSCs do not need to take further action based on this memorandum. OSR will contact you to establish the nature and timing of your next review. If the decision diagram indicates your operation is an Interdepartmental Service Center (ISC), then the appropriate oversight body is the Interdepartmental Fees & Charges Committee and this memorandum does apply.

Information about the IF&C policies and procedures and other important information are located at the following web site: http://finance.unc.edu/finance-division/about-us/finance-committees.html#comm_inter. The following information is available on the web site.

* List of Interdepartmental Fees and Charges
* Interdepartmental Fees and Charges Policies and Procedures
* Rate Development Form and Attachments

In summary, requests for interdepartmental fees and charges for fiscal year 2013-14 must be submitted to me by September 17, 2012, at dennis_press@unc.edu. Requests in Excel format are preferred. Thank you.

Note, this memo is also being distributed to University Business Managers.

This email is sponsored by: Interdepartmental Fees and Charges Committee

LEARNING SESSIONS

Purpose

The purpose of this handout is to provide learning specialists and assistants with a basic structure and expectations of the learning session. In accordance with the mission of the Learning Engagement and Enhancement Program (LEEP), we should use learning sessions to support students in their becoming "goal-directed, strategic, and self-regulated learners." Learning staff will adapt their sessions to meet the needs of their students, but the basic components of the learning session should remain intact. Those basic components are outlined below.

The First Two Weeks

Structure of a session:

1. Set a purpose for the session.
2. Organize binder and PASS book, check Sakai for printouts, and check syllabi for upcoming assignments or readings.
3. Review notes and note-taking strategies.
4. Model/teach strategies to help students with current assignments or readings.
5. Determine tasks for student to complete independently and to record in PASS book.
6. Identify learning goals and questions for student's next class.

Setting a Purpose for the Session

Because most of our students are not yet goal-directed learners, we need to model goal-directed behavior for them. After the student arrives to your session and you spend a minute or two getting settled and discussing the day, you should explain what the goals of the session will be, namely, the next steps as outlined above. During the first two weeks, you will be establishing the purpose for the session, but you should be clear that the student must start to take ownership of his learning. After the first two weeks, students should arrive to their sessions knowing what readings and assignments they have or what questions they want to discuss.

Organizing Materials

After you have set the purpose for the session, you should help the student check Sakai for any printouts, organize materials in his binder, and check syllabi for any assignments or readings he may not have yet recorded in his PASS book. However, you should also be clear that after the first two weeks the student will need to complete these activities on his own prior to arriving at your session. If the student comes to your session directly from another appointment, you may need to help your student identify an appropriate time (e.g., the night before) to complete these activities. This may be a good opportunity to discuss time management.

Reviewing Notes and Note-taking Strategies

We expect our students to take notes during class. Even students who have a note-taker are not excused. Every student must demonstrate that he attempted to be an active learner in class. Many students legitimately struggle with taking notes, and so we may need to teach them note-taking strategies. You can do this by showing them your own notes from class and/or explaining your own particular process. You can also find resources on the internet that demonstrate the widely used Cornell note-taking system. By the end of the first two weeks, students will still be developing their note-taking skills, but they should be producing notes that are suitable for reviewing and studying.

Learning Strategies

The heart of your session is the strategy component. This is the time when you help students learn the material and learn strategies to continue learning and to complete their assignments successfully. You should choose strategies according to the readings or assignments students have that day.

Making a To-do List

Unfortunately, our learning sessions are never long enough to get through all the material students have. Therefore, you should instruct the student to record in the blue pages of his PASS book any readings or assignments he still needs to complete. At the beginning of your subsequent session with that student, you will check to see if he completed it and make note on the feedback form if he did not.

Setting a Purpose for Class

To help our students become goal-directed learners, we must instill in them a habit of setting a purpose not just for learning sessions but also for their classes. Use the last few minutes of your session to identify on the syllabus the topic for the student's next class and help the student anticipate what he may learn during that class. This is also an opportunity to help the student generate questions and connect what he already knows to what he will be learning in the future.

After the First Two Weeks

As discussed above, students need to take ownership of their learning. During the first two weeks, they should have developed some basic organizational skills and should now understand what is expected of them when they show up to learning sessions. At this point the student should arrive (1) knowing what assignments and readings he needs to complete, (2) having already printed materials from Sakai and organizing them in his binder, and (3) having taken notes during class. Because those tasks should be complete when the student arrives, you can now spend more time helping students learn the material and learn strategies for further learning.

Structure of a session:

1. Agree on a purpose for the session.
2. Review notes and previous assignments or readings.
3. Model/teach strategies to help students with current assignments or readings.
4. Determine tasks for student to complete independently and to record in PASS book.
5. Identify learning goals and questions for student's next class.

Establishing a Purpose

Students should arrive with questions from class or previous readings and with an awareness of what readings or assignments they need to complete. You will have the syllabus and thereby also know what readings or assignments they have. You should therefore agree on some goals for the session and proceed. If the student arrived unaware of what he needed to do, you should make note on the feedback form.

Reviewing Notes and Other Materials

If the student comes with specific questions from previous assignments or readings, this is the time to address those questions. You should help the student reason through the questions and try to find the answers on his own. You should also review the student's notes with the student to help him elaborate on them and make connections between his notes and the assignments or readings. Finally, you should also use this time to check whether the student completed his to-do list from the previous session. If he did not, make note on the feedback form.

Learning Strategies

Again, this is the heart of your session. This is the time when you help students learn the material and learn strategies to continue learning and to complete their assignments successfully. You should choose strategies according to the goals you established at the beginning of the session.

Making a To-do List

Unfortunately, our learning sessions are never long enough to get through all the material students have. Therefore, you should instruct the student to record in the blue pages of his PASS book any readings or assignments he still needs to complete.

Setting a Purpose for Class

To help our students become goal-directed learners, we must instill in them a habit of setting a purpose not just for learning sessions but also for their classes. Use the last few minutes of your session to identify on the syllabus the topic for the student's next class and help the student anticipate what he may learn during that class. This is also an opportunity to help the student generate questions and connect what he already knows to what he will be learning in the future.

Although learning staff should maintain the basic components of a learning session as outlined above, learning staff should adapt and possibly even re-arrange the components according to the needs of the situation or the student. For example, there may be sessions when reviewing notes could come after working through the material. In that case, you have an opportunity to support the student's autonomy by allowing him to choose the order of the steps. Learning staff should use their professional judgment to determine how best to help students become goal-directed, strategic, and self-regulated learners.

Current Impact Statement

Name_____ **Date**_____ **PID**_____

In addition to reviewing your documentation, we would also like specific information on how the diagnosed disability/medical condition described is ***currently*** *impacting your functioning and causing you substantial limitations.*

Please address ***ALL*** *of the following in as much detail as possible. Feel free to use to use the back of this form, or type your response on additional paper. Incomplete responses will be returned for more information*

If a written response is difficult for you, you may record your responses and submit an audio file.

1. **Considering the skills such as reading, writing, paying attention, mathematics, etc., describe (be specific) the current (or recent) impact of the disability/medical condition in both of the following areas:**

    a. In Class (lectures, test-taking, participation, etc.)

    b. Out of Class (studying, time management, homework, etc.)

2. **Accommodations/Services**
   In reference to the above information, describe accommodations or services that you think you will need. Why?

In addition to your response, you may also ask others who currently know you, or have observed you to submit answers to these questions in a separate document.

Sign your name indicating you composed and wrote the response.

Subject: Enforced prerequisites

Attach: Copy of Total Prereq List-Sent to Depts.xlsx

Good afternoon everyone,
See attached for the list of courses that are currently programmed in ConnectCarolina to enforce prerequisites. Please note that the effective term on the spreadsheet means when it was programmed in the course catalog, not that the course is offered in the Spring 2013 semester.
If a student has a prerequisite for a course and are not able to enroll online, they will need to contact the department directly to register.
Let us know if you have any questions.
Thanks!
Chloe

FREN	566	Prerequisite, FREN 300.
FREN	670	Prerequisites, FREN 300 and 371, 372, or 373.
GEOG	253	Prerequisites, MATH 231 and either CHEM 102 or PHYS 104.
GEOG	410	Prerequisite, GEOG 110
GEOG	412	Prerequisite, GEOG 110 or 111
GEOG	416	Prerequisite, GEOG 110 or 111
GEOG	440	Prerequisite, GEOG 110
GEOG	441	Prerequisite, GEOG 110
GEOG	457	Prerequisite, GEOG 259
GEOG	458	Prerequisite, GEOG 259
GEOG	477	Prerequisite, GEOG 370
GEOG	491	Prerequisite, GEOG 370
GEOG	577	Prerequisite, GEOG 370 or 477
GEOG	593	Prerequisite, GEOG 370 or 491
GEOG	594	Prerequisite, GEOG 370
GEOG	595	Prerequisite, BIOL 561 or STOR 355
GEOL	202	Prerequisite, GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159
GEOL	204	Prerequisite, GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159
GEOL	211	Prerequisite, GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159
GEOL	213	Prerequisite, GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159
GEOL	215	Prerequisite, GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159

GEOL	221	Prerequisite, GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159
GEOL	223	Prerequisite, GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159
GEOL	225	Prerequisites, GEOL 101/101L.
GEOL	301	Prerequisite, GEOL 101 or 110; pre- or corequisite, CHEM 101.
GEOL	401	Prerequisite, GEOL 101, 105, 109, or 110
GEOL	402	Prerequisites, GEOL 101 or 110, and GEOL 301.
GEOL	404	Prerequisite, GEOL 301
GEOL	413	Prerequisites, GEOL 101, 109, 110, or 159; and 402 or 478.
GEOL	417	Prerequisites, GEOL 101 or 110, and MATH 231.
GEOL	430	Prerequisite, GEOL 402.
GEOL	431	Prerequisite, GEOL 478 or MASC 440.
GEOL	432	Prerequisite, GEOL 402.
GEOL	433	Prerequisite, GEOL 402 or 503.
GEOL	440	Prerequisites, GEOL 101, 213, 401; MATH 231.
GEOL	460	Prerequisite, MATH 232.
GEOL	478	Prerequisite, GEOL 159 or BIOL 101.
GEOL	480	Prerequisite, MATH 232.
GEOL	504	Prerequisite, GEOL 404.
GEOL	507	Prerequisite, GEOL 402.
GEOL	508	Prerequisites, GEOL 101 or 110, MATH 231, PHYS 105.
GEOL	509	Prerequisites, CHEM 102; GEOL 101, 105, 109, or 110; MATH 231; PHYS 104, 116.
GEOL	510	Prerequisites, CHEM 102; GEOL 101, 105, 109, or 110; MATH 231.

GEOL	511	Prerequisite, CHEM 102.
GEOL	512	Prerequisites, CHEM 102; GEOL 101, 105, or 110; and MATH 231.
GEOL	513	Prerequisite, GEOL 101 or 110, or CHEM 102.
GEOL	514	Prerequisites, GEOL 101 or 110, and 211 or 417.
GEOL	515	Prerequisites, PHYS 104 and 105.
GEOL	516	Prerequisite, GEOL 401.
GEOL	517	Prerequisite, GEOL 402.
GEOL	518	Prerequisites, CHEM 102; GEOL 101 or 110; MATH 232; and PHYS 104 and 105.
GEOL	520	Prerequisites, MATH 231 and 232.
GEOL	601	Prerequisites: GEOL 301, 401, 402, and 404.
GEOL	602	Prerequisites: GEOL 301, 401, 402, and 404.
GEOL	608	Prerequisites, MATH 231; PHYS 104 or 116; GEOL 101 or 103 or 105 or 108 or 109 or 110 or 159
GEOL	609	Prerequisites, GEOL 601 and 602.
GEOL	655	Prerequisites, CHEM 102 and MATH 232.
GEOL	101L	Pre- or corequisite, GEOL 72, 101, 105, 109, or 110.
GEOL	417L	Pre- or corequisite, GEOL 417.
HEBR	102	Prerequisite, HEBR 101.
HEBR	204	Prerequisite, HEBR 203.
INLS	285	Prerequisite, INLS 200.
INLS	318	Prerequisite, INLS 382.
INLS	382	Pre- or corequisite, INLS 261.
INLS	397	Prerequisites, INLS 200, 261, and 382.
INLS	501	Pre- or corequisite, INLS 461.
INLS	502	Prerequisite, INLS 501.
INLS	512	Prerequisite, COMP 110, 116, or 121.
INLS	523	Pre- or corequisite, INLS 261 or 461.
INLS	560	Prerequisite, INLS 261 or 461.

INLS	566	Prerequisite, INLS 261 or 461.
INLS	572	Prerequisite, INLS 261 or 461.
INLS	574	Prerequisite, INLS 261 or 461.
INLS	576	Prerequisite, INLS 261 or 461.
INLS	578	Prerequisite, INLS 261 or 461.
INLS	623	Prerequisites, INLS 382 or 582, and 523.
INLS	672	Prerequisite, INLS 572.
ITAL	203	Prerequisite, ITAL 102 or 401.
ITAL	204	Prerequisite, ITAL 203.
ITAL	300	Prerequisite, ITAL 204 or 402.
ITAL	308	Prerequisite, ITAL 203.
ITAL	310	Prerequisite, ITAL 204 or 402.
ITAL	330	Prerequisite, ITAL 204 or 402.
ITAL	371	Prerequisite, ITAL 204 or 402.
ITAL	382	Prerequisite, ITAL 204 or 402.
ITAL	402	Prerequisite, ITAL 102 or 401.
ITAL	526	Prerequisite, ITAL 204 or 402.
ITAL	102	Prerequisite, ITAL 101.
JOMC	157	Prerequisite, JOMC 153
JOMC	181	Prerequisite, JOMC 180
JOMC	221	Prerequisite, JOMC 153
JOMC	232	Prerequisites, JOMC 137 and 153
JOMC	244	Prerequisite, JOMC 153
JOMC	253	Prerequisite, JOMC 153
JOMC	256	Prerequisite, JOMC 153
JOMC	271	Prerequisite, JOMC 137
JOMC	272	Prerequisite, JOMC 137
JOMC	279	Prerequisite, JOMC 137
JOMC	333	Prerequisite, JOMC 137
JOMC	340	Prerequisite, JOMC 153
JOMC	394	Prerequisite, JOMC 153
JOMC	421	Prerequisites, JOMC 121 and 221
JOMC	422	Prerequisite, JOMC 421

JOMC	423	Prerequisite, JOMC 422
JOMC	426	Prerequisite, JOMC 121
JOMC	431	Prerequisite, JOMC 137
JOMC	433	Prerequisites, JOMC 137 and 431
JOMC	434	Prerequisites, JOMC 232, 279 and 431
JOMC	452	Prerequisite, JOMC 153
JOMC	456	Prerequisites, JOMC 153 and 256
JOMC	457	Prerequisite, JOMC 157
JOMC	459	Prerequisite, JOMC 153
JOMC	473	Prerequisite, JOMC 271 or 272
JOMC	480	Prerequisite, JOMC 180; pre- or corequisite, JOMC 153
JOMC	481	Prerequisite, JOMC 480
JOMC	482	Prerequisite, JOMC 182; pre- or corequisite, JOMC 153
JOMC	483	Prerequisite, JOMC 482
JOMC	484	Prerequisite, JOMC 182
JOMC	551	Prerequisites, JOMC 153, and 137 or 253
JOMC	552	Prerequisite, JOMC 452, 475, or 551
JOMC	581	Prerequisite, JOMC 187
JOMC	583	Prerequisite, JOMC 187
JOMC	586	Prerequisite, JOMC 187
JOMC	582	Prerequisite, JOMC 180
LING	200	Prerequisite, LING 101.
LING	201	Prerequisite, LING 101.
LING	202	Prerequisite, LING 101.
LING	203	Prerequisite, LING 101.
LING	296	Prerequisite, LING 101.
LING	301	Prerequisite, LING 101.
LING	304	Prerequisite, LING 101.
LING	310	Prerequisite, LING 101.
LING	422	Prerequisite, LING 200, 520, 523, or SPHS 540.
LING	522	Prerequisites, LING 520, and 200 or 523.

LING	523	Prerequisite, LING 520, or SPHS 530 or 540.
LING	524	Prerequisite, LING 200 or 523.
LING	529	Prerequisite, LING 203 or 528.
LING	533	Prerequisite, LING 530.
LING	538	Prerequisite, LING 537.
LING	551	Prerequisite, LING 550.
MATH	233	Prerequisite, MATH 232 or 283
MATH	383	Prerequisite, MATH 233.
MATH	406	Prerequisite, MATH 232.
MATH	418	Prerequisites, MATH 233 and 381.
MATH	515	Prerequisite, MATH 381.
MATH	521	Prerequisites, MATH 233 and 381.
MATH	522	Prerequisites, MATH 383 and 521.
MATH	523	Prerequisite, MATH 383.
MATH	524	Prerequisite, MATH 383.
MATH	528	Prerequisites, MATH 383; and PHYS 104 and 105, or PHYS 116 and 117.
MATH	529	Prerequisites, PHYS 104 and 105, and one of MATH 521, 524, or 528.
MATH	533	Prerequisite, MATH 381.
MATH	534	Prerequisite, MATH 381.
MATH	547	Prerequisite, MATH 233 or 283
MATH	548	Prerequisite, MATH 381.
MATH	550	Prerequisite, MATH 233; corequisite, MATH 383.
MATH	551	Prerequisite, MATH 381
MATH	555	Prerequisite, MATH 383.
MATH	564	Prerequisite, MATH 283 or 383
MATH	565	Prerequisite, MATH 383.
MATH	566	Prerequisite, MATH 383.
MATH	577	Prerequisites, MATH 381 and 383.
MATH	578	Prerequisite, MATH 547 or 577.
MATH	579	Prerequisite, MATH 547 or 577.

MATH	590	Prerequisite, MATH 522.
MUSC	123	Corequisite, MUSC 202.
MUSC	125	Prerequisite, MUSC 123.
MUSC	132	Prerequisites, MUSC 130, and 131 or 131H; corequisite, MUSC 133.
MUSC	133	Prerequisites, MUSC 130, and 131 or 131H; corequisite, MUSC 132.
MUSC	135	Prerequisite, MUSC 121 or 131 or 131H.
MUSC	163	Prerequisite, MUSC 135.
MUSC	166	Prerequisites, MUSC 130, and 131 or 131H.
MUSC	228	Prerequisites, MUSC 226 and 227.
MUSC	230	Prerequisites, MUSC 132 or 132H, and 133; corequisite, MUSC 232.
MUSC	232	Prerequisites, MUSC 132 or 132H, and 133; corequisite, MUSC 230.
MUSC	234	Prerequisites, MUSC 132 or 132H, and 133.
MUSC	252	Prerequisites, MUSC 132 or 132H, and 133.
MUSC	253	Prerequisites, MUSC 230, 232 or 232H, and 252.
MUSC	258	Prerequisites, MUSC 132 or 132H, and 133.
MUSC	263	Prerequisite, MUSC 163.
MUSC	266	Prerequisite, MUSC 166.
MUSC	300	Prerequisite, MUSC 200.
MUSC	302	Prerequisite, MUSC 202.
MUSC	303	Prerequisite, MUSC 203.
MUSC	304	Prerequisite, MUSC 204.
MUSC	305	Prerequisite, MUSC 205.
MUSC	306	Prerequisite, MUSC 206.
MUSC	308	Prerequisite, MUSC 168.
MUSC	309	Prerequisite, MUSC 308.
MUSC	331	Prerequisites, MUSC 230, and 232 or 232H.
MUSC	332	Prerequisites, MUSC 230, and 232 or 232H.
MUSC	338	Prerequisites, MUSC 230, and 232 or 232H.

MUSC	355	Prerequisites, MUSC 251, 252, and 253.
MUSC	124	Prerequisite, MUSC 123.
NUTR	240	Prerequisite, BIOL 101/101L and CHEM 102/102L
PHIL	356	Prerequisite, PHIL 155.
PHIL	456	Prerequisite, PHIL 455.
PHIL	457	Prerequisite, PHIL 455.
PHIL	459	Prerequisite, PHIL 455.
PHIL	462	Prerequisite, PHIL 362
PHIL	474	Prerequisite, PHIL 170.
PHIL	475	Prerequisite, PHIL 275 or WMST 101.
PHIL	560	Prerequisite, PHIL 160, and 360 or 362 or 364 or 368
PLCY	460	Prerequisite, STOR 155
PLCY	698	Prerequistes, PLCY 460, and 681 or 691H
PLCY	692H	Prerequisites, PLCY 460 and 691H
POLI	442	Prerequisites, ECON 101 and POLI 150.
POLI	443	Prerequisite, POLI 150.
POLI	446	Prerequisite, POLI 150.
POLI	458	Prerequisite, POLI 150.
PORT	203	Prerequisite, PORT 102, 111, or 401.
PORT	204	Prerequisite, PORT 203.
PORT	310	Prerequisite, PORT 204 or 402.
PORT	323	Prerequisite, PORT 204 or 402.
PORT	402	Prerequisite, PORT 102, 111, or 401.
PORT	102	Prerequisite, PORT 101.
PSYC	270	Prerequisites, PSYC 101, and 210 or 215
PSYC	431	Prerequisites, PSYC 101, and 210 or 215
PSYC	434	Prerequisites, PSYC 101, and 210 or 215; and one of PSYC 220, 222, 225, 230, or BIOL 450, 455

PSYC	500	Prerequisites, PSYC 101, 245, and 250
PSYC	503	Prerequisite, PSYC 101
PSYC	505	Prerequisites, PSYC 101 and 245, and 210 or 215
PSYC	210	Prerequisite, PSYC 101
PSYC	215	Prerequisites, MATH 231 and PSYC 101
PSYC	220	Prerequisite, PSYC 101
PSYC	222	Prerequisite, PSYC 101
PSYC	225	Prerequisite, PSYC 101
PSYC	230	Prerequisite, PSYC 101
PSYC	245	Prerequisite, PSYC 101
PSYC	250	Prerequisite, PSYC 101
PSYC	260	Prerequisite, PSYC 101
PSYC	320	Prerequisite, PSYC 101
PSYC	400	Prerequisites, PSYC 101 and 222
PSYC	401	Prerequisites, PSYC 101, and BIOL 101 or PSYC 222
PSYC	402	Prerequisites, PSYC 101 and 220
PSYC	403	Prerequisites, PSYC 101, and 220 or 402
PSYC	404	Prerequisite, PSYC 101
PSYC	425	Prerequisites, PSYC 101, and one of PSYC 220, 225, or 230
PSYC	430	Prerequisites, PSYC 101, and 222 or 230
PSYC	432	Prerequisites, PSYC 101 and 230, or LING 101, or 400
PSYC	433	Prerequisite, PSYC 101
PSYC	436	Prerequisite, PSYC 220, 222, 225, 230, 260, 431, 432, 433, or 469
PSYC	461	Prerequisites, PSYC 101 and 250
PSYC	463	Prerequisites, PSYC 101 and 250, and 210 or 215
PSYC	465	Prerequisites, PSYC 101 and 250
PSYC	467	Prerequisites, PSYC 101 and 250

PSYC	468	Prerequisites, PSYC 101 and 250, and 210 or 215
PSYC	469	Prerequisites, BIOL 101 and PSYC 101, and 210 or 215
PSYC	470	Prerequisites, PSYC 101 and 250, and 210 or 215
PSYC	471	Prerequisites, PSYC 101, 210 or 215, and 250
PSYC	501	Prerequisite, PSYC 101
PSYC	502	Prerequisites, PSYC 101 and 250
PSYC	504	Prerequisites, PSYC 101 and 245
PSYC	506	Prerequisites, PSYC 101 and 245
PSYC	507	Prerequisites, PSYC 101, 245, and 250
PSYC	509	Prerequisites, PSYC 101 and 245
PSYC	512	Prerequisite, PSYC 101
PSYC	514	Prerequisites, PSYC 101 and 245
PSYC	515	Prerequisite, PSYC 270
PSYC	530	Prerequisites, PSYC 101 and 270
PSYC	531	Prerequisites, PSYC 101, and 210 or 215
PSYC	532	Prerequisite, PSYC 210 or 215 or SOCI 252 or STOR 155
PSYC	533	Prerequisite, ECON 400 or PSYC 210 or 215 or SOCI 252 or STOR 155
PSYC	560	Prerequisites, PSYC 101 and 260, and 210 or 215
PSYC	561	Prerequisites, PSYC 101 and 260, and 210 or 215
PSYC	563	Prerequisites, PSYC 101 and 260, and 210 or 215
PSYC	564	Prerequisites, PSYC 101 and 260, and 210 or 215
PSYC	565	Prerequisites, PSYC 101 and 260, and 210 or 215

PSYC	566	Prerequisites, PSYC 101 and 260, and 210 or 215
PSYC	567	Prerequisites, PSYC 101 and 270, and 210 or 215
PSYC	600	Prerequisite, PSYC 101
PSYC	601	Prerequisites, PSYC 101 and 270
PSYC	602	Prerequisite, PSYC 101
RELI	222	Prerequisite, PHIL 134 or RELI 122, 126, 140, 161, or 163.
RELI	367	Prerequisites, RELI 161 and 163.
RELI	402	Prerequisite, RELI 401.
RELI	409	Prerequisite, GREK 222.
RELI	410	Prerequisites, RELI 403 and 404.
RELI	411	Prerequisites, RELI 403 and 404.
RELI	412	Prerequisites, RELI 403 and 404.
RELI	423	Prerequisite, RELI 140.
RELI	512	Prerequisite, RELI 110
RELI	540	Prerequisite, RELI 140.
RELI	607	Prerequisite, RELI 104, 207, or 208.
SPAN	300	Prerequisite, SPAN 250, 255, or 260.
SPAN	310	Prerequisite, SPAN 250, 255, or 260.
SPAN	320	Prerequisite, SPAN 265.
SPAN	321	Prerequisite, SPAN 265.
SPAN	322	Prerequisite, SPAN 265.
SPAN	323	Prerequisite, SPAN 265.
SPAN	327	Prerequisite, ECON 325 or SPAN 265.
SPAN	329	Prerequisite, SPAN 320, 321, 322, 323, or 327.
SPAN	330	Prerequisite, SPAN 300
SPAN	331	Prerequisite, SPAN 300
SPAN	340	Prerequisite, SPAN 300
SPAN	345	Prerequisite, SPAN 300
SPAN	350	Prerequisite, SPAN 300

SPAN	369	Prerequisite, SPAN 300
SPAN	371	Prerequisites, SPAN 260 and 300
SPAN	372	Prerequisites, SPAN 260 and 300
SPAN	373	Prerequisites, SPAN 260 and 300
SPAN	375	Prerequisite, SPAN 300
SPAN	376	Prerequisite, SPAN 300
SPAN	380	Prerequisite, SPAN 371, 372, or 373.
SPAN	381	Prerequisite, SPAN 371, 372, or 373.
SPAN	382	Prerequisite, SPAN 371, 372, or 373.
SPAN	383	Prerequisite, SPAN 371
SPAN	384	Prerequisite, SPAN 371
SPAN	385	Prerequisite, SPAN 371, 372, or 373.
SPAN	389	Prerequisite, SPAN 373
SPAN	395	Prerequisite, SPAN 300 or 326
SPAN	398	Prerequisite, SPAN 371, 372, or 373.
SPAN	397	Prerequisite, SPAN 330, 340, 344, or 345
STOR	113	Prerequisite, MATH 110 or 110P
STOR	151	Prerequisite, MATH 110 or 110P
STOR	155	Prerequisite, MATH 110 or 110P
STOR	215	Prerequisite, MATH 110 or 110P
STOR	305	Prerequisite, MATH 152 or STOR 155
STOR	415	Prerequisite, MATH 547
STOR	435	Prerequisite, MATH 233
STOR	445	Prerequisite, BIOS 660 or STOR 435
STOR	455	Prerequisite, STOR 155
STOR	456	Prerequisite, STOR 455
STOR	465	Prerequisite, STOR 445
STOR	471	Prerequisite, STOR 435
STOR	472	Prerequisite, STOR 435
STOR	555	Prerequisite, STOR 435
WMST	102	Prerequisite, WMST 101.
WMST	294	Prerequisite, WMST 101.

Subject: ACC-Big 10 Challenge!

Hiya Beth,

yes!!!

Domenic J. Tiani

I am originally from Pittsburgh, PA and attended both Westminster College and The University of Pittsburgh. I moved to North Carolina and obtained a B.A. in Chemistry at North Carolina State University. After graduating from N.C. State I worked at LabCorp (Burlington, NC) for 1 year and then moved to Tucson, AZ where I obtained my Ph.D. in Chemistry at The University of Arizona. After completing my Ph.D., I taught for 1 year at the University of Arizona. I joined the faculty in the Department of Chemistry at UNC in the fall of 2003. I teach a number of introductory chemistry courses and work closely with the laboratory program. I am also a part time faculty adviser in the chemistry department and for the health professions in the Health Professions Advising Office.

I live in Hillsborough, NC with my wife and my two young children. I enjoy reading, running and woodworking.

- Go Heels

A Program to Provide Psycho-Educational Services for UNC Student-Athletes

Goal: To establish a program for evaluating student-athletes' psycho-educational needs and developing effective services to meet those needs.

Elements of the Program

1. The program would be a partnership between the Academic Support Program for Student-Athletes and the School Psychology Program.
2. School Psychology externs will evaluate student-athletes for potential psycho-educational concerns that may negatively affect their academic performance.
3. School psychology externs will compose thorough reports on students diagnosed with learning disabilities and/or ADHD.
4. School psychology externs will implement evidence-based interventions for students needing socio-emotional support throughout the semester or school year.
5. School psychology externs will consult with learning specialists to develop evidence-based interventions for students needing intensive learning support.
6. Learning specialists will implement learning interventions throughout the semester or school year.
7. School psychology externs will consult with learning specialists to monitor students' learning progress and periodically re-evaluate students' learning needs.
8. School psychology externs and learning specialists will collaborate to collect data and maintain records for program evaluation.

Value-Added Benefits of the Program

1. The range of service will include the current practice of providing psycho-educational reports and be expanded to include: (a) ongoing formative assessments tied directly to students' academic needs, (b) data-based progress monitoring, (c) collaboration with ASPSA staff, (d) a school psychology extern will keep regular hours at the facility, and (e) the extern will provide psycho-educational group support. These additional services are further outlined below.
2. Assessment for intervention: the new assessment program will provide academic support staff and student-athletes with diagnostic information that will be used to develop ongoing support for academic success.
3. Curriculum-based assessments of critical reading and math dimensions will be used to determine appropriate counseling and learning services.
4. Formative assessment practices will be utilized to meaningfully chart academic progress and guide further academic support.
5. The psychological assessment battery will include the use of evidence-based measures that assess the students' cognitive processing and present a learning profile. This profile will be used in conjunction with the curriculum-based assessments to plan and guide academic supports.
6. The school psychology extern will have an office in the academic center and provide assessment and intervention support 15-20 hours a week over the course of the school year.
7. The school psychology extern would be available to offer psycho-educational support to help students with managing school stress and other adaptive issues. (However, the intern

would not provide mental health therapy. That will remain the responsibility of the athletics department's sports psychologists.)

Costs:
The cost to fully fund and cover start-up expenses for a school psychology intern during Summer Session II, Fall, and Spring semesters would be approximately $27-28k per year. A single intern would be able to provide services for incoming football and women's basketball student-athletes.

Biographical Sketch for Frank Church, Ph.D. (November 2012)
Professor of Pathology & Laboratory Medicine
University of North Carolina at Chapel Hill, School of Medicine

Frank Church is a Professor in the Departments of Pathology and Laboratory Medicine, Pharmacology, and Medicine in the School of Medicine at the University of North Carolina at Chapel Hill. He received his B.S. and M.S. degrees from Louisiana State University; he received a Ph.D. from North Carolina State University; and after a postdoctoral fellowship at UNC-CH, has been on the faculty at UNC-CH since 1986.

His research efforts are to understand the balance between proteases and their specific protease inhibitors (Serpins) in the vasculature, and this research includes protein structure-activity relationships, cell and molecular biology, pathology, and murine models of disease. Specifically, he seeks to better understand the hematological links of coagulation-fibrinolysis to support age/senescence-related venous thrombosis and cancer cell processes that promote proliferation and invasion/metastasis. His laboratory has historically been supported by the NIH (NHLBI, NIA, NINDS, and NCI), the American Heart Association, and the Susan G. Komen for the Cure. Since 1986, he has helped train 18 graduate students (Ph.D., M.D./Ph.D., or M.S.), 15 postdoctoral fellows, and 60 undergraduates in the laboratory.

His teaching activities at the University include senior undergraduates (Biology/ Pathology 426 "Biology of Blood Diseases", where he is Course Director and sole lecturer), medical students (Hematology-Oncology Block for 2nd year students where he serves as Block Head and lecturer in a team-taught course), and graduate students (Pathology 713, "Molecular and Cellular Pathophysiological Basis of Disease: Mechanisms of Disease", where he has served both as Course Director and now as a lecturer in a team-taught course).

He has received several University-wide teaching awards, the Tanner Award for Excellence in Undergraduate Teaching (1999 and 2005) and the Student Undergraduate Teaching Award (2004); the Joe Grisham Award for Excellence in Teaching Graduate Students, Pathology & Laboratory Medicine (2006); the 2nd Year Basic Science Course Award for Hematology-Oncology in the School of Medicine (2007); he was in the inaugural group of Fellows in the Academy of Educators, UNC-CH School of Medicine (2007); and since 2000, he has been a member of the Academy of Teaching Scholars at the University of North Carolina at Chapel Hill.

From 1996-2006 he served two functions in the Department of Pathology and Laboratory Medicine Graduate Program, first as Director of Admissions, and then as Director of Graduate Studies. He also is a currently on the Medical School Admissions Committee, the 2nd year Course Directors Committee, and the Student Promotions Committee. Nationally, he served as the Chair of the Research Committee of the Mid-Atlantic American Heart Association; grant reviewer for the Breast Cancer Research Program, Department of Defense; and is on the Editorial Boards of *The Journal of Biological Chemistry*, *Thrombosis*, and *Journal of Thrombosis and Haemostasis*.

Dead Period: Dec. 12-31

Other Sports
Contact Period: Dec.1-31

PARTICIPATION AWARDS

Participation awards may be given to student-athletes each year, provided they are given at the conclusion of the regular playing season and do not exceed the NCAA maximum value **($225 for underclassmen, $425 for seniors)**. Such awards may not include cash, a cash-equivalent award, or a country club or sports club membership. Gift cards are permissible, provided no cash can be received from the card at any time (e.g., remaining balance after purchase). Awards may not be sold or exchanged for another item of value, even if the student-athlete's name or picture does not appear on the award. All awards provided by the institution must be uniform for all team members receiving the award.

Equipment/apparel necessary for competition may be issued during the regular playing season and subsequently given as a participatory award at the conclusion of the season, provided the combined value of these items and any additional institutional participatory awards do not exceed the NCAA maximum values listed above.

OUTSIDE COMPETITION—SPORTS OTHER THAN BASKETBALL

During the winter break, it is permissible for student-athletes to participate in a non-collegiate, amateur outside competition, (e.g., for a club team), provided it is outside of the team's playing and practice season (i.e., 20-hour weeks). Note that there are limits on the number of UNC student-athletes that can participate on the same team (see Bylaw 17.28.2). Additionally, the student-athlete must wait to compete until the institutional final exam period has ended (December 14).

MID-YEAR CERTIFICATION REQUIREMENTS

Please be reminded of the NCAA's academic requirements for student-athletes to compete during the spring semester. All student-athletes must pass at least 6 hours during the fall semester in order to be eligible to compete during the spring. Student-athletes must also meet the following GPA requirements at the end of the fall term:

*Student-athletes competing in post-season championships or bowl games that occur between terms must pass at least 6 hours (with no additional GPA requirement) to be eligible for the competition in the post-season event.

*Please remember that student-athletes should not compete in the spring of 2013 until their names appear on an official eligibility certification roster provided by Lance Markos.

Freshmen	**No GPA Requirement**
Sophomores	**1.8 Cumulative GPA**
Juniors	**1.9 Cumulative GPA**
Seniors & 5th Years	**2.0 Cumulative GPA**

HOLIDAY REMINDERS

With the holiday season upon us, please consider the following reminders as you prepare for team events and correspond with prospects.

Greeting Cards -- It is not permissible to send holiday greeting cards to prospects, their relatives, or their coaches. The only permissible cards are plain postal service cards and approved institutional note cards. It is permissible to use colored ink if you want to include a holiday message on an institutional note card. However, please remember that the greeting must be hand-written.

Holiday Meals -- All "occasional meal" rules still apply for any institutional staff member who wishes to provide a student-athlete or an entire team with a holiday meal. This includes team holiday parties. Each student-athlete is limited to three occasional meals per semester, and anyone wishing to provide a meal must clear it with the student-athlete's head coach, complete the "Occasional Meal Form" (located on the J: Drive), and submit it to the Compliance Office before providing the meal.

Holiday Gifts -- All "extra benefits" rules still apply during the holiday season; therefore, it is not permissible to give holiday gifts to student-athletes or their relatives.

Increasing likelihood of engagement

Good Practices in Undergraduate Education

(Chickering & Gamson, 1987; Pascarella & Terenzini, 2005)

- ✓ Student-faculty/staff contact
- ✓ Active learning
- ✓ Prompt feedback
- ✓ Time on task
- ✓ High expectations
- ✓ Respect for diverse learning styles
- ✓ Cooperation among students

Kuh, 2012 : Slide 19

Do all students benefit equitably from all five clusters?

Are students who are performing at lower levels (just above the minimum eligibility requirements or on academic probation) benefitting from all five clusters?

Access, Advantage and Action

- ✓ ***Fewer 1st gen students***
- ✓ ***Fewer students of color***
- ✓ ***Fewer transfer students***
- ✓ ***Fewer part-time students***
- ✓ ***Fewer older students***

Kuh, 2012 : Slides 40 and 41

Impact on lower-performing and underrepresented students

Impact of Educationally Purposeful Activities on First Academic Year GPA by Race/Ethnicity

Impact of Educationally Purposeful Activities on the Probablility of Returning for the Second Year of College by Race

Kuh. G. D. (2008) High-Impact Educational Practices: What They Are, Who Has Access to Them, and Why They Matter. http://leap.aacu.org/toolkit/wp-content/files_mf/hips_slos_and_data.pdf

"Thus, while participation in effective educational activities generally benefits all students, the salutary effects are even greater for students who begin college at lower achievement levels, as well as students of color, compared with white students." p. 19

A (highly) suggested institutional priority …

Have *every student* do (at least) one high-quality "high-impact" experience in the first year and another linked to the major

Kuh, 2012 : Slide 30

We can't leave serendipity to chance

Kuh, 2012 : Slide 22

Key takeaways from Kuh et.al. …

- High impact educational opportunities (HIEOs) have a major impact on student success, including persistence to graduation.
- There are disparities in access (perceived and real) to HIEOs.
- *All* students should participate in HIEOs – especially in their first year.
- We should intentionally investigate student participation trends in in HIEOs on our campus.

Opportunities for us to make a difference…

Step 1: Identify evidence-based indicators of HIEOs

Step 2: Identify HIEO at Carolina; invite directors of those initiatives to share information

Step 3: Work with HIEO providers to establish new goals to increase participation for underrepresented students and access lower-performing students

Step 4: Share indicators/ standards of HIEO with all campus partners to encourage enhancement of existing student engagement opportunities to meet those standards

PART 1

High-Impact Educational Practices

A Brief Overview[9]

THE FOLLOWING TEACHING AND LEARNING PRACTICES have been widely tested and have been shown to be beneficial for college students from many backgrounds.[10] These practices take many different forms, depending on learner characteristics and on institutional priorities and contexts. On many campuses, assessment of student involvement in active learning practices such as these has made it possible to assess the practices' contribution to students' cumulative learning. However, on almost all campuses, utilization of active learning practices is unsystematic, to the detriment of student learning. Presented below are brief descriptions of high-impact practices that educational research suggests increase rates of student retention and student engagement. The rest of this publication will explore in more detail why these types of practices are effective, which students have access to them, and, finally, what effect they might have on different cohorts of students.

First-Year Seminars and Experiences

Many schools now build into the curriculum first-year seminars or other programs that bring small groups of students together with faculty or staff on a regular basis. The highest-quality first-year experiences place a strong emphasis on critical inquiry, frequent writing, information literacy, collaborative learning, and other skills that develop students' intellectual and practical competencies. First-year seminars can also involve students with cutting-edge questions in scholarship and with faculty members' own research.

Common Intellectual Experiences

The older idea of a "core" curriculum has evolved into a variety of modern forms, such as a set of required common courses or a vertically organized general education program that includes advanced integrative studies and/or required participation in a learning community (see below). These programs often combine broad themes—e.g., technology and society, global interdependence—with a variety of curricular and cocurricular options for students.

Learning Communities

The key goals for learning communities are to encourage integration of learning across courses and to involve students with "big questions" that matter beyond the classroom. Students take two or more linked courses as a group and work closely with one another and with their professors. Many learning communities explore a common topic and/or common readings through the lenses of different disciplines. Some deliberately link "liberal arts" and "professional courses"; others feature service learning (see p. 11).

Writing-Intensive Courses

These courses emphasize writing at all levels of instruction and across the curriculum, including final-year projects. Students are encouraged to produce and revise various forms of writing for different audiences in different disciplines. The effectiveness of this repeated practice "across the curriculum" has led to parallel efforts in such areas as quantitative reasoning, oral communication, information literacy, and, on some campuses, ethical inquiry.

Collaborative Assignments and Projects

Collaborative learning combines two key goals: learning to work and solve problems in the company of others, and sharpening one's own understanding by listening seriously to the insights of others, especially those with different backgrounds and life experiences. Approaches range from study groups within a course, to team-based assignments and writing, to cooperative projects and research.

Undergraduate Research

Many colleges and universities are now providing research experiences for students in all disciplines. Undergraduate research, however, has been most prominently used in science disciplines. With strong support from the National Science Foundation and the research community, scientists are reshaping their courses to connect key concepts and questions with students' early and active involvement in systematic investigation and research. The goal is to involve students with actively contested questions, empirical observation, cutting-edge technologies, and the sense of excitement that comes from working to answer important questions.

Diversity/Global Learning

Many colleges and universities now emphasize courses and programs that help students explore cultures, life experiences, and worldviews different from their own. These studies—which may address U.S. diversity, world cultures, or both—often explore "difficult differences" such as racial, ethnic, and gender inequality, or continuing struggles around the globe for human rights, freedom, and power. Frequently, intercultural studies are augmented by experiential learning in the community and/or by study abroad.

Service Learning, Community-Based Learning

In these programs, field-based "experiential learning" with community partners is an instructional strategy—and often a required part of the course. The idea is to give students direct experience with issues they are studying in the curriculum and with ongoing efforts to analyze and solve problems in the community. A key element in these programs is the opportunity students have to both *apply* what they are learning in real-world settings and *reflect* in a classroom setting on their service experiences. These programs model the idea that giving something back to the community is an important college outcome, and that working with community partners is good preparation for citizenship, work, and life.

Internships

Internships are another increasingly common form of experiential learning. The idea is to provide students with direct experience in a work setting—usually related to their career interests—and to give them the benefit of supervision and coaching from professionals in the field. If the internship is taken for course credit, students complete a project or paper that is approved by a faculty member.

Capstone Courses and Projects

Whether they're called "senior capstones" or some other name, these culminating experiences require students nearing the end of their college years to create a project of some sort that integrates and applies what they've learned. The project might be a research paper, a performance, a portfolio of "best work," or an exhibit of artwork. Capstones are offered both in departmental programs and, increasingly, in general education as well.

Chart C

Achieving the Goals of Liberal Education:

Connecting Essential Learning Outcomes with High-Impact Practices

Fostering Broad Knowledge of Human Cultures and the Natural World

- Common intellectual experiences (exploring "big questions" in history, cultures, science, and society)
- Undergraduate research
- Learning communities (multiple courses linked to a "big question")
- Diversity, civic, and global learning
- Capstone courses

Strengthening Intellectual and Practical Skills

- First-year seminars and experiences
- Writing-intensive courses (across the curriculum)
- Skill-intensive courses (quantitative reasoning, oral communication, and information literacy across the curriculum)
- Collaborative assignments and projects
- Undergraduate research
- Internships

Deepening Personal and Social Responsibility

- Common intellectual experiences (exploring "big questions" in history, culture, science, and society)
- Diversity, civic, and global learning
- Ethics-intensive courses
- Collaborative assignments and projects
- Service and community-based learning

Practicing Integrative and Applied Learning

- Learning communities (multiple courses linked to a "big question")
- Undergraduate research
- Service and community-based learning
- Internships
- Capstone projects and culminating experiences

Figure 3

Impact of Educationally Purposeful Activities on the Probablility of Returning for the Second Year of College by Race

compensatory effect on their first-year grades. Figure 2 shows a similar compensatory effect for the grades of Hispanic students compared with their white counterparts.

A similar effect exists between engagement and the odds that a student will return to the same institution for the second year of college (figure 3). That is, while engagement and persistence are positively correlated for all students, engagement has a compensatory effect for African American students relative to white students in that as the African American students become more engaged, they also become more likely to surpass white students in the likelihood they will persist.

Thus, while participation in effective educational activities generally benefits all students, the salutary effects are even greater for students who begin college at lower achievement levels, as well as students of color, compared with white students.

How Do We Raise Achievement?

So, today when I am asked, what one thing can we do to enhance student engagement and increase student success? I now have an answer: make it possible for every student to participate in *at least two high-impact activities* during his or her undergraduate program, one in the first year, and one taken later in relation to the major field. The obvious choices for incoming students are first-year seminars, learning communities, and service learning. Common intellectual content should be a nonnegotiable organizing principle for these early college experiences; when students have read and discussed some of the same material in one or more classes, they are more likely to talk with their

National Institute for
Learning Outcomes Assessment
Making Learning Outcomes Usable & Transparent

What Matters to Student Success

George D. Kuh

National Symposium
on Student Retention

October 31, 2012

What If…

- Our work was guided by what we know about how students best learn and develop…?
- And if we created optimum learning conditions for all students…?
- Then, how would we re-design our policies, programs and practices?
- What kinds of assessment approaches would we use?

The Major Tasks

Teach students to:

- ***Reflect*** – think about experiences inside and outside the classroom
- ***Integrate*** – see the connections between different courses, out-of-class experiences, and life beyond the institution
- ***Apply*** – use what one has learned in different settings presenting novel challenges and opportunities

Overview

- What the world needs now
- Why engagement and deep learning matter
- Six priorities for our work
- Discussion

US Economy Defined by Greater Workplace Challenges <u>and</u> Dynamism

- **More than 1/3 of the entire US labor force changes jobs *ANNUALLY*.**
- **Today's students will have 10-14 jobs *by age 38*!**
- **Half of workers have been with their company less than 5 years.**
- **Every year, more than 30 million Americans are working in jobs that did not exist in the previous year.**

DOL-BLS

The World is Demanding More

- …more college-educated workers.
- …more educated workers with *higher levels of learning and knowledge*.

Employer expectations of employees have increased

% who agree with each statement

Our company is asking employees to **take on more responsibilities** and to **use a broader set of skills** than in the past

Employees are expected to **work harder to coordinate with other departments** than in the past

The **challenges** employees face within our company are **more complex today** than they were in the past

To succeed in our company, employees need **higher levels of learning and knowledge** today than they did in the past

Key Capabilities Open the Door for Career Success and Earnings

"Irrespective of college major or institutional selectivity, what matters to career success is students' development of a **broad set of cross-cutting capacities…**"

Anthony Carnevale, Georgetown University Center on Education and the Workforce

Narrow Learning is Not Enough: The Essential Learning Outcomes

★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★

- ★ ***Knowledge of Human Cultures and the Physical & Natural World***
- ★ ***Intellectual and Practical Skills***
- ★ ***Personal and Social Responsibility***
- ★ ***"Deep" Integrative Learning***

AAC&U Association of American Colleges and Universities

Deep, Integrative Learning

- Attend to the underlying meaning of information as well as content
- Integrate and synthesize different ideas, sources of information
- Discern patterns in evidence or phenomena
- Apply knowledge in different situations
- View issues from multiple perspectives

Early College Indicators of Persistence and Success

- ✓ Goal realization
- ✓ Psycho-social fit
- ✓ Credit hours completed
- ✓ Academic and social support
- ✓ Involvement in the “right” kinds of activities

What *Really* Matters in College: **Student Engagement**

Because individual effort and involvement are the critical determinants of college impact, institutions should focus on the ways they can shape their academic, interpersonal, and extracurricular offerings to encourage student engagement.

Pascarella & Terenzini, 2005, p. 602

Something Else That *Really Matters* in College

The greatest impact appears to stem from students' *total level* of campus engagement, particularly when academic, interpersonal, and extracurricular involvements are *mutually reinforcing*…

Pascarella & Terenzini, 2005, p. 647

It Takes a Whole Campus to Educate a Student

What does a student-friendly, educationally effective institution look like?

Student Engagement Trifecta

- What students *do* -- time and energy devoted to educationally purposeful activities
- What institutions *do* -- using effective educational practices to induce students to do the right things
- Educationally effective institutions channel student energy toward *the right activities*

Good Practices in Undergraduate Education

(Chickering & Gamson, 1987; Pascarella & Terenzini, 2005)

- ✓ Student-faculty/staff contact
- ✓ Active learning
- ✓ Prompt feedback
- ✓ Time on task
- ✓ High expectations
- ✓ Respect for diverse learning styles
- ✓ Cooperation among students

National Survey of Student Engagement
(pronounced "nessie")

Community College Survey of Student Engagement
(pronounced "cessie")

College student surveys that assess the extent to which students engage in educational practices associated with high levels of learning and development

NSSE Clusters of Effective Educational Practices

National Survey
of Student Engagement

Key findings

Grades, persistence, student satisfaction, gains across a range of desired outcomes, and engagement go hand in hand

Creating Conditions That Matter to Student Success

We can't leave serendipity to chance

Six Priorities

1. Insist on doing what works

Engaging Pedagogies and Practices

a. *Classroom organization*
b. *Early and continuing assignments requiring reflection and integration coupled with feedback*
c. *Use of peer preceptors/mentors*
d. *One minute papers (variations)*
e. *Case studies*
f. *Debates*
g. *Simulations*
h. *Small group problem sets*
i. *Others…*

Make Effective Practice Mandatory

- Require intrusive advising and orientation
- Stop late registration
- Math refresher before placement test
- Reduce D/W/F rates
- Deploy *effective* early warning systems
- Scale up Supplemental Instruction
- Organize residences around educational themes
- Communicate with students' family members
- Use assessment approaches that measure the outcomes we seek

Let's Talk Checklists

Checklists (Gawande, 2009) have the potential make us more intentional in our practice

"The volume and complexity of what we know has exceeded our individual ability to deliver its benefits correctly, safely, or reliably" (p. 13)

"Checklists ..remind us of the minimum necessary steps and make them explicit. They not only offer the possibility of verification but also instill a kind of discipline of higher performance" (p. 36)

Where Checklists Could Make a Difference

- ✓ Academic advising
- ✓ Service learning courses
- ✓ Internships, field placements
- ✓ Independent student inquiries
- ✓ Academic skills centers
- ✓ Residence hall & student group advisors
- ✓ Study abroad coordinators
- ✓ Others?

“Difference Makers”

Student success is the product of thousands of small gestures extended on a daily basis by caring, supportive educators sprinkled throughout the institution who enact a talent development philosophy.

“Miss Rita”

Six Priorities

2. Put money where it makes a difference to student success.

It's not how much you spend but where
(DEEP study, Delta Cost Project, Cornell studies)

Six Priorities

1. Insist on doing what works
2. Put money where it makes a difference to student success.
3. Sunset redundant and ineffective programs
4. Have *every student* do (at least) one high-quality "high-impact" experience in the first year and another linked to the major

Essential Learning Outcome:

NSSE Deep/Integrative Learning

- Integrating ideas or information from various sources
- Included diverse perspectives in class discussions/writing
- Put together ideas from different courses
- Discussed ideas with faculty members outside of class
- Discussed ideas with others outside of class
- Analyzing the basic elements of an idea, experience, or theory
- Synthesizing & organizing ideas, info., or experiences
- Making judgments about the value of information
- Applying theories to practical problems or in new situations
- Examined the strengths and weaknesses of your own views
- Tried to better understand someone else's views
- Learned something that changed how you understand an issue

Effects of Participating in High-Impact Activities on Deep/Integrative Learning and Gains

	Deep Learning	Gains General	Gains Personal	Gains Practical
		First-Year		
Learning Communities	+++	++	++	++
Service Learning	+++	++	+++	++
		Senior		
Study Abroad	++	+	++	
Student-Faculty Research	+++	++	++	++
Internship	++	++	++	++
Service Learning	+++	++	+++	++
Culminating Experience	++	++	++	++

+ $p < .001$, ++ $p < .001$ & Unstd B > .10, +++ $p < .001$ & Unstd B > .30

Effects of Participating in High-Impact Activities on Student Engagement

	Level of Academic Challenge	Active and Collab. Learning	Student-Faculty Interaction	Supportive Campus Env.
		First-Year		
Learning Communities	++	+++	+++	++
Service Learning	++	+++	+++	++
		Senior		
Study Abroad	++	++	++	+
Student-Faculty Research	+++	+++	+++	++
Internship	++	+++	+++	++
Service Learning	++	+++	+++	++
Culminating Experience	++	++	+++	++

+ $p < .001$, ++ $p < .001$ & Unstd B > .10, +++ $p < .001$ & Unstd B > .30

High-Impact Activities Increase Odds Students Will:

- ✓ *Invest time and effort*
- ✓ *Interact with faculty and peers about substantive matters*
- ✓ *Experience diversity*
- ✓ *Get more frequent feedback*
- ✓ *Reflect & integrate learning*
- ✓ *Discover relevance of learning through real-world applications*
- ✓ *Publicly demonstrate competence*

Graduation Rates by Ethnicity and Participation in High-Impact Practices

Employers assess the potential value of high-impact educational practices

% saying each would help a lot/fair amount to prepare college students for success

84%	**Students complete a significant project before graduation that demonstrates their depth of knowledge in their major AND their acquisition of analytical, problem-solving, and communication skills *(62% help a lot)***
81%	**Students complete an internship or community-based field project to connect classroom learning with real-world experiences *(66%)***
81%	**Students develop research skills appropriate to their field and develop evidence-based analyses *(57%)***
73%	**Students work through ethical issues and debates to form their own judgments *(48%)***

Keep in Mind…

- ✓ More college experiences can be or are "high impact" in addition to those on the AAC&U list
- ✓ Implementation quality matters!
- ✓ Implications for advising

High-Impact Practices and the Disparities Within…

Frosh: Service Learning and LCs

- ✓ *Parity among racial/ethnic groups*
- ✓ *Fewer 1st gen students*
- ✓ *Fewer part-time students*
- ✓ *Fewer transfer students*
- ✓ *Fewer older students*

High-Impact Practices and the Disparities Within…

Seniors in All HIPs

- ✓ ***Fewer 1st gen students***
- ✓ ***Fewer students of color***
- ✓ ***Fewer transfer students***
- ✓ ***Fewer part-time students***
- ✓ ***Fewer older students***

Six Priorities

5. Make work a high-impact activity.

U of Iowa Student Employment Project
"Guided Reflection on Work" (GROW)

- Supervisors from Student Health Service/, Housing, Iowa Memorial Union, Libraries
- Supervisors received one hour of training on:
  - Outcomes of student employment
  - Results from the previous year's Division of Student Services Student Employment Survey
  - Background on the role supervisors can play in helping students make connections between work and academics
  - Expectations for the Pilot Projects

U of Iowa Student Employment Project
"Guided Reflection on Work" (GROW)

- Supervisors had two structured conversations with every student employee during spring semester and coded conversations into the following categories:
  - How the job and academics complement each other ("How is your job fitting in with your academics?")
  - Transfer between work and academics ("What are you learning here at work that is helping you in school?")
  - Transfer between academics and work ("Are you learning anything in class that you can apply here at work?")
  - Transfer between work and future career ("Give me a couple of examples of things that you are learning here at work that you will be using in your future profession?")

U of Iowa Student Employment Project
"Guided Reflection on Work" (GROW)

- **Student Employment Survey used to examine differences between pilot and non-pilot participants.**

Student Employment Outcomes: "Guided Reflection on Work" (GROW)

Outcome	% agree/strongly agree		Mean	
	Pilot Participants	Non-Pilot	Pilot	Non-Pilot
My supervisor helps me make connections between my work and my life as a student.	60%	51%	3.8	3.3
My job has helped prepare me for the world of full-time work.	62%	51%	3.6	3.4
My job has helped me improve my written communications.	16%	21%	2.6	2.7

Student Employment Outcomes: "Guided Reflection on Work" (GROW)

Outcome	% agree/strongly agree		Mean	
	Pilot Participants	Non-Pilot	Pilot	Non-Pilot
I can see connections between my job and my major/coursework.	56%	36%	3.4	2.9
My job has helped me learn about career options.	30%	39%	3.2	3.3

Student Employment Outcomes: "Guided Reflection on Work" (GROW)

Outcome	% agree/strongly agree		Mean	
	Pilot Participants	Non-Pilot	Pilot	Non-Pilot
Because of my job, I am able to work effectively with individuals with a variety of backgrounds, experiences, and cultures.	82%	77%	4.1	4.0
My job has helped me use critical thinking skills	70%	57%	3.8	3.5

Student Employment Outcomes: "Guided Reflection on Work" (GROW)

	Pilot Participants	Non-Pilot	Pilot	Non-Pilot
My job helped me develop more effective time management skills.	76%	76%	4.0	4.0
My job helped me improve my oral communication skills.	78%	72%	4.0	3.8
My job helped me develop conflict resolution skills.	74%	61%	3.8	3.6

6. Stay the course

The good-to-great-transformations never happened in one fell swoop. There was no single defining action, no grand program, no one killer innovation, no solitary lucky break, no miracle moment. Sustainable transformations follow a predictable pattern of buildup and breakthrough…

(Collins, 2001, p. 186)

High performance is not guaranteed to last

It's not complacency but over-reaching that better explains how the once invincible self-destruct

The things we have to learn before we do them, we learn by doing them.

Aristotle, *Nicomachean Ethics*

Six Priorities

1. Insist on doing what works
2. Put money where it makes a difference to student success.
3. Sunset redundant, ineffective programs
4. Have *every student* do (at least) one high-quality "high-impact" experience in the first year and another linked to the major
5. Make work a high-impact activity
6. Stay the course

The Major Tasks

Teach students to:

- ***Reflect*** – think about experiences inside and outside the classroom
- ***Integrate*** – see the connections between different courses, out-of-class experiences, and life beyond the institution
- ***Apply*** – use what one has learned in different settings presenting novel challenges and opportunities

Last Word

- We must embrace the lineage of our students.
- Campus cultures do not change easily or willingly.
- To foster more student success we must use promising policies and practices more consistently throughout the institution.
- Do we have the *will* to do so?

Questions & Discussion

Retention Working Group
December 7, 2012
Agenda

- Welcome and Introductions

- Transfer United Assessment Report

- High Impact Educational Opportunities Discussion

- **Academic Probation Appeals**
  Changes to process - http://studentsuccess.unc.edu/academic_eligibility/appeals/

- **Academic Early Warnings**
  Update: Academic Early warnings will now be called Academic Progress Reports
  In addition to "warnings" instructors will now be able to also provide positive feedback (Keep up Good Work, Showing Improvement, Outstanding Performance, Good Class Participation)

- **Navigating the Research University**
  Update: 4 sections planned for summer (with 1 for Meyerhoff-like program)
  1 or 2 sections will be offered in fall for Millenial Scholars

- New Project - Students In Academic Distress: A Guide for Faculty and Staff
  Students In Academic Distress: A Guide for Families
  Update: Parents Council Grant Application Submitted

- Save the Date: Friday, January 18, 2013 11 a.m. – 1:00 p.m. **(150 participants have registered)**
  First Generation College Student Advocates Program

- Brown Bag Lunch Series – Next Friday
  December 14th **Academic Integrity**
  with Jim Leloudis, Professor of History, Associate Dean for Honors, Director, The James M. Johnston Center for Undergraduate Excellence
  <u>12 noon – 1:30 p.m. Location: Graham Memorial 011</u>
  Academic honesty, personal integrity, and responsible citizenship are cornerstones of the public research university. Academic integrity is essential to all academic work and it is a complex issue. This session will explore questions such as: How do undergraduates learn about academic integrity? What does it mean for undergraduates to be a member of a community of scholars? What programs and supports does Carolina offer to educate undergraduates about academic integrity?

- Suggestions for spring 2013 brown bag lunch topics?

- Open Agenda/Updates from Colleagues

Upcoming Meetings:
2/13
4/17 (Topic: Personal Librarian Program?)

All meetings are from 1 to 2:30 p.m. in the Steele Conference Room

From: Woodard, Harold <harold_woodard@unc.edu>
Sent: Thursday, December 13, 2012 8:27 PM
To: Blanton, Brent S <blanton@uncaa.unc.edu>; Bridger, Beth <bridgerb@email.unc.edu>; Richardson, Wally <wricha@email.unc.edu>; Jennifer Townsend <jtownsend@uncaa.unc.edu>
Subject: ASPSA ASSESSMENT FOR SACS (FINAL DRAFT)
Attach: ASPSA Annual Assessment Final DRAFT.xlsx

Colleagues,
Please review the attached report and let me know what you think.
Thanks very much for your valuable assistance with this.
Harold

2011-2012 Annual Assessment Report

Department Name: Academic Support Program for Student-Athletes **Contact Person:** Harold Woodard

Mission of Unit:

The University of North Carolina Academic Support Program assists student-athletes in exploring their interests and abilities, enjoying a broad edu

Outcomes Assessed
Counsel students on progress towards degree, course selection (in collaboration with Academic Advisers), career exploration, eligibility status for both UNC and the NCAA and transitional issues into the University. Assist students in balancing the demands of course responsibilities while also competing in their sport. Be a point of contact for students regarding University procedures. Assist students find necessary resources within the University community.
Deliver tutorial services to students in a variety of settings, depending upon the needs of the student.

Outcomes Assessed
LEEP Program: 1. Students will demonstrate increased levels of self-regulated learning. 2. Students will demonstrate increased reading comprehension levels and fluency with college-level vocabulary words. 3. Students will demonstrate increased ability to compose college-level texts.

ucational experience, and reaching or exceeding their academic goals. This commitment to student learning supports the university's mission to "… t

Assessment Methods	Results of Assessments
Exit interviews conducted with graduating seniors by an athletics/faculty committee. Run reports from our database to track how many contacts we have with each student and the quality of the appointment from an administrative standpoint. Eligibility standards are measured each term via the certification process for competition.	Reports from our database revealed that there were more than 3000 notations of meetings with students. That is more than 300 per counselor over the course of the fall term. We also received, at a minimum, 427 reponses to progress report queries (less than 25%). Academic Progress Report (APR) data shows that the students performed well.
Reviewing statistical data captured within our database as well as online surveys completed by both students and tutors.	Students with cumulative grade point averages of 2.5 or higher are not served adequately by the ASPSA tutorial program. Our academically weaker students are receiving the bulk of the services, but we have yet to determine the level of correlation between amount of services and accomplishment of educational objectives. Feedback also showed deficiencies in the size of the tutorial staff.

Assessment Methods	Results of Assessments
1. Our primary evaluation tool will be the Structured Interview for Assessing Student Use of Self-Regulated Learning Strategies, developed by Barry J. Zimmerman and Manuel Martinez Pons. At the beginning and end of the school year, we will conduct structured interviews with LEEP participants, code the responses according to Zimmerman and Pons's published guidelines, and compare the data. 2. We will administer alternate forms of the Wide Range Achievement Test IV at the beginning and end of the school year and compare the data. 3. We will develop our own rubric and use it to evaluate and compare individual students' writing at the beginning and end of the school year.	The LEEP program began in the fall 2012 semester. The comprehensive process of assessing this program will occur in the spring 2013. Preliminary indicators such as graded class assignments suggest that students will not perform as well as was expected. Feedback from the Learning Specialists and the graduate learning assistants state that they were overwhelmed in their attempts to provide adequate assistance to the most underprepared students, especially those who placed into English 100.

each a diverse community of undergraduates."

Use of Results (Actions)
Develop or purchase software allowing staff to more fully document contacts with students and solicit feedback on the students' experiences. In the meantime, we must, as a unit, commit more fully to documenting our contacts with students and noting what type of contacts they were. We must investigate better ways to solicit professor feedback on student progress. A centralized record of all academic issues must be maintained; having one person over eligibility should easily allow for that in future.
Will remove team oversight from Tutor Coordinator's responsibilities as soon as possible. Intensify tutor training both initially and throughout terms. Try to determine the correlation between the amount of services being provided and the extent to which educational objectives are accomplished. Increase the number of tutors available to students.

Use of Results (Actions)
At least three new Learning Specialists should be hired as soon as possible. This was recommended two years ago by a faculty committee that reviewed the ASPSA program's operations and staffing. The three staff members with some Learning Specialist training will operate as a unit to address the needs of underprepared students more effectively. That unit will also be given the opportunity review the academic profile of recruits and to comment on the unit's ability to meet the needs of these students, given the number of similar students already being served. The comments of this unit will be shared with the Faculty Admissions Committee on Special Talents.

The Learning Engagement and Enhancement Program

Mission: To help academically underprepared student-athletes and student-athletes with learning disabilities become goal-directed, strategic, and self-regulated learners.

Philosophy: Our philosophy is both student-centered and learning-centered. We believe all students can succeed when provided an environment in which learning is the central value. The following seven principles underscore our service to student-athletes:

1. Every student is a learner.
2. Every student has potential.
3. Every student possesses valuable knowledge.
4. Every student will make her or his own learning choices.
5. Learning is an active process.
6. Learning is social.
7. Learning can be enhanced.

Our overall goal is that every student who participates in the Learning Engagement and Enhancement Program will maintain eligibility and advance to graduation. By meeting the following objectives, we believe we can accomplish that goal.

Objective I: Students will demonstrate increased levels of self-regulated learning.

Objective II: Students will demonstrate increased reading comprehension levels and fluency with college-level vocabulary words.

Objective III: Students will demonstrate increased ability to compose college-level texts.

Subject: Eligibility Report for Student Athletes

Hi, Harold.
Attached please find the eligibility report for all student athletes. Highlighted students are Ineligible or on Academic Probation.
The attached documents were sent to Ineligible and Probation students.

- "FY or TR Ineligible" was sent to students who have only completed one semester at the University and are now Ineligible
- "NON NEW" was sent to students who are beyond their first semester and are currently Ineligible
- "New PR" was sent all students new to probation

Appeals are due at 5 p.m. on January 2nd.
Please let me know if I can provide you with any additional information.
Best, Cynthia

December 19, 2012

Dear Student:

I am concerned about your academic progress and would like to see you succeed.

Your current academic standing is **Ineligible.** If you are still missing grades, your academic standing may change. I encourage you to check ConnectCarolina on a regular basis until all of your grades have been posted.

Students who are Ineligible cannot register for full-time, on-campuses classes during the fall or spring terms.

Transitioning to the University can be a significant challenge. The University acknowledges the unique nature of this transition. For this reason, First-Year Students and Transfers who become academically ineligible after their first, fall semester at the University may **appeal for a semester of academic probation**. Probation is a one semester opportunity to take classes on campus even though you have not met minimum eligibility requirements. Students on academic probation must complete academic intervention steps during their probationary semester. I recommend that you review the steps required of all students on academic probation BEFORE you consider appealing. These steps can be found at www.studentsuccess.unc.edu.

If you decided to appeal for probation, please visit http://studentsuccess.unc.edu/academic_eligibility/appeals/ and complete the online form. As part of this form, you must submit a concise and compelling statement describing the circumstances which prevented you from meeting the minimum eligibility requirements. Your statement should contain:

1. A compelling explanation for your poor academic performance in the preceding semester.
2. An explanation of why you believe you should be granted a probationary semester.
3. A plan of action for how you will return to good standing if you are granted a semester of probation.

Appeals are due by **5 p.m. on Wednesday, January 2, 2013**. *You are welcome to submit your appeal early.* Complete appeals submitted by 5 p.m. on January 2nd will receive a decision by the evening of Friday, January 4th. We cannot guarantee a decision prior to the start of classes for appeals which are submitted late.

The University is closed for several days over the next two weeks. If you would like to meet with an academic advisor, Steele Building will be open for the duration of this week as well as on December 27th, 28th, and January 2nd. It will be closed all other days. If you would like to meet with an advisor, I recommend that you make an appointment using the online appointment scheduler.

All parts of the appeals form must be completed. Incomplete appeals will not be approved.

For more information on academic eligibility, please visit
http://studentsuccess.unc.edu/academic_eligibility/ or meet with an academic advisor.

Sincerely,

Cynthia Demetriou

December 19, 2012

Dear «FIRST_NAME»,

I am concerned about your academic progress and would like to see you succeed.

Your current academic standing is **Eligible – On Academic Probation.**

If you are still missing grades, your academic standing may change. I encourage you to check ConnectCarolina on a regular basis until all of your grades have been posted.

During the spring semester, all students on academic probation will be required to go to www.studentsuccess.unc.edu and complete the following steps:

1. Complete the Self-Assessment.
2. Complete the online Student Success Seminar.
3. Sign the Probation Contract at the end of the seminar.
4. Make an appointment with an academic advisor.

All students on probation are expected to meet with an academic advisor at least 2 times during the semester to discuss their progress towards returning to good standing.

You must make an appointment using the online appointment scheduler:
http://advising.unc.edu/

Walk-in appointments cannot be used to fulfill the probation requirements.

You must bring the completed Self-Assessment and the signed Probation Contract to the meeting with the advisor.

*****If you do not complete ALL of the probation steps above, a "stop" will be placed on your account preventing you from registering for future courses.*****

It is highly recommended that you sign up for the Bounce Back program. Bounce Back is a semester-long program that meets on a weekly-basis in a group setting to foster resiliency, scholastic and personal skills.

Bounce Back will offered during Spring 2013 on the following days and times:

Mondays, 3-4
Mondays, 4-5
Tuesdays, 11-12
Tuesdays, 1-2
Tuesdays 3:30-4:30

Thursdays, 1-2
Fridays, 1-2

To register for Bounce Back, email Caraina Garris at cgarris@ad.unc.edu with your preferred day and time.

Your probationary term of enrollment at UNC-Chapel Hill is critical in determining your academic future. It is a one semester opportunity to return to good academic standing. You must earn a cumulative GPA of at least 2.0 and meet the credit hour requirements outlined below by the end of the semester. Carefully review the requirements for good academic standing.

The University of North Carolina at Chapel Hill is committed to your success. You will receive further communication from me and my colleagues in Undergraduate Retention throughout the spring 2013 semester. *Check your email frequently for this communication. Open and read all emails.*

Sincerely,

Cynthia Demetriou

Requirements for Good Standing

A 2.000 cumulative UNC-Chapel Hill grade-point average and the following number of academic semester credit hours passed:

- 9 academic hours to enter a second semester
- 24 academic hours to enter a third semester (30 hours is recommended)
- 36 academic hours to enter a fourth semester
- 51 academic hours to enter a fifth semester (60 hours is recommended)
- 63 academic hours to enter a sixth semester
- 78 academic hours to enter a seventh semester (90 hours is recommended)
- 93 academic hours to enter an eighth semester
- Special permission of the dean to enter a ninth semester

The Influence of Selected Variables on NCAA Academic Progress Rate

James E. Johnson
Ball State University

Roger D. Wessel
Ball State University

David A. Pierce
Ball State University

The Academic Progress Rate (APR) was created in 2004 to measure the real-time academic culture of NCAA Division I college athletic teams. During its short existence, the APR has become one of the leading academic metrics from which teams are evaluated. Given the lack of empirical data on APR, the purpose of this study was to determine if selected variables were correlated with, and were significant predictors of, single year APR scores. Ten independent variables were used to evaluate the dependent variable of APR from a sample of 652 NCAA Division I first-year student-athletes. Pearson correlations revealed APR scores were significantly related to gender, race, high school GPA, standardized tests, major, sport, coaching change, playing time, and team winning percentage. Least squares linear regression analysis demonstrated that gender, race, sport, coaching change, and winning percentage significantly predicted 38.7% of the variance observed in APR scores. These results could aid in programming efforts of first-year student-athletes while contributing to the APR body of knowledge.

Introduction

National Collegiate Athletic Association (NCAA) Division I athletics offer an elite athletic environment framed within the walls of higher education. The inimitable balance between athletics and academics has caused a level of antipathy between athletic and academic interests. This antagonism is especially true for elite football and men's basketball programs where the most successful athletic teams are often criticized for lackluster academic performance (Knight Commission, 2001; NCAA, 2009, 2011a). To counterbalance declining academic standards, as well as provide structure for initial and continuing eligibility, the NCAA has enacted a variety of academic reform measures. For example, in 1983, the NCAA adopted Proposition 48, a groundbreaking measure that established a 2.0 grade-point average (GPA), 700 SAT score, and

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

11 core high school courses as minimum standards for prospective student-athletes (Baumann & Henschen, 1986). Amid wide-ranging criticism, Proposition 48 was superseded in 1992 by Proposition 16 which including a *sliding scale* relationship between standardized test scores and high school GPAs, and increased the number of core requirements from 11 to 13 (Judge & Johnson, 2011; NCAA, 2010). These initiatives gave way to the current round of academic reform that spawned the Academic Progress Rate (APR).

APR Defined

Established in April of 2004, the APR was a groundbreaking metric designed to measure academic performance while being a "sufficient incentive for athletics programs to ensure the mission of educating student-athletes is not compromised, circumvented or ignored" (NCAA, n.d.a., p. 1). The rationale for the APR came from the lack of real-time academic data for individual athletic teams (Brown, 2005). The previous academic markers used by the NCAA were initial eligibility measures (e.g., Propositions 48 & 16) or graduation rates. These measures, however, were determined before students entered college, or were calculated six years after students were admitted. While enrolled at an institution, the NCAA also monitored GPA and percentage of degree completion for individual student-athletes. These semester-by-semester measures provided sufficient information to determine eligibility for an individual student-athlete, but did little to explain the academic culture of an entire team. Therefore, the APR was designed as a semester-by-semester metric to evaluate the academic culture of an entire team, which could then be compared to other teams across the country (Brown, 2005).

The APR is calculated for all "currently enrolled student-athletes receiving institutional financial aid based in any degree on athletics ability" (NCAA, 2004, p. 1). Eligibility and retention criteria are used to calculate individual student-athlete APR points which are used in the overall team APR calculation. In one semester a student-athlete can earn two points; one point for being academically eligible, and one point for returning to school the following semester. An individual student-athlete can acquire four APR points during an academic year by being eligible and returning to pursue their education for both academic semesters (Brown, 2005). Retention and eligibility were chosen because they are the two factors that best indicate graduation, which is the goal deemed most important by the NCAA (Brown, 2005).

A retention point is earned when a student-athlete "is retained by the institution, returning to school as a full-time student the next regular academic term" (NCAA, 2004, p. 2). When a student graduates they also receive a retention point. To earn an eligibility point, a student-athlete must meet minimum standards for GPA, credit hours completed, and progress towards degree. Students must earn a 1.8 GPA after year one, a 1.9 after year two, and a 2.0 in each subsequent year. Minimum credit hour requirements include 6 hours completed per semester, 18 hours between two semesters, and 24 hours for an entire academic year. Progress towards degree requirements mandate after the second year of athletic eligibility students must have earned 40% of their degree, 60% after year three, 80% after year four, and 100% after year five (Hamilton, 2005). While many institutions adhere to the NCAA minimum requirements, individual conferences and institutions may require minimums above these standards. Stringent policies that exceed the NCAA minimums could prevent an eligibility point that would have otherwise been earned by another institution who adhered to the minimum standards.

The APR is calculated by dividing the team's total points earned by the total team points possible. This number is multiplied by 1,000 to make the score easily understood (a perfect

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

score is 1,000). Penalties accrue when scores dip below 925. The Committee on Academic Performance (CAP) designated this cutoff because it was originally thought to equal a 60% graduation rate, and it allowed for normal attrition rates. Diane Dickman, managing director of membership services for the NCAA, explained the 925 mark this way;

> We know that most teams over a four-year period are going to lose points. Things happen in people's lives – they meet the love of their lives or a parent has a health issue – and they transfer. That's why we didn't set the bar at perfection. But if you're having sustained, regular 'runoffs' to the point that half of your roster is just leaving year after year, something's wrong. (Hamilton, 2005, p. 4).

Teams that fall below the 925 mark are subject to both contemporaneous and historical penalties. Contemporaneous penalties are the most immediate penalties and occur when a team score below 925 has a student-athlete go 0/2 (ineligible and leaves school). This specific penalty means the institution cannot re-award the scholarship to another student-athlete. Therefore a 0/2 means that a scholarship is lost for a full year. This type of penalty is designed to identify immediate problems and reinforce the importance of retaining student-athletes, while moving them towards graduation (NCAA, 2004, 2010). Historical penalties are more severe and occur when a team falls below 900. These penalties began after four full years of data were collected in 2008. Crenshaw and Leger (2007) noted these penalties were designed to punish the chronic underperformers through loss of scholarships, postseason bans, and loss of NCAA membership.

APR Outcomes

Following the first year of data collection, 183 of the 326 (56%) schools had at least one program deemed substandard by the NCAA (Wieberg, 2005). Altogether 411 of the 5,720 Division I programs were flagged. Football (923), men's basketball (923) and baseball (922) were the only sports to have a national average under the 925 cutoff. Women's field hockey, lacrosse, and rowing earned the highest average scores (981 for each). A total of 1,737 teams had perfect APRs, none of which were in Division I-A football.

The next five years of data collection (2004-05 and 2008-09) had similar results as the first year. Several women's sports continued to have high marks while the same three men's sports (baseball, basketball, and football) registered the lowest average APR scores. The second year of data collection revealed that 111 out of 6,100 teams were penalized, while the third year showed 112 teams penalized. These numbers indicated less than 2% of all NCAA Division I-A teams were subject to contemporaneous penalties (NCAA, 2006). The most anticipated data set came from the fourth year. This data triggered the use of the four-year rolling average, which was used to enact more serious punishments to offenders. Single year APR scores were still used to determine contemporaneous penalties, but any loss of post-season play was to be determined by the historical penalty structure (Stewart, 2007). Similar to previous years, the four year average saw approximately 3% of all Division I-A teams fall below the 925 mark. Only 218 teams out of approximately 6,100 were penalized. Of those, 174 lost scholarships for the 2008-2009 academic year. Former NCAA president, Miles Brand, saw those numbers as encouraging. He explained the relatively positive outcome as the result of the gradual introduction of the APR over the previous four years, as well as institutions' commitment to

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

embrace the philosophy of the APR, and make behavioral changes within their athletic departments (Sander, 2008).

Academic reports from the 2009-10 and 2010-11 academic years showed multi-year Division I APRs for all sports as 967 and 970 respectively. In the high-profile sports, football's average four-year APR was 944 and 946, while men's basketball was 940 and 945. In 2009-10, 177 teams at 107 schools received penalties, while 103 teams at 67 schools were sanctioned in 2010-11. There were 1,143 fewer student-athletes in 2010-11 year who were "0-for-2," compared to 2004-05, the first year of APR penalties (NCAA, 2011a).

Although there have been continued improvements in Division I APR scores since its inception, the APR is not without criticism and subsequent revision. Two key revisions were passed by the NCAA in 2011. First, the four-year postseason benchmark was increased from 900 to 930 to compensate for lower-than-estimated Graduate Success Rates (GSR) for comparable APR scores (Hosick, 2011; NCAA, 2011b). Second, a new penalty structure combines contemporaneous and historical penalties into a three-level penalty structure based solely on the four-year rolling average. Level one penalties limit practice time, level two penalties limit competition dates, and the third level of penalties could include coaching suspensions and scholarship reductions.

APR Research

The influence the APR has had on NCAA Division I athletics has been extensive. It would be rare to find an administrator or coach at the Division I level who does not routinely evaluate APR scores, especially if they have been close to the 900 and 925 penalty benchmarks. Similarly, athletic advising and support offices are keenly aware of the APR because they must program to improve scores while simultaneously educating coaches and athletic administrators on the importance of such a metric (Meyer, 2005). It is clear the APR has taken its own place in the lexicon of college athletics where the terms *eligibility* and *graduation rates* have perched for decades (Smith, 2011).

Despite its far-reaching and practical influence, there have been no empirical studies, and relatively little reporting, on APR outside of the annual press releases provided by the NCAA (NCAA, 2011a). This is surprising when one considers that every Division I student-athlete receiving athletic aid contributes to their team APR. Moreover, the lack of research is unanticipated in view of the potentially serious consequences tied to low APR scores, and that APR scores are made public via the APR team and coach databases maintained by the NCAA (NCAA, n.d.b, NCAA, n.d.c). The lack of empirical investigation is likely the result of two factors. First, APR has only been in existence for seven years, and the historical penalties have only been calculated for three years. Second, the research and publication process sometimes takes several years to complete.

Although APR itself has not been empirically investigated, there is plethora of research examining academic variables relative to student-athletes, especially for two of the contributing factors to APR; eligibility and retention (Astin & Osguera, 2004; Babington, 1997; Durand, 1999; Johnson, Wessel, & Pierce, 2010, in press; Kane, Leo, & Holleran, 2008; Tinto, 1993). GPA is only part of the eligibility criteria used to calculate APR, but has been one of the most scrutinized academic variables related to collegiate student-athletes. A comprehensive review of student-athlete GPA is beyond the scope of this paper, but it is important to note that GPA is regularly used to determine eligibility, financial aid, recruiting, transfer decisions, playing time

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

decisions, and APR scores (Johnson et al., 2010). Retention, a second critical component of the APR, is equally as important as GPA. The magnitude of retention is clear when one considers that approximately 40% of college students will never earn a degree (Astin & Oseguera, 2004), and 75% of those students will likely leave within the first two years of their college careers (Tinto, 1993).

The most contemporary studies to evaluate GPA and retention of student-athletes were conducted by Johnson et al. (2010) and Johnson et al. (in press). Using a combination of demographic variables (i.e., gender, race, distance from home), academic variables (i.e., standardized test scores, high school GPA, high school rank, major) and athletic variables (i.e., sport, coaching change, playing time, winning percentage), the authors investigated 674 Division I student-athletes in 19 sports to determine which variables best predicted GPA and retention. For GPA, gender, race, standardized tests, high school GPA, high school rank, and high school size were significant predictors. These results demonstrated that traditional demographic and academic variables were the most powerful variables to consider when predicting GPA. The results also demonstrated that athletic variables (i.e., sport type, coaching change, playing time, and winning percentage) had virtually no impact on GPA. Conversely, race, distance from home, sport, and playing time were significant predictors for retention. These results suggested the variables most influential to predict retention were demographic and athletic in nature. Unlike GPA, two of the four athletic variables under investigation contributed to predicting retention (Johnson et al., in press).

The Johnson et al. (2010, in press) studies demonstrated markedly different predictors for GPA than for retention. Whereas demographic and academic variables significantly contributed to predicting GPA (i.e., gender, race, standardized tests, high school GPA, high school rank, high school size), demographic and athletic variables largely aided in predicting retention (i.e., race, distance from home, sport type, playing time). If both GPA and retention would have been predicted by the same variables, it would be logical to conclude those variables would also predict APR. This, however, was not the case. Given these results, the next logical question to ask is which variables predict APR? Therefore, the current study was designed to utilize the variables investigated by Johnson et al. (2010, in press) to determine: 1) the individual relationship between each of the selected variables and APR; 2) if any of the selected variables were significant predictors of APR.

Method

A sample of 652 NCAA Division I student-athletes in 19 varsity sports were sampled during a five-year span (2005-06 to 2009-10) to determine which selected variables aided in the prediction of single-year APR scores. The sample was taken from a large Midwestern university where the student-athletes were investigated during their first year of college. Only first-time first-year student-athletes were investigated. Student-athletes that transferred into the university were not included in the sample. Student-athletes that transferred out of the university during or after their first year, however, were included in the retention calculations. Additionally, no student-athletes turned professional after the first year of college. A total of 10 variables were selected as potential predictors of APR scores (i.e., gender, race, distance from home, high school GPA, standardized test scores, major, sport type, coaching change, playing time, and team winning percentage). The academic variables of high school rank and size (Johnson et al., 2010, in press) were not utilized in the current study due to large amount of missing data and a reliance

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

on high school GPA and standardized test scores as the most appropriate and powerful academic variables under consideration. Each variable investigated was hypothesized to be significantly correlated with, and a significant predictor of, APR.

The comprehensive list of first-year student-athletes was obtained from the Athlete Advising Office, which serves as the primary liaison between the academic community and the athletic department. Each team list was provided to Athletic Advising by head coaches during the week before the semester began as part of pre-semester academic meetings designed to identify a current roster and determine academic services for the upcoming fall semester. Upon completion of the participant roster for each year under investigation, archival data was mined using multiple sources. The selected variables of gender, race, hometown (to determine distance from home), high school GPA, standardized test scores, and choice of major were extracted from the university's central database. The athletic variables (i.e., sport, coaching change, playing time, and winning percentage) were obtained using a combination of athletic media guides and information stored on the athletics website.

Operational Definitions

Operational Definitions for each of the 10 selected variables were paramount during the data collection process. To accurately collect and code data, the following operational definitions were adopted from Johnson et al. (2010, in press). A brief explanation of each variable is included where appropriate.

1) *Gender* = male or female.
2) *Race* = Caucasian or minority. Race was divided into two groups due to the small amount (n = 33) of minority student-athletes that were not African American and the large amount of Caucasians in the sample (n = 498). Of the 33 non-African American minority student-athletes, most were considered bi-racial (n = 22), while seven were Hispanic/Latino, and four were Asian American.
3) *Distance From Home* = short (less than 100 miles from the university), medium (101-250 miles from the university), or long (250+ miles from the university). The longer the distance, the more difficult visits to home would prove to be.
4) *High School GPA* = The grade point average earned on a 4.0 scale. High school GPA was calculated from core high school classes.
5) *Standardized Test Scores* = SAT or ACT scores. SAT scores were converted to ACT score format using a concordance table provided by American College Testing (2009). If a student-athlete had both SAT and ACT scores, ACT scores were used.
6) *Major* = declared a major or was undecided. This designation was self-reported by student-athletes upon their entrance into the university.
7) *Sport* = revenue or nonrevenue sports. Revenue sports were designated as football, and men's and women's basketball because they were the three highest revenue-producing sports at the university. The other 16 varsity sports were designated as nonrevenue sports.
8) *Coaching Change* = no coaching change, positive coaching change, or negative coaching change. Coaching changes were recorded for a change in head coach any time during the academic year. A positive coaching change was recorded if a head coach moved to a

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

different program or retired. A negative coaching change occurred if a coach was fired or their contract was not renewed.

9) *Playing Time* = low (played in less than one third of total contests), medium (played in one third to two thirds of total contests), high (played in more than two thirds of total contests). Although each sport has a different type of contest (e.g., games, rounds, meets, or matches), the percentage of total number of contests were used to determine playing time. The exception to this definition occurred in men's and women's basketball where the percentage of total minutes was used rather than the percentage of contests.
10) *Winning Percentage* = number of wins divided by the total number of contests during a sport season. In golf and track where multiple teams compete in competition, winning percentage was calculated as the mean percentile ranking of all competitions.

Because individual years were not a variable of consequence, the data collected across five years were collapsed into one dataset. This permitted confidentiality of individual student-athletes because no student-athlete could be identified by the year they entered school. Individual names were deleted during the collapse of the data to further ensure confidentiality. Data were analyzed using SPSS Predictive Analytics Software version 19. For descriptive purpose, analysis included frequency counts, measures of central tendency, standard deviation, and percentages. Following descriptive analysis, the selected variables were subjected to Pearson Correlation analysis to determine the potential relationships between variables. Finally, the selected predictor variables underwent least squares logistic regression analysis against the criterion variable of APR to determine which selected variables aided in predicting APR scores.

Results

For the criterion variable of APR, there were a total of 652 scores (M = 963.04, SD = 35.93). A total of 205 revenue student-athletes produced a mean APR score of 934, while a total of 447 nonrevenue student-athletes produced a mean APR score of 974. The descriptive information for the predictor variables is displayed in Table 1. Descriptors include total number of participants (N), the percentage of each variable related to the overall sample (%), the mean (M), and the standard deviation (SD). The descriptive results reveal relatively even distributions between the categories of gender and distance from home, but demonstrate uneven distributions for the remaining variables. For example, race includes a large Caucasian sample (76.4%) when compared to the minority sample (23.6%), while sport includes a majority of student-athletes from non-revenue sports (68.6%) compared to revenue sports (31.4%).

Medium Playing Time	82	12.6		
High Playing Time	218	33.4		
Team Winning Percentage	652		46	.5

Note. Team Winning Percentage is presented as a % indicating all student-athletes won 48% of their total contests.

Table 2 presents the Pearson Correlation Coefficients for the selected variables. All variables except distance from home were correlated with APR scores. Eight of the nine variables were significant at the .001 alpha level. The three most powerful relationships with APR scores were sport (r = -.53), gender (r = .47), and race (r = .32). In fact, the correlation

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

coefficient between APR scores and sport was the same strength as the relationship between high school GPA and standardized test scores ($r = .53$). This r value proved to be the strongest relationship among all selected variables.

After the examination of Pearson correlations, a least squares linear regression analysis was conducted to evaluate how well the selected variables predicted APR scores. The predictors were 10 variables hypothesized to influence APR scores, while the criterion variable was APR scores. The linear combination of selected variables was significantly related to APR scores, $F(10, 641) = 40.47$, $p < .01$. The sample multiple correlation coefficient was .62, indicating that approximately 38.7% of the variance of APR scores can be accounted for by the linear combination of the selected variables.

Table 3 outlines the results of the least squares linear regression for the selected variables. Despite nine of the ten variables being significantly correlated with APR score, only five variables significantly contributed to predicting APR scores. Those variables were gender (B = .29), race (B = -.11), sport (B = .24), coaching change (B = -.19), and winning percentage (B = .14). None of the three academic variables (i.e., high school GPA, standardized test scores, and major) contributed to the prediction of APR scores. However, three of the four athletic variables examined (i.e., sport, coaching change, and winning percentage) accounted for a majority (57%) of the total 38.7% observed variance in APR scores.

Table 3 - *Summary of Least Squares Regression for Selected Variables Predicting APR*

Discussion

The first variable under investigation, gender, was significantly correlated with (r = .47, p < .01), and significantly aided in predicting APR (B = 21.14, p < .01). The correlation coefficient of .47 demonstrates a moderately strong relationship between gender and APR. Likewise, the B value from the least squares regression analysis indicates that if all other variables were held constant, female student-athletes would have an APR score 21.14 points higher than males. These significant relationships are consistent with the first seven years of

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

APR data collection which demonstrated that males have consistently lower APR scores than females (NCAA, 2006, 2011a; Stewart, 2007). In fact, the APR scores for football, men's basketball, and men's baseball have demonstrated the three lowest team scores since the beginning of APR data collection (NCAA, 2006, 2011a). These results are also consistent with the overwhelming majority of literature indicating female student-athletes outperform males in nearly all academic areas. Whether it is GPA, high school measures, standardized test scores, graduation rates, or academic motivation, females tend to have superior results (Babington, 1997; Durand, 1999; Hosick, 2009; Johnson et al., 2010; Kane et al., 2008; Mayo, 1982; Melendez, 2006).

The managerial implications for gender advocate for an increased monitoring and intervention strategy for male athletes. Because males consistently demonstrate lower APR scores than females, it can be assumed that males are in an academic culture that, on average, does not exhibit the level of academic commitment shown by females. Therefore, it is reasonable for personnel in advising, administration, and coaching to provide programming efforts designed to improve APR scores. For example, more academic intercession, increased tutor availability, and an amplified effort to retain male student-athletes could alleviate the disparity between male and female APR scores. Although many colleges and universities already engage in such behavior for their most *at-risk* student-athletes, directly targeting males is a difficult undertaking due to gender equity guidelines (Smith, 2011).

The second selected variable under investigation was race. For the purposes of this study race was divided into two categories; Caucasian and minority student-athletes. Similar to gender, race was significantly correlated with APR ($r = -.32$, $p < .01$). Also similar to gender, the least squares regression analysis revealed race was a significant predictor of APR ($B = -9.53$, $p < .01$). A B value of -9.53 denotes that Caucasian student-athletes demonstrated an APR score 9.53 points higher (out of 1,000) than a minority student-athlete if all other variables were constant. Existing literature indicates these results are consistent with most studies involving race. Specifically, Caucasian student-athletes tend to display higher GPAs, standardized test scores, high school measures, retention behaviors, and academic motivation than their minority counterparts (Babington, 1997; Institute for Diversity and Ethics in Sport, 2009; Johnson et al., 2010, in press; Kane et al., 2008; Killeya, 2001; Sellers, 1992; Shapiro, 1984; Siegel, 1994).

Poor academic performance for minority student-athletes has been linked to a variety of causes including a desire for upward mobility while minimizing academic pursuits, fewer opportunities for economic success, an over-developed athletic identity, and contemporary racism (Ashe, 1977; Kihl, Richardson, & Campisi, 2008; Melendez, 2006; Siegel, 1994). Determining the likely cause is a difficult endeavor that is beyond the bounds of the current study. The importance of the current findings, however, lies in the practical application that can be garnered from the results. In much the same fashion as males, minority student-athlete APR scores would likely benefit from increased academic programming efforts focused on enhanced tutoring, academic skill building, and enhanced advising initiatives. It would also behoove administrators, coaches, and advisors to educate themselves on the distinctive challenges faced by minority student-athletes (Siegel, 1994). Such a gesture would be of particular relevance in the sports of men's basketball and football where 71.2% and 56% of the student-athletes are designated as minorities, respectively (Brown, 2011).

The third variable investigated in the current study was distance from home. Of all the variables investigated, distance from home was the only variable that was neither correlated with ($r = -.05$), or significantly aided in predicting APR ($B = -.83$, $p = .55$). In other words, the

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

distance student-athletes attended college from their home had the least amount of interaction with APR scores. This finding is somewhat surprising because distance from home was found to be a relatively powerful predictor of retention, which is half of the calculation for APR scores (Johnson et al., in press). This finding is also curious considering distance from home is a consistent reason for college choice (Briggs, 2006; Higher Education Research Institute, 2008; Martin, 1996; Rajapaksa & Dundes, 2003), and has been linked to homesickness (Fisher, 1989).

Although distance from home was found to be a significant predictor of retention (Johnson et al., in press), it was not found to be a significant predictor of GPA (Johnson et al., 2010). This dichotomy gives credence to the argument that APR is a unique metric that is not overly influenced by the retention variable, but resembled GPA, at least in terms of the distance from home variable. From a practical standpoint, the current findings suggest that coaches and administrators should not focus their efforts on location of student-athletes' homes during the recruiting process in an effort to improve APR scores. However, the distance from home variable should not be entirely ignored because it is a significant predictor of retention into the second year of college, which does factor into the APR calculation. Although distance from home may not be a significant predictor of APR, improving retention could only help APR scores while creating a more stable culture on individual athletic teams (Johnson et al., in press).

High school GPA was the fourth variable under investigation. Results indicated a significant relationship with APR ($r = .28, p < .01$) whereby an increase in high school GPA is related to an increase in APR score. However, the relationship was not strong enough to aid in the overall prediction of APR scores ($B = .16, p = .95$). The correlation found between APR and high school GPA supports much of the previous literature linking high school GPA to student-athlete college GPA (Baumann & Henschen, 1986; Johnson et al., 2010; Lang, Dunham, & Alpert, 1988; Nettles, 1984). In fact, Johnson et al. (2010) found high school GPA to have a strong relationship with college GPA ($r = .64, p < .01$), in addition to being the most powerful predictor of college GPA ($B = .41, p < .01$). These results make intuitive sense when one considers that high school GPA is likely achieved with the same (or similar) skills as college GPA, and that college GPA is one factor used in the overall APR calculation. Although the correlation between high school GPA and APR is not as strong as the relationship between high school GPA and college GPA, the relationship is significant.

The fact that high school GPA is not an APR predictor may appear surprising at first, especially considering the correlational evidence discussed above. However, when one remembers that APR is partially calculated using retention, this result is understandable. High school GPA has not been found to be a significant predictor of retention for student-athletes (Johnson et al., in press), and thus was not found to be a predictor of APR. This is further evidence that the APR is a unique metric that sometimes resembles GPA, while at other times resembles retention. Pragmatically, high school GPA has been used for decades to make decisions about admissions, recruiting, and the probability of college success. Results from this study, as well as Johnson et al. (2010), suggest high school GPA can be used for those purposes. Focusing on high school GPA for those purposes certainly could not hurt APR scores. However, if the goal is solely to predict APR scores, high school GPA is not a variable of choice.

The fifth variable investigated in this study was standardized tests. For operational purposes, standardized tests were defined as scores on the SAT or ACT. Similar to high school GPA, standardized tests have been used for decades to effectively predict college academic performance, especially when used in conjunction with high school GPA (Ayers v. Fordice, 1995; Bridgeman & Wendler, 1989; Burton & Ramist, 2001; Johnson et al., 2010; Sacks, 1997).

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

Based on the previous literature, as well as conventional wisdom that standardized tests are one of the primary tools of choice for admissions departments, it was hypothesized that standardized tests would predict APR.

Results for standardized tests, like those for high school GPA, revealed a significant correlation with APR ($r = .24, p < .01$), but an insignificant ability to predict APR ($B = .6, p = .1$). The significant relationship between standardized tests and APR indicate that higher standardized test scores are related to higher APR scores. This result is logical based on the assumption that such tests offer an indication of academic potential, which ultimately would influence the academic eligibility of student-athletes. However, like high school GPA, standardized test scores were not a significant predictor of APR. This result is most likely due to the retention variable used to calculate the APR. Johnson et al. (in press) confirmed that standardized test scores were not a significant predictor of retention. Furthermore, the lack of prediction capabilities for standardized test scores might also be attributed to flaws in the tests themselves. There is a body of literature suggesting such tests might be poorly designed or biased to particular groups (Babington, 1997; Baumann & Henschen, 1986; Hoffman, 1961; Worthen & Spandel, 1991; Young & Kobrin, 2001).

From a managerial perspective, the use of standardized tests, especially in conjunction with high school GPA, has been used for decades with mostly reliable outcomes (Ayers v. Fordice, 1995; Bridgeman & Wendler, 1989; Burton & Ramist, 2001; Sacks, 1997). Such use is likely to continue given the results from the current study, as well as the results from Johnson et al. (2010, in press). These studies revealed standardized tests are correlated to GPA, retention, and APR scores, while also a significant predictor of GPA. However, these studies also revealed that standardized tests are not a significant predictor of retention or APR. Therefore, using standardized test scores for recruiting, programming, and admission decisions appears to be a reasonable practice. Nevertheless, standardized test scores do not predict APR.

Major was the sixth variable investigated in the current study. Undecided students ($n = 119$) were those that did not declare a major upon entering college, while students that chose a major ($n = 533$) were considered a declared major. Similar to the previous two academic variables (i.e., high school GPA and standardized test scores), major was correlated with APR ($r = .09, p < .05$), but was not a significant predictor ($B = -1.76, p = .55$).

The logic behind investigating major as a variable of potential influence on APR is predicated by research supporting and negating its potential influence. For example, the fact that major is correlated with APR scores (i.e., higher APR scores = declared major) is supported by a variety of sources linking major with a heightened level of commitment and focus on academic pursuits (Gordon and Steele, 2003; Roese and Summerville, 2005; St. John, 2000). Theoretically, these sources suggest students who are willing to commit to a specific field of study early in their college career are the ones that will tend to produce higher academic achievement in the form of various metrics such as GPA (Johnson et al., 2010). Moreover, the impact of major choice has been found to be particularly powerful in cases where academic clustering might occur. Academic clustering is defined as more than 25% of students on a given team enrolled in one major (Fountain & Finley, 2011; Sanders & Hildenbrand, 2010; Schneider, Ross, & Fisher, 2010). If first-year student athletes declare a major because it is less rigorous than another area of study, the cluster effect could influence APR. The current study did not investigate clustering or specific major choice, but given the attention of this phenomena in recent years (Fountain & Finley, 2011) it is reasonable to acknowledge that future research linking major choice and APR should consider potential clustering effects.

Conversely, major was not a significant predictor of APR. This finding supports a body of work with conclusions opposite to the literature referenced above, and suggests that being undecided is not influential to academic achievement or college graduation (Knight, 1994; Kroc, Howard, Hull, & Woodard, 1997; Schein & Laff, 1997). In fact, Schein and Laff (1997) go as far as calling the concept of a major "bureaucratic and administrative" with structures that ultimately may reduce creative options available to students with unique academic interests. Additionally, the lack of APR prediction is not surprising when one considers that major did not predict retention (Johnson et al., in press). Furthermore, From a practical standpoint, major should be treated similarly to high school GPA and standardized tests with regard to APR. It is certainly advisable to monitor which student-athletes have declared a major, and use such information in decisions about academic advising or programming. Such a practice cannot hurt APR scores. Predicting APR scores, however, is not advanced by knowing if a student has declared a major.

The seventh variable investigated was sport type (revenue or nonrevenue). Revenue sports were football, men's basketball, and women's basketball. Nonrevenue sports were the remaining 16 varsity sports. Results indicated sport type had the strongest relationship with APR of any variable investigated ($r = -.53, p < .01$). Sport was also a significant predictor of APR scores ($B = 18.66, p < .01$). In fact, if all other variables were held constant, revenue sports would achieve an APR score 18.66 points lower (out of 1,000) than nonrevenue sports.

These results were hypothesized given the APR annual reports produced by the NCAA. In those reports, football and men's basketball are routinely cited as having the lowest APR scores moving from 923 in the first year of data collection for both sports, to 946 for football and 945 for basketball in the most recent report (NCAA, 2011a). These annual APR results are consistent with the findings from the current study which revealed a mean APR score of 934 for revenue sports ($n = 205$) and 974 for nonrevenue sports ($n = 447$). Furthermore, these findings are consistent with literature indicating revenue sports routinely demonstrate lower GPAs, graduation rates, and retention levels than nonrevenue sports (Johnson et al., 2010, in press; Kane et al., 2008; Kihl et al., 2008; Lang et al., 1988; Le Crom, Warren, Clark, Marolla, & Gerber, 2009; Mayo, 1982; NCAA Research Staff, 2009; Shapiro, 1984).

Stakeholders within collegiate sport would be well-served to focus academic support initiatives towards revenue sports. This recommendation will not be a surprise for many coaches and administrators, especially considering the sports of football and men's basketball are routinely considered the most academically at-risk teams on many college campuses, and often associated with the commercialization and professionalization frequently synonymous with big-time college athletes (Johnson et al., 2010; Meyer, 2005; Sperber, 2001). More importantly, sport could be used in combination with other variables (i.e., gender, race, etc.) to develop an academic risk portfolio based on variables identified in this study. Such a profile could serve to drive allocation of available resources.

Coaching change was the eighth variable under investigation. For the purposes of this study, coaching change was defined as positive, negative, or no change occurring during the academic year. Positive change included a promotion to a new institution following success at the current institution. Negative change was defined as being fired or demoted. Defining coaching change in this way was a deviation from the two previous studies investigating a head coaching change conducted by Johnson et al. (2010, in press) whereby a coaching change was defined as a dichotomous variable of change versus no change. The adjustment in operational definition for coaching change occurred as a result of recommendations by Johnson et al. (2010,

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

in press) to be more specific due to the potential impact of context on such a coaching change. This recommendation also occurred after coaching change was not found to be a significant predictor of GPA or retention, which is surprising given the large body of literature documenting the impact of a coach on the well-being of student-athletes (Amorose, 2003; Gagne, Ryan, & Bargmann, 2003; Parsh, 2007).

The current study found that coaching change was both significantly correlated with (r = -.21, $p < .01$), and a significant predictor of (B = -12.3, $p < .01$) APR score. A B value of -12.3 indicates that a negative change in head coach would produce an APR score 12.3 points lower than a positive change, and 24.6 points lower than no change at all, assuming all other variables were constant. This result is somewhat surprising considering Johnson et al. (2010, in press) found coaching change was not a significant predictor of GPA or retention. The likely explanation is the change in operational definition which takes into account the context of the coaching change. This result is logical when one considers that a situation likely to cause a negative coaching change may involve an environment where the coach may be under stress to win games, or where the coach may not relate well to their team. This idea is further reinforced by the significant correlation between coaching change and winning percentage (r = .18, $p <$ .01). Similarly, in a situation where no coaching change occurs, the team environment is likely to be more stable, thus ensuring a consistent pattern of academic expectations from the coach. These results, although significant, should be considered preliminary due to the small sample size of positive (n = 47) and negative (n = 42) coaching changes. Examining more coaching changes across a variety of institutions may yield different outcomes.

The ninth variable under investigation was playing time. Playing time was significantly correlated to APR (r = .16, $p < .01$). This correlation indicated that student-athletes who played in more than two-thirds of their team's contests had higher APR scores than students who played in less than two-thirds of contests. Such a relationship is logical considering the powerful impact playing time has on student-athlete identity, motivation, retention, and enjoyment (Johnson, in press; Petlichkoff, 1993a, 1993b; Weiss, McAuley, Ebbeck, & Wiese, 1990). Furthermore, this relationship was hypothesized given the discrepancy between high school and college playing time (Moe, 1994, Murphy, 1991). Most NCAA Division I athletes were the best athletes on their high school teams. They are not accustomed to sitting on the bench after successful high school careers (Murphy, 1991). This change in athletic utility may have a variety of impacts including a change on academic motivation that ultimately may influence APR, and has already been found to be related to GPA and retention (Johnson et al., 2010, in press).

Despite the significant relationship with APR, playing time was the only athletic variable that did not aid in predicting APR (B = 1.76, p = .18). It is plausible that the other variables found to be significant predictors of APR overshadowed playing time in the regression equation. This is a likely explanation for any variable found to be correlated, but not a significant predictor of APR. Another possible explanation would be that playing time has been found to be a significant predictor of retention (Johnson et al., in press), but not a significant predictor of GPA (Johnson et al., 2010). In other words, playing time predicts only one of the variables used to calculate APR scores, and thus is not powerful enough to predict APR scores themselves. Therefore, if playing time predicts retention, but retention is only half of the APR calculation, it is easy to conclude how it could be correlated, but not a significant predictor. Practically, this is valuable information for coaches and administrators because they can improve the retention component of APR calculations with a better understanding about how playing time might influence student-athletes. This suggestion is not meant to propose all players receive equal

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

amounts of playing time in order to improve APR scores. That is unrealistic. It is, however, realistic to educate coaches on the link between playing time and APR so they can decide for themselves how to better recruit and define individual player roles.

The final variable under investigation was team winning percentage. Results indicated that team winning percentage had a significant relationship with APR ($r = .18$, $p < .01$), and significantly aided in predicting APR ($B = 10.08$, $p < .01$). Additionally, for every .001 improvement in winning percentage, APR scores increased by one point, assuming all other variables were held constant. Results for winning percentage appeared to be the most curious of any variable investigated in this study considering Johnson et al. (2010, in press) did not find any significant relationships between winning percentage, GPA, or retention. The current results, however, are not as curious when one recognizes that APR is a team score, whereas GPA and retention are individual variables. Thus, the winning percentage of a team is more likely to coincide with APR scores because the same score (or percentage) is attached to all members of the team, unlike GPA that is unique to each individual. Additionally these results are supported by literature that suggested teams with the highest winning percentage, particularly in revenue sports, have historically been found to produce relatively low graduation rates and APR scores (Hosick, 2009; Institute for Diversity and Ethics in Sport, 2008; Shapiro, 1984). Furthermore, these results make sense when one considers that team athletic success has been found to influence the number and quality of freshman admission applications, financial contributions from donors, and attendance (McCormick & Tinsley, 1987; Petersen, Johnson, & Yurko, 2010; Stinson & Howard, 2008). In short, winning matters. In this case, winning appears to matter enough to impact APR scores.

The logic behind why winning is important is basic. Winning teams generate excitement. It is fun to win. The atmosphere on a winning team, and in winning programs, is likely to be more positive and supportive for all members of the team. Such an environment is likely to transcend beyond the courts or fields into other areas of life, even academic pursuits. Pragmatically, it is worth noting for stakeholders of college athletics that student-athletes on unsuccessful teams may be more susceptible to producing lower APR scores. In these cases, extra academic programming may be given to teams that are not winning. Or, as an alternate solution, APR scores could improve if the importance of winning could somehow be deemphasized. Given the current culture of Division I athletics, where elite competition and high profile sports have created a financial arms race for salaries and facilities (Knight Commission, 2001; Smith, 2011; Sperber, 2001), deemphasizing winning is unlikely.

Conclusion

Given the lack of APR research, especially considering the impact APR has had on the culture of NCAA Division I athletics, empirical evaluation of APR was overdue. The current study begins such an evaluation by determining if selected variables were related to, and aided in predicting, APR scores for first-year student-athletes. Variables were selected based on research from Johnson et al., (2010, in press) who found markedly different sets of demographic, academic, and athletic variables were responsible for predicting GPA and retention, two of the primary components used to calculate APR.

Results revealed APR was significantly correlated to all selected variables under investigation except distance from home. This fact is important because it demonstrates APR is related to a broad set of variables which are demographic (i.e., gender and race), academic (i.e.,

Downloaded from http://csri-jiia.org ©2012 College Sport Research Institute. All rights reserved. Not for commercial use or unauthorized distribution.

high school GPA, standardized test scores, and major), and athletic (i.e., sport type, coaching change, playing time, and winning percentage) in nature. Furthermore, the variables that were significant predictors of APR were largely different from the variables that predicted GPA and retention (Johnson et al., 2010, in press). For APR, significant predictors included gender, race, sport type, coaching change, and winning percentage. These variables accounted for 38.7% of the variance found in APR scores. The only variable found to predict APR, as well as GPA and retention, was race. Besides race, the only predictor variable shared by APR and GPA was gender. Similarly, the only predictor variable shared by APR and retention (besides race) was sport type (Johnson et al., 2010, in press). These results support the notion that APR does not overly resemble GPA or retention, and is a unique metric in itself.

The fact that three of the five significant predictors of APR were athletic variables should be noted. This important finding demonstrates the influence that Division I athletic participation can have on academic pursuits. These findings also supports a critical discovery by Johnson et al. (in press), who found that playing time was the most powerful predictor of retention for first-year Division I student-athletes. Given the high athletic identities found in elite athletes (Melendez, 2006), these results are not necessarily surprising. Functionally, the results of this study can aid administrators, coaches, and other college athletic stakeholders in better understanding some of the variables that impact APR. By including athletic variables into a comprehensive student portfolio, that often includes only demographic and academic variables, stakeholders can make more informed decisions about programming efforts. If nothing else, these results confirm athletic variables are powerfully linked to academic outcomes.

Sandy Nickel, Ph.D, Professor of Education

ABSTRACT

Have you ever watched a televised college football or basketball game where they show the starting lineup's academic majors? If so, you may have noticed that many of the student athletes have the same academic majors, be it communications, criminal justice, sociology, etc. In fact, many have taken notice and labeled this phenomenon as "academic clustering." In particular, numerous scholarly papers and popular press articles have examined clustering in terms of occurrence and frequency. However, very few have attempted to examine academic clustering through the lens of the student athlete to understand their experience. The purpose of this study was to explore how former Division I student athletes experienced academic clustering. This study brings to light the lived experiences of academic clustering through the first-hand voice of former Division I student athletes who were academically clustered.

To examine this phenomenon the researcher asked: What is the lived experience of former Division I student athletes who have been academically clustered? To answer the research question, the researcher conducted a qualitative methodology, specifically, *phenomenology*, as a means to gain an in-depth understanding of the lived experience of being academically clustered. In addition, Institutional Theory was selected as theoretical lens to interpret the findings of the study. The study sample contained 7 former Division I student athletes who participated on the football team (5 African American and two Caucasian) at a large 4-year public university on the East Coast. A Purposeful sample technique was employed.

Five conclusions emerged from the data regarding the student athletes' lived experience of being academically clustered: 1) Academic clustering is one consequence of the required athletic schedule; 2) Academic clustering is one method used to maintain athletes' eligibility; 3)

Academic clustering facilitated indifference toward academic achievement; 4) Academic clustering further isolated student athletes from the general student population and a traditional college experience and; 5) Student athletes lacked in-depth academic support to help realize their academic potential.

Recommendations are provided for academic advisors, coaches and student athletes with the goal of encouraging these different constituencies to understand areas where their behaviors could change to provide a meaningful education for student athletes.

DEDICATION

To the student athletes who march onward and upward toward the light, this thesis is respectfully dedicated.

ACKNOWLEDGMENTS

First and foremost, I would like to give thanks, honor and glory to God for providing me the mental strength and fortitude to see my doctoral degree come to pass. I know if it were not for Him this could not be possible.

I must thank numerous individuals. Thank you to my mom and dad; Huey and Song Calhoun. You gave me unconditional love, wisdom, courage and strength to seize the world. Thank you to my brother, Vernon Calhoun. You have provided me lighthearted moments to help me through this process. Thank you to the entire Calhoun family for your encouragement and love. Thank you to the Nelson family who welcomed me with open arms, support and love. And to all of my friends and mentors who are too many to name individually, thank you.

Thank you to Northeastern University and the School of Education faculty and staff. A special thanks to my advisor, Dr. David Szabla, for helping me throughout this entire process. I am forever grateful for the numerous hours you worked with me. You continually challenged me and pushed me farther than I ever imagined. Thank you to Dr. Liliana Meneses for providing continued support and phenomenological enlightenment.

I must also thank the spectrum of activists, thinkers, and figures who have helped to raise my consciousness and given me the inspiration through the pages of their books, words of their speeches, and acts of courage in the face of adversity. From Booker T to Marcus G, from Malcolm to Martin, from Huey to Angela, from Paulo to Pac and all the way to Barack, thank you.

And last but not least thank you to my wife, Tammie. You have sacrificed so much to help make this moment a reality. The past three years have been challenging but you stood by me

every step of the way offering constant support, affection and love. You never doubted me when I sometimes doubted myself, you lifted me up when I was down, and you made the darkest of days exceptionally bright. We did it, I love you!

Chapter I. Introduction

The purpose of this proposed research study was to gain a comprehensive understanding of the experience of academic clustering through the perspective of former student athletes. Academic clustering is objectively defined by Case, Greer, and Brown (1987) as when a significant percentage, typically 25% or greater, of student athletes on one team have the same major. Though a cluster is not wholly unethical, it does raise concerns as to why student athletes are clustered. Utilizing a phenomenological approach this study goes beyond what academic clustering is and explores the experience of clustered student athletes and how various elements create the environment for clustering to take place.

According to popular thought, it is believed that student athletes involved in Division I revenue-generating sports (men's basketball and football) have been stymied in several areas such as academic achievement/expectation and career aspiration outside of professional sports. For the average American sports fan or citizen, the term *student athlete* is either accepted uncritically or is perceived to perform a number of positive functions. Nonetheless, the literal representation of a priority system in which primacy is accorded to the academic process with athletics subservient to it, the term student athlete evokes descriptions of individuals who are "students first, athletes second" (Staurowsky & Sack, 2005). In spite of the rhetoric, athletic programs have come to be protected and promoted activities on college campuses across the country (Flowers, 2009).

Whether or not one supports the idea of high-profile intercollegiate athletics, it is difficult to deny that college sports matter greatly in the public life of the university. Football and basketball are a significant component of the overall identity of schools that invest heavily in

these activities (Toma, 1999). In addition, athletic competition may help structure a student's life, and coaching may improve both physical and intellectual performance. Conversely, the amplified emphasis on sports may hinder the student athletes to the point of negatively impacting their grades (Maloney & McCormick, 1993). Because of this paradox between academics and athletics, college sports has been criticized for allowing commercial interests and over-emphasis on winning to undermine academic values (Meggyesy, 2000). As a consequence the victims of such ambition are the student athletes.

Accordingly, this research study examines academic clustering from the student athlete's perspective. The literature reviewed by the researcher shows that clustering does happen and often. However, the research is based heavily on objective data describing the frequency of clustering. The gaps in the literature are the student athletes' perspectives; they are often talked about but not talked to. Specifically, the researcher investigated the practice of academic clustering through the conceptual lens of institutional theory that will aid in illuminating the rules, norms, and routines that have created and perpetuated academic clustering. Furthermore, the researcher utilized phenomenology as the methodology focusing on Heidegger's Hermeneutic Phenomenology.

Statement of Problem

Participation in intercollegiate athletics has been promoted by athletic administrators and the National Collegiate Athletic Association (NCAA) as having educative value, as sports were often defended by claims that such activities developed in its participants a sense of competition, leadership skills, work ethic, and character (Flowers, 2010). However, the escalating costs of intercollegiate athletics, generated by the athletics arms race (desire to hire a popular coach, stadium expansion, new stadiums, product sales, ticket sales, TV contracts), creates a paradox

between academics and athletics (Estler & Nelson, 2005). Many commentators (Adler &Adler, 1987; Benford, 2007; Capriccioso, 2010; Lederman, 2010; Wolverton, 2008; Thelin 2008) have noted how the increasing commercialization of college sports has made it even more difficult for universities to reconcile the gap between college sports and the fundamental mission of higher education (Sharpe & Sheilley, 2008).

Not surprisingly, coaches and athletic administrators appear to always find ways to skew the policies to produce a more favorable outcome for their benefit. For example, a stipulation within the Academic Progress Report (APR), the progress-toward -degree policy, also known as the 40-60-80 rule says that once student athletes declare their majors, they must have completed 40 percent of their degree-program requirements going into their third year, 60 percent going into their fourth year, and 80 percent going into their fifth year. The 40-60-80 rule, according to the NCAA would mean moving student athletes to graduation in five years (Meyer, 2005), whereas before with the progress toward degree policy a student athlete could take any combination of classes as long as he had the required number of credits to maintain eligibility. The unintended consequence of the APR is an enhanced propensity to cluster athletes into "athletic friendly majors."

Fountain and Finley (2009) say coaches are now more apt to recruit athletes of marginal academic ability and seek easier majors, courses, and professors to ensure a reasonable graduation rate. Accordingly, the phenomenon of clustering has not gone unnoticed. In particular, scholarly research papers (Fountain & Finely, 2009; Case, Greer & Brown 1987; Sanders & Hildenbrand, 2010) as well as numerous popular press articles (Welch, 2003; Lederman, 2010; Wolverton, 2008) have examined academic clustering as well as its impact. In particular, the Knight Commission has been an independent voice advocating for the alignment

of athletics programs with their universities' educational missions (Hesel & Perko, 2010). The Commission's initial goal was to recommend a reform agenda that emphasized academic values in an arena where commercialization of college sports often overshadowed the underlying goals of higher education. Since 1989, the Knight Commission on Intercollegiate Athletics has worked to ensure that intercollegiate athletics programs operate within the educational mission of their colleges and universities (Knight Commission, 2011).

Thus the problem that the researcher investigated was the lived experience of academic clustering, when 25% or more student athletes on one team have the same major (Case, Greer, & Brown, 1987). According to Hollencamp (2009) the NCAA's recently instituted academic rule, the APR, a semester-by-semester measurement of an athletic program's academic success based on its graduation rate may have unintentionally increased this problem. The rule, in effect, punishes institutions competitively and financially if their athletes don't continue to move toward a degree, and may increase the pressure to get athletes into majors in which they are more likely to succeed (Capriccioso, 2010).

Statement of Potential Significance

This study contributes to the scholarly community by expanding the focus of academic clustering to include the voice of the student athlete. Using a phenomenological approach fills the gap in the literature that speaks only to the frequency of clustering and/or speaks to the student athlete experience without explicitly focusing on clustering. This study will expand the body of knowledge regarding policy, practice and research implications in order to aid university administrators, athletic administrators, coaches, faculty and the student athletes who face the competing interest of balancing academics and athletics. The following will outline the potential significance in regards to research, practice, and policy.

Research

The perspective of student athletes should be considered when developing reform to ensure the student athletes' best interests are being met along with the stated goals of the institution of higher learning. Comparatively, while this study will be the first to specifically examine the experiences of student athletes who have been academically clustered, it could open the door to similar studies being conducted. As such, this study could spur interest in gaining a broader perspective of all those involved in the phenomenon of clustering. Specifically, conducting a study from a coach's perspective could provide a wealth of information. For example, research could show that coaches use clustering as a competitive advantage to make the student athletes' academic tenure as easy as possible. It could demonstrate that coaches recruit student athletes out of high school knowing that they are not ready for the rigors of college course work but have an athletic friendly curriculum, which said student athletes can manage. It could also demonstrate the immense pressure to win and financial incentive to promote athletics above academics.

Practice

Considering the potential significance of this study it can aid in reconsidering how academic practices are approached from an institutional point of view. For example, seven years ago Vanderbilt's Chancellor Gordon Gee announced that he was eliminating the position of athletic director and folding the athletic department into his office's division of student life and university affairs. Gee says that real success is an athletics program that is no longer viewed as an appendage or a side business for entertaining students and donors. Gee's vision is that if the whole university is responsible for the athletic program, everyone invests more to make sure it succeeds (Pope, 2008). Gee also had another motive in addition to improving the quality of his

program: to set an example that it's not unreasonable that other schools might benefit from taking steps to bridge the chasm between athletics and academia (Bechtel, 2003).

Though the researcher is not suggesting the abolishment of the position of athletics director or athletics departments, this study may act as a catalyst to motivate a change in practice of how academics is balanced with advising. For example, athletic administrators may consider relinquishing control of academic advising to the university academic advisors. As it stands at many institutions student athlete academic advisors are the primary academic advisors to student athletes. They act as liaisons between the academic and athletics communities and are primarily responsible for ensuring that student athletes have as much academic success as their ability can afford. Many people view academic/athletic advisors as eligibility brokers, those who keep student athletes eligible to play (Myers, 2005). If academic advising were to be housed under the auspices of university advisors then the frequency of clustering may diminish and the engagement of student athletes in sincere discourse about academic exploration, career alignment, and graduate studies may result.

Policy

Lastly, when considering potential policy impact, this study may prompt policy makers to revisit student athletes' initial academic eligibility standards. In other words, recruiters would make sure that only those student athletes being recruited and ultimately admitted into an institution are capable of performing academically based on high school GPA and standardized test scores (SAT or ACT). The concern is that the academic preparedness for admission, seriousness toward learning, and graduation rates of many student athletes threaten academic integrity (Lumpkin, 2008). In response to these concerns the NCAA over the past thirty years has instituted various academic reform measures such as Proposition 48, Proposition 42, Proposition

16, increased SAT/ACT scores, increased GPA standards and most recently the Academic Progress Report.

Today the NCAA utilizes a sliding-scale combination of grades in high school core courses and standardized test scores. For example, if a student athlete earns a 3.0 grade-point average in core courses, that individual must score at least 620 on the SAT or 52 on the ACT. As the GPA increases, the required test score decreases, and vice versa (NCAA, 2010a). This sliding scale presents itself as a conduit for the possibility of admitting students who are not fully prepared for the rigors of college academics. However, if student athletes were subject to the regular admissions process without bias to athletics, there perhaps would be greater likelihood that only qualified student athletes are admitted. This assumes that admissions does not also give preference or special admission standards for student athletes.

Purpose and Research Question

The research question is: *What is the lived experience of former Division I student athletes who have been academically clustered?* This study is concentrated on each individual subject's experience, from freshman year through senior year. The selected subjects were interviewed three separate times, following the interview method described by Seidman (1998). The first interview focused on life history and involvement with sports and academics. The second focused on describing the details of the intercollegiate athletic culture and the relationship with academics. The third allowed for subjects to reflect on the meaning of their experience.

Theoretical Framework

This research study investigated the lived experienced of former Division I student athletes who were academically clustered. As a means to better understand the phenomenon of

academic clustering within the broader context of universities and athletic departments, the theoretical lens through which this phenomenon was studied was institutional theory. Institutional Theory allowed the researcher to situate academic clustering not as an isolated incident but connected to practices and norms implicitly and perhaps explicitly set by the institution of college athletics and the intercollegiate athletic governing body, the NCAA. Institutional Theory suggests that organizations by accident and choice mirror the norms, values and ideologies of the general environment in which they are embedded (Bess and Dee, 2008).

Institutional Theory

Organizations are the preeminent institutional form in modern society. They organize and structure the daily activities of most people (Zucker, 1983). As such, colleges and universities are complex organizations operating in a diverse ever-changing environment with shifting values, varying states of economic prosperity, and obscure permutations of political power. Yet they have endured, constituting a remarkably resilient organizational form and one of the oldest in human history (Bess and Dee, 2008). For these reasons, Institutional Theory attends to the deeper and more resilient aspects of social structure. It considers the processes by which structures, including schemas, rules, norms, and routines, become established as authoritative guidelines for social behavior. It investigates how these elements are created, diffused, adopted, and adapted over space and time, and how they fall into decline and disuse (Scott, 2004). Thus, it should be noted that a major function of theory is then to provide a model or map of why the world is the way it is. It is a simplification of the world, but a simplification aimed at clarifying and explaining some aspect of how it works (Maxwell, 2005).

More precisely, a theory such as Institutional Theory is a set of well-developed concepts related through statements of relationship, which together constitute an integrated framework

that can be used to predict phenomena (Strauss and Corbin, 1998). Furthermore, it is not simply a "framework," although it can provide that, but a story about what the researcher thinks is happening and why, and one that gives the researcher new insights and broadens the researcher's understanding of that phenomenon (Maxwell, 2005). As such, the researcher agrees with Toma & Cross' (1998) account that today's intercollegiate athletics are commonly portrayed as the front door to the university: what many people on the outside see and what eventually gets them inside. Campus spectator sports, particularly the entertainment spectaculars that are football and men's basketball at many large institutions, are the aspect of the university most often visible to those outside of the academic community, both sports fans and non-sports fans (Toma & Cross, 1998).

The concepts of institution and institutionalization have been defined in diverse ways, with substantial variation among approaches. Thus, the beginning of wisdom in approaching Institutional Theory is to recognize at the outset that there is not one but several variants. Some versions are much more carefully defined and explicit about their definitions and referents, while others are less clear in conceptualization. Although there seems to be an underlying similarity in the various approaches, there is little agreement on specifics (Scott, 1987). Nonetheless, the roots of Institutional Theory run richly through the formative years of the social sciences, enlisting and incorporating the creative insights of scholars ranging from Marx and Weber, Cooley and Mead, to Veblen and Commons. Much of this work carried out at the end of the nineteenth and beginning of the twentieth centuries was submerged under the onslaught of neoclassical theory in economics, behavioralism in political science, and positivism in sociology (Scott, 2004).

Institutional Theory holds that organizations, like an onion, exist in a layered form encompassing the environmental field, the organization, formal and informal groups within the

organization, and the individual employees. The degree of conformity or fit between the layers in the onion determines the degree of organizational stability (Hanson, 2001). Organizations are thus influenced by normative pressures, sometimes arising from external sources such as the state, other times arising from within the organization itself. Under some conditions, these pressures lead the organization to be guided by legitimated elements, from standard operating procedures to professional certification and state requirements, leading to isomorphism with the institutional environment and increasing the probability of survival (Zucker, 1987).

More specifically, isomorphism is a process that causes one unit in a population to resemble other units in the population that face the same set of environmental conditions. Because of isomorphic pressures, organizations will become increasingly homogeneous within given domains and conform to expectations of the wider institutional environment (Carpenter, 2004). Subsequently, colleges and universities are embedded in institutional environments where state governments, professional associations, accreditation organizations, and other external agents generate rules, regulations, and requirements for organizational performance, leading colleges and universities to adopt practices that conform to institutionalized expectations (Bess and Dee, 2008). Thus, institutional theory posits a deterministic environment where organizations may have limited discretion in the types of strategic choices they make. The range of choice is limited by external pressures for conformity (Bess and Dee, 2008).

DiMaggio and Powell (1983) suggest that institutions engage in three forms of isomorphism, *coercive*, *mimetic*, and *normative*:

> *Coercive isomorphism* results from both formal and informal pressures exerted on organizations by other organizations upon which they are dependent and by cultural

expectations in the society within which organizations function. Such pressures may be felt as force, as persuasion, or as invitation to join in collusion.

Mimetic isomorphism occurs when one educational organization consciously models itself after another that it believes to represent a higher level of success and achievement in the public eye. The intention to mimic is constantly encouraged and reinforced by (a) educational consultants who vigorously (and profitably) spread the latest news about exciting things taking place on the other side of the fence, (b) academic conferences that function as supermarkets for new idea, and (c) the rapid movement by administrators between schools or districts near and far (Hanson, 2001).

Normative isomorphism is rooted in the processes of professionalization in which the values, codes, and standards are imposed by universities as well as professional certification and accreditation agencies. These agencies also act as gatekeepers, determining who gets into the profession and therefore further reinforcing normative expectations and order on the behavior of teachers and administrators (Hanson, 2001).

Institutional theory also emphasizes the normative elements in the environment that shape organizational practices. The institutional environment is defined as the set of expectations that emerges from influential external agents (Scott, 1995). Likewise, using the lens of institutional theory can provide a rich examination of universities and the athletic culture, which may manifest an environment where academic clustering exists. It is in this respect institutional theory can examine the norms that govern coaches, athletic directors, academic advisors, presidents, faculty, student athletes and policies that shape the student athlete experience. Accordingly, this study used three pillars of institution as defined by Richard Scott (1995):

Regulative, Normative, and Cognitive, as a conceptual lens to view the student athlete experience as illustrated in Figure 1.

Theoretical Framework Graph

Figure 1. **Cyclical Nature of Richard Scott's Three Pillars**

Note. Cyclical nature of the three pillars; Regulative, Normative, and Cognitive, which create the student athlete experience.

Regulative Pillar

The regulative pillar is distinguished by the prominence given to explicit regulative process – rule setting, monitoring, and sanctioning. In this conception, the regulative process involves the capacity to establish rules, inspect or review others' conformity to them and as necessary, manipulates sanctions – rewards or punishments – in an attempt to influence behavior (Scott, 1995). Similar to the aforementioned, the NCAA can levy sanctions against athletic programs found in violation of its rules, sanctions which range from a temporary reduction in scholarships, to suspension of a team from postseason play, all the way up to the requirement that a school eliminate a certain team and, even, measures that indirectly threaten the school's academic accreditation (Kahn, 2007). A prime example of the NCAA's regulative power is its ability to create and enforce academic legislation over autonomous universities. For instance, the APR was the NCAA's response to calls for academic integrity. It is intended to ensure eligibility for student athletes and to serve as a check and balance on athletic departments. The APR also serves to monitor whether the institutions are properly providing for student athlete academic needs. The scores are meant to provide institutions with a clear set of goals for each team and to set a higher priority on academics in collegiate athletics departments (Bouchet & Scott, 2009). However, schools that earn an APR of less than 900 (equivalent to a GSR of 50%) are punished by the NCAA.

One of the primary goals of continued evaluation is to provide a structure that honors the mission of the divisions and sets standards of interaction among university presidents, administrators, athletics departments, and athletes (Hill, Burch-Ragan, & Yates, 2001). While clustering is not necessarily negative, it becomes so if athletes are simply taking an easy major to comply with the strict rules enforcing the completion of a major within five years. Rather than

studying a subject that interests them, or one that will be most beneficial to them in the future, they are choosing–or being directed to–a major to simply maintain eligibility. In this scenario, academics are taking a backseat to athletics, violating generally held university missions and priorities (Denhart, Villwock, & Vedder, 2010).

Normative Pillar

The normative pillar is distinguished by the normative system focusing on values and norms (Scott, 1995). Values are conceptions of the preferred or the desirable together with the construction of standards to which existing structures or behavior can be compared. Norms specify how things should be done; actors conform not because it serves their individual interest, but because it is expected of them, and they are obliged to do so (Scott, 1995). Accordingly, the normative pillar can help the researcher better understand the system of college athletics that implicitly and explicitly places pressure on student athletes to choose between academics and athletics.

Most notably the ideals of the NCAA are rooted in the premise of amateurism. The NCAA's current Amateurism bylaw 2.9 of the Division I manual states:

> "Student-athletes shall be amateurs in an intercollegiate sport, and their participation should be motivated primarily by education and by the physical, mental and social benefits to be derived. Student participation in intercollegiate athletics is an avocation, and student-athletes should be protected from exploitation by professional and commercial enterprises (NCAA, 2010a)."

However, many believe these ideals are limited to all but Division I athletics. Evidence has demonstrated that highly selective colleges and NCAA Division III members have different

athletic orientations than their Division I counterparts (Schroeder, 2010). For example, the NCAA Division III presents its concept of non-scholarship sport as follows:

> Colleges and universities in NCAA Division III place highest priority on the overall quality of the educational experience and on the successful completion of all students' academic programs. They seek to establish and maintain an environment in which a student athlete's athletics activities are conducted as an integral part of the student-athlete's educational experience. They also seek to establish and maintain an environment that values cultural diversity and gender equity among their student-athletes and athletics staff (NCAA, 2010b).

Conversely, former Division I football player Dr. Greg Primus, a top receiver for Colorado State University in the late '80s and early '90s, said in his playing days clustering was a common practice. "The main goal is keeping these athletes eligible," Primus stated. "If athletes do have a particular interest and they find that the course load is too challenging, they fail classes and they're struggling to be eligible, it's going to be a natural reaction for them to pull out of that and say, 'You know, what's most important right now is that I at least get a 2.0. Let me shift my curriculum to Basket-weaving 101.' And everybody's happy. At least during those four years" (Hollencamp, 2009, p.3).

There is no doubt that the NCAA is a commercial enterprise, and numerous scholars have taken the position that the NCAA uses this outdated principle of amateurism to maximize its own gain while keeping student athletes as serfs in the feudal system of intercollegiate athletics (Sharp, 2004). The NCAA has retained complete control over major college football and major college basketball in regard to the regulation of student athletes. Courts provide the organization with "ample latitude" in maintaining its regulations out of deference to the goal of preserving

amateur sports as a product distinct from professional sports (Baker, Maxcy, & Thomas, 2011, p.14).

Cognitive Pillar

The cognitive pillar stresses the rules that constitute the nature of reality and the frames through which meaning is made (Scott, 1995). Some find the essence of culture to be the implicit assumptions and beliefs that influence the way a group of people think and behave. These guiding assumptions and beliefs, which are below the surface of conscious thought, are manifested into observable forms or artifacts (Kuh & Whitt, 2008). One particular observable fact is when institutions admit young men and women based on their athletic rather than their academic potential, and then expect them to perform as both athletes and students. In high profile sports such as football and men's basketball, this is a particular problem. Players in these sports often have a difficult time performing well in the classroom for any number of reasons, including attending poor high schools, daydreaming about the millions they think they will make in the pros, and dealing with the oppressive demands of practice and competition (Martin & Christy, 2010). As such institutional theory will be able to help the researcher produce a critical description of their lived experience and add to the literature.

Infusing a cognitive lens into intercollegiate athletics provides the opportunity to debate the realities and perceptions of this system by not accepting things as they are or as what they appear to be. The literature has demonstrated an absence of the student athletes' voice as it relates to their understanding of the system of intercollegiate athletics as well as their place within the system. The narratives that often describe the student athletes are often general or depicted in numbers and statistics that are constructed without the participation of the student athletes themselves (Case, Greer & Brown, 1987; Fountain & Finley, 2009; Mitten, Musselman,

& Burton, 2009; Sanders & Hildenbrand, 2010; Schneider, Ross, & Fisher, 2010). In contrast to this narrative, a counter narrative through a cognitive lens will enable the researcher to engage student athletes in a critical discourse about their relationship with academic clustering and intercollegiate athletics. This manner of inquiry is directly in opposition to the dominant philosophy of prescription.

For example, Benson's (2000) article *Constructing Academic Inadequacy* utilized a critical theorist perspective with the premise that though there is a plethora of objective data and statistics regarding the poor performance of student athletes, specifically black male student athletes, their voices are never heard. In this article Benson asks how our educational policies and practices might change if we better understood these students' narratives of their schooling experiences. Through open dialogue Benson was able to report that the marginal academic performance of these student athletes was a phenomenon created by a series of interrelated practices engaged in by significant members of the university community including peers, coaches, academic advisors, professors, and the student athletes themselves. Conversely the researcher aims to use Institutional Theory to uncover hidden truths about the experience of being clustered.

Summary of Methodology

The strategy of inquiry utilized in this study is phenomenology. The word phenomenology is derived from the Greek meaning "to bring into the light" and the current definition encourages an approach that looks beyond initial appearances (Pringle, McLafferty, & Hendry, 2011). Its primary position is that the most basic human truths are accessible only through inner subjectivity, and that the person is integral to the environment. Phenomenological research is thus inductive and descriptive. Simply put, a researcher utilizing phenomenology

aims to understand the cognitive subjective perspective of the person who has the experience and the effect that perspective has on the lived experience (Flood, 2010). Therefore, the researcher has "brought to light" the lived experience of the former student athletes' encounter with academic clustering.

In terms of participant selection the researcher sought out former student athletes whose lives involved a direct relationship with academic clustering. The basis of this decision is that they would likely be most fully and authentically able to make accessible what the researcher is interested in: their experience. However, the researcher must admit a natural bias in that he was a former student athlete who was clustered. Conversely, because of his experience as a former student athlete he has fostered and maintained relationships with other former student athletes who made up the initial sample pool. Thus, the researcher utilized the method *purposeful sampling*; a strategy in which particular settings, persons, or activities are selected deliberately in order to provide information that can't be attained as well from other sources (Maxwell, 2005). As a result the participants in this study are all former Division I student athletes who participated in football.

In order to obtain the information needed to answer the research question the method of *interviewing* was utilized, specifically Sideman's (1998) three step interview process. Interviews provide opportunities for participants to describe the situation in their own terms. It is a reflective process that enables the interviewee to explore his experience in detail and reveal the many features of that experience that have an effect on the issue investigated (Stringer, 2007). The researcher utilized various forms of questions such as Grand Tour questions that include: Typical questions (Describe a typical day of a Division I student athlete?) and Specific questions (Describe your interaction with professors); Guided questions (Can you tell me more about the

coaches' philosophy regarding school work?); Task questions (Can you tell me how you selected your major?); Extension questions (Is there anything else you can tell me about your emphasis on academics?); Encouragement comments (Go on.); Example questions (Can you give me an example of how your academic advisor encouraged you not to pursue a major?) (Stringer, 2007).

Logistically, however, all the interviews were conducted by phone. All of the researcher's contacts live outside of his immediate area, though face to face interviews would have been his first choice. Simultaneously with the interviews the researcher triangulated the data via journal articles, books, and informal conversations with athletic administrators/coaches. These multiple sources and methods may give the researcher more credibility than if his answers were from only one particular source (Maxwell, 2005).

Definition of Key Terms

Academic Clustering

Academic clustering is a phenomenon in which a large numbers of student athletes at an institution major in a particular program or department, out of proportion to other students at the college. Case, Greer and Brown (1987) defined clustering as when 25% of a given team is found in a single major.

Academic Progress Report (APR)

Instituted in 2004 by the Academic Performance Rate (APR) is based on a team's ability to measure and retain eligible athletes' semester by semester (Christy, Seifried, & Pastore, 2008). For each student athlete in the cohort group, one point is earned each semester if the student athlete remains enrolled and on the team (retention point) and one point is earned if he/she is academically eligible to compete (eligibility point). Thus, each student athlete can potentially

earn two APR points each semester for the institution by remaining in school and fulfilling the academic requirements necessary to be eligible to participate in intercollegiate athletics. To earn the eligibility point, the student athlete must meet both the NCAA progress-toward-degree requirements and any institutional policies related to athletics participation (LaForge & Hodge, 2011). According to the progress-toward-degree requirement, also known as the "40-60-80 Rule," once student athletes declare their majors, they must have completed 40 percent of their degree-program requirements going into their third year, 60 percent going into their fourth year, and 80 percent going into their fifth year, thus, according to the NCAA, moving student athletes to graduation in five years (Meyer, 2005).

Academic Reform

Policies and procedures that have been implemented to decrease the frequency of academic misconduct. For example, Proposition 48 (Prop 48) which stated the 1983 NCAA Convention that, beginning in 1986, entering freshmen would be eligible for athletics grants and game competition only if their high school grade point average was at least 2.0 in a core curriculum and they had achieved a minimum 700 of the combined 1,600 points on the SAT or 15 of 36 composite points on the ACT exam (Byers & Hammer, 1995). Proposition 48 also developed the concept of "partial qualifiers," which allowed high school student athletes to receive athletic scholarships if they partially met the academic requirements. This system forbade the student athlete from competing as a freshman, but allowed him to compete during his second year if he maintained "good academic standing" and "an overall grade point average of 2.0 in twenty-four units of college work (Rosen, 2000).

Athletic Administrator

Anyone in a role such as athletic director, assistant athletic director that has oversight over the implementation and enforcement of policies and procedures set forth by the NCAA, affiliated conference, and institution.

Division I

Widely considered the highest level of NCAA affiliated amateur sports. Division I members must offer at least 14 sports (at least seven for men and seven for women, or six for men and eight for women). The institution must sponsor at least two team sports (for example, football, basketball, or volleyball) for each gender. The school also must have participating male and female teams or participants in the fall, winter, and spring seasons.

National Collegiate Athletic Association (NCAA)

The NCAA is made up of three membership classifications that are known as Divisions I, II, and III. Each division creates its own rules governing personnel, amateurism, recruiting, eligibility, benefits, financial aid, and playing and practice seasons – consistent with the overall governing principles of the Association (NCAA, 2011b). NCAA rules are established by representatives of member institutions (that is, colleges and universities), and these rules are generally formed at the NCAA's annual convention. All NCAA legislation must be voted on and adopted by all the active members. As a condition of membership, each institution is obligated to apply and enforce all the NCAA legislation as related to its own athletic programs. Among other functions, the NCAA maintains, applies, and enforces the rules of eligibility and the standards of amateurism in connection with student participation in intercollegiate athletic events.

Phenomenology

Phenomenology is understood as an approach that involves returning to the experience in order to obtain a comprehensive description that provides the basis for a reflective structural analysis that portrays the essences of the experience (Moustakas, 1994).

Student Athlete

Refers to a student who participates in college athletics. Initial eligibility and maintenance of eligibility varies, but amateur status must be maintained at all times.

Chapter II. Literature Review

Introductory Statement

In Division I intercollegiate athletics academic clustering is a phenomenon in which a large number of student athletes at an institution major in a particular program or department, out of proportion to other students at the college. Clustering raises a range of potential problems, including academic fraud; certain majors and classes having dubious academic requirements; and coaches and athletics academic advisors' inappropriately influencing students' decisions on majors and classes (Steeg, Upton, Bohn, & Berkowitz, 2008).

This section utilized Machi & McEvoy's (2009) literature review writing method as a guideline whereby creating the argument for this study. As such this literature review consists of two main sections, the body and the summation. In particular, the body focuses on the concepts of the *Argument of Discovery* and the *Argument of Advocacy*. The Argument of Discovery discusses and explains what is known about the subject in question. In other words, this researcher has developed findings that present the current state of knowledge about academic clustering. The Argument of Advocacy analyzes and critiques the knowledge gained from the

synthesis of the data produced by the discovery argument to answer the research question (Machi & McEvoy, 2009, p.61). Following the body, this paper concludes with the *Summation,* which consists of (a) the thesis statement, (b) the thesis analysis, and (c) the study's implications.

Topic Statement

Literature regarding the experience of student athletes who have been academically clustered is minimal, but several studies regarding parts of the issue provide significant insight. Noteworthy research exists objectively on the frequency of academic clustering (Case, Greer & Brown, 1987; Fountain & Finley, 2009; Mitten, Musselman, & Burton, 2009; Sanders and Hildenbrand, 2010; Schneider, Ross, & Fisher, 2010) and noteworthy research studies exist subjectively on the student athlete experience (Adler & Adler, 1985; Beamon, 2009; Benson, 2004). As such, the existing literature has led to a progressive refinement of the scholarly community's understanding of the phenomenon of academic clustering. However, a study that examines student athletes who have been academically clustered describing their point of view via in-depth interviews does not yet exist.

Utilizing a qualitative approach, phenomenology via interviews goes beyond what academic clustering is, but more so provides a first-hand account of the student athlete's perspective of their particular experience. Qualitative research derives primarily from its inductive approach; it focuses on specific situations or people and it emphasizes words rather than numbers (Maxwell, 2005). Further, qualitative approaches increase awareness of particular issues within a bounded system, which provides more understanding and broadens the researchers' and readers' view of the world. Unlike the quantitative approach, which examines the cause and effect of a particular treatment, a qualitative approach is a lens viewing the experiences of both the researcher and the participants (Snow, Wolff, Hudspeth, & Etheridge,

2009). Thus, qualitative research is an ideal strategy of inquiry for student athletes to have their voices represented from which to understand their experience.

The following research tools were searched utilizing various terms: JStor, ProQuest, Ebscohost, Google Scholar and Sage. The literature search included the following terms: academic clustering, student athlete academic fraud, student athlete graduation rate, academic progress report, college athletic economics, university mission, black student athlete, and student athlete exploitation. The search was limited to peer-reviewed journals with articles from the past thirty years. A further citation analysis led to other relevant sources that were included. After reviewing the abstracts of each article, more than seventy articles were chosen for review and read in their entirety. These studies were reviewed for quality and for relevance, and research that was found irrelevant was discarded. Irrelevant research included those articles that did not analyze policy or perform an empirical study. Such pieces contained mainly opinion or editorial writing, and were deemed inappropriate.

Context Statement

When studying the experiences of student athletes, it is important to provide the context of intercollegiate athletics and Division I. To understand the participant's experience, it is necessary to comprehend the precise environment an athlete inhabits and competes within. Accordingly, this section briefly recounts the circumstances that surround, and perhaps have produced, academic clustering. Today we see abundant images of commercialism, professionalism, and corruption that have permeated college athletics, attracting public attention and distrust (Hill, Burch-Ragan, & Tates, 2001). Whether or not one supports the idea of high-profile intercollegiate athletics, it is difficult to deny that college sports matter greatly in the public life of the university. Football and basketball are a significant component of the overall

identity of schools that invest heavily in these activities (Toma, 1999). In addition, athletic competition may help structure a student's life and coaching may improve both physical and intellectual performance. On the other hand, the amplified emphasis on sports may hinder the student athletes to the point of negatively impacting their grades (Maloney & McCormick, 1993).

Because of this paradox between academics and athletics, college sports have been criticized for allowing commercial interests and over-emphasis on winning to undermine academic values (Meggyesy, 2000). As a consequence the victims of such ambition are the student athletes. For many the concern is that the academic preparedness for admission, seriousness toward learning, and graduation rates of many student athletes threaten academic integrity (Lumpkin, 2008). In response to these concerns the NCAA over the past thirty years has instituted various academic reform measures such as Proposition 48, Proposition 42, Proposition 16, increased SAT/ACT scores, increased GPA standards and most recently Academic Progress Report.

Not surprisingly, coaches and athletic administrators seem to have always found ways to skew the policies to produce outcomes in their favor. For example, a stipulation within the APR, the progress toward degree policy, also known as the 40-60-80 rule says that once student athletes declare their majors, they must have completed 40 percent of their degree-program requirements going into their third year, 60 percent going into their fourth year, and 80 percent going into their fifth year, thus, according to the NCAA, moving student athletes to graduation in five years (Meyer, 2005). Whereas before the progress toward degree policy a student athlete could take any combination of classes as long as he had the required number of credits to maintain eligibility.

The unintended consequence of the APR is an enhanced propensity to cluster athletes into "easy majors." Fountain and Finley (2009) say coaches are now more apt to recruit athletes of marginal academic ability and seek easier majors, courses, and professors to ensure a reasonable graduation rate. Though clustering is not necessarily a new phenomenon it may become more prevalent in the face of the APR. The future policy makers must keep in mind that the implementation of a policy can often produce unintended consequences that conflict or undermine another goal. In this case student athletes are graduating but not necessarily receiving a meaningful education. Accordingly, the phenomenon of clustering has not gone unnoticed. The increasing commercialization of college sports has made it even more difficult for universities to reconcile the gap between college sports and the fundamental mission of higher education (Sharpe & Sheilley, 2008).

Simply put, college athletes represent a unique "nontraditional" group on a college campus. Unlike non-student athletes they are part of a complex social and political system within the university. They attend college in part to excel at the highest amateur level of their sport (Harrison & Harrison 2009). Broadly speaking, Division I student athletes face all of the challenges experienced by other students in the general population with regard to social and academic adjustment to college. College coaches expect a great deal of their players' time to be spent on sports, with practices, travel, team meetings, and midweek game schedules. Student athletes often spend more than 40 hours a week on sport-related activities, as well as coping with the mental fatigue, physical exhaustion, and nagging injuries that afflict those who participate in college sports (Comeuax, 2011).

Argument of Discovery

The Argument of Discovery can either be built on simple arguments or complex arguments. A simple argument is a single claim, its evidence, and its warrant. However, most arguments are complex, made up of multiple simple claims becoming the evidence to warrant the claim of the major argument (Machi & McEvoy, 2009). Accordingly, this researcher has utilized multiple single claims of evidence to warrant one major claim: *the current literature on the student athlete's experience with academic clustering has not been examined from the student athlete's point of view via in-depth phenomenological interviews*. The following will focus on multiple research studies and commentary to date, subjectively and objectively, that directly and indirectly focus on academic clustering whereby demonstrating a gap in the literature warranting this study. The following section will examine six claims; Claim 1: Construct defined in 1987, Claim 2: Clustering more prevalent with minorities, Claim 3: Conflict between athletic culture and academic culture, Claim 4: Student athletes scrutinized by faculty, Claim 5: Coaches implicitly support academic clustering, and Claim 6: Priority to maintain eligibility of student athletes.

Claim 1: Construct Defined in 1987

The first claim is acknowledging academic clustering as a phenomenon. Academic clustering was first examined via a survey study by Case, Greer, and Brown (1987) in which they coined the term *Academic Clustering* to describe the phenomenon. Interestingly, they never intended nor had interest in studying academic clustering. The impetus for their study was that the primary researcher was told that he would be teaching in a program that caters to student athletes. As a result, they decided to conduct a research study on this seemingly unanticipated encounter. This resulted in them surveying 130 institutions to see if this phenomenon was

widespread. Operationally, they defined clustering when 25% or more student athletes were in a particular major. The researchers conducted a survey study of men's and women's Division I basketball teams for the year 1985-1986. Of a total of 77 men's team that responded, 55 (71%) reflected clusters; and 27 (51%) of the 53 women's team reflected clustering as well. Also noteworthy, they found that men tend to be clustered more than women, blacks tend to be clustered more than whites, "big-time" schools tend to cluster more than smaller size schools, and student athletes tend to be clustered into more non-science majors than science majors.

Claim 2: Clustering More Prevalent with Minorities

Fountain and Finely (2009) conducted a modern era survey study building off of and inspired by Case, Greer and Brown (1987). They examined race and academic clustering in a study titled *Academic Majors of Upperclassmen Football Players in the Atlantic Coast Conference: An Analysis of Academic Clustering Comparing White and Minority Players.* The Atlantic Coast Conference served as the sample pool that consists of the following schools: Boston College, Clemson, Duke, Florida State, Georgia Tech, University of Miami, University of North Carolina Chapel Hill, North Carolina State, University of Virginia, Virginia Tech, and Wake Forest. They found that nearly every school in the study had minority football players clustered into a single major at a higher percentage than their white counterparts. The pattern of minorities clustering more densely into a single program held true at nine of the 11 schools. Four teams had 62% or more of their minority upperclassmen clustered into a single major. Only in one case was the percentage of white players in one major as high (69%).

Sellers (1992) conducted a survey questionnaire of former black student athletes to assess their life experience as student athletes. Participants were asked for written permission to obtain ACT/SAT scores, high school, and college transcripts. The variables used in the analyses were

college GPA, high school GPA, SAT composite score, socioeconomic status, importance of obtaining degree, hours spent studying, mother's occupation, and years in college. Interestingly, black student athletes come from lower socioeconomic backgrounds and enter college less academically prepared than their white counterparts. Differences in race also seem to influence college academic performance. Yet, black student athletes do not differ in their stated importance for getting a degree or time spent studying.

Claim 3: Conflict Between Athletic Culture and Academic Culture

Student athletes' experiences can differ based on NCAA Division level. Division I student athletes might have fewer opportunities to be a part of the traditional college experience because of the demands of athletic participation at that level, including the benefits and high costs (both immediate and long term) of win-loss records, and of media attention and scrutiny. On the other hand, the focus at many Division II and III schools is different. Many Division II and III institutions pride themselves on their ability to integrate the student athlete, and athletics in general, into the college environment. The general understanding is that athletes who compete at Division II and III colleges and universities do so for the love of the sport rather than for external rewards (Watt & Moore, 2001).

Thus the term "student athlete" at Division I by itself reflects the implicit semantic intention of the NCAA and college administrators to obscure exploitative practices that profited the institutions involved while violating the fundamental tenets of higher education and human rights. The mere crafting of the term, however, has not proven sufficient to persuade the American public to either believe that scholarship athletes in big-time college sports were receiving mythical free rides and getting college educations or to overlook the hypocrisies that have been evident in big-time college sport from its beginning (Staurowsky & Sack, 2005).

Recognizing that the commercialization of intercollegiate athletics creates economic incentives for conduct that may conflict with a university's academic mission and may potentially exploit student-athletes is the first step in understanding this competing dynamic (Mitten et al., 2009). The academic performance of college athletes, most notably in revenue-generating sports, continues to receive considerable attention from both the academic community and the media. The research focus of the academic community has included comparisons between athletes and the general student body in regard to graduation rates, academic performance, academic support services, academic entrance requirements, and academic motivation (Fountain & Finley, 2009).

Accordingly, one principal concern with the athletic culture in college sports today is that the commercialization of intercollegiate athletics creates economic incentives for conduct that may conflict with a university's academic mission and may potentially exploit student-athletes (Mitten et al., 2009). Sharpe and Sheilly (2008) cite Eitzen (2000) as having captured the essence of the concerns: "Not only do typical athletes in big-time sports enter at an academic disadvantage; they often encounter a diluted educational experience while attending their schools. Coaches, under the intense pressure to win, tend to diminish the student side of their athletes by counseling them to take easy courses, choose easy majors, and enroll in courses given by faculty members friendly to the athletic department." Thus the third claim is the conflict between athletic culture and academic culture of higher education. This claim is reinforced in Adler and Adler's (1985) in-depth qualitative participant-observation study of a major college basketball program to understand the student athlete experience.

The results of the study found that the student athletes start off with high standards for themselves academically but become overwhelmed by the demands and intensity of the athletic

realm, which absorbs their concentration and commitment; athletes find themselves socially isolated from other students because of their geographic and temporal separation and their physical and cultural differences; and for many athletes, the gap between their academic abilities and the university's expectations brings failure, frustration, and alienation. The peer subculture exacerbates the situation by devaluing academic involvement and neutralizing academic failure. As a consequence the student athletes responded by gradually withdrawing from their commitment to academics.

Thelin (2008) says that intercollegiate athletics at colleges and universities is a “peculiar institution.” He further comments that intercollegiate athletics is pervasive, yet their proper balance with academics remains puzzling. This balance between academics and athletics is central to the peculiarity that Thelin speaks of. The academic responsibilities may be nothing like athletes expected, yet their academic accomplishments or lack thereof will become a matter of public record via graduation reports (Meyer, 2005).

Furthermore, Thelin’s sentiment is reinforced in Beamon’s (2008) in-depth qualitative participant-observation study of former student athletes. Many of the participants stated that any reference to education was directly related to eligibility. Most (14 of 20) of the respondents actually employed phrases with the word "used" such as "used up," "used goods," and "used and abused" to describe the manner in which they felt they were treated by universities. Several respondents (9 of 20) mentioned these types of constraints limited their choices for majors. Additionally, most (15 of 20) mentioned choosing majors with courses classified as "easy to pass" or departments that were "athlete-friendly." For these reasons and to remain eligible to play their sport, student athletes often selected more pragmatic educational goals.

An ethnographic study of former college football players by Krystal Benson (2000) found that the marginal academic performance of these football players was a phenomenon created by a series of interrelated practices engaged in by all significant members of the institution including peers, coaches, advisors, professors, and the student athletes themselves. From the very beginning of their academic careers in recruitment, orientation, and their first year and continuing throughout their college years, these football players received implicit and/or explicit messages that school was not important, that they were not considered intellectually capable students, were not expected to do well in school, and were not cared about as individual student learners.

Of course, a principal criticism of "big-time" college sports is precisely that schools select athletes mainly for their athletic, not academic, interests and abilities, and that once on campus they are de facto regarded primarily as "athlete students" rather than "student athletes" (Eckard, 2010). These problems make us focus on the paradox of college athletics that it is supposed to be an academic or educational enterprise on the one hand and that it is clearly a multibillion-dollar entertainment business on the other (Lawry, 2005).

Claim 4: Student Athletes Scrutinized by Faculty

Culture sets the normative context for groups and individuals, and indicates which rewards the organization deems important and which kinds of work will be rewarded (Dee & Bess, 2008). Therefore, culture can also be potentially divisive. If routine patterns of behavior within one group are considered normal, different activities performed by another subgroup may be judged as abnormal (Kuh & Whitt, 1988). For example, faculty and administrators who have had the courage to blow the whistle on academic fraud within athletics departments have frequently paid a heavy price for their attempts to protect and preserve their institutions'

integrity. Former University of Tennessee English Professor Linda Bensel-Myers incurred substantial personal and professional costs when she blew the whistle on a massive cheating scam there. Subsequently, she endured constant harassment by administrators, faculty, students, boosters, and coaches. She fought this harassment for years but eventually fled to the University of Denver. The experience led her to become heavily involved in the national college sports reform movement (Benford, 2007).

Interestingly, one pressure facing college athletes on a college campus relates to the negative stereotypes that faculty, traditional students, and administrative personnel have about them. Compared to traditional students, college athletes were rated more negatively by faculty and other students when they were presented as driving an expensive car, receiving a scholarship and special advising/tutoring, being admitted to the university despite low test scores, and missing class (Harrison & Harriosn 2009). Not surprisingly these student athletes are in fact aware of such culture clashes bringing about the fourth claim, the role of faculty. In a study conducted by Benson (2000) she asked a group of student athletes to describe their perception of their professors' attitudes toward them as student athletes. She noted them saying that many teachers just didn't care enough about their learning to actually teach them the course material. They described experiences with teachers whom they did not understand, who did not appear to have the time to teach material so that they understood it, and who did not appear to be available to help them when they were struggling to learn. Conversely, Martin, Harrison, Stone and Lawrence (2010) conducted a phenomenological study to explore the academic experiences of African American student athletes who were academically high achievers in which they note their experience with professors. In contrast to Benson's (2000) study, participants spoke highly of their relationships with professors and appreciated the ambitions of their non-athlete peers;

however, participants consistently noted that they had a point to prove and the need to show their professors and fellow classmates (non-athletes) that they were worthy of being students at prestigious universities.

Claim 5: Coaches Implicitly Support Academic Clustering

College athletics have occasionally failed to fulfill their obligation of providing genuine educational opportunities to student athletes. Critics and reform minded analysts argue that these foibles go beyond occasional oversights and are, rather, evidence of a corrupted system that threatens the academic integrity of higher education (Ferris, Finster, & McDonald, 2004). Like the student athlete, college coaches face tremendous pressure to win, especially because of the big business mentality that consumes revenue-generating college sports. This win-at-all-costs attitude places coaches and athletes in a difficult situation. Coaches must win, but doing so may compromise their institution's academic standards. The athlete, on the other hand, may possess unparalleled athletic talent and may receive an athletic scholarship regardless of educational ability or the desire to excel (Rosen, 2000).

In a study conducted by Purdy, Eitzen, and Hufnagel (1982) they examined college athletes over a ten-year period in one major university and two major themes emerged: (1) Student athletes "owe" their coaches their undivided attention because these coaches are paying the bills. This creates a role conflict for student athletes, with the student role often being neglected or de-emphasized. Second, full-scholarship athletes are likely to be the best athletes. Thus, they may overemphasize their sport at the expense of academic pursuits. (2) Because of the revenue-producing potential of football and basketball, the pressures are intense to win. This means that coaches in these sports are likely to be excessive in their demands on the time of their athletes during and between sessions. The serious and far-ranging financial consequences of

"big-time" sports also increase the likelihood that coaches will recruit exceptional athletes who are unqualified for the academic demands of college. To the degree that this occurs, coaches are then faced with keeping these marginal students eligible.

Fountain and Finely (2009) state that coaches can adopt one of three paradigms: First, recruit athletes who are truly and completely prepared for the academic rigors of the university. Second, they can increase expectations of players and provide academic services for the players of marginal academic pedigree. Or, third, they can recruit athletes of marginal academic ability and seek easier majors, courses, and professors to ensure a reasonable graduation rate. They state that exercising the third option could lead to an increase in academic clustering of athletes. Comeux (2009) cites Adler & Adler, (1985) stating that coaches who view students as athletes first also feel enormous pressure to win, and as such they tend to devalue the academic role, counseling their students to take less demanding courses, to choose majors held in low repute, and to take courses with selected faculty who are “student athlete friendly” or who are willing to give the Division I student athlete “special” considerations in the classroom.

Unmistakably, Christy, Seifried, and Pastore (2008) substantiate claims that coaches might be inclined to academically cluster their student athletes. They administered an online survey of 127 individuals consisting of coaches, athletic directors, and athletic administrators from institutions from the major football conferences Big East, Big Ten, PAC Ten, SEC, ACC, and Big Twelve Conferences. Three major themes emerged. First, the APR will cause head coaches and athletics departments to take a closer look at the type of student athlete being admitted. Second head coaches will be held more accountable for the academic success of student athletes and this, in turn, will have a positive impact on graduation rates. And third, the APR will lead to an increase in “academic fraud,” creating an environment of “watered down”

curriculum so the student athlete will be able to "succeed" in the classroom and encouraging "easier" academic courses to ensure APR success.

Claim 6: Priority to Maintain Eligibility of Student Athletes

Academic support services for student athletes dates back to the 1970s when programs consisted of one or two individuals whose job was to keep student athletes eligible for competition (Gatson-Gayles, 2003). Athletic academic advising of college student athletes at many institutions continues to focus only on maintaining academic eligibility and graduation rates rather than on enhancing the academic, personal, and athletic development of the student athlete. It is clear however, that this concentration on academic advising does not sufficiently meet the needs of student athletes (Broughton & Neyer, 2001). Offices of academic services for athletes have come to take enormous control of the athlete's curricular life and study habits. Savvy advisors from the athletics departments know which academic program is easiest to major in, which courses to avoid and take, and which professors are sympathetic and unsympathetic to athletes. (A corollary phenomenon that has arisen on campuses is the faculty member who prejudges athletes as "dumb jocks" and/or unmotivated and often makes course completion and grade achievement unfairly difficult for athletes) (Lawry, 2005).

Conversely, Gatson-Gayles (2003) conducted a phenomenological study of directors of student athlete support services seeking the factors that contribute to a successful academic service office. Directors of student support services at private institutions, as well as some from the smaller state institutions, expressed that institutional size played an important role in the success of their academic support program. Staffs at academic support programs at smaller institutions are able to work more closely with students than can those from large state institutions. Small class sizes allow for increased interaction between faculty members and

students, a point illustrated in the following comments from the director at a private institution. However, as one participant noted, admissions plays a crucial role in academic advisors' their overall success to educate and graduate the student athletes;

> "The problem in college athletics today is there's a mentality out there that if you put enough money into academic support and enough staff people, tutors, and learning specialists you can bring any kind of student into an institution of higher learning and make them successful. We don't believe that's the case. We just feel like if you don't bring quality students into a quality institution then you're going to have problems. Certain students would graduate, but the majority probably would not (Gatson-Gayles, 2003, p. 54)."

Argument of Advocacy

Machi and McEvoy (2009) state that projects such as doctoral dissertations demand extending topic knowledge beyond what is known by uncovering a question for original study, a research problem. Researchers must ask more questions: What are the gaps, contradictions, omissions, and debates about the research subject surfaced by the discovery argument?" Accordingly, this researcher has outlined and critiqued the previous claims made in the Argument of Discovery section warranting the main claim therefore justifying this study.

The first claim noting the existence of academic clustering by Case, Greer and Brown (1987) though groundbreaking, does not offer a voice of the student athlete regarding their experience of being clustered. Their study essentially leaves the reader to their own conclusions in regards to if the student athlete received a meaningful education, if student athletes were steered into a major, and even why clustering occurred. But what their study did, without fear of denial, is begin the conversation. As stated previously they found that men tend to be clustered

more than women, blacks tend to be clustered more than whites, "big-time" schools tend to cluster more than smaller size schools, and student athletes tend to be clustered into more non-science majors than science majors. Conversely, this study is student athlete centered. In other words, seeking out an athlete's total experience pre-college, during college, and a post-college reflection of what they would have done differently knowing what they know now.

The second claim where Case and colleagues (1987) stumbled upon race, Fountain and Finley's (2009) follow-up study sought it out. By all accounts Fountain and Finley's study points to the fact that even twenty-two years later academic clustering and the intersection of race is still a noteworthy phenomenon. Thus it would be imprudent for higher education administrators and the scholarly community concerned with clustering to dismiss the reoccurrence of race and clustering. Nevertheless, the gap still remains as to how the student athletes themselves interpret, feel, and are impacted by clustering. This study from the outset acknowledges that clustering is a concern, but a concern that needs to be reinforced with the student athlete's voice involved in the discussion.

The third claim regarding the conflict of interest between academics and athletics is highlighted in Adler and Adler's (1985) qualitative ethnographic study of the student athlete experience which is the first of its kind. In other words there has not been any scholarly attempt to capture the essence of the student athlete's perspective qualitatively prior to this study. Their study demonstrates that by engaging the student athlete, meaningful dialogue can be extracted to better understand their experience. Though this study did not mention the phrase academic clustering, certain themes emerged from quotes that demonstrate where the application of clustering could manifest. For example, one participant said:

> "In college the coaches be a lot more concerned on winning and the money comin' in. If they don't win, they may get the boot, and so they pass that pressure onto us athletes. I go to bed every night and I be thinkin' 'bout basketball. That's what college athletics do to you. It takes over you mind."

For the same reasons, to extract the student athlete's point of view, this study follows suit with Adler and Adler, but hones in on the experience of being clustered. Adler and Adler's (1985) study did not delve into the issue of clustering. This researcher has used a similar in-depth interviewing structure but adapted it to focus on the phenomenon of academic clustering.

The fourth claim regarding the role of faculty proves quite interesting. The caveat that is often overlooked is that professors and academic departments should be the ultimate guardians of academic integrity. Conversely, it appears that a number of professors and/or academic departments may have compromised their bestowed upon commitment of academic integrity for the sake of athletics. The question that arises is, why? Were these professors approached by athletic department staff and given special benefits (sideline game passes, travel with team, etc.) for leniency in grades/curriculum demands? Are these professors star struck fans that desire a relationship with these "rock star" student athletes? Or are these professors influenced to assist athletics by senior university administrative staff or alumni.? Whatever the reason or reasons, academic clustering likely could not exist to the extent that it does without the aid of professors.

Thus, the advantages of Benson (2000) and Martin, Harrison, Stone, and Lawrence (2010) studies are encapsulated within a perspective built upon the student athlete's voice. In this instance, the message being transmitted is that professors, despite their stance toward athletics and in particular student athletes, are important in shaping the cognitive perceptions student athletes have about themselves and their academics. What this study attempted do is expand

upon these themes in three particular ways. First, it illustrated the perceived attitudes of "athletic friendly" professors. Second, it offered insight as to whether clustered student athletes feel that they are being pushed through by professors, thus resulting in a disillusioned attitude toward academics. And finally it illustrated that the student athletes were indeed appreciative of professors who are "athletic friendly."

In regards to the fifth claim, the role of coaches and revenue, it should be noted that from a historical point of view since the 1950s televised football has become an important aspect of American culture, attracting significant audiences. More recently, the annual men's NCAA Final Four basketball tournament every March has also become a highlight of the sports calendar, approaching baseball's World Series in popularity (Schroeder, 2010). Last year, nearly fourteen million prime-time TV viewers watched the University of North Carolina Tar Heels win the men's championship and nearly three million watched the University of Connecticut Huskies take home the women's title. The audience is even larger when factoring in Internet viewership; it's up 147 percent from 2007 to 2008 (Hesel & Perko, 2010). It also goes without saying that this enormous popularity of men's basketball has led to huge potential revenue opportunity. For instance, CBS agreed to pay the NCAA $6 billion from 2002 through 2013 to broadcast its men's basketball tournament (Mitten et al., 2009). A May 2009 Congressional Budget Office (CBO) paper titled "Tax Preferences for Collegiate Sports" states that the 2008 NCAA men's basketball tournament generated approximately $143 million in revenue for college athletics departments (CBO 2009). The CBO paper includes data showing that the 2004–05 fiscal year average athletic program revenues for universities with Division I football and men's basketball teams was $35.2 million.

As a result of such revenue coaches are able to demand enormous salaries. Coaches' compensation packages not only include substantial base salaries, typically the highest in the university, but also revenues from summer camps, media shows, and shoe and apparel contracts (Benford, 2007). For example, in 2006 the median salary for basketball head coaches was $611,900 a 15% increase from the 2004 median; for football head coaches it was $855,500 a 47% increase from the 2004 median (Mitten et al., 2009). Because substantial compensation is provided to a coach in return for a winning record this presents an inherent conflict of interest for coaches, choosing between academics and athletics.

While the goal of academic reform such APR is to restore the balance of academics and athletics, the means utilized by schools to avoid loss of scholarship could prove to be dubious. Given that coaches certainly do not want to face scholarship reductions due to a low APR, they will be faced with several options for maintaining or increasing graduation rates (Sharp & Sheilley, 2008). These sentiments regarding coaches provided sufficient contextual information for this study, as the experience of being academically clustered by the participants likely will have been influenced by coaches and/or administration. However, without conducting such a study, the scholarly community will be left only to theoretical speculation regarding the experience student athletes have with their coaches.

For example, according to Sanders and Hildenbrand (2010) there are two predominant theoretical explanations of why clustering occurs: a selection hypothesis and structure hypothesis. The selection hypothesis holds that participation in college athletics is selective of a unique population of students. According to this view, student athletes begin college more disposed than non-athletes toward a unique set of academic majors—namely, those majors that are perceived to best facilitate successful participation in college athletics. Lesser college

preparation on the part of athletes may make them less inclined than non-athletes to consider academia's more challenging majors. Whereas the structure hypothesis argues that clustering stems from the experience of college athletics itself. According to this view, participation in college athletics places athletes into environments that pressure them to choose academic majors that are most compatible with fulfillment of the student athlete role. Thus, according to this second view, external influences are most accountable for athlete clustering.

Sanders and Hildenbrand's view is of particular importance because it essentially says that regardless of hypothesis, selection, or structure, the student athlete chooses to be clustered. This current study helps substantiate these claims by examining the process in which a clustered student athlete becomes clustered.

The sixth claim regarding the role of academic support services and advisors is looked upon more now than ever, and they receive enormous amount of pressure if APR cut-off scores are not maintained or increased. There will be an objective accountability for academics personnel with dismissals or demotions from athletics department personnel to help get the program back in compliance. Coaches also will desire to be actively involved in selecting academic personnel that work with their specific program (Satterfield, Croft, Godfrey & Flint, 2010). This balancing act of ensuring the eligibility of each student athlete and the morality of not forcing them to choose a major against their will presents a peculiar dilemma. Again, this peculiar dilemma has not been studied as of yet and could close a gap in the literature. Though Gatson-Gayles (2009) conducted a phenomenological study of directors of student athlete support services seeking the factors that contribute to a successful academic service office, the question still remains, what is the student athlete's perspective? This researcher used the same in depth phenomenological method but applied it to student athletes.

Given the evidence presented thus far a reasonable conclusion based on the research question asked, "*What is the lived experience of former Division I student athletes who have been academically clustered?*" and further substantiated by the literature review demonstrates that there is a gap of knowledge. This gap of knowledge in accordance with Machi and McEvoy (2009) is presented here as the thesis statement, which warrants this study as original research.

Analysis and Interpretation and Explanation of the Thesis

The purpose of this literature review was to create the argument for conducting this research study. The literature review included knowledge that helped frame this research study ranging from: previous qualitative and quantitative studies conducted and various commentaries about clustering. In addition the literature review shed light as to how this study attempted to fill the gap in the literature given what is known and more so what is not known.

The claims that emerged about academic clustering were organized into two sections: Argument of Discovery and Argument of Advocacy. The first section, Argument of Discovery was organized into six single claims– Claim 1: Construct defined in 1987, Claim 2: Clustering more prevalent with minorities, Claim 3: Conflict between athletic culture and academic culture, Claim 4: Student athletes scrutinized by faculty, Claim 5: Coaches implicitly support academic clustering, and Claim 6: Priority to maintain eligibility of student athletes. These single claims provided the building block for the primary goal, to justify this study, which was the focus of the Argument of Advocacy section. Emergent from each of the six claims were themes that further explained key ideas of the thesis, provided further definition of those ideas, and explored the thesis from various perspectives.

Foremost among all identified claims whether implicitly or explicitly stated is that academic clustering is one of the many symptoms of revenue-generating Division I

intercollegiate athletics. Each claim identified various reasons for the dichotomy of athletics and academics, and the impact it has on the institution of higher education and on the student athletes. For example, Adler and Adler's (1985) study focused on the structure of "big-time" athletics, which they attributed to the compromise of academics. They note that due to the athletic demands placed on student athletes by coaches, administrators, and boosters, they wholly deny student athletes a legitimate opportunity to succeed in the classroom. Moreover, these claims are important because they highlight a structural deficiency that often goes unnoticed in college athletics. Many times we hear of academic fraud or academic scandal and perceive it to be an isolated incident, but rarely do we frame it or acknowledge it as a continuous structural practice.

These claims also extend the knowledge of academic clustering more broadly. For example, Sharp and Sheilley (2008) proposed a holistic approach to remedying this clustering by ensuring that it must start with having the right people in administration, faculty, and coaching in place who value education. They also recommend placing academic services back in the jurisdiction of the university, rather than remaining housed in athletics.

The overarching connection within all six claims is that the education of the student athlete is being compromised implicitly or explicitly by one or more actors (coaches, athletic directors, faculty, academic advisors, and the student athlete). As a result the overwhelming conclusion each claim hints towards is that the commercialization of Division I intercollegiate athletics brings forth the inherent conflict of interest when revenue becomes the premium. For example, Fountain, and Finely (2009) cite former Texas A&M football coach, R.C. Slocum, who after being fired, complained that he was at a competitive disadvantage because his players did not have a general studies program like players at the rest of the schools in the Big Twelve

conference. The underlying assumption is that if his players had a general studies program, which is presumably less academically challenging than "mainstream" courses, more of his players could have enrolled in it, leading to more wins and therefore allowing him to keep his job. This underlying assumption can be viewed as indicative of many Division I revenue-producing sports programs and the hypocritical tone the institutions of higher education have adopted.

This dichotomous notion can also be seen as two clashing subcultures between academics and athletics. A subculture is the culture of a subsystem within a larger system. Subcultures often overlap with surrounding substructures in an organization (Bess & Dee, 2008). Kuh and Whitt (1988) state that culture exhibits one or more of the following properties: 1. Observed behavioral regularities; 2. Norms or specific guides to conduct, some of which are more salient than others; 3. Dominant values espoused by the organization; 4. The philosophy that guides an organization's attitudes and actions toward employees or clients; 5. Rules for getting along in the organization; and 6. The feeling or organizational climate and the manner in which members of the culture interact with those outside the culture. Some find the essence of culture to be the implicit assumptions and beliefs that influence the way a group of people think and behave. These guiding assumptions and beliefs, which are below the surface of conscious thought, are manifested into observable forms or artifacts (Kuh & Whitt, 2008). One particular observable fact is when institutions admit young men and women based on their athletic rather than their academic potential, and then expect them to perform as both athletes and students. In high profile sports such as football and men's basketball, this is a particular problem.

Finally, all this leads to one important perspective: the student athlete's. In all of the articles and journals, it is rare to have a student athlete openly acknowledge that the system is

awry. This perspective would provide a glimpse into the unspoken truth of Division I athletics. Though it is well known that academic clustering is a phenomenon, to have student athletes substantiate the reasons why it happens, how it happens, and who orchestrates the system would prove quite groundbreaking. For instance, student athletes could shed light on why they chose a specific major, how academics are discussed behind the locker room doors, or if they feel coaches are not concerned with academics outside of eligibility.

Practical Impact of the Study

This phenomenological study of the student athlete's experience of being academically clustered has led to greater insight and appreciation for some of the challenges Division I student athletes' face. This qualitative study provided the student athletes a voice regarding their experience and highlights the need for continued research in this particular subject. The prospective to extend this area of research subsists in numerous meaningful ways: understanding the expectations placed on student athletes, the academic choices student athletes have to make, and the student athlete experience as a whole.

The implications of the findings in this research project are applicable to multiple constituencies throughout athletic departments and universities as well. According to the NCAA (2010b), its core purpose is to govern competition in a fair, safe, equitable, and sportsmanlike manner, and to integrate intercollegiate athletics into higher education so that the educational experience of the student athlete is paramount. Ultimately, the integrity of college sports must start at its stated purpose: education of the participants. The dearth of integrity in college sports has unfortunately also started at the premise of education (Ridpath, 2008). If education is thus paramount and the central mission of college, then leadership—presidents, athletic directors,

coaches, and faculty—must place the best interest of the student athlete first, not institutional prestige, championship games, bowl games, and ultimately revenue.

Myles Brand, former president of the NCAA noted, “When you have extreme clustering you really do have to ask some hard questions: Is there an advisor who's pushing students into this? Are there some faculty members who are too friendly with student-athletes? I'm not saying that's the case. But I think you have to ask those questions." Those questions, Brand and others say, should be asked by professors and administrators on individual campuses, since questions about curriculums and course quality at a given college or university are the purview not of the NCAA, but of the faculty there (Lederman, 2010).

This study may prompt college administrators, athletic advisors, faculty, and coaches to ask themselves: Are student athletes becoming independent, self-directed, and leaving college with a meaningful education? If they cannot answer in the affirmative, there perhaps rests the disconnect to the fulfillment of the educational mission of college, as well as the conscious awareness of exploiting the student athlete in the best interest of the university, which is not necessarily the best interest of the student athlete.

Chapter III. Research Design

This doctoral thesis pursued a phenomenological study into the lived experience of former Division I student athletes. The chosen former student athletes were asked to describe their academic experience, specifically academic clustering at their respective institution. However, to focus solely on the method of this research without a discussion of its background and development would be a great injustice. In fact, the researcher has outlined the difference between qualitative and quantitative research, the history and development of phenomenology, his decision on the specific method of phenomenology, and his history with academic clustering.

Qualitative Paradigm

The researcher's methodology utilized a qualitative approach. Qualitative research derives primarily from its inductive approach; it focuses on specific situations or people and its emphasis on words rather than on numbers (Maxwell, 2005). Further, qualitative approaches increase awareness of particular issues within a bounded system, which provides more understanding and broadens the researcher's and readers' view of the world. Unlike the quantitative approach, which examines the cause and effect of a particular treatment, a qualitative approach is a lens through which the experiences of both the researcher and the participants are viewed (Snow, Wolff, Hudspeth, & Etheridge, 2009).

Utilizing a qualitative approach via interviews goes beyond what clustering is, but more so why it occurs, who it affects, how it affects the student athletes and how various elements create a particular situation. The researcher is not merely concerned with physical events and behaviors taking place, but understanding the particular context within which the participants act, and the influence that this context has on their perceptions. Thus, qualitative research was an

ideal strategy of inquiry for student athletes to have their voices represented and for the student athletes to lead the researcher on an intellectual journey of discovery.

Qualitative research is a means for exploring and understanding the meaning individuals or groups ascribe to social or human problems. The process of research involves emerging questions and procedures, data typically collected in the participants' setting, data analysis inductively building from particulars to general themes, and the researcher interpreting the meaning of the meaning of the data (Creswell, 2009). Maxwell (2005) indicates five particular goals for which qualitative studies are especially suited:

1. Understanding the *Meaning* for participants—the event, situations, experiences, and actions they are involved with or engage in. Meaning is used in a broad sense, including cognition, affect, intentions, and perspective.
2. Understanding the *Context* within which the participants act and the influence that this context has on their actions.
3. Identifying the *Unanticipated* phenomena and influences and generating new grounded theories about the latter.
4. Understanding the *Process* by which events and actions take place. Getting to the processes that lead to the particular outcome.
5. Developing *Causal explanations of* the traditional view that only quantitative methods can be used to credibly draw causal conclusions has been disputed.

Accordingly, the question arises, when is it suitable to use qualitative research? According to Creswell (2007) qualitative research is conducted because a problem or issue needs to be explored. Creswell (2007) further states that qualitative research is conducted because a detailed understanding is needed and this can only be accomplished by talking directly to people and

allowing them to tell their stories. It is conducted as a means to empower individuals to share their stories, and hear their voices. It is conducted when the researcher wants to write in a literary, flexible style that conveys stories. It is conducted because the researcher wants to understand the context and settings in which participants in a study are situated. address. It is conducted to develop theories when partial or inadequate theories exist. And it is conducted when quantitative measures and statistical analyses simply do not fit the problem.

In contrast, Strauss and Corbin (1998) state that many quantitative researchers are apt to dismiss qualitative studies completely as giving no valid findings, but rather representing a little better than journalistic accounts. Quantitative researchers tend to be interested in whether and to what extent variance in x causes variance in y (Maxwell, 2005). Creswell (2009) describes quantitative research as a means for testing objective theories by examining the relationship among variables. These variables, in turn, can be measured, typically by instruments, so that numbered data can be analyzed using statistical procedures.

Phenomenology

What is called phenomenology is not a rigid school or uniform philosophic discipline with an undisputed set of dogmas. Rather there is a great diversity in various points of view of thinkers and approaches who and which could be classified under the general rubric of phenomenology. Consequently, as a philosophical movement, phenomenology is marked by a variety of different forms, themes, ideas, problems, and issues and further developments and variations (Küpers, 2009). Yet, phenomenology is understood as an approach that involves returning to the experience in order to obtain a comprehensive description that provides the basis for a reflective structural analysis that portrays the essences of the experience (Moustakas, 1994). The word phenomenology is derived from the Greek meaning “to bring into the light” and the

current definition encourages an approach that looks beyond initial appearances (Pringle, McLafferty, & Hendry, 2011). Its primary position is that the most basic human truths are accessible only through inner subjectivity, and that the person is integral to the environment. Phenomenological research is thus inductive and descriptive. Phenomenology is a disciplined, rigorous effort to understand experience profoundly and authentically. In this effort, phenomenology becomes quite complex. Further, it is hardly monolithic; there is a wide range of phenomenological methodologies and themes. For example, several scholars emphasize the hermeneutical or interpretative aspect of phenomenological inquiry; others strive to honor a philosophical tradition of phenomenology; still others work in the space between phenomenology and post structuralism (Pinar & Reynolds, 1992). Simply put, a researcher utilizing phenomenology aims to understand the cognitive subjective perspective of the person who has the experience and the effect that perspective has on the lived experience (Flood, 2010).

According to Kockleman (1967) the term phenomenology was used as early as 1765 in philosophical writings. Spielberg (1982) notes that phenomenology was first documented in the 1764 book *Neues Organon oder Gedanken uber die Erforschung und Bezeichnug des Wahren und der Unterschediung von Irrtum und Schein* by Johann Heinrich Lambert. Further, Speilburg (1982) notes that for Lambert phenomenology was a theory of illusion and of its varieties, forming in this role the concluding fourth part of a study of the means for finding the truth.

Since the mid-1700s phenomenology has typically fallen into two major paradigms, that of Edmund Husserl and Martin Heidegger. Husserl's philosophical ideas (Transcendental) gave rise to the descriptive phenomenological approach to enquiry (Flood, 2010). In contrast, Heidegger suggested that rather than focus on people or phenomena, the exploration of the lived

experience or “dasein,” the situated meaning of a human in the world should be the focus (Hermeneutic) (Flood, 2010).

Pinar and Reynolds (1992) note Van Manen’s (1984) four "procedural activities" to guide a phenomenological exploration. First, the phenomenological investigator chooses a phenomenon that interests him or her in a serious way and simultaneously pulls him or her into the world. Authentic phenomenological research is not narcissistic nor is it idealistic in the classical philosophical sense. Serious phenomenological research attunes and pulls the investigator and the student more deeply into the world. Second, the phenomenological researcher investigates the identified phenomenon as it is lived, not merely as it is theorized. Third, the phenomenological researcher reflects upon the essential themes or structures that characterize the phenomenon. Finally, the researcher describes the phenomenon via the art of writing.

Edmund Husserl – Transcendental Phenomenology

The philosopher Edmund Husserl (1859-1938) is considered the founding father of phenomenology, but others who have also used and substantially contributed to phenomenological ideas include Heidegger, Sartre, Schütz, de Beauvoir, Merleau-Ponty, Berger and Luckmann, Ricoeur, Garfinkel, Bourdieu, Derrida, Giddens, and Habermas. The different phenomenological routes they have taken suggest that it is practically futile to attempt to identify one single doctrine in phenomenology; rather, it is better to see it as a movement united by a common core (Aspers, 2009).

Nonetheless, Husserl, in response to his disillusionment with natural science as a means of studying human experiences, developed transcendental phenomenology. He saw phenomenology as a foundational science underlying all of the sciences and sought to clarify,

through the use of critical reflection (i.e., rationality) and description, the foundation and constitution of knowledge in consciousness (Hein & Austin, 2001). He contended that knowledge stems from conscious awareness and that the mind is directed toward objects (McConnell-Henry, Chapman, & Francis, 2009a). For Husserl, the aim of phenomenology is the rigorous and unbiased study of things as they appear in order to arrive at an essential understanding of human consciousness and experience (Dowling, 2007).

Indeed, when Husserl insists that phenomenology, the science of the personalistic attitude, is a "rigorous science," he is intent on carrying over this rigor from the natural sciences, but with a fundamentally different sense of rigor. What makes the natural sciences rigorous is that they are exact and produce repeatable results under reproducible conditions and what they ascertain is laws of nature. However, their results pertain to factual entities in nature (plants, animals), and the laws they formulate are laws with respect to factually existing entities. The laws can only be formulated on the basis of things existing in nature (Luft, 2005). Phenomenological rigor on the other hand was one of Husserl's central goals, which was to provide a method for doing phenomenology and the centerpiece of his method involved "bracketing," "epoche," or "phenomenological reduction." The goals of the aforementioned methods were to provide a way to turn our attention from naïve absorption in the perceived world to enable us to study intentionality, our ways of representing the world in our conscious mental states (Thomasson, 2007).

Husserl asserted that to generate valid data it was first necessary for the researcher to put aside any presuppositions that he/she might have in relation to the question. He termed this *epoche*, but the concept is also referred to as "bracketing" or "reduction." What resulted was information that was fundamentally epistemological in nature. It provided a description of the

experience, but made no attempt to derive meaning from the incident. Famous for saying "back to the things themselves," Husserl endeavored to present findings that were pre-reflective, prior to it being categorized (McConnell-Henry, Chapman, & Francis, 2009a). Conversely, phenomenological epoche does not eliminate everything, does not deny the reality of everything, and does not doubt everything, it doubts only the natural attitude, the biases of everyday knowledge, as a basis for truth and reality. What is doubted are the scientific "facts," the knowing of things in advance, from an external base rather than from internal reflection and meaning (Moustakas, 1994). Yet, Moustakas (1994) does acknowledge that perfect epoche is rarely achieved. He states that some entities are simply not "bracketable." There are life experiences that are so severe, intense, and so ingrained in us that they cannot be reached. However, he is hopeful that epoche will offer a resource and process for the actual nature and essence of things to be disclosed more fully, allowing things to reveal themselves to us in knowledge and truth (Moustakas, 1994).

Martin Heidegger – Hermeneutic Phenomenology

Martin Heidegger (1889-1976) developed another phenomenological approach known as hermeneutics meaning interpretation. It differs from Husserlian phenomenology, in that the researchers bring their own understanding and experiences to the research process, whereas the former advocates "bracketing" (Mapp, 2008). Heidegger embarked on a phenomenology of human being, or, as he called it, *dasein*, a term denoting the essential nature of the human being, which includes the ability to inquire into the nature and possibilities of Being. In Heidegger's thinking a person exists as a being both in and of the world. Heidegger asserted that nothing can be encountered without reference to a person's background and pre-understanding, and that we cannot have a life in the world except through acts of interpretation (Tan, Wilson, & Oliver,

2009). In other words, he differs from Husserl in his views of how the lived experience is explored, and he advocates the utilization of hermeneutics as a research method founded on the ontological view that the lived experience is an interpretive process (Dowling, 2007).

Heidegger, a student of Husserl, challenged bracketing, by suggesting that the researcher is as much a part of the research as the participant, and that his or her ability to interpret the data was reliant on previous knowledge. Heidegger called this prior understanding *fore-structure*. He postulated that there is no such thing as interpretive research, free of the judgment or influence of the researcher (McConnell-Henry, Chapman, & Francis, 2009b). This challenge can be traced back to a dispute between Husserl and Heidegger over Husserl's *Encyclopedia Britannica* article on phenomenology. Heidegger's message was simple: "Understanding is never without presuppositions. We do not, and cannot, understand anything from a purely objective position; we always understand from within the context of our disposition and involvement in the world" (McConnell-Henry, Chapman, & Francis, 2009b).

Transcendental or Hermeneutic

As demonstrated in the literature review, there is plenty of information regarding academic improprieties, scandals, and academic clustering; yet absent in the literature are the voices of the student athletes' perceptions of the phenomenon of clustering. Scholarly investigation is needed and through investigations the divide between athletics and academics can perhaps be bridged. As such, Heidegger's method of hermeneutic phenomenology offers a framework that supports promoting the student athlete's voice because it is descriptive in nature. Moreover, the application of Heidegger's phenomenology is a means to investigate the lived experience of others while also incorporating the researcher's pre-understanding to add richness to overall investigation. Pre-understanding is not something a person can step outside of or put

aside, as it is understood as already being with us in the world. Heidegger went as far as to claim that nothing can be encountered without reference to understanding a person's background (Laverty, 2003).

In contrast, Husserl's method of transcendental phenomenology, though descriptive, does not place context around the experience. The aim of this study was to examine the lived experience, which allowed the researcher to bring forth his personal experience with academic clustering. It also allowed him to build instant rapport and credibility with participants, enabling him to pose and ask questions that might otherwise not have been asked. And it allowed him to interpret and comprehend the responses of participants not just at face value but connect it to deeper meanings within the culture of intercollegiate Division I athletics. This personal insight of the researcher undoubtedly added richness to the overall study without compromising the integrity of the participant's descriptions.

Accordingly, Creswell (2009) states that in qualitative research the researcher's role is typically involved in a sustained and intensive experience with the participants. As such, this introduces a range of strategic, ethical, and personal issues into the qualitative research process. Further, the inquirer should explicitly identify their biases, values, and personal background that may shape the interpretation of the study. As necessary in hermeneutic phenomenology the researcher has disclosed his relationship with academic clustering in the previous chapter.

Participants

The term "sampling" in qualitative research is problematic for some because it implies the purpose of representing the population sampled. Research methods texts typically recognize only two main types of sampling, probability sampling and convenience sampling. In probability sampling each member of the population has an equal chance of being selected, which some

consider "the highest form of quality research," whereas any other form is a non-probability sampling, or in other words a convenience sample (Maxwell, 2005).

The researcher drew from his network of former student athletes to determine if they met the criteria of being a clustered student athlete (See Table 1). In doing so, before the researcher conducted his formal interviews, he conducted pre-interviews to determine their relationship with academic clustering. The sampling for this study is then purposeful sampling, meaning that all participants met a specific criteria. Creswell (1998) recommends that an adequate sample size should be at least three individuals but no more than ten individuals, which the researcher adhered to. The specific number of participants was based on when saturation of information is reached as described by Seidman (1998). The researcher found participants who fit the following criteria as reflected in Table 1:

Table 1.
Criteria for Selecting Participants

Criteria
Former Division I student athlete
Participated on a football or men's basketball team
Received a full athletic scholarship
Confirms that he was a part of a cluster

Further, each participant had first-hand experience with clustering; were interested in understanding the implicit and explicit impact of clustering; willing to participate in one-on-one interviews with the researcher; allowed the researcher to tape-record all interviews; and agreed that the data can be published as long as their identity is not revealed.

Data Collection Procedures

In order to obtain the information needed to answer the research question, interviewing was utilized. Interviews provided opportunities for participants to describe the situation in their own terms. It was a reflective process that enabled the interviewees to explore their experience in detail and reveal the many features of that experience that have an effect on the issue investigated (Stringer, 2007). Typically, qualitative in-depth interviews are much more like conversations than formal events with predetermined response categories. The researcher explores a few general topics to help uncover the participant's views but otherwise respects how the participant frames and structures the responses. The participant's perspectives on the phenomenon of interest should unfold as the participant views it, not as the researcher views it (Marshall & Rossman, 1999).

Specifically, the researcher utilized Seidman's (1998) "three interview series" that is designed for phenomenological studies. This method calls for having three separate interviews. The first interview established the context of the participants' experience. The second allowed the participants to reconstruct the details of their experience within the context in which it occurred. And the third encouraged the participants to reflect on the meaning their experience holds for them. The scheduling goal was to adhere to Seideman's (1998) suggestion of spacing the interviews between three and five days apart. This spacing allows time for the participants to ponder the preceding interview but not enough time to lose the connection between the two (Seidman, 1998). Further, the researcher adhered to the suggested length of 90 minutes.

Data Analysis

Qualitative analysis is not about mere counting or providing numeric summaries. Instead, the objective is to discover variation, portray shades of meaning, and examine complexity. The goals of the analysis are to reflect the complexity of human interaction by portraying it in the words of the interviewees and through actual events and to make that complexity understandable to others (Rubin & Rubin, 2005). Thus, the impulse to impose some form of organization and order to data can be overwhelming at times with the mass of seemingly unconnected notes and scribblings, interview tapes, and transcribed conversation (Mason, 1996).

Accordingly, the researcher implemented Marshall and Rossman's (1999) analytical procedures that fall into six phases:

Phase 1 – *Organizing the Data*: Reading and re-reading data to become familiar with it in intimate ways. In some instances, direct transfer onto pre-developed data recording charts is appropriate.

Phase 2 – *Generating Categories, Themes, and Patterns*: This is the most difficult and complex phase that demands a heightened awareness of the data. As categories of meaning emerge, the researcher searches for those that have internal convergence and external divergence.

Phase 3 – *Coding the Data*: This is the formal representation of analytical thinking. The researcher applies some coding scheme to categories and diligently marks passages in the data using codes. Codes may take several forms: abbreviation of key words, colored dots, numbers. Computer software typically relies on abbreviations of key words.

Phase 4 – *Testing Emergent Understandings*: As themes and categories emerge, the researcher begins the process of evaluating the plausibility of his developing understanding and exploring them through the data. Part of this phase is to evaluate the data for their usefulness and centrality; in other words exploring how useful the data is in illuminating the question being explored.

Phase 5 – *Searching for Alternative Explanations*: The researcher should search for other plausible explanations.

Phase 6 – *Writing the Report*: The research genre this doctoral thesis will fall under is the Realist tales, which are the most recognized. This report displays a realist account of the culture under study, and represents published articles or scholarly monographs in third-person voice with clear separation between the researcher and the researched. For example, the report states that "the data revealed" over "I interpreted this event."

According to Creswell (2009) qualitative researchers often use general procedures in a research proposal to guide the researcher and then incorporate a specific analysis method. In adhering to Creswell's (2009) recommendation, the researcher incorporated Moustakas'(1994) modification of methods of analysis suggested by Stevick, Colaizzi and Keen. The following is a description of each particular step:

1. Using a phenomenological approach, obtain a full description of your own experience of the phenomenon.

2. From the verbatim transcript of your experience complete the following steps:
    a. Consider each statement with respect to significance for description of the experience.
    b. Record all relevant statements.
    c. List each non-repetitive, non-overlapping statement. These are the invariant horizons or meaning units of the experience.
    d. Relate and cluster the invariant meaning units into themes.

e. Synthesize the invariant meaning units and themes into *a description of the textures of the experience*. Include verbatim examples.
f. Reflect on your own textural description. Through imaginative variation, construct *a description of the structures of your experience*.
g. Construct *a textural-structural description* of the meanings and essences of your experience.

3. From the verbatim transcript of the experiences of *each* of the other *co-researchers (participants)*, complete the above steps, a through g.

4. From the individual textural-structural descriptions of all co-researchers' experiences, construct *a composite textural-structural description of the meanings and essences of the experience*, integrating all individual textural-structural descriptions into a universal description of the experience representing the group as a whole (Moustakas, 1994, p. 122).

Furthermore, the researcher utilized the qualitative software package MAXqda (http://www.maxqda.com/) for the systematic analysis and interpretation of interview texts that have been generated. According to Creswell (2007) MAXqda is a powerful analysis tool for developing theories and testing theoretical conclusions.

In short, the researcher's six primary steps in providing this analysis included: (1) Data Managing – create and organize files for data; (2) Reading, Memoing – read through texts, make margin notes, form initial codes; (3) Describing – describe personal experience (4) Classifying – develop significant statements and group said statements into meaning units; (5) Interpreting – develop a textural description; develop a structural description of 'what happened,' and develop the 'essence' of how the phenomenon was experienced: and finally (6) Representing, Visualizing – present a narration of the essence of the experience in tables, figures, or discussions (Creswell, 2007). Table 2 shows the work plan used for data collection and analysis activities.

Table 2.

Data Collection and Analysis Plan

Activity	Timeframe
IRB	January 2012
Conduct and analyze interviews	February – March 2012
Organize and read data	March 2012
Create themes and codes	March – April 2012
Code data	March – April 2012
Writing the report	May 2012

Trustworthiness

Maxwell (2005) states there are two types of threats to trustworthiness that are often raised in relation to qualitative studies: Researcher Bias and Reactivity.

> *Researcher bias* is not concerned with eliminating variance between researchers in the values and expectation they bring to the study, but with understanding how a particular researcher's values and expectations influence the conduct and conclusion of the study (which may be either positive or negative) while avoiding negative consequences.
>
> *Reactivity* is the effect of the researcher on the individuals studied—essentially trying to understand how the researcher is influencing what the informant says, and how this affects the validity of the inference the researcher can draw from the interview (for example, leading questions).

Creswell (2007) offers eight validation strategies to help increase trustworthiness. Prolonged engagement, triangulation, peer review, negative case analysis, clarifying researcher bias, member checking, rich and thick description, and external audits. Creswell (2007) further states that qualitative researchers should engage in at least two of these strategies. Accordingly, the research study applied three methods: clarifying researcher bias, member checking, and peer review.

Clarifying Researcher Bias: The researcher must comment on past experiences, biases, prejudices, and orientations that have likely shaped the interpretation and approach to the study.

Member Checking: The researcher solicits participants' views of the credibility of the findings and interpretations. This involves taking data analyses, interpretations, and conclusions back to the participants so that they can judge the accuracy and credibility of the account. The researcher should not present them raw data, but present them themes and descriptions and inquire about their views of the analyses and what might be missing.

Peer Review: This provides an external check on the research process. The peer reviewer keeps the researcher honest, asks hard questions about methods, meanings, and interpretations and provides the researcher with the opportunity for catharsis by sympathetically listening to the researcher's feelings.

Protection of Human Subjects

All participants were invited to participate in this research on a voluntary basis. Accordingly, the researcher was guided by Seidman (2006) eight points of informed consent:

1. An invitation to participate in what, to what end, how, how long, and for whom?
2. Risks: outline the potential risks of vulnerability or discomfort for the participants that might result from taking part in the research.
3. Rights: outline the rights of the participants. These rights are designed to mitigate the vulnerability or discomfort and should include an explicit statement about the research being voluntary.
4. Possible benefits: modestly outline the benefits of the study in general.
5. Confidentiality of records: steps the researcher will take to make sure the participant's identity is kept confidential.
6. Dissemination: How the research will be disseminated and seek explicit release for the extensive use of the participant's words.
7. Special condition for children: participants under 18 years of age must be provided a parental consent form.
8. Contact information and copies of all forms: clarifies how to contact the researcher and the local IRB if the participants have any questions about their rights.

Moreover, the researcher completed the National Institute of Health (NIH) web-based training course, *Protecting Human Research Participants* (Certification Number 651669 dated 03/10/2011). Anonymity of all participants and universities was paramount and pseudonyms were used and applied during the entire report.

Conclusion

As presented in the current literature, academic clustering appears to be a symptom of the dichotomy between academics and athletics. Clustering, if exercised as a means to "game" the system from genuine academic pursuits, threatens the very foundation of higher education. This

study demonstrates an opportunity to engage former student athletes who have experienced clustering and can articulate the nuances of such a phenomenon. The scholarly research studies that have been dedicated to academic clustering, Case, Green and Brown (1987), Fountain and Finely (2007), Sanders and Hilderbrand (2003), are all quantitative. Furthermore, many more studies regarding intercollegiate athletics focus on statistically quantifiable items: graduation rate, APR score, GPA, and SAT/ACT score.

The gap in the scholarly literature is the student athletes' voices. The literature typically speaks about them, their behavior, their grades, their test scores, thereby concluding who they are without ever talking to them. This doctoral thesis attempted to complement the current research on clustering qualitatively by adding the student athlete's voice. The method of phenomenology is most appropriate in supporting the goal of describing the lived experience of the clustered student athlete. This method of analysis allowed for an in-depth examination that may affirm some preconceived notions, bring to light unanticipated concepts, as well as negate some commonly held beliefs. In addition, this research study attempted to serve as an impetus to further examine academic clustering among the scholarly community. Moreover, this thesis can be of benefit to athletic administrators and athletic reformers interested in exploring the phenomenon of clustering—why it happens, how it impacts the student athlete, and how the dichotomy between academics and athletics can be better understood.

Chapter IV. Findings

The purpose of this research was to bring to light the lived experiences of former Division I student athletes who have been academically clustered. The gap in the literature is the perspective of the student athletes who are often talked about but not talked to. Thus, the purpose of this chapter is to analyze the interview data. First, data analysis using Moustakas' (1994) modified version of the Stevick, Colaizzi, and Keen protocol are presented, specifically the thematic analysis that resulted in seven themes and 43 invariant constituents. Next, based upon the thematic analysis the researcher presents a textural and structural description of each participant followed by a composite textural and composite structural description for the entire sample of research participants. Lastly, a synthesis of the composite textural and composite structural description is presented capturing the essence of being academically clustered.

Thematic Analysis

Moustakas' (1994) modified version of the Stevick, Colaizzi, and Keen protocol requires the researcher to list all non-repetitive statements from the verbatim transcripts. These statements are also known as the invariant constituents. Next, this protocol requires that all similarly themed invariant constituents be placed together into a broader category or theme. Accordingly, the researcher analyzed the verbatim transcripts of all seven participants' experiences of being in an academic cluster in order to determine the significant, relevant, and invariant meanings that provide living descriptions and highlights of the experience. The researcher derived 43 invariant constituents and clustered them into seven themes as reflected in Table 3:

Table 3.

Thematic Analysis

Themes	Invariant Constituents
Significance of family and their influence	Expected to go to college Valued education Fear of disappointing parent(s)
Education growing up (pre-college)	Engaged academically in grade school Aware that I was supposed to do well School wasn't easy Lacked confidence Aspired to college Didn't aspire to college
Athletics while growing up	Played all sports Athletics overshadowed academics Athletics was my identity Athletics boosted my confidence
Being recruited by college scouts	Receiving letters Coaches calling house Official campus visit Very little academic message Heavily sport focused Tired of process Why I signed with school
Expectation of college	Potential career goals Potential majors Didn't want to fail out
College academic experience	Relationship with academic advisor Lack of academic guidance Placed in class and/or major Felt stuck in major Built-in network of teammates in classes Special treatment received (Tests) My schedule Coaches' message No need to study Study hall

Reflections of clustering	Culture of clustering Recognized cluster Personal responsibility How clustering happens Keep'em eligible Athlete first Lost academic opportunity Meaningful education

Thematic Analysis Description

From the invariant constituents the researcher constructed thematic portrayals of the experience. The following represents the clustering of meanings into core themes. Likewise, the following excerpts and data represent the distinctive nature of clustering for the participants.

Theme One: Significance of Family and Their Influence

The data revealed that family influenced each of the seven participant's views of education. All of the participants identified the importance their mother and/or father had while growing up. For all of the participants their parents valued education and believed it was important in order to have a good life. Consequently, most of the parents expected college attendance by their sons. Interestingly, four of the seven participants explicitly said they were fearful of failing out of college and disappointing their parent(s). The family influenced in no particular order aspects such as (1) choice of high school (2) expectation to get good grades in K-12 and graduate high school (3) the college chosen (4) fear of disappointing parents and (5) to get a college degree. These factors accounted for how each individual pursued higher education.

Theme Two: Education growing up (pre-college)

The general consensus among all participants was that they were fairly engaged in education at one time, typically in elementary school. Then at specific points along the K-12 spectrum they lost interest in school and became more interested in sports, socializing, and girls. As they all progressed into high school sports became the dominant theme in their lives. At the same time every individual's confidence in his academic abilities decreased. Nonetheless, they all aspired to reach college, though some did not have that aspiration until they were being recruited to play college athletics.

Theme Three: Athletics While Growing Up

All of the participants began playing sports at an early age. The earliest noted age was seven years old, playing for an organized basketball league. As each participant grew up sports became more prevalent in their everyday lives. Many noted how they lived to play sports and how it became their identity. Likewise, playing sports boosted the confidence of each participant more so than academics.

Theme Four: Being Recruited by College Scouts

All of the participants during high school or junior college experienced the college recruiting process. For all of the participants the initial contact by college scouts came in the form of recruiting letters. Recruiting letters were noted as non-personalized mass mailings sent to all the area's top recruits to mid-level recruits. These letters typically are an advertisement about the institution and the football program. As the recruitment process advanced it became personalized via receiving phone calls from college scouts (coaches). During this process coaches attempt to connect with each participant on a more intimate level. The next phase of the

recruiting process was being offered a visit to each respective college. The NCAA allows every prospective student athlete five official campus visits. The intent of these visits was for each participant to have an opportunity to meet the coaches, tour the facilities, meet current players, and tour the campus. Each participant, however, noted that an academic message either by phone or official visit was hardly discussed. They all noted that everything was sports focused. After going through months of the recruiting process many of the participants said they were tired of the visits and phone calls and just wanted to sign with the school. Most chose to sign with their college based on proximity to family.

Theme Five: Expectation of College

Many of the participants entered college without an academic plan. Only one participant could clearly articulate his career ambition and how college would help him achieve his career goal. Most noted that when they arrived on campus their main goal was not to fail out. Three of the seven participants indicated that college was never their goal growing up. Two of those three said their parents never actively spoke about going to college until the athletic recruitment process began.

Theme Six: College Academic Experience

The academic experience for all of the participants varied somewhat, but by and large they all echoed similar sentiments. In particular, nearly every participant spoke of the lack of academic guidance from their academic advisor. They noted that not having a meaningful relationship with their advisor partly hindered their academic growth. Many felt they could not switch majors and "start over" because their scholarship would run out; therefore they felt stuck in their major. Every participant felt that being clustered provided a built-in network of

teammates and as a result, they did not have to make friends with "regular students." They all noted that being part of a cluster elicited certain benefits foremost having access to tests before they were administered. This type of special benefit created a sense of laziness and indifference toward academics because participants did not have to give full academic effort. Compounding their indifference toward academics was their daily schedule, which was experienced as having a "full time job." Their daily schedule was skewed heavily toward athletic-related commitments. Likewise, the times allocated for studying such as study hall for all the participants, was a "joke" in that no real studying took place. Many noted how they could not focus because it became a "goof off" session. And lastly, they all noted that the academic message they received from their coach did not support academic first.

Theme Seven: Reflections of Clustering

The data reveal that all seven participants view clustering as a residual phenomenon of "big-time" college athletics. All participants noted that clustering had its positive aspects though not many. In particular a few participants noted that clustering provided a sense of comfort in having familiar faces in a majority of their classes. They also noted that it was positive for student athletes who may not have otherwise been able to handle the rigors of college academics. Conversely, many didn't realize at the time the extent the culture of clustering had on their lives and how it would impact them in the future. Many see clustering as a means to keep student athletes eligible. And in doing so this creates lost academic opportunity and a meaningful education. However, they all realized and acknowledged the personal responsibility they should have had with their education.

Textural and Structural Descriptions

According to Moustakas (1994) a textural description is simply the "what happened" during the experience. This description is taken directly from the verbatim transcripts of each interview. Conversely, the structural description is a narrative of how each participant interpreted their experience and what conditions they believe led to their experience. The textural and structural descriptions sometimes overlap and are not necessarily exclusive to one or the other, but a guideline to reach the essence of the experience.

Participant Profiles

A brief description of the participants is presented in Table 4 below in order to introduce them prior to introducing their brief biography, textural descriptions, and structural descriptions.

Table 4.
Participant Profile

Pseudonyms	Age	Race	Sport	Major	Education	Current Career
Eric	33	Black/Chinese	Football	Criminal Justice	Bachelor's	State Accountant
Chris	29	Black	Football	Criminal Justice	Bachelor's	Family Assistant Coordinator
Harold	32	Black	Football	Criminal Justice	Bachelor's	Community Outreach Specialist
Michael	31	Black	Football	Criminal Justice	Bachelor's	US Federal Agent
Reggie	30	Black	Football	Criminal Justice	Bachelor's	Beverage Merchandiser
Gary	33	White	Football	Criminal Justice	MBA	Pharmaceutical Brand Manager
Brandon	33	White	Football	Criminal Justice	Bachelor's	Nursing Home Administrator

Biography: Eric

Eric identifies as being of mixed ethnic heritage; his father is African American and his mother is Chinese. Eric was born and raised in a suburban community in Northern California. He became involved in organized sports at the age of seven. He also valued academics as both of his parents are college graduates. For Eric, it was not a matter of if he would go to college, but what college he would go to. Eric noted that as he got older he excelled primarily in two sports: football and basketball. As he progressed in high school, sports took precedence in his life while academics subtly became secondary as he received athletic accolades. He recalls his college recruiting process as standard in that he was not a highly sought after recruit. Eric was being recruited by a few Pac 10 schools as a senior but never offered an athletic scholarship by them. He was offered a full football scholarship to a smaller conference school. Reluctantly, he declined the scholarship offer at the advice of his father and enrolled at a well-known football program at a private Midwestern university. After one year of not adjusting well academically and athletically he decided to move back home where he attended and played football at a junior college. After one full year of junior college he accepted a full scholarship offer to a northeast public institution where he played football and graduated with a degree in criminal justice. Upon graduating from college Eric was offered a tryout with one NFL team but declined because he was physically and mentally "burned-out" with football. At the same time Eric lacked career direction and took several entry level jobs. He eventually realized his passion for numbers and is now a state accountant, married, and has two young children.

Eric: Textural Description

From the moment Eric enrolled in college he had an ambition to play professional football in the NFL. "My main focus was what can I do to get to the league (NFL). So I really didn't have a plan (academically) of what I wanted to do." This kind of ambition is bold, yet can be detrimental to academic success. "I was doing this football thing and you know that overshadowed everything else." This ambiguity toward his academics allowed Eric's academic advisor to steer him to a particular major. Eric recalls his advisor saying, "why don't you do criminal justice and you could change it later on if you think of something else?" Eric states, "That's how it basically went, no lie. It wasn't like what are you interested in or anything like that, it was why don't you do criminal justice and if want to change it, you can change it later and I went along with it." Lack of direction was central to Eric being steered into a cluster. "I'm out here, there's so much stuff going through my mind, I was second guessing my decision of going out there and you know. I was home sick and all this stuff was going on."

Furthermore, Eric was frustrated by the fact that his "prescribed" major was not discussed in reference to post-college employment prospects by his academic advisor. "I didn't hear shit about jobs, I can tell you that much. Even when I graduated near the end of my senior year it was like what am I going to do with this, you know. And I know, I know for a fact it wasn't something discussed when the talk about what do you want to major in, as far as what it would lead into, I had no idea. It was, why don't you try this major and that was it. It was, no you could do this or that with this degree."

Likewise his coaches did not provide much guidance either. "The coaches, I wouldn't, I can't fault them for not be as involved in my academics. I mean they're there to coach football. They probably don't know much of the ins and outs of the academic programs anyway."

Similarly, Eric recognized that his coach's involvement in his academics would be fleeting at best. "Other than if I had to go to study hall that was about the only thing (laughter) that they ever talked about, my academics…I may have spoken with Coach Smith about my academics, how things were going. Even if they were going bad, I told him they were okay. It wasn't like someone was hounding me about my academics."

While in the cluster Eric became cognizant that something was awry given that many of his teammates were in the same major. "Usually you hear communications or physical education, I didn't think criminal justice was the jock major, but as I started taking classes I noticed all the football players were all in the same classes as me and that's when I figured out that was the football major." Being in the cluster led to feelings of self-consciousness and shame for Eric, "sometimes I would sit in my room and think, damn man, I didn't want to be that dude, I didn't want to be that dude with the communication major and here I am a criminal justice major and I'm that dude in that major."

During the cluster experience Eric said that "whether it was intentional or not, I believe football was the focus, not to say that nobody, I wouldn't say this about the coaches that they didn't care we weren't studying. But it was obvious, we were football players, we're expected to, our football-related activities would come first before academics." Memories of academics during the football season were recalled as, "I knew during football season my grades were going to be crap and after football season they would be okay. And that's just something I understood." In particular, this belief in inevitable poor grades can be attributed to realizing the time and energy football would take. "Football was time consuming, I mean not only was it time consuming, you're running around and everything else, you got to sit up in these football meetings and pay attention. So it's not only the time, it's the energy, I caught myself falling

asleep in a couple classes, I was just tired. It's not like football you're just walking around in the morning, going on daily stroll with your dog, you're out there hitting, running fast, you're exerting a lot of energy and after that I was expected to go to class and study and all that stuff, the body can only handle so much."

Eric realized the benefits of being in a cluster, specifically receiving tests prior to tests being administered. "For the majority of the classes, yeah, I had the tests, they were all multiple choice tests and it wasn't hard to come by, the old tests just in different order. Most of the classes we had the answers." Having the tests lead to feelings of disenchantment and laziness with academics. "If I had the test, I had all the answers for the test in that class so I knew that I didn't need to study for that class." Conversely, Eric was able to draw a comparison between courses in his major to non-major courses. "I minored in political science and those classes were way different than the criminal justice classes where I didn't have all that inside knowledge so I had to really study for those classes, so if I could get the answers for the test in criminal justice I could focus more on the political science classes."

Also a noteworthy benefit of being in the cluster for Eric was the built-in network of teammates that took many of the same classes as him. "If you're in a certain major you're going to be in classes with teammates and if they're working together to study for a final or project you have that, you're with somebody that you're comfortable with and that makes it easier to work on a project of something like that."

Eric's entry into the cluster appears typical in that he was steered into his major by his academic advisor. As a result, Eric's experience in the cluster was highlighted with many commonly associated occurrences that a clustered student athlete experiences. In particular five core themes emerged: 1) He had no personal academic plan. 2) He received minimal if any

guidance from his academic advisor. 3) He felt there was an imbalance of time devoted to football. 4) He received special benefits such as tests. 5) He felt comfort in having teammates in the same classes.

Eric: Structural Description

Many feelings emerged as being associated with his experience in the cluster. In particular, his own lack of academic direction, not having a meaningful relationship with his academic advisor, a belief that maintaining academic eligibility for student athletes was his academic advisor's primary role, a perception that the divergent athletic/academic culture was correlated with revenue, and a belief that academics was implicitly made secondary to athletics.

For Eric, attempting to articulate his academic ambition was frustrating and something he never attempted before. He was conscious that he needed to declare a major immediately because he was a junior college transfer, and he found this task daunting. His personal feelings of ambiguity toward academics compounded by the need to declare a major pressured Eric into accepting the suggestion of his academic advisor to major in criminal justice. Reflecting on that moment Eric confessed that "I'm stuck in my counselor's office trying to figure out my major and just anything sounded good to get out of there and I said okay." Eric strongly believes that his undeveloped academic goals needed to be vetted and nurtured more by his academic advisor. He wanted his academic advisor to have a discussion(s) about different majors and what these different majors could potentially lead to in terms of jobs. However, what he received from his academic advisor was quite the opposite, "a prescription of what to take."

Being academically clustered is tied to his belief that maintaining academic eligibility for himself and his teammates was the priority of the academic advisors and not developing a sound academic plan and/or possible career goals. "I just thought it was, they're just trying to keep

everybody as being eligible as they could. You got academic advisors, I'm sure they're getting direction from coaches, athletic director – hey you gotta keep these guys eligible, put'em in easy classes." As a consequence of being clustered Eric recognized how clustering doesn't help the student athlete develop academically. "So you're not really helping the student athletes find themselves if you're just, you know, setting them up for a major that's easy that they can stay eligible with." Eric refers to this as "conscious clustering." Similarly, Eric also believes clustering is tied to the monetary aspects of college sports. "Coaches, you know they have to answer to the athletic directors, boosters, and everybody, you know, people who are funding the program and stuff. You know, the coaches have an interest cuz they're getting paid a lot of money to coach and they want to keep their job."

Moreover, being kept eligible and in easy classes is implicitly tied to the rigorous schedule that Eric and his teammates had to manage. When he returned home after a "12-13 hour day" consisting of practice, film study, weight lifting and classes he desired only to "get off my feet and enjoy myself so I can wake up the next morning at 6 am and do it all over again." Day and night there is no time for concentrated focus on education. Without the cluster Eric may not have been able to manage such a rigorous schedule.

Eric wraps up his experience as, "I was involved in this system and I sort of let it happen to me. Some of the responsibility falls on me obviously because nobody is forcing me to do these things. There were adults there that could have sort of pulled me over to the side and been like hey why don't you think of this, or there's life after football. Or during that initial academic meeting say, why don't you come back and think about what you want to major in instead of making me choose my major during a thirty minute meeting. So I mean there's things that could

have been differently on both sides, it's part of the game, you just hope that people become aware of it.

Biography: Chris

Chris is a 29-year-old African American male. He was born and raised in an urban community in northern New Jersey. He describes his community as blue collar and hardworking though it has become riddled with crime as of late. His mother completed high school but did not attend college. His father did not complete high school but completed a trade school. As a child Chris was very active in sports, music, computers, and math. In high school Chris was selected for the academic honors program, which he notes was very prestigious. However, he became infatuated with athletics in high school and academics became secondary. He was a member of a highly ranked football program and began getting recruited by several well-known college football programs. He notes how football became his identity and how he dreamed of playing professional football. He selected his college based on the location so his parents could attend his games. Upon graduating with a degree in criminal justice, Chris attempted to play professional football though his attempts were unsuccessful. As a result, he was unsure about a career and accepted various sales jobs. Currently he is single and works as a family assistant coordinator.

Chris: Textural Description

Entering college Chris' initial academic goal was to study physical education to become a gym teacher but unbeknownst to him that was not offered as a major. "I always thought I'd become a gym teacher. I felt that they made good money, their job is fairly easy and it gave them an opportunity to also coach other sports." However, physical education was not offered as a major. "That was on me not doing my homework to see if they had physical education." Consequently, Chris explored the criminal justice major as advised by his older brother who

graduated with that particular degree. "I didn't feel I was pressured into a particular major (by academic advisors). I actually had criminal justice set in my mind as an option before I went to school. I kind of had it in my back pocket. That to say if I can't figure out a major that truly, that I am truly passionate about I'm going to give criminal justice a try." Interestingly, Chris' final decision to choose criminal justice appeared based more on logistics than actually based in solid interest. "And I said (to my academic advisor) where am I at right now with credits. And criminal justice seemed like the one I was further along and based on the other classes that I had taken. Well that's the one that I'm interested and I don't want to be here longer than four years, so let's get this going right now."

At first Chris did not notice the high number of teammates in his major. "As I was taking classes you start seeing more and more teammates in it." Initially Chris found having teammates in a majority of his classes a benefit. "It was nice at times to have that network of people that have the same major and you can say hey I missed class today what was the assignment. And you know people had your back. You didn't have to really socialize with the general students all the time to get the information. You weren't forced to make friends with people for information. Whereas you can text your teammate and get the information right away." Chris also found that clustering aided his ability to focus more attention on playing football. "It did allow me to devote more time to football. Because like I said, it's basically a network of people where resources are being offered for the group whereas other courses and majors not as many resources are being offered to the athletic department. And because we are getting this resource it's helping us prepare for exams and big assignments. Its saves time and that time is reinvested into film study, putting in extra work in the weight room, or extra time into resting, which is very important too."

Though clustering is advantageous in some regards, it did present problems for Chris. He felt it took away from his ability to be vocal and studious in class because he would be deemed the "go to person" for all his teammates' academic needs. "It kind of gets to a point where if you become visibly focused and vocal in class others (teammates) will kind of want to feed off of you. But not in the sense where they become as focused and vocal in class but more so you got all the answers where are they? It kind of gets to a point where you play dumb. You say no I don't know the answers just because you don't want to be that guy where 20 people for example are looking for the answer from you." Further, Chris speaks to feeling drained and questions his own pursuit of education because of overbearing teammates. "You're playing dumb to the point where it becomes habitual and you know what, what's the point of me knowing all of this stuff if people are just gonna kind of drain it out of me without any benefit on my end."

Similarly, Chris begins to question what employment prospects would be like because so many of his teammates are in the same major. "Wow there's a lot of us studying this. And you realize, you do think two steps ahead, you're trained as a student athlete to think a couple steps ahead. You say, when I get out of school you're gonna tell me we're all going for the same job, is there that many jobs in this field."

Likewise, because a cluster groups an individual with teammates who are also friends it distracted Chris from his ability to focus. "Because it was so many familiar faces it was kind of distracting because, you know, we all have sense of humors and we're all clowning around, and joking around." This sentiment was also echoed when Chris spoke about study hall (official organized study session), which is mandated for most student athletes to take if they are a freshman and/or below a certain GPA. "When you get a bunch of teammates together to do something that they really don't want to do and in a place that they don't want to be, you been

there for the majority of your day and now you're being forced to sit there and do your work, you know, like you feel you're not capable of managing your own time and do it around your own schedule. You know people had to be silly to keep their sanity. So it was a joke in the sense of you're getting a whole bunch of people in one big room and you expect them to get their work done, that doesn't happen."

While in the cluster Chris became suspicious of his academic advisor and the athletic department itself. Specifically, Chris felt particularly guarded with sharing his academic life. "I didn't really trust my advisor until my last year really. I felt as though if I went to them things would get back to coach. I mean if something was going wrong you would end up in the sand pit. I mean it was a very….you try to avoid discipline, being disciplined when possible, so that's what I felt." Moreover, Chris was conscious of the punitive nature that speaking to his academic advisor would result in. "I felt as though if they were aware of academic challenges going on there would be more oversight and more work given to you versus help. And you know, I felt I'd be better trying to work this out on my own." As a consequence Chris took this as an opportunity to reach out to individuals outside of athletics. "I actually sought help outside the academic program, because there was academic services for students. And as a student athlete you are a student so you have access to that in addition to what you have. And I actually felt more comfortable seeking assistance with professors directly through advisors through the university rather than the team. I felt like that was something I wanted to address confidentially and privately. I didn't feel like I had that privacy going to the athletic student advisors."

Chris' entry into the cluster is atypical in that he was not steered into the cluster by an academic advisor or coach. Nonetheless, Chris' experiences in the cluster resemble those who were steered into it. For example, Chris' textural description highlights six core themes: 1) He

was able to focus more on football because the cluster provided academic relief. 2) He benefited from having a network of teammates in his class to assist with homework and note taking. 3) He suppressed his own academic ambition to not be relied upon academically by his teammates. 4) He felt distracted in class because of the high number of teammates in his class. 5) He did not trust the athletic academic advisors and felt they put the best interest of the football program ahead of his own. 6) He questioned his employment prospects post college.

Chris: Structural Description

Chris was conscious of divulging any academic challenges he was experiencing to his academic advisors. He was acutely conscious that if he went to his academic advisor with any academic challenges it may have led to added time commitments in the form of increased study hall hours, tutoring sessions, or punishment by coaches thereby giving up more control of his life. "I just felt like that more work would be given to me, more oversight, more stress given to you than alleviating all those things and improving." During these instances Chris felt threatened by the possibility of losing the little control that he believed he had. Chris refers to participating in college athletics as a "full-time job," with days lasting "10-15 hours." As a consequence, he valued the little time he did have and was wary of doing anything to compromise that time.

Chris felt that academic clustering placed him in an uncomfortable position where he became relied upon by his teammates to help them academically. For Chris, he speaks of feeling drained by his overbearing teammates and a sense of obligation to help them regardless of their effort. "I felt like people weren't giving their best and they're still asking you for help. And at some point when people aren't giving their best you just stop helping them." Chris became frustrated and filled with anguish over his teammates' inability to help themselves as well as questioning his own academic effort. "What's the point of me knowing all of this stuff if people

are just gonna kind of drain it out of me without any benefit on my end." Chris became conflicted with helping his teammates who he genuinely cared about; however, they took more from him than he was able to give. As a result, Chris sacrificed his own academic ambition as a way to suppress his inner conflict so that his teammates would no longer rely upon him.

Chris' disillusionment with academics and his mistrust of the athletic department stems from his belief that athletics departments have financial incentives to cluster student athletes, which is not necessarily in the best interest of the student athlete. "If every single person on the team had a different major and if they requested academic assistance, it would look really bad on the team if they couldn't provide that. So if a third of the team does criminal justice, it's like wow we saved a boat load of money by having all these kids being able to fit into two study groups versus having thirty different tutors for each or having to pay a different tutor for different subjects." The superseding implication of Chris' sentiment is a loss of faith in a system that is supposedly there to genuinely help the student athlete.

For Chris, he used the analogy of being in a barrel to describe his experience with academic clustering. "Clustering itself, basically, you're put into a barrel with a whole bunch of humans in the barrel, you gotta find a way to stand out, take leadership, if you're in the cluster and you're not doing anything to rise above your teammates and you kind of settle with everyone else. You may get lost in the shuffle and your worth gets watered down. In order to stand out you gotta do the best you possibly can academically, network, meet other people retain as much info as possible. Start early with developing your resume and making connections career wise and being a leader and regardless if you're in a group with other people, it doesn't mean you can't individually stand out and be more noticeable."

Biography: Harold

Harold is a 31-year-old African American male. He was born and raised in an urban Massachusetts community. He describes his community as low income. In particular, he said his neighborhood was rampant with crime, gangs, and drugs. He grew up in a single parent home with his mother; he did not know his father. At the time, his mother's highest level of education was a high school diploma but she will graduate this spring with her bachelor's degree. As a child, Harold describes himself as mischievous. At the age of 14 he joined a gang and sold drugs. By the age of 16 he was arrested for his criminal activity. Nonetheless, Harold described himself as a decent student. He was also a member of the football team. By his senior year in high school he became a highly touted football recruit. He was offered scholarships to numerous universities. He chose his school based on location to stay close to his mother. Harold graduated with a degree in criminal justice. At the conclusion of his senior year he was offered multiple try-outs with the New York Giants, Minnesota Vikings, Denver Broncos, and Houston Texans but declined because he was physically and mentally "burned out" from football. He then took various jobs including security officer and juvenile counselor. He also unsuccessfully attempted to become a police officer. He has now returned to school to pursue his teaching certification. He is married with one daughter.

Harold: Textural Description

Harold entered college with little to no expectation of achieving academically or playing professional football. "I really didn't have expectations because you gotta remember where I was coming from, I'm selling drugs, making money. I loved playing football, but I really, I was just, that wasn't the main focus. It was more just being on the streets, chasing the women, chasing the money…you know that type of money. I thought I was going to be a drug dealer."

In terms of academic achievement Harold said, "when I got to college, it's like alright, I'm here, I'm gonna lift weights, do the academics, do what I need to do. I didn't have any expectations I was just like I'm here, I'm present, I'm here, there wasn't any expectations, no real goals." This lack of ambition is somewhat precarious and left Harold susceptible to being clustered. However, Harold did have one goal in mind, to major in criminal justice, though for an eccentric reason. "My thought process behind that (choosing a major) was that because I was already arrested and been in jail, just like well, I'm not trying to be fucked over by the law, so I need to know and understand the law and that's it and that's how I chose criminal justice." In addition, Harold speaks to his desire to be a gym teacher, but was discouraged by a friend.

Prior to choosing his major he experienced being steered into particular courses by his academic advisor. "They just gave me classes and told me what I need to take. These are the days you're going to be in class that fits yours schedule and that was it. This is your study hall hours and that was it." Harold didn't have much confidence in his academic advisor citing her incompetence as a reason for his frustration with academics. "I hated that bitch. She was horrible, she was horrible. She was the reason why I didn't get the classes or take the classes I was supposed to take my freshman year. She gave me classes. I don't know if that was her first year or what….I mean I don't know, I'm a freshman. I don't know jack. As a freshman you don't know jack. And just kind of set me off on a bad path.

Eventually that bad path led to extreme academic hardship for Harold. "I wasn't taking academics seriously. I failed out my very first year. I was partying every weekend. I knew I was redshirting (not participating in games, but allowed to practice) and I really didn't care." The catalyst of failing out was led by what Harold perceived as indifference about his grades from his coaches. "Let me just say this, coaches were only sincere because they want you to play. If you

weren't a guy who was playing…If a guy was third on the depth chart, I don't think they took you as seriously. My redshirt freshman year, there was no coach that was like come on you need to get your grades right. I failed out and there was no coach saying that to me, it was all academic advisor saying you got get your grades right to stay in school and to keep your scholarship. Coaches really didn't say anything to me until I was a backup and they knew if the starter went down I was playing, you see what I'm saying. That's when they kind of…you got to pick up your grades, you got to do this you gotta do that."

Interestingly, when Harold re-enrolled in school he declared criminal justice as his major not knowing it was a clustered major. "It didn't occur to me at the time. It didn't occur to me until after I graduated. It was just like wow, all these guys were in criminal justice and about ten of them stayed in that field and did something with it out of like twenty or thirty." Regardless of being in a cluster or not, Harold felt sure of one thing. "I was an athlete first. I felt that my athletic ability helped me get to where I was. I felt that if I kept my academic at a novice level, an intermediate level, I was okay. The focus on academics wasn't that strong. I wasn't really trying to grab A's and B's like that just trying to pass."

While in the cluster Harold had positive relationships with professors in his major. "I remember a professor named Karen Pine, she was particular toward the athletes. Then there was the guy who works for the football team, he was actually part of the criminal justice teaching staff. He wouldn't do any favors for us. But like if you were late for assignments, he would be like make sure you turn it in soon as possible. He wouldn't say you don't have to do the work or grade it differently, but he would give you more time a little bit more lenient in that aspect."

Nonetheless, Harold had access to tests prior to them being administered. "Well let me say this, one guy on the team had ways of getting tests before we actually took the test. So I

mean all you had to do was study the test and you'd get 100%. Yeah, I mean, guys would make money off the stuff, $20, $10." But Harold says, "I usually studied for the test unless I was just tired. It wasn't because of special benefits. If I didn't study it was because I was just being a dick head, I just didn't feel like studying."

Harold entered the cluster for a personal reason: to understand how to combat the law if he found himself in an unfavorable position with the law. Nonetheless, Harold experienced being steered into classes by his academic advisor when he first arrived as a freshman. Because he inadvertently found himself in a cluster, he spoke of five core themes that captured his experience. These five include: 1) He felt he was steered into classes by his advisor. 2) He felt that coaches did not care about his academic achievement unless it impacted his eligibility. 3) He considered himself an athlete first. 4) He had athletic-friendly professors 5) He had access to tests, which led to no real learning.

Harold: Structural Description

Harold's experience in the cluster was dictated by a strong belief that he was an athlete first, student second. In particular, this originated and was reinforced by the expectations of him as a football player to prepare himself athletically. In addition, Harold's own academic motivation was modest at best because eligibility was the primary focus.

Harold's belief that he was an "athlete first, student second" was the essence of his four years in college. This feeling was exacerbated and compounded by what he was expected to do as an athlete. "I mean you would just be studying tape alone, practice tape, game tape….I mean I did that more than I did for classes. I mean not even including practice, it was just game tape and practice tape alone was more than studying for school work."

Further, Harold was not concerned with being a high academic achiever. Rather, he was only concerned with maintaining eligibility allowing him to continue playing. "The focus was staying eligible. It was practice, it was getting better, getting stronger, getting faster. It was really the focus of education was staying eligible. It's not much more than that. I mean, you took it for what it's worth to stay eligible. Some people might look at it differently, I didn't. I just looked at it as I need to graduate cuz I promised my mother I was going to graduate and that I needed to get some type of education and that was it." Further, he notes the sentiments of his teammates as well. "A lot of the guys I hung out with thought the same way I did. We're here to play football and we're going to school to be eligible to play football. I mean guys would pass the class with C's. They're like trying to stay eligible. You're not really learning anything passing with C's, you're just there, you're present."

Lastly, Harold believes clustering is done knowingly. "I think, and it's just an opinion. I think a lot of academic advisor knew. They looked at the kids' grades and their GPA from high school then decided that this kid is a C, C- student or B, C- student and we're going to figure out a major for him that won't be too difficult for him to achieve. Because it looks bad on us if a kid fails out, we're not doing our job if a kid fails out. And this is me looking back it right now."

Biography: Michael

Michael is a 31-year-old African American male. He was born and raised in a suburban community in southern New Jersey. He describes his community as working class. His mother completed college as an adult and his father did not attend college. As a child, he says he was very curious academically and excelled in grade school. At the same time he participated in organized sports: football, basketball, baseball, and swimming. However, once he entered junior high school he became academically lazy and "academically overwhelmed." At this point in his

life he focused more on sports to his detriment. Progressing into high school Michael continued to excel in football while his academics continued to slip. Michael eventually transferred to a different high school in his senior year where they were committed to his academic growth. Michael was then able to make the necessary grades to become eligible for a football scholarship. Michael was a mid-level recruit and was pursued by some big-time football schools. He eventually made his college decision based on the close proximity of his family and girlfriend so they could attend his games regularly. Michael graduated with a degree in criminal justice. Upon graduation, Michael secured a job with the public defender's office as an investigator and then became a sworn federal police officer. He is married and has two young children.

Michael: Textural Description

Entering college Michael's ambition was to study business administration and become a CEO. "When I first got to campus I knew that's what I wanted (business administration). I thought that I was already in the process once you start taking classes. I thought I was in the process that I could declare it (business administration) once it came up." However, Michael was unaware that he needed prerequisite courses in order to declare business as his major. This lack of understanding prohibited Michael from pursing his ambition. Left without a definitive major to pursue, his academic advisor suggested that he major in criminal justice. "My advisor said criminal justice was the easier degree, the easier degree to get and some of classes that I already had can count toward that major so I can graduate on time. She said everybody is taking it and this is a good way to go about your courses, your major. Take this major and graduate with that. That was what had happened so I think I was forced more to take that major." Distressed by not being able to pursue his major of choice Michael says he felt "stuck in criminal justice. "To be honest with you, I didn't want to do criminal justice. I didn't want to do that major, I had no

intention of becoming a law enforcement officer. I really didn't have any intention on any of that stuff." Unfortunately, the only consolation he could find in the situation was in the belief that "at least I'm going to get my degree in something."

For Michael, he recognized early that criminal justice was a major widely chosen by student athletes. "It seemed like criminal justice was the major of the sports program. Football or basketball it didn't matter, everybody was in criminal justice." Because Michael was trusting of the athletic program he felt that clustering was normal. "I thought it was one of those football-friendly classes that everybody used to love to take when it came to college. It was one of those push through class. You pass the class and the teachers are football friendly and push you through and everything like that. It kind of had you eligible to play."

While in the cluster Michael became disenchanted with academics because of special benefits that he was able to receive. Specifically, Michael recalls being given tests for exams at study sessions prior to the test being administered. "A couple times they (football program) would have some type of study sessions where pretty much the actual test was provided. A test from a previous year and it's just worded up differently and changed up in different numbers and it was pretty much the same thing." Having this benefit, Michael's academic experience did not present much of a challenge. "You went in to the test and knew everything was right and then you leave and you know you already got an A. Or you get a couple wrong so you won't get a perfect score, but you know, it was really up there, you know you'd get an A or B."

If a test was not provided at a study session he would anticipate a teammate having it to share with him at some point before the test. "There were plenty of times I wouldn't study for the test. Sometimes I really didn't care about the test cuz I already knew that 10 minutes before class we would have the answers anyway. We weren't worried about the test the night before but it

was like we'd get it tomorrow. It was like a big group session right before the test and everybody would sit next to each other and pretty much, you know, look off each other's test or whoever was the main person who knew all the answers and we pretty much went down the line and everybody looked off each other's paper. That was pretty much it; there was really no worries about it."

And even when the attempt to study came up, specifically study hall, Michael felt that it was a waste of time. "We had that study hall. It was crazy you couldn't really do your work cuz it became a chat session. You can't put a whole bunch of guys' together, good friends, football players in a room and think they're going to study, no way…just didn't work that way."

Michael's entry into the cluster stemmed from not understanding the academic major declaration process. Therefore, unable to declare his desired major, his advisor steered him into a clustered major. Michael's experience in the cluster was highlighted with three specific core textural themes: 1) He had a lingering disappointment that he could not choose his major. 2) He lacked academic guidance from his academic advisor. 3) He had special benefits that led to academic disenchantment.

Michael: Structural Description

Michael never felt like he was a student athlete in the ideal sense of the term. "I didn't consider myself a student athlete. School was there but, you know, obviously I paid attention to it and I wanted to do well but I didn't look at it as a student athlete type thing but more of an athlete that just goes to school. Of course like I said I wanted to do good in school but I was more of an athlete." Driving this sentiment is that Michael did not have meaningful academic conversations with his academic advisor or coach. Also attached to the sentiment of not being an

idealistic student athlete was Michael's daily schedule that was overwhelming athletic focused which left him with little time to study and physically exhausted.

Michael lacked guidance academically from coaches as well as his academic advisor. He never recalled his coach emphasizing academics. "My coach's view on academics, of course he preached about it, but to be honest with you I don't remember him speaking about it that much. It wasn't like a big, a big thing that he would talk about. I remember at the time coming in as a freshman, you know, coming into college there was a lot of players that were failing out of school at the time." This implicit message compounded with the lack of academic communication by his academic advisors created a perception that academics were not important. For instance, Michael doesn't recall an academic advisor ever talking with him at any point about choosing a major or overseeing that he takes the appropriate courses in order to declare the major of his choice. "No, I don't remember them sitting down and taking the time out walking me through it as far as choosing the right major for you." The superseding implication of their inaction is Michael's personal disillusionment with academics and the waning value of it.

Michael's waking hours were spent abiding a regimented structure required to participate as a student athlete. "The typical day in football season was so tiring. We had the job of playing football. It was a lot going on, so sleep deprivation and stuff like that I do believe we really were deprived a lot of sleep and rest as we should have gotten. I always felt tired, I always felt, you know, my body was hurting and never felt like I could recover in a certain amount of time. We was always doing something we always had to be somewhere."

Thus it is not surprising that Michael felt he did not have to give full effort academically. Clustering helped save him time in terms of actually studying and perhaps was needed in order for him to survive the rigors of being a college athlete. Michael believes that the phenomenon of

clustering provided him a safe haven as opposed to if he was not in a cluster. "Without the cluster I would have had to apply and put forth more effort in school. As far as if I didn't have the cluster and if I was doing business administration I really think that I would have put more effort towards that major and that degree and definitely had to work harder and study a lot more."

Also not surprising is how he internalized his coaches' nonchalant views of academics, his advisor's lack of guidance, and his daily schedule that implicitly or perhaps explicitly signaled to him academics wasn't important. "School and classes became secondary. It was one of those things that once you figured it out, how to get by, it was like alright then I don't feel like going to class I'm not going to go. And you just hang out at home and stuff like that until practice starts. I did feel that school did become secondary."

Interestingly, Michael believes that academic advisors, coaches, and administration knew what was going on in terms of clustering. "And probably a lot of times, I'm thinking, it's probably the staff, support staff and stuff like that. They're trying to keep you so busy so you can focus more on football. And maybe your school work afterwards and that's it. There is no life outside of that world. It's just that and that's it. I'm thinking the people that kind of get you clustered it's the support staff, I would think."

Biography: Reggie

Reggie is a 30-year-old African American male. He was born in an urban northern New Jersey city and resided there until sixth grade. He describes his childhood community as the inner city where he attended a private elementary school. In the sixth grade he moved to a central New Jersey suburban community, which he describes as "a better area and more white." Neither his mother nor his father attended college. As a child he says he was very competitive in school

to the extent that he and his friends would compete for grades. He did not want his friends to get higher grades than him. As Reggie progressed into middle school his competiveness for academics declined because of girls, sports, and the desire to be socially accepted. Although he notes that he still maintained good grades because his dad ruled with an "iron fist" regarding academic achievement. Sports in high school became a big part of his life, in particular, basketball. He was being recruited to play basketball in college. Due to his large physical stature his peers encouraged him to play football. Thus, in his junior year he went out for the football team. By Reggie's senior year he became one of the area's best players. Reggie became a mid-level recruit and was recruited by a few major football programs. He eventually chose his college based on three factors: 1) the proximity to his home; 2) his best friend was offered a football scholarship to the same college; and 3) hearing about the good academic reputation of the college from his high school teachers. Reggie graduated with a degree in criminal justice. After college Reggie played two seasons in the Arena Football league. He was cut after his second season and decided that it was time to move on with his life. He is currently engaged and working as a merchandiser for a major beverage company.

Reggie: Textural Description

The experience of academic clustering for Reggie is one of indifference about his academic goals. Unsure of his interests and potential career aspirations he implicitly allowed his academic advisor to choose his classes for him without protest. "I didn't pick my schedule when I came to school. I don't remember how it worked out but when I came in school my schedule was handed to me and that was it. I didn't pick my classes. Those classes I'm assuming were picked by the football program's personnel." Though Reggie was unsure about his academics he believed that being given his classes by his advisor was "standard." "I didn't feel any type of

way because I didn't have anything to go by. It was standard issue when you first go through something and don't have anything to put it up against. I just thought this is how things worked."

As Reggie progressed into his sophomore year his major was decided not based on his interest per se, but by logistics. "I went into the academic office and my advisor sat me down and said well it's time to pick a major and I said to her well what do I have the most classes in? She looked at what I already took and said you have a few criminal justices classes that can go toward the major. Boom, sign me up I'm done, I'm out of here. And the reason why I had the criminal justice classes is because those are the classes I was put in when I came to school." Further, Reggie expressed a genuine lack of guidance by his academic advisor. "It wasn't a conversation, you sure, it wasn't any of that."

Eventually, Reggie recognized explicit benefits of being in a cluster, specifically receiving a test prior to it being administered. For Reggie this presented somewhat of a dilemma. "It was the first time I ever cheated on a test in my life. How they (teammates) got the test, I don't know, but it sure was the real deal and I used it (laughter). I'm not an idiot." Moreover, Reggie admits this was the only time he cheated on a test.

Conversely, Reggie felt trapped once in the major. "Some people switch majors, but in my mind was, listen, I played my freshman year so they're probably only going to pay my scholarship for four year is what I'm thinking. I started with criminal justice, I can't switch now. I strongly remember that thinking listen; I can't switch now so I'm going to stick with it. You see, they say you can switch if you want now, no, no…So if they're already paying for four years, I'm not switching. I'm not paying for anything so I got to get this done."

Reggie's entry into the cluster appears to be rooted in his advisor's initial selection of his classes as a freshman. Accordingly, when it came time to pick a major Reggie deferred to the

major in which he had earned the most credits. Reggie's experience in the cluster was highlighted with many commonly associated occurrences that a clustered student athlete experiences. In particular four core themes emerged: 1) Initially his classes were selected by academic advisors without his consent. 2) He lacked guidance from his academic advisor. 3) He was faced with a moral decision to accept special benefits or not. 4) He felt trapped in his major.

Reggie: Structural Description

Interestingly, Reggie did not consciously realize he was in a cluster or contemplate why many of his teammates were in many of the same classes. "In college you're living life you don't really, like now, start putting things together like why are we all clustered in this class. You don't think about things like that. You just go onto class especially in the end of class you're just goofing off. You never ask questions when you're playing sports, working out and all that stuff. You're not really thinking, like damn, why are we all in the same class, it was never a thought." For Reggie, his main concern was not about academics. "It was about football, parties, and girls and what we're going to do later on."

Reggie's lens through which he experienced college stems from his upbringing that never stressed going to college. He notes that he cannot recall his mother or father discussing college until he began being recruited to play college football. "I came in (to college) with zero expectations actually. I think maybe because my parents never went to school, to college, so I guess they didn't know what to expect. In turn because we never talked about it I didn't know what to think. It was just going there and going to experience it, whatever it is, it is."

In general, Reggie is aware of his own personal responsibility regarding his academics and life. In particular, he speaks about himself in relation to his academic advisor. "I can't expect an academic advisor to be worried about my life if I'm not worried about my life, you know

what I mean. I can't expect him to think I gotta get on Reggie to make sure he does something with his life. They're not my parents I can't expect him to do that. If I'm not coming to them, listen, I want to do this or that, what can you do for me. If I'm not reaching out to them, why would they have to reach out to me? That's why I don't have any ill feelings for what they do."

However, Reggie has a negative perception of the athletic department. Reggie describes the student athlete academic support services as "horrible." Specifically he didn't have a problem with his advisor but recognized the precarious position an advisor's job calls for. "Most of the people (academic advisors) were just trying to get by, they don't care if you're doing bad, unless, if you're on the verge of failing or something like that. Or if the coach says listen man, this guy is doing terrible, he needs study hall or whatever the case may be then they'll do something. But they are very much reactive than proactive. There was never a time where I felt as though for anyone would go out of their way like, you know, checking grades, he's doing bad, let me go grab him and talk to him…there was never any of that."

His negative perception is further compounded by the belief that clustering is done purposely. "The program, they do push you into, you know, easier subjects and things of that nature, to make it, I'm assuming, to make it easier on the student athlete. I'm thinking that's what they're thinking. And since, you know, as I said, when you're seventeen, eighteen coming into college, you're not thinking about academics too much, you just go along with whatever, whatever they're pushing for you." Reggie also acknowledged the personal responsibility of each student athlete. "I don't want to be unfair to the football administration. I think it's up to you. I can't say they didn't do anything. I think it all falls back to being an adult and making your own choices."

Biography: Gary

Gary is a 33-year-old Caucasian male. He was born in suburban New Jersey. He describes his childhood community as working class. He performed the best academically and was most engaged in elementary school. As he progressed into junior high he became less engaged, and in high school he describes his academic engagement as poor. His parents made the decision that he would attend Catholic high school because he started "running with the wrong crowd." Likewise, at this particular time sports and girls became his focus. At the conclusion of his senior year in high school he made the decision to repeat his senior year at a post-graduate preparatory academy. This decision was made so that he could mature mentally and physically. As a result, he was recruited to play Division I football and post-graduate school allowed him to genuinely focus academically. Primarily ivy-league schools and mid-major schools recruited him to play football as well as two schools in major conferences. He made the decision to attend his college based on the proximity to his family. Gary graduated college with a degree in criminal justice. After graduation he secured a position as a pharmaceutical sales representative where the company also paid for graduate school. Gary earned a master's in business administration. He is currently a brand manager for a large pharmaceutical company and is married with a newborn child.

Gary: Textural Description

Entering college Gary felt confident about his academics due to the one year he spent in post-graduate high school. He said post-graduate high school was where he was able to "engage and lock in academically." Thus, in his first year of college he was disappointed with the classes he was placed in. "Our counselors put us in the very basic foundation courses. I don't want to say rocks for jocks but they pretty much were." He did not hold his academic counselor in the

highest esteem. “You know, I would see her (academic advisor) occasionally for my classes and it was a matter of just kind of managing our class load and that was it.”

When it was time for Gary to pick his major he said it was his decision. “For the most part it was my decision. I chose it going into my sophomore year. And a lot of it was just because a lot of the foundational courses we had been taking counted against that major itself. It almost made it a no brainer, right? You got X amount of classes you already completed and they counted toward that major and decided to go forward with it.” Gary was also influenced by his teammates, the classes they took, and their opinions of courses and of professors. “Coming back to buddies on the team I would take things knowing that they’re going to be in it and knowing that they’re supposed to be decent or half decent classes.”

Gary recognized the underlying reason why he chose criminal justice as well as why his teammates did too. “I think a lot of people jumped in because they offer easy classes. We knew the professors well. We weren't guaranteed a decent grade but it was one of those things if you go and show up you’re going to pass a majority of the courses and they were set up that way.

Similarly, Gary recognized what the impact clustering had on him personally. “It really facilitated me taking a lazy path forward, man. I think you were so fully invested in the athletic part of it. Where academically it was, you know, you kind of got a little bit of a break and that’s why we went that direction.” In particular, Gary speaks of special benefits that facilitated his laziness. “Guys would have note takers for them and share them with you and tests and other crap like that.” Even more, having access to tests further facilitated his laziness. “A majority of the cluster classes that you’re speaking to would have a test circulating. Would they be the exact test, no, but they would very similar as far as steer you in the right direction. They would be a former copy of test that would be administered for classes, but never the exact one and it kind of

just surfaced. There was a couple people who would know somebody if we're going into class, it was more of study guide than a true test with answers on it."

Gary's entry into the cluster appears to be rooted in his advisor's initial selection of his classes as a freshman. Accordingly, when it came time to pick a major Gary deferred to the major in which he had earned the most credits, criminal justice. Gary's experience in the cluster was highlighted by five core themes: 1) He was disappointed with the selection of classes by his academic advisor. 2) He lacked academic guidance from his advisor. 3) He picked classes based on teammates' referrals. 4) He acknowledged that there were football-friendly professors. 5) He felt clustering facilitated laziness.

Gary: Structural Description

Gary felt that he "fell through the cracks" academically. He believes that academic services were primarily designed to help those student athletes who were in danger of being ineligible. "I think I was one of those that never had an issue being eligible so I really never got much out of it. I never had anybody pushing me. I never had anyone saying here's what you may want to consider." Conversely, because he was not a high academic achiever either no guidance or encouragement was provided. "I think I was one that fell kind of in the middle, you know, of whatever curve you're looking at and since I wasn't a super high achiever or dragging, it was like you just got forgot about. So I never felt like…I never got any special attention or extra effort by anybody that, you know, to help me figure out what I wanted to do when I grew up."

Gary has his suspicion for why academic clustering occurs, to help keep student athletes academically eligible. "They want to see success and in their minds it tends to be graduation rate and how do they get people through to graduate and to keep them eligible. So I think you fall under these clusters easier."

The cluster provided him an excuse to be lazy and an excuse to not give full academic effort and an excuse to just get by. He felt that if it had not been for the cluster his academic experience would have been more meaningful. “It’s sad looking back on it, it facilitates laziness. When you think about it you're with a bunch of people and you kind of know what to expect and it sets the bar low. And for me I think that was one of my biggest regrets of college, for sure.” Gary contrasts his college experience to that of his master’s program experience. “Post-graduate school is obviously very different, you know, I learned a ton and was very engaged. I went to business school following undergrad and I learned more than I learned in my life. I excelled in school and because it was relevant to what I did every day, you know, to my job and to my career.”

Gary weighs the positive and negatives of clustering. “If the desired result is to keep players eligible and keep them playing and to keep the program going, clustering is definitely a big positive. It’s a positive in terms of camaraderie when you’re trying to build a team. But I think some of the negatives are and I use myself as an example, you know, what would I have done if I would have not been part of a cluster and gone a separate way and pushed myself and gone to business school right after undergrad? So to me that’s the big question. And I think the potential downside to clustering.”

Biography: Brandon

Brandon is a 33-year-old Caucasian male. He was born and raised in a suburb in Northern California. He describes his childhood as a middle-class community. Both his parents attended college but did not graduate. Growing up Brandon never envisioned himself going to college; he always thought he’d become a fireman. Nonetheless, his father was a disciplinarian and demanded he earn good grades. At the same time sports was a major factor in his life as well as

religion. Athletically he felt he was above average throughout middle school and high school but not good enough to play Division I college football. After Brandon graduated high school he enrolled and completed one year of junior college while also participating on the football team. At the conclusion of his first year in junior college he was asked to partake in a two-year religious mission in South America. Upon returning home to California he grew three inches in height and after training in the weight room for six months he put on nearly 40 pounds of muscle. It was at this time that another local junior college football team took notice of his stature and asked him to play. He decided to play and had a tremendous year athletically garnering national attention by numerous schools. He initially committed to attend a well-known West Coast public institution but due to a new NCAA rule regarding academic standards he was unable to attend. Brandon was still able to attend other universities in which he chose a well-known public East Coast institution. Brandon graduated with a degree in criminal justice. He is now married with three kids and is a licensed nursing home administrator.

Brandon: Textural Description

Entering college Brandon had a career goal and major in mind. "When I got out to school, believe it or not, I wanted to do the FBI. I had it set in my head that I wanted to be in the FBI. So when the majors came up for me I actually picked criminal justice. So they didn't say here's the majors we can offer you. I actually said I want to major in criminal justice." For Brandon his learning wasn't as important as receiving good grades. "I wasn't too focused on learning as I was getting good grades and passing the class. In order to get into the FBI I thought the criminal justice major would look best. You know what I mean, and I'm thinking okay in order to get a good job, you know, if I want to work in criminal justice I should study criminal justice." Interestingly though it did not take Brandon long to realize he had chosen the "jock

major." "I kind of realized that, shoot, they throw everybody in criminal justice (laughter) all my classes had football players in it (laughter)."

Brandon gave his academic advisor credit for her willingness to help him search for classes and fit classes into his schedule. However, as he recalls, "I can remember at times she would ask what do you want to learn about and I was like look, I don't really care what I learned about. Just give me the units and the classes with the easiest teachers you know." This particular thought process stems from family and friends who said to him it didn't matter what your major is per se but more so that you graduated. "People always told me it's all about getting your name on that piece of paper that says you graduated. Rarely do people look up and say what's your GPA. I mean now when I talk to people and tell them I graduated, it's not what classes did you take, you know, sometimes it's what's your major."

But at the same time being in a jock major gave Brandon a sense of insecurity as to how he believed professors viewed football players. "The academic departments hated the athletic department. It's like some teachers you didn't tell you played football. When we went to class the dumb guys on the football team hung out together. I was the kid in the corner by myself. I didn't want to be seen sitting with those guys. I didn't want to be lumped in as a football player, you know what I mean, cuz they looked down on football players."

Conversely, Brandon recognized the personal benefits of being in a cluster. "There was definitely benefits cuz at the same time you always had someone in there you could talk to. You always knew someone in every class and it made things a lot easier whether it be getting rides to football (practice) afterwards or having someone you already knew in the class. I mean for me that was the benefits." Furthermore, Brandon faced a moral dilemma with receiving tests prior to them being administered. "Even if I felt guilty, it's like how come I'm busting my ass studying

for this when everyone is getting the answers for nothing. So you know, that was hard for me psychologically trying to….I didn't want to feel like I was cheating, but at the same time I couldn't afford to let these jackasses get better grades than me. But what are you supposed to do when they give you the test with all the answers." Brandon recalls one specific incident where he gave in to cheating. "I remember especially one test was going around and I remember studying for an hour and half and going this is bullshit dude, I'm not going to study for this. The answers are sitting right there in my bag."

Brandon's disillusionment with academics was also reinforced by his coaches. Because Brandon was a junior college transfer the expectation of him from his coaches was to play immediately, unlike freshmen. Further, due to another player being injured he was asked to fill in at that position, which he had never played previously.Essentially, he was asked by his coaches to compromise school for the sake of football. "I had to learn the whole playbook in less than four weeks from when I got there from when our first game was! And literally I can remember at times, coaches said okay don't worry about class we'll take care of your classes. Yeah don't worry about school this week we gotta get this playbook in." In particular, Brandon was told not to go to class for a whole week because of a high profile game coming up. I can remember Coach Rodriguez saying, "This is Miami week. You don't go to school this week. This is Miami week. We study for Miami, this is what we do, we're going to beat 'em."

Brandon's entry into the cluster was his choice though he was unaware that he chose the institution's athletic-friendly major. Conversely, many of the feelings and experiences he describes are similar to those who were steered into a clustered major by an advisor. Brandon's experience in the cluster was highlighted by five themes: 1) He encountered the realization and disappointment that he was in the jock major. 2) He was insecure and self-conscious of being in

the jock major. 3) He acknowledged receiving special benefits because he was an athlete. 4) He was faced with the moral dilemma to cheat on tests or not. 5) He felt the coaches sent him mixed messages regarding athletic and academic priorities.

Brandon: Structural Description

Brandon's feelings and thoughts connected with academic clustering are based on his belief that he was an "athlete student." Brandon believes that the popular thought that football practice is merely two or three hours a day is unequivocally false. He takes into account pre-practice physical treatment, team meetings, individual position meetings, practice, and post-practice meetings that account for at least an eight-hour day. Brandon believes that the daily schedule of a student athlete was indicative of what was the priority. "We were limited in when we could take class. We could only take class between 8 am and 12 noon because the rest of the day is all football stuff."

Brandon believes that the clustering didn't happen by chance, but was consciously done. "I think that coaches know. I think the athletic directors and the counselors all know. I mean a lot of these kids that come in and the coaches and stuff look at them as athletes. They don't ever look at him and say he's going to raise our graduation. I don't think anyone does that. I think they look at it as he's a good football player and how can we get him to stay eligible. I think everybody knows that, it's a given."

As a result, Brandon is aware of the implicit role his academic advisor had. "Her job was to keep everybody eligible. That's her job. She was paid to keep you eligible. And I guarantee that if we had a bunch of dudes becoming ineligible she would lose her job. I mean that's just how it was."

For Brandon, his "athlete student" belief was confirmed by the mixed messages he received from his coaches in his first year on the team. The foremost example occurred at the conclusion of Brandon's first season. During the season Brandon was explicitly told by coaches to skip class and come to the football office to study game and practice film. However, and as ironic as it sounds, he was scolded about his poor grades at the end of the semester. "Once football ended they flipped the script on me, cuz football would end November, first part of December…and then all of a sudden it was like, dude what are you doing (academically)? I felt like going, are you serious (laugh)?

Further compounding Brandon's belief that he was an athlete first was after he sustained a season-ending leg injury. "At West Virginia I broke my leg at the game. That was really hard for me cuz you go from being this really important person where everyone talks to you. You'd pass a coach in the hallway and they're like, hey listen when we do this, or hey you did good in this, hey we need to look for this this week, to the day I broke my leg dude. The next day I felt like I was a nobody bro, a nobody to those coaches! It was like, they would walk right past you dude. So I remember calling home to my dad and that psychologically, that messed me up a little bit too. It's like you know how it is, Vaughn, you're only as good as good as your last game. Basically you're only good to them for what you're worth. And that's what kind of woke me up and in my mind too and I'm going, you know. I'd love to say that this guy cares about me and I'm sure they did feel bad that I broke my leg and at the same time they're like there's nothing we can do about it. We got to move on. You know, it's kind of a wake up call."

Composite Textural Description

For all participants their family was of particular importance in terms of providing life lessons, discipline, academic expectations, as well as being involved in the college decision-

making process. For four of the seven participants being first-generation college students, a fear of failure was present. They felt that they lacked a certain awareness about the college process, what to expect, and how to navigate college. The most notable fear was the fear of failing out of college. In fact one participant failed out but was reinstated.

For nearly all of the participants education in their early life (pre-high school) was a time when they excelled academically. Interestingly, sports for many of the participants were viewed as a hobby and purely recreational. The general consensus was that they were academically curious, excited about learning, and felt confident academically. Then, at various points between junior high and high school most of the participants experienced a paradigm shift from academics being the focus to that of socialization being the focus–girls, parties, and athletics. This process of socializing usually occurred as a result of trying to "fit in" and a self-realization that they were athletically gifted. Many of the participants felt a particular pride and self-confidence because of their athletic prowess. For instance, Chris noted how football became his "identity." Eric said that "I played varsity basketball my sophomore year (high school) and seeing my name in the papers and stuff, you know, and started feeling myself and all that (laughter). You start getting, I started getting cocky and letting school fall off a little bit. I mean I wasn't ever in jeopardy of being ineligible but I knew I wasn't trying as hard in school as I probably could have. Yeah, sophomore year things started going bad."

This particular trend of athletics taking precedence continued as they progressed into college. This new paradigm was reinforced for all participants by college coaches who were recruiting them. Every participant said that college coaches seldom spoke of academics during the recruitment process as opposed to athletics. Brandon recalls that "nobody talked about academics (laughter). Nobody ever says, hey, we have a great academic program. No, nobody

said that (laughter)." Reggie recalls that "I never really had them talk to me personally, you could get a good education here. Or, you know, we have the highest graduation rate, none of that stuff. It was more listen, we need you here, we want you here, we like what you can do athletically and the coaches love you. But never to me personally were any coaches saying to me that you gotta graduate. None of them, not one. I don't remember any of them saying that."

Further compounding this sentiment were the official recruiting visits that every participant took. An official recruiting visit is allowed by the NCAA as a chance for the prospective student athlete to visit the campus, meet the coaches, and get a sense if the institution would be a good fit for them. However, many of the participants portrayed their official visits to various colleges as having a "party atmosphere" trying to lure them to said college. One particular participant, Michael, says that sex was implicitly offered to him as a means to obtain his commitment to a particular institution. "It wasn't really like, put it this way, saying girls would, you know, gonna fuck…It was go holler at her and you know and I'm sure you'll get what you want type of thing. It wasn't offered as sex on the table right then and there. It was more like go talk to her and see what you can do or whatever. I'm sure you could. It was pretty much out there, they ain't want to come out and say it was sex." Though Michael's experience may be unique, it nonetheless captures the essence of the experience of being a student athlete.

For most participants their adjustment to college was academically challenging. Feelings such as being overwhelmed, unprepared, nervous, afraid of failing, and a rigorous daily schedule resonated with them the most. In fact, all noted that their ability to concentrate on academics was implicitly prohibited due to their football commitments.

Most participants noted how participating athletically was similar to a "full-time job" in terms of hours per week and daily commitments. These hours consisted not only of scheduled

practices and game times but also weight lifting sessions, pre-practice meetings, post-practice meetings, mandatory film study sessions, non-mandatory (but mandatory) film study sessions, treatment (physical therapy), mandatory team breakfast, mandatory team dinners, speed and agility workouts, and travel to and from games. All participants said they easily spent well over forty hours on football-related activities. Not surprisingly, all participants revealed that their academics inevitably suffered.

All but one participant had negative comments regarding the quality of academic guidance received. These negative comments stem from the lack of guidance by their academic advisors. Issues such as not being made aware of different academic majors and possible career paths, as well as the lack of simple conversations to explore their personal academic interests were the primary themes expressed. In fact, two of the participants stated that they were handed their class schedules as freshmen without any input or opportunity to dispute the class selection. Three of the seven were steered into a particular academic major by their advisor. One participant noted that he chose his classes and major based on what his teammates recommended. And only two participants chose their majors without being prompted or steered by their academic advisors.

Conversely many stated that they felt stuck in the major and could not switch majors because they would not graduate within four years. Many also stated that because they were on scholarship they were fearful of the reality that if they switched majors it would take more time than they had; in essence their scholarship would not cover the expense and they would be left without a degree.

For all participants they acknowledged the implicit and explicit benefit that a cluster provided. Foremost among the benefits was a sense of comfort of being in the same classes with

familiar faces. In the event that a participant missed a class they could get notes, assignments, and/or important missed information. On the other hand some of the participants noted that because they were in a cluster they were not forced to make friends outside of the football team. This type of dynamic created a sense of isolation from "regular students." Also noteworthy, one participant noted how he became relied upon academically by his teammates to a point where he disengaged with academics to relieve himself of the burden of being everyone's go to person for help and information.

All of the participants found that professors in their major were more partial to them as a result of being members of the athletic program. Of particular interest, all participants spoke about having access to tests prior to them being administered. Though no one knew exactly where the tests were generated from everyone had their opinions ranging from: absolutely no idea, passed down by teammates year to year, fraternities, or possibly professors. Conversely, receiving this benefit stimulated feelings of guilt and laziness for several participants.

Composite Structural Description

Being academically clustered for each participant was a confusing reality. Are they a student athlete or an athlete student? This confusion doesn't necessarily begin at college though it appears college exacerbated this confusion. Rightly or wrongly athletics appears to have taken precedence over academics in a subtle and somewhat divisive manner. Being clustered lead to feelings of embarrassment, loss of control, laziness, ambiguity toward academics, and the inability to articulate career goals and aspirations.

Being a student athlete required extreme physical and mental toughness. All the participants had to balance and make sense of the mixed messages about academic and athletic priorities. Simply put, due to the significant amount of hours given to athletics, the implicit

message was that athletics was more valued than academics. As a result, feelings of disillusionment about academics arose.

Further the academic advisors were viewed as looking out for the best interest of the football program, not the individual student athlete. Specifically, academic advisors were described as not providing sufficient academic guidance. For instance, the lack of communication about various majors, particular career paths, and graduate school was not a part of their message. Many of the participants felt that maintaining eligibility was the primary role of the academic advisors and not much else. Whether or not explicitly expressed, participants knew that they wanted more from their advisor but were unsure how to articulate it and just went along with what the advisor provided.

For many participants they had no idea that the major they were in was a "clustered major" or as some said, "the jock major." Many did not realize that they had either been steered into or chosen the "jock major" until after a few classes and seeing many of their teammates in the same classes. During this realization a sense of embarrassment of being in a cluster emerged, as well as feelings of shame and disappointment. Conversely, it did not bother others. They felt that even though they were clustered at least they would graduate with a degree.

As each individual moved along within the cluster he found himself more attuned to being an "athlete student." Through constant reminders of athletic-friendly professors, coaches who demand more time athletically, little control over class selection, and receiving special benefits, the idea of being a "student athlete" was fleeting. More particularly, as the participants realized what was happening with them they noticed the same thing was happening to teammates, which further compounded their sense that being an "athlete student" was normal.

These subtle yet impactful messages constantly challenged how each individual viewed their own academic attitudes and beliefs. For instance this was apparent when each of the participants received tests prior to them being administered. During these times the student athlete was confronted with the enigmatic and moral character question: to cheat or to not cheat. During this contemplation the student athlete tried to understand his values while attempting to justify why it was okay to cheat in the academic atmosphere of which he was a part. All participants justified it as either everybody else is doing it or it gave them a break from studying.

Synthesis Textural –Structural Description

The student athletes' lives during their tenure in college was consumed with athletic responsibilities as well as academic responsibilities; however, these responsibilities were not equally divided as the term "student athlete" tends to suggest. The amount of time required to fulfill their athletic commitments has been described by many of the participants as a "full-time job;" extending beyond the traditional 40-hour work week. For these participants, the time commitment of football impacted their academic responsibilities. It appeared that there was never enough time to meet the needs of both athletics and academics in a sufficient manner. In fact, their respective sport took precedence during their entire tenure as a student athlete requiring numerous hours spent on playing games, travel, practice, film study, team meetings, weight lifting, physical therapy, mandatory breakfasts, and mandatory dinners.

For these student athletes their academic experience was directly impacted by the culture of the football program's implicit message that their academic responsibilities were secondary. These perceptions were perpetuated from multiple actors in the college athletic system. Notably, these perceptions began with college scouts during the recruitment process and continued with coaches, academic advisors, faculty members, and teammates alike once on campus.

Idealistically, we assume that coaches should set a positive tone regarding academic priorities. Further, we assume that academic advisors are there to guide, assist, and nurture the academic aspect of the student athlete. However, this was not the case. In particular, many interpreted being in a cluster as connected to a plausible ulterior motive to ensure academic eligibility and an adequate graduation rate for the majority of the student athletes.

The environment that these student athletes experienced had its own set of rules and values separate from all other students. It seemed that no matter how often the term "student athlete" was used to describe them they knew they were different. Conversely, it should be noted that different isn't necessarily a negative association. The participants in this study chose the path they were on to a certain degree. The experience of being a student athlete created a different and exclusive experience than that of the general student body. This experience of being able to continue playing a game they loved at the highest amateur level, a free education, and the possibility of playing professional football was a tradeoff in that they missed out on some traditional college experiences. They knew that playing a sport, in particular football, would be demanding physically, mentally, emotionally and academically, though they could not conceive to what degree until they were actively in the experience. As a result, this is where the dichotomy of academics and athletics emerged.

For all of the participants the entry point into the cluster was at the conclusion of their sophomore year leading into their junior year. Or if they were a junior college transfer they entered the cluster upon enrolling in the institution. The decision to pursue a certain major was reflected in the following scenarios: 1) It was their sole decision. 2) They were steered by an advisor. 3) Logistically they chose the major based upon the amount of credits they currently had

that counted most toward a degree. But interestingly, none of the participants knew that they were entering a cluster or comprehended what a cluster was.

For them, academic clustering had a positive and a negative impact on their individual growth and college experience. Clusters can positively create a sense of comfort and familiarity with having teammates in the same classes allowing student athletes to create further camaraderie. But on the other hand clustering was viewed negatively. In particular, many of the participants expressed the mental stress caused by being in a cluster. For example, being labeled a "dumb jock," feeling "stuck in a major," "losing control of their lives," to "guilt" because they consciously cheated on test(s).

Nonetheless, as most of the participants noted the key to academic success is ultimately the responsibility of the student athletes themselves. This acknowledgment implies that being in an academic cluster does not preclude an individual from giving full effort academically, seeking out mentors, and exploring career options. However, many noted that because they were so young, immature, and unsure how to approach college their academic advisor should have invested more time into establishing a structured academic plan. And because none of these participants were given the attention that they felt they deserved the cluster became a safe haven. In effect, the cluster provided a quasi-coping tool to help alleviate the mental and physical stress of being a student athlete.

The essence of academic clustering for these student athletes was rooted in balancing expectations of academics and athletics. The expectation was to succeed athletically without question as the majority of their daily lives was consumed with athletic-related activities. Likewise, they were expected to perform on par academically with athletics though not nearly as much time was allocated to class and/or studying. Athletics and academics are both important

but there was not sufficient time to devote equally to both. Therefore, academic clustering was a means to balance out expectations allowing for athletics and academics to coexist.

Chapter V. Conclusions, Implications, and Limitations

The purpose of this study was to capture the experience of former Division I student athletes who were academically clustered. The interviews allowed each participant the opportunity to speak openly and candidly about their experiences as a clustered student athlete. Within this chapter a summary of the study is included. Next, five conclusions are discussed. Also discussed are the implications for practice, the implications for future research, the limitations, and the researcher's concluding thoughts.

Summary of the Study

The purpose of this research study was to gain a comprehensive understanding of the lived experience of academic clustering through the lens of former student athletes. Academic clustering is objectively defined by Case, Greer, and Brown (1987) as when a significant percentage, typically 25% or greater, of student athletes on one team have the same major. However, little research has investigated the experiences of student athletes who have been academically clustered. The research on academic clustering is based heavily on objective data describing the frequency of clustering. The literature lacks the student athlete's perspective.

Research indicates that student athletes involved in Division I revenue-generating sports men's basketball and football have a tendency to be academically clustered (Case, Greer, & Brown 1987; Fountain and Finley, 2009; Mitten, Musselman, & Burton; Sanders & Hildenbrand, 2010; Schneider, Ross, & Fisher, 2010). This study contributes to the body of knowledge related

to the experience of student athletes being clustered in Division I revenue-generating sports. The findings are valuable to college and university administrators, athletic administrators, current student athletes, and prospective student athletes to gain a better understanding of the experiences of the student athlete population. Although this research focused on the experiences of Division I student athletes, this information may also prove noteworthy for individuals who are a part of non-revenue-generating sports as well as non-Division I institutions.

The literature review included information that framed the study, information specific to Division I athletics, the student athlete experience, and policies and rules. Further, the literature review consisted of two main sections, the body and the summation. In particular, the body focused on the concepts of the Argument of Discovery and the Argument of Advocacy. The Argument of Discovery section discussed and explained what is known about academic clustering. In other words, the researcher presented the current state of knowledge about academic clustering. The Argument of Advocacy section analyzed and critiqued the knowledge gained from the synthesis of the data produced by the discovery argument to answer the research question: What is the lived experience of student athletes who have been academically clustered?

A qualitative research design was selected to understand the lived experience of student athletes who have been academically clustered. According to Creswell (2007) qualitative research is conducted because a detailed understanding is needed and it can only be accomplished by talking directly to people allowing them to tell their stories. It is conducted when the researcher wants to write in a literary, flexible style that conveys stories. It is conducted because the researcher wants to understand the context and settings in which participants in a study address. And it is conducted when quantitative measures and statistical analyses simply do not fit the problem.

The study utilized phenomenology, which served as the methodological guide throughout the study. Phenomenology is understood as an approach that involves returning to the experience in order to obtain a comprehensive description that provides the basis for a reflective structural analysis that portrays the essences of the experience (Moustakas, 1994). More specifically, Heidegger's method of hermeneutic phenomenology was utilized as the framework that supports promoting the student athlete's voice because it is descriptive in nature. Moreover, the application of Heidegger's phenomenology was a means to investigate the lived experience of others while also incorporating the researcher's pre-understanding to add richness to the overall investigation. Pre-understanding is not something a person can step outside of or put aside, as it is understood as already being with us in the world. Heidegger went as far as to claim that nothing can be encountered without reference to a person's background understanding (Laverty, 2003).

Institutional Theory provided the lens to frame the issue of academic clustering and to answer the research question. Institutional theory allowed the researcher to situate academic clustering not as an isolated incident but connected to rules, practices and norms implicitly and perhaps explicitly set by the institution of college athletics. Institutional theory considers the processes by which structures, including schemas, rules, norms, and routines, become established as authoritative guidelines for social behavior (Scott, 2004). The major function of theory is to provide a model or map that helps to explain why the world is the way it is (Maxwell, 2005). It is in this respect institutional theory can examine the norms that shape the student athlete experience. Accordingly, this study used the three pillars of institutional theory as defined by Richard Scott (1995). These pillars are: *Regulative, Normative, and Cognitive* as illustrated in Figure 1.1.

Seven former Division I student athletes who participated in football accounted for the participants in this study. They were "purposefully selected" (Creswell, 2009) to participate based on their experience with clustering. Further, each participant had first-hand experience with being academically clustered. They were willing to participate in one-on-one interviews with the researcher. They allowed the researcher to tape-record all interviews. And they all agreed that the data can be published as long as their identity is not revealed. The participants took part in a series of three interviews that were semi-structured as recommended by Seidman (1998) for phenomenological interviews. All interviews took place via "Skype phone" and were digitally recorded.

All interviews were transcribed by the researcher. The transcribed data was uploaded to MAXqda, a qualitative data analysis software program. Transcripts were analyzed and coded using Moustakas' (1994) modification of methods of analysis suggested by Stevick, Colaizzi, and Keen. It was through this data analysis process that the essence of the participants' lived experiences were understood. After analyzing, coding, and organizing the data, the information was arranged into textural and structural descriptions for each participant, followed by composite textural and composite structural descriptions for the entire pool of participants. A synthesis of the composite textural and composite structural descriptions capturing the essence of the lived experience of being academically clustered completed the analysis.

Conclusions

The following research question guided this study: *What is the lived experience of former Division I student athletes who have been academically clustered?* When seeking to answer this question, institutional theory provided the lens to interpret, analyze, and answer this question. As a result five conclusions have been drawn:

Conclusion 1: Academic clustering is an implicit consequence of the required athletic schedule.

Conclusion 2: Academic clustering is one method used to maintain athletic eligibility of student athletes.

Conclusion 3: Academic clustering facilitated indifference toward academic achievement.

Conclusion 4: Academic clustering further isolated student athletes from the general student population and a traditional college experience.

Conclusion 5: Student athletes lacked in-depth academic support to help realize their academic potential.

Conclusion 1: Academic clustering is an implicit consequence of the required athletic schedule.

Upon entering college these participants were submerged into a normative culture where they were expected to conform to the demands of their sport. These norms existed in both an implicit and explicit manner to ensure that the greater good of the team was served. Through the lens of the normative pillar a cultural expectation was created where each participant was expected to conform to the daily schedule necessary to compete at the Division I level. Commonalities that emerged from the participants' schedule included attending daily team breakfast, pre-practice film study, pre-practice meetings, physical therapy, weight lifting sessions, post-practice meetings, post-practice film study, team dinner, traveling to the team

hotel Friday nights for home games and traveling to the airport Friday afternoons for away games. All the while, they still had to attend classes and find time to study.

Interestingly, there are congruencies between how the participants' spoke about their daily schedule in this study and what previous research states. Comeuax (2011) acknowledges that college coaches expect a great deal from their student athletes ranging from practices, travel, team meetings, and midweek and weekend game schedules. He further notes how student athletes often spend more than 40 hours a week on sport-related activities, as well as coping with the mental fatigue, physical exhaustion, and nagging injuries. This falls in line with one participant's sentiment that college athletics is a "full-time job" with days lasting "10-15 hours." Similarly, another participant, Brandon, believes that the daily schedule of a student athlete was indicative of what was the priority. "We were limited in when we could take class. We could only take class between 8 am and 12 noon because the rest of the day is all football stuff."

Considering the preceding literature and the sentiments of the participants, it appears that academic clustering is therefore seen as one consequence of the daily athletic schedule. In particular, classes must not conflict with scheduled athletic commitments. Afternoon to late evenings are reserved for athletic commitments leaving only morning to early afternoon for classes. Because of such a short window of time, classes and majors must be able to fit within this schedule; if not, they cannot be pursued. For example, majors that require afternoon labs, typically the sciences, cannot be logistically pursued. As a result, student athletes are limited to the majors they can logistically declare. It is in this sense that student athletes are implicitly steered or only have a few majors to choose from, which results in a cluster.

Conclusion 2: Academic clustering is one method used to maintain the athletic eligibility of student athletes.

In order to participate in college athletics student athletes are required by NCAA policy to maintain a cumulative grade point average of 2.0 as well as other possible university and team standards. Through the lens of the regulative pillar these rules can be seen as a method to keep academics central to the student athlete experience. Conversely, if student athletes fail to maintain these minimum standards they can be placed on academic probation and lose their scholarship. Further, if a team fails to comply and falls below the NCAA's APR standards it will be subject to financial penalty, loss of scholarships, and even post-season bans. It is within this context that the regulative policy of the NCAA implicitly prompts the emergence of academic clustering. In particular, this becomes an issue when clustering is used as a tool to maintain athletic eligibility at the sacrifice of a meaningful education.

The participants each spoke of their assumption that clustering is not by chance but by implicit design and perhaps explicitly employed by athletic administration to maintain the eligibility of student athletes. For example, in Michael's narrative he noted how his advisor explicitly steered him into his major by saying that it was an easier degree to earn. Likewise, Eric was told by his advisor to pursue a particular major.

Similarly, the literature concurs with many of the participants' experiences that revenue ultimately propels clustering. In a study conducted by Purdy, Eitzen, and Hufnagel (1982) they concluded that the serious and far-ranging financial consequences of "big-time" sports also increase the likelihood that coaches will recruit exceptional athletes who are unqualified for the academic demands of college. As a consequence coaches are then faced with keeping these marginal student athletes eligible. In Beamon's (2008) in-depth qualitative participant-observation study of former student athletes many of the participants stated that any reference to

education was directly related to eligibility. Most of the participants (15 of 20) mentioned choosing majors with courses classified as "easy to pass" or departments that were "athlete-friendly." Considering the preceding literature and the sentiments of the participants, it appears that academic clustering is therefore seen as a method of maintaining athletic eligibility.

Conclusion 3: Academic clustering facilitated indifference toward academic achievement.

Through the lens of the cognitive pillar student athletes developed the perception that academics was secondary. Initially, most of the student athletes' academic outlook ranged from being somewhat interested to enthusiastic. However, as the student athletes progressed year to year they grew to perceive academics with indifference and their interest and enthusiasm waned. This indifference and perception was an implicit result of being in a cluster.

For those student athletes who were steered into their major their indifference was immediate. These student athletes lacked any interest in the major and could not connect their academics to particular career paths. They felt stuck and not able to grow academically. To compound this indifference they experienced what student athletes who chose their major also felt. In particular, they realized they were in the "football major," which generated feelings of shame and self-consciousness. Eric said that "sometimes I would sit in my room and think, damn man, I didn't want to be that dude, I didn't want to be that dude with the communication major and here I am a criminal justice major and I'm that dude in that major."

They realized that because so much of their time was dedicated to football, it implicitly sent a message that academics was secondary to athletics. For example, Brandon states, "I can remember at times coaches said okay don't worry about class we'll take care of your classes. Yeah don't worry about school this week we gotta get this playbook in." Further, because these participants were benefactors of special benefits such as having access to tests before they were

administered this exacerbated their indifference. Many felt that they no longer needed to study. For example, Reggie states that "it was the first time I ever cheated on a test in my life. How they (teammates) got the test, I don't know, but it sure was the real deal and I used it (laughter). I'm not an idiot."

Interestingly, there are congruencies between how the participants' spoke about their indifference and what previous research states. As concluded in Adler and Adler's (1985) in-depth qualitative participant-observation study of a major college basketball program they found that the student athletes start off with high standards for themselves academically but become overwhelmed by the demands and intensity of their sport. Likewise, they note that the peer subculture exacerbates the situation by devaluing academic involvement and neutralizing academic failure. As a consequence the student athletes responded by gradually withdrawing from their commitment to academics. Considering the preceding literature and the sentiments of the participants, it appears that academic clustering can lead to indifference toward academic achievement.

Conclusion 4: Academic clustering can lead to isolation from the general student body.

The dual commitments of athletics and academics created a lifestyle of implicit and perhaps explicit isolation for these participants. It can be inferred by the description of each participant that due to their rigorous schedule it was difficult for them to foster any substantial relationships with faculty, student groups, and non-athlete peers or partake in career exploration opportunities.

Through the lens of the cognitive pillar, student athletes had the perception that developing friendships and being a part of the academic community was not necessary. The cluster in effect created and perpetuated a homogenous group through implicit self-isolation. In

particular, the cluster provided each student athletes a built-in network of friends to do assignments, study, and share notes with. For example, Chris states that "it was nice at times to have that network of people that have the same major and you can say hey I missed class today what was the assignment. And you know people had your back. You didn't have to really socialize with the general students all the time to get the information. You weren't forced to make friends with people for information. Whereas you can text your teammate and get the information right away."

Through the lens of the normative pillar being isolated was seen as normal. For example, Reggie stated that "especially in college you're living life you don't really, like now, putting things together, why are we all clustered in this class. You don't think about things like that, you just go onto class. You never ask question when you're playing sports, working out and all that stuff. You're not really thinking, like damn, why are we all in the same class, it was never a thought, we never had conversations why everybody is in the same it was just, it was what it was."

Interestingly the emergence of the term "academic clustering" developed from student athletes being isolated. Specifically, in Case, Greer and Brown (1987) they note how Case, a prospective professor at the time was told he would be responsible for teaching a class that caters to student athletes. As found in Adler and Adler (1985) their study's results found that the student athletes find themselves socially isolated from other students because of their geographic and temporal separation and their physical and cultural differences. Considering the preceding literature and the sentiments of the participants, it appears that academic clustering can lead to isolation.

Conclusion 5: Student athletes lacked in-depth academic support to help them make informed decisions regarding academic path and career path.

The participants were bound by enormous expectations to exceed athletically. Thus, it could be argued that the resources and time given to student athletes athletically far outweigh the resources and time given to them academically. In particular, student athlete academic support services in theory should be the central resource hub for their academic needs ranging from individual counseling and tutors to career preparation. However, as noted by all participants, this was not the case. In fact, it appeared that their athletic academic advisors were there in name only and not in action. Harold stated that "they just gave me classes and told me what I need to take and these are the days you're going to be in class that fits yours schedule and that was it." When the researcher asked Gary if he had a relationship with his academic advisor he said, "not really much at all (laughing). You know, I would see her occasionally for my classes and it was a matter of just kind of managing our class load and that was it."

Through the lens of the cognitive pillar many of the participants recognized that it was partly up to them as individuals to seek out academic guidance and be proactive as they were in fact still students who needed guidance. Reggie stated that "I can't expect an academic advisor to be worried about my life if I'm not worried about my life." However, many perceived it should have been the responsibility of the academic advisors, who are the adults, to engage them no matter how difficult and tedious this process may have seemed.

This lack of support appears more of an institutionalized norm as demonstrated in Benson's (2000) study of student athletes. Benson's participants noted how they felt from their freshman year to graduation. In particular, they said they received implicit and/or explicit messages that school was not important, that they were not considered intellectually capable

students, were not expected to do well in school, and were not cared about as individual student learners.

Based on the responses from the participants, only one could articulate what major he desired and connect it to a post-college ambition. However, it should be noted that he came into college with that ambition and that it was not cultivated while in college. For the remainder of the participants, after four years of college, they were all left with the figurative blank stares of not knowing what they were going to do post-college. Considering the preceding literature and the sentiments of the participants, it appears that academic clustering does not foster academic exploration, academic growth, or career preparedness.

Implications for Practice

The study's conclusions have implications for multiple constituencies within higher education, including student athletes, academic advisors, coaches, and prospective student athletes. Exploring the experiences of former student athletes who were academically clustered provides valuable information for those who advise student athletes and student athletes themselves in terms of understanding how to navigate college academics. The individuals who participated in this study were not limited to a single race, socio-economic background, academic ambition, or professional ambition. Likewise, academic clustering is not limited to a single act, a single person, or a single feeling. It can and perhaps should be viewed as a series of interrelated practices as noted in Benson's (2000) study, *Constructing academic inadequacy.* Through open dialogue Benson was able to report that the marginal academic performance of these student athletes was a phenomenon created by a series of interrelated practices engaged in

by significant members of the university community including peers, coaches, academic advisors, professors, and the student athletes themselves.

Current student athletes and prospective student athletes can utilize the study's conclusions when contemplating how to pursue their academics: from understanding the value of thinking critically about their academic endeavors, searching for majors, as well as connecting majors to various career paths. The study revealed that most student athletes were unable to articulate their academic interest or career interests. Consequently, student athletes must be proactive in facilitating their own academic and career development. In particular they should curtail the notion that they "owe" their coaches for giving them a scholarship and neglecting their academics as found in the study conducted by Purdy, Eitzen, and Hufnagel (1982). As noted by many of this study's participants, athletes stated they should have taken academic initiative, pursued their interests, and actively pursue mentors who can help them reach their goals.

This study is important for athletic academic advisors who may be unaware of the impact of clustering, short term and long term. The study revealed that academic advisors were not as helpful as they could have been in nurturing academic development and career development leading to academic detachment. This form of academic detachment was highlighted in Adler and Adler's (1985) study concluding that student athletes make pragmatic adjustments based on athletic, social, and classroom experiences leading them to abandon their earlier academic aspirations and gradually resigning themselves to inferior academic performance. If academic advisors are able to be more conscious of the consequences of clustering they can perhaps reduce chances of academic detachment by re-evaluating their personal practices and philosophies about how to approach the student athlete's academic pursuits.

College coaches may find this information insightful as a means to better understand the direct and indirect impact they have on their student athletes. In particular, all the participants discussed the lack of involvement and message about academics that came from their coaches. For example, a USA Today article, *College Athletes Studies Guided Toward 'Major in Eligibility'* (Steeg, Upton, Bohn, & Berkowitz, 2008) highlights many areas in which academic clustering can impact a student athlete. An excerpt from an interview of a former football student athlete, Steven Cline, articulates his experience and perception of the college athletic system that steered him away from his initial major, pre-veterinary, into an easier and friendlier major, sociology. He states:

> "The whole time I was at Kansas State, I felt stuck — stuck in football, stuck in my major. … I'd tell current student athletes to choose a career — a real career for their life after football and work toward it. Don't let anybody or anything take you off that path. Don't fool yourselves into thinking (you're) going to play (sports) professionally. Now I look back and say, well, what did I really go to college for? Crap classes you won't use the rest of your life? Social science is really nothing specific. … I was majoring in football."

For most of these student athletes playing professional football will not be an option, thus having a sound academic foundation will be a key factor in their post-college life. Coaches should then be mindful that they have the strongest voice to reach these student athletes. If coaches are sincerely interested in the overall well-being of their student athletes, they should consider feasible options that will establish and reinforce genuine academic exploration and career development.

The results of this study add to the current research on student athletes in relation to the phenomenon of academic clustering. The study provides information that allows college athletic administrators, coaches, and student athletes to reevaluate current practices and how student athletes pursue academic achievement. The paramount benefit of this study is that it allowed the student athlete to share his voice unlike previous research. Previous research is based heavily on objective data and the frequency of academic clustering. For example, Sanders and Hildenbrand (2010) conducted a quantitative multinomial logistic regression of football players' academic major selections to determine if academic clustering actually existed as noted by popular press articles. The seasons 1996, 2001, and 2006 were selected for analysis in which Chi-square was used to identify statistical significance. Their results suggested that academic clustering existed within intercollegiate athletics when compared to the general students at the respective institution.

In contrast, this study sought the voices of the student athletes to glean their experience of being academically clustered. Infusing phenomenology into academic clustering provided the opportunity to debate the realities and perceptions of this phenomenon by not accepting things as they are or what they are thought to be. The narratives that often describe the student athletes are often general or depicted in numbers and statistics that are constructed without the participation of the student athletes themselves. In contrast to this narrative, a counter narrative through phenomenology enabled the student athletes to engage in a critical discourse about their relationship with and about academic clustering and intercollegiate athletics, which led to a raised consciousness and deeper understanding for them and the researcher.

Implications for Future Research

In two peer reviewed articles, Johnson (1985) along with Sharp and Sheilly (2008) both ask what are the obligations of the university to educate student athletes? Is it the duty of the university to help the student athlete earn any degree regardless if they "legitimately earned it" or not and does that constitute an education? Or does an education constitute being an active participant in deciding your own major, choosing your own electives, and setting up your classes as you see fit? This study on the lived experience of student athletes who have been academically clustered has implicitly answered some of these questions. However, there is much more that needs to be understood. The student athlete's voice was brought to the forefront demonstrating the value of their thoughts, opinions, and sentiment. In particular, this illustrates the need to continue research studies where they are the subject and not the object of discussion. The potential to extend the research of clustering exists not only in terms of the student athlete perspective, but also in capturing the perspectives of coaches, academic advisors, faculty, and other athletic administrators who are actors within the dynamic of academic clustering. Pursuing their voices will allow for a richer understanding and comprehensive view of clustering.

Conversely, because intercollegiate football presents unique characteristics unlike any other sports in terms of team size, coaching staff size, and revenue-generating expectations these student athletes' experiences may differ greatly. Hence, there is opportunity to conduct research on the multitude of other intercollegiate sports by applying the same phenomenological method. Moreover, conducting phenomenological research studies on Division II and III student athletes can also prove insightful in distinguishing between levels of intercollegiate athletic sports in terms of the experiences of student athletes, coaches, and athletic administrators. Doing these

comparative studies will enable the intercollegiate athletic community to have a greater sense of the breadth and depth that academic clustering presents across all divisions.

Academic clustering can also be explored through other conceptual lenses such as critical theory that can provide another voice to the student athlete. Critical theory is a conceptual framework that focuses on understanding the total existence of groups of people and on explaining cultural, economic, and political contexts (Hyter, 2008). First coined by the philosophers of the Frankfurt School in the 1930s, critical theory challenged the biased nature of all knowledge, specifically knowledge that was transmitted via dominant institutions such as schools and the media (Morrell, 2009). For example, from a critical theorist perspective, questions such as the following might be asked: Is academic clustering necessarily in the best interest of the student athlete or the administrators and advertisers? Does clustering contradict the academic mission of college, or does it take away from true academic enrichment?

As presented in the current literature and this study, academic clustering appears to be a symptom of the dichotomy between academics and athletics. Clustering if exercised as a means to "game" the system in terms of genuine academic pursuits threatens the very foundation of higher education. It is the hope of the researcher that this study will complement the current research on clustering qualitatively by adding the student athlete's voice.

Limitations

This study has several plausible limitations that potentially influenced these findings. The first limitation is relative to its generalizability because the participants represent a select group of academically clustered student athletes whose views could potentially be different from other student athletes who were academically clustered. Atieno (2009) noted that one of the main disadvantages of qualitative approaches to mass analysis is that such findings cannot be extended

to wider populations with the same degree of certainty as quantitative analyses. This is because the findings of the research are not tested to discover whether they are statistically significant or due to chance. Accordingly, this study encompassed only seven participants, which under a quantitative lens would be considered a limitation. The findings do not represent all Division I student athletes or football players who have been academically clustered. Likewise, the participants of this study represent a homogenous group because all attended the same public northeast university. The characteristics of this institution, its athletic culture, coaches philosophies, academic departments, and student athletes' experience cannot necessarily be generalized for other universities. Ok = part of the qualitative approach

Maxwell (2005) states there are two types of threats to trustworthiness that are often raised in relation to qualitative studies: researcher bias and reactivity. Researcher bias is trying to understand how a particular researcher's values and expectations influence the conduct and conclusion of the study. Reactivity is the effect of the researcher on the individuals studied. Essentially, reactivity is trying to understand how the researcher is influencing what the informant says, and how this affects the validity of the inference the researcher can draw from the interview.

Thus, another limitation to consider is the researcher's personal experience with being academically clustered. The researcher was able to bring his own understanding and experiences to the research process as deemed appropriate by Heidegger's phenomenology method. This allowed the researcher to bring his pre-understanding to the study. In contrast, Husserlian Phenomenology purists would argue that Heidegger's method is flawed because it dismisses "epoche" or "bracketing," which is a salient limitation.

Concluding Thoughts

The process of conducting this original research has been simultaneously demanding, enlightening, and humbling. This process lasted over a year and has challenged the researcher to think critically about intercollegiate athletics, re-examine his own personal beliefs, and reflect upon his experience as a former Division I student athlete. Conducting this study not only allowed the researcher to explore a topic of great personal interest but a phenomenon that he personally experienced.

As a former Division I student athlete, the researcher has the utmost admiration for all student athletes who sacrifice so much for the sport that they love, regardless of sport or division. But in particular, he has a certain affinity for the Division I football student athlete. They are consumed with responsibilities and expectations unlike any other student or student athlete on campus. Even though they volunteered themselves to participate in college football, nothing could have prepared them for the demands placed on their mind, body, or spirit.

Contrary to popular belief, student athletes, in particular the seven men who participated in this study, did value education as did the researcher. However, the culture of college athletics made it difficult for these men to nurture their academic being. Although this does not exempt them from their academic responsibilities, it illustrates the pressures and norms that have been created over the years that make academics secondary to athletics.

The participating former student athletes had important experiences to share. The researcher is indebted to these men who allowed him to explore their inner thoughts, feelings, and personal experiences. They provided so much to the researcher and even more to the greater academic community. In fact, some of these men even said they also benefitted from participating in this study. Many said they never critically examined their experience as a college

athlete prior to participating in this study. Further, many never looked at college athletics and their experience through the lens of something possible divisive.

Lastly, the researcher is thankful for the journey and pleased with the results this academic exercise has provided him. It is the researcher's passion for college athletics and student athletes that fueled his ambition to undertake in this research study. It is the researcher's intent to publish sections of this study in various journals and magazines. The researcher is excited and looks forward to seeing how this study can be of value to athletic administrators, coaches, and student athletes.

Appendices

Appendix A: Interview Questions

Interview One – Focused life history

1. Tell me about your parents' educational background.
2. Tell me about your childhood as it relates to athletics.
3. Tell me about your academic experience in grade school and middle school.
4. Tell me about your high school athletic experience.
5. Tell me about your high school academic experience.
6. Tell me about any travel team or AAU experience.
7. Tell me about any mentors or family members that were influential in your life growing up.
8. Tell me about any perceived special treatment or benefits you received as a result of your athletic ability from teachers, staff, family, friends, and fans.
9. How did that special treatment influence your outlook on life?
10. Was college something that you always aspired to? If so, why?
11. What factors were most important to you in selecting a college and why?
12. What factors were least important to you in selecting a college and why?
13. Tell me about your academic expectation of college before enrolling. What were your goals?
14. Tell me about your athletic expectation of college. What were your goals?
15. Tell me about the college recruitment process.
16. Tell me about the sales pitch that coaches pitched to you.
17. Tell me about your "official campus visit" experiences.
18. Tell me about the academic emphasis coaches spoke of during the recruitment process.
19. Tell me about why you chose the school you signed with.
20. What influence did the coaches have in your final decision?
21. What influence did your family have in selecting your college?

Interview Two – Details of experiences

1. Tell me about your adjustment to entering college.
2. Tell me about your daily schedule in season.
3. Tell me about your daily schedule in the off season.
4. Tell me about the importance of academics as you began your college tenure.
5. Tell me about time spent on athletic-related activities as opposed to academic-related activities.
6. Tell me about your coach's views on academic achievement.
7. Tell me about your relationship with your academic advisor.
8. Tell me what upperclassmen were saying about choosing a major or their major.
9. What do you believe the general consensus was amongst your teammates regarding academics? Did you share the same view? Please explain.
10. Tell me about your career goals at the time.
11. Tell me about the majors you were contemplating pursuing.
12. Tell me how and why you selected your academic major.

13. Tell me about any conversations you had with a coach or academic advisor to pursue a particular major or set of classes for the sake of eligibility.
14. Tell me about the relationship you had with professors in your major.
15. Tell me about any special benefits, privileges, or treatment you received as a result of being in your particular major.
16. As a clustered student athlete did you ever feel guilty that you cheated yourself by receiving the special benefit? How did you justify it in your mind? Please explain.
17. If it wasn't for being in your particular major, how do you think you would have done academically?
18. As a clustered student athlete did you ever consciously not study or prepare for class or exams because you knew you would still pass? Please explain.
19. As a result of being clustered willingly or not, did your views of academics change? Please explain.
20. Did any underclassmen ever ask you about picking a major? What advice did you give them?
21. Can you share any particular stories you have about being clustered?

Interview Three – Reflection on the meaning

1. Did you consider yourself a "student athlete" in the idealistic sense of the term? If so, why?
2. Is clustering an unspoken phenomenon? Please explain.
3. Tell me about your views of the system of college athletics – in particular how does clustering happen, who enables this to happen, and are student athletes also responsible for its existence? Please explain.
4. In your view, are there external forces that influence academic clustering? If so who and/or what?
5. What are the positives of clustering?
6. What are the negatives of clustering?
7. In some cases, is academic clustering an inevitable phenomenon? Please explain.
8. In some cases is academic clustering a necessary evil for some student athletes? Please explain.
9. Did you ever publicly or privately contemplate why so many of your teammates or other athletes were in the same classes? Please explain.
10. Do you believe you received a quality education? Why?
11. As a result of being a part of a cluster were you ever disenchanted by academics as being secondary to athletics? Please explain.
12. Describe how you explored academic interests?
13. Please describe your coach's philosophy about academics. What did he say or do to reinforce his beliefs?
14. Do you believe you had a realistic or unrealistic expectation of playing professional sports? How did this expectation impact your attitude toward academics? Please explain.
15. How has your college educational background prepared you for your career?
16. What advice would you give to freshmen Division I student athletes regarding their academics?
17. If you could go back to your freshman year, what would you do differently?

Appendix B: Participant Consent Form

Date: _____
Dear _____,
