

Haven for Hope

SAN ANTONIO, TEXAS

Haven for Hope is a private nonprofit that garnered widespread support aimed at transforming the lives of the homeless population in the San Antonio/Bexar County area. The 285,000-square-foot project created a public space that evokes a campus environment, while reaching out to the homeless community.

Working as a consultant to architect-of-record and design architect Overland Partners, LPA was responsible for ensuring all the exterior envelopes of the former industrial park buildings were made weather-resistant, brought up to current codes, and renovated so they could be repurposed into safe shelters for men, women, families and oftentimes, their pets. Amenities such as food service, medical services, counseling, meeting spaces, a community kitchen, a community laundry facility, classrooms, recreational spaces, and chapel were organized into the existing structures as well strategic new buildings. LPA's team of designers were fortunate to work with the Haven for Hope organization on the kitchen and dining hall transformation and the intake building used by each person seeking support. Haven for Hope is the largest, most comprehensive Homeless Transformation Campus in the United States.
