The Academy Summer Math Log

It is our hope that students grow in their enjoyment of math over the summer AND also maintain important math skills. To this end, students are encouraged to do 45 minutes of math per week. Parents may provide a workbook, online activities, or fact practice using flashcards. Some suggestions are: 1) Singapore's Intensive Practice workbooks (for grade just completed); 2) Singapore's Challenging Word Problems (for grade just completed); 3) Kumon Math Practice book (for grade just completed); 4) Resources from one of the following sites: http://www.sgtestpaper.com/sgmath/; http://schoolkid.ph/singapore-math-worksheets/, http://www.onlinemathlearning.com/singapore-math.html. You may print multiple copies of this form. All math logs must be turned in on the first day of school in August.

Student_____

Date (Week beginning)	Time (Minutes)	Activity (page number, website, etc.) - parent signature

I certify that my student has completed these math activities this summer:

Parent Signature: _____
