Global Mobile Advertising **Made Easy**

BREMOBILE's full suite of demographic categories and sub-categories helps advertisers target specific audiences, allowing multiple ads to run locally, regionally, nationally and internationally.

BREMOBILE

BREMOBILE'S algorithm allows users to quickly search by:

- Brand
- Business Type
- City /Town
- County
- Country
- Desire
- Destination
- Industry
- Mall
- Preference
- Product
- Region
- Retailer
- Shopping Center
- State
- Zip Code

BREMOBILE targets millions of small businesses, along with local, regional, and national U.S. brands. We also target millions of global small businesses and international brands.

BREMOBILE has an integrated database with over 20 million U.S. businesses, over 7 million brands, more than 100,000 shopping centers and malls. Together they represent a stable, addressable market.

BREMOBILE will incorporate Google Maps to assist consumers to locate their favorite retailer, brand or business. Amazon's Web Services will allow us reach 190 global marketplaces. Global consumers will be able to discover new businesses and brands across the globe or in their own neighborhoods.

BREMOBILE'S addressable market is huge. Globally there are 100 million+ businesses and over 13 million brands. Many don't have a website or advertise with frequency. When you factor in the number of cities, towns, shopping centers and malls in the world, our addressable market is virtually untapped.

BREMOBILE's mobile ad templates allows individuals, retailers, businesses, brands and organizations an opportunity to place a mobile ad anywhere in the world, at a fraction of the time and cost.
