Arthur R. Paholke

ILLUSTRATED CATALOGUE

OF

KEYS

AND

HARDWARE SPECIALTIES

MANUFACTURED BY

THE GRAHAM MFG. CO.

DERBY, CONNECTICUT, U. S. A.

ARTHUR R. PANCOE
LAW LIBRARY
PUBLIC
COOK COUNTY, ILL.

To the Trade:

No goods taken back unless agreed to, and at a deduction of 10% to cover expense.

In ordering, please use our catalogue numbers only, and do not use lockmaker's name unless you wish their make of goods.

Unless otherwise stated, goods shown in this catalogue are of our own make.

In ordering trunk keys, please use catalogue number only, and not change numbers of cut keys.

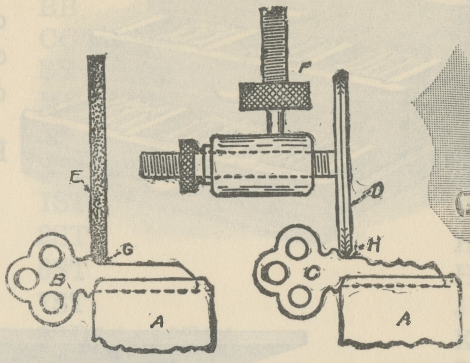
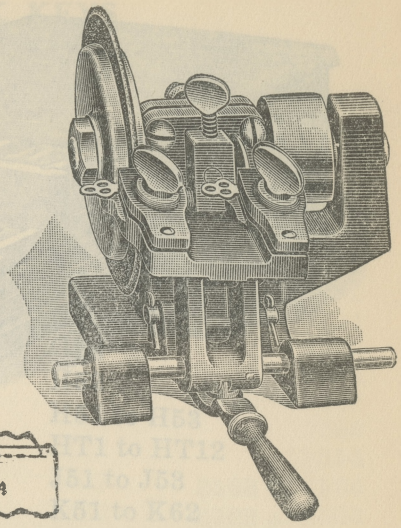
HAND KEY MACHINE

Machines can be equipped with either steel mill or emery wheel.





SMALL POWER MACHINE

Size of pulley, 2″ diameter for 1″ belt.
Size of emery wheel or steel mill, 6″ diam., 1/8″ face, 3/4″ hole.
Weight of machine, about 15 lbs.
Space occupied, one square foot.

DIRECTIONS

Place the key which is to be duplicated in the clip in front of the gauge, and the blank in the clip in front of emery wheel. Be sure that the backs of both keys rest squarely against the shoulder of the seat on the carriage.

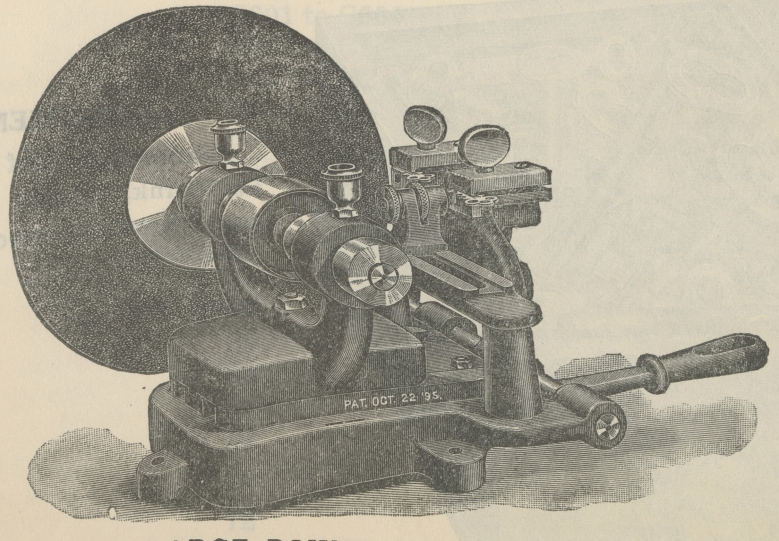
Bring the emery wheel into contact with the key blank at the shoulder of the key, as at (*g*), and adjust the guide disc (*d*) to bear against the original key in an exactly similar position, as at (*h*). This adjustment insures the correct location of the grooves along the face of the key.

With the wheel revolving, adjust the screw (*f*) so that the wheel will just touch the blank but will not cut it so long as the guide disc (*d*) bears against the plain portion of the key.

Move the hand lever from right to left, and as soon as the guide disc enters a groove in the key, a similar groove will be ground in the blank. Continue the grinding until the wheel no longer cuts the blank at any point.

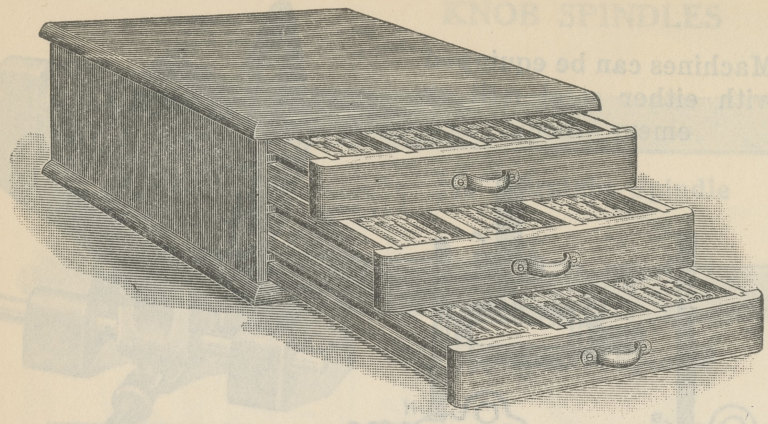
If the face of the emery wheel becomes rounded off by wear, it should be trued up with a diamond or steel to its original sharp edge.

The power machines with emery wheel should be run at speed of 3,000 revolutions; with steel mill at 2,240 revolutions.



LARGE POWER KEY MACHINE

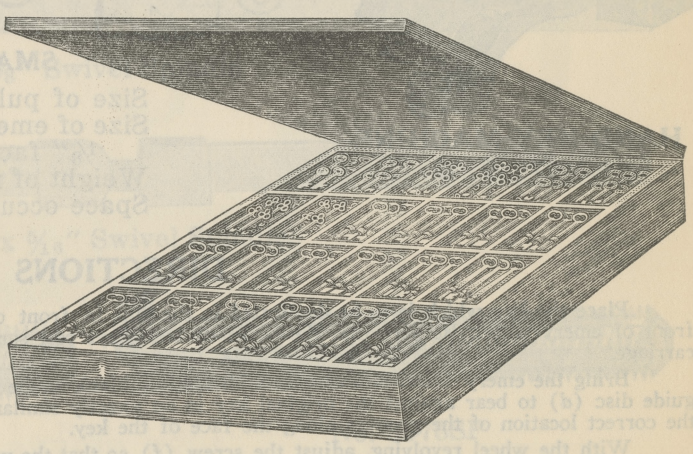
Can be equipped with 6″ Steel Mill or Emery Wheel or 10″ Emery Wheel



ASSORTMENT 300

Three gross of assorted door, trunk, cabinet, pad and cylinder keys in three drawer cabinet.

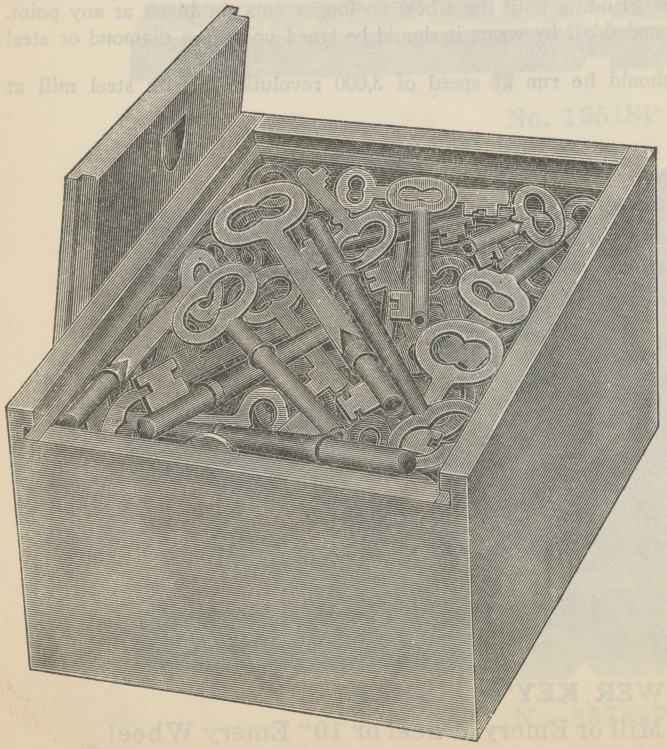
Price, per cabinet,



ASSORTMENT 408

One gross of assorted door, trunk and cabinet keys in 24 compartment box with hinged cover.

Price, per box,



ASSORTMENT 500

One-half gross of assorted door, flat trunk, cabinet and Excelsior trunk keys in a wooden box with slide cover.

Price, per box,
