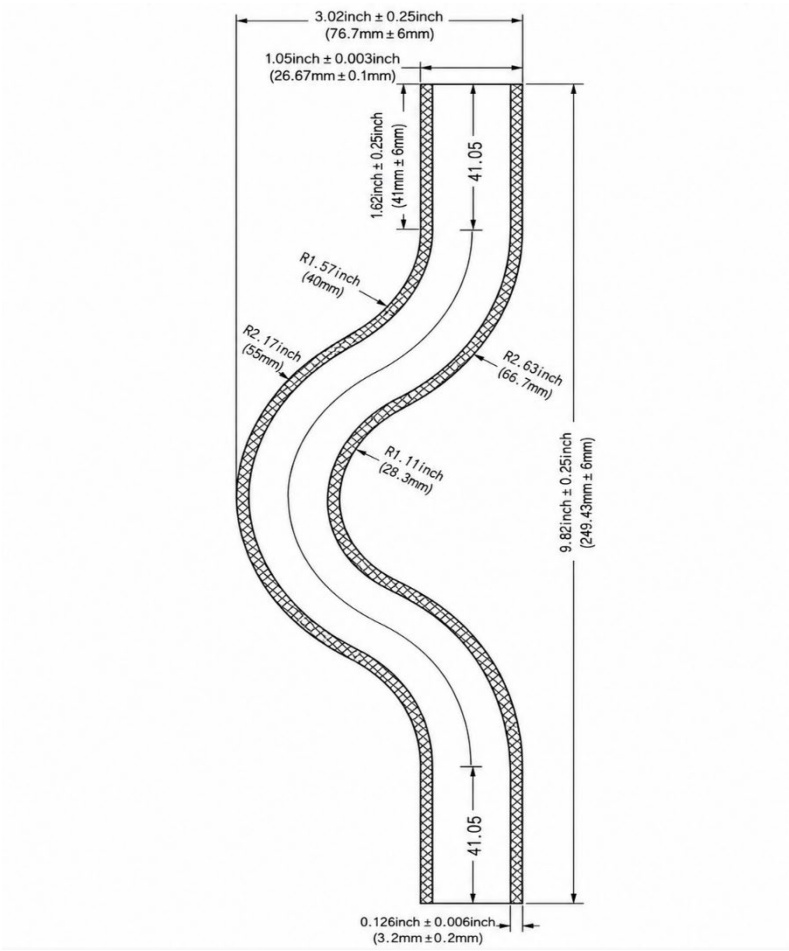
SKU: PVBTR075

3/4” PVC Condensate R-Trap

Applications:
The Bluefin 3/4" PVC Condensate R-Trap is designed for residential and light commercial HVAC condensate drain systems. It provides a reliable water seal to prevent sewer gases and odors from entering occupied spaces while maintaining proper condensate drainage. Its compact S-shaped (R) profile offers increased routing flexibility, making it ideal for installations with limited space, custom condensate drain assemblies, air handlers, furnaces, fan coil units, condensate pumps, and retrofit applications.

Product Features

- Creates a dependable water seal for condensate drain systems
- Helps prevent sewer gases and odors from entering occupied spaces
- Compact R-shaped design allows flexible drain routing
- Ideal for custom drain assemblies and OEM applications
- Corrosion, rust, and chemical resistant
- Compatible with standard 3/4" PVC drain piping
- Lightweight for easy installation
- Suitable for residential and light commercial HVAC systems



Materials

- Schedule 40 PVC (Polyvinyl Chloride

Notes:
• All Dimensions are nominal • Dimensions in inches (millimeters) • Tolerance ± 0.005 inch (±0.13mm) unless otherwise noted • For use with HVAC condensate drain systems only
