Executive Director

Office of Academic Affairs/Academic Center for Student-Athletes

The Louisiana State University Office of Academic Affairs and the Academic Center for Student-Athletes invite nominations and applications for the position of Executive Director for the Cox Communications Academic Center for Student-Athletes. Louisiana State University is a Division I member of the Southeastern Conference. **Responsibilities include but are not limited to:** Daily administration and management of the Academic Center for Student-Athletes; hiring, training, development, supervision, and evaluation of staff; budget oversight, strategic planning and direction; data collection and program evaluation; interdepartmental communication and reporting. **Required Qualifications:** Master's degree; five years experience in academic support services in higher education, including program development, implementation, and evaluation; knowledge of NCAA eligibility requirements and commitment to rules compliance; proficiency in financial, personnel, and facilities management; experience working with administrators, faculty, staff, coaches, alumni, and community members; demonstrated excellence in oral, written, and interpersonal skills. **Additional Qualifications Desired:** Experience directing an academic program for student-athletes at the Division 1-A level. Application deadline is May 23, 2008 or until a candidate is selected. An offer of employment is contingent on a satisfactory pre-employment background check. Anticipated start date for the position is July 1, 2008. Please send cover letter and resume (including email address) with a minimum of three references to ACSA Executive Director Search Committee Chair, Academic Affairs, Louisiana State University, Ref: #027585, Baton Rouge, LA 70803.

Subject: the Academic Services sound.....

Attach: CTOPS Academic Services 2007.pptm

CTOPS dates
Academic Services session during Day 1 of CTOPS on June 2, 5, 9, 12, 16, 19, 26, July 10, 14, 17, 21, 24, 28, and August 14. The sessions will be 2:00PM - 2:30PM in the Union Auditorium.

I have set all of these days on my calendar. This is no big deal since Marcus will have Bridge!! If you would want to be there with me or some other pairing, that is fine also. Please let me/us know what day you would like to do the presentation. Chocolate will be available ONLY on the days I (solo) present.
I am attaching the presentation. Please look at it for corrections/additions. They need the final copy by Friday
CTOPS Parent Schedule
http://orientation.unc.edu/index.php?option=com_content&task=view&id=28&Itemid=62
If you look at the CTOPS schedule, you will also see that there is an Info Fair during the SECOND day, 3:00 - 4:30 PM, probably in a Union room. This is also held during the two TSOP days, June 23 and August 13, 4:00 □ 5:00 PM in room 3411 of the Union. Some of you have expressed interest in these and may already have agreed to participate. This may be a time for collaboration.
Of course this is also during the time for Athletic parents so that crew will be swamped.
Thanks all. Shade

ACADEMIC SERVICES

- **Constituent Programs**
  - Academic Support Program for Student Athletes
  - Learning Center
    - Academic Success Program for Students with LD & ADHD
- Math Help Center
- General Chemistry Resource Center
- Summer Bridge Program
- Writing Center

II. MISSION

- to enhance and diversify educational opportunities
- to improve the quality of students' learning experiences

III. REFERRALS

- self-referrals
- referrals from an academic advisor, dean, faculty member, or other appropriate university personnel
- some programs restricted to special populations

LEARNING CENTER

- offers diverse services and programs aimed to assist students with improvement in their learning and their academic performance
- services available to any student
- academic counseling
- test preparation for standardized exams
- peer tutoring program
- supplemental instruction
- reading program

www.unc.edu/depts/lcweb/

Director: Martha Keever 962-3782

WRITING CENTER

- enhances writing skills by offering free, ungraded, non-credit tutorials
- services available to any student (emphasis on 1st and 2nd year students)
- one-on-one conferences
- group workshops
- in-class seminars
- on-line submissions

www.unc.edu/depts/wcweb

Director: Kimberly Abels 962-7710

GENERAL CHEMISTRY RESOURCE CENTER

augments in-class instruction for students experiencing difficulty in (Chem 101, 101L; 201, 201L; 205H; 241, 241H; 261, 261H; 262, 262H)

- individual and/or small group instruction
- faculty and tutors provide instruction
- noticeable improvement in comprehension of material

Director: Todd Austell 966-4097

MATHEMATICS HELP CENTER

- offers tutoring to students experiencing difficulty in Math 110, 130, 152, 231, 232, 233.
- one-on-one and small group help for all students
- staffed by qualified undergraduate students, math graduate students, and faculty
- meetings between tutor and tutee
- problem-solving sessions to improve comprehension

www.unc.edu/UgradInfo/HelpCenter/mathhelp.html

Director: Edward Richmond

ACADEMIC SUPPORT PROGRAM FOR STUDENT ATHLETES

- assists student athletes with balancing their academic responsibilities with their athletic obligations
- individual academic, personal, and career counseling
- first year academic success program
- weekly meeting with academic counselor
- extensive tutoral services
- peer education and mentoring program

Director: Robert Mercer 966-4102

Academic Success Program for Students with LD & ADHD

- assists students with documented learning disabilities, attention deficit disorders, and brain injuries in achieving their academic potential
- information about diagnostic assessment
- direct services and accommodations
- academic support groups
- training and consultation to University community

www.unc.edu/depts/lds

Coordinator: Theresa Maitland 962-7227

SUMMER BRIDGE PROGRAM

- facilitates a select group of students' transition from high school to the University

- seven- week residential academic program
- supportive and structured environment
- first year UNC CH students from NC
- enrollment in English 100 or 101 and Math 110 or 130 or 118
- six credit hours counted toward graduation
- cultural and social activities

Interim Director: Shade Little 962-1046

Subject: Workshop on Friday, May 30th

Good morning,
I just wanted to remind everyone about the workshop that Crystal and Stephen from the Registrars Office will be conducting regarding the new curriculum on Friday, May 30 from 10:00am - 12:00noon. Lunch will immediately follow the workshop. If you have some specific major examples that you would like for them to address, please let me know as soon as possible so that they can prepare appropriately. Bring any questions that you have. Now is the time to attempt to clear up any confusion with regard to the new curriculum and counting courses.

Look forward to seeing everyone on Friday morning.

Thank you,
Susan

COACHES CERTIFICATION EXAM (MAKE-UP DATE)

The Coaches Certification Make-Up Exam for the 2008-09 academic year will be held on Thursday, June 5th at 9:00 AM in the Academic Center Auditorium. At 9:00 am, prior to the exam, a video of the review session previously conducted by the ACC will be shown. The test will follow immediately at 10:30 am. Coaches, please mark your calendar to attend this exam and RSVP to Susan Maloy if you have not already done so. Please bring your 2007-08 NCAA manual to the exam. **UNC requires that all coaching staff members, including volunteer coaches and Directors of Operations, prepare for and take the exam, even if they do not recruit off-campus.**

PLAYING/PRACTICE SEASON PAPERWORK

Head coaches will be receiving playing/practice season paperwork this month. These will be due to Susan on Friday, July 25th.

VIDEOTAPING PROSPECTS

Videotaping prospects is prohibited at a non-institutional camp or where the tape would be used for recruiting purposes. It is permissible for you to videotape prospects at an institutional camp ONLY FOR INSTRUCTIONAL PURPOSES.

CTOPS

Please notify all incoming student-athletes of the C-TOPS session for Varsity Student-Athletes. The presentation by Academics and Compliance staff will include topics such as the NCAA Eligibility Center, Financial Aid, and services provided by the Academic Support Unit. There will also be a separate session for the parents of incoming student-athletes in the afternoon.

DOCUMENTATION REMINDER

Please remember that all compliance documentation must be submitted on a monthly basis and is due by the 10th day of the following month. This includes Countable Hours, Telephone Logs, Contact/Evaluation Logs, Official Visit, and Summer Camp Paperwork. Remember, if you have not had any activity in these areas, you must still report to the Compliance Office to avoid having a hold placed on your sport in the Business Office. It is your responsibility to contact our staff to determine if you are missing any paperwork. Please contact Shelly Green (2-7851) if you have any questions.

VOLUNTARY WORKOUTS DURING THE SUMMER

In order for any athletically related activity to be considered "voluntary," all of the following conditions must be met:

(a) The student-athlete must not be required to report back to a coach or other athletics department staff member (e.g., strength coach, trainer, manager) any information related to the activity. In addition, no athletics department staff member who observes the activity may report back to the student-athlete's coach any information related to the activity.

(b) The activity must be initiated and requested solely by the student-athlete. Neither the institution nor any athletics department staff member may require the student-athlete to participate in the activity at any time. However, it is permissible for an athletics department staff member to provide information to student-athletes related to available opportunities for participating in voluntary activities.

(c) The student-athlete's attendance and participation in the activity (or lack thereof) may not be recorded for the purposes of reporting such information to coaching staff members.

(d) The student-athlete may not be subjected to penalty if he or she elects not to participate in the activity. In addition, neither the institution nor any athletics department staff member may provide recognition or incentives (e.g., awards) to a student-athlete based upon his or her attendance or performance in the activity.

Subject: Legislative Update
Attach: 5-4-05.xls

All,

Wanted to update you on the legislation that would have allowed student-athletes receiving institutional aid to not have to have that counted toward their sports' equivalency limit... If you remember, this would have potentially allowed student-athletes to accept their CCI grant as opposed to receiving one of our loaner laptops.

The legislation was tabled by the NCAA's Board of Directors and sent back to the Management Council for review. It will be brought back to the Board in August. That being said, for this year, we will move forward "as normal" with our CCI process. If a student-athlete is receiving one of our loaner laptops and qualifies for the CCI grant, that grant money will be used to pay for their loaner laptop through our process. They will not be able to accept the grant themselves.

Please let me know if you have any questions. Also, I have attached my latest list, which includes 1 additional name (wrestler at the bottom in yellow) and as many PIDs as I can come up with at this point. I will continue to update you as necessary.

Thanks,
Amy

Subject: Re: Corbitt Scholarship-FYI
Attach: Text.htm

Jackie,

Thanks for this information. I did not know such assistance was available, and it's possible that our academic support personnel doesn't, as well. I'm copying them on this email, as we have recently discussed the potential need to cut back on the student-athletes that we fund testing for through SAOF (for budgetary reasons).

Robert, you and I can discuss further about how we would be able to potentially make use of this other funding source, depending on which of our student-athletes would qualify. I'm not sure how this assistance would "count" NCAA equivalency-wise. But if a student has to be receiving need-based aid in the first place, it is possible that they are not a counter for us, anyway.

We'll keep this in mind, Jackie, particularly for student-athletes who are on need-based institutional aid as opposed to athletics aid. Thanks again for bringing this to our attention!

Amy

>>> "Jacquelyn Copeland" <Jackie_Copeland@unc.edu> 3/16/2007 2:45 PM >>>

Amy,

We have a scholarship program called Corbitt that we use to cover psychological testing and other expenses related to a student□s physical or mental disabilities or impairments. If your office encounters a student that is receiving need based financial aid, needs such testing or some equipment that you cannot fund and they can□t get funding from the LDS or Disability services offices on campus we may be able to help them. Students have to be identified by the LDS and Disability services offices, we confirm their eligibility for need based aid and they are able to visit a provider (they have a list of some in the area) that is willing to bill our office for payment of their services.

I noticed there was a lot of testing and the list for SAF and SAOF reminds me of my Corbitt scholarship list so I though I□d let you know about this fund just in case it is able to help any of your student athletes. My understanding is that LDS can offer services to the students only after they have been tested and identified and that process is pretty costly so we help them get past that hurdle.

Jackie

COACHES CERTIFICATION EXAM

The Coaches Certification Exam for the 2008-09 academic year will be held on Thursday, May 29, 2008 in the Swofford Auditorium on the second floor of the Kenan Football Center. Beginning at 9 am, prior to the exam, the ACC will conduct an hour-long review session. Coaches, please mark your calendar to attend this exam and RSVP to Susan Maloy if you have not already done so. Please bring your 2007-08 NCAA manual to the exam. Make-up dates for the exam are June 5th and June 12th. Both make-up dates will have a review session at 9 am with the exam to follow at 10:15 am. **UNC requires that all coaching staff members, including volunteer coaches and Directors of Operations, prepare for and take the exam, even if they do not recruit off-campus.**

SUMMER EVALUATIONS

Coaches, please remember that evaluations of prospects that occur outside of the prospect's academic year (summer only) DO NOT count against the annual number of recruiting opportunities. Contacts that occur with a prospect during this time period DO COUNT against the annual number of permissible recruiting opportunities and must be reported to the Compliance Office.

SUMMER CAMP DOCUMENTATION

At least one week prior to the start of each camp, coaches must complete and submit the following forms to Lance in the Compliance Office:

- Student-Athlete Employment Roster
- Outside Coaches Employment Roster
- Free or Reduced Admission Roster

These forms should be signed and submitted, even if they do not apply to your particular camps. Starting in August, for any camp conducted in June or July that is missing documentation, a hold will be placed on that sport's account with the business office in a manner consistent with other delinquent paperwork. Please contact Lance (3-7259) with any questions.

PROSPECTS JOINING LOCAL SPORTS CLUB

Remember that prospects enrolling initially in the fall CANNOT relocate to Chapel Hill for the summer and join and work out with a local sport club with which one of our coaching staff members is involved. Please contact Amy if you have questions about this interpretation.

SUMMER EMPLOYMENT

Coaches, please ensure that your student-athletes are familiar with the guidelines for employment prior to leaving for summer vacation.

Student-athletes may obtain employment as long as they meet the following regulations:

1. The student-athlete's compensation must not include any remuneration for the value or utility the student-athlete may have for the employer because of the publicity, reputation, fame, or personal following that he or she has obtained because of athletics ability;
2. The student-athlete must be compensated only for work actually performed; and
3. The student athlete must be compensated at a rate commensurate with the going rate for similar services in that locale.

Provided these regulations are met, there is no limit on the amount of money a student-athlete can earn. Please remind your student-athletes to complete the Student-Athlete Employment Form, which you can find on the J:/ drive.

C-TOPS

Please notify all incoming student-athletes of the C-TOPS session for Varsity Student-Athletes. The presentation by Academics and Compliance will include topics such as NCAA Clearinghouse, Financial Aid, and services provided by the Academic Support Unit. There will also be a separate session in the afternoon aimed at the parents of incoming student-athletes.

Subject: Medical and 5th Yr Non-Counter Agreement
Attach: TEXT.htm; Medical and 5th Year Contract (Fall Term).doc

---

All,

Please see attached the Medical and 5th Year Non-Counter Agreement that we require all non-counters to sign in advance of awarding them athletics grant-in-aid. The NCAA has passed legislation that is effective for next year that allows us to award grants to these individuals on a semester-by-semester basis, so that we can be certain that they are fulfilling their academic requirements. The impetus behind this, obviously, is the potential "hit" that our programs can take with regards to APR if a non-counter fails to perform academically.

All that being said, I'd like for each of you to have the opportunity to "weigh in" on this agreement and let me know if there are corrections/suggestions that you believe would make it better. If you have comments, please pass them on to me as soon as possible, as I will need to start distributing them to this year's non-counters very soon in order to renew their grants-in-aid by the July 1 deadline.

I appreciate your help with this!

Amy

919.962.6002 (fax)
ajschae@uncaa.unc.edu

MEDICAL AND 5TH YEAR NON-COUNTER GRANT-IN-AID AGREEMENT (Fall Semester)

Although your athletics eligibility has ended, it is still our desire to assist you on your path toward graduating from the University of North Carolina at Chapel Hill. We are pleased to inform you that you will be receiving athletics grant-in-aid during the **Fall** semester to assist you with the costs associated with your continued progress toward this goal. Please keep in mind that athletics aid for a 9th/10th semester or during the summer is NOT guaranteed and will depend on your progress and plan toward graduation.

Along with receiving athletics grant-in-aid, however, comes responsibility. Because we have made a financial commitment to you, we expect and require you to make that same level of commitment toward your academic progress. Therefore, your continued receipt of athletics grant-in-aid for future terms (if applicable) is dependent on your successful adherence to the regulations listed below in this contract.

In order to retain your athletics grant-in-aid for future terms, you must abide by the following regulations:

1) You must meet on a pre-determined basis with Mr. Brent Blanton or Ms. Cynthia Reynolds (as assigned) in the Academic Center. You will work with them to develop an appropriate schedule and plan for graduation. You must attend all scheduled meetings and arrive on time;
2) You must meet with Dr. Cricket Lane to develop, if appropriate, a plan for continued Student Services support (e.g., career services, medical rehabilitation, etc.);
3) You must attend every class on your schedule (arriving punctually and staying through completion) and complete and submit all assignments by their due dates;
4) You will be subject to random drug testing through the UNC Drug Testing Program and must abide by all other Departmental and institutional policies; and
5) You must continue to meet all NCAA, ACC, and UNC academic standards of eligibility, along with all behavior/conduct requirements as specified in the Athletics Scholarship Agreement you initially signed.

Please be aware that failing to meet any of these requirements would be considered a fraudulent misrepresentation of information on this agreement and would result in the immediate termination of your athletics grant-in-aid.

If your athletics grant-in-aid consists of off-campus room and/or board (see specific award breakdown below), you will receive monthly stipend checks from the Department of Athletics. These checks will be issued by Mr. Blanton and will be dependent upon your continued compliance with this contract. If at any time you fail to meet these requirements, your room and board stipend will be immediately terminated. In such cases, the Department of Athletics also reserves the right to pro-rate tuition, fees, on-campus room, and book charges and to terminate remaining aid in these award components for the remainder of the term.

Please sign below, indicating that you have read and fully understand that the continuation of your athletics grant-in-aid is dependent on your compliance with this contract and your successful academic progress toward graduation, as outlined in NCAA progress-toward-degree standards. It is our hope that you will complete your degree requirements and leave the University with your degree.

Sincerely,

Richard A. Baddour
Director of Athletics

Subject: FOLLOW-UP: Underload Approvals/Full-Time Enrollment
Attach: TEXT.htm

All,

To follow up on Susan's email from the financial aid perspective... There are also issues with student-athletes receiving grant-in-aid while not in 12 hours or an approved underload - they can't! Though we certainly need them to be in 12 hours so that they can practice, compete, and receive GIA, they also need to be as timely as possible in getting their underload approval form signed and then dropping the unnecessary hours, so that we aren't unnecessarily paying full-time charges for student-athletes who will ultimately drop to 9 or fewer hours.

The last date to drop a course for tuition/fees credit is Tuesday, 9/2. For financial reasons, obviously, we need for approval forms to be signed and courses dropped by this date.

Thanks for your help with this.

Amy

>>> Susan B. Maloy 8/25/2008 7:47 AM >>>
Good morning everyone!

Hope you had a good weekend.

Just a reminder that today is the last day for our student-athletes to be practicing while in less than 12 hours without an underload approval form. This means that all underload paperwork needs to be on file in my office by the end of the day if they plan to enroll in less than 12 hours. Otherwise, we should put them in 12 hours for now until the underload is approved on campus. That way we don't have to rush the approval system, especially since there are new folks involved in the process.

It would be great if you could get me a list of all of your student-athletes who I should expect to be in an underload this semester.

Thank you for your attention to this important matter.

Susan

THE COMPLIANCE NEWSLETTER

UNC Department of Athletics

SEPTEMBER 3, 2008 ***VOLUME XV, NUMBER 2***

September Recruiting Calendar

Baseball
Quiet Period: Sept. 1 - 11
Contact Period: Sept. 12 - 30

Men's Basketball
Quiet Period: Sept. 1 - 8
Contact Period: Sept. 9 - 30

Women's Basketball
Quiet Period: Sept. 1 - 15
Contact Period: Sept 16 - 30

Football
Evaluation Period (42 days during September, October, November)

Quiet Period: Remainder of Days

Men's Lacrosse
Contacts only/No evaluations: Sept. 1 - 30

Women's Lacrosse
Contact Period Sept. 1 - 30

Track/Cross Country
Contact Period Sept. 1 - 30

Softball
Contact Period: Sept. 1
Contacts only/No evaluations: Sept. 2 - 30

Volleyball
Contact Period Sept. 1 - 30

Other Sports
Contact Period Sept. 1 - 30

TAILGATES

As the 2008-2009 season gets underway, coaches are reminded that student-athletes must pay the cost of any meal/snack they may receive at a tailgate party. **The student-athletes must pay for the food prior to the tailgate**.

There are two exceptions to this tailgate policy. First, the **parents of student-athletes** are permitted to provide occasional meals/snacks to team members. An example of this would be a tailgate meal following a competition. Also, student-athletes may receive up to three (3) occasional meals per semester, provided by an institutional staff member or booster. This may occur at tailgates **only if** the meal is being provided by an institutional staff member (**not** a booster, as boosters can provide meals only at their homes).

2008-09 NLI SIGNING DATES

Please note the following NLI signing dates for the upcoming academic year:

Basketball (Early)	11/12/08 - 11/19/08
Basketball (Regular)	4/15/09 - 5/20/09
Football (Mid-Year JC)	12/17/08 - 1/15/09
Football (Regular)	2/04/09 - 4/01/09
Field Hockey, Soccer and Track & Field	2/04/09 - 8/01/09
All other sports (Early)	11/12/08 - 11/19/08
All Other Sports (Regular)	4/08/09 - 8/01/09

COMPLIMENTARY TICKET GUIDELINES

Student-Athletes: Student-athletes are each permitted **4** complimentary admissions to home and away events in the sport in which he/she participates, and **6** complimentary admissions to post-season events. Complimentary admissions may be provided to family members and friends of student-athletes and must be administered via a pass list. Tickets cannot be sold, bartered or traded for any item of value. **Only** under the following conditions may a student-athlete provide tickets to prospect-aged individuals:

1. If UNC is recruiting the prospect, the student-athlete's relationship with him/her must have begun ***before*** UNC began recruiting the individual.

2. No one affiliated with the athletics department (e.g., coach) can initiate the provision of a student-athlete's ticket to a prospect.

3. A prospect may not receive complimentary admissions during a dead period in the sport in which he/she is being recruited by UNC.

4. Prior to providing prospects with complimentary admissions, a student-athlete must identify the individual as a prospect to the pass list administrator.

ALUMNI GAMES DURING TWO-HOUR SKILL INSTRUCTION

Competition is not permitted outside of a team's 20-hour/week season. Therefore, it is not permissible to play alumni games during a team's 8-hour/week off-season. Please contact Susan at 2-9892 with any questions.

FUNDING AVAILABLE FOR STUDENT-ATHLETES

Please be reminded of the availability of funds of which student-athletes may take advantage if a need presents itself:

Student-Athlete Opportunity Fund (SAOF):

The SAOF is used to purchase health insurance for international student-athletes, other student-athletes without insurance coverage, or student-athletes whose policy has a high deductible. It is also available for professional testing, such as learning disability testing, as well as emergency expenses.

For those full scholarship student-athletes who also receive a Pell grant, the fund is available to pay dental and other medical expenses not covered by insurance policies (provided prior approval is sought and granted). Additionally, these same student-athletes are eligible for up to $500 per year for clothing expenses.

Coaches are encouraged to identify situations in which this funding could be helpful to their student-athletes. Please contact the compliance staff for approval prior to discussing it with the student-athlete or with any questions you may have.

Subject: Student-Athletes Not Returning for Spring
Attach: TEXT.htm

Coaches,

Several of you have student-athletes that are not returning for the spring term (e.g., transferring, turning pro, etc.). Please make sure these student-athletes handle all the necessary paperwork to officially withdraw! Not only must they withdraw from the institution (which the Academics staff can walk them through), but they must also cancel any housing, meal plans, etc., that they are received during the fall and might carry over automatically.

Any cancellation charges resulting from them not completing all necessary steps will be their responsibility. as they are no longer receiving athletics GIA!

Thanks,
Amy

Subject: Revised Recruiting Policy
Attach: TEXT.htm; UNC Recruiting Handbook (effective 2.1.09).pdf

---

Coaches,

Please see attached for the revised Department of Athletics' Recruiting Policy (approved and effective 2.1.09). In a couple of days, this document will be found on the "Prospective Student-Athletes" tab on the Compliance page of tarheelblue.com, and it will also be on the J: drive in the Official Visit file.

Please let us know if you have any questions.

Thanks,
Amy

University of North Carolina at Chapel Hill
Department of Athletics

Recruiting Handbook

Effective 12/1/04, Revised 2/1/09

The University of North Carolina Athletics Mission Statement

The University of North Carolina at Chapel Hill Department of Athletics' mission is to sponsor a broad-based athletics program that provides educational and athletics opportunities to allow young men and women to grow, develop, and serve the interests of the University by complementing and enhancing its diversity and quality of life. Coaches, as educators, are fundamental to this process. In keeping with the University's efforts to offer programs of regional and national acclaim, the Department's athletics programs strive for competitive excellence within the Atlantic Coast Conference (ACC) and with other similar institutions. Through its athletics programs, the University seeks to unite students, faculty, staff, and alumni in a common and shared experience. The Department seeks to contribute to the diversity of the University by offering opportunities for enhanced racial, ethnic, cultural, and geographic representation.

The University of North Carolina Recruiting Philosophy

The University of North Carolina at Chapel Hill (UNC) is committed to providing prospective student-athletes meaningful opportunities to make informed decisions whether to pursue their academic and athletics futures at UNC. Recruiting visits bring prospective student-athletes to campus as part of their decision-making processes on where to enroll. These visits are to be a mutual exploration by prospective student-athletes and institutional officials, especially athletics personnel, regarding whether the institution and the prospective student-athletes are a good fit for each other. This philosophy is based on the concept that the prospective student-athletes are making decisions about where to pursue their academic and athletics futures, while, concurrently, the institution is evaluating prospective student-athletes' abilities to contribute to the University and athletics programs.

The primary consideration in selecting activities for these visits, therefore, should be to provide information that will assist prospective student-athletes and their families in making these decisions. Appropriate behavior is expected of all prospective student-athletes who visit the campus.

Athletics department personnel are expected to provide an educational experience in an environment that conforms to University and NCAA policies and missions. Student-athlete hosts are expected to adhere to these policies, as well as to provide all prospective student-athletes with safe and insightful student experiences at UNC. Finally, prospective student-athletes should behave in a manner consistent with the expectations of all UNC student-athletes, adhering to all ACC and NCAA regulations, as well as all State and federal laws.

Violations of the guidelines will be reported to the Director of Athletics. All suspected violations will be investigated thoroughly and dealt with seriously. Any infraction(s) found to be in violation of any of the guidelines will be reported to the Faculty Athletics Representative, Chancellor, ACC, and NCAA.

Development of Recruiting Policies

The Committee on Recruiting for the University of North Carolina at Chapel Hill began collecting information and meeting in early 2004. Through its diverse membership from both the Department of Athletics and the campus community, the committee gathered and reviewed information on all aspects of the University's on-campus recruiting processes. The Board of Trustees was also informed of the thorough review of the recruiting processes.

Information was obtained from the Committee, the Student-Athlete Advisory Committee, coaches groups, conversations with the ACC, and other universities. The Committee established a subcommittee to analyze the information collected.

The subcommittee developed this recruiting handbook that includes a recruiting philosophy statement, guidelines and concepts, and updated recruiting forms. It also establishes procedures for athletics administrators, head coaches, student hosts, and prospective student-athletes.

After consultation with faculty, student-athletes, and coaches regarding both the collection of receipts from student-athlete hosts and prospects (for student host money) as well as the establishment of a curfew/regulation of unstructured time, the subcommittee decided not to institute department-wide policies enacting these regulations. Instead, these decisions will be left to the discretion of each sport's head coach. The subcommittee believes the guidelines currently in place will create the "safe and insightful student experiences" the institution strives to provide to prospective student-athletes.

The handbook was reviewed by the Committee on Recruiting, the Faculty Committee on Athletics, and the Chancellor. The final copy will be on file with the Faculty Athletics Representative, the Chancellor, and the ACC office. It will also be distributed to head coaches, athletics administrators, and student hosts. In the event that changes to the recruiting policy are deemed necessary, the above individuals will be given the opportunity to comment on the proposed changes. Once changes are finalized, the Chancellor and Director of Athletics will formally approve the changes, and an approved version (along with the signatures of these two individuals) will be submitted to the ACC office.

GUIDELINES FOR ATHLETICS DEPARTMENT STAFF

The goal of campus recruiting visits is to provide prospective student-athletes with the opportunities to make informed decisions about their future academic and athletics careers at the collegiate level. These guidelines are intended to provide institutional staff members with the information necessary to provide these opportunities in a manner consistent with the regulations set forth by the NCAA.

Recruiting is a vital component for the success of our athletics program. Our goal is to attract not only great student-athletes, but also great people, who will enhance the overall University environment in a positive fashion. It is our responsibility to make sure all prospective student-athletes have positive and safe visits.

1. In preparation for an official visit, coaches will send a letter to prospective student-athletes, outlining expectations and describing available opportunities for the visit. If permitted by NCAA regulations, this information will also be provided to prospective student-athletes arranging unofficial visits to campus.
2. If air transportation is provided to prospective student-athletes to and from an official campus visit, the flights must be via a commercial airline at coach class airfare with no upgrades. Prospective student-athletes may be picked up at the airport by any member of the athletics department.
3. If prospective student-athletes drive to campus by personal or rental cars, mileage reimbursement may be provided at the rate used by UNC for institutional staff members. It is not permissible to cover the cost of prospective student-athletes' rental cars.
4. Student hosts must be either current student-athletes or students who are part of the institution's regular program for providing campus tours to prospective students. Student host regulations will be discussed at team eligibility meetings, and all student hosts will receive a copy of the recruiting handbook.
5. Head coaches (or their representatives) will meet with the student hosts and prospective student-athletes to set expectations for behavior and review the guidelines and forms. Head coaches will also provide the prospective student-athletes and hosts with visit itineraries that include contact information for necessary individuals (e.g., coaching/administrative staff, student-athletes).
6. Student hosts and prospective student-athletes must abide by all local, State, and federal laws, along with UNC, ACC, and NCAA regulations. Upon arrival, prospective student-athletes and their student hosts must sign the applicable forms (Guidelines for Prospective Student-Athletes, Student-Athlete Host Entertainment Form, Unofficial Visit Declaration) indicating that they will not engage in inappropriate behavior (e.g., drinking, use of drugs, gambling). By signing these forms, prospective student-athletes and student hosts will affirm their understanding of the guidelines. At the conclusion of an official visit, prospective student-athletes must sign a form (Prospect Official Visitation Form) affirming their visits' conformity to all UNC, ACC, and NCAA regulations.
7. When transporting prospective student-athletes around campus during official visits, coaches must use their personal vehicles or institutional vehicles generally used by personnel to transport prospective students on campus tours. Student hosts may also use their personal vehicles. Prospective student-athletes may not be provided with cars to use during their visit.
8. Prospective student-athletes (and prospective student-athletes' parents or legal guardians) must be housed either on campus with student hosts or in standard lodging. Those staying in dorms on unofficial visits must pay the $10 per night housing charge specified by UNC Housing. For those on official visits being housed in hotels, rooms may not be suites or include special accessories, such as Jacuzzis, unless those amenities are available to all patrons at that specific establishment. It is not permissible to decorate, in any degree, prospects' rooms of lodging, regardless of their location (e.g., hotel, dormitory, etc.).
9. The meals provided to prospective student-athletes and their parents or legal guardians on official visits should be comparable to those meals given to student-athletes during the academic year. Each day, the institution may provide 3 meals and a reasonable snack (e.g., pizza, hamburger). On unofficial visits, meals cannot be purchased for prospective student-athletes or their parents or legal guardians.

10. Personalized recruiting aids (e.g., personalized jerseys, lockers, audio/video scoreboard presentations) and simulated game-day activities during prospective student-athletes' visits are prohibited. Prospective student-athletes may be present in the locker room before or after a competition. During the competition, however, prospective student-athletes must be seated in the regular seating areas. It is not permissible to publicize prospective student-athletes' visits in any way.
11. During campus visits, prospective student-athletes, student hosts, and coaches are prohibited from participating in activities involving the consumption of alcohol, drug use, or any violations of criminal law.
12. Gambling, of any type, during visits is prohibited.
13. Harassment, of any type, is impermissible. This includes, but is not limited to, racial, sexual, or religious harassment. Providing or purchasing sexual favors, purchasing or viewing pornography, or any other involvement with sexually-explicit material is inappropriate and strictly prohibited.
14. Campus visits should include meetings with Academic Support Program staff (e.g., team's academic counselor, Director of Student-Athlete Development), along with other campus personnel, if possible (e.g., meeting with faculty, attending class). At a minimum, the coach should review the academic packet, which is provided by the academic counselor, with the prospective student-athletes.
15. During official and unofficial visits, 3 complimentary admissions to campus athletics contests may be provided to prospective student-athletes and anyone accompanying them on the visit. The names of the prospective student-athletes and their relatives or friends must be placed on a pass list. Prospective student-athletes and their relatives or friends must sign the pass list and show identification to be admitted. No hard tickets may be issued.
16. Application of these guidelines will be monitored by the Compliance Office and designated coaches.

Your compliance with these guidelines is absolutely necessary and greatly appreciated. Appropriate disciplinary actions will be in accordance with University policy.

University Alcohol Policy

The University has a detailed policy concerning the use of alcohol by students. The following is a summary of the University Alcohol Policy. Students are responsible for knowing the full content of the policy. A complete copy of the policy may be obtained at http://deanofstudents.unc.edu/policies/sub.policies.alcohol.html or from the Student Affairs Office (966-4042).

Students under the age of 21 may not buy, possess, or consume alcoholic beverages. Students 21 and older may possess and consume alcohol in residence hall rooms, but may not sell or give alcohol to anyone under 21. Common source containers of alcohol (e.g., kegs) are not permitted on campus. Possession or consumption of alcohol is not permitted at any campus athletics event or performance or at any outdoor campus location. No student activities fees or other funds of a recognized student group may be used to buy alcohol.

If you are found to be in violation of the University Alcohol Policy you may:

- be referred for counseling, assessment, and/or alcohol education
- have your housing contract terminated
- be placed on housing contract probation
- receive a written reprimand
- be required to make restitution
- be referred to the Student Judicial System

As a member of the Community, you may:

- lose your driver's license
- be convicted of a felony or a misdemeanor
- obtain a criminal record, accrue fines, and possibly serve jail time

This is the University's Alcohol Policy. Both Student Hosts and Prospective Student-Athletes are required to abide by this policy.

Department of Athletics' Alcohol Policy

The Department of Athletics' policy regarding the use of alcohol at departmental events is as follows:

a. Alcohol may not be purchased or consumed during team travel.
b. Alcohol may not be served or consumed during team functions.
c. Alcohol may not be purchased by administrators or coaches for consumption by student-athletes.

Departmental events including prospective student-athletes and enrolled student-athletes may not involve the use of alcohol. In regard to prospective student-athletes, administrators and head coaches must require that the entertainment of prospective student-athletes not involve the use of alcohol. In regard to enrolled student-athletes, alcohol may not be served at gatherings held after athletics contests.

This is the Department of Athletics' Alcohol Policy. Head Coaches, Administrators, Student Hosts, and Prospective Student-Athletes are required to abide by this policy.

Effective 12/1/04, Revised 2/1/09

Key Points to Hosting a Recruit

1. When you know you are hosting a prospective student-athlete, plan ahead. Plan an itinerary with your coach and teammates. Make planning and hosting a team effort.
2. Establish a relationship with the prospective student-athlete based on trust and sincerity.
3. If you have a prior engagement (e.g., meeting with professor, study table) and it is not feasible for you to take your guest with you, you MUST make arrangements with a reliable teammate to stay with your guest for the time that you are away.
4. Treat the prospective student-athlete in the manner which typifies our athletics program. Give them a taste of the distinctive environment which makes UNC unique.
5. Be aware that your impression of the prospective student-athlete will be of interest to your coaches and teammates.
6. In the case of an EMERGENCY, notify the proper authorities immediately.
7. It is permissible for you to communicate with prospective student-athletes after they leave campus; however, it must be on your own initiative and cannot be at the direction of your coaching staff. Give the prospect your contact information (e.g., email address, instant messaging screen name) at the conclusion of the visit. Tell the prospect that he/she can contact you with any questions they may have after leaving campus.

Hosting Checklist

_____ Get as much information as possible from your coach about the prospective student-athlete.

_____ Have the prospective student-athlete complete the questionnaire.

_____ Check your schedule. Do you have any tests, projects, or homework assignments that you will need time to work on while the prospective student-athlete is visiting?

_____ Plan your hosting duties with teammates to allow for studying, if necessary.

_____ Determine the classes the prospective student-athlete will attend. Have him or her attend some classes in his or her potential major.

_____ Notify your dorm RA that you are having a guest (if applicable).

_____ Meet with your coach and the prospective student-athlete.

_____ Sign the Student-Athlete Host Entertainment Form.

_____ Get to know the prospective student-athlete. Find out his or her interests. What does he or she like to do with friends? Does he or she have any questions about UNC that you can answer?

THE UNIVERSITY OF NORTH CAROLINA

Unofficial Visit Declaration

We are pleased that you are visiting The University of North Carolina at Chapel Hill on an unofficial recruiting visit. The NCAA and the University have developed rules and regulations regarding unofficial visits. We have listed them below so that you may be aware of our policies.

1. You are permitted to visit our campus at your own expense an unlimited number of times, and these visits can occur at any point in your high school career.

2. UNC is not permitted to pay ANY expenses while you are visiting our campus. This includes transportation costs, housing, meal, or beverage expenses, and the cost of any entertainment. You are responsible for all of these expenses during your visit.

3. You may receive 3 complimentary admissions to a UNC athletics event. Admission must be through a pass list, as hard tickets will not be provided. These tickets can be used by you and anyone accompanying you on your visit.

4. If additional tickets are needed, you must purchase them in the same manner as any other member of the general public. UNC is not able to reserve additional tickets for prospects on an unofficial visit.

5. UNC can only transport you to view off-campus practice and competition sites in your sport, attend home athletics contests at a local facility, or view other institutional facilities within 30 miles of the campus. All other transportation is your responsibility.

6. UNC cannot provide you with parking privileges to utilize while attending a campus athletics event.

7. UNC cannot provide you with any gifts while you are on campus. This includes clothing, equipment, and UNC memorabilia. Game programs can be provided during an unofficial visit.

8. If you choose to stay in a UNC dorm during your visit, you are required to pay the regular institutional rate, which is $10 per night.

Please complete at the conclusion of the unofficial visit and submit to the Compliance Office:

Student Host Instructions (per NCAA Rules and Regulations):

These guidelines have been established to ensure that each prospect's visit to our campus is an enriching one. Serving as a student host is an important service to UNC and the Department of Athletics. Appropriate conduct is required of you by UNC, ACC, and NCAA standards:

1. You must be enrolled full-time at UNC.
2. You will be provided money with which to entertain only the prospect and his/her parents, legal guardians, or spouse. This money may not exceed $30/day, with an additional $15/day for each additional prospect that you entertain.
3. You may not give the prospect cash, nor may you use the entertainment funds to purchase or provide the prospect with alcohol, drugs, or gifts of value (e.g. souvenirs or clothing items).
4. You may not transport the prospect or anyone accompanying him/her more than 30 miles from campus.
5. No UNC institutional staff member or athletics booster may provide or arrange for you an automobile to use to transport the prospect or anyone accompanying him/her.
6. You should not allow the prospect to have a recruiting conversation, either on or off campus, with former student-athletes, alumni, or boosters of the athletics program. If an unplanned meeting occurs, only an exchange of greetings is permissible.
7. You may allow the prospect to participate in a workout or recreational activity during his/her visit, provided the activity is not organized or observed by members of the coaching staff and is not designed to test the athletics ability of the prospect.
8. You may receive a complimentary admission to a campus athletics event, provided you are accompanying a prospect to that event.
9. You may not allow the prospect to use alcohol or drugs during the visit. Underage drinking (below 21) is illegal in the State of North Carolina. In addition, you may not engage in any activity that violates criminal law.
10. The University of North Carolina at Chapel Hill will not tolerate harassment of any kind (e.g., racial, sexual, religious) by anyone associated with our athletics teams. You, as a student host, must be aware of the University's position on this type of activity and work to ensure that prospects you are hosting conduct themselves appropriately. Providing or purchasing sexual favors, purchasing or viewing pornography, or involving yourselves with any other sexually-explicit material is inappropriate and strictly prohibited.
11. You, along with prospects, must adhere to ACC and NCAA bylaws, as well as all State and federal laws, prohibiting gambling.

Your compliance with these guidelines is absolutely necessary and greatly appreciated. Failure to agree with and adhere to all guidelines may result in one or more of the following disciplinary actions: reprimand, probation, suspension, termination of grant-in-aid, cancellation of eligibility, or dismissal from the athletics program. You may also be subject to any penalties set forth by the University.

My signature below indicates that

- I have read and understand the above rules governing my role as a student host.
- I will use the $_____ provided me to host the prospect(s) named above in a manner consistent with the above regulations.
- I will return any unused funds to my head coach.

Arrival Date and Time ____/____/____ ____:____ AM/PM (circle one)

Departure Date and Time ____/____/____ ____:____ AM/PM (circle one)

We are pleased that you are visiting the University of North Carolina on an official recruiting visit. The NCAA and the University have developed rules and regulations regarding official visits. We have listed them below so that you may be aware of our policies.

1. You may take **no more than 5** expense-paid visits to Division I or II institutions, and only 1 of these may be taken to UNC.
2. The length of an official visit may not exceed 48 hours. This period begins when you first arrive on the UNC campus. If you remain at UNC after this time period has expired, you are responsible for any expenses associated with your return trip home.
3. UNC may pay round-trip expenses for you (e.g., mileage reimbursement, coach airfare). Unless your family or friends accompanied you in the same car, these individuals are responsible for their own travel expenses. No one associated with UNC may provide a car for your use during the official visit.
4. UNC may pay your actual costs for reasonable expenses (e.g. meals, lodging) incurred while traveling to and from campus on an official visit.
5. Entertainment may only be provided to you, your parents or guardians, and your spouse, and must occur within 30 miles of campus. Entertainment funds may not be used to purchase alcohol, drugs, or gifts of value (e.g. souvenirs or clothing).
6. You may not receive cash for entertainment purposes, nor may gifts, souvenirs, or athletics gear be given to you free of charge or at a reduced rate.
7. You, along with two people accompanying you, may receive complimentary admission, via a pass list, to a regular season campus athletics event, but such seating must be in the general seating area of the facility.
8. At no point is it permissible for you to have a recruiting conversation with former student-athletes, alumni, or boosters of the athletics program at UNC.
9. You may not participate in a physical workout or recreational activity that is organized or observed by any member(s) of UNC's coaching staff.
10. The use of alcohol or drugs during official visits is not allowed. Underage drinking (below 21) is illegal in the State of North Carolina. In addition, you may not engage in any activity that violates criminal law.
11. You must adhere to ACC and NCAA bylaws, as well as all State and federal laws, which prohibit gambling.
12. The University of North Carolina at Chapel Hill will not tolerate harassment of any kind (e.g., racial, sexual, religious) by anyone associated with our athletics teams. Student hosts are aware of the University's position on this type of activity, and work to ensure that the prospects they host conduct themselves appropriately. Providing or purchasing sexual favors, purchasing or viewing pornography, or involving yourself with any other sexually-explicit material is inappropriate and strictly prohibited.
13. If you have any concern about conduct during your visit, you are encouraged to talk to the head coach or an athletics administrator.

Your cooperation and adherence to these guidelines is absolutely necessary and greatly appreciated. Appropriate behavior is expected of our current student-athletes, as well. This is a great chance to experience the impressive opportunities available to student-athletes on the UNC campus. We hope you enjoy your visit!

To be signed by the prospective student-athlete and coach at the BEGINNING of the official visit:

- I have reviewed the above provisions and agree to abide by them on my official visit.

Prospect's Signature: _____ Date: _____

Administering Coach's Signature: _____ Date: _____

To be signed by the prospective student-athlete and coach at the CONCLUSION of the official visit:

- I affirm that I have conducted myself in accordance with the above guidelines for the duration of my official visit.

Prospect's Signature: _____ Date: _____

Administering Coach's Signature: _____ Date: _____

Effective 12/1/04, Revised 2/1/09

Dear

Congratulations on selecting the University of North Carolina at Chapel Hill as one of your official visits. You will be stepping onto 729 acres of one of America's most beautiful campuses and visiting one of the nation's top public universities (ranked 5th in the nation), as stated by U.S. News and World Report magazine's 2004 "America's Best Colleges" guide. UNC students have a long tradition of outstanding achievement in the classroom, on the playing field, and beyond.

UNC athletics is committed to providing educational and athletics opportunities that will allow our student-athletes to grow, develop, and continue to achieve. This visit is a mutual exploration. Along with allowing us to get to know you better, your visit will expose you to the exceptional opportunities available at UNC to develop academic scholarship, athletics excellence, leadership, and community service throughout your collegiate career.

We expect that your behavior during your visit will reflect the kind of behavior that we expect of all UNC student-athletes. We want you to have a wonderfully exciting and safe trip to our campus. Please take time to read all the information regarding your official visit and fill out the Prospective Student-Athlete Questionnaire available online at www.tarheelblue.com. This questionnaire will assist your host in planning your visit. In addition, the NCAA website (www.ncaa.org) might contain information that you will find useful throughout the recruiting process.

This is a great chance to understand the impressive opportunities available to student-athletes on the UNC campus. We hope you enjoy your visit!

Sincerely,

From: Amy Herman <ajschae@uncaa.unc.edu>

Attach: TEXT.htm; FB 2009 Summer Conditioning Period Regulations.doc; Summer Conditioning Regulations (Basketball) - 2009.doc; Summer Conditioning Regulations (not FB or BB) - 2009.doc

---

All,

See attached for the Summer Conditioning memos for this summer. Please note that there are 3 attachments. You will need to read/print only the one that is applicable to your sport!

Please let us know if you have any questions about this information.

Thanks,
Amy

Amy Herman

FOOTBALL SUMMER CONDITIONING - 2009

Scheduling

1. Summer conditioning begins nine weeks prior to the permissible reporting date, which is the night before the first day of practice. For the 2009 summer, based on the formula, our first day of summer conditioning will be Thursday, June 4th, immediately following the last discretionary week, which ends on Wednesday, June 3rd.
2. 1 week of **discretionary time: Sunday, 7/26 through Saturday, 8/1** (see reg's below)
3. Other 8 weeks **non-mandatory weight training and conditioning** (see reg's below)

Discretionary Time

1. No required workouts
2. Institutions not permitted to recommend weight training and conditioning activities
3. If student-athlete opts to work out, S&C staff may monitor facility for health and safety purposes, but may not conduct the workouts.

Non-Mandatory Weight Training and Conditioning

1. Conducted by S&C staff with department-wide duties
2. No more than 8 hours per week
3. **Hours/week must be submitted to Compliance office at beginning of each week**.
4. Role should not be taken and attendance may not be reported back to football staff.

Incoming Freshmen/Transfers

1. UNC may loan clothes (including workout apparel, shoes, laundry service) to prospects for summer workouts.
2. If prospect has signed an NLI or is enrolled in UNC's summer school prior to initial full-time enrollment at UNC, he is permitted to participate in summer workouts after pre-participation medical exam.
3. 4-4 Transfers who have signed a financial aid agreement or written offer of admission may participate in non-mandatory summer workout (as they do not have the opportunity to sign an NLI).
4. Prospects must have completed their senior year in high school prior to beginning summer conditioning.
5. Unless they are enrolled in summer school, prospects may not receive room and board expenses while they are participating in summer conditioning.

Medical Issues

1. Prior to any non-mandatory summer weight training or conditioning workouts, incoming freshmen and transfers beginning their initial season of eligibility at UNC must undergo a pre-participation medical examination conducted by a physician.
2. All S&C coaches must be certified in CPR and First Aid.
3. During all conditioning activities (not weight training), a sports medicine staff member must be present and have the unchallengeable authority to cancel or modify the workout for health and safety reasons.

4. We may cover medical expenses for enrolled student-athletes, **prospects that have signed an NLI or are enrolled in UNC's summer school prior to initial full-time enrollment at UNC**, and 4-4 Transfers who have signed a financial aid agreement or written offer of admission that sustain injuries while participating in non-mandatory summer conditioning activities that are conducted by an institution's strength and conditioning coach with department-wide duties.
5. Not permissible to cover medical expenses for prospective student-athletes who have not signed an NLI or, in the case of 4-4 Transfers, a financial aid agreement or written offer of admission (e.g., high school or juco), or those that are not enrolled in summer school, as these individuals are not permitted to participate in non-mandatory summer conditioning activities conducted by our strength and conditioning coaches.

Summer Specifics

1. No offensive/defensive alignments may be set up during conditioning, and no football-related equipment may be used.
2. It would be permissible for a prospect or an enrolled student-athlete to watch game film if he makes the request and the coach is not present. **Prospects and student-athletes may not at any time watch game film with a coach**, as that is a countable athletically related activity that is not permitted during the summer.

SUMMER CONDITIONING (BASKETBALL) - 2009

INVOLVEMENT OF STRENGTH AND CONDITIONING COACHES

1) With Current Student-Athletes
    a. Must have **department-wide responsibilities*** in order to be able to design and conduct specific workout programs for student-athletes during vacation periods (e.g., summer).
2) With Incoming Freshmen and 2-Year Transfers (**who have signed NLI's**)* and 4-Year Transfers (**who have signed a financial aid agreement or written offer of admission**)
    a. Cannot prearrange conditioning activities for them;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.
3) With Incoming Freshmen and 2-Year Transfers (**who have not signed NLI's**)* and 4-Year Transfers (**who have not signed a financial aid agreement or written offer of admission**)
    a. Cannot permit them to participate in voluntary weight-lifting or conditioning activities on our campus **unless the facilities are open to the public***;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.

EXCEPTION: INCOMING FRESHMEN AND TRANSFERS WHO HAVE **1) SIGNED NLI'S** OR **2) ARE ENROLLED IN SUMMER SCHOOL PRIOR TO INITIAL ENROLLMENT AT UNC**:

1) Are permitted to use weight facilities that are closed to the public; and
2) May participate in voluntary weight lifting or conditioning activities that are conducted by the strength and conditioning coach, who must have department-wide responsibilities.

INCOMING FRESHMEN AND TRANSFERS WHO DO NOT MEET THE ABOVE EXCEPTION (E.G., THOSE NOT IN SUMMER SCHOOL)

1) May not participate in weight lifting or conditioning activities on the institution's campus unless the facilities are open to the public; and
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach, **but all conditions in (3) above are applicable.**

* *Clarifications*:

1) <u>Department-Wide Responsibilities</u>:
    a. Job description must include duties that extend beyond one sport; and
    b. Could include working as a strength coach with at least one other sport, having Olympic sport weight room supervision hours, or having supervisory responsibilities over strength coaches that work with other sports.

2) <u>Open to the Public</u>:
    a. Can be limited to the extent of being open to only Faculty and Students with valid identification (e.g., Student Recreation Center policies);
    b. Can have certain hours when facilities are open to the public (e.g., 8 am – noon: reserved for current student-athletes; noon – 4 pm: open to the public); and
    c. Incoming freshmen who have not signed NLI's would be limited to the time period when the facility is open to the public.

3) Work with Incoming Freshmen and Transfers:
   a. Strength coaches may provide them, as an attachment to a letter, a written program for their workouts in the summer prior to full-time enrollment.
   b. However, the strength coach cannot, in any way, lead them through the program in the weight room, unless they meet the exception above.
   c. It is not permissible to circumvent this rule by allowing incoming freshmen to work out alongside current student-athletes who are being led through the same program by the strength coach, as this would constitute indirect administration of the program to the incoming freshmen.
   d. He/She can only be involved in the workout for supervisory (safety) purposes.

MISCELLANEOUS SUMMER REGULATIONS

1) Medical Expenses:
   a. Prior to any voluntary summer weight training or conditioning workouts, incoming freshmen and transfers beginning their initial season of eligibility at UNC must undergo a pre-participation medical examination conducted by a physician.
   b. An institution may provide medical expenses (including rehab and physical therapy expenses) for any student-athlete or prospective student-athlete who sustains an injury while participation in voluntary conditioning activities during the summer that are conducted by an institution's strength and conditioning coach with department-wide duties.
   c. An institution may not provide medical expenses for injuries sustained by a student-athlete or prospective student-athlete engaging in voluntary summer conditioning activities that are not conducted by the strength and conditioning coach.

2) Academic Support Services and Training Room Facilities:
   a. If a prospect (high school, juco transfer, 4-year transfer) **is enrolled in the institution's summer term before his/her initial enrollment**, he/she may receive academic support services and utilize the institution's training room facilities.
   b. If a prospect (high school, juco transfer, 4-year transfer) **is not enrolled in the institution's summer term before his/her initial enrollment at UNC,** he/she may not utilize these services.

3) Summer Workout Apparel/Equipment:
   a. It is permissible for student-athletes to use institutional apparel during the summer (per the institution's normal issuance and retrieval policy), and the student-athletes may use institutional laundry services for this apparel.
   b. It is permissible for student-athletes to retain and use institutional athletics equipment (per the institution's normal equipment policy) during a summer vacation period.
   c. Prospective student-athletes who are eligible to participate in voluntary summer workouts conducted by the strength and conditioning coach may borrow apparel (t-shirts, shorts, socks, undergarments) and utilize the institution's laundry services. They may also be provided shoes for use during these voluntary summer workouts.

ALL SUMMER WORKOUTS MUST BE VOLUNTARY (Per Bylaw 17.02.13):

1) The student-athlete must not be required to report back to a coach or other athletics department staff member (for example, strength coach, trainer, manager) any information related to the activity. In addition, no athletics department staff member who observes the activity (for example, strength coach, trainer, manager) may report back to the student-athlete's coach any information related to the activity;
2) The activity must be initiated and requested solely by the student-athlete. Neither the institution nor any athletics department staff member may require the student-athlete to participate in the activity at any time. However, it is permissible for an athletics department staff member to provide information to student-athletes related to available opportunities for participating in voluntary activities (for example, times when the strength and conditioning coach will be on duty in the weight room or on the track). In addition, for student-athletes who have initiated a request to engage in voluntary activities, the institution or an athletics department staff member may assign specific times for student-athletes to use institutional facilities for such purposes and inform the student-athletes of the times in advance;
3) The student-athlete's attendance and participation in the activity (or lack thereof) may not be recorded for the purpose or reporting such information to coaching staff members or other student-athletes; and
4) The student-athlete may not be subject to penalty if he or she elects not to participate in the activity. **In addition, neither the institution nor any athletics department staff member may provide recognition or incentives (for example, awards) to a student-athlete based on his or her attendance or performance in the activity**.

SUMMER CONDITIONING (SPORTS OTHER THAN FOOTBALL AND BASKETBALL) 2009

Returning Student-Athletes

1) Strength and conditioning coaches must have **department-wide responsibilities*** in order to design and conduct specific workout programs for student-athletes during vacation periods (e.g., summer).
2) Student-athletes in TEAM sports (Baseball, Field Hockey, Lacrosse, Rowing, Soccer, Softball, and Volleyball) are not permitted to engage in any practice activities in the presence of a sport's coach during the summer.
3) Student-athletes in INDIVIDUAL sports (Fencing, Golf, Gymnastics, Swimming/Diving, Tennis, Track/Cross Country, and Wrestling) may request individual workouts with a sport's coach during the summer.

Incoming Freshmen, 2-Year Transfers, and 4-Year Transfers **who are enrolled in summer school prior to initial full-time enrollment at UNC**

1) May participate in summer voluntary weight lifting or conditioning activities conducted by a strength and conditioning coach who has department-wide responsibilities;
2) MUST undergo a pre-participation medical examination conducted by a physician prior to any voluntary summer weight training or conditioning workouts; and
3) May receive workout apparel on an issue and retrieval basis.

Incoming Freshmen and 2-Year Transfers (who have signed NLI's)* and 4-Year Transfers (who have signed a financial aid agreement or written offer of admission) **who are not enrolled in summer school prior to initial full-time enrollment at UNC**

1) Are permitted to use weight facilities that are closed to the public;
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach; however, the strength coach:
    a. Cannot prearrange conditioning activities for them;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.

Incoming Freshmen, 2-Year Transfers, and 4-Year Transfers who have not signed the above-noted documents and are not enrolled in summer school prior to initial full-time enrollment at UNC

1) May not participate in voluntary weight lifting or conditioning activities on the institution's campus, unless the facilities are open to the public*;
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach; however, the strength coach:
    a. Cannot prearrange conditioning activities for them;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.

Additional Regulations for Incoming Freshmen and Transfers in Sports with a Safety Exception (who are enrolled in a summer term prior to initial full-time enrollment at UNC):

1) Sports include: Fencing, Gymnastics, Rowing, Swimming, Field Events in Track, Hurdles and Steeplechase (the jumping elements thereof) in Track, and Wrestling

2) May participate in voluntary workouts in the presence of the institution's coach and in the institution's regular practice facility when the prospect uses equipment related to the sport; however, **note that the institution's coach**:
   a. May provide safety and skill instruction; but
   b. **May not conduct the individual's workout.**

* *Clarifications*:

1) Department-Wide Responsibilities:
   a. Job description must include duties that extend beyond one sport;
   b. Could include working as a strength coach with at least one other sport, having Olympic sport weight room supervision hours, or having supervisory responsibilities over strength coaches that work with other sports.

2) Open to the Public:
   a. Can be limited to the extent of being open to only Faculty and Students with valid identification (e.g., Student Recreation Center policies);
   b. Can have certain hours when facilities are open to the public (e.g., 8 am – noon: reserved for current student-athletes; noon – 4 pm: open to the public); and
   c. Incoming freshmen who have not signed NLI's would be limited to the time period when the facility is open to the public.

3) Work with Incoming Freshmen and Transfers who are NOT Enrolled in Summer School:
   a. Strength coaches may provide, as an attachment to a letter, a written program for their workouts in the summer prior to full-time enrollment.
   b. However, the strength coach cannot, in any way, lead them through the program in the weight room.
   c. It is not permissible to circumvent this rule by allowing incoming freshmen to work out alongside current student-athletes who are being led through the same program by the strength coach, as this would constitute indirect administration of the program to the incoming freshmen .
   d. He/She can only be involved in the workout for supervisory (safety) purposes.

MISCELLANEOUS SUMMER REGULATIONS:

1) Medical Expenses:
   a. An institution may provide medical expenses (including rehab and physical therapy expenses) for any student-athlete who sustains an injury while participation in voluntary conditioning activities during the summer that are conducted by an institution's strength and conditioning coach with department-wide duties. This includes returning student-athletes and incoming student-athletes who are enrolled in summer school and, thus, permitted to engage in voluntary workouts conducted by the strength and conditioning staff.
   b. An institution may not provide medical expenses for injuries sustained by a student-athlete engaging in voluntary summer conditioning activities that are not conducted by the strength and conditioning coach. This includes any incoming student who is not enrolled in summer school.

c. In sports in which the safety exception is applicable, prospects who will be first-time participants are required to undergo a medical examination or evaluation administered or supervised by a physician prior to participation in any voluntary individual workouts pursuant to the safety exception.

2) Academic Support Services and Training Room Facilities:
   a. If a prospect (high school, juco transfer, 4-year transfer) **is enrolled in the institution's summer term before his/her initial enrollment at UNC**, he/she may receive academic support services and utilize the institution's training room facilities.
   b. If a prospect (high school, juco transfer, 4-year transfer) **is not enrolled in the institution's summer term before his/her initial enrollment at UNC,** he/she may not utilize these services.

3) Summer Workout Apparel/Equipment:
   a. It is permissible for returning student-athletes to use institutional apparel during the summer (per the institution's normal issuance and retrieval policy), and the student-athletes may use institutional laundry services for this apparel.
   b. It is permissible for student-athletes to retain and use institutional athletics equipment (per the institution's normal equipment policy) during a summer vacation period.
   c. Provided they are enrolled in summer school prior to initial full-time enrollment, prospective student-athletes may borrow apparel (t-shirts, shorts, socks, undergarments) and utilize the institution's laundry services. They may also be provided shoes for use during these voluntary summer workouts.

ALL SUMMER WORKOUTS MUST BE VOLUNTARY (Per Bylaw 17.02.13):

1) The student-athlete must not be required to report back to a coach or other athletics department staff member (for example, strength coach, trainer, manager) any information related to the activity. In addition, no athletics department staff member who observes the activity (for example, strength coach, trainer, manager) may report back to the student-athlete's coach any information related to the activity;
2) The activity must be initiated and requested solely by the student-athlete. Neither the institution nor any athletics department staff member may require the student-athlete to participate in the activity at any time. However, it is permissible for an athletics department staff member to provide information to student-athletes related to available opportunities for participating in voluntary activities (for example, times when the strength and conditioning coach will be on duty in the weight room or on the track). In addition, for student-athletes who have initiated a request to engage in voluntary activities, the institution or an athletics department staff member may assign specific times for student-athletes to use institutional facilities for such purposes and inform the student-athletes of the times in advance;
3) The student-athlete's attendance and participation in the activity (or lack thereof) may not be recorded for the purpose or reporting such information to coaching staff members or other student-athletes; and
4) The student-athlete may not be subject to penalty if he or she elects not to participate in the activity. **In addition, neither the institution nor any athletics department staff member may provide recognition or incentives (for example, awards) to a student-athlete based on his or her attendance or performance in the activity**.

THE COMPLIANCE NEWSLETTER

UNC Department of Athletics

OCTOBER 1, 2009 ***VOLUME XVI NUMBER 3***

October Recruiting Calendar

Baseball
Contact Period during October

Men's Basketball
Contact Period: Oct. 1 - 5

Evaluation Period: Oct. 6 - 31

Women's Basketball
Contact Period: Oct. 1 - 6

Oct. 2 - 4: Evaluations permitted at non-scholastic events

Evaluation Period: Oct. 7 - 31

Football
Evaluation Period (42 days during Sept., Oct., and Nov.)

Quiet Period: Remainder of Days

Men's Lacrosse
Contact Period, but No Evaluations during October

Women's Lacrosse
Contact Period during October

Softball
Contact Period during October

Track/Cross Country
Contact Period during October

Volleyball
Contact Period during October

Other Sports
Contact Period during October

AUTOGRAPH POLICY

Currently, all autograph request forms are updated and available to the public via www.tarheelblue.com. Any special requests for autographed items outside of those offered through the policies must first be approved by the compliance office.

VACATION PERIOD EXPENSES

Athletics Department funds may cover expenses for student-athletes who are required to stay on campus during institutional vacation periods (e.g. fall break). It is also permissible to provide actual expenses for entertainment within a 30-mile radius of campus. However, it is not permissible to provide cash directly to student-athletes for entertainment purposes.

NCAA INTERNSHIP PROGRAM

The deadline to apply for the 2009-2010 NCAA Internship Program is December 11, 2009. This internship at the national office in Indianapolis, Indiana is a paid, 12-month position. More information can be found at www.ncaa.org. If you know of any student-athletes who might be interested, please share this information with them.

MALE PRACTICE PLAYERS

Male students who practice with women's teams on a regular basis (more than twice/month) MUST be certified as eligible for practice in accordance with all applicable NCAA eligibility regulations. This means that all male practice players must be enrolled in a minimum full-time program of studies, sign the NCAA drug-testing consent form, be cleared by sports medicine, and be included on the team's squad list. Coaches should contact Lance prior to permitting a male student to practice with a women's team.

NLI - EARLY SIGNEES (NOV. 11, 2009)

Prospects who plan to sign a National Letter of Intent during the early signing period must have their transcripts, test scores, and class rank or school profile reviewed by the compliance and admissions offices before they sign. Signees must also be registered with the Eligibility Center and added to each sport's IRL prior to signing an NLI.

RECRUITING TAILGATES

Recruiting tailgates are planned for November 7th vs. Duke and November 14th vs. Miami.

GAMBLING EDUCATION: INTRA-SQUAD SCRIMMAGES

(excerpt from NCAA's "Don't Bet On It" Newsletter; October, 2008 edition)

As NCAA teams prepare for their respective seasons, a common practice is for the team to hold an intra-squad scrimmage. Intra-squad scrimmages can be a useful way to evaluate talent for the coaches, and can be a welcome change from the everyday routine of practice for the student-athletes. An intra-squad scrimmage can be fun for a team, since the scrimmage lacks the pressure of a regular season game, however student-athletes must still be aware of the dangers that intra-squad scrimmages can place on their eligibility.

NCAA Bylaw 10.3 does not allow student-athletes to solicit or accept bets on any intercollegiate athletics competition that has any tangible value. Specifically, this means that student-athletes should not wager anything of value on their intra-squad scrimmages. It may seem like a harmless thing to bet your roommate a week's worth of laundry service to the winner of the game, however this is a service that has a tangible value which is impermissible by the NCAA. The rule also includes any wagers made for food, cash, clothing, etc. If anything involved in the wager can have a monetary value placed on it, student-athletes are not allowed to engage in it.

Student-athletes who don't follow Bylaw 10.3 risk losing their eligibility for the season or possibly their NCAA career. So play it smart, enjoy the scrimmage, but no matter what you do, Don't Bet on It.

Subject: Book Scholarships, UNC Athletics (IMPORTANT!)
Attach: TEXT.htm

Coaches and Staff,

The below email was sent to our student-athlete email database. It includes our policy for purchasing books as part of athletics scholarships.

While all student-athletes have received this email from me, I would suggest, coaches, that you find a way to make certain that all of your book scholarship student-athletes have received it. And maybe even their parents! Each term we get questions about how book scholarships "work", so this is a good resource for you to have to share with those that might ask such questions of you.

I hope I have made it clear to the student-athletes that there are no excuses for not following these procedures, now that they are aware of them and have them in writing. It is critical that they obtain approved book forms prior to going to Student Stores! Failure to do so will result in them taking on fiscal responsibility for any purchases they make and charge to their student accounts.

Please let me know if any of you have any questions about this information.

Thanks,
Amy

>>> Amy Herman 1/5/2010 12:04 PM >>>

All UNC student-athletes who receive books as part of their UNC athletics scholarship MUST read this email!

As you know, the Department of Athletics is only permitted to pay the cost of REQUIRED books for your courses. In an attempt to provide more oversight of this process, we have worked together with the staff at UNC Student Stores to develop a procedure for this process that migbt be a slight change from what you have previously experienced.

Please understand that it is YOUR responsibility to read and understand this policy. If, after reading, you have any questions, please do not hesitate to contact me. Because we have given you this information, "I didn't know" is not a valid excuse for errors in following the procedure. Any mistakes you make might result in you being financially responsible for something you might not have otherwise been.

PURCHASING BOOKS

For the vast majority of you, your scholarship papers are complete and you will be able to charge required books to "UNC Athletics" upon your return to campus for the spring term. Prior to doing so, though, you MUST complete a UNC Athletics Textbook Approval Form (hereafter, "Book Form") and have it approved by the appropriate Athletics staff member during pre-determined hours (check with your academic counselor for this information). This approved Book Form must accompany you to Student Stores.

Once at Student Stores, after you have selected all of the books identified on your Book Form, you must take the books and the Book Form to one of the registers marked "Student Athletic Scholarship". At this point, all books that are identified appropriately on your Book Form will be charged directly to UNC Athletics. Any other purchases you make (e.g., recommended books, course supplies) can either be paid for by you up-front (cash, charge) or, in some cases, charged to your personal UNC account. These items, of course, cannot, and will not, be charged to UNC Athletics.

It is important to note that if you fail to obtain an approved Book Form prior to purchasing books at Student Stores, these books will be charged to your personal UNC account and you will be responsible for payment of the charges. Therefore, it is critical that you obtain an approved Book Form for any books that you believe UNC Athletics should cover under your scholarship.

In the rare instance when a required course book is not available at Student Stores (e.g., Friday Center online courses), you will be required to purchase it up-front with personal funds. Then, in order to be reimbursed, you must submit both the receipt for the book, as well as the course syllabus identifying the book as required for the course, to your academic counselor in the Academic Center. The paperwork will then be submitted to the Compliance Office and a reimbursement check will be cut to you by the Cashier's Office. Please note that this process could take up to 6 weeks to complete.

When your book purchases are complete, please file all receipts in a safe location in case there is a need for you to return a book!!!

RETURNING BOOKS

In circumstances where it is necessary for you to return a book (dropped course, etc.), it will be important for you to have the receipt from purchase. The following dates apply to this spring term:

Last day to return without a drop slip: 1/27/2010

Last day to return with a drop slip: 3/19/2010

Between 3/20/2010 and 4/14/2010: Must return with 48 hours of purchase

Provided you have the original receipt, you will be allowed to return books within these dates directly to Student Stores. With the original receipt, Student Stores will know that the account to he reimbursed is the UNC Athletics book account. Without the receipt, you will not be allowed to return books on your own. Rather, you will need to seek the assistance of your academic counselor, resulting in time delays in completing course drops/adds. This, again, makes the point that it is critical for you to retain receipts!

In summary, we know that there are many circumstances that will arise that might not fall "neatly" into the above procedures. In such cases, it is your responsibility to seek answers to your questions in advance of purchasing books. We cannot be responsible for fiscal decisions that you might make on your own without first seeking help.

Please do not hesitate to contact me if you have any questions about these procedures. My contact information is below.

Thanks for your attention to this important matter.

Advisors,

We are working on the Student-Athlete Graduation Reception and want to be sure that we invite all graduating seniors (in May or December).

Please check the attached excel sheet and confirm that all athletes under your name are in fact graduating.

Also, if you had any student-athletes who graduated in December 2009 feel free to add them!

thanks,
Laura

THE COMPLIANCE NEWSLETTER

UNC Department of Athletics

APRIL 1, 2010 ***VOLUME XVI, NUMBER 9***

AWARDS BANQUETS

As the end of the year approaches and you are planning your banquets, please remember that **family members and friends of all student-athletes, including those who have exhausted their eligibility (e.g., seniors), must pay the per person cost for attending the banquet**. NCAA legislation (Bylaw 16.6.1.6) allows us to cover banquet costs only for the student-athletes and their spouses and children. All other relatives and friends must pay to attend. The price to attend must include the cost of the meal, as well as linen rental, serving fees, cost of paper goods, catering charges, gratuities, etc. In order to calculate a per-person fee, divide the total cost for the event by the number of attendees.

AMATEURISM CERTIFICATION

New freshman and transfer student-athletes enrolling for the 2010-2011 academic year are able to request their final amateurism certification beginning April 1st. To do this, student-athletes must visit the NCAA Eligibility Center at www.eligibilitycenter.org. Please remind your incoming student-athletes to do this by April 15th in order to prevent unnecessary delays to their enrollment.

NLI SIGNING PERIOD

The spring NLI signing period for all sports other than basketball, field hockey, football, soccer, and track and field **begins April 14th** and runs through August 1st. Coaching staff members from sports utilizing this signing period may make **unlimited** telephone calls to prospects from April 14th through April 16th.

Please note that the sports associated with this NLI signing period are in a dead period from Monday, April 12th through Thursday, April 15th.

Men's and women's basketball spring signing period **begins April 14th** and ends May 19th. Basketball coaches may make **unlimited** phone calls to a prospect from April 14th through April 16th.

Please note that the sport of basketball is in a dead period from Monday, April 12th through Thursday, April 15th.

During a dead period, it is not permissible to make in-person recruiting contacts or evaluations on or off the UNC campus. **This also prohibits official or unofficial visits to UNC's campus, as well as the provision of complimentary admissions to prospects for campus athletics contests.** (Note that there is an April 14th baseball game vs. Coastal Carolina during this dead period.) Please see Bylaw 13.02.4.4 for more details.

REMINDERS

- The deadline to submit all summer athletics grant-in-aid forms to Amy Herman is April 1, 2010.
- The deadline to submit all renewal and termination of athletics grant-in-aid forms to Amy Herman is April 16, 2010.
- Please contact the Compliance Office at 2-6000 with any questions about this information.

April Recruiting Calendar

Men's Basketball

Dead Period April 1-8 (noon); 12-15
Contact Period April 8 (noon) - 11; 16-21
Quiet Period April 22-30

Women's Basketball

Contact Period April 1
Dead Period April 2-8; 12-15
Quiet Period April 9-11
Evaluation Period April 16-20

Football

Quiet Period April 1-18; 25
Evaluation Period April 19-24; 26-30

Gymnastics

Contact Period April 1-11; 16-20; 25 (noon) - 30
Dead Period April 12-15; 21-25 (noon)

Field Hockey, Soccer, and Track/Cross Country

Contact Period April 1-30

All Other Sports

Contact Period April 1-11; 16-30
Dead Period April 12-15

CONTACT RESTRICTIONS AFTER SIGNING NATIONAL LETTER OF INTENT

After prospects have signed NLI's, coaching and administrative staff members are permitted to contact them through unlimited phone calls.

On the calendar day **after** a prospective student-athlete signs an NLI, coaches are also permitted unlimited text messaging, as well as unlimited contacts with or evaluations of the prospect. However, any contact at the prospective student-athlete's educational institution in football and men's basketball shall be confined to the permissible contact periods.

Even after a prospect signs an NLI, though, no contacts can be made with them during dead periods, and contact at the site of a prospect's competition is still governed by Bylaw 13.1.7.2. Other sport-specific regulations might also exist — see Bylaws 13.1.6 and 13.1.7.

FOOTBALL SUMMER CONDITIONING - 2010

Scheduling

1. Summer conditioning begins nine weeks prior to the permissible reporting date, which is the night before the first day of practice. For the 2010 summer, based on the formula, our first day of summer conditioning will be Thursday, June 3rd, immediately following the last discretionary week, which ends on Wednesday, June 2nd.
2. 1 week of **discretionary time: Sunday, 7/25 through Saturday, 7/31** (see reg's below)
3. Other 8 weeks **non-mandatory weight training and conditioning** (see reg's below)

Discretionary Time

1. No required workouts
2. Institutions not permitted to recommend weight training and conditioning activities
3. If student-athlete opts to work out, S&C staff may monitor facility for health and safety purposes, but may not conduct the workouts.

Non-Mandatory Weight Training and Conditioning

1. Conducted by S&C staff with department-wide duties
2. No more than 8 hours per week
3. **Hours/week must be submitted to Compliance office at beginning of each week**.
4. Role should not be taken and attendance may not be reported back to football staff.

Incoming Freshmen/Transfers

1. UNC may loan clothes (including workout apparel, shoes, laundry service) to prospects for summer workouts.
2. If prospect has signed an NLI or is enrolled in UNC's summer school prior to initial full-time enrollment at UNC, he is permitted to participate in summer workouts after pre-participation medical exam.
3. 4-4 Transfers who have signed a financial aid agreement or written offer of admission may participate in non-mandatory summer workout (as they do not have the opportunity to sign an NLI).
4. Prospects must have completed their senior year in high school prior to beginning summer conditioning.
5. Unless they are enrolled in summer school, prospects may not receive room and board expenses while they are participating in summer conditioning.

Medical Issues

1. Prior to any non-mandatory summer weight training or conditioning workouts, incoming freshmen and transfers beginning their initial season of eligibility at UNC must undergo a pre-participation medical examination conducted by a physician.
2. All S&C coaches must be certified in CPR and First Aid.
3. During all conditioning activities (not weight training), a sports medicine staff member must be present and have the unchallengeable authority to cancel or modify the workout for health and safety reasons.

4. We may cover medical expenses for enrolled student-athletes, **prospects that have signed an NLI or are enrolled in UNC's summer school prior to initial full-time enrollment at UNC**, and 4-4 Transfers who have signed a financial aid agreement or written offer of admission that sustain injuries while participating in non-mandatory summer conditioning activities that are conducted by an institution's strength and conditioning coach with department-wide duties.
5. Not permissible to cover medical expenses for prospective student-athletes who have not signed an NLI or, in the case of 4-4 Transfers, a financial aid agreement or written offer of admission (e.g., high school or juco), or those that are not enrolled in summer school, as these individuals are not permitted to participate in non-mandatory summer conditioning activities conducted by our strength and conditioning coaches.

Summer Specifics

1. No offensive/defensive alignments may be set up during conditioning, and no football-related equipment may be used.
2. It would be permissible for a prospect or an enrolled student-athlete to watch game film if he makes the request and the coach is not present. **Prospects and student-athletes may not at any time watch game film with a coach**, as that is a countable athletically related activity that is not permitted during the summer.

SUMMER CONDITIONING (BASKETBALL) - 2010

INVOLVEMENT OF STRENGTH AND CONDITIONING COACHES

1) With Current Student-Athletes
    a. Must have **department-wide responsibilities*** in order to be able to design and conduct specific workout programs for student-athletes during vacation periods (e.g., summer).
2) With Incoming Freshmen and 2-Year Transfers (**who have signed NLI's**)* and 4-Year Transfers (**who have signed a financial aid agreement or written offer of admission**)
    a. Cannot prearrange conditioning activities for them;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.
3) With Incoming Freshmen and 2-Year Transfers (**who have not signed NLI's**)* and 4-Year Transfers (**who have not signed a financial aid agreement or written offer of admission**)
    a. Cannot permit them to participate in voluntary weight-lifting or conditioning activities on our campus **unless the facilities are open to the public***;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.

EXCEPTION: INCOMING FRESHMEN AND TRANSFERS WHO HAVE **1) SIGNED NLI'S** OR **2) ARE ENROLLED IN SUMMER SCHOOL PRIOR TO INITIAL ENROLLMENT AT UNC**:

1) Are permitted to use weight facilities that are closed to the public; and
2) May participate in voluntary weight lifting or conditioning activities that are conducted by the strength and conditioning coach, who must have department-wide responsibilities.

INCOMING FRESHMEN AND TRANSFERS WHO DO NOT MEET THE ABOVE EXCEPTION (E.G., THOSE NOT IN SUMMER SCHOOL)

1) May not participate in weight lifting or conditioning activities on the institution's campus unless the facilities are open to the public; and
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach, **but all conditions in (3) above are applicable.**

* *Clarifications*:

1) <u>Department-Wide Responsibilities</u>:
    a. Job description must include duties that extend beyond one sport; and
    b. Could include working as a strength coach with at least one other sport, having Olympic sport weight room supervision hours, or having supervisory responsibilities over strength coaches that work with other sports.

2) <u>Open to the Public</u>:
    a. Can be limited to the extent of being open to only Faculty and Students with valid identification (e.g., Student Recreation Center policies);
    b. Can have certain hours when facilities are open to the public (e.g., 8 am – noon: reserved for current student-athletes; noon – 4 pm: open to the public); and
    c. Incoming freshmen who have not signed NLI's would be limited to the time period when the facility is open to the public.

3) Work with Incoming Freshmen and Transfers:
   a. Strength coaches may provide them, as an attachment to a letter, a written program for their workouts in the summer prior to full-time enrollment.
   b. However, the strength coach cannot, in any way, lead them through the program in the weight room, unless they meet the exception above.
   c. It is not permissible to circumvent this rule by allowing incoming freshmen to work out alongside current student-athletes who are being led through the same program by the strength coach, as this would constitute indirect administration of the program to the incoming freshmen.
   d. He/She can only be involved in the workout for supervisory (safety) purposes.

MISCELLANEOUS SUMMER REGULATIONS

1) Medical Expenses:
   a. Prior to any voluntary summer weight training or conditioning workouts, incoming freshmen and transfers beginning their initial season of eligibility at UNC must undergo a pre-participation medical examination conducted by a physician.
   b. An institution may provide medical expenses (including rehab and physical therapy expenses) for any student-athlete or prospective student-athlete who sustains an injury while participation in voluntary conditioning activities during the summer that are conducted by an institution's strength and conditioning coach with department-wide duties.
   c. An institution may not provide medical expenses for injuries sustained by a student-athlete or prospective student-athlete engaging in voluntary summer conditioning activities that are not conducted by the strength and conditioning coach.

2) Academic Support Services and Training Room Facilities:
   a. If a prospect (high school, juco transfer, 4-year transfer) **is enrolled in the institution's summer term before his/her initial enrollment**, he/she may receive academic support services and utilize the institution's training room facilities.
   b. If a prospect (high school, juco transfer, 4-year transfer) **is not enrolled in the institution's summer term before his/her initial enrollment at UNC,** he/she may not utilize these services.

3) Summer Workout Apparel/Equipment:
   a. It is permissible for student-athletes to use institutional apparel during the summer (per the institution's normal issuance and retrieval policy), and the student-athletes may use institutional laundry services for this apparel.
   b. It is permissible for student-athletes to retain and use institutional athletics equipment (per the institution's normal equipment policy) during a summer vacation period.
   c. Prospective student-athletes who are eligible to participate in voluntary summer workouts conducted by the strength and conditioning coach may borrow apparel (t-shirts, shorts, socks, undergarments) and utilize the institution's laundry services. They may also be provided shoes for use during these voluntary summer workouts.

ALL SUMMER WORKOUTS MUST BE VOLUNTARY (Per Bylaw 17.02.13):

1) The student-athlete must not be required to report back to a coach or other athletics department staff member (for example, strength coach, trainer, manager) any information related to the activity. In addition, no athletics department staff member who observes the activity (for example, strength coach, trainer, manager) may report back to the student-athlete's coach any information related to the activity;
2) The activity must be initiated and requested solely by the student-athlete. Neither the institution nor any athletics department staff member may require the student-athlete to participate in the activity at any time. However, it is permissible for an athletics department staff member to provide information to student-athletes related to available opportunities for participating in voluntary activities (for example, times when the strength and conditioning coach will be on duty in the weight room or on the track). In addition, for student-athletes who have initiated a request to engage in voluntary activities, the institution or an athletics department staff member may assign specific times for student-athletes to use institutional facilities for such purposes and inform the student-athletes of the times in advance;
3) The student-athlete's attendance and participation in the activity (or lack thereof) may not be recorded for the purpose or reporting such information to coaching staff members or other student-athletes; and
4) The student-athlete may not be subject to penalty if he or she elects not to participate in the activity. **In addition, neither the institution nor any athletics department staff member may provide recognition or incentives (for example, awards) to a student-athlete based on his or her attendance or performance in the activity**.

SUMMER CONDITIONING (SPORTS OTHER THAN FOOTBALL AND BASKETBALL) 2010

Returning Student-Athletes

1) Strength and conditioning coaches must have **department-wide responsibilities*** in order to design and conduct specific workout programs for student-athletes during vacation periods (e.g., summer).
2) Student-athletes in TEAM sports (Baseball, Field Hockey, Lacrosse, Rowing, Soccer, Softball, and Volleyball) are not permitted to engage in any practice activities in the presence of a sport's coach during the summer.
3) Student-athletes in INDIVIDUAL sports (Fencing, Golf, Gymnastics, Swimming/Diving, Tennis, Track/Cross Country, and Wrestling) may request individual workouts with a sport's coach during the summer.

Incoming Freshmen, 2-Year Transfers, and 4-Year Transfers **who are enrolled in summer school prior to initial full-time enrollment at UNC**

1) May participate in summer voluntary weight lifting or conditioning activities conducted by a strength and conditioning coach who has department-wide responsibilities;
2) MUST undergo a pre-participation medical examination conducted by a physician prior to any voluntary summer weight training or conditioning workouts; and
3) May receive workout apparel on an issue and retrieval basis.

Incoming Freshmen and 2-Year Transfers (who have signed NLI's)* and 4-Year Transfers (who have signed a financial aid agreement or written offer of admission) **who are not enrolled in summer school prior to initial full-time enrollment at UNC**

1) Are permitted to use weight facilities that are closed to the public;
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach; however, the strength coach:
    a. Cannot prearrange conditioning activities for them;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.

Incoming Freshmen, 2-Year Transfers, and 4-Year Transfers who have not signed the above-noted documents and are not enrolled in summer school prior to initial full-time enrollment at UNC

1) May not participate in voluntary weight lifting or conditioning activities on the institution's campus, unless the facilities are open to the public*;
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach; however, the strength coach:
    a. Cannot prearrange conditioning activities for them;
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room; and
    c. Cannot work directly with the prospective student-athletes.

Additional Regulations for Incoming Freshmen and Transfers in Sports with a Safety Exception (who are enrolled in a summer term prior to initial full-time enrollment at UNC):

1) Sports include: Fencing, Gymnastics, Rowing, Swimming, Field Events in Track, Hurdles and Steeplechase (the jumping elements thereof) in Track, and Wrestling

2) May participate in voluntary workouts in the presence of the institution's coach and in the institution's regular practice facility when the prospect uses equipment related to the sport; however, **note that the institution's coach**:
   a. May provide safety and skill instruction; but
   b. **May not conduct the individual's workout.**

* *Clarifications*:

1) Department-Wide Responsibilities:
   a. Job description must include duties that extend beyond one sport;
   b. Could include working as a strength coach with at least one other sport, having Olympic sport weight room supervision hours, or having supervisory responsibilities over strength coaches that work with other sports.

2) Open to the Public:
   a. Can be limited to the extent of being open to only Faculty and Students with valid identification (e.g., Student Recreation Center policies);
   b. Can have certain hours when facilities are open to the public (e.g., 8 am – noon: reserved for current student-athletes; noon – 4 pm: open to the public); and
   c. Incoming freshmen who have not signed NLI's would be limited to the time period when the facility is open to the public.

3) Work with Incoming Freshmen and Transfers who are NOT Enrolled in Summer School:
   a. Strength coaches may provide, as an attachment to a letter, a written program for their workouts in the summer prior to full-time enrollment.
   b. However, the strength coach cannot, in any way, lead them through the program in the weight room.
   c. It is not permissible to circumvent this rule by allowing incoming freshmen to work out alongside current student-athletes who are being led through the same program by the strength coach, as this would constitute indirect administration of the program to the incoming freshmen .
   d. He/She can only be involved in the workout for supervisory (safety) purposes.

MISCELLANEOUS SUMMER REGULATIONS:

1) Medical Expenses:
   a. An institution may provide medical expenses (including rehab and physical therapy expenses) for any student-athlete who sustains an injury while participation in voluntary conditioning activities during the summer that are conducted by an institution's strength and conditioning coach with department-wide duties. This includes returning student-athletes and incoming student-athletes who are enrolled in summer school and, thus, permitted to engage in voluntary workouts conducted by the strength and conditioning staff.
   b. An institution may not provide medical expenses for injuries sustained by a student-athlete engaging in voluntary summer conditioning activities that are not conducted by the strength and conditioning coach. This includes any incoming student who is not enrolled in summer school.

c. In sports in which the safety exception is applicable, prospects who will be first-time participants are required to undergo a medical examination or evaluation administered or supervised by a physician prior to participation in any voluntary individual workouts pursuant to the safety exception.

2) Academic Support Services and Training Room Facilities:
   a. If a prospect (high school, juco transfer, 4-year transfer) **is enrolled in the institution's summer term before his/her initial enrollment at UNC**, he/she may receive academic support services and utilize the institution's training room facilities.
   b. If a prospect (high school, juco transfer, 4-year transfer) **is not enrolled in the institution's summer term before his/her initial enrollment at UNC,** he/she may not utilize these services.

3) Summer Workout Apparel/Equipment:
   a. It is permissible for returning student-athletes to use institutional apparel during the summer (per the institution's normal issuance and retrieval policy), and the student-athletes may use institutional laundry services for this apparel.
   b. It is permissible for student-athletes to retain and use institutional athletics equipment (per the institution's normal equipment policy) during a summer vacation period.
   c. Provided they are enrolled in summer school prior to initial full-time enrollment, prospective student-athletes may borrow apparel (t-shirts, shorts, socks, undergarments) and utilize the institution's laundry services. They may also be provided shoes for use during these voluntary summer workouts.

ALL SUMMER WORKOUTS MUST BE VOLUNTARY (Per Bylaw 17.02.13):

1) The student-athlete must not be required to report back to a coach or other athletics department staff member (for example, strength coach, trainer, manager) any information related to the activity. In addition, no athletics department staff member who observes the activity (for example, strength coach, trainer, manager) may report back to the student-athlete's coach any information related to the activity;
2) The activity must be initiated and requested solely by the student-athlete. Neither the institution nor any athletics department staff member may require the student-athlete to participate in the activity at any time. However, it is permissible for an athletics department staff member to provide information to student-athletes related to available opportunities for participating in voluntary activities (for example, times when the strength and conditioning coach will be on duty in the weight room or on the track). In addition, for student-athletes who have initiated a request to engage in voluntary activities, the institution or an athletics department staff member may assign specific times for student-athletes to use institutional facilities for such purposes and inform the student-athletes of the times in advance;
3) The student-athlete's attendance and participation in the activity (or lack thereof) may not be recorded for the purpose or reporting such information to coaching staff members or other student-athletes; and
4) The student-athlete may not be subject to penalty if he or she elects not to participate in the activity. **In addition, neither the institution nor any athletics department staff member may provide recognition or incentives (for example, awards) to a student-athlete based on his or her attendance or performance in the activity**.

COACHES CERTIFICATION EXAM

The Coaches Certification Exam for the 2010-2011 academic year will be held on Thursday, May 20, 2010 in the 2nd floor Football Center Auditorium. Beginning at 9:30 am, we will show a one-hour, taped, ACC-conducted review session. The exam will follow immediately thereafter. **Coaches, please mark your calendar to attend this exam and RSVP to Susan Maloy if you have not already done so**. Please bring your 2009-2010 NCAA manual to the exam. The make-up date for the exam is May 27th in the South Side Football Press Box (location subject to change). This make-up date will have a taped review session at 9 am, with the exam to follow at approximately 10:15 am. **UNC requires that all coaching staff members, including volunteer coaches and Directors of Operations, prepare for and take the exam, even if they do not recruit off-campus.**

SUMMER EVALUATIONS

Coaches, please remember that evaluations of prospects that occur outside of the prospect's academic year (summer only) DO NOT count against the annual number of recruiting opportunities. Contacts that occur with a prospect during this time period DO COUNT against the annual number of permissible recruiting opportunities and must be reported to the Compliance Office.

SUMMER CAMP DOCUMENTATION

At least one week prior to the start of each camp, coaches must complete and submit the following forms to Lance in the Compliance Office:

- Student-Athlete Employment Roster
- Outside Coaches Employment Roster
- Free or Reduced Admission Roster

These forms should be signed and submitted, even if they do not apply to your particular camps. Starting in August, for any camp conducted in June or July that is missing documentation, a hold will be placed on that sport's account with the business office in a manner consistent with other delinquent paperwork. Please contact Lance (3-7259) with any questions.

PROSPECTS JOINING LOCAL SPORTS CLUB

Remember that prospects enrolling initially in the fall CANNOT relocate to Chapel Hill for the summer and join and work out with a local sport club with which one of our coaching staff members is involved. Please contact Amy if you have questions about this interpretation.

SUMMER EMPLOYMENT

Coaches, please ensure that your student-athletes are familiar with the guidelines for employment prior to leaving for summer vacation.

Student-athletes may obtain employment as long as they meet the following regulations:

1. The student-athlete's compensation must not include any remuneration for the value or utility the student-athlete may have for the employer because of the publicity, reputation, fame, or personal following that he or she has obtained because of athletics ability;
2. The student-athlete must be compensated only for work actually performed; and
3. The student athlete must be compensated at a rate commensurate with the going rate for similar services in that locale.

Provided these regulations are met, there is no limit on the amount of money a student-athlete can earn. Please remind your student-athletes to complete the Student-Athlete Employment Form, which was emailed to them with the Ram Rules summer reminder.s. You can also find it on the J:/ drive.

C-TOPS

Please notify all incoming student-athletes of the C-TOPS session for Varsity Student-Athletes and their parents The presentation by Academics and Compliance will include topics such as NCAA Clearinghouse, Financial Aid, and services provided by the Academic Support Unit.

Welcome to the first edition of the 2010 - 2011 Compliance Newsletter.

NEW LEGISLATION

Communication During Official Visits: Effective 8/1/2010, non-coaching staff members are permitted to initiate and receive an unlimited number of telephone calls from prospects (or those individuals accompanying the prospects) during the prospect's transportation to campus for the official visit and throughout his/her visit. Please note, this ONLY applies to Official (not Unofficial) Visits.

Determining a Season of Competition: Effective 8/01/2010, a student-athlete is permitted to participate in ONE (only one!) of the following exempted team activities without having to count such participation as a season of competition:

1. Alumni Game;
2. Fundraising Activity; **or**
3. Celebrity Sports Activity

If you would like to take advantage of this exception during the 2010-2011 academic year, please notify and obtain approval from the Compliance staff in advance of allowing a student-athlete to participate in the event.

OFFICIAL VISIT REQUIRED PAPERWORK

At least five days prior to an official visit, the Compliance Office must receive a copy of the prospect's Official Visit Approval Form, along with a transcript and appropriate test scores. The Student-Athlete Host Entertainment Form, as well as the Guidelines for Prospective Student-Athletes Form, must be submitted to the Compliance Office within one week following the official visit.

PHOTOGRAPHING PROSPECTS

Though it IS permissible for UNC staff members to photograph prospects when they are on their official visits to campus (to keep on file for future media guides, etc., after they potentially sign with us), it is NOT permissible to print the pictures for the prospects or send the pictures to them or their coaches via email. These pictures can be taken and retained for internal purposes **only**.

DROP/ADD CLASS APPROVAL

Each semester (fall, spring, and summer), after the last day to drop a course using the web registration system, student-athletes must obtain written approval from their athletics academic counselor, in addition to their Arts & Sciences academic advisor, in order to add or drop a course. **PLEASE NOTE** that student-athletes must continue to attend class in the course(s) they wish to drop until written approval from both their advisor and counselor has been obtained.

TEAM ELIGIBILITY MEETINGS

Student-athletes are not allowed to participate in any countable athletically-related activities until they have completed the required eligibility paperwork! If any student-athlete is unable to attend their scheduled team eligibility meeting, arrangements can be made for the student-athlete to attend a meeting scheduled for another date and time. A student-athlete may also schedule an individual eligibility meeting (if no other options work with his/her schedule). Please contact Susan Maloy (2-9892) with any questions or scheduling concerns.

STUDENT MANAGERS

Effective 8/1/2010, along with performing traditional managerial duties (e.g., laundry, equipment), a student manager must meet the following criteria:

1. The individual must be a full time-time undergraduate or graduate student, except that during his/her last semester of his/her degree program, he/she can be in an approved course underload.
2. The individual may participate in limited on-court/on-field activities during practice or competition (such as assisting with drills, throwing batting practice, and catching in the bullpen) on a regular basis.
3. The individual **cannot** provide instruction to student-athletes.
4. The individual shall not participate in countable athletically-related activities beyond what is permitted in #2 above (e.g., cannot function as a "practice player".).
5. In **baseball**, the individual must forfeit any remaining eligibility in baseball at UNC.

The Ram Rules
UNC Department of Athletics
Vol X * No. 2 * October 7, 2010

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.

Dear UNC Student-Athletes,

There are several well-defined ways in which student-athletes can jeopardize their eligibility under NCAA guidelines:

1) Accept payment for athletics skills
2) Accept a promise of payment for athletic abilities
3) Sign a professional contract
4) Receive a salary from a sports organization
5) Compete on a professional team
6) Enter a professional draft (outside of the manner permitted by NCAA legislation in some sports)
7) Enter into an agreement (either verbal or written) with, or accept benefits from, an agent or financial advisor

Along with these very clear violations of NCAA legislation, however, there are other ways to violate the principles of amateurism that could very well seem ambiguous to student-athletes. One such way is through the receipt of what the NCAA calls □extra benefits□ or □preferential treatment□.

Extra benefits are benefits that student-athletes receive from either an institutional staff member or a booster of the institution. If you recall, we speak about extra benefits at length during our team meetings at the beginning of the year. The important thing to remember is that you cannot receive benefits from anyone, including staff members or boosters, if they are not explicitly allowed for in NCAA legislation. Essentially, with regard to boosters, the only thing you can receive are occasional meals provided by a booster either on-campus or at the booster□s home. Even in these cases, the booster and the student-athlete should make sure that the coaching and Compliance Office staffs have approved the meal in advance.

Even more difficult to define are benefits received from other individuals who are not necessarily boosters of the institution. The NCAA defines □preferential treatment□ as any benefits that are received as a result of the individual□s athletics reputation, skill, or pay-back potential as a professional athlete. Therefore, the origin and length of a relationship is important when determining whether or not a student-athlete can receive benefits through the relationship, as is the pattern of benefits that has been established throughout the relationship.

Maybe an example would help to explain this better, particularly with regard to benefits you might receive from former teammates or individuals you meet through your participation in athletics at UNC.

Jim is a student-athlete at UNC. He and Sam, a former teammate, were best friends while at UNC together. They would often go out to eat together and take turns paying the bill and picking up the parking tab. Sam has since graduated, but Jim is still at UNC, in his senior year. Sam is now a professional athlete, but sometimes is able to return to Chapel Hill to visit. When he does, Sam and Jim will occasionally go out to eat at their favorite restaurants from their college days together. Since Sam is a professional athlete, he is more financially stable and almost always picks up the tab for these meals.

Because Jim and Sam have a history of paying for meals for each other during their time together in college, it is fine for that relationship to continue in the same manner after Sam leaves UNC. However, it would not be permissible for Sam to start providing Jim with other benefits, like gifts, cash, or transportation expenses to assist Jim during his last year of college, because there is no pattern of these sorts of benefits being provided by Sam to Jim during their college days together.

This same basis for determination must be used to evaluate any benefit that you receive from anyone! If the relationship began because of your status as a UNC student-athlete, it is likely that you are not permitted to receive any benefits from that individual. For example, you should not receive any benefits from an UNC alumnus/former player in your sport with whom you never were teammates, as the NCAA would deem this as a relationship that developed solely because of your status as a UNC student-athlete and, thus, any benefit from this individual would be impermissible.

We know that this information can be very confusing and, in a lot of cases, will not be clear to the situation in which you find yourself. Therefore, our biggest message to you is that prior to receiving ANY benefits from anyone other than your family members, you should always talk with the Compliance staff and your coaches to make sure it is okay per NCAA regulations.

As we often say to you during our team meetings, □It is better to ask for permission than for forgiveness,□ and □Do the right thing, even when you think no one is watching.□ Remember to ask before you act!

The Ram Rules Bottom Line:

It is your responsibility to understand NCAA and UNC rules. You can find all UNC Department of Athletics□ policies and other NCAA resources at http://tarheelblue.cstv.com/compliance/unc-compliance.html (http://links.onmarketer-726.com/LinkClick.ashx/ggi5gbjqxrvejdphvqllvjewem/vebc3fiyvsdebcptck777hrk44). Please contact the Compliance Office (919-962-6000) if you have any questions about extra benefit or preferential treatment regulations.

Subject: Super Bowl Gambling Reminder

Attach: TEXT.htm; Super Bowl NCAA Reminder.pdf

All,

In anticipation of Super Bowl weekend, the NCAA has issued the attached reminder regarding its prohibition on gambling.

Please note that this regulation applies to all athletics department employees, as well as nonathletics staff members who have responsibilities within or over the athletics department (e.g., Chancellor, FAR).

We will send this same reminder to our student-athletes, as well.

Please do not hesitate to contact me with any questions you may have.

DON'T BET ON IT!!!

Thanks,
Amy

Amy Herman

Super Bowl Sports Wagering Reminder Notice

Dear NCAA student-athletes, coaches and administrators:

With the Super Bowl this weekend, we wanted to take this time to remind all student-athletes, coaches and administrators of the NCAA's policy on gambling.

- The NCAA membership has adopted specific rules prohibiting athletics department staff members and student-athletes from engaging in gambling activities as they relate to intercollegiate or professional sporting events.

- NCAA member colleges and universities have defined sports wagering as putting something at risk, such as an entry fee, with the opportunity to win something in return. Because of this, student-athletes, coaches and administrators may not participate in competitions where there is both a required entry fee and an opportunity to win a prize.

If you have any questions regarding this material, please do not hesitate to contact the agent, gambling and amateurism activities staff at 317/917-6222.

THE COMPLIANCE NEWSLETTER

UNC Department of Athletics

FEBRUARY 3, 2011 ***VOLUME XVII, NUMBER 7***

SUPER BOWL GAMBLING

With the NFL post-season premier event upon us, all athletics department staff members are reminded that **gambling on any college or professional sporting events is strictly prohibited by NCAA regulations.** Not only does this prohibition include gambling through sports books, bookmakers, and Internet services, but it also applies to online bowl "pick-em" contests, playoff challenge competitions, knockout pools, and office pools. If you have any questions about what "counts," please call the Compliance Office.

DEAD PERIOD REMINDER

The sports of Field Hockey, Football, M/W Soccer, and M/W Track & Field are in a **DEAD PERIOD** from Monday, January 31, 2011 through Thursday, February 3, 2011 surrounding the National Letter of Intent initial signing date on Wednesday, February 2, 2011. The National Letter of Intent signing period continues until April 1, 2011 for Football, and until August 1, 2011 for Field Hockey, Soccer, and Track & Field.

COACHING STAFF TELEPHONE CALL REGULATIONS SURROUNDING NLI SIGNING PERIOD

Field Hockey, Soccer, and Track & Field: Coaching staff members may make unlimited telephone calls to a prospect from February 2nd through February 4th.

Football: Coaching staff members may make unlimited telephone calls to prospects from January 31st at 7:00 am until February 4th at 7:00 am.

NEW LEGISLATION FROM THE NCAA CONVENTION

Summer Financial Aid: EFFECTIVE IMMEDIATELY, A student-athlete who has not received athletics aid during the previous academic year, but who has been awarded athletics aid for the following year, is permitted to receive aid during the summer between the academic years in question. In order to receive this aid, however, the aid must be in proportion to the amount of athletics aid the student-athlete will receive during the following academic year.

Number of Off-Campus Recruiters: **EFFECTIVE IMMEDIATELY**, In sports other than basketball (as they already have this regulation in place for their July Evaluation Periods), during June, July, and August, a coach replaced for purposes of off-campus recruiting is not required to return to campus prior to engaging in additional recruiting activities, provided no more than the permissible number of off-campus recruiters in the sport engage in recruiting activities each day.

Communication with Prospects After Commitment : Effective August 1, 2011. On the day after a prospect signs an NLI or ASA or we receive a financial deposit in response to our offer of admission, the following activities are permissible:

1) Non-coaching staff members are permitted to make telephone calls to or receive telephone calls from prospects or their parents, legal guardians, or coaches;
2) Prospects can make unofficial visits during dead periods;
3) WBB coaches can communicate during the July evaluation period with the signee;
4) Telephone calls are unlimited; and
5) All forms of electronic communication (e.g., instant messaging, text messaging) are unlimited.

Subject: Athletics' Book List (as of 8/10/08, 5 pm)
Attach: TEXT.htm; Book List (as of 8-10-08, 5 pm).xls

All,

I've attached the first (of many, I'm sure) book lists for the fall semester. Couple things to explain about the highlighting...

1) GRAY: This simply means that the student is an incoming frosh or transfer. I have them highlighted only because this is the first time they've been through our book process, so they might need a little extra help!

2) YELLOW: If a name is highlighted in yellow, then you will need to check with me PRIOR to signing a book form for that student. This means that there is something "missing" from their scholarship paperwork that we must have prior to purchasing their books for them.

3) RED: If a name is highlighted in red, the student-athlete has not yet been certified by the NCAA Eligibility Center. Thus, we cannot purchase their books for them. Instead, they will have to defer their books to their student accounts. Then, when they are cleared by the Eligibility Center, we will be able to cover these charges. Here's the process that must be followed:

a. The student-athlete will need to complete a book form as normal.
b. Whoever approves and signs the book form in the Academic Center will need to sign and indicate in large letters on the form "DEFER TO STUDENT ACCOUNT".
c. The book store will then need to defer ONLY the books listed on the form to the student's account. If the student-athletes need to purchase other books or supplies, they will need to pay for them upfront or have them deferred separately in a way that will be able to be "tracked" later as a personal charge.

I hope this makes sense. Please let me know if you have any questions. Paperwork will be coming in over the next few days, so bear with me as I send updates to this list. I will try to indicate in the text of the email what has changed, but will always attach the most updated version.

Let me know if you have any questions.

Thanks,
Amy

All,

I have a correction to make to the below email, specifically regarding the way that those student-athletes highlighted in RED must be handled... I have included the change of procedure within the email below (in blue). Please read carefully and discard the previous email. The attached book list has not changed.

Feel free to let me know if you have any questions about this change.

Thanks,
Amy

All,

I've attached the first (of many, I'm sure) book lists for the spring semester. Couple things to explain about the highlighting...

1) GRAY: This simply means that the student is an incoming frosh or transfer. I have them highlighted only because this is the first year they've been through our book process, so they might need a little extra help!

2) YELLOW: If a name is highlighted in yellow, then you will need to check with me PRIOR to signing a book form for that student. This means that there is something "missing" from their scholarship paperwork that we must have prior to purchasing their books for them.

3) RED: If a name is highlighted in red, the student-athlete has not yet been certified by the NCAA Eligibility Center. Thus, we cannot purchase their books for them and should NOT sign off on a Book Form for them. Instead, they will have to charge their books to their student accounts. Then, when they are cleared by the Eligibility Center, I will work with Student Stores and the Cashier's Office to cover those charges we are permitted to pay. Here's the process that must be followed:

a. The student-athlete must be told by the appropriate authority (Compliance staff, Sherron Peace) that we cannot provide them with an approved Book Form due to his/her pending NCAA eligibility certification. If the student-athlete wishes to wait to purchase books until he/she has been certified and we can sign off on a Book Form, that is fine. If he/she wishes to go ahead and purchase books, he/she must be told that the books will have to be charged to his/her personal student account.
b. The textbook authority can still help the student-athlete by identifying which books we might ultimately be able to pay for (upon certification), but, again, the textbook authority CANNOT officially sign off on a Book Form.
c. Because the student-athlete does not have an approved Book Form, Student Stores will charge the books to the student's personal account.
d. Following this process, the student-athlete MUST retain the original sales receipt! It is from this receipt that we will be able to determine, following the student-athlete's eligibility certification, which book charges we are permitted to cover. The student-athlete should bring the sales receipt to his/her academic counselor, who should scan the receipt and email it to Amy for future reference.

I hope this makes sense. Please let me know if you have any questions. Paperwork will be coming in over the next several days, so bear with me as I send updates to this list. I will try to indicate in the text of the email what has changed, but will always attach the most updated version.

Let me know if you have any questions.

Robert and Susan,

Attached is the spreadsheet of students we are monitoring to see if they will need summer school. I've highlighted the ones we already know will need SS in yellow - the primary reason they need it is to meet UNC hour requirements right now. Let me know if you have any questions. Thanks.

Subject: Fall Hours Earned & the Database

Hey guys,

Just wanted to send a reminder to everyone about our new plan for verifying fall semester hours earned for our students. Please have the hours each student has earned towards their degree for the fall semester in to the database by the end of the day on January 5.

I'll be doing a calculation for each student at the same time and will then verify the numbers in the database. Any differences will be discussed the following week to reconcile the discrepancy.

If you have any questions, please just let me know. Thank you for your work regarding the eligibility of our student-athletes.

Subject: 2007 Newly Passed Legislation
Attach: TEXT.htm; Eligibility for Postseason Competition Between Terms.msg; Passed Legislation Memo - Academics.pdf

---

Hey guys,

The attached document has two proposals that were passed that will take effect for next year. They both have to do with eligibility for post-season play that occurs between terms. This will effect football and all the spring sports that compete in ACC and/or NCAA championships following the end of the spring term.

The other attachment is an email from Susan explaining the one proposal for students in less than full-time enrollment. Both proposals are important but especially the one that now stipulates that all students must pass six hours in order to be eligible for post-season between terms.

This information has also been forwarded on to the coaches. If you have any questions, just let me know. Thanks.

---

Coaches,
At the January 2007 Convention, the NCAA approved new legislation to be effective August 1, 2007 regarding eligibility for postseason competition (i.e. conference tournament, bowl game, NIT, NCAA Championships, etc.) between terms for student-athletes who are enrolled in less than 12 hours in their final season of competition. If a student-athlete in their final season of competition is enrolled in 6 hours or less, he/she must pass the total number of semester hours in which he or she is enrolled.

In other words:
Enrolled 6 hrs - must pass 6 hrs.
Enrolled 3 hrs. must pass 3 hrs.
Enrolled 9 hrs. - must pass 6 hrs.

This legislation will effect only those sports who have postseason competition that occurs between terms (including summer), i.e. football (bowl game) and most spring sports. Eligibility certification will be conducted for those sports effected by this bylaw for postseason competition.

Let us know if you have any questions.

Thank you,
Susan

Susan Maloy

MEMORANDUM

TO: Robert Mercer
Brent Blanton
Wayne Walden
Cynthia Reynolds
Mary Brunk
Kym Orr

FROM: Lance Markos
Assistant Director of Compliance

DATE: May 21, 2007

RE: Newly Passed NCAA Legislation

New Legislation – Effective August 1, 2007

Eligibility – General Eligibility Requirements – Change in Eligibility Status – Eligibility for Postseason Competition Between Terms. Intent: To specify that, in order for *any* student-athlete to be eligible to compete in postseason competition occurring between regular terms, an institution shall certify that he or she has satisfactorily completed six semester-hours or six quarter-hours of academic credit during the preceding regular academic term. Currently, this rule only applies to students in their last season of eligibility. **Effective Date: August 1, 2007**.

Eligibility – General Eligibility Requirements – Change in Eligibility Status – Eligibility for Postseason Competition Between Terms -- Less Than Full-Time Enrollment. Intent: To specify that a student-athlete who is in his or her final season of competition in the applicable sport and is enrolled in less than a minimum full-time program of studies, but is enrolled in at least six hours, shall have satisfactorily completed six semester or six quarter hours of academic credit during the preceding regular term in order to be eligible to participate in postseason competition occurring between terms; and to specify that a student-athlete who is in his or her final season of competition in the applicable sport and is enrolled in less than six hours, shall have satisfactorily completed the number of semester or quarter hours of academic credit in which he or she was enrolled during the preceding regular academic term in order to be eligible to participate in postseason competition occurring between terms. **Effective date: August 1, 2007.**

Counselors,

Attached is a list of everyone who will be returning next year who is currently ineligible. The majority are those who can take SS to get themselves healthy.

If I missed anyone who you have as needing SS, let me know and we can discuss. If there is someone on the list who you don't think has any eligibility issues, we can discuss as well.

Great job on getting everything done!! Thanks!

Lance

Hi Everyone,
Attached is the first 12 hour report, which is rather long, but to be expected as students drop and add this week. Since we are still in the process of firming up our rosters with the Registrars Office, those of you who have teams competing this weekend, (men's soccer, women's soccer, field hockey and men's golf), may want to look up each individual prior to competition to check their hours just to be certainly that they are indeed registered for 12 hours.

As always, thanks for your attention to this very important detail. If we can assist you in anyway with this, let us know.

Thanks and good luck with everything this week.

Susan

Lance and Susan,

Here's the 12 hour report, by sport, by student. Let me know if you want it formatted any differently or any other information included in the report.

Under Elig Status, P means Pending, and E means Eligible. There also could be an X for Ineligible (it's on screen 194.)

Thanks,

Lee

Susan and Lance -

I wasn't sure if you wanted this yet, but figured I'd send it since there are still quite a few kids under 12 hours. I went through yesterday and hopefully removed the kids that have graduated or are not competing as of last semester.

Thanks,

Lee

Here is today's AdmPros report for 12 hours. I have since removed those who have graduated so disregard their names.

Today is the last day for them to practice while enrolled in less than 12 hours. I must have the underload approval form in my office before we can declare them eligible. Just completing the form and leaving it in a pile to be approved is not the end of the process for athletes. Please let me know the status.

Here is a 12 hour report. It may not be entirely accurate because I don't believe we have all of the incoming freshman flagged in SIS yet. I hope to get that done this week, but until them, we need to check our teams by hand. Field Hockey competes on Aug. 23 and Women's Soccer and Men's Soccer compete on Aug. 22. Please help me stay on top of these teams to ensure that they are enrolled full time prior to competition. For those who plan to take an underload, the best scenario right now is to register for 12 hours now and drop once the approval has been made.

Thanks and keep me informed on any issues.

Thank you,
Susan

Here is a 12 hour report. Again it is not 100% since we are still tightening up the database for 08-09, but it will give you some idea.

Men's Soccer, Women's Soccer and Field Hockey play tomorrow and Saturday. We need to check 12 hours for them today and tomorrow specifically. I know that men's soccer actually leaves today at 5pm, so they will not have any opportunities to adjust their schedule past 5 pm today, so please be sure that they are all enrolled in 12 hours by the end of the day.

Keep me posted on all underloads that you have. If they are on scholarship but have exhausted eligibility, I still need for you to fax the forms down to me.

Thanks so much,
Susan

Hi Everyone,
Here is the 12 hour report from the Registrars Office for today. I know you are working this week to shorten this list, but thought this might help so you know exactly who to be working with.

Wayne, we will need to check men's basketball individually on Thursday, Jan. 15.

Everyone, we should probably check the following teams individually on Friday, Jan. 16 since they compete on Friday and Sat. this week.
W. Basketball
M. Basketball
Gymnastics
M. and W. Swimming
W. Tennis
M. and W. Track
M. Tennis
Wrestling

Again, just a reminder to let me know who your underloads are going to be. If we don't have an approval form on file, we will need to have them register full-time until the approval has gone through. As of right now, I only have 1 underload approval form on file.

Thank you for your help with this.

Susan

Good morning!

Here is the 12 hour report as it exists right now. Keep in mind that the database is not 100% updated as yet, so we will need to check teams individually in SIS as well; at least the ones competing this weekend, which are

Women's Soccer
Field Hockey
Volleyball

Thanks,
Susan

Good morning!

Here is today's 12 hours report. It is now looking more like we would expect. I won't continue to clog your inbox with these reports unless I notice a change.

Just to be on the safe side, however, would you mind still checking each team individually in SIS for competition today and throughout the weekend.

M and W Cross Country
Field Hockey
Men's Soccer
Women's Soccer
Women's Golf
Volleyball

Thank you,
Susan

All,
Attached is today's 12-hour report run by the Registrars Office. Note that there are students on the list who are no longer competing because they have not had a chance to mark their change of status for this term yet (hopefully PeopleSoft will make that a lot easier). Please review and keep me posted on underloads. Fax them down to me as you receive them. 2-6002

Thank you,
Susan

Subject: Drop/Add Approval for Student-Athletes
Attach: Studentathletesdroppingandaddingcourses.doc

Dear Debra and Senora,

I have prepared the attached procedures to identify how your staff should handle registration/drop/add requests from student-athletes. I think I have covered everything you and your staff will need to know to establish this new step in your existing current and post-semester registration/drop/add procedures. Please review and let me know if you have any questions or concerns about the process. Additionally, if you would like for me to, I will be happy to go over the new procedure with your staff.

The Compliance Office and the Academic Support Program for Student-Athletes would like to implement (set an effective date) the new procedure as soon as possible. Please let me know the date you expect your staff to begin enforcing the new procedure, and I will notify all parties involved of the effective date.

Thanks,
Donna

Subject: Bylaw 14.1.10.2

Hello Everyone,
Since you are in the midst of meeting with students and conducting team meetings, I wanted to call your attention to Bylaw 14.1.10.2 - Eligibility Postseason Competition-Between Terms, on page 141. I will talk about this in more detail at your next staff meeting, but the main idea of this rule is as follows:

In order to be eligible for postseason that occurs after exams this spring, a student-athlete in his/her final season of eligibility must complete at least 6 hours of academic credit this semester. We are required to certify the completion of these 6 hours within 14 business days after the date of the last scheduled exam; however, if competition occurs during the 14 days and enough grades are posted to declare a student ineligible, we must certify this student ineligible for competition in postseason contests.

At the moment this only includes students in their final season of eligibility who are enrolled full-time. If students are in an underload, they are not responsible for passing 6 hours.

As I said, I would like to talk with you about this in more detail, but in the meantime, I think it is important for you to be talking to your senior student-athletes about this immediately. It may be necessary to send each of them an email to be sure that they are aware of this rule, which we can discuss further on Tuesday.

If you have any questions, please contact me.

Thank you,
Susan

Subject: Part-time Hours to Satisfy 18 Hour Requirement

Hello All,
This interp below was just released by the NCAA. Not sure how often this would apply since most of our underload situations are with SAs who are in their final season of eligibility. But I wanted to send it out to you for future reference.

Thanks,
Susan

Use of Credits Earned while Enrolled Part Time to Satisfy the 18-Semester/27-Quarter Hour Requirement (I)

Date Issued: Mar 21, 2007
Type: Official
Item Ref: 1

Interpretation:

The committee confirmed that credits earned by a student-athlete during a term in which he or she is enrolled in less than a full-time program of studies may be used to satisfy the 18-semester/27-quarter hour requirement only if such credits are combined with credits earned during an immediately preceding or immediately subsequent term in which the student-athlete is enrolled as a full-time student. Further, credits earned during the part-time term may be completed at an institution other than the certifying institution.

[References: NCAA Bylaws 14.4.3.1 (fulfillment of credit-hour requirements) and 14.4.3.1.4 (application of rule)].

Subject: Fwd: Ready to Implement New Drop/Add Approval for Student-Athletes
Attach: Ready to Implement New Drop_Add Approval for Student-Athletes.msg; Drop and Add Counselor Approval Process - Final version.doc

---

Hi Everyone,
I just wanted to inform you that the new Drop/Add Approval Process for Student-Athletes that I spoke to you about at one of your recent staff meetings has been officially approved and will begin effective Wed., April 25, 2007. From this point forward, student-athletes will not be permitted to drop or add classes without your stamp of approval. By now, each counselor should already have the stamp that Doug ordered to be used in this process. Please be sure to keep these stamps in a safe place.

Each semester this written counselor approval will begin after the last day to drop using the web registration system. My suggestion would be to keep a copy of all forms that you stamp in your files just in case we would need to refer back. The procedures that have been drafted for Registrars Office personnel are attached for your information. Items #7 and #8 specifically state the steps that the academic counselors must take. Please review this document and let me know if you have any questions. Remember that this process may also originate with you.

We are pleased that the Registrars Office has taken this initiative to assist us in preventing our student-athletes from dropping below 12 hours or from dropping and adding courses that could effect their eligibility.

Please keep me informed of how this process is going and let me know if you have any questions or concerns. Thank you for your attention to this important matter.

Thank you,
Susan

Subject: Ready to Implement New Drop/Add Approval for Student-Athletes

---

Dear Susan,

We are ready to begin the new procedure requiring Athletic Academic Counselor (Academic Support Program) approval prior to processing current and post-semester registration, drop, and add transactions for student-athletes. The effective date for requiring current semester drop/add approvals will be Wednesday, April 25, and Monday, April 30th for post-semester reg/drop/adds.

Thank you, Debra and Senora, for the quick turn around in reviewing and implementing the new procedures with your staff. Your cooperation and assistance in making this process work is ever so important to our ability to deliver the improvements recommended during the ACC Compliance Review. Another great example of team work within the department and throughout the University. Your extra efforts are noted and much appreciated.

Susan, please let me know if you need any thing else from us.

Thanks,
Donna

Attach: RE_ 18 Hrs. Earned toward Degree for Double Major.msg

---

Patrick and Crystal,
I thought it was worth going back to the NCAA to revisit the issue of how to count 18 hours for a student who is a double major. The key to the flexibility of counting the hours is that the majors must be within the same degree program. We may not count hours toward one major in the Fall and toward the second major in the Spring if one major is within a BA degree and the other is within a BS degree. Take a look at the attached email from the bottom up for further clarification on this matter, and let me know if you have any questions.

Hi Brent,
I hate to drop this on you at the last minute, but I need your help right away to review the data that I have imported for your teams for APR. APR must be submitted by Oct. 2, next Tuesday. Please be sure that I have all the ineligible students noted correctly and all of those who did not return in Spring 07 or Fall 07 noted correctly as well.

Attached is a summary report for each sport as well as a complete report for each sport that includes hours passed, GPAs, etc. If you have time to review all data, that would be most helpful, but the bottom line is that we need to have the "Eligibility and Retention" flags set accurately.

Let me know if you have any questions. If you can let me know how everything checks out on your end by next Tuesday morning at the latest, that would be great.

Again, sorry to come to you at the 11th hour, but there is a tremendous amount of data that I am working with, and I want to be sure that it is all as accurate as possible, thus the need for your assistance.

Thanks very much.

Subject: Drop Process for Student-Athletes Surrounding the Oct. 15th Deadline

---

Hi Carolyn,
Just wanted to follow up with our discussion earlier today about the drop procedures for student-athletes in the interest of the Oct. 15th deadline as the last day to drop with a Dean's signature. According to our academic support staff, there have been several occasions when the student-athlete has only brought the student copy of the form to their athletics academic counselor and that the actual drop form was sent directly from Advising to the Registrars Office. When this happens, it adds time to the process which is our concern with regard to the Oct. 15th deadline. As you said in the past, the Registrars Office has honored the date that the Advisor signs the form even if the form is received in the Registrars Office after the deadline for whatever reason. If that is still in fact the case given the extra step in the process for student-athletes, then we may not have an issue surrounding the upcoming deadline. But that is our ultimate concern. Anything you can do to assist us in this process so that student-athletes who sought approval from their academic advisor in your office prior to the 15th will still be able to drop if the form is not received by the Registrars Office until after Oct. 15th due to the extra required steps in the process would be very helpful.

Thank you very much for working with us on this important process.

Susan

Subject: Re: Drop Process for Student-Athletes Surrounding the Oct. 15th Deadline

---

Dear all -
Sorry for chimming in late, I was out sick yesterday and am still home sick today.

First, let me clarify the "drop with a Dean's signature" date. It is after the 8 week deadline that we require dean's signature, not before. After the second week of classes, students can no longer use the web system to drop and we begin to require a Reg/Drop/Add Form that requires advisor signature only, and then require the dean's signature after the 8 weeks (students normally have to appeal to drop through admin boards after the 8 weeks, but we are looking for dean's signature at that point).

That said, I believe I need to further clarify the procedures that we agreed upon with the Compliance Office. I can send a copy of the procedures tomorrow for all to see, but for now, I will clarify based on my recollection. Susan, we agreed that the registrar's office staff would check "all" drop/add forms submitted to our office to determine whether or not the student was an athlete (checking screen 194) and send the student and form (if submitted by the student) to the Academic Athletic Counselor for further review and approval before we processed the form. So, that arrangement/procedures were set up between our two offices, and I don't recall that we asked Academic Advising in GC/AS to redirect students to your office before submitting the drop/add form. If that arrangement was made between you and Carolyn Cannon, that's certainly fine with us, but I think we should document (we can use the procedures I wrote) those agreements so we're all operating on the same page.

Lastly, although we strongly urge students to submit the form on the day it is signed by advisors or deans, Carolyn Cannon is right, we honor the date the form was signed by the advisor or dean. We strongly urge students to submit the form on the day of approval so that they don't carry the form around for a long period of time.

I hope to return to the office tomorrow so maybe we can all get together to discuss these issues further

Thanks,
Donna

Subject: Re: Drop Process for Student-Athletes Surrounding the Oct. 15th Deadline

---

Hi Donna,
Sorry that you are still under the weather. I hope you feel better soon.

Thank you for this clarification of the process. I agree that when we originally laid out this process, we did not include Academic Advising in the procedures. But I have to admit, at the time that you and I were working on this, I did not realize that Academic Advisors do not return the form to the student and that they send the forms directly to the Registrars Office. Earlier in the semester a drop occurred without our academic counselors having the opportunity to approve the drop. At that time, I spoke with Carolyn Cannon about the process to see if she would object to her Advisors providing the drop forms to the student-athletes so that they could bring their form to their counselors for approval. This was more of a preventative step to the process and perhaps a step that would eleviate a slight time delay from the time the drop is requested to the time it is officially processed. Certainly, if a drop form gets sent directly to the Registrars Office, we still want the Registrar's staff to send the form directly to Academic Support once they determine that the individual is a student-athlete.

I apologize if we have created some confusion to the process. As with any new procedure, there are kinks that need to be ironed out. I certainly appreciate everyone's cooperation and involvement in this important drop/add process.

Let's do discuss further if need be.

Thanks again,
Susan

>>> <redmon@email.unc.edu> 10/4/2007 9:01 AM >>>
Dear all -
Sorry for chimming in late, I was out sick yesterday and am still home sick today.

First, let me clarify the "drop with a Dean's signature" date. It is after the 8 week deadline that we require dean's signature, not before. After the second week of classes, students can no longer use the web system to drop and we begin to require a Reg/Drop/Add Form that requires advisor signature only, and then require the dean's signature after the 8 weeks (students normally have to appeal to drop through admin boards after the 8 weeks, but we are looking for dean's signature at that point).

That said, I believe I need to further clarify the procedures that we agreed upon with the Compliance Office. I can send a copy of the procedures tomorrow for all to see, but for now, I will clarify based on my recollection. Susan, we agreed that the registrar's office staff would check "all" drop/add forms submitted to our office to determine whether or not the student was an athlete (checking screen 194) and send the student and form (if submitted by the student) to the Academic Athletic Counselor for further review and approval before we processed the form. So, that arrangement/procedures were set up between our two offices, and I don't recall that we asked Academic Advising in GC/AS to redirect students to your office before submitting the drop/add form.

Subject: Re: Drop Process for Student-Athletes Surrounding the Oct. 15th Deadline

---

Well, this is news to me. When last I was responsible for overseeing the registration/drop/add processes, we clearly indicated that students should bring the form to the registrar's office on the same day of issuance (again, even if the student failed to do so, we used the date approved to process the drop). This must have changed recently, and the College decided to retain the forms and send to us via campus mail or courier. You may recall that I circulated our procedures for monitoring "drops for athletes" to the staff here so I'm surprised that someone didn't alert me to the fact that students were no longer required to submit the form directly to the registrar's office. So, in the absence of this information I did not foresee this as a problem. Carolyn, are you sure all advisors hold the forms and then submit them to our office - instead of asking the student to submit the forms directly to our office? I'm referring to the period between the second week of classes and the 8th week. I know that your office submits the forms after the 8th week when dean's approval is required.

I guess we need to do more review of this process, and be sure we're all in agreement about what we're telling students, and revise related procedure/policy documents.

Again, I hope to return to the office tomorrow.

thanks,
Donna

Dear all -

Carolyn is right. Just before we moved to SASB, Alice did send out a message to the department about the new administrative logistics for moving forms back and forth between our two offices. I simply did not apply those new logistics to the new new procedure we set in motion to assist the Athletic Academic Support Programs with monitoring and stopping athletes from dropping until the student-athlete received additional counseling from that office. I certainly should have, but did not. My apologies.

Of course, we can still use the Athletic Drop Procedure (check for student athlete before processing the form) we arranged through Susan's office, but obviously, we need to rethink how to notify Academic Support when we have a drop to be processed for a student-athlete. Additionally, it might be a good idea for "all" of us to meet to discuss the best way to accomplish notifying Athletic Academic Support Programs when an athlete is attempting to drop using a current or post semester Reg/Drop/Add form. Again, I apologize for adding to the confusion regarding processing these drops - totally my mistake in thinking that students were still carrying around forms and submitting to our office. Hope to return to the office tomorrow, and perhaps we continue these discussions verbally.
Thanks, Donna

Subject: Re: Drop Process for Student-Athletes Surrounding the Oct. 15th Deadline

---

Dear All,

All-in-all, I think this process has been working well. Carolyn has informed her advisors to provide the forms for student-athletes back to the student-athlete to take to the Academic Center for approval. In the event that doesn't happen, the Registrars Office is set up in such a way that they are still preventing a student-athlete from dropping or adding a class as they are checking screen 194 to verify whether or not the student is an athlete. If they determine that the student is an athlete and there is no stamp of approval from the Academic Center, they are sending the forms back to the Academic Center before officially recording the drop or add. Now I understand, that all of this is occurring with the understanding that the date on which the Advisor/Dean signs the form will be the date that is honored by the Registrars Office.

On a positive note, this process has already strengthened our counseling of student-athletes and has given us the control that is necessary in monitoring the eligibility of student-athletes. Thankfully, it has made us aware of potential issues that we have not been aware of in years past. With that being said, I would like to thank everyone for working with us on this drop/add process.

Thanks again to everyone. Have a great weekend.

Susan

>>> <redmon@email.unc.edu> 10/4/2007 4:07 PM >>>
Dear all -

Carolyn is right. Just before we moved to SASB, Alice did send out a message to the department about the new administrative logistics for moving forms back and forth between our two offices. I simply did not apply those new logistics to the new new procedure we set in motion to assist the Athletic Academic Support Programs with monitoring and stopping athletes from dropping until the student-athlete received additional counseling from that office. I certainly should have, but did not. My apologies.

Of course, we can still use the Athletic Drop Procedure (check for student athlete before processing the form) we arranged through Susan's office, but obviously, we need to rethink how to notify Academic Support when we have a drop to be processed for a student-athlete. Additionally, it might be a good idea for "all" of us to meet to discuss the best way to accomplish notifying Athletic Academic Support Programs when an athlete is attempting to drop using a current or post semester Reg/Drop/Add form. Again, I apologize for adding to the confusion regarding processing these drops - totally my mistake in thinking that students were still carrying around forms and submitting to our office. Hope to return to the office tomorrow, and perhaps we continue these discussions verbally.
Thanks, Donna

Subject: Advisors Writing to Prospects

Hello All,
Tony asked the following question after reviewing the "Compliance Corner" of the athletic department newsletter, and I wanted to share the answer with everyone.

"After reading the department newsletter Kent sent I have this question. May I not email incoming freshmen who have signed their NLI and tell them about registration, CTOPS, the need for them to take the SAT II before they get here for proper math placement, etc?"

There is an exception that allows academic advisors to (1) call prospects provided the call is included in the one call per week limitation and to (2) write to prospects as long as the reason for writing to a prospect is to send necessary pre-enrollment information.

So to answer the question specifically, YES, it is permissible for you to send an incoming freshman, who has signed an NLI, information regarding registration, CTOPS, SAT II requirements, etc. via written correspondence or email as we would consider that "necessary pre-enrollment information." The interp below is provided for further confirmation.

If you have any further questions about what and when you may write to prospects, don't hesitate to ask. In the meantime, I hope this helps clarify the FAQ in the newsletter.

Thank you,
Susan

Institutional Staff Members Preparing and Sending General Correspondence and Necessary Pre-enrollment Information to Prospective Student-Athletes. (I)

Date Issued: Jul 18, 2007
Type: Staff Interpretation
Item Ref: 1

Interpretation:

The membership services staff determined the following regarding institutional staff members preparing and sending general correspondence and necessary pre-enrollment information to prospective student-athletes:

(1) Noncoaching staff members who are identified as permissible callers in the legislation are permitted to prepare and send general correspondence to prospective student-athletes, subject to the time period restrictions set forth in the recruiting materials legislation. The limitations applicable to those noncoaching staff members' permissible telephone calls also govern their preparation and sending of general correspondence; and

(2) Any institutional staff member is permitted to prepare and send necessary pre-enrollment information to a prospective student-athlete who has signed a National Letter of Intent or financial aid agreement or has been officially accepted for enrollment.

Thanks Barbara. I think for NCAA purposes, they will be full time if the registrar and Financial Aid consider them FT.

I think the Registrar makes this call. In the past, I referred to Advising due to the operation going on at the Registrar's office. Now, they are on top of these issues. I would want Alice's take on this, just to make sure. As you have pointed out, Susan, this is the difference between having a violation or not. Also, I think it is unfair to students at this university that there is not consistency among financial aid, advising, and the registrar. That needs to be straightened out. John

Just an FYI on personnel matters in the Registrars Office. I am disappointed that we won't have as much contact with Chris throughout the next few years. But we are fortunate to have Patrick, Crystal and Stephen who will continue to work with us. From my understanding, Alice will be more hands-on with the athletic certification process in Chris' absence. Just wanted to make you aware of this change.

Thank you,

Subject: Certifying 18-hour rule for Midyear Enrollees

Hello All,
Here is a new NCAA interp regarding how to certify the 18-hour requirement for midyear enrollees. This appears to be the way we have always handled this. For a Spring 08 enrollee, it essentially means that you are going to be counting the hours in Fall 08 twice to certify the 18 hour rule - once to certify prior to Spring 09 and once to certify prior to Fall 09. It is just a matter of getting them back on track with all fall semester initial enrollees. Remember that you will still have to certify percentage toward degree at mid-year every year since this is based on the students terms of enrollment.

Let me know if you have any questions.

Thank you,
Susan

Application of 18/27 Credit-Hour Requirement to a Midyear Enrollee or Midyear Transfer Student-Athlete (I)

Date Issued: Apr 30, 2008
Type: Official
Item Ref: 1

NCAA Interpretation:

The committee determined that an institution is not required to certify the 18/27 credit-hour requirement for a midyear enrollee or transfer student-athlete until the completion of two regular, full-time semesters or three full-time quarters at the certifying institution. After the initial certification, the institution shall certify the 18/27 credit-hour requirement based on the student-athlete's record since the beginning of the previous fall term. For example, an institution would not certify the 18/27 hour requirement for a student-athlete who initially enrolls at the institution in the spring semester or winter quarter until the start of the following spring semester or winter quarter. Thereafter, the institution would certify the 18/27 hour requirement prior to the start of each fall term.

Hi Everyone,
Patrick sought clarification on the issue of counting major courses as Connections and Approaches. Here is the response from Barb Stenross. I will forward a second follow-up email as well. This may be the way you have been operating, but I just wanted to reinforce the issue.

Thanks,
Susan

Hello All,
Here is a follow-up to our meeting last Friday regarding the Business major discussion. The email clarifies the issue with the BE credit in MATH 231. It does appear, they have to receive BE credit in MATH 231 and 232 in order to satisfy the QR requirement. Otherwise, if they take MATH 231 at UNC, they will have satisfied the QR requirement.

Also, attached is a list of the Global Awareness courses. Looks like there are only 6 BUSI courses that satisfy this requirement unless they have an International Studies and Foreign Language minor or double major or if they study abroad. Otherwise, if there is a non-business course that you think should meet the Global Awareness requirement, they will have to submit a Petition Form.

With all of this information, I think we now have the Business major down. At least, I feel better about how all of the courses count. Let me know if you have any questions or concerns.

Thank you,
Susan

Thanks,
Stephen

Greetings all.

I just received a phone call and an email from Lee May in the Business School. Please find information regarding the Global Awareness requirement attached to this email.

Regarding the Math requirement issue:

A student needs to take a Calculus based class from UNC in order to have it count as their Foundations QR. The only way to accept BE credit for the Foundations QR requirement is if a student comes in with both MATH 231 and MATH 232 as BE credit. If that's the case then MATH 232 is counted as a Foundations QR and MATH 231 is counted as a non-business elective.

If a student comes in with BE credit fro MATH 231, 152, STOR 112 or 113 then it will be counted as a non-business elective. If they take any of those classes here then it can count in the Foundations area.

Please let me know if you have any other questions about this issue.

Cheers,
Stephen

Subject: Underload Approvals/Full-Time Enrollment

Good morning everyone!

Hope you had a good weekend.

Just a reminder that today is the last day for our student-athletes to be practicing while in less than 12 hours without an underload approval form. This means that all underload paperwork needs to be on file in my office by the end of the day if they plan to enroll in less than 12 hours. Otherwise, we should put them in 12 hours for now until the underload is approved on campus. That way we don't have to rush the approval system, especially since there are new folks involved in the process.

It would be great if you could get me a list of all of your student-athletes who I should expect to be in an underload this semester.

Thank you for your attention to this important matter.

Susan

Subject: Interp regarding Minors

Hello All,
This interp was just released by the NCAA. However, I don't see this as any different than we have been counting minors all along. If the minor requirement fits into the elective category, than we may still count it toward credit hour requirements and % toward degree requirements. If the electives are full and the student still chooses to take a minor that is not required to graduate, then we obviously may not count the hours toward progress-toward-degree. Let me know if you have any questions.

Use of Credits Earned in a Minor to Satisfy Progress-Toward-Degree Requirements (I)

Date Issued: Sep 17, 2008
Type: Official
Item Ref: 1

Interpretation:

The committee confirmed that a voluntary or optional minor is a minor that is not a required element of the original baccalaureate degree program for all students; therefore, credits earned toward a voluntary or optional minor may not be used to satisfy credit-hour requirements after the first two years of enrollment or percentage of degree requirements even if the student-athlete must complete the requirements for the voluntary or optional minor in order to graduate. A student-athlete may use credits earned in a minor only if the minor is a required element for all students to obtain the original baccalaureate degree.

Thanks,
Susan

Hi Kym
FYI, I didn't realize that this can happen. BE credit was removed since the student retook the course. [See the attached email]
Probably better for this type of request to come from the Registrars Office rather than our office as it did in this case.

Thank you,

North Carolina Common Curriculum and the Comprehensive Articulation Agreement （CAA）

The CAA states that transfer students who have completed two years of course work at community colleges are regarded as having satisfied their General Education requirements, with the following exceptions.

If the equivalents of the following requirements are transferred in from the Community College courses, this credit will be accepted and regarded as fulfilling the specific requirement.

Old Curriculum (Pre-Fall 06) students are responsible for:

General Perspectives

- Foreign Language
- Physical Activity
- Non-Western History

Arts & Sciences Perspectives (Undergraduates) 4 out of 5 areas

- West/Non-West History
- Social Sciences
- Aesthetic
- Philosophical
- Natural Sciences

New Curriculum (Fall 06-present) students are responsible for:

Foundations

- Foreign Language
- Lifetime Fitness

Connections

- Experiential Education
- Global Issues

For undergraduates seeking a BA degree, Supplemental Education requirements will still need to be met. Individual transferred courses equivalent to 200-level or higher UNC-CH courses would be eligible to fulfill these requirements.

The Comprehensive Articulation Agreement (CAA) Manual as well as a transfer course listing can be found online at:
http://www.northcarolina.edu/content.php/assessment/reports/student_info/caa.htm

Subject: ACC Workshop this summer

Brent,
I understand the budget constraints as to why you all will not be able to attend the NCAA Regional Seminar. Do you plan to have any counselors attend the ACC Workshop in Greensboro on June 23-24? It should be beneficial, and I would like to encourage that several of you attend. I don't think we have a limit on attendees. Please let me know.

Thanks,
Susan

Hi Everyone,
Thought this article might be of interest to you. It is basically explaining what information the NCAA is now going to require if a student-athlete tests positive for a drug needed to treat ADHD. There is a link to Guidelines as well as a sample evaluation form that may be helpful to you as you assess our student-athletes' learning deficiencies.

Let us know if you have an questions.

Hello All,
I may have stated something incorrectly about Level 4 FL being able to be counted as a Supplemental Ed in a major where Level 4 is not required if BE was received in both Level 3 and 4. Barb Stenross is consulting Dean Lindaman, so I will get back to you when I hear from her.

Thanks and I apologize for the confusion.

Subject: Schedule Audits

Hello All,
Wanted to let you know that the Registrars folks performed Spring schedule audits. I am in the process of reviewing these with them, but it will take some time. I am going to go ahead and forward their audits to you in case they will be helpful in terms of registering for summer school. They have split up sports among the four of them. I am going to go ahead and forward each email to all of you, if you don't mind just pulling your sports from each one. Once you review them, if you have some concerns, just let me know.

More emails to follow.

Thanks,
Susan

Susan,

I talked to our report writer and it doesn't look like we'll be able to fix the issues with the current report right now. We will work on it over the next few months to firm up a more accurate report. Once again, those pesky Ns are the trouble. Since we have to access FALL 099 data for this report, the N added to student-athletes in 092 have not rolled and that's why were getting students who are no longer on certain teams.

Cheers,
Stephen

Yes, GEOL 101L.  The department will no longer be offering GEOL 109, per
Drew Coleman.

Susan -

Thanks so much for arranging this meeting on such short notice. We will all be there and are looking forward to the opportunity to continuing the discussion on how we can improve the certification process going forward. There are a couple points that I would like to emphasize in advance of the meeting. The first is that I am looking at this as an opportunity to make improvements in the process in conjunction with our move to PeopleSoft. There are a variety of tools, including the new document management system, that will help to facilitate the more transparent process that we have been seeking for at least as long as I've been here, and very likely before that. However, just having those tools at our disposal will not in and of itself improve the process, so getting the right people in the room and having the right discussions about what we can and/or should do going forward is critical to ensuring that we take full advantage of this opportunity. This is exactly why I am looking forward to discussing with you and the athletic advisors what it is we can do to make this a better process for all of us.

This notion of making the process better for all of us leads to my second point. As we discuss the certification process, I think it's important that we keep in mind first and foremost that all of us are in this together. Therefore as we move forward, I hope we are looking at not just what each office's primary role is but what can we all do to support each other in that role. As such, I don't think we are suggesting that our role is only certification, but rather that certification is our primary role. If we weren't anticipating potential problems by planning ahead for what a student will be doing academically, then we are both neglecting the certification process and the needs of all those involved in this process. However, if the athletic advisors are already doing that same planning with athletes, our only goal is to find the best way to incorporate that planning into the certification process so that all of us are on the same page and working toward the same goal. As I've already noted, the move to PeopleSoft will provide us with tools that will allow us to share documents more readily, which will also allow us the opportunity to avoid repetition and/or parallel work in the process, thus addressing the transparency concern that we have discussed.

In the absence of these tools right now, our options are much more limited, so I hope it's clear that we are not looking to make any significant changes to the current process. However, I think we owe it

to all the offices involved in this process to embrace this opportunity
to thoroughly re-examine the process in order to find areas for
improvement and ideally maximize the collaboration between everyone
involved.

Thanks again, Susan. Have a great weekend, and we'll see you next week.

Chris

My thought is to spend the time talking about some of the topics from yesterday, i.e. counting hours in the first two years, your role as you see it being certification only and not planning, providing worksheets to Arts and Sciences advisors, and examining the whole certification process as it relates to PeopleSoft and Document Management. If there is anything else that you can think of, just let me know.

Attach: Re_ GEOL 109.msg

Hi Everyone,
The question came up about whether or not GEOL 105 and GEOL 101L can meet the science with a lab requirement given the recent emails about GEOL 109. It doesn't look like this is an easy answer. Take a look at the email from Barb Stenross and stay tuned for updates. Until then, I would be cautious about assuming that GEOL 105 will meet a requirement.

Thanks,
Susan

Subject: Re: GEOL 109

Hi Crystal,

I don't feel I can answer this question. Dean Lindemann provided an answer to the question raised by the particular student in this email chain based on agreements on record with Dean Smith that were time-limited. That answer doesn't extend to this larger, and very frustrating, situation.

I know from speaking and emailing with Drew Coleman in Geological Sciences (and from the Bulletin's section on Geological Sciences) that that department regards GEOL 101, 105, 109 and 111 as equivalent classes any of which can be combined with GEOL 101L (except 111, which is a 4 hours class with its own lab),and only one of which can count for graduation. GEOL 101, 105, and 109 are listed in the 2009 Bulletin as PL classes and 11 as a PX, but we have been counting GEOL 101 taken with GEOL 101L as PX. I am quite sure the department intends 105 and 109 with 101L to also count as PX, but I don't know if they have ever requested that through the Boards, or even if that has been requested for 101 with 101l!

So, I am passing on this one, and hoping that Dean Lindemann will help us find a way out of the morass. :-)

Best,
Barb

Hi Everyone,
Looks like we finally have some information that clears up the issues with how to count intro GEOL courses. Please let me know if you still have questions after reading through these details.

Thanks,
Susan

Susan Maloy
Assistant Athletic Director for Certification and Eligibility

Cc: Lindemann, Erika <ulinde@email.unc.edu>
Subject: Introductory Geology and Gen Ed

Hi all,

Dean Erika Lindeman and I met yesterday to discuss the confusion regarding introductory geology classes and what general education requirements they fulfill. The following is the list of approved general education attributes at this time:

* GEOL 101 = PL
* GEOL 101 and 101L = PX
* GEOL 105 = PL
* GEOL 105 and 101L = PX
* GEOL 109 = PL
* GEOL 111 = PX

Note that GEOL 109 with 101L has not been approved as PX.. There is a one-time exception to this. In spring 2008, Dean Smith approved the use of GEOL 109 with 101L as PX for that semester only.

The Geological Sciences department has been informed of the process by which they might bring GEOL 109/101L into the PX fold, but this would not be in effect until Fall 2010, if approved.

Please let me know if you have any questions.

Thanks,
Barb

Hello All,
Attached is further clarification on when foreign language level 4 may be counted as a supplemental education requirement.

Let me know if you have any questions.

Someone please forward this on to Jenn once her email is up an running.

Thanks,
Susan

Subject: Re: Supplemental Education question

Hi Rocky and other esteemed colleagues,

The notes I have are as follows:
> If student has BE credit or TR credit for FL 4 and it is not required
> for a primary major, it can count as supp ed in appropriate division.
> If student places into FL 4 and must take to fulfill foundations
> req't, may not be used for Supp Ed.
This was based on discussions in Sept. 2008 at an Advisors meeting with Amy Dye, who consulted with Dean Smith.
I believe the rationale is that the foundation requirements is to show proficiency through level 3, and therefore level 4 is beyond the call of duty, and fair game for Supplemental Education unless it is required for the student's primary major.

Best,
Barb

Yet another email from me. Isn't this fun?!

Anyway, here is the hook list which will give you an idea of who has not shown up to purchase books yet. Those marked with an "x" have come by at least once to complete a book form.

Hopefully this helps.

Thanks,
Susan

Subject: Fwd: GEOL 109 q
Attach: TEXT.htm; GEOL 109 q.msg

Sorry! One more email from me this morning.

Remember all of the emails that flew around last semester about GEOL 101, 105 and 109 with regard to the lab and the PX requirement? Well, Cynthia had raised one more question that was not previously answered until today.

As you may remember, an exception was made for GEOL 109 and GEOL 101L to meet the PX requirement if it was taken in Spring 2008. The attached email confirmed that the exception indicates that if a student took only the course (GEOL 109) in Spring 2008, they may still take the lab (GEOL 101L) this semester to meet the PX requirement.

This is a one time exception as GEOL 109 and GEOL101L have not been approved as a PX moving forward.

Hopefully this makes sense.

Thanks,
Susan

Subject: GEOL 109 q

Hi Susan,

For the student who took GEOL 109 in 082, yes, he can use 101L now to make that a PX. Erika Lindemann is making an exception to allow this based on the earlier deal Dean Smith made for 109 that term.

---

All,
Attached is some clarification regarding information that Barbara Lucido brought up at one of your recent staff meetings regarding the number of permissible online courses and the number of BE credits that may be counted toward their major. Note that BE credits do not count toward the 18 hours of C or better.

An additional email on this will follow.

Thanks,
Susan

I am attaching the memo that Barb Stenross wrote for Advising detailing the rules that the Admin Boards came up with. In it she mentions 2 courses of BE credit, for 6-8 hours, perhaps Susan Malloy saw this and things got a little bit confused?

Hope this clears things up. I am still going to inquire re: 21 hr majors.

Well, that is to make room for 2 classes that are 4 cr hrs each, but Stephen does raise a good question re: what to do if the BE credit leaves less than 18hrs of the major to be done here on campus and how does that affect the 18hrs of C rule... I've left a message for Barb and will let you all know what I find out.

thanks,

C

Hello All,
I just wanted to forward the attached example of the application of an interpretation regarding Fulfillment of Degree Requirements when Changing Degree Program, specifically prior to the 5th term. Notice that 40% toward degree must be certified based on a student-athlete's declared degree program in existence at the beginning of the 5th term, not what his designated degree is prior to competition within the 5th term. In other words, if a student is ineligible per the 40% rule prior to the start of the 5th term, then we may not require him/her to change his/her major after the semester begins to regain eligibility for the 5th term.

I know that we have student-athletes change their major often during the term in order to be eligible the following term. So we must not confuse that with having a student change his major after the semester begins to be certified as eligible for that same term. The 40/60/80 Rule must be assessed based on the degree/major that was officially declared prior to the start of the term.

If anyone has any questions, please feel free to give me a call.

Thanks,
Susan

Subject: INFORMATIONAL: ConnectCarolina Town Hall

The University community has a unique opportunity to learn about the ConnectCarolina project at a Town Hall on Monday, Nov. 9, 2-3 p.m. at Gerrard Hall. ConnectCarolina is a fully integrated administrative system that will improve interaction with the University for faculty, staff and students. Chairs of the Stakeholder Committees will provide a project update on the student services, human resources, payroll and finance components. The Executive Sponsors will speak to the importance of the ConnectCarolina project to the University community. This will be a chance to hear about the status of the student services implementation as well as the plans for the HR, payroll, and financial systems. Questions are welcome. Light refreshments will be served. For more information, visit http://connectcarolina.unc.edu/.

This email is sponsored by: Information Technology Services

==========
"INFORMATIONAL:" email will only be sent to those who have indicated that they do want to receive mass email. To set your informational mass email preference, logon to the on-line directory web site at https://dir.unc.edu/dir/update.

Mercer,
Attached is information to post for students about Registration in ConnectCarolina. Perhaps you could post these PDFs throughout the Academic Center Do you think we should also send this out as a RAM Rules email or through Cricket's email listserv? Whatever, we decide, I think we need to move fast since they will already receive some access as early as tomorrow. Please let me know what you think.

Also, did you all decide that you wanted to schedule demos for our athletes? If so, I will need to get back to the training folks pretty soon to get on their calendar.

Thanks and I'll look forward to hearing back from you.

Subject: PeopleSoft training for Student-Athletes
Attach: TEXT.htm

Hello All,
I have just heard back from the folks at Connect Carolina about training for our student-athletes. They have agreed to meet with our students on Monday, March 22, 2010 in the Academic Center Auditorium at 7:00pm for all student-athletes who you want to come, and then on Wednesday, March 24 at the SAAC meeting. Cricket, I just need to know the location as soon as you know. The format will he a 25 minute demo and then time will be allotted for them to actually load their own shopping carts and the training folks will be there walking around to answer questions that they may have. She said that this has worked well for other student groups that they have met with.

So please get the word out to your student-athletes and make sure that they are in attendance, particularly underclassmen. Also, make sure that they bring their own laptops so that they can actively participate in the session. Sherron, if you could book the Auditorium for 7pm on Monday, March 22, that would be great. Do you all think that we should send this out as a mass email to all student-athletes through RAMRules, or do you want to take care of getting in touch with them on your own?

One thing that I failed to mention at the staff meeting when we were determining dates that would work best is that I will not be available the week of the 22nd. My husband and I will be taking our children to Disney World that week. I didn't think that it would be that big of a deal if I was not there, since you all are the ones who will be working with our student-athletes regarding registration, etc. as opposed to me. With that said, Brent, do you mind if I give them your name and contact info, should they need to get in touch for any reason?

Thanks for your attention to this. Let me know how you want to advertise this.

Subject: Fwd: RE: AdmissionPros - Summer School Grades
Attach: TEXT.htm; RE_ Summer School Grades.msg

Hi Guys,
Thanks for meeting this morning.

I contacted Jeff Hilts at AdmissionPros to ask about whether or not we would be able to access Summer School grades through our typical Grade Report through Summer Session II and his response is attached.

There is a chance that we will not be able to access grades for SSII. I suggest that you prepare as though we won't. You may want to run SSII schedules prior to July 1, so that you will know exactly who you have in summer school that you will need to check on in SIS. Again, just another issue with changing systems.

I'll let you know if I hear anything more on this.

Thanks,
Susan

Susan-

We are waiting to hear from IT regarding our status on campus after July 1. If we are still doing work on campus this should not be a problem. If we are not, then in all likely hood we will just be pulling out of all work at UNC. This has been a very frustrating experience for us and I am sure for our clients as well. It's unfortunate that no one IT will listen. They are suppose to let me know their plans by May 1. I will keep you updated. Hope all is well!

Hi Guys!

Ok, I attempted to find out where we can access SAT scores and the attached outlines the navigation. Never would have thought to look in Transfer Credit Evaluation. Hmm!

Anyway, let me know if you are not able to see test scores under Transfer Credit Evaluation>Academic Test Summary.

Thank you,
Susan

Attach: TEXT.htm

Hi Susan,
Since you are requesting this for our enrolling students (rather than applicants), I believe that the access will need to be approved by the Registrar's office. As such, I'm copying Chris Derickson on this to be sure. Here is the path that you should request.
Records and Enrollment > Transfer Credit Evaluation > Academic Test Summary
Please let me know if I can help with anything else.

Subject: Access to Test Scores

Hi Allison,
I hope you are doing well.

I'm hoping you can help to guide me. Our academic counselors need access to test scores through Connect Carolina for our incoming student-athletes. Do you know how I can instruct them to find this information or what I need to request access to in order for them to be able to see the info? They do not have the same "Student Recruiting" page that Lance and I have, but I am not sure where else to tell them to go for this info.

Thanks for your help.

Hello All,

Attached is the grade report tbat the Registrars Office is running for us to capture SSII grades. Not a wbole lot to report just yet, but Crystal will run this for us again later this week. She will run a separate report for SSI to capture all of the Online course grades later in the week as well.

Hope this is helpful.

Thanks,
Susan

PS: Sports are identified with a code in the first column. I believe the sports are coded as follows:

C = Baseball
D = Basketball
I = Fencing
J = Field Hockey
K = Football
L = Golf
M = Gymnastics
Q = Lacrosse
U = Rowing
Z = Soccer
0 = Softball
2 = Swimming
4 = Tennis
5 = Track
6 = Volleyball
8 = Wrestling

---

Hey Everybody,
I really need for you to prioritize something for me. APR is due to be submitted on Oct. 5th. I need for each of you to review your teams roster closely. Here are some things to look for:

1. Be sure the roster seems right to you. It should be made up of those who received aid each semester.
2. Be sure that those who left for the pros are noted correctly in the RET column.
3. Be sure those who are ineligible for either semester are noted properly.
4. Be sure that those who are retained are noted properly.
5. Be sure that those who transferred are noted correctly in the RET column if they left with a 2.6 GPA or above. Otherwise the transfer will be noted in the Reason Not Retained column.

I'd like to hear back from each of you whether it all looks correct or not, so that I know you have had a chance to review the information. Please get back to me by Monday morning at the latest.

As I was saving all of the summary sheets, the system shut down when I was through 75% of our sports. So a few sports are missing from the attachments. Nonetheless, please pull out the PDFs for your sports and look them over. For those of you who changed sports recently, please look them over as well. I'll follow-up with the remaining sports as soon as possible.

If you have any questions, please let me know. Thanks again for your assistance with this.

Susan

Hello All,
Attached is a grade report that was run for me in ITS. It lists all student-athletes, so you will need to pull out your sports or simply delete the sports that you are not concerned with. If students are not showing up that should be, or if students are showing up that shouldn't be, please let me know so that I can clean that up.

Thanks and hope this is somewhat helpful.

Here is the drop report. Brent informed me that he has not been given the opportunity to approve the drops. Is that the same with each of you? Please give me some names of individuals on this report who actually dropped without your review. I am trying to work through this process with the Registrars Office, again. My guess is there still might be an issue with the Advisors not giving the forms to the athletes and then the Registrars Office must not be checking to see if they are athletes. Anyway, I was hoping you all could say something to Barbara Lucido in your next staff meeting to see if she could communicate everything to the Advisors.

Please send me some names.

Thanks,
Susan

A few new drops as of yesterday. Have you had a chance to approve all of the drops that you have been seeing on these reports? Just want to be sure that the process is working.

Thanks,

Susan

Hello All,
For some reason the report has not been coming directly to my email this week. Problem has been fixed. So you will notice a good number of drops this week.

Thanks,

Susan

Hello All,
Just wanted to let everyone know that you should now have access to Advisor Center under Self-Service in ConnectCarolina. Some of you may not have access to much information under the Advisee Academics tab within the section titled Institution/Career/Program. In this section, you should eventually be able to see Plan (major) and Sup-Plan etc. Rest assured that you will soon be able to see this. They are working out the securities right now. So let me know if you continue to not have this access by the end of the week.

Also, we currently do not have the ability to tag our student-athletes under My Advisees. I spoke with Carolyn Covalt, and her thought is that this is not an impossibility, but it requires more discussion with Dean Stenross and staff since this is something new for all of us. PeopleSoft does allow a student to be tagged to several advisors, however. So this may be something for the future for us.

Of great importance is that I have been told that there are possible errors to the historical grade data that you are now able to view in Advisee Academics. Therefore, you MAY NOT print any of this information off for students at this time. These errors should be fixed once they go live with the ability to generate transcripts from PeopleSoft which will be some time in December. So for now, still refer to SIS for historical data and please do not provide information from Connect to your students.

Attached is an online tutorial for Advisor Center that may be helpful to you.

Let me know if you have any questions.

Thank you,
Susan

sbmaloy@uncaa.unc.edu

ACCESSING COURSE SCHEDULE REPORTS BY TEAM IN ConnectCAROLINA

UNC Athlete Course Breakdown

Once logged into CONNECT, select "Campus Community" >"Personal Information (Student)" > "Participation Data (Student)" > "UNC Athlete Course Breakdown"

Select "Add a New Value" tab and in the Run Control ID box input "Athletecoursebreakdown" with no spaces. You only have to do this one time to set up the Run Control ID. The next time you access schedule reports you will simply enter the same ID under the "Find an Existing Value" tab.

Select a term and sport and click "RUN"

In the drop-down box beside "Server Name", make sure that PSUNX is saved there and click "OK".

This takes you back to the run screen. Select "Report Manager" > "Administration Tab".

Then you will see a report link that may indicate "Processing" under Status. Continue to hit the yellow REFRESH button until the status is "Posted". You may need to wait a minute or 2 each time you hit refresh.

Once the report is "Posted", click on the report link and you should see the report with your team's schedules, (which may actually serve as a grade report for us as well once grades are posted each term).

Historical Grades/Courses – the 'Unofficial Transcript" – Still Available via Faculty/ Staff Central menu and Student Center Menu for Students and Faculty/Staff Advisors

Thanks to the efforts of the Office of the University Registrar (OUR) and the ConnectCarolina team in Information Technology Services (ITS), students and faculty/staff advisors will continue to be able to access the historical grades/courses data through the Faculty/Staff and Student Central links on MyUNC.

The ConnectCarolina team moved the access point to this data from one server to another, giving students and faculty/staff advisors continued access to view this information during the transition to ConnectCarolina which should be complete in December. For students, the transition will be transparent. For faculty/staff advisors, there will be a small change in menus to access this information.

See below for more information, including detailed directions for faculty/staff advisors.

University Registrar Chris Derickson notes that his office is committed to ensuring that students and advisors can access this information for Spring 2011 registration, and that the OUR will continue to assist students, faculty and staff through this last step in the full transition to ConnectCarolina.

Students: How to View Historical Courses and Grades

Students can continue to view historical grades/courses in the following ways:

- Go to studentcentral.unc.edu and be automatically redirected to the new access point for this data.
- Click on a link on the Student Services portlet (the first page students see after logging in at my.unc.edu) to be automatically redirected to the new access point.
- Go to the University Registrar's office at SASB and request an unofficial transcript.
- View the left hand menu to access the "GPA Calculator."

Students should keep in mind that the data in the historical grades/courses do not include Fall 2010 courses; those are available in ConnectCarolina (where Fall grades will also be available in December).

Faculty/Staff Advisors: How to View Historical Courses and Grades

Faculty/staff advisors can view historical grades and courses in the following ways:

- Faculty advisors, advisors and student services staff have access to this information in ConnectCarolina. Due to the continued interface between SIS and ConnectCarolina, there may still be lags in updates so the data in ConnectCarolina are not considered canonical yet, **and should not be shared with students**.
- Advisors (not including faculty advisors) and student services managers have direct access to this information in SIS up to and including the Summer II 2010 term.
- Go to facultystaffcentral.unc.edu and be automatically redirected to the new access point for this data.
- Click on the "Faculty/Staff Central" link in the My Applications section of the employee portlet (accessed through my.unc.edu) to be automatically redirected to the new access point. Advisors, faculty advisors and student services staff will be able to see grades and eligibility:
  - **Please note:** the RAM menu from Faculty/ Staff Central will **not** be available as of November 1. There will still be a search box at the bottom of the menu, where a student's PID can be entered; the results of that search will include the ability to see an unofficial transcript.
  - GPA Calculator: There will be a hyperlink to a GPA calculator, just above the main, blue menu. This will take users to a webpage where ***the GPA Calculator will be a blank template that is not linked to any student's PID***.

Statistics, as seen here, or in SIS,

	AHRS	EHRS	**QHRS**	**QPTS**	**GPA**
Current	3.0	3.0	3.0	11.10	3.700
Cumulative	100.0	98.0	97.0	309.20	3.188
Status	ELIGIBLE				

should be entered into this template and then the GPA Calculator can be used, per usual practice. **IMPORTANT**: always use the **cumulative** values for **QHRS, QPTS, and GPA** like the following screen shot:

Questions

Users with questions about the availability of historical courses/grades or the decommissioning of Student Central and Faculty/Staff Central may contact connectcarolina_info@unc.edu. Technical issues should be directed to the Help Desk by calling (919) 962-HELP or visiting help.unc.edu.

Why were the Servers for Student Central and Faculty/Staff Central decommissioned on Nov. 1?

The servers on which Student Central and Faculty/Staff Central resided are being turned off due to the expiration of maintenance contracts on the aging servers. Extending these servers would come at a prohibitive cost and would have to be for another year, which is not needed.

The ConnectCarolina project website has a guide to where to find items formerly available on Student Central and Faculty/Staff Central:
http://connectcarolina.unc.edu/news/erp-news/centrals-mapping.html

Subject: RE: Viewing Fall 2010 Schedules
Attach: TEXT.htm

Hi Susan,
In ConnectCarolina there is an "Enrollment and Shopping Cart" date which has ended for Fall 2010 because this was forcing students to specify fall 2010 term, allowing students to add classes to their Fall shopping carts, see Fall 2010 class numbers and creating confusion from students and departments.
Ending this date, however, means that Advisors need to view the Fall class information a little differently through Advisor Center...
Instead of viewing the student view of their schedule in list view to see the requirement designations, you can go to:
Advisor Center > Academics > Term Summary section, and click on Fall 2010 term, and then you can click on the classes to see which requirement designations they meet.
Let me know if you have further questions.

Thanks!
Heather

Subject: Viewing Fall 2010 Schedules

Hi Heather,
Not sure if you can answer this Connect Carolina question or not, but since students have registered for Spring 2011, you can no longer see the details (such as the Requirement Designation, the instructor, etc.) of the Fall 2010 schedule when you click on "My class schedule" within Student Center of the Advisor Center. It does seem strange that when you open up Advisee Student Center, you can see the Fall classes that a student is enrolled in, and then when you click on "My class schedule", you see only the Spring 2011 proposed schedule. Is this the way it was intended to be in Connect?

Thanks so much for your assistance,
Susan

Good morning!

Attached you will find an evaluation survey and minutes for our spring 2006 meeting. Becky Bowman has forwarded a draft of the benchmarking chart to me and I will get it out to the group as soon as possible. Let me know if you see anything that needs to be corrected in the meantime as I attempted to capture the sense of the group in our meeting. Also, please return the short survey form back to Tracey Haith no later than Friday June 23, 2006. This is the first time that we have formally solicited feedback from this group so it would be helpful to ensure effective meetings in the future.

It has been over a month since we last met as a group - anything you need from the conference? Feel free call me at 336-854-8787 ext 233 or via cell phone at 336-314-7340 for any of your concerns. Have a great summer!

Eric A. Wood

MINUTES OF THE
ACADEMIC ADVISORS MEETING
May 1, 2006

Those in attendance:
Boston College – Ferna Phillips
Clemson University – Becky Bowman, *Chair*
Duke University – Brad Berndt, Tony Bennett
Florida State University – Mark Meleny
Georgia Institute of Technology – Phyllis LaBaw, Cindy Moore
University of Maryland – Anton Goff
University of Miami – David Wyman
University of North Carolina – Robert Mercer, Brent Blanton
North Carolina State University – Phil Moses, Carrie Leger
University of Virginia – Claudia Pirkle
Virginia Polytechnic Institute & State University – Chris Helms
Wake Forest University – Jane Caldwell, Sherry Long
Atlantic Coast Conference – Eric Wood, *ex-officio*

Attending portions of the meeting: Shane Lyons-Associate Commissioner, Bill Reagan-Director NCAA Membership Services

[Note: While certain items in the agenda may have been acted on at various times throughout the meeting, all final actions within a given topic are combined in these minutes and listed in order of the agenda for convenience of reference. These minutes reflect only actions (formal votes or "sense of meeting") that occurred.]

1. Welcome/Introduction. Becky Bowman welcomed everyone and led the group in introductions.

2. Approval of September 22, 2004 Minutes. The minutes were approved with changes.

3. Department Structure/Responsibilities. Those who brought flow charts to the meeting took the opportunity to exchange and briefly discuss department structure and reporting lines. It was suggested that the conference office develop an ACC benchmarking chart to be updated and distributed at the annual meeting for ease of reference.

4. Study Skills Coaching vs. Subject Tutoring. Jane Caldwell led a discussion regarding this approach used in the Wake Forest University Athletic Department. Her staff found that it was not always the subject matter troubling the students but often times they did not know how to study. Wake hires graduate students as well as people from the surrounding community to work with the student-athletes. Ms. Caldwell reported that coaching study skills in conjunction with subject tutoring has had a significant impact on the academic success of her at-risk student-athletes.

5. Advisor Training. Carrie Leger and Phil Moses shared an advisor training model used with the North Carolina State academic support staff to provide continuing education on pertinent topics related to the field. Ms. Leger reported that all staff is required to participate. The training allows new staff to get acquainted with department policies/procedures and provides an opportunity for returning staff to address pressing issues. Ms. Leger also reported that the training process fosters a team environment and encourages open communication among the staff.

6. Best Practices-Academic Progress Rate. Eric Wood informed the group that there were a number of requests to discuss APR issues based on the agenda items request form. It was decided that APR would serve as the "best practices" session for this years meeting. The group discussed who was primarily responsible for the collection and analysis of data on their respective campuses. Carrie Leger and Phil Moses led the discussion with a presentation used to educate campus groups not only on the analysis of data but also the implementation of action plans to improve.

7. Facebook-Online Social Networks. Eric Wood addressed the group to gauge interest in making a formal recommendation to the ACC Faculty Athletics Representatives regarding a conference policy on the use of Facebook and other online social networks. It was suggested that the decision to regulate online social networks be left to each institution. Mr. Wood shared that Katie Hershede, graduate student from the University of South Carolina, was the guest speaker for the annual CHAMPS/Lifeskills meeting if anyone was interested in having a speaker on campus. Her presentation was entitled: "Online Social Networks." Ms. Hershede provided examples of student-athlete misfortunes and helped to identify special features (i.e. privacy settings) that could protect them.

8. New Legislation. Bill Regan, NCAA Director of Membership Services, gave a presentation on progress toward degree standards and new NCAA legislation adopted in January and April 2006.

9. Summer Bridge Programs for Freshman. Mark Meleney shared the Florida State University summer bridge program with the group. He encouraged others to look into implementing a similar program, based on the timing of institutional orientation programs, in order to facilitate the transition for freshman to college life.

10. Student-Athlete Programs. Eric Wood updated the group on the ACC student-athlete programs:

    Futures Intern Program-Interviews took place April 18, 2006 at the conference office. The following 5 student-athletes were hired: Lee Butler from Miami (ACC Championships), Ashley Dunigan from Wake (Disney), Katie Harrington from Duke (Fox), Holly Johnson from Florida State (Sun Sports Productions), and Rachel Stockdale from NC State (Sun Sports Marketing).

Postgraduate Scholarship Awards Luncheon-Took place April 13, 2006 in Greensboro, NC. 44 student-athletes were honored (33 present) and over 500 people in attendance.

Honor Roll/All-Academic Teams-Eric Wood reported that the conference office will no longer include grade point averages when releasing this information to the media without the consent of the student-athletes. The student-athletes sign the Buckley Amendment at the beginning of the year releasing educational records to institutional officials and the conference office but not the media or the general public.

11. Initial Eligibility Trends. Eric Wood reported that Dr Myles Brand authorized the creation of this group to review recent trends in secondary school education that impact NCAA legislation and academic policies. This working group made recommendations to the Board of Directors for their April meeting, some with immediate effective dates and the others will go through the normal legislative cycle. Proposals 2006-11 (ethical conduct legislation), 2006-12 (requiring official test scores from the testing agency), and 2006-13 (NCCA has the authority to review high school and a prospects academic credentials) were all adopted. 2006-12 has an effective date of 8/1/07 while 11 and 13 are effective immediately. There were two proposals that were recommended to go through the regular legislative cycle. The first requires PSA's to be placed on the Institutional Request List (IRL) and have registered with the clearinghouse prior to being provided an official visit (effective 8/1/07 if adopted). The second proposal **will not** go into the regular 2006-07 legislative cycle to amend the core course time limitation requiring high school graduation in order for a PSA to use a limited number of core courses for initial eligibility purposes after the eighth semester. The AEC will report back to the working group in 18-24 months.

12. Future Meeting Dates. The group decided that the Conference should continue to have the annual meeting of the academic advisors in the spring.

13. Other Business. With no other business the meeting was adjourned at 6:30 p.m.

Greetings!

To date I have only received 8 evaluation forms of the 17 administrators in attendance. Your input is very important to us in order to run effective & efficient meetings. Please take the time to complete the very brief survey so that I can accommodate your concerns and requests for future meetings. We want to be a resource for you and this assessment instrument will assist us in determining if we are truly serving our membership! I appreciate your time and consideration and I wish everyone a happy holiday.

Good morning!

Attached you will find an evaluation survey and minutes for our spring 2006 meeting. Becky Bowman has forwarded a draft of the benchmarking chart to me and I will get it out to the group as soon as possible. Let me know if you see anything that needs to be corrected in the meantime as I attempted to capture the sense of the group in our meeting. Also, please return the short survey form back to Tracey Haith no later than Friday June 23, 2006. This is the first time that we have formally solicited feedback from this group so it would be helpful to ensure effective meetings in the future.

Subject: Postseason Eligibility-Football
Attach: TEXT.htm; FAQ-Nov.2006 MTG.doc

Good Morning!

Attached you will find a FAQ document related to postseason eligibility for football that I put together based off the questions we've received here over the past month. Many of these you already know but since we've had a number of institutions ask the same questions, I figured I would submit them to our NCAA contact, Bill Reagan, for an official NCAA response. This document is supplement no. 8 for the ACC Compliance Director's meeting scheduled for today and tomorrow so feel free to discuss with them upon their return to campus and let me know if you have any questions/concerns.

Eric A. Wood

Director of Student-Athlete Programs & Compliance

The Atlantic Coast Conference

MINUTES OF THE
ACADEMIC ADVISORS MEETING
May 7, 2007

Those in attendance:
Boston College – Ferna Phillips
Clemson University – Becky Bowman, Maria Herbst
Duke University – Brad Berndt
Florida State University – Mark Meleney, Amy Lord
University of Maryland – Anton Goff
University of Miami – Leigh Husband, Christine Scheets
University of North Carolina – Robert Mercer, *Chair*, Brent Blanton
North Carolina State University – Phil Moses, Carrie Leger
University of Virginia – Adrien Harraway, Jim Booz
Virginia Polytechnic Institute & State University – Chris Helms
Wake Forest University – Jane Caldwell, Elizabeth Miller
Atlantic Coast Conference – Eric Wood, *ex-officio*

Attending portions of the meeting: Shane Lyons-Associate Commissioner, Bill Reagan-NCAA Membership Services, Greg Dana-NCAA Eligibility Center, Beth Bridger/Mary Willingham, Learning Specialists-University of North Carolina.

[Note: While certain items in the agenda may have been acted on at various times throughout the meeting, all final actions within a given topic are combined in these minutes and listed in order of the agenda for convenience of reference. These minutes reflect only actions (formal votes or "sense of meeting") that occurred.]

1. Welcome/Introduction. Robert Mercer welcomed everyone and led the group in introductions. Eric Wood reviewed the itinerary for the two-day meeting.

2. Approval of May 1, 2006 Minutes. The minutes were approved as written.

3. Benchmarking. With quite a few requests for discussion on department staffing and budgets, Robert Mercer created and distributed a survey prior to the meeting date for the group to review and share information. He stressed the importance of maintaining confidentiality as a result of sharing highly sensitive budget information. It was suggested that a few other areas be addressed on the survey pertaining to the number of sports sponsored, student-athlete population, use of the academic enhancement fund and salary ranges for tutors. The survey information should be maintained by the ACC office but updated annually by the membership.

4. Institutional Policies. The group shared information related to admissions processes, travel/missed class time policies and summer school criteria. Beth Bridger and Mary Willingham, learning specialists from the University of North Carolina, presented on

remediation and motivating student-athletes who come in under prepared towards becoming independent learners. A hard copy of the PowerPoint is on file in the ACC office.

5. Continuing Eligibility. Brett Blanton, Associate Director (UNC), addressed this agenda item by sharing the continuing eligibility process at North Carolina and opened the floor for discussion. The group shared processes they use on their respective campuses.

6. Communication With Prospects. Eric Wood shared a July 27, 2006 interpretation that reads all recruiting functions must be performed by a coach who counts towards the numerical limitations of head or assistant coaches. While it is permissible for academic advisors to make calls or receive calls from prospective student-athletes related to admissions or academic issues, those calls are subject to the applicable limitation on the number of telephone calls an institution may place to these prospects (i.e. 1 x per week) prior to signing a National Letter of Intent. Once the prospect has signed a NLI, advisors can make unlimited calls to prospects.

7. NCAA Legislation Update. Eric Wood briefly reviewed a newly adopted legislation chart focusing on legislation related to academic services. He also emphasized the effective dates with some of the proposals adopted immediately in January and others effective August 1, 2007. Mr. Wood also shared information regarding bylaw *14.3.5.1 participation prior to certification* and an April 4, 2007 interpretation. The interpretation reads that an institution may not provide athletically related financial aid to a student-athlete while his or her initial or transfer eligibility certification is pending during either the 14 day **temporary** certification period for recruited student-athletes or 45 day **temporary** certification period for non-recruited student-athletes.

8. APR. Phil Moses and Carrie Ledger, NC State, led a discussion on having broad based participation on campus when addressing APR issues. They also shared a sample academic improvement plan intended to assist the institution with its review of academic progress as well as its academic support services. Bill Reagan, NCAA, addressed the group on the baseball academic enhancement working group final report, particularly the financial aid piece, which is stirring up a lot of conversation across the country. Finally, Eric Wood provided the APR/GSR/Federal Graduation Rate information for our league as well as a comparison with the other 5 major bowl conferences.

9. Student-Athlete Programs. Eric Wood updated the group on the ACC student-athlete programs:

   Futures Intern Program-Interviews took place March 27, 2007 at the Grandover Resort. The following 7 student-athletes were hired: Jessica Morris from Virginia Tech (ACC Championships), Meeghan Ford (Disney), Lauren Barry from NC State (Disney), Debra Vento from Duke (Fox) Cara Lopresti from Duke (Sun Sports Productions), Jessica Skower from Florida State (Sun Sports Marketing) and Britten Meyer from Clemson (Orange Bowl Committee.)

Postgraduate Scholarship Awards Luncheon-Took place April 12, 2007 in Greensboro, NC. 45 student-athletes were honored (28 present) and approximately 600 people in attendance.

Honor Roll/All-Academic Teams-Eric Wood reminded the group that we will not be using grade point averages in the announcement. Also, please remember to use formal names when submitting candidates to the conference office in order to ensure accurate record keeping.

10. Other Business. Eric Wood reminded the group to please turn in evaluation forms. Mr. Wood also surveyed the group to determine if a conference call was needed-it was the sense of the group that a call was not necessary for the 07-08 academic year.

11. Future Meeting Dates. The group decided that the Conference office should continue to have the annual meeting of the academic advisors in May.

12. Adjourn. With no other business the meeting was adjourned.

2009 ACC Summer Compliance Workshop - June 23-24, 2009
Sheraton Hotel and Koury Convention Center, Greensboro, NC

JOSEPH S. KOURY
CONVENTION CENTER

Directions to Sheraton Greensboro Hotel at Four Seasons
3121 High Point Road, Greensboro, NC 27407 ~ (336) 292-9161

Arriving from Piedmont Triad Airport (PTI) - approx. 12.2 miles:

Turn right onto East Bryan Blvd. Take the Winston-Salem/I-40. Merge onto Future I-73. Take exit 1 to merge onto 1-40 Bus. E/US-421 S toward Greensboro. Take exit 217 toward High Point Rd. Merge onto Pinecroft Rd. Turn left on Koury Blvd. Hotel on left.

Airport Shuttle Service is available by calling FLY PTI at 1-877-796-5466. They are located in the middle of the Baggage Claim area. There is a $26.00 per person one-way and/or roundtrip fee.

Arriving from the South (Charlotte, Atlanta):

Follow I-85 N towards Greensboro. Take I-85 Bus N/US-29N/US70E. Take exit 35B for I-73/US-220 toward I-40. Merge onto US-220N. Take exit 81 for I-40 toward Winston Salem. Merge onto I-40 Business West. Take exit 217 to Koury Blvd. Turn right on Koury Blvd. Hotel on immediate right.

Arriving from the East (Raleigh, Durham, Chapel Hill):

Traveling I-40 W/I-85 S. Continue following I-40 Bus W. Take exit 217 to Koury Blvd. Turn right on Koury Blvd. Hotel on immediate right.

Arriving from the West (Winston-Salem, High Point):

Traveling I-40 E. Take slight right at I-40 Bus E (signs for I-40 Bus/Greensboro/Bryan Blvd). Take exit 217 toward High Point Rd. Merge on Pinecroft Rd. Turn left on Koury Blvd. Hotel on left.

Arriving from Charlottesville area:

Traveling on US-29 S into North Carolina, take the I-85/I-40 exit toward US-70/Charlotte/High Point/US-220/US-29. Merge onto I-40 Bus W/I-85 Bus S/US-220 S/US-29 S/ US-70 W. Continue to follow I-40 Bus W. Take exit 217 to Koury Blvd. Turn right at Koury Blvd. Hotel on immediate right.

Arriving from the North (Virginia, Maryland, Washington, DC):

Traveling I-85 S to Bus 85 S or US 29 S until it merges with I-40 W in Greensboro. Follow I-40 W to exit 217 (Koury Blvd). Turn right on Koury Blvd. Hotel on immediate right. Hotel on immediate right.

Student-Athlete Academic Support Services at Division I Institutions

Preliminary Results

September 2009

Study Background

- The intent of the study was to learn more about the resources and practices institutions have in place to help promote academic success.
- Given increasing demands placed on student-athletes to progress toward a degree at a quicker pace and the increased public attention given to student-athlete academics as a result of the APR, the Academic Cabinet has identified this review as one of its top priorities for the next few years.
- This study is a follow-up study from a similar one done in 1998. As analyses continue, trend data will be examined.

Study Development and Pilot

- The items examined in the current study were largely based on the 1998 study. Questions, however, were modified to relate to current practices. In addition, an advisory group comprised of members of the National Association of Academic Advisors for Athletics (N4A) and the National ACademic ADvising Association (NACADA) consulted in the development of the survey instrument.
- The survey instrument was fully piloted on seven campuses. With the assistance of an N4A member, we were able to ensure that various institution-types were represented, including low-resource, private and larger public institutions.
- Based on the results of the pilot, the survey instrument was slightly modified.

Response

- The final instrument was sent to all Division I Athletics Directors with instructions that it is best completed by the individual on campus who is in charge of academic advising for student-athletes (e.g., the director of academic support services for student-athletes). With the assistance of N4A, the survey link also was sent to the primary N4A contact. Multiple targeted reminders were sent to institutions that had not responded.
- In total, we have 295 institutional responses, including pilot responses. This equates to an almost 90% response rate.
- Two-thirds of respondents indicated they were either the director of the academic center for student-athletes (54%) or an academic advisor to student-athletes (12%).

Response (cont.)

- Many of the analyses presented here will compare results by subdivision and resource level.

Response rate by subdivision:

Football Bowl Subdivision (FBS)	Football Championship Subdivision (FCS)	No Football
94%	85%	84%

Response rate by resource quartiles (high to low):

Quartile 1	Quartile 2	Quartile 3	Quartile 4
87%	89%	86%	81%

- Quartiles used here are the same as those used in APR penalty determination.

Part I: Availability of Academic Support Services

Academic Support Services

- Respondents initially were asked if they offer support services either through the athletics department or through the general university that are available to student-athletes. In total, only three institutions reported not having any services.
- The following two slides display the frequencies for various services. There were significant differences in response by subdivision and resource. These are explained in greater detail in later slides.

	Proportion of Student-Athlete who Use the Service						
	100%	80-100%	60-80%	40-60%	20-40%	Less than 20%	None/Not offered
Course selection/ degree progress	34%	40%	10%	9%	3%	2%	3%
Monitor class attendance	25%	26%	14%	14%	10%	6%	5%
Daily class check	3%	4%	3%	10%	15%	30%	35%
Study Hall	11%	11%	22%	32%	16%	6%	3%
Assess learning disabilities	3%	3%	3%	4%	9%	40%	39%
Accomm. for LD	4%	5%	3%	4%	7%	52%	24%
Basic skills Assessment	11%	5%	7%	6%	13%	25%	32%
Remediation	5%	7%	10%	16%	22%	29%	11%

	Proportion of Student-Athletes who Use the Service						
	100%	80-100%	60-80%	40-60%	20-40%	Less than 20%	None/Not offered
Course specific tutors	8%	10%	23%	28%	21%	8%	3%
Summer Transition Program	4%	3%	3%	7%	11%	40%	32%
Priority Registration	48%	27%	2%	2%	2%	1%	18%
Computer Lab	28%	30%	19%	8%	6%	1%	9%
Note-taker	0%	>1%	2%	2%	2%	17%	77%
Faculty mentor	2%	3%	4%	5%	11%	30%	46%
Peer Mentor	1%	3%	4%	9%	12%	31%	41%

Academic Support Services: Differences by Subdivision and Resource Category

- There were statistically significant differences in the proportion of student-athletes who use various services by both subdivision and resource category. The following slide provides more detail.

	Subdivisional Difference	Resource Difference
Course selection/degree progress	FBS greater proportion	Resource 1 & 4 greater
Monitor class attendance		
Daily class check	FBS greater proportion	Resource 1 & 4 greater
Study Hall		Resource 3 & 4 greater
Assess learning disabilities	FBS greater	Resource 1 greater
Accommodations for LD		
Basic skills Assessment	FBS greater	Resource 1 greater
Remediation	FBS greater	Resource 4 greater
Course specific tutors	FBS greater	Resource 1 greater
Summer Transition Program	FBS greater	Resource 1 greater
Priority Registration	FBS greater	
Computer Lab		
Note-taker		
Faculty mentor		Resource 1 greater
Peer Mentor		

Student-Athlete Facilities

- Overall, 78% of institutions reported having a computer facility that is dedicated for student-athlete use only. Breakdown by subdivision:
  - FBS: 89%
  - FCS: 66%
  - Non-Football: 78%
- The average number of computer terminals available varied. FBS institutions reported an average of 39 terminals, while both FCS and non-football institutions reported an average of 15.
- Overall, 88% of institutions reported having a physical space on campus that is dedicated to academic support for student-athletes.
  - Almost all FBS institutions (96%) reported having a center, while 81-85% of FCS and non-football institutions reported having a center.
- Another 70% reported updating this space in the last 5 years. While the majority (68%) spent under $250,000 on these updates, almost 10% indicated spending $1 million or more, the majority of which was reported by FBS institutions.

Academic Support Services Available to General Student Body

- In order to assess potential services that are available only to student-athletes, respondents also were asked to indicate what services are available to the general student population. The following slide compares what services are available to student-athletes and what are available to the general student population.

- As the next slide shows, with the exception of assessment of and accommodations for learning disabilities and basic skills assessment, institutions report greater availability of academic support services for their student-athletes than for their general student population.

Academic Support Services Available to General Student Body (cont.)

Academic Support Services Available in the Summer

- Almost all respondents (95%) reported that academic support services are available to student-athletes in the summer. There was little variation in availability by sport:
  - Men's Basketball: 99%
  - Football (including just FBS and FCS respondents): 97%
  - Men's Other Sports: 95%
  - Women's Basketball: 98%
  - Women's Other Sports: 96%

Part II: Academic Support Requirements

General Academic Support Requirements

- The majority of institutions require that their student-athletes use various academic support services that are available to them. FBS institutions were significantly more likely to require these than FCS or non-football institutions.

Percent indicating service required of all or certain student-athlete subgroups:

	Basic Skills Assessment	Course Specific Tutoring	Summer Transition Program
FBS	91%	89%	75%
FCS	55%	67%	40%
No Football	57%	71%	56%
Quartile 1	84%	92%	87%
Quartile 2	52%	67%	50%
Quartile 3	68%	75%	48%
Quartile 4	74%	72%	45%

Academic Support Requirements: Study Hall

- Among all respondents, six percent require study hall of all their student-athletes and 89 percent require it of certain subgroups. FCS institutions were less likely to report requiring it than FBS and institutions not sponsoring football.

Overall percent indicating required of the following subgroups:

	Baseball	MBB	Football	Men's Other	WBB	Women's Other
2-4 Transfer	40%	50%	45%	41%	48%	41%
4-4 Transfer	34%	45%	37%	36%	41%	36%
At-risk	61%	72%	67%	71%	72%	70%
Certain Classes (e.g., freshmen)	57%	66%	64%	63%	65%	62%
Below a GPA threshold	65%	73%	68%	73%	73%	73%

Academic Support Requirements: Monitor Attendance

- Among all respondents, 24 percent require that their student-athlete class attendance is monitored for all their student-athletes and 54 percent require it of certain subgroups. There were no significant differences by subdivision or resource.

Overall percent indicating required of the following subgroups:

	Baseball	MBB	Football	Men's Other	WBB	Women's Other
2-4 Transfer	12%	23%	24%	12%	17%	11%
4-4 Transfer	9%	19%	21%	10%	15%	10%
At-risk	33%	45%	57%	37%	40%	37%
Certain Classes (e.g., freshmen)	18%	26%	32%	20%	22%	20%
Below a GPA threshold	25%	36%	48%	28%	31%	28%

Academic Support Requirements: Tutors

- Among all respondents, only one percent require tutors of all their student-athletes, while 73 percent require it of certain subgroups. FBS institutions were more likely to report tutoring is a requirement than FCS or non-football institutions.

Overall percent indicating required of the following subgroups:

	Baseball	MBB	Football	Men's Other	WBB	Women's Other
2-4 Transfer	15%	24%	18%	14%	21%	14%
4-4 Transfer	12%	21%	15%	13%	18%	12%
At-risk	50%	60%	44%	56%	58%	56%
Certain Classes (e.g., freshmen)	24%	33%	25%	26%	30%	25%
Below a GPA threshold	43%	51%	37%	47%	49%	47%

Part III: Athletic Department Academic Support Staff

Academic Support Staff for Student-Athletes

- We asked respondents about the number of employees within their athletics departments that are dedicated to academic support for student-athletes. Differences between FBS and the other two subdivisions were significant in all cases.

	DI FBS		DI FCS		DI – No Football	
	Range	Average	Range	Average	Range	Average
FT Professional Staff	2-18	7.67 (n=105)	0-8	2.44 (n=90)	0-10	2.33 (n=72)
FT Secretarial Staff	0-4	0.93 (n=98)	0-3	0.34 (n=62)	0-2	0.32 (n=47)
FT IT Staff	0-3	0.22 (n=73)	0-1	0.03 (n=58)	0-3	0.07 (n=41)
PT Employees	0-20	2.91 (n=68)	0-10	0.75 (n=65)	0-8	0.84 (n=51)
Paid Interns	0-19	1.77 (n=81)	0-4	0.41 (n=63)	0-4	0.58 (n=57)

Academic Support Staff for Student-Athletes (cont.)

- With the exception of Part-time Employees, the differences between quartile 1 and the other three were statistically significant.

	Quartile 1		Quartile 2		Quartile 3		Quartile 4	
	Range	Average	Range	Average	Range	Average	Range	Average
FT Professional Staff	0-18	8.52 (n=69)	1-10	3.44 (n=68)	0-8	2.71 (n=64)	0-15	2.98 (n=66)
FT Secretarial Staff	0-4	1.0 (n=63)	0-2	0.47 (n=49)	0-2	0.38 (n=45)	0-3	0.48 (n=50)
FT IT Staff	0-3	0.29 (n=48)	0-1	0.10 (n=42)	0-3	0.08 (n=40)	0	--
PT Employees	0-10	2.34 (n=44)	0-4	0.65 (n=40)	0-20	1.82 (n=49)	0-14	1.41 (n=51)
Paid Interns	0-19	1.82 (n=55)	0-7	0.80 (n=50)	0-4	0.81 (n=48)	0-5	0.48 (n=48)

Educational Background of Academic Support Staff

- The majority of full-time, professional staff whose job is dedicated to academic support hold a master's degree as their highest degree. There were no significant differences in highest degree held by either subdivision or resource level.

Overall percent holding:

Ph.D., Ed.D. or J.D.	Master's Degree	Bachelor's Degree	Associate's Degree	High School Diploma
7%	74%	17%	<1%	0%

Student Employees: Positions *Other Than* Tutoring

- On average, institutions employ almost 7 students as part of their athletics-academic support staff in positions other than tutoring. The majority of these positions are filled by undergraduate students rather than graduate students. (Note: We asked institutions to include work-study employees in their figures)
- There were not significant differences in the number of undergraduate student employees either by subdivision or resource classification.
- There were, however, significant differences in the number of graduate student employees by both subdivision and resource. While FBS institutions employ 4 graduate students, on average, FCS and institutions not sponsoring football employ only 1. Similarly, while institutions in the highest resource quartile employ, on average, 4.3 graduate students, those in the lower quartiles employ between 1.2-1.7.

Student Employees: Tutoring Positions

- On average, institutions employ almost 31 tutors, including undergraduate, graduate and non-student tutors (e.g., retired teachers). The majority of these positions, however, are filled by undergraduate students. Highlighted portions below indicate a significantly greater number of employees.

	Undergraduate	Graduate	Non-Student
Averages by Subdivision			
FBS	32 (n=96)	18 (n=94)	7 (n=89)
FCS	16 (n=80)	3 (n=66)	1 (n=67)
No Football	10 (n=70)	3 (n=66)	1 (n=63)
Averages by Resource Quartile			
Quartile 1	37 (n=63)	24 (n=63)	8 (n=62)
Quartile 2	21 (n=63)	5 (n=61)	2 (n=60)
Quartile 3	13 (n=63)	4 (n=54)	1 (n=52)
Quartile 4	11 (n=57)	2 (n=48)	1 (n=45)

Student Employees: Hours Paid

- When considering student employees working both in tutoring and non-tutoring positions, institutions pay, on average, 149 student-worked hours per week. When averaging the two separately, institutions pay for 124 tutors hours and 38 non-tutors hours weekly.
- Non-tutors work, on average, 11.6 hours each week, while tutors work considerably less at 4.8 hours per week. Many institutions, in fact, reported that their tutors work just 1-2 hours per person per week.
- FBS and Quartile 1 institutions paid students for significantly more hours than the other groups.

Student Employees: Hours Paid

	Non-Tutor Hours	Tutor Hours
Averages by Subdivision		
FBS	65 (n=92)	268 (n=83)
FCS	21 (n=86)	46 (n=81)
No Football	24 (n=68)	45 (n=69)
Averages by Resource Quartile		
Quartile 1	66 (n=60)	340 (n=52)
Quartile 2	33 (n=63)	70 (n=61)
Quartile 3	25 (n=61)	74 (n=59)
Quartile 4	31 (n=62)	45 (n=61)

Tutorial Support Budget

- Respondents were asked a series of questions related to their institutional budget directed to academic support for student-athletes. A few questions asked specifically about the tutorial support budget.

- The median spent by responding institutions was $30,000 during the 2008 fiscal year on tutorial support. FBS and institutions in Quartile 1 reported spending significantly more money on tutorial support.

Median spent in 2008:

FBS	FCS	No Football
$105,000 (n=83)	$11,500 (n=58)	$10,500 (n=48)

Quartile 1	Quartile 2	Quartile 3	Quartile 4
$140,000 (N=53)	$17,000 (N=47)	$20,000 (N=43)	$11,000 (N=46)

Tutorial Support Budget

- Institutions indicated what percentage of their budget for tutorial support went to one of five sport groups.

Range and average percent of tutorial budget spent on each of the following sport groups in 2008:

	Men's Basketball	Football	Men's Other Sports	Women's Basketball	Women's Other Sports
Range	0-100%	0-70%	0-60%	0-40%	0-55%
Average	18.4%	25.9%	20.8%	11.7%	22.1%

Part IV: Athletic Department Academic Support Budget

Athletic Department Academic Support Budget

- Respondents were asked to provide their *institution's* overall budget dedicated to academic support for student-athletes. Responses varied greatly by subdivision and resource category. On average, 65% of the total budget was paid for by the athletics department.

	Total Budget	
	Range	Median
Results by Subdivision		
FBS	$20,000 – 2.6 million	$655,098 (n=78)
FCS	$0 – 1.025 million	$140,000 (n=53)
No Football	$0 – 460,000	$154,980 (n=43)
Results by Quartile		
Quartile 1	$0 – 2.6 million	$1,000,000 (n=46)
Quartile 2	$800 – 1,100,436	$203,582 (n=46)
Quartile 3	$20,000 – 620,000	$174,500 (n=41)
Quartile 4	$0 – 1.025 million	$150,000 (n=41)

Athletic Department Academic Support Budget (cont.)

- Below are the ranges and medians of the total amount spent by the athletics department/university on staff salaries (excluding tutors) for the athletics-academic support program. On average, salaries comprised 67% of the total budget. FBS and quartile 1 institutions reported spending significantly more.

	Total Spent on Salaries	
	Range	Median
Results by Subdivision		
FBS	$0 – 1.399 million	$427,000 (n=80)
FCS	$0 – 365,000	$85,385 (n=64)
No Football	$0 – 400,000	$98,775 (n=46)
Results by Quartile		
Quartile 1	$0 – 1.399 million	$538,892 (n=50)
Quartile 2	$0 – 680,596	$129,500 (n=52)
Quartile 3	$0 – 490,000	$109,652 (n=45)
Quartile 4	$0 – 504,600	$100,000 (n=43)

Athletic Department Academic Support Budget (cont.)

- Given the current economic climate, we asked how spending on student-athletes has changed recently.
- Changes in spending on student-athletes (Note, we asked specifically for changes excluding investments in physical space):
  - 8% of institutions indicated spending on such programs has decreased since 2007
  - 28% reported there has been no change
  - 52% reported a 1-20% increase in total spending on academic support programs
  - The remaining 12% indicated a 21-100% increase.
- Changes in spending on athletics programs:
  - The majority of institutions reported a reduction in spending on athletics programs. Only 17% reported an increase.
  - There were no significant differences by subdivision or resource.

Part V: Effects of NCAA Academic Standards

Opinions Regarding Student-Athletes' Academic Pathway

- Respondents were asked to provide their opinions regarding how important it is to ensure that student-athletes fulfill various requirements, including graduation, maintaining athletic eligibility, etc. They were asked to not only indicate how much they agree with the statements on a six-point scale but also to rank order the list from most important to least important.

- While the majority strongly agree that it is important to ensure student-athletes choose a major for a career; maintain athletic eligibility and graduate, the vast majority reported graduation as the most important objective:

Opinions Regarding Student-Athletes' Majors

- A great deal of attention lately has been given to student-athletes' choice of major. We asked respondents their opinion on why student-athletes are choosing the majors that they are. There were no significant differences in response by subdivision. Results to student-athletes choice of major can be found on the following slide.

- We also asked whether clustering has increased as a result of increased NCAA academic standards. Over one-half of respondents (62%) reported that they believe there has been no change in clustering of student-athletes in certain majors as a result of increased standards. Approximately 27 percent, however, believe clustering has increased. There were no significant differences by subdivision or resource level.

Opinions Regarding Student-Athletes' Majors (cont.)

	Strongly Agree	Agree	Somewhat Agree	Somewhat Disagree	Disagree	Strongly Disagree
Too many S-A want to major in subjects too difficult for them	1%	7%	28%	26%	32%	6%
Too many S-A choose major because it will be easy	3%	11%	37%	25%	21%	4%
Too many S-A choose major based on teammates'	2%	14%	28%	30%	22%	4%
S-A choose major to prepare for a career	9%	57%	27%	6%	1%	0%
Too many S-A are restricted in choice due to time demands	8%	18%	36%	19%	15%	4%
PTD prevents too many from changing majors	24%	20%	25%	14%	14%	4%
PTD resulted in too many choosing for ease of major	9%	14%	24%	28%	21%	4%

Opinions Regarding Student-Athletes' Majors (cont.)

- We asked if respondents believed there were sport group differences in how student-athletes choose their majors, and if so to explain what they thought those differences were. Although the overwhelming majority reported simply "no", a few interesting themes arose, including:
  - Transfer student-athletes being restricted in their choice of major
  - Revenue or Men's Basketball and Football tend to cluster more than other sports
  - Males tend to cluster more than females
  - Student-athletes choose based on teammates
  - Certain sports are highly restricted in choice of major due to practice schedules.

Changes to Academic Support Program

- In addition to their opinions regarding student-athletes' academic trajectories, respondents also were asked about changes their institutions have made as a direct result of increased NCAA academic standards. The majority of institutions reported that they have added additional staff to work directly with student-athletes (e.g., advisors, tutors, etc.) and that coaches have become more involved in monitoring the student-athletes. There were no significant differences by subdivision or resource.

Changes to Academic Support Program (cont.)

- Respondents were asked if their institution has implemented a program that holds academic support staff "accountable" for student-athlete performance as a result of increased reporting and academic requirements. The overwhelming majority of responses simply indicated "no" staff is not held accountable. A few other themes arose, including:
  - Staff has always been responsible – increased reporting/requirements not the cause
  - Several institutions indicated they are in the process of making changes to hold staff more accountable, and
  - Others indicated that coaches are being hold more accountable due to increased requirements.

- Many of the responses focused on the word "accountable" in the question. There were a good number of comments that discussed a responsibility on the part of staff to assist student-athletes but that ultimate accountability must fall on the student.

  Our support staff is not "held accountable" for student-athlete performance, but we do feel that their performance is a reflection of our competence and commitment. When they perform poorly, it is hard for us not to feel some responsibility. But we realize that they are ultimately responsible for their success/failure.

Part VI: Summary and Next Steps

Summary

- Almost all Division I institutions reported having an academic support program for student-athletes, and 88 percent reported having physical space dedicated to academic support.
- The majority of institutions also report requiring the student-athletes to use at least certain academic support services. Reported use, however, varies as a function of subdivision and resource level. FBS institutions as well as institutions with greater resources report greater use of services among their student-athletes.
- Overall, 89 percent of institutions report having at least one full-time staff member dedicated to academic support for student-athletes. Again, FBS and institutions with greater financial resources (quartile 1) reported having a significantly larger staff than their counterparts.

Summary (cont.)

- Student employees also make up an important part of the academic support program. Institutions reported, on average, employing 36 students in tutoring and non-tutoring positions who work, on average, 149 hours a week. Institutions in the FBS or resource quartile 1 employed significantly more students than their counterparts.
- Total budget figures devoted to the athletics-academic support program ranged from $0 to $2.6 million. The median spent by FBS institutions was approximately $650,000 in 2008 compared with approximately $150,000 that was spent by FCS and non-football institutions.
- Overall, 64% of institutions reported an increase in spending on academic support for student-athletes in spite of current economic conditions.

Summary (cont.)

- The majority of respondents disagree that too many student-athletes are choosing a major based on their teammates' majors. The majority agree, however, that student-athletes are restricted in their choice of major due to time demands and that enhanced PTD requirements prevent student-athletes from changing majors.

- The majority of institutions reported that, as a direct result of increased NCAA academic standards, they have added additional staff to work directly with student-athletes (e.g., advisors, tutors, etc.) and that coaches have become more involved in monitoring the student-athletes.

Future Analyses

- Respondents were required to provide institution name when completing the survey. This will allow us to link survey responses to APP data to enable to establish if there are common practices in place at the top-performing academic institutions. This also will allow us to develop predictive models using the survey data as well as APP data.

- We also will be comparing survey results to the results of the '98 study to determine how things have changed in the past decade.

All:

Please find attached a job announcement looking for a Director of Student-Athlete Programs and Compliance for the ACC. Please circulate to possible candidates you feel meet the qualifications.

Thanks
Shane

JOB DESCRIPTION

Director of Student-Athlete Programs and Compliance

The Atlantic Coast Conference is seeking a college graduate candidate (master's degree preferred) with at least three to five years of working experience at a Division I institution or conference office in the area of NCAA Student-Athlete Programs and Compliance. The Director of Student-Athlete Programs and Compliance will be responsible for the following:

Student-Athlete Programs

- Coordinate and prepare materials for the ACC Student-Athlete Advisory Committee (SAAC) meetings
- Coordinate annual meetings of the Life Skills Directors and Academic Advisors
- Assist with on-campus Student Athlete Advisory Board's initiatives
- Coordinate the National Letter of Intent Program
- Management of the NCAA Student Assistance Fund
- Management of the ACC Student-Athlete Scholar Banquet
- Assist with the ACC Postgraduate Scholarship Program
- Manage the ACC Honor Roll Program
- Coordinate the ACC Futures Internship Program
- Serve as primary staff liaison to the ACC Student-Athlete Welfare Committee

Compliance

- Provide interpretations of NCAA and ACC rules
- Assist in educating conference personnel on NCAA legislation
- Attend NCAA Compliance Seminars and National Association of Academic Advisors for Athletics(N4A) annual meeting
- Assist in administration of Conference and NCAA waivers, specifically medical hardship waivers and medical absence waivers
- Assist with compliance related activities during ACC coaches' meetings

Other

- Coordinate and initiate ACC Community Service Projects
- Assist with responsibilities in Human Resources
- Assist with academic research projects, specifically APR and GSR reporting
- Successfully manage annual budgets
- Perform other duties as assigned by the Commissioner and the Associate Commissioner for Compliance and Governance

Candidates must have strong computer skills, excellent written and verbal skills and demonstrated ability to self-start, be creative, show initiative and meet established goals and deadlines. Salary commensurate with experience. Review of applicants will begin November 6, 2009 and will continue until position is filled. Applications from women and minorities are encouraged. Send cover letter and resume to:

Shane Lyons
Associate Commissioner
Atlantic Coast Conference
4512 Weybridge Lane
Greensboro, NC 27407

Subject: RE: Summer Independent Study

Academic Retention Committee Notes
June 2008

Just high lights from the June committee meeting. All FYI, feel free to speak with me if you would like more details!

1. **After Spring and SS1 classes, 54% of all AP students returned back to good standing.**
    a. This will be recalculated after SS2. Questions were raised as when to calculate these figures. Calculating after Spring, may give a truer read to probable AP students' status after Fall, but can't deny students are given until end of Summer to return to good standing. (ie more time to get back to good standing after Spring AP than Fall AP)

2. **Again, after Spring and SS1 classes, 95.8% of the Freshmen 2008 class was retained**.

3. **These figures were not broken down into sub-categories, ie Athletes, Covenant, etc. We have asked that they should be.**

4. **Also, AP for the Fall semester will be 'recalculated' after SS2 for those who raised their grades above a 2.0 during the summer classes.**

5. **Bounce Back Results**
    a. Those people who were regular BB attenders (10-13 classes)-Average GPA 2.05.
    b. Those who were intermittent attenders (5-9 classes)—Average GPA 1.75.
    c. Those who were infrequent attenders (1-4 classes)—Average GPA almost a 1.8 (could be due to fact they were "higher" students to begin with?)
    d. BB regular attenders (10-13 classes)—60% returned to good standing
    e. Again, of all of AP students, only 54% returned to good standing
    f. According to data collected using likert scale ratings, students were satisfied with BB and helped students deal more effectively with academic challenges

6. **Cynthia Demetrio will start a peer mentoring group for students who *RETURNED to good standing.***
    a. They don't former AP students to feel all alone after the great amount of attention they received while on probation. (I mentioned the requirements for AP were probably not as "time consuming" as she thought and maybe the peer mentoring could be a good idea for students on AP as well).

7. **Other comments from meeting:**
    a. Trial run: Covenant students who were on AP, if attended regular meetings with Fred Clark and Michael throughout the summer, could get their loans turned into grants for courses taken to help them get back to good standing.
    b. Want to look into further into doing academic screening for students on AP. Fred Clark's gang is referring a lot of students up to LDS, and diagnosis of LD/ADHD have been found.

If you have any questions or would like me to bring something up in this committee, please feel free to let me know. We will meet again in August.

Brent,
I hadn't talked with Robert, but here are a few faculty I think would be good to invite--some you likely have already:

Nina Martin, Geography
Chris Gaffney, Geography
Altha Cravey, Geography
John Florin, Geography
Doug MacLean, Philosophy
Susan Wolfe, Philosophy
Tom Hill, Philosophy
Marc Lange, Philosophy
Alan Nelson, Philosophy
Tim McMillan, AFAM
Perry Hall, AFAM
Sherry Salyer, EXSS
Barbara Osborne, EXSS
Elizabeth Hedgepeth, EXSS
Richard Southall, EXSS
Deborah Southall, EXSS
Deborah Stroman, EXSS
Kristin Odrak, EXSS
Gerald Unks, EDUC
Debby Crowder, AFAM
Jean DeSaix, BIOL
Rita Balaban, ECON
Steve Zinder, EXSS
Andre Wesson, Advising
Glenn George, Law
Gene Nichol, Law
Terri Houston, Minority AFFAirs
Ben Saypol, Drama, Interactive Theatre Carolina
Rachel Murphy-Brown, AFAM

Brent,
Thanks so much for the letter. Attached is an edited letter for the WBB incoming students.
I send them to each individually, so let me know if I need to make changes.
Thanks,
Jan

Coach Hatchell,
Attached is a list of your student-athletes who have been certified as eligible to compete in Spring 2010. Please remind all of your student-athletes that they must not drop down below 12 hours in order to remain eligible to practice and compete, particularly in this first week of school when they are permitted to adjust their schedules online on their own. We will continue to monitor their full-time enrollment status throughout the first week and beyond as we normally do.

Please review the list to make sure that no one is missing.

Thank you and best of luck through the remainder of the season.

Susan

Subject: Academic All-America news

Great news in this week's Academic All-America at-large team announcements -- field hockey's Rachel Dawson was named to the women's first team today and golf's Barden Berry to the men's third team on Tuesday. Please see releases below:

JUNE 12, 2008

CAROLINA FIELD HOCKEY'S DAWSON NAMED ACADEMIC ALL-AMERICA

CHAPEL HILL, N.C. -- North Carolina's Rachel Dawson, a senior on the 2007 NCAA Championship field hockey team, has been named to the ESPN The Magazine Academic All-America at-large women's first team, as announced Thursday by the College Sports Information Directors of America (CoSIDA). She is the only field hockey player on the squad, which includes representatives from seven different sports, and the first UNC field hockey player to earn first-team Academic All-America honors since 1999.
The Academic All-America at-large teams are open to student-athletes from the sports of women's bowling, women's crew, men's and women's fencing, field hockey, men's and women's golf, men's and women's gymnastics, men's and women's ice hockey, men's and women's lacrosse, men's and women's rifle, men's and women's skiing, men's and women's swimming, men's and women's tennis, men's volleyhall, men's and women's water polo and wrestling. To be a candidate for the honor, a student-athlete must be a starter or key reserve and must carry a cumulative grade point average of 3.2 or hetter. Academic All-America first, second and third teams were selected in the university and college divisions.
Tar Heel men's golfer Barden Berry was named to the Academic All-America at-large men's third team, announced on Tuesday.
Dawson, a business major from Berlin, N.J., graduated with distinction in December after leading Carolina to NCAA and Atlantic Coast Conference championships and an undefeated season. She received the Honda Award as 2007 national player of the year and her No. 9 Carolina jersey has been retired. A recipient of an Atlantic Coast Conference Weaver-James-Corrigan Award, she served as a team captain and earned the Carolina Leadership Academy's highest honor, the Three-Dimensional Leader Award.
Named 2007 ACC Scholar-Athlete for field hockey, Dawson finished her UNC career with a 3.63 GPA. A two-time first-team All-America selection, she now plays full-time for the U.S. Field Hockey National Team and recently was named Player of the Tournament as the squad qualified for this sunimer's Olympic Games in China.

Academic All-America
UNIVERSITY DIVISION
FIRST TEAM
Kristi Miller (Georgia Tech, Tennis, Sr., 4.00); Amanda Blumenherst (Duke, Golf, Jr., 3.78); Hilary Bowen (Northwestern, Lacrosse, Jr., 3.87); Molly Crispell (Penn State, Swimming, Sr., 4.00); Stacy Lewis (Arkansas, Golf, Sr., 3.73); Kelly Zahalka (U.S. Naval Academy, Swimming, Jr., 4.00); Rachel Dawson (North Carolina, Field Hockey, Sr., 3.63); Imke Reimers (Nebraska, Tennis, Sr., 3.98); Azahara Munoz (Arizona State, Golf, Jr., 3.90); Kate Burdick (Michigan State, Rowing, Sr., 3.99); Kara Denby (Auburn, Swimming, Sr., 3.93); Vanessa Andrews (Tulsa, Rowing, Sr., 4.0); Diana Martinez (South Carolina-Upstate, Tennis, Sr., 4.00); Gretchen Kittelberger (Maryland, Gymnastics, Gr., 4.00); Christine Magnuson (Tennessee, Swiniming, Sr., 3.70)

June 10, 2008

CAROLINA'S BERRY SELECTED THIRD-TEAM ACADEMIC ALL-AMERICA

CHAPEL HILL, N.C. – University of North Carolina golfer Barden Berry has been selected to the ESPN The Magazine Academic All-America At-Large Third Team as announced Tuesday by the College Sports Information Directors of America (CoSIDA). Berry, a senior from Kinston, N.C., was earlier named to the ESPN The Magazine Academic All-District At-Large First Team.

Berry was a starter in all of Carolina's 11 tournaments this year and carded four top-20 finishes. Berry posted four rounds of even par and nine rounds under-par, two in the 60s. He concluded the year with a 73.56 scoring average.

Berry, a psychology major, earned second-team Academic All-District recognition last year and was a 2007 Cleveland Golf All-America Scholar. He is part of UNC's honors program and a recipient of the Athletic Director's Scholar-Athlete Award and the McCaskill Award, given for excellence in athletics, scholarship and community service. A member of Phi Beta Kappa honorary society, Berry carries a 3.89 grade point average and was the recipient of the Carolina Leadership Academy's highest honor, the Three-Dimensional Leader Award.

Brent and I are going over today to meet with Coach Davis and the exhausted eligibility group. This is a short meeting to introduce the contract. Afterwards, the students will make appointments to meet with you and Brent together. I'll update you on the meeting when we return. Thank you again for supporting this, it's important. RJM

January 10, 2007

Student-Athlete,

Although your athletic eligibility has ended, it is still our desire to assist you on your path toward graduating from the University of North Carolina. You will receive full tuition, fees, books, room and board for the 2007 spring semester.

The academic support staff, headed by Robert Mercer will track your academic progress throughout the semester and provide you with monthly room and board stipends.

Your funding will come in the form of 4 monthly (January, February, March and April) checks of $1044.75 ($575 for room and $458.75 for meals), provided you continue to meet several requirements throughout the semester. **Please note that if at any point you fail to abide by these requirements, your funding for meals and housing will immediately cease.** The requirements are as follows:

1) Check in with Robert Mercer or his designee once a week in order to monitor your academic progress. Mr. Mercer will set a regular pre-approved time for this appointment;
2) Attend every class (arriving punctually and staying to the completion); and complete all of your class assignments when due.
3) Meet all NCAA, ACC, and UNC academic standards stated in your Athletics Scholarship Agreement.

Please be aware that not meeting any one of these stipulations will result in the immediate termination of your room and board scholarship (as allowable per NCAA regulations).

Please sign in the space provided below, signifying that you have read and fully understand that this agreement is based on your academic progress. It is our hope and expectation that you will complete your degree requirements and graduate at the end of the fall semester.

Subject: AFRI 520

Hi Brent. Prof. Sahle has promised to send me something--hopefully soon. For AFRI 520--they have to submit an abstract of their proposed paper--asap since already past due. The ultimate goal is a 25 pp. paper. This is what he sent me as far as topics go:

> Topics could range from the persistence of racism in South Africa, to
> Mozambique as the most dynamic democracy in the region....compare the
> regimes of Mandela and Mbeki; Lesotho as the next problem for South
> Africa; the diamond economy in Botswana, Mugabe and the crisis in
> Zimbabwe, civil society in Zambia, the Banda regime in Malawi, Nyerere
> and African Socialism in Tanzania, Civil war in Angola and the role of
> Blood Diamonds, the AIDS crisis in Swaziland and South Africa, the
> Democratic Republic of Congo as a failed state.....etc, etc

I hope that helps somewhat. DC

All,

Brent and I are meeting on Friday morning at 9 (here in the Smith Center) to discuss contracts for the exhausted and medical s-a's to sign each year so we can "hold their feet to the fire" in terms of academic progress. I've attached my first shot at it... Would you all review and give me your thoughts about things that are missing, etc.? Also, Robert/Corey/Andre, if you guys are around and want to join the party Friday morning, feel free. I know we could benefit from your expertise. :-)

Thanks,
Amy

MEDICAL AND 5TH YEAR NON-COUNTER GRANT-IN-AID AGREEMENT

Although your athletics eligibility has ended, it is still our desire to assist you on your path toward graduating from the University of North Carolina at Chapel Hill. We are pleased to inform you that you will be receiving athletics grant-in-aid to assist you with the costs associated with your continued progress toward this goal.

Along with receiving athletics grant-in-aid, however, comes responsibility. Because we have made a financial commitment to you, we expect and require you to make that same level of commitment toward your academic progress. Therefore, your continued receipt of athletics grant-in-aid is dependent on your successful adherence to the regulations listed below in this contract.

In order to retain your athletics grant-in-aid throughout this academic year, you must abide by the following regulations:

1) You must meet on a pre-determined basis with Mr. Brent Blanton in the Academic Center. You will work with Mr. Blanton to develop an appropriate schedule. You must attend all scheduled meetings and arrive on time;
2) You must attend every class on your schedule (arriving punctually and staying through completion) and complete and submit all assignments by their due dates; and
3) You must continue to meet all NCAA, ACC, and UNC academic standards of eligibility.

Please be aware that failing to meet these requirements above would be considered a fraudulent misrepresentation of information on this agreement and would result in the immediate termination of your athletics grant-in-aid.

If your athletics grant-in-aid consists of off-campus room and/or board (see specific award breakdown below), you will receive monthly stipend checks from the Department of Athletics. These checks will be issued by Mr. Blanton and will be dependent upon your continued compliance with this contract. If at any time you fail to meet these requirements, your room and board stipend will be immediately terminated. In such cases, the Department of Athletics also reserves the right to pro-rate tuition, fees, on-campus room, and book charges and terminate remaining aid in these categories for the remainder of the term and academic year.

Please sign below, indicating that you have read and fully understand that the continuation of your athletics grant-in-aid is dependent on your compliance with this contract and your successful academic progress toward graduation, as outlined in NCAA progress-toward-degree standards. It is our hope that you will complete your degree requirements and leave the University with your degree.

Sincerely,

Richard A. Baddour
Director of Athletics

Subject: Re: Exhausted Eligibility and Medical Non-Counter Agreement

---

Corey,

I won't be available on Friday but do have a few comments about medical non-counters and continuing services from Sports Medicine. We have continued to provide follow-up care and rehab supervision to these athletes. We rely on them being responsible active participants in their care rather than having to chase them down and monitor their compliance with appointments and plans of care. Our basic scenario is to have them followed by the Athletic Trainer supervising there team. I think the human nature of separating from a team is that the MNC athlete feels ill at ease about following up their care in the same venue that their former team is using and feeling like they are a burden to the AT staff. There are both physical and psychologic issues that need to be addressed with this group. Physically it is very easy to transfer care to our PT/AT clinic in Campus Health. Psychologically and counseling wise, we can use the Psychological Services group in Campus Health also or try to access Dr. Hack's schedule, or have a Private Psychologist see them. Dr. Hack has 8 hours of appointments per week and we try to prioritize his schedule to be available to participating athletes. He is available at his private practice so could possibly see them in Campus Health and then pick them up in his private practice. I agree that each athlete when they become a medical non-counter needs to have a psychologic assessment and plan. I will be happy to work on this plan or agreement in the future. Dan

Subject: Non-Counter Checks - January
Attach: TEXT.htm

I'm going to disburse the January non-counter checks out of my office. I want to meet briefly with all of the non-counters so I can make sure I have all the necessary paperwork, etc., as well as reiterate to them what their contract means in terms of the academic and other behavior we expect out of them.

Once we get to February checks, I'll go back to sending them over to you guys.

I'm going to send an email out to all non-counters and tell them that they must call me and set up a time to meet with me to pick up their checks. I will copy you on that email. Before I meet with the FB guys, Cynthia, I will check with you to see if you've had your "talk" with them. If you haven't, I'll send them your way first.

Thought this would be easier than sending 8 million emails back and forth once I get the paperwork I need from each of them. If they don't get/ignore my email, please give them my number when they come looking for their checks...

Thanks,
Amy

Hi Crystal,

I've consulted with our Associate Dean for Undergraduate Curricula, and
I can tell you that AFAM 101 is approved as both HS and US. This
correction to 1GE was requested last March.

Hope that helps,
Amy

Crystal Lineberry wrote:

Thanks Brent ..... and well done .... this is worthy of a raise!

>>> Brent Blanton 8/6/2009 1:15 PM >>>
Hi Anson,
Attached are the grades from both sessions. As we've discussed, everyone is eligible and ready to go for the fall, so they all took care of their business this summer.

Let me know if you have any questions,
B

We have an eligibility meeting that morning in your auditorium at 9am which will probably last for almost 2 hours. Could we do something at 11am?

susan

>>> Mary Willingham 7/28/2006 11:37 AM >>>
Susan and Lance,

Would it be possible for one of you to speak at our SI training on Monday August 21st anytime between 9 and 12? You are of course welcome to attend the entire training, or just send me a time that would work for you to discuss compliance.

Thanks!
Mary W.

Do you have a list of athletes (men and women's soccer) with a 3.0 GPA Cumulative (Fall 2007 & Spring 2008). I have the grade reports for Spring but it doesn't show a cumulative for fall and spring.

Coaches,
Please send a list of athletes who received a cumulative 3.0 GPA (FALL AND SPRING) using the attached form. (Note that this is different than what we normally do, we are combining Fall and Spring this year).

Please email this form back to me by Friday, May 30, 2008 so that Dr. Miller can send the letters out in a timely fashion.

Thanks!

Coaches,
Please send a list of athletes who received a **cumulative** 3.0 GPA (**FALL AND SPRING**) using the attached form. *(Note that this is different than what we normally do, we are combining Fall and Spring this year).*

Please email this form back to me by **Friday, May 30, 2008** so that Dr. Miller can send the letters out in a timely fashion.

Thanks!

FYI, softball's Evans and baseball's Warren honored (see below)
More good news to come. It's that awards time of year ...

Evans Earns Academic All-District Honor
Senior shortstop recognized for the third time.

May 10, 2007

CHAPEL HILL, N.C. - North Carolina's Anna Evans, a senior shortstop, has been named to the ESPN the Magazine Academic All-District second team for softball, announced Thursday. She earned second-team honors for the third year in a row.

Evans, from Fairmont, N.C., will graduate from UNC this month with a double major in biology and exercise and sport science and a minor in chemistry. She carries a 3.5 grade point average and attended North Carolina on a Morehead-Cain Scholarship, the school's most prestigious merit award.

She is a recipient of an Atlantic Coast Conference Weaver-James-Corrigan Postgraduate Scholarship as well as the Tatum Award as one of UNC's top all-around student-athletes. She also received the ACC Top Six for Service Award, recognizing her involvement in community outreach activities. Named to the ACC Academic Honor Roll, the Dean's List and the All-ACC Softball Academic Team, she plans to attend dental school at UNC this fall.

Evans is a fourth-year starter for the Tar Heels, 43-17 this season heading into the ACC Championship, which begins Thursday in Tallahassee, Fla. A .265 career hitter, she holds the school records for career starts and career games played and needs one walk to tie the school record in that category. She was named team MVP and All-ACC as a sophomore.

To be eligible for the honor, student-athletes must have at least a 3.2 cumulative GPA and be starters or key reserves on their teams. First-team recipients advance as candidates for Academic All-America honors.

ESPN the Magazine Academic All-District
District 3 Winners
University Division
FIRST TEAM
Catcher - McKenna Hughes (South Carolina); Infield - Whitney Haller (Georgia Tech); Infield - Christina Trimble (Bethune-Cookman); Infield - Paige Goss (Elon); Infield - Joanna Ward (Gardner-Webb); Outfield - Lisa Kingsmore (Winthrop); Outfield - Kacie Feaster (Central Florida); Outfield - Kellie Middleton (Georgia);

Pitcher - Angela Tincher (Virginia Tech); Pitcher - Kasi Carroll (Georgia); Designated Player - Laura Hill (Withrop)
SECOND TEAM
Catcher - Carley Hughes (UNC Wilmington); Infield - Anna Evans (North Carolina); Infield - Dawn Jeff (Liberty); Infield - Kimberly Cillis (Coastal Carolina); Infield - Aileen Morales (Georgia Tech); Outfield - Ashton Payne (South Carolina); Outfield - Tessa Thomas (Winthrop); Outfield - Crystal Condra (Mercer); Pitcher - Stacey Stephens (Florida); Melissa May (Florida State); Designated Player - Heather Gelbard (NC State)

Warren Claims Academic All-District Honors
Sophomore right-hander has won nine straight starts.

May 10, 2007

CHAPEL HILL, N.C. - Thanks to his outstanding credentials on the field and in the classroom, North Carolina sophomore right-hander Adam Warren was named to the ESPN The Magazine Academic All-District III University Division Baseball Second Team Thursday, the College Sports Information Directors of America announced.

Warren, who owns a 3.41 grade point average, is in the midst of a breakout season for the Tar Heels. He is 9-0 with a 1.58 ERA over 51 1/3 innings and has not allowed a run over his last 14 2/3 innings, which includes shutout performances against Elon and East Carolina. The New Bern native has pitched in three combined shutouts and has 39 strikeouts to just 19 walks.

Warren is the first Tar Heel to earn academic all-district honors since Marshall Hubbard also claimed second-team honors in 2004. He is one of five Atlantic Coast Conference players to earn a spot on the two 11-members teams for District III, which were selected by CoSIDA members in Virginia, North Carolina, South Carolina, Georgia and Florida.

Sean,
We would be very interested in adding this interface in order to generate the export files. What is the next step in this process?
Thank you for this suggestion.

Wayne Walden

>>> "Sean M. Crisman" <crisman@admissionpros.com> 2/8/2005 6:16 PM >>>
Wayne,

If you are satisfied with doing mailings in this method, I can add an interface to the system that we install so that you may generate the export files any time you need. We currently have one there, but it was designed around web interface.

If you can provide me with the user's name and the name of the query they were working with, it would help a lot.

Subject: RE: progress report form

Sean,
Thank you for getting the data for the progress reports to us. These reports are very important to what we do and it would help me to know how much advance time you all will need for the second round of reports because our timing is crucial for these.
Also I had left a message last week about a query that one of the staff members was having some difficulty with. She was trying to find out how many senior female athletes had a cumulative GPA above a 2.90 after the Fall 04 semester. She set deleted = false and the status code to "is null." She was getting multiple listings for some students (one student might be listed eight times). Do you know what might have caused that?
We appreciate your help with this.

Sincerely,
Wayne Walden

Dear Colleagues--

Summer 2007 is fast approaching, and preparations for CTOPS are underway. All full-time advisors--and some of the deans, as needed--will be teaching the Day 1 advising workshop and working in the registration lab on Day 2. Several staff members will be involved in the Day 2 registration lab.

We, the CTOPS Committee, want to be sure that everyone is fully informed about this summer's procedures. Please mark your calendars to attend one of the upcoming Day 1 and Day 2 CTOPS training sessions:

Day 2 (registration lab):

Wednesday, May 2, 3-4:30, Greenlaw 222
Thursday, May 10, 9-10:30, Greenlaw 222

Day 1 (advising workshop):

Wednesday, May 16, 3-4:30, Greenlaw 222
Thursday, May 24, 9-10:30, Greenlaw 222

You are highly encouraged to attend these trainings, although you do not need to let me know which one you plan to attend. Newbies: If you feel the need for more training after the initial trainings, the CTOPS Committee is happy to accommodate you (and anyone else who desires more).

Please let me know if you have questions.

Best--
Barbara

Subject: Reg Advising for Student-Athletes

Dear Colleagues--

Although we typically do not begin to see students for spring registration advising until the end of September, the Athletic Advisors in the Academic Support Center for Student-Athletes will be encouraging their students to schedule registration advising appointments with their academic advisors in the coming weeks.

Saturday, September 27, marks the day when the Registrar's Office will 'activate' students for the spring 2009 semester. Until then, no advisor approval flags will appear in students' records. If you are meeting with a student-athlete (or any student) prior to that date, please keep a log with their names and PIDs so that you can lift their advisor approval flags after the September 27 date and before the students register.

First-year students, sophomores with gpa's below 2.0, UNDC juniors and seniors, and juniors and seniors in the following majors will have advisor approval flags:

Applied Science
Asian Studies
Chemistry
Classics
Environmental Studies & Science
German
Mathematics
Mathematical Decision Science
Music

Juniors and Seniors in the above majors must go to their respective academic departments to receive academic advising and have their advisor approval flags lifted.

Student-athletes will be instructed to inform their advisor if they wish to receive registration advising. If they do not, we run the risk of student-athletes being unable to register because of a flag that hasn't been lifted. Please do your best to assist in this process.

Note that students on academic probation will have a 'stop' AND an advisor approval flag. The 'stop' can be lifted at present only by Cynthia Demetriou. Cynthia will be instructing us in the coming weeks on the appropriate procedures for working with students who are on academic probation.

If you have any questions, feel free to send them my way.

Best--
Barbara

Subject: Underloads for Graduating Seniors

Dear Robert & Brent

I'm not sure if you are aware of the recent decision involving underloads for graduating seniors. In the past, the Registrar's Office has been able to code these students as full-time in the system; but we have recently learned that this can no longer happen because it "violates the law" in some way.

Effective this spring, students who are in their last semester prior to graduation who are enrolled in less than 12 hours will be coded by the Registrar as part-time. Internallly, they will have all of the privileges that full-time students have (can live in a dorm, use Student Health and Student Rec Center, get Duke tickets, etc.), but for external reporting purposes, their eligibility for insurance coverage and scholarship and/or a student loans may be compromised.

Our office will need to know from you what procedure to follow in January for student-athletes who may be affected by this new policy.

Let me know if you have questions.

Best,
Barbara

Graduation Application with Request for Underload

KEY INFORMATION REGARDING YOUR UNDERLOAD REQUEST

DO NOT APPLY FOR GRADUATION UNLESS YOU WILL HAVE COMPLETED ALL GRADUATION REQUIREMENTS BEFORE THE DEGREE AWARD DATE.

As a full-time undergraduate student at the University of North Carolina at Chapel Hill, you are required to carry at least twelve (12) academic credit hours every semester. However, in the College of Arts and Sciences during your final semester you are permitted to carry a course load of fewer than twelve (12) credit hours if those credits will satisfy **ALL** remaining graduation requirements. For **University purposes** if you are approved for an academic underload, you have the same rights, privileges, and responsibilities as undergraduates carrying twelve (12) or more credit hours. You pay full-time student fees and are permitted to reside in on-campus housing, utilize campus support services, and have access to athletic events.

Please Note: If you enroll in fewer than twelve (12) credit hours, the Office of the University Registrar cannot categorize you as a full-time student for official reporting purposes. Being a part-time student may compromise your eligibility for insurance coverage and you may invalidate a scholarship and/or a student loan. <u>You must check with your insurance company and/or scholarship/loan provider to verify whether enrolling in fewer than twelve (12) hours will invalidate your coverage/scholarship/loan.</u>

To request permission to carry a course load of fewer than twelve (12) hours, please submit this form **no later than Monday, January 26, 2009**. Authorization may take as much as one month and must be completed before you drop any course(s) reducing your course load below twelve (12) academic hours. THE GRADUATION APPLICATION WITH REQUEST FOR AN UNDERLOAD IS NOT A DROP FORM! MERELY COMPLETING THIS APPLICATION WILL NOT DROP YOU FROM ANY COURSE. This request only <u>authorizes</u> you to drop course(s) and to carry an underload this semester. You will be notified via e-mail as soon as your application has been processed. YOU WILL NEED THEN TO MEET WITH AN ADVISOR TO HAVE ANY AUTHORIZED DROP(S) PROCESSED.

Please Note: There will be no refund of tuition for dropped credit hours if your request is submitted after the Monday, January 26, 2009. <u>No drops are allowed after the eight week drop deadline</u>, regardless of underload authorization.

Hi All,

I want to make sure everyone (including me) is clear about how BE credits and Carolina Courses Online (CCO) apply to the degree, and especially to the requirement that students earn 18 hours of C or better in the major.

Carolina Courses Online

Students entering as new first-year or transfer students in Fall 2008 and thereafter are governed by new rules concerning Carolina Courses Online. These rules, noted on pages 386-87 of the 2009-10 Undergraduate Bulletin, limit the use of CCO courses as follows:

- Nor more than six online courses or 18 credit hours (all of which must be designated UNC-Chapel Hill) can be counted toward a degree in the College of Arts and Sciences
- First-year students may not take online courses except in exceptional circumstances, and must secure the permission of their academic dean in advance of enrolling in such courses
- No more than two online courses in any one department or curriculum may count toward a major, minor, or degree in the College of Arts and Sciences
- Self-paced classes cannot be counted toward a degree in the College of Arts and Sciences in other than exceptional circumstances, and with advance permission form their academic dean.

These limitations do not apply to courses taken prior to matriculation. Grades in the courses do count toward hours of C in the major.

By Examination (BE) credits

On April 1, 2009, the Administrative Boards of the General College and the College of Arts and Sciences approved new rules governing the use of BE credit from AB, IB and SAT II Subject Tests as applied to the major or minor.

The new rules, which apply to new first-year and transfer student beginning Fall 2009 and later, are as follows:

- No more than two courses (6 to 8 credit hours) of BE credit may be used as part of the major core (defined as the 8 to 10 courses beyond any introductory prerequisite course, if there is one).
- The grade of BE from an AP, IB, or SATII Subject test may not count toward the requirement that students earn at least 18 hours of C or better grades in the major core.
- No more than one BE credit course (3 to 4 credit hours) may be used as part of a minor.

Note that BE credit is not restricted in the fulfillment of general education requirements.

Please email if you have any questions.

Barb
August 24, 2009

LU1: The Math Lab consists of three tables in the current facility where students come to ask questions. It is staffed by one of our longest-tenured tutors. He works best with "high-end" students in the upper-level courses who do not need as much direction. Like a chess-master, he simply floats around the area assisting with questions as they come up. When he is assisting a student, all others usually put into practice information the tutor gave direction on previously.

LU2: The term "Olympic sports" is used to describe all non-revenue sports. Revenue-producing sports at UNC are Men's Basketball and Football only; all others fall into the Olympic Sport category.

LU3: "At-Risk" is used when describing incoming students who are committee cases or those students who scored sub-1000 scores on the SAT. For returning students, it is for those on Academic Probation (AP) or those who are carrying sub2.3 GPAs.

LU4: Tutor attendance monitored by the tutor coordinator and entered into the office's database. Each counselor then checks the attendance each day and reports to coaches via either a Daily or Weekly Reports any concerns. It is important to note that all Associate Directors are also counselors, so this task falls to them just as it does the other counselors.

Counselors do not assign mentors to students but they do request mentors for the students they feel would benefit from such a service. All students have access to mentoring, but because of budgeting and staffing, only those with the greatest needs are typically matched with mentors. The actual matching and scheduling is completed by Beth Bridger, who oversees the Mentor Program.

LU5: Weekly Reports are for discussion of all students and their corresponding situations. The at-risk population is probably spoken of most in these reports, but it is not a report designed solely for those purposes. Any Progress Report information is detailed in these reports also, and they are requested for more than just the at-risk population. These reports are designed to keep the coach informed of any and all situations brought to the attention of the counselor.

LU6: Academic counselors meet with the coaches of their respective sports. Again, it is important to note that all Associate Directors are also counselors, so this responsibility falls to them as well as the other counselors.

LU7: Progress Reports are sent out for all students on which the academic counselor and/or coach wants information. For some sports, this may only be the at-risk population; for others, it may be the entire team.

LU8: All prospective tutors must complete the internal application process and then interview with Beth Bridger, Jenn Townsend or Brent Blanton (currently serving as tutor coordinator), depending upon which student-athlete population the tutor will serve – football, men's basketball or the Olympic sports. Whoever conducts the interview also controls the hire.

LU9: Tutor preparation is two-fold. From a logistical and compliance standpoint, the tutor is prepared via the tutor orientation meeting at the beginning of each term. Preparation for the actual tutorial setting comes from both the orientation and their own respective backgrounds – they are the subject's "expert" and are prepared to tutor from that standpoint.

LU10: Tutoring has many shapes. For most subjects, it is conducted in a small group setting. For the sciences, math and foreign language, however, we also see the value of having one-on-one sessions so all focus is on the particular student' needs. For those students who simply have issues remaining focused and learning in a small group setting, one-on-one is also offered.

LU11: Appendix A is an example of our latest survey tool for the Olympic sport program.

LU12: As smaller internal staffs, we meet periodically (weekly is optimal) to go over the current status of programming. Any issues brought to our attention during the week, if not already confronted, are taken up during these meetings.

LU13: People interested in the Mentor Program contact the Program Coordinator directly. A resume is requested along with permission to view a transcript (if a student) before the interview process is started. After the interview, if the mentor is chosen, hiring paperwork is completed.

LU14: Mentoring is available to all student-athletes but most (typically all) who take advantage of the program are considered 'at-risk'.

LU15: Mentors are selected by the Program Coordinator after careful review of their transcript, resume, and in-person interview.

LU16: Student-athletes are assigned to a mentor by the Program Coordinator. The Program Coordinator refers to the student's Academic Counselor for the mentee's personality, learning style, schedule, and academic concerns, strengths and weaknesses. From there, the Program Coordinator matches the mentee and mentor. If for some reason the match does not seem to be a "right" one after feedback from the mentee and mentor, a change can be made. The student-athlete will stay with the same mentor for the duration of the semester (given any unforeseeable issues). If the mentor is employed in the next semester and it works with the mentee's schedule, they could be scheduled again. This is taken into consideration but not guaranteed. Mentor sessions vary in duration and frequency depending on the mentee. On average, a student meets with a mentor two nights a week for a two hour session.

LU17: Most current SI Leaders were targeted by relationships of the previous Learning Specialist. SI Leaders are selected by the Program Coordinator after careful review of their transcript (if student), resume, and in-person interview. Our population of SI Leaders (with exception to the current student) are typically individuals with Bachelor and Master degrees who are part-time employees with availability during the day to attend class and hold review sessions. They were initially interested in tutoring in the program, but with availability, found SI was a good fit for their skill set and schedule.

LU18: SI Sessions are held on a weekly basis. The SI Leader will hold smaller sessions for 'at-risk' students usually 2-3 times a week, 2-3 students a session. They will hold large test review sessions, 10-20 students, before each test. All student-athletes and non-student-athletes are invited to attend any of these sessions.

Subject: CTOPS Reminder

The first session of CTOPS finished yesterday and session #2 begins tomorrow. I want to take a moment and review a few policies and procedures for CTOPS.

1. After incoming students complete their admission paperwork and return the INTENT TO ENROLL card, they are automatically eligible to register for CTOPS on line (give it a few days for paperwork to be processed in Admissions). If the student experiences problems registering for CTOPS, please have them contact our office/your academic counselor and we will walk them thru the process. Students should not arrive at CTOPS without proper registration. Again, if there is a question, call us.

2. If you are aware which CTOPS date your student-athletes are registered for please let your counselor know so they can be prepared.

3. CTOPS and all of it's programming is mandatory. Students should not miss any sessions once their CTOPS begins.

4. The Academic Support Staff and the Compliance Staff are facilitating information sessions for both student-athletes and parents on the second day of CTOPS. These sessions are listed in the CTOPS bulletin that all students receive and Orientation Leaders are helping student-athletes and parents be aware of these sessions. The purpose of these sessions is to introduce our staff, services, and to answer questions.

I realize some of you are still putting together your recruiting classes and I hope this reminder is helpful. Please contact me or Brent Blanton if you have specific questions about your team/student-athletes and CTOPS.

Thank you.

RJM

Subject: Special Interest Sessions (CTOPS)
Attach: TEXT.htm; Session Dates 2006.doc

Hi Robert and Brent,

I wanted to send this information to you before our meeting next Monday. The dates for all sessions are attached, and the specific times for the CTOPS and TSOP special interest sessions are listed below. Please note that we are having four interest sessions during CTOPS instead of five, and they begin one hour later than in previous years (based on feedback from students and presenters).

CTOPS Special Interest Sessions (Day 2)

9:30 - 9:50am

10 - 10:20am

10:30 - 10:50am

11 - 11:20am

Also, your descriptions (as listed in last year's schedules) are below. Please feel free to review/edit as needed.

(Special Interest Session) Carolina, the NCAA, and the Varsity Student-Athlete - Carolina has a rich tradition in intercollegiate athletics. If you are on one of Carolina's varsity athletics teams, come find out valuable academic and compliance information that will help you get off to a successful start in the fall semester.

(Parent Session, Day 2, 3:00 - 3:30pm) Parents of NCAA Student-Athletes - If your student will be participating on one of Carolina's varsity athletics teams, come find out valuable academic and compliance information that will help your student get off to a successful start to the fall semester.

Please confirm your interest in participating and send any description edits to me by Friday, Feb. 17. Let me know if you have any questions or need additional information. I look forward to working with you again this summer!

Thanks,

Michele

CTOPS Athlete Registration Form

1. General Information

a. Name (first, middle, last):
b. PID number:
c. Gender:

d. Address:
City: State: Zip:

e. Phone:
f. Current email:

g. Intended program of study (Choose one from the following, please delete the others):

Math and Sciences *(including the following):* Biology, Biomedical Engineering, Chemistry, Computer Engineering, Computer Science, Environmental Science, Geology, Materials Science, Mathematics, Mathematical Decision Sciences, Physics

Social and Behavioral Sciences *(including the following):* Anthropology, Communication Studies, Economics, Exercise & Sport Science, Geography, Management & Society, Political Science, Psychology, Public Policy, Sociology, Women's Studies

Fine Arts and Humanities *(including the following):* Art History, Classics (including Greek & Latin), English, Dramatic Art, History, Linguistics, Music, Philosophy, Religious Studies, Studio Art

Undergraduate Health Professions *(including the following):* Clinical Lab Sciences, Dental Hygiene, Nursing, Pharmacy, Public Health, Radiologic Science

Other Pre-Professional Schools *(including the following):* Education, Information Science, Journalism

Foreign Languages & Global Studies *(including the following):* African Studies, African-American Studies, American Studies, Asian Studies (Interdisciplinary Major),Asian Studies-Chinese Concentration, Asian Studies-Japanese Concentration, Contemporary European Studies ,Germanic Languages ,International Studies, Latin American Studies, Peace, War & Defense ,Romance Languages (French, Italian, Portuguese, Spanish),Russian & East European Area Studies ,Slavic Languages & Literatures

Business (Pre-Professional Schools)

h. What foreign language placement exam do you plan to take? (Note: you must take the placement exam for the language you studied in high school, whether you plan to continue studying that language or not.)

2. Guest Information (if you have no guests, please delete this section)

General information about Guests at CTOPS:
Guests over the age of 17: $75.00 per person (Note: this does not include housing costs, guest housing is available for an additional $61.00 for a room with 2 twin beds.)
Guests between the ages of 6 and 17: $33.00 per person
Guests under 5: no charge

a. Please enter your Guest's full name and email address (if available) in the space below. If the guest is between 6 and 17 years of age or under 5, please note that information as well.

b. Please list any family / guest needs that would require special accommodations (e.g. interpreters, housing, etc.) during orientation (if none, please write "none"):

c. Will your guest require housing on campus during orientation?

There is a charge of $61.00 per room. Please note:
-all rooms are air conditioned.
-family members and guests must be registered for CTOPS if they are staying in campus housing
-at least one person in the room must be a minimum of 18 years old
-each room includes a small soap, 2 twin beds, sheets, towels, pillows and pillow cases, but no blanket

3. Student Housing

2006 CTOPS Student Fees:
Student with on-campus housing: $146
Student without housing (August 17-18 dates ONLY): $117.50

All students will be staying in campus housing during CTOPS. Each student will be assigned another CTOPS student as a roommate at check-in.

Please list any needs you have that would require special accommodations (e.g. interpreters, housing, etc.) during orientation.

4. Early and Late Departure

We make rooms available for early arrival the day before and late departure the day after in order to assist with travel schedules. If you do not require early or late departure housing, please delete this section.

a. *Early arrival - Check-in the day before orientation between 2:00 PM and 12:00 midnight.*
Number of Early Arrival Rooms desired:

Choose from the following options: (please delete the option you do not want).

-Share an early-arrival room with another student. ($30.50 charge)
In selecting this option you will be assigned a roommate. If you wish to room with a specific student, please indicate so upon your arrival at check-in.
-I would like an early-arrival room for myself ($61.00 charge)

b. *Late departure - Check-out the day after orientation by 12:00 PM.*
Number of late departure rooms desired ($61.00 per room):

5. Payment

We can accept payment by Visa, MasterCard, Diners Club, check, or money order. Please note that checks and money orders **must be received within 10 days** or your registration will automatically be cancelled. If you are paying by check or money order, please send a copy of this page along with your payment.

If you have the need to make changes to your reservation after it has been confirmed, i.e. adding to the number of persons from your family attending the program, or requesting your session date be changed because of some extreme extenuating circumstance, you will be charged a **$15.00** change fee. You will need to make a formal request for the change in writing. This can be done by emailing orientation@unc.edu or by regular mail to the Office of New Student and Carolina Parent Programs, CB# 5490, 205 Wilson Street, UNC Chapel Hill, Chapel Hill, NC 27599-5490. Your change request must be received no less than 10 days before your scheduled CTOPS or TSOP attendance date.

If you fail to attend the summer orientation session you have registered for, without our office having received written notice within 10 days prior to that date, you will be recorded as a NO SHOW. As a no show, you have lost your paid fee. If you still intend to enroll at Carolina, you are required to attend CTOPS. To attend CTOPS at a later time, you must re-register and pay the full fee again.

a. Please choose your payment option:
   -Check - You must subtotal your total orientation cost and submit a check within ten days of your registration.
   -Credit card – A staff member from the Office of New Student and Carolina Parent Programs will contact you for your credit card information.

Please return your completed form to Brent Blanton at blanton@uncaa.unc.edu.

Attach: TEXT.htm; 4.28.09.doc

All,

See attached for our initial list of student-athletes for whom we will cover CTOPS charges this summer. I will send updates as they become available.

Thanks,
Amy

Subject: Observations

Brent and Robert

I want to share with you a comment from one of our advisors, because I think it might be somewhat insightful for y'all. The following is just an example of the frustrations we often encounter with student-athletes:

"The problem I had yesterday with getting GRtR forms completed was athletes who brought from their meetings with their athletic coaches a few courses written on a piece of notebook paper, despite my importuning them on day one to PLEASE fill out their GRtR forms, even if their coaches did not. When asked to transfer courses from the notebook paper to the GRtR form, they had no idea where to put them. In a couple of sessions I just ran out of time to do what their coaches should have done the afternoon before. I will make an effort to do a better job of having the athletes prepared, but this problem, in large part, is in the athletic department. I'm not trying to pass the buck, and I WILL do a better job of making sure that forms are completed, but I'm VERY frustrated with the poor job some of the athletic coaches are doing, or whoever it is in the athletic department who is working with the athletes to prepare them to register."

(By the way, GRtR is the Get Ready to Register form.)

Another problem we have encountered is when they have very specific section numbers identified (as in Engl 101 or 102), and those sections have not been released by the dept (most notably ENGL) for their particular CTOPS. This causes great angst on the part of the student, especially when they don't understand.

I know that this is always a work in progress and that the coaches may be involved in this as well, and I understand that much of this is out of your control; but if these student-athletes could have the Get Ready to REgister form completely filled out with many options and not have specific sections of courses identified, this would work so much better.

Let me know if you have questions or concerns, and we'll definitely work together!

Best,
Barbara

Subject: More CTOPs reminders
Attach: TEXT.htm

Hi, Everyone:

Here are a few more reminders that Shandol from CTOPS sent us:

On a related note, we've received a few more requests from athletes about moving up their registration times as they need to leave early for some other activities/events. Unfortunately, we are unable to request/change registration times as all registration and advising times are pre-set and require coordination from several personnel across campus to ensure that students can indeed register during the program.
If a student should need to leave CTOPS early, the student should contact me at the Orientation Help Desk (located next to the Union Information Desk) and I will work to get them in touch with Barbara Lucido in Academic Advising. Barbara can help students register over the phone on the next business day following CTOPS. However, please note that the course availability for registering on an "off-CTOPS" day is extremely limited (more limited compared to the assigned registration time) so the student has a much better chance of getting the classes they would like to take during their assigned registration time. We are more than happy to assist athletes in this way as we utilize this procedure for any student who runs into a situation in which they need to leave the program early without registering at CTOPS.
Last, we've had a few athletes indicate their coach requested that they come meet with them during CTOPS. The best times for students to meet with coaches and/or advisors during CTOPS is during the following times:
Lunch on Day 1: 12:15pm to 1:00pm
Dinner on Day1: 6:15pm to 7:15pm
Breakfast on Day 2: 7:15am to 7:50pm
Lunch on Day 2 (depends on their group assignment)
It tends to work best if the student lets their OL know that they will be meeting with staff during the meal time so that the OL can let them know where the next session is after meal.

Let me know if you have any questions.

Subject: new CTOPS list
Attach: TEXT.htm; CTOPSlist6-16.xls

Here is the newest CTOPS list. Please let me know if there is anything that looks incorrect. Please also let me know if there are any students who need to be added or taken off the list.

It looks like we will not be able to have students come over here during the afternoon time slot of the first day. You would be able to go over to CTOPS to meet with your student during that 4:45-5:15 time slot, but they should not be meeting you over here. You will have to set up meetings during the meal times outlined in the previous e-mail. Also, please make sure that your students tell their Orientation Leader where they are going.

Thanks!

Debbie:

Just to follow up on our phone conversation- please don't hesitate to
email or call
if you have any questions in regard to the visit.

If your folks need transportation from the airport <or> from the
Marriott to our campus
location please let me know.

Here's the link to your hotel, if you don't already have it-
http://marriott.com/property/propertypage/RDUCH

Take care,

Subject: Arizona-UNC Visit (July 24)

Deb-

Our program director, Robert Mercer, will pick Patti & Lynne up at the airport and bring them to the Marriott on Sunday night. Brent Blanton, our Asst. Director, will provide them with a ride to our office on Monday morning. Brent suggested meeting in the hotel lobby at 8:30am.

Patti & Lynn will meet with Robert, Cynthia Reynolds (Assoc. Director), Fred Clark (Assoc. Dean of Academic Services, College of Arts & Sciences), and John Blanchard (Sr. Associate Athletics Director). I'll email an agenda to you as soon as meeting times are firm. Since Patti & Lynn will be around on Tuesday, we'll line up something for the morning... possibly Susan Maloy, Director of Athletics Certification.

Once Patti and Lynn are here, we'll work out plans to get them back to the airport on Tuesday late morning.
FYI- travel time is approximately 20 +/- minutes from hotel/UNC to airport (depending on traffic).

Let me know if you have any questions!

Doug

Hey Doug!
Patti & Lynne will arrive on Sunday night, July 23 at around 7:32pm on Continental #2595H from Houston. They have reservations at the Courtyard Chapel Hill. The reservations are in each of their names separately.
On Monday - they will be all yours. If you will let me know what you have planned for them then I can let them know what to expect. What time should they come to campus? What time do you all start getting in? Is there a shuttle or will someone be able to pick them up?
They will be flying out at 12:40pm on Tuesday.
Anything else I can't think of right now that I may have missed? Let me know.
Thanks for everything. (They did end up with a discount for their visit - it was just a matter of changing the accommodations a piece).

Debbie:

Please let me know when your travel plans are set - we are doing some planning on our end, and would like to know when to expect the visitors (first thing, Monday am?) - whether or not they need transportation help... etc.
Thanks
Doug

>>> "Debbie Evano" <evanod@email.arizona.edu> 7/11/2006 2:31 PM >>>
Thank you - you are a gentleman and a scholar. I am sure we will be in
touch as soon as we have the plans ironed out.
Have a great afternoon and I look forward to speaking with you again in the
very near future.

Debbie:

Just to follow up on our phone conversation- please don't hesitate to email or call
if you have any questions in regard to the visit.

If your folks need transportation from the airport <or> from the Marriott to our campus
location please let me know.

Here's the link to your hotel, if you don't already have it-

Subject: Re: service permit

Robert-

Brent handed me the service pass in the hall the other day- I recall this after Brent and I discussed. From what I can remember, I went into the mail room and sorted some mail... it is possible I tossed it out with some junk mail.. I don't know. I thought I put it in your box, but obviously not the case.

I've looked through the mail room and my office. I check with John to make sure that they somehow don't have both passes. It appears to be lost.

Below is a copy of an email that I sent to Stacey Harris- she has to prepare paperwork to get it replaced. There will be a small replacement fee ($25).

Sorry... I'm really in the dark as to what happened.

D

****

Stacey-

We do not know 'exactly' what happened to it. No need to go into details- but there are a number of possibilities... most likely is that it was set upon some paperwork that was later disposed of. The permit was handed it to me in the hallway... I stopped by our mail room and sorted some mail- it is possible i set it down with some junk mail and later tossed the whole batch. Have turned the whole building upside-down looking for it... it's gone.

so...

1) You need an "affidavit"? Assuming this means a signed letter that it was lost? Can I fax this to you? I'll sign a letter stating that I accidently threw it in the trash.
2) Acct# 319036
3) No, do not know the service permit number.

Thanks
D

>>> Stacey Harris 11/7/2006 11:11 AM >>>
do you remember the no of the permit?

>>> Doug Roberts 11/7/2006 8:57 AM >>>
stacey-

it looks like our service permit is missing- i think it was accidentally tossed out in the trash. any way- we really need to replace it as it is used often by our staff.

do i need to go up to transportation and parking? let me know what i need to do.

thanks
doug

Classes End	Wednesday, Dec. 5th			
"AB" changes to "F"	Wednesday, Dec. 5th	**Office Main Line**		966-4102
Reading Day(s)	Thur. 12/6 & Wed. 12/12	**Office Fax**		962-8247
Exams Begin	Friday, Dec. 7th			
Exams End	Friday, Dec. 14th			
Commencement	Sunday, Dec. 16th			

DROP/ADD PROCEDURES

Student-athletes are now required to get their Academic Support advisor's signature BEFORE any changes in enrollment will be allowed once the on-line drop/add period ends. Should you go to the Registrar's Office without that signature, you will be turned away. REMEMBER, ONCE YOU RECEIVE THE DEAN'S APPROVAL, YOU WILL UNTIL THE END OF THAT DAY TO MAKE YOUR SCHEDULE CHANGE. DO NOT FORGET TO GET YOUR ACADEMIC SUPPORT ADVISOR'S SIGNATURE/APPROVAL BEFORE SEEING THE REGISTRAR!

STRUCTURED STUDY PROGRAMS

First-year students participating in our structured study program will be required to complete 6 hours of structured study per week. **Upperclassmen who are below a 2.1 cumulative GPA will also have regular study hours** (this will not include computer lab usage). Structured Study starts on Sunday, August 26th.

EVENING TUTORING

The Academic Center opens at 7pm and small group tutoring will run from 7:00 -10:00pm, Sunday-Thursday evenings. In order to guarantee sufficient time with the tutor please arrive promptly for each appointment. Evening tutoring will begin on Sunday, August 26th. The tutor schedule is posted on the bulletin boards in the Academic Center. This schedule is constantly changing so be sure to check it on a regular basis. If you need an individual tutor, see your counselor. In order for the tutoring session to be useful and productive please arrive with proper books, notes and materials.

COMPUTER LAB

All computers have Internet and email access. During peak hours you will be limited to one hour at the computer. If you have any questions about the computers or software please see the computer lab monitor. He/she will be glad to assist you. Computer lab monitors will be on duty Sunday through Thursday from 7:00pm to 10pm.

CLASS ATTENDANCE

Class attendance is mandatory. **Please note that English 100, 101, and 102 have a very strict attendance policy.** Make sure that you inform your professor of your competition schedule in advance! Your coach will furnish you with travel letters to give to your professors before you miss a class due to athletic competition. It is your responsibility to give the letters to your professors.

TRAVEL LETTERS

All students in their competition season need to contact their professors **during the first week of school** and make them aware of their travel schedule by handing them a copy of the travel letter with the conflict dates highlighted. Students need to make arrangements for these conflicts **as soon as possible.** Remind professors each week of pending competitions! After the second week of classes, letters will no longer be available at the Academic Center - they will ONLY be available at your coach's office.

SUPPLEMENTAL INSTRUCTION PROGRAM (SI)

SI is a series of weekly organized group study sessions facilitated by trained SI leaders. Please see your academic counselor for more information about participation in Supplemental Instruction.

TEXTBOOK PURCHASE PURCHASING POLICY ***(for student-athletes designated to receive books as part of their scholarship)***

- Obtain a textbook purchasing form from the Academic Support Center, complete the form, and have your form signed between the hours of 10:00am & 2:00pm in the Academic Support Center.
- Book forms **will not** be signed without a copy of your schedule.
- Only textbooks and course materials that are listed in the official University Book List as "required" may be purchased.
- You are allotted a maximum of $600 per semester to buy books. Exceptions are approved on a case by case basis.
- **You must purchase all of your required textbooks by October 15th.** Exceptions are approved on a case by case basis.
- If you drop a course, all textbooks and materials must be returned immediately to your academic counselor.
- If you are unsure of your scholarship status, check with your coach.
- For all "recommended" materials on your syllabi, please see your academic counselor.

IMPORTANT INFORMATION & EVENTS

GRADUATING SENIORS

- 1 PHYA needed (check with your Academic Support advisor to make sure that credit for playing your varsity sport has been added)
- See Academic Advisor in Arts & Sciences or Professional School and complete an official degree audit during your senior year
- Resume on file with University Career Services
- Career Guide
- At least 120 hours/2.0 cum
- Application for 10th semester (if necessary)
- Last day to file for Fall 2007 graduation ~ Friday, October 12th
- UNDERLOAD APPROVALS MUST BE COMPLETED BY THE END OF THE FIRST WEEK OF CLASSES

JUNIORS

- PHYA
- See Academic Advisor in Arts & Sciences or Business College

SOPHOMORES

- You must declare a major before your junior year, specifically during the second semester of your sophomore year! Go to Arts & Sciences and fill out the necessary paperwork.

MINIMUM ACADEMIC ELIGIBILITY REQUIREMENTS

Each student is required to attend an individual eligibility meeting with an academic counselor each term. Your counselor will contact you at the beginning of each semester about scheduling your eligibility meeting.

You must be enrolled FULL TIME (12 hrs) in order to practice and compete. Please contact your Academic Support Counselor PRIOR to dropping or adding a course.

***UNC* REQUIREMENTS FOR FRESHMAN & CONTINUING STUDENT-ATHLETES**

To enter…	Continuing Students must have…	Freshmen must have…
3rd semester	1.5 cum gpa and 24 hours	2.0 cum gpa and 24 hours
5th semester	1.75 cum gpa and 51 hours	2.0 cum gpa and 51 hours
7th semester	1.9 cum gpa and 78 hours	2.0 cum gpa and 78 hours
9th semester	2.0 cum gpa and 105 hours	2.0 cum gpa and 105 hours and prior approval by a dean is required
10th semester	Prior approval by a dean is required	Prior approval by a dean is required

You must pass 9 hours with a 1.0 *each* semester in order to return to UNC. The student-athlete is responsible for the appeals process. The Academics Center exists to counsel and assist.

***NCAA* REQUIREMENTS FOR CONTINUING ELIGIBILITY** (GPA & HOURS FOR AID, PRACTICE, AND COMPETITION)

To be eligible for…	Must have…
3rd Semester	1.8 gpa and 24 total hours
4th Semester	1.8 gpa
5th Semester	1.9 gpa and 48 total - 48 DA hours + declare major
6th Semester	1.9 gpa
7th Semester	2.0 gpa and 72 total - 72 DA hours
8th Semester	2.0 gpa
9th Semester	2.0 gpa and 96 total - 96 DA hours

DA = Degree Applicable

FOR SATISFACTORY PROGRESS

IMPORTANT!!! 18 degree hours needed to meet satisfactory progress must be earned during the regular academic year (i.e. fall and spring semester). Physical education activity classes **DO NOT** count as academic hours or towards NCAA eligibility and therefore are not counted toward full-time enrollment for all students following UNC's old curriculum standards. Lifetime fitness courses DO count for all students following the new curriculum.

5th Semester	1.9 gpa and 48 total - 48 DA hours + declare major
6th Semester	1.9 gpa
7th Semester	2.0 gpa and 72 total - 72 DA hours
8th Semester	2.0 gpa
9th Semester	2.0 gpa and 96 total - 96 DA hours

DA = Degree Applicable

FOR SATISFACTORY PROGRESS

IMPORTANT!!! 18 degree hours needed to meet satisfactory progress must be earned during the regular academic year (i.e. fall and spring semester). Physical education activity classes **DO NOT** count as academic hours or towards NCAA eligibility and therefore are not counted toward full-time enrollment for all students following UNC's old curriculum standards. Lifetime fitness courses DO count for all students following the new curriculum.

Folks-

Sorry,... here's the first revision. Apologies to Jaimie Lee!
You'll notice that she is now on the list.

Thx
Doug

---

here are copies of our temp hiring paperwork.

if applicant is a student:
1) fill out Dept Payroll data sheet
2) fill out COE-Temp Regular sheet
3) send applicant and paperwork to Tracey harris (with ID ,etc.)

if applicant is non-student:
1) fill out crim check
wait for clearance from tracey harris on crim check, then...

2) fill out Dept Payroll Data sheet

3) A. IF working less than 20 hrs week - fill out CO-Temp - INT sheet
B. IF working more than 20 hrs week - fill out COE-Temp - REG sheet (beware- if person is hired as a REG temp, and is a non-student, the temp will have to come off payroll for 30 days after working for one calendar year.

The University of North Carolina at Chapel Hill
Office of Human Resources

CONDITIONS OF EMPLOYMENT – SPA INTERMITTENT TEMPORARY EMPLOYEES

Appointment Type:	**Intermittent Temporary Employee**	**Offered to:**	**{ FORMTEXT }**
Position ID:	**{ FORMTEXT }**	**Hourly Pay Rate:**	**{ FORMTEXT }**
Department Name:	**{ FORMTEXT }**	**Effective Date:**	**{ FORMTEXT }**
Department Number:	**{ FORMTEXT }**	**Supervisor:**	**{ FORMTEXT }**

In order to be employed with the University of North Carolina at Chapel Hill as an Intermittent Temporary Staff (SPA) Employee, you must agree to the following conditions of employment:

1. I understand that any offer of employment is conditional pending the completion of the University's required criminal conviction check. I understand a criminal conviction in and of itself does not disqualify me from employment at the University. I understand that in the event a criminal conviction record is discovered where I had not listed it on the employment application, I may be disqualified from employment in this position, and any other position at the University, for falsification of the employment application. I also understand that due to the nature of some criminal convictions, employment in certain positions at the University may be unavailable to me. I understand that in the event that thirty (30) calendar days have elapsed since the initiation of my criminal convictions check with the University's Department of Public Safety, I may be allowed to begin work at the University with the understanding that my employment offer may be rescinded if the criminal convictions check when received discloses information that affects my selection. I understand that before a final decision would be made to rescind my appointment, I would have the opportunity to provide any exculpatory or explanatory information.

2. Federal law requires each new employee to complete the "Employee Information and Verification" section of the U.S. Citizenship and Immigration Services (Form I-9) and to submit certain original documents for examination in order to verify and certify identification and employment eligibility. In compliance with N.C. law, the University verifies each individual's legal status or authorization to work in the United States after hiring the individual using the Department of Homeland Security's E-Verify Program. I understand that my employment will be terminated if I fail to comply with the employment authorization requirements or if it is determined that I am not authorized to work in the United States.

3. State policy requires each Permanent Staff employee to be at least 18 years of age, and State law requires the University to have these individuals indicate their compliance with the Federal Military Selective Service Act. Initial the appropriate response below.
   _____ (*initial*) I certify that I am required to be and have registered with Selective Service, OR
   _____ (*initial*) I certify that I am exempt from registering with Selective Service, OR
   _____ (*initial*) I certify that I am required to be and have NOT registered with Selective Service.
   I understand that if I am not registered but am required to be, I MUST do so no later than 30 days from the appointment date indicated on this document in order to stay employed at the University. I understand that failure to comply with the registration requirement bars a person from State employment.

4. I understand I am required to provide my Social Security Number so the University can satisfy its income-reporting and withholding obligations under North Carolina and federal laws. Unless this sentence is marked through and initialed by me, I voluntarily permit the use of my social security number for internal record keeping and information management operations. However, I understand I have been randomly assigned the personal identification number (PID) indicated on this document, which the University will use instead whenever possible.

5. I understand that the University requires all presently-hired employees to be paid by direct deposit into a bank or credit union account, and that pay stubs will be provided to me electronically through the University's E-pay program. In order to satisfy this requirement, I understand I must either present a deposit slip or voided check during my assigned Job Offer Acceptance Session or submit the direct payroll deposit authorization (Form PR-8) to the University Payroll Department by the end of my first work week. My signature below certifies I understand I will not receive a paycheck from the University until the appropriate payroll forms have been completed and submitted.

6. I understand that the rules governing my work schedule, meal and break periods, time records, pay day, wage-hour status (for overtime purposes), and the policies covering equal employment opportunity, reporting an on-the-job injury, workplace violence, illegal drugs in the workplace, and other policies as listed on the "Certification of Review of Relevant Employment Policies" have been provided to me by a department representative.

7. I authorize the University to withhold from my final paycheck the cost of any keys, uniforms, or other State-owned property I fail to return when my appointment ends. I also authorize the University to withhold from my final paycheck the amount of any other debt I owe to the University, subject to Wage-Hour requirements.

CONDITIONS OF EMPLOYMENT – SPA INTERMITTENT TEMPORARY EMPLOYEES

CONDITIONS OF EMPLOYMENT (continued)

8. I understand that if my position's duties expose me to blood-borne pathogens or other potentially infectious material, I am required to attend the Environment, Health & Safety Office's OSHA-required training within my first 10 days at work. I also understand that to comply with University policy, if my position's duties include engaging in University health care activities, I must:
    a. satisfactorily complete a tuberculosis screening skin test (PPD) within my first 10 days of work, and
    b. disclose to my department head, dean, division chief, Office of Human Resources Employee & Management Relations Division, or the chair of the University's AIDS Task Force if I am currently, or later become, infected with either the HIV or Hepatitis B viruses.
9. I understand that the University follows a "Smoke Free" policy and that smoking is not allowed within 100 feet of all University facilities, both on and off campus. I also understand that smoking in state-owned vehicles is also prohibited.
10. I understand that the only employee benefit programs in which I am eligible to participate are the voluntary 403(b) supplemental retirement and/or U.S. savings bonds programs.
11. I understand that as an intermittent temporary employee at the University of North Carolina at Chapel Hill (University), I am limited to working less than 1500 hours within any 12-month period, and that if I work for the University 1500 hours or more within a 12-month period, my appointment must be terminated (effective no later than the last day of that 12-month period), and that I will not be eligible to be re-hired by the University in a temporary capacity for a minimum period of 31 days after my appointment termination date.
12. **{** FORMTEXT **}** *(initials)* **For retirees only.** I understand that State policy allows me, as a retiree, to work longer than twelve consecutive months regardless of the number of hours I work, and that my initials beside this condition certify that I am retired, am not available for (or seeking) permanent work, and have benefits (like health insurance) through my retirement plan.
13. I understand that in the event that I accept a permanent position with another North Carolina state agency or with another University department, I must inform my hiring department and terminate my temporary appointment.

Priority Registration for Student-Athletes Questionnaire

1. Does your institution currently have priority registration for student-athletes?

   _____ Yes
   _____ No

If you answered yes to the first question, please continue filling out the remaining portion

2. Who registers the student-athletes for classes when using priority registration?

   _____ Student-Athlete
   _____ Academic Advisor/Counselor
   _____ Other

3. Which student-athletes are eligible for priority registration?

   _____ All Student-athletes
   _____ Student-athletes who are in-season
   _____ Student-athletes who are traveling
   _____ Other _____

4. Do certain sports/student-athletes have priority registration over other sports? (e.g. scholarship vs. non-scholarship, committee cases, sport vs. sport)

5. When does priority registration take place? (e.g. one initial date, priority vs. rest of class)

6. How do student-athletes enroll for classes when using priority registration?

   _____ Online
   _____ Registration Forms
   _____ Registrar's Office

7. Is there a restriction on the number of student-athletes who may enroll in each class/section to prevent clustering? What are the restrictions? (e.g. 25%)

8. Who monitors class make-up? (e.g. Provost, Registrar, Academic Support Staff)

9. How well does your system work? Would you change anything?

Thank you for your time; we appreciate it!

Priority Registration for Student-Athletes Questionnaire

QUESTION	BC	CLEMSON	DUKE	FSU	GT	NCSU	MARYLAND	MIAMI	UVA	VT	WFU	UNC
Does your institution currently have priority registration?	No	Yes	Modified	Yes	Yes	Yes	Yes	Yes	Yes	No	Yes	Modified
Which SA's are eligible for priority?	All BC students who have diagnosed LD	All Student-Athletes	All SA's except for the novice Women's Rowing team during their 1st semester	All Student-Athletes	All Student-Athletes	All Student-Athletes	All Student-Athletes	All Student-Athletes	Student-Athletes who are in-season	None	Student-athletes with SAT<1050	LD Student-Athletes and those SA's that are traveling
Do Certain sports /SA's have priority registration over other sports?	No	No, all SA's are randomly assigned a registration time over day 2 and 3 of registration		No	No	No, all student-athletes are allowed to register early	No	No	Swimming, wrestling and basketball receive it both semesters and all other sports receive it while in-season	No	Special admit <1050 SAT scores	No
When does priority registration take place?	2 days prior to the general student body registration period which is done by class	With priority registration, SA's register with seniors. Students with disabilities and honors college students register on the 1st day followed by SA's and seniors	SA's are assigned a window which is 1st within their academic class and they complete the registration	Our students register on the 1st day of open registration. If they wait too long beyond that date they forfeit priority by default	Priority registration begins for Student-Athletes on the initial date of registration each semester	1 day before seniors can register	Every semester approximately 1 week before the general population registers	Priority vs. the rest of the class	Opens one day before the rest of registration begins for students	All students request courses and place course request online. Students are able to place requests for 1 week. Students find out courses when they return from Thanksgiving break	Friday afternoon prior to Monday regular registration	One day prior to their classmates
How do SA's enroll for classes when using priority registration?	Online	Online	Online	Online	Online	Online	Online	Registration Forms and Registrar's Office	Online	Online	Registrar's Office	Online
Who registers the SA's for classes when using priority registration	Dean of respective college	Student-Athlete	Student-Athlete	Student-Athlete	Student-Athlete	Academic Advisor/Counselor	Student-Athlete	Other	Student-Athletes	Student-Athlete	Academic Advisor/ Counselor	Academic Advisor/ Counselor
Is there a restriction on the number of SA's who may enroll in each class/section to prevent clustering?	No class size is determined by the Registrar when a class is full then it is closed	Yes. We have a 25% restriction on classes. Some departments on-campus will enroll slightly over 25% cap but that is on a case by case basis.	There is no restriction on the number of SA's in a section/class	No restrictions but monitored closely to prevent clustering	No, but we have gotten requests from some departments to spread our populations amongst sections to avoid clustering	We self-impose a cap for student-athlete enrollment at 25%	Yes, About 25%	No	No restrictions but monitored closely to prevent clustering	The staff oversees this	3-4 special admit student-athletes per class	No restrictions
Who monitors	Student Services	Classes are		Academic	Registrar and	The Academic	Registrar	Academic	Academic	No would if the	Registrar and	

class make-up?		monitored by the registrar although our registration system automatically has a 25% cap		Support Staff	Academic Support Staff	Support Program monitors enrollment with assistance from Registration and Records		Services	Services	staff did not oversee the process	Academic Support Staff	
How well does your system work?	Very well, Have more of the elective course slots held for freshmen and faculty to offer more sections of various upper level course	One problem is the 25% cap, which counts all SA's including walk-ons and scholarship athletes. Another problem was no priority registration for 1st year students. They register with 1st year college students		Works Well, no need for change	We have been satisfied with our system	We are satisfied with our system and have the full support of administration because of our very own checks and balances	Good, the 1 think I would like to change is for the Athletic Advisors to be allowed to give the permission for our SA's to adjust their schedules (add/drop). Currently only the advisors in their majors can give them permission	Okay		The majority of SA's receive the courses they requested	Great system but very time consuming	
Is there anything else unique to your SA's priority registration that you think we should know about?		It is beneficial to have the priority registration and would be difficult to get SA's registered for classes that fit w/in the block schedule		No		If you get it, it is your responsibility not to abuse it						
QUESTION	BC	CLEMSON	DUKE	FSU	GT	NCSU	MARYLAND	MIAMI	UVA	VT	WFU	UNC

Research Matters

1) Arms Against a Sea of Troubles

Do statistics show that places where conceal permits are allowed actually have lower crime rates?

We need (respectable) opinion pieces and data to support arguments for and against gun control in general.

Who gets the gun? Teachers or students?

Facts about concealment. Some places demand it, some outlaw it. I bet most of those decisions are completely speculative (not based on data). Let's see if we can get some psychology data one way or the other.

2) For Bitter or Worse

Facts about how alimony works. There are, Blane said, four or five different kinds.

What's the opportunity cost of housewifery? (Tom's point)

In what way does NYC-NOW see the current situation to be the only leverage available to women in divorce proceedings? What does NOW want changed? (check their website etc) The case says, "greater economic fairness for women". Does that mean in divorce court or in the workplace generally?

All-male juries for divorce between heterosexual couples? Does that seem right? Is there any thing out there on this?

3) Virgin Records

Is it empowering? How do we decide? What's the best way philosophically speaking to decide whether something is actually empowering? (i.e., Can it not be empowering even when she herself says it is? Under what conditions?)

Objectivity and self-respect and false consciousness (reclaiming "queer" etc)

Paternalism of the state… What should the state care that she does this?

We need lots of analogous situations and research on them: organ donation, selling yourself into slavery, prohibition of alcohol…

4) No News is Good News

What is the average income of families in Lincolnshire, IL? Or anyway get a measurement of how rich that school is.

How legitimate is the spokesman's claim that the administration is ultimately responsible for the content of the taxpayer funded newspaper? Why and/or why not?

Needs everything on student journalism law. Somewhere a judge said, "Students do not leave their rights at the school door."

We value the free flow of information and the free exchange of ideas. The thing to do would have been to put out the next issue challenging the perspective in the "offending" issue.

What's the deal at the DTH?

Fairness doctrine.

5) The Gift that Keeps on Giving

Is she double dipping in the child support? Is the non-biological, but birth certificate father also giving alimony?

We need lots to say about the analogy to abortion and the man's role therein. Can the man say, "No don't get one"? Can the man say, "Yes you must get one"?

What's the difference between sperm banks and private contracts? (Oral contracts are a special case or private contracts…)

Biological parents are not called for child support when adoptive parents divorce…

Do children have the right to two parents?

6) Smoke Screen

Is it more accurate to say that they fund this research or more accurate to say they exploit university facilities? That is, how much in overhead costs is PM avoiding?

What if PM leases the university facilities and labor of professors? It starts to seem more intuitively permissible. But why?

Pope Foundation funds were rejected at UNC. Why? What are good reasons? Academic freedom? Why is that a good reason? Is it because there is something essential to the university having to do with non-commercial interest and academic research for its own sake?

This is, like many of the rest, a true case. Look up opinion pieces on this very case.

7) Baby, Baby, Baby

When do we legitimately limit individuals' freedom to seek their own conception of the good and the flourishing life? As a last resort, I'd think. Perhaps only when societal damage can be demonstrated empirically… not just when our disgust is piqued by the individuals conception of the good life.

In this case too there might be an issue of self-harm….

And there is the issue of protecting the rights of the unborn….But if you go there you might have an inconsistency with regard to a pro-choice position on abortion….

The role of evolving technology and moral choices.… What are some analogous situations?

8) Health Bars

What do WE think the interesting or important aspects of this case are?

Consider the "Heinz" case put forth I think by Kohlberg (the Kantian psychologist of moral development)… his wife is sick and they are poor, is it permissible that he steals the medicine she needs from the neighborhood pharmacy?

9) Cut to the Quick

Note that "anecdotal" reports should not count as empirical evidence!

What's voluntary, philosophically speaking? (This same question appears in another case, namely 10 Brother Where are Thou?)

10) Brother, Where Art Thou?

How real are the worries about hacking these things? Critics will say the worries are real. VeriChip will say there's no way. Who's right?

What are the risks of implantation?

Get some background on situations in which the FDA has not acted responsibly to protect the consumer… but has instead protected corporate interests.

What's voluntary, philosophically speaking? Do you act voluntarily when incentives are evident? When they are reasonably thought to be overwhelming?

11) The Game's Afoot

Who does local casino construction hurt? Who does it help?

Do we think gambling is inherently wrong?

Is it a tax on the stupid?

12) Roach Baiting

WTF?

I guess research on scammy marketing practices?

13) Never-Never Land

Research on firms that have attempted to make amends for their role in the holocaust or the collaboration…

14) Greenbelt

Is the inventory of affordable housing a separate issue? I mean can't we do both – have a greenbelt and provide low income housing? What are the pieces of misdirection in this case?

Research on "eminent domain"

15) Public School Expulsions

How hard is it to just go to some other school in the district after having been expelled? If "alternative education" is not "provided" why does that mean the child remains uneducated?

Get more on the stats that were mentioned in the case itself: without ability to threaten expulsion schools cannot keep order and fulfill their mission…

Learning Specialist Training – Beth Lyons

Week of May 3rd, 2010

Overview of Weekly Meetings & Ongoing Training Tasks

Standing Weekly Meetings – subject to change each semester

- Academic support program staff meeting Every first and third Tuesday 2:00–3:00
  - Staff meetings will not take place on a regular basis during the school year
- CSSAC meeting Every third Thursday 8:30-9:30 SASB

Ongoing Training – things to accomplish during independent office time

For Student-Athletes/Athletics:

- ✓ Athletic department staff manual: (http://staffmanual.athletics.unc.edu/)
- ✓ Team Media Guides
- ✓ UNC Athletic Department website: (http://tarheelblue.cstv.com/)
- ✓ Student-Athlete Handbook : (http://tarheelblue.cstv.com/auto_pdf/p_hotos/s_chools/unc/genrel/auto_pdf/sa-handbook2009-10)
- ✓ Sport Eligibility Lists
- ✓ Student Files
- ✓ Study Lists (Class Schedules from PeopleSoft)

For Compliance:

- ✓ NCAA & ACC Manuals (see Jenn for PDF versions)
- ✓ UNC Compliance: (http://tarheelblue.cstv.com/compliance/unc-compliance.html)

For Academics/Colleges/College Offices/UNC:

- ✓ Academic Calendar : (http://regweb.oit.unc.edu/calendars/index.php)
  - Semester Dates (drop/add, finals dates, etc)
  - Application deadlines (Kenan-Flager application, minor applications)
  - Important Event Dates
- ✓ UNC, College, & Program Websites
- ✓ Carolina Undergraduate Bulletin
- ✓ First Year Guide
- ✓ Campus Maps
- ✓ Advisor Contact Lists

Meetings to Schedule and People to Meet

For Academic Support Program:

- ✓ Counselors
- ✓ Appointment for picture and bio on website – See Dana Gelin (962-0083, dgelin@uncaa.unc.edu)
- ✓ Talk to Robert about athletic department ticket policy

For Academics/Colleges/College Offices:

- ✓ Colleagues in College Advising Offices - Will receive list from co-workers
- ✓ Admissions - Barbara Polk (966-3989)
- ✓ Registrar - Chris Derickson (962-8289)

For Compliance:

- ✓ Eligibility and Certification - Susan Maloy (962-9892)
- ✓ Financial Aid/Scholarships - Amy Herman (962-7853)
- ✓ Initial Eligibility - Lance Markos (843-7259)

Learning Specialist Training – 2010

Daily Schedule – Day One

Monday, May 3rd, 2010 ***Key Contact***

8:30am – 9:00am Office Basics & Human Resources Sandy Restivo

- Mail: Outside, Campus, Mailbox
- Phone: Voice Mail, Outside Calls, Hold, Transferring
- Supplies & Ordering

9:00am – 9:45am Computer Basics Christy Suits

- Groupwise e-mail
- Novell log in
- Computer set-up

9:45am – 10:30am Independent Office Time

- Pick out phone
- Schedule appointment for website photo/bio

10:30am – 11:30pm Life Skills Program Cricket Lane

- CHAMPS Life Skills progam overview
- Carolina Leadership Academy

11:30am – 12:00pm More Computer Basics Brent Blanton

- Computer: Database, AdmissionsPros
- Other important websites

12:00pm – 1:00pm **Lunch**

1:00pm – 2:00pm **Check–In & Review with Director** Robert Mercer

- Review of training schedule
- Learning Specialist Expectations
- Policies, Processes, & Procedures
- Academic Support Program's Role in: Athletics, Academics, Admissions, Registrar, Disability Services, Student Services, Office Support Staff
- Departmental policies: Vacation days, work hours, required meetings, athletic ticket policies

2:00pm – 3:00pm **More Office Basics** Jenn Townsend

- Academic Calendar
- working with students
- Q and A

Learning Specialist Training – 2010

Daily Schedule – Day Two

Tuesday , May 4th, 2010 ***Key Contact***

9:30am – 10:30am **Learning Disability Testing** Dr. Lyn Johnson

- Learning disability screening
- Disability testing
- Policies and procedures (Sports medicine, etc.)

11:00am – 12:30pm **CTOPS training (Murphy 111)** College of Arts and Sciences

- Orientation schedule
- advising procedures
- New First Year Guide
- New Undergraduate Bulletin

12:30pm – 1:00pm **Lunch**

1:00pm – 2:00pm **Overview of Office and Files** Mary Willingham

- Files in office
- Files saved on screening computer
- Important books to use as resources

2:00pm – 5:00pm **Graduation reception in Alumni Center** -

-Reception for graduating student-athletes (formal program starts at 3:00)

Learning Specialist Training – 2010
Daily Schedule – Day Three

Wednesday, May 5th, 2010 ***Key Contact***

10:00 – 11:00am **"At Risk" Student—Athlete Services** Beth Bridger
- Football initial screening
- Other football learning disability services
- Mentor progam

11:30am – 1:30pm **Lunch**
- Athletic department "Play Day" so will probably go out to lunch if you want to come

1:30pm – 4:30 pm **Organize office/pack** Nate Yarbrough
- Talk to Nate about sticker system/boxes/shredding

Learning Specialist Training – 2010
Daily Schedule – Day Four

Thursday , May 6th, 2010 ***Key Contact***

10:30am – 12:00pm **NCAA Rules and Regulations at EWAC** Susan Maloy
- NCAA/ACC/UNC continuing eligibility rules
- General NCAA rules (extra benefits, recruiting)
- Initial eligibility rules

12:00pm-1:00pm **Lunch**

1:00pm – 3:00pm **Office Time/Follow up Q and A**
- Pack office
- Ask Robert, Jenn, Brent, or Beth any follow-up questions

3:00pm – 4:30pm **College of Arts and Sciences Advising** Barbara Lucido
- College of Arts and Science rules/policies/procedures
- General Education requirements/curriculum
- Athletics/college interactions

Learning Specialist Training – 2010

Daily Schedule – Day Five

Friday , May 6th, 2010 ***Key Contact***

10:00am – 11:00am **Tutoring /SI program** Brent Blanton

- Tutoring program
- Rules/regulation
- SI program

Rest of the day **Office Time/Follow up Q and A**

- Pack office
- Ask Robert, Jenn, Brent, or Beth any follow-up questions

Cynthia-

Just a quick email to check in with you. Attached is my resume. I was also wondering if you were any closer to setting a date for my visit. I know Doug mentioned the 22nd, but if there was any way possible to do it earlier, that would be much better for me. I have some obligations with JMU that week and although the 22nd could work, even the Friday before would be much better.

Talk to you soon.

Subject: priority registration LDS
Attach: Priority Reg Summer Fall 2005.doc

Attached is the form for all students that receive services from LDS. If you have a student 'in the pipeline' for services, I would still have them fill out a priority registration from and get it over to Jeanette Florence in Room 207 (Dean Clark's office). Make sure to follow-up regarding their 'clearance' so that we know the schedule was processed (I can help with this).

Important Dates
Summer: Priority Registration will begin March 7, 2005 for Summer Sessions and ends March 18, 2005
Fall: Priority Registration will begin March 28, 2005 for Fall Semester.
See the important dates below for the fall priority registration period for your class.

Rising seniors: March 28-April 1
Rising juniors: March 28-April 8
Rising sophomores: March 28-April 15

PRIORITY REGISTRATION FORM
For Summer and Fall 2005

Name _____ PID# _____
Last First Middle

Date of Birth _____ Year in School FR SO JR SR CS OTHER

PIN# _____ Email Address _____ Telephone Number_____

Important Dates

Summer: Priority Registration will begin **March 7, 2005 for Summer Sessions and ends March 18, 2005**
Fall: Priority Registration will begin **March 28, 2005 for Fall Semester.**
See the important dates below for the fall priority registration period for your class.

Rising **seniors: March 28-April 1**
Rising **juniors: March 28-April 8**
Rising **sophomores: March 28-April 15**

You can drop off your form to Jeanette on the first day that priority registration begins for summer (March 7) and fall (March 28). She will not process any forms received after the last date for each registration period listed above.

You will need to have the advisor approval flag removed from your file if you are a:

- First year student,
- Sophomore with a grade point average less than 2.0,
- Journalism sophomore,
- Undecided junior, or
- INTS junior or senior with grade point average less than 2.0.

Please follow these instructions:

1. Log onto Student Central and review "Registration Information" and "Stops". ALL stops **MUST** be cleared before your registration can be completed. If you are required to see your advisor, you must do so **before the deadline listed under IMPORTANT DATES.**

2. Priority registration forms should be completed and returned to Jeanette Florence in Room 207 Steele Building between the hours of 8:00 am – 11:00 am and 2:00 pm – 4:00 pm ONLY. If the office is closed, you may slide the form under the door.

3. After turning in your form, you should check your class schedule on Student Central. If you are trying to register for a "controlled enrollment" course you will need to speak to the department to tell them you receive priority registration and they will need to register you in that course.

Once Jeanette has registered you, she will NOT be making any changes to your schedule. You will have to wait until your registration date and make any changes through student central.

May 13, 2005

Dear Professor,

The Academic Support Program for Student Athletes here at UNC will continue to have a Supplemental Instruction program for our student-athletes during both summer sessions. The fall '04 and spring '05 program was well received by both faculty and students.

We are constantly trying to improve our support programs in order to better help our students academically. Supplemental Instruction (SI) is a learning enhancement program and is designed to organize and improve the ways in which students prepare for class outside of the classroom. SI is attached to courses to provide students with a systematic and disciplined approach for processing the course material assigned by the professor. We will be assigning SI leaders to each of the courses selected. These leaders have been identified through our tutor interview process.

The SI program is not intended as a substitution for regular attendance at class. The SI leader attends all lectures, takes notes, reads assignments and is trained in study skill strategies. The SI leader does not re-lecture, but rather facilitates and encourages the group to process the material. The SI meetings will be held during regular study hall hours at the Academic Center. We will also hold a few spots open in each SI group for potential (non-athlete) student recommendations based on your referrals.

We will maintain records of attendance and use a systematic research-based approach to evaluate our program at the end of the semester (for more information visit the SI website at www.umkc.edu/cad/si.htm). Please let us know if it would be possible for an SI leader to attend your class. Thank you for allowing us to work with you to help our students succeed academically.

Sincerely,

Mary C. Willingham
Learning Specialist/SI Coordinator
University of North Carolina - Chapel Hill
Academic Support Program for Student Athletes

Subject: si summary
Attach: SI exec sum.doc

This is a two page doc. - I'm just giving Robert page 2 for his meeting.
M

Supplemental Instruction (SI)

- Used by more than 800 campuses in the US
- Provides an enriched learning environment for students to increase mastery and understanding of content
- Created at the University of Missouri, Kansas City 1973
- www.umkc.edu/cad/si.htm
- SI is an extension of the classroom
- SI Leaders are trained (but not necessarily experts) in both content and study skills
- Research has shown that tutoring relationships do not always promote transfer of needed academic skills
- SI begins the first week of the semester (critical)
- Research has shown that study skills in isolation from content has little impact on the students' performance
- Students find that organizing and processing information during the SI session is a very beneficial experience
- SI techniques need to be taught to the SI leaders – monitoring of the groups needs to take place
- Research findings concerning SI – the national database consists of 270 schools – increased frequency of SI attendance does show a relationship with a higher grade (1/2 to 1 letter grade)
- Students who attended SI (for a particular course) showed an increase in their overall GPA by .27 (2.64 to 2.37)

Supplemental Instruction (SI)

Pilot program – UNC

Academic Support Program for Student Athletes

- Identified 'at risk' Freshman/Sophomores
- Identified *Perspective* Classes with 12 or more of our students (SI sessions count towards study hall hours and are mandatory)
- Hired and Trained SI Leaders to attend classes and run sessions – collaborated with the Learning Center
- Approval from Professors/Departments/Coaches
- Posted SI classes/session times
  - Fall 2004 - 6 SI Classes
  - Spring 2005 – 6 SI Classes
- **Fall results – 72 students participated with a 97% pass rate**
- **Spring results – 36 students participated with a 100% pass rate**
- Fall 2005 – Targeted 12 SI Classes Plus 3 Math *'MSI" pilot* for Math 10 - with a goal of a 95% pass rate

(based on research model at UMKC)

SI Classes: Geog 20, Geog 10, Soci 10, Dram 16, Geol 11, Psyc 10, Geog 11 – additional for Fall 2005 – Biol 11, Econ 10, Hist 22, Dram 20, Phil 22, Eng 28

Subject: LD screening

Hi Everyone,

Good meeting yesterday, great feedback. To move forward on the screening issue, Mary Willingham is going to put a new screening process in place. Begining today when you have a student who needs to be screened, you will need to complete a screening request form (provided by Mary). The information will include:

Past LD/ADD/ADHD history
# of weekly meetings attended
#of tutor appointments required and attended
# of SI's required and attended
# of study hall hrs required and attended
SAT, AI
Progress reports
GPA
Comments
etc...

This information will be very helpful to Mary in determining screening needs.
Thanks for everyone's help with this. If you have questions, please see me or Mary.
RJM

*Aslo, remember the first study skills program is Sunday night and is required for any student with a C- or below (unless gpa dictates otherwise).

Important Dates:

Summer: Priority Registration for all rising seniors, juniors, and sophomores begins on **March 6, 2006 for Summer Sessions and ends March 17, 2006. After this date, students will need to register themselves.**
Fall: Priority Registration will begin **March 20, 2006 for Fall Semester for all LDS students.**
See the important dates below for the fall priority registration period for your class.

Rising **seniors: March 20-March 24**
Rising **juniors: March 20-March 31**
Rising **sophomores: March 20-April 7th**

You can drop off your form to Jeanette on the first day that priority registration begins for summer (March 6) and fall (March 20). She will not process any forms received after the last date for each registration period listed above.

You will need to have the advisor approval flag removed from your file if you are a:

- First year student,
- Sophomore with a grade point average less than 2.0,
- Journalism sophomore,
- Undecided junior, or
- INTS junior or senior with grade point average less than 2.0.

Please follow these instructions:

1. Log onto Student Central and review "Registration Information" and "Stops". ALL stops **MUST** be cleared before your registration can be completed. If you are required to see your advisor, you must do so **before the deadline listed under IMPORTANT DATES.**

2. Priority registration forms should be completed and returned to Jeanette Florence in Room 207 Steele Building between the hours of 8:00 am – 11:00 am and 2:00 pm – 4:00 pm ONLY. If the office is closed, you may slide the form under the door.

3. After turning in your form, you should check your class schedule on Student Central. If you are trying to register for a "controlled enrollment" course you will need to speak to the department to tell them you receive priority registration and they will need to register you in that course.

Once Jeanette has registered you, she will NOT be making any changes to your schedule. You will have to wait until your registration date and make any changes through student central.

Brent,

Let me know if you want anything else -
Mary

Supplemental Instruction is a series of weekly organized group study sessions. It is a chance to get together with the people in your class to compare notes, discuss important topics, develop study strategies and test yourself on the material.

At each session, students will be guided by an SI Leader. This person will be a hired tutor/mentor that is attending the class at the same time as the students. SI leaders are trained to help the student learn and study. They are not there as a replacement to the instructor, but as a facilitator to make sure that the SI sessions run efficiently.

Student- Athletes will be identified to join an SI group at the beginning of each semester. The meetings will take place during their regular study hall hours.

Fall 2006
Supplemental Instruction

PSYC101/10 - Section 002 MWF @ 10 w/Jordan

Subject: Re: Weekly Reports

Brent,
That is awesome. Your attention to detail is most certainly what will take you places in this field!

I am feeling a bit overwhelmed with English 100 (about 20 students who I see on a regular basis 4day SI and 1-2 night SI) plus all of my 4 years worth of LD contact students plus committee cases - we should talk about how I can once again incorporate my reports with all of yours - it is absolutely redundant for the coaches to hear from me too. The way Robert might have envisioned it simply does not work. Personally, I liked it when I didn't have to report to them - I already report to WAY too many people. Study hall hours are already reported each week, and I'm filling in sheets (SI or my new LS sheet) every day (I've actually turned in 2 sheets some days) with who I see and for how long - what subjects/issues we worked on etc.(much more brief than your sheets) If a student is a no show, then I think an automatic email should be sent (by me) - at this point, that has really not been a problem. Maybe we could get together and discuss.
Mary

>>> Brent Blanton 09/29/06 2:08 PM >>>
Hi Mary,
Attached is a copy of one of my weekly reports. This is what the coaches are used to receiving, and it contains more detail so they know exactly what the score is and if they need to do anything.

Brent

FYI -
For the remainder of the semester, Dr. Johnson will complete testing/reports for students currently in the process (15 students tested, 9 Olympic sports athletes) - no 'new' students will be tested this semester.

Beginning immediately - for testing that will start in January, the attached screening form must be completed with each student asking/referred to be tested. Any student requesting ADD screening will also need to fill out an online assessment (see OA-UNC attached) along with a parent/coach/teacher (at least one of these) in order to see Dr. Johnson here or at her office.

Any questions/comments, please advise.
Mary W.

Testing Dates

Sent to LDS

Received Letter from LDS

North Carolina Neuropsychiatry, PA

Please go to our website www.ncneuropsych.com, to complete our **online assessment.**

Online Assessment:
This is a secure database and the information you give is completely protected.
This assessment will take approximately 20 minutes to complete.
Once you've gone to our home page, along the right side of the screen will be a blue box with links, please click: **Online Assessment**

A new page will pop up, in the middle of that page please click on the button marked:
Start Web Agent

A window will pop up, inside this window it will ask for

Test Administrator	please type in the word:	**unc**
Password	please type in:	**athletes**

A new window will pop up, inside this window please type in the patient's first and last name in the subject ID box (NO SPACE BETWEEN NAMES).

Another window will pop up asking for the following information:

Protocol	**leave blank**
Referring physician	**leave blank**
Ordering physician	**leave blank**

Please answer other questions.

Next window will ask:

Tests to perform	**place check mark in FIRST box (default)**
Time frame	**over past couple of weeks (default)**
Respondent	**Drop down list for who is answering questions.**

*If other family members or teachers would also take this assessment of the patient, please follow the above steps.

Once you have completed the assessment, you can print the results and bring it with you to your appointment; or leave it and we will print it when you come in. If you have any questions or concerns, please feel free to call us.

Subject: subs and lds contacts
Attach: TEXT.htm; MATH Course Substitutions List.doc; LDS SA Contacts.xls; FL Course Substitutions List.doc

---

Attached are the most recent copies of substitutes for FL and Math. Do not assume the subs will be approved for the student unless they have a 'letter' since this may become an eligibility issue - later.
Please let me know who has graduated from the LD contact list.
thanks, m

BEFORE seeking substitutions try MATH 118 or 119. MATH 118 is offered during SSI with an SI component. If you have placed out of MATH 110, try STOR 151.
First year students should look closely at the MATH or STOR First Year Seminars.

MATHEMATICAL SUBSTITUTES

BUSI 100 **Financial Accounting (4) -** Prerequisite or co-requisite, Economics 101 (10) or equivalent. Role of accounting; basic concepts and methodology; mass data processing; valuation and income determination principles; management and internal control problems and basic financial statement components.

COMP 101 **Computer: Power Tools for the Mind (3) -** The nature of computers, their capabilities, and limitations. How computers work; popular applications; problem-solving skills; algorithms and programming; potential use and abuse in society. Lectures, weekly readings, and laboratory assignments.

COMP 380 **Computers and Society (3) -** Cultural, social, philosophical, technological, and economic effects of information technology on individuals, groups, and society. Risks and controversies. Ethics of technology and computer use.

ECON 385 **Women and Economics (AMST 385, WMST 385) (3) -** Survey of women's time allocation patterns, labor force participation trends, earnings, occupational selection, and economic history.

EXSS 324 **Finance and Economics of Sport (3) -** Prerequisites, none but EXSS 101, 221 recommended. This course provides an understanding of the financial and economic growth of sport, economic theory applied to the sport industry, and the basic principles and methods of sound fiscal control.

MUSC 121 **Fundamentals of Music I (3)** – Notational and theoretical materials of music, with musicianship skills developed. Intended for the non-major who wishes to learn to express musical ideas in clear, correct notational form.

MUSC 122 **Fundamentals of Music II (3)** – Prerequisite, MUSC 121 or equivalent. Non-majors only. A continuation of MUSC 121 with the addition of basic instrumentation and arranging.

PLAN 247 **Solving Urban Problems (3) -** Introduction to methods used for solving urban problems. Covers methods employed in subfields of planning to develop an ability to critically evaluate different techniques and approaches used within these disciplines.

PSYC 210 **Statistical Principles of Psychological Research (3) –** Prerequisite, PSYC 101. Consideration of the methodological principles underlying psychological research, descriptive and inferential techniques, and the manner by which they may be employed to design psychological experiments and analyze behavioral data. Three lecture hours and one laboratory hour a week.

SOCI 252 **Measurement and Data Collection (3) –** Methods of data collection, with attention to problem selection, sources of information, choice of methods, and research design. Operationalization and measurement; sampling, construction of questionnaires, and interviewing; observation techniques; experimentation. Required of sociology majors.

Updated January 15

BEFORE seeking a FL substitution, try Swahili with the SI component.

APPROVED FOREIGN LANGUAGE SUBSTITUTES

AFRI 262 **African Literature (3)** - Introduction to the traditional and modern literature of Africa. Works studied include traditional poetry and the epic as well as examples of the poetry, drama, fiction of contemporary anglophone and francophone writers.

BUSI 401 **Management and Corporate Communication (3)** - Open to junior-senior business majors only. Writing- and speaking-intensive course that emphasizes professional communication. Combines lecture, discussion, and draft workshops that focus on letters, memos, reports, resumes, email, and business presentations.

CLAS 121 **The Greeks (3)** - Introduction to the history, literature, religion, philosophy, science, art and architecture of Greece from Homer to Alexander the Great.

CLAS 122 **The Romans (3)** - A survey of Roman civilization from the beginning to the late empire, dealing with history, literature, archaeology, philosophy and religion, technology, the economy and social and political institutions.

CLAS 125 **Word Formation and Etymology (3)** - Systematic study of the formation of words from Greek or Latin to build vocabulary and recognition. For medical terminology see Classics 126

CLAS 126 **Medical Word Formation and Etymology (3) -** Systematic study of the formation of medical terms from Greek and Latin roots, to build vocabulary and recognition. For general etymology see Classics 125.

COMM 372 **The Rhetoric of Social Movements (3)** - Explores the discourse of dissident voices in American Society, particularly as they speak about grievances pertaining to race, gender, the environment; focuses on rhetorical strategies that initiate and sustain social movements.

DRAM 486 **Latin American Theatre (3)** – Prerequisite, DRAM 120. This course explores the historical and aesthetic development of Latin American theatre, focusing on particular factors that distinguish this theatre from the Western European tradition.

ENGL 303 **Advanced Expository Writing for the Natural Sciences (3)** – Advanced practice with the oral and written discourse of the natural sciences. Special attention to disciplinary rhetoric, style, genre, format and citation.

ENGL 304 **Advanced Expository Writing for Business (3)** – Advanced practice with business and professional oral and written discourse. Special attention to disciplinary rhetoric, style, genre, format, and citation.

LING 101 **Introduction to Language (3)** - A survey of the many aspects of human language, including the history of language, similarities and differences among languages, language and culture, dialects, writing systems, child language acquisition, animal 'languages,' and the use of computers in

analyzing languages. Linguistics methods used to describe and relate languages. This class is offered online through the Friday Center.

LING 400 **Introduction to General Linguistics (ANTH 400) (3).** An introduction to the scientific study of language. The nature of language structure. How languages are alike and how they differ.

PHIL 145 **Language and Communication (Linguistics 222) (3)** – How are natural human languages different from other communication systems? How are languages related to the world and the mind?

PSYC 432 **Psychology of Language (3) -** Prerequisite, PSYC 101 and 230 or LING 101 and 400. After an examination of the possible relations between psychology and linguistics, this course will consider problems in the acquisition of language and particular recent work in experimental psycholinguistics.

PSYC 462 **Development of Language (3)** - Prerequisites, PSYC 101 and 250. Study of the development of language in normal children.

LITERATURE IN TRANSLATION

ARAB 151 **Survey of Arabic Literature (3) -** Introduces the rich literary heritage of the Arabic language from pre-Islamic to modern times and covers all major genres. Emphasis on critical thinking, literary analysis, and academic writing.

ARAB 433 **Medieval Arabic Literature in Translation (3) -** Introduction to the main literary themes and genres from the pre-Islamic era to the early 16th century; course will include discussion of Andalusian literature.

ARAB 434 **Modern Arabic Literature in Translation (3) -** Course treats a variety of themes and genres of Arabic literature from the mid-20th century to the present.

ASIA 161 **Survey of Indian Literature in Translation (3) -** Features the Sanskrit Ramayana and Mahabharata, poetry from Tamil, Bengali, and Hindi, as well as the Islamic ghazal. Concludes with the colonial impact and the rise of the novel.

CHIN 451 **Chinese Literature in Translation through the T'ang (3)** - A survey of Chinese literature from the classical period to the end of the T'ang dynasty (906 A.D.).

CHIN 452 **Chinese Literature in Translation since the Sung (3)** - A survey of Chinese literature from the Sung Dynasty to 1949.

CHIN 551 **Chinese Poetry in Translation (3)** - Selected topics in Chinese poetry concentrating on one period or one genre.

CHIN 552 **Topics in Chinese Prose (3) -** Selected topics in Chinese fiction, historical writing, and prose belles lettres, concentrating on one period or one genre.

CHIN 563 **Post-Mao Chinese Literature in Translation (3) -** A study of Chinese literature since 1977, its historical context in the New Era of reform, and influences from modern Western literature.

FREN 275 **French Theatre in Translation (3) -** Representative dramatic masterpieces from the seventeenth to the twentieth century. Since these works are read in English translation, emphasis is placed on theme and character rather than language and style.

FREN 277 **French Novel in Translation (3)** – Representative works of fiction from the eighteenth to the twentieth century. Since all reading is in English translation, emphasis is placed on theme and character rather than language and style.

GERM 250 **Women in German Cinema (WMST 250) (3)** - Introduction to feminist aesthetics and film theory by the examination of the representation of women in German cinema from Expressionism to the present: All materials and discussion in English.

GERM 290 **Studies in German Literature (3)** - Study of a literary genre, theme, writer, period, movement, or problem. Readings and discussions in English.

ITAL 240 **Dante in English Translation (3)** - A reading of Dante's Divine Comedy.

ITAL 241 **Italian Renaissance Literature in Translation (3) -** A study of the major authors of the Italian Renaissance, with special attention to Petrarch, Boccaccio, Machiavelli, Castiglione, Ariosto, and Tasso.

ITAL 242 **Modern Italian Literature in Translation (3)** - A study of the major prose writers of modern Italian literature with special attention given to Manzoni, Verga, Pirandello, Svevo, Moravia, Lampedusa, and other contemporary novelists.

PORT 270 **Modern Brazilian Literature in English Translation (3)** – This course is devoted to the study of Brazilian culture through representative works of 19th- and 20th-century literature.

PORT 275 **Portuguese and Brazilian Fiction in Translation (3)** – The study of selected literary works by major writers from Portugal, Brazil, and the former Portuguese colonies in Africa

ROML 229 **Literature in the Romance Languages (3)** - An introduction to literature in the Romance Languages literature. All readings in English translation. Focus and readings will vary.

RUSS 270 **Russian Literature of the Nineteenth Century (3) -** Introduction to Russian prose fiction of the 19th century with particular consideration of selected writings of Pushkin, Gogol, Turgenev, Dostoevsky, and Tolstoy. Lectures and readings in English.

RUSS 272 **Russian Literature from Chekhov to the Revolution (3)** - Literary situations and authors of 1880-1917, with emphasis on Chekhov and the Symbolists. Lectures and readings in English; some readings in Russian for majors.

RUSS 273 **Russian Culture and Society 1890-1917 (3)** - Examines the extraordinary diversity of the turn of the century Russian culture (1890's - 1917); the proliferation of the visual and performance arts; the rise of popular culture; new artistic explorations of gender and sexuality.

RUSS 274 **Russian Literature after 1917 (3)** - Russian writers and literary problems from the Revolution to the present. Lectures and readings in English; selected readings in Russian for majors.

SLAV 306 **Language and Nationalism (LING 306) (3) -** This course focuses on language, identity, and nationalism in contemporary societies, with special emphasis on Europe, Africa, Asia, and the United States.

SLAV 405 **Introduction to Slavic Linguistics (3) -** The phonological and morphological history of Slavic languages from the late Indo-European to the split of the common Slavic linguistic unity.

SLAV 409 **Cognitive Linguistics (LING 409) (3) -** Development of and present state of research in cognitive linguistics. Readings discuss various language phenomena and are drawn from linguistics, psychology, philosophy, artificial intelligence, and literary analysis of metaphor.

SPAN 270 **Contemporary Spanish American Prose Fiction in Translation (3)** - Narrative works of Borges, Cortizar, Garcia, Marquez, and other contemporary Spanish American writers.

SPAN 275 **Masterpieces of Spanish Literature in Translation (3)** - Representative Spanish authors from the Middle Ages to the present.

SPAN 280 **Cervantes in English Translation (3)** - Study and discussion of Don Quixote with consideration of the Exemplary Novels and the background of Renaissance prose.

Please note: This permission for substitute courses covers only the General Education Foreign Language requirement, through level 3. If your major requires level 4 or beyond, you must resolve this requirement through your major department.

Subject: Priority Regsitration Notice

Colleagues,
As you know, the Priority Registration Advisory Committee met on Wednesday, February 27 to review the recommendations for Fall 2008 priority registration. Thank you for your cooperation and your careful response to the directions for submitting materials. Your request has been approved by the PRAC.

Early registration times have been assigned to all eligible students and will be available to students on Student Central on Tuesday, March 4. Your selected students have been assigned to the first time slots assigned to their cohort (Sophomore, Junior, etc.). The earliest slots, dedicated to the priority groups, are 8:00 a.m. or the 8:15 a.m. on March 22, March 29, and April 5.

Please be aware that this process will be repeated every Spring semester for Fall registration and every Fall semester for Spring registration. Because your group was approved this year should not be construed as a guarantee that your requests will be approved in other semesters.

Please let me know if you have any questions. Thank you.

Alice Poehls

>>> Alice Poehls <apoehls@email.unc.edu> 9/4/2008 9:36 AM >>>
Colleagues,

The announcement below will be published by campus email very soon. I am sending you this note because your groups have been identified as groups who may wish to apply for priority registration. Please note that the Office of the University Registrar has a very narrow window for reviewing applications and then adjusting the registration appointment screens; therefore, the September 22 Deadline is firm.

Remember that you attach the application with the rationale and process to a list of Students, PID, and Classification (fr, so, jr, etc.). The PRAC will NOT see the lists of names. If possible, I would greatly appreciate an emailed excel spreadsheet (to me, apoehls@unc.edu) in addition to the application so that we can prepare information for the PRAC quickly.

Please share this memo broadly with any colleagues who may be interested.

Thanks very much.

Alice Poehls

PLEASE NOTE THE PRIORITY REGISTRATION APPLICATION DEADLINE IS SEPTEMBER 22.In December 2007 the Faculty Council of the University of North Carolina at Chapel Hill adopted a Policy for Priority Registration. The University Registrar announces the membership of the 2008 Priority Registration Advisory Committee and the process and timeline for submitting requests for priority registration on behalf of student groups FOR SPRING EARLY REGISTRATION. The official responsible for students who are potentially eligible for priority registration will send the Registrar an application form along with a list of students who are recommended for priority registration NOT LATER THAN MONDAY, SEPTEMBER 22, 2008 at 5:00 pm. Complete details are available on the Registrar□s website. (http://regweb.unc.edu/resources/prac.php)

Hi,

Please tell student that they will need to call and they shouldn't ask
for me they should say they are student athletes who are requesting PR.

One dropped in just now thinking we could see him..they will need to
call or drop by and schedule an appointment.

Subject: 2nd session tutoring

Jan and Wayne,

We have taken care of the football crowd - they will have tutors and study hall on Tuesday nights and Wed. afternoons (1:30 - 3:30). They will also be around in the morning - some from 9:45 - 11 and another group from 11:30 - 1. We still have plenty of room for your freshman and I'm wondering if you want some tutors - Tony Yount, our retired CHHS History teacher is asking for something to do...He is great at working on reading for content and papers too. Let me know, Jan I'm sure that he would work well with the girls - I'm a little worried that we need 'all hands on deck' for 2nd session.

Mary

STUDY TABLE PROGRAMMING – 2007/08

LOCATION

SI – Rooms 213A/B, 227/headquarters Study room A – forms coordinated by MW

- ⇒ Three rooms per night allows for six-to-nine SI's per term w/o using Sunday night

Tutorials – Rooms 215, -23, -24, -25, *Ram's Room* and *Ram's Room Extension*

- ⇒ Comprehensive tutor listing
- ⇒ Multiple tutors for high volume subjects
  - Foreign language – SPAN, PORT
  - History – 127, 128, 140, 151
  - Mathematics – 110, -18, -30, -52, 231, -32
    - Upson for the upper-level in much the same format as now (chess master)
    - Two other tutors for the lower-level courses
  - Political Science? – 100
- ⇒ Drama – tutorial only (Carol has been to enough to be able to navigate the course, no)?
- ⇒ Feedback forms – dropped in electronic mailbox – sorted by part-time program assistant

Writing Lab – located in Study Room A - B/C for overflow

Study Hall – Auditorium

Staffing – Each advisor will staff an evening (full night)

- ⇒ Monitors? If yes, looking for older individual commanding more respect and definitely more responsible
- ⇒ New position (NP)(20 hours each week – NOT tutorial coordinator) – partial evenings; much of work will be scheduling (taking place during daytime hours – afternoons?)

Format – Each sport can come on any night possible – NOT on assigned night to correspond with advisor on staff – gender based time slots?

- ⇒ Will football be in the building in the evenings? For shared tutorials only?
- ⇒ Sessions will be scheduled in advance by the NP
  - Advisors will identify needs during July months, taking into account what schedule changes need to occur – at-risk students should NOT have much change because we should know what is needed and the best way to accomplish through scheduling
- ⇒ Drop-ins should be largely discouraged – again, advisors should know the syllabi of needy students and should prescribe services accordingly (meetings are HUGE in this process)
- ⇒ In the event that impromptu tutorials are needed, all scheduling should go through the advisor and then the NP – NO direct emails from student to tutor (too much abuse resulting in an inflated budget)

Miscellaneous

- ⇒ Hiring to begin in July allowing for one month's preparation
- ⇒ Communication/tutor work room – calendar etc.
- ⇒ Training to be led by Willingham and Beth – dual training for SI and tutors/mentors – scheduled at next meeting
- ⇒ Brent does supporting paperwork/audit tutor hours
- ⇒ Melissa Exum contacted in July – get on her schedule EARLY
- ⇒ Academic Center rules – laminated and posted (what/where?)

⇒ Tutor pictures on Tutor Board (with permission) for easy identification (especially in the *Ram's Room* and *Extension*)

Melinda and Jonathan:

I just wanted to confirm the presentation that we agreed upon for our tutors on August 20th @ 6 PM. The group will be meeting in the Academic Support Center auditorium. I know it is a busy time for you so if you could be prepared to do your piece right at 6 that would be great and then you can slip out. In terms of content, if you can just cover the basic information about the Honor Code with emphasis on plagiarism and unauthorized collaboration, that would be fantastic. Again, thanks so much and I look forward to seeing you next week.

Kym

Subject: writing lab
Attach: wl week of 9-16.xls

Cost of writing lab - $637 per week (10K per semester)
This week =
112 students - (25 not tutored) = 87/637 - $7.32 per student
THIS DOES NOT INCLUDE FOOTBALL (SEEN DURING FOOTBALL STUDY HALL HOURS)- WHICH COULD TAKE IT DOWN ABOUT $1 PER HIT!!

Hard copies provided - feedback not included so use attachment for comment section.

Professor's Burns and Fletcher,

The Academic Support Program for Student- Athletes is interested in providing Supplemental Instruction to students in the fall who are in your History classes (Hist 142 and Hist 140 respectively). I've attached a sample SI letter for your review, and our experienced SI Leaders (Tony Yount and Brent Blanton) would be happy to meet with you at your convenience to discuss the possibility of SI. We have had great success with SI over the past 4 years across the General College curriculum. Thanks to your department (especially) for the support.

Regards,

Mary C. Willingham
Learning Specialist/SI Coordinator

Sample SI Letter

January 3, 2008

Dear Professor,

The Academic Support Program for Student Athletes will continue to have a Supplemental Instruction program for our student-athletes during the upcoming spring semester. The program continues to be well received and successful. Thanks to all those who have been involved thus far.

We are constantly trying to improve our support programs in order to better help our students academically. Supplemental Instruction (SI) is a learning enhancement program and is designed to organize and improve the ways in which students prepare for class outside of the classroom. SI is attached to courses to provide students with a systematic and disciplined approach for processing the course material assigned by the professor. We will be assigning SI leaders to each of the courses selected. These leaders have been identified through our tutor interview process.

The SI program is not intended as a substitution for regular attendance at class. The SI leader attends all lectures, takes notes, reads assignments and is trained in study skill strategies. The SI leader does not re-lecture, but rather facilitates and encourages the group to process the material. The SI meetings will be held during regular study hall hours at the Academic Center. **SI will be open to all of the students in the class.** The SI Leader will provide day/time information with regards to the sessions. Please sign and return a copy of this letter at your earliest convenience.

We will maintain records of attendance and use a systematic research-based approach to evaluate our program at the end of the semester (for more information visit the SI website at www.umkc.edu/cad/si.htm). Please let us know if it would be possible for an SI leader to attend your class. Thank you for allowing us to work with you to help our students succeed academically.

Sincerely,

Robert Mercer
Director

Academic Center for Student-Athletes Tutor Evaluation Form

Spring 2009

Tutor's Name_____ Subject Area_____

Key: 3-Consistently **2**- Sometimes **1**-Not all or no N/**A-** not applicable

1. The tutor indicated understanding of the student's academic problem or asked for clarification.
2. The tutor asked questions to encourage the student to think about the task.
3. The tutor encouraged the student to find his/her own answers without providing them.
4. The tutor encouraged the student to demonstrate his/her understanding of the material.
5. The tutor provided positive reinforcement.
6. The tutor was patient with the student and able to adjust to the student's pace.
7. The tutor exhibited knowledge and confidence in the subject.
8. The tutor recommended other resources for the student, e.g. computer, workshop, faculty, etc., if appropriate.
9. The tutor helped the student develop a goal for further study.
10. If the student exhibited problems outside the tutor's expertise, the tutor directed the student toward appropriate help.
11. The tutor encouraged the student to return.

Brent,
If you could pass me any history syllabus that you think I should set up SI 'review' test prep for, (like Peggy does for Bio), just let me know and I will organize. I am making a calendar of all the tests, papers, and finals for general college classes where we have attached SI in the past (and still have lots of students in). At this point, I am responsible for SI, SI review, Writing Lab and the training and observation of all tutors. Hopefully this is correct, and helpful. mary

Date _____

Dear _____:

As a former part-time member of our Academic Support Program for Student-Athletes, we would like to take this opportunity to thank you for your service to our student-athletes and to our Program. We take great pride in the academic accomplishments of our student-athletes, and our tutorial program is a key component to this success.

We strongly believe that only currently employed tutors/mentors should work with our student-athletes. It is through monitoring and supervision that we are able to ensure the proper environment for them. **As a result of your departure from our Program, we ask that you refrain from working with our student-athletes in an academic setting from this point forward, i.e. tutoring, mentoring, academic counseling, etc.**

We would also like to remind you of some NCAA rules and regulations that still pertain to you even though you are no longer working with us. You may remember from our training session that once you become an institutional staff member, you retain this identity indefinitely. **Should you continue tutoring our student-athletes outside of our Academic Support Program, the eligibility of our student-athletes could be jeopardized.** The following NCAA regulations have been provided for further clarification.

Representative of Athletics Interests/Institutional Staff Member (Bylaw 13.02.13):
An individual, independent agency, corporate entity or other organization that is known by the athletic administration to:

- Be assisting or to have assisted in providing benefits to enrolled student-athletes or their families

By virtue of you being paid by the athletic department even if you work 2 hours a week, you are considered an institutional staff member. Institutional staff member includes an individual who performs work for the University or the Athletics Department, even if the individual is a student (e.g. student manager, student trainer) and/or does not receive compensation from the institution for performing such services. Once an individual is identified as such a representative, he/she retains this identity indefinitely. (Bylaw 13.02.13) Others considered in this category are coaches, professors, other students and student-athletes, secretaries, etc.

Thank you again for your time and dedication to the Academic Support Program for Student-Athletes.

Sincerely,

Robert Mercer
Director of Academic Support for
Student-Athletes

Dear Mentor:

Welcome to the staff of the Academic Support Program for Student-Athletes at the University of North Carolina. I am excited that you have joined us in our efforts to provide professional and high quality academic support to our student-athletes.

Your job as a mentor carries with it a great amount of responsibility and challenge. Our students run the full gamut in terms of ability, motivation, and areas of interest. As a mentor you can help the students reach their full potential. However, please keep in mind that student-athletes neither gain special privileges nor lose basic rights. They are to do their own work and reap the consequences, positive or negative. Likewise, they do not forfeit their right to confidentiality regarding their academic progress. The ethics and integrity which guide your own academic work fully apply here in the Academic Support Program for Student-Athletes.

This handbook is designed to help you understand our mentoring program and to clarify your role. Please read it thoroughly. If you have any questions, please feel free to ask our mentor coordinator or any full-time staff member. They are available to assist you at any time.

Over the years our program has become one of the finest in the country. A key ingredient to our success is having a staff of mentors committed to quality education. I appreciate your contributions to improving upon our tradition of academic excellence.

Best wishes for an enjoyable and rewarding experience.

Sincerely,

Robert Mercer, Director
Academic Support Program for Student-Athletes

Sundays	Closed unless special session is scheduled in advance

INTRODUCTION

The Academic Support Program for Student-Athletes is administratively part of the Academic Services unit of the College of Arts and Sciences. The program serves as an educational resource to students who participate in varsity athletics at the University.

We are committed to the true student-athlete concept, applying the same principles that have made superior athletes to develop superior students. A superior athlete is dedicated, hardworking, committed, and never misses practice. A student with the same qualities who never misses class will achieve the same high level of academic success.

Staff members include:

Robert Mercer	Director
Jenn Townsend	Associate Director, *jtownsend@uncaa.unc.edu* Men's Basketball, Women's Swimming, Softball
Beth Bridger	Associate Director/Learning Specialist, *bridgerb@uncaa.unc.edu* Football

MENTOR POLICIES and PROCEDURES

Requirements

Mentoring is similar to any other employment opportunity. As such, the following are required:

- Follow the rules and regulations of the Academic Support Center for Student-Athletes
- Arrive on time for all sessions. If you will be late, please call the Mentor Coordinator.
- Be in the room assigned to you within the Academic Facility.
- In the event you must miss a mentoring session, please inform the Mentor Coordinator so he or she can make alternative arrangements.
- Work only the hours assigned or requested. The Mentor Coordinator assigns all mentor hours. **Neither student nor mentors may make appointments for private sessions without the expressed approval of the Mentor Coordinator.**

Release and Dismissal

A mentor may be terminated for any of the following reasons:

1. Failure to uphold the general duties of a mentor as outlined in the handbook, including repeatedly failing to turn in feedback forms.
2. Failure to observe the rules and regulations of the Academic Support Program for Student-Athletes.
3. Failure to keep mentoring appointments.
4. Disruptive behavior that calls unfavorable attention to the mentor as a representative of the Academic Support Program for Student-Athletes, the student-athletes, or the University.
5. Unscheduled sessions and/or sessions outside of the Academic Center.
6. Violation of University or NCAA policies regarding academic honesty.

Confidentiality

Mentors are to maintain confidentiality in all areas regarding student-athletes. You may discuss a student's academic concerns only with the student and academic staff. You may not discuss the student's academic concerns with other students, faculty, or members of the community or media. This would be a violation of the student's right to privacy under the Buckley Amendment. ***Any question to the breach of a student's confidentiality will result in termination of employment.***

No Shows

Wait 30 minutes and then check in with the staff to see if you should leave (or use best judgment). Make sure to document on your feedback form and record 30 minutes on your TIMS timecard.

Evaluations

You will meet periodically with the Mentor Coordinator to evaluate the effectiveness of your mentor meetings. You will also be required to fill out an end of the semester evaluation form on your mentee and the mentor program. You are not personally evaluated by the grades of the students, but rather by your own performances in mentoring the students.

Parking

Day: We will not provide parking tickets for daytime tutors. You will be responsible for covering your own parking expenses.

Night: Mentors can park on campus after 5:00pm. No parking fines are issued after that time except during special events. It is a first come, first serve basis, so spots are limited. You can also park on Stadium Drive or any other eligible parking lots. We will ***not*** provide parking tickets for the parking garages or pay for DPS parking tickets.

Copies

All copies must be academic related and approved by a staff member. Any questions as to what this includes, please ask the Mentor Coordinator.

You may also take advantage of using our computer lab and free printing for feedback forms, academic related materials, etc. Personal copying/printing is not permitted.

Weather

Adverse Weather Hotline: 843-1234
If we are experiencing bad weather or have the threat of bad weather, please call the Mentor Coordinator for details of the day's meetings. If unable to reach, call 962-9536 after 5pm. A message regarding our plans for the evening operation of the building will be stated.

Announcements

Please check your email periodically for important notes and announcements from the Mentor Coordinator.

Dress Code

The Academic Center is a professional place of work. Even though you are working with students, our office is a place of business and a direct representation of the Athletic Department and University. Although formal business attire is not necessary, please abide by the following dress code:

Acceptable:

- Teacher/Business/Sport Casual

Not Acceptable:

- Low cut (cleavage baring), midriff exposing shirts or dresses
- Gym clothes such as mesh shorts, spandex leggings, etc.
- Strapless shirts or dresses
- High cut (rear-end baring) shorts, skirts, or dresses
- Excessively torn or worn blue jeans
- Clothes denoting inappropriate messages or logos

Behavior

Do not engage in "extra-curricular" activities with your mentee.
Please refrain from using or allowing your mentee to use foul language.
A mentor relationship is a special one of trust and respect. Be sure to not "cross" these lines.

Cell Phones /Non-Academic Websites/Music

These items are PROHIBITED during your mentor meetings. This includes mentees and mentors. On RARE occasions, a cell phone must be answered. As a mentor, please do this in a professional manner. Also, there are times when mentors are waiting to help mentees. Please DO NOT use this time to text message, access non-academic websites, or use headphones to listen to music. This is NOT the example we are trying to set for our student-athletes.

NCAA/UNC Academic Honesty Policy Form

As a mentor for the Academic Support Center for Student-Athletes, you are required to carefully read, sign, and date the NCAA/Academic Honesty Policy Form. The form provides guidelines that should be followed throughout your employment with the Academic Support Center. It is a statement indicating mentors will abide by all UNC and NCAA guidelines as articulated by the Academic Support Program for Student-Athletes. ***Failure to comply will result in immediate termination of employment*.**

Payment/Timesheets

1. We use **TIMS.** All time worked is recorded through this time management system. Before you begin work, you must complete the 15 minute online training: http://finance.unc.edu/university-controller/time-information-management-tim/welcome.html

2. Pay rate is established on an hourly basis. No additional pay is granted for simultaneously tutoring a number of students during a given time period. No additional pay is granted for preparation time outside of your scheduled hours unless an academic counselor has requested your services for a special assignment. No hours will be paid for unauthorized unscheduled sessions.

3. All time for tutoring must be stamped in and out on TIMS. Your times must be consistent with the Daily Tutoring Feedback Forms for that pay period; any irregularities in times will not be honored. **Time cards without approvals cannot be submitted for payment.**

4. Time cards should be **approved by noon on Friday** of the pay period ending the following Sunday. If you tutor on Sunday, you must approve your timecard by 10pm that night. If you do not approve your timecard, you will not be able to be paid, and these hours will be lost.

5. ***Paychecks will be issued only on a Direct Deposit basis***; two weeks following the day time sheets were submitted. (See the Tutor Board in the resource room for Pay Schedule)

6. If you run into an issue or problem with your timecard, please enter the information into the log next to the mentor computer on the 5th floor. **Do not email the Mentor Coordinator.** If it is not in the log, it will not get fixed.

7. You can use the computers in the Academic Center, download TIMS onto your own computer, or logon from anywhere using https://unctim.unc.edu/wfc/applications/wtk/html/ess/logon.jsp.

TIPS for TIMS

1. Don't forget to stamp in and stamp out. Computers available throughout the Academic Center.

2. IMPERATIVE to LOG OFF not just X out of the screen.

3. Approval—once you APPROVE your time card, it is over!! All time cards must be approved by **NOON on FRIDAY** of the time period. **IF YOU WORK ON SUNDAY, you must approve your timesheet by **10pm on SUNDAY**. If you do not approve your timecard, you will not be paid for these hours.

4. IF YOU MESS UP – you must fill out the TIMS log by the computer/copier on the 5th floor of the Academic Center.

5. If you mess up, get it fixed BEFORE you approve the timecard

6. Check your email for password expiration notices, if password expires, you can't stamp in/out.

7. Eliminate errors!!! Remind yourself, check your timecard after each log in. We do not enjoy fixing mistakes!

TIMS APPROVAL DATES
For the 2010-2011 Academic Year

August 27th

September 10th

September 24th

October 8th

October 22nd

November 5th

April 8th

April 22nd

May 6th

Feedback Forms

You must complete and submit feedback forms electronically through www. tarheelblue.com. Click on Inside Athletics, scroll down to Student-Athlete Development, Academic Support Program for Student Athletes, and then Information for Student-Athletes. Please use the Individual Tutor Report feedback for one-on-one sessions. http://tarheelblue.cstv.com/genrel/110904aac.html

Please see attached samples of typical mentor feedback forms. The appearance of the forms on www.tarheelblue.com will change slightly, but the relevant elements will remain. Please be thorough and prompt. Feedback forms need to be written for a "professional" audience. These will be read by academic staff members and coaches. Please be extremely detailed in your comments.

You will not be paid for hours worked unless there is feedback corresponding to the recorded hours. They do not only serve as a record for hours worked but become a part of the student-athlete's permanent file. Even if you have a face-to-face conversation with a staff member, you still need to submit a feedback form. Feedback forms are due by **NOON** the day following your meeting. The sooner the better. Feel free to utilize any of the computers in the academic center to complete your feedback form. This way you can complete your feedback form once your session is completed when the details are fresh in your mind, and clock out when you are done.

MUST DO LIST--ASAP!

1. **Fill out all hiring paperwork**

2. **Call/email to SET UP AN APPOINTMENT to meet with Human Resources**

   TRACY HARRIS
   962-7852
   tuh@uncaa.unc.edu

   You must MEET with her to submit your *hiring paperwork*.
   DON'T FORGET:

   PAPERWORK
   Social Security Card
   Driver's License
   Voided Check

3. **Call/email to SET UP AN APPOINTMENT to meet with Compliance**

   SUSAN MALOY
   962-9892
   sbmaloy@uncaa.unc.edu

   You must MEET with her to go over *NCAA Rules*. DON'T FORGET:

   Tutor Handbook (NCAA section)

4. **On-Line TIMS training at** http://finance.unc.edu/university-controller/time-information-management-tim/welcome.html

ALL ***MUST*** BE COMPLETED BEFORE YOU CAN BEGIN WORKING!!!

What is a Mentor?

Although the concept of mentoring has been around for many years, everyone seems to have his or her own definition. Webster's defines a mentor as a "trusted counselor or guide, a tutor or coach." The word "mentor" has its origins in Greek mythology. In the tale of Odysseus, when Odysseus went away on his famous 10 year odyssey, he entrusted his son, Telemachus, to his friend and advisor, Mentor. In Odysseus' absence, Mentor served as guardian, teacher, and father figure to Telemachus. **YOU ARE NOT A DISCIPLINARIAN!!!**

Purpose of the Mentor Program

The Academic Support Program for Student-Athletes sees a need for academically at-risk student-athletes to receive extra help from one person to develop skills necessary to succeed in college.

This program pairs an academically at-risk student-athlete with a skilled mentor to address general college survival skills as well as specific academic needs. The mentor provides guidance or advice by example and through practice with the mentee. Mentors will help to facilitate the student-athlete's transition through challenging periods in their academic experience. The mentoring process, if it is to be successful, must be done with a high degree of enthusiasm, confidentiality, and unconditional positive regard for the mentee.

Student-athletes could be identified as at-risk by the Academic Support Program for Student-Athletes' staff for many reasons such as a poor high school academic background, a diagnosed learning disability, difficulty adjusting to the academic rigors of UNC-CH, etc.

The purpose of this program is to introduce the at-risk student-athlete to the skills he or she will need to become a successful student at UNC-CH and to help the student-athlete to incorporate these skills into his or her individual learning style. The ultimate goal of the Academic Support Program for Student-Athletes is to produce independent, responsible, and confident learners.

It is important to find your approach with your mentee. Not all mentees are the same, so not all strategies are universal. Use your "people" skills to find what works and what doesn't. Will your student need constant "supervision" or is your mentee one that is good at taking direction and finishing tasks? "Typically" a friendly, laid back but structured, comforting environment can be one that is successful.

Characteristics of a Mentor

- Listen to and communicate effectively with others
- Recognize excellence (or steps towards it) and encourage it
- Like to help others
- Recognize when others require support, direct assistance, or independence
- Teach, guide, coach, and be a positive role model
- Willingness to share knowledge, skill, and experience
- Challenge for positive change to occur
- Patience
- Enthusiasm
- Ability to take initiative
- Maintain confidentiality
- Sense of humor
- Willingness to learn
- Ability to interact with individuals of different social, cultural, economic, and educational backgrounds
- Organized, efficient time manager
- Responsible
- Reliable
- Work as part of a team

Mentoring a Student-Athlete

It is important to understand what being a student-athlete at the Division I level of the National Collegiate Athletic Association is all about.

+What issues do you anticipate encountering with your mentee? (also consider a student who is also academically underprepared for college)

Some student-athletes lack the proper preparation for college work from high school. There are extreme demands on the time of a student-athlete with practice, travel, team meetings, and academics. There are also the pressures of winning and losing, eligibility concerns, family demands, and the list goes on.

As you come to know your mentee, you will learn which pressures are causing which results. This can be a great breakthrough in formulating how to best work with your mentee.

Example daily schedule:

6-8am	Weights
8-11	Class
11-12	Lunch/Break
12-2	Tutor Sessions/Meetings at AC
230-6	Practice/Film
6-7	Dinner
7-10	Study Table

MENTOR MEETINGS

Mentors will meet with their mentee in duration and frequency designated by the Mentor Coordinator. The following section will guide you through working with a mentee:

FIRST MEETING:

- Get to know each other. Here are some good communication starters:
    - Where are you from? Tell me about your family.
    - What position do you play, how is practice going? Why did you pick UNC?
    - What was high school like for you? How is it alike/different from college?
    - Hardest/easiest class?

- Reiterate the attendance policy and how the mentee MUST contact the staff member on duty if they are going to miss/be late for a meeting. Please follow up with the counselor via FF or at study table if your mentee is a no-show or late.

- Explain your role--how you can help them throughout the course of the semester.

- Review your set meetings times for the week. You can explain meeting length depends on how much work they have for the week and how efficiently they complete assignments. Length will depend on sport/student as well.

- REQUIRE mentee to bring all syllabi, Academic Planner, 3-ring binder, and class materials to each meeting. This is ESSENTIAL!! Make copies of all of his syllabi for yourself.

- Go over each syllabus. Make sure mentees have an understanding of: what their professor's names are, grading system, when assignments are due, criteria of assignments, absence policy, late work policy, etc. NAMES especially. Feel free to hi-lite.

- With syllabi, note which days student will miss due to competition. Encourage student to speak with professor about these absences IN ADVANCE!

- Utilize syllabi to help students organize responsibilities (academic, athletic, and personal). Fill in time management devices (preferably in pencil in case of changes). Start with the monthly calendars for the whole semester. Mark in dates for tests, quizzes, projects, papers, presentations and even extra obligations such as game schedule and CREED meetings.

- Fill in those same dates in the weekly planning sheets.

- Start on any assignments

"REGULAR" MEETINGS:

1. Promote *TIME MANAGEMENT*

Check the monthly calendar for important upcoming dates. Plan for each week. Go through each syllabus to plan and list readings and assignments for the week. Refer to the calendars and syllabi every meeting.

2. Promote *CLASS RESPONSIBILITY*

Check Blackboard and email for professor messages, announcements, and to access printouts/assignments for class. Stress the importance of class attendance, behavior in class, respect of professors/academic staff, encourage and motivate students to strive for improvement and excellence, always! Record and report any grades or teacher comments you actually see or hear.

3. Promote *PROFESSOR COMMUNICATION*

If your mentee has any questions or concerns about class/grades, facilitate how to communicate in person and via email to faculty/staff.

4. Promote *ORGANIZATION*

Spend 5-10 minutes organizing each section of the notebook and filing away any loose papers.

5. Promote and facilitate *DAILY WORK*.

Review class notes, lecture, and text materials every day. Check to make sure the student-athlete is taking notes in their classes. Go ahead and start on upcoming assignments. Do not neglect reading assignments in classes just because a paper is due.

6. Promote ACADEMIC SKILLS through Daily Work.

Record any progress or lack thereof made in the following areas that could be a red flag for learning deficiencies.

   a. Writing Skills
   b. Note Taking
   c. Test Taking
   d. Reading Comprehension
   e. Study Skills
   f. Stress Management
   g. Test Anxiety
   h. Any other deficiencies that may interfere with the student-athlete's ability to do his/her best academic work

ACADEMIC SKILLS

Note Taking

Test Taking

Reading Textbooks

Study Strategies

Motivation

+What issues would be of extreme concern when helping a student with a paper? What could be seen as a "gray area"?

WRITING

Things to consider when helping students with writing.

Basic Rules:

**If you write on a student's paper, it is NEVER to change content! Comments should be directed towards grammar, citing, and questions as to content, never writing content for the student.*

***Papers are NEVER to be emailed.*

****You should NEVER be on a student's computer. Written suggestions should always be made on hard copies of papers or as a verbal comment when the student is working. If a student is working on their computer, sit next to them but do not put your hands on their keyboard.*

Topics that can be addressed during writing assistance:

1. Understanding the Prompt/Topic
    a. Do you understand all the terms in the prompt?
    b. What type of essay will you have to write?
    c. Do you know what the teacher is looking for?

2. Research
    a. What type of sources do you need?
        i. Academic: journal article, newspapers, magazines (websites, .gov, .org, .edu)
        ii. Non-academic : websites, Wikipedia
    b. Do you know how to find these types of sources?
        i. Academic Search Premiere
        ii. Search Terms
        iii. Abstracts
    c. Can you find the information you need in the sources?
        i. Hi-light evidence to support your topic
        ii. Paraphrasing vs summarizing vs direct quotes

3. Outlining
    a. Whether they want to or not, they need to OUTLINE their papers, not just start typing
    b. The level of your student dictates how much of this process you assist with
    c. Never bad to start very detailed and see them develop throughout the semester

4. Introduction
    a. Attn grabbing first sentence
    b. History, background, explanations
    c. Thesis
        i. Topic
        ii. Stance
        iii. Reason

5. Body Paragraphs
    a. Topic sentence for each paragraph
    b. Claim
    c. Evidence to support claim
    d. Explanation
    e. Summary
    f. Always link to thesis

6. Conclusion
    a. Review of main ideas/points
    b. Restate thesis
    c. Final thoughts, conclusions, for the future, more info on, future research

7. Work Cited Page
    a. What type of citation does the teacher want?
    b. Follow St. Martins
    c. ABC order, single spaced, hanging indent
    d. Try to avoid citation machines, not very reliable!

8. Editing
    a. Read through multiple times
    b. Spelling, grammar
        i. Use colored pen
        ii. Have student hi-light/check off correction is made
    c. Content
    d. Structure
    e. Spacing, title, header/footer
    f. Sometimes mistakes will be overwhelming, work/focus on one thing at a time

Writing Rules of the Road – Tips for Success

1. Ask questions, lots and lots of questions. This stimulates the student to think about the question and answer it. This can help with brainstorming, understanding paper requirements, content, etc. Talk" through ideas and concepts for papers. Discussion helps ideas flow. Beware the student does not write down exactly what you say have them put it in their own words.

2. Use the white board to help the student brainstorm, make sure they write it down on their own paper as well.

3. Rather than tell or lead a student in the correct direction, prod their thinking by asking questions that will help redirect and clarify their own thinking.

4. Use colored pens when editing papers. Point out spelling/grammar/content/citing mistakes. With content, make sure all the ideas are the students.

5. If you can, go to the library with them to show them the ropes.

6. If you have a complete paper and there are good paragraphs with bad order and structure, cut (literally) the paper apart to see if you can reorder and make better sense of the content.

7. Read the students' paper to them to catch mistakes. Make it look DIFFERENT to the writer. Backwards Ruler.

8. Simply---Think about how you would help a peer. What techniques would you use with them? Would you write if for them? Is this paper their ideas/their voice?

9. Be conscious of how the student writes when he has received help versus how he writes when he is in class. Will the professor see it as consistent?

10. It is up to the student to take or leave your suggestions. You are serving as someone to provide feedback, not as a grader.

FURTHER DISCUSSION

‘Crisis’ Management

How will you handle the following?

- Unknown assignment or quiz
- Mentee didn’t do what you asked them to do from previous session
- Bad grade after a lot of time/work was spent
- Good grade after a lot of time/work was spent
- Continually on non-academic websites/won’t turn off cell phone/blasting music
- Refuse to do work when work has to be done
- You know they didn’t do work “individually”
- Several items due for different classes at the same time
- Unclear about what directions were given for particular assignments
- You over hear an interaction with another mentor/mentee that you feel is inappropriate or you have an interaction with a student who is not your mentee you feel is inappropriate.

My mentee made the following comment. What should I do? How should I respond?

- I hate this/I give up/I’m not going to do well anyways/ The teacher just doesn’t like me.
- I’m done, I already did it.
- I’m so tired.
- See I didn’t study and I did just fine.
- Jokes around/plays off a serious issue.

TOP TIPS for Mentors:

It isn't how much you know. It is how much they know you care.
Get to know the kids, it helps build trust. Find out their mom and dad's names, brothers and sisters, etc. Always threaten to call mom if they don't listen to you! Be interested in their sport and other parts of their life. Don't be all business all the time. Take a few minutes every session to see what's up with them. Only let them complain for a few minutes.

Maintain a professional relationship with the mentees; let them know that you have high expectations from the beginning and create an environment where they are accountable for themselves, their work, and you.

These kids do a lot of things wrong, but they also do a lot right. Remember to tell them how good they did when something goes well.

IF POSSIBLE---Make sure they complete assignments that are due the next day before the end of a tutoring session, if you know they are going to have a difficult time actually completing it after they've left the building.

Get their football number and let them know you want it so you can cheer for them at games.

Never accept "I did it already" for face value; ask to see the evidence!

When trying to write papers, form outlines, or brainstorm ideas for things (i.e. presentations, papers), have the guys talk it out with you, but always have a pen or dry erase marker in hand to jot down ideas as they say them. This way, they can see all the ideas they came up with without having to try to recall them all from memory. Then, take these ideas and apply them to the outline or whatever it is you're helping them with.

Don't create a situation where the guys are becoming too needy or dependent upon you. You want them to be accountable for their work and feel a sense of accomplishment. This sense of accomplishment leads to both confidence in themselves and motivation for future assignments/success.

Be flexible! Plans can change quickly. Some things may not work getting the idea across. Be willing to go with it and try different things to get the info across to the guys.

Always ask 'why', Don't just ask, "Does that make sense? Do you understand? They can tell you 'yes' without having a clue why. Always, always, always ask 'why', but also always be willing to take the time (and by time, sometimes it takes several minutes) to let them formulate and talk out their explanations until they come to whatever conclusion they reach themselves. You may have to prompt them a little by repeating something they just said and letting them finish or rephrase the thought, but make them explain it to you. BE PATIENT!

Break down assignments in multiple ways, to ensure that each individual student understands what they have to do. (i.e. on the board, on their calendar, and/or in their notes). Don't just tell them that we expect them to be organized; actually hold them accountable by checking their assigns/folders daily before they can leave.

Never ever ever forget to be straight with the guys. Don't sugar coat things. Due dates are due dates, and stuff has to get done. That's just the way it is. Also, celebrate every achievement even if it is little.

When you sense that your guys need a break and are losing attention to what they're doing let them take a break and come back. Summer session is quite tedious. I think it might be a good idea to reward your guys for working hard by giving the last 5 or 10 min of every hour as a break. This might also eliminate urges to get on facebook or cell phones during "our time".

Try to use a positive tone as much as possible when making corrections/suggestions. They are already self conscious so they need encouragement as much as possible

Never fall for flattery. They usually want something.

ONE MORE TIME…

MENTOR DOs and DON'Ts

1. **Abide by all the rules set forth by the Academic Support Program for Student-Athletes**
   - *The rules set forth in this handbook are for the protection of the mentors, student-athletes, and staff of the program. Following the rules set by the program is essential to the success and integrity of the program.*

2. **Never do any of the mentee's work or work harder than the mentee.**
   - *Do help assist the mentee with learning process and class assignments.*
   - *Should a student-athlete make such a request, or if it appears he or she may be involved in inappropriate activities, please bring it to the IMMEDIATE attention of the Mentor Coordinator.*

3. **Never assume the student-athlete did it**
   - *Do ask to see "evidence" the student-athlete completed an assignment*

4. **Never see or email the instructor in place of the student.**
   - *Do talk to the Mentor Coordinator about possibly contacting or getting more information from a professor*

5. **Do not discuss your mentoring sessions, including a student-athlete's academic performance or grades, with anyone other than an Academic Support Program for Student-Athletes' staff member.**
   - *Do feel free to see or talk to the Mentor Coordinator with any questions, comments, or concerns regarding your mentee or the mentor program.*

6. **Do not withhold information on your mentee from an Academic Support Program for Student-Athletes' staff member.**
   - *Please let the Mentor Coordinator know the "truth and nothing but the truth" when it comes to any part of your mentee's academic performance or behavior (feedback forms included).*

7. **Do not dress or act inappropriately in the Academic Center.**
   - *Please dress in a manner appropriate for a professional environment.*
   - *Please abide by the rules set forth by the staff and this handbook.*

8. **Do not contact Student-Athletes or allow them to contact you.**
   - *Only communicate with the Student-Athletes outside of your session by going through the staff.*
   - *Never email the Student-Athletes.*
   - *Any feedback you give a Student-Athlete on paper writing must be directly on the paper and take place when you are together in your approved, scheduled session at the AC.*

NCAA ELIGIBILITY REQUIREMENTS

Year of Eligibility	Semester Hours	Fall and Spring Combined Hours	Total Hours for the Academic Year	GPA requirement	Degree Progress (percentage of your degree that must be completed by the end of the indicated academic year)
1st year	6 per semester	18	24	1.8	--
2nd year	6 per semester	18	---	1.9	40%
3rd year	6 per semester	18	---	2.0	60%
4th year	6 per semester	18	---	2.0	80%
5th year	6 per semester	18	---	2.0	--

UNC ELIGIBILITY REQUIREMENTS

Year of Eligibility	Semester Hours	Total Hours for the Academic Year	GPA requirement
1st year	9 per semester	24	2.0
2nd year	9 per semester	51	2.0
3rd year	9 per semester	78	2.0
4th year	9 per semester	105	2.0
5th year	9 per semester		2.0

Things to consider:

- You must pass 6 hours per semester (NCAA). However, you must pass 18 for the fall and spring combined and 24 for the year. *Therefore, there is no way to only pass 6 hours per semester and still be eligible.*

- If you fall below a 2.0:
  - *You are put on probation*
  - *You must petition to continue at the University*
  - *If approved, you can return*
  - *You must raise your GPA to a 2.0 to stay*

- Just because you have a 4.0 semester does not mean you will be eligible to compete. *Classes must go towards your designated major.*

LEARNING STYLES

What type of learner are you working with?

It is important as a mentor to understand the learning styles of the student you are working with. Understanding different learning styles will not only help you transmit information to the student, but help the student retain and learn the content of the subject matter being tutored. Make sure to engage the student in conversation about how they learn best. Identifying a particular learning style can give you a guideline of ideas and strategies to use with the student you are tutoring.

There are 3 types of learners:

VISUAL

A student has to *SEE* the information to retain it.

Techniques:

- *Highlighting*: Identify key concepts and terms in text. Use different colors. Underline.
- *Concept Maps*: Use a variety of maps such as webbing, compare and contrast, tree maps, tables, charts, outlines, and time lines.
- *Notecards*: Hand write or create labels to put on index cards to memorize key content terms
- *Writing or Diagramming:* Chalkboards and dry erase boards provide a large area in which to dramatize information. Get the student involved as this also serves as a comprehension check of the particular concept.
- *Testing:* Develop a short quiz to evaluate and reinforce learning.
- *CD-ROMS*: Many textbooks include CD-ROMs of text information, practice quizzes, diagrams, and charts. These can be greatly utilized with visual learners.

AUDITORY

A student has to *HEAR* the information to retain it.

Techniques:

- *Paraphrase*: Restate what the student says to let them know you are listening to them. Also have the student repeat back to you in their own words a concept you have reviewed. This will not only reinforce the concept in the student's mind, but give you an idea of how they are grasping the idea. Paraphrasing will either make a concept clearer or it will demonstrate that more study or review is necessary.

- *Silence:* Sometimes it takes students who are auditory learners longer to retrieve and recall information. Do not be eager to jump in with the answer to a question without giving them a bit of time to think about it. Count to ten. This may seem like "awkward" silence, but you are giving the student a chance to process the information, alleviate feeling rushed, and help them develop confidence. This will also help the tutor session from being a one-way process.

- *Questions:* Ask questions on subject material and have students answer aloud.

- *Listen:* Use any information posted to web or software the student can listen to.

- *Read material aloud*: Have the student read text material, class notes, or any other information aloud.

TACTILE/KINESTHETIC

A student has to *WRITE THINGS DOWN/ DO HANDS ONACTIVITIES* to retain information.

Techniques:

- *Demonstration:* This is a great tool with science and lab classes. It can be verbal, but is most often activity based and shows how to do a particular task to solve a problem. Explain abstract ideas using concrete examples. This will help the student apply the idea over different situations.

- *Chalkboard or dry erase board*: Have the student do repetitive writing. Ideas and concepts will get ingrained into students' memories and almost "flow" out of their pencil.

- *Write out summaries*: Have the student write out summaries of concepts or ideas discussed during the tutor session.

- *Games:* Use any type of game or activity to serve as a review or learning tool. Anything competitive will help students learn. Examples: Matching game with note cards, quiz show, board games, Pictionary, worksheet races, etc.

- *Walk and talk*: Let the student walk around the room or up and down the hall while discussing class notes or class related information.

Attention Deficit Disorder (ADD)/ Attention Deficit and Hyperactivity Disorder (ADHD)

Characteristics: Easily distracted, fidgety, loss of attention, unprepared for meetings, "scatter brained".

Techniques:

- *Set a game plan*: What will you do for the session? What will you specifically cover? Set a plan and then go over this plan with your student at the beginning of each tutor session.

- *Breaks:* Integrate breaks during the tutor session. Allow 1 to 2 breaks during the session (probably not to exceed 5 minutes each). These could include a bathroom break, water break, or even just walking around the Academic Center.

- *Quiet distraction free environment*: Utilize the tutor rooms with the door closed to block out outside noise and distractions.

- *Personal conversations*: Although we want you to build a trusting relationship with the student, try to avoid in-depth, long, personal conversations. For the student with ADD/ADHD, this is the perfect distraction for avoiding work.

Final Thoughts

- Try to engage the student in open ended questions. Asking yes or no questions usually will not gauge how the student understands the information. Also pertains to, You understand? Got it? It is much easier to say, "I understand" then actually having to answer a question or explain a concept. ASK WHY?

- If you are having difficulties with your student or need ideas to better help your student, use your feedback form to voice these concerns. This is a great communication tool for any thoughts, ideas, or concerns you have. Also, feel free to contact the tutor coordinator. Being a tutor means you have the background and ability to tutor, but does not ensure that you have "all the answers". The important thing to know is when and how to ask for information and help.

EDUCATION SESSION FOR DEPARTMENTAL TUTORS/MENTORS/MONITORS REGARDING NCAA REGULATIONS
Updated 8/19/10

Representative of Athletics Interests/Institutional Staff Member (Bylaw 13.02.12):
An individual, independent agency, corporate entity or other organization that is known by the athletic administration to:

- Have participated in promoting the institution's athletics program
- Have made financial contributions to the athletics department or booster organization
- Be assisting or to have been requested by the athletics department staff to assist in the recruitment of prospects
- Be assisting or to have assisted in providing benefits to enrolled student-athletes or their families

By virtue of you being paid by the athletic department even if you work 2 hours a week, you are considered an institutional staff member. Institutional staff member includes an individual who performs work for the University or the Athletics Department, even if the individual is a student (e.g. student manager, student trainer) and/or does not receive compensation from the institution for performing such services. Once an individual is identified as such a representative, he/she retains this identity indefinitely. (Bylaw 13.02.13) Others considered in this category are coaches, professors, other students and student-athletes, secretaries, etc.

Unethical Conduct (Bylaw 10.1)
Unethical Conduct by a current or former institutional staff or a prospective or enrolled student-athlete member may include, but is not limited to, the following:

- Refusal to furnish information relevant to an investigation of a possible violation
- Knowing involvement in arranging for fraudulent academic credit or false transcripts for a prospective or an enrolled student-athlete
- Knowing involvement in offering or providing a prospective or enrolled student-athlete an improper inducement or extra benefit, improper academic assistance or improper financial aid
- Receipt of benefits by an institutional staff member for facilitating or arranging a meeting between a student-athlete and an agent, financial advisor or a representative of an agent or advisor.

Academic Fraud and Academic Offense
The differences between academic fraud and an academic offense determine whether or not the incident must be reported to the NCAA or not. An institution is required to self-report a violation of Unethical Conduct if an institutional staff member (e.g. coach, professor, tutor, etc.) is knowingly involved in arranging fraudulent academic credit for a prospect or an enrolled student-athlete. Examples of this would be: 1.) if an institutional staff member is involved with assisting a student-athlete in obtaining grade changes in course work, especially if the grade change was unearned, or typing a paper for a student-athlete; 2.) if a student-athlete receives improper academic assistance from an institutional staff member, regardless of credit obtained; and 3.) if an institutional staff member provides improper assistance to prospective or enrolled student-athletes in correspondence and/or online courses via writing papers, taking quizzes and finals, etc.

An institution is also required to self-report a violation if a student-athlete knowingly becomes involved in arranging fraudulent academic credit. An example of this would be if a student were to purchase a term paper off the Internet and turns it in for course credit. (e.g. "Apex-Termpapers.com") Also if a student-athlete cheats, does not get caught and it is later determined that he/she cheated.

Other examples are:

- Signing a student-athlete's name on an attendance sheet in a course where participation/attendance is part of the final grade.
- Preparing and typing papers for student-athletes.

- Obtaining a fraudulent medical excuse on behalf of a student-athlete for the purpose of obtaining extensions to take exams and contacting faculty members in connection with the extension.

If a student-athlete commits an academic offense (e.g. cheating on a test, plagiarism on a term paper and gets caught) with no involvement of an institutional staff member, the institution is not required to report a violation; however, this incident as well as those above must be addressed through the University Honor Court system. An academic offense is considered academic fraud and must be reported to the NCAA if the offense results in an erroneous declaration of eligibility and the student-athlete subsequently competes at UNC.

If you become aware of anything that appears to be unethical even if it is merely a rumor, we would like for you to make us aware. Any violation that goes unreported may cause huge problems in the future. The penalties will certainly be greater than if the self-report was made at the time of the incident. Keep in mind that cheating that does not provide enough assistance to enable a student-athlete to pass the course does not lessen the violation. Also, improper assistance provided to a student-athlete who is not specifically assigned to you does not diminish the seriousness of the violation.

Extra Benefits (Bylaw 16.02.3)
An extra benefit is any special arrangement by an institutional employee or a representative of the institution's athletics interests to provide a student-athlete or the student-athlete's relative or friend a benefit that is not expressly authorized by NCAA legislation. Receipt of a benefit by student-athletes and/or their relatives or friends is not a violation of NCAA legislation if it is demonstrated that the same benefit is generally available to all of the institution's students or a particular segment of the student body.

Bylaws and Interpretations of incidences that constitute an extra benefit:

1. Writing and/or Typing a paper for a student-athlete or paying the typing costs.

2. Professor providing special study materials only to student-athletes.

3. Providing old tests to student-athletes that have not been approved by the professor. Report to an Academic Support staff member to discuss the use of old tests/quizzes prior to using them in your tutor sessions.

4. Professor offering special treatment to a student-athlete and providing a grade for eligibility purposes.

5. Professor giving a grade that the student-athlete did not earn.

6. Providing library books or other research materials to the student for purposes of writing a paper.

7. We are permitted to purchase textbooks for a student-athlete on scholarship. This does not include course supplies (e.g. calculators, notebooks, art supplies or other study materials not specified on the course syllabus). Students may come to you unprepared and you may want to help by providing them with a notebook and other materials that you thought would help them pass the course. This would not be permissible although you may certainly make a strong suggestion that they bring these materials to your next session.

8. Providing student-athletes with CDs, zip drives, etc. in the computer lab is not permissible no matter what kind of a bind they are in with their course work. Another issue with CDs and zip drives could come up that borders on the line of academic fraud and that is, if a student turns a paper in to you on CD or through email and not a hard copy asking for you to proof it. **Corrections may not be made**

directly on the document saved on the CD. Additionally, a tutor should NEVER type on a student's computer.

9. Use of a copy machine and/or fax machine is prohibited. Tutors and mentors must see the counselor on duty to request the use of the fax and copy machines for any purpose.

10. Printing long documents should be carefully monitored.

11. An institutional staff member may not provide payment of any expenses (e.g. room, board, transportation etc.) for friends or relatives to visit a student-athlete at the institution where he or she is enrolled.

12. An institution may not provide the student-athlete with an automobile, under any circumstances. Tutors and mentors may not provide transportation to student-athletes for any reason, even if the student-athlete provides reimbursement of expenses. (A University student who is also a part-time employee of the athletic department and is an established family friend of a student-athlete may continue to provide transportation and occasional home meals to the student-athlete based on the individual's preexisting relationship.)

13. A student-athlete or the entire team in a sport may receive an "occasional meal" from an institutional staff member or booster/representative of athletics interests under the following conditions:
    - If provided by a booster, the meal must be provided in the booster's home, on campus or at a facility that is regularly used for home competition. It may, however be catered.
    - If an institutional staff member provides the meal, it may be at a restaurant, but <u>must</u> be in the locale of the institution.
    - In either case, the booster or the staff member may provide reasonable local transportation to the student-athletes to attend the meal.
    - Meals must be restricted to infrequent and special occasions
    - **Most importantly, the staff member or booster must notify the compliance office, receive permission to provide the meal, and complete the necessary paperwork.** This must occur PRIOR to the meal. **Failure to follow this policy could result in an NCAA extra benefits violation.**

14. A student-athlete may not receive a special discount, payment arrangement or credit on a purchase or a service from an institutional staff member or a representative of athletics interest.

15. A student-athlete may not receive services (e.g. movie tickets, dinners, use of car, etc.) without charge.

16. It is not permissible to allow a student-athlete to use a telephone or credit card for personal reasons without charge or at a reduced cost. A staff member may not make a charge on their personal credit card for which a student-athlete will reimburse.

17. An institutional staff member or representative of athletics interest may not provide a student-athlete with a loan even if the student-athlete plans to repay the loan.

18. An institutional staff member may not arrange for another individual to provide benefits for an enrolled student-athlete and/or their relatives and friends.

Online Courses and Exams

It is against UNC and NCAA policy for an institutional staff member to assist a student-athlete or prospective student-athlete with any online quizzes or exams. Some regularly enrolled courses at UNC have an online component, in which students may attend class each week and take quizzes and exams online, but the course is not identified as a typical online course. With this in mind, if a student-athlete

should request assistance with an online assignment, please be sure to ask them if the assignment will be graded before working with the student. A professor may authorize group work with online assignments. If so, please ask for written verification before working with the student. Although, online coursework can be accessed from anywhere, remember that institutional staff members (tutors, mentors, etc.) are asked NOT to work with student-athletes outside of the Academic Support Center for Student-Athletes.

Additional Information

Contact with Student-Athletes Outside of the Academic Center – All tutoring and mentoring should be conducted in the Academic Center ONLY. **Student-athletes should not be contacting tutors and mentors vial phone call, email, social networking sites, or text messaging to arrange additional academic assistance after hours outside of the Academic Center. NO tutoring/mentoring sessions may be conducted outside of the Academic Center.**

Complimentary Tickets – An institution may provide four complimentary admissions per home and away contests to a student-athlete in the sport in which he/she is participating. However, admissions shall be provided only through a pass list for individuals designated by the student-athlete, and "hard tickets" shall not be issued.

Gambling – Student-athletes and athletic department staff members may not participate in sports wagering activities or provide information to individuals involved or associated with any type of sports wagering activities concerning intercollegiate or professional athletics competition.

Assisting with Writing a Paper – Do's and Don'ts

I. How to begin without an idea

- 50% of the paper is what you do before you write
- Review the assignment together on the syllabus and underline key points in the assignment.
- Talk to the student about the main idea and what 3 points they want to make
- Ask a series of questions until he/she has developed a thesis and an argument
- Students should be taking notes during the brainstorming discussion rather than the tutor. **Although the tutor may write on a separate sheet of paper (i.e. mapping, outlining), the tutor must keep the paper and the student should leave with their own written copy of the notes from the session.**

II. How to assist with research

- A tutor may go to the library with the student to teach him/her how to find research materials and point them in the right direction.
- **A tutor may not Check-Out and/or provide library books or other research materials to the student for purposes of writing a paper.**
- A tutor may teach a student how to use the Infotrac and how to choose the best articles rather than the first 3 on the list.
- A tutor may teach a student how to research a topic on the internet by helping them to come up with good search words.
- **A student must take their own notes on the research; however, a tutor may discuss the material.**
- A tutor may teach a student how to look beyond the internet for resources.
- A tutor may help a student determine if the source is reliable for the assignment by teaching them strategies/skills on how to think critically about sources and analyze the research.
- A tutor may recommend books and experts within the area they are writing about to talk to.

III. **How to Assist in the Writing Process**

- Teach a student how to structure a paper with an outline.
- Teach a student how to skim the resource and put the material into their own words.
- Have them talk about what they want to say as they are writing. Use a tape recorder if a student is having trouble remembering his/her thoughts. **A tutor should never be writing on a student's paper during any stage of the paper to change its content.**
- Have the student read what he/she has written out loud to see if it makes sense and to listen for mistakes.
- Teach them how to properly site resources used within a paragraph.

IV. **Proper Ways to Proofread/Edit a Paper**

- **A tutor/mentor should NEVER type on a student's computer.**
- **A tutor should never take a pen to the student's paper to alter its content that will ultimately turn a "D" paper into a "B" paper.**
- **If you circle misspelled words or punctuation that Spell Check is unable to catch, use a colored pen and be sure to write your initials beside any markings on the paper.**
- **Do not let a student drop off a paper for you to proofread and return in an hour.**
- **Do not read papers from a student's disks or laptops, only from printouts.**
- **Do not accept papers from students via email.** Should a student send you an email with a paper attached, simply reply stating that you are not permitted to assist the student with their paper that is sent electronically. Please instruct them to bring a hard copy version (ONLY) of the paper to you during your tutoring hours.
- Review the structure of their paper to be sure that they have a good thesis and argument.
- Review their works sited according to the appropriate style manual.
- In parts of the paper that do not flow, ask the student to talk about what he/she meant to say.
- Have the student read the paper out loud and listen for mistakes.

When in doubt…."Editing becomes a violation when the thoughts on paper are no longer those of the student-athlete."

TUTORING TECHNIQUES

TOOLS FOR THE TUTOR SESSION

Course Syllabus

- Review the syllabus with the student to identify requirements of the course, test dates, and assignment deadlines.
- Discuss use of tutoring surrounding these dates for test readiness, emphasizing that last-minute tutor sessions are useful only for cursory review.

Class Notes, Tests, and Homework Assignments

- Review notes, old tests, and homework with the student to pinpoint the student's strengths and weaknesses in the course.
- Assist the student in effective note taking.
- Review incorrect and correct answers from old tests or homework assignments.

Textbook

- Help the student to read actively.
- Analyze a section of the text with the student, asking him/her to look for major themes.

GUIDELINES FOR WORKING WITH STUDENTS

Student Involvement

- Emphasize the importance of student involvement in the learning process: advance preparation, effective note taking, active listening, and class participation. Repeatedly remind students of the negative effects of procrastination and last minute efforts.
- Involve the student in the discussion of material and explanation of problems. Your goals are to guide rather than teach, show rather than tell, and question rather than lecture.

Communication

- Listen actively to the student--what he/she is saying and how he/she is saying it.
- Ask open-ended questions that illicit conversation.
- Follow the student's pace, slowing down if necessary.
- Observe how the student approaches a problem; this pinpoints where you need to begin with the student.
- Report any problems or concerns to one of the academic counselors.

Encouragement

- Be supportive of students, especially those who appear lost or frustrated.
- Reinforce positive academic behavior; give reassurance for efforts and improvements made.
- If you are confronted with a problem that is more emotional than academic in nature, inform the academic counselor for that student's sport.

IMPORTANT DATES

University Holidays
During Fall Semester 2010 &
Spring Semester 2011

UNC HUMAN RESOURCES

CONDITIONS OF EMPLOYMENT
SPA TEMPORARY EMPLOYEES

Appointment Type:	**Temporary Employee**	**Offered to:**	
Position ID:		**Hourly Pay Rate:**	
Department Name:		**Effective Date:**	
Department Number:		**Supervisor:**	

In order to be employed with the University of North Carolina at Chapel Hill as a Temporary Staff (SPA) Employee, you must agree to the following conditions of employment:

1. I understand that any offer of employment is conditional pending the completion of the University's required criminal conviction check. I understand a criminal conviction in and of itself does not disqualify me from employment at the University. I understand that in the event a criminal conviction record is discovered where I had not listed it on the employment application, I may be disqualified from employment in this position, and any other position at the University, for falsification of the employment application. I also understand that due to the nature of some criminal convictions, employment in certain positions at the University may be unavailable to me. I understand that in the event that thirty (30) calendar days have elapsed since the initiation of my criminal convictions check with the University's Department of Public Safety, I may be allowed to begin work at the University with the understanding that my employment offer may be rescinded if the criminal convictions check when received discloses information that affects my selection. I understand that before a final decision would be made to rescind my appointment, I would have the opportunity to provide any exculpatory or explanatory information.

2. Federal law requires each new employee to complete the "Employee Information and Verification" section of the U.S. Citizenship and Immigration Services (Form I-9) and to submit certain original documents for examination in order to verify and certify identification and employment eligibility. In compliance with N.C. law, the University verifies each individual's legal status or authorization to work in the United States after hiring the individual using the Department of Homeland Security's E-Verify Program. I understand that my employment will be terminated if I fail to comply with the employment authorization requirements or if it is determined that I am not authorized to work in the United States.

3. State policy requires each Permanent Staff employee to be at least 18 years of age, and State law requires the University to have these individuals indicate their compliance with the Federal Military Selective Service Act. Initial the appropriate response below.
   _____ (*initial*) I certify that I am required to be and have registered with Selective Service, OR
   _____ (*initial*) I certify that I am exempt from registering with Selective Service, OR
   _____ (*initial*) I certify that I am required to be and have NOT registered with Selective Service.
   I understand that if I am not registered but am required to be, I MUST do so no later than 30 days from the appointment date indicated on this document in order to stay employed at the University. I understand that failure to comply with the registration requirement bars a person from State employment.

4. I understand I am required to provide my Social Security Number so the University can satisfy its income-reporting and withholding obligations under North Carolina and federal laws. Unless this sentence is marked through and initialed by me, I voluntarily permit the use of my social security number for internal record keeping and information management operations. However, I understand I have been randomly assigned the personal identification number (PID) indicated on this document, which the University will use instead whenever possible.

5. I understand that the University requires all presently-hired employees to be paid by direct deposit into a bank or credit union account, and that pay stubs will be provided to me electronically through the University's E-pay program. In order to satisfy this requirement, I understand I must either present a deposit slip or voided check during my assigned Job Offer Acceptance Session or submit the direct payroll deposit authorization (Form PR-8) to the University Payroll Department by the end of my first work week. My signature below certifies I understand I will not receive a paycheck from the University until the appropriate payroll forms have been completed and submitted.

Employee's Initials: _____ Human Resources Rep Initials: _____

6. I understand that the rules governing my work schedule, meal and break periods, time records, pay day, wage-hour status (for overtime purposes), and the policies covering equal employment opportunity, reporting an on-the-job injury, workplace violence, illegal drugs in the workplace, and other policies as listed on the "Certification of Review of Relevant Employment Policies" have been provided to me by a department representative.
7. I authorize the University to withhold from my final paycheck the cost of any keys, uniforms, or other State-owned property I fail to return when my appointment ends. I also authorize the University to withhold from my final paycheck the amount of any other debt I owe to the University, subject to Wage-Hour requirements.
8. I understand that I am required to comply with the University's Department of Environment, Health and Safety (EH&S) policies and procedures regarding vaccinations, medical surveillance or other required safety training within the first 10 days of my employment. I further understand that if my position places me in a healthcare environment or if my duties involve healthcare, I also must complete the items outlined in the "EHS Conditions of Employment" document in accordance to the time frames and frequency specified. I understand that this document will be provided to me by my appointing department and that if I do not receive this document and my position places me in a healthcare environment or my duties involve healthcare, I can find information regarding these policies and procedures on the web at: http://www.ehs.unc.edu/manuals/ehsmanual/docs/5appendixb.pdf or from my supervisor, my departmental Human Resources Facilitator or Manager, or by contacting EH&S by telephone at 919-962-5507.
9. I understand that to comply with University policy, if my position's duties include engaging in University healthcare activities, I must disclose to my Department Head, Dean, Division Chief, the Office of Human Resources Employee & Management Relations Division or the Chair of the University's AIDS Task Force if I am currently, or later become, infected with either the HIV or the Hepatitis B viruses.
10. I understand that the University follows a "Smoke Free" policy and that smoking is not allowed within 100 feet of all University facilities, both on and off campus. I also understand that smoking in state-owned vehicles is also prohibited.
11. I understand that the only employee benefit programs in which I am eligible to participate are the voluntary 403(b) supplemental retirement and/or U.S. savings bonds programs.
12. I understand that my appointment is for a period of twelve calendar months or less, if retained, from the date of my first work day at the University of North Carolina at Chapel Hill (University) and that if I work for the University for 1500 hours or more within a 12-month period, my appointment must be terminated (effective no later than the last day of that 12-month period). I understand that I will not be eligible to be re-hired by the University in a temporary capacity for a minimum period of 31 days after the date my appointment was terminated.
13. _____ *(initials)* **For retirees only.** I understand that State policy allows me, as a retiree, to work longer than twelve consecutive months regardless of the number of hours I work, and that my initials beside this condition certify that I am retired, am not available for (or seeking) permanent work, and have benefits (like health insurance) through my retirement plan.
14. I understand that in the event that I accept a permanent position with another North Carolina state agency or with another University department, I must inform my hiring department and terminate my temporary appointment.

Subject: Fwd: major timestamp problems

Attach: TEXT.htm

Folks,

There is apparently a major issue with time stamps and teletime for this past week-end. When approving time cards of employees who use time stamp and teletime, PLEASE BE SURE THAT THEIR TIME HAS BEEN ACCEPTED IN THEIR TIME CARD. Apparently time the employees thought was entered is somehow not staying in the system creating time cards with no time. Please see the notes below from campus as to what you may need to do. This appears to be a TIM issue that is campus-wide and I have reported it, and I hope they are able to address this issue soon.
Thanks for your patience with this matter.

Joyce

>>> Joyce Dalgleish 2/28/2011 9:10 AM >>>
Kristen and TIMSUPPORT,

It appears there is a major issue with time stamp...see the note below from one of my supervisors, and I just got a call from another supervisor that said all of her folks who time stamped in for an event last night have no time showing in their time cards. Please respond ASAP as we have a lot of folks using time cards.

"..... we had multiple time stamp and approval problems over the weekend. People did not have time stamps recorded today and could not approve their timecards."

Thanks,

Joyce Dalgleish

Attach: TEXT.htm

Below is a message from campus about the Time stamp and teletime issues that I sent a few moments ago. PLEASE READ AND FOLLOW THE INSTRUCTIONS IN KRISTEN DUNIVANT'S MESSAGE DIRECTLY BELOW. This will enable the programmers to work on this issue. Please let me know if you have any questions.
Thanks,
Joyce

Joyce,

We appreciate you making TIM Support aware of the issue and for clarifying that it was TimeStamp and Teletime that had the issues.

Please note in the future that the ITS Control Center is open 24 x 7 and would have been able to contact the TIM technical team last evening with this issue so the issues could have been investigated and hopefully resolved.

If the supervisors could call 962-HELP and provide the following information for each timeframe over the weekend that had issues-

* Approximate times in and out for the timeframe
* Employees names and pids working in that timeframe
* If the employee was using TimeStamp or TeleTime

Thank you,
Kristen

THE 9TH TIMOTHY B. & JANE A. BURNETT SEMINAR FOR ACADEMIC ACHIEVEMENT
SPARK: The Revolutionary New Science of Exercise and the Brain
REGISTRATION REMINDER

An Afternoon with John Ratey
Wednesday, Nov. 17 | 1:30 - 4 p.m.
George Watts Hill Alumni Center

Thank you to those who have already registered for the 9th Timothy B. and Jane A. Burnett Seminar for Academic Achievement, featuring John Ratey, M.D. We have had a wonderful response to this program and are expecting a full house. If you are no longer able to attend, please let us know so that we can finalize our plans.

For those of you who plan to attend but haven't yet registered, you may do so at alumni.unc.edu/AcademicSuccess.

SPARK: The Revolutionary New Science of Exercise and the Brain
John Ratey, Harvard Medical School associate clinical professor of psychiatry and best-selling co-author of Driven to Distraction, will discuss principles from his latest book, Spark: The Revolutionary New Science of Exercise and the Brain on Wednesday, Nov. 17.

The seminar, held at the George Watts Hill Alumni Center, is targeted to high school and college students with LD/ADHD, as well as parents and the professionals who work with them. This program is sponsored by the Academic Success Program for Students with LD/ADHD - A Learning Center Program in UNC's College of Arts and Sciences and the General Alumni Association.

This event is free and open to the public. Preregistration is strongly encouraged. You may register online at alumni.unc.edu/AcademicSuccess.

If you plan to bring a group by bus to this event, please contact Ann-Louise Aguiar '76 at (919) 962-3574 or ann-louise_aguiar@unc.edu. If anyone in your group has special needs, please indicate your needs when you register. The University of North Carolina maintains a policy of equal education opportunity.

i've corrected a couple of typos that were on the revised testing policy i sent out yesterday.

-mark mccombs

Revised MathPort Testing Procedure

Fall 2005

ALL TESTS ARE CLOSED BOOK AND CLOSED NOTES

**** Due to flaws in the online testing software, all remaining Math 10 graded tests, including the final exam, will be administered in "pencil and paper" format so that they can be graded with partial credit for work shown. ****

COMPUTERS WILL NOT BE USED FOR GRADED TESTS.

ALL RECITATION SECTIONS now have the following testing deadlines:

- **The deadline for Test 2 is Tuesday, October 11.**
  Test Covers Text Sections 2.1–2.5, 7.1
- **The deadline for Test 3 is Wednesday, November 2.**
  Test Covers Text Sections 3.1–3.5, 4.5
- **The deadline for Test 4 is Wednesday, November 30.**
  Test Covers Text Sections 4.1, 5.1, 5.3–5.6
- **The final exam is Tuesday, December 13.**

Scheduling a test:

1. You may take a test before or on the deadline.
2. Once you decide what day you will take your test, you must schedule an appointment to take the test during regular MathPort operating hours. Testing times will start "on the hour" (noon, 1:00, 2:00, etc.), and the number of students that can schedule any given hour will be limited to 25. **You will be notified you via email as soon as the online scheduling webpage is available.**
3. The only time that it is not necessary for you to schedule a testing appointment is if a test deadline falls on the day that your recitation section meets. In that case, if you do not wish to take your test an earlier day, then you may take it during your scheduled recitation time.
4. **You may take each test one time.**
5. Each test has a 50-minute time limit.

Counselors:

After submitting the ACC Honor Roll list to the Registrar's Office for their approval, I received an response (attached) indicating a few potential errors. If you could please review the list of names, find those on your teams, and let me know whether or not you agree or disagree with the suggestion to add/remove their names, I would appreciate it. Thank you.

Re: 2005 All-ACC Academic Football Team

Date: January 6, 2006

Attached is the nomination form for the 2005 All-Atlantic Coast Conference Academic Football Team. The All-ACC Academic football team is based on a combination of the student-athlete's academic achievement and football-related performance.

Nominate any player who achieved a minimum 3.00 grade-point average for his last semester/quarter and has at least a cumulative 3.00 GPA for his career. Note that this year's minimums have changed from what has been used in the past. Formerly, a combination of a 2.75 and a 3.00 for either the past semester and career was required.

Forward your nominations to my attention via email or fax

(336-854-8797).Once nominations are received; the All-Academic Team will be selected by a committee appointed by the Commissioner.

Please return the form to me no later than Tuesday, January 24, 2006

Subject: ACC Honor Roll
Attach: Honor Roll Form.xls

Staff:

The time of year has come again when we have to submit all 1,000,000 names for the ACC Honor Roll for the 2007-08 academic year. I am asking for all of your help in compiling the comprehensive list in which I will ultimately put together once I receive all the nominees.

I ask that you download the attachment and complete the Excel document as it indicates on the actual form. It instructs us to put the names alphabetically rather than by sport, but you may send it to me by sport rather than combining all of your sports into one list.

This is a very lengthy and tedious process so I ask that you get this back to me as soon as possible. I will be out of the office until June 16 and plan to start working on this task June 17. Everyone should already have a list of their nominees because of the grade composite that we all updated after this past semester.

You will notice that we have to identify who lettered in their respective sport. If you do not know, please leave the line blank.

To refresh everyone I have added the criteria:

1. Have participated for the full school year (September to June) in one of the intercollegiate sports recognized by this institution.

2. Have attained a B average for the full school year (September to June). (see No. 3 under criteria)

The ACC HONOR ROLL is established on the following criteria:

1 A student-athlete must have participated (played and/or practiced) in an intercollegiate varsity sport, not a club team or junior varsity team, officially recognized by your institution during the 2007-08 academic year.

2.The ACC Honor Roll will include December graduates provided the student-athlete was a full-time student in the fall semester of 2007-08 academic year and the qualifying GPA be based on his/her last 24 credit hours.

3.Student-athletes who are considered medicals qualify as well, as long as the medical situation was incurred during the 2007-08 academic year.

4. Redshirts will qualify, if they are on the team roster and practicing.

5. Managers and trainers will not be included on the ACC Honor Roll.

6. An institution may consider members of any sport that is designated a varsity sport by that institution for inclusion on the ACC Academic Honor Roll list.

Thanks so much,

Spencer

Coaches:

Please share the attached flyer with your seniors. This is in regards to the ACC Postgraduate Scholarship that is coming up next month. It is a $5,000 scholarship provided by the ACC to the graduate institution of the students choice. An email to your team about this would be greatly appreciated.

This is a great opportunity for individuals who are planning on attending graduate school next year.

Thanks,

Spencer Welborn

Advisors: Please let me know of anyone who you think may be interested.

ACC POSTGRADUATE SCHOLARSHIP

DUE January 23, 2009

Are you interested in attending graduate school next year? If so, you may be eligible for the ACC Postgraduate Scholarship!

The ACC will award a $5,000 scholarship for the winners of this postgraduate award. Presentations of the winners will take place at the Awards Luncheon on Wednesday, April 16, 2008

If you meet the following criteria please see Spencer Welborn in Academic Services:

To be eligible for consideration an applicant shall have:

1. Distinguished himself/herself academically with an overall minimum accumulative grade point average of 3.0 or its equivalent.

(a) Completed at least seven semesters; students engaged in undergraduate programs requiring more than four years for a baccalaureate degree shall be considered during their final year of intercollegiate athletic competition.

(b) Students who compete as graduate students may be selected only after their final year of intercollegiate athletic competition.

2. Performed with distinction as a member of a varsity team. Supporting information from coaches should comment on the standing of the nominee relative to others in the conference and nationally.

3. Conducted himself/herself, both on and off the field, in a manner, which has brought credit to himself/herself, his/her institution, intercollegiate athletics, and the ideals and objectives of higher education.

In selecting recipients for this award:

1. The degree of the student's athletic achievement shall be weighed at least equally with the degree of his/her academic performance.

2. Consideration shall also be given to his/her participation in campus activities other than academic and athletic in which he/she has demonstrated his/her qualities of leadership and has served as an example to his/her fellow students.

3. Need shall not be a factor in granting these awards. The award of support for post-baccalaureate study from other sources will not make the student-athlete ineligible for these awards.

4. Applicants must be continuing academic work beyond the baccalaureate degree as a full-time graduate or professional student and have been judged capable of such study by his/her major professor, major department head or dean of the college in which he/she is enrolled. The recipients of the award must use all scholarship money within three academic years from the fall semester after selection.

Subject: Carolina Panthers Internship
Attach: Foundation for the Carolinas Description.docx

Staff:

I have attached a flyer for your viewing regarding the Carolina Panthers Internship sponsored by the Foundation For The Carolinas.

This is a scholarship for female student-athletes and male football players only. The flyer indicates the nominating criteria and what the selection committee emphasizes on when making a final decision.

It appears that the student must be planning on attending graduate school next semester which is a very important factor to consider.

Please review the flyer and get back to me with any suggestions on who you would like to nominate. This is an award based heavily on leadership and service.

Thanks.

Spencer

Cricket: Please feel free to send names of students that have spent a lot of time with you volunteering their time in the community.

Foundation for the Carolinas

CAROLINA PANTHERS GRAUATE SCHOLARSHIPS

Foundation For The Carolinas is pleased to make available two graduate level scholarships through the Carolina Panthers Scholarship Fund of up to $10,000. Each year this fund provides scholarships to female student-athletes and male football players. Applicants must be seniors who plan to pursue a graduate degree. Applicants are not limited to a specific field of study however it must be graduate level. Since all colleges and universities in North Carolina and South Carolina can nominate one female student-athlete and one football student-athlete the scholarship is very competitive.

Since UNC can only nominate one female student-athlete and one football student-athlete please recommend any of your student-athletes to me in the next few weeks. At that time, we will look at overall GPA and leadership/community service/ etc. and decide who we will nominate.

Criteria to Apply:

- Must be a graduating senior student-athlete
- Must have earned an intercollegiate varsity letter
- Must have a minimum of a 3.00 cumulative GPA
- Must demonstrate outstanding leadership and citizenship

Selection Criteria:

- Prior academic performance, including grade point average and graduate admission test scores
- Record of leadership and citizenship
- School and community involvement and personal achievement

Coaches:

Please pass along this email and the attached flyer to ALL of your senior student-athletes.

Counselors, please notify me of students that may have come to you in the past few months inquiring about scholarship opportunities.

The following is regarding the NCAA Postgraduate Scholarship opportunities...

NCAA POSTGRADUATE SCHOLARSHIP
(Winter Sports, Due: MARCH 19)

Are you interested in attending graduate school next year? If so, you may be eligible for the NCAA Postgraduate Scholarship!
The NCAA awards up to 174 postgraduate scholarships annually, 87 for men and 87 for women. The scholarships are awarded to student-athletes who excel academically and athletically and who are in their final year of intercollegiate athletics competition.
The one-time grants of $7,500 each are awarded for fall sports, winter sports and spring sports. Each sports season (fall, winter and spring), there are 29 scholarships available for men and 29 scholarships available for women. The scholarships are one-time, non-renewable grants.

If you meet the following criteria please see Spencer Welborn in the Academic Support Center or email him @ wellborn@uncaa.unc.edu before MARCH 4.

- In final season of NCAA athletics eligibility or will not be using any remaining athletics eligibility.
- Have an overall undergraduate minimum cumulative grade-point average of 3.200 (based on a 4.000 scale) or its equivalent, including all undergraduate hour earned at all undergraduate institutions attended. The grade-point average may not include any graduate-level hours.
- Have performed with distinction as a member of the varsity team in the sport in which the student-athlete is being nominated. The degree of the student-athlete's athletics achievement will be weighed in conjunction with academic performance, university involvement and volunteer community service. Institutions should note participation in activities in which the student-athlete serves as an example to other students and demonstrates leadership qualities.
- Intend to continue academic work beyond the baccalaureate degree and enroll in a graduate degree program on a part- or full-time basis at an academically accredited graduate or degree-granting professional school. An academic professor of the college in which the student-athlete is currently enrolled must address the capability of the student-athlete for graduate study.
- Are outstanding citizens and excellent role models for the institution and intercollegiate athletics as a whole.

Subject: NCAA Degree Completion Program

Greetings:

The applications for the NCAA Degree Completion Program for Fall/Spring 2009/10 will be due in a little over a month. Please let me know of anyone that could potentially use this program to their advantage and I will email them the application. Below is the criteria that I pulled off the application:

Qualifications:
1. Applicant must be a student-athlete who has completed eligibility at an NCAA Division I member institution.

2. Applicant must be within 30 semester hours (45 quarter hours) of completion of his/her first undergraduate degree. Students enrolled in programs that extend beyond the baccalaureate degree or enrolled in graduate programs are not eligible (e.g., PharmD).

3. Applicant must have enrolled originally in or before September 2004.

4. Applicant must have received athletics-related financial aid [See NCAA Bylaw 15.02.4].

5. Applicant must be entering at least his/her sixth year of post-secondary education, and shall have exhausted institutional eligibility (five years) for athletics-related aid, pursuant to the 2008-09 NCAA Division I Manual (Bylaw 15.01.5 Eligibility of Student-Athletes for Institutional Financial Aid).

6. If this application is for full-time status, all remaining hours (maximum of 30) must be attainable in not more than two consecutive semesters or three consecutive quarter terms (maximum 45 quarter hours), the first term normally being Fall 2009. The NCAA Division I Degree-Completion Award consultants will review applications for part-time status on a case-by-case basis.

7. Financial information (i.e., tax forms) will be considered in making awards.

8. Courses required for graduation and full- or part-time status will be determined from the information provided by the dean or department head in Part B of the application.

I know that we have two former women's soccer student-athletes that are interested and the application has already been email to them. Again, please let me know as soon as possible so the former students will have a chance to complete all of the required paperwork.

Thanks,

Spencer Welborn

Subject: Fwd: 2008-2009 ACC Academic Honor Roll
Attach: Memo.doc; Honor Roll Form.xls

Greetings:

Once again I come to you all for assistance in filling out the lovely ACC Honor Roll spreadsheet. There have been some changes this year but instead of retyping all of the details I will let you read the attached memo for the qualifications.

As you will see, the process for very time consuming since it has to be verified by the registrars office as well as by Jack Evans. I ask that you send me your list as soon as possible and I will put all of the names into a comprehensive list. If you have any questions please feel free to ask.

Most of you already know your ACC Honor Roll names but the GPA calculations may take a little time. The website usually has if the student has made the ACC Honor Roll in the past which can be a huge time saver in the long run.

Let me know if you have any questions.

Spencer

ATLANTIC COAST CONFERENCE

OFFICE OF THE COMMISSIONER

MEMORANDUM

TO: Atlantic Coast Conference Director's of Academic Support
Atlantic Coast Conference Life Skills Directors

FROM: Tracey Haith, Administrative Assistant

DATE: June 1, 2009

SUBJECT: 2008-09 Academic Honor Roll

The Conference Office is now in the process of compiling the ACC Honor Roll. ***Please review the nomination procedures as they have changed beginning with the 2008-09 academic year.*** Over the past 50 years, this special feature has attracted considerable attention from the media throughout the ACC. In addition, the Honor Roll also serves as the basis for nominations to the various All-Academic teams.

The ACC HONOR ROLL is established on the following criteria:

1. A student-athlete must have participated (played and/or practiced) in an intercollegiate varsity sport, not a club team or junior varsity team, officially recognized by your institution during the 2008-09 academic year.

2. The ACC Honor Roll will include December graduates **provided** the student-athlete was a full-time student in the fall semester of the 2008-09 academic year and the GPA (3.0 GPA) based on the last two full-time semesters.

3. Student-athletes who are considered "medicals" qualify as well, **as long as** the medical situation was incurred during the 2008-09 academic year.

4. Redshirts will qualify, **if** they are on the team roster and practicing.

5. Managers and trainers **will not** be included on the ACC Honor Roll.

6. An institution may consider members of any sport that is designated a varsity sport by that institution for inclusion on the ACC Academic Honor Roll list.

4512 WEYBRIDGE LANE • GREENSBORO, NC 27407 • P.O. DRAWER ACC • GREENSBORO, NC 27417-6724 • (336) 854-8787
MEDIA RELATIONS & VIDEO SERVICES (336) 851-6062 • MEDIA RELATIONS FAX (336) 854-8797 • ADMINISTRATION FAX (336) 316-6097

BOSTON COLLEGE • CLEMSON UNIVERSITY • DUKE UNIVERSITY • FLORIDA STATE UNIVERSITY • GEORGIA INSTITUTE OF TECHNOLOGY
UNIVERSITY OF MARYLAND • UNIVERSITY OF MIAMI • UNIVERSITY OF NORTH CAROLINA • NORTH CAROLINA STATE UNIVERSITY
UNIVERSITY OF VIRGINIA • VIRGINIA POLYTECHNIC INSTITUTE AND STATE UNIVERSITY • WAKE FOREST UNIVERSITY

The nomination procedure is as follows:

1. **Please note that the ACC Honor Roll needs to be completed in the Excel form attached.** Use first, middle and last name only. **Nicknames should not be used. (Please do not list in sport order on separate sheets)**. It is important that you not only send it back electronically, but also print out a copy, obtain the proper signatures and send it via US mail.

2. Before the honor roll list is returned please make sure that the list of participants is forwarded to the Registrar for verification. The Registrar should verify those with a **"B"** average (3.0 GPA) **for the academic year (August 2008 to June 2009).** Upon completion, the Registrar should sign the paper copy and forward it to the Faculty Athletics Representative. (*exception - see No. 2 on page 1*)

3. ***Beginning with the 2008-09 academic year, you must indicate the previous years (not the number of years) each student-athlete has been named to the conference honor roll. (ex. 04-05, 05-06, 06-07)***

4. **The Director's of Academic Support are responsible for securing signatures from the Faculty Athletics Representative and Registrar, and then forwarding the final Excel document and paper copy to the ACC Office by Wednesday, July 1, 2009, to the attention of Tracey Haith. E-mail address: thaith@theacc.org.**

It is requested that student-athletes names be arranged in **alphabetical order**, **men and women intermingled**, and those who participated in more than one sport be listed **only once**. As soon as the full list is compiled from all twelve schools, a press release will be prepared and sent to the media and school representatives.

The Honor Roll certificates (with name of school already printed, along with signatures of the appropriate Conference officials) will be sent to each school, and it will be the responsibility of the school to have the name of the student-athlete printed on the certificate and the certificate given to each recipient.

Please do not hesitate to contact me should you have any questions.

Coaches:

Please forward this to all of your senior students. If possible, placing the attached flier in the locker room or a highly visible place will be very helpful as well.

I have included the information in the email as well as in an attached flier. This is award is intended for all Fall Sports sponsored by the NCAA.

NCAA POSTGRADUATE SCHOLARSHIP
(FALL SPORTS: DUE JANUARY 14)
Are you interested in attending graduate school next year? If so, you may be eligible for the NCAA Postgraduate Scholarship!
The NCAA awards up to 174 postgraduate scholarships annually, 87 for men and 87 for women. The scholarships are awarded to student-athletes who excel academically and athletically and who are in their final year of intercollegiate athletics competition during the 2009-10 academic year.
The one-time grants of $7,500 each are awarded for fall sports, winter sports and spring sports. Each sports season (fall, winter and spring), there are 29 scholarships available for men and 29 scholarships available for women. The scholarships are one-time, non-renewable grants.
If you meet the following criteria please see Spencer Welborn in the Academic Support Center or email him @ welborn@uncaa.unc.edu before DEC. 18!!

- In final season of NCAA athletics eligibility or will not be using any remaining athletics eligibility.
- Have an overall undergraduate minimum cumulative grade-point average of 3.200 (based on a 4.000 scale) or its equivalent, including all undergraduate hour earned at all undergraduate institutions attended. The grade-point average may not include any graduate-level hours.
- Have performed with distinction as a member of the varsity team in the sport in which the student-athlete is being nominated. The degree of the student-athlete s athletics achievement will be weighed in conjunction with academic performance, university involvement and volunteer community service. Institutions should note participation in activities in which the student-athlete serves as an example to other students and demonstrates leadership qualities.
- Intend to continue academic work beyond the baccalaureate degree and enroll in a graduate degree program on a part- or full-time basis at an academically accredited graduate or degree-granting professional school. An academic professor of the college in which the student-athlete is currently enrolled must address the capability of the student-athlete for graduate study.
- Are outstanding citizens and excellent role models for the institution and intercollegiate athletics as a whole.

The Ram Rules
UNC Department of Athletics
Vol VIII * No. 2 * November 3, 2008

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.

Student Athletes,

I know that we supply you with information about NCAA gambling regulations quite often, but it is very important to continue to stress to you the pitfalls involved with gambling.

An intra-squad scrimmage is a useful way to evaluate talent for coaches, and can be a welcome change from the everyday routine of practice for the student-athletes. However, student-athletes must still be aware of the dangers that intra-squad scrimmages can place on their eligibility.

NCAA Bylaw 10.3 does not allow student-athletes to solicit or accept bets on any intercollegiate athletics competition that has any tangible value. It may seem harmless for the student-athletes to bet a week□s worth of laundry service to the winner of the game, however this is a service that has tangible value which is impermissible by NCAA rules. Student-athletes who don□t follow Bylaw 10.3 risk losing their eligibility for the season or possibly their entire NCAA career.

Also at your eligibility meeting you heard our sports nutritionists talk about the dangers associated with taking over-the-counter supplements. Below is an article about a supplement which was not properly labeled.

As always, please contact the Compliance Staff (962-6000) if you have any questions about NCAA gambling regulations or contact the Sports Nutrition Staff (962-9356) regarding questions about supplements.

Sincerely,
Dick Baddour
Director of Athletics

Saints' Nesbit sues supplement maker after serving suspension

METAIRIE, La. -- Saints offensive guard Jamar Nesbit filed suit Tuesday against the maker of a weight-loss supplement, alleging it was improperly spiked with a diuretic that is banned by the NFL.

The lawsuit against the makers of StarCaps, an over-the-counter product, was filed in federal district court in New Jersey, said Nesbit's attorney Brian Molloy.

Nesbit returned last week from a four-game suspension levied after he tested positive for Bumetanide, a substance that helps rid the body of excess water and salt. The NFL considers the substance a possible masking agent for steroids.

It is the same substance for which several other players around the league have reportedly tested positive, including three other Saints: running back Deuce McAllister and defensive ends Will Smith and Charles Grant.

McAllister, Smith and Grant remain on the Saints roster pending a consolidated appeal of their suspensions, said a person familiar with their case. The person spoke to The Associated Press on condition of anonymity because the appeals are ongoing.

Nesbit never appealed his suspension because he did not expect to win, and instead chose get it over with as soon as possible while trying to recoup his $235,294 in lost salary from StarCaps, Molloy said.

"Under NFL rules, you are strictly liable for what is in your body. They don't care how it got there, contaminated supplements or otherwise," said Molloy, who has represented other players in past appeals of NFL suspensions for banned substances. "So he did not appeal his suspension and focused his attention on going after the manufacturer of StarCaps."

In addition to lost salary, the lawsuit seeks money for damage to Nesbit's reputation and for the alleged intentional, undisclosed spiking of the product with Bumetanide.
Molloy said some of Nesbit's leftover pills were tested and found to be contaminated with Bumetanide, which is not listed as an ingredient.

StarCaps did not immediately respond to an e-mail from The Associated Press seeking comment on the allegations.

McAllister, who publicly acknowledged he was being investigated by the league after the Saints' 37-32 victory over San Diego on Sunday, has said his positive test for Bumetanide also resulted from his use of StarCaps. He said he has been using the product to help him control his weight for four years and had the pills lab-tested before he began taking them.
Nesbit's lawsuit was filed the day after the Saints flew home from London, where they improved to 4-4 by beating the Chargers.

The Saints and the NFL have declined to discuss the investigations of individual players' alleged use of banned substances, citing confidentiality rules.

The Ram Rules
UNC Department of Athletics
Vol. VIII * No. 9 * April 29, 2009

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.

Student-Athletes,

Several nutritional supplements on the market have been recalled by their vendor, Universal ABC Beauty Supply International, Inc., because they have been found by the Food and Drug Administration (FDA) to contain Sibutramine, which is a drug used as an appetite suppressant for weight loss. The recalled dietary supplements were not supposed to contain this drug, nor did they identify it as an ingredient on the packaging. Sibutramine is known to substantially increase patients blood pressure and/or pulse rate, and may present a significant risk to patients with a history of coronary artery disease, congestive heart failure, arrhythmias, or stroke.

As you all know, the supplement industry is NOT regulated by the FDA! Therefore, their safety and effectiveness is unknown. It is because of this uncertainty that the Department of Athletics requires student-athletes to receive prior approval before consuming ANY dietary supplement. You should discuss the product in question with your sport s athletic trainer or one of our departmental sports nutritionists (Jen Ketterly or Rebecca Rebmann) prior to purchasing it. Though they will not be able to give you 100% assurance of its safety, they will he able to identify the product s level of risk.

Please see below for a complete list of dietary supplements that have been recalled. We appreciate your cooperation with this advance approval policy, as it is in place to protect your personal welfare. Please contact our Sports Medicine staff if you have any questions about supplement use, in general, or if you have concerns about any supplements identified on the list below.

Dick Baddour
Director of Athletics

Subject: Ram Rules #1: Countable Athletically-Related Activities
Attach: TEXT.htm

The Ram Rules
UNC Department of Athletics
Vol IX * No. 1 * September 9, 2009

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.

Welcome back! As you begin the 2009 fall semester in Chapel Hill, we want to make sure you are aware of NCAA regulations concerning the amount of time that coaches are permitted to require your participation in what the NCAA refers to as □countable athletically-related activities□.

This issue will explain the following topics regarding countable hours:

I. Countable Hours: What Counts?
II. What are the Time Limits?
III. Do I Get Breaks?

I. Countable Hours: What Counts?

The following are considered countable athletically-related activities and must be counted in the weekly and daily time limitations:Practice
Field, floor, or on-court activities
Mandatory meetings
Film Review
□Chalk Talk□
Competition
Required weight-training and conditioning activities held at the direction of, or supervised by, a UNC coach or other UNC staff member (e.g., strength coach)
Required participation in camps, clinics, or workshops
□Captain□s practices□ - no coaches present, but considered mandatory for the team

The following activities DO NOT count against the weekly and daily time limitations:Study hall or tutoring
Travel to and from practice and competition
Treatment and rehabilitation
Voluntary individual workouts without a coach
Voluntary strength and conditioning workouts
Pick-up games and other similar activities not directed by a coach

In order for a workout to be voluntary (and not countable), the following must occur:
□ You are not required to attend, and information related to the activity is not reported back to your coaches (by other student-athletes, strength coaches, etc.);
□ Your attendance, or lack thereof, cannot be recorded and reported to your coaches; and
□ You cannot be rewarded for participating, nor may you be penalized if you choose not to.

II. What are the Time Limits?

In all sports, the following time limitations apply when UNC□s classes are in session. (No time limits are in effect during vacation periods). Exceeding these limits is a violation of NCAA rules!
During the □traditional season of competition□ (in-season), a student-athlete□s participation in countable athletically related activities is limited to a maximum of 4 hours per day and 20 hours per week.
Competition days always counts as 3 hours, regardless of the actual amount of time spent on athletically-related activities that day.
A practice round of golf may exceed 4 hours, but must count for the full amount of time spent, and the 20-hour weekly limit is still in effect.
Practice rounds of golf held at the site of the tournament on the day prior to the tournament count as 3 hours, regardless of actual length.
During the □non-traditional season of competition□ (off-season), a student-athlete□s participation in countable athletically-related activities is limited to a maximum of 8 hours per week.
In sports other than football, no more than 2 hours per week may be spent on individual/team workouts with a coach. Football student-athletes are instead allotted 2 hours of film review.
Remaining time (up to 8 total hours) may be spent only on weight training and conditioning activities.

III. Do I Get Breaks?

□ Required Day(s) Off: During the playing season, you must have one calendar day per week that is free from ANY countable activities. Vacation days and travel days may fulfill this requirement. This rule is not in effect during conference and NCAA championships. During the off-season (i.e., 8-hour weeks), you must have two calendar days per week free from ANY countable activities.
□ Preseason Practice: Daily and weekly time limitations do not apply during preseason practice prior to the first day of classes.
□ Vacation Periods: Time limitations do not apply during official vacation periods in-season. However, if a vacation period occurs during any part of a week in which classes are in session, the institution is subject to the time limitations during that portion of the week, and must provide the student-athletes with the required day off, which may be a vacation day. During vacation periods in the off-season, a student-athlete may not participate in ANY countable athletically-related activities.

The Ram Rules Bottom Line:

It is your responsibility to understand NCAA and UNC rules. Please ask an Athletics Department official or call the Compliance Office at 962-6000 if you have any questions or concerns about countable athletically-related activities and their respective time limits.

The Ram Rules
UNC Department of Athletics
Vol IX * No. 2 * October 8, 2009

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.

During team eligibility meetings this fall, our department s sports nutritionists, Jen Ketterly and Rebecca Rebmann, spoke to all of our student-athletes about the potential dangers associated with taking supplements that have not been approved by our sports medicine staff. The following is an article from ABC News reinforcing this point.
Young Athletes Turn to Sometimes Harmful Strength SupplementsCongress to Hear Near-Death Experiences in Testimony From AthletesBy LISA CHINN and MIKE CALLAHAN
Sept. 29, 2009
Athletes (http://abcnews.go.com/Health/WellnessNews/trendy-kettlebell-workout-exercise-staple/story?id=8494655) are constantly under pressure to become stronger and faster and many turn to strength supplements (http://abcnews.go.com/Health/MensHealthNews/story?id=7969671&page=1)they ordered online. But, in an effort to crack down on the industry, the Senate Judiciary Committee is expected to hear testimony today from young men and women detailing their near-death experiences with these seemingly harmless supplements.
Sports supplements make up a $2 billion industry that continues to grow. The Internet is saturated with ads and Web sites promising athletes results that sometimes seem too good to be true.
Jareem Gunter, 26, was looking for a competitive edge in baseball and he was not alone, he said.
"I believe around 90 percent of players or more take some kind of supplement (http://abcnews.go.com/Health/Healthday/story?id=5185154&page=1)," Gunter said.
During his first year of playing college baseball, Gunter took Superdrol, a substance that promised a dramatic increase in strength.
"I did research for three to four weeks to make sure I wasn't taking anything that could harm me," Gunter said.
But Superdrol apparently harmed Gunter and he ended up in the hospital one month later because his body had shut down from severe liver failure.
"This was on a Sunday," Gunter said. "And [the doctor] said if I had waited until Tuesday I could have been dead."
Superdrol contains methasterone, a potentially dangerous substance that acts like testosterone once it is in a person's body.
"Methasterone has long been known to be and act like an anabolic steroid," ABC News medical contributor Dr. Marie Savard said. "So, in a way, it doesn't sound like testosterone, doesn't sound like a hormone, but it is. It has all those dangerous effects that wreak havoc with a young child's hormone levels." Hoping to Crack Down on Illegal Steroids
The company that sold Superdrol is now out of business but the drug and other designer steroids continue to be sold in stores and on the Web as pressure on young athletes continues to grow. Nearly five percent of all teenagers have admitted to some kind of steroid (http://abcnews.go.com/Health/story?id=3956728&page=1) use and Internet sales for strength supplements have increased 50 percent.
"All you need is a credit card and a computer," Travis Tybolt of the United States Anti-Doping Agency said. "The smart chemists out there and the evil chemists out there are exploiting the loophole that allows these to be sold."
The result is that many parents and coaches want to promote a "no-substance" policy. The dietary supplement industry also wants to crack down on these substances that could tarnish the industry's reputation.
"It is a crime to sell illegal steroids, and anyone caught doing this ought to get the book thrown at them," Daniel Fabricant of the Natural Products Association said in a statement. "We're glad the Congress is looking into this, because anything we can do to separate the legal, safe and healthy dietary supplement industry from the seedy, fly-by-night, and unsafe world of illegal steroids is worthwhile."

The Ram Rules
UNC Department of Athletics
Vol IX * No. 3 * October 16, 2009

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.

Gambling occurs on EVERY college campus. Unfortunately, student-athletes can be drug into gambling in such an innocent manner that they do not even realize it is happening. Below is an article from the NCAA□s monthly gambling education newsletter. After you read it, you□ll understand that no student-athlete is safe. Each and every one of you could be pulled into gambling. So make the right choices, no matter how trivial they may appear to be at the time. Your collegiate eligibility is at stake.

Guest Columnist
This month's guest column comes from a current NCAA student-athlete, who wishes to remain
anonymous. He details his past experiences with sports wagering and the consequences that he was dealt as a result.

Hello everyone, I am here to tell you about my experience with gambling and how it is has affected my life and what I have done now to better it.

So where do I start? Well I guess I will give some background on the type of person I am and how I got into this whole misdirected and miscued world of gambling. Right now I am attending college in Pennsylvania while also being involved in the men's varsity soccer program, a fraternity and also many other organizations on campus. I love just being able to hang out with my friends watching any type of sporting event and this is where the problem started. When I was in eighth grade one of my best friend's older brothers (we will call him Bob for the rest of the story to make things easier) approached me about gambling. He knew that I was all about sports, knowing all the stats and what players were doing well and what players were struggling. I knew everything there was to know about the NBA, NFL, and MLB. He said to me, "If you love watching the games and love looking up stats, why not make things more interesting and more fun." So I had no clue what that actually meant until he started giving me spread lines and over/unders in which I could place small wagers on ($1-$5). I had no clue that on that day, my life would change for the worst.

Growing up in a small community, there were only a select crowd of people that you were going to get associated with especially as a guy; it was the people that were in the play and theatre, the druggies, and then the jock athletes. The jock athletes (the one that I was considered in and probably one of the most likeable) always were hanging out playing poker, watching the big games and just loving sports. Well throughout high school, I continued placing wagers with Bob thinking that it was fine winning a few dollars here and there, not really losing money and having enough to have pocket cash. The worst part was I knew I was getting in too deep, now betting on games that I had no interest in and betting for a much higher amount. Along came my senior year and I was having the time of my life, being named one of the top 30 soccer players in my state along with being accepted to a fine college to continue my academics and athletics career. I thought nothing was going to bring me down until I got in over my head. I owed Bob a sum of money that I did not end up having and had to do something about it. I had to end up selling my IPod and Play Station to make up the loose cash I did not have. It was not one of my finer points in life and I knew something had to change before this happened again especially due to the fact that I was going to college and did not want to create any problems when I was up at school. But the other main reason was just because I did not want to embarrass my parents and disgrace my family.

Freshman year came along and I did what I felt like I had to do to change. I stopped talking to Bob and I started thinking and focusing on other subjects that pertained more to me, like bettering myself in soccer and in the class room. After three years at college I thought that everything was going wonderfully, I had a great support system in my teammates, coaching staff and my fraternity brothers and was loving the college life. There was nothing more that I could ask for, until I did something that I regret and still regret. I think about it every day and just wish I could go back and change it.

At the beginning of my junior year in college my old friends from high school and I decided that it would be a great idea to bring back a tradition the next September - fantasy football. We were starting to lose touch with each other with everyone going to different schools and doing their own thing. We needed something to bring us back together talking and getting back to our old friendships. Here is where things went wrong for me, we decided to place money down on it and have one of my friends be the commissioner of the league who kept all of the money. At the time I did not know that this was illegal for the NCAA and thought since everyone else does it that it should not matter but I think that given my past experiences and me getting started in it again that I had to tell someone. I started to get too into it again and I ended up telling one of my friends on the soccer team who was concerned about me and told my head coach. My head coach helped me in so many ways that I cannot even describe it in words and I don't think he knows that, but after talking to my coach, we decided that I needed help just to make sure that I do not fall back into the trap and old habits again. We decided that it would be a good idea for me to go to Gamblers Anonymous and basically talk to people that have gone through this circumstance before and to help me abstain from any type of gambling. So I continued to go to GA for the rest of my junior year and the summer going into my senior year clean from gambling and it felt good.

But along came my senior year, and I was ready to be a leader on the soccer team after being named 2nd Team all Conference and felt like I could improve on my stats from the years before and help my team earn a spot in the playoffs. When preseason started, I had a meeting with our athletics director about me violating one of the rules for the agreements of players in the NCAA. I felt like it was my duty as a player to report this, even though I did not expect it to turn out the way it did. I found out after I reported it that it was a major issue and that I could've lost my senior years eligibility and have my career end without me even stepping out on that field. The athletics director (his assistants), the coaching staff and all of the college were supportive of me and were helping me deal and cope with what I was going through. Everyone was working diligently trying to help me get a hearing set up and have my case heard by the NCAA Review Board. It was tearing me up inside thinking that I brought this upon myself and that gambling which has affected my financial status is now taking away one of my true loves in life. I had to sit out the rest of the preseason due to the fact that once I reported that I gambled, I actually was immediately ineligible and could not partake in any more practices or scrimmages. After sitting out for over more than a week and a half, the review board heard my case and was going to let me know a day or two after with their decision. I was just praying that I would be able to play again and that this wasn't going to be the end for me. After two days, the board came back with the decision that I was going to have to sit out two games due to the fact that I did violate the
NCAA gambling rules. At first I was relieved that I was going to be able to play this year, but at the same time I was upset that this whole situation went this far over small wages that I could have stopped.

After the hearing and getting the results from the review board, I swore to myself and my friends that I was going to do something to prevent this from happening to me or anyone else again. I have abstained from gambling for what will be a year coming up in February and it feels amazing, but I know that I could help out other students too. I have joined the Gambling Task Force Committee here at my college to add the students perspective of what can be done to help gambling addicts on campus even if they don't think they need help. This year so far has had its ups and downs but I am glad that I am getting my life back on track and normal again without having to worry about losing money or even losing family and friends over gambling. I would like to thank you for taking your time and reading this. Hopefully my life was not too boring for you but I do want to say one thing. Take it from me, gambling is not worth it, it is not worth it to put your collegiate career in jeopardy, it is not worth it to lose all of that money and it is not worth it because in the end you'll never win. You will always lose somehow.

The Ram Rules Bottom Line:

It is your responsibility to understand NCAA and UNC rules. ANY gambling on college and professional sports is against NCAA regulations, even if the amount of the wager is minimal! Your eligibility is at risk. DON□T BET ON IT.

Please contact the Compliance Office (919-962-6000) if you have any questions about NCAA gambling regulations.

MEMO

To: Athletic Department Personnel

From: Dick Baddour

Subject: Athletic Department Play Day

On May 5, 2010 all members of the Athletic Department are invited to participate in a golf, tennis, volleyball or walking outing.

Please print the attached form and indicate your preference of activity and return it to Beth Miller by April 27, 2010. If you would like to play golf with specific people, please indicate this on the form along with your handicap or average score.

Golfers will begin play at 10:30am at Finley Golf Course. Tennis players should meet at the UNC Tennis Center at 1:30 pm, and volleyball players should meet in Carmichael Arena at 1:30 pm. We have not finalized details for walkers, but will let you know prior to May 5.

I hope all of you will be able to participate and we look forward to being with you at this time.

Dick Baddour

Subject: Athletic Department Family Picnic

Attach: TEXT.htm

I would like to invite you and your family to the Athletic Department Family Picnic on May 7, 2010. We will have the picnic in the Eddie Smith Fieldhouse. There will be plenty of food and inflatable games for kids.

The picnic and fun will begin at 5:30 p.m. and everyone is invited to the UNC vs. Wake Forest Baseball game at 7:00 p.m. If you want to attend the baseball game, just stop by the ticket booth to get tickets on your way in to the game.

Please return the following RSVP to Beth Miller by April 30, 2010. I look forward to seeing you.

P.S. If there is anyone in your department that does not have access to email, please make sure they receive this invitation.

The Ram Rules
UNC Department of Athletics
Vol. IX * No. 6* April 27, 2010

A newsletter designed to educate University of North Carolina student-athletes about NCAA rules. As a UNC student-athlete, it is YOUR responsibility to review the contained information to preserve your eligibility to participate in intercollegiate athletics.

Dear Carolina Student-Athlete,

As finals approach, I hope you all are as proud as I am about our Department's accomplishments during the 2009-2010 academic year. Before going your separate ways for the summer, please see the attached PDF presentation that includes important reminders pertaining to NCAA rules and regulations for Summer, 2010.

We've also attached 2 forms for you to access if the need arises over the summer. The first is the Student-Athlete Employment Form, which must be completed if you obtain a job this summer. The second is the Student-Athlete Fee-for-Lesson Compensation Form, which must be completed if you give lessons in your sport to younger kids and charge for the lessons.

As the presentation indicates, please do not hesitate to contact our Compliance staff at 919-962-6000 if you have any questions about this information.

Have a wonderful summer!

Dick Baddour
Director of Athletics

Ram Rules
Summer Of 2010

Summer issues for student-athletes

NCAA Drug Testing

- The NCAA conducts drug-testing year round. It is possible that you could be selected, at random, to participate in a drug test during the summer.
- If selected, the NCAA will conduct the drug test wherever you are at the time – they will come to you.
- It can take place at home!!!

NCAA Drug Testing (cont.)

- If you test positive on an NCAA drug test:
  - You will be ineligible to participate in regular season and postseason competition for one calendar year; and
  - You will lose one season of competition in all sports while you sit out.

- If you test positive a second time (for the use of any drug other than a "street drug"):
  - You will lose all remaining eligibility in all sports.

- Missing or arriving late for a scheduled drug test is the same as testing positive!

Employment

- You must receive pay ONLY for work actually performed.
- You must get paid at a rate that is commensurate with the going rate for like jobs in that community.
- You must NOT receive pay based on your status as an athlete.
- You, your employer, and your head coach must complete and submit the Compliance Office's Student-Athlete Employment Form (see attached).
- If you wish to provide lessons for a fee, you must first check with the Compliance Office and complete the Student-Athlete Fee-for-Lesson Form (see attached).

Camp and Clinic Employment

You MAY Work a Sports Camp or Clinic IF:

- You will be performing duties that are of a general supervisory nature in addition to any coaching or officiating assignments; AND
- Your pay is commensurate with the going rate for camp or clinic counselors of like teaching abilities and your wages are not based on the reputation or fame you have received as a student-athlete.

- Football Student-Athletes:
  - May work a sports camp or clinic camp <u>at another institution</u> provided you are the only player from UNC working the camp.
  - May be employed as a counselor at any diversified camp, including a diversified camp at your own institution, provided your are the only UNC football player working the camp.

Camp and Clinic Employment (cont.)

You MAY NOT:

- Receive compensation from a camp or clinic for your appearance in which you <u>only lecture or demonstrate</u>.
- Conduct your own camp or clinic.
- Participate in required practice activities outside of your playing season.
- Football Student-Athletes:
  - May not work a football camp or clinic at your institution.
- International Student-Athletes:
  - Are not permitted to work summer camps.

Outside Competition

- Student-athletes are permitted to participate on a non-collegiate, amateur team provided it occurs during an official UNC vacation period.
  - Student-athletes on UNC's soccer, women's volleyball, and field hockey teams may participate on an outside team no earlier than May 1.
- If you participate in a team sport, there is a limit on the number of UNC student-athletes that can participate on the same team during the summer.

Be sure your summer coach knows this rule!!

The limits, including yourself, are:

Baseball	*4*	*Basketball*	*2*	*Field Hockey*	*5*
Lacrosse	*5*	*Soccer*	*5*	*Softball*	*4*
Volleyball	*2*				

- If you wish to participate <u>with</u> or <u>against</u> a professional team in your sport, STOP and ASK the Compliance Office prior to your participation.
  - Failure to do so could seriously jeopardize your eligibility!!

Outside Competition (cont.)

You MAY NOT:

- Earn money in competition during the summer:
  - Road racing
  - 3 on 3
  - Beach volleyball
- Receive expenses based on how you finish in a competition.
  - The receipt of expenses must be based on actual and necessary expenses incurred as a result of your participation.

Summer Workouts

- Football: Beginning June 3, 2010, you may have organized workouts with strength staff up to 8 hours per week (not mandatory).
  - You must have one week of discretionary time during which there may be no supervision other than for safety purposes. This week is July 25th through 31st.
- Other Team Sports: NO required activities of any kind.
  - If you choose, you may work out with strength staff, even if you are not enrolled in summer school.
- Individual Sports: You may request skill instruction from your coach, but cannot be <u>required</u> to participate.
  - Some sports also have a "safety" exception, where a coach may be present to prevent injury.

If you have any questions, please contact the Compliance Office at 962-6000.

- Amy Herman, Asst. AD for Compliance
- Susan Maloy, Asst. AD for Certification and Eligibility
- Lance Markos, Director of Compliance

Thanks, and have a great summer!!

THE UNIVERSITY OF NORTH CAROLINA

Student-Athlete Fee-for-Lesson Compensation

Per NCAA Bylaw 12.4.2.1, a student-athlete may receive compensation for teaching or coaching sports skills or techniques in his or her sport on a fee-for-lesson basis, provided:

a) Institutional facilities are not used;
b) Playing lessons are not permitted;
c) The institution obtains and keeps on file documentation of the recipient of the lesson(s) and the fee charged for the lesson(s) provided during any time of the year;
d) The compensation is paid by the lesson recipient (or the recipient's family) and not another individual or entity;
e) When it involves more than one individual at a time, instruction to each individual is comparable to the instruction that would be provided during a private lesson; and
f) The student-athlete does not use his or her name, picture, or appearance to promote or advertise the availability of fee-for-lesson sessions.

Prior to giving lessons, student-athletes are required to contact the Compliance Office (919-962-6000) to complete any necessary employment paperwork, including the form below, which must be completed for EACH lesson:

To be completed by the student-athlete:

Student-Athlete's Name: _____

Sport: _____

Year in School: _____

Name of Lesson Recipient: _____

Date of Lesson: _____

Location of Lesson (Facility): _____

Cost of Lesson: _____

Person Responsible for Payment: _____

Relationship to Lesson Recipient: _____

Payment Type: _____

I certify that the above information is complete and accurate, and that I have followed all applicable NCAA regulations concerning fee-for-lesson compensation.

_____

Student-Athlete's Signature Date

Folks,

This is a very long, BUT VERY GOOD article from the NY Times about some of the "quick fix get your eligibility establishments" that are/have been in existence around the country. As you are aware, Dick Baddour is a member of the NCAA task force assigned to review/study, etc. "the validity" of these establishments. It is an eye-opener!

Take care and have a good day!

Larry Gallo, Jr.

February 25, 2006
The Quick Fix
Schools Where the Only Real Test Is Basketball
By _PETE THAMEL_
(http://topics.nytimes.com/top/reference/timestopics/people/t/pete_thamel/index.html?inline=nyt-per)

Each day at Eldon Academy in Michigan, Dewayne Walker could sleep till 11 a.m., practice basketball for 90 minutes and never spend more than two hours in class. He said that the only other students were his teammates, that his only teacher was also his coach. "I'm not a Harvard-type person," Walker said, "but I thought it would be a lot more work."

Justin Gardenhire laughed when recalling his classes at Redemption Christian Academy in Troy, N.Y., where many high school students are basketball players. Gardenhire said the school was so disorganized, a Spanish class one day would be French the next. "We had a spelling class," Gardenhire said. "I was like, 'Come on, are you serious?' "

Phil Jones attended Lutheran Christian Academy, an unaccredited private high school in Philadelphia where, he said, all of the students were basketball players. In his seven months there, he said, class consisted of the coach, Darryl Schofield, giving workbooks to the students to fill out. "I thought prep school was supposed to be hard," Jones said.

In the past two years, these young men attended unusual institutions — some called prep schools, some called learning centers — where all or most of the students were highly regarded basketball players. These athletes were trying to raise their grades to compensate for poor College Board scores or trying to gain attention from major-college coaches.

An investigation by The New York Times found more than a dozen of these institutions, some of which closed soon after opening. The Times found that at least 200 players had enrolled at such places in the past 10 years and that dozens had gone on to play at N.C.A.A. Division I universities like Mississippi State, George Washington, Georgetown and Texas-El Paso.

"I would say that in my 21 years, the number of those schools has quadrupled, and I would put schools in quotation marks," Phil Martelli, the men's basketball coach at St. Joseph's University in Philadelphia, said. "They're not all academic institutions."

The National Collegiate Athletic Association acknowledges that it has not acted as such places have proliferated. For years, its Clearinghouse has approved transcripts from these institutions without questioning them.

Until revelations last year about a diploma mill in Florida and concerns about other schools like it, the N.C.A.A. chose not to police high schools.

Although the N.C.A.A. recently commissioned a task force charged with curbing academic abuse, it still faces the tricky task of separating the legitimate from

the nonlegitimate schools.
The Times found several schools with curious student populations.
¶Genesis One Christian Academy in Mendenhall, Miss.: Two years ago, this kindergarten-to-Grade 8 school added a high school and a Grade 13, for basketball players who did not graduate to raise their grade-point averages. At least 33 of about 40 students at the unaccredited high school play basketball, and its stars have signed letters of intent to attend Oklahoma State, Arkansas and Alabama.
¶Boys to Men Academy in Chicago: The student body consists of 16 basketball players, who can earn credit for the equivalent of eight high school core courses in a year by studying online through an accredited correspondence school.
¶Rise Academy in Philadelphia: Opened last fall, it outsources lessons to others, including Lutheran Christian and two online high schools.
¶God's Academy in Irving, Tex.: A summer basketball coach started with three students in August. Now 40 students in Grades 6 to 12, all basketball players, meet with two full-time teachers four days a week at a recreation center. The curriculum is provided and graded by an education center 25 miles away. Its star player, Jeremy Mayfield, signed with Oklahoma.
Some of these institutions recently joined other private schools to form the National Elite Athletic Association. With more than two dozen teams from Los Angeles to Toronto, this conference is seeking a shoe contract and a television deal. Its teams sometimes travel thousands of miles to play in tournaments that often attract more college coaches than fans. Those coaches will pay $100 for booklets of information about the players.
"I believe that our high school associations create mediocrity," said Linzy Davis, a conference founder, who coaches in Stockbridge, Ga. "We have rules in high school associations that say a coach can coach a kid at this time and not at this time. Meanwhile, you have the Europeans that can practice eight hours a day."
The increase in secondary-school options has forged a culture of free agency in prep basketball. Travis George, a senior at Lutheran Christian, left his Boston-area public high school after three-plus years without passing a single core course. The N.C.A.A. requires high school athletes to complete 14 core courses, including four years of English, two years of math and two years of science.
Since the fall of 2004, George has attended six prep schools. He and his coaches say he is on track to qualify for a scholarship at the end of this school year.
"If a kid really wants to, he can find a place that will get him his grades," said Steve Smith, the coach at Oak Hill Academy, a traditional prep powerhouse in Virginia. "That's not good. I believe in kids earning it."
Profit and Opportunity
Basketball-centered schools multiplied after Tracy McGrady leapt to the National Basketball Association from Mount Zion Christian Academy in North Carolina in 1997. He signed a deal with Adidas that gave $300,000 to Mount Zion, which had about 200 students and was not founded as a basketball academy, and nearly $1 million to his coach.
The notion that top players could be a financial boon, combined with the relaxing of N.C.A.A. rules, spawned more basketball academies. In 2000, the N.C.A.A. began allowing high school administrators to determine the legitimacy of their own core courses. Three years later, the N.C.A.A. began allowing students to compensate for low College Board scores with higher grade-point averages.
"Why did these schools come about?" said Mike Byrnes, who has coached for 10 years at 80-year-old Winchendon School in Massachusetts. "Because these kids need to have a higher grade-point average because you can't beat the SAT."
Under these rules, University High School in Miami, a correspondence school with no teachers, classrooms or sports, helped 28 athletes qualify for college. After The Times reported in November that University High gave fast and easy grades to college football prospects, the school shut down. It is under investigation by the Miami-Dade County state attorney's office.
Kevin Lennon, the N.C.A.A.'s vice president for membership services, who is in charge of the task force on secondary schools, said he could not estimate the number of schools abusing the system.
"All we know is that we're seeing more of them," he said.
Mysteries and Discrepancies
Coach Martelli of St. Joseph's said Tommy Lloyd, an assistant at Gonzaga, called last fall asking for directions to Lutheran. Although Coach Schofield said Lutheran sent more than 50 players to Division I in the past eight years, Coach Martelli could not help Mr. Lloyd.

"I have no idea," Coach Martelli, a lifelong resident of Philadelphia, recalled saying. "I've never been there."

The red-brick community center that houses Lutheran has become a running joke in recruiting circles. Interviews with 10 current or former players revealed that all of Lutheran's more than 30 students are college basketball prospects. They have classes in one community center, a converted grocery store on North 17th Street, and practice in another.

Three former Lutheran students — Roosevelt Lee, Jamual Warren and Bobby Maze — echoed Phil Jones in saying that they were not required to attend classes and that Coach Schofield was their only instructor. Maze said he did no work when he did attend class.

Warren said his mother took him home to Springfield, Mass., after a month because he told her there was no school building.

"I like to get by easy," Warren said, "but not that easy."

Jones, a Brooklyn native, is a senior at Laurinburg Prep in North Carolina. He said he was glad he left Lutheran because universities like Kansas, Virginia Tech and Kentucky indicated that they could not recruit him there.

Lee and Warren did not qualify for Division I scholarships out of high school; they now attend Globe Institute of Technology, a junior college in Manhattan. Lee said that in one month at Lutheran, he received credit for five courses, earning all B's, although he never took a test, attended a class or received instruction.

"There were no classes," Lee said. "We went to basketball practice every single day. What we were told when we first went there was: How you perform on the court, that's what you do for your grades."

Coach Schofield filed paperwork listing 35 courses, which the N.C.A.A. certified; among them are Latin 2, chemistry and physics. He said Lutheran had four full-time and two part-time teachers, and was accredited by the state. But a spokesman for the Pennsylvania Department of Education said Lutheran was not accredited and had never applied for accreditation.

Coach Schofield said that the students' improved academic performance could be attributed to Lutheran's strict discipline and that the students were required to retake exams until they achieved a score of at least 80.

Some students praise Lutheran. Charles Bronson said that in two years, he improved his grade-point average to 3.5 (on a 4-point scale) from 2.1. "Nothing was given to me," said Bronson, who attended East Carolina before transferring to Panola College, a junior college in Carthage, Tex., and then signing with Xavier. "I had to work."

Coach Schofield said he gave opportunity to teenagers with no hope. He said that Lutheran's tuition was $5,000 but that he rarely charged more than $2,000.

"If you're going to fail, you might as well go home and fail," he said. "We don't want that. We want all success stories."

Coach Schofield has plenty. Last year, Lutheran sent at least 11 players to Division I, including two each to Mississippi State, Texas-El Paso and Tennessee-Chattanooga. Other former Lutheran students play for Washington State, Middle Tennessee State and Temple. Omar Williams and Maureece Rice are key players for No. 6 George Washington. Marc Egerson is a freshman for No. 23 Georgetown.

Don Haman, Egerson's coach at Glasgow High School in Delaware, said Egerson earned a core-course G.P.A. under 2.0, scored in the 600's on his combined SAT and never graduated from Glasgow before going to Lutheran.

"I wonder about it myself," Mr. Haman said of Egerson's acceptance to Georgetown. "But I can't say anything if he gets the score and gets into school."

Jamont Gordon went to Lutheran after withdrawing from Oak Hill last April. Coach Smith said Gordon would have been a borderline prospect to qualify for college academically if he had completed the final quarter of his senior year at Oak Hill.

Gordon now leads Mississippi State in scoring as a freshman. Bulldogs Coach Rick Stansbury said Gordon had gone to Lutheran to "finish one class." Told that Gordon had left Oak Hill needing to complete all his classes, Coach Stansbury said: "He went there to finish. That's all. He did what he had to do to finish his academics."

Coach Stansbury, who refused several requests to allow Gordon to comment for this article, said he had no reason to check whether Lutheran, which has been open in various forms for eight years, was accredited. Despite Gordon's tenuous academic situation and the fact that Mississippi State's top recruit, Vernon Goodridge, also went there, Coach Stansbury said he neither visited Lutheran nor talked to teachers or guidance counselors. He did, however, go to the gym.

"We don't talk to teachers when we're recruiting kids," he said. "Everyone

does it differently."
Lutheran also produced Paul Graham III, one of six players signed last spring by Florida Atlantic. Matt Doherty, Florida Atlantic's new coach, said he went to the gym once to watch Graham but did not visit any teachers, as he usually does, because he was scrambling to sign players. "The fact that the school is not accredited and I wasn't aware of that, that's on me as a coach," Coach Doherty, who previously coached at Notre Dame and North Carolina, said.
It is no surprise that few teams have as many players from Lutheran as Texas-El Paso; among them are the top recruits last year, Maurice Thomas and Stefon Jackson. David Anwar, who founded Lutheran with Coach Schofield, is the director for basketball operations at Texas-El Paso.
Mr. Anwar said he had not been to Lutheran in six years. He said he knew the school had teachers but did not know their names.
"He takes kids that have nothing, absolutely nothing, and gives them a chance to go to school," Mr. Anwar said of Coach Schofield. "It's a shame that everyone looks at that as a bad thing."
Expectations and Realities
When Ifeanyi Ehirim accepted a full scholarship to Eldon Academy for its inaugural year in 2004, he said, he was led to believe the school had a building, a typical student body, full-time teachers and standard courses.
But Ehirim and, a year later, Dewayne Walker, each found little more than a traveling basketball team. Ehirim said Eldon's classes were held in the basement of the bookstore in Petoskey, Mich. When Walker arrived, Eldon used a classroom at a local community college. All of the students were high school graduates who needed higher standardized test scores or wanted the exposure of a national schedule. Ehirim and Walker said they learned little at Eldon.
During Walker's year, he said, the coach, Gerald E. Ernst Jr., was the only teacher, who taught English and had students take practice standardized tests from a book.
Academically qualified for college when he went to Eldon, Walker was hoping to earn a Division I scholarship. But in late January, Walker saw the message "Pack your stuff" on the board in the apartment where the students lived.
Walker said they were told that some had not paid tuition, prompting Coach Ernst to close Eldon. That cut the season short and hurt Walker's chances.
"It was a big waste of time and money," said Judy McGee, Walker's mother. "I didn't have $4,300 to throw away."
Eldon's official documents refer to it as a "learning center for ACT preparation, life skills and vocabulary." But the players said Coach Ernst portrayed it differently. Five calls to his home were not returned.
"They told me it was prep school," Ehirim, now a freshman at Birmingham Southern, said.
Old Order and New World
A decade ago, athletes with poor academic records often went to traditional prep schools, many of them in New England; military academies; or junior colleges. The elite players have since abandoned junior colleges, and the level of play at the traditional prep schools has dipped.
"Now, the Larry Johnsons and Nick Van Exels, they go to prep school," said Scott Monarch, the coach at Panola College. "I don't think junior college is ever going to get a marquee player again. The Shawn Kemps, the Sam Cassells and Mookie Blaylocks, I just don't think you're going to get them anymore."
Places like Eldon clearly bother the coaches at the venerable New England prep schools known for academic rigor. Raphael Chillious, the coach at the South Kent School in Connecticut, said the coach at a Florida public school sneered when they were introduced. "As soon as people say prep school," Coach Chillious said, "there's a negative connotation now."
Coach Byrnes of the Winchendon School said college coaches called asking for grades for their recruits as if they were ordering takeout: B's in seven core courses and a 900 SAT. When he tells them that cannot be done at Winchendon, the coaches keep shopping.
"I don't know how an administration at a school can allow that," Coach Byrnes said, referring to colleges that accept players from basketball academies. "What if Albert Einstein wanted to go to one of these schools? They wouldn't accept him? He could patent a cure for cancer, and they would tell him he couldn't come to school because he couldn't score a basket."
Catching Up and Cracking Down
Travis George is a 6-foot-7 forward, a strong rebounder who shows the potential to play elite college basketball. But his grades got in the way. A copy of his high school transcript shows that by the time he was a senior, George had passed only sheet metal and health education. Neither counts toward the 14 core courses the N.C.A.A. requires.
At Notre Dame Prep in Fitchburg, Mass., George earned credit for half a core

course before leaving in January 2005. Several coaches said he then went to Mount Zion, Laurinburg and Patterson in North Carolina, then to Rise Academy and Lutheran in Philadelphia.

George and his coaches say he should be eligible for college by the end of the school year. If his high school transcript is correct, that means he will have completed 13½ core courses in about 18 months.

"I just had to find a place where I was comfortable," said George, who contended that Lutheran was his third prep school.

One of the ways a nomad like George can earn eligibility is to avoid graduation. Sam Rines Jr., who opened Rise as a basketball academy, said a student could get credit for as many as eight core courses in a year. He said that if students finished their senior year and did not meet the N.C.A.A.'s eligibility standards, he encouraged them not to graduate, then to retake classes to raise their averages.

"Graduation," Mr. Rines said, " is a horrible thing."

Rise and Eldon are relatively new, but Redemption Christian has existed since 1979. The N.B.A. star Lamar Odom attended Redemption, known in recruiting circles for its work-study program. Students work shifts in a bakery and sell cake and cookies door to door. Redemption's founder and head administrator, the Rev. John Massey Jr., said, "Kids come here as a last resort."

Many of its basketball stars are postgraduates in need of higher standardized test scores, but it also has high school students. Yet Redemption is not registered with the New York State Department of Education, so it cannot award diplomas.

"Is the college not asking them for a bona fide high school diploma?" said Thomas Hogan, the supervisor for the office of nonpublic school services in the education department. "Because they can't legally give one."

When Laura Holmes, a vice principal at Redemption, was asked about its accreditation, its diploma policy and the percentage of the students who play basketball, she sent a 15-page fax that included positive articles about Redemption, awards given to Mr. Massey and an anonymous post defending him taken from a George Washington fan Web site, _gwhoops.com_ (http://gwhoops.com/) .

But Lorenzo Keeler said there was no comparison between Redemption and his current school, South Kent. "We were literally doing fractions in math class," he said of Redemption. "Stuff I did years and years ago."

Mr. Lennon, the head of the N.C.A.A task force, said it would focus first on schools like Redemption that are not under state regulation. "We're committed to flushing out those high schools abusing the system and putting a stop to it," he said.

One question the task force must answer: What is the maximum course load? For now, there is no rule against taking the required 14 core courses in a year.

It is essentially impossible for a student at Winchendon or South Kent to take more than five core courses in a school year, the coaches there said. (Intense summer school could add one or two more.)

"If they set the limit at five, I'd be in favor of that," Coach Chillious of South Kent said.

With the task force recommendations due June 1, Mr. Lennon issued a warning: "Any student contemplating leaving their high school right now to pick up additional courses needs to be aware the N.C.A.A. will be implementing policies. They need to make sure they are taking real courses, academic courses, and not simply trying to buy eligibility."

But after years of not policing secondary schools, the biggest challenge for the N.C.A.A. will be determining which of the nation's 5,000 private schools that do not fall under state regulation are exploiting the system.

Athletic department's response pleases profs
Faculty member: Fact-finding businesslike

By ANTHONY GIMINO and JOHN MOREDICH
Published: 04.12.2006
The University of Arizona athletic department went fact-finding yesterday, interviewing professors who claim the former interim head of the classics department gave preferential academic treatment toward a UA athlete.
"They were businesslike, interested, professional, which is what I hoped it would be," said associate classics professor Gonda Van Steen. "They took it seriously."
Van Steen was one of eight professors in the classics department who signed a vote-of-no-confidence petition March 28 that called for the ouster of interim head Alexander Nava.
Nava resigned Monday.
Yesterday, Bill Morgan, in charge of compliance within the athletic department, and Doug Woodard, the faculty athletic representative, talked individually to those professors and others for more than two hours on campus.
"They were investigating very seriously," said associate professor of classics David Christenson. "They weren't there to argue with me."
Van Steen and Christenson said the athletic department representatives were especially interested in potential academic fraud by Nava and how the student-athlete in question became enrolled in graduate-level classes without sufficient prerequisites.
The student-athlete has not been named by the professors because of federal student privacy rights, but he is identified as Chris Rodgers, who is the only one who fits the description in the petition - a graduate student on the basketball team.
UA senior associate athletic director Kathleen "Rocky" LaRose set no timetable on the completion of the athletic department investigation. She said the Pac-10 was notified of possible problems "the second" athletic director Jim Livengood received the professors' petition.
"I will say this: It will be a very thorough investigation," LaRose said.
"We're not going to reach any conclusions until all the facts are in, and everyone who needs to be talked to has been talked to, and any data that needs to be pulled up is pulled up."
After the athletic department investigation is complete, LaRose said the next step is for UA to forward the findings to the Pac-10. If the athletic department has found any wrongdoing, it will recommend sanctions.
The matter is then reviewed by the Pac-10 compliance committee, which could accept those sanctions or add to them. Then the case could get moved to the NCAA, "who might have an additional say," LaRose said.
Rodgers, who earned his undergraduate degree in December, needed to take nine units of graduate-level classes to remain eligible this spring.
Rodgers has not returned phone calls or e-mails from the Citizen in the past two days.
LaRose said the athletic department monitors class schedules of its athletes to see if they fulfill NCAA requirements, but that the final course work is approved by an individual's college adviser.
A psychology major, Rodgers enrolled in nine graduate-level units in the classics department - three in a course in Greek and Roman Sculpture and another six in an independent study class, supervised by Nava, whose background is in religious studies.
Christenson and Van Steen allege that Nava's handling of independent study courses raises many red flags as potential for abuse.
Nava said yesterday he had 27 students in independent study classes this semester, including 11 student-athletes. Christenson and Van Steen said classics professors typically have less than five students in independent study.
LaRose declined comment on this specific case when asked if the athletic department was aware of potential problems prior to the March 28 petition in regard to student-athletes in independent study classes.
However, a Jan. 30 memo from the Undergraduate Council to university "deans, directors, department heads and faculty" warns that

"irregularities in the use of independent study courses were recently brought to the attention of the Undergraduate Council."
In the petition, the professors say that the student-athlete was enrolled in independent study by Nava "without submitting the necessary paperwork." Christenson said Woodard, the athletic department faculty representative, was interested in Nava's alleged "end run" around the enrollment process.
"His actions are indefensible," Christenson said. "This is blatant and willful fraud, and I think that will come out eventually, if it has to."

Robert and Brent,

Great work, and thank you for all you continue to do in assisting our student-athletes with integrity!

Take care,
Larry

>>> Brent Blanton 9/27/2007 10:14 AM >>>
Ladies and gentlemen,
Below is an article about serious problems within Florida State University's tutorial program that I must forward to you all - these issues cannot occur within our program. I am in no way suggesting that any of you cross the line when tutoring, but I do feel it important to read concrete examples of how good people working with kids with real problems can make mistakes. Should any of you have concerns regarding issues like these, or anything else that may cross a line, please do not hesitate to contact me.

Again, I do not think that we make errors in judgment like these, but I wanted to pass the information along. Take care, and keep up the wonderful work you are doing for our students and office.

Brent

Nearly 2 dozen FSU athletes accused of cheating

The Associated Press
Published on: 09/26/07
Tallahassee, Fla. Two athletic department academic assistance employees have resigned and 23 Florida State University athletes were implicated in cheating on tests given over the Internet, school officials said Wednesday.

The athletes represent nine sports and 17 of the students are or have been on scholarship. Officials could not identify the students and could not say which sports are involved because of federal confidentiality restrictions.

University President T.K. Wetherell reported the findings in a letter to the NCAA. He indicated inquires are continuing although an internal investigation failed to find conclusive evidence of a more widespread pattern of cheating.

The students could face punishment from the university and NCAA including loss of eligibility. The NCAA also could sanction the university, but spokesman Erik Christianson said it would be speculative and declined comment.

"I think the school took appropriate action," said Jim Smith, chairman of the university's board of trustees and a former Florida attorney general. "It's unfortunate something like this could happen."

Wetherell ordered an investigation by the university's Office of Audit Services in May after receiving information an athletics department learning specialist had directed one athlete to take an online quiz for another and then provided the answers.

The student who took the test was not enrolled in the class and reported what happened to his athletics academic advisor.

Neither he nor the other athlete, who had been unaware someone else took the test for him, were disciplined, the report said.

The investigation then found the learning specialist also typed papers for five students who apparently didn't qualify for that service and a tutorovided answers or other unethical assistance to 23 students for online tests. The testing involved a single course, which was not identified.

"Some students from the 2007 semester indicated that it was common knowledge among the student athletes that the tutor would help with the exams in the class," the report said.

The learning specialist and tutor resigned. They are not named in the report.

The tutor confirmed in an interview with the school's auditors that he had been assisting students with answers for the online exams since the fall of 2006, according to the report.

"Student testimony as well as the students' grades indicated the amount of assistance the tutor provided escalated from fall 2006 through his resignation during the summer semester 2007," the report stated.

The auditors also found the learning specialist had failed to direct athletes with disabilities to Florida State's Student Disability Resource Center where they could have received legitimate assistance.

The NCAA is also awaiting more details.

"We are aware of the situation and we will work with the institution when more information is submitted to our office," Christianson said.

Subject: NCAA Drug Testing ~ Medical Exceptions ~ NEW INFORMATION
Attach: ATT00028.txt

Folks,

This is an email that Dr. Ciocca sent to me regarding the topic of what we will now have to have on file to apply for a medical exception if any of our student-athletes test positive on a NCAA drug test. If you recall, we discussed this issue a couple of weeks ago.

I provided this link http://www.ncaa.org/wps/ncaa?ContentID=1458 which contains good information from the NCAA and describes a more stringent policy of "testing" documentation if a student-athlete will be considered/can apply for/is eligible for a medical exception due to a positive NCAA drug test.

Robert Mercer and Dr. Ciocca ~ I urge you to share this information with your entire staff/colleagues, and we are also going to have share this with our coaching staffs. It will not be good enough any more for a student-athlete to say, "I have been tested for a learning disability and I am on prescription meds ~ here is my prescription from my family physician back home!"

Thanks very much and have a good day.

Larry

>>> "Mario Ciocca" <ciocca@email.unc.edu> 4/3/2008 10:36 AM >>>
Larry, Below is the new medical exception rules. Pertaining to stimulants, do you know if this means we need to keep a complete record (actual testing done) in their medical file at sports medicine or can we continue as usual? Right now we get notification from carolina neuropsychiatry on diagnosis and meds but the actual testing documentation is kept there which is off campus. We have not had a problem in the past of getting this documentation on an as needed basis and they usually respond quickly.
Thanks, mario

Subject: [Team_physician_ncaa] NCAA Medical Exceptions follow-up

NCAA Medical Exceptions

The Medical Exception information recently sent to the membership reflects a stricter application of the current policy. This stricter application will be applied effective August 2009. The current policy can be found at <http://www.ncaa.org/health-safety> www.ncaa.org/health-safety, click on "NCAA Drug Testing" and "Drug Testing Exceptions Procedures." The current policy states that "The institution should maintain documentation that supports the use of medication in the student-athlete's medical record on campus. The documentation can be a letter or copies of medical notes from the prescribing physician that documents how the diagnosis was reached, and that the student-athlete has a medical history demonstrating the need for regular use of such a drug. The letter should contain information as to the diagnosis (including appropriate verification of the diagnosis), medical history and dosage information."

This stricter application reflects a medical concern about the use of stimulants by student-athletes without proper diagnosis.

Please note: When a student-athlete reports the use of stimulant medications for ADHD, the athletics staff should then obtain the required documentation, and should maintain those documents in the student-athletes file. In most cases, the request for the exemption takes place upon notification of a positive drug test. This is true for stimulants and diuretics. But for anabolic agents (testosterone) or peptide hormones (hGH), the request to use or continue using while participating in athletics must be made upfront, prior to participation while using.

The expectation is for the student-athlete to provide the required documentation to the athletics department upon matriculation or whenever the treatment commences, and the athletics department to maintain the documentation in its files until such time that the student-athlete tests positive for the banned medication. When the AD is informed of a positive drug test for a student-athlete on these banned meds, he or she will then provide the documentation for a review by the physicians on the CSMAS committee.

One good practice to meet this expectation is to require a dictated letter from the prescribing physician that identifies what steps were taken to make the diagnosis, including a report of the ADHD assessment. If this assessment has not been conducted, the institution may turn to campus student-support services or the disabilities services to request such an assessment.

Subject: Re: NCAA Infractions Penalties Article

Folks,

Although you may not think it may be necessary to share this article (I have provided both the link to the original article and have pasted the article in this email) with the EVERYONE email list in our Department, I thought it was best to do so because "this type of stuff" will certainly effect EVERYONE in a Department of Athletics and would also cause many hardships within the University community.

Thanks so much and be careful out there!

Larry

NCAA infractions committee looks to get tough on serious violators

By Steve Wieberg, USA TODAY

Responding to complaints that it has been too soft, the NCAA's infractions committee is preparing to come down harder on college athletics' serious rules violators - returning to television sanctions, giving closer consideration to postseason bans and widening the use of scholarship cuts.
It also wants to levy monetary fines.

Josephine Potuto, a Nebraska law professor who is the immediate past chairman of the infractions committee, will lay out the recommendations Thursday to the association's Division I Board of Directors, which meets in Indianapolis. Though NCAA rules already provide for many of the measures, Potuto said the panel is looking for a go-ahead to move more aggressively than it has in recent years.

"The committee feels that, over the years, the penalties really have gotten out of synch with the magnitude of violations," Potuto said Wednesday.

"Increasingly, there were people on campus saying, 'There's no teeth here. Did they lose any scholarships? Were they taken out of the postseason? Were wins vacated? And if not, it couldn't have been a big case.' … Only certain penalties really signal seriousness to anybody."

FIND MORE STORIES IN: Indianapolis | Nebraska | Texas Southern | Board of Directors

The NCAA's penalty structure has gone largely unchanged since 1985 and invited skepticism - some of it internal - that it effectively deters cheating in an era when the financial stakes and pressures in major-college athletics continue to rise.

Even in serious cases involving illicit extra benefits, recruiting and other competitive-edge violations, the punishment sometimes don't measure up to sanctions now in place for teams' academic deficiencies. Those start with scholarship cuts and escalate to recruiting and practice restrictions and ultimately postseason bans.

The prospective crackdown would subject offenders to:

● The first bans on TV appearances in Division I since 1996. The restriction would extend to "all modes of video transmission," including video streaming and other internet appearances.

● More scholarship cuts. Now limited to cases involving financial-aid violations, they would become "the norm" in all serious cases.

● Fines, which the committee would assess sparingly but across a wider array of sports. They currently affect only basketball and programs forced to return shares of NCAA tournament revenue.

● More bans on postseason appearances. Among other things, that would become a "presumptive" penalty in cases involving academic fraud and repeat violations.

Tournament or football bowl bans have been assessed in eight of 40 major infractions cases involving Division I schools in the past 3 1/2 years. But in only three, most recently involving Texas Southern softball in July, was the action initiated by the NCAA (the five remaining bans were self-imposed by schools and folded into a wider array of penalties handed down by the infractions committee).

One trend unlikely to change is the NCAA's reluctance to hit offending athletics programs with its strongest sanction, a ban on practice and competition - a complete shutdown known as the death penalty.

"I know that, often, the media talk about the fact that the committee is not imposing it in cases that have been extremely egregious," Potuto said. "But the thing that set SMU apart (in 1987, the only time the death penalty has been imposed in Division I) was the institutional effort by high-level administrators to hide the fact that they were committing violations - and repeatedly hide it. In the cases at least over the time I've sat on the committee, we have not had that circumstance.

"It's still in there for the kind of case where there's not only a failure of institutional control but an unethical-conduct approach. But in other cases where there are really serious violations - particularly if we ramp up the penalties now - there are other ways to get at those violations without effectively shutting down a program."

Schools have learned to come clean and cooperate in investigations, most anticipating it will help their case and ultimately minimize sanctions. Notably, Potuto's committee also is asking the NCAA board to eliminate that tack as a damage-control strategy.

A proposed rules change would stipulate: "Full and complete cooperation in investigations and in disclosure of violations is an obligation of membership and does not mitigate sanctions imposed on either institutions or their staff members." Failure to cooperate would represent an "independent violation."

The NCAA is a joke regarding violations: when is the NCAA going to make a decision on Reggie Bush, for example?

I nominate Bobby Knight to be employed by Miles Brand to oversee investigations of rules violations on the part of NCAA members! Knight was supposedly squeaky clean as a coach. I wonder if Knight has a cell phone like the last coach at Indiana?

just-thinking wrote: 5d 1h ago
The "Death Penalty" does more to injure the students than the institutions. Some of these kids (a few at least) actually do want an education and see an athletic scholarship as their ticket to higher education. If the NCAA imposes a "death penalty" then there must be a provision that the college/university offer all students on athletic scholarships an equivalent credit against tuition costs to continue their academic pursuits. Once the kids are taken care of, let the Athletic Departments suffer whatever fate is warranted.

You really need to get over your penis envy of USC. Name one school that has a better record in BCS Bowls over the last six years.
****
Well, DUH! Did you even read the article So Cal?

USC should have been given the "Death Penalty" in football over playing Reggie Bush while he was on the payroll. The NCAA looked the other way over the Holy Land of Southern Cal. Any other school in FBS would have had to return the Heisman Trophy and forfeit all it's games during the Bush era.

LSU has 2 Crystal Footballs in their trophy case. USC has only one.

The paper trophy (AP) means nothing.

The NCAA's infractions committee has been looking the other way since 1985, If they really want to do something attach the sanctions imposed also to the Head Coach This way he can't jump a sinking ship and sail away free & clear with another school.

The NCAA needs to correct the problem at it's source, the Head Coach.

I agree. The stinking agents need to be held accountable too. They know what they are doing is wrong! The NCAA won't do squat.....too much money to lose. Not to mention how they got burned by Rick Nueheisel and Jerry Tarkanian! Some one needs to police the NCAA!

Part of this 'supposed' reform needs to be attached to coaches too. Look at how many coaches have left after they get their university in trouble, just to be picked up for a huge contract to coach at another school leaving all of their punishment behind. Penalties need to follow the coaches! Perfect example: Cell-vin Sampson... the NCAA should have NEVER allowed him to even be able to go to Indiana after his previous actions. I have no attachment to either school... it's a system-wide problem that needs to be addressed immediately! Plus, if the coach's program is guilty of major violations, there should be a mandatory forfeit of contract buyouts. It kills me to see a guilty coach walk away from a university with a $500,000 'severance pay' in-hand. Don't reward the criminals!

Subject: URGENT ~ Student-Athlete Medical Insurance and Prescription Drug Information
Attach: Sports Medicine Info (2009-10).pdf

Colleagues:

Once again, we are requesting your assistance in obtaining medical insurance information from your respective sport's student-athletes. Additionally, we ask for your assistance in obtaining newly-required (by the NCAA) documentation from your student-athletes who might be taking prescription medications that include banned substances (e.g., stimulant medication for learning disabilities).

Please note that this is a required procedure, and it is imperative that it be done before your student-athlete engage in any type of voluntary or mandatory team practices this fall!!!

Procedures for Medical Insurance Forms

1. Print off the attached document: "Sports Medicine Info (2009-10)".

2. Make the appropriate number of copies and mail the entire packet to the parents/legal guardians of each of your student-athletes that you are expecting to be on your squad list during the 2009-2010 year (i.e., returnees, transfers, incoming freshmen, medical exempts - EVERYONE!!).

3. As an alternative to mailing, please note that you can also email this packet to parents if you have email addresses for all of them - however, it will be your responsibility to follow-up with each of them to make sure that they have successfully received the email and are proceeding with completing the required documentation.

4. The enclosed medical insurance forms are to be returned either to you or one of your coaching staff members.

5. Once you receive the completed medical insurance forms from your 2009-2010 student-athletes, alphabetize the forms, attach a current 2009-2010 roster, and give the forms to your respective sport's head athletic trainer. The athletic trainer will review the forms and then send them to the appropriate staff in the Sports Medicine Unit of Campus Health Services. Every student-athlete must complete a form, regardless of whether they have medical insurance!

6. NOTE: The athletic trainer assigned to your sport will review your roster to ascertain if every student-athlete on your roster has completed and returned the insurance form. A student-athlete who does not return the medical insurance form will not be allowed to participate in any practice until the form is received.

This process should be completed in its entirety, with all forms returned to Sports Medicine, by Friday, July 10, 2009.

This email has been sent to each head coach, assistant coaches, administrative assistants/directors of operations of certain sports, the sports medicine staff, and to some team secretaries.

Thank you for your immediate attention to this very important welfare issue concerning our student-athletes. Please be very diligent in obtaining this information in a timely fashion, and please feel free to share this information with your colleagues in your work unit. I appreciate your cooperation and assistance in advance.

I am hopeful you are enjoying the start of your summer. Take care.

Larry

May 27, 2009

Dear Parents of UNC Student Athletes:

The UNC Sports Medicine Department would like to welcome your child to Chapel Hill for the 2009-2010 academic year! In advance of his/her arrival for the fall semester, we would like to provide you with some information as to how the Department of Athletics will handle any medical issues that might arise.

Generally speaking, the Department of Athletics covers most medical costs that are associated with participation with UNC Athletics (see www.tarheelblue.com for more information). **It should be noted, though, that any visits, procedures, or prescriptions must be approved by the team physician before the Department of Athletics will cover the charges**. Below are some items to remember.

1) Each team is assigned a team athletic trainer, who is typically their initial contact for medical issues, as well as a team doctor and orthopedist to provide medical care. For details on these team assignments, please see the Department of Athletics' official website (www.tarheelblue.com).
2) Your child or family's insurance will be the primary insurance coverage. Therefore, please make sure your child is in possession of a copy of all insurance cards (medical, prescription) when he/she arrives for school in the fall. Your child should be instructed to present the applicable card each time he/she picks up a prescription or is seen by a physician outside of Campus Health. **Please note that the UNC Hospitals system is considered "outside" of Campus Health**. Therefore, insurance cards must be presented at all UNC Hospitals appointments. Failure to do so results in a very time-consuming filing process after the fact.
3) LaToya Wright (919-966-3655) is your Sports Medicine contact for any billing questions you may have. When presenting his/her insurance card at time of service, your child should be instructed to identify Sports Medicine as the "secondary insurer". If this procedure is followed, future bills for the service will be sent directly to the Sports Medicine staff, alleviating the necessity for you to forward any bills to us. However, should you receive a bill that you believe should be covered by Athletics, you should forward it to us via the address below, or by fax at 919-966-9779.
4) If at any point you receive an insurance payment reimbursement check for an expense originally covered by the Department of Athletics, the check should be immediately signed over to Sports Medicine and forwarded to us at the address below, so that we can apply the funds to the medical expenses on your child's account. Your retention of these reimbursement checks would result in an NCAA violation and would render your child ineligible to participate in intercollegiate athletics.

5) The attached form must be filled out completely and returned to your child's head coach as soon as possible. Along with the completed form, please send a copy (FRONT and BACK) of all insurance cards (e.g., medical and prescription drugs) to the Head Coach at the address on the form. We must have this information **by July 10th** to call and verify benefits on all policies before August 1. Note that we MUST have the policy holder's information, as it is critical to verify benefits and in cases in which we need authorization for radiology, surgery, etc.
6) It is critical that we receive updated information regarding your child's insurance throughout the year. Therefore, after submitting the completed form and copies of insurance cards this summer, please retain a blank copy of the form to send to us, should any insurance information change throughout the year.
7) With HIPPA/FERPA regulations, we must have your child's permission for a doctor to speak with parents about his/her medical records. Be sure your child is clear with his/her physician regarding what can be discussed with parents.
8) To assist in your child's smooth transition into our medical system, please follow the enclosed instructions to obtain a Medical Record Number (MRN) for your child. This number should then be included on the attached form where requested.
9) Lastly, please be sure to read the new NCAA regulations regarding ADHD medicines in the enclosed letter. Contact information is included in that letter should you have questions or concerns about this issue.

We appreciate your time reading this document and completing the necessary paperwork in order to prepare your child for this fall. Should you have questions or concerns regarding these or any other Sports Medicine issues, please feel free to give us a call at 919-966-3655.

Sincerely,

Dr. Timothy N. Taft, Director
Sports Medicine Division
CB # 7470, Campus Health Services
University of North Carolina
Chapel Hill, NC 27599

enclosures

Please return completed form as soon as possible, with copy of insurance cards (**front and back**) to:

Head Coach (**Sport-Specific**)

Name: _____ Date of Birth: _____/_____/_____ S.S.#: _____-____-_____

Policy Number _____ Relationship to Student:_____

Address (Street, City, State, Zip):_____

Home Phone Number: _____ Cell Number _____

Policyholder's Employer: _____

Employer Address (Street, City, State, Zip):_____

Employer's Phone: _____ Fax: _____

(Check all that apply) Full-time ☐ Part-time ☐ Retired ☐ Self-Employed ☐

Is this policy an: HMO ☐ or a PPO ☐ ? If this policy requires pre-authorization from a primary care physician before services can be rendered, please complete the following:

Physician's Name:_____ Phone Number:_____

Do you have a **separate prescription drug policy**? Yes ☐ No ☐ If yes, please provide name and address and/or a blank copy of claim form. Please also include a legible copy of your drug card, front and back.

Name:_____ Address:_____

I give my permission to the Division of Sports Medicine to file a claim for medical services with the above health care insurer. According to NCAA regulations, I understand that any insurance payments I receive must be returned to repay the Department of Athletics for your child's services.

Parent's Signature:_____ Date:_____

**** If this information changes during the school year, please contact:

Division of Sports Medicine
CB #7470, Campus Health Service
University of North Carolina
Chapel Hill, NC 27599

919-966-3655 phone, or fax new card front & back to 919-966-9779. On cover sheet, include student's name, sport, and above policy holder information (if different). Please retain a blank copy of this form to re-submit if your insurance changes.

**** **Athletes should have their own copy of all insurance cards**.****

Instructions to Obtain a UNC Hospitals Medical Record Number (MRN)

The UNC Sports Medicine Department would like to request your assistance with obtaining a UNC Hospitals Medical Record Number (MRN) for your child. **Please note that if your child was enrolled at UNC during the 2008-2009 academic year, he or she most likely already has an MRN**. If you have this number on file, please include it on the attached form. If you do not, you may call the phone number identified below to obtain the MRN for inclusion on the form.

The Campus Health System is a separate entity from the UNC Hospitals System. Therefore, in case your child ever requires services at the hospital (MRI, CT scan, other radiology or specialty clinic, such as ENT), he/she must obtain an MRN prior to receiving such services. It is important to note that these numbers are permanent; thus, if your child has ever received services from UNC Hospitals or an affiliate, he/she most likely already has an MRN.

To obtain an MRN for your child (or to check to see if he/she already has one), please follow the instructions below. The number should then be included on the insurance form where requested.

****

1. Dial 919-966-1234 (if local) or 1-866-595-3175 (toll-free).
2. Press 1 for English
3. Press 3 to "obtain a new Medical Record Number"
4. You will then be transferred to a customer service representative. Inform them that you need to get an MRN for your child. Please be certain to first ask the representative to confirm that your child does not already have an MRN!

Please have the following information available for the representative:

1. Child's Name, Date of Birth, and Social Security Number
2. Child's Primary Address (should be permanent home address – bills will be sent here)
3. Child's Primary Phone (should be cell phone, if possible, as the hospital clinics will call this number for appointments)
4. Emergency Contact Name and Phone Number
5. Insurance Information (i.e., Does your child have insurance? What type? Subscriber ID? Group Number? Policy Holder's Name and SSN? Mailing address for Insurance Company – usually found on back of card? Is Policy Holder a full-time employee?)

After obtaining the necessary information, the representative will generate an MRN for your child and will give you that number prior to ending the call. **This number should then be included on the enclosed insurance information form that you complete and return**. If your child is ever seen at UNC Hospitals, he/she will receive a plastic identification card with their MRN (much like a credit card). This card should be retained by the student, along with his/her other insurance information.

****

Thanks for your assistance. Should you have any questions about this, feel free to contact us at 919-966-3655.

May 27, 2009

Dear UNC Student-Athlete,

The NCAA has adopted a stricter application with regards to its Medical Exceptions Policy for Banned Drugs. Therefore, institutions will now be required to submit more formal and complete documentation when a student-athlete tests positive on an NCAA Drug Test for the use of any prescription medication that contains a banned drug (for example, stimulant medications for ADHD, such as Adderall or Ritalin).

In an effort to protect our student-athletes from unwarranted NCAA drug testing sanctions in the future, **we are now requiring that all student-athletes who are taking such prescription medication submit to us the appropriate documentation prior to the beginning of the 2009-2010 academic year**.

If you are on such medication, the documentation that we must have on file from you is as follows:

1) A physician's record of your evaluation
2) A physician's diagnosis
3) The history of the treatment that you have undergone
4) A copy of your most recent prescription

Please note that this information can come in many different forms, including in letter format from your treating physician. **HOWEVER**, keep in mind that all of the above information must be included in the letter or other paperwork.

We ask that, if applicable, you compile this required information and submit it to our Sports Medicine staff at the following address no later than **July 10, 2009**. This will give us ample opportunity to seek additional information from you, if necessary, prior to the start of the 2009-10 academic year.

Dr. Mario Ciocca
UNC Division of Sports Medicine
James A. Taylor Campus Health Services
CB #7470
Chapel Hill, NC 27599-7470

Also, on the enclosed pages, I have included a Q&A document from the NCAA competitive safeguards committee. It is my hope that this document will answer any questions you might have about this new requirement.

Thank you for your attention to this critical matter with regards to your future eligibility to participate in intercollegiate athletics at UNC.

Sincerely,

Larry Gallo, Jr.
Senior Associate Athletics Director

NCAA Banned Drugs and Medical Exceptions Policy
A stricter application – August 2009

My name is Jerry Koloskie, and I am the chair of the NCAA competitive safeguards committee.

As you know, the NCAA bans classes of drugs because they can harm student-athletes, and because they can create an unfair advantage in competition. Some legitimate medications contain NCAA banned substances, and student-athletes may need to use these medicines to support their academics and their general health. We have in place a procedure to review and approve legitimate use of medications that contain NCAA banned substances.

Our committee has the responsibility to oversee the banned drug list and review medical exception requests. Physicians on the committee determine whether the use of a banned medication is warranted, and weigh the medical need vs. the potential for abuse and for unfair performance enhancement. This review protects not only the health and safety of the student-athlete, but the liability of the institution. Banned substances should not be allowed unless there is sufficient evidence of medical need.

We've received a number of requests to grant medical exceptions in which the institution or student-athlete did not provide adequate documentation to show the student-athlete had undergone a diagnostic evaluation. Most commonly this occurs in cases of ADHD – Attention Deficit Hyperactivity Disorders.

We often get asked what documentation is needed in order for the committee to grant a medical exception, so let's consider these questions:

Question. *What types of medications fall under the NCAA medical exception policy?*

Answer. First, there is no medical exception for the use of street drugs. The use of any medication that contains a banned substance must be approved. For stimulants, diuretics, and anti-estrogen use, a request for review and approval should be made following the notice of a positive NCAA drug test. For anabolic agents and peptide hormones, the request must come prior to the use of the medication.

Question. *What documentation does an institution need to keep on file?*

Answer. The institution should keep on file **a record of the student-athlete's evaluation**, **diagnosis**, **the history of treatment**, and **a copy of the most recent prescription**. This documentation can be compiled in the form of a dictated letter from the prescribing physician if the letter includes the details previously mentioned. There is no need to keep records of all testing, but rather to demonstrate that an evaluation has been conducted to achieve the diagnosis.

Question. *For ADHD specifically, who needs to conduct the evaluation?*

Answer. The initial evaluation may be conducted by clinicians with experience in assessing ADHD: these include school psychologists, clinical psychologists, psychiatrists, other MD's, and their supervised clinicians.

Question. *What type of assessment is used to diagnose ADHD?*

Answer. There are a variety of tools used by clinicians to reach a diagnosis of ADHD. Many children are diagnosed soon after they begin their formal schooling, and school psychologists and child psychiatrists use behavioral assessments such as the Conners Rating Scale or the DSM-IV ADHD Survey. When a student-athlete is not diagnosed until they have already matriculated to your institution, the institution's student support services or disability services can provide an assessment, using such tools as the Conners Adult ADHD Rating

Scales (CAARS) or the Adult ADHD Self-Report Scale (ASRS). In any case, a student-athlete may go through their family physician for a referral for an assessment.

***Question**. Will an assessment conducted more than 5 years ago be acceptable?*

Answer. Yes, if the student-athlete has been followed-up recently to confirm that continuing treatment is appropriate. On the other hand, if a student-athlete has a history of treatment with stimulant medications for ADHD but has not undergone a diagnostic assessment for this condition, the sports medicine staff should refer the student-athlete for an assessment.

The important criteria are: an evaluation has been conducted, the student-athlete is under ongoing medical care for the condition, and the student-athlete is being treated appropriately.

***Question.** Does a student-athlete need to have an updated letter from the prescribing physician on file each year of their eligibility?*

Answer. Yes, an annual follow-up with the prescribing physician is the minimum standard, and that can be reflected in a letter from the physician or a copy of the medical record, with written indication of the current treatment.

***Question**. Some athletes are embarrassed and don't reveal that they are taking medication for ADHD, so the institution is unaware. How is this handled when a student-athlete tests positive for using the medication?*

Answer. Of course, all medications should be reported to the sports medicine staff, so they can be informed in the event a student-athlete experiences any illness or injury while under their care. Incoming student-athletes should be educated on the importance of this policy, and specifically advised of the need to share information about medications that may contain banned substances, such as Adderall or Ritalin. Many new student-athletes are unaware they may be using banned substances. Making it a requirement to report all medications as a part of the routine care, and naming a variety of examples, the sports medicine staff can help diminish embarrassment. The NCAA will also include information about this issue as it sends out information to prospective student-athletes.

If a student-athlete tests positive for a medication and has not provided documentation to the institution, an appeal hearing may be scheduled so that the student-athlete and the institution can gather that information. Until the hearing takes place, the student-athlete must be withheld from competition as in any other positive drug-test case.

***Question**. Do student-athletes need to be prescribed a non-stimulant medication for ADHD before using stimulant medications?*

Answer. The NCAA Medical Exception policy requires that a non-banned medication be used if available, but the medical community has generally accepted that with this age group, the non-stimulant medications are not as effective to treat ADHD. The committee will approve the use of stimulant medications for ADHD without a prior trial with non-stimulant medicine.

For other medical issues, student-athletes need to provide documentation that non-banned medications indicated for the condition have been prescribed before using the banned medication.

These are the most common questions we have heard about the NCAA Medical Exception policy, but your institution may have a unique question or circumstance involving student-athlete use of banned medications. For these, contact the NCAA Health and Safety Staff, at www.ncaa.org/health-safety . Together we can assure that our student-athletes are able to compete in a healthy and safer athletics environment.

1 PROCEEDINGS BEFORE THE DIVISION I
2 COMMITTEE ON INFRACTIONS OF THE
3 NATIONAL COLLEGIATE ATHLETIC ASSOCIATION
4 In Re: FLORIDA STATE UNIVERSITY) Case No. M286
5 TRANSCRIPT OF PROCEEDINGS
6 BE IT REMEMBERED, that on this 18th day of
7 October, 2008, the above-entitled matter comes on for
8 hearing before the Division I Committee on
9 Infractions of The National Collegiate Athletic
10 Association, meeting in the Westin Hotel,
11 Indianapolis, Indiana, beginning at 8:30 o'clock
12 a.m., with Chairman Dennis Thomas presiding.
13 The other members of the Committee present
14 are: Messrs. Alfred "Jim" Lechner, James Park, Jr.;
15 Mmes. Josephine Potuto, Andrea Myers and Eileen
16 Jennings.
17 Messrs. John Black, Britton Banowsky and
18 Melissa Conboy, new members of the Committee, were in
19 attendance.
20 Ms. Naima Stevenson is present representing
21 the NCAA General Counsel's Office.
22 Mr. Shepard Cooper, Director for the
23 Committees on Infractions, Mr. Jim Elworth, Assistant
24 Director for the Committees on Infractions, Ms.
25 Cheryl DeWees, Coordinator for the Committees on

1 Infractions, and Ms. Karen Martin,
2 Administrative Assistant to the Committees on
3 Infractions were also present.
4 Also present are Mr. Jerry Parkinson
5 and Mr. Brian Halloran, Coordinators of Appeals
6 for the Infractions Committee.
7 APPEARANCES
8 The NCAA Enforcement Staff of the
9 National Collegiate Athletic Association was
10 represented by Messrs. David Price, David
11 Didion, Ameen Najjar, Kevin Lennon and Chris
12 Strobel; and Mmes. Joyce Thompson, Stephanie
13 Hannah, Julie Roe, Rachel Baker, Jennifer
14 Henderson, Kelly Groddy.
15 Present on behalf of Florida State
16 University are Messrs. T.K. Wetherell, Joseph
17 Beckham, Randy Spetman, Brian Battle, Larry
18 Abele, Mark Meleney, Chuck Smrt, Bill Shults;
19 and Mmes. Betty Steffens and Stacey Karpinski.
20 Mr. Shane Lyons, Associate Commissioner
21 of the Atlantic Coast Conference, was also
22 present.
23 Ms. Brenda Monk and her attorney of
24 record, Mr. Brant Hargrove, appear in person.
25

1 (Whereupon, the following proceedings
2 are had and entered of record.)
3
4 CHAIRMAN THOMAS: Good morning,
5 everyone. This is Case No. M286, Florida State
6 University. My name is Dennis Thomas. I am the
7 Commissioner of the Mid-Eastern Athletic
8 Conference and the Vice-Chair of the Division I
9 Committee on Infractions.
10 With me today hearing this case are to
11 my right, Andrea Myers, the Director of
12 Athletics Emeritus at Indiana State University;
13 Alfred "Jim" Lechner, Jr., an attorney with the
14 New York Law firm of Case & White, and formerly
15 a Federal District Judge, District of New
16 Jersey. Mr. Lechner is one of the Committee's
17 two public members.

18 To my left is Josephine Potuto, the

19 Richard H. Larson Professor of Constitutional

20 Law at the University of Nebraska, Lincoln, and

21 the former chair of this Committee; Eileen

22 Jennings, the general counsel at Central

23 Michigan University; James Park, Jr., an

24 attorney with the law firm of Frost Brown Todd

25 of Lexington, Kentucky. Mr. Park is a public

1 member.

2 Seated at the table to my right is

3 Shep Cooper, the Director for Committees on

4 Infractions, and Jim Elworth, the Assistant

5 Director.

6 At the table to my left are the

7 Committee's two Coordinators of Appeals: Dean

8 Jerry Parkinson, Dean of the School of Law at

9 the University of Wyoming, and Brian Halloran of

10 Malibu, California, the manager and general

11 counsel of Painted Hills Wind Developers, a

12 company involved in the renewable power

13 business.

14 Ms. Naima Stevenson, NCAA's General

15 Counsel's Office, is seated at the table by

16 herself between the enforcement staff and the

17 University. Where is Naima? There you are.

18 Cheryl DeWees, the Committee's

19 Coordinator, and Karen Martin, the Committee's

20 Administrative Assistant, are seated together at

21 the table behind Ms. Stevenson. Ms. DeWees and

22 Ms. Martin are available to assist with any

23 logistical needs during the hearing.

24 Also here today is Mr. John Bowen, of

25 Bowen & Associates, a Certified Court Reporter

1 from Kansas City, to take the record in the
2 case.
3 Finally, three recently appointed
4 members of the Committee are attending this
5 hearing as observers and are seated in the very
6 back of the room with Ms. DeWees and Ms. Martin.
7 They are John Black, a new public member. Mr.
8 Black is a partner with the law firm of
9 Shughart, Thomson & Kilroy of Kansas City,
10 Missouri.
11 Also here is Melissa "Missy" Conboy,
12 the Deputy Director of Athletics and Senior
13 Woman's Administrator at the University of Notre
14 Dame, and Britton Banowsky, the Commissioner of
15 Conference USA.
16 Before I turn to other instructions,
17 let me explain how this microphone works. It is

18 a very sophisticated object. On each microphone

19 is a small black button. You activate your

20 microphone by pushing that button. You know

21 your microphone is activated because the red

22 collar on the top will be illuminated.

23 When you push the button and activate

24 your microphone, you turn off all other

25 microphones except mine. So, please, be

1 careful. Don't activate your microphone while
2 someone else is speaking. But be sure to
3 activate it when you wish to speak.
4 You don't need to press your button to
5 turn off your microphone as that automatically
6 happens when the next speaker pushes his or her
7 button. If you push the microphone button when
8 you are done, all that will happen is you will
9 cut off the next speaker. So, please, don't do
10 this. If the person sitting next to you forgets
11 to activate his or her microphone, please push
12 the button.
13 Finally, if you have a cell phone,
14 please turn it off or place it in a silent mode.
15 President Wetherell, will you please
16 introduce yourself and other representatives
17 from the University?

18 MR. WETHERELL: Thank you, Mr.

19 Chairman. I am T.K. Wetherell, President of

20 Florida State University. I will go down to my

21 right. Betty Steffens is here, who is the

22 general counsel for Florida State.

23 Chuck Smrt, who served as a consultant

24 for us on this case, is with us. Larry Abele,

25 the Provost of Florida State is here. Stacey

1 Karpinski, also with Chuck's firm and a
2 consultant on the case.
3 Dr. Joe Beckham, who is the Faculty
4 Rep for Florida State. Randy Spetman, who is
5 our Athletic Director. Brian Battle, who is an
6 Associate Athletic Director for Compliance.
7 Mark Meleney, who is the former Associate
8 Athletic Director for Academic Service, and our
9 current Academic Services Director for
10 Athletics, Bill Shults. And at the far end of
11 the table is Shane Lyons, who is the ACC Rep for
12 us.
13 CHAIRMAN THOMAS: Thank you, President
14 Wetherell.
15 Mr. Lyons, you have already been
16 introduced. Would you like to re-introduce
17 yourself?

18 MR. LYONS: That is okay.

19 CHAIRMAN THOMAS: All right. Thank

20 you.

21 Ms. Monk, will you, please, introduce

22 yourself and your counsel?

23 MS. MONK: I am Dr. Brenda Monk, and I

24 served as a learning specialist at Florida State

25 University from 2001 until 2007. Sitting to my

1 left is Brant Hargrove, who is representing me
2 today.
3 CHAIRMAN THOMAS: Thank you.
4 Mr. Price.
5 MR. HARGROVE: Mr. Chairman, I have a
6 question, if I may. I mentioned to Dr. Monk
7 that when we walked into the room that they are
8 many and we are few. I would ask permission to
9 have Allison Monk sit next to me, because she
10 has assisted me on some of this, and it would
11 aid me if I could have her sit next to me, if
12 that is allowable. If it is not, that is fine.
13 too.
14 CHAIRMAN THOMAS: We have already
15 addressed that issue, and when the information
16 comes about that is relevant to your assistant,
17 she will be allowed to participate. Thank you.

18 MR. HARGROVE: Thank you.

19 CHAIRMAN THOMAS: Mr. Price.

20 MR. PRICE: Thank you. I am David

21 Price, Vice-President of Enforcement. To my

22 immediate left are the two individuals

23 responsible for presenting the case today, David

24 Didion and Joyce Thompson.

25 Then we have Directors of Enforcement

1 Stephanie Hannah, Julie Roe, Ameen Najjar.
2 Rachel Baker is our Director of Agents, Gambling
3 & Amateurism activities. Kevin Lennon is Vice-
4 President for Membership Services.
5 Jennifer Henderson and Kelly Groddy
6 are with our student-athlete reinstatement
7 staff, and Andrew Perrott is a legal intern for
8 us. He is not here today, I see. And Chris
9 Strobel is our Director of Enforcement for
10 Secondary Violations.
11 CHAIRMAN THOMAS: I would also like to
12 note that the Vice-President for Membership
13 Services, Kevin Lennon, is here in case there
14 are any questions from the Committee regarding
15 student-athlete's reinstatement.
16 In these hearings we proceed rather
17 informally. If you wish to take off your

18 jacket, please feel free to do so. You are

19 welcome to stand up and move about and to avail

20 yourself of the refreshments in the back of the

21 room.

22 We usually spend about an hour or an

23 hour and a half and then take a break. If at

24 any time you need to step out of the room,

25 please feel free to do so. One exception is for

1 Dr. Monk.

2 As you know, you should be here when

3 allegations are discussed or concern you. If

4 you need to step out, just signal me and we will

5 accommodate you.

6 You were previously advised in the

7 Notice of Allegations sent by the enforcement

8 staff, as well as in a supplemental letter you

9 received from the Committee, that the Committee

10 does not receive all of the information and

11 materials which the enforcement staff has

12 received and which the enforcement staff may

13 have developed.

14 In particular, the Committee does not

15 see all the information that the enforcement

16 staff has placed in the custodial file. What

17 the Committee has seen is a list of items that I

18 am going to read now. That list also has been

19 provided to you. This list contains the written

20 record of the case as it exists right now at the

21 start of this hearing.

22 What the Committee knows about this

23 case is what is contained in this record. The

24 report currently includes the following items:

25 Notice of Inquiry.

1 Notice of Allegations.

2 The institution's response to Notice

3 of Allegations.

4 Brenda Monk's response to the Notice

5 of Allegations.

6 A letter from David Hart regarding the

7 University corrective actions.

8 A letter from President Wetherell in

9 response to Dave Hart's letter.

10 The Case Summary.

11 Brenda Monk's supplemental response to

12 the Notice of Allegations.

13 A memo from the Student-Athlete

14 Reinstatement staff in response to questions

15 from the Committee.

16 Letters from Florida State's outside

17 consultant, Chuck Smrt, expressing concern

18 regarding the Committee's request for

19 information from the Student-Athlete

20 Reinstatement staff.

21 The University's response to questions

22 posed by the Committee on October 14th, and an

23 October 14th memo at random sent to Chuck Smrt.

24 If there are any materials which are

25 not part of the record, which I just listed and

1 that you want the Committee to consider, then
2 you must ask permission from the Committee to
3 have that information introduced as evidence
4 during this hearing.
5 The Committee has the discretion to
6 determine what additional information will be
7 made a part of the record.
8 Let me emphasize that the record in
9 this case constitutes the list of items that I
10 just read to you. In addition, any other items
11 accepted into the record during this hearing as
12 well, of course, and the information presented
13 as discussed here today that will be transcribed
14 by Mr. Bowen.
15 The Committee's findings in this case
16 will be based on this record. Should there be
17 adverse findings against the University or any

18 party involved that results in an appeal, this

19 record and the Committee's infractions report

20 will constitute the full and complete record on

21 appeal.

22 Finally, there may be copies of

23 memoranda transcripts and other documents that

24 are provided to the University or an involved

25 party by the enforcement staff during this

1 hearing. These documents must be returned to
2 the enforcement staff at the conclusion of
3 today's hearing.
4 We have set aside the day to hear this
5 case. We are here to undertake a full and
6 complete exploration of the issues, not to rush
7 through the hearing. We will spend as much time
8 as is necessary for you to explain the
9 circumstances out of which this case arose.
10 When we finish today, we want you to be
11 satisfied that you have had a full opportunity
12 to do that.
13 At the end of the hearing today, we
14 would like to have a discussion with the
15 University regarding its self-imposed penalties
16 and corrective actions, and in particular the
17 reasoning the institution used in imposing these

18 sanctions and implementing the corrective

19 actions.

20 Based upon the information that may be

21 discussed in the hearing today, or that may have

22 been raised in the information previously

23 submitted, the Committee has the authority on

24 its own initiative to make additional findings

25 or to amend the allegations to conform with the

1 information presented today.

2 Additional findings may relate to any

3 bylaw violations, including unethical conduct,

4 lack of institutional control, or failure to

5 monitor.

6 We have noted in particular that there

7 is an allegation of failure to monitor against

8 the institution and an unethical conduct charge

9 against a former academic advisor.

10 Even if there were no such

11 allegations, those here today should understand

12 that the Committee can make these findings if

13 the evidence presented to the Committee

14 justifies such action.

15 If the Committee should decide that

16 additional findings may be appropriate, it will

17 inform all parties and give the opportunity to

18 respond. If the additional information relates

19 to unethical conduct, the lack of institutional

20 control or a failure to monitor, the Committee

21 will afford the parties an opportunity for

22 further response after hearing if they so

23 desire.

24 Each violation charged in the Notice

25 of Allegations, or in the enforcement staff's

1 Case Summary is considered to be a major
2 violation of NCAA legislation unless
3 specifically designated as a secondary
4 violation.
5 If the enforcement staff, the
6 institution or Dr. Monk believe that a violation
7 is secondary, including any initially alleged as
8 a secondary violation by the enforcement staff,
9 that party must make that known to the Committee
10 at this hearing and either then rest on its own
11 written submission, if any, or present evidence
12 and arguments why it is secondary.
13 The Committee will make the final
14 decision after considering all of the
15 information and arguments in the record.
16 Everyone here today also should know
17 that any issues related to the processing of

18 this case includes issues regarding the conduct

19 of the enforcement staff must be raised during

20 the course of this hearing.

21 Failure to raise such claims during

22 the course of the hearing constitutes a waiver

23 of such claim. Among other things, such waiver

24 precludes raising these issues on appeal.

25 We now turn to brief general opening

1 statements from the University and the NCAA
2 staff. Dr. Monk will be provided an opportunity
3 to make an opening statement, if you wish, as
4 well as you, Mr. Lyons.
5 After opening statements, we will turn
6 to the allegations contained in the Case Summary
7 and work through those. We will address the
8 allegations in the order as they appear in the
9 Case Summary.
10 After we have considered all of the
11 allegations, we will have closing statements
12 from the University, Dr. Monk and the NCAA. Mr.
13 Lyons, you will have the opportunity to make a
14 closing statement if you wish.
15 Are there any questions?
16 MR. HARGROVE: Yes, sir, I have one.
17 On behalf of Dr. Monk, will I be allowed to make

18 the opening statement? You mentioned her, you

19 didn't mention me. I just wanted to be sure.

20 CHAIRMAN THOMAS: Dr. Monk, are you

21 agreeing to having your counsel perform the

22 opening statement for you?

23 MS. MONK: Yes, sir.

24 CHAIRMAN THOMAS: Thank you.

25 Mr. Didion, have all of those who are

1 at risk at this hearing been informed of the
2 date, time and place of the hearing?
3 MR. DIDION: Yes, they have, Mr.
4 Chair.
5 CHAIRMAN THOMAS: Have all eligibility
6 issues been resolved?
7 MR. DIDION: They have.
8 CHAIRMAN THOMAS: Are there any
9 instances in this case in which student-athletes
10 competed while ineligible and might result in
11 the vacation of contests by the Committee?
12 MR. DIDION: I believe there were, and
13 those have been addressed by the institution.
14 CHAIRMAN THOMAS: Okay.
15 MS. POTUTO: I just want to put on the
16 record now that as I understand the institution,
17 they related to NCAA championships, and the

18 Committee has some questions about regular

19 season and conference.

20 MR. DIDION: That's correct.

21 CHAIRMAN THOMAS: We will now turn to

22 opening statements. Let me emphasize that these

23 statements should be general overviews of the

24 case and not recitation of information relevant

25 to particular allegations. Please be as brief

as possible with the opening statements.

President Wetherell, are you ready for the institutional opening statement?

MR. WETHERELL: Yes, Mr. Chairman.

CHAIRMAN THOMAS: Thank you.

MR. WETHERELL: Thank you, Mr. Chairman. The consultants and various people provided me with some notes to make this statement, and they started off with thanking you for the opportunity to be here today. Upon reflecting upon that a moment, I don't think I can think of a place I would rather not be than here today, quite frankly.

Florida State is embarrassed, quite frankly, to be here. We are a better institution than this. This is not something that we are proud of, and it is not necessarily

18 our finest hour. But we do appreciate the help

19 and the support that we received from the NCAA

20 as we went through this process.

21 I kind of reflect back to Apollo 13

22 and remember that they started off to the moon,

23 and in the final analysis never made that, but

24 it well may have been NASA's most probable or

25 best performance of all.

1 I think Florida State will come out of
2 this a better institution, as embarrassed as we
3 might be. You have read the case, you have been
4 provided the information. To the best of my
5 knowledge, there is really no conflict in the
6 facts of the case. We self-reported this case.
7 It evolved in a way that we did not
8 expect it to evolve. The NCAA came down and
9 reviewed the matter after we had sent it up
10 pursuant to policy and procedures. There were
11 very few changes made. We then reacted to that
12 report and made very few changes.
13 So, the facts are pretty simple. It
14 seems like a relatively simple case on the
15 surface, but I think as you have read it and as
16 you hear testimony today you are going to find
17 out that this is a very complex issue.

18 Those of you in the law profession

19 will particularly note some of the issues and

20 the challenges that the institution had to face

21 as we went through various segments of this

22 proceeding.

23 We would point out that it really

24 doesn't fit in the NCAA Manual. We have

25 searched throughout NCAA records and can't find

1 a case that is of this particular nature with
2 this many different options.
3 This case does not involve misconduct
4 by any coach, any assistant coach. There are no
5 boosters, no donors, no trainers, no one
6 directly involved with teams in athletics.
7 That's highly unusual. We admit that.
8 The facts of the matter are that a
9 student-athlete went to the Academic Support
10 Center to do some work as they should do. While
11 at that center, the student-athlete was asked
12 about another student-athlete who was to come
13 and do some work.
14 The student-athlete number one
15 basically responded by saying he is not coming,
16 he is involved in some other things. That
17 happened to be an athlete that

18

19

20 He was working out appropriately and

21 legally for given teams in the combine. The

22 student-athlete number one was advised that

23 student-athlete number two was supposed to take

24 a quiz on that day, an online quiz.

25 The student-athlete number one said he

1 is not coming, he is not going to take that
2 test. He was then advised to sit down and take
3 the test by a staff person at Florida State
4 University.
5 The athlete getting instructions from
6 a staff person did as he was told. He did not
7 ask to do this, he was not even enrolled in the
8 course.
9 The student-athlete took the test,
10 left the center, reported that to his coach.
11 His coach then reported it to the Compliance
12 Center, and FSU began an investigation pursuant
13 to NCAA regulations.
14 The issue at that point in time was
15 who was going to do the investigation, the
16 Athletic Department or some other entity? It
17 was my decision that we would let some other

18 entity do that investigation since it was not

19 involving a coach or an athletic issue at that

20 point in time, it was a personnel matter.

21 We determined that the Inspector

22 General at Florida State should do it in

23 conjunction with HR staff at Florida State. we

24 believed we were dealing with an employee

25 relations issue at that point in time.

1 The employee was so notified, the
2 athletic director was so notified because he had
3 been told by the coach, and we moved ahead in
4 that process.
5 Part of that investigation process
6 included talking to student-athletes that were
7 in the course. There were some 30-some student-
8 athletes talked to, amongst other people, and
9 basically as they went through that process it
10 was not much that we didn't know, didn't show
11 up.
12 It was only at the end when one
13 student-athlete basically told us that I don't
14 know what the big problem is. If you talk to a
15 student mentor or tutor, you could do the same
16 thing. That alerted us that there was some
17 other problems.

18 You have to realize that each of these
19 students was asked to come and give us
20 information regarding that system. They were
21 specifically told that they were not being
22 investigated.
23 Their eligibility was not in question,
24 and their scholarship was in no jeopardy. But
25 when a student-athlete then notified us that

1 some students may have violated NCAA rules at a
2 time when he was supposedly helping us resolve
3 another issue, it created a series of complex
4 issues that we had to face.
5 At that point in time, we decided we
6 had more than a personnel issue, we had an NCAA
7 issue, and we hired Mr. Smrt and his firm to
8 help us. We went through that process and
9 determined that there was inappropriate behavior
10 in our minds with a specific tutor.
11 We looked at other issues involved.
12 We could find no conclusive evidence that there
13 were other tutors involved.
14 We have a system at Florida State that
15 runs the grades of each athlete against the
16 grades of the course, and the grades of other
17 students. We looked at those files and we

18 determined that there was one section in the
19 spring of 2007, that there were anomalies--
20 well, actually in the fall there were some
21 anomalies, but they were not significant enough
22 to cause an alarm.
23 In the spring of '07, they were
24 significant. What we found out was that we had
25 a faculty member that was offering an online

1 course, that had been offering that same course
2 for a number of years and in previous semesters
3 had allowed students to work together, to print
4 the final exam, to work as a group on the final
5 exam, and not only the final exam but all exams
6 and tests, and turn those in and receive a
7 grade.
8 It was perfectly acceptable and no
9 violation of the student's honor code and no
10 violation, quite frankly, of the guidelines of
11 the course.
12 The faculty member subsequently
13 changed that. He did not change the syllabus,
14 but he did change the online test procedure.
15 There was no requirement that a student take the
16 test in a secured testing site.
17 They could take it from their dorm

18 room, take it from any computer that they could

19 sign on to. It did go through a process that we

20 used Blackboard like most institutions use. We

21 began talking to other students and asking what

22 did they do and when did they do it? Because if

23 they worked as a group under certain

24 circumstances, there was no violation.

25 If, on the other hand, if they did it

1 in the fall or spring of '07, and the rules of
2 the course and the testing were changed, there
3 was potentially a violation. We came to
4 understand that a rogue tutor had basically made
5 copies of the test, committed those tests to
6 memory, and as he worked with students gave some
7 of those answers to the various students. Some
8 received more answers than others.
9 As we interviewed those 30-some
10 students before, that we went through before and
11 started back with them, we determined that some
12 of those students did receive help. This was a
13 difficult time to define exactly what help was.
14 Some students actually took the test
15 with the tutor saying, yes, you should mark
16 Answer A, B, or whatever was appropriate. Some
17 students sat in the Testing Center and heard

18 people discussing tests, and marked papers

19 accordingly.

20 So, we began to realize that we had a

21 problem with that one course, that one faculty

22 member. As you might expect, any university,

23 particularly an Athletic Department, the

24 grapevine sometimes works better than e-mail.

25 The system and the students started

1 talking to one another. The NCAA rules, as we
2 understand them from the Enforcement Committee,
3 state that when we knew that there was a
4 violation we were obligated to sit that student
5 from specific participation in the sport.
6 This was in the winter and spring
7 term, so obviously our emphasis was on those
8 sports where individuals were participating at
9 that point in time. The question became how
10 much do we sit them for? What was the
11 violation?
12 As we worked with Enforcement, those
13 violations, based on NCAA precedence, ranged
14 from a game to a full season depending. As we
15 began to make those decisions, all kinds of
16 other issues became into play.
17 What is the difference in one game,

18 two games, five games or ten? What was the

19 determining factor? How did you determine this?

20 In some cases students and student-athletes went

21 directly to the honor court.

22 Some students went directly to the

23 faculty member. Some students basically had a

24 pass, if you want to call it that, from a

25 faculty member based upon whatever conversations

1 they had with that particular faculty member.

2 We began to submit to the

3 Reinstatement Committee reinstatements after we

4 had sat students for some number of games,

5 contests, or whatever it happened to be, and

6 finally that became cumbersome because the

7 Reinstatement Committee said we can't keep up

8 with these, we want to batch them and do them as

9 a group. We said fine.

10 In addition to that, while all of this

11 is going on, certain athletes were then saying,

12 well, if you are going to bust me, you need to

13 talk to so and so, and we had that issue to deal

14 with.

15 We had some coaches that said, well, I

16 am not sure we are getting the fair treatment

17 because what about this team or that team? We,

18 in essence, had a system going where students

19 could go to a faculty member, the honor court,

20 come through our system and talk to the

21 consultants, and be faced with some preliminary

22 decision with us trying to go to the NCAA and

23 get some kind of across-the-board treatment of

24 those student-athletes.

25 We came together in, I believe it was,

1 October, remembering that summer came in there
2 and students left campus, and trying to find
3 those students at that point in time became
4 difficult.
5 Basically, in the fall when student-
6 athletes came back, we sat down and began
7 talking to the NCAA Enforcement and
8 Reinstatement and said, you know, this is not
9 working. We can't get to the bottom of this
10 without some understanding of what the penalties
11 are going to be.
12 We had the probability of the race
13 card being played by some athletes, saying
14 different students were getting different
15 priorities. We had the gender card being
16 played. We had major sports versus minor
17 sports, all involved in that process.

18 We had some students that were very

19 forthcoming and said, you know, if that is your

20 definition of inappropriate actions, then, yes,

21 I did that. We had others who said no, I didn't

22 do that. We didn't have a way at that point in

23 time to really know what was happening other

24 than he said-she said, so to speak.

25 At that point in time, the provost and

1 the Technology Department came together and we
2 did what we believe is unprecedented in NCAA's
3 history. Because this was an online course,
4 every student had to take that test online, and
5 there was a computer record of when they took
6 it, where they took it, who was in the room when
7 everybody took it, and we then cross-filed
8 payrolls with that, and we could determine what
9 tutors were in the room when who took it and
10 what happened.
11 Most of the time you don't have that
12 type of information in a paper-pencil test. You
13 simply know the hour that the test was taken,
14 but you don't know to the effect when a person
15 punches a button and says it is A, B, C or D.
16 When a student is sitting in the back
17 of the room and says I heard someone holler

18 across the room the answer to number such and

19 such is, and they had already marked, let's say

20 C and the answer was B, and that student says

21 well, if it was inappropriate for me to hear

22 that and change my answer, then I guess I did.

23 So, I am guilty, versus the student who was

24 actually sharing that information. That's the

25 type of things that the NCAA had to have.

1 We knew that information because we
2 created a program that figured it out. We sat
3 with the NCAA and said, you know, what has
4 happened here is the students who have been the
5 most honest are being penalized.
6 We came to a conclusion that we needed
7 to go back and re-interview all of the students
8 in those classes, showing them the information
9 we had, and say do you really want to say this,
10 with the understanding that if you said yes, I
11 did something inappropriate, not trying to split
12 hairs and determine how bad it was or not, you
13 would receive a certain penalty. If, on the
14 other hand, you chose to go a different route,
15 then you would lose your eligibility at Florida
16 State.
17 When we went through that process, we

18 came up with the number that you see before you.

19 In addition to that, the provost and myself

20 began to talk with the Faculty Senate and the

21 term I think we began to use is we had a

22 contaminated course, particularly a section in

23 the spring semester.

24 We made the determination, and I think

25 it is probably somewhat unprecedented, that we

1 would take all student-athletes, regardless of
2 what grade they made, and they would have to
3 retake that course whether they admitted they
4 violated some procedure or not.
5 The Faculty Senate met on that and
6 agreed, and we vacated that course for athletes
7 only. So, we think that as you go through this
8 process had we not been working as closely with
9 the NCAA Enforcement and Reinstatement, where we
10 could sit down and say we need you to be totally
11 honest, and here is the information, we probably
12 would not be here today.
13 Probably, what would have happened is,
14 because it had already started to happen,
15 certain athletes would have begun to get legal
16 counsel. There would have been all kinds of
17 issues raised from parents, media and everywhere

18 else, and we would have never been able to get

19 to the conclusion that we got to and that we

20 believe we have identified those individuals who

21 did get inappropriate behavior -- we believe

22 inappropriate assistance.

23 We believe we have also been able to

24 identify from a staffing standpoint those

25 individuals who participated in giving that

1 help, reminding you that in some cases a
2 student-athlete was counseled to take this
3 course even though they didn't want the course.
4 The student-athletes didn't start off
5 with the idea of this is how I am going to
6 "cheat". We don't really believe they cheated.
7 They got inappropriate help. Most of the
8 athletes did not need this course for
9 graduation.
10 It is not a required course, it is an
11 elective course that does count in several
12 categories. There were student involved in this
13 who had 4.0's and students who had 2.0's. It
14 was not a course that people were put into to
15 gain eligibility.
16 Had we known the information in the
17 spring that we know now, and had we chosen to

18 vacate that course then, had we known it, all of

19 those students would have been eligible to go to

20 summer school and retake a class and avoid any

21 possibility of being "ineligible".

22 Part of the conversation that we had

23 with Enforcement and Reinstatement was that if

24 we went through this and developed that profile

25 and that matrix, and we had a student who came

1 forward and honestly gave us the information,
2 that would not affect their eligibility. That
3 was part of the understanding that we worked off
4 of.
5 So, we have gotten here today what you
6 see before you is that information. The problem
7 the University was faced with is we started a
8 personnel matter, we advised the students that
9 they would be helpful to us, could be helpful to
10 us, and didn't tell them at that point in time
11 that they could be jeopardizing their
12 eligibility for their scholarship.
13 We told them just the opposite. We
14 then went back and reassessed where we were, and
15 told the students the exact truth of where we
16 were. We defined exactly what semesters we were
17 talking about, because under certain guidelines

18 they could literally take a copy of the test in

19 and write the exam with that copy and be in no

20 violation. It is not something we are proud of,

21 it is not something the way we want to run a

22 course.

23 The provost has had conversations with

24 the faculty member, but we would remind you that

25 we have a unionized faculty and a union

1 procedure that we had to recognize. We had an
2 honor code that we had to recognize.
3 We had a code of conduct that we had
4 to recognize. We had students who had been
5 interviewed once and said one thing, then when
6 presented with data that showed something
7 different and defined inappropriate behavior in
8 a different way, recanted that and then decided,
9 yes, I did.
10 We had some students who came to us
11 with their attorney or their mother or father or
12 person, significant other, and were very
13 forthcoming. Others, when they saw the
14 information, said yeah, I probably did do
15 something I shouldn't have.
16 But the bottom line is that, in my
17 judgment, while this is an embarrassing process

18 for the State of Florida and for Florida State

19 in particular, because it isn't how most

20 institutions in the State of Florida operate or

21 we operate, we have learned a lot.

22 I am teaching an online course this

23 semester just to see how the thing works. I

24 converted a political science in a Florida

25 history course into an online course, and we are

1 now going through a process to, first of all,
2 put everybody in a monitored testing situation,
3 randomly select questions as opposed to using
4 the same questions each time.
5 We have done a number of things and
6 you have seen those in some of the corrective
7 actions. But I really believe that had we not
8 been as diligent as we were in getting on this
9 when we found it, had we not created the profile
10 and matrix that we could show students, their
11 attorneys or whomever they wanted, and had the
12 NCAA not been as helpful to us as they were, we
13 would not be able to sit here today and tell you
14 as definitively as we can exactly what happened.
15 We would have strong suspicions, but
16 we could not say without a doubt this is where
17 we are. I think if you read the report you will

18 find that basically that is what it says.

19 You will find there is very little

20 difference of opinion on the facts of the case.

21 The outcome of the case probably is some degree

22 of conversation. Florida State is taking this

23 very seriously.

24 Quite frankly, I don't know what you

25 are going to do. We hope you will accept the

1 penalties that we have placed upon ourself. It
2 really doesn't matter because we are going to do
3 that no matter what you do.
4 The issue that we had was that we
5 believed that the student-athletes needed to
6 share in the responsibility of their actions,
7 but the University also needed to share in
8 those. The University was more culpable than
9 the student-athletes in this case.
10 I think, Mr. Chairman, that is
11 basically the facts of the matter, and from
12 Florida State's standpoint how we got to where
13 we are.
14 CHAIRMAN THOMAS: Thank you, President
15 Wetherell.
16 Mr. Lyons, do you wish to make an
17 opening statement?

18 MR. LYONS: I will forego that at this

19 time, Mr. Chairman.

20 CHAIRMAN THOMAS: Thank you.

21 Mr. Didion, does the staff have any

22 preliminary comments before we turn to

23 Allegation 1?

24 MR. DIDION: Mr. Chair, I think Mr.

25 Hargrove's turn is before us.

1 CHAIRMAN THOMAS: I am sorry.

2 Mr. Hargrove.

3 MR. HARGROVE: Thank you, sir.

4 CHAIRMAN THOMAS: I do apologize for

5 overlooking you.

6 MR. HARGROVE: That is okay. I kind

7 of figured they were going to go first anyway.

8 Many years ago, when I first became a

9 lawyer, I had an opportunity to try a case, the

10 first case I ever tried in front of the judge.

11 It was a bench trial. It was in front of the

12 judge who had denied Mr. Gideon his right to a

13 lawyer in the case of Gideon versus Wainwright.

14 Mr. Gideon was a criminal defendant

15 who was convicted and was staying at the Florida

16 State motel. Mr. Wainwright was the head of the

17 Department of Corrections and had the key to

18 that motel.

19 Mr. Gideon had asked for an attorney

20 at the trial level. The trial judge denied him

21 that right, went up to the Supreme Court, and

22 Mr. Gideon was allowed to have a lawyer. That

23 established the principle that an indigent is

24 entitled to counsel.

25 The reason I tell you that is because

1 of the side story that I am going to tell you
2 about. That experience for me was unnerving,
3 and there is a distinction between being
4 unnerved and being intimidated.
5 This is an unnerving position to be
6 in, both myself and more particularly Dr. Monk.
7 The side story is that I had learned that this
8 particular judge was the fishing buddy of
9 opposing counsel.
10 I went into court that day, the judge
11 liked to chew on an unlit cigar, and I had just
12 learned he was the fishing buddy of opposing
13 counsel.
14 This was a bench trial. There was no
15 jury to balance it all out. I was unnerved. I
16 wasn't intimidated because I had had the benefit
17 of process of discovery, depositions, attendance

18 at interviews, those kinds of things. But I was

19 unnerved at the sideline events.

20 So, anyway, we get involved in the

21 trial and I called opposing counsel's client. I

22 was representing the state agency at the time.

23 I called the opposing counsel's client. They

24 had sued my agency.

25 I called her as an adverse witness,

1 and when I got her on the stand I began asking
2 leading questions. Opposing counsel objected.
3 "He is asking leading questions."
4 I said, "Well, Judge, I have called
5 her as an adverse witness and I can ask her
6 leading questions." Opposing counsel then said,
7 "Well, he hasn't established that she is
8 hostile."
9 I said, "Judge, I don't have to
10 establish that. She is hostile because I have
11 called her as a different kind of witness." But
12 I said, "So that we can move along, I will
13 rephrase my question, so we can move along
14 without argument."
15 So, I rephrased my question and I did
16 not ask leading questions. Well, after I had
17 asked two or three questions, the lady got mad.

18 She got real mad. The judge leaned back, chewed

19 on his cigar, and he said, "Well, Frank, I think

20 Mr. Hargrove has established that she is

21 hostile." She was hostile.

22 My point is this: From where we sit,

23 this is not an intimidating circumstance, it is

24 an unnerving one. The reason that is an

25 unnerving circumstance is because we don't have

1 to be here. Mr. Goldsmith isn't here, and I can
2 surmise why. He has basically said I don't have
3 to, I am not going to.
4 Adam Wright is not here. We are here,
5 Dr. Monk and myself, and we are here with our
6 hands kind of tied behind our back.
7 I would take this opportunity to say
8 that Joyce Thompson, who is representing the
9 NCAA, I have said this behind her back and I
10 will say it to her face, she has been
11 professional, helpful. I have got no
12 complaints.
13 But it is an unnerving situation for
14 us to be in having no subpoena power to get at
15 the whole truth, not just slivers of it, to not
16 be able to cross-examine anybody. But that's
17 the system that we have here. But it is an

18 unnerving situation to be in when we can't get

19 at in this forum everything.

20 At the end of this hearing, as it

21 relates to Dr. Monk, I believe that you will

22 have much more clarity than you have now. Will

23 you have a plasma screen vision? No, you won't.

24 The reason you won't is because we have kind of

25 had our hands tied behind our backs, because we

1 have not been able to get at some of the issues
2 that we ultimately would like to get at just
3 because of the forum we are in.
4 So, the question, then, is why are we
5 here? Why does it matter to us to be here when
6 we don't have to be here, number one? And,
7 number two, in a forum where just because of the
8 nature of the forum, we have not been able to
9 utilize those things that let us get at all the
10 information.
11 I would reiterate that the NCAA has
12 given us all the information that they have as
13 it relates to Dr. Monk. That is not my
14 complaint. I am not complaining. I am
15 attempting to describe to you the difference
16 from our perspective being unnerved and being
17 intimidated. We are unnerved.

18 It is a difficult position to be in

19 because we don't know all of the information. I

20 know that there is information that you are not

21 going to get. How do I know that? Well, just

22 like President Wetherell stated, there is a

23 grapevine, and I have talked within that

24 grapevine.

25 Do I have the ability to compel

1 testimony from that grapevine? I do not in this
2 forum. I do not. I can't present it to you.
3 So, we are unnerved.
4 But again, I have asked why are we
5 here? You have got to be asking that. Well, I
6 am going to tell you why we are here, even
7 though we don't have to be. We are here for two
8 reasons.
9 Number one, Dr. Monk firmly believes
10 that you good folks need to know the
11 difficulties that learning-disabled students
12 have in an academic setting. Dr. Monk, contrary
13 to how she has been portrayed, and I would add
14 she has been portrayed -- she is the only one
15 who has been identified in the media as someone
16 who has done something horribly fraudulent and
17 wrong.

18 You have got my response. I am not

19 going to belabor it. But she believes that it

20 is her duty as a professional, and I would

21 submit to you that she is the consummate

22 professional.

23 She thinks you ought to know the

24 circumstance that exists for learning-disabled

25 students in an academic setting at a collegiate

1 level. That is number one.

2 Number two, she does not like the fact

3 that she has been portrayed as unprofessional.

4 She is a professional. She wants you to know

5 that. Those are the two reasons. I have helped

6 her, yes.

7 I am the dirty word, because I am the

8 lawyer, but my objective here today, I hope -- I

9 am going to step aside, and I sincerely hope

10 that you will take the opportunity to just

11 bypass me.

12 She is here, she will answer every

13 question you ask. She will answer the questions

14 as long as you want to ask them. I won't

15 interrupt. I don't intend to. I would like the

16 opportunity to add a comment every now and then.

17 But my purpose here is not a purpose

18 that is typically perceived as being one of a

19 lawyer. My purpose here is to facilitate. It

20 is not to obfuscate. I will explain to you the

21 hamstrung nature under which we come before you

22 for those two reasons that I have articulated,

23 and only those two reasons.

24 So, you have got my response. That is

25 the skeleton of Dr. Brenda Monk. The blood and

1 the sinews and the rest of the story is right
2 here. I would urge you to pursue it, even
3 though I don't believe that at the end of it you
4 are going to have a crystal-clear picture.
5 It is kind of like many people in this
6 room. I note they are probably around the same
7 age as me. When I was growing up, you had 12
8 channels on a television and then you had a dot.
9 Well, that dot became ESPN.
10 We are at the beginning stage of that
11 dot. You will have a clear picture at the end
12 of this given the nature of how this system
13 works. This is the person who can facilitate
14 that. And I am not here to prevent you from
15 getting it. So, please feel free to bypass me.
16 Yes, she is represented by a lawyer,
17 me, but you have free access to her. We know

18 that she doesn't have to be here, but she is

19 going to stay here as long as you want her here.

20 So, thank you for -- no, I am not going to thank

21 you for the opportunity.

22 I agree with President Wetherell, this

23 is not an opportunity, this is not an enjoyable

24 thing. But we are here with a determination to

25 answer your questions honestly and as completely

1 as possible. As many times as you want to hear
2 those answers, please feel free. So, thank you.
3 CHAIRMAN THOMAS: Thank you, Mr.
4 Hargrove.
5 Mr. Didion, does the staff have any
6 preliminary comments before we turn to
7 Allegation 1?
8 MR. DIDION: Yes. Thank you, Mr.
9 Chair. Ms. Thompson is going to make the
10 opening statement for the enforcement staff.
11 CHAIRMAN THOMAS: Okay. Ms. Thompson.
12 MS. THOMPSON: Members of the
13 Committee, this case primarily involves academic
14 fraud in the failure of the institution to
15 monitor its activities of its employees within
16 the Athletics Academic Support Services
17 Department.

18 The crux of this case rests in the
19 failure of the Athletic Academic Support
20 Services Department to timely communicate with
21 the institution's compliance staff when it
22 learned of potential NCAA violations which
23 contributed to the scope and severity of the
24 alleged and reported violations within this
25 case.

1 What we intend to show the Committee
2 today is that the focal point of this case
3 involves three individuals whose actions
4 affected a total of 61 student-athletes in 11
5 sports, and involves NCAA bylaws governing extra
6 benefits, academic fraud and unethical conduct.
7 The actions of the involved parties,
8 combined with the institution's failure to
9 monitor certain aspects of the Athletic Academic
10 Support Services unit, resulted in this serious
11 major infractions case, which contradicts the
12 core mission of the Association and the
13 protection of academic integrity.
14 With that said, we are prepared to
15 address the issues in this case and ready to
16 proceed with Allegation No. 1.
17 CHAIRMAN THOMAS: Let's proceed with

18 Allegation No. 1. Yes, Professor Potuto has a

19 question.

20 MS. POTUTO: Yes, I would just like to

21 clarify the allegation itself, if I could. The

22 opening paragraph describes academic fraud,

23 unethical conduct when they knowingly provided

24 improper academic assistance and arranged for

25 fraudulent academic credit as a result of 61

1 students.

2 Subparagraph (a) does not have an

3 academic fraud citation to it. So, I have two

4 questions. One, whether it should be there,

5 and, two, if you contend it shouldn't be, then

6 do you believe that editing portions of a

7 student-athlete's term papers does not

8 constitute the kind of academic assistance that

9 is academic fraud under the bylaws?

10 MS. THOMPSON: We did not allege

11 unethical conduct in Subparagraph (a), because

12 we believed that the actions in Subparagraph (a)

13 involved extra benefit actions, not unethical

14 conduct actions. So, that's why we didn't

15 allege unethical conduct.

16 MS. POTUTO: That gives me your

17 conclusion. I would like know why you believe

18 that providing editing assistance on term

19 papers, which is what you list in (a), does not

20 constitute academic conduct under 10.1?

21 MR. DIDION: When we reviewed the

22 information that led to Subparagraph (a), we

23 didn't believe that it rose to the level of

24 academic fraud. The editing and the typing

25 activities that took place, we believe were more

1 in line being covered by the extra benefit bylaw
2 and not ethical conduct bylaw.
3 MS. POTUTO: Well, I will get to them
4 when we go into the allegation, what the
5 substantive editing was that you contend
6 occurred, so I can get a better sense of why you
7 think that doesn't rise to the level of academic
8 assistance that is improper under 10.1.
9 Let us assume, then, that the
10 Committee ultimately agrees with you, and that
11 is an assumption right now, we would then have
12 to redo the stem paragraph, because the stem
13 paragraph captures this all under unethical
14 conduct and academic fraud. It doesn't capture
15 it as anything else; is that correct?
16 MR. DIDION: We may have to. That is
17 correct.

18 MS. POTUTO: Without assuming where

19 the Committee is going to go on any finding

20 whatsoever, if the Committee were to accept that

21 (a) is not academic assistance under 10.1, and

22 also make a finding with regard to it, and again

23 I am not prejudging anything, I am just trying

24 to get at the way the finding would have to

25 read, would the University agree that that stem

1 paragraph has to separate out extra benefit from
2 the academic misconduct, the unethical conduct?
3 MR. SMRT: Obviously, in 1-(a), we do
4 not believe it is academic fraud, and we will
5 talk about why we don't believe it is academic
6 fraud. That being said, I agree that that first
7 paragraph does not say extra benefits. However,
8 the bylaw citation is --
9 MS. POTUTO: Yes, but the first
10 paragraph captures it all under academic
11 misconduct.
12 Mr. Hargrove, do you understand what I
13 am talking about? We are not making any
14 finding, not prejudging anything, it is just
15 that stem paragraph right now captures 1-(a) as
16 academic misconduct, and that's not the way at
17 least that the enforcement staff believes it

18 should be constituted.

19 MR. HARGROVE: I appreciate your

20 concern. I have got it.

21 MS. POTUTO: Okay. Then my second

22 question is in Paragraph (c). The way this

23 reads, the study guide that you say was created

24 was only exam questions in '05-06, and then the

25 answers came later.

1 Is that accurate? Because later you
2 talk about Dr. Monk asking Mr. Wright to review
3 the answers, which sounds as though they are
4 already in there. So, I am just trying to find
5 out. As you understand it, does the study guide
6 just have questions initially or were there some
7 answers in it the first time around?
8 MS. THOMPSON: I think initially when
9 the study guide was created it had just
10 questions, but later on as the years progressed
11 there were answers in the study guide.
12 MS. POTUTO: Okay. Then my third
13 question here is in that same paragraph. As I
14 understood the materials, there was a bank of
15 questions that the professor used, and they were
16 randomly selected out with regard to particular
17 test year, is that right, or was it particularly

18 tests?

19 In other words, was the random

20 selection, whenever I went online and hit the

21 button, I would get one set of questions, but if

22 Dr. Thomas went online he might have a different

23 set of questions from the bank, or was it the

24 same set of questions for the year?

25 MR. ABELE: In looking over the

1 material, but I have not seen that particular
2 study guide you refer to, there were
3 approximately 70 questions of which 40 showed
4 up, but all 40 were given to all of the students
5 during that particular exam period.
6 MS. POTUTO: Okay. Then my question
7 with regard to the wording of the allegation,
8 then, is the last line. "The amended study
9 guide contained correct answers for the previous
10 exam of the online course, several of which were
11 the questions on the existing exams."
12 By that, then, do you mean -- well,
13 did the study guide contain all the answers to
14 all the questions, and then 40 of them would
15 have been on the spring '06 exam, or are you
16 saying that the study guide did not include all
17 questions and all answers? Are you following my

18 question?

19 MS. THOMPSON: I think so. You are

20 asking whether or not the study guide contained

21 all the questions and all the answers.

22 MS. POTUTO: That is right. If it was

23 70, then does the study guide have all 70 or

24 fewer than 70?

25 MS. THOMPSON: Initially in the

1 beginning it did not, but as the years did
2 progress it did contain all the questions and
3 all the answers.
4 MS. POTUTO: Do you know whether by
5 the time we are talking about, the fall of '06,
6 which I take it is the first time that the
7 improper assistance started to happen, did that
8 study guide have 70 questions and 70 answers?
9 MS. THOMPSON: Yes, Ms. Potuto, it
10 did.
11 MS. POTUTO: All right. Then when you
12 get down to several of them were on the test,
13 really all of them that were on the test were in
14 the study guide, there were more in the study
15 guide than were on the test.
16 Does everybody understand that again
17 without making any decision about findings or

18 anything else? We will have to amend this

19 language to be clear. Does everybody

20 understand?

21 MR. HARGROVE: We understand it.

22 MS. POTUTO: Okay. Then I have got

23 one more, and that is in (d), Page 1-2. You

24 start out saying during the 2006-07 academic

25 year. But I thought the summer was also

1 involved, that there were at least some
2 athletes.
3 MS. THOMPSON: December, '07?
4 MS. POTUTO: Yes -- no. Was the
5 summer, '07, part of that?
6 MS. THOMPSON: Yes, there were a few
7 student-athletes in the beginning of the summer
8 of '07 that received impermissible assistance.
9 MS. POTUTO: I typically think that
10 the academic year is fall and spring, but you
11 are talking about the entire year; is that
12 right?
13 MS. THOMPSON: Yes, I am. And we can
14 amend that language to include the summer of
15 '07.
16 MS. POTUTO: I just wanted to be sure
17 what is alleged is what it is that everybody

18 agrees that the facts are going to point to.

19 That's it. I have got it cleared.

20 CHAIRMAN THOMAS: Any other questions

21 from the Committee? We will proceed with

22 Allegation 1.

23 MS. THOMPSON: I would just like to

24 make two corrections as it relates to the Case

25 Summary regarding typographical errors, if I

1 may. Under the individuals to be mentioned, on
2 Page No. 3, under Brenda Monk's name, in
3 addition to the learning specialist she was also
4 the Assistant Director for Athletics Academic
5 Support Services. So, I just wanted to make
6 that correction.
7 Then on Page 2-1 of the enforcement
8 staff's Case Summary, the number before the
9 bylaw citation should be "2" as opposed to "5".
10 MS. JENNINGS: Please say that again.
11 I can't flip the pages as fast as you are
12 already there.
13 MS. THOMPSON: On Page 2-1 of the
14 enforcement staff's Case Summary, the number
15 before the bylaw citation should be "2" as
16 opposed to "5".
17 MS. POTUTO: We have "2".

18 MS. JENNINGS: We don't have any bylaw

19 citation. The constitution is cited there. But

20 where is there a bylaw citation?

21 MR. DIDION: You are correct. It is

22 the constitution. Before you see NCAA

23 Constitution 2.8.1, it is Allegation No. 5 that

24 should be corrected to Allegation No. 2.

25 MS. JENNINGS: Oh. Thanks.

1 CHAIRMAN THOMAS: Thanks. Any other
2 corrections? You may proceed.
3 MS. THOMPSON: I have consulted with
4 all the parties present today and I would like
5 the permission of the Committee to address each
6 of the subparagraphs in Allegation No. 1
7 separately, if we may, as opposed to
8 collectively.
9 CHAIRMAN THOMAS: Yes.
10 MS. THOMPSON: Okay. Overall,
11 Allegation No. 1 involves violations of
12 impermissible benefits and unethical conduct by
13 former learning specialist Dr. Brenda Monk and
14 former academic tutor Adam Wright.
15 As it relates to Subparagraph (a),
16 during the 2004-05 through the 2006-07 academic
17 years, Dr. Monk provided improper editing and

18 typing assistance on her word processor to at

19 least three student-athletes whom she believed

20 had learning disabilities.

21 Monk's actions violated NCAA's

22 legislation on extra benefits and an

23 institutional policy which required that any

24 accommodations for learning disabled student-

25 athletes would be provided through the Student

1 Disability Resource Center, known as the SDRC.

2 Regarding Subparagraph (a), the

3 enforcement staff and the institution are in

4 agreement on the facts, and the institution

5 notes that the number of occasions in which Monk

6 provided typing and editing assistance is

7 unknown.

8 Monk disagrees that the assistance

9 that she provided was improper. Therefore,

10 there is one issue for this Committee to

11 consider concerning Subparagraph (a). Did Monk

12 provide improper typing and editing assistance

13 when she used her word processor to type

14 student-athletes' rough drafts, develop outlines

15 for the student-athletes' papers, and edited

16 their thoughts within their papers?

17 Regarding this issue, although the

18 enforcement staff believes that the number of

19 student-athletes which Monk typed and edited

20 papers for is greater than three, the staff

21 could only readily identify three student-

22 athletes involved in this matter, and relies on

23 four points to support its position.

24 Point number one: The staff directs

25 the Committee's attention to Florida State's

1 institutional policy which is located in
2 Attachment A of the enforcement staff's Case
3 Summary, and Institution's Exhibit No. 1-16.
4 The staff believes that Florida
5 State's policy is indisputable in that if a
6 student seeks accommodations for his or her
7 learning disability, they must identify
8 themselves, be registered and approved by SDRC
9 to receive accommodations, and the
10 accommodations must be arranged by the SDRC
11 staff.
12 Further, Dr. Bea Awoniyi, the director
13 of the SDRC, is extremely clear in that typing
14 is not an accommodation for students with
15 learning disabilities, and that Monk was not
16 given permission from anyone from the SDRC staff
17 to provide accommodations or services to

18 students with learning or medical disabilities.

19 Moreover, if a student with a learning

20 disability qualifies for a scribe, as Monk has

21 suggested in this case, then again SDRC is the

22 only entity on Florida State's campus that

23 should have provided and approved such an

24 accommodation.

25 Point number two: Three student-

1 athletes involved in this matter reported that
2 Monk typed and edited their papers.
3 Specifically, reported during his
4 May 30, 2007, and his August 21st, 2008,
5 interviews with the enforcement staff and the
6 institution that Monk typed two papers for him
7 because he was a slow typist. But he could not
8 recall the course or courses for which the
9 papers were typed.
10 reported during his June
11 5th, 2007, interview that sometimes Monk would
12 help him type his papers
13 during the 2006-07 academic year, and inserted
14 some changes within his papers.
15 Finally, reported
16 during his May 3rd, 2007, interview that Monk
17 helped type and reword some of his papers so

18 that they would "make better sense."

19 further reported that Monk helped him in his

20 writing assignments, in his English, Theater and

21 Family and Relationship classes.

22 Point number three: Monk acknowledged

23 during her November 7, 2007, interview with the

24 enforcement staff and the institution that she

25 typed student-athletes' handwritten drafts and

1 typed outlines for student-athletes on her word
2 processor, and that her key strokes would
3 sometimes be included in the student-athletes'
4 actual papers which Monk considered permissible.
5 Point number four: Former
6 institutional staff members Amy Lord and Brian
7 Schmauch reported seeing Monk with student-
8 athletes typing a paper, and current
9 institutional staff member Kylie Amato reported
10 that she was asked by Monk during her intern
11 year at the institution to type a paper for a
12 student-athlete. These concerns were addressed
13 by their direct supervisor, Mark Meleney.
14 For the above-mentioned reasons, the
15 staff believes that Monk provided impermissible
16 benefits when she used her word processor to
17 type three student-athletes' rough drafts,

18 developed outlines for the student-athletes'

19 papers, and edited their thoughts.

20 The enforcement staff believes that

21 Subparagraph (a) should be found as reported.

22 And this concludes the staff's presentation of

23 Subparagraph (a).

24 CHAIRMAN THOMAS: Okay.

25 Mr. Smrt.

1 MR. SMRT: Thank you. We agree that
2 it is an extra benefit.
3 MR. PARK: May I ask a question?
4 CHAIRMAN THOMAS: Yes, Judge Park.
5 MR. PARK: I am confused, which is not
6 infrequent. I would like to clarify something
7 at the very beginning. Looking at your first
8 bullet on 1-4 of the Case Summary talks about
9 editing and typing portions of papers. Then you
10 drop down into later bullets and it talks about
11 typing papers.
12 Now, my first question is the
13 allegation that Dr. Monk actually typed an
14 entire paper up for any of the student-athletes,
15 or is it that she may have typed portions of the
16 paper?
17 MS. THOMPSON: It is my understanding

18 from listening to the student-athletes'

19 interviews that she typed portions of papers for

20 some, and that for others she typed the entire

21 papers.

22 MR. PARK: Could you identify what

23 papers, what complete papers she typed, for whom

24 and when, and what course?

25 MS. THOMPSON: Out of the three

1 student-athletes, the only person that we could
2 identify that she typed papers for would have
3 been, I believe it is , the
4 individual during the
5 2006-2007 academic year.
6 MR. PARK: So, as far as entire
7 papers, that goes to
8
9 MS. THOMPSON: Yes. It is just
10 unclear from the other two student-athletes
11 whether or not it was entire papers. Their
12 language was that it was portions of their
13 papers.
14 MR. PARK: The next question I am
15 having trouble with, and this isn't criticism,
16 it is just trying to understand what the staff
17 contends. That has to do with the concept of

18 editing.

19 What is editing? We have got a center

20 that is supposed to assist. So, was it improper

21 for Dr. Monk to look at drafts of papers that

22 these student-athletes had prepared?

23 MS. THOMPSON: Mr. Park, I believe

24 that editing and proofreading are two totally

25 different separate things within the revision

1 process of the paper. Do I believe it was
2 permissible for her to proofread a student-
3 athlete's paper? Certainly. But do I believe
4 that it was improper for her to edit the paper?
5 I do.
6 MR. PARK: By editing, what do you
7 mean? Does that include criticism, this isn't
8 clear, this is clear, or what is editing? Do
9 you mean actually rewriting it? I am trying to
10 get the flavor of this, if I can, as to what is
11 proper and what is not proper to cover what Mr.
12 Smrt talked about as very difficult, or maybe
13 moving a line.
14 MS. THOMPSON: As it relates to
15 editing, in my opinion, when you are looking at
16 a paper and determining whether or not the paper
17 meets the actual requirements of the assignment,

18 when you are looking to determine whether or not

19 the content is actually there, whether or not

20 the transitions and the paragraphs flow

21 smoothly, whether or not you are determining

22 whether or not there is a thesis statement,

23 there is an introductory statement, there is a

24 conclusion statement.

25 I think in my opinion that that is

1 editing a paper. When you are proofreading, I
2 think you are simply reviewing the paper and
3 looking at grammatical and typographical errors,
4 not when you are determining whether or not you
5 have, in fact, met all the requirements of the
6 paper.
7 MS. POTUTO: Can I just follow up?
8 What do you contend that she did with regard to
9 editing? Did she say to the student-athlete,
10 let us say, there is no, you know, topic
11 sentence that starts this paragraph, or did she
12 write the topic sentence?
13 MS. THOMPSON: From the student-
14 athletes' statements, they indicated that she
15 "made sure that the paper made better sense."
16 When we asked Dr. Monk what did she actually do,
17 she informed the staff and the institution that

18 she would write outlines for the student-

19 athletes for the paper.

20 She would type handwritten drafts that

21 the student-athletes provided her. If the

22 students did not have all the requirements of

23 the paper met, she would -- I don't know if she

24 used the exact words, reword some of the

25 statements. But she made sure that the student-

1 athletes' papers made sense.

2 MS. POTUTO: Did you ask the students

3 in particular what it was they meant when they

4 said "made the papers make better sense"?

5 MS. THOMPSON: I listened to several

6 of the interview. I will say, and I have to

7 deflect this back to the institution, because

8 they did the bulk of the interviews with the

9 student-athletes. So, I would like for them to

10 answer those questions.

11 MR. SMRT: This allegation has evolved

12 over the past few months. President Wetherell

13 talked about the initial interviews with the 30-

14 some athletes. Those were athletes that Dr.

15 Monk advised.

16 So, the auditors went in with the

17 thought of, was there anybody else who got help

18 as and did in 1-(b). So, they

19 went in with that approach or that interview

20 line.

21 During those initial interviews, five

22 athletes said Dr. Monk typed papers for her. So

23 coming out of the auditor's interview, there

24 were five athletes that said typed papers. When

25 we got involved, we said let's make sure none of

1 them have restoration issues, so we went back to
2 the five, or Bob Minnix went back to the five,
3 interviewed all five, and four of them came off
4 and said no, she really didn't type papers.
5 One athlete, , said yes, she
6 typed papers. So, we go with that into Dr.
7 Monk's interview in November. And during her
8 interview, she said no, I didn't type papers.
9 What she did say was that I would sit down with
10 them and they would give me their thoughts. I
11 would type up their thoughts.
12 It would be an outline or a theme. I
13 was the one that specifically asked her did any
14 of this ever get into a paper? And she said
15 yes, I believe -- well, she said I gave it back
16 to them then.
17 I gave them a disk or however I give

18 it back to them. I said did any of that ever

19 get into a paper? And she said, "Yes, I believe

20 on occasion that probably did." From that point

21 on, we didn't care if it was an issue of typing

22 a whole paper or a piece of paper, we don't

23 think that a person involved in the Academic

24 Services can type anything that gets into a

25 paper regardless of a learning disability, a

1 learning strategy, or a learning diagnosis. So,
2 from that point on we thought she has
3 acknowledged an extra benefit violation.
4 Now, Joyce continued on, and continued
5 on with typing papers. So, we went back to some
6 of the four who denied it for a third interview,
7 and was one who -- well, for the most part,
8 they still said no, she didn't type papers.
9 said no.
10 After being confronted with this
11 auditor's interview, he said yes, maybe she did.
12 So, where we are sitting here today we have one
13 athlete, who said she did type a
14 paper. We have her own testimony, and that is
15 what we are basing our position on.
16 The extra benefit is that she said
17 during the interview there were occasions from

18 what I typed, that information, her keystrokes,

19 if you will, somehow got into a student-

20 athlete's paper for us, that's it.

21 That is an extra benefit. It doesn't

22 make any difference about doing disability

23 strategies or whatever. It is a violation. Is

24 it an editing issue? I don't know. To us, you

25 don't have to get to the editing. If she did

1 something that got into a paper, that's enough.

2 MR. PARK: I am curious about this

3 editing problem. What was it that was proper

4 for Dr. Monk to do when a student came in and

5 maybe had a draft of a paper? What could she do

6 as a part of her function?

7 Could she make suggestions as to the

8 substance of the paper, as to the way it was

9 expressed? Where is the line?

10 MR. SMRT: I think the line -- well,

11 if an athlete comes in, she can sit down with

12 the athlete, obviously, and go through the

13 athlete's thoughts. She could write down the

14 athlete's thoughts and give it back to him or

15 her. But once her work goes into the paper,

16 that's where the issue came up for us.

17 MR. PARK: So, you are saying if she

18 had written these notes on a pad with just a

19 paper, you know, with a pen, and then the

20 athlete had put that in those exact words into

21 the paper, that wouldn't be a violation.

22 But the fact that she somewhere or

23 another had perhaps for clarity sake, if nothing

24 else, typed it up, and then he used those words,

25 that becomes the extra benefit?

1 MR. SMRT: If it is the athlete's
2 words, yes.
3 MS. POTUTO: If it is the athlete's
4 words and her typing, is that right? Is that
5 your distinction, that if she is typing and then
6 it is the athlete's words, and then the athlete
7 retypes, there would be no extra benefit; is
8 that right? I just want to understand where you
9 are, no extra benefit?
10 MR. SMRT: That is correct.
11 MS. POTUTO: Do you want to go ahead?
12 MR. PARK: I am almost through. I am
13 looking at Exhibit 1-7 of the institution. I am
14 sorry, 1-8, which is a draft which I assume that
15 Dr. Monk prepared. When you turn over to Page 6
16 of that draft, at the bottom it has 45, and
17 about two-thirds of the way down the paper "if

18 there is difficulty writing", and then there are

19 about five bullets.

20 It talks about use of computers,

21 proofreading, acting as a scribe. Would those

22 be acceptable activities?

23 MR. SMRT: Generally speaking, no. I

24 guess it depends on what specifically is meant

25 by those words. But I think I will let Mark

1 Meleney address that because this is obviously a
2 draft document that Dr. Monk developed. I will
3 let Mark address that.
4 MR. PARK: And then if somebody could
5 in answering that amplify, you know, what is
6 this piece of paper, what does it stand for,
7 other than it was a draft some years back? I
8 mean, was this something that was turned in to
9 the higher-ups, either accepted or not accepted?
10 But at least it shows what her thinking was at
11 the time.
12 MR. MELENEY: Okay. I would like to
13 address that, if I could. When Dr. Monk came in
14 on her interview with Florida State, our goal
15 was to develop services to meet the needs of
16 students with learning disabilities.
17 She presented a model for me in our

18 program to look at. This draft was an extension

19 of her thoughts because this was just shortly

20 after her hire, within the first year of her

21 hire. And this was the beginning of her

22 development of a programming that we would

23 submit to the institution for approval and

24 acknowledgement.

25 Brenda and I walked through this

1 draft, we talked about different issues within
2 the draft. Much of this was dictated by the
3 SDRC. It was determined to be either
4 appropriate or inappropriate at the direction of
5 the SDRC.
6 So, my direction to Brenda at that
7 time was as we continue to develop this, talk
8 with the director of the SDRC, determine what
9 the institution's position is on these services,
10 and we will continue to clearly define a program
11 and establish a program in place.
12 This draft never surfaced any further
13 than that. I presented this draft to the
14 institution and to the NCAA, just directly out
15 of her personnel file. This was a draft I had
16 in the file as our discussions to this process.
17 So, the efforts of this draft were

18 never acknowledged by the institution or

19 determined to be either acceptable

20 accommodations or non-acceptable at that time.

21 She continued to discuss this with the SDRC and

22 different versions of the efforts were continued

23 to be defined.

24 MR. PARK: Was she ever instructed,

25 that is Dr. Monk, that she couldn't perform any

1 of those activities that are described?

2 MR. MELENEY: Yes, sir. We did have

3 numerous discussions related to the definition

4 of a scribe, and whether a scribe is an

5 appropriate accommodation. We asked for some

6 clarification from compliance as well, and we

7 received some communication on that.

8 And shortly after this, I believe it

9 would have been probably in '02, a decision was

10 made that we could not provide a scribe under

11 institutional policy unless approved by the SDRC

12 Office.

13 MR. SMRT: There was also a policy

14 that Mark implemented at some point that a tutor

15 or mentor could not be at a screen with an

16 athlete. So, this would have fallen under that

17 general restriction also.

18 CHAIRMAN THOMAS: Andrea Myers.

19 MS. MYERS: Just one quick question.

20 Mr. Meleney or else Ms. Thompson, based on your

21 presentation, if Dr. Monk had been an employee

22 in the SDRC, then would these same services have

23 been within the rules?

24 MR. MELENEY: I believe you would have

25 to determine that on an individual basis for

1 each student, because the disability defined by
2 each student provides them these types of
3 services or maybe not.
4 So, each individual's student's case
5 would have to be reviewed and the SDRC Office
6 would say yes, this accommodation is appropriate
7 but, no, this one is not.
8 MR. SMRT: You have to be registered
9 with the SDRC to receive it. At this time,
10 during this time period, unfortunately, there
11 were several athletes with what were believed to
12 be disabilities.
13 However, there were few diagnoses
14 through SDRC, if you registered with SDRC. Now,
15 everyone is registered with SDRC who has this
16 diagnosis.
17 MS. MYERS: One quick follow-up. So,

18 now a student-athlete registered with SDRC could

19 receive this same service and it would not be a

20 violation?

21 MR. ABELE: There is a three-step

22 process to registering with SDRC. The first is

23 the student voluntarily comes in with documents

24 and which test they have taken and the process

25 by which the disability was determined.

1 Those documents are submitted to SDRC.
2 There is then an interview with SDRC staff, and
3 the student to determine what accommodations are
4 appropriate, and then finally the student and
5 the faculty member signs a letter that they
6 agreed to participate with SDRC in this process.
7 And it is only, once a student has
8 completed those three steps and the
9 accommodation certified that the student is
10 eligible for them, but they must be taken in the
11 SDRC Center.
12 MS. MYERS: So, the answer to my
13 question was yes. If the current student-
14 athlete is currently enrolled in the SDRC and an
15 employee in the SDRC provided these services, it
16 would have been legal within the rules of the
17 NCAA.

18 MR. ABELE: Only if during the

19 evaluation and interview process they determined

20 that those services were appropriate. Typing is

21 very rare in SDRC.

22 MS. POTUTO: Can I clarify it just for

23 a moment? It would have to be in the center; is

24 that right?

25 MR. ABELE: That is correct.

1 CHAIRMAN THOMAS: Okay.

2 Judge Lechner.

3 MS. KARPINSKI: Can I just clarify the

4 SDRC policy on scribes? A scribe, as defined by

5 SDRC at Florida State University is somebody

6 that is certified by SDRC to serve as a scribe,

7 and that would only be an accommodation that

8 would be allowable in a testing situation.

9 SDRC does not permit scribes to do

10 papers or work on assignments with the student.

11 Typing services is different from a scribe. The

12 scribe is an accommodation in a testing

13 situation, not to work on papers, seeing papers

14 and that sort of thing.

15 CHAIRMAN THOMAS: Judge Lechner.

16 MR. LECHNER: I would like to get to

17 something a little bit basic, and maybe ask the

18 University, and then if the staff disagrees let

19 me know. If I am taking a course at Florida

20 State and my professor says the paper has to be

21 typed, that is my obligation to type the paper,

22 correct?

23 MR. ABELE: (Nods head.)

24 MR. LECHNER: You will have to respond

25 yes or no.

1 MR. ABELE: That is correct.

2 MR. LECHNER: So, if I can't type, I

3 have to pay somebody to type it or get somebody

4 else who will be a friend of mine to type it up

5 for me, correct?

6 MR. ABELE: That would be correct.

7 MR. LECHNER: So, if I am an athlete

8 and I can't type, and I am in this course and

9 somebody in either the academic or the Academic

10 Department types that paper for me, and forget

11 about editing it, just types it as I have

12 handwritten it, I have gotten an extra benefit;

13 is that correct?

14 MR. ABELE: Yes.

15 MR. LECHNER: Now, if that same person

16 in one of the Florida State departments, not

17 only types it but comes back and says, "Lechner,

18 I think you have got to add this in, this isn't

19 correct. Reword this. Let me help you reword

20 it."

21 As he or she is typing it changes some

22 of it, that is adding to my paper, and that is

23 unethical; is that correct?

24 MR. ABELE: That would be a violation

25 of the honor code.

1 MR. LECHNER: It would be unethical,
2 correct?
3 MR. ABELE: Correct.
4 MR. LECHNER: So, if I had that done,
5 I could have two violations, an extra benefit
6 and an ethics violation?
7 MR. ABELE: Yes.
8 MR. LECHNER: Thank you. Does anybody
9 disagree with it on the staff?
10 MR. DIDION: No, sir, we agree with
11 that.
12 MS. JENNINGS: I have a little
13 question about that, because I understood from
14 reading your material you have a Writing Center
15 that does do exactly what Judge Lechner just
16 described, and that any student in the
17 University can go to the Writing Center and that

18 Writing Center will work with the student and

19 say you don't have a topic sentence here; you

20 don't have a thesis. Have you thought about

21 rewriting it this way, et cetera, and many of

22 the things that he just described; is that not

23 correct?

24 MR. ABELE: That is correct. What the

25 Writing Center's staff are permitted to do is to

1 tell the student the paper doesn't have a theme,
2 there is no transition sentences, it needs a lot
3 of work. You need to go back and work on it.
4 They are not allowed to type the paper
5 or to put material in that the student doesn't
6 give them.
7 CHAIRMAN THOMAS: Any other questions?
8 Mr. Smrt, would the institution like
9 to respond?
10 MR. SMRT: No, I just do want to
11 reinforce the current policy is that you can't
12 be at a screen with a student-athlete, and all
13 the athletes who have been diagnosed are
14 registered with SDRC now.
15 MR. PARK: What should the football
16 player, , what should he
17 have done? What should have happened?

18 MR. SMRT: He should have gone to SDRC

19 and tried to get a temporary accommodation.

20 MS. POTUTO: SDRC is not simply

21 learning disabilities, it is any disability that

22 they handle?

23 MR. ABELE: They handle any

24 disability, physical disabilities, as well as

25 learning disabilities.

1 CHAIRMAN THOMAS: Any other questions

2 or comments?

3 MS. KARPINSKI: The question about the

4 if somebody came to SDRC with a

5 or a handicap of some sort, the SDRC

6 would not type his paper. They would find ways

7 to accommodate and other ways for

8 him to type, whether it is read orally into a

9 computer or something like that. They would not

10 simply take the draft and type it.

11 CHAIRMAN THOMAS: Mr. Smrt, is this it

12 in terms of the institution's opening statement

13 for 1-(a)?

14 MR. SMRT: I think you have heard it.

15 CHAIRMAN THOMAS: Okay.

16 Dr. Monk.

17 MR. HARGROVE: If I may respond

18 briefly to one issue, Mr. Chairman.

19 CHAIRMAN THOMAS: Go ahead.

20 Dr. Monk, are you in agreement?

21 MS. MONK: Yes, that's fine.

22 CHAIRMAN THOMAS: Okay.

23 MR. HARGROVE: With all due respect to

24 Mr. Smrt, the interview of was one

25 that I would have dearly loved to have been at.

1 statement was nowhere near to be kind
2 as definitive as what Mr. Smrt has relayed.
3 Mr. Smrt was, in fact, there.
4 said she didn't type anything, and he was
5 confronted with essentially a question that was,
6 well, that disagrees with what you said back in
7 whenever.
8 "Oh," he said, "well, whatever I said
9 then is what I said." The two statements in the
10 two interviews were not inconsistent with one
11 another. is one of the students with
12 whom Dr. Monk worked who did, in fact, have a
13 learning disability.
14 And with that, I apologize for
15 interjecting that. You are free to ask Ms. Monk
16 everything else. But I wanted the Committee to
17 know that, that this is one of the issues from

18 our perspective that we had to deal with because

19 we were not there. I would have dearly loved to

20 have pinned that down a little better.

21 MS. POTUTO: I am not sure I followed

22 you. You know, we do not have the statements.

23 The second statement, as you described it,

24 sounded to me exactly like what Mr. Smrt said.

25 You are saying in the first statement that

1 gave he did not say she typed for me?

2 MR. HARGROVE: That is correct. He

3 was confronted in the second interview --

4 MS. POTUTO: In the first interview,

5 what did he say?

6 MR. HARGROVE: In the first interview

7 he said essentially that she provided editing-

8 type services, tutorial services for him. The

9 second interview he said she didn't type any

10 papers for me. Those two statements are not

11 inconsistent.

12 But he was confronted with a question

13 indicating to him that they were inconsistent.

14 So, what said was, "Well, whatever I

15 said in the first interview was correct." It

16 was correct as was the second.

17 In other words, it wasn't the

18 situation where recanted what he

19 said between interviews. He was attempting to

20 be consistent but was confronted with a question

21 that told him, wait a minute, those are

22 inconsistent. Those were not his words that

23 they were inconsistent, those were Mr. Smrt's

24 words that they were inconsistent.

25 CHAIRMAN THOMAS: Dr. Monk.

1 MS. MONK: Thank you for the
2 opportunity to speak. First of all, I want to
3 say that when I was hired at Florida State or
4 when I was brought on board at Florida State
5 University in 2001, and I went through the
6 interview process, part of the interview process
7 included people who were individuals who were
8 employed at our Testing Center on campus,
9 individuals who were employed with SDRC.
10 It was very much a statement to me,
11 and I took the position with the belief that
12 what I was to do was to complement what SDRC
13 could do at the university with a group of
14 student-athletes who didn't always meet the time
15 lines that SDRC had.
16 SDRC had certain hours that they were
17 in operation. They were limited in the fact

18 that they had no tutors available to students

19 with learning disabilities. All of the tutors

20 that were available at SDRC were tutors that

21 were volunteers to SDRC, not paid specialists in

22 the areas of students with learning disabilities

23 and other disabilities.

24 Not all student-athletes just had

25 learning disabilities. Many of them had -- we

1 worked with student-athletes that had hearing
2 impairments. We worked with student-athletes
3 who had visual impairments as well as the
4 temporary physical disabilities that we have
5 spoken of about
6 So, I came on board with the belief
7 that my job responsibility was to complement the
8 services that were already on campus with SDRC,
9 and to be able to provide those services really
10 24 hours a day, or at the availability when
11 student-athletes needed those services.
12 I had the same qualifications, if not
13 higher qualifications, than the individuals that
14 served in SDRC. Those were qualifications that
15 were advertised for, were qualifications that I
16 was interviewed with and asked if I could
17 provide the support services to students with

18 disabilities. And I did so.

19 I did so with rigor, and I did so with

20 a level of professionalism that I don't think

21 anyone in this room, if you saw me work during

22 those six and a half years, would be able to

23 question.

24 I never typed a paper for a student.

25 I never had any intent of typing a paper for

1 students. I did work with students who had
2 writing disabilities. There was never a
3 question as to they supposedly had a disability
4 or maybe they might have had a disability.
5 I came into the position with the
6 qualifications to know that they had a learning
7 disability. In my file cabinet, Mr. Meleney can
8 agree to this, in my file cabinet that was
9 locked in my office, it had every student's
10 paperwork in there that diagnosed them with a
11 specific learning disability.
12 A student with a writing disability is
13 going to have a very difficult time getting
14 their thoughts on paper. I did struggle with
15 the NCAA and how the NCAA and the institution,
16 how I could work with those students.
17 I did struggle. I did seek counsel

18 from Mr. Meleney. I did seek counsel from the

19 Compliance Department. "How can I work with

20 this student? They have a writing disability,

21 they write at the second grade level. How am I

22 going to be able to accommodate them? What can

23 I do?"

24 So, the only thing I had to rely on

25 was what I knew from my educational background.

1 What I knew from the accommodations that were
2 afforded to them by their high school programs,
3 that came in their IEPs, in their folders.
4 What was prescribed to them as an
5 accommodation by clinical psychologists that had
6 performed psycho-educational evaluations on
7 them, and had given them what they needed in
8 order to be successful.
9 I also relied on them, what they said
10 they needed, what their parents said. I talked
11 to their parents, and so I was at a place in my
12 life where I was the only one who was in the
13 Athletic Academic Support Program who was a
14 professional to working with students with
15 learning disabilities and with other
16 disabilities.
17 So, I relied -- I didn't have a

18 document. There was not a document that the

19 University produced for me saying this is what

20 you can and cannot do. There was not a document

21 published by Mr. Meleney to say that I could or

22 could not do this as part of that.

23 And I worked with SDRC. I brought

24 about many of the changes that Mr. Smrt has

25 talked about. Many of those changes became a

1 part of what my goal was, was to work with SDRC.
2 I brought SDRC in our building.
3 We set up office hours for them to be
4 able to meet with student-athletes, to be able
5 to assign reluctant student-athletes up for
6 services. I worked with getting an academic
7 graduate student that could kind of be a liaison
8 between SDRC and the Athletic Department.
9 At all times throughout the six and a
10 half years that I worked there, I always
11 believed that it was my job and my position that
12 I was hired for and had the qualifications for
13 was to provide the supplemental studies, provide
14 supplemental services that would complement
15 SDRC, never intended to take the place of it,
16 but realizing that SDRC could not at that time
17 meet the needs of the student-athletes.

18 Therefore, the University had

19 requested and sought and found a professional

20 that could provide those services. But again, I

21 will say I never typed a paper, but I did work

22 very closely with students with writing

23 disabilities.

24 If you know someone in your family or

25 friends that have a writing disability,

1 diagnosed with that disability, you will never
2 very much understand why I may have used some of
3 the tactics that I did.
4 CHAIRMAN THOMAS: Thank you, Dr. Monk.
5 We are going to take two questions from the
6 Committee, and then we will break and come back.
7 Judge Lechner.
8 MR. LECHNER: Doctor, did you ever
9 work with a student who was rejected by SDRC,
10 who SDRC decided didn't need or didn't fit
11 within the qualifications to come within their
12 purview?
13 MS. MONK: I worked in my six and a
14 half years, I probably went through 1,200
15 student-athletes, so to say that --
16 MR. LECHNER: Excuse me, Doctor.
17 MS. MONK: Oh?

18 MR. LECHNER: Listen to the question.

19 I didn't ask how many people you worked with. I

20 just want to know during your period did you

21 provide services to a student who was rejected

22 by SDRC, or one that SDRC said does not fit

23 within our profile, does not qualify for SDRC

24 services?

25 MS. MONK: No.

1 MR. LECHNER: I am sorry?

2 MS. MONK: No.

3 MR. LECHNER: That is all I have.

4 CHAIRMAN THOMAS: Professor Potuto.

5 MS. POTUTO: As I understand it, you

6 are not a licensed professional who could make

7 the learning disability diagnosis; is that

8 right?

9 MS. MONK: That is incorrect.

10 MS. POTUTO: So, you are licensed, and

11 I could hire you if I had a child and you could

12 do the diagnostic determining that there was a

13 learning disability that I could then bring to

14 our center at Nebraska and say this is a

15 licensed professional whose professional

16 credentials permit her to make this diagnosis?

17 MS. MONK: I did that for 20 years in

18 the State of Mississippi. I am not licensed in

19 Florida, but I was licensed in the State of

20 Mississippi as a school psychologist and

21 provided those services for 20 years.

22 MS. POTUTO: Not the services, but the

23 diagnosis.

24 MS. MONK: For 20 years, in the State

25 of Mississippi, I was a licensed school

1 psychologist. I am still a licensed school
2 psychologist in the State of Mississippi and can
3 provide those diagnostic services.
4 I did not seek that license in
5 Florida, because the services were already there
6 in SDRC and at the Testing Center, and I did not
7 seek that license to cover Florida. But I am
8 still a licensed school psychologist in
9 Mississippi.
10 MS. POTUTO: And the University didn't
11 hire you as a licensed diagnostician; is that
12 right?
13 MS. MONK: That is correct, and I
14 never served in that role.
15 MS. POTUTO: Okay. So, can you say
16 that every student-athlete with whom you worked
17 had a disability that was processed through SDRC

18 MR. MELENEY: Yes, ma'am.

19 MS. POTUTO: Were those diagnoses ones

20 that identified a learning disability particular

21 to writing?

22 MR. MELENEY: I did not have access to

23 all those documents, so I did not review those

24 documents for every student. That decision was

25 between Dr. Monk and the SDRC Office. So, I

1 MS. MONK: They were certified as
2 having a learning disability when they came.
3 MS. POTUTO: I don't care about that.
4 Did they go through SDRC and get certification?
5 MS. MONK: That was not a policy that
6 they had to get certification.
7 MS. POTUTO: Are you answering no?
8 MS. MONK: If you are asking if every
9 student went through SDRC, the answer is no.
10 MS. POTUTO: The answer is no. Okay.
11 With regard to the students with whom you
12 worked, did you have a document, other than
13 SDRC, that had been a diagnosis that had been
14 performed within the prior two years that you
15 were using?
16 MS. MONK: Yes, I did.
17 MS. POTUTO: Every single one?

18 MS. MONK: Yes.

19 MS. POTUTO: You said you had files,

20 that if Mr. Meleney found those, they would have

21 been in the file?

22 MS. MONK: Yes.

23 MS. POTUTO: Mr. Meleney, is that

24 true? Did you find documents on every student?

25 She said she worked with 1,200, with 1,200

1 students who had documented learning
2 disabilities where the diagnosis would have been
3 in the prior two years.
4 MR. MELENEY: When she was referring
5 to 1,200 students, she was not referring to
6 1,200 disabled students. Dr. Monk worked with
7 other students, outside of other students, as
8 well. We did have documentation in-house on
9 students that she worked with as far as I know.
10 I do not know of any individual students.
11 MS. POTUTO: Did the documentation
12 show there was a diagnosed learning disability
13 for each of those?
14 MR. MELENEY: As far as I understand
15 it.
16 MS. POTUTO: Done with in the prior
17 two years?

18 MR. MELENEY: Yes, ma'am.

19 MS. POTUTO: Were those diagnoses ones

20 that identified a learning disability particular

21 to writing?

22 MR. MELENEY: I did not have access to

23 all those documents, so I did not review those

24 documents for every student. That decision was

25 between Dr. Monk and the SDRC Office. So, I

1 can't tell you that I knew of the type of
2 disability for each of those students.
3 MS. POTUTO: Dr. Monk, did all the
4 students with whom you worked have a diagnosed
5 learning disability that went to writing?
6 MS. MONK: Not all students had a
7 diagnosis of a learning disability with writing.
8 There was only a certain segment of the
9 students. I would just like to say to Mr.
10 Meleney, each semester, and I have a copy of the
11 document, I provided Mr. Meleney with a copy of
12 the document with the student's name and all of
13 the disability information regarding the
14 students. My file cabinet was available to him.
15 So, there was an opportunity. Mr.
16 Meleney and I were the only two people that had
17 an opportunity to look at their files. For

18 confidentiality, they were not open files for

19 everyone to see.

20 In answering your question again, not

21 all students had a writing disability. But if I

22 were to provide the services that we talked

23 about today, that student would have had a

24 writing disability that was diagnosed.

25 MS. POTUTO: So that every student

1 that is named in here, at least the three that
2 were named for whom you provided the assistance,
3 all of them had diagnosed disabilities relating
4 to writing, all three?
5 MS. MONK: I do not have those -- my
6 memory is not that good, but I do not have those
7 documents in front of me, and cannot make that
8 as a clear statement of yes or no. So, I am
9 going to have to pass on that one without having
10 their documents in front of me.
11 MS. POTUTO: Okay. Let me see if I
12 understand you. You contend that you were
13 authorized to work with students who had
14 diagnosed learning disabilities with regard to
15 whatever the accommodations that would have been
16 provided as a part of the diagnosis or as a part
17 of the accommodation plan derived from the

18 diagnosis.

19 You were authorized to do that without

20 regard to whether the students went through the

21 SDRC process?

22 MS. MONK: That is correct. The SDRC

23 was a secondary facility on campus to use as a

24 resource for students, and so they did not have

25 to be a part of SDRC for me to work with them.

1 MS. POTUTO: Maybe I didn't ask the
2 question right. I am just trying to find out.
3 I thought I heard the University say that before
4 any student on campus could be provided an
5 accommodation, that student would have had to go
6 through the SDRC process. Let me just make sure
7 I understood that from the University.
8 MR. ABELE: All students must go
9 through the SDRC if they are to receive
10 accommodations.
11 MS. POTUTO: Okay. I hear, then, you
12 saying that you disagree that that was the
13 policy?
14 MS. MONK: The policy with SDRC, as I
15 understood it, and I am not trying to contradict
16 Dr. Abele in any way, if they were to receive an
17 accommodation, a classroom accommodation, the

18 classroom accommodation could only be received

19 if they were a part of the SDRC.

20 That did not preclude them from being

21 able to work with me. I was not providing a

22 classroom accommodation.

23 MS. POTUTO: I am not talking about

24 whether they could work with a tutor outside of

25 SDRC, but whether without going through the SDRC

1 anyone could give an accommodation. And I hear
2 you say that you believe that you were
3 authorized to provide accommodations for
4 students who did not go through the SDRC
5 process. I want to find out where you are.
6 MS. MONK: Yes, if you read the job
7 description, you will see that in the job
8 description it clearly states what they were
9 looking for, which was someone to work with
10 student-athletes with learning disabilities.
11 Accommodations from SDRC allowed them to get
12 accommodations in their classroom.
13 MS. POTUTO: But with respect, and I
14 still don't know what your position is, I heard
15 the University say that whether in classroom or
16 not, if the student was going to get an
17 accommodation, that student would have to be

1 to take a break at this time. It is about
2 10:30. We will reconvene in ten minutes. That
3 is 10:40. So, we will take a break at this
4 time. Thank you.
5 (RECESS.)
6 CHAIRMAN THOMAS: We are ready to
7 start here after everyone gets seated. I have a
8 couple of questions for the institution. Who is
9 actually responsible for determining the
10 disabilities, whatever they might be, on your
11 campus?
12 MR. ABELE: We have a very clear
13 written policy on that. The Student Disability
14 Resource Center is the only agency that can make
15 that determination.
16 CHAIRMAN THOMAS: At any time was Dr.
17 Monk given that responsibility or authority to

18 determine that she could do that with student-

19 athletes?

20 MR. ABELE: Not that I am aware of

21 sir.

22 CHAIRMAN THOMAS: Dr. Monk, were you

23 under those impressions?

24 MS. MONK: I never made a

25 determination that a student had a learning

1 disability. That was not my responsibility. I
2 took the documentation that the student provided
3 to the Athletic Department, either when they
4 were cleared through the clearinghouse and they
5 provided the documentation during that period of
6 time, or when they came to our campus and
7 provided that documentation to us.
8 I did not diagnose students with a
9 learning disability. I took the documentation
10 that was done by a professional psychologist, in
11 whichever state the student came from. If they
12 came from the State of Washington, the diagnosis
13 was provided by the State of Washington.
14 If they came from Texas, it was
15 provided by Texas. If they came from Florida,
16 it was provided by Florida. At no time did I
17 ever give a diagnosis for a student with a

18 learning disability. The diagnosis was in place

19 when they came to us.

20 MR. SMRT: As a clarification mainly,

21 Dr. Monk worked with maybe 50 student-athletes.

22 It varies by year, and it was increased during

23 her latter years. We can't tell you what

24 percent of those student-athletes had a

25 diagnosis.

18 learning disability. The diagnosis was in place

19 when they came to us.

20 MR. SMRT: As a clarification mainly,

21 Dr. Monk worked with maybe 50 student-athletes.

22 It varies by year, and it was increased during

23 her latter years. We can't tell you what

24 percent of those student-athletes had a

25 diagnosis.

1 We believe there are some who didn't,
2 but we can't tell you -- we can't give you what
3 percent. We know that of the athletes she did
4 work with, that were diagnosed, less than 10
5 percent or so were registered with SDRC. The
6 vast majority were not registered.
7 CHAIRMAN THOMAS: From an
8 institutional perspective, could you just kind
9 of procedurally, when prospective student-
10 athletes would come in, was there a process in
11 determining their level of disabilities based
12 upon their academic record from high school,
13 junior college, or whatever, or did you just
14 depend upon them to go to the SDRC Center to be
15 evaluated? What was the process the institution
16 would use to determine the disabilities?
17 MR. ABELE: The process begins with

18 the student self-identifying to the Student

19 Disability Center. All students are given a

20 handbook that outlines if they have a student

21 disability and if they choose to register with

22 the Student Disability Center, they would be

23 required to bring in the date of the current

24 diagnostic evaluation, if there was an earlier

25 diagnostic evaluation, whether or not that is

1 followed, the Diagnostic Statistical Manual of
2 the American Psychiatric Association, along with
3 the criteria and the professional credentials of
4 the individual who performed the diagnosis.
5 The reason that they are required to
6 register is the statutes relating to K-12
7 disability are different from those rules
8 relating to collegiate disability. So, they
9 would have to go through that process.
10 That information is assessed by the
11 professional staff, and that is when the
12 interview occurs, and any accommodations
13 necessary. That is clearly outlined in both the
14 Student Handbook and the University Procedures.
15 CHAIRMAN THOMAS: I have noticed a
16 couple of things. The job description of Dr.
17 Monk, and it does have some wordage in there

18 that indicates about an assessment of learning

19 disabilities.

20 So, I am trying to -- again, if I am

21 incorrect, Dr. Monk, you correct me. I also

22 noticed that all of your professional

23 credentials, in terms of retardation and

24 handicaps and so on and so forth, apprenticeship

25 and all those credentials were on the secondary

1 level, they were not on the post-secondary
2 level.
3 Am I correct in that assessment of
4 your credentials?
5 MS. MONK: Licensed in the state is
6 going to be only K through 12.
7 CHAIRMAN THOMAS: Do you have any
8 credentials, professional credentials, that
9 would allow you to go post-secondary in terms of
10 disabilities assessments?
11 MS. MONK: I have a Doctorate Degree
12 in Education Leadership. I believe that is the
13 same as President Wetherell has.
14 CHAIRMAN THOMAS: I am talking
15 specifically about the credentials, professional
16 credentials as you had with K through 12, that
17 clearly indicates that you are certified to do

18 dah, dah, dah.

19 MS. MONK: I did not know that those

20 credentials exist.

21 CHAIRMAN THOMAS: Okay. My last

22 question is from the AASS Office, is there a

23 referral process in terms of determining these

24 students probably need to be assessed or

25 evaluated for learning disability? Can someone

1 explain what that process is and how many actual
2 students you did have?
3 MR. SMRT: Some athletes came with a
4 diagnosis and the AASS sent out some athletes to
5 get tested. If you want to know how that
6 process works, there were some on campus, was an
7 on-campus facility that did that. There was a
8 private group that also did that.
9 So, yes, some came and some were
10 diagnosed when they arrived. I did want to go
11 back to your question about the job description,
12 because the job description -- Exhibit 1-8 is
13 Dr. Monk's draft during the interview process.
14 1-7 is the job description. 1-7 talks
15 about making protocol for working with SDRC on
16 campus. So, I am not sure if anywhere it says
17 that she has the authority to provide

18 accommodations.

19 MS. JENNINGS: Look at No. 13,

20 Question No. 13 on the job description.

21 MR. SMRT: I have that. It says

22 conduct learning assessments, make

23 recommendations and appropriate support counsel

24 and monitor student-athletes. That is exactly

25 what she was supposed to do, and develop

1 learning strategies.

2 In her interview, she talked about you

3 would work differently with people with learning

4 disabilities. Obviously, we are talking about a

5 range of disability or accommodation that is

6 provided.

7 She talked about in the interview

8 there are different learning strategies for

9 individuals with different disabilities, and

10 that makes sense. I see that on 13 is exactly

11 what she is supposed to do, develop learning

12 strategies, to work with individuals with

13 different accommodations.

14 MS. JENNINGS: With all due respect,

15 you skipped over the first three words,

16 "Conduct, Learning Assessments," and learning

17 assessments is capitalized. I guess I would

18 like to generalize the question a little bit and

19 say I don't understand why you hired a person of

20 her qualifications and what you did expect her

21 to do.

22 I have heard a lot about what you

23 didn't expect her to do, but I don't have a

24 clear idea of what she was supposed to do. Can

25 somebody help to clarify that for me?

1 MR. SMRT: I guess Mark would be the
2 appropriate person since he was the person who
3 supervised her.
4 MR. MELENEY: Yes, I would like to
5 answer that. In our efforts to go out and seek
6 a learning specialist for our program, the
7 position is somewhat new under academics and
8 athletics academic support programs during that
9 period of time.
10 Nationally, what perhaps we were
11 looking for was for somebody to build a bridge
12 between your University community to support
13 the student-athlete population. So, our efforts
14 were to find an expert, find someone with
15 background with students with learning
16 disabilities and ask that person to come on
17 board and establish programming for our student

18 population.

19 So, our goal was to again develop a

20 stand-alone program that would not be driven by

21 individuals but would be driven by a process.

22 This is where our commitment to Dr. Monk to work

23 closely with the SDRC to build that bridge

24 through the University community of students

25 with disabilities and to provide the appropriate

1 services as defined by SDRC.

2 MS. JENNINGS: And how did you clarify

3 to her, a person with a lot of experience in

4 diagnosing and in assessing and in determining

5 what accommodations were necessary, where the

6 limits of this were and what was the job of SDRC

7 versus what was her responsibility?

8 MR. MELENEY: I believe in one

9 conversations throughout this process, it was

10 the discussions were related to using your

11 expertise to help understand the process and to

12 help guide our student-athlete population to the

13 right accommodations.

14 So, I valued her expertise and her

15 experience in that nature, but also was clearly

16 understood that our direction for students with

17 disabilities came directly from the SDRC Office.

18 I believe that Brenda and I had those

19 conversations throughout.

20 That is why she reached out to that

21 office when she came on board, and the efforts

22 to build that bridge between the two offices.

23 MS. JENNINGS: Given the job

24 description and given her background, and so

25 forth, surely you expected her to provide

1 accommodations, not just to laissez with the
2 SDRC?
3 MR. MELENEY: Only accommodations that
4 were defined clearly by SDRC, because Brenda and
5 I had -- we had so many conversations about
6 appropriate accommodations throughout this
7 period of time.
8 This is obviously an area that has a
9 lot of avenues to it. What we spoke to often
10 was is this the appropriate accommodation? Can
11 we provide any of these accommodations, and who
12 do we take our marching orders from in this
13 area? It was clearly understood that we took
14 our orders from the SDRC.
15 MS. JENNINGS: Dr. Monk, you said that
16 they didn't need certification from the SDRC of
17 their disability. I am a general counsel at a

18 university, and I am not aware of any university

19 in the United States that does not have one

20 single certification office, only one is every

21 single student who wants accommodations must be

22 certified.

23 That doesn't mean conducting the

24 assessment tests, it means evaluating them, and

25 so I am really interested in why you think they

1 didn't need certification.

2 MS. MONK: I never said that. I said

3 that they --

4 MS. JENNINGS: I wrote it down as a

5 direct quote.

6 MS. MONK: I am sorry. When I was

7 talking about accommodations, I think that you

8 have to look at what I was doing was not

9 providing accommodations. I was a service

10 provider.

11 I was providing services to students

12 with learning disabilities, because I understood

13 what they needed. If they were seeking

14 accommodations in the classroom, classroom

15 accommodations, every student that was seeking

16 classroom accommodations were sent through the

17 SDRC.

18 They were the only agency on campus

19 that could determine if there were

20 accommodations that they could use in their

21 classroom. Accommodations are something that

22 had to do with different from service.

23 I think I go back to the Reading and

24 Writing Center. I saw myself as almost an in-

25 house specialist in how to sit down with the

1 student with a learning disability and help them
2 learn how to learn.
3 I did exactly what my job description
4 said, and that was to provide strategies for
5 learning for those students. I was not
6 providing accommodations, I was not requesting
7 accommodations for those students.
8 If a student was requesting an
9 accommodation in the classroom, they were sent
10 through SDRC, and those accommodations were
11 provided through them. I have never called one
12 professor and asked for accommodation.
13 I never met with a professor and asked
14 for an accommodation, and those were -- this was
15 the responsibility of SDRC. I never saw it in
16 providing services any different than the
17 services that were provided by the Reading and

18 Writing Center, the Math Center.

19 Those were services that I could

20 provide because I did have an understanding of

21 what students needed, and I taught them learning

22 strategies so they would be able to perform

23 academically in the classroom.

24 MS. JENNINGS: You have said several

25 times that SDRC only provided classroom

1 accommodations. That's really astonishing to
2 me, because again I am unfamiliar with any
3 university whose SDRC Office limits itself to
4 classroom accommodations.
5 So, can you tell me why you believed
6 that?
7 MS. MONK: First of all, SDRC did not
8 have tutors that were able to tutor the students
9 with learning disabilities. At the time, when I
10 started, and that may have changed, but at the
11 time that I started all the tutors were
12 volunteer students.
13 So, they were not equipped to work
14 with the students with learning disabilities
15 like I was. So, I provided a lot of the
16 tutoring services; they were limited in their
17 technology. They did have Kurzweil, and their

18 students did go to SDRC.

19 They utilized Kurzweil reader. They

20 did go to SDRC to utilize some of the

21 technology. They took some of their exams at

22 SDRC, if that was an accommodation that was

23 appropriate. So, SDRC was very limited in what

24 they could provide one-on-one to students.

25 MS. POTUTO: If I can just interject.

1 The statutes with regard to disabilities have a
2 defined meaning for accommodation. I have a
3 very distinct feeling that we have got at least
4 two or three meanings floating around here.
5 The SDRC, in revealing evaluations
6 done by licensed psychologists or psychiatrists,
7 would provide accommodations related to the
8 particular learning disability in a particular
9 area. They would decide what accommodations
10 under the law were appropriate and necessary.
11 Let us say one of those accommodations
12 might be that classroom lectures be taped so
13 that a student who has trouble with the
14 particular -- has a particular learning
15 disability can listen to the tapes.
16 Now, that would be the accommodation,
17 as I understand it. Who provides the tapes and

18 who assists in getting that accommodation done

19 is a different question. Now, would you agree

20 with me -- well, first of all, would you agree

21 with that distinction, Dr. Monk?

22 MS. MONK: Yes.

23 MS. POTUTO: Okay. So, what you are

24 talking about, if I understand you, is that the

25 accommodations that were required under the law

1 for a particular student given the particular
2 learning disability would be determined
3 elsewhere.
4 Now, we have a disagreement whether it
5 has to be done through SDRC or whether you can
6 take one that came in which some other
7 psychiatrist or psychologist had done it.
8 Putting that aside, that diagnosis would be made
9 elsewhere, the accommodations that would be
10 required would be determined elsewhere, and then
11 what you say you were doing was facilitating
12 whatever the accommodation was, not describing
13 new ones.
14 Do I have it?
15 MS. MONK: Yes, you do.
16 MS. POTUTO: All right.
17 MS. JENNINGS: The problem with that

18 is that the diagnostician does not dictate the

19 accommodation that the university provides. It

20 may recommend, but it does not determine. The

21 institution determines the accommodation that is

22 required.

23 MS. POTUTO: All I was trying to do

24 was to define out what she is suggesting that

25 she does. Wherever the accommodation is being

1 determined, I don't want to get into that wide
2 area, but wherever it is that it is being done,
3 you are using accommodations rather loosely over
4 there because you don't mean the accommodation
5 under the law.
6 MS. MONK: That is correct.
7 CHAIRMAN THOMAS: Judge Lechner.
8 MR. LECHNER: Dr. Monk, in a little
9 different area. You said before that you never
10 typed a paper; is that correct?
11 MS. MONK: That is correct.
12 MR. LECHNER: Did you ever type an
13 outline for a paper?
14 MS. MONK: Yes.
15 MR. LECHNER: Where did you get the
16 information to put in that outline?
17 MS. MONK: From the student.

18 MR. LECHNER: Did you ever change any

19 of it?

20 MS. MONK: To change their thoughts,

21 no. To change their grammar, yes. There would

22 be times where they would have a writing

23 disability, or even if they were dyslexia, and

24 their language would be very mixed up, and so I

25 would guide them to the correct way to say a

1 sentence.

2 They might have the verb in front of

3 the noun, and the preposition hung out there

4 somewhere, or it may be jumbled up and they made

5 up words. Those were things that I would guide

6 them through so that through their disability

7 they would be able to construct a paper that

8 would be legible for someone to read.

9 MR. LECHNER: How would you know the

10 subject matter they were in? Would they explain

11 it to you?

12 MS. MONK: Every student that I worked

13 with with a diagnosed learning disability, those

14 disabilities were -- their paperwork was kept in

15 my office. That was information that was

16 available on demand by Mr. Meleney, also on

17 demand by academic counselors if they needed it,

18 coaches.

19 MR. LECHNER: Maybe my question was

20 wrong. I meant from the paper they were

21 writing, did they explain the subject matter of

22 the paper?

23 MS. MONK: Yes. I mean, they would

24 come to me with -- they knew what they needed to

25 do. They just didn't know how to do it.

1 MR. LECHNER: I am not talking about
2 the assignment, for example, write a 25-page
3 paper with a certain number of footnotes or
4 citations. I am talking about whether they
5 explained to you what the subject matter of the
6 paper was, whether it was a book review, whether
7 it was a comparison, whether it was an essay,
8 whether it was a philosophical essay. Did they
9 explain what they were talking about to you?
10 MS. MONK: Yes. I want to go one step
11 further with that. Usually, if they had a
12 writing disability they also had a reading
13 disability. So, let's say they had to write a
14 critical essay on a short story in English, an
15 English short story.
16 The first thing that the student and I
17 would have done, if they were unable to read the

18 short story because it was written, say, on the

19 eighth or ninth-grade level, and maybe they only

20 read on the second-grade level because of the

21 severity of their learning disability, we would

22 read the story.

23 A lot of times we would just do -- it

24 was almost like paired reading. They would read

25 a paragraph, become very tired, and I would read

1 the paragraph. So, we would read the story, the
2 short story from beginning to end.
3 Then they would look at the question
4 that they were trying to answer, or the
5 assignment they were trying to answer. We would
6 talk through it, and once they had an
7 understanding of what they needed to do, then
8 they would proceed with doing it.
9 MR. LECHNER: So, when you had this
10 paired reading and you read the essay or the
11 book, or whatever that was supposed to be the
12 subject matter of the critical essay, did you
13 explain that book to them?
14 MS. MONK: Yes.
15 MR. LECHNER: Did you explain some
16 criticisms or give them some ideas on what their
17 paper should be?

18 MS. MONK: It was a process.

19 MR. LECHNER: Excuse me. That is a

20 yes or no?

21 MS. MONK: Yes.

22 MR. LECHNER: After you explain that

23 to them, what their paper should be, did they

24 give you an outline?

25 MS. MONK: Yes.

1 MR. LECHNER: Did you explain to them
2 whether that outline was correct or incorrect?
3 MS. MONK: Yes.
4 MR. LECHNER: Were they in agreement
5 with you or in disagreement at times?
6 MS. MONK: Yes.
7 MR. LECHNER: After you explained the
8 book to them and after you explained the outline
9 in that, did you have any further discussions?
10 MS. MONK: They would then write, and
11 then they would come back and we would discuss
12 their initial writing.
13 MR. LECHNER: And did you criticize
14 that writing?
15 MS. MONK: Yes.
16 MR. LECHNER: I am not talking about
17 the physical layout of the writing where the

18 verbs and adjectives were, hanging prepositions,

19 split definitives. Did you criticize the

20 substance of it?

21 MS. MONK: Yes. I mean, we talked

22 about how they developed the writing and were

23 they on track.

24 MR. LECHNER: Did you criticize the

25 substance of what the student was saying?

1 MS. MONK: I am not sure I understand
2 what you are saying.
3 MR. LECHNER: Did you disagree with
4 the substance of what the student was offering
5 to you as to what the student was proposing as
6 the criticism?
7 MS. MONK: No.
8 MR. LECHNER: Did you ever change any
9 thought of a student?
10 MS. MONK: No.
11 MR. LECHNER: That may be a fact, but
12 I find it hard to believe when you just
13 explained to me that you had an eighth-grade
14 book and a student with a second-grade reading
15 level where you had to read the book to the
16 student, walk the student through the book, and
17 you are telling me that whatever the student

18 said you took verbatim.

19 I find it hard to believe that. If

20 that is the case, fine. But from my point of

21 view, I find it difficult. If there is anything

22 else you want to say to that, I will give you

23 the opportunity.

24 MS. MONK: I think you would have to

25 be there to see the process. The process was

1 not a 30-minute process as you are outlining it
2 to be. It was --
3 MR. LECHNER: I didn't suggest any
4 time.
5 MS. MONK: It is very time-consuming.
6 MR. LECHNER: Excuse me one second. I
7 didn't suggest any time period.
8 Go ahead.
9 MS. MONK: It was a very time-
10 consuming process. Any time that I worked with
11 a student on a writing assignment, there were
12 many different factors that went into it. It
13 was a process that sometimes went on for a week,
14 sometimes it went on for two weeks, sometimes it
15 went on for four weeks.
16 It was a process of writing and re-
17 writing and re-writing, and investigating and

18 looking, and coming up with how they could put

19 their thoughts down in the way that the

20 professor was asking for.

21 MR. LECHNER: Well, he gave you these

22 thoughts. You typed them out; is that correct?

23 MS. MONK: That is correct.

24 MR. LECHNER: They wrote them out?

25 MS. MONK: The majority of the time.

1 There were a couple of occasions where it
2 became -- I did use the word processor to help
3 them with a general outline. Again, that
4 depended on the severity of the learning
5 disability.
6 But on a day-to-day basis, that was a
7 very rare occurrence. That did not occur or it
8 was not a normal operating procedure. It was
9 not a normal teaching procedure. I worked with
10 as many as 65 students, and out of those 65
11 students there were probably two or three each
12 semester that would require more of my time
13 based on the severity of their learning
14 disability.
15 But it was a process. It was not
16 something that just happened. My thoughts were
17 not in what the student needed to say, it was

18 their thoughts. I did help them clarify their

19 thoughts at times so that they could be

20 understood, that their thoughts could be

21 understood and not just a mumble jumble of words

22 that were thrown out on a paper.

23 MR. LECHNER: Did you ever suggest to

24 the student that the criticism offered by the

25 student may have missed the point, may not be on

1 point, or may be incorrect?

2 MS. MONK: Usually in an open-ended

3 question, I might say, "How does this sound to

4 you? Does this sound like what the question was

5 asking?"

6 MR. LECHNER: Did you ever suggest to

7 the student that the criticism was incorrect or

8 misses the point?

9 MS. MONK: Their finished product is

10 what they want was their thoughts.

11 MR. LECHNER: One more opportunity.

12 Did you ever suggest to the student that their

13 criticism was incorrect or missing the point?

14 MS. MONK: No.

15 CHAIRMAN THOMAS: Let me ask the

16 institution a question. Did you provide NCAA

17 rules education for personnel in the AASS area?

18 MR. SMRT: Obviously, Dr. Monk was

19 there for several years, and so we will do it in

20 pieces because it has evolved. Brian maybe

21 could direct what went on during the initial

22 period.

23 MR. BATTLE: Our educational efforts,

24 when Dr. Monk first came on board, were as Mr.

25 Meleney stated, that this was a new position.

1 At the time she came on board there were three
2 of us in the office.
3 Bob Minnix oversaw the office as the
4 Associate A.D.; who was in charge of educational
5 efforts at that time, was directed by Penny
6 Parker, and I was compliance coordinator. We
7 assisted them in any of those efforts.
8 After about nine months, I believe,
9 when Dr. Monk was on staff, Mr. Meleney asked us
10 to put on the agenda, which our Financial Aid,
11 Registrar, Academics and Compliance at that time
12 would meet once a semester to get at certain
13 things.
14 During that educational process, we
15 were trying to learn what services the learning
16 specialists could provide. At that time we told
17 them they could only provide services that were

18 provided by SDRC.

19 In regards to other educational

20 opportunities for the Athletic Academic Support

21 Office, it was highly recommended in discussions

22 with Mr. Meleney, that they attend their NAAAA

23 sessions at the national and regional level,

24 which I believe most of the staff did attend.

25 In addition to that, some of the staff

1 members attended the NCAA regional seminars. As
2 I stated earlier, that the semester meetings
3 with the Financial Aid, Registrar, Academics and
4 Compliance in 2005 became a monthly meeting,
5 which education was a part of that in different
6 areas.
7 In addition to that, at the beginning
8 of each year we would meet as a staff and the
9 Director of Athletics would have what we call a
10 certification and compliance meeting. We would
11 talk about the state of the union with the
12 Athletic Department as well as stating at that
13 point in time signing the NCAA form that they
14 did not know of any NCAA rules violations.
15 CHAIRMAN THOMAS: Dr. Monk, while you
16 were employed at Florida State, did the
17 Athletics Department give you any rules

18 education regarding NCAA?

19 MS. MONK: The two policies that we

20 talked about was that the typing of a paper for

21 a student, and any other services that you might

22 give a student as far as pens, pencils and

23 paper, and those services that would have been

24 an extra benefit.

25 So, those were the two rules, and when

1 you talk about what typing a paper is, and maybe
2 this is a good point to bring that up. Maybe
3 this was my poor interpretation of it although I
4 know why -- I guess I stand on this.
5 When I think about the typing of a
6 paper, I considered that to be a violation that
7 occurs when a student can request at will from
8 someone in the Athletic Department or someone on
9 campus, if you will just type this paper for me,
10 or that paper is typed for them and handed to
11 them in a final draft form, that they can then
12 take it to class and get a grade for it.
13 That, to me, was my understanding of
14 what typing a paper for. In facilitating a
15 student through the process of writing a paper
16 and using technology, technology drives us all,
17 we were in the process of getting more and more

18 technology, of using Kurzweil reader, of using

19 Speak Naturally, trying to get those programs on

20 so that students in the Athletic Department that

21 had a learning disability in reading and writing

22 could use that technology so that they could

23 speak into a computer and a finished product

24 would come out.

25 I would have never been put into a

1 place where I might have to facilitate them
2 using a word processor. But as far as the two
3 accommodations was typing a paper and providing
4 them with pens and pencils and paper, so that
5 they did not have to purchase it themselves.
6 CHAIRMAN THOMAS: Okay. Mr. Meleney,
7 if we can ask with some specificity here
8 regarding AASS Department and the SDRC. Was
9 there specific education, NCAA rules education,
10 that were covered and reviewed and talked about
11 in meetings that related to learning
12 disabilities, what you could and couldn't do?
13 Was that ever mentioned, and anything,
14 any documentation to indicate that this was
15 disseminated to the personnel in those two
16 areas?
17 MR. MELENEY: Yes, sir, there was. We

18 conducted weekly staff meetings. At those staff

19 meetings we listed at times in our agenda issues

20 of question, any services of questions. We had

21 opportunities where we were actually tested

22 through compliance, where we did the 30-question

23 test related to Bylaw 14 mainly, but to other

24 bylaws that were related to academic services

25 and academic support.

1 So, we conducted those processes.
2 Brenda was involved with NAAAA and I am deeply
3 involved in NAAAA as well.
4 CHAIRMAN THOMAS: In essence, Dr.
5 Monk, if Mr. Meleney's articulation is accurate,
6 then you knew what you could and couldn't do in
7 terms of extra benefits with learning disability
8 student-athletes?
9 MS. MONK: I knew I could not type a
10 paper for them or provide them with a pen,
11 pencils, paper, so they would have to purchase
12 it.
13 CHAIRMAN THOMAS: So, in essence,
14 everything else you did not know?
15 MS. MONK: That is correct. I knew I
16 could not provide them accommodations in the
17 classroom, and that that had to be provided

18 through SDRC.

19 CHAIRMAN THOMAS: Professor Potuto.

20 MS. POTUTO: Do you get training on

21 the definition of an extra benefit?

22 MS. MONK: An extra benefit was

23 something that a student could receive in the

24 Athletic Department that they could not receive

25 outside the Athletic Department, that a regular

1 student could not receive outside the Athletic
2 Department.
3 MS. POTUTO: Let me get back to the
4 compliance.
5 Did you do specific training on what
6 an extra benefit means? I mean, at one level
7 you can do a list you may not do, you can do
8 this, you may not do this, you can do this. But
9 in another level, the basic principle as to
10 where the dividing line is, so that you can make
11 some of the more discreet decisions, I think
12 often are more useful.
13 Did Academic Services get the general
14 instruction on what an extra benefit is?
15 MR. BATTLE: Yes, ma'am, they did.
16 The basic understanding, as Dr. Monk has stated,
17 is our premise was if you cannot give it to the

18 general student, then you cannot give it to the

19 student-athlete.

20 To take it a step further, in meetings

21 where Dr. Monk was present, every semester we

22 did a tutorial education with the tutors where

23 it was specifically described in different

24 situations what constituted an extra benefit.

25 She was in those meetings and understood that

education.

MS. POTUTO: Dr. Monk, if I can, I would like to follow up.

Mr. Meleney, did you have something you wanted to say? I wanted to follow up a little on what Judge Lechner was pursuing. Your educational background is in educational administration, with a specialty in special education; is that correct?

MS. MONK: That is correct.

MS. POTUTO: Okay. So, you have got a student who has got a second-grade reading level, which is what I think you used as an example earlier, or writing level, I guess is what you said, a second-grade writing level.

They are in an English Literature course, and they are supposed to read Tale of

18 Two Cities. Are you familiar with Tale of Two

19 Cities?

20 MS. MONK: I have read it, yes.

21 MS. POTUTO: Okay. So the student

22 comes to you after you have spent -- I am being

23 assisted over here. She just gave me an

24 accommodation. You have worked with the student

25 for a period of time on the book.

1 Then the student goes off, and I think
2 you said they would write their own outline; is
3 that right? I don't want to put words in your
4 mouth.
5 MS. MONK: Yes, ma'am.
6 MS. POTUTO: Okay. So, the student
7 comes back and tells you that the two cities in
8 the book are Rome and Alexandria in Egypt. What
9 do you do next?
10 MS. MONK: You know, I guess we look
11 at the scenario in trying to fill it out. It
12 was a very long process.
13 MS. POTUTO: No, no.
14 MS. MONK: I understand. I was a long
15 process. I mean, we read the book, we read the
16 summaries, we re-read the book. If they had
17 incorrect information, it would be my

18 responsibility to guide them in the ways to find

19 the correct information.

20 MS. POTUTO: Tell me what you would

21 do. The student tells you that the two cities

22 in the book are Florence and Alexandria. I am

23 the student. You just gave me --

24 MS. MONK: We would read. If that was

25 incorrect information, we would go back and we

1 would re-read the information until he had the
2 correct information.
3 MS. POTUTO: So, what would you tell
4 me? We are going to go back and re-read because
5 there is something here that is not right?
6 MS. MONK: I would say something to
7 them like you may have misinterpreted your
8 reading. Let's read it again.
9 CHAIRMAN THOMAS: Any further
10 questions?
11 MS. POTUTO: So, I assume from what
12 you said, and particularly from, I think, in one
13 of the responses that this could be a very
14 lengthy process. But you would go back and
15 forth, and you would never at any point say when
16 you designated these two cities there was an
17 error?

18 MS. MONK: That is not teaching.

19 Teaching is allowing the student to find their

20 own mistakes and to find and gain their

21 information. I was a teacher. I taught and I

22 used the standard teaching, professional

23 teaching experience, and it would be maybe

24 looking at other resources, re-reading the

25 materials, looking at it a different way.

1 It was not my purpose to give them any
2 information. That is not teaching. Teaching
3 only occurs when the student can learn and can
4 find out information on their own.
5 MS. POTUTO: If I am in a law class
6 and I get an answer from a student that there
7 are eight Justices on the Supreme Court, and I
8 say that is wrong, I am no longer teaching?
9 MS. MONK: You know, it is a long
10 process. I cannot outline -- I wish I had it on
11 tape where you could see me working with the
12 student. I think that is the only way to
13 understand.
14 You know, I was not in the process of
15 saying to them that is right or that is wrong.
16 I was always giving them an opportunity. If I
17 knew it was wrong and I was just giving them an

18 opportunity to investigate it on their own and

19 to find the answer.

20 MS. POTUTO: And what would be the

21 responsibility of the student? If the two

22 cities are Alexandria and Florence, and you said

23 you may have misinterpreted, let's go back and

24 read again, would we read the entire book or

25 would we read the page that designated the

1 correct answer to the two cities?

2 MS. MONK: After the student probably

3 used a few choice words to me because I was

4 going to insist that he read the book again or

5 read those passages again, he would have done

6 what I asked him to do.

7 He would have read, we would have

8 discussed, and giving him an opportunity to

9 have -- to be at the same level as the student

10 who didn't need any help. You know, that was

11 the whole purpose of reading to him or having

12 Kurzweil read to him, or reading it two or three

13 times to allow them the opportunity to be on the

14 same level of classroom discussion, so that they

15 would be able to perform in the classroom with

16 those students who did not have diagnosed

17 learning disabilities.

18 MS. POTUTO: What if I did read it

19 again, and it is a long book, and I read it

20 again, and I read it again, and I come to you

21 and say that the two cities are Florence and

22 Rome. Is there a point at which you would stop?

23 MS. MONK: And just give them the

24 answer.

25 MS. POTUTO: No, just stop, be

1 permitted to submit a paper that was flat out
2 wrong because you have gone through a process a
3 number of times and they never did find the
4 right answer.
5 MS. MONK: There would be a point that
6 they would turn in the work as they had
7 constructed it. That was their choice. They
8 always had the choice of whether or not they
9 wanted that additional help or whether or not
10 they wanted to turn in exactly what they did.
11 There were many of them who took the
12 choice not to come through me, and they would
13 turn in work that was sub-par and would result
14 in a failing grade. So, there was never any--
15 I mean, there was never any mandate that they
16 would have to work with me until they got all
17 the correct answers.

18 Mr. Meleney, I don't want to misstate

19 it. I thought I heard somebody say that, and I

20 thought it was you.

21 MR. MELENEY: In my conversations in

22 reference to a scribe, which maybe, I don't know

23 if you are describing the typist or a scribe as

24 the same thing. We got a definition that a

25 scribe, because Brenda had shared with us that

1 the software program that they used. I could be
2 wrong. Dr. Abele can probably speak to that.
3 But they actually had the software program in
4 place, and they trained the students who used
5 SDRC to go and use that software, which, in
6 essence, typed their paper for them.
7 That was the service that SDRC
8 wouldn't have any need to provide a typist,
9 because they had the technology to provide that
10 service.
11 MS. POTUTO: My question is, I thought
12 I understood Mr. Meleney to say you got an
13 answer back from SDRC that outside the center a
14 service to a diagnosed learning disability
15 student, even with a writing disability, that
16 the typing was not a service that could be
17 provided.

18 Mr. Meleney, I don't want to misstate

19 it. I thought I heard somebody say that, and I

20 thought it was you.

21 MR. MELENEY: In my conversations in

22 reference to a scribe, which maybe, I don't know

23 if you are describing the typist or a scribe as

24 the same thing. We got a definition that a

25 scribe, because Brenda had shared with us that

1 under federal law certain students would be
2 eligible for a scribe, should be eligible for a
3 scribe.
4 I asked her to do some research on
5 that. I asked her to provide some federal
6 guidelines that share that. We provided
7 that -- I don't know if we provided that direct
8 information to the Compliance Office, but we did
9 get an answer from the Compliance Office.
10 I don't know if it was through their
11 discussions with SDRC as well, that we could not
12 provide a scribe directly.
13 MS. POTUTO: Mr. Abele, was it you
14 that had talked about typists in particular? I
15 thought somebody there did. If I misheard, I
16 would like to get it corrected.
17 MR. ABELE: I am reasonably familiar

18 with the services, and I am unaware of typing

19 services at the Student Disability Resource

20 Center. Someone, I presume may have been a

21 disability such that they would provide them,

22 but that is not one of their standard six or

23 eight accommodations.

24 They will send students, they are note

25 takers, they are sign language interpreters.

1 But I do not know of any typists.

2 MS. POTUTO: Mr. Meleney.

3 MR. MELENEY: Yes. I think the other

4 reference you were speaking to is when Mr. Smrt

5 mentioned that I said to the staff you cannot

6 type a paper.

7 MS. POTUTO: No, I was first getting

8 what the center's position was. But let's go

9 there. When was it that you told the staff, and

10 what did you tell the staff with regard to

11 typing?

12 MR. MELENEY: It has been so many

13 times. I mean, typing of a paper is known by

14 all of us within the profession that you cannot

15 do. From the moment Dr. Monk came on board in

16 our program, she was aware at the collegiate

17 level you cannot type a paper for a student.

18 MS. POTUTO: So, you had staff who had

19 concerns about whether she knew where the line

20 was and had come to you on several occasions, so

21 much so that you told her she couldn't have the

22 computer terminal on her lap.

23 Was anything else done to try to

24 oversee what she was doing or not doing, or was

25 that the end of it?

1 on the difference between typing a paper and
2 drafting -- helping a student draft an outline,
3 developing a study guide, because we will get in
4 this later.
5 When we talked about when I referenced
6 Dr. Monk, when my staff came to me on concerns,
7 Brenda and I had direct conversations about
8 these issues every time that it was approached,
9 and she assured me that she understood the rule
10 and understood what she could and couldn't do.
11 MS. POTUTO: Let's try this, though.
12 If you tell her you may not type a paper and she
13 has typed part of the paper, she could answer
14 you, could say not, I did not type the paper.
15 Did the conversation go any beyond
16 typing a paper?
17 MR. MELENEY: Yes, ma'am. They did.

18 She gave me direct evidence of the things that

19 she was working on, and I felt comfortable with

20 those issues. An outline, a diagram to help a

21 visual learner, those were the examples that she

22 shared with me.

23 MS. POTUTO: I thought somebody said

24 there was a directive that a tutor counselor

25 should not be at a computer terminal with the

1 student.

2 MR. MELENEY: We got to a point where

3 staff, throughout that three-year period, every

4 time -- if a staff member saw Dr. Monk sitting

5 at her computer, they were uncomfortable. So,

6 when I went in to Dr. Monk and said, "Brenda, we

7 don't know what you are working on. We have

8 concerns that you can't go further than that,

9 that you understand what you can provide for the

10 student, and the keyboard needs to be in the

11 student's lap." I mean, those were the

12 conversations that she and I had during that

13 period of time.

14 MS. POTUTO: When would that have

15 been?

16 MR. MELENEY: Numerous conversations

17 from probably early '04 on.

18 MS. POTUTO: So, you had staff who had

19 concerns about whether she knew where the line

20 was and had come to you on several occasions, so

21 much so that you told her she couldn't have the

22 computer terminal on her lap.

23 Was anything else done to try to

24 oversee what she was doing or not doing, or was

25 that the end of it?

1 MR. MELENEY: No, I don't think it was
2 ever the end of it. I think it was at the
3 forefront of my thoughts throughout our working
4 relationship together. But we had a strong
5 relationship.
6 We communicated to each other. We
7 believed in each other. I believed in who she
8 was as an educator. I recognized and respected
9 her education and her experience.
10 MS. POTUTO: But, nonetheless, you had
11 staff saying we are really uncomfortable,
12 sufficiently so that no matter how much you
13 believe in her you gave her a specific directive
14 where the keyboard should be. It sounds to me
15 to be slightly inconsistent.
16 MR. MELENEY: I will speak to that.
17 In that period of time, there were not more than

18 four or five occasions where the staff came to

19 me directly, and at no time did they have any

20 evidence of any information

21 They say I walked by Brenda's office

22 and she is on a keyboard. That was the gist of

23 their evidence of any wrongdoing.

24 MS. POTUTO: Did you go to Compliance

25 and say I have staff people who are concerned,

1 what might we do, what controls might we put in
2 place? What kind of oversight should we be
3 doing to either determine that she is acting
4 appropriately or find out that she is not?
5 MR. MELENEY: I did not. What I did,
6 I believed in her and the process. There were
7 four occasions in four years, so it wasn't like
8 this was happening on a weekly basis or anything
9 like that. It was happening once every eight
10 months. But I did not.
11 CHAIRMAN THOMAS: Judge Lechner, and
12 then Judge Park.
13 MR. PARK: Mr. Meleney, I am looking
14 at Exhibit 1-6. I just sort of have a
15 background question to begin with.
16 Have you got that?
17 MR. MELENEY: Yes, sir.

18 MR. PARK: Up in the right-hand corner

19 it says "Director's Office."

20 Was that your office?

21 MR. MELENEY: Yes, sir, it is.

22 MR. PARK: And when you got these

23 reports that Dr. Monk was on a computer with a

24 student in the office and you went to talk to

25 her, did she give you an explanation for what

1 she was doing?

2 MR. MELENEY: Yes, sir, she did.

3 MR. PARK: And you were satisfied with

4 that explanation based upon your experience with

5 her?

6 MR. MELENEY: Yes, sir, I was.

7 MR. PARK: And her explanation

8 included her preparing an outline?

9 MR. MELENEY: Yes, sir, at the time it

10 did.

11 MR. PARK: Thank you.

12 CHAIRMAN THOMAS: Judge Lechner.

13 MR. LECHNER: Dr. Monk, in addition to

14 typing an outline from time-to-time, did you

15 ever, when a student was having a problem

16 putting thoughts on a paper, give that student

17 an example of how a good paragraph might look on

18 paper?

19 MS. MONK: If it were an English

20 class, the English class had some wonderful

21 textbooks and resources that you could pull out

22 and provide them with what a good paragraph

23 looked like.

24 We would go online and look at some

25 paragraphs and what they should look like. So,

1 the answer to that would be yes, I would use
2 resources to provide that student with examples
3 of what a good paragraph would look like.
4 MR. LECHNER: Did you ever provide,
5 personally, an example of what one would look
6 like?
7 MS. MONK: I have no -- I do not
8 recall ever doing that. I do not recall ever
9 doing that. Could I just -- I know this may not
10 be the time, but I do want to say that Mr.
11 Meleney would have walked by my office many
12 times and seen me doing exactly the same thing
13 with a pen and pencil as well as with the
14 computer.
15 The technology just made it easier.
16 But many of the outlines and the things that I
17 did for the students, for them to see it in my

18 own handwriting and scribbling, because I did

19 them with a pen and a pencil as opposed to doing

20 them with a keyboard.

21 MR. LECHNER: Now, did you ever type a

22 portion of a paper for -- I am talking about a

23 draft, a portion of a draft before you got to

24 the final?

25 MS. MONK: Sometimes they would hand

1 me a draft where their handwriting was so poor
2 and their English was so poor, that for me to be
3 able to talk with the student I had to get it in
4 a format that I could read and that I would be
5 able to talk to them about it.
6 So, there were times that I would take
7 their handwritten drafts and put them into the
8 computer so that the two of us could look at
9 them on the screen and try to determine where
10 the mistakes were.
11 I would write the spelling exactly the
12 wy they had the spelling. The order of the
13 words would go exactly where it was. I just had
14 to put it in a better format, and that is where
15 I used technology to do it.
16 MR. LECHNER: Okay. Now, that format
17 that you used to put it on the screen, the

18 computer, all that did was take it from the

19 paper and put it on the screen in exactly the

20 same way the student handwrote it; is that

21 correct?

22 MS. MONK: Correct.

23 MR. LECHNER: Once it was up there,

24 did you and the student work on improving it?

25 MS. MONK: The student and I worked on

1 improving it. We used -- again, I talk about
2 Kurzweil. Kurzweil reader is a wonderful
3 program that reads a sentence and then as
4 Kurzweil would read the sentence we would stop
5 it and I would say, "Okay, you just heard that
6 sentence read. How could that be said? Did you
7 say it the way you wanted to say it?"
8 They would say, "No, that didn't sound
9 right. That word is not the word I would have
10 used." So when they heard it, they would be
11 able to diagnose their own problems, and then
12 they would correct their problems.
13 MR. LECHNER: Again, using your
14 example of somebody with a second-grade reading
15 level, I am having a little difficult time to
16 understand how a second grader would have that
17 sophistication to take that, as you suggest, and

1 the very gifted range and with just a little bit
2 of guidance they could then take that second-
3 grade writing level or that second-grade reading
4 level, and with my guidance be able to
5 understand what they needed to change.
6 MR. LECHNER: My question was beyond
7 asking how you could make it better. What else
8 did you do to help this person with a second-
9 grade reading or writing level to put a product
10 in a collegiate level finished product?
11 MS. MONK: In the years that--
12 really, the last three years, it was the
13 Kurzweil because Kurzweil would allow like a
14 vocabulary word, they could look at a very
15 simple word that they had used and then they
16 would have a Thesaurus at their basis, they
17 would be able to look up different words on

18 their Thesaurus, and they would be able to get

19 the meanings of those words, and then decide

20 which of those words might fit into theirs.

21 The vocabulary, a lot of times was

22 greater than the second-grade reading level.

23 So, there was the use of that technology piece

24 that really allowed me to be able to do what I

25 did.

18 their Thesaurus, and they would be able to get

19 the meanings of those words, and then decide

20 which of those words might fit into theirs.

21 The vocabulary, a lot of times was

22 greater than the second-grade reading level.

23 So, there was the use of that technology piece

24 that really allowed me to be able to do what I

25 did.

1 MR. LECHNER: Aside from changing a
2 word or aside from moving a word from one
3 portion of the sentence to another place in the
4 paragraph, what did you do to help them develop
5 a critique of a book Professor Potuto was
6 talking about, or what did you do to help them
7 understand what the subject matter of the essay
8 should or shouldn't be?
9 MS. MONK: First of all, these were
10 very intellectual men and women that I work
11 with. Their vocabulary was far greater than
12 their reading level. Just basically using the
13 technology that was available, there are
14 summaries that you can get that makes it a
15 condensed version of a book.
16 Just really go through dissecting what
17 it is that they needed to do. They understand

18 it intellectually. I think that is the
19 difference between a student with a learning
20 disability is not a student with mental
21 retardation.
22 They are a student who are average or
23 above. Many of the students, I can remember one
24 specifically with an I.Q. of 145 and a reading
25 level of second grade. It doesn't take a lot

1 for them with the right guidance to be able to
2 understand what they need to do as long as you
3 have the patience and the time to sit with them
4 and guide them and dissect it word for word for
5 word, so they have a clear understanding of what
6 they need to do.
7 MR. LECHNER: One more question to
8 follow up Professor Potuto. If you did this
9 time after time, after reading Tale of Two
10 Cities, and the cities were still identified
11 incorrectly, would you throw up your hands?
12 MS. MONK: I never threw my hands up,
13 but I also had to honor the student's ability to
14 walk away, and they could walk away at any time
15 and take what they had and turn it in. It may
16 be for a failing grade, but they would turn it
17 in.

18 MR. LECHNER: Did you ever in your

19 position include any of your own thought

20 processes in any stage of the product that the

21 student was working on, for any student?

22 MS. MONK: Not to my knowledge.

23 CHAIRMAN THOMAS: Professor Potuto.

24 MS. POTUTO: I have just one question

25 over here for Mr. Battle, I think it is for you,

with regard to NCAA rules. If you had a student who was not learning disabled but with bad penmanship, would a tutor be able to type out the bad penmanship that the tutor could then work with that student on the project?

MR. ABELE: I would say no.

MS. POTUTO: Why?

MR. ABELE: That would be an extra benefit. We would be providing a service to that person. I just think that our answer to them they would not be able to.

MS. JENNINGS: I am curious about a background question. You have computer labs in the Academic Center. Do most of the student-athletes use them? One of my questions, I didn't understand, and it is just a general one.

I don't understand why the students

18 aren't going in and using the computers to type

19 their handwritten papers in whatever, incorrect,

20 improper, and why they are not using things like

21 Spell Check and Grammar Check to assist them

22 during this process. What am I missing?

23 MR. MELENEY: All of those efforts

24 were being made. We have a 32-station computer

25 lab. We have eight tutorial rooms that had a

1 computer in them. So, those computers were
2 being used consistently every day on the hour.
3 We ran nearly 500 sessions a week in
4 tutorial, so from 7:00 a.m. to 9:00 p.m. our
5 facility was full.
6 MS. JENNINGS: Did it serve the
7 learning disabled or were they redirected over
8 to a different office for assistance?
9 MR. MELENEY: For direct accommodation
10 to the classroom, they were to be sent to SDRC,
11 but services in-house were conducted for
12 learning disabled and for the non-disabled
13 student-athlete.
14 MS. JENNINGS: Is there a reason, Dr.
15 Monk, why the students you are talking about--
16 there is no reference anywhere in any of the
17 materials that any of your students ever used

18 that approach.

19 MS. MONK: When I was working with the

20 student, they were assigned to me for a period

21 of time, it was usually an hour. Sometimes it

22 was a two-hour session. So, the process would

23 be something that we would be working on during

24 their two-hour session with me.

25 It was an individualized session.

1 They used the computer lab, they used -- they
2 had lots of other tutors other than me. But if
3 they had a writing disability, a reading
4 disability, or a language disability, they were
5 going to be assigned to me for a period of time,
6 and it was my responsibility to work with them
7 during that period of time.
8 So, in saying that that would be part
9 of my work session with them. If I sent them
10 out to do it on their own, then we would have
11 lost the time that we needed in order to conduct
12 the tutoring session or the training session
13 that we were going through at the time.
14 MS. JENNINGS: But if I understand,
15 sometimes there are some examples where I think
16 you gave them where a student would come in with
17 a draft of a paper written, and you would put it

18 into the computer because it was easier for you

19 to read and easier for you to discuss with them.

20 It wasn't to type it up for them, it was to make

21 it easier for you to work with them.

22 Did you ever tell the students, you

23 know, when you are coming in tomorrow, when you

24 come back tomorrow, could you go in and type

25 this up in the meantime, and then come back and

1 we will talk about it from there?

2 MS. MONK: Yes. That did occur on a

3 day-to-day basis that they were given that

4 information. In fact, toward the end, they got

5 very good at doing that. The students that I

6 had worked with over a period of, say, three or

7 four years, they got very good with that.

8 They would bring it already in to us

9 on their USB. We could throw it on the computer

10 screen and use the time we had in our hour

11 tutoring session to really get down to the nuts

12 and bolts of what it was they were trying to

13 accomplish.

14 CHAIRMAN THOMAS: Any other questions

15 by the Committee?

16 MR. LECHNER: Just one follow-up.

17 When you were helping the students in taking the

18 jumble they had written and put it on the

19 screen, and then you would ask if it sounded

20 right or how they would want to change it, when

21 you got the product where the student wanted it,

22 did you download it to his USB or Thumb drives

23 so he could use it in the future?

24 MS. MONK: Yes.

25 MS. POTUTO: I want to get back to Ms.

1 Thompson, to where I really started on this,
2 which was the word edit in (a). I would like to
3 know from you or Mr. Didion, what do you contend
4 that she did, not what editing is or isn't, but
5 what do you contend she did and on whose
6 information you rely to make that determination?
7 And did you interview any of the student-
8 athletes yourself with regard to this
9 information?
10 MR. DIDION: I will answer the first
11 part of your question. That's why the paragraph
12 appears as it does. When we reviewed it and
13 talked about the information that we had at
14 hand, and it was information provided by the
15 institution and then information we developed
16 during our interviews, it was primarily me.
17 I looked at this and believed that

18 what she had done was provided a service and had

19 not provided any content to the individuals.

20 Because of that I believed that it was --

21 MS. POTUTO: You are giving me your

22 conclusion. I want to know what it is that you

23 contend that she did that constituted editing,

24 and from whose information in the record that we

25 have that you drew that conclusion.

1 MR. DIDION: What I believed editing
2 was, was taking information from the student-
3 athletes, using the information from the
4 student-athletes to assist in putting together a
5 coherent paper, not interjecting any of her own
6 thoughts or own ideas, but using the information
7 that the student-athletes had developed on their
8 own.
9 And my source of information was
10 information from interviews that were done by
11 the institution and by Ms. Thompson.
12 MS. POTUTO: Can you tell me which
13 interviews, which student-athletes?
14 MS. THOMPSON: Let me provide a little
15 bit of background with this. When the
16 institution initially reported that there were
17 five student-athletes that reported they had

18 received typing or editing assistance, I

19 questioned exactly in the initial interviews

20 with the auditors, I questioned exactly what

21 happened, what was actually done?

22 The institution and I agreed that we

23 needed to re-interview some of those student-

24 athletes. In order to answer your question, Ms.

25 Potuto, the one interview that I did, I was

1 there present as far as the student-athletes
2 were concerned. That was Chuck
3 Smrt and I conducted that interview.
4 was interviewed
5 twice by the institution, as well as
6 So, as far as my presence in the
7 interview, it was only with Then
8 the information that I am relying on is
9 information that was reported by Dr. Monk, as
10 well as as well as and
11 although --
12 MS. POTUTO: Let me try this. What
13 information did they give you that led you to
14 decide that it constituted anything but editing
15 as an extra benefit, and not editing an academic
16 conduct?
17 All I have is conclusions here, and

18 this person said something that you are relying

19 on and somebody else might have said something.

20 But I have no idea what it is you are saying

21 that they said.

22 MS. THOMPSON: As it relates to

23 said

24 specifically that Dr. Monk typed my papers "so

25 that my papers would make better sense." That

1 is the information that I relied on as far as
2 the typing and as far as the editing is
3 concerned.
4 MS. POTUTO: And that was in an
5 interview that the University did?
6 MS. THOMPSON: Yes.
7 MS. POTUTO: And I assume you never
8 went back to try to find out from him what he
9 meant by "so it would make better sense"?
10 MS. THOMPSON: No, I did not. I just
11 read the interview notes from what the
12 institution provided me.
13 MR. PARK: Let me ask a question.
14 MS. POTUTO: Sure.
15 MR. PARK: And then I will pass it
16 back. Interview notes, I take it there was no
17 recording or transcription of that?

18 MS. THOMPSON: The institution -- it

19 is my understanding that those interviews were,

20 in fact, recorded with

21 because I did receive

22 actual tape recording from the interview, which

23 I did listen to.

24 MR. PARK: We are talking about

25 and you said that you read a memorandum of

1 an interview.

2 MS. THOMPSON: I am sorry.

3 MR. PARK: I am wondering whether the

4 interview was recorded and transcribed.

5 MS. THOMPSON: It is my understanding

6 the first interview that the institution did

7 with [illegible] was, in fact, recorded. The

8 second interview that I did as well as with -- I

9 did with [illegible] was actually recorded and I

10 did an interview summary of that particular

11 interview with [illegible]

12 MR. PARK: There is no transcript in

13 our record for us to look at, is there?

14 MS. THOMPSON: There is no transcript,

15 but there is the interview summary.

16 MR. PARK: Mr. Price will tell you

17 this is a bone I have picked for a long time.

18 So, what you are saying is we should believe you

19 as to what was said in there, because we don't

20 have the original of a transcription to know

21 exactly what the man said?

22 MS. THOMPSON: Yes, that is correct.

23 CHAIRMAN THOMAS: Does the institution

24 have any documentation on that?

25 MS. KARPINSKI: We do not have the

1 transcription of the tapes here. We certainly
2 have all of the interviews taped and could
3 provide transcriptions of those tapes to you.
4 But we do not have a transcription with us. We
5 do have summaries.
6 MS. POTUTO: Let me go back to where I
7 was on this, then. ' said to the
8 institution that Dr. Monk typed some papers for
9 him so they would make better sense. You then
10 participated in a second interview with him, is
11 that right, or not?
12 MS. THOMPSON: Not with ,
13 but with
14 MS. POTUTO: Okay. So, with
15 all we have is to say "to make
16 better sense", but you never went back to try to
17 find out what that meant, what her assistance

18 was?

19 MS. THOMPSON: That is correct.

20 MS. POTUTO: Okay. Then we get to

21 where we don't have transcripts, and what

22 do you say that said in the first

23 interview?

24 MS. THOMPSON: I was not present at

25 the first interview, but from the interview

1 notes said that Dr. Monk typed two papers

2 for him.

3 MS. POTUTO: So for there is

4 nothing about editing assistance, it is purely

5 the typing?

6 MS. THOMPSON: Yes.

7 MS. POTUTO: Now, there is a third

8 student-athlete, whose name I have now

9 forgotten, What did say?

10 MS. THOMPSON: said that Dr.

11 Monk typed papers for him because he was a slow

12 typist, and said that

13 during the 2006-2007 academic year, Dr.

14 Monk provided papers. So, as it relates to

15 , it was typing papers as well.

16 MS. POTUTO: All right. So for the

17 three students who are editing, what we have is

18 two who were for typing only and a third who

19 said she typed papers so they would make better

20 sense, but we have no more information as to

21 what that student meant by that phrase?

22 MS. THOMPSON: No, no.

23 MS. POTUTO: All right. And I assume

24 the University has no other interviews with

25 other students with whom Dr. Monk worked, who

1 talked about the kind of assistance that she
2 provided, or am I wrong? Do you have other
3 interviews where they talked about the kind of
4 assistance that was provided?
5 MS. KARPINSKI: We do. I went back
6 and interviewed several athletes two weeks ago
7 to try to get to the bottom of exactly what she
8 provided to them. On example provided by a
9 student was he was told by Dr. Monk to make an
10 attempt to write half the paper on his own.
11 MS. THOMPSON: Who is that student?
12 Identify him.
13 MS. KARPINSKI: So,
14 was told if the paper was to be a six-page
15 paper on a certain subject, he had to arrive in
16 her office having attempted at least half of the
17 paper. So, he said he would make sure he walked

18 in there with three pages written.

19 Then he would hand that to Dr. Monk,

20 either in handwritten form or through his USB

21 drive, and they would sit there together and

22 that three-page paper when he left would be a

23 six-page paper. That is one example.

24 MS. POTUTO: But that doesn't really

25 identify whether I am getting three pages to six

1 pages. It was appropriate tutorial assistance
2 or it crossed the line.
3 Do you have any information from that
4 student-athlete as to how that paper grew from
5 three to six pages?
6 MS. KARPINSKI: He indicated -- what
7 he said to me is we wrote it together. I think
8 I left there believing that it was, I guess,
9 back and forth. Well, he just said they wrote
10 it together and not really able to articulate
11 any more specifically how the paper grew.
12 MS. POTUTO: All right. You said you
13 interviewed several others. Did any of them
14 give you any more concrete particulars with
15 regard to the kind of assistance independent of
16 typing? He said he also got typing assistance
17 from her when you went back two weeks ago, or

18 no, ?

19 MS. KARPINSKI: Well, when he left her

20 office, he had a six-page paper ready to be

21 turned in.

22 MS. POTUTO: She did not type for him?

23 MS. KARPINSKI: She did not type for

24 him.

25 MS. POTUTO: Okay.

1 MS. KARPINSKI: is

2 another student that I re-interviewed.

3 said he went in there and he had his paper--

4 this time he indicated he always had his paper

5 typed.

6 He did not bring his USB drive, but he

7 always brought it typed. And she would make

8 marks on his paper and corrections and

9 recommendations or thoughts of how he could

10 improve his paper.

11 I think his exact words were she would

12 fix things, and he would then make those

13 corrections and turn his paper in.

14 CHAIRMAN THOMAS: That is

15 ?

16 MS. KARPINSKI: Correct.

17 CHAIRMAN THOMAS: Anything further?

18 MS. KARPINSKI: was

19 another student I interviewed, and his was -- he

20 indicated that he lost his USB drive, so I

21 believe his was mostly written, that he walked

22 in there with, and --

23 MS. POTUTO: Handwritten, do you mean?

24 MS. KARPINSKI: Handwritten, because

25 he could not transfer it back and forth because

18 MS. KARPINSKI: was

19 another student I interviewed, and his was -- he

20 indicated that he lost his USB drive, so I

21 believe his was mostly written, that he walked

22 in there with, and --

23 MS. POTUTO: Handwritten, do you mean?

24 MS. KARPINSKI: Handwritten, because

25 he could not transfer it back and forth because

1 he didn't have a USB drive. So, my impression
2 from that was when he left he had a finished
3 paper to be turned in.
4 MS. POTUTO: But again you don't have
5 any particulars besides the fact -- were these
6 interviews taped?
7 MS. KARPINSKI: Yes, they were.
8 MS. POTUTO: Okay. But you don't have
9 any particulars as to what it was, the
10 assistance was? You said you had an impression
11 that it was done when he left. No particulars
12 as to what the assistance was or wasn't?
13 MS. KARPINSKI: Yes, the kind of
14 comments that the student-athletes made to me
15 was --
16 MS. POTUTO: or somebody else?
17 MS. KARPINSKI: I would say all four

18 that I interviewed were very similar in that she

19 would take their --

20 MS. POTUTO: Well, are those re-

21 interviews that you are talking about, ,

22 , , and so forth, I guess? Is that

23 what you are talking about? I want to know

24 where it is coming from and when.

25 MS. KARPINSKI: Right. These student-

1 athletes were originally interviewed by the
2 auditors before I arrived on campus. So, I took
3 those auditors' interviews and then went back to
4 the student-athletes and said, "Okay. I need t
5 understand exactly what you meant. Tell me
6 about what Dr. Monk provided to you."
7 MS. POTUTO: All right. This was two
8 weeks ago, you said?
9 MS. KARPINSKI: Correct.
10 MS. POTUTO: You said there were four,
11 and I have three names so far:
12 and . Who is the fourth?
13 MS. KARPINSKI: I apologize. It was
14 three two weeks ago. The other student that
15 makes up the fourth is
16 was re-interviewed last
17 fall related to his receiving typing services.

1 MS. POTUTO: Then Mr. Hargrove, does
2 Mr. Hargrove have a copy of these three
3 interviews that you just talked about that you
4 did two weeks ago?
5 MS. KARPINSKI: All of our interviews
6 were made available at Florida State. We had a
7 custodial site for those. Those last three are
8 not there yet, no.
9 MS. POTUTO: So, he hasn't heard them
10 or seen them? All right. I just want to clear
11 up one little matter, and it happens a while
12 ago, and it was Mr. Hargrove with regard to, was
13 it, that you were talking about
14 where he said that the characterization of the
15 first interview didn't jive with what the
16 student-athlete said on the tape of the first
17 interview?

18 MR. HARGROVE:

19 MS. POTUTO: They both had been

20 consistent. I don't want to leave this hanging.

21 Does anybody have what the student-athlete

22 actually said?

23 MS. KARPINSKI: The tape again was

24 available at the custodial site. I just have

25 quotations that I took from the tape in my

1 notes. He said that Dr. Monk would help him
2 with his papers.
3 "He couldn't type very fast so she
4 would help with typing or anything else that he
5 needed help with. She never actually wrote his
6 paper for him she typed his thoughts. She wrote
7 it up." That was in his first interview by the
8 auditors on May 30, '07.
9 MR. SMRT: was interviewed three
10 times. During the first one, in May, '07, he
11 reported what Stacey said, that she helped him
12 with papers by typing because he was slow at it.
13 It was always his thoughts, but she typed them.
14 Then Minnix goes back to him in the
15 fall and he generally, as we understand it,
16 denied what he reported earlier on. It is the
17 third interview that happened recently with

18 Joyce and I when he started down the path of
19 saying no, that he didn't receive any
20 assistance.
21 Joyce confronts him, I guess, and says
22 you said this earlier in the first interview
23 with the auditor. Then it is my recollection he
24 said, "Well, I will go with whatever I said the
25 first time."

1 We said, "We don't want you to go with
2 that. We want your recollection at this point."
3 He said, "I will go with what I said the first
4 time," which was during the auditor's interview.
5 MS. POTUTO: Mr. Hargrove, do you
6 disagree with what was just reported as to
7 interviews one, two, three, and what was said?
8 MR. HARGROVE: The only information
9 that I had, and I went over this twice to
10 specifically look for specific people.
11 I went a month or so ago, and I sent a
12 representative from my office again ten days
13 ago, two weeks ago, specifically looking for
14
15 The reason was because I had two
16 documents as it relates to . The
17 first , and it is attached in my

18 supplemental response that you folks have. I

19 thought it was odd that he refused to be taped,

20 but somehow there was a tape or there was a

21 recording.

22 So I went back. I sent a

23 representative from my office again to make sure

24 that I didn't miss it. What you have from

25 that I have, you have what I have

1 attached as Exhibit 2 to my Supplemental
2 Response, and I also have what Ms. Thompson
3 provided to me, the reinstatement letter that
4 was submitted on behalf. That's
5 what I have.
6 MS. POTUTO: But I thought you said it
7 was where you had the disagreement as
8 to whether what was reported was accurate. You
9 just heard them describe the first interview,
10 the second interview and the third interview.
11 That is what I wanted to get back to,
12 to find out if you have a different -- if your
13 memory or information as to the three interviews
14 is different from what we just heard.
15 MR. HARGROVE: Substantively, no. My
16 recollection is that it was Mr. Smrt that asked
17 the question, it was not Ms. Thompson. I could

18 be mistaken on that. My recollection is that it

19 is Mr. Smrt that asked the question, and the

20 question was indicated to that what he

21 was saying was inconsistent.

22 As I was listening to the two

23 interviews, I didn't see the inconsistency based

24 on what I knew Dr. Monk had said. The

25 assertion, the question contained within it, a

1 version that what he was saying now was
2 inconsistent with what he had said before, I
3 wasn't hearing it that way. So, I have heard
4 those two interviews, yes.
5 MS. POTUTO: Now I am really confused.
6 I thought I heard Ms. Karpinski say in the first
7 interview he said she typed the paper, and the
8 second interview he told Mr. Minnix no, and in
9 the third interview somebody said to him, "But
10 you said in an earlier interview that she typed
11 a paper."
12 He said, "If that is what I said, then
13 I stand on it." So, you will have to help me.
14 I don't know where --
15 MR. HARGROVE: I am sorry. I cut you
16 off. I heard your question. This is one of the
17 cases where what I described in my opening

18 statement was troublesome. I would like to have

19 asked the question exactly what do you mean when

20 you say typed the paper? Because I knew the

21 answer to that question.

22 I know what that answer is. It is as

23 what Dr. Monk described. So, I wanted to ask

24 that question. I still want to ask that

25 question exactly what do you mean specifically?

1 And the answer to that question, I am very
2 confident, would lead to additional questions.
3 I want to know. I wanted to know the answer to
4 that question before I came here today.
5 MS. POTUTO: Did you try to interview
6 ?
7 MR. HARGROVE: Not yet.
8 MS. POTUTO: Well, you wanted to get
9 the answer to the question. You wanted to have
10 it before you came here today, and you have not
11 tried to interview the people who could answer
12 the question. Now, I am really perplexed.
13 MR. HARGROVE: I don't have a method
14 to compel him to talk to me. What I have tried
15 to do is to get --
16 MR. LECHNER: Excuse me. Did you
17 simply ask him?

18 MR. HARGROVE: I suppose I could track

19 him down and ask him.

20 MR. LECHNER: No, I asked did you

21 simply ask whether he would talk to you?

22 MR. HARGROVE: No.

23 CHAIRMAN THOMAS: Any other questions?

24 We have had some exhaustive conversations about

25 1-(a). Are there any other comments on 1-(a)?

1 Can we close out on 1-(a) and take a lunch break
2 and come back and continue?
3 Any other questions on 1-(a)? If
4 there are no questions, we will recess for lunch
5 and come back at 1:00 o'clock. Thank you.
6 (NOON RECESS.)
7 CHAIRMAN THOMAS: We will begin with
8 the proceedings here. Professor Potuto will
9 have one question before we move to 1-(b), and
10 that is after Professor Potuto we will move on.
11 MS. POTUTO: This is really quick, and
12 it is just one. I guess it would be to
13 Professor Monk or Ms. Thompson. On Page 1-6 of
14 the Case Summary, there is a statement under 1,
15 about eight lines down before that first bullet,
16 "Monk reported that she provided these typing
17 and editing accommodations."

18 I just looked at the part of the

19 November 7th interview that you have here in the

20 Case Summary. I just wondered whether editing

21 was her word or your word.

22 MS. THOMPSON: I believe, if I recall

23 the interview on November 7, 2007, editing

24 probably was my word to be honest.

25 MS. POTUTO: Thank you.

1 CHAIRMAN THOMAS: Okay. Let's move to
2 1-(b). The staff.
3 CHAIRMAN THOMAS: As it relates to
4 Subparagraph (b), Dr. Monk violated the
5 provisions of unethical conduct when she
6 provided correct answers for a Sports Psychology
7 quiz to
8 and requested to enter those
9 answers onto an online quiz form on behalf of
10
11
12 Regarding Subparagraph (b), the
13 institution and the enforcement staff are in
14 substantial agreement as it relates to the
15 facts. Dr. Monk believes she did not commit a
16 fraudulent act, but she believes that she made a
17 mistake.

18 Therefore, there is one issue for this

19 Committee to consider as it relates to

20 Subparagraph (b). Did Dr. Monk's actions rise

21 to a level of unethical conduct as it relates to

22 academic fraud as set forth in Subparagraph (b)?

23 Regarding this issue, the enforcement

24 staff believes that Monk committed academic

25 fraud and that her actions rose to the level of

1 unethical conduct when she learns that

2 had not completed the quiz by the deadline, and

3 she arranged for to receive unearned

4 academic credit by asking to enter

5 answers on behalf of Thornton instead of

6 communicating to that he had not

7 completed the quiz, or allowing to

8 communicate with his professor about making up

9 the quiz.

10 This concludes the staff's

11 presentation of Subparagraph (b), and the

12 Committee should find Subparagraph (b) as

13 reported.

14 CHAIRMAN THOMAS: Thank you.

15 The institution,

16 MR. SMRT: I thought the issue was the

17 source of the answers and Dr. Monk obviously can

18 give us her position on this. As I read the

19 response from Dr. Monk, that she is saying that

20 had the answers and she gave

21 answers to

22 Maybe I misread that. I thought it

23 was an issue between the reliability of

24 information reported by versus Dr.

25 Monk. said he did not develop any

1 answers for that, and that he knew nothing about
2 this until after the fact.
3 We thought seemed credible
4 because it was unrealistic for an athlete to say
5 he didn't provide answers if he, in fact, did
6 provide them. So, based upon that we thought
7 that the allegation should be found as alleged.
8 CHAIRMAN THOMAS: Okay. Thank you.
9 Dr. Monk or Dr. Hargrove, which one
10 wants to speak?
11 MR. HARGROVE: It will be Dr. Monk. I
12 have outlined the response in my response and I
13 don't have anything to add. She can add to it,
14 I am sure. So, feel free to do so.
15 CHAIRMAN THOMAS: Dr. Monk.
16 MS. MONK: The facts are there. I
17 have stated those facts in every interview, and

18 they have not wavered. The facts are there. I

19 did make a mistake. I did not commit fraud. It

20 was a mistake that I wish I could have taken

21 back, but it was a mistake that I made.

22 CHAIRMAN THOMAS: Thank you. Any

23 questions?

24 MS. POTUTO: Yes. Mine is of the

25 staff, actually. I take it in alleging the

1 facts in (b), you believe that the student-
2 athletes and not Professor Monk's description of
3 what occurred?
4 MS. THOMPSON: That's correct.
5 MS. POTUTO: Why wasn't she charged
6 with 10.1-(d)?
7 MR. DIDION: Ms. Potuto, honestly, if
8 I had to give you an answer to that, my answer
9 would be that it didn't occur to me that she
10 should be.
11 MS. POTUTO: Now that it has occurred
12 to you, should it have been charged?
13 MR. DIDION: Yes, I do believe so.
14 MS. POTUTO: Any other questions?
15 MR. PARK: I have one. Dr. Monk, I
16 have looked at Exhibit 1-9 to the institution's
17 response, which is what I understand to be a

18 test sheet that was submitted, or that was used

19 in making the online submission in

20 name.

21 Have you got that?

22 MS. MONK: Yes, sir.

23 MR. PARK: All right. My question is

24 at the time that you told to send that

25 in, were the answers filled in by

1 or did somebody else fill those in?

2 MS. MONK: I believe those answers to

3 be . The question, as they are

4 now, were left on my desk, and I believed it was

5 a routine practice for students when they took

6 an online test to prove to me that they had

7 completed the exam, they would leave the

8 questions on my desk.

9 That would be my verification, because

10 in the online exam, this is another one of those

11 online classes where students can print off

12 their questions before they take the test, look

13 the answers up, and then go in and fill those

14 answers in on the quiz, which I believe that is

15 what had done.

16 He had been working in the office that

17 afternoon, and that was one of the tasks that he

18 was to do. So, when I looked at his answers,

19 just knowing him as a person, I thought I better

20 check his Blackboard.

21 So, I checked his Blackboard,

22 believing those to be his answers, noticed that

23 they had not been submitted. My initial thought

24 was, you know, darn, he forgot to hit submit,

25 and that was at the point of the process

1 continued as I have reported it in all of my
2 interviews. I can go through it again but, you
3 know, you have had a chance to read it.
4 MS. POTUTO: Can you tell me why you
5 didn't enter the answers yourself?
6 MS. MONK: It never occurred to me.
7 That question has been asked several times why I
8 didn't just go into my office, close my door and
9 enter those answers. I did not. I
10 was the one working at the computer.
11 He and I were working together, and he
12 was sitting there, and I said let's pull up
13 Blackboard and check on it, and we just pulled
14 it up and I just said, "Do you want to do it for
15 him?"
16 I have no idea. I made a mistake that
17 day in making that statement. I have never

18 skirted the issues that it was a mistake. I

19 said from the very beginning that it was, but it

20 was a moment in time and I made a poor judgment

21 call and a mistake.

22 MS. POTUTO: And if I could ask

23 somebody at the institution, if I understand the

24 materials, I don't know whether it would be the

25 provost or somebody on the academic side to

1 determine that there was no academic misconduct

2 by or .

3 didn't know -- I understand

4 , he didn't know that he was doing

5 anything that would have constituted assistance

6 on a test. , he had

7 by the time you found out that the

8 grade was recorded.

9 What was his situation?

10 MS. KARPINSKI: Yes, he had

11

12 when he was

13 notified of the exam.

14 MS. POTUTO: When he was notified -- I

15 thought I saw somewhere in here that he

16

17

18

19

20 MS. KARPINSKI: He had already

21

22 MS. POTUTO: All right.

23 MS. KARPINSKI: So, the season was

24 over at the time this occurred.

25 MS. POTUTO: So, he is no longer a

1 student at the time this occurred, and for
2 purposes of the institution -- well, let me ask
3 it differently. He finds out later and he never
4 lets anybody know.
5 Is that an academic offense at Florida
6 State? If not, what is the thinking?
7 MR. ABELE: All of the material was
8 gathered together and taken before the Honor
9 Code Committee. The Honor Code Committee
10 considered all of the information. As I recall,
11 although I am not 100-percent sure, they
12 interviewed and came to the
13 conclusion that he felt he was operating at the
14 direction of a supervisor and reported it. And
15 there was no honor code violation on either
16 student's part.
17 MS. POTUTO: I understand

18 What was the theory on ?

19 MR. ABELE: had dropped out

20 of school and knew nothing about it and,

21 therefore, couldn't be held accountable for

22 something he knew nothing about.

23 CHAIRMAN THOMAS: If there are no

24 other questions, we will move to 1-(c).

25 The staff.

1 MS. THOMPSON: As it relates to
2 Subparagraph (c), Monk violated the provisions
3 of unethical conduct between the fall of 2006
4 and the spring of 2007, when she, one, allowed
5 athletes
6 to
7 utilize the study guide which contained answers
8 to the exact exam questions utilized in the MUH-
9 2051 online exam while they took their online
10 exams.
11 Two, verbally provided student-
12 athlete with answers to his MUH-
13 2051 exam, even though students taking this
14 course were not to receive any unauthorized help
15 or utilize any supplemental study guides or
16 course text for their exams.
17 Concerning Subparagraph (c), the

18 enforcement staff and the institution agreed to

19 the facts of this subparagraph. However, the

20 enforcement staff and the institution cannot

21 verify that every student-athlete that used the

22 study guide received it directly from Dr. Monk.

23 Monk does not agree that she provided

24 answers to a student-athlete or that she

25 permitted the student-athletes to utilize the

1 study guide for their exams.

2 Therefore, there is one issue for this

3 Committee to consider regarding this allegation,

4 which is whether Monk committed academic fraud

5 when she verbally provided exam answers to a

6 student-athlete while he was taking his MUH-2051

7 exam, and she allowed the student-athlete to

8 utilize the study guide which contained

9 questions and answers to the same exam as

10 utilized in the MUH-2051 course.

11 The enforcement staff believes that

12 Dr. Monk committed academic fraud and relies on

13 four points to support this position.

14 Point No. 1: Student-athlete

15 who enrolled in the class during the

16 spring of 2007, reported to the institution

17 during his December 14, 2007, interview that

18 Monk was with him every time he took his exam.

19 reported that he knew the

20 material but when he "got stuck Monk would lead

21 him to the correct answers.

22 Point No. 2: Adam Wright, the former

23 academic tutor, reported during his July 19,

24 2007, hearing with the Office of Student Rights

25 and Responsibilities, that he remembered an

1 occasion during the fall of 2007 that Monk asked
2 him for answers to an MUH-2051 exam while she
3 was sitting with the student-athlete who was
4 taking the exam, and that the answers he
5 provided to Monk were directly given to the
6 student-athlete who she was working with.
7 Point No. 3: During Monk's November 7,
8 2007, interview with the institution and the
9 enforcement staff, she reported that the MUH-
10 2051 exam were open books until the spring of
11 2007.
12 Monk acknowledged assisting student-
13 athletes with answers by looking up questions in
14 the student guide, conducting online searches to
15 exam questions, because in her opinion there
16 were no parameters or restrictions regarding the
17 level of the assistance that could be provided

18 to students in the course.

19 Finally, Point No. 4: Five student-

20 athletes reported that they received the study

21 guide which Monk created and controlled, which

22 the student-athletes subsequently utilized this

23 in their exams.

24 Again, the staff asks the Committee to

25 turn its attention to Page 1-32 and 1-33 of the

1 enforcement staff's Case Summary to read exactly
2 what the student-athletes have reported. The
3 enforcement staff believes that based on the
4 above-mentioned points, Monk committed academic
5 fraud, and Subparagraph (c) should be found as
6 reported.
7 This concludes the staff's
8 presentation of Subparagraph (c).
9 CHAIRMAN THOMAS: Thank you.
10 The institution.
11 MR. SMRT: This paragraph has
12 basically two parts. The first is the answers.
13 Did Dr. Monk give answers to athletes? The
14 second is the binder, the resource material. As
15 confusing, we will talk about it, I am sure,
16 over the next hour or two about the open and
17 closed nature of the course.

18 Whenever Professor Olsen taught the

19 course, it was closed. However, during the

20 spring and summer of '06, others taught it and

21 it was open. That caused some confusion. Now,

22 as far as the answers go, you do have

23 telling you what Joyce related.

24 You have Adam Wright saying what he

25 said, what Joyce described, about observing or

1 having Dr. Monk ask him for answers. We relay
2 that in our Case Summary. So, our position is
3 that at least on one occasion Dr. Monk gave an
4 answer to an athlete for this test.
5 Concerning the binder, it is a little
6 more difficult to prove that Dr. Monk gave the
7 binder to athletes. We don't take that
8 position. We believe there should have been
9 some due diligence on her part if she was the
10 holder or the preparer of this document, that
11 she should have taken more care and ensured that
12 the answers in this binder are not the answers
13 on a test.
14 Again, her position is that it was
15 open until the spring of '07. From the
16 information that we have been able to gather, it
17 appears that the binder was still used in the

18 spring of '07.

19 Currently, you cannot take any more

20 online tests at the AASS. Is that correct,

21 Bill?

22 MR. SHULTS: Yes, that is accurate.

23 CHAIRMAN THOMAS: Okay. Any

24 questions?

25 MS. MYERS: Did anyone -- well, maybe

1 I should have let Mr. Hargrove respond. But in
2 the supplemental response that we received, did
3 anyone look into the assertion by
4 that you could buy all of this information
5 online?
6 MR. ABELE: During the auditor's
7 investigation, there was an assertion that the
8 material was available, and one student, who was
9 not a student-athlete, produced an e-mail
10 offering copies of the exam, with the correct
11 answers for sale.
12 The student attempted to follow up
13 with that, and it went nowhere. But there
14 certainly was a belief that they were out there.
15 MS. MYERS; But you found no proof
16 that there was such an occurrence or
17 occurrences?

18 MR. ABELE: No. I can detail reasons

19 later, but we did quite an exhaustive

20 investigation on that. Thank you.

21 CHAIRMAN THOMAS: Anything else from

22 the institution?

23 Okay. Dr. Monk.

24 MR. HARGROVE: If I may, briefly.

25 CHAIRMAN THOMAS: Sure, Mr. Hargrove.

1 MR. HARGROVE: There are two pieces of
2 information that were provided to us regarding
3 . I have relayed them to you
4 before. The first is Exhibit No. 2 to my
5 Supplemental Response.
6 The second is request to
7 be reinstated, which is described in the NCAA's
8 summary. That is all that existed as of two
9 weeks ago with There was no tape
10 of . We have looked twice.
11 The rest of the responses, as it
12 relates to providing the binder, my responses
13 are articulated what is in those interviews.
14 That's what those students said in those
15 interviews.
16 As a preliminary statement, I would
17 offer that, and Dr. Monk, I will tender her to

18 you.

19 CHAIRMAN THOMAS: Dr. Monk, do you

20 have a statement?

21 MS. MONK: Yes. Just in regard to the

22 binder, I wish we had the binder here. I don't

23 know where the binder is, but the binder

24 would -- first of all, I think it was alluded to

25 by the NCAA investigation that it had 100

1 percent of all of the answers in the binder.

2 That, in fact, I know is untrue,

3 because with each exam there would be some new

4 questions that were generated that would not be

5 in the binder. So, that would be one of the

6 things.

7 The second thing is that there were

8 correct answers in the binder. There was never

9 any reason for -- there was never any purpose in

10 me providing the correct answers. The binder

11 came about as a result of -- again this was an

12 online examination all the way through, I

13 believe, in the spring of 2007, where it was an

14 open-access class where everything could be

15 printed off.

16 You could print off every exam, every

17 exam question. You could print off every study

18 guide that he had examples, and it would have

19 just been -- and students would just print their

20 test off and bring them to me and I would stick

21 them in the binder.

22 There was no way to know whether or

23 not that was correct or incorrect. Likewise, if

24 there was a set of study questions or study

25 materials, they would also print that off, send

1 it to my office, and I would just stick it in
2 the binder.
3 So, the binder being 100 percent,
4 having all the exams in it, and having 100
5 percent of all of the exam questions correct
6 would be an incorrect statement.
7 CHAIRMAN THOMAS: Thank you. Any
8 other questions regarding 1-(c)?
9 MS. JENNINGS: Dr. Monk, I have to say
10 that in reading and preparing for this today, I
11 was most struck by the statements that are
12 quoted in your interview on Pages 129 and 130 of
13 the Case Summary.
14 I am struck because back earlier on
15 when you were talking about the earlier issue of
16 assisting people with editing papers. At one
17 point somebody asked you about why would you do

18 this, and you said no, because what are they

19 going to learn if I do that?

20 I found that in dramatic contrast to

21 your statements in regard to the test questions

22 and your possible helping or other people

23 helping people during the test to give the right

24 answers.

25 And I would like to give you a chance

1 to clarify that, because it appears to me, as I
2 read this, that what you were saying is you saw
3 absolutely nothing wrong with anybody giving--
4 if it is an open-book exam, it is perfectly all
5 right for somebody to just say, hey, what is the
6 answer to Question 3, and for somebody to tell
7 him, including a tutor or you, or anybody else.
8 That is how I read the text of this
9 interview. I would like to give you a chance to
10 address that.
11 MS. MONK: Thank you. I think
12 President Wetherell said a little bit about that
13 particular class. That particular class was set
14 up as a method to allow collaborative learning,
15 collaborative working together with students.
16 The quizzes in the beginning, and to
17 my knowledge until the fall of 2006, it was not

18 until the spring of 2007 that I actually

19 realized that the class had changed. But the

20 quizzes were more of attendance quizzes with the

21 purpose being, and if you knew anything about

22 the class and you observed the students working

23 in the class, it was more of a way to determine

24 if they were indeed looking through the

25 materials and making an effort to go through all

1 of the study guides and all of the materials.

2 There was nothing in there that I saw

3 that would preclude them from using their

4 textbook, from using a tutor, from using

5 resources that they might need prior to the

6 spring of 2007.

7 It varies. The quizzes were a very

8 small part of the exam, and again they appeared

9 to be more of attendance kinds of things to just

10 make sure that the students were interacting

11 with the classroom materials.

12 The bulk of the class came from the

13 students having to go and attend concerts and

14 write papers about the concert. There was a

15 foolproof method in there that there could not

16 be any collaboration with those papers, because

17 they had to use turnitin.com to verify that the

18 papers were an individual's paper, and there was

19 no way they could be plagiarized. That was the

20 bulk of the class.

21 So, in making that statement I am

22 saying to you that groups of students in that

23 music class would get together and they would

24 take the quizzes in a collaborative way, because

25 there was nothing there that would say to them

1 collaboration is not allowed.

2 It was again -- I realize now it was

3 in the fall of 2006 rather than the spring of

4 2007. But I was only alerted to it in the

5 spring of 2007, that I recognized the fact that

6 the class had changed and that collaboration was

7 not a part of how those quizzes were to be

8 taken.

9 MS. JENNINGS: Let's assume for the

10 moment that this was a poorly-organized class.

11 It was not well-monitored by the faculty member.

12 Let's assume there are all kinds of problems

13 with it.

14 My problem is understanding you are an

15 educator, you are working with persons who are

16 learning disabled. You said that you understood

17 the purpose of the quizzes. Let's assume it is

18 a very small portion of the grade, but the

19 purpose of the quizzes was to ensure that the

20 people had gone through the material.

21 How is it consistent with going

22 through the material for people not to go

23 through, not to discuss the answers to the

24 questions with anybody, not to say let's look it

25 up in the book?

1 Because there was a time frame to
2 work, you had only a certain amount of time to
3 answer. To me, it is a huge leap from that to
4 say it is perfectly all right for me to give the
5 answer.
6 How was that help in regard to
7 for a person of your profession and your
8 background, and the purposes you served in this
9 program for helping students learn?
10 MS. MONK: First of all, the music
11 class was a class that I had very little
12 responsibility for. The study guide was just
13 one of many study guides that I kept in my
14 office.
15 I would -- you know, from semester to
16 semester, some of the same classes that students
17 would have, and there were notes that we could

18 download from the computer, from the class.

19 Sometimes they would just be, you know, notes

20 that were generated by other students.

21 I kept them in my office strictly as

22 study guides. That is what that was. Just the

23 collaboration of that class was something that

24 the students did on their own. Now, there were

25 tutors assigned to those students, and the

1 tutors could sit there with those students in
2 the collaborative way prior to and, to my
3 knowledge, the spring of 2004 the class was--
4 you know, learning was taking place.
5 There was learning taking place
6 because students were talking to students. They
7 were looking the answers up. They were taking
8 quizzes. Sometimes there might have been a
9 group of two or three working together;
10 sometimes it might be a group of five working
11 together.
12 Class, I believe, and Mr. Meleney's
13 understanding of the class, that collaboration
14 was part of the process and to be able to do
15 that particular class and those quizzes. There
16 was no collaboration on the papers that they had
17 to write.

18 That was ensured through turnitin.com

19 process that the University had in place and

20 that that program had in place that there would

21 be no collaboration on that. The class was very

22 interactive. It was a class where students had

23 a wide range of ways that they could manage that

24 class.

25 Part of that management might be with

1 some collaborative efforts, either with a tutor
2 or with someone working with them, and the study
3 guide was just something that was evolved
4 through the semesters of just keeping a lot of
5 the old stuff, never intended for that to be
6 other than that, just as a study guide, one more
7 resource for the students to be able to use at
8 the time when the class was a collaborative
9 class.
10 MS. JENNINGS: My questions are not
11 focused on the binder. Let me ask it a
12 different way.
13 Do you deny that you ever gave the
14 student an answer during a test on a question on
15 that quiz?
16 MS. MONK: I did not give an answer to
17 a question. I may have -- I have worked with

18 students in a collaborative way, and in a
19 collaborative way it would come up. Whether it
20 was working with a group of students as they
21 were looking through the test materials and, you
22 know, I cannot tell you that prior to spring,
23 2007 that in sitting with students and in
24 working with them that I could have been a
25 resource to them, just like any tutor could have

1 been a resource to them. There were numerous
2 resources that were available to them. I could
3 have been a resource.
4 MS. JENNINGS: Were you ever aware
5 that tutors were directly giving the answers to
6 the students while they were taking the test?
7 MS. MONK: I was made aware of that
8 when the allegations came out in whatever.
9 October, 2000, is when I was aware of it.
10 CHAIRMAN THOMAS: Judge, and then Ms.
11 Potuto.
12 MR. LECHNER: The binder that you had
13 in your office, that had tests and answers to
14 tests, among other things, correct?
15 MS. MONK: That is correct.
16 MR. LECHNER: And these courses that
17 we are talking about, they are open book, one of

18 the things the students were supposed to do is

19 to look through materials and try to find

20 answers, correct?

21 MS. MONK: That is correct.

22 MR. LECHNER: So, doesn't that loose

23 leaf binder defeat the purpose of that one

24 aspect of that open book test? All they have

25 got to do is to look through your binder to find

1 some, or many, or perhaps all of the answers?

2 MS. MONK: That also -- I think -- my

3 answer is no. That was a resource. The binder

4 was strictly a resource for them to use. There

5 are so many reasons --

6 MR. LECHNER: Excuse me. I am sorry

7 to interrupt you. Speaking for myself, I find

8 your responses incredible. You said before that

9 the students were allowed to look through the

10 books, were supposed to find the answer.

11 That was one part of the exercise,

12 although it wasn't from memory, they could look

13 at the resources. My question to you, doesn't

14 the fact that you maintained that loose leaf

15 binder defeat that aspect?

16 MS. MONK: No.

17 CHAIRMAN THOMAS: Professor Potuto.

18 MS. POTUTO: Yes. Let me start with

19 an open book program, and understanding that

20 this was not an open book exam over the period

21 of time that these violations occurred. Give me

22 your definition of what it is permissible to do

23 when it is an open book exam.

24 MS. MONK: I think that would have to

25 be defined by the professor. The professor, in

18 those particular students, they had been

19 assigned a music tutor. A lot of times that

20 would have been -- they would have been assigned

21 a music tutor by their academic advisor.

22 The academic advisor would be the one

23 that would be the first line of defense as to

24 defining open book to those students. It was

25 not going to be me, but for me open book means

1 open resources, that it doesn't just mean -- it
2 did not clarify that you could only use your
3 textbook, it did not clarify in there that you
4 could not use the tutor.
5 It did not clarify in there that you
6 could not look up the answers online. So, to me
7 open book would mean open resource, unless the
8 professor specifically said only use your
9 textbook to glean answers for the questions.
10 MS. POTUTO: Okay. I guess we have
11 joined issues, because I think it is an
12 extraordinary interpretation to say if a
13 professor says open book with nothing more, that
14 that permits a student to work with a tutor in
15 answering the questions on a final.
16 MS. MONK: I believe Mr. Meleney can
17 probably answer that better than me, because he

18 was the one overseeing the tutors being

19 assigned, and working with the academic advisors

20 on that syllabus.

21 MS. POTUTO: Well, if that is true,

22 then I would join issue with Mr. Meleney also.

23 I cannot imagine as a professor teaching a

24 course, and I don't use open book for a lot of

25 reasons, but were I to use open book, I cannot

1 imagine that the fault would be if I don't say
2 you cannot use a tutor, you cannot use another
3 professor, you cannot download, look up the
4 answers and go back online, that the default
5 mode for that would be all of it is okay, which
6 is what I hear you say.
7 MS. MONK: That is your -- I mean
8 that --
9 MS. POTUTO: That is mine.
10 MS. MONK: That is an interpretation.
11 And I think the only person that would clearly
12 be able to answer that is the professor and what
13 the professor intended with open book and what
14 area of interpretation as academic support
15 program was for open book.
16 MS. POTUTO: Did anybody ask the
17 professor before the tutor help was made what

18 does open book mean here?

19 MS. MONK: I would believe that their

20 academic advisors would have had contact with

21 the professor, if that was the question that

22 they had.

23 MR. LECHNER: Did you ever ask?

24 MS. MONK: I did not. I did not ask

25 the professor. It was not routinely for me to

1 handle that part of it. Most of the students
2 that we are talking about were not students that
3 I directly worked with.
4 I was indirectly linked to them
5 through the study guides. So,it was not going
6 to be a lot of students that I worked with.
7 Again, it was a topic of discussion or should
8 have been a topic of discussion and, you know,
9 it is still my belief if they were assigned to
10 tutor and it said open book, that it also left
11 it wide open as to the interpretation that
12 anyone could make about that.
13 MR. LECHNER: Would that mean that you
14 could help?
15 MS. MONK: Could I help a student in
16 an open book exam? I will be glad to say could
17 a tutor help the person?

18 MR. LECHNER: No, could you?

19 MS. MONK: If I was serving in the

20 role of a tutor with a person who had an open

21 book exam, could I assist that student? I see

22 no reason why I could not.

23 MR. LECHNER: Now, my question is,

24 could you assist the student in open book tests

25 without your qualifications? Yes or no?

1 MS. MONK: If I were a regular tutor
2 assigned to a student --
3 MR. LECHNER: I didn't say that.
4 MS. MONK: -- I would be able to
5 assist a student with an exam that was an open
6 book exam without any specifications from the
7 professor that that is not what they wanted to
8 happen.
9 MR. LECHNER: If you weren't a tutor,
10 could you assist the student?
11 MS. MONK: I was a tutor, and if I had
12 a student that was taking an open book exam, and
13 that student was with me taking an open book
14 exam, and I was serving in the capacity of the
15 tutor, then I did not see that as a direct
16 violation of anything, because a tutor was a
17 resource, and the professor did not specifically

18 say open book only means the textbook. So,

19 there would be that opportunity for a tutor to

20 assist.

21 MR. LECHNER: So, in your view of

22 this, it was a free fire zone. Anything could

23 occur because it was open book, any resource

24 could be looked at, any person could be

25 consulted, including you? Yes or no?

1 MS. MONK: Yes.

2 MS. POTUTO: Let me go back to

3 homework assignments. They are also open book.

4 They are ungraded but they are open book. Would

5 you agree?

6 MS. MONK: Yes.

7 MS. POTUTO: But with regard to the

8 homework assignments, you said you would not

9 provide an answer or direct that Florence and

10 Alexandria were incorrect answers to the Tale of

11 Two Cities, you would lead them to the right

12 answer.

13 Now, you have got a test that is an

14 open book, which is a graded assignment, and you

15 say the appropriate tutoring resource use would

16 include working with them and giving them

17 answers on the test.

18 MS. MONK: I think you have to look at

19 a tutor. If a student was assigned a tutor and

20 they were working on a homework assignment, or

21 they were working on an open book assignment,

22 the tutor would assist that student in those

23 assignments.

24 That was the purpose of the tutor, and

25 it was my purpose when I was working directly

1 with a student. But I think you are looking at
2 an open book. That is not me giving the
3 answers. That is me working collaboratively
4 with that student to use the resources that we
5 had to find the answers.
6 So, that is an entirely different
7 thing than saying you are just standing there
8 handing them the answers, and them getting a
9 grade on it. And that is not what happens.
10 MS. POTUTO: But as I recall, when we
11 were talking about homework, you said the
12 students who were really seriously learning
13 disabled, it would take hours and hours and
14 hours to get to them to the point where they
15 could get the homework assignment done.
16 Now, you are talking about a timed
17 test. If you were doing the assistance on the

18 timed test and you are not providing answers,

19 what are you doing that allows them to get that

20 test done in the time permitted?

21 MS. MONK: They were not timed tests.

22 Not during every semester were they timed tests.

23 There was at one point in time where they could

24 take the test as many times as they wanted it.

25 There were probably students that took

1 the test as many as 100 times in order to get a
2 perfect score on the exam.
3 MS. POTUTO: Can the institution help
4 me? Is that right, when that was an open book
5 exam, were the students permitted to take the
6 tests as many times as they would like? It is
7 not in the syllabus, so it would have to be in
8 the exam instructions.
9 MR. ABELE: The section in the
10 syllabus, which is Page 4 of Attachment G.
11 MS. POTUTO: Oh, there it is.
12 MR. ABELE: It mentions that the exam
13 is timed. So there is a limited amount of time
14 and, therefore, they have to know the material
15 ahead of time. They could retake the exam, but
16 a different exam would come up.
17 MS. POTUTO: No, no, no. I think I

18 asked the first thing this morning, when it was

19 the bank of 70 questions and 40 on the test,

20 whether that meant it was a random selection of

21 40 of the 70 for each individual student, or for

22 that test it would be 40 questions.

23 I am sure the answer I got was that it

24 was the same 40. I might have misunderstood. I

25 am sure what I understood the answer to be was

1 that it was the same 40. Did I misunderstand?

2 MR. ABELE: You understood the answer

3 correctly. It was the same 40.

4 MS. POTUTO: All right.

5 MR. ABELE: If they retook the exam,

6 so they finished the exam, they have turned it

7 in, and this is only under Professor Trevor and

8 only for the spring and summer of '06. If they

9 turned that exam in, they get that grade back

10 almost instantaneously. If they wish to retake

11 it again, they would get a new set of questions.

12 MS. POTUTO: All right. So the

13 protocol of the test was not that in the weeks

14 that the test was posted, you could take and

15 retake; is that right? You would have to turn

16 it in, or submit it through the online process?

17 MR. ABELE: That is correct.

18 MS. POTUTO: Was there a protocol on

19 the test that prevented me -- once I took the

20 online test, was there a control in that test

21 that wouldn't allow me to go back in and submit

22 another one to replace the first? The

23 instruction is no, right?

24 MR. ABELE: No.

25 MS. POTUTO: They would not?

1 MR. ABELE: Each exam was recorded.

2 MS. POTUTO: Okay. Now, Professor

3 Monk, if you read the last page of the spring

4 '06 exam, the very last paragraph says that they

5 will be timed.

6 MS. MONK: What the students would do

7 or what I observed the students doing that could

8 take the test as many times as they wanted it,

9 but each time they took the test they would

10 print that test off.

11 Then they would take the test the

12 second time and print that test off, and then

13 they would take it a third time and print that

14 test off, and if some of the answers were the

15 same, then they would use those answers.

16 They could do that 100 times until

17 they got, or as many times as they wanted to.

18 Two hundred, 300, 400 times, they could take the

19 exam and you could print the questions from the

20 previous exam off.

21 They would mark them right or wrong,

22 so you always had a resource as to whether or

23 not you duplicated any of the questions through

24 each exam.

25 MS. POTUTO: Mr. Abele, you say that

1 is not possible; is that right?

2 MR. ABELE: It was possible to print

3 the exam, which I was shocked to find out.

4 MS. POTUTO: Before taking it, could

5 you go on and print it?

6 MR. ABELE: You had to take the exam,

7 it then printed it. But it did not print the

8 correct answers with the exam. It only gave you

9 the questions asked and your options for

10 multiple choice response.

11 MS. POTUTO: Let me understand this,

12 then. I have got the first exam in front of me.

13 I go online and I am going to take it. After I

14 have taken it, I can print it, and it won't have

15 the answers on it. But that first exam that I

16 took has been submitted at that point.

17 MR. ABELE: Correct.

18 MS. POTUTO: If I take it again, if I

19 do take it again, either on -- let's assume that

20 the process permits me to take it again. The

21 professor will receive two copies of my exam at

22 that point, or five or twenty?

23 MR. ABELE: Correct.

24 MS. POTUTO: And let me just do one

25 more thing, Professor Monk. I thought I heard

1 you say when you were describing this test, the
2 prior test, that it was the graded assignments
3 were going and listening to the music and doing
4 the other things, and really what the test was
5 designed to do was just to make sure that they
6 were keeping up with materials; is that right?
7 MS. MONK: That's my understanding.
8 MS. POTUTO: All right. The syllabus
9 for the spring, '06 test, however, describes the
10 grading policy to be a total of 200 points with
11 the exams counting for 50 percent of the total,
12 with grades on each. It is on Page 2 of the
13 syllabus behind Attachment G of the Case
14 Summary.
15 MS. MONK: I mean, that is his
16 syllabus. That was that particular semester and
17 how they graded the exams that semester.

18 MS. POTUTO: But that is one of the

19 semesters that you were describing as being the

20 open book part, where the exams were not graded

21 and students could take it as many times as they

22 want.

23 MS. MONK: That is still correct. You

24 could take the exam as many times as you wanted.

25 If you did poorly on an exam, for example, let's

say that you had an exam on the second part of the test, if you had an exam that you were not happy with, they would allow you at the end of the semester to take those exams over again with the intent of trying to get your exam grades to be what you wanted them to be.

So, there were no restrictions -- even though there were restrictions on the exams, if you did poorly on one, then you could go back and retake the exam again at the end of it.

MS. POTUTO: But that is a little different than having a tutor sitting down with you on a timed exam where the six in total are going to count 50 percent of the grade, and using that tutor as a resource.

MS. MONK: It was an open book exam, and being an open book to me meant being an open

18 resource. Mr. Meleney would be the one that

19 would speak as to why tutors were given to those

20 students who were enrolled in that class.

21 MS. POTUTO: I will ask Mr. Meleney,

22 do you think the fact that a tutor is given to a

23 student in a class means that the tutor can

24 exist on an exam?

25 MS. MONK: In many of the online -- in

1 many of the classes tutors were there to assist
2 students with learning, and in an open book
3 class it would be just like in a math class, if
4 it were in a math class and you had the
5 availability of the questions and the
6 information to work a math problem, they might
7 work that math problem with that student before
8 that student answered that math problem and put
9 it into some homework and online, or in a class.
10 MS. POTUTO: Ungraded assignments are
11 one thing. We are talking about graded
12 assignments for the course. You have mentioned
13 Mr. Meleney is going to endorse all this several
14 times. I am going to hear whether you are going
15 to endorse this.
16 MS. MONK: I am not saying that Mr.
17 Meleney would endorse it. I am saying Mr.

18 Meleney would have been the one to determine

19 whether or not there would be tutors assigned to

20 students who were in that music class.

21 MS. POTUTO: Okay. I am sure the

22 answer to that may be yes. But that -- I don't

23 think that is really relevant to this question.

24 Tutors assigned to students is one thing.

25 Tutors sitting down and working on graded

1 assignments is a very different thing, whether
2 you want to say it is open book or not.
3 Mr. Meleney, tell me about taking
4 tests in the Athletic Academic Center. Is there
5 a room set apart when they are taking online
6 tests, or are they out in wherever the students
7 are anywhere?
8 MR. MELENEY: The structure was
9 supposed to be where the student would check in
10 at the front desk. Our tutorial coordinator
11 would assign them to a room, and they would be
12 assigned to a specific room for testing.
13 MS. POTUTO: Are you talking about
14 cubicles, where there would be one student per
15 room?
16 MR. MELENEY: We have like eight by
17 eight tutorial rooms where one to three people

18 could be in the room but not during the testing

19 process, obviously.

20 MS. POTUTO: But when they were doing

21 an online test in the Athletics Academic Center,

22 there was not a special place where they would

23 have to go to take the test, they could be

24 sitting in a cubicle where next door it might be

25 a tutor working with another student on an

1 upgraded homework assignment?

2 MR. MELENEY: No, it is not a cubicle.

3 It is a specific room with a door, a closed

4 room. The student was supposed to sign in, be

5 assigned to a room. The tutor coordinator,

6 Brian Schmauch, was supposed to supervise that

7 process, and the student should go in to the

8 room, sit down, make sure that the only resource

9 with that student is the textbook, if it is open

10 book, and allow that student to take the test

11 and check out.

12 MS. POTUTO: All right. Are these

13 rooms, whether they are cubicles, rooms or

14 whatever, could there be somebody next door who

15 was working with the tutor on a homework

16 assignment, or were they dedicated to taking

17 online tests?

18 MR. MELENEY: There could be a student

19 and a tutor in a room next door. They don't see

20 each other. There is no visual, there is no

21 hearing. It would be like being out in the

22 hall. You wouldn't know they were there.

23 MS. POTUTO: But you would have to

24 sign in saying I want to take an online test, or

25 do you just sign in to say I want a room to

1 study in? What would you be telling Mr.
2 Schmauch?
3 MR. MELENEY: The student would be
4 telling Mr. Schmauch I am scheduled to take my
5 test today, and I need a room to take the test.
6 Then what our students were doing, were supposed
7 to be doing, were coming into the facility.
8 If they were meeting with the tutor
9 prior to taking the test, they would meet with
10 the tutor for an hour before, review the
11 materials, be prepared for the test, and then
12 walk away from the tutor and go in and take
13 their test.
14 MS. POTUTO: Would his notes as to who
15 was going into the rooms indicate that they were
16 going in to take a test? What kind of records
17 do you have of the use of these rooms?

18 MR. MELENEY: We had a sign-in sheet.

19 When the students came in to the front desk,

20 they would sign in and be assigned a room.

21 There would be a room sheet there. In most

22 cases, it was poorly done to be honest with you.

23 The measuring of the students, when

24 they are in a testing position, Brian Schmauch

25 did not keep strong records on the testing

1 process.

2 MS. POTUTO: Did you have any policy

3 about tutors assisting on graded assignments?

4 MR. MELENEY: We did, very much so.

5 The first time I heard that a tutor was in a

6 room with a student during the testing process

7 was through our internal auditors in October,

8 '07.

9 MS. POTUTO: But that says you were

10 surprised to find that it happened. It doesn't

11 say you had a policy in place in advance.

12 MR. MELENEY: My answer to Brian

13 Schmauch, when I heard that, was how on earth

14 would we even assume that we would ever let a

15 tutor in a room with a student while they are

16 testing?

17 MS. POTUTO: Was there written

18 policies that said tutors may not assist on

19 graded assignments?

20 MR. MELENEY: I don't know if that was

21 addressed in our tutorial manual or not.

22 MS. POTUTO: Was it addressed in your

23 education sessions with the tutors?

24 MR. MELENEY: I would believe

25 conversations that stated that indirectly were

1 spoken quite often.

2 MS. POTUTO: What does it mean to

3 state indirectly tutors may not assist on graded

4 assignments?

5 MR. MELENEY: Discussions of how we

6 are processing our students in a testing

7 session. Using your words, I would say that we

8 would make a strong statement that there would

9 be no one involved in the testing process when a

10 student is in a test.

11 It was stated clearly. It was

12 understood in our program that students were not

13 to be with tutors while they are testing.

14 CHAIRMAN THOMAS: Judge Lechner.

15 MR. LECHNER: To the institution, is

16 there anybody here today representing the

17 institution who can state that it was

18 appropriate for Dr. Monk, or any tutor, to

19 assist the students in a graded exercise, be it

20 a test or a paper? Does the silence mean no?

21 MR. ABELE: No.

22 MS. MONK: Then, I just want to make a

23 comment, sir.

24 MR. LECHNER: Excuse me. Do you mind

25 if I continue, Doctor?

1 MR. HARGROVE: Do you mind?

2 MR. LECHNER: Yes, when I have

3 finished, you can speak. There has never been

4 any question about that, Mr. Hargrove. Is there

5 anybody there prior to this audit, and Mr.

6 Meleney, you mentioned with knowledge of a tutor

7 or Dr. Monk assisting a student in a graded

8 exercise?

9 MR. MELENEY: There was no knowledge

10 on my part, no.

11

12 MR. ABELE: No knowledge that I was

13 aware of.

14 MR. LECHNER: From the institution's

15 point of view, what is wrong with that, a tutor

16 or Dr. Monk assisting a student in a graded

17 exercise?

18 MR. ABELE: It is not the student's

19 work. You are evaluating someone else's work,

20 not the student's.

21 MR. LECHNER: Thank you.

22 CHAIRMAN THOMAS: Dr. Monk, do you

23 have a comment?

24 MS. MONK: My comment is that every

25 exercise that was conducted in the Athletics

1 Academic Support Center, where a student was
2 with a tutor, ended up in that tutor receiving a
3 grade on knowledge they got from that tutor.
4 Whether it was preparing for an exam
5 that they took the next day in class, preparing
6 for an exam that they took on an online exam,
7 every session that was conducted in the Athletic
8 Academic Support between the tutor and the
9 student was for the purpose of that student to
10 be able to use that teaching in order then to go
11 and do well on a graded exam. So, everything
12 that we did had a grade attached to it if you
13 are using that definition.
14 MR. LECHNER: You see no difference,
15 Doctor, in the preparation with a tutor and then
16 the tutor assisting in a graded exercise?
17 MS. MONK: The tutor --

18 MR. LECHNER: No, all I want to know

19 is if you see any difference.

20 MS. MONK: If the class allowed for a

21 tutor to be with them in an exercise, I see no

22 difference.

23 MR. LECHNER: Do you know of one

24 class, one professor, one example where the

25 professor said to a student, individually or

1 class-wise, that you can take this test with the
2 assistance of another person, a tutor, you or
3 somebody else?
4 MS. MONK: That was a -- as far as a
5 professor saying that, I cannot tell you that a
6 professor is going to write that down on paper.
7 But when they allow us to -- when they allow
8 students to have tutors and to have open book
9 tests, and the students are working with them, I
10 could not guarantee you that those -- that the
11 tutor is there to help that student to be able
12 to do the work, and there was nothing there
13 except open book, open resource, and a tutor was
14 a resource that we used in the Athletics
15 Academic Support to help students so that they
16 could be prepared for the grades. So, every
17 tutoring session resulted in a grade for a

18 student.

19 MR. LECHNER: I didn't ask for a prep

20 session. I asked about an exam. Do you know of

21 one instance, just one, where the professor said

22 it was okay for a student to be assisted in

23 taking these tests by a tutor or anybody else?

24 MS. MONK: In the music class, when it

25 said open book, and the way the music class was

1 structured, there was no restrictions placed on
2 whether or not the students could use resources
3 that were available to them, including a tutor,
4 to help them prior to the class changes.
5 MR. LECHNER: Does the University have
6 any position other than what I understand to be
7 that it would be objectionable, unethical, to
8 have an assistant during the time of an exam?
9 MR. ABELE: It would be unethical and
10 unacceptable.
11 MR. LECHNER: Thank you.
12 MS. POTUTO: Professor, if I can just
13 get a couple of little more information out from
14 you. How did you know that the -- you said you
15 weren't really directly involved with that
16 class, you just had a few students.
17 How did you know that the exam in

18 spring, '06, or fall, '05, was open book?

19 MS. MONK: The students that I worked

20 with, we read the syllabus. Every student that

21 I worked with, I kept a copy of their syllabus

22 and I would go through their syllabus with them.

23 So, if I was working with a student and we

24 looked at it as open book, and they were

25 assigned to me during that period of time, then

1 that was -- I would work with them during that
2 period of time within that syllabus, and
3 believing that open book would allow me to have
4 the book, and maybe work with them on the exam.
5 MS. POTUTO: What happened in the fall
6 of '06, when it was no longer an open book test?
7 MS. MONK: I did not realize that in
8 the fall of '06. It was only in the spring of
9 '07 that I was alerted, that I became aware that
10 it was no longer the open book, open resource
11 type of exams that they had changed.
12 MS. POTUTO: Tell me how the professor
13 is supposed to control for this. You say if the
14 professor says open book in the syllabus, then
15 anything goes. That is my editorial comment.
16 You don't have to accept it.
17 But the professor is in control of the

18 classroom. If you are not checking the syllabus

19 each semester, how are you protecting those of

20 us who do not permit an open book test? You

21 assumed that -- do you agree it is a different

22 professor in the course and it is going to be

23 taught the same way until what? How would you

24 know if you are not reading it?

25 MS. MONK: Again, the music class, and

1 I think I have just -- if you-all will just give
2 me a few moments, I would just like to talk a
3 little bit about that music class. That music
4 class was something that was a concern to me
5 from early on, just because of how we had it
6 structured, the fact that the music class had so
7 many student-athletes in it.
8 It was a very fragmented class. It
9 was very fragmented with how each professor
10 would be a little bit different in what their
11 expectations were. It was not my primary
12 responsibility.
13 The responsibility that I had with the
14 music class was working with the students that
15 had a learning disability, that were in that
16 music class, that had been placed in that music
17 class by their academic counselor.

18 I was working with them. I was in

19 error in the fall of 2006 in believing that the

20 music class was still an open book exam. That

21 was an error on my part. I don't know that I

22 even worked with any students in the fall of

23 2006, and would have had a need to have a copy

24 of the syllabus for that class.

25 In the spring of 2007, I did have some

1 students that were placed in that music class.
2 I printed off the syllabus, I put them in my
3 book, I read the syllabus with the students, and
4 I recognized the fact that the class had
5 changed. I read that.
6 I took that to a staff meeting where
7 ever academic counselor, Mr. Meleney was there,
8 and I took that to them as a concern in the
9 spring of 2007. I said in a staff meeting, "The
10 class has changed. This is something that we
11 really need to talk about on how this class has
12 changed."
13 One important issue that was in that
14 class was that resource guide. I asked the
15 staff, "I have this resource guide. Is this
16 something that we want to discuss as a group as
17 to whether or not this resource guide is

18 something that we need to keep and make it

19 available, or is it something that we need to

20 pull back? We have got to change how we did

21 that music class."

22 I changed how I did that music class

23 with the students that I had. I no longer saw

24 it as an open book, an open forum for that

25 class. The study guide became something that

had to be checked out of my office where students could use the study guide, because we as a staff voted that that study guide would be something that would be appropriate to continue to have in my office.

I would allow students to use the study guide. Every time they got the study guide, they got the same statement from me: "This is a study guide. The answers and the materials contained in here may or may not be part of what you will see on the exam. It is strictly as a study guide. If you believe it will help you learn the material in the class, you may use it. You may not use it when you take an exam and you must remember that you have signed an oath on the computer in that semester saying that you would not use the study guide,

18 that you would not use any help in taking your

19 exam."

20 That was how we -- how that class

21 became -- how I was alerted to the fact that

22 that class had changed in the spring of 2007. I

23 should have known it in the fall of 2006. I did

24 not. I was one person. I did not catch

25 everything that went on in every class with

1 every student.

2 We had academic counselors that had

3 students assigned to them, who got their

4 syllabus, who looked at their syllabus, and for

5 whatever reason it was never articulated to me

6 in the fall of 2006.

7 If it was, somewhere I missed it. But

8 when it became the spring of 2007, that is when

9 I was adamant with the class has changed, we

10 have to change how we do this class in music.

11 MS. POTUTO: Mr. Meleney, Dr. Monk

12 describes coming to you and your staff and

13 saying the course has changed, I have this study

14 guide.

15 Did she give an accurate description

16 of the meeting? Was there a meeting, and did

17 she describe it accurately?

18 MR. MELENEY: Yes, she did. It was in

19 February, 2007, in a staff meeting she brought

20 the binder in and she said, "I have just been

21 made aware that this class is closed book and

22 there is nothing that can go in with the testing

23 process."

24 We said, "Can our students still use

25 the study guide to review?" The answer we gave

1 ourselves was these study guides are online,
2 they can be printed from the professor's Web
3 site. These old tests were like from 2004,
4 2005, 2006 were available to all students.
5 Other students on our campus had the
6 same access to these old tests. So we said to
7 ourselves that was our test of whether these
8 guides can be used for studying.
9 MS. POTUTO: They were online with
10 answers?
11 MR. MELENEY: No, ma'am, no answers,
12 just test scores.
13 MS. POTUTO: So, you think you are
14 doing what every other student has available, if
15 yours are online with answers and others are
16 online without answers?
17 MR. MELENEY: I was unaware how many

18 answers were in the study guide. I mean, the

19 tests were printed tests without answers. The

20 same students can take those tests and go look

21 up the answers for those questions.

22 MS. POTUTO: Let me just say that I

23 also think -- it is extraordinary to me that

24 this would come up and you are discussing it and

25 no one thinks either to ask the professor or to

1 assure yourselves that what is available to
2 other students is precisely what you are making
3 available to student-athletes. It is just -- I
4 assume you didn't ask the professor.
5 MR. MELENEY: I did not.
6 MS. POTUTO: And you did not for
7 yourself double check what your study guide
8 provided; is that right?
9 MR. MELENEY: I have never seen the
10 study guide other than I saw a notebook.
11 MS. POTUTO: And did you assure
12 yourself what was online with regard to the
13 course for all students?
14 MR. MELENEY: A staff member went
15 online. We realized there were tests available
16 to print down over the course of about three
17 semesters, and also when the professor's study

18 guide that he had available each semester

19 online, many of the same test questions were on

20 the professor's study guide.

21 MS. POTUTO: So, you just assumed that

22 what you had was identical with what was online

23 without anybody looking.

24 MR. MELENEY: It came from the same

25 source. It came from the same Web site, and the

1 same professor's Web site.

2 MS. POTUTO: Well, what Dr. Monk had

3 in her office was online?

4 MS. MONK: Yes, it was.

5 MR LECHER: In that same form?

6 MS. MONK: Yes.

7 MS. POTUTO: What you had online were

8 the answers you posted online, and then why were

9 they checking it out from you?

10 MR. MELENEY: No, it wasn't posted

11 online with answers. The old tests were online

12 throughout the whole two-year period.

13 MS. POTUTO: Yes, but not the answers,

14 right? I thought you said not the answers.

15 Okay. You did not know that the study guides

16 had answers?

17 MR. MELENEY: I am sorry?

18 MS. POTUTO: Did you know whether the

19 study guide had answers in Dr. Monk's study

20 guide?

21 MR. MELENEY: I was unaware of how

22 many answers were on there.

23 MS. POTUTO: Did you know there were

24 any answers in the study guide?

25 MR. MELENEY: I was aware of that.

1 MS. POTUTO: So, you make the
2 conclusion because all the exams are posted
3 without answers, it is appropriate to make
4 available to student-athletes study guides that
5 you knew at least some answers, although you
6 didn't know the extent of the answers?
7 I just want to see if I have got it
8 right.
9 MR. MELENEY: I would say yes, I
10 believed that that was okay because the
11 professor had allowed that to be out there.
12 MS. POTUTO: Is this new information
13 to you, or did you know this when you were doing
14 your inquiry?
15 MS. THOMPSON: No, I didn't know the
16 test questions and answers were posted online.
17 MS. POTUTO: The answers were not

18 posted, no? Did you know that the Academic

19 Services staff had discussed it and decided that

20 it was appropriate for the study guide with the

21 answers to be given to student-athletes?

22 MS. THOMPSON: Dr. Monk did state that

23 in her November 7, 2007 --

24 MS. POTUTO: I understand that. Did

25 you believe her, did you double check it?

1 MS. THOMPSON: Did I double check
2 what, whether or not the discussion had been
3 held?
4 MS. POTUTO: Yes. Did you know there
5 was a meeting -- did you take what she said at
6 face value, that there was a meeting and that
7 Mr. Meleney and staff had blessed the use of the
8 study guide with the answers?
9 MS. THOMPSON: I believe I did, if I
10 am not mistaken, ask Mr. Meleney during the
11 interview whether or not this discussion had
12 been held, and it was my understanding from his
13 response, if I am not mistaken, that the study
14 guide could be used to review.
15 MS. POTUTO: All right. I want to ask
16 both of you this. If student-athletes in a
17 course have available a study guide with all the

18 questions that are going to be on the final,

19 with answers provided by a tutor in athletics,

20 and it is not available to students generally,

21 and that has been an official decision made by

22 the Academic Athletics staff, have they not also

23 at least committed an extra benefit?

24 MR. DIDION: Yes, they probably have.

25 MS. POTUTO: And it was not charged

1 because you didn't find this out, or what?

2 MR. DIDION: It wasn't charged because

3 we were focusing on the unethical conduct and

4 not the extra benefit part.

5 MS. POTUTO: Well, you had the extra

6 benefit in one of the others. In your view, is

7 it academic fraud to provide assistance with

8 answers to student-athletes that other students

9 do not have, although they have the same exact

10 questions?

11 MR. DIDION: I don't know that I would

12 consider that as academic fraud to provide them

13 with a study guide with the answers to review,

14 but I would consider it academic fraud if they

15 used that during an exam.

16 MS. POTUTO: So, the fact that they

17 used the extra benefit in advance to study, so

18 long as they didn't bring the study guide into

19 the final with them, is that what I understand?

20 MR. DIDION: Yes.

21 MS. POTUTO: All right. If you had

22 this information before, would you have charged

23 a lack of institutional control and not a

24 failure to monitor?

25 MR. DIDION: No, we reviewed the

1 information pretty thoroughly and decided it did
2 not rise to the level of a lack of institutional
3 control.
4 MS. POTUTO: You reviewed that
5 information that you had, but you told me you
6 didn't have this information. This information
7 would not have changed the conclusion that you
8 now have, an institutional decision from the
9 person in charge of the program to provide a
10 study guide, which you now say is an extra
11 benefit to student-athletes?
12 MR. DIDION: I still don't know that I
13 would charge a lack of institutional control.
14 CHAIRMAN THOMAS: Okay.
15 Professor Myers.
16 MS. MYERS: Just one quick question,
17 and I am not sure who is going to answer it.

18 But did anyone at the University or, Mr. Smrt,

19 did you interview the other tutors that were

20 utilized in athletics?

21 Then I am going to add a second part

22 to that, and then you can answer them both

23 together, maybe. I am going to rephrase the

24 question. Were there other tutors that tutored

25 student-athletes who were of the same

1 understanding as Dr. Monk about what they could
2 do in regard to it? I am going to use the quote
3 "open book, open forum courses."
4 MS. KARPINSKI: I interviewed a number
5 of other tutors within Academic Services. None
6 of them, even though they have tutored in the
7 music course, none of them were present -- they
8 indicated to me none of them were present when
9 the student-athlete was taking the exam.
10 They would tutor the students to help
11 prepare for the exam. Now, some of those
12 students, when they took their exam, met with
13 Mr. Wright and received assistance from him on
14 the exam. But I am not aware of any other tutor
15 who was using the black binder with the
16 students.
17 MS. MYERS: Or during the exam?

18 MS. KARPINSKI: Correct, or during the

19 exam. Can I just clarify? We are using the

20 word "study guide" interchangeably with the

21 professor's study guide. The professor had

22 online a study guide which was readings as well

23 as I believe sample questions from the readings.

24 That is different than the study guide

25 as Dr. Monk is referring to, what we call the

1 black binder. In the black binder were copies
2 of all the exams, exact copies of all the exams,
3 as well as additional readings.
4 But the study guide that the professor
5 created and the black binder are not the same
6 study guide.
7 MS. MYERS: But with the black binder,
8 did other tutors, other than Dr. Monk, use the
9 black binder with their students?
10 MS. KARPINSKI: None reported that to
11 me.
12 MS. MYERS: Professor Monk, the black
13 binder sounds like a pretty good document. Did
14 any other tutors utilize the black binder?
15 MS. MONK: As with other resources
16 that were in my office, I kept the binders in
17 several courses with a lot of information in

18 them. I kept several textbooks, a long list

19 within my office.

20 The tutors had access to that to use.

21 I would say, yes, there were other tutors who

22 would take the resource guide and use it as they

23 were preparing students to take the exam in

24 spring, 2007.

25 MS. MYERS: Okay. The resource guide

1 is the black binder?

2 MS. MONK: Yes, ma'am. I called it a

3 resource guide, because that is all it was.

4 MS. MYERS: Mr. Didion or Mr.

5 Thompson, in your interview of tutors did you

6 ask any other tutors if they utilized the

7 resource guide in preparation for tests?

8 MS. THOMPSON: In the interviews that

9 I did with Ms. Karpinski and Mr. Smrt, none of

10 the tutors indicated that they used the binder.

11 MR. LECHNER: Did you ask?

12 MS. THOMPSON: Yes, we did.

13 MR. LECHNER: Okay.

14 MS. MYERS: So, today it was what

15 Professor Monk just said is the first time it

16 has even been suggested to you that any other

17 tutors utilized the resource guide?

18 MR. DIDION: Well, except for Adam

19 Wright, who was asked to review the resource

20 guide and provide the correct answers. I think

21 the answer to that is no one else did say that.

22 MS. MYERS: Okay. Just one follow-up

23 with Professor Monk. I think you used the term

24 that the resource guide and other materials,

25 class materials, were available in your office.

1 You couldn't help but believe some other tutors
2 used it.
3 Do you know precisely that other
4 tutors took that and used it with preparation?
5 MS. MONK: Again, I did poor record
6 keeping of people checking it out. I could not
7 give you a name of someone that would have taken
8 it.
9 MS. THOMPSON: Okay. Any other
10 questions?
11 MS. JENNINGS: Can I ask to go back a
12 little bit? Who has actually looked at the
13 black binder, and can tell me whether all or
14 some of the answers were marked on the sample
15 tests that were in there?
16 Have you, Ms. Thompson?
17 MS. THOMPSON: No, I have asked for

18 the black binder several times, and I have not

19 received it. I think Ms. Karpinski has actually

20 looked at the black binder.

21 MS. JENNINGS: Who has the black

22 binder?

23 MS. KARPINSKI: The black binder has

24 not been seen since the day, I believe, Dr.

25 Monk's last day of employment. No one has seen

1 it. I have asked every student-athlete that I
2 have interviewed, as well as the academic
3 advisors, what was in it, obviously, because we
4 searched for it.
5 Everybody looked for it, but it was
6 not found. So, what I know about what was in
7 the black binder is only based on interviews of
8 100 or so student-athletes as well as the
9 advisors.
10 MS. JENNINGS: And did the University
11 not know that the black binder was some kind of
12 an issue before Dr. Monk left the University?
13 MS. KARPINSKI: No, they did not. At
14 the time Dr. Monk left the University, it was
15 based on the quiz that was filled in on
16 the computer. All of this information related
17 to the music course came subsequent to that in

18 the interviews of the students who had worked

19 with Dr. Monk in trying to determine if she had

20 ever taken a quiz for somebody else, or

21 assisted.

22 MS. JENNINGS: Dr. Monk, could you

23 tell me, did you develop this black binder?

24 MS. MONK: It evolved through the

25 years. It was something that I just -- with

1 each of the music class, if I happened to be
2 tutoring students in the music class, I would
3 download the information that the professor had
4 online. It was an open access information
5 You could download exams, you could
6 download all kinds of information. There was
7 even a quiz -- there was even a test book that
8 was full of the questions that were on the exam,
9 and so those questions that were in this
10 particular study notebook, all of that was in
11 there.
12 So, it was a whole host of information
13 that had just evolved. Did I do it? Yes, it
14 was something that I just kept putting stuff in
15 it through the years. But it was nothing that
16 was -- it was nothing that couldn't be
17 downloaded by any student on the campus.

18 Any student in that class could have

19 had probably a much better study guide than I

20 had, because mine had really no order to it. It

21 was just a conglomeration of things that were

22 just stuck in there from semester to semester.

23 MS. JENNINGS: That is what puzzles

24 me. You had mentioned before, and I am hearing

25 some inconsistency. You had said before you

1 didn't have any particular responsibility with
2 regard to this music class.
3 It just happened that a couple of your
4 students that you were working with were taking
5 it. Surely there are other classes that
6 multiple student-athletes take besides this, but
7 you chose to develop this.
8 You were also saying it was available
9 online. I am just trying to understand why you
10 decided for this particular course to make up
11 this binder to assist the students that at first
12 apparently that you were working with and later
13 for any students in the athletics program.
14 MS. MONK: It was just one of many
15 binders. I had one on English, one on biology,
16 one on physics, one on -- I can't think of all
17 of the classes. One of them was just on music,

18 not 2021, 2012. There was one on Music 2012.

19 I had a whole host of study guides in

20 my office that just accumulated through the

21 years from working with students. It just gave

22 me a better resource. It was only information

23 that could be freely downloaded from the

24 computer.

25 It was nothing that was online. It

1 was information that was put out online by the
2 professors that could be downloaded. As I would
3 download them, I would just stick them in a book
4 because it might be something that I could use
5 with a student the next semester with
6 information.
7 There was no conspiracy out of it.
8 The study guide was just -- it was just a
9 conglomeration of information that might help a
10 student as they are preparing for the classes.
11 MS. JENNINGS: The University, are
12 there other study guides still available at the
13 University?
14 MR. ABELE: The University?
15 MS. JENNINGS: No, I mean the ones
16 that Dr. Monk and colleagues developed in
17 English, in physics, and I forget what the other

18 courses were that you mentioned.

19 MS. MONK: I said biology, I had one

20 in several different classes.

21 MS. JENNINGS: Maybe I should ask you

22 first. Did you remove those when you left your

23 employment?

24 MS. MONK: No. You know, I did not

25 remove them. They were left on the shelf with

1 the resource materials that were left there when
2 I left.
3 MS. JENNINGS: And that included this
4 one on the music course?
5 MS. MONK: It is my belief that is
6 where it was, yes, ma'am.
7 MS. JENNINGS: And I am asking the
8 University, are the other ones, besides the
9 music course binder, still there and still
10 available?
11 MR. MELENEY: When I left the
12 Athletics Department, they were still there.
13 MR. LECHNER: Doctor, a few quick
14 questions. Are you saying that everything that
15 was in your black loose leaf binder was
16 available to be downloaded?
17 MS. MONK: Yes.

18 MR. LECHNER: Is it your position that
19 answers to the exams, or at least some of the
20 answers to the questions to the exam were
21 available for download?
22 MS. MONK: Yes. The answers were not
23 necessarily available for download, but the
24 answers were easy to get. I mean, that was just
25 a part of the process was there were some--

1 some of those questions were with answers,
2 because some of the students had actually
3 downloaded their exams, and I did not realize
4 what they were doing.
5 But they would just download their
6 exams, and I put those exams in there. I don't
7 know that the questions -- I don't know that
8 they were answered correctly, but there may have
9 been some questions in there.
10 But if you went and downloaded
11 biology, for example, if you went online and
12 downloaded the biology study guide, you would
13 also download the correct answers to the biology
14 study guide. Some have the correct answers.
15 MR. LECHNER: Excuse me. I am not
16 talking about the biology study guide. I am
17 talking about the black loose leaf binder which

18 has been the subject of our discussion the past

19 couple of hours. Is it your position that

20 answers or some of the answers were available

21 for download?

22 MS. MONK: A student could print off

23 their exam, and if they got the question

24 correct, and I put it in the book, then there

25 might have been a correct answer in the book.

1 MR. LECHNER: I am going to ask you
2 one more time. Listen to the question and give
3 me a yes or no. Were answers available for
4 download?
5 MS. MONK: Yes.
6 MR. LECHNER: The University's
7 position on that.
8 MR. ABELE: The student -- no, they
9 were not available for download.
10 MR. LECHNER: All right. Now, Doctor,
11 you said when you left this black binder, this
12 black loose leaf binder, was in your office,
13 correct?
14 MS. MONK: To my knowledge.
15 MR. LECHNER: Do you have a copy of
16 it?
17 MS. MONK: There was one copy.

18 MR. LECHNER: Where is the copy?

19 MS. MONK: It was in my office.

20 MR. LECHNER: That is the only copy is

21 my point?

22 MS. MONK: That is correct. When we

23 met as a group, the one thing that as a group we

24 decided to do, there were more than one copy.

25 Some of the academic counselors actually had a

1 copy, but in order that one day when we met as a
2 group, we agreed that we would downsize it to
3 one copy so that we would be able to have
4 control of that copy of that.
5 MR. LECHNER: Okay. Fine. So, is it
6 your position when you left, to your
7 recollection, that one copy of that black loose
8 leaf binder remained in your office?
9 MS. MONK: That is correct.
10 MR. LECHNER: Did you do anything to
11 remove anything from that document? Did you
12 destroy anything, or do you have any idea where
13 it might be?
14 MS. MONK: No.
15 MR. LECHNER: Thank you.
16 MR. PARK: May I ask a question?
17 CHAIRMAN THOMAS: Yes.

18 MR. PARK: Dr. Monk, I am looking at

19 Exhibit F, I believe it is, to the Case Summary.

20 I have just pulled it loose. It is

21 handwritten statement. This is

22 attached to the Case Summary as an exhibit. I

23 think it is Exhibit F.

24 Do you find that?

25 MR. HARGROVE: We have that, yes.

1 MR. PARK: Dr. Monk, did you give

2 answers to during this music course

3 quizzes?

4 MS. MONK: No.

5 MR. PARK: And so his statement, then,

6 is not correct?

7 MS. MONK: It is correct in that I

8 gave him assistance, but I did not give him

9 answers.

10 MR. PARK: All right. What was the

11 assistance that you gave him?

12 MS. MONK: is a unique

13 case. I recall very much when he came on to the

14 University, I took his information in to Mr.

15 Meleney and I said to Mr. Meleney, "What in the

16 world are we going to do with ?"

17 -

18 MS. MONK: I believe, if you are

19 asking my opinion, is that someone wrote the

20 letter for him and he copied the letter.

21 MR. LECHNER: That is not my question.

22 My question is, is it your opinion that if

23 somebody read this letter to him he would not

24 understand it?

25 MS. MONK: It would be my opinion that

1 he would not understand it.

2 MR. LECHNER: The first paragraph

3 reads, "My name is ." He would

4 understand that, wouldn't he?

5 MS. MONK: Probably, yes, sir.

6 MR. LECHNER: The next phrase reads,

7 "I was a member of the for

8 Florida State University."

9 He would understand that, wouldn't he?

10 MS. MONK: Yes, sir.

11 MR. LECHNER: He would understand the

12 request to be reinstated, wouldn't he?

13 MS. MONK: I have said his --

14 MR. LECHNER: No, just answer my

15 question.

16 MS. MONK: What I have said is is that

17 would not have produced this

18 document if he were freely asked to produce it.

19 MR. LECHNER: That is not my question.

20 Excuse me.

21 MS. MONK: Your question was does he

22 understand the content of this? I would say

23 that he probably understood the content of it.

24 I addressed you specifically and said I do not

25 believe that he wrote the letter.

1 I believe he copied the letter after
2 someone else had written it based on the time
3 that I worked with
4 MR. LECHNER: So, it is your
5 position -- let me ask you, could he read this
6 letter?
7 MS. MONK: No.
8 MR. LECHNER: Would he understand what
9 the request for reinstatement meant?
10 MS. MONK: If it were explained to him
11 in lay terms he would.
12 MR. LECHNER: So, if somebody would
13 have to explain to him what the word
14 "reinstatement" meant, how would he possibly
15 take an exam if somebody read an exam to him and
16 some questions, so A, B or C answer questions to
17 him, would you have to explain what each of

18 those words meant?

19 MS. MONK: If you saw the test

20 questions, the test questions were not -- I

21 mean, would I explain it? If there was a word

22 that he did not know, I would explain it to him.

23 Yes, I would give him the definition for that

24 word.

25 MR. LECHNER: So, it is still your

1 position that he would not understand what
2 reinstatement meant?
3 MS. MONK: That is correct.
4 MS. MYERS: A quick follow-up. This
5 is on Florida State's letterhead, so obviously
6 anybody over there have any thoughts about this
7 letter?
8 MR. SMRT: Maybe Brian can help.
9 Brian, were you involved in this submission?
10 MR. BATTLE: Yes, I was. I was asked
11 in consultation with Stacey to gather all our
12 student-athletes that needed to request
13 reinstatement. I was personally there when
14 wrote this letter, and there were
15 probably about ten other members of the
16 in that session.
17 To get them started with this, I

18 basically told them, as it states here, my name

19 is. I was a member of the , and to

20 show some respect for the reinstatement process

21 I said you need to say something along the lines

22 as I am respectfully requesting reinstatement.

23 At that point, I told them then you

24 need to specifically talk about your situation,

25 either with Dr. Monk, with Adam Wright, the

1 tutor, whatever the case might be. I don't
2 know, because we did have over 75 interviews,
3 and I can't remember specifically what each one
4 was.
5 At the end, I told them to finish it
6 up with some sort of saying that they are sorry
7 about this type of thing, and they must sign
8 their name. They knew exactly what they were
9 doing.
10 They knew that this was for
11 reinstatement, because I explained it to them,
12 and they asked, "Why do I have to do this?" I
13 said, "This is part of the process in order for
14 you to come back next year and play ."
15 MR. LECHNER: Do you remember speaking
16 with
17 MR. BATTLE: Yes, sir.

18 MR. LECHNER: Did he understand what

19 reinstatement was?

20 MR. BATTLE: Oh, yes.

21 MR. LECHNER: How do you know that?

22 MR. BATTLE: Because he asked me at

23 that point would he have to sit out three games

24 or four.

25 MR. LECHNER: Did anybody force

1 (to sign this?

2 MR. BATTLE: No, sir.

3 MR. LECHNER: Other than that first

4 paragraph, my name is and I request

5 reinstatement, did you tell him what to write in

6 this?

7 MR. BATTLE: No, sir.

8 MR. LECHNER: Did you see him

9 consulting with anybody else from the staff as

10 to what to put in the remainder of that letter?

11 MR. BATTLE: With a staff member?

12 MR. LECHNER: Yes.

13 MR. BATTLE: No, sir.

14 MR. LECHNER: Are they his words?

15 MR. BATTLE: Yes, sir, to the best of

16 my knowledge.

17 MS. MYERS: You followed up with a

18 staff member. As teammates, you said there were

19 a bunch of them in the room. Now, were they

20 collaborating on how they are going to write

21 this?

22 MR. BATTLE: Did they collaborate with

23 each other? No, they were pretty much trying to

24 remember what their specific situation was after

25 those first couple of sentences.

1 MS. MYERS: So, you feel pretty
2 confident that this young man, who had either
3 writing or reading disabilities, it was his
4 words to say, "Please accept this letter as my
5 final request to be reinstated to they", I see
6 that, " at Florida State"?
7 MR. BATTLE: That is how we told them
8 to summarize at the end. You know, we want them
9 to close it with something, you know, close out
10 the letter.
11 MR. LECHNER: Did you tell him to put
12 any reference in there with regard to Dr. Monk?
13 MR. BATTLE: We told him to
14 specifically address the situation in regards to
15 their assistance. If it was Dr. Monk, if it was
16 Adam Wright, or if it was the black binder, that
17 is what they had to explain in there.

18 MR. LECHNER: Did you tell

19 to use the name Dr. Brenda Monk?

20 MR. BATTLE: I said if Dr. Monk was

21 one of those people, or if it was Adam Wright,

22 or the black binder, those are the things that

23 we had talked to them about. I did not

24 specifically single out Dr. Monk.

25 MS. JENNINGS: Do we know --

1 CHAIRMAN THOMAS: Hold on just a
2 second.
3 Go ahead Professor Potuto.
4 MS. POTUTO: If I could, Mr. Battle,
5 was it Mr. Battle? Yes, I guess it was. When
6 you interviewed the student-athletes, or when
7 you talked to them about submitting their
8 statements on the reinstatement request, did you
9 name other tutors, or did you give them the
10 opportunity to specify anyone else, or did you
11 simply highlight Dr. Monk and Mr. Wright because
12 of their prior responses?
13 MS. KARPINSKI: The letter that is in
14 there, this came a couple of months after the
15 interview. So, at that point in time we had
16 already the names of the student-athletes who
17 said they received assistance and what type of

18 assistance they received.

19 So, the only assistance we were

20 talking about at that time was Dr. Monk, the

21 black notebook, or Adam Wright. I will say that

22 I personally interviewed on December

23 14th.

24 It is recorded where he also says that

25 it was Dr. Monk who assisted him with his exams

1 and gave him the answers. So, the letter is
2 consistent with what he has said in interviews
3 and it is recorded.
4 MS. POTUTO: I want, if I could, to
5 just go back a little. President Wetherell
6 started the hearing this morning, talked about
7 how this case initially presented itself. And I
8 was -- let me just ask this.
9 You had one student-athlete completing
10 test questions for another student-athlete,
11 although he had already
12 On the claim that
13 somebody in Athletic Academics Services directed
14 the athlete to do it, and yet that was not seen
15 as something that might implicate NCAA rules or
16 athletics academic issues more generally?
17 MR. WETHERELL: I will answer that

18 When we got that information, as I pointed out,

19 it was a quiz which was, I think, the Sports

20 Administration test or quiz, or something, but

21 not the music one.

22 Our initial reaction was, as I think

23 the provost has pointed out, it is not policy of

24 Florida State to have tutor or staff or faculty

25 giving exam answers to other students. That was

1 our initial concern.

2 Clearly, we understand that it is it

3 inappropriate and violations of NCAA rules. But

4 our initial investigation was to find out what a

5 particular staff member, in this case it

6 happened to be Dr. Monk.

7 By the time we got through that

8 conversation, the 30-some students and the music

9 exam came up, that was, as you see it, a

10 different set of circumstances. It was still

11 somebody was giving answers inappropriately.

12 But, yes, we figured we had a problem

13 in that regard. We wanted to be -- we didn't

14 know what we had and we wanted to find out.

15 MS. POTUTO: Remind me who was on the

16 original internal -- it was called the Internal

17 Audit Committee; is that right?

18 MR. WETHERELL: The internal auditor,

19 yes, ma'am.

20 MS. POTUTO: Who is the internal

21 auditor?

22 MR. WETHERELL: The University has an

23 internal auditor that reports to the Board. It

24 does audits on a variety of issues. The

25 question in my mind was who should look into

1 this?

2 If the Athletic Department did it and

3 came up with no fault, let's say, there was

4 going to be a suspicion that somebody had just

5 covered it up. I consequently believed we would

6 be better off taking it outside of the Athletic

7 Department.

8 Additionally, we were looking at

9 misconduct of an individual, and that's why we

10 also want the Human Resources Department

11 involved.

12 MS. POTUTO: Did the internal auditor

13 consult with Compliance, or talk to Compliance,

14 or look at it from the perspective of what might

15 ought to be NCAA violations? Although I

16 understand why you would go outside of

17 athletics, I am just wondering if it was done in

18 concert with or with the understanding that

19 there might turn out to be other issues also, or

20 was it first focused on the personnel issue and

21 more a general academic issue, and then you went

22 back in and engaged other with more familiarity?

23 MR. WETHERELL: When I initially

24 talked to Dave Corey, that is the internal

25 auditor, I told him he needed to talk with the

1 Athletic Department. Actually, he had formed a
2 little subcommittee which included, I think,
3 then Athletic Director Hart, the provost, and to
4 look at it because it would have implications.
5 We also called the ACC and told them
6 as well as we initially thought this could be a
7 minor violation as opposed to a major violation
8 since we thought it was one quiz, one person
9 doing one thing wrong as opposed to a much
10 broader deal.
11 As it became obvious this was broader,
12 and then we began -- and we also called the
13 NCAA. We then began more consultation with the
14 NCAA. We brought in Mr. Smrt, and we began
15 looking at a broader scope.
16 MS. POTUTO: So, it wasn't that one
17 was going and then at some point the other end

18 of it was engaged? You talked to the other

19 entities, whether it is the conference office or

20 people in compliance in athletics, as it

21 started?

22 MR. BECKHAM: May I address that?

23 MS. POTUTO: Yes. Professor Beckham

24 was with you on that Consulting Committee with

25 the auditor?

1 MR. BECKHAM: There was a meeting
2 prior to the investigation by the Audit Services
3 Division at the University to discuss protocols
4 for interviews with student-athletes, and I
5 attended that meeting.
6 One of the responsibilities that I
7 felt I had in that meeting was to remind the
8 auditors of Article 10, and to be sure that in
9 the protocol that students were aware that false
10 statements would implicate a violation of NCAA
11 rules.
12 Others in that room, including the
13 Dean of Undergraduate Studies, were emphatic
14 about informing and ensuring that students in
15 the course of the protocol used by Audit
16 Services would inform students of their
17 essential or right to due process and

18 disclosure.

19 But I did not observe or participate

20 in any of the inquiries by Audit Services, and I

21 cannot affirm that all those protocols were

22 incorporated.

23 MS. POTUTO: I was struck by, and

24 again I guess it was in President Wetherell's

25 opening remarks, that the students were told

1 that you are not at risk for anything, we are
2 not questioning you because you simply had not
3 done anything.
4 Now, that is an odd way to do an
5 inquiry before you have any information, and you
6 can say we don't know that we have anything, but
7 promises at the outset, which is the way it
8 sounds in the opening, based on the information
9 that had not yet been developed, seemed to me to
10 be an odd place to be.
11 Mr. Smrt.
12 MR. SMRT: The auditor did several
13 interviews.
14 CHAIRMAN THOMAS: Push your button.
15 MR. SMRT: The auditor did several
16 interviews. I don't think we have gone to each
17 one to see what was said at the beginning of

18 each one. We know that, and I am looking at one

19 interview with a staff member where they read

20 10.1 to the staff member.

21 Here is one to a student-athlete that

22 said we did not tell them the purpose of the

23 interview under 32.3.7. We didn't tell them

24 that. Instead, we told the purpose of the

25 interview was to determine whether employees'

1 behavior was involved.

2 I guess I feel uncomfortable telling

3 you what was said in each one, because it may

4 have varied depending upon the person.

5 MS. POTUTO: But you can understand

6 the concern, that if you start out on the

7 interview telling them they are not at risk, if

8 that is what was told, that makes it difficult

9 as you go in and find information to cure what

10 was not the right place to start. At least that

11 is my view of it, not the right place to start.

12 MR. WETHERELL: Well, if I might.

13 MS. POTUTO: Sure.

14 MR. WETHERELL: First of all, I think

15 probably what we said is you are not the target

16 of the interview, remembering that at that point

17 we were dealing with a quiz in a different

18 course that many of those students hadn't taken

19 or any part of.

20 So, we were trying to get information

21 and ascertain information about what was in

22 essence happening in athletics, in academic

23 support. We did notify, as I said, the NCAA and

24 the ACC, and we were very cognizant of potential

25 violations.

1 As soon as we began to get other
2 information, clearly if you look at the chain of
3 command from the athletic director to the
4 associate athletic director to Ms. Monk, et
5 cetera, it is an academic issue, but also an
6 athletic issue.
7 You look at the dotted lines and all
8 of that of who is involved. So, we were keenly
9 aware that we were on the verge of something
10 that could be a problem. The minute we
11 ascertained that there was a problem, that is
12 when we started going back saying, wait a
13 minute.
14 And that even when we were
15 interviewing students, it is my understanding, I
16 didn't sit in on those interviews, but students
17 would incriminate themselves in courses that we

18 weren't even talking about at that point in

19 time.

20 So, that is when we decided, wait a

21 minute, we have got to go a different route,

22 which is what we did.

23 MS. POTUTO: I think I understand the

24 chronology. It was what they were told

25 initially as to the consequences to them, at

1 least as I heard you describe it in the opening.

2 Mr. Lyons, or I guess it was Mr.

3 Price, did you advise them on anything that they

4 should alert the student-athletes to, and in an

5 inquiry that might not have anything to do with

6 them, but there is always the potential?

7 MR. LYONS: Our initial conversation

8 was as President Wetherell indicated, the

9 specifics of the initial test of providing the

10 answers to the test, and it is more of

11 personality issues. We did advise the

12 institution, which they were in the process of

13 doing, is making sure no other assistance to

14 other student-athletes had been provided and go

15 back to those individuals who did have the

16 advising through Dr. Monk to see if they did,

17 which was approximately 30 individuals.

18 Now, we didn't advise at that point

19 what was being said by the internal audit, but

20 we did advise and have to go back and interview

21 everybody that Dr. Monk had consultations with.

22 MS. POTUTO: Mr. Price, I assume they

23 called you. Did you advise them to be careful

24 about not saying anything in the first interview

25 that would lead the student to believe if the

1 information that might be developed will never,
2 you know, turn around to affect my eligibility
3 or my academic status at the University?
4 MR. PRICE: As I recall, when we got
5 involved, those questions had been asked and
6 there was concern about how they could be used
7 given the legal issues. But in the spirit of
8 cooperation, and this was an attempt to get
9 beyond that, everybody agreed we had to get that
10 information.
11 We may have to do some re-
12 interviewing. And even if certain people denied
13 they had done it, that wasn't going to stop. We
14 were going to continue. So, our effort was to
15 go in very hard to try to get the information.
16 The institution was completely cooperative with
17 that.

18 MS. POTUTO: I wasn't suggesting by

19 any means that there was a failure of

20 cooperation or a lack of understanding as to

21 where it would end up. I was concerned with

22 what might have been the initial information

23 given to the students, and then some of the

24 suggestion in the University's response that the

25 students -- that at that point they were

1 promised one thing or told one thing at the
2 start, and the effect of what happened later,
3 which is in part what triggered my question.
4 The other question is, can somebody
5 give me the chronology again? I had it when we
6 started before this hearing this morning, and I
7 probably have it somewhere if I want to dig for
8 it, but I am sure you can do it more quickly.
9 The internal auditors stepped in when?
10 MR. ABELE: The auditor, on May
11 28th -- excuse me, March 28th, the president
12 called the auditor in and said to begin the
13 process. At that time a database was built of
14 the 31 students who had contact with Dr. Monk,
15 as well as the other employees in the center.
16 MS. POTUTO: Okay. That was March,
17 '06?

18 MR. ABELE: That would be March, '07.

19 MS. POTUTO: Okay. It looks like from

20 your materials that Dr. Monk resigned; is that

21 right?

22 MR. ABELE: Yes.

23 MS. POTUTO: When was that?

24 MR. ABELE: Well, Mark Meleney can

25 give you the exact date. I was called on

1 approximately March 28th by the Dean of
2 Undergraduate Studies, and Mark was in the
3 office, and I said that the employee should be
4 removed from the office immediately.
5 And then I sent the computer security
6 people over to lock down the hard drive, to
7 maintain the integrity of the files. She was
8 then on administrative leave with pay until she
9 resigned officially in July, '07. But she was
10 no longer in the building.
11 MS. POTUTO: Is the internal auditor
12 first assigned the task on March --
13 MR. ABELE: March 28th.
14 MS. POTUTO: That is what I thought.
15 So, it is the same day for both acts, the
16 auditor comes on and Dr. Monk is relieved of her
17 duties?

18 MR. ABELE: From the discussions, Dr.

19 Monk admitted that she made bad judgment, and at

20 that point it was felt that she should be

21 removed from the premises and placed on

22 administrative leave pending investigation.

23 MS. POTUTO: Okay. So nobody looked

24 for what you are calling the black book. From

25 that point, you are doing the interviews, and

1 then you find out it might be relevant, but by
2 that time you have already -- I see Mr. Spetman.
3 Yes.
4 MR. SPETMAN: Ma'am, we were not
5 looking for the black book then. It was a
6 different issue.
7 MS. POTUTO: Yes, I understand that.
8 MR. SPETMAN: So that is they would
9 not have looked for it.
10 MS. POTUTO: I was trying to get the
11 chronology. At the point they started, you
12 didn't have any information that this was going
13 to be an issue. She is already put on
14 administrative leave and the office is locked
15 up, or the files are locked up, or both?
16 MR. ABELE: I know the computer was
17 locked up. I believe it also was also locked

18 would be unable to read the questions and would

19 be unable to understand most of the questions;

20 is that correct?

21 MS. MONK: I did say that, but I do

22 not know what his grade was.

23 MS. JENNINGS: Okay. Thank you.

24 CHAIRMAN THOMAS: Any other questions

25 on Allegation 1-(c)? If not, we will move to 1-

1 (d) after a break. We will take a 15-minute
2 break and we will reconvene back at 3:10. Thank
3 you.
4 (RECESS.)
5 CHAIRMAN THOMAS: Before we move to 1-
6 (d), we are going to switch the order, if it is
7 okay with the institution, staff and Dr. Monk.
8 We will go to 3 after 1-(d), and then 2 after 3.
9 Then after 3, Dr. Monk, you will have the
10 liberty to leave at that time, because there
11 might be some instances where we might want to
12 ask you some questions regarding Allegation No.
13 3.
14 Is that okay with you?
15 MS. MONK: Yes, sir.
16 CHAIRMAN THOMAS: Okay. Thank you.
17 Is that okay with the institution?

18 MR. SMRT: I didn't write that down.

19 You are going to 1-(d), 3, 2?

20 CHAIRMAN THOMAS: Yes.

21 MR. SMRT: Okay.

22 CHAIRMAN THOMAS: Is that okay with

23 the institution?

24 MR. SMRT: If that is the way the

25 Committee wishes, that's fine.

1 CHAIRMAN THOMAS: If it is not okay,
2 just state so.
3 MR. SMRT: Obviously, Dr. Monk is not
4 named in Allegation 3. We thought she was going
5 to be excused after 1, so she would not be
6 present for 2 or 3, because she is not named.
7 We don't see the relevancy in 2 or 3. However,
8 if that is what the Committee wishes, we don't
9 have a concern about that at all.
10 CHAIRMAN THOMAS: Well, the reason why
11 2 is there is because of what happened basically
12 in 1. She was the reason why 1.
13 MR. SMRT: I can see that 3 is
14 Goldsmith's unethical conduct.
15 CHAIRMAN THOMAS: At some point, does
16 she have any supervisory responsibility for
17 those individuals involved in 3?

18 MR. SMRT: No, I don't believe she

19 did. No, Goldsmith did not report to her.

20 CHAIRMAN THOMAS: Go ahead, Professor

21 Potuto.

22 MS. POTUTO: I thought the

23 organizational chart for the institution showed

24 Dr. Monk as the line to whom the tutors

25 reported.

1 Is that not correct?

2 MR. MELENEY: That is correct. The

3 person, first was the tutorial coordinator, and

4 then he reported to Dr. Monk, yes.

5 MR. SMRT: I thought the question was

6 Goldsmith reported to Dr. Monk, and Goldsmith

7 did not report to Dr. Monk.

8 CHAIRMAN THOMAS: No, that was not the

9 question.

10 MR. SMRT: Okay.

11 CHAIRMAN THOMAS: Does the institution

12 agree with the reordering?

13 MR. SMRT: That is fine. We agree

14 with the reordering.

15 CHAIRMAN THOMAS: Thank you.

16 The staff.

17 MS. THOMPSON: Subparagraph (d)?

18 CHAIRMAN THOMAS: Yes. Thank you.

19 MS. THOMPSON: Members of the

20 Committee, as it relates --

21 CHAIRMAN THOMAS: Hold on just a

22 moment. Okay. Staff, will you go with 1-(d),

23 please.

24 MS. THOMPSON: Members of the

25 Committee, as it relates to Subparagraph (d),

former athletic tutor Adam Wright violated the provisions of unethical conduct when he provided 55 student-athletes with answers to the MUH-2051 online course. Concerning Subparagraph (d), the enforcement staff and the institution agree to the facts as it relates to the subparagraph.

Although Adam Wright did not provide a response to the Notice of Allegations, Wright agreed during his November 8, 2007, interview with the enforcement staff and the institution that he provided answers in various degrees to numerous Florida State athletes in this course.

There are no remaining issues regarding this subparagraph, and the staff believes that the Committee should find Subparagraph (d) as reported.

CHAIRMAN THOMAS: Thank you.

18 The institution.

19 MR. SMRT: We agree. We believe in

20 Mr. Wright's interview he acknowledged this

21 provision. We are talking about three semesters

22 in which this occurred. We believe the

23 information from him and from the athletes is

24 contained in our response.

25 CHAIRMAN THOMAS: Thank you.

1 Dr. Monk.

2 MS. MONK: Yes, sir. I agree that

3 what Adam Wright said is correct.

4 CHAIRMAN THOMAS: Any questions from

5 the Committee?

6 MR. HARGROVE: I want to be sure that

7 the Committee understands that Adam Wright does

8 not report to Dr. Monk.

9 CHAIRMAN THOMAS: Would you speak into

10 the microphone, please?

11 MR. HARGROVE: Sure. Adam Wright did

12 not report to Dr. Monk. She did not supervise

13 Adam Wright. I just wanted to be sure that is

14 clear, because from where I sit I am not sure

15 that it is.

16 CHAIRMAN THOMAS: I apologize, but I

17 didn't quite understand what you had referenced

18 when you said Dr. Monk did not supervise whom?

19 MR. HARGROVE: Adam Wright, the

20 subject of 1-(d).

21 MS. JENNINGS: I had one little

22 question, if I could ask it. It goes back to

23 your describing, Mr. Meleney, before how

24 everybody took exams in an individual closed

25 room.

1 That is inconsistent with what I
2 understood happened with Mr. Wright. I
3 understood that people were taking it more maybe
4 in the computer lab, or in some area where a
5 number of open areas, where a number of people
6 would take the test at once.
7 Did I misunderstand that?
8 MR. MELENEY: No, ma'am, you did not.
9 What happened was our position as a program that
10 we set up our testing site, and the students
11 would check in to those rooms. Later in the
12 process, students were taking these music online
13 tests in our computer lab. I had no knowledge
14 of that.
15 MS. JENNINGS: Okay. Thank you.
16 MR. MELENEY: It did occur.
17 MS. POTUTO: Dr. Monk.

18 MS. MONK: Yes, ma'am.

19 MS. POTUTO: I just wanted to be sure.

20 Mr. Wright reports that you asked him for

21 answers to questions while you were sitting and

22 helping the student-athlete with the music exam.

23 This is on Page 1-27 of the Case Summary.

24 When you said you agreed, do you also

25 agree what he has reported occurred?

1 MS. MONK: I have already testified
2 that this class was a collaborative class and
3 there would be times that I would work with
4 students collaboratively. He would be -- this
5 would be prior to spring, 2007.
6 I am not sure exactly which semester
7 he is referring to, but it would be during the
8 period of time that I have already testified to
9 or spoken about, which was when it was a
10 collaborative class and various groups of
11 students would get together and work on the
12 quizzes with the materials that were available.
13 MS. POTUTO: Okay. And he also
14 reports that you asked him to look at the
15 answers in the binder and make sure they were
16 correct.
17 Do you agree with that?

18 MS. MONK: I don't recall that.

19 MS. POTUTO: I mean, let me be sure.

20 You don't recall or you did not ask him?

21 MS. MONK: I don't recall asking him.

22 CHAIRMAN THOMAS: All right. Any

23 other questions by the Committee?

24 All right. We will go to No. 3.

25 MS. THOMPSON: Members of the

1 Committee, Allegation No. 3 involves unethical
2 conduct against former academic advisor Hillard
3 Goldsmith. The enforcement staff believes that
4 Goldsmith committed academic fraud when he, one,
5 advised Wright to provide answers to student-
6 athletes who were taking the MUH-2051 exam, and,
7 two, when he instructed seven student-athletes
8 to be present in either the computer lab or the
9 tutorial rooms at a time when he knew Wright
10 would be present to provide student-athletes
11 with exam answers.
12 The enforcement staff and the
13 institution are in substantial agreement as to
14 the facts. However, the institution cannot
15 verify that Goldsmith instructed Adam Wright to
16 provide student-athletes with exam answers for
17 the online music course, because Wright was the

18 only person that provided this information.

19 Goldsmith did not cooperate with the

20 NCAA or the institution during its

21 investigations into this matter, and did not

22 respond to this allegation. Therefore, there is

23 one issue for this Committee to consider, which

24 is whether Goldsmith committed academic fraud as

25 set forth in Allegation No. 3.

1 The enforcement staff believes that
2 Goldsmith committed academic fraud as it relates
3 to this subparagraph, or as it relates to this
4 allegation, excuse me, and relies on the
5 following two points to support its position.
6 Point No. 1: Seven student-athletes
7 reported that Goldsmith instructed them to work
8 with Wright or that Wright would help them with
9 their MUH-2051 exam. The enforcement staff
10 asked the Committee to turn its attention to
11 Pages 3-2 and 3-3 of the enforcement staff's
12 Case Summary, which outlines what the student-
13 athletes have reported.
14 Point No. 2: When questioned about
15 other institutional officials involved in this
16 matter who knew or told Wright to provide
17 answers, Wright reported during his January 24,

18 2008, interview with the enforcement staff that

19 Goldsmith knew that he was providing answers to

20 student-athletes because Goldsmith asked him to

21 provide answers to the online exams, and that

22 Goldsmith brought people to him.

23 This concludes the staff's

24 presentation of Allegation No. 3, and the staff

25 believes that the Committee should find

1 Allegation No. 3 as alleged.

2 CHAIRMAN THOMAS: Thank you.

3 MR. DIDION: Mr. Chair, there is one

4 more thing to add to that. In the box on Page

5 3-1 of the Case Summary, there is an amendment

6 to make.

7

8

9 CHAIRMAN THOMAS: Will you repeat

10 that, Mr. Didion?

11 MR. DIDION: On Page 3-1 of the Case

12 Summary, there is a box underneath the start of

13 the allegation that identifies the student-

14 athletes, and student-athlete is

15 in

16 CHAIRMAN THOMAS: Okay. Thank you.

17 Any other corrections?

18 MR. DIDION: Not that I have found so

19 far.

20 CHAIRMAN THOMAS: The institution.

21 MR. SMRT: Yes. This allegation

22 basically has three parts to it. We agree with

23 the first two, and just don't believe we have

24 sufficient information to agree with the third.

25 But since we agree with the first two, we would

1 agree that constitutes a 10.1.

2 We agree that he instructed some

3 student-athletes to be present when he knew

4 Wright was to be present. We agree that he knew

5 that Wright would provide answers. Where we

6 disagree or just don't believe there is

7 sufficient information is that Goldsmith told

8 Wright to provide the answers, and we were not

9 present, and Adam Wright would not allow us to

10 be present for the second interview when he

11 provided this information.

12 During the first interview that we did

13 with him, we questioned him, I think, very

14 vigorously about tell us who knew at the

15 institution, and for the most part other than

16 the reason why he started doing it, he would not

17 tell us anybody at the institution who knew

18 this.

19 It was during the second interview

20 with the enforcement staff. In that interview,

21 there is only a couple of sentences where Wright

22 describes why he thought Goldsmith knew or

23 Goldsmith told him to do this.

24 So, we just don't believe the

25 information is sufficient to get to that third

1 piece. But the first two, we would think in
2 itself constitutes unethical conduct.
3 The institution has disassociated
4 Goldsmith, and we made the attempt during my
5 first trip to Tallahassee, and I talked to
6 Goldsmith the night before, set up an interview
7 for the next day, and the next day the newspaper
8 stories broke about this, and he left me sitting
9 at the public library at 10:00 o'clock.
10 So, he never showed up. I called him,
11 and he left a message back on my cell phone
12 saying I do not wish to participate. I don't
13 want to interview with you. Basically, he said
14 please don't call me again.
15 CHAIRMAN THOMAS: Okay. Any questions
16 from the Committee?
17 Professor Potuto.

18 MS. POTUTO: First, does anybody know

19 what he is doing right now?

20 MS. STEFFENS: To our knowledge, he is

21 employed in the State of Florida with the

22 Department of Education.

23 MS. POTUTO: The Department of

24 Education? I have a question for the staff, and

25 it goes to charging. As I understand it, he

1 never agreed to be interviewed; is that right?

2 MS. THOMPSON: That is correct.

3 MS. POTUTO: I would like to know why

4 neither 10.1-(a), nor failure to cooperate under

5 32.3.11 weren't charged.

6 MR. DIDION: Once again, I would have

7 to tell you that was oversight on our part not

8 to charge him with those.

9 MS. POTUTO: Let me just stop for a

10 moment and beg everybody's indulgence. One of

11 the concerns that the Committee has, and it is a

12 very, very strong concern, is that the charging

13 over a number of cases is consistent.

14 I ask these questions because I have a

15 concern that there is not a consistent approach

16 to charging these. It worries me. So, this is

17 probably my last swan song to make a speech.

18 But this does worry me.

19 CHAIRMAN THOMAS: Are there any other

20 questions by the Committee?

21 If no other questions, we will go to

22 Allegation No. 2.

23 MS. THOMPSON: Mr. Chair, at this

24 point, Dr. Monk and Brant Hargrove are still in

25 the room. I don't know if you want them to be

1 dismissed or not.

2 CHAIRMAN THOMAS: Would you repeat

3 that for me? I was distracted.

4 MS. THOMPSON: My question was Dr.

5 Monk and Mr. Hargrove are still in the room, and

6 Allegation No. 2 involves the failure to monitor

7 against the institution. I am not sure whether

8 or not you still want them in the room or they

9 need to be dismissed at this time.

10 CHAIRMAN THOMAS: Dr. Monk, what is

11 your position? You obviously have the right to

12 leave at this time. Before you leave, I have to

13 have some instructions that I would need to make

14 to you.

15 MR. HARGROVE: On behalf of Dr. Monk,

16 I can tell you as pleasant as this has been, we

17 don't see a need. We don't have a dog in this

18 fight.

19 MS. POTUTO: The chair is going to

20 give you the closing and give you some

21 information now. But before we go there, the

22 institution in its response, and they are going

23 to probably be able to help me find it faster

24 than I am going to be able to do it, had a list

25 of penalties, corrective actions and other.

1 Can you give me that page, Mr. Smrt?

2 MR. SMRT: It would be starting on 19,

3 20, 21, 22.

4 MS. POTUTO: And I really want to go

5 to "Other" on Page 22, because I want to clarify

6 with regard to everybody on this list who was

7 dismissed or let go because of this case, who

8 resigned, you believe resigned because of the

9 case, and which ones of these were serendipitous

10 in terms of they left, but it was not related to

11 this case.

12 I am asking while Ms. Monk is still

13 here, because she is one of the ones listed

14 under "Other". If we can go through each one of

15 them, I would appreciate knowing which ones you

16 contend are related to this case, and the

17 Committee should take into account in

1 So, there are a number of people who
2 have been former employees who are no longer
3 there for me to assign to them or contribute to
4 them some wrongdoing which would probably be
5 unfair.
6 I think it is safe to say there are a
7 number of people, as you can look at this list,
8 who are no longer there, and that was a general
9 feeling that we need to have a new leadership
10 and a new direction from the top down.
11 Now, I can answer your question with
12 regard to Dr. Monk. She voluntarily resigned
13 and we worked out a settlement agreement. Each
14 one of these will be different. It is not a
15 wholesale, which one has something to do with
16 this case or --
17 MS. POTUTO: Let me try to put it

18 differently. I want to know, when I am sitting

19 and deliberating, which one of these you want us

20 to consider as part of your institutional

21 response to this infractions case that is

22 relevant to penalties.

23 MS. STEFFENS: The entire list.

24 MS. POTUTO: The entire list?

25 MS. STEFFENS: Yes.

18 concern is there are a number of names on this

19 list.

20 If you want us to consider that their

21 conduct was part of the environment or activity

22 that led to these violations and, therefore, the

23 action taken with regard to them is relevant to

24 our assessment of other penalties, then you need

25 to tell me particularly, and then I think we may

18 concern is there are a number of names on this

19 list.

20 If you want us to consider that their

21 conduct was part of the environment or activity

22 that led to these violations and, therefore, the

23 action taken with regard to them is relevant to

24 our assessment of other penalties, then you need

25 to tell me particularly, and then I think we may

1 have some questions about whether the people on
2 this list had a chance to respond.
3 MR. SMRT: Is your question posed now
4 because Dr. Monk is here?
5 MS. POTUTO: Yes, because we can do
6 all the rest of them later, but Dr. Monk is on
7 this list. I think the answer is obvious, but,
8 nonetheless, I would like to have it on the
9 record explicitly.
10 MR. SMRT: It seems very appropriate,
11 then, for the institution to respond as it
12 pertains to Dr. Monk and the rest we can talk
13 about later.
14 MS. POTUTO: Right.
15 MS. JENNINGS: Did you say she
16 resigned under a settlement agreement? I didn't
17 hear you.

18 MS. STEFFENS: Yes.

19 MS. JENNINGS: Could you put your

20 mouth closer to the mike, please, Betty?

21 MS. STEFFENS: I apologize. We have

22 the settlement agreement and her resignation,

23 and there was administrative leave during the

24 investigation. But when we say settlement

25 agreement, it settled all issues, and one of the

1 issues we included in the settlement agreement
2 was her full cooperation with any investigation,
3 and Dr. Monk has fully cooperated. It was
4 important for us to obtain that.
5 I don't believe we had any disputes
6 regarding this agreement. It was to conclude
7 her employment and have a written document that
8 would refer her back, and it was important that
9 we have cooperation during the investigations
10 that followed.
11 CHAIRMAN THOMAS: As part of that
12 settlement agreement, were any financials
13 involved?
14 MS. STEFFENS: The remainder of her
15 contract was, I believe, up until the final day.
16 MR. PARK: I am sorry. I can't hear
17 you.

18 MS. STEFFENS: I am sorry. I am not

19 usually accused of --

20 MR. PARK: Get closer.

21 MS. STEFFENS: I am sorry.

22 MS. JENNINGS: Put it right up to your

23 mouth, Betty.

24 MS. STEFFENS: I will be happy to give

25 you a copy of this agreement and her

1 resignation, but the object was that she was
2 paid, I believe, through the month of July.
3 Dr. Monk, is that not correct? I
4 believe through July, 2007. Her contract was
5 about to expire, and that was worked in within
6 her resignation, which she signed it -- July
7 5th, which was the effective date, and she
8 signed it July 29th.
9 MS. POTUTO: And this was not listed
10 as a corrective action? Why? I have a concern,
11 and I think the Committee has a concern that if
12 anything is reported in this report that we are
13 reflecting what the institutional position is,
14 and no more than that.
15 MR. SMRT: She is listed in two places
16 in those pages that I just read to you, and she
17 is listed under Punitive Actions, that the

18 institution did not renew the contract of Monk

19 and Wright. That is correct.

20 Now, there is this "See Other

21 Charges." I guess technically she probably

22 should not be in "Other Charges" since she is in

23 (b). There is a distinction as being made very

24 clearly for a lot of purposes from (c) versus

25 (b).

1 MS. POTUTO: That answers it.

2 CHAIRMAN THOMAS: Okay. Any other

3 questions?

4 Dr. Monk, I understand that you have

5 elected to leave the proceedings with your

6 counsel; is that correct?

7 MS. MONK: Yes, sir.

8 CHAIRMAN THOMAS: Okay. Dr. Monk, I

9 want to advise you that after you leave the

10 hearing room, it is the Committee's expectation

11 that nothing that is said will involve

12 allegations concerning you.

13 Should the Committee believe that the

14 information being presented may affect you, the

15 Committee will cease discussion of that

16 allegation until you are given the opportunity

17 to participate.

18 You have the option of making a

19 closing statement now, and then dismissed, or

20 you may choose to return to the hearing room

21 after all the allegations with the University

22 have been addressed, and give your closing at

23 that time.

24 Do you want to give your closing now?

25 MR. HARGROVE: Mr. Chairman, thank

1 you. I can be repetitive, which I won't be.

2 CHAIRMAN THOMAS: Mr. Hargrove, you

3 elect to give the closing statement now?

4 MR. HARGROVE: What I am trying to get

5 at is in the spirit of brevity, I don't think

6 there is anything that I could add to what Dr.

7 Monk has said. I have tried to point out

8 through two mechanisms what her position is.

9 I have articulated in my two

10 responses. I have tried to point out things

11 that the Committee has let me point out. I can

12 argue about them. I don't know that in this

13 forum that is a good use of time.

14 It is all there. You have heard it.

15 I have been very explicit in my responses, my

16 written responses, and I think Dr. Monk has been

17 very explicit to you folks. So, I don't see any

18 strategic advantage or the necessity to sum it

19 up.

20 I think we have kind of done that

21 through the testimony to you. So, I won't labor

22 with it anymore, at least in this forum. So, we

23 will decline to make a closing comment. Unless

24 you need us to testify further, we are at your

25 call.

1 CHAIRMAN THOMAS: Okay. Thank you. I
2 do have to finish up with some additional
3 information to you and Dr. Monk. Thank you for
4 your comments, and we do appreciate your
5 response.
6 Does the University have anything that
7 it wishes to say?
8 MR. SMRT: No, we have no closing
9 concerning Dr. Monk and we will not say anything
10 about Dr. Monk in our closing.
11 CHAIRMAN THOMAS: Okay. The
12 enforcement staff related to Dr. Monk?
13 MS. THOMPSON: The only thing is I
14 would just like to thank you for your time and
15 cooperation as far as this case is concerned,
16 and thank you for making yourself available in
17 the numerous times I have asked and requested

18 you to be present. So, thank you. That's all I

19 have.

20 MS. MONK: You are welcome.

21 CHAIRMAN THOMAS: Dr. Monk, I am now

22 going to review with you and your counsel what

23 will happen after the hearing adjourns. The

24 Committee, after adjournment, will spend

25 whatever time is necessary in deliberations in

1 order to fully consider all the information in
2 the record, and then to resolve the issues and
3 determine if findings of violations are to be
4 made.
5 We will then consider the penalties,
6 if any, to be imposed. A member of the
7 Committee will be assigned to write a working
8 draft of the infractions report. That will take
9 approximately five to seven weeks.
10 The report will be divided into three
11 parts. One, an introduction in which the
12 Committee will provide an overview and context
13 of its findings. A section that discusses the
14 particulars of each violation.
15 A section that outlines and explains
16 the penalties.
17 Once the working draft is completed,

18 the entire Committee will review it, typically

19 on a conference call. The report then is put in

20 final form.

21 The Committee's public affairs liaison

22 will notify the president's office or the person

23 designated by the University to be notified.

24 This notification will occur 48 hours ahead of

25 the public release of the report. The

1 University will receive a copy of the report 24
2 hours before this release.
3 Dr. Monk, you will be notified 24
4 hours prior to the public release and receive a
5 copy of the report on the morning of the public
6 release. The public release of the report is
7 followed by a press conference with a member of
8 this Committee, usually the chair. There will
9 be no other statements by members of the
10 Committee about this case.
11 As to any appeal of the infractions
12 decision or penalty, you have 15 days from the
13 date the report is released to accept or to
14 appeal the decision. If you accept the
15 decision, the penalties are in effect from the
16 date of the public release. If you appeal, the
17 Infractions Appeals Committee will hear the case

18 and all appealed penalties are stayed until the

19 public announcement of its decision.

20 To exercise your appeal option, you

21 should send the notice of appeal form to Wendy

22 Walters at the NCAA. Ms. Walters is staff

23 liaison to the Infractions Appeals Committee.

24 You may submit your written appeal

25 within 30 days after the Appeals Committee

1 provides you with written acknowledgement that
2 it received your notice of appeal. Either Dean
3 Parkinson or Mr. Halloran will respond to your
4 appeal and represent the Committee on
5 Infractions at the appeals hearing.
6 The NCAA strives to preserve the
7 confidentiality of these proceedings and those
8 providing information. One aspect of that
9 effort is that in the public infractions report,
10 the names of individuals are redacted.
11 The requirement of confidentiality
12 also pertains to these hearings. The Committee
13 cautions all parties that you must refrain from
14 revealing what was discussed in the hearing
15 today, especially with the media, until after
16 public release of the infractions report.
17 You are free to leave. Thank you for

18 your attendance at this hearing today.

19 MR. HARGROVE: Thank you, Mr.

20 Chairman.

21 CHAIRMAN THOMAS: We will go to

22 Allegation No. 2 by the staff.

23 MS. THOMPSON: Members of the

24 Committee, Allegation No. 2 involves the failure

25 to monitor allegation against the institution

1 and the institution failed to monitor certain
2 aspects of the Athletics Academic Support
3 Services unit.
4 Specifically, the enforcement staff
5 believes the institution failed to take
6 appropriate steps regarding the following four
7 areas.
8 First, former director Mark Meleney
9 failed to sufficiently review and forward
10 information to the institution's NCAA compliance
11 staff when it learned of potential violations
12 involving the actions of Dr. Monk to determine
13 whether rules violations had, in fact, occurred.
14 Two, the institution failed to detect
15 or monitor that the MUH-2051 course was taken in
16 an inappropriate structured environment when the
17 number of student-athletes taking the course in

18 the 2006-07 academic year have more than doubled

19 than in the previous semesters.

20 Third, the institution failed to

21 detect that the Athletics Academic Support

22 Services Department had acted contrary to its

23 operating policies when it allowed Monk and

24 Wright to be present while student-athletes were

25 taking their online MUH-2051 exams.

1 Fourth, institutional personnel failed
2 to review a report generated by the Registrar's
3 Office that would have alerted the institution
4 that during the 2006-2007 academic year more
5 student-athletes registered in the MUH-2051
6 online course than in previous years, and that
7 the same year a disproportionate amount of
8 student-athletes were receiving higher grades in
9 the MUH-2051 exam than student-athletes that
10 were taking this course in previous semesters.
11 The institution and the enforcement
12 staff are in substantial agreement as to the
13 facts, and there are no remaining issues that
14 need to be discussed. Therefore, the Committee
15 should find this allegation as reported.
16 This concludes the staff's
17 presentation of Allegation No. 2.

18 CHAIRMAN THOMAS: The institution.

19 MR. SMRT: We agree that there was a

20 failure to monitor. Joyce used four components,

21 and I will touch upon very briefly some of

22 those. The first paragraph or the first

23 component is that several individuals came to

24 Mark Meleney questioning Dr. Monk's activities,

25 and Mark should have reported that on to the

1 Compliance staff.

2 He deferred to Dr. Monk's experience

3 in this area, that all was permissible. But he

4 should have contacted the Compliance staff about

5 that.

6 Paragraph (b) relates to the

7 structured or lack of structured environment.

8 Mark talked earlier about ideally what should

9 have gone on when athletes came in to get

10 tested. That was not done, and that was another

11 reason that some of this resulted in what it

12 did.

13 Paragraph 3 concerned whether there

14 was a policy that a tutor could not be present.

15 That was the practice. There wasn't a written

16 policy, that was the practice, but obviously

17 that was not adhered to.

18 The fourth, of all the things in this

19 No. 2, the thing that is most disappointing, I

20 guess, is that the institution was tracking the

21 number of athletes in courses and the

22 proportional grade the athletes were receiving

23 versus other students. We work with a lot of

24 institutions on compliance reviews, and we have

25 not come across another school that does this

1 type of report.

2 Unfortunately, this report didn't get

3 to the people it should have, and it would have

4 picked this up. So, the institution was doing

5 something that very few do to avoid this

6 situation. But the report didn't get to whom it

7 should have gotten to.

8 So, I think that a lot of this -- at

9 least the right piece of this could have been

10 avoided if the instructor would have done a few

11 things, but also if this report would have

12 gotten forwarded to where it should have gotten

13 forwarded to.

14 Again, there are not many

15 institutions, and I am not sure if I can tell

16 you of another one, that does this. But it just

17 didn't get to the people that it should have.

18 It has been going on since the mid-

19 1990s, and also got to where it was supposed to.

20 But there was never a problem. When a problem

21 arises, it didn't get to where it was supposed

22 to be. Dr. Abele can address that if you need

23 more detail.

24 CHAIRMAN THOMAS: Any comments from

25 the Committee?

1 MS. POTUTO: I have some questions in
2 here, and I am not entirely sure whether they
3 are more pertinent than when we discussed
4 penalties or with regard to the general failure
5 to monitor.
6 So, unless anybody cares, I think I
7 will do them now because some of them are
8 directed at student-athlete reinstatement. You
9 may not want to sit all the way through
10 penalties.
11 I want to try to understand a
12 little -- to make sure that I understand, first,
13 general policies there and some particulars with
14 regard to this case.
15 First, if I read your memorandum of
16 October 8, 2008, correctly, as of December,
17 2007, the Committee directive as to withholding

18 for academic fraud is now permanent

19 ineligibility. In other words, it is no longer

20 one and one, we are up to permanent

21 ineligibility.

22 MS. BAKER: Yes, that is correct.

23 MS. POTUTO: All right. Is that new

24 withholding what would happen without regard to

25 when an academic fraud violation may have been

1 committed. So, if I am in Nebraska and I
2 report, let's say, on February 15th, 2008, an
3 academic fraud incident that occurred in
4 September, '07, would the student-athlete in
5 Nebraska be subject to the permanent withholding
6 or the one and one? Are you looking at when the
7 academic fraud occurred, or when the
8 reinstatement request is made?
9 MS. BAKER: Yes, I appreciate the
10 question. We are looking at the time that the
11 conduct occurred. So, I think in your example,
12 I think you gave a fall of '07 conduct.
13 MS. POTUTO: Right.
14 MS. BAKER: So, then, we would be at
15 the older guideline, if you will, for student-
16 athlete reinstatement.
17 MS. POTUTO: Is this new, the

18 permanent withholding, has that been

19 disseminated to the member schools and the

20 Compliance people? How did you do it?

21 MS. BAKER: Yes, we are still in the

22 process of doing that. We have talked about

23 that at our Regional Rules Seminar. The

24 information has been disseminated for Division

25 I, and again there is a Division I specific

1 change in the guideline through the CCACA
2 Conference membership, and then hopefully that
3 is being disseminated down to their member
4 institutions.
5 But we are still in the process of
6 disseminating that information and very
7 respectful and cognizant of the notice function.
8 MS. POTUTO: The -- I lost my train of
9 thought. Let me back up a little so I can do
10 it. Those guidelines are for academic fraud.
11 If the student-athlete misrepresents, lies or
12 fails to disclose fully, as I understand it,
13 that is an add-on.
14 You have permanent ineligibility and
15 you don't know where it is going anymore. But
16 that is an additional consideration; is that
17 right?

18 MS. BAKER: Yes. I think we can cite

19 a false or misleading charge, if you will. So,

20 it could be an additional charge.

21 I would like to state I think as most

22 people in this room know that the permanent

23 ineligibility is a starting point. It does not

24 mean that there is no room to mitigate from that

25 point.

1 MS. POTUTO: What is relevant to
2 mitigation?
3 MS. BAKER: Well, as you know, we take
4 all of the information that is presented before
5 us, and much of that can be deemed mitigation.
6 The individual culpability of the student-
7 athlete is something that we look at; the
8 institution's culpability and responsibility in
9 the circumstances.
10 MS. POTUTO: Explain that to me,
11 because I had obviously misunderstood. I
12 thought that institutional culpability was this
13 Committee, and what you look at was student-
14 athlete culpability exclusively. Obviously, I
15 misunderstood.
16 So, if you would explain what exactly
17 you do with regard to institutional culpability

18 when you are looking at the student-athlete's

19 responsibility.

20 MS. BAKER: Yes. Thank you. Perhaps

21 I misspoke. Obviously this body has the purview

22 over the institutional responsibility, and our

23 Division I Student-Athlete Committee does look

24 at the student-athlete culpability.

25 When we talk about the institution's

1 involvement, some of that can take into account
2 misadvisement and other types of conduct that
3 may affect the culpability of the student-
4 athletes.
5 MS. POTUTO: Let's look at this case
6 in particular. You went from, I guess it would
7 have been -- would it have been permanent
8 ineligibility considering when the request was
9 made, or are you still under a one and one at
10 that point?
11 MS. BAKER: We were still at the
12 starting point for seed of season, charge of
13 season, one on one.
14 MS. POTUTO: You had not moved to an
15 additional one yet?
16 MS. BAKER: Not for this case, yes.
17 MS. POTUTO: Okay. You went from one

18 on one to 30 percent for one year, which, I

19 guess, most people would say a hefty decrease.

20 How much of that was based on your

21 decision that institutional responsibility

22 mitigated student-athlete responsibility?

23 MS. BAKER: It is hard to say in a

24 succinct way. As you know, as you have read the

25 materials, this has been an extraordinary

1 situation and extraordinary circumstances.
2 Within the review of the student-athlete, we
3 look at things in totality, so that includes the
4 entire circumstance.
5 MS. POTUTO: Well, let's talk about
6 this case. What are the entire circumstances
7 here? How much of it was claimed by the
8 institution as to institutional responsibility
9 that you thought mitigated student-athlete--
10 the first 19, 20, or 21, I never did get the
11 number straight because it was a floating
12 number. Fifteen of those initially you decided
13 deserved one and one; is that right?
14 MS. BAKER: Yes, in our first review
15 of the matter, yes. I can say that those 15, I
16 believe, had an institutional charge, if you
17 will. The institution itself charged student

18 conduct violation.

19 That is important in what we look at

20 from student-athlete reinstatement, because the

21 institution is finding some culpability through

22 their process as it has gone through their

23 entire student conduct code process. So, that

24 was important for us.

25 The status of those students changed,

1 and we got new information. As you know, this
2 case has evolved and you have heard it today and
3 you have read it, and I am sure over the last
4 several weeks through the materials and the case
5 evolved, and we had reconsideration based on new
6 information and additional information.
7 MS. POTUTO: I am interested,
8 obviously, in the institutional culpability
9 part. What you did with student-athletes is
10 over in your end of the world. But the
11 reassessment of student culpability, based on
12 the information they were not culpable, or was
13 it based on information presented that the
14 institution really bore the brunt of the
15 violation?
16 MS. BAKER: It is based on the
17 culpability of the student-athletes. In

18 addition, as you know, we do have some precedent

19 within this particular area. We look at that,

20 the fact that the institution did not charge

21 within its own administrative process.

22 The student code of conduct was

23 important to the view from our staff on the

24 culpability of the student.

25 MS. POTUTO: That is awfully general.

1 Could you be more concrete?

2 MR. LENNON: If I may, Jo, very

3 quickly. The staff and the Reinstatement

4 Committee obviously operate with the authority

5 that they have been given and within the

6 guidelines that have been established to look at

7 mitigation.

8 MS. POTUTO: Mr. Lennon, can I stop

9 you a second? As I understand it, this was the

10 staff based on Committee's guidelines and

11 discretion. The Committee was not involved at

12 the decision-making stage; is that right?

13 MR. LENNON: That is correct.

14 MS. POTUTO: Okay.

15 MR. LENNON: The staff operated with

16 the authority it has been given to consider the

17 mitigation well within its authority and balance

18 to do so. Specific to your question, I think

19 maybe we can get right to it.

20 When the institution came forward and

21 said this is the environment that existed within

22 this course, or the courses in question for

23 these students, they did indicate that there

24 were institutional problems.

25 There were challenges that needed to

1 be considered when you looked at the individuals
2 in their specific culpability. So, if the
3 question is was that factored in? I think the
4 answer is it absolutely was.
5 I can also share with you that the
6 staff did not simply accept whole cloth without
7 any thought to the 30 percent. That was the
8 source of lengthy conversations as we looked
9 again at individual culpability across all the
10 stats, looked at the institution's response and
11 the climate that they talked about that these
12 violations occurred within and reached the 30
13 percent.
14 MS. POTUTO: I don't want to
15 interrupt, but I want to be clear on the facts.
16 I thought, and I may well have misread this,
17 that the initial proposal from the institution

18 was 20 percent.

19 Did I misread it? Was it always 30

20 percent?

21 MR. SMRT: It was 30.

22 MS. POTUTO: Okay.

23 CHAIRMAN THOMAS: Any other questions?

24 MS. POTUTO: Yes, I have not finished

25 this yet.

1 CHAIRMAN THOMAS: Let me ask one
2 question. When it comes to mitigating
3 circumstances, is this the final destination or
4 is there another body to address that, or are
5 you-all the final destination regarding
6 unethical conduct or academic fraud?
7 MS. BAKER: I am sorry, Mr. Chairman.
8 In general or in this specific instance?
9 CHAIRMAN THOMAS: Both.
10 MS. BAKER: Well, for this specific
11 instance, the staff was the final decision-
12 making body, because the institution did not
13 choose to appeal the staff's decision. There
14 is, as you know, an opportunity to appeal, and
15 that would be to the Division I Student-Athlete
16 Reinstatement Committee.
17 MS. POTUTO: Can I pursue that? If I

18 ask for 30 percent and I get 30 percent, what

19 would I be appealing?

20 MS. BAKER: I don't believe you need

21 to appeal anything.

22 MS. POTUTO: I would think that

23 somebody would send me to a psychiatrist

24 quickly, I believe. All right. So, if I heard

25 Mr. Lennon correctly, the student's culpability

1 was determined to be mitigated because of the
2 additional information provided by the
3 institution about the institutional -- the
4 environment that was created at the institution
5 out of which this occurred?
6 MR. LENNON: I think that is a fair
7 statement.
8 MS. POTUTO: And the institution
9 agrees that was the case that you presented?
10 MR. SMRT: I think it is as stated in
11 the restoration request. We said this is an
12 institutional problem and the athletes should be
13 given credit, some credit because of the
14 institutional problem.
15 MS. POTUTO: Okay. And would you
16 agree that the institutional problem was of a
17 large magnitude if the student-athlete

18 reinstatement staff were willing to give such a

19 credit to the student-athletes because of the

20 institutional culpability?

21 MR. SMRT: I didn't hear Reinstatement

22 say what percentage, so I don't know what

23 percentage it was.

24 MS. POTUTO: I know they started out

25 with one and one for 15 of them. I don't know

1 what happened with the others. They started out
2 with one and one, and they came down to 30
3 percent, and there was on the submission as to
4 the environment and the institutional
5 culpability.
6 Would you agree with that part, or was
7 that cited accurately without regard to a
8 conclusion, or that it --
9 MR. SMRT: I hope the institution did
10 a good job in their letter and they convinced
11 the Reinstatement staff that it should reduce to
12 30 percent. What percent was it? The
13 institution said penalizing -- take away
14 something from the athletes because more of it
15 is the institution.
16 That was four or five points that we
17 made. I can't tell you which factor they used.

18 I would think it was used. I don't know how

19 much.

20 MS. POTUTO: Let's put on the record

21 what other factors were there.

22 MR. ABELE: May I present from the

23 academic vice-president's perspective some

24 context for this?.

25 MR. ABELE: May I from the academic

1 vice-president's perspective have some context
2 for this?
3 MS. POTUTO: Well, yeah. I mean, I
4 have read all the stuff and I understand the
5 context. I am just trying to find out on the
6 presentation to Student-Athlete Reinstatement
7 what the considerations were that you raised.
8 I am going to inquire of them whether
9 they can tell me, you know, how they assessed
10 it. They may say no.
11 MR. ABELE: I will try and do it in
12 three minutes. In my 25 years in academic
13 administration, I have never seen so many
14 factors so unfortunately come together.
15 VERY BRIEFLY, This faculty member
16 taught a course for many years. He went on
17 sabbatical. Two people took the course who had

18 open book. The professor came back and violated

19 our own guidelines on the requirement for

20 proctoring of all online exams, whether you are

21 on campus or off campus.

22 When he then met with students, the

23 first 21 students he found one asked for a

24 hearing, four he found not responsible even

25 after they had admitted culpability to some

1 extent.

2 Sixteen, he had signed a Step One

3 Agreement for academic misconduct. Then when

4 some students found out that he gave other

5 students a by, they went back and he started

6 reversing himself.

7 My feeling at that point was the

8 faculty did not follow stated University

9 guidelines, that the two terms before all of

10 these things happened, the faculty member who

11 taught the course was, in my view, was

12 ridiculously lax, if not to the extent that was

13 portrayed earlier, but still lax, nonetheless.

14 And the fact that the faculty member

15 kept changing his mind on how much the students

16 knew about the course during his interview. Our

17 academic honor policy requires the faculty

18 member and the student as the first point of

19 contact.

20 So, by this time it was a mess. We

21 conveyed that to the individuals here, and

22 apologized, and as I will apologize to everyone

23 here. We should never be here if the faculty

24 member had followed what is published in the

25 University and what is required.

1 So, that is how the University felt
2 culpability. We did not monitor that faculty
3 member and his responsibility for proctoring,
4 which is very specific. That is if you are off
5 campus, you must obtain a proctor's
6 certification in advance.
7 That proctor's certification has to be
8 accepted and then the exam given. He ignored
9 all of those things.
10 MS. POTUTO: Can I just inquire? How
11 about the other two professors that taught this
12 course, were they also in violation of the
13 protocol?
14 MR. ABELE: Yes, they were. However,
15 because they said it was open book, that changed
16 it somewhat. But they still violated the
17 protocol that requires proctor certification.

18 MS. POTUTO: So, the four or five

19 things that were presented to Student-Athlete

20 Reinstatement were, one, it is a mess that the

21 professor is moving back and forth on this and

22 it is a moving target; two, the institution is

23 culpable is the second piece of it.

24 Mr. Smrt, you said you had two or

25 three others.

1 MR. SMRT: In our October 15th
2 submission to Reinstatement, we list out almost
3 ten points that we think litigated individual
4 student-athlete responsibility. I can read
5 those to you if you want. Those would be
6 included in our most recent submission this week
7 to you.
8 MS. POTUTO: I can read it. I will
9 look. Let me get back to Student-Athlete
10 Reinstatement.
11 MR. BECKHAM: Professor Potuto, may I
12 add what you asked us for and explain that would
13 relate to the considerations that were weighed
14 with regard to institutional and individual
15 culpability?
16 I wanted to mention one other, if that
17 would be permissible. During the fall, I served

18 on the Ad Hoc Committee appointed by the

19 president to review the information that we had

20 following the Audit Services investigation,

21 which Provost Abele chaired.

22 Throughout that fall term of 2007, we

23 were incrementally adding to a body of

24 information that we felt pointed towards

25 implicating additional students beyond the

1 initial students who came forward and admitted
2 their involvement in misconduct in the course.
3 However, the body of evidence that we
4 had, we continually debated as a Committee
5 because we did not feel it was sufficient to
6 meet the standard of the honor policy, which was
7 the preponderance of the evidence.
8 One of the factors that led to the
9 decision to approach the NCAA staff had to do
10 with trying to build a base for a penalty that
11 would honor our obligation under the NCAA
12 eligibility standards, but at the same time
13 provide a basis for encouraging students who we
14 felt were implicated to come forward and admit
15 their involvement.
16 So, another factor of meeting at the
17 NCAA headquarters in November was our desire as

18 an institution to provide some encouragement to

19 students to come forward who had not done so.

20 That was a related factor.

21 MS. POTUTO: I have a question over

22 here to Student-Athlete Reinstatement. If the

23 institution said we are in such a mess about how

24 the course was set up by the professor and how

25 we are going to be able to figure out how many

1 others may have been involved, I assume that you
2 are saying that that weighs into your
3 determination as to the individual student-
4 athlete's culpability.
5 MS. BAKER: I would say yes, the
6 culture that was created and the environment
7 that was created, and the documentation that we
8 had of that does weigh in and work, I guess, in
9 favor of the student-athlete, if you will, and
10 lessen their culpability because of the
11 environment that was created by the institution.
12 MS. POTUTO: Okay. Now, if I am a
13 student-athlete in fall, '06, and I used the
14 assistance rendered on three of the six quizzes,
15 and I am ineligible at the time I committed the
16 academic fraud, if my institution comes -- I
17 have done this in fall, '06, and my institution

18 comes forward in February, '07, and I have

19 competed in that fall, have I competed while

20 ineligible if I am engaged in academic fraud?

21 MS. BAKER: There are a lot of things

22 that go into that. But if the conduct occurred

23 in the fall and was deemed to be academic fraud,

24 then that student-athlete would be ineligible.

25 MS. POTUTO: From the time of the

1 conduct?

2 MS. BAKER: Well, it again depends on

3 the investigation timing and the interpretation

4 and when the interpretation is garnered.

5 MR. LECHNER: Jo, I have just one

6 question.

7 MS. POTUTO: Sure.

8 MR. LECHNER: Simply put, what is the

9 essence here, the fraud or the finding of the

10 fraud? What triggers it, the actual commission

11 of the fraud or the finding of the fraud? It

12 seems to me that it would have to be the fraud

13 itself. Whether there is a finding or not, the

14 fraud exists.

15 MS. BAKER: I would agree with you as

16 would our Committee, yes.

17 MS. POTUTO: Okay. So, once I find it

18 and I self-report it, and you determine that you

19 agree with me, the student-athlete is ineligible

20 from the time of the commission of the academic

21 fraud, then I am seeking reinstatement.

22 It is not when I find out about it, is

23 it, because in that case I could be dilatory,

24 right?

25 CHAIRMAN THOMAS: Professor Potuto

1 gave an analogy early on about something
2 happened in September, '07, you found out about
3 it in February, '08, and you indicated that
4 September, '07, was the time that the
5 ineligibility would be rendered. So, which one
6 is it? I am confused.
7 MS. BAKER: No, I think that is
8 correct. I think that is an accurate depiction
9 and I would agree with Professor Potuto's
10 question.
11 CHAIRMAN THOMAS: That was my
12 understanding when it was brought to my
13 attention last year about the change in the
14 academic fraud situation from our compliance
15 people.
16 So, I guess I won't -- I understand
17 now the consistency part of it now, so I am

18 clear on it. Thank you.

19 MS. POTUTO: Let me get back to the

20 institution, because you did have athletes who

21 committed the academic fraud in fall, '06, and

22 you had some in spring, '07, a lot in spring,

23 '07, and a few in summer, '07.

24 We now know from the commission of the

25 academic fraud they are ineligible and the

1 Committee, at the request of the institution
2 about regular season and conference competition,
3 and I think their response back was it is our
4 position that they didn't compete while
5 ineligible.
6 Does that mean that none of the
7 athletes in fall, '06, competed?
8 MR. BECKHAM: Mr. Chairman, may I
9 respond in part?
10 CHAIRMAN THOMAS: Yes.
11 MR. BECKHAM: The question of
12 eligibility with regard to the point at which it
13 occurs also influences, and the notion of a
14 dilatory response by an institution is not
15 consistent, in my view, with what the
16 institution did in this case.
17 To be dilatory would suggest that we

18 were negligent. I would urge the Committee that

19 we exercised due diligence here. So, to punish

20 due diligence is different than punishing a

21 dilatory conduct.

22 MS. POTUTO: I used the word, but I

23 wasn't referring to you at all. I was just

24 trying to find out where they timed it. If it

25 sounded like I was describing what Florida State

1 did, I apologize, because that was the furthest
2 thing from my mind.
3 If you had athletes who competed in
4 fall, '06, and they are ineligible from the time
5 of the academic fraud, then you have athletes
6 who competed in regular season and conference
7 competition.
8 Now, were there any fall, '06 -- were
9 all of them in fall, '06, in the course for
10 which a finding of academic fraud was made, did
11 none of them compete? I have the same question
12 for spring, '07.
13 MR. SMRT: We assume some of the
14 athletes that competed in which fraud was
15 committed in the fall of '06 and spring of '07,
16 participated in regular season and
17 championships.

18 Our response this week was that we
19 couldn't within a matter of two days come up
20 with 61 athletes' regular season games, et
21 cetera. So, that was our response about the
22 specifics.
23 Now, Betty can tell you about the
24 statement in there that these have been
25 resolved.

1 MS. STEFFENS: Professor Potuto, I
2 think you are obviously working with a set of
3 principles that you are very familiar with and
4 your staff are working from, and I wish we fit
5 in them as perfectly as you wished that we may
6 fit into them.
7 But I don't think we fit in all the
8 categories, and we were on both sides of the
9 shop here asking for advice a year ago from
10 today. If we knew somebody was ineligible, we
11 sat them.
12 I know that is different than where
13 you are going. But let me start with what we
14 knew and how we got there. When we found out
15 somebody was ineligible, we sat them down and we
16 started communicating on what to do next.
17 We sort of got two sides of the shop

18 involved at NCAA on how do we deal with this

19 eligibility? You have heard them talk about the

20 mitigating factors and the circumstances and all

21 of that.

22 In our minds, and I am not speaking

23 for the NCAA staff, we needed to resolve all of

24 these issues as best we could in one fell swoop

25 with regard to eligibility if we were going to

1 get to move forward.

2 We had students with lawyers, we had

3 students without lawyers, we had categories of

4 honor code. We were not going to go anywhere.

5 We would be playing players that we should not

6 be playing that we knew probably had done

7 something wrong.

8 One of our goals was to bring it in

9 for a landing with some finality, and with the

10 truth on the record as to who did and didn't

11 take advantage of our problems within this music

12 class.

13 We believe or we believed what we came

14 away with last November, after we tooled up here

15 to Indianapolis, was a resolution of

16 ineligibility. Maybe we are wrong, maybe we are

17 naive, but we felt that we resolved the issue of

18 eligibility for these students.

19 They were to pay the 30-percent

20 penalty of their season. Whether or not, and I

21 know you are an expert so I apologize, that

22 there was not a discussion that, oh, by the way,

23 there is this other eligibility issue.

24 If that child played, even though you

25 didn't know about it, and they had been in that

1 guy's last, even though the instructor didn't
2 find them guilty, they now are guilty. So, we
3 have that dilemma that not all these young
4 people were cheating to the same degree or
5 guilty to the same degree, we put them all in
6 the same box, and then we nullified the class.
7 Now, that is another concept that you-
8 all will have to work with us on. We took it to
9 the faculty, and had it wiped off the record.
10 Those young people weren't in that class. It
11 was nullified. It was a do-over.
12 They were to be held harmless for
13 purposes of eligibility so they could keep their
14 scholarships and they could move forward.
15 MS. POTUTO: Let me just clarify this.
16 This Committee doesn't deal with eligibility,
17 but we do deal with the vacation of records,

18 because a participation of ineligible student-

19 athletes, that is a different issue, and for

20 that issue, at least one person's view up here

21 is they compete while ineligible.

22 What the student-athlete reinstatement

23 did, was restore them to eligibility going

24 forward. They can't fix the ineligibility that

25 occurred prior. They can impose some penalty on

1 the student-athletes for the academic fraud.

2 But the ineligible participation that

3 occurred for purposes of the institution is a

4 vacation issue.

5 MS. STEFFENS: I obviously recognize

6 this body has the authority and discretion to

7 decide that issue. Part of what I would

8 suggest, as you are using your discretion, that

9 we didn't fit into a box, that we had a variety

10 of issues involved, we had a class that was

11 wiped off, all our records for all our student-

12 athletes, not just the kids that admitted

13 culpability. It was a nullity.

14 Now, you may --

15 MS. POTUTO: Let me give you another

16 piece of what I am thinking about. So I will

17 just put it on the floor so you can respond.

18 You nullified the class after they completed the

19 class and got the second grade; is that right?

20 MS. STEFFENS: No, ma'am.

21 MR. WETHERELL: I believe we nullified

22 that class, period. Some students retook it and

23 got the same grade. Some people got a different

24 grade. I will defer to the provost. Some

25 students didn't retake it at all, I think.

1 Is that correct?

2 MS. POTUTO: I didn't ask the question

3 correctly. If I am a student-athlete in fall,

4 '06, and I committed the academic fraud, I went

5 to Student-Athlete Reinstatement and I was

6 reinstated to eligibility.

7 If that class in fall, '06, were

8 removed from my record, I might not have enough

9 credits to be eligible the next year. I might

10 not have a grade that meets the required GPA

11 requirement.

12 I might not have made the six hours.

13 I may not have made a host of eligibility

14 requirements. I don't think that is what you

15 did. I think those grades stayed, the credits

16 stayed until the course was retaken.

17 Now, if I misunderstood how you

18 described it, please correct me.

19 MR. BECKHAM: May I at least offer an

20 observation in that regard? Professor Potuto, a

21 consideration that weighed in my mind with

22 regard to the approach that we used for this was

23 that if we nullified the course prior to the

24 opportunity for a retake, it would affect the

25 financial aid and support for him of the

1 students who were involved in this course.

2 These include both Pell Grant and

3 student loans, and other support. That would

4 have been an undue hardship on the 61 athletes

5 that were involved.

6 MR. WETHERELL: If I could also on

7 that, to follow up, yes, ma'am, you are correct.

8 But as has been pointed out, there were other

9 issues at stake ranging from financial aid. We

10 have a program in Florida called Bright Futures.

11 We have a program called Prepared.

12 There were significant ramifications.

13 Part of the reason that we are here today and

14 part of what we suggested in our opening

15 statement, this is a unique case and does not

16 fit into that box.

17 We can sit around and play what if

18 games for a long time. We hope that we don't do

19 that because part of it is that we sort of did

20 that to get to the situation where we could

21 present you with a set of facts that are in

22 disputable.

23 If we would have done that, then we

24 would have said okay, son or daughter, or

25 whoever, take this other course in the summer,

1 and they would not have been ineligible at that
2 point in time.
3 I don't believe the course itself, and
4 I may be wrong, by failing that course at that
5 moment in time did not make anybody ineligible.
6 If they would not have had the courses, the
7 other courses for the summer school they may
8 have been.
9 I think there were a couple of
10 students in that circumstance. But generally
11 speaking, that one course at that moment in time
12 did not change anything. It had the
13 implications to change something should somebody
14 then had not taken an extra three hours the
15 following semester to get eligible for the fall.
16 I believe that to be the case.
17 MS. POTUTO: I am not necessarily

18 suggesting that you needed to do something else.

19 I am just putting in context the vacation issue,

20 because that is one that can be handled now

21 without regard to trying to remake history.

22 But as long as the question came up,

23 are you confident if the course had been -- if

24 you were not able to use the course, that

25 everybody would have been eligible the semester

1 subsequent to the academic fraud on six hours,
2 twelve hours, GPA?
3 MR. WETHERELL: I believe we looked at
4 that and there might have been, Stacey, if I am
5 correct, there might have been potentially one
6 student , if I am not mistaken, that may
7 have fallen in that circumstance.
8 I don't want to be held to that one.
9 But again part of the discussions with
10 Enforcement and Reinstatement dealt with this
11 whole issue in a broader sense, because we
12 realized we were going to be before you at some
13 point in time.
14 And certainly what you have raised is
15 a legitimate question and a legitimate issue,
16 and it deserves to be aired. But it begs the
17 question of how we got to where we are and are

18 able to share with you facts, not, well, we

19 think.

20 We are pretty darn sure of what might

21 have happened here, as embarrassing as it might

22 be. I will speak to some of that other in the

23 closing if you like.

24 CHAIRMAN THOMAS: From the chair's

25 position, I do understand the arduous situation

1 that the University was in in terms of student-
2 athletes' eligibility and how that impacted a
3 whole lot of other variables.
4 However, I think that the situation
5 with the reinstatement moving forward, I think
6 the Committee would have to take a look at the
7 ineligibility that was happening at that time
8 and consider the vacation issue from that time
9 prior to the reinstatement by the NCAA. So, I
10 think that is where we are.
11 If the Committee has -- Jo, do you
12 have anything else?
13 MS. POTUTO: No, I am pretty sure that
14 everybody would like me to shut up, so I don't
15 have anything else.
16 MR. LYONS: Just one comment on that,
17 and from the membership. I have been doing this

18 for over 20 years, and I think there is a

19 reinstatement, and obviously here we are talking

20 about academic fraud and 10.1.

21 But there are other things that fall

22 under 10.1. One, gambling. You know,

23 ineligibility also is in Bylaw 16 that, you

24 know, is that at the point in -- I don't think

25 that the membership has a belief, and I could be

1 wrong, that at the time of that extra benefit,
2 or 10.1, that is the time that the individual is
3 ineligible and anything after that.
4 I believe the membership is once we
5 find that and we have enough evidence to know
6 that there was a 10.1 or a Bylaw 16 violation,
7 from that point forward this student-athlete
8 would be withheld from competition until
9 reinstatement occurs.
10 I don't think we have ever gone back,
11 and there are a lot of cases in Bylaw 16 on
12 extra benefits that we, as a membership, in my
13 20 years of doing this, we have not done that.
14 And also in 10.1 issues, gambling, we have not
15 gone back and said that is a point that you
16 define.
17 MS. POTUTO: Who is we?

18 MR. LYONS: The membership.

19 MS. POTUTO: But "we" in what context?

20 You can't go back for purposes of student-

21 athlete reinstatement and fix what has occurred,

22 although the period of ineligibility may weigh

23 on whatever they do in terms of reinstatement.

24 It is a different issue when you are

25 talking about whether a record should be vacated

1 because of the ineligible participation.

2 MR. LYONS: I guess my point is, Jo,

3 that this has never been discussed with the

4 membership. As I said, I could be wrong on

5 that. This is the first time I have ever heard

6 and asked the question of that, is when does

7 that become ineligible? I don't think the

8 membership has been applying it that way.

9 MS. POTUTO: I am pretty sure the

10 Committee has.

11 CHAIRMAN THOMAS: Go ahead. Being a

12 part of the membership, I have got to say that

13 it has always been our thought, who our member-

14 ship is if a student-athlete participated during

15 the fall of '07 and academic fraud was going on

16 that semester, confirmed that that actually did

17 happen, but it didn't come to light until May of

18 '08. It clearly was my understanding that it

19 was retroactive, for the lack of a better word,

20 to when it actually happened.

21 So, if you took it from the time it

22 came to light in May and forgot about when it

23 actually happened in the fall of '07, then what

24 is the use?

25 MR. LYONS: I guess my point is at the

1 time of the academic fraud, if you go back to
2 the satisfactory progress rules, everything
3 before that time, everything that has been
4 certified without using that course.
5 If at that time there was academic
6 fraud, the student had not even used that course
7 for academic purposes to be certified eligible
8 or not. So, I think that is the issue to
9 debate.
10 CHAIRMAN THOMAS: I am sorry. I
11 didn't mean to interrupt you.
12 MR. LYONS: That is all right.
13 CHAIRMAN THOMAS: If you used that
14 premise, then virtually somebody could commit
15 academic fraud and say, well, I didn't while
16 eligibility, therefore, I am not ineligible.
17 But they have committed academic fraud.

18 C category.

19 So, I think she is in there already.

20 So I guess we would ask that you take her out of

21 C and she is already in B, I guess. So, with

22 that, I guess the people in C, we do not say are

23 culpable in this case. We have taken that

24 position throughout the investigation.

25 In the president's response, we put

1 point.

2 MR. LYONS: I mean, there is still a

3 violation there, but they weren't using that

4 course for purposes of meeting the satisfactory

5 progress requirements.

6 CHAIRMAN THOMAS: Okay. We will move

7 on if there is nothing else. At this time,

8 before we get to closing statements, we will go

9 through the University's discussion and

10 clarification with the corrective actions and

11 penalties.

12 MR. SMRT: Did you want -- I thought

13 the Committee had some questions of us. I think

14 that corrective and punitive and other actions,

15 as I mentioned, it was probably more appropriate

16 to put Dr. Monk, and she is listed in the B

17 category of a punitive action as opposed to the

18 C category.

19 So, I think she is in there already.

20 So I guess we would ask that you take her out of

21 C and she is already in B, I guess. So, with

22 that, I guess the people in C, we do not say are

23 culpable in this case. We have taken that

24 position throughout the investigation.

25 In the president's response, we put

1 that in there to show the changes made in the
2 institution over the past year, 18 months.
3 There was no intent to somehow insinuate that
4 that somehow the individuals are responsible
5 directly for any violations in these
6 allegations.
7 MR. WETHERELL: If I could speak to
8 that just a minute. I am trying to say this
9 where I don't get us all in trouble. I think
10 without trying to do a closing statement, the
11 Committee recognizes that there was an
12 atmosphere in athletics, particularly the
13 academic support, that was unacceptable.
14 I mean, you have heard everyone from
15 Ms. Monk to others say that certain things were
16 happening. The provost and I, from an academic
17 standpoint, don't believe it is appropriate that

18 someone take a test for one another. It is just

19 unacceptable.

20 To suggest that we knew all of the

21 things that we know today in January of

22 February, whenever, of '07, I guess it was, of

23 last year is not true. We didn't know

24 everything then.

25 But in terms of, let's say, the

1 athletic director, he and I met in January and I
2 advised him at that point in time that his
3 contract would not be renewed. This issue
4 didn't come up until March, so to say that it
5 was directly related is not true.
6 But the reason that we didn't or I
7 didn't extend that contract was that I was
8 concerned about some of the things that were
9 going on in athletics at that point in time. I
10 was concerned about class attendance, I was
11 concerned about some issues that were going on
12 with the way our students were conducting
13 themselves publicly.
14 There were a variety of issues going
15 on that while I did not specifically know of the
16 music course or the sports, whatever quiz, we
17 were uncomfortable and we had agreed, the

18 athletic director and I, that we were not going

19 to extend that contract.

20 At his request, so he could find a job

21 and do some things, we didn't make that public.

22 It didn't become public until July at which time

23 this had begun to happen. So, to say directly

24 that it was that cause would be incorrect.

25 But to say that we were pleased with

1 what was going on in academic support prior to
2 that, we weren't, quite frankly. When you look
3 at Ms. Overton, her job was, I don't know--
4 what is the term I am trying to use?
5 MR. ABELE: Student Services.
6 MR. WETHERELL: Her job was to help
7 students act responsibly and do the right thing.
8 Clearly, they were not doing the right thing.
9 We didn't know the details, but we knew
10 something wasn't working out.
11 We have had a nepotism policy at
12 Florida State for a while. It has been pretty
13 well-documented in certain sports about that.
14 But to have a staff member hire their daughter
15 in a sport that we directly supervised, that
16 wasn't getting the job done at that point in
17 time.

18 So, there were a lot of things that

19 were happening that we wanted to correct. So, I

20 guess that is just where I am coming from in the

21 whole deal, so that everybody doesn't misunder-

22 stand.

23 Now, everybody chose to leave. If it

24 had been up to me, to be very honest with you, I

25 would have fired Monk. But the athletic

1 director said no, no, we don't want to do that.
2 We want to work out this agreement and we are
3 going to need this and we are going to need
4 that. You know, that is the way the thing came
5 down.
6 So, trying to answer, Jo, your
7 questions, I can't tell you exactly all of the
8 rules, but there was concern and we had agreed
9 in terms of the Athletic Department to reshape
10 it. I wanted an Athletic Department that was
11 more involved in student activities and more
12 involved in the University and less involved as
13 operating as an island.
14 If you look at the athletic director
15 that we have now, there is an open door policy,
16 not just for staff but for student-athletes.
17 Our staff is involved with athletes. It is a

18 more wholesome atmosphere. That was the

19 intention.

20 This just happened to come up after we

21 had made most of those decisions and started

22 most of those changes in place. While the

23 public may have known about them, we knew about

24 them internally.

25 So, I don't know if you put them on

1 this list or that list, or how we get to which
2 list. But there were changes that were going to
3 be made no matter what happened. This may have
4 just come back, if it makes you-all feel better,
5 and we reaffirmed it, it doesn't. But the fact
6 of the matter is we were going to make some
7 changes no matter what happened.
8 MR. SMRT: I might just piggyback on
9 to that. I want to make sure, because this is
10 more of a housekeeping item, I guess. If you
11 turn to Page 22 of the institution's response,
12 and that is the page that says "Other Changes"
13 under C.
14 I have mentioned to you that it is
15 appropriate to take Dr. Monk out of there
16 because she is in B, and I guess while we are
17 doing that we should take Mark out of that also

18 because he is over in B. So, these other

19 changes would not include Monk and Meleney.

20 MS. JENNINGS: How about Goldsmith?

21 MR. SMRT: MS. JENNINGS: resigned

22 early on, June or July during the middle of the

23 inquiry. When Goldsmith left, there was -- when

24 he left there was no path leading to Goldsmith

25 at that time.

1 I can't say there was no information.
2 I think there was no information. It was very
3 little, if anything, about Goldsmith when he
4 left. By that time not all the athletes had
5 been interviewed. Goldsmith left on his own
6 volition.
7 MS. JENNINGS: Well, the reason I
8 asked that, you had said before that none of the
9 people in C are culpable in this case except for
10 Monk. That is inaccurate if you leave Goldsmith
11 on there.
12 That is fine to leave him on, but the
13 statement is not accurate anymore, is it?
14 MR. SMRT: I guess I was thinking
15 about the time of the departure. But you are
16 correct, we obviously think that Goldsmith
17 violated unethical conduct. We didn't have that

18 information at the time of his departure.

19 CHAIRMAN THOMAS: Any other comments

20 from the Committee? We will take a five-minute

21 break before we go to closings.

22 MS. MYERS: Just a quick question on

23 penalties. In looking on Page 21 where you have

24 the reduction of scholarships, are the students

25 that you used, the number of student-athletes

1 that you used in calculating that, are they the
2 ones listed on 23 through 25, or are there more
3 that I don't see?
4 Where you have listed the number of
5 grants, at the top you have this formula that
6 you used. Are the number of student-athletes
7 that would have been used in that formula the
8 student-athletes that are listed back under 23
9 to 25?
10 MR. SMRT: Yes.
11 MS. MYERS: Okay. A quick follow-up.
12 I have looked at this five times and my eyes are
13 about crossed, so I may have missed it. I
14 didn't see a . listed on
15 those pages, and yet there was a reduction
16 there.
17 MR. SMRT: How about in the Case

18 Summary? Some names were added to the Case

19 Summary.

20 MS. MYERS: That is why I asked. Are

21 there more besides on this chart? So, that is

22 what I as looking at. Okay. You have answered

23 my question. I will go back and do that.

24 MR. SMRT: Formulas are predicated on

25 the number of involved student-athletes. There

1 should be 61 assorted in the 11 sports or 10

2 sports.

3 MS. MYERS: I understand, but the

4 .. was not listed on that chart.

5 So, okay where did that come from? Thank you.

6 Yeah, Jo, don't correct me.

7 CHAIRMAN THOMAS: If there are no

8 other questions, we will take a five-minute

9 break and come back for closing arguments.

10 Thank you.

11 (RECESS.)

12 CHAIRMAN THOMAS: Let's start, please.

13 If the institution and the enforcement staff

14 have addressed all the issues they wish to

15 address and presented all the information you

16 wish to present, then we will move to closing

17 remarks.

18 Just as with opening statements,

19 closing remarks should not rehash, I emphasize,

20 rehash, the particulars of the specific

21 allegations discussed today, but should be

22 general overviews that highlight, and briefly, I

23 can't emphasize briefly enough, summarize your

24 position.

25 President Wetherell, would you,

1 please, make the closing statements for the
2 institution.
3 MR. WETHERELL: Certainly, Mr.
4 Chairman, briefly.
5 MR. LECHNER: We will hold you to
6 that.
7 MR. WETHERELL: It is time at this
8 point to say thank you. Before, as I said, we
9 were embarrassed, but we do want to thank you,
10 Enforcement, Reinstatement, the NCAA, for the
11 time that you spent today.
12 We hope we have made the case. But
13 this is a complex matter. It is not a simple
14 issue. We hope we have made the case that the
15 University takes this seriously and we believed
16 that we have done as responsible of a job of
17 getting to the bottom line and who did what

18 without any hearsay. We hope you understand

19 that.

20 I suppose if we could say two things

21 in closing, we believe that we put forth an

22 effort that as uncomfortable as this has made

23 us, would have made all of us proud that at

24 least the institution is trying to straighten

25 out the situation.

1 Secondly, we believe that those
2 penalties or corrective actions, or whatever
3 were imposed, are fair and adequate and
4 reflective of those who committed the
5 violations. We hope you will reaffirm those.
6 Probably the most important thing we
7 would like to leave the Committee with, this was
8 a collaborative effort to get to where we are
9 today. If we are ever going to make a statement
10 about an institution and the NCAA working
11 together to come to resolution, this is going to
12 be a classic case study for someone at some
13 point in time.
14 If you can affirm what we have done as
15 being responsible, then I think it sends the
16 right message to not only Florida State but
17 hundreds of other institutions who will choose

18 to work with the NCAA as opposed to go the

19 litigation route. We thank you very much for

20 your support.

21 CHAIRMAN THOMAS: Thank you, Mr.

22 Wetherell.

23 Mr. Lyons, would you like to make any

24 closing statement?

25 MR. LYONS: Very briefly, Mr.

1 Chairman. Again, thank you as Mr. Wetherell had
2 already indicated. I would like to emphasize
3 the transparency that the institution has had
4 with the conference office , and you will see in
5 your notes, I don't have to reiterate that, from
6 the time this occurred and then letting us know
7 and to be involved in that process, and to help
8 in any way we can to guide them through the
9 processing and what we have today over the last
10 year and a half.
11 Obviously, this case, as you heard
12 today, there were some poor decisions and
13 mistakes made by a few individuals. I hope that
14 doesn't paint the broad brush of the
15 institution.
16 Being in the league now for eight
17 years as Associate Commissioner, I can tell you

18 that my visits to their campus for various

19 things, including compliance reviews, they have

20 an utmost respect from other members of our

21 conference of having a very solid compliance

22 program, trying to do the right thing as an

23 institution.

24 Those of you who have sat in chairs in

25 the compliance offices and institutions

1 understand that the broad nature and things that
2 can happen on campus when a couple of
3 individuals decide they don't want to follow the
4 rules.
5 I just want to emphasize, you know, in
6 this case that the things that the institution
7 has tried to do over the years from education,
8 their culture with their coaches in trying to
9 ask the questions ahead of time and staying out
10 of trouble, you have heard today.
11 And I think it should be emphasized
12 one last time that this case didn't involve
13 coaches and coaches trying to get an advantage
14 from an academic fraud issue. This was clearly
15 administrative from that standpoint.
16 So, again, thank you for being here
17 and the transparency that the institution has

18 provided to the conference and to the NCAA.

19 CHAIRMAN THOMAS: Thank you, Mr.

20 Lyons.

21 Mr. Didion or Ms. Thompson, who will

22 be making the closing statement?

23 MR. DIDION: Ms. Thompson will be

24 doing it.

25 CHAIRMAN THOMAS: Ms. Thompson.

1 MS. THOMPSON: We would just like to
2 extend out appreciation to the University for
3 the due diligence in their investigative efforts
4 while processing this case. We commend
5 President Wetherell and his staff for initiating
6 a thorough investigation into this matter, and
7 taking strong action to address other difficult
8 issues in this case.
9 We also appreciate the fact that the
10 institution detected and self-reported a
11 majority of these violations. Finally, we would
12 like to thank the Committee for their time and
13 attention on this case, and unless anybody from
14 our staff has any further remarks, we have no
15 further comments.
16 CHAIRMAN THOMAS: Thank you. Are
17 there any further questions or comments today?

18 I would like to thank the University, President

19 Wetherell, the NCAA staff, for their presence

20 today. I know that the members of the Committee

21 join me in thanking you for a very clear and

22 helpful presentation.

23 The matters before us today have been

24 well-presented in a straightforward manner. The

25 Committee appreciates the full participation by

1 the University, and also by such full
2 participation the Committee is able to render a
3 fully-considered decision.
4 The Committee will, after adjournment,
5 spend whatever time is necessary in
6 deliberations in order to fully consider all
7 information in the record, and then to resolve
8 the issues and determine if findings of
9 violations are to be made.
10 We will then consider the penalties,
11 if any, to be imposed.
12 A member of the Committee will be
13 assigned to write a working draft of the
14 infractions report. It sounds like Ground Hog's
15 Day. I said this before.
16 That will take approximately five to
17 seven weeks. The report will be divided into

18 three parts, an introduction, which the

19 Committee will provide an overview and context

20 for its findings.

21 A section that discusses the

22 particulars of each violation; a section that

23 outlines and explains the penalties.

24 Once a working draft is completed, the

25 entire Committee will review it, typically on a

1 conference call. The report then is put in
2 final form. The Committee's public affairs
3 liaison will notify the president's office or
4 the person designated by the University to be
5 notified.
6 This notification will occur 48 hours
7 ahead of the public release of the report. The
8 University will receive a copy of the report 24
9 hours before this release.
10 The public release of the report is
11 followed by a press conference with a member of
12 this Committee, usually the chair, and there
13 will be no other statements made by members of
14 the Committee after this case. I am sorry,
15 about this case.
16 As to any appeal of the infractions
17 decision, all penalties, you will have 15 days

18 from the date the report is released to accept

19 or to appeal the decision. If you accept the

20 decision, the penalties are in effect from the

21 date of the public release.

22 If you appeal, the Infractions Appeals

23 Committee will hear the case and all appealed

24 penalties are stayed until the public

25 announcement of its decision.

1 To exercise your appeal option, you
2 should send the notice of appeal form to Wendy
3 Walters at the NCAA. Ms. Walters is the staff
4 liaison to the Infractions Appeals Committee.
5 You must submit your written appeal
6 within 30 days after the Appeals Committee
7 provides you written acknowledgement that it
8 received your notice of appeal.
9 Either Dean Parkinson or Mr. Halloran
10 will respond to your appeal and represent the
11 Committee on Infractions at the appeals hearing.
12 The NCAA strives to preserve the
13 confidentiality of these proceedings and those
14 providing information. One aspect of that
15 effort is that in the public infractions report
16 the names of individuals are redacted.
17 The requirement of confidentiality

18 also pertains to these hearings. The Committee

19 cautions all parties that you must refrain from

20 revealing what was discussed in the hearing

21 today, especially with the media, until the

22 public release of the infractions report.

23 Unless there are other matters to come

24 before us today, we will conclude this hearing

25 at this time in Case No. M289, Florida State

1 University.

2 We stand adjourned. Thank you very

3 much.

4 (Whereupon, the hearing was duly

5 adjourned at 5:05 p.m.)

Subject: Re: Committee on Infractions article
Attach: TEXT.htm; IMAGE.gif

Colleagues:

I know that there are some or many of you that are receiving this email that may ask the question, "Why am I receiving this? This information should be received only by coaches!"

Speaking from experiences dealing with the Committee on Infractions, I can tell you that being accused and found guilty of a major NCAA violation will have a profound impact upon everyone in an athletic department and its university/college. Therefore, if you have 10 minutes to spare, the following article is a pretty good description of how the Committee on Infractions "goes about its business" for the NCAA membership.

Thank you and have a good weekend!

Larry Gallo, Jr.

An inside look at the NCAA's secretive Committee on Infractions

SI.com
For three days beginning on Thursday, a 10-person NCAA committee will convene in a conference room at a hotel in Tempe, Ariz. There are more than 125 NCAA committees that meet during a calendar year and this one is no different in that its members are largely unrecognizable collegiate bureaucrats. The NCAA Web site lists three attorneys, three law professors, two conference commissioners and two athletic department officials as members of this committee, and while some of them played or coached collegiate sports, none have done so in the past 20 years.
The NFL, NBA, NHL, MLS and Major League Baseball are dictatorships when it comes to penalizing its members; a single person decides on sanctions. The NCAA has this group of 10, known as the Committee on Infractions (COI), one of the most powerful, yet least examined, entities in American sports. Most people could not name a single member of the COI or tell you how it comes to its decisions. It goes about its business in relative obscurity, its deliberations kept secret, its findings conveyed mostly via press releases. Rarely has so little been known about a group that wields such authority.
The spotlight rarely finds the COI, which makes the hearing in Tempe unique. Among the cases under review is the biggest to come before the committee in years, one that will bring media attention and fan scrutiny:
USC.
The NCAA has investigated allegations against the Trojans athletic department since 2006, one of the longest probes in the association's history. The possibility of major sanctions for the school has loomed in the background for years, the bane of its supporters and a beacon for its critics. Allegations include claims that 2005 Heisman Trophy winner Reggie Bush received improper benefits from multiple agents, including the use of a house for his family. Former USC basketball star O.J. Mayo, in his one season with the Trojans, also reportedly received money and gifts from an agent, and, most recently, investigators looked into a car driven by but not owned by running back Joe McKnight.
Given the profile of the school and the athletes involved it is a landmark case, one sure to stand as a litmus test for the NCAA's unique brand of justice. It also raises questions about the mysterious committee that acts as the NCAA's judge: Who are the members of the COI and how did they land on the committee? How do they review allegations like those against USC? And, perhaps most important, how do they determine what penalties, if any, to hand down?
*****
The NCAA does not disclose the individuals who will hear a specific case, and it is common for COI members to miss a hearing and/or be replaced by a former member. Still, it is a safe bet that those judging USC in Tempe will boast impressive credentials. The COI chairperson, Paul Dee, is the former athletic director at Miami and a professor at that school. Britton Banowsky and Dennis Thomas are the commissioners of Conference USA and the Mid-Eastern Athletic Conference, respectively, and Missy Conboy has worked in Notre Dame's athletic department for 22 years. Temple law professor Eleanor Myers is an expert on legal ethics, and Rodney Uphoff, a professor at Missouri, is a former defense attorney who helped represent Oklahoma City bomber Terry Nichols.
Per NCAA guidelines, two of the 10 members must be women and three are "public" representatives, usually attorneys or former judges unaffiliated with a school or conference. The three public representatives on the COI roster are all lawyers, the most notable being Roscoe Howard Jr., a former U.S. Attorney.
Among the individuals judging USC will be Josephine Potuto, a tiny woman with red hair who teaches law at the University of Nebraska. (She confirmed to SI.com that she would be Tempe.) Potuto might be the smallest person in the room, but she will also be the most senior, having served on the committee since 1999. She is the person USC athletic director Mike Garrett, school president Steven Sample, and the others representing the school should fear the most as she is a fierce questioner and unafraid to call out school officials who attempt to massage the truth.
Hearings are closed to the public, transcripts of the proceedings are kept confidential, and COI members are forbidden from discussing cases. But Potuto's grilling of former basketball Georgia coach Jim Harrick in 2004 is legendary among followers of the COI, and in a 2008 Florida State hearing -- the transcript from which was transmitted to the university in a way that made it subject to open record laws -- she repeatedly cornered those defending the school.

When recruiting COI members, Potuto looked for people with "gravitas," which she says includes fearlessness in the face of a challenge from a high-profile coach or administrator. "My experience with Jo and the rest of the committee is that they want to be fair, but they won't do an institution any favors and they dig down pretty deep," says Michael Rogers, who represented Baylor in its 2005 hearing.
That Potuto will review a high profile case involving agents funneling money to athletes is fitting, as it was her comments on that issue that brought her to the attention of the COI. At aconference in 1998, Potuto listened as former North Carolina basketball coach Dean Smith and Big Ten commissioner Jim Delany bemoaned how agents were funneling money to basketball players. Potuto stood up and said it was interesting that a little money going to the players was such a huge concern given how much the NCAA profited off those same kids. Immediately after, a COI member approached her. "I think they liked that I was willing to challenge people who are respected in athletics," she says.
The most common way to get on the committee is to know someone on it or to impress when representing a school. Alabama law professor Gene Marsh, who served from 1999 to 2008, was asked to join after arguing on behalf of the Crimson Tide in a 1998 infractions case.
COI members will tell you it is a thankless (and unpaid) job.. They meet, on average, six times a year for four days at a time. Each case requires about 20 hours of reading and a complex hearing like USC's can last 12 hours or more. "There are plenty of people who get on the committee and pull the rip cord early because they don't realize the time commitment required," Marsh says.
Not Potuto. Her longevity and embrace of the work stands out.. Followers of the committee say anonymously that if they could grant her a lifetime appointment (members are limited to three, three-year terms) they would, and they predict that she will loom large during the proceedings in Tempe.
For that, USC has, coincidentally, the rule book to blame.
COI guidelines require a committee member to recuse his or herself when a school from the same conference is under scrutiny. Potuto's final term ended in 2008, but she was asked back for the USC case, likely as a replacement for Oregon law professor James O'Fallon.
In other words, the toughest person in the room wasn't even supposed to be there.
*****
Prior to arriving in Tempe, Potuto and the rest of the COI received a case file detailing the infractions the NCAA enforcement staff has concluded were committed by USC, as well as any response by the school. This could be called evidence -- it often includes transcripts of interviews and other supporting documents -- but the COI rarely determines whether or not a rule

was broken, a common misconception. By the time a school appears before the COI it is usually in agreement with the enforcement staff on the violations committed. USC officials (who declined to discuss their case with SI.com) might take exception to the severity of some violations, but the two parties are likely to agree on the rules broken.

"One misconception is that a [COI hearing] is like a trial we would see in our judicial system," says Rogers. "It is very different." In an interview, Dee, the COI chairperson, referred to the process as "quasi-judicial" and "in a way like arbitration" and similar to an "administrative hearing," the variety of descriptors a testament to the unique nature of the COI's work.

Interpret may be the best description for what the committee does. They review the violations and then, while listening to remarks from school officials and others, they interpret the core cause of the misdeeds and whether the university's actions before and after the wrongdoing surfaced were sufficient. Thus, the task of the school officials present at a hearing is to push their own interpretation.

In the Florida State case, university president T.K. Wetherell attempted to paint the widespread cheating by athletes in several sports as the actions of a "rogue tutor," saying: "We don't really believe they cheated. They got inappropriate help." That may seem like a clever muddling of the facts, but a rogue tutor isn't as serious in the eyes of the COI as institutionalized cheating. Though the COI sanctioned the Seminoles -- including vacating wins in 10 sports and taking away three football scholarships -- it concluded that the school did not knowingly allow athletes who cheated to compete.

At the start of a hearing, the school under review and the NCAA enforcement staff make opening remarks. Then the COI members pose questions, and it is during this period when cases are won and lost. Depending on who is among the contingent from USC (former football coach Pete Carroll and Tim Floyd, the former basketball coach, reportedly plan to attend or participate via video conference), this could be the hearing's most dramatic stretch, with Potuto and others peppering them with questions and scrutinizing their responses.

The enforcement division's exact findings regarding USC won't be made public until after the COI's decision, but the committee is expected to conclude that Bush and Mayo received improper benefits from agents. Regarding Mayo, the school did an inadequate job monitoring the basketball program, a supposition supported by the university's imposition of sanctions on the basketball team in December, including a postseason ban this season. The school allowed Rodney Guillory, Mayo's handler, into its program despite the fact that the NCAA deemed him a runner for agents in 2000 when he paid the airfare for a USC player. The COI would surely have sanctioned the Trojans if the school had not taken action against itself, and it could still penalize the program further.

USC's interpretation of violations committed by football players would appear to be very different. Garrett, the Trojans' athletic director, said last month that the school had "some arguments" to make before the COI on that front. He is not likely to challenge that rules were broken but rather whether USC should be held responsible for the actions of Bush, his family, and the agents.

It is a defense that hits at a thorny issue for the NCAA: how much to hold schools accountable for the actions of the agents who court its players? On one hand, it is unreasonable to expect a school to monitor where all of its athletes' families live, what their parents drive and whom they might be receiving money from? On the other, Bush was not just any player, and it appears the agents operated right under USC's nose. According to Yahoo! Sports, the NCAA requested a copy of a photo of sports agents Lloyd Lake and Michael Michaels posing with PeteCarroll in the locker room after a game. USC also cleared Bush in 2005 to work as a summer intern for sports marketing agent Mike Ornstein, who was reportedly allowed on the sidelines for some USC games. Ornstein, like Lake and Michaels, allegedly provided Bush with improper benefits.

Many major infractions cases often come down to simple question -- what should the school have known? In Florida State's case, the school avoided the dreaded "lack of institutional control" label, which carries the harshest sanctions, and USC will hope do the same while in the tricky position of arguing that there were institutional failings in one sport (basketball) but not in another (football).

"It is a hard sell," says one lawyer with ties to the case. "It's the "what-more-could-we-do defense, and the problem with that is what a school could have done is open to a wide interpretation."

*****

A widely held perception about the COI is that they go soft on cheaters, particularly high-profile schools. Pick any major infractions case from the last decade -- Ohio State in 2006, Alabama in 2002 and 2008, etc.. -- and you can find a large segment of people that think the cheaters got off too easy and that the COI selectively spared a big (and profitable) program.

Potuto, Dee and others say that is folly. They judge a case on its merits, they contend, the profile of a school never comes under consideration. And yet it is hard not to note that the NCAA may have already done USC a huge favor.

In July 2008, the COI recommended sweeping changes in the severity of penalties assessed, including giving the COI the ability to impose postseason bans, hefty fines, bans on television appearances, and other penalties that hadn't been used in years. There were other recommendations, which when taken in total meant a seismic overhaul of how the NCAA penalizes cheaters.

A case like USC's, where the finding of a lack of institutional control is a real possibility, would seemingly be ripe for the deployment of the new penalties, and the perfect way to send a message to the rest of the association. "When people realize there is not a risk of severe penalties, they take chances," Dee says. "We wanted to put risk back on the table by dusting off some of these dormant penalties."

One problem: They are still dormant. Nearly 20 months after receiving the COI's recommendations, the Board of Directors has yet to ratify them. The COI may wish to throw the book at USC, but its hands will be tied by the slow-turning wheels of the NCAA machine. As a result, questions about whether justice was served will persist regardless of how the COI rules on the Trojans.

"The porridge will always be too hot or too cold," says Marsh, the Alabama law professor and former COI chair. "Some believe we are too harsh, others say too soft. No one ever says [the COI] got it just right."

At the conclusion of the hearing in Tempe, the COI will gather and begin talking through the issues until a consensus is reached on what penalties, if any, to hand down. Dee will then assign one member to write an opinion, which will be passed among the others to approve. The process takes about between eight to 10 weeks, meaning that sometime in the spring USC will know its fate. On that day, the debate over whether justice was served will rage on radio shows, blogs, and at water coolers across the country.

The COI, meanwhile, will drift back into the shadows.

Subject: URGENT ~ Student-Athlete Medical Insurance and Prescription Drug Information
Attach: TEXT.htm; Sports Medicine Info (2010-11).pdf

Colleagues,

Once again, we are requesting your assistance in obtaining medical insurance information from your respective sport's student-athletes. Additionally, we ask for your help in making sure all student-athletes and their parents are aware of the new requirements regarding mandatory insurance for all UNC students. Finally, we ask for your assistance in obtaining newly-required (by the NCAA) documentation from your student-athletes who might be taking prescription medications that include banned substances (e.g., stimulant medication for learning disabilities).

Please note that these are required procedures, and it is imperative that they be completed before your student-athletes engage in any type of voluntary or mandatory team practices this fall!!!

Mandatory Insurance Requirement

1. Please take the time to review the enclosed letter to the parents regarding the new mandatory insurance requirement. The answers to any questions you and/or the parents might have are likely found in the attached letter or on the referenced websites.
2. Parents should be informed that, pursuant to NCAA regulations, this mandatory insurance IS NOT covered by athletics scholarships! The cost of the system-wide policy, should the parents choose to purchase the plan for their son/daughter, will be the family s responsibility.

Procedures for Medical Insurance Forms

1. Print off the attached document: "Sports Medicine Info (2010-11)".

2. Make the appropriate number of copies and mail the entire packet to the parents/legal guardians of each of your student-athletes that you are expecting to be on your squad list during the 2010-2011 year (i.e., returnees, transfers, incoming freshmen, medical exempts - EVERYONE!!).

3. As an alternative to mailing, please note that you can also email this packet to parents if you have email addresses for all of them - however, it will be your responsibility to follow-up with each of them to make sure that they have successfully received the email and are proceeding with completing the required documentation.

4. The enclosed medical insurance forms are to be returned either to you or one of your coaching staff members.

5. Once you receive the completed medical insurance forms from your 2010-2011 student-athletes, alphabetize the forms, attach a current 2010-2011 roster, and give the forms to your respective sport's head athletic trainer. The athletic trainer will review the forms and then send them to the appropriate staff in the Sports Medicine Department of Campus Health Services. Every student-athlete must complete a form!

6. NOTE: The athletic trainer assigned to your sport will review your roster to ascertain if every student-athlete on your roster has completed and returned the insurance form. A student-athlete who does not return the medical insurance form and complete the online insurance information will not be allowed to participate in any practice until these processes have been completed.

This process should be completed in its entirety, with all forms returned to Sports Medicine, by Monday, May 31, 2010.

This email has been sent to each head coach, assistant coaches, administrative assistants/directors of operations of certain sports, the sports medicine staff, and to some team secretaries.

Thank you for your immediate attention to this very important welfare issue concerning our student-athletes. Please be very diligent in obtaining this information in a timely fashion, and please feel free to share this information with your colleagues in your work unit. I appreciate your cooperation and assistance in advance.

Take care,
Larry

DIVISION OF STUDENT AFFAIRS

THE JAMES A. TAYLOR
CAMPUS HEALTH SERVICES BLDG.
CAMPUS BOX 7470
CHAPEL HILL, NC 27599-7470

April 16, 2010

Dear Parents of UNC Student Athletes:

The UNC Sports Medicine Department is excited to work with your son/daughter during the 2010-2011 academic year! In advance of his/her arrival for the fall semester, we would like to provide you with some information regarding both a change in insurance policy affecting all UNC students, as well as procedural information as to how the Department of Athletics will handle any medical issues that might arise due to athletics participation.

Mandatory Insurance Program

In August, 2009, the UNC Board of Governors approved the implementation of a mandatory insurance program for all students who meet specific criteria. In essence, all students who are enrolled in a degree-seeking program, enrolled in a minimum of 6 credit hours, and eligible to pay the student health fee are required to show evidence of an existing "creditable coverage" health insurance policy OR enroll in the UNC system-wide plan. Due to the nature of intercollegiate athletics, all of our student-athletes will meet these criteria and be required to have creditable insurance.

Please note that this requirement does NOT obligate student-athletes to enroll in the UNC system-wide insurance plan! Rather, all students, including student-athletes, must simply be covered by a creditable insurance plan and submit the required information through the online system.

"Waiving out" of the UNC system-wide plan is easily and quickly done, provided you have all insurance information available to you at the time that you log in to the system. The web portal to complete this process for Fall, 2010 and Spring, 2011 opened for UNC students on April 1, 2010. The website address is www.studentinsurance.com. We ask that all student-athletes complete this process no later than May 31, 2010.

Policy verification will begin on June 1, 2010 for those students who have submitted the necessary information in advance of that date. At that time, you or your son/daughter will receive an email verifying that your coverage has met the minimum guidelines required by the institution. If, at that point, you are notified that the coverage you submitted does not meet these minimum guidelines, you will have the option to purchase the UNC system-wide plan.

Failure to complete this "waive-out" process will result in the charges for the UNC system-wide insurance plan being automatically placed on your son/daughter's account. The cost of the policy is $723 for the entire academic year, resulting in fall and spring semester charges of $361.50 each term.

Please note that NCAA regulations do not permit the Department of Athletics to cover insurance costs as part of an athletics scholarship. Therefore, any charges placed on your son/daughter's account will be your responsibility.

For those of you that are interested in obtaining the UNC system-wide insurance plan for your son/daughter, we are pleased to inform you that the selected policy is very comprehensive.

Benefits include:

1) 100% coverage of services at the UNC-Chapel Hill Campus Health Services
2) $150 deductible
3) 80% coinsurance of PPO allowance
4) Unlimited major medical lifetime maximum
5) Unlimited pharmacy maximum (with a $10 co-pay at the UNC-Chapel Hill Campus Health Pharmacy and a four-tier plan for other pharmacies)
6) $500 wellness benefit
7) Vision care plan

For more information on the UNC system-wide insurance plan coverage or questions on the university policy of mandatory health insurance, please visit http://campushealth.unc.edu. Additionally, a "Frequently Asked Questions" document can be found at the following link: https://www.pearceandpearce.com/PearceSite/Schools/NC/source/PDFs/FAQs.pdf.

Dates to Know

- April 1, 2010: Portal opens to allow students to "waive out" of the UNC system-wide plan
- **May 31, 2010: Deadline for student-athletes to complete "waive out" process**
- June 1, 2010: Policy verification begins
- June 30, 2010: Deadline for students to "waive out" to avoid fall charges being placed on student accounts
- September 24, 2010: Students will be enrolled in system-wide plan and no credits will be issued.

Sports Medicine Processes and Procedures

Generally speaking, the Department of Athletics covers most medical costs that are associated with participation with UNC Athletics (see www.tarheelblue.com for more information). **It should be noted, though, that any visits, procedures, or prescriptions must be approved by the team physician before the Department of Athletics will cover the charges**. Below are some items to remember.

1) Each team is assigned a team athletic trainer, who is typically their initial contact for medical issues, as well as a team doctor and orthopedist to provide medical care. For details on these team assignments, please see the Department of Athletics' official website (www.tarheelblue.com).
2) Your son/daughter's or family's insurance will be the primary insurance coverage. Therefore, please make sure he/she is in possession of a copy of all insurance cards (medical, prescription) when he/she arrives for school in the fall. Your son/daughter should be instructed to present the applicable card each time he/she picks up a prescription or is seen by a physician outside of Campus Health. **Please note that the UNC Hospitals system is considered "outside" of Campus Health**. Therefore, insurance cards must be presented at all UNC Hospitals appointments. Failure to do so results in a very time-consuming filing process after the fact.
3) LaToya Wright (919-966-3655) is your Sports Medicine contact for any billing questions you may have. When presenting his/her insurance card at time of service, your son/daughter should ask the service provider to send a copy of all bills to UNC Sports Medicine, as well. If this procedure is followed, future bills for the service will be sent directly to the Sports Medicine staff, alleviating the necessity for you to forward any bills to us. However, should you receive a bill that you believe should be covered by Athletics, you should forward it to us at the address below, or by fax at 919-966-9779.
4) If at any point you receive an insurance payment reimbursement check for an expense originally covered by the Department of Athletics, the check should be immediately signed over to Sports Medicine and forwarded to us at the address below, so that we can apply the funds to the medical expenses on your son/daughter's account. Your retention of these reimbursement checks would result in an NCAA violation and would render your son/daughter ineligible to participate in intercollegiate athletics.
5) The attached form must be filled out completely and returned to your son/daughter's head coach as soon as possible. Along with the completed form, please send a copy (FRONT and BACK) of all insurance cards (e.g., medical and prescription drugs) to the head coach at the address on the form. We must have this information **by May 31st** to call and verify benefits on all policies. Note that we MUST have the policy holder's information, as it is critical to verify benefits and in cases in which we need authorization for radiology, surgery, etc.
6) It is critical that we receive updated information regarding your son/daughter's insurance throughout the year. Therefore, after submitting the completed form and copies of insurance cards this summer, please retain a blank copy of the form to send to us, should any insurance information change throughout the year.
7) With HIPPA/FERPA regulations, we must have your son/daughter's permission for a doctor to speak with parents about his/her medical records. Be sure your son/daughter is clear with his/her physician regarding what can be discussed with parents.
8) To assist in your son/daughter's smooth transition into our medical system, please follow the enclosed instructions to obtain a Medical Record Number (MRN) for him/her. This number should then be included on the attached form where requested.
9) Lastly, please be sure to read the new NCAA regulations regarding ADHD medicines in the enclosed letter. Contact information is included in that letter should you have questions or concerns about this issue.

We appreciate your time reading this document and completing the necessary paperwork in order to prepare your child for this fall. Should you have questions or concerns regarding these or any other Sports Medicine issues, please feel free to give us a call at 919-966-3655.

In summary, please review the below Required Tasks List:

1) **By May 31st**, log in to www.studentinsurance.com and either purchase or "waive out" of the system-wide policy.
2) Obtain a UNC Medical Record Number (per the attached instructions), and include it on the enclosed Student-Athlete Insurance Form.
3) **By May 31st**, complete and submit the attached Student-Athlete Insurance Form, along with a copy of the front and back of all insurance cards, to the head coach at the address on the form.
4) **By July 1st**, review the enclosed information regarding the NCAA Medical Exceptions Policy for Banned Drugs and obtain and submit appropriate documentation to our Sports Medicine Staff at the address identified in the attached letter.

Thank you all for attention to these critical issues as your son/daughter prepares for the 2010-2011 academic year on campus.

Sincerely,

Dr. Mario Ciocca, Director
Sports Medicine Division
CB # 7470, Campus Health Services
University of North Carolina
Chapel Hill, NC 27599

STUDENT-ATHLETE INSURANCE INFORMATION

Student's Full Name:_____

Date of Birth: _____/_____/_____ SPORT: _____ SEX: M ☐ F ☐

UNC Medical Record Number (see attached instructions): _____

IS YOUR SON/DAUGHTER COVERED BY **HEALTH INSURANCE**? YES ☐ NO ☐

Please complete below. Submit a copy of insurance card, **front & back**. *Make sure copy is legible.*

Policyholder's Information (Required for obtaining authorization)

Name: _____ Date of Birth: _____/_____/_____ S.S.#: _____-____-_____

Policy Number _____ Relationship to Student:_____

Address (Street, City, State, Zip):_____

Home Phone Number: _____ Cell Number _____

Policyholder's Employer: _____

Employer Address (Street, City, State, Zip):_____

Employer's Phone: _____ Fax: _____

(Check all that apply) Full-time ☐ Part-time ☐ Retired ☐ Self-Employed ☐

Is this policy an: HMO ☐ or a PPO ☐ ? If this policy requires pre-authorization from a primary care physician before services can be rendered, please complete the following:

Physician's Name:_____ Phone Number:_____

Do you have a **separate prescription drug policy**? Yes ☐ No ☐ If yes, please provide name and address and/or a blank copy of claim form. Please also include a legible copy of your drug card, front and back.

Name:_____ Address:_____

I give my permission to the Division of Sports Medicine to file a claim for medical services with the above health care insurer. According to NCAA regulations, I understand that any insurance payments I receive must be returned to repay the Department of Athletics for your child's services.

Parent's Signature:_____ Date:_____

**** If this information changes during the school year, please contact:

Division of Sports Medicine
CB #7470, Campus Health Service
University of North Carolina
Chapel Hill, NC 27599

919-966-3655 phone, or fax new card front & back to 919-966-9779. On cover sheet, include student's name, sport, and above policy holder information (if different). Please retain a blank copy of this form to re-submit if your insurance changes.

**** **Athletes should have their own copy of all insurance cards**.****

Instructions to Obtain a UNC Hospitals Medical Record Number (MRN)

The UNC Sports Medicine Department would like to request your assistance with obtaining a UNC Hospitals Medical Record Number (MRN) for your child. **Please note that if your child was enrolled at UNC during the 2009-2010 academic year, he or she most likely already has an MRN**. If you have this number on file, please include it on the attached form. If you do not, you may call the phone number identified below to obtain the MRN for inclusion on the form.

The Campus Health System is a separate entity from the UNC Hospitals System. Therefore, in case your child ever requires services at the hospital (MRI, CT scan, other radiology or specialty clinic, such as ENT), he/she must obtain an MRN prior to receiving such services. It is important to note that these numbers are permanent; thus, if your child has ever received services from UNC Hospitals or an affiliate, he/she most likely already has an MRN.

To obtain an MRN for your child (or to check to see if he/she already has one), please follow the instructions below. The number should then be included on the insurance form where requested.

****

1. Dial 919-966-1234 (if local) or 1-866-595-3175 (toll-free).
2. Press 1 for English
3. Press 3 to "obtain a new Medical Record Number"
4. You will then be transferred to a customer service representative. Inform them that you need to get an MRN for your child. Please be certain to first ask the representative to confirm that your child does not already have an MRN!

Please have the following information available for the representative:

1. Child's Name, Date of Birth, and Social Security Number
2. Child's Primary Address (should be permanent home address – bills will be sent here)
3. Child's Primary Phone (should be cell phone, if possible, as the hospital clinics will call this number for appointments)
4. Emergency Contact Name and Phone Number
5. Insurance Information (i.e., Does your child have insurance? What type? Subscriber ID? Group Number? Policy Holder's Name and SSN? Mailing address for Insurance Company – usually found on back of card? Is Policy Holder a full-time employee?)

After obtaining the necessary information, the representative will generate an MRN for your child and will give you that number prior to ending the call. **This number should then be included on the enclosed insurance information form that you complete and return**. If your child is ever seen at UNC Hospitals, he/she will receive a plastic identification card with their MRN (much like a credit card). This card should be retained by the student, along with his/her other insurance information.

****

Thanks for your assistance. Should you have any questions about this, feel free to contact us at 919-966-3655.

April 16, 2010

Dear UNC Student-Athlete,

The NCAA has adopted a stricter application with regards to its Medical Exceptions Policy for Banned Drugs. Therefore, institutions will now be required to submit more formal and complete documentation when a student-athlete tests positive on an NCAA Drug Test for the use of any prescription medication that contains a banned drug (for example, stimulant medications for ADHD, such as Adderall or Ritalin).

In an effort to protect our student-athletes from unwarranted NCAA drug testing sanctions in the future, **we are now requiring that all student-athletes who are taking such prescription medication submit to us the appropriate documentation prior to the beginning of the 2010-2011 academic year**.

If you are on such medication, the documentation that we must have on file from you is as follows:

1) A physician's record of your evaluation
2) A physician's diagnosis
3) The history of the treatment that you have undergone
4) A copy of your most recent prescription

Please note that this information can come in many different forms, including in letter format from your treating physician. **HOWEVER**, keep in mind that all of the above information must be included in the letter or other paperwork.

We ask that, if applicable, you compile this required information and submit it to our Sports Medicine staff at the following address no later than **July 1, 2010**. This will give us ample opportunity to seek additional information from you, if necessary, prior to the start of the 2010-2011 academic year.

Dr. Mario Ciocca, Director
UNC Division of Sports Medicine
James A. Taylor Campus Health Services
CB #7470
Chapel Hill, NC 27599-7470

Also, on the enclosed pages, I have included a Q&A document from the NCAA competitive safeguards committee, as well as a detailed NCAA Reporting Guidelines document, that further explain this requirement. It is my hope that these documents will answer any questions you might have.

Thank you for your attention to this critical matter with regards to your future eligibility to participate in intercollegiate athletics at UNC.

Sincerely,

Larry Gallo, Jr.
Senior Associate Athletics Director

NCAA Banned Drugs and Medical Exceptions Policy
A stricter application – August 2009

My name is Jerry Koloskie, and I am the chair of the NCAA competitive safeguards committee.

As you know, the NCAA bans classes of drugs because they can harm student-athletes, and because they can create an unfair advantage in competition. Some legitimate medications contain NCAA banned substances, and student-athletes may need to use these medicines to support their academics and their general health. We have in place a procedure to review and approve legitimate use of medications that contain NCAA banned substances.

Our committee has the responsibility to oversee the banned drug list and review medical exception requests. Physicians on the committee determine whether the use of a banned medication is warranted, and weigh the medical need vs. the potential for abuse and for unfair performance enhancement. This review protects not only the health and safety of the student-athlete, but the liability of the institution. Banned substances should not be allowed unless there is sufficient evidence of medical need.

We've received a number of requests to grant medical exceptions in which the institution or student-athlete did not provide adequate documentation to show the student-athlete had undergone a diagnostic evaluation. Most commonly this occurs in cases of ADHD – Attention Deficit Hyperactivity Disorders.

We often get asked what documentation is needed in order for the committee to grant a medical exception, so let's consider these questions:

Question. *What types of medications fall under the NCAA medical exception policy?*

Answer. First, there is no medical exception for the use of street drugs. The use of any medication that contains a banned substance must be approved. For stimulants, diuretics, and anti-estrogen use, a request for review and approval should be made following the notice of a positive NCAA drug test. For anabolic agents and peptide hormones, the request must come prior to the use of the medication.

Question. *What documentation does an institution need to keep on file?*

Answer. The institution should keep on file **a record of the student-athlete's evaluation**, **diagnosis**, **the history of treatment**, and **a copy of the most recent prescription**. This documentation can be compiled in the form of a dictated letter from the prescribing physician if the letter includes the details previously mentioned. There is no need to keep records of all testing, but rather to demonstrate that an evaluation has been conducted to achieve the diagnosis.

Question. *For ADHD specifically, who needs to conduct the evaluation?*

Answer. The initial evaluation may be conducted by clinicians with experience in assessing ADHD: these include school psychologists, clinical psychologists, psychiatrists, other MD's, and their supervised clinicians.

Question. *What type of assessment is used to diagnose ADHD?*

Answer. There are a variety of tools used by clinicians to reach a diagnosis of ADHD. Many children are diagnosed soon after they begin their formal schooling, and school psychologists and child psychiatrists use behavioral assessments such as the Conners Rating Scale or the DSM-IV ADHD Survey. When a student-athlete is not diagnosed until they have already matriculated to your institution, the institution's student support services or disability services can provide an assessment, using such tools as the Conners Adult ADHD Rating

Scales (CAARS) or the Adult ADHD Self-Report Scale (ASRS). In any case, a student-athlete may go through their family physician for a referral for an assessment.

***Question**. Will an assessment conducted more than 5 years ago be acceptable?*

Answer. Yes, if the student-athlete has been followed-up recently to confirm that continuing treatment is appropriate. On the other hand, if a student-athlete has a history of treatment with stimulant medications for ADHD but has not undergone a diagnostic assessment for this condition, the sports medicine staff should refer the student-athlete for an assessment.

The important criteria are: an evaluation has been conducted, the student-athlete is under ongoing medical care for the condition, and the student-athlete is being treated appropriately.

***Question.** Does a student-athlete need to have an updated letter from the prescribing physician on file each year of their eligibility?*

Answer. Yes, an annual follow-up with the prescribing physician is the minimum standard, and that can be reflected in a letter from the physician or a copy of the medical record, with written indication of the current treatment.

***Question**. Some athletes are embarrassed and don't reveal that they are taking medication for ADHD, so the institution is unaware. How is this handled when a student-athlete tests positive for using the medication?*

Answer. Of course, all medications should be reported to the sports medicine staff, so they can be informed in the event a student-athlete experiences any illness or injury while under their care. Incoming student-athletes should be educated on the importance of this policy, and specifically advised of the need to share information about medications that may contain banned substances, such as Adderall or Ritalin. Many new student-athletes are unaware they may be using banned substances. Making it a requirement to report all medications as a part of the routine care, and naming a variety of examples, the sports medicine staff can help diminish embarrassment. The NCAA will also include information about this issue as it sends out information to prospective student-athletes.

If a student-athlete tests positive for a medication and has not provided documentation to the institution, an appeal hearing may be scheduled so that the student-athlete and the institution can gather that information. Until the hearing takes place, the student-athlete must be withheld from competition as in any other positive drug-test case.

***Question**. Do student-athletes need to be prescribed a non-stimulant medication for ADHD before using stimulant medications?*

Answer. The NCAA Medical Exception policy requires that a non-banned medication be used if available, but the medical community has generally accepted that with this age group, the non-stimulant medications are not as effective to treat ADHD. The committee will approve the use of stimulant medications for ADHD without a prior trial with non-stimulant medicine.

For other medical issues, student-athletes need to provide documentation that non-banned medications indicated for the condition have been prescribed before using the banned medication.

These are the most common questions we have heard about the NCAA Medical Exception policy, but your institution may have a unique question or circumstance involving student-athlete use of banned medications. For these, contact the NCAA Health and Safety Staff, at www.ncaa.org/health-safety . Together we can assure that our student-athletes are able to compete in a healthy and safer athletics environment.

NCAA Banned Drugs and Medical Exceptions Policy
Guidelines Regarding Medical Reporting
for Student-Athletes with Attention Deficit Hyperactivity Disorder (ADHD)
Taking Prescribed Stimulants

The NCAA bans classes of drugs because they can harm student-athletes and can create an unfair advantage in competition. Some legitimate medications contain NCAA banned substances, and student-athletes may need to use these medicines to support their academics and their general health. The NCAA has a procedure to review and approve legitimate use of medications that contain NCAA banned substances through a Medical Exceptions Procedure. The diagnosis of adult ADHD remains clinically based utilizing clinical interviews, symptom-rating scales, and subjective reporting from patients and others. The following guidelines will help institutions ensure adequate medical records are on file for student-athletes diagnosed with ADHD in order to request an exception in the event a student-athlete tests positive during NCAA Drug Testing.

1. General considerations. Student-athletes diagnosed with ADHD in childhood should provide records of the ADHD assessment and history of treatment. Student-athletes treated since childhood with ADHD stimulant medication but who do not have records of childhood ADHD assessment, or who are initiating treatment as an adult, must undergo a comprehensive evaluation to establish a diagnosis of ADHD. There are currently no formal guidelines or standards of care for the evaluation and management of adult ADHD. The diagnosis is based on a clinical evaluation. ADHD is a neurobiological disorder that should be assessed by an experienced clinician and managed by a physician to improve the functioning and quality of life of an individual.

    a. Student-athletes should have access to a comprehensive continuum of care including educational, behavioral, psychosocial and pharmacological services provided by licensed practitioners who have experience in the diagnosis and management of ADHD. Student-athletes treated with ADHD stimulant medication should receive, at a minimum, annual clinical evaluations.

    b. Mental health professionals who evaluate and prescribe medical therapy for student-athletes with ADHD should have appropriate training and experience in the diagnosis and management of ADHD and should have access to consultation and referral resources, such as appropriate medical specialists.

    c. Primary care professionals providing mental health services (specifically the prescribing of stimulants) for student-athletes with ADHD should have experience in the diagnosis and management of ADHD and should have access to consultation and referral resources (e.g., qualified mental health professionals as well as other appropriate medical specialists).

2. Recommended ways to facilitate academic, athletics, occupational and psychosocial success in the college athlete with adult ADHD taking prescribed stimulants include:

    a. Access to practitioners experienced in the diagnosis and management of adult ADHD.

    b. A timely, comprehensive clinical evaluation and appropriate diagnosis using current medical standards.

c. Access to disability services.

d. Appropriate medical reporting to athletics departments/sports medicine staff.

e. Regular mental health/general medical follow-up.

3. Student-Athlete Document Responsibility. The student-athlete's documentation from the prescribing physician to the athletics departments/ sports medicine staff should contain a minimum of the following information to help ensure that ADHD has been diagnosed and is being managed appropriately (see Attachment for physician letter criteria):

   a. Description of the evaluation process which identifies the assessment tools and procedures.

   b. Statement of the Diagnosis, including when it was confirmed.

   c. History of ADHD treatment (previous/ongoing).

   d. Statement that a non-banned ADHD alternative has been **considered** if a stimulant is currently prescribed.

   e. Statement regarding follow-up and monitoring visits.

4. Institutional Document Responsibility. The institution should note ADHD treatment in the student-athlete's medical record on file in the athletics department. In order to request a medical exception for ADHD stimulant medication use, it is important for the institution to have on file documentation that an evaluation has been conducted, the student-athlete is undergoing medical care for the condition, and the student-athlete is being treated appropriately. The institution should keep the following on confidential file:

   a. Record of the student-athlete's evaluation.

   b. Statement of the Diagnosis, including when it was confirmed.

   c. History of ADHD treatment (previous/ongoing).

   d. Copy of the most recent prescription (as documented by the prescribing physician).

5. Requesting an NCAA Medical Exception:

   a. The student-athlete should report the banned medication to the institution upon matriculation or when treatment commences in order for the student-athlete to be eligible for a medical exception in the event of a positive drug test.

   b. A student-athlete's medical records or physician's letter should **not** be sent to the NCAA, unless requested by the NCAA.

   c. The use of the prescribed stimulant medication **does not** need to be reported at the time of NCAA drug testing.

   d. Documentation should be submitted by the institution in the event a student-athlete tests positive for the banned stimulant.

Note: The NCAA Committee on Competitive Safeguards and Medical Aspects of Sports may approve stimulant medication use for ADHD without a prior trial of a non-stimulant medication. Although the NCAA Medical Exception Policy requires that a non-banned medication be considered, the medical community has generally accepted that the non-stimulant medications may not be as effective in the treatment of ADHD for some in this age group.

ATTACHMENT

Attention Deficit Hyperactivity Disorder (ADHD) Guideline Attachment

Criteria for letter from prescribing Physician to provide documentation to the Athletics Department/Sports Medicine staff regarding assessment of student-athletes taking prescribed stimulants for Attention Deficit Hyperactivity Disorder (ADHD), in support of an NCAA Medical Exception request for the use of a banned substance.

The following must be included in supporting documentation:

- Student-athlete name.
- Student-athlete date of birth.
- Date of clinical evaluation.
- Clinical evaluation components including:
    - Summary of comprehensive clinical evaluation (referencing DSM-IV criteria) -- attach supporting documentation.
    - ADHD Rating Scale(s) (e.g., Connors, ASRS, CAARS) scores and report summary -- attach supporting documentation.
    - Blood pressure and pulse readings and comments.
    - Note that alternative non-banned medications have been considered, and comments.
    - Diagnosis.
    - Medication(s) and dosage.
    - Follow-up orders.

Additional ADHD evaluation components if available:

- Report ADHD symptoms by other significant individual(s).
- Psychological testing results.
- Physical exam date and results.
- Laboratory/testing results.
- Summary of previous ADHD diagnosis.
- Other comments.

Documentation from prescribing physician must also include the following:

- Physician name (Printed)
- Office address and contact information.
- Specialty.
- Physician signature and date.

DISCLAIMER: The National Collegiate Athletic Association shall not be liable or responsible, in any way, for any diagnosis or other evaluation made, or exam performed, in connection herewith, or for any subsequent action taken, in whole or in part, in reliance upon the accuracy or veracity of the information provided hereunder.

Folks,

Attached is an interesting article from Washington State University re:ethics in college athletics. It presents an interesting perspective on today's college student-athlete. John

John Blanchard
Senior Associate Director of Athletics
P.O. Box 2126, CB# 8550
Chapel Hill, NC 27515-2126
University of North Carolina

Failing system needs challenged

Moral reasoning and teaching found lacking in sports, society

By Robert Frank, WSU Today

Moral reasoning among athletes is at a record low and declining rapidly, according to 18 years of research and statistics gathered by WSU's **Jennifer Beller**, and University of Idaho's Sharon Stoll.

"When I first heard that (supposition), I thought 'What does that say about me,' " said Beller, who played field hockey and tennis throughout high school and college --- enough to advance to the AIAW (Association for Intercollegiate Athletics for Women) national tennis championships. So in 1987 that news propelled her to focus her doctoral research on the topic, with Stoll as her principal advisor. To Beller's dismay, their study and statistics supported the theory.

Today, armed with survey results and statistics gathered from 72,000 athletes, the two work fervently with coaches nationwide to reverse that trend. Ideally, they'd like to see athletic programs return to the competitive goals and integrity upon which they were founded. Unfortunately, their message and mission are not often embraced.
Beller, an associate professor with WSU's Department of Educational Leadership and Counseling Psychology, and Stoll, a UI professor in Physical Education, together form the UI's Center for ETHICS. Beller eventually earned her Ph.D. in education from the UI and is now a research and measurement specialist, collecting and evaluating data; Stoll, who earned her Ph.D. in sport philosophy from Kent State University, is the center's director.

The two have worked with 26 high schools, numerous universities including the University of Georgia, University of Alabama, and most recently the Atlanta Braves. In addition, they serve as consultants to such organizations as the U.S. Naval and Air Force Academies, the Idaho Bar Association, and the American Bar Association.

Evolved ethics
At the root of today's moral decline in athletics lies a battery of competitive ethics that have evolved over the past 40 or more years.

"We (athletics) lost competitive integrity when we began to morally justify that the win was the most important facet of competition," said Stoll. "That has not always been there."

Stoll points to such examples as a 1940 game between Darmouth and Cornell. Cornell won the game with a last-minute touchdown. However, it was later determined that the referees had errantly allowed Cornell a fifth down. Cornell's captain stated that based on the rules his team did not fairly win and that its opponents deserved the victory. In addition, Cornell's coach and university president telegrammed Dartmouth: "We congratulate you on the victory of your fine team. The Cornell touchdown was scored on a fifth down, and we relinquish claim to the victory and extend congratulations to Dartmouth." The gesture of sportsmanship cost Cornell both the game and a national championship.

Fast forward to Oct. 6, 1990, when officials failed to turn the down markers and the University of Colorado gained a similar fifth down and a last-second touchdown victory over University of Missouri. Immediately after the game it was realized that Colorado had gained a fifth down. But the game was over, and NCAA rules dictate that once time has expired no changes or appeals can be made. So, Missouri's appeals were ignored. And, with the help of that hugely controversial victory, Colorado went on to win the Orange Bowl and the Big Eight championship.

Unlike, Cornell, Beller agrues, the Colorado coach did not “take the high ground” by attempting to admit defeat or forfeit the game or accept accountability. Instead, he defended his team by pointing the NCAA rules and the failure of sideline officials to turn the down markers appropriately.

Push the rules, get the win

“Today, coaches and players are taught to push the rules as much as possible,” Stoll said. “Some promote (illegal) strategies and work to manipulate field or playing conditions to gain the advantage. And some encourage their players to attempt to outwit the referees, so they don’t see or know what they’re doing (outside the rules).

“When strategies are changed and manipulated so not to honor your opponent, the game and referee, you have a mess… Athletics hinges upon an understanding that coaches and players respect the opposing team and players…. It’s supposed to be about is the integrity of the game. Doing your best to win the game has always been important, but how you get the win and the integrity of the game must come first.”

There was a time not that long ago, Stoll noted, when the role of sports was to teach. It was a means by which to:

- test and build character
- improve players’ education and skills
- learn to respect your opponent
- teach teamwork and cooperation
- build self-respect through doing one’s best
- teach players how to be good losers, gracious winners and benefit from criticism
- just have fun

"Over time we’ve moved away from principle of building character,” said Stoll. “It was never perfect, but today it’s pretty much out of control.”

A steady progression

Today’s competitive ethics, Beller noted, are often taught from elementary school and beyond in all types of sports. Unfortunately, those same ethics are carried over by athletes into daily life and society.

Sports-page headlines provide ready evidence: university programs suspended for recruiting violations; athletes involved in bar fights and shootings; coaches fired for gambling violations; athletes suspended for drug abuse and drunk driving, etc.

But no one can dare be priggish as the same decline and lack of moral reasoning is evident among nonathletes: students, businesspeople, lawyers and those in competitive jobs. (e.g. Enron, Tyco, Metropolitan Mortgage, etc.)

“Athlete populations score significantly lower on moral reasoning inventories than do nonathlete populations,” said Beller. The reason for the difference is that many socially unacceptable standards are taught, reinforced and modeled in athletics. And statistics show that “the longer one is in athletics, the more affected and calloused one’s moral reasoning becomes.”

Enemy vs. competition

Coaches think athletes need to be motivated to do their best, Beller said. Even at younger ages that might involve pushing, swearing, yelling and other normally (social) unacceptable behaviors. Yet in athletics those actions have become acceptable.

“Opposing athletes become your enemy or an object. When they are an object, it’s okay to violate them or ‘take them out.’ In sports like football and hockey it’s easier because faces are hidden behind helmets and masks, larger bodies are exaggerated and protected by padding and other gear, and brute force against an opponent is lauded.”

For many, today’s athletic philosophy includes “do to others before they do to you.”

The degree of this is lessened in individual and noncontact sports, but the trend is still there.

“We have become good at rationalizing why it’s an acceptable action,” Beller said.

Even in squash, said Stoll, a player might decide to manipulate conditions to his advantage. For example, a player might intentionally hit his opponent in back of the head with the ball to “shake him up or keep him on edge.”

Point of derailment
Although one cannot pinpoint a place in time where society lost its moral compass, in general Beller points back to the 1960s, when the Baby Boom generation promoted such agendas as free love and no accountability, and educators began to embrace and promote a perspective of social contructionism played out as moral relativism, which pervades today’s classrooms. In essence this viewpoint contends that there are no absolute or moral truths, no moral rights and wrongs, everything is relative based on society.

“It was in the 1960s and 1970s that values clarification exercises were begun in the classroom,” Beller said. “Today, moral relativism and moral justification pervade education and society.”

Beller, to many of her colleague’s dismay, argues that those theories don’t hold water and that there are clear absolute and moral truths and that those truths have consequences. “My office is on the third floor, and if I step out the window there is a (universal) truth in place that takes affect.” she said.
Similarly, the lack of teaching of moral ethics and principles has resulted in today’s ethical dilemma in sports and society.

(Information below not available in print -- only available via WSU Today online.)

The social constructionist philosophy allows athletes and coaches to simply choose the morals and ethics that best suit their needs, she noted. In the classroom, similar philosophies have been adopted. Virtually everywhere Beller and Stoll go, students and professionals espouse the belief that “cheating is okay as long as you’re not caught, after all everyone is doing it.”

“What we are finding is that more and more people no longer know what the right thing to do is,” said Stoll.

From nuts to winning teams
“In our early years, people looked at us like we were nuts,” said Stoll. “They don’t anymore.” Today, they are calling the Center for ETHICS for assistance.

To help reverse this trend Stoll and Beller have developed a copyrighted educational program that helps coaches teach moral ethics, decision making, sportsmanship, competitive integrity, inspiring through leadership, justice, and competitive responsibility. Topics include servant leadership, fair play, teamwork, respecting opposing players, cheating, consequences, as well as off-the-court behavior -- drugs, alcohol. And, coaches are required to teach segments of the course.

Although most coaches have not endorsed such a program, those that have are beginning to see the results, telling Beller and Stoll that it has resulted in more teamwork and better and stronger players and staff.

This year, the University of Georgia won its conference with a 9-2 record and was ranked 13th in the nation. The University of Alabama took third in its conference with a 9-2 record and was ranked 14th in the nation.

Stoll, however, says one of the most important outcome measurements of the UGA program — now in its fourth year — will be revealed next spring. That’s when senior UGA football players each complete a journal reflecting their thoughts about the ETHICS

program and the issues taught. Those journals will be shared with Beller and Stoll.

“We’re trying to get to the point where each player is a servant leader,” said Stoll. “You serve others in order to lead. … It’s a foreign concept to athletes. Today’s athletes think ‘It’s about me. I’ll make a touchdown. I’ll catch the pass.’ But as a servant leader, it’s not about me, it’s about others.

“If we are concerned about the mental, physical and social growth of athletes through sports programs, we as parents, coaches, teachers, professors, administrators and media must challenge the status quo and demand changes.”

Subject: NCAA Press Release

Attach: NCAA News Release GSR 08.doc

Folks,

Attached is today's press release from the NCAA on the most recent graduation rates. I have added in bold print the UNC equivalent at each point in the article that I had one. You will see that we compare quite favorably when compared to national rates. John

Bottom of Form

INDIANAPOLIS—Division I student-athletes are graduating at the highest rates ever, according to the latest NCAA Graduation Success Rates.

The most recent GSR data show that 79 percent of freshmen student-athletes who entered college in 2001 earned their four-year degrees **(UNC 88%)**. The average Graduation Success Rate for the last four graduating classes is 78 percent **(UNC 85%)**. Both rates are up one percentage point from last year. **(UNC up 2 percentage points for later figure.)**

Even when calculating graduation rates using the federal government's methodology, which does not count transfer students, Division I student-athletes graduated at 64 percent **(UNC 77%)**, the highest federal rate ever. This rate is two percentage points higher than the general student body **(UNC 6 percentage points below UNC student body)**, two percentage points higher than last year **(UNC up 11 percentage points)** and up four percentage points **(UNC up 6 percentage points)** over the past seven years.

NCAA President Myles Brand praised the latest figures, citing increased initial-eligibility standards and an overall emphasis on academics, including the development of the Academic Progress Rate for each Division I sports team, as key factors contributing to student-athlete success.

"Nearly eight out of 10 Division I student-athletes are finishing college and earning their degrees. This is extremely good news," Brand said. "We still have work to do and can't declare victory just yet, but the trend lines are moving in the right direction."

Brand said approximately 4,000 additional student-athletes graduated from Division I colleges over the past six years because of increased graduation rates. Another 7,000 additional student-athletes who started college between 1996 and 2001 earned degrees because of increased enrollment

and growth in Division I membership.

Other NCAA research has shown that nearly 90 percent of student-athletes had earned their college degree 10 years after starting college **(UNC 89%)**. The calculations for the GSR and federal rate both limit time to graduation to six years from initial collegiate enrollment.

"The ultimate success is in the changed lives of student-athletes," Brand said. "The so-called 'dumb jock' myth is just that—a myth."

Key findings from the graduation rate data include the following:

OVERALL FINDINGS

- GSR for entering class of 2001: 79 percent **(UNC 88%)**
- GSR for entering classes of 1998-2001: 78 percent **(UNC 85%)**
- 1998-2001 GSR for male student-athletes: 71 percent **(UNC 79%)**
- 1998-2001 GSR for female student-athletes: 87 percent **(UNC 93%)**
- Federal graduation rate for student-athletes who started college in 2001: 64 percent **(UNC 77%)**
- Federal graduation rate for general students who started college in 2001: 62 percent **(UNC 83%)**
- Key statistic: Overall GSR is up five percentage points in last seven years.

MEN'S BASKETBALL

- GSR for entering class of 2001: 65 percent, up nine percentage points over seven years **(UNC 100%)**
- GSR for entering classes of 1998-2001: 62 percent **(UNC 86%)**
- Federal graduation rate for 2001 entering class: 49 percent **(UNC 100%)**

- Key statistic: Latest GSR for African-American men's basketball players is 58 percent, up 12 percentage points over the past seven years. **(UNC 80%)**

WOMEN'S BASKETBALL

- GSR for entering class of 2001: 85 percent **(UNC 100%)**

- GSR for entering classes of 1998-2001: 82 percent **(UNC 90%)**

- Federal graduation rate for 2001 entering class: 65 percent **(UNC 80%)**

- Key statistic: Latest GSR for African-American women's basketball players is 78 percent, up eight percentage points over the past seven years. **(UNC 88%)**

BASEBALL

- GSR for entering class of 2001: 72 percent **(UNC 100%)**

- GSR for entering classes of 1998-2001: 68 percent **(UNC 79%)**

- Federal graduation rate for 2001 entering class: 49 percent **(UNC 20%: one of five graduated, four left eligible.)**

- Key statistic: GSR has increased five percentage points in the past year **(UNC increased 11 percentage points)**.

FOOTBALL BOWL SUBDIVISION

- GSR for entering class of 2001: 66 percent **(UNC 78%)**

- GSR for entering classes of 1998-2001: 67 percent **(UNC 78%)**

- Federal graduation rate for 2001 entering class: 56 percent **(UNC 68%)**

- Key statistic: Latest GSR is 80 percent for white football student-athletes **(UNC 91%)** and 58 percent for African-American football players **(UNC 70%)**. These rates are up four and five percentage points, respectively, over the past seven years, although the GSR for African-American football players decreased three percentage points from last year.

The Graduation Success Rate was developed by the NCAA as part of its academic reform initiative to more accurately assess the academic success of student-athletes. The GSR holds institutions accountable for transfer students, unlike the federal graduation rate. The GSR also accounts for midyear enrollees and is calculated for every sport.

Under the GSR calculation, institutions are not penalized for outgoing transfer students who leave in good academic standing. These outgoing transfers are essentially passed to the receiving institution's GSR cohort.

By counting incoming transfer students and midyear enrollees, the GSR increases the total number of student-athletes tracked for graduation by more than 37 percent. The NCAA also calculates the federal graduation rate for student-athletes, because it is the only rate by which to compare student-athletes to the general student body.

The most recent Graduation Success Rates are based on the four entering freshmen classes in Division I from 1998-99 through 2001-02. There are almost 100,000 student-athletes included in the most recent four classes using the GSR methodology, as compared to just over 72,000 counted in the federal rate.

This year marks the seventh year that GSR data have been collected. The NCAA began collecting GSR data with the entering freshman class of 1995. The latest entering class for which data are available is 2001.

The NCAA also has released the latest Division II graduation rate data, including the division's Academic Success Rate. This is the third year the NCAA has released the Division II ASR, which is similar to the Division I Graduation Success Rate and also includes student-athletes not receiving athletically related financial aid.

The latest figures show a 71 percent ASR for the Division II entering class of 2001, an increase of two percentage points over last year.

Even when utilizing the less-inclusive federal rate, Division II student-athletes perform significantly better than the general student body. The federal rate for Division II student-athletes is 55 percent, nine percentage points higher than the overall student body at Division II colleges and universities.

Most Division III student-athletes are not covered by the federal graduation rate methodology, because it only includes student-athletes who receive athletics financial aid. Therefore, the data for Division III are used to

analyze success rates within the student bodies. In all, students who entered those institutions in the fall of 2001 showed a federal graduation rate of 62 percent.

Subject: article about millennials

Folks,

I know there is probably better things to do on New Year's Eve but I read the lengthy article below from the Chronicle of Higher Education with interest and thought you might be interested. It is about this wonderful generation of students that we all have the privilege to work with and learn from. I agree with some of what he has to say, disagree with some, and not sure of some. Anyway, here it is if you care to read it...and Happy New Year! John

AN ACADEMIC IN AMERICA
On Stupidity

By THOMAS H. BENTON

"No one ever went broke underestimating the intelligence of the American public," said H.L. Mencken in the era of Babbitt and the Scopes "monkey" trial. Several generations later, one might speculate that no publisher has ever lost money with a book accusing Americans - particularly young ones - of being stupid.

The most influential book in that genre is surely Richard Hofstadter's Anti-Intellectualism in American Life (1963), in which he argues that the American dislike for educational elitism derives from a number of interlocking cultural legacies, including religious fundamentalism, populism, the privileging of "common sense" over esoteric knowledge, the pragmatic values of business and science, and the cult of the self-made man. With some cyclical variation, Americans tend to distrust, resent, and even feel moral revulsion toward "intellectuals."

As an English professor, I can attest to the power of that element in American culture, as can just about anyone in any academic field without direct, practical applications. When a stranger asks me what I do, I usually just say, "I'm a teacher." The unfortunate follow-up remarks - usually about political bias in the classroom and sham apologies for their poor grammar meant to imply that I am a snob - usually make me wish I had said, "I sell hydraulic couplers," an answer more likely to produce hums of respectful incomprehension.

If the situation was bad in Hofstadter's time, it's grown steadily worse over the past 40 years. The anti-intellectual legacy he described has often been used by the political right - since at least the McCarthy era - to label any complication of the usual pieties of patriotism, religion, and capitalism as subversive, dangerous, and un-American. And, one might add, the left has its own mirror-image dogmas.

Now, in the post-9/11 era, American anti-intellectualism has grown more powerful, pervasive, and dangerous than at any time in our history, and we have a duty - particularly as educators - to foster intelligence as a moral obligation.

Or at least that is the urgent selling point of a cartload of books published in the past several months.

For academics on the political left, the last eight years represent the sleep of reason producing the monsters of our time: suburban McMansions, gas-guzzling Hummers, pop evangelicalism, the triple-bacon cheeseburger, Are You Smarter Than a Fifth-Grader?, creation science, waterboarding, environmental apocalypse, Miley Cyrus, and the Iraq War - all presided over by that twice-elected, self-satisfied, inarticulate avatar of American incuriosity and hubris: he who shall not be named.

The Anti-Intellectual Presidency: The Decline of Presidential Rhetoric From George Washington to George W. Bush (2008), by Elvin T. Lim, examines speeches and public papers - noting shortened sentences, simplified diction, the proliferation of platitudes - to show a pattern of increased pandering to the lowest common intellectual denominator, combined with a mockery of complexity and analysis.

Just How Stupid Are We?: Facing the Truth About the American Voter (2008), by Richard Shenkman, argues that the dumbing down of our political culture is linked to the decline of organized labor and local party politics, which kept members informed on matters of substance. Building on arguments put forward in books such as What's the Matter With Kansas?: How Conservatives Won the Heart of America (2004), by Thomas Frank, Shenkman shows how the political right has been able to don the populist mantle even as it pursues policies that thwart the economic and social interests of the average voter.

Meanwhile, the political left is unable to argue that those average Americans are in some way responsible for their own exploitation because they are too shallow and misinformed - too stupid - to recognize their own interests. One of Shenkman's solutions is to require voters to pass a civics exam.

Former Vice President Al Gore obviously has a dog in this hunt, and his book The Assault on Reason (2007) argues that the fundamental principles of American freedom - descended from the Enlightenment - are being corrupted by the politics of fear, the abuse of faith, the power of an increasingly centralized media culture, and degradation of political checks and balances favoring an imperial presidency.

The results of that perfect storm include the aftermath of Hurricane Katrina, the continuing threat of global warming, the squandering of respect and sympathy for the United States after 9/11, and the nation's dependence on foreign oil.

Most notably, Gore argues that the democratization of information and the community-building power of the Internet can play important roles in the creation of a "well-connected" citizenry and the restoration of a rational democracy.

Nevertheless, several books - with an emphasis on education and the young - argue that it is precisely the point-and-click culture of the Internet that is damaging our intelligence and our civic culture.

Always On: Language in an Online and Mobile World (2008), by Naomi S. Baron, shows how the proliferation of electronic communication has impaired students' ability to write formal prose; moreover, it discourages direct communication, leading to isolation, self-absorption, and damaged relationships.

Worst of all, the prevalence of multi-tasking - of always being partly distracted, doing several things at once - has diminished the quality of our thought, reflection, self-expression, and even, surprisingly, our productivity. Baron's solution is to turn off the distractions and focus on the task and people at hand.

Her conclusions are largely affirmed by Nicholas Carr's cover story in the July/August 2008 issue of The Atlantic: "Is Google Making Us Stoopid?" which prompted a recent dialogue in The Chronicle ("Your Brain on Google," July 11).

Carr, author of The Big Switch: Rewiring the World, From Edison to Google (2008), argues that daily use of the Internet may be rewiring our brains for skimming rather than for the sustained concentration that is required for reading books, listening to lectures, and writing long essays. Obviously, such rewiring is going to have the biggest impact on the rising generation appearing in our college classrooms: the "digital natives."

The Dumbest Generation: How the Digital Age Stupefies Young Americans and Jeopardizes Our Future (2008), by Mark Bauerlein, provides alarming statistical support for the suspicion - widespread among professors (including me) - that young Americans are arriving at college with diminished verbal skills, an impaired work ethic, an inability to concentrate, and a lack of knowledge even as more and more money is spent on education.

It seems that our students are dumb and ignorant, but their self-esteem is high so they are impervious or hostile to criticism. Approaching his subject from the right, Bauerlein mentions the usual suspects - popular culture, pandering by educators, the culture war, etc. - but also reserves special attention for the digital technologies, which, for all their promise, have only more deeply immersed students in the peer obsessions of entertainment and fashion rather than encouraging more mature and sustained thought about politics, history, science, and the arts.

For Bauerlein, the future of American democracy "looks dim" unless we can counter the youth culture with respect for the knowledge of those over 30.

The most wide-ranging cultural study - extending Hofstadter's analysis up to the present - is Susan Jacoby's The Age of American Unreason (2008), in which she argues that American anti-intellectualism has reached unprecedented heights thanks to the converging influences of junk science, fundamentalism, celebrity-obsessed media, identity politics, urban-gang culture, political correctness, declining academic standards, moral relativism, political pandering, and the weakening of investigative journalism, among other factors.

Jacoby also supports the view that technology has damaged our ability to focus and think deeply. Her vision of the future is a nation that is unprepared for the global challenges we face.

As someone involved in education, I take the concerns of all of those writers quite seriously: The abilities and attitudes of students affect my life on a daily basis. It is my job, as I see it, to combat ignorance and foster the skills and knowledge needed to produce intelligent, ethical, and productive citizens. I see too many students who are:

Primarily focused on their own emotions - on the primacy of their "feelings" - rather than on analysis supported by evidence.

Uncertain what constitutes reliable evidence, thus tending to use the most easily found sources uncritically.

Convinced that no opinion is worth more than another: All views are equal.

Uncertain about academic honesty and what constitutes plagiarism. (I recently had a student defend herself by claiming that her paper was more than 50 percent original, so she should receive that much credit, at least.)

Unable to follow or make a sustained argument.

Uncertain about spelling and punctuation (and skeptical that such skills matter).

Hostile to anything that is not directly relevant to their career goals, which are vaguely understood.

Increasingly interested in the social and athletic above the academic, while "needing" to receive very high grades.

Not really embarrassed at their lack of knowledge and skills.

Certain that any academic failure is the fault of the professor rather than the student.

About half of the concerns I've listed - punctuation, plagiarism, argumentation, evaluation of evidence - can be effectively addressed in the classroom. But the other half make it increasingly difficult to do so without considerable institutional support: small classes, high standards, and full-time faculty members who are backed by the administration.

More than anything else, I see the group of books I've listed here as supporting the redirection of resources into the classroom, rather than into amenities and administrative bloat. We need to reverse the customer-service mentality that goes hand-in-hand with the transformation of most college teaching into a part-time, transient occupation and the absence of any reliable assessment of course outcomes besides student evaluations.

On the other hand, I am not so pessimistic about the abilities of the "digital natives." Different generations have different ways of knowing - different configurations of multiple intelligences. Pick your era and your subject: How many of us know anything about farming anymore or how to read the changing of the seasons? How many of us know how to repair an automobile or make a cake from scratch?

Of course, we lament that the skills we have acquired at great pains can become lost to the next generation, but we can hardly reverse all of it. And it may be that the young are better adapted to what is coming than we are.

We can be student-centered and respond to their ways of viewing the world, but at the same time it seems reasonable to expect that students also become faculty-centered. Students must learn, as we do, to speak across generational lines and gradually abandon the notion of a world constructed purely around them.

While I share many of these authors' concerns about the pathologies nurtured by new technologies, I have to agree with Gore's position - that technology must play a prominent role in this continuing intergenerational negotiation. There are, undoubtedly, major changes taking place in the culture and psychology of the young, with serious consequences for everyone. And there are many steps that individual educators can take to deal with those changes.

But that's a subject for next month's column.

Thomas H. Benton is the pen name of William Pannapacker, an associate professor of English at Hope College, in Holland, Mich. He welcomes mail directed to his attention at careers@chronicle.com. Subject: ACC Clustering

Folks,

From the CHE afternoon update. We just discussed this in the Faculty Committee Meeting. John

February 10, 2009
Minority Football Players Are More Apt to 'Cluster' in Majors, Study Finds
Minority athletes are more likely than their white peers to □cluster□ in certain academic majors, a new study suggests.

The study, described in a paper by researchers at Nova Southeastern University and published in the Journal of Issues in Intercollegiate Athletics, examined the prevalence of □clustering□ among football players in the Atlantic Coast Conference. The researchers defined clustering, which has raised concerns at the NCAA, as having 25 percent or more of the players on a team choose the same academic major.

The study covered 394 upperclass athletes at 11 of the 12 ACC universities. Fifty-nine percent were identified as minority students. The universities were not identified by name in the study.

The minority players clustered into a single major at a higher rate than their white peers at nearly every university in the study, the authors note. Four teams had 62 percent or more of their minority upperclass athletes clustered into a single major.

White athletes also tended to cluster, although not to the same degree as their minority counterparts. Over all, of the 11 colleges examined, six had one-third or more of all upperclass football players in a single major. The highest concentration was at a university at which 73 percent of the athletes in the study were majoring in business management. □Libby Sander

So what??? What does this mean? What□s the problem? It doesn□t matter. Stop comparing minorities to whites and vice versa! There are several other things we can be discussing than minority students □clustering.□ Who Cares!

□ College Counselor Feb 10, 03:17 PM #

I could see how this matters. This pattern could emerge from a campus climate that is not welcoming enough to minority students, so they feel more comfort in taking classes together with people they know (i.e. other people on the team), lending them to choose the same majors. Obviously more data would be required for such speculation, but I□m just trying to say that sort of study is not useless.

□ Katherine Feb 10, 03:22 PM #

Now we really are reaching for straws, aren□t we? Student athletes on scholarship receive a □free□ education. Let THEM decide what they want to study. If you want to make an issue of something, then focus on academic performance or the □special□ treatment that student athletes receive.

□ zackattack Feb 10, 03:22 PM #

We care because many of us have read the data showing that clustering is a result of athletes being inserted into gut majors and courses with minimal academic requirements. Or is it just coincidence that out of the dozens of majors available at ACC colleges, football players miraculously gravitate to the same majors at such a disproportionate rate? Wake up and smell the Gatorade.

Subject: RE: ACC Clustering

This is timely background for our discussion in March. I've read the first half of the paper and hope to finish it today. My overall sense is an unstated premise in the minds of the authors that clustering is per se bad. An additional implication seems to be that the clustering implies the majors in which the clusters appear are gut majors.

I'm waiting for someone in this dialog to say that the academic integrity of the various majors is the responsibility of the faculty at these institutions - neither the NCAA nor the athletic department is responaible for this. I'll confess that I'm suspicious of these majors that permit a student to "take a little bit of everything, but nothing advanced", and I have my own opinions of which schools and conferences have them, but I say shame on the faculty that permit that to happen. Suppose 30% of the students (minority or not) from a particular team take a particular major. If that's a gut major for them (by virtue of the clustering?), is it not, a fortiori, also a gut major for the non-athlete students who choose that major (who by the implication of articles such as these were not given any leeway in the admission porcess)?

Our data will likely show some concentation of student-athletes and perhaps also of minority student-athletes in a couple of our majors. Our faculty apparently believe that these courses of study are sufficiently rigorous to warrant granting a UNC degree to a student (ANY student) who completes the requirements. These majors may be less demanding than some other majors that are selected by student-athletes (and perhaps also non-athlete students) with low frequency. That doesn't make them gut majors. What would make them (inappropriate) gut majors would be 1) the course of study lacks appropriate rigor for a UNC degree, and 2) the faculty responsible for setting the requirements in those majors have allowed this lack of rigor to persist. We can't do anything about the level of rigor at other institutions, but I choose to believe that the job market does a pretty good job of dealing with that.

If clustering of student-athletes is going to result in some form of indictment for lack of rigor, let's be clear about the target. Now I'm going to read the rest of the paper to see whether they even mention these issues.

Jack,

Is the paper on-line or available to read? I would like to check it out. I agree with all your comments and would add that academic "rigor" is also subjective. I felt that the simplest of science courses at Stanford was "rigorous" whereas I felt comfortable with some of the best History courses they had to offer. I am sure that some of my science-oriented friends had the opposite experience. John

NCAA penalizes Florida State

March 06, 2009

The NCAA News

The NCAA Division I Committee on Infractions has placed Florida State University on probation for four years, reduced scholarships, vacated records and issued show-cause penalties for former staff members because of major violations in its athletics program.

The case involved academic fraud affecting more than 60 student-athletes across 10 sports, as well as impermissible benefits, unethical conduct by three former academic support services staff members, and a failure to monitor by the university.

The sports programs involved in these violations include football, baseball, men's track and field, women's track and field, men's swimming, women's swimming, men's basketball, women's basketball, softball and men's golf.

The show-cause penalties mandate that the former staff members' contact with student-athletes must be limited at any employing institutions. These limitations are further explained in the public report.

This case involved a former learning specialist, academic advisor and tutor at the University Athletics Academic Support Services (AASS), all of whom gave improper assistance to student-athletes, resulting in academic fraud.

The committee stated this case was "extremely serious" because of the large number of student-athletes involved and the fact that academic fraud is considered by the committee to be among the most egregious of NCAA rules violations.

A significant portion of the academic fraud violations involved a music course offered to students without incident for more than 10 years before its academic integrity was compromised in the fall semester of 2006, resulting in academic fraud occurring during this time, as well as the 2007 spring and summer semesters.

In addition to the academic improprieties associated with the online music course, the former learning specialist provided impermissible assistance to at least three student-athletes by typing portions of papers assigned to them. She also provided answers to an online psychology course quiz for a student-athlete by instructing a second student-athlete to complete the quiz on behalf of the student-athlete enrolled in the course.

Ultimately, 61 student-athletes went through the NCAA's reinstatement process as a result of these violations. The university believed it was likely that more student-athletes received improper assistance in the online music course, but it concluded the evidence to substantiate this belief was circumstantial and inconclusive.

The committee attributed the violations in this case to two primary factors. First, it said the online exams for the music course were not administered in a structured environment. There was no requirement for a proctor, and the university acknowledged that the course did not have sufficient safeguards in place to prevent students from obtaining exam answers. Second, the committee said that inconsistent supervision of the AASS created an environment that allowed the academic support personnel to take actions violating NCAA rules and university guidelines.

The three former staff members were charged with unethical conduct for knowingly arranging for fraudulent academic credit for numerous student-athletes and providing improper academic assistance. The former academic advisor also refused to cooperate with the investigation and violated another provision of NCAA ethical conduct rules, as well as the cooperative principle. The cooperative principle states that university and its staff have an obligation to assist the enforcement staff in developing full information on the case. As a result of the academic

improprieties by the three staff members, 61 student-athletes also violated the ethical conduct rules, and several student-athletes competed while ineligible.

The penalties in this case are as follows:

- Public reprimand and censure.
- Four years of probation (March 6, 2009, to March 5, 2013).
- Scholarship reductions in football; men's and women's basketball; men's and women's swimming; men's and women's track and field; baseball; softball; and men's golf. Additional details are available in the public report.
- Vacation of all wins in which the 61 student-athletes in the sports of football, men's and women's basketball, men's and women's swimming, men's and women's track, men's golf, baseball and softball competed while ineligible during 2006 and 2007. This includes regular season contests, postseason contests and any NCAA championship competition. The individual records of the student-athletes shall be vacated as well. Further, the institution's records regarding all of the involved sports, as well as the records of the head coaches of those sports will reflect the vacated records and will be recorded in all publications in which these records are reported, including, but not limited to, institution media guides, recruiting material, electronic and digital media plus institution and NCAA archives. Any public reference to tournament performances won during this time shall be removed, including, but not limited to, athletics department stationery and banners displayed in public areas such as the venues in which the specified teams compete.
- Five-year show-cause order for the former academic advisor (March 6, 2009, to March 5, 2014). Additional details are available in the public report.
- Four-year show-cause order for the former learning specialist (March 6, 2009, to March 5, 2013). Additional details are available in the public report.
- Three-year show-cause order for the former tutor (March 6, 2009, to March 5, 2012). Additional details are available in the public report.

The members of the Committee on Infractions who reviewed this case include Dennis Thomas, the commissioner of the Mid-Eastern Athletic Conference and formerly director of athletics at Hampton University. He is the vice chair of the Committee on Infractions and acting chair for this case. Other members are Eileen Jennings, general counsel at Central Michigan University; Andrea Meyers, athletic director emeritus, Indiana State University; Alfred Lechner, Jr., attorney; James Park Jr., attorney, Lexington, Kentucky and Josephine (Jo) R. Potuto, the Richard H. Larson Professor of Constitutional Law at the University of Nebraska College of Law.

I'm guessing some jobs may be coming available at USC and Clemson. I think Clemson had 4 teams below the 925.

USC earns split grades

Trial run of new system puts men□s basketball at biggest risk for penalties; women□s teams flourish

By STEVE WISEMAN

Staff Writer

South Carolina□s men□s basketball team would lose two scholarships if the NCAA□s new academic guidelines were fully in place, according to Academic Progress Reports (APRs) released by the NCAA on Monday.

The guidelines and their mandated penalties are part of an academic reform package approved by the NCAA in April.

The APRs were mailed to schools on Feb. 15 to let schools know where they stood under the new guidelines.

The guidelines and mandated penalties will not be fully implemented until December. At that time, the NCAA will have compiled APRs using data from the 2003-04 and the 2004-05 school years. Penalties mandated by the APR data released at that time will take effect in the 2006-07 school year.

Of the 19 programs at USC that were assessed by the NCAA, 12 scored at 925 or better. Seven scored below 925, which is the threshold for penalties to go into effect.

Basketball, with a score of 860, ranked the lowest of the seven USC men□s teams that scored below 925. Football (924), baseball (912), soccer (914), tennis (900), indoor track (903) and outdoor track (894) were the others.

No USC women□s sports fell below 925. Softball and tennis were the highest rated teams. Each achieved perfect 1,000 scores.

USC□s average of all its teams□ scores was 934; the Division I average was 948.

Since the numbers in the first year of the program will be based on a limited time period, the NCAA will allow schools a cushion, so that teams falling just below 925 might not be penalized. Schools can appeal punishments on the basis that their athletes performed adequately compared to the student body.

Under these NCAA guidelines, only the basketball team at USC would have been subject to penalties.

□Based on this trial report,□ USC athletics director Mike McGee said, □we would have been restricted by two men□s basketball scholarships. Our goal is to have continued progress among those teams falling within the lower confidence boundary and the cut score and work toward improvement across the board.□

USC basketball coach Dave Odom pointed out that the men's basketball program recorded its best semester GPA (2.910) in the fall and ranked fourth among all USC men□s teams academically.

□Every player in our program is on track for graduation and is in good standing with the NCAA eligibility rules as well as those of our university,□ Odom said in a statement. □Presently we have four seniors on our basketball squad, one of which graduated in December, and the other three are scheduled to graduate either in May or in the summer of 2005.□

USC□s basketball score of 860 would place it only in the 10th-20th percentile among all men□s basketball teams. The average Division I score nationwide was 923.

Football and indoor track also had a 923 average across Division

Dealing with the consequences

Star-coddling not Spurrier□s style

By RON MORRIS

Sports Columnist

AS DISAPPOINTED AS South Carolina football fans are with Tuesday□s decision to dismiss running back Demetris Summers from the team, this could prove to be welcome news for the program and for him.

Even though the decision was out of Steve Spurrier□s hands, the new coach is not likely to brood over it or go to great lengths to retain Summers□ eligibility. From day one at USC, and throughout his tenure at Florida, Spurrier has said that those who violate team rules will be penalized, regardless of their status on the team.

The team and its well being are much greater than any individual by Spurrier□s way of thinking. As a result, Spurrier□s teams experienced few discipline problems over the years. It carried over to his team□s play on the field at Florida, where a precision offense and aggressive, yet disciplined, defense were the hallmarks of his success.

As much as Summer□s absence in the backfield might hurt USC during the next two seasons, Gamecocks fans should embrace Spurrier□s style, if for no other reason than it stands in stark contrast to that of Lou Holtz.

Holtz□s inability to discipline individuals on his team and his coddling of star players were his undoing at USC. Holtz had lost control of his last three teams, and it played out to a national audience with the benches-clearing brawl against Clemson during November□s season finale.

Holtz sold his soul to top-level recruits, and that strategy backfired with the two biggest stars he brought to USC.

Derek Watson and Summers remain the top two running backs in South Carolina high school football history. They were Holtz□s most prized recruits □ and two of his biggest problems.

Unfortunately for the two standouts, Holtz never taught them about being accountable for their actions. Time and again Watson was allowed back on the team and retained his eligibility despite numerous off-field incidents.

By the end of Watson□s three-season stay at USC, Holtz had assigned a player to shadow his star running back at all times. That meant escorting Watson to class and remaining by his side during social activities. When a babysitter was hired for Summers upon his arrival at USC, Holtz□s message was clear to other team members: Stars get special treatment and are above the rules.

Holtz attempted to regain control of his team before last season and formed an advisory counsel of players. One of the counsel□s early complaints to Holtz concerned his designation of star status to certain players. Holtz took their complaint to heart and suspended Summers from the team during the summer for missing workouts and classes.

It was too little, since Summers was eligible again in the fall, and too late, since the team recognized the suspension was for effect only.

Holtz did discipline at least one star player □ Troy Hambrick. He was booted from Holtz□s first USC squad in 1999 and transferred to Savannah State. Hambrick has played the past five seasons in the NFL with the Dallas Cowboys and Arizona Cardinals.

Beyond Hambrick□s suspension, Holtz seemed to work harder at retaining the eligibility of his best players than he did at instilling discipline.

That will not happen with Spurrier, if his history at Florida is any indication.

One of Spurrier□s more noteworthy suspensions came during the 1997 season and involved star quarterback Doug Johnson, who violated curfew before Florida□s game at LSU. Johnson played in the No. 1 Gators□ loss to LSU only because Spurrier did not learn of the quarterback□s late-night antics until the following Monday. Spurrier then suspended Johnson for Florida□s next game, at No. 6 Auburn. In what proved to be one of Spurrier□s great coaching jobs, he used freshman quarterback Jesse Palmer and little-used reserve Noah Brindise to defeat Auburn.

If only Spurrier had been around to discipline Summers. Now it is evident Summers failed an earlier drug test during Holtz□s tenure. Under USC□s wellness program for athletes, Holtz had the option to suspend Summers from the team at that time and, not surprisingly, did not.

Summers probably believed that his next drug violation would be pushed aside, just like the first one. Because that did not happen, he now is forced to work his way out of his own problem, perhaps for the first time in his life.

One can only hope Summers finds the wherewithal to right himself, remain a student at USC through this semester and transfer to another school where he can showcase his immense football talents.

Should that happen, his dismissal from the USC football team will prove to be the best thing that ever happened to him, just as the Gamecocks ultimately will benefit from knowing the rules now apply to everyone ... even the stars.

Coaches & Administrators,

Summer & Fall registration will begin March 21st. Now more than ever it is important for all of our student-athletes to meet with their academic counselor to review degree progress, eligibility, and course selection. The academic counselors are in the process of conducting team meetings to discuss registration and to make student-athlete appointments. Please help us by reinforcing the importance of these meetings and appointments to your team. Remember, now is the time to be proactive in addressing possible graduation and eligibility issues. Thank you. RJM

Attach: 4-27-05 (to CCI group).xls

All,

Please see attached spreadsheet regarding incoming student-athletes who are currently eligible for the CCI loaner laptop program through the Department of Athletics for the 2005-06 academic year. Please keep in mind that all National Letters of Intent are not yet filed, so there will be updates to this list.

You will see that 2 student-athletes are highlighted. These student-athletes are eligible for the CCI grant. In the past, we have given these students loaners and the CCI grant has paid for them (making them "free", so to speak, to the Department of Athletics). However, new legislation might pass tomorrow allowing these student-athletes to accept the CCI grant on top of their athletics scholarship, thereby allowing them to take the CCI grant themselves instead of getting a loaner laptop from us. Once we know the status of this situation, we will be in further touch with you. I will try to let you know ASAP of the student-athletes who should be removed from the loaner list for this reason, as I know you are facing a time crunch to get these computers ordered and tagged for us.

Please let me know if you have any questions. I will send you updates as they become available.

Thanks,
Amy

Casualties of Tech, football
Yellow Jackets 2003 academic washouts repair their lives

By RANA L. CASH
The Atlanta Journal-Constitution
Published on: 05/29/05
Ten Georgia Tech football players stood on the same line, their futures facing fourth-and-long. Academic ineligibility forced them out of school — and off the field — in the spring of 2003.

Some resurrected their careers. Others buried them.

Malone family
(ENLARGE)
Former Jackets defensive tackle Alfred Malone has graduated from Troy and signed an NFL contract.

EMAIL THIS
PRINT THIS
MOST POPULAR

They've taken on blue-collar jobs and labored in the junior college ranks. They are playing on all levels — from the NFL to Division II. They've drifted away, losing contact with former friends and teammates.

"I lost the love for the game," Kingi McNair, then a redshirt freshman linebacker, says today.

Georgia Tech has since overhauled the academic arm of its athletics department. Football coaches now lean more heavily on the academic support staff, and are less involved in the daily activities of the players outside of athletics.

Tech's pending NCAA probation for allowing 17 ineligible athletes to compete in four sports from 2000-04 is unrelated to the 2003 football players' academic issues.

As Tech tries to reconcile those separate embarrassments, the athletes involved in the 2003 academic casualties have moved on, as well.

"I was disappointed in myself," said former running back Tony Hollings. "I'm the type of person that I'm not gonna let it hang over my head. I keep moving, keep pushing forward. I keep going."

That's exactly what Hollings, set to begin his third season with the Houston Texans, did. Defensive lineman Tony Hargrove is coming off a breakout year with the St. Louis Rams. A third player, defensive tackle Alfred Malone, hopes to follow them down the NFL road. After graduating this spring from Troy State, Malone signed a free-agent contract with the Houston Texans.

"It motivated me," Malone said. "A lot of people said that Georgia Tech wasn't the place for me and that college isn't for everybody. If I'd started out at Tech the way I did here, with that same focus, I would have graduated from Georgia Tech.

"But I've got the paper — right here — to prove people wrong."

Taking the blame

As they reflect on what went wrong, on how their promising football careers were derailed, many of the players point to themselves.

After undergoing knee surgery, Hollings didn't feel like enduring the pain to attend classes.

Malone fell asleep during lectures.

McNair had too much fun during his first year away from home.

Anthony Lawston admits he didn't always make schoolwork a priority.

Getting back on course was, in most cases, considerably more difficult than falling off it.

"It's easy to let your grade point average slip," said Lawston, a former linebacker. "It's harder to bring it up."

Receiver Lekeldrick Bridges was a budding star at Tech. A 6-foot-2, 175-pound speedster, Bridges made waves his freshman season and was expected to be a major contributor his sophomore year.

That time eventually came, but on a far less glamorous stage. Bridges traded the ACC for Hinds Community College in Mississippi. At Hinds last season, he caught 55 passes for 884 yards and seven touchdowns.

This fall, he is headed to Division I-AA powerhouse Grambling.

"We recruited Lekeldrick out of high school," Grambling coach Melvin Spears said. "It came down to us and Georgia Tech. I told him and his mother that if things didn't work out at Tech, we would be here. He was an outstanding basketball player and football player, but he was also an outstanding student."

Sterling Green found a place, as well. After taking online classes and working a full-time job, the 6-3, 220-pound strong safety enrolled at Division II Bowie State. He missed both the 2002 and '03 Tech football seasons, but at Bowie State, he was the team's third-leading tackler last season.

"Football-wise, I'm blessed to be in the situation I'm in," said Green, who will begin his senior year this fall. "I'm doing well, and I have the opportunity to show what I can do. At Georgia Tech, they required a lot academically and athletically. There's more emphasis on athletics, and it makes it harder to find the time for academics."

Now, things have turned around for Green.

"He's the prototype athlete," Bowie State coach Mike Lynn said. "He's going to be on the cover of our media guide."

Working construction

The road for former running back Michael Sampson has been even longer. Sampson, who was on Tech's 2004 spring roster, underwent back surgery before leaving Atlanta for Fort Scott Community College in Kansas, his mother said.

Once there, he never played. And, according to assistant coach Ryan Peterson, Sampson has been dismissed from the team for personal reasons. Peterson said Sampson is considering transferring to a Division II school, possibly Arkansas Monticello.

Terron Pullen, once named the Journal-Constitution's Class A Defensive Player of the Year, attempted unsuccessfully to transfer to Georgia Southern. Now, he's working construction in Johnson County.

McNair works from 11 p.m. to 7 a.m. as a machine operator in his hometown of Pelahatchie, Miss. He briefly considered playing at Hinds, but chose instead to work and help care for his 1-year-old son.

"Three years ago, you couldn't pay me to say that I lost the love for the game, but I did," McNair said. "There was too much pressure, too stressful. It wasn't fun anymore. It was too much of a business.

"But I don't have any complaints. I tell people around here all the time: 'If your mind ain't made up, don't pursue it.' I see them quitting the high school team. I know how they feel. I feel like I could have gone all the way if I'd stuck with it. But people call me a 'has been.' All I say is: 'What are you doing other than standing on the corner drinking?' I have a job and I take care of my son. I'm not embarrassed by that."

'I'd like to teach'

Lawston, who said he was "ashamed" for failing out of school, re-enrolled at Tech and briefly remained in school there. Despite needing just five more classes to graduate, he said he has put pursuing his degree on hold because his GPA was too low.

He is headed to the Air Force reserves after working as a baggage handler at Hartsfield-Jackson International Airport. With a 2-year-old son and marriage plans in the works, he said he'd like to transfer to Georgia State and begin a career as a teacher.

"I'd like to teach and coach," he said. "I believe that is what I've always been trained to do."

Defensive tackle Reggie Koon, originally from Miramar, Fla., is still living and working in Atlanta. He left the game of football behind.

Malone, however, was unable walk away from school — or football. While the winds of life fanned away others' desire, he saw his determination take deeper roots, his passion for football swelling every day he had to sit and watch. In two seasons at Troy State, he flourished on the defensive line.

"When I came here, I was more focused," said Malone, who said he graduated with a 3.4 GPA in social sciences. "The big thing for me was getting better and polishing my skills. There was a time after I left that I thought about walking away. Life is so much easier when you don't have practices and games and no one is breathing down your neck.

"I gained 20 pounds, but then I lost 40 in one summer and was ready to go. Everything happens for a reason. I got off to a bad start at Tech. Physically I was ready, but mentally I wasn't. When I got here, I was a grown man."

Going pro

Hollings and Hargrove grew up quickly, as well, competing in the NFL. Hargrove, a starting defensive end, recorded 23 tackles last season for the Rams. Hollings severely damaged his knee in the fourth game of the 2002 season. The following spring, he failed out of school. That summer, he took a job unloading bags from airplanes at the airport. A few months later, he entered the NFL supplemental draft.

He has rushed for 149 yards in two seasons, but is hoping for a turn this year.

"I haven't reached where I want to be, but I do look at it as a success, just being here," Hollings said. "This was a lifelong dream. If that hadn't happened at Tech, I would have had another season of college to play and to mature more.

"I would have been in a better situation. But this is something I did to myself. You take the good with the bad. I was embarrassed, but had to man up and face it, and things turned out well. Life goes on."

WHATEVER HAPPENED TO . . .

A look at what the 10 Georgia Tech football players ruled academically ineligible in 2003 are up to now:

- RB Tony Hollings: Playing for the NFL's Houston Texans
- DE Tony Hargrove: Playing for the NFL's St. Louis Rams
- DT Alfred Malone: Graduated from Troy State; free agent with NFL's Houston Texans
- WR Lekeldrick Bridges: Went to Hinds CC; enrolling at Grambling State
- SS Sterling Green: Playing at Maryland's Bowie State
- RB Michael Sampson: Went to Fort Scott CC; looking for a Division II school
- DL Terron Pullen: Construction worker in Johnson County
- SS Kingi McNair: Machine operator in Mississippi
- LB Anthony Lawston: Entering Air Force reserves
- LB Reggie Koon: Working in Atlanta

UNC ranks 5th among publics, gains in faculty resources,
leads in student accessibility: U.S. News & World Report

CHAPEL HILL - The University of North Carolina at Chapel Hill ranked as the nation's fifth best public university and stands out as a national leader in promoting student accessibility, according to U.S. News & World Report magazine.

In addition, UNC posted an 11-point gain - following last year's 21-point rise - in faculty resources. That 39th overall ranking was up from 50th in 2004. It was the university's best showing in the past six years; the lowest had been 71st twice during that period. Two other rankings - best value and least debt load - affirmed Carolina's leadership role in measures of student accessibility.

In faculty resources, U.S. News examined snapshots of class size (fewer than 20 students and 50 students or more), average faculty compensation in 2003-04 and 2004-05, proportion of faculty who are full time and with the highest degree in their field, and student-faculty ratio.

"Carolina is making excellent progress toward university priorities we have set ourselves," said Chancellor James Moeser. "Overall, our focus is on promoting excellence in all that we do in order to benefit the people of North Carolina and beyond. Our top priority is strengthening faculty recruitment, retention and development, and these U.S. News results show how last year's state appropriations and campus-based tuition revenue helped keep us competitive in faculty compensation with our national peers."

Another university priority is creating the richest possible learning environment for students, Moeser said. "The U.S. News rankings examine important aspects of the exceptional education we provide to undergraduates," he said.

Among public campuses, the University of California at Berkeley ranked first, followed by the University of Virginia. The universities of California at Los Angeles and Michigan at Ann Arbor tied for third, followed by UNC at fifth for the fifth consecutive year. For years, these five campuses have held the top five spots.

Overall, Carolina tied for 27th - up two spots from last year - among both public and private campuses with Tufts and Wake Forest universities. Other top public campuses ranked between 20th (Berkeley) and 25th (UCLA and Michigan).

The new rankings appear in the magazine's 2006 "America's Best Colleges" guidebook and will be posted at www.usnews.com Friday (Aug. 19) at 12:01 a.m. EDT. The magazine's Aug. 29 edition and the guidebook are scheduled to be on newsstands Monday (Aug. 22).

The U.S. News rankings formula weighs data including opinion survey responses about academic excellence from peer presidents, provosts or admissions officials; student retention rates; faculty resources; student selectivity; financial resources; graduation rates; and alumni giving.

UNC ranked first among national public campuses and 10th overall - up nine places from last year - in "Great Schools, Great Prices," based on a formula determining which schools offer best value by relating academic quality to the net cost of attendance for a student who receives the average level of financial aid.

Another category - least debt among students - listed UNC fifth among public campuses and eighth overall, with 24 percent of graduates posting an average debt of $11,751 in 2004. In 2003, that number was $11,519, down from $13,700 in 2000. Less than a quarter of Carolina's graduating students accumulate debt. By contrast, the nation's average student debt loan doubled to $18,900 in about a decade.

Moeser said campus practices protect access and affordability. Among undergraduates, 33 percent received need-based financial aid in 2004-05. UNC met two-thirds of undergraduates' need with scholarships and grants and the remaining third with loans and work-study jobs. Traditionally, aid packages on most campuses are closer to two-thirds loans and one-third grants.

In recent years, when UNC-Chapel Hill enacted a campus-based tuition increase for undergraduates, 35 percent of the revenue went to grants for needy students. Every needy student received a grant to cover a campus-based tuition increase.

UNC has launched the Carolina Covenant, a first among U.S. public universities, that makes a Chapel Hill education possible debt-free for qualified low-income students. Eligible freshmen can graduate without borrowing by doing a work-study job. Carolina meets the rest of their needs through federal, state and private grants and scholarships. This fall, the second class of Covenant scholars is enrolling. An estimated 340 to 350 new first-year students will participate under expanded eligibility requirements announced by Moeser last year.

UNC's own measures of excellence, developed in 2002 in consultation with trustees, emphasize indicators that the university provides an outstanding, intellectually challenging liberal arts education for undergraduates. The university has invested its resources based on these key priorities such as class size.

In 2004, 54 percent of UNC's course sections enrolled fewer than 20 students. That was second (topped only by UC-Berkeley at 58 percent) among UNC's top public peers and up from 51 percent in 2003. U.S. News considered an additional measure: only 11 percent of UNC's course sections enrolled 50 or more students in 2004, down from 12 percent the previous year.

In other U.S. News rankings, UNC's Kenan-Flagler Business School tied for fifth with Carnegie Mellon and New York universities, as well as the University of Texas at Austin, among undergraduate business degree programs. Kenan-Flagler tied for second among public campuses. In specialty areas, Kenan-Flagler tied for fourth with Berkeley for marketing and ranked fifth in management.

U.S. News included Carolina in a category called "programs to look for" - highlighting outstanding examples of academic programs that lead to student success. Education experts, including staff of the Association of American Colleges of Universities, helped identify these programs.

UNC was among 43 public and private campuses cited for their first-year experiences programs, which include first-year seminars and other programs bringing small groups of students together with faculty and staff on a regular basis. UNC was one of 22 public campuses selected for this list.

Another category of "programs to look for" was undergraduate

research/creative projects, in which UNC was listed among a dozen public campuses and 36 universities overall. This category reflects opportunities for students to engage in independent or small-team work under the direction of a faculty mentor. Students conduct intensive and self-directed research or creative work that results in an original scholarly paper or other product that they can formally present on or off campus.

Scandal at Houston
Ex-instructor, athlete accuse school of grade-fixing
Posted: Friday August 19, 2005 1:23PM; Updated: Friday August 19, 2005 3:31PM

Brown says former University of Houston football player Brandon Evans, now with the Texans, did not complete coursework in Brown's summer classes. Evans says he earned every grade he received.
AP

By George Dohrmann, SI.com

When Alex Brown became a coordinator for student-athlete academic support at the University of Houston in 1994, he believed the job would allow him to help black student-athletes earn their degrees. Instead, Brown says, he became the athletic department's "fixer," the man coaches and academic counselors went to when an athlete's academic eligibility was in peril and a quick remedy was needed.

From 1995 to 2003, Brown says he solicited from other University of Houston professors at least 25 improper grade changes for UH athletes at the behest of coaches and other school officials. In addition, he says he changed grades for at least 30 athletes in the class he taught, Introduction to African-American Studies, and committed other acts of academic misconduct.

Brown, who was fired from the university in January 2004 and indicted by a grand jury earlier this year on charges related to stealing department funds, detailed his role in a series of interviews with SI.com this week. Other former University of Houston athletic department employees and former athletes contacted by SI.com substantiated Brown's charges that several school faculty members were willing to bend and break the rules for athletes.

"I was the best book-cooker in the athletic department. I was the go-to man," Brown says. "Everybody knew it. But I wasn't the only person doing wrong."

Brown twice met with NCAA enforcement officials earlier this year to discuss his accusations against the school. Brown says the first meeting occurred in February, when he traveled to Indianapolis to meet with NCAA assistant director of enforcement Eddie Weatherington. Brown says he then met with Rich Johanningmeier, the NCAA's associate director of enforcement, at a Houston hotel in April. The NCAA contacted the University of Houston on May 13, and a subsequent internal investigation by the school found 14 grade changes for student athletes between 1999-2005, says athletic director Dave Maggard. "The investigations found nothing irregular about the grade changes, the number of grade changes or the purpose or reasons for the grade changes," says Maggard.

NCAA spokesperson Jennifer Kearns told SI.com that the organization would not comment on the issue.

Brown says the grade changing began long before 1999 and claims the wrongdoing is more far-reaching than the school's internal investigation revealed. "My reaction to the results of [Houston's internal] investigation was, 'Damn, that's all they found?' They must not have looked hard," Brown says. "And I told the NCAA to look back to 1994, but the school went back only to 1999-2000. I guess they only looked at what they wanted to look at."

Brown was accused of stealing money from the university in December 2003, when he oversaw the athletic department's book distribution program. He is scheduled to go to trial on theft charges on Aug. 29. If convicted of the felony, Brown faces between 180 days and two years in jail and up to $10,000 in fines.

Brown denies stealing the money and admits he spoke to the NCAA and then to the media about his allegations to gain a measure of revenge for the theft charges. "Am I doing this because I am angry? Absolutely," he says. "But I just got fed up with all of it."

Subject: rest of the story

Brown had previously filed a federal lawsuit against the school in August 2001, accusing former athletic director Chet Gladchuk of racial discrimination and alleging he was denied promotion to associate athletic director because he was black. Brown says he dropped the case after Gladchuk left the university.

Brown's attorney, Jolanda Jones, a former Houston track star, has subpoenaed a host of school employees, including Maggard, to testify in the theft-charges trial. Jones vows to use the trial to expose the wrongdoing she believes has festered in the athletic department since she was an athlete there in the late 1980s. She has requested documents she says will detail Brown's grade changing.

"We will push to get the truth out about what goes on in the athletic department to keep athletes eligible," says Jones, "and it will be excruciatingly painful for them."

"Each year, Professor Brown signed documents stating that if he knew of an NCAA violation, he was obligated to report it," Maggard says. "He never reported a violation to our compliance director. Why only now is he coming forward and saying there were violations?

"I can only speak to what I have seen since I was hired [in 2002]. I have seen nothing to indicate the types of things he is talking about."

'Kamikaze summer' courseloads questioned
Brown believes his final act of academic misconduct at the university, which he says took place during the summer of 2003, may have been his most serious violation of NCAA and school policy. He says he was involved in a scheme to ensure star offensive line recruit Brandon Evans would be eligible to play that fall. Brown says an athletic department employee told him that Evans, a transfer, was 27 credits short of being eligible to compete. According to Brown, the official created a plan that would allow Evans to get the credits he needed. The plan included enrolling Evans in Brown's course -- AAS 2320 -- as well as an independent study class that Brown monitored. Brown says Evans never attended a single session for either course nor did he turn in any assignments, a fact Brown says he passed along to school officials. "They said that they would take care of it, they would get him to turn something in before the fall semester started," Brown says. "So I gave him the grades. But he never turned in a thing. It was absolute academic fraud."

Evans may not have had time for Brown's classes because of the courseload he took at other schools in or near Houston that summer. According to an employee in the registrar's office at Houston Community College, Evans was enrolled in an art history course there that summer. Brown says Evans also took classes at San Jacinto College and Lee College in Baytown, Texas. (Neither San Jacinto nor Lee would provide information about enrollment without student consent or a social security number.)

Evans, who now plays for the Houston Texans, could not be reached directly by SI.com, but he said through a Texans spokesperson that he attended all his classes that summer and turned in the work required. Evans told KPRC TV in Houston, "I took 27 [hours] that summer and the rest I took 40 [hours] between the whole school year."

Evans would not have been the first University of Houston athlete to use those schools to retrieve credits needed to stay eligible. Brown and other former school employees say it was a common practice, dating to 1996. Athletes took so many courses at that trio of colleges that one UH employee referred to them as "kamikaze summers."

An athletic department intern, who asked not to be named for fear of reprisal from university officials and alumni, says that in the summer of 1996 he was asked by Maria Peden, the school's assistant athletics director for student-athlete academic services, to drive football players to Lee College several times. He says she even let him use her convertible BMW to transport them.

Brown says having athletes take classes at Lee College was a systemic abuse of a loophole in NCAA policy. Lee College has a three-week semester it calls a May Mini Session. It falls between the end of Houston's spring semester and the start of its summer session. Brown says school officials would count Lee College credits as having been earned in the spring. Thus, an athlete could still take classes during Houston's summer session and not exceed the NCAA maximum of six credit hours a summer. "Grades were in, we had walked [at commencement], but somehow those Lee College classes were still counted toward the spring semester," Brown said.

Maggard said that when he was hired by the school, he was concerned about the classes athletes were taking during the summer, which is why he instituted a rule stating that the school would not pay for summer classes that did not contribute toward an athlete getting a degree. As for Brown's charge about the mini-session at Lee College, Maggard says: "That's a new [accusation]. We would

have to look at the records and see how many students did that."

Brown, 57, was hired as assistant director of African-American studies at the University of Houston in 1989 after teaching at Prairie View A&M. In 1994, he applied for the position of associate athletic director for academic affairs at UH, which included supervision of academic support for athletes. He didn't get the job, but the woman who did, Janice Hilliard, tabbed him as her second in command. Brown supervised the academic counselors for the various sports and also counseled athletes, including men's basketball players until 2000.

Brown says he was first asked to orchestrate an improper grade change for an athlete shortly after he joined the athletic department. A university official approached him with the transcript of safety Delmonico Montgomery, and asked if Brown could find a way to raise Montgomery's grade-point average. "The team was leaving for the charter [plane] that day, it was the Friday before the opening game, and everyone was frantic," Brown says.

He took a grade-change form to a professor he knew was sympathetic to athletes. The instructor signed the form without hesitation, Brown says, and Brown then got it signed by the head of the department and by someone in the dean's office, as both must approve a grade change. After they signed the form, he took it to the registrar's office so it could be recorded. Montgomery's NCAA eligibility needed to be certified by the school's faculty representative to athletics, so Brown raced back to the athletic department, where he says an unknowing Montgomery was waiting to learn his fate while the rest of the team sat in buses outside wondering if their star defender would be joining them on the trip to the airport.

Brown says he took the certification form to the athletic department, where they had a rubber stamp of the faculty rep's signature "They stamped it and then I walked Delmonico out to the buses," Brown says. "When we got outside, the whole bus started cheering."

Later that night, Brown went to a restaurant where former players were hosting a reception. "Before I got there, word had spread about what I'd done," Brown says. "When I arrived, everyone wanted to buy me a drink."

That incident contributed to Brown's reputation as the man to go to when an athlete's transcript needed a quick fix. He would push already forgiving professors to raise an athlete's grade when asked by coaches or counselors. He said he enticed professors with tickets or promises of athletic clothing. Once he arranged for football tickets to be provided to a professor's son and his Little League teammates. "One professor used to joke with me that he helped a certain player so much that the player should name his first child after him," Brown says.

The stable of professors Brown says he could count on to raise a grade or turn an incomplete into a grade include some of the schools most distinguished faculty. Brown says those professors changed grades without requiring extra work from the students or, in some instances, requested more work but were willing to change the grade before it was turned in. "And then more often than not the athlete wouldn't turn anything in later," Brown says.

One of Brown's former assistants, who often filled out grade-change forms for him, said she got so tired of the frequent trips to the registrar's office to retrieve the forms that she ultimately brought back a stack of between 15-20 and stored them in a credenza in Brown's office. The assistant said she witnessed Brown facilitate change grades for football or basketball players "at least 15 times," and said she often delivered the signed forms to the registrar's office herself or sent them using inter-office mail.

"Any time a season was about to start, when an athlete needed to be certified to play, the coaches would come to Dr. Brown's office," said the assistant, who asked not to be named. "Then we'd fill out more [grade-change] forms."

At the center of Brown's allegation is the class (AAS 2320) he taught three times a year -- during the fall semester, the spring semester and the summer session. Brown drew on his experiences growing up in Birmingham, Ala., during the Civil Rights movement. He once marched with Dr. Martin Luther King and was mentioned in a chapter of James Forman's book The Makings of Black Revolutionaries.

When he started teaching at the University of Houston, Brown required his students to complete a series of reading assignments, take two exams, write a 10-page research paper, review a book and prepare an oral presentation. It was a popular class, he says, but initially did not attract many athletes because it was an elective and did not fill a requirement toward a degree in most disciplines. But after he moved into the athletic department, Brown gradually tailored the course to accommodate athletes. He began teaching it twice during the summer because so many players stayed for summer school, and he eventually got approval for his fall and spring classes to meet only once a week (and at night). Brown says he stopped giving in-class exams, assigning only take-home writing assignments. "I knew athletes were getting their girlfriends or mamas to write the papers, but I didn't care," Brown says. "Changing grades was a lot of work. If they turned in something, I had an excuse to give a player a good grade and then didn't have to feel so slimy changing it later."

Though Brown's course was an easy one, he says athletes still cheated. In 2001, according to Brown, six male athletes turned in the

same paper for his class. "The only thing they changed was the cover sheet," he says. He took the matter to at least one school official and a coach. Brown says they assured him the six would be punished. He claims the athletes did not resubmit the assignment, yet he did not flunk them because "I knew I'd just be asked to change their grades later."

Brown's class was not the only one in which athletes allegedly got away with cheating. Several former Houston athletes contacted by SI.com told of athletes receiving improper assistance, including some taught by professors other than those Brown mentioned.

Brown says one professor of a class that was popular with athletes sometimes gave his tests to an academic counselor so the athletic department could administer them. Former football player Kyle Brown (no relation), recalled the circumstances under which he and others took one of the professor's exams. "After practice on a Sunday, all the football players in that class and some other athletes went to a room in the athletic department to take the test," Kyle Brown says. When the players arrived, they were given a blank form to fill in the answers for the multiple-choice test but also one with the answers already filled in. "All we had to do was fill in the blank form with the answers they gave us," Kyle Brown says. "Sometimes, there were not enough forms with the answers, so we'd pass them around."

Kyle Brown said he saw the professor travel on the team bus and attend walk-throughs before games, a privilege he says was extended only to "special guests."

"I don't know anything about that first hand," says Maggard. "But going by what people have told me about [the years] prior to when I got here, nothing like that would have occurred."

Houston athletic director Maggard says of Brown's accusations, "I can only speak to what I have seen since I was hired [in 2002], and I have seen nothing to indicate the types of things he is talking about."
AP

Brown points to the high number of professors, heads of academic departments, and deans who signed off on grade changes as evidence of a systematic problem. "It is an institutional issue," he says. He said the cheating contributes to the larger crisis: the school's failure to graduate its athletes, particularly African-American males. "Look at the graduation numbers; they're embarrassing," Brown says.

Houston's four-class average graduation rate was 44 percent, according to the most recent results released by the NCAA. However, as recent as the NCAA's 2000 synopsis, it was 31 percent. Houston's record of graduating black male athletes is even lower. The school's most recent four-class average in that category is 33 percent and was 30 percent or lower in each of the four years prior. (The Division I average was 60 percent for all athletes and 45 percent for African-American male athletes, according to the most recent figures available.)

"The university has had a problem educating athletes for a long time," says Jones, who is a member of the university's athletic Hall of Fame. "It's shameful."

"The graduation rate for athletes has been going up since I got here," says Maggard. "The most recent numbers are higher for athletes [50 percent] than they are for regular students [40 percent]."

Brown said he initially thought his grade fixing was aiding the athletes' cause but came to believe he was being exploited while no one benefited. He says that when Evans enrolled in the fall of 2003 after his "kamikaze summer," Brown vowed to never again cheat for a Houston athlete.

"I told the academic counselors not to put another athlete in my class again," he said. "I told them that if they did I was going to flunk [the athlete] whether he did the work or not."

That was in October. By January, Brown had been fired. When he returned from Christmas break, he says he was questioned by campus police and then handcuffed in the parking lot outside the athletics building. Brown claims the university manufactured the theft charge to get rid of him once he would no longer agree to cheat for athletes. He also wonders if it was retaliation for a separate incident.

At the end of the 2003 fall semester, Brown claims he identified at least six football players who had not returned their books. He says he feared that they had sold them and pocketed the money, so he ordered the athletics business office to put a stop on their registration for the spring semester until the books were returned or paid for. The six were not eligible to compete in the Hawaii Bowl on Christmas Day unless they registered for the spring semester. Brown says an athletic department official sent a memo to the business office ordering the holds released, allowing the players to register and play. Brown says he doesn't believe the six ever made restitution for the books, which he claims were worth several thousand dollars, a potential violation of NCAA rules.

"It made me sick," says Brown, who is now selling basketball equipment. "Look, I am not proud of what I did. Had I set out to be crooked and dishonest, I would be pleased with myself. But I am not . . . I did it because I was getting a decent salary, state benefits and good vacation time. I liked my job and wanted to keep my job.

"But eventually, I got tired of it. It gets old. An athlete would come in with this swagger and expect things to be done for him. It made me sick."

Corrections to the 2005-06 NCAA Division I Manual*

Page(s)	Bylaw	Correction
93	13.1.3.1.2	Additional text added (**correction noted in bold and underlined**). 13.1.3.1.2 Exception -- Men's Basketball. In men's basketball, an institution is permitted to make one telephone call per month to a prospect [or the prospect's parents or legal guardian(s)] on or after June 15 of the prospect's sophomore year in high school through July 31 of the prospect's junior year in high school. An institution is permitted to make two telephone calls **per week** to a prospect [or the prospect's relatives or legal guardian(s)] beginning August 1 prior to the prospect's senior year in high school. An institution is permitted to make one telephone call per week to a two-year college prospect [or the prospect's parents or legal guardian(s)].
100	13.1.8.8-(a)-(4)	Bylaw cite is incorrect. Please replace 30.17 with 30.16.
100	13.1.8.8-(b)-(2)	Bylaw cite is incorrect. Please replace 30.18 with 30.17.
124	13.12.1.1.2	Additional text added (**correction noted in bold and underlined**). 13.12.1.1.2 Football and Basketball. An institution's football camp or clinic may be conducted only during two periods of 15-consecutive days in the months of June and July or any calendar week (Sunday through Saturday) that includes days of those months (e.g., May 28-June 3), unless such activities meet the provisions regarding developmental clinics set forth in Bylaw 13.11.3.1. The dates of the two 15-day periods must be on file in the office of the athletics director. An institution's basketball camp or clinic may be conducted only during the months of June, July and August, **or any calendar week (Sunday through Saturday) that includes days of those months** unless such activities meet the provisions regarding developmental clinics set forth in Bylaw 13.11.3.1. Violations of this bylaw shall be considered institutional violations per Constitution 2.8.1; however, such violations shall not affect the prospective student-athlete's eligibility.
127	13.12.3-(a)	Bylaw cite is incorrect. Please replace 30.18 with 30.16.
128	13.12.3-(b)	Bylaw cite is incorrect. Please replace 30.18 with 30.17.

Corrections to the 2005-06 NCAA Division I Manual*

Page(s)	Bylaw	Correction
148 and 149	14.3.1.1-(a)	Under "Additional academic courses," please remove reference to computer science. As of August 1, 2005, computer science course can be used only if the high school grants graduation credit in mathematics or natural/physical science and the courses appear on the high-school's core course list as a math or science course.
164	14.4.3.5-(a)	Remove "not" in the last sentence of the bylaw (**correction noted in bold and <u>underlined</u>**). 14.4.3.5 Exceptions to Progress-Toward-Degree Rule. (a) Missed term**.** One time during a student-athlete's entire period of collegiate enrollment, the provisions of Bylaw 14.4.3.1-(b)-(1) may be prorated at 12 hours per term of actual attendance if the student-athlete misses a complete term or consecutive terms during an academic year, subject to the following conditions: (1) The student-athlete engaged in no outside competition in the sport during the academic term or terms in which the student was not in attendance; and (2) At the time of certification, the student has fulfilled the progress-toward-degree requirements per Bylaw 14.4.3.1 for the terms in which the student was in attendance. A transfer student from a two-year college is not eligible to utilize this one-time exception during the first academic year of residence at the certifying institution in order to maintain eligibility during the second year in residence. **<u>Hours earned while enrolled as a part-time student during the "missed term" may be counted in meeting the progress-toward-degree requirements</u>**.

Corrections to the 2005-06 NCAA Division I Manual*

Page(s)	Bylaw	Corrections
171	14.4.3.6-(a)	Additional text added (**correction noted in bold and <u>underlined</u>**). (a) Medical absence. The credit hours required under the progress-toward-degree regulation of Bylaws 14.4.3.1 **<u>(b) and (c)</u>** and 14.4.3.5-(c) may be prorated at nine hours per term of actual attendance during an academic year in which a student misses a term or is unable to complete a term as a full-time student as a result of an injury or illness.
215	15.5.7.1.1.2.3.1	Bylaw cite in the first sentence is missing a number. 15.5.7.1.2.3 should read 15.5.7.1.1.2.3.
218	Figure 15-1	The footnote for the "Institutional Employee Dependent Tuition Benefit" should be 5 not 7.
240	17.02.11.4	The reference to football should be removed from this bylaw. It should read as follows: 17.02.11.4 First Day of Practice. The first day of practice may be conducted on the day when the last practice unit occurs, which is determined by counting backward from the day of the first permissible regularly scheduled contest. For example, in women's volleyball, practice may be held on the day that the 29th practice unit actually occurs, counting backward from the day of the first permissible regularly scheduled contest.
265	17.8.3	The reference to rugby is incorrect. Please replace with equestrian.
411-12	30.11.2-(b)	Additional text added (**correction noted in bold and <u>underlined</u>**). (b) September 16 through Tuesday of the week following the initial date for the spring signing of the National Letter of Intent [except for (1), (2), (3) **<u>, (4) (5) and (6)</u>** below] Women's basketball staff members shall not exceed 85 recruiting person days (see Bylaw 13.02.10). Academic year evaluations are limited to scholastic events.*:
412	30.11.3-(a)-(2)	Please remove the word "calendar" in between "42" and "days." Please see 13.1.8.9.3 and ER-2005-17 for details on the change.
428-29	31.2.3.3	The two references to "season of participation" is incorrect. Please replace "participation" with "competition."

* The LSDBi contains the most up to date version of the Division I Manual.

Robert,
Attached is contact information for Advisors and departments. I know Cynthia wanted this information, but it might be helpful to others.

Marilyn

Subject: Ed. Fdn. Fall Scholarship Dinner

Hi All,

The Rams Club is looking for student-athletes to assist with the program at the Nov. 5 Scholarship Dinner. If you would like to recommend someone from your team for the following, please let me know by Oct. 6, 2005.

1. Invocation
2. Speak on behalf of student-athletes on scholarship
3. write a letter to include in the printed program
4. serve as emcee

We have some very bright and talented student-athletes and the scholarship donors love to hear from them, so please give some thought to who might do a good job with any of these areas and let me know if you have someone.

Thanks,
Beth

Subject: Guest Coaches for Louisville

Guest Coaches for the Louisville game are:

Julius Nyang'oro - Faculty, African/Afro American Studies (traveling to L'ville)
Debbie Crowder and Travis also from Afam
*Coach Bunting's table

Beth Jordan - Faculty, Psychology (traveling to L'ville)
*Coach Bunting's table

Others groups attending Thursday lunch:

Tommy Womble and Cashier's office staff (3 total).

Jim Clinton and Jon Gorsuch from the One Card Office and Bookstore, also bringing staff (11 total).

Jeannette Florence and Kim Allison from Arts & Sciences/Advising.

Robert,
There was a question in your staff meeting last week about students still showing up on the roll for Afam 40 004. This course was canceled, but students were not dropped from the list. I just received word from the Registrar's office that Debra Banks will take care of dropping these students, but she will contact the Cashier's office first to make sure there are no issues.

Can you pass this on?

Thank you,
Marilyn

Subject: Winning logic

Winning logic
Winning logic

By Dan Wetzel, Yahoo! Sports
December 8, 2005

The Colorado Buffaloes lost by a combined score of 100-6 the last two weeks, which means Nebraska and Texas did to Gary Barnett what hookers, rape allegations and NCAA investigators couldn't get him fired.

CU officials dumped Barnett for being a lousy football coach on Thursday. They should have canned him a long time ago for being a lousy representative of the university.

But that, of course, isn't how college athletics works. You can have recruits plied with drugs, prostitutes and strippers on campus visits, you can have sexual misconduct charges pile up like cord wood and you can say outrageously stupid things about a female place kicker who had filed one of the aforementioned sexual misconduct charges and you'll still keep your job.

At least as long as you are winning. Before the 100-6 double debacle, Barnett was working on a contract extension.

"In major college (athletics) nine out of 10 schools break the rules," said Jerry Tarkanian, the rogue former basketball coach in a book I wrote with him.

"The other one is in last place."

Say what you want about Tark the Shark, but he is bringing it real on that one. All that major college lip service about compliance, education and values blows away in the wind of reality.

And every coach like Barnett knows it. Which is why you either push the envelope or perish, playing a wink-and-nod game with administrators who care not how all that ticket, television and parking money shows up in the coffers, just how much shows up.

Barnett took over for Rick Neuheisel, who had landed CU on probation only to get a better paying gig at the University of Washington anyway. The Huskies liked Neuheisel's on-field record (33-14) and didn't care about his NCAA compliance one. He lasted all of four years before landing UW on probation and getting caught gambling on college sports.

For this, Neuheisel made millions.

This isn't just a Colorado or Washington thing, of course. It is everywhere. Winning is both everything and the only thing.

In November, The New York Times in a brilliant piece of investigative reporting blew the roof off of Miami's University High, a storefront "school" with no classes, no teachers and no academic accreditation that area football stars were paying $399 to pump up weak transcripts in an effort to get academically eligible for college ball.

It was an outrageous, almost comically fraudulent place.

Naturally, the paper identified 14 University High "alums" at 11 different Division I programs, including the University of Tennessee, where three of four members on the admission board "expressed reservations" about the place but still allowed recruit Demetrice Morley and his absurd transcript into UT.

"I always had reservations about this type of school, if students are actually learning," Ruth Darling, assistant vice chancellor for academic affairs, told the Times.

Not enough reservations, of course, for Ruth to deny admission to a big recruit. Even at a school which dealt with an academic scandal (tutors writing papers) as recently as 2000.

You would have thought this would be a big thing at Tennessee, academic fraud cutting to the core mission of college athletics you know, actually educating the athletes. But the only swift investigations and mass firings inside Volunteer football were three assistant coaches who were deemed responsible for UT's first losing season since 1988.

UT hasn't done anything about admitting kids from joke high schools because, it points out, the NCAA Clearinghouse itself said it was OK. But that is the NCAA, which is interested in fair play as long as it doesn't crimp the business model.

Consider that the NCAA governing board that makes the very rule book no one follows includes six members representing either schools or conferences that are currently on probation, essentially allowing the rule breakers to write the rules.

Probably the most laughable example is Mike Slive, the commissioner of the SEC a league that since 1990 has seen all 12 members (the entire conference) slammed with major violations 20 different times and in 2005 alone had seven of its schools on probation.

This is the most credible guy the NCAA could find?

Of course, the most recent case under Slive's watch involves Lou Holtz's South Carolina program, which was nailed for 10 major violations earlier this year. This shouldn't have come as a surprise to anyone since Ole Lou put his last three programs (South Carolina, Notre Dame and Minnesota) on probation. This is what he does.

For some reason, Holtz is still a highly paid and respected motivational speaker and ESPN analyst. As a coach he cheated and cheated and cheated. Of course, he never got fired like Gary Barnett.

Gee, wonder why.

Dan Wetzel is Yahoo! Sports' national columnist. Dan's new book, "Runnin' Rebel: Shark Tales of 'Extra Benefits,' Frank Sinatra and Winning It All" with coach Jerry Tarkanian, is on sale now.

Subject: English

Wanted to update everyone on the meeting Mary Willingham and I had with Todd Taylor today. Our priorities going in were English 10 in 2nd summer session, supplemental instruction or writing workshops and plagiarism.

Todd is going to meet with C.Cannon and B.Owen to discuss his thoughts on English 10 being offered in 2nd summer session. There is some concern about having an English class with all SA's. However, Todd estimates that about 75% of English 10 students (fall and summer) are SA's so it's almost impossible not to have the above scenario. The other 25% are traditional fr and ESL students (English second language).

Mary Willingham is going to develop an SI or writing workshop for English 10 students. This will be approved by Todd and will be open to all English 10 students (not just SA's). We will facilitate the program out of our building. The program will then expand to follow the English 10 students thru English 11 as well. We will also make support available to the ESL students.

Todd would also like to work with our SA's (all of them) on issues of plagiarism. He said he really took to heart Coach Bunting's message (fall Thursday lunch) on leadership and integrity and wants to help. Todd will work with us this summer and fall on developing a more comprehensive program on plagiarism. It may also be a good idea to include Todd in on the Summer II football programs and the CREED academic meeting in the fall, Cricket?

Mary Willingham will also participate in the English TA training this summer/fall to help us better understand the course.

OK - that's it for now..this is very good news...Todd is really making himself and the writing program available to us.

I thought you guy's should be in the loop about this. The part in red is, well, in red!

Faculty Council is meeting Friday to discuss the following....

Resolution 2006-2.
Revising the Standards for Continued Academic Eligibility for Undergraduate Enrollment

The Faculty Council endorses the recommendation of the Educational Policy Committee that the standard for continuing eligibility for undergraduate enrollment be changed to a cumulative GPA of 2.0 throughout a student's enrollment, and that this change be made effective beginning with the Fall Semester, 2007.

The Dean of the College of Arts and Sciences is requested to prepare the necessary amendments to the Academic Eligibility Regulations (2005-006 Undergraduate Bulletin, pp. 304-308) for formal approval by the Faculty Council.

Educational Policy Committee Comment: Eligibility standards are designed to specify minimum acceptable academic performance. It is expected that most students will exceed those standards and in fact most do. Current standards for continuing eligibility have been in place since the mid 1980s (see the Undergraduate Bulletin). These standards can be seen as attempting to place standards for cumulative GPA that get progressively higher over the course of a college career, presumably so as to allow a struggling student to adapt to the demands of academic work at Carolina. Based on analyses of student performance by the Student Retention Study Group and on discussions with student advisors, the current system creates two kinds of difficulties. First, the current rules requiring progressively higher levels of performance are very complicated and can be difficult to explain to students in some cases. Second, and more seriously, the current eligibility rules allow students to remain eligible while building a record that can make it very hard to meet the standard of a cumulative GPA of 2.0 that is needed in order to graduate. Based on these considerations, EPC recommends that the standard for continuing eligibility be changed to a cumulative GPA of 2.0 throughout a student's academic career. EPC proposes that this change go into effect for students entering the University during the fall semester of 2007.

Resolution 2006-3
Replacing the System of Academic Warning Notification and Academic Review with a System of Academic Probation
The Faculty Council endorses the recommendation of the Educational Policy Committee that the current system of Academic Warning Notification and Academic Review for undergraduate students be replaced with a system of Academic Probation that contains the following features:

1. a student who does not meet eligibility standards after any semester in residence is automatically placed on probation for one semester;

2. a student who does not meet eligibility standards at the end of the probationary semester becomes ineligible; and

3. the associate dean responsible for academic advising may impose other conditions to be met during the probationary semester in order to promote student success by providing support services to students in a coordinated and timely manner.

This change shall be made effective beginning with the Fall Semester, 2007.

The Dean of the College of Arts and Sciences is requested to prepare the necessary amendments to the Academic Eligibility Regulations (2005-006 Undergraduate Bulletin, pp. 304-308) for formal approval by the Faculty Council.

Educational Policy Committee Comment: Currently there is a system where students who are not making acceptable academic progress receive an Academic Warning Notification and undergo Academic Review. Besides providing an explicit warning about inadequate progress, this notice is meant to encourage students to take advantage of resources that provide academic support. EPC recommends that the current system of Academic Warning Notification and Academic Review be replaced with a system of Academic Probation. A student who does not meet eligibility standards after any semester in residence would be automatically placed on probation for one semester. A student who does not meet eligibility standards at the end of the probationary semester would become ineligible. Further conditions of Academic Probation would be determined by the Deans who are responsible for academic advising. The requirement that students on probation meet conditions specified by academic advisors is intended to promote student success by providing support services to students in a coordinated and timely manner. EPC proposes that this change go into effect for students entering the University during the fall semester of 2007.

Resolution 2006-4
Revising the Deadline for Undergraduate Course Schedule Changes in the Fall and Spring Semester
The regulation on Changes in Fall and Spring Semester Schedules (2005-06 Undergraduate Bulletin, pp. 301-302) is amended by striking out the words "sixth week" wherever they appear and inserting in lieu thereof the words "eighth week".

This amendment is effective beginning with the Fall Semester, 2006.

The Dean of the College of Arts and Sciences is requested to prepare the necessary amendments to the Academic Eligibility Regulations (2005-006 Undergraduate Bulletin, pp. 304-308) for formal approval by the Faculty Council.

Educational Policy Committee Comment: Currently students can withdraw from courses (with permission) through the sixth week of class with no record of enrollment in the course on their transcripts. EPC believes that if higher eligibility standards for cumulative GPA are instituted, then this deadline should be extended to the eighth week of classes. Extending the drop date would allow students to assess better how well they are doing in a class before having to decide whether to withdraw. This should make it easier for struggling students to meet the GPA standards by dropping courses in which they are doing poorly and focusing on their remaining courses. Because a change in the withdrawal date is relatively easy to implement, EPC recommends that the new deadline be adopted starting in the fall semester of 2006.

*So what does this mean? OK, the 9/HR 1.0 gpa rule will be replaced by a 9/hr 2.0 cum gpa rule. If at any time a student drops below a 2.0 cum gpa they will be placed on academic probation. If after the probation semester they are still below the 2.0 cum gpa, they will be dismissed. For now there is no appeal process.

What are we concerned about? First the term academic probation. The NCAA says an SA must be in good academic standing within the institution to compete. So what does academic probation mean? Who defines it? Second, is to make sure the probation period is consecutive and not retroactive.

Bobbi gave me the heads up last week. Cyn, Wayne, JGB and I met this morning to review. JGB and I spoke with L Broome and Jack. Most likely all of us will be attending Friday's FC meeting to hear the faculty discussion. After that we will contact Bobbi, Fred and Carolyn to hear/discuss amendments.

The good news is there is an opportunity for the Dean of Arts and Sciences to make amendments before the final Faculty Council Review.

More - I spoke with Alice Poehls - Registrar and she said that the intent is to retain students not to dismiss them. So, the probation period must be consecutive, not retroactive. Further, at her prior institutions (Illinois, N. Dakota), good academic standing meant enrolled full time regardless of the probationary status. Very good news. She is going to pursue this with Bobbi and get back with me.

Call if you have questions. RJM

2.0 not 3.0.

The working plan is that all first year students stay in school regardless of how they do during their first semester (if they do really poorly, they will be asked to "consult with a member of the academic advising retention team."

The first time a student finds him or herself in trouble - they would be automatically put on probation. Only after a semester of probation would they become ineligible - with the current methods of restoring good standing still in place (summer school, on-line, self-paced studies). I am attaching what looks like the standard hours and gpa requirements. No more review, no more warning.

It's technically possible to be here for three semesters in a row before ending up ineligible.

Bobbi
****

DRAFT:

A student who enters the University after July 1, 2007 must meet the following minimum requirements:

A. a 2.000 cumulative grade point average and 24 academic semester hours passed (cumulative) to begin the third semester-in-residence. Any student who does not have at least a 2.000 cumulative GPA and 9 academic hours passed by the beginning of their second semester in residence will be required to consult with a member of the advising program retention team

B. a 2.000 cumulative grade point average and 36 academic semester hours passed (cumulative) to begin the fourth semester-in-residence;

C. a 2.000 cumulative grade point average and 51 academic semester hours passed (cumulative) to begin the fifth semester-in-residence;

D. a 2.000 cumulative grade point average and 63 academic semester hours passed (cumulative) to begin the sixth semester-in-residence;

E. a 2.000 cumulative grade point average and 78 academic semester hours passed (cumulative) to begin the seventh semester-in-residence;

F. a 2.000 cumulative grade point average and 90 academic semester hours passed (cumulative) to begin the eighth semester-in-residence;

G. a 2.000 cumulative grade point average and 105 academic semester hours passed (cumulative) to begin the ninth semester-in-residence.

/Notes/

Except for degree programs that require enrollment beyond a ninth semester, permission to enroll in a tenth semester or beyond must be secured in advance from the appropriate officials in the college or school in which the student is enrolled. A minimum of 2.000 cumulative GPA is required to enter a 10th semester or beyond.

****

I am also attaching the "Toolbox Revisited Report" which has much of interest. It suggests that course drops without penalty and waivers of good standing without penalty do little good over the long term as students do not accept responsibility for their actions.

Part IV. Matriculation and Beyond: The Features of Postsecondary History

13. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary entry phase 45
14. Percentage of 1992 12th-graders who earned credits in five categories of college-level mathematics courses in the first calendar year of attendance; and among non-incidental students, the percentage who ever earned credits in those five categories, by type of institution first attended 48
15. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: First postsecondary year performance 49
16. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary financing 51
17. Percentage of 1992 12th-graders with complete postsecondary records who persisted in postsecondary education from their first calendar year of enrollment to a second calendar year, by type of institution first attended, and, of those who persisted, percentage with lagging first-year performance 54
18. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, credits earned, and GPA at the end of the second year following initial enrollment in postsecondary education, and extended postsecondary attendance and performance markers, by ultimate bachelor's degree status 56
19. Status drop-out rates at the end of the second year following initial enrollment in postsecondary education of 1992 12th-graders who attended a four-year college at any time, and allied academic performance data 57
20. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, course participation rates by the end of the end of the second year following initial enrollment in postsecondary education, by ultimate degree status 58
21. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, participation rates in lower division course category aggregates and average number of credits earned in each aggregate by the end of the second year following initial enrollment in postsecondary education, by ultimate degree status 60
22. Relationships of GPA in first year of attendance to number of institutions attended by 1992 12th-graders, by type of first institution attended by 1992 12th-graders, by type of first institution attended 63

Tables (continued) **Page**

23. Combinations of institutions attended by 1992 12th-graders who attended a four-year college at any time and who also attended more than one school, and percentage earning bachelor's degrees under each combination 64
24. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary attendance patterns 66
25. Three trends in postsecondary GPA of 1992 12th-graders who attended a four-year college at any time through December 2000 and offered complete postsecondary records, by GPA at three points in time, average undergraduate time, and percentage earning bachelor's degree 69
26. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Extended postsecondary performance 71
27. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Final factors, with complete academic history 75
28. To what extent does the final ratio of undergraduate course withdrawal and no-credit repeat grades reflect the ratio and volume of withdrawal and no-credit repeat grades in the first calendar year of enrollment? Answers from the history of 1992 12th-graders who attended a four-year college at any time 76
29. Seven steps of a logistic regression model with bachelor's degree attainment by age 26 or 27 as the outcome for 1992 12th-graders who attended a four-year college at any time 78

Part V: Closing the Gap

30. Bachelor's degree completion rates for students who began in four-year colleges according to three different national longitudinal studies of the 1990s 87
31. Of 1992 12th-graders who started their postsecondary careers in four-year colleges, percent who earned bachelor's degrees by number of credits earned in summer terms, by race/ethnicity 90
32. Hypothetical cumulative consequences of variables critical to bachelor's degree completion for 1992 12th-graders who earned a standard high school diploma by December 1996, attended a four-year college at any time, and whose postsecondary records were complete, by race/ethnicity 92
33. Percent of credits earned during undergraduate summer terms by African-American 1992 12th-graders in aggregate course categories 94
34. Hypothetical cumulative consequences of variables critical to bachelor's degree completion for 1992 12th-graders from the lowest, middle, and highest socioeconomic status quintiles who earned a standard high school diploma by December 1996, attended a four-year college at any time, and whose postsecondary records were complete 95

Acknowledgments

For review of the drafts of *The Toolbox Revisited*, the author is deeply grateful to Laura Horn of MPR Associates, Alisa Cunningham of the Institute for Higher Education Policy, Rosa Aronson of the National Association of Secondary School Principals, Alberto Cabrera of the University of Wisconsin-Madison, six anonymous external reviewers selected by the Office of Vocational and Adult Education (OVAE) of the U.S. Department of Education, and expresses particular appreciation for the meticulous review by Paula Knepper of the Department's National Center for Education Statistics. In the final stages of review and revision, the author is especially appreciative of the efforts and insights of Jeffrey Owings of the National Center for Education Statistics and David Bergeron of the Office of Postsecondary Education, both of the U.S. Department of Education.

While cited in the text, it is appropriate to repeat gratitude for the paths blazed and inspirations offered by Karl Alexander of Johns Hopkins University and Vincent Tinto of Syracuse University. C. Dennis Carroll and Jeffrey Owings, both of the National Center for Education Statistics, are responsible for the data sets used and the way they are used, and for continued support, encouragement, instruction, and tough oversight. All who invoke these national data treasures owe them.

Colleagues in the Policy, Research, and Evaluation Studies group of OVAE—Braden Goetz, Andrew Abrams, Ricardo Hernandez, and Chief of Staff, Jana Toner—are thanked for their management of the review process for this document, for instructive feedback, and for shepherding the penultimate drafts of this document through the Department, while Joan Athen made sure that the community college role in the story of the students traced in this document was appropriately highlighted. The final shape of *The Toolbox Revisited* owes a considerable amount to its ultimate editor, Katherine Devine, and to the support of Jacquelyn Zimmermann, the Department's Director of Editorial Policy and Publications. For the Web version, the author owes much to the skill and dedication of Carol Bryant.

THIS PAGE INTENTIONALLY LEFT BLANK

Executive Summary

The Toolbox Revisited is a data essay that follows a nationally representative cohort of students from high school into postsecondary education, and asks what aspects of their formal schooling contribute to completing a bachelor's degree by their mid-20s. The universe of students is confined to those who attended a four-year college at any time, thus including students who started out in other types of institutions, particularly community colleges.

The core question, data source, and legacy

The core question is not about basic "access" to higher education. It is not about persistence to the second term or the second year following postsecondary entry. It is about completion of academic credentials—the culmination of opportunity, guidance, choice, effort, and commitment.

To answer the question, *The Toolbox Revisited* uses the most recently completed of the national grade-cohort longitudinal studies conducted by the National Center for Education Statistics. This study, known as the NELS:88/2000, began with a national sample of eighth-graders in 1988. They were scheduled to be in the 12th grade and graduate from high school in 1992. They were followed through December 2000. In addition to regular interviews with these students, the data set on which this essay draws includes the critical components of high school and college transcripts, and the transcript data are the principal sources for the academic history observed.

The Toolbox Revisited was designed as a replication of a noted previous study published by the U.S. Department of Education, *Answers in the Tool Box: Academic Intensity, Attendance Patterns, and Bachelor's Degree Attainment* (1999), hereinafter referred to as "the original *Tool Box,*" which based its analysis on a national cohort of high school students who were scheduled to graduate in 1982, and who were followed through 1993. The question naturally arose as to whether the hypotheses and analyses based on that cohort's history would hold up in the story of the slightly overlapping 1992–2000 period.

We have learned a great deal in a very short time from numerous initiatives of states and private foundations to prepare high school students better for higher education, and from major federal stimuli under the *No Child Left Behind* legislation to jump start the process of academic momentum prior to high school. One of the reasons for examining the academic history of the NELS:88/2000 cohort is that its students attended high school after the wave of reforms in the 1980s that followed the critique of U.S. education offered by the seminal report, *A Nation at Risk* (1983), and, hence, may provide some clues as to the likely outcomes of current reform efforts.

Much has changed in other ways, too, since the High School Class of 1982 (the subjects of the original *Tool Box*) moved through their scheduled 12th grade and through postsecondary education. A dramatically higher proportion of high school seniors of all race/ethnicity groups continue their education, though access gaps remain (Wirt et al. 2005, indicator 22). Postsecondary attendance patterns among traditional-age students have become far more

complex, with nearly 60 percent of undergraduates attending more than one institution, and 35 percent of this group crossing state lines in the process; community college transfer rates rising nearly 10 percentage points; one out of eight undergraduates based in four-year institutions using community colleges to fill in pieces of their curriculum, and another eight percent "swirling" back and forth between the four-year and two-year sectors. Dual-enrollment while in high school, credit-by-examination, and use of summer terms all added to the dynamic mix of time and space that marked student pathways in the1990s.

With all this change, we still measure something called "college graduation rates" with anachronistic formulas that do not track students through increasingly complex paths to degrees. As a result, we do not understand what is really going on. The dominant language accompanying analyses bemoaning putatively low graduation rates is a language of "attrition," with students labeled "at risk" or "minimally college-qualified," and leaking out of "pipelines."

This study looks at student histories derived from transcript records in a different way and with a different tone. It follows the student, not the institution, because it is the *student's* success that matters to families—and to the nation. It allows the maximum length of postsecondary time for the High School Class of 1992, 8.5 years, for students to earn degrees no matter how many institutions they attend. It notes that if the history of the Class of 1982 were truncated at 8.5 years, there has been a decent improvement in bachelor's degree attainment among non-incidental students (those who earned more than 10 credits, i.e. "made a go of it") who attended a four-year college at any time (from 60 to 66 percent). It is natural to ask how this happened, to identify the moments and aspects of schooling that may have made a difference, and to reflect on what might make the most difference in the future for narrowing degree-completion gaps by race/ethnicity. In that task, *The Toolbox Revisited* looks for the features of academic history that are realistically subject to change by institutions whose principal business is the generation, preservation, and dissemination of knowledge. While acknowledging that for degree-completion rates to improve, students themselves must respond, and that their response does not occur in a vacuum, the features of student histories that are the domain of this inquiry do not include social and psychological variables attendant on the passage from adolescence to adulthood.

It is important to note that, as was the case for the original *Tool Box*, the student universe for *The Toolbox Revisited* constitutes roughly half who reach the 12th grade (table 1). It does not include students who failed to graduate from high school, those who earned General Education Diplomas (GEDs), those who had not enrolled in any postsecondary institution by the age of 26, and those who entered the postsecondary system but never attended a bachelor's degree-granting institution. The resulting demographics are slightly more female, slightly less minority, less with a second language background, and a higher socioeconomic status distribution than the cohort as a whole (table 2).

Organization

We learned from critiques of the original *Tool Box* to sort the chronology of events with greater care. There are seven steps in the analysis of *The Toolbox Revisited*, each of which involves a

collection of variables that are investigated in terms of the degree to which they help us explain bachelor's degree completion for the population of students under investigation:

Step 1: Demographic background and high school history
Step 2: Postsecondary entrance (timing and type of institution)
Step 3: First postsecondary year history (curriculum and performance)
Step 4: Factors of financing postsecondary education in the early years
Step 5: Postsecondary attendance patterns
Step 6: Extended postsecondary history (curriculum and performance)
Step 7: Final model, with complete academic history

This essay also takes an important pause outside the steps of the core statistical model to consider the characteristics of student progress through the *second* year following postsecondary entry.

As each step of the statistical model of student history is set forth, it is pointed out where the results are similar to the findings of the original *Tool Box* with its earlier population, and where they diverge. All seven steps are subsequently assembled together in one place (table 29) so that the reader can observe the factors that have *consistently* contributed to degree completion.

Principal Stories and Guidance

This executive summary offers themes, highlights, and implications of the data for those who comment on secondary and higher education and make decisions about institutional or system policy—editorial writers, legislators, researchers, education administrators.

Two national longitudinal studies, a decade apart, have told similar stories. When the second story reinforces the first—and sheds even more light—something has to be right, and it behooves us to pay attention. Both of them provide support for current efforts to improve the quality of high school curricula and the participation in those curricula of ever larger proportions of students. Both of them provide guidance for college and community college processes likely to lead students to degree completion.

Some of what was learned from the original *Tool Box* was taken to heart at the secondary school level, and, in some respects, we are seeing positive results in academic curricular participation in high schools. But counting Carnegie units[1] in English or science is not the same as describing and validating what students have learned, and whether that learning links smoothly to the performance expectations of the postsecondary world. *The Toolbox Revisited* says we have more to do, that the bulk of our task lies both after the college matriculation line, and in communication and outreach between postsecondary institutions and high schools. How do we

[1]A Carnegie unit is the basic credit system for U.S. secondary schools. It is generally recognized as representing a full year (36-40 weeks) in a specific class meeting four or five times per week for 40-50 minutes per class session (Martinez and Bray 2002).

learn what we have to do? By following students in the richness and complexity of their postsecondary histories.

Curriculum, starting in high school, and continuing

However complex students' attendance patterns, the principal story line leading to degrees is that of content. What one learns is what one studies, and what one brings to economic and community life. The story starts in high school, but merely crossing the bridge to college or community college doesn't mean the story is over. Furthermore, the bridge is not always aligned with the road on the other side.

The academic intensity of the student's high school curriculum still counts more than anything else in precollegiate history in providing momentum toward completing a bachelor's degree. At the highest level of a 31-level scale describing this academic intensity (see Appendix F), one finds students who, through grade 12 in1992, had accumulated:

3.75 or more Carnegie units of English
3.75 or more Carnegie units of mathematics
highest mathematics of either calculus, precalculus, or trigonometry
2.5 or more Carnegie units of science *or* more than 2.0 Carnegie units of core laboratory science (biology, chemistry, and physics)
more than 2.0 Carnegie Units of foreign languages
more than 2.0 Carnegie Units of history and social studies
1.0 or more Carnegie Units of computer science
more than one Advanced Placement course
no remedial English; no remedial mathematics

These are minimums. In fact, students who reached this level of academic curriculum intensity accumulated much more than these threshold criteria (see table F1), and 95 percent of these students earned bachelor's degrees (41 also percent earned master's, first professional, or doctoral degrees) by December 2000.

Provided that high schools offer these courses, students are encouraged or required to take them, and, in the case of electives, students *choose* to take them, just about everybody could accumulate this portfolio. Unfortunately, not all high schools present adequate opportunity-to-learn, and some groups of students are excluded more than others. Latino students, for example, are far less likely to attend high schools offering trigonometry (let alone calculus) than white or Asian students. Students from the lowest socioeconomic status (SES) quintile attend high schools that are much less likely to offer any math above Algebra 2 than students in the upper SES quintiles (table 6). If we are going to close gaps in preparation—and ultimate degree attainment—the provision of curriculum issue has to be addressed. In recent years, colleges and community colleges have begun to provide these courses to high school students, and distance learning provides additional options if students have access to the technology. The hypothetical

consequences of participating in curriculum configurations approaching that illustrated above for Latino degree completion rates, in particular, are stunning (table 32).

There is a quantitative theme to the curriculum story that illustrates how students cross the bridge onto and through the postsecondary landscape successfully. The highest level of mathematics reached in high school continues to be a key marker in precollegiate momentum, with the tipping point of momentum toward a bachelor's degree now firmly above Algebra 2. But in order for that momentum to pay off, earning credits in truly college-level mathematics on the postsecondary side is *de rigeur*. The world has gone quantitative: business, geography, criminal justice, history, allied health fields—a full range of disciplines and job tasks tells students why math requirements are not just some abstract school exercise. By the end of the second calendar year of enrollment, the gap in credit generation in college-level mathematics between those who eventually earned bachelor's degrees and those who didn't is 71 to 38 percent (table 21). In a previous study, the author found the same magnitude of disparity among community college students in relation to earning a terminal associate degree (Adelman 2005a). The math gap is something we definitely have to fix.

A dominant feature of academic histories that cannot really be assessed until the end of the second year following college entry is the extent to which students successfully completed credits in a range of "gateway" courses. It is at this point that the postsecondary curricular story line fully emerges, with ratios of participation in the "gateways" between those who ultimately earned degrees and those who did not running 6:1 in American literature, 4:1 in general chemistry, and more than 3:1 in precalculus, micro/macroeconomics, introduction to philosophy, and world civilization (table 20). These gaps in curricular participation argue for academic administrators to identify their key gateway courses and regularly monitor participation.

College and community college expectations for their first-year students in those gateway courses—expressed through examinations, paper and laboratory assignments—need to be more public. Examples such as those offered by the American Diploma Project in its report, *Ready or Not: Creating a High School Diploma That Counts* (2004), should be shared with larger audiences than policymakers and others who habitually read such reports. Parents should see those assignments even if they don't understand them; high school teachers should ponder them to assess whether their exiting students are likely to be prepared; and, most importantly, high school students have got to see them as road signs to their next education destination. *The Toolbox Revisited* advocates making these examples part and parcel of admissions packets, publicity brochures, and Web sites. There is risk in this: Some students may be scared away. But there is no better way to enhance articulation and preparedness than to display what students can expect.

Postsecondary benchmarks

In both colleges and community colleges, the curriculum story line intersects attendance patterns and performance in ways that set benchmarks for academic advisement and intervention:

- Less than 20 credits by the end of the first calendar year of enrollment (no matter in what term one started, whether summer, fall, winter, spring) is a serious drag on degree completion. The original *Tool Box* told the same story. It is all the more reason to begin the transition process in high school with expanded dual enrollment programs offering true postsecondary course work so that students enter higher education with a *minimum* of 6 additive credits to help them cross that 20-credit line. Six is good, 9 is better, and 12 is a guarantee of momentum.
- We falsely believe that beginning students drop out of higher education in appalling numbers by the end of their scheduled first academic year of attendance. In fact, about 90 percent of traditional-age beginning students turn up somewhere (maybe not at the first school attended) and at some time (maybe not in the fall term) during the subsequent calendar academic year (which we measure as July 1 through June 30). However impressive this percentage, the *quality* of persistence counts more, and, for a third of these students, the quality of persistence leaves much to be desired (table 17). *The Toolbox Revisited* urges that institutions monitor and report the quality (as much as the fact) of persistence.
- More than 60 percent of the students in the sample under investigation enrolled during summer terms. Undergraduates are not only more geographically mobile, but have shattered observance of the traditional academic calendar. Summer term credits are more than metaphors for high octane persistence: Earning more than 4 credits during those terms held a consistently positive relationship to degree completion, and gave African-American students, in particular, a significant boost in hypothetical graduation rates (table 32). College and community college administrators can be very creative in expanding the use of summer terms.

Student uses of time

The example of summer-term credits, particularly in combination with the complex multi-institutional attendance patterns, underscores another theme of *The Toolbox Revisited*: Student uses of time in undergraduate careers are now more important than their uses of place. In other words, *when* students do something academic has a more significant relationship to degree completion than *where* they do it. For example:

- For the High School Class of 1982 (the subjects of the original *Tool Box)*, timing of entry to postsecondary education never rose to a level of statistical significance in the analysis, whereas variables for the type of institution first entered played inconsistent but positive roles in explaining degree completion. A decade later, with a higher proportion of high school students continuing to college, the situation was reversed (table 13). What this means is that recruitment efforts have to insure that students enter postsecondary education immediately following high school graduation. The longer students wait, the less likely they will finish a degree.

- The only characteristic of the first institution of attendance to be admitted to statistical analysis was selectivity, but it never rose above the threshold of significance. Quite frankly, one isn't worried about degree completion for the 5 percent of traditional-age undergraduates who enter highly selective colleges. One is more concerned with the rest of the river—particularly the 78 percent who start in either nonselective four-year colleges or open-door community colleges.
- The original *Tool Box* study declined to confront part-time status and its effects. If one is using transcripts as evidence, there are a number of problems in determining which students are part-time and when. *The Toolbox Revisited* found a way around these problems to mark whether a student's enrollment intensity *ever* fell into part-time status, i.e., less than 12 credits per semester or its equivalent. Part-time attendance by whatever means, as Carroll (1989) labeled it, proved "hazardous" to degree completion health (table 24; table 29).
- In longitudinal studies extending for as long a period of postsecondary time as does the NELS:88/2000 (8.5 calendar years), a student is allowed stop-out periods totaling one semester or its equivalent (e.g., two quarters), exclusive of summer terms, and still be considered "continuously enrolled." Continuous enrollment is a factor of attendance patterns, and another marker of the student's use of time. It proves to be overpowering: with 16 other variables in play, continuous enrollment increases the probability of degree completion by 43 percent (table 27). The original *Tool Box* offered the same message, arguing for assiduous monitoring of student stop-out periods. Put another way: Keep the student continuously enrolled, even part-time (less damaging than excessive stop-out periods).

Purposeful migration versus "swirling"

The complexity of student postsecondary enrollment patterns, already a notable phenomenon for the population under study in the original *Tool Box*, accelerated in the subsequent cohort. The construction of the NELS:88/2000 postsecondary transcript files took advantage of what we learned from more sophisticated institutional and state system tracking studies of the 1990s; hence, some new attendance pattern variables were available and others (those describing different kinds of multi-institutional attendance) refined.

What we found for the students of the 1992-2000 period was this:

- Formal transfer from a community college to a four-year college and formal transfer from one four-year college to another were positively associated with degree completion, but wandering from one school to another was not.

In fact, the nomadic multi-institutional attendance behavior increasingly known as 'swirling,' held a significant and negative relationship to degree completion (table 24, table 39). These statements are a very simple untangling of complex realities.

The basic question asked of the transcript data—did a student attend only one school or more than one?—begins a process of inquiry to determine *how* the student attended second and third institutions. Given very taut definitions of what transfer means, we are advised to ensure that multi-institutional attendance is purposeful and productive. For that, we require much better student tracking systems than we currently possess, and regular contact with students in motion.

Student academic performance

More than the original *Tool Box*, *The Toolbox Revisited* recognizes that the path of student academic performance, marked by grades, is a reflection of quality of effort, and pays off. It starts in high school: Academic curriculum participation is still the strongest of the precollegiate momentum indicators, but between the 1980s and 1990s, class rank/GPA moved markedly ahead of senior year test score in its contribution to students' overall "Academic Resources" index, a composite indicator of high school curriculum intensity, class rank/GPA, and senior year scores on a 90-minute exam best described as a mini, enhanced SAT (see p. 16 and Glossary).

This story continues on the postsecondary side of the matriculation line:

- Earning grades that place one in the top 40 percent of first-year GPA for the whole cohort is a strong—and positive—contributor to academic momentum, and remains in the account of degree completion throughout the histories of both the class of 1982 and the class of 1992 (table 15).

- The theme of quality-of-student-effort, reflected in grades, is strengthened when the canvas covers the student's entire undergraduate career. In the original *Tool Box*, the variable describing the *trend* in students' GPA had only two reference points: first calendar year and final GPA. For *The Toolbox Revisited*, there are three such points: first calendar year GPA, cumulative GPA for the first two calendar years, and GPA as of the last date of attendance, whether or not a degree was earned. A rising trend in grades fits with attainment (table 25), contributing positively and significantly (table 26).

A story twice told should be a story to which we listen

Both the original *Tool Box* and *The Toolbox Revisited* revealed that one of the most degree-crippling features of undergraduate histories is an excessive volume of courses from which the student withdrew *without penalty* and those the student repeated. We set this up as a ratio, and marked those who withdrew from or repeated 20 percent or more of their course attempts. Doing so cuts the probability of completing a degree in half (table 27)!

The withdrawals counted here are not "drop" grades that apply during standard drop-and-add periods at the beginning of terms. They are the result of institutional policies that allow withdrawals without penalty after the drop-and-add period. No-credit repeats are standard fare

in remedial courses, but when they reach destructive levels the question arises as to how many times an institution allows a student to repeat a course. Think of it this way: Every non-penalty withdrawal and no-credit repeat means that a seat in a course is not available to someone else. Add those seats up, and admission to an institution may not be available to someone else. Excessively lax withdrawal and repeat policy, then, ultimately blocks general access. And in terms of degree completion, such policies do students no favors.

What Does Not Count in The Account of Completion?

- Students' education "anticipations" (the consistency and level of their vision of how far they will get in school) were not significant at any step of the logistic account for the High School Class of 1992. This is a change from the position of the "anticipations" variable in the original *Tool Box*, where it ducked in and out of significance. The new message is more clear: Among students who attend a four-year college at some time, expectations are distinctly secondary to one's uses of academic time and to one's academic performance.

- Whereas grants and student work-study were modestly significant contributors to degree momentum at *early* stages of students' postsecondary careers in the history of the High School Class of 1982, the data on finance mechanisms for the High School Class of 1992 are poor, and the results inconclusive. Analysts are directed instead to the Beginning Postsecondary Students longitudinal studies, which contain detailed financial aid data (but skeletal information on high school histories and postsecondary course work).

- Of student demographic characteristics, only one—socioeconomic status—was significantly associated with degree completion, though in a modest manner. Gender and race/ethnicity were never significant in the logistic narrative, even though some *indirect* effects of these key demographic characteristics would probably be found in other statistical models. When each race/ethnicity group was treated as an independent variable, the basic story did not change.

- Both a dichotomous variable marking any remedial work in the first calendar year of attendance, and an elaborate variable describing types and extent of remediation over the course of a student's entire undergraduate career were employed in the analysis, but to no avail. The same procedure was used in the original *Tool Box*, where the variables were admitted to the statistical model but did not reach the threshold of significance. Sufficient numbers of students who took remedial classes successfully moved through them so that remediation did not make a strategic difference in degree completion.

- Half of the students in the sample for *The Toolbox Revisited* who earned bachelor's degrees changed their major along the way. It was natural to ask whether change-of-major had any influence on degree attainment. It did not,

principally because, with few exceptions, community college transfer students come in to the four-year institution from a general studies program and automatically are classified as "change-of-major" the minute they enter a specific program at the four-year school.

Students as active, responsible participants

The Toolbox Revisited does not treat students as passive creatures whose fate is wholly molded by schools and colleges. It demonstrates that, within the population of traditional-age students who attend a four-year college at any time (obviously including community college transfers), we *can* improve graduation rates and close some of the gaps in completion by race/ethnicity and socioeconomic status. But it also argues that there is a limit to what we can realistically do unless students respond to highly targeted advice and prodding.

The analysis of *The Toolbox Revisited* identifies features of academic history that are most tractable in terms of second party intervention. But there is also something we might dub "first party intervention." Once the modest echoes of socioeconomic status are accounted for, each step of academic history offers *students* a set of decisions that require the commitment of time and effort likely to yield the return of earning a degree. Provided there is opportunity, the choices made by students, beginning with high school curriculum and quality of effort in high school, allow subsequent leverage. Entering a postsecondary institution directly from high school, earning 20 or more credits in the first calendar year of enrollment, and performing well enough in that first calendar year to fall in the top 40 percent of a GPA distribution build on previous academic investments, and are all signs of commitment.

Subsequent choices that may not be reflected in a bounded period of time, such as excessive course withdrawals, prove to be poor decisions with negative returns, breaking accumulated momentum. Other configurations of choice, including summer-term credit generation, meeting the challenge of college-level mathematics, effort required to yield a rising GPA, and most of all, remaining continuously enrolled, all reflect continuing leverage of attainment. This is what academic momentum is all about. While these choices do not take place in a social and psychological vacuum, this is a story about the intersection of student choice with the structures of opportunity offered by institutions whose first order of business is the distribution of knowledge. It is not a story about growing up, although that happens along the way.

Degree Completion: How High Can We Go? How Much Can the Gaps Be Closed?

In Part V of *The Toolbox Revisited*, three different national longitudinal studies conducted during the 1990s are set side-by-side, so as to demonstrate a remarkable degree of agreement on the rate of bachelor's degree completion for students who started out in four-year colleges (granted, that is only part of the broader universe addressed in this essay). Looking at the concordance of these three sources (table 30), it is fair to say that:

- A third of traditional-age students who started in a four-year college earned a bachelor's degree from the same school in the "traditional" four-year period.

- Between 54 and 58 percent earned the degree from the same school in which they began within six years of entry.
- When the option of earning a degree from a different four-year college than the one in which these students commenced study, the six-year completion rates are in the 62–67 percent range.
- Only the NELS:88/2000 extends the time period for earning a degree beyond six years; at 8.5 years, its degree completion rate for students who started in a four-year college approaches 70 percent.

However, it is unfortunate to note that despite increased participation of minority students to postsecondary education over the past quarter century, the gap in bachelor's degree completion between whites and Asians, on the one hand, and Latinos and African-Americans, on the other, remains wide.

What features of academic history might close the gaps, and by how much?

The data-driven exercise in Part V of *The Toolbox Revisited* can be characterized as "reasoned speculation." From the NELS:88/2000, we start with a degree completion gap between whites and Asians vis-a-vis African-Americans of 15 percent; and with reference to Latinos, 22 percent. We go back through our analysis and ask what factors:

(a) consistently contributed to bachelor's degree completion at all stages of the model in which they were "in play," and

(b) were most subject to change by external parties with little-to-modest—but creative—effort that might improve the portrait of degree completion.

Five factors stand out, four of which affect small populations in which minority students are over-represented. Small populations can add up. These factors are:

1. **First-year credit generation**, i.e., the goal of making sure that postsecondary students end their first calendar year of enrollment with 20 or more additive credits.

2. The problem of **excessive no-penalty withdrawals and no-credit repeats**, which affect 10 percent of the cohort. Institutional policy and advising can cut the incidence of withdrawals and repeats in half.

3. **Use of summer terms**. Strategic enrollment management can move more sections of high demand courses into summer terms, offer credit-bearing internships in summer terms, and engage in other creative initiatives that will also smooth out the utilization of institutional resources over what has become an "academic calendar year."

4. **No delay of entry.** This is a matter of recruitment strategy among high school students whose commitment to postsecondary education is less than fervid. The later they show up, the more their postsecondary fate is in jeopardy.

5. **The high school curriculum component of "Academic Resources."** This is not a case of "little-to-modest" effort or a small population. It is a megawork in progress, much of which depends on students' reading skills on entering high school. If students cannot read close to grade level, the biology textbook, the math problems, the history documents, the novel—all will be beyond them. And if high schools are not offering a full academic curriculum, there is little hope.

But with those five factors in mind, and assuming full student response and success, *potential* degree completion rates were hypothesized based on the records of NELS:88/2000 high school graduates by race/ethnicity (table 32) and socioeconomic status quintile (table 34). Virtually every one of these factors contributed to closing degree completion gaps, but none more than high school academic curriculum participation—which, to repeat, is criterion-referenced, hence, open to everyone to rank at or near the top. For African-American students, the combination of moving into the top 40 percent of the high school academic curriculum intensity index plus earning more than four credits during postsecondary summer terms would lower the degree completion gap vis-a-vis white and Asian students from 15 percent to 6 percent. For students from the lowest socioeconomic status quintile, moving into the top 40 percent of the academic curriculum intensity index and entering postsecondary education directly from high school would improve degree completion from 36 to 59 percent. For Latino students, the same steps would improve degree completion from 45 to 69 percent. Does that mean that future degree completion rates will look like those in tables 32 and 34 if everyone meets the criteria on all five counts? No; not everybody will make it. But the tables suggest just where the improvements could be dramatic—and for whom.

Messages to Students and Commentators

Student responsibility (the intersection of choice with opportunity) is a major theme of *The Toolbox Revisited* in a way that was only implicit in the original *Tool Box*. The essay concludes with some recommendations for students, who are partners in their own education fate, who shouldn't wait around for someone else to do something for them, and who are rarely addressed in studies of attainment.

The concluding messages also reflect on the dissonant data of public discourse on high school graduation rates, college attrition rates, and college graduation rates, examples of consequent "scare stories" that do not help us identify and address real problems, and a plea for creativity and cooperation in developing better student tracking systems. These messages also urge a considerable change in the language we use in describing what happens to students from a negative rhetoric that assumes passivity to one that respects students as active players, seeking and discovering paths to their education goals.

A Guide for Reading Tables and Terms

Interchangeable terms

This essay frequently compares the histories of two grade-cohort longitudinal studies carried out by the National Center for Education Statistics (NCES). Each of these studies can be referenced in a number of ways, and all of these references are used.

The following labels for the longitudinal study that began with a national sample of 10th-graders in 1980, the High School and Beyond/Sophomore cohort, are interchangeable:

HS&B/So
High School Class of 1982
class of 1982 (where inter-cohort comparisons of 12th-graders are at issue)

"High School & Beyond/Sophomore cohort" will also be spelled out when the entire longitudinal study, including all its data set components, is the subject.

The following labels for the longitudinal study that began with a national sample of eighth-graders in 1988, the National Education Longitudinal Study of 1988, are interchangeable:

NELS:88/2000
High School Class of 1992
class of 1992 (where inter-cohort comparisons of 12th-graders are at issue)

On reading tables in this study, part 1: Descriptive cross-tabulations

All tables in this study are constructed to meet the statistical standards for table presentation of the National Center for Education Statistics (NCES 2002a). They are stand-alone tables, so that if they are reproduced outside the context of the essay, they tell a complete, self-contained story. To ensure a complete story, the descriptive cross-tabulations in this document include the standard errors of the estimates. The reason for this election—instead of placing tables of standard errors in an appendix—is to enable the reader to judge, on the spot, whether the difference between any two estimates is statistically significant. While the text draws the reader's attention to statistically significant (and insignificant) estimates important to the narrative, it does not comment on all statistically significant estimates. In general, the formula invoked for statistical significance is the simple student's *t* test:

$$t = (P_1 - P_2) \div \bullet\bullet \overline{(se_1^2 + se_2^2)}$$

where P_1 and P_2 are the percentage estimates to be compared and se_1 and se_2 are the corresponding standard errors. If $t > 1.96$, one has a statistically significant difference at $p < .05$ (which means that the probability that this observation would occur by chance is less than 1 in 20), a standard marker. In the case of multiple comparisons, the critical value for *t* rises.[2]

[2]For technical issues concerning standard errors and multiple comparisons, see Appendix D.

Variances in estimates

The reader will often find that estimates for the same phenomenon will differ somewhat, e.g., in one table a bachelor's degree completion rate is 69.3 percent, in another table, 64.6 percent. These differences are due to the definition of the universe (i.e., who are we counting?) for each table and the weight employed in the calculation.

On reading tables in this study, part 2: Logistic models

The core analytic method employed in *The Toolbox Revisited* is a logistic regression, and there are a baker's dozen tables in both the text and appendices that present the results of logistic models. There are many ways in which researchers have presented these results (Peng, So, St. John, and Stage 2002), and a number of statistics are employed in these representations. *The Toolbox Revisited* employs the following for each row of these tables:

The name of the variable—Variable names were created so that the realities to which they refer are self-evident.

The unadjusted parameter estimate—also known as the log odds, or the natural logarithm of the odds of the outcome of interest happening, e.g., whether a bachelor's degree was earned. The reader should note whether the sign for this estimate indicates a positive or negative relationship to bachelor's degree completion, as well as the magnitude of the estimate (though that alone does not indicate whether the estimate is significant).

The adjusted standard error of measurement for the estimate—Some researchers will say that this statistic is not necessary. The author provides it because, without it, one could not verify the accuracy of the other statistics on the row. We need the adjustment because NCES longitudinal studies are based on complex sampling designs. The adjusted standard error is calculated by multiplying the simple standard error by the Root Design Effect for students who offer non-missing values for all variables in the logistic model at issue (see Appendix D).

The t statistic—This is the measure that opens the gate to the judgment of degree of significance for the variable in question on that row. Again, some researchers will say that this statistic is not necessary because in the next column, the p statistic indicating degree of significance is provided. The author offers the t statistic because a minimum t of 0.765 was selected as a threshold for keeping a variable in the sequence of logistic models, and the reader should see those instances where a variable fails to meet that criterion. Why 0.765? In any statistics textbook, one will find an appendix with a table of relationships between levels of significance (p values) and t-values for two-tailed significance tests according to the number of degrees of freedom (number of variables in a model minus one). If one goes to the column for the lowest level of significance in this standard table ($p < .50$), and scrolls down to the t-value for the smallest number of

variables used in any of the logistic models in *The Toolbox Revisited*, three, one will find it equal to 0.765. This is a very generous threshold.

The *p* statistic—This notation tells us whether the observed relationship would occur by chance, and, if so, at what ratio of chance. A *p* of <.05 says that the odds of the relationship between independent and dependent variables in that model occurring by chance are less than 1 in 20. This is also known as a 95 percent confidence level. In all of the logistic models in *The Toolbox Revisited* there are variables that do not meet the *t* requirements for even a marginal level of significance ($p < .10$). All variables with a *p* of <.10 or better are highlighted in bold.

Delta-p is the critical statistic for telling the story of the association of the parameter estimate with degree completion. It says that every unit change in the independent variable changes the *probability* that X will happen by Y percent—and the Y is indicated by the Delta-p, e.g., 0.1285 would be translated in the text as 12.9 percent. The statement of change in probability is not a linear statement, and is always the result of relationships among the variables in a particular logistic model. It certainly should not be read as a statement of cause or prediction.

Three decision rules

In indicating whether a variable was used in the logistic models of *The Toolbox Revisited*, three criteria were observed:

- Any statistical software package (the Statistical Analysis System, or SAS, was used in this report) allows one to set a threshold of statistical significance for a variable to be admitted to a multivariate model. The default threshold is that 95 percent confidence level, represented as $p < .05$. For both the original *Tool Box* and *The Toolbox Revisited* this threshold was changed to a much more generous .2, i.e., the probability that the variable would be admitted by chance is less than 1 in 5. The purpose of the more generous threshold is to allow more variables to "compete," so to speak, within the boundaries of a statistical model, and then to see which variables survive.
- As noted above, the survival indicator in a model was a *t* value set to 0.765. If a variable failed to exceed that value when utilized in the step of the logistic series in which it was introduced, it was not carried forward to subsequent steps.
- Collinearity—Think of the Venn diagrams you learned in high school mathematics. If each circle in the Venn diagram represents a variable, you don't want a situation where two or more of them overlap to a point approaching an eclipse, for if they do, analysis of either one is impossible. There are special statistics for determining the extent of collinearity, and these were employed to determine when this situation arose. When it arose, one of the variables had to be dropped. This often happens when one variable is a major component of another, e.g., family income in relation to socioeconomic status. The narrative will describe these cases. For further comments on collinearity, see Appendix D.

THIS PAGE INTENTIONALLY LEFT BLANK

Organization of This Data Essay

The following is a brief outline of *The Toolbox Revisited* so the reader knows what to expect.

Part I: Background. The introduction presents the basic question, the data sets invoked, the purposes and statistics of the investigation, and the demography of the subject universe.

Part II: Variables Explored and Used in This Analysis. This short section of the study lists all the independent variables that were considered and provides brief definitions and basic statistical characteristics. A summary figure (pp. 20–21) indicates which of these met the criteria for inclusion in the logistic narrative of Parts III and IV. A more elaborate glossary (pp.179–193) provides details on the construction of these variables, allied data and commentary, and will be of particular interest to researchers.

Part III: What Is and What Happens Before Matriculation. Here we begin the chronological narrative, using both descriptive and multivariate data, of what ultimately made a difference in bachelor's degree attainment by December 2000 for 1992 12th-graders who attended a four-year college at any time. Part III begins with background demographic characteristics, then adds the critical components of high school academic history.

Part IV: Matriculation and Beyond. This section continues the cumulative steps of the logistic narrative, starting with the characteristics of entry to the postsecondary world, and continuing with first calendar year performance, financing considerations, attendance patterns, and extended performance (that is, taking students' entire undergraduate careers into account). It includes a special consideration for the second calendar year of enrollment and concludes its logistic narrative with attention to two very powerful variables: continuous enrollment and the ratio of course withdrawals and repeats to the number of all courses attempted.

Part V: Closing the Gap. Having demonstrated how the universe of independent variables is related to degree completion, *The Toolbox Revisited* then asks two questions: (1) To what extent do the major national data sets agree on "graduation rates"? And (2) Given what we have learned about what makes a difference in degree completion, what variables provide the most promising guidance for closing the gap in graduation rates, by race/ethnicity and socioeconomic status, for students who attend a four-year college at any time?

Part VI: The Missing Element of This Story. A key missing part of the story that is a by-product of the limited features of the NELS:88/2000 is addressed in this section: the content standards of high school and postsecondary course work. Other brief "excursions"—timing and reasons for permanent ("status") drop out from college, and time-to-degree—are placed in Appendices H and K respectively.

Part VII: Messages. Finally, *The Toolbox Revisited* offers some messages—to students and to those who engage in public discourse about the issues we have covered—and highlights the major conclusions of the study.

Appendices: With one exception, appendices are presented in the order in which they are cited in the text. The exception is the last appendix, Appendix L, that contains a variety of reference tables on miscellaneous topics raised in the text.

[THIS PAGE INTENTIONALLY LEFT BLANK]

Part I
Background

This study explores the academic resources and momentum students build through their high school and college careers, and analyzes the relationships between those factors and degree completion rates. It departs from most previous research on attainment by focusing on the details of students' high school and college curricula and academic performance that are available from transcript records. Its principal data are drawn from the National Education Longitudinal Study of 1988 (hereafter referred to as the NELS:88/2000 or just NELS). This longitudinal study followed a national sample of over 12,000 students (representing a weighted 2.9 million students) from the time they were in the eighth grade in 1988 to roughly age 26 or 27 in December 2000.

In round numbers, of the high school graduates in this cohort, 83 percent engaged in some form of postsecondary education by age 26, and 68 percent attended a four-year college at some time. Of those who earned any credits from four-year colleges at any time (which includes a substantial proportion of students who began postsecondary study in community colleges), 66 percent earned a bachelor's degree.

While the 66 percent completion rate sounds impressive for a mass system of higher education, it masks an unhappy differential by race/ethnicity, and more so by socioeconomic status. As we strive to improve high school graduation rates, to invite greater numbers of high school graduates into the postsecondary system, simply to maintain—let alone improve—our completion rates will take a great deal of effort. We need constructive guidance and benchmarks.

This study was designed as a follow-up and replication of a previous attempt to provide that guidance—*Answers in the Tool Box: Academic Intensity, Attendance Patterns, and Bachelor's Degree Attainment* (hereafter referred to as the original *Tool Box*).[3] Since its publication in 1999, the original *Tool Box* has become one of the most frequently cited works in public discussions about—and initiatives to improve—the preparation of students for higher education. Its most visible uses have included the presentations of the Texas "Master Scholars" program (2002), the revisions in entrance requirements for the University of North Carolina system (2000), standards goals set by the Illinois Board of Higher Education (2001), and suggestions of the Education Commission of the States for state high school graduation policies (2001). It was summarized in major litigation addressed to inequities in opportunity-to-learn in high schools (e.g., *Daniel v. California* 1999), and in the research literature, its analyses of both precollegiate preparation and post-matriculation attendance patterns and performance have also been marked (e.g., Horn and Kojaku, 2001; Zucker & Dawson, 2001; Cabrera and La Nasa, 2001) and improved on (DesJardins, McCall, Ahlburg and Moye, 2002; Cabrera, Burkum, and LaNasa 2005).

---

[3]Out of print but available at http://www.ed.gov/students/prep/college/thinkcollege/early/aboutus/edlite-resources.html.

The analyses in the original *Tool Box* were based on the High School & Beyond/Sophomore cohort longitudinal study (hereafter occasionally referred to as the HS&B/So), the second of the U.S. Department of Education's national grade-cohort longitudinal studies,[4] which followed a national sample of 10th-graders from 1980 to1992 in surveys and to September 1993 on postsecondary transcripts. As with all of the grade cohort longitudinal studies carried out by the National Center for Education Statistics,[5] test scores are included in the database, along with surveys of parents, school teachers, and school administrators. The modal high school graduation year for the HS&B/So was 1982, and student age at the conclusion of the study was 29 or 30.

The HS&B/So data, while compelling, are now somewhat dated. There were considerable changes in both the demography and postsecondary entrance behavior of high school seniors in the comparatively short span of the decade between 1982 and 1992. Appendix A highlights contrasts in selected background characteristics of all 12th-graders in the two longitudinal studies cohorts. Some of these changes have been frequently observed (higher proportion of minority students, westward and southward movements of populations, higher proportion of high school seniors entering higher education and planning to earn a bachelor's degree), and some rarely observed (higher proportion who grew up in mixed-ethnicity neighborhoods, and a higher proportion with parents who indicated some postsecondary education). The question naturally arises as to whether the hypotheses and analyses based on the history of the High School & Beyond/Sophomore cohort would hold up in the story of the NELS:88/2000. The NELS history offers a more contemporary account,[6] one that, in terms of secondary school records, may reflect the high school curriculum reforms of the mid- and later-1980s[7] that followed the discussion of the report of the National Commission on Excellence in Education, *A Nation at Risk* (1983). *The Toolbox Revisited* follows the same path of analysis using the NELS:88/2000 as did its predecessor with the HS&B/So. In that sense, it is a replication. It is a modified replication, however, because it introduces new constructs based on critiques of the original *Tool Box* and because it offers a more refined chronology of steps from high school to the end of a student's undergraduate education.

A substantial amount of the analyses and endorsements that followed the original *Tool Box* revived the flagging "seamless" K–16 themes of the 1980s post-*Nation at Risk* reform effort. In an October 2000 policy brief that visited these issues, the Education Commission of the States reminded people of what most of the 1980s reform reports did not address: the fact that K-12 and postsecondary systems are governed in very different ways, even in the public sector of postsecondary, and that there is a consequent "disconnect" of substantial dimensions (Education

---

[4]The first was the National Longitudinal Study of the High School Class of 1972 (1972–86).

[5]For a description of the grade-cohort studies, see Appendix B.

[6]A fourth-grade-cohort longitudinal study is currently in progress. Called the ELS2002, it began with a national sample of 10th-graders in 2002 and is expected to run at least through 2012. We obviously will have to wait some years before we see its full results.

[7]For an account of changes in high school graduation requirements in the years immediately following issuance of *A Nation at Risk*, see Stedman and Jordan (1986).

Commission of the States 2000). The metaphor of bridges (Venezia, Kirst and Antonio 2003) and the rhetoric of disconnect (e.g., Conley 2003) created a more sophisticated focus of analysis than the reform reports of the 1980s embraced. The major work that sought to build new bridges and connect the disconnects underscored the obligation of the system not merely to assure college "access," but degree completion, with curriculum playing the key role. While "degree completion," in public discourse, refers to the bachelor's degree, the same principles apply to associate degrees granted principally by community colleges as well (Adelman 2005a).

What Did the Original *Tool Box* Say?—And Based on What Kind of Evidence?

In a nutshell, here are the major conclusions of the High School & Beyond/Sophomore-based *Answers in theTool Box* analysis:

1) Of three traditional measures of precollegiate educational history—curriculum configuration, academic performance (on a scale that combines class rank and GPA), and assessed general learned abilities (a senior year mini-SAT)—the intensity and quality of one's secondary school curriculum was the strongest influence not merely on college entrance, but more importantly, on bachelor's degree completion for students who attended a four-year college at any time. The highest level of mathematics the student reached in high school played a significant role in the strength of the curriculum configuration. One of the major contributions of *Tool Box* not only to the literature, but to practice as well, was to change what was understood by the "entry characteristics"of students by digging out and demonstrating the power of the academic intensity of secondary school curriculum over combinations of standardized test scores and grades.

2) By moving into the top two quintiles of the curriculum measure and completing a high school mathematics course beyond Algebra 2, African-American students who started out in a four-year college would hypothetically increase their bachelor's degree attainment rate from 45 percent to 73 percent; Latino students who did the same would hypothetically increase their bachelor's degree attainment rate from 61 percent to 79 percent.[8] These increases were significantly greater than those for white and Asian students under this scenario, and, more importantly, were considerably greater than the influence of moving into the top two quintiles of either test scores or class rank/GPA. In other words, curriculum counts, particularly for minority students.

3) The three traditional precollegiate measures can be combined in a composite measure of "Academic Resources." This measure had continuing, statistically significant relationships with bachelor's degree completion in both linear and (more appropriately and convincingly) logistic regression sequences involving four post-matriculation steps (blocks of variables for financial aid, attendance patterns, first-year performance, and extended postsecondary performance).

---

[8]For African-American students in the HS&B/So who reached the 12th grade and entered postsecondary education, 52.3 percent started in four-year colleges, a percentage that rose to 54.2 in the NELS:88/2000. The comparable percentages for Latino students, who are more likely to start in community colleges, were 38.9 percent for the HS&B/So and 38.6 percent for the NELS:88/2000. For white students, the proportions starting in four-year colleges were 54.3 percent for the HS&B/So and 57.4 percent in the NELS:88/2000.

4) Post-matriculation behaviors and attendance patterns that were strongly and positively associated with bachelor's degree attainment were continuous enrollment, transfer from a community college to a four-year institution after more than 10 credits earned at the community college, and the *trend* in students' grades.

5) Post-matriculation behaviors and attendance patterns that had a strong negative influence on bachelor's degree attainment were the ratio of courses from which the student withdrew or repeated to all courses attempted, and earning less than 20 credits in the first calendar year of postsecondary attendance.

6) Socioeconomic status had a modest and diminishing association with bachelor's degree attainment. Minority status had a modest negative association until performance (first-year performance and continuing performance) was taken into account, at which point it had no effect Gender had no effect at any stage of the model. The only demographic variable to have a strong (and in this case, negative) association with degree completion was becoming a parent by age 20.

The overall message was about academic momentum and what adds to that momentum at each stage of a student's history from secondary school onward. The evidence was archival, was treated in the tradition of quantitative history (Elder, Pavalko, and Clipp 1993; Clubb, Austin and Kirk 1989; Haskins and Jeffrey 1990), and like this essay, did not claim causality.

Why use these data sets?

There are three types of national data sets available to construct longitudinal analyses such as the original *Tool Box* and this replication, but only one type of data set—the NCES transcript-based grade-cohort study—is truly suited to the task. The other two are (1) the Cooperative Institutional Research Project (CIRP) occasional longitudinal follow-ups to its annual survey of entering college freshmen, and (2) the NCES Beginning Postsecondary Students studies (BPS). Each of these has its virtues, and will be revisited in Part V of this study when we compare what three different longitudinal studies of the 1990s say about degree-completion rates. The CIRP produces an enormous amount of information on student attitudes, values, and college experiences, and does so with large samples of (principally) entering four-year college students. Its occasional longitudinal follow-ups involve sufficient history (e.g., six or nine years) to track not only long-term undergraduate completion rates, but also postbaccalaureate education (Astin 1993). The BPS longitudinal studies are shorter (five or six years), not dependent on institutional decisions to participate (as is the CIRP), inclusive of students of all ages at entry, and, as befits their principal population sample (a subset of the triennial National Postsecondary Student Aid Study), contain very strong and reliable financial aid data. The BPS study of 1995/96–2001 will be used at a number of points in this study to expand the range of our observations.

However, in both cases, all features of precollegiate history must be rendered as exogenous variables. The high school histories provided by students in CIRP are retrospective, and the precollegiate histories in the Beginning Postsecondary Students studies derive from a combination of retrospective offerings by students and accounts on the student information

questionnaires for those who took either the Scholastic Assessment Test (SAT) or American College Test (ACT) within the two years prior to the BPS start date (nearly half the students in the BPS studies did *not* take either exam). As Kahn and Nauta (2001) demonstrated, there is an inevitable loss of accuracy in the process of these retrospections.

On the other hand, the very nature of a longitudinal study population assembled in the 10th grade (High School & Beyond/Sophomore cohort) or eighth grade (NELS:88/2000) renders precollegiate history endogenous to analytic models. The transcript-base overrides student accounts and provides far more detail than either paper-and-pencil surveys (used by CIRP) or computer-assisted telephone interviews (used by the BPS studies) can provide.

Every data set sacrifices something. No data set is constructed with the questions a particular researcher may have a decade later, so variables are derived and secondary. The High School & Beyond/Sophomore study and the NELS:88/2000 are wanting in many ways where the other studies are strong: financial aid (BPS), and changes in values and opinions (CIRP). But as stories about the core activities we call education, they are unsurpassed by the others.

Purposes and Statistics of This Monograph

The primary purpose of this monograph is to trace the elements of academic momentum as they played out in the secondary school and college history of the High School Class of 1992 (through December 2000) compared with the parallel history of the High School Class of 1982 that was the foundation for the original *Tool Box* study. In the process, the analysis is enriched by including variables we learned to construct or modify on the basis of commentaries and critiques of *Tool Box*, and by a more accurate chronological order in presentation of those variables. The portrait of academic momentum that emerges is a framework within which more sophisticated analyses can be pursued, and within which ameliorative policies (the tools) can be advocated. This study does not pretend to answer complex questions about indirect effects of home, peer, school, and postsecondary institution interactions, but rather trusts future research to deal with those issues.

A secondary task is to demonstrate the construction of a replication when the two data sources, a decade apart, are presumably parallel**,** but turn out to be something less (for a key example, see Appendix C). The principal encouragement for the replication is that the bachelor's degree attainment rate for students who attended a four-year college at any time remained the same despite differences in the length of cohort history: 65.6 percent for the HS&B/So over 11 years, and 66.5 percent for the NELS:88/2000 cohort over 8.5 years (Adelman 2004a, table 2.2, p. 21). If the HS&Beyond/So history were truncated at 8.5 years, the bachelor's degree attainment rate would have been 59.7 percent. From this perspective there was a marked improvement in degree completion for traditional age college students over the two decades in question. It is natural to ask how this happened, and if the answers to that question provide any guidance for the future.

In terms of statistical technique, both the original *Tool Box* and *The Toolbox Revisited* use simple logistic regression, not structural equations or other path models that are common to causal inquiries or searches for indirect effects, e.g., of discrete aspects of school or college environments (Dey and Astin 1993). A logistic regression is focused on an event that either happens or it doesn't. The dependent variable is dichotomous: yes or no. The independent variables are judged within each model by the degree to which they contribute to what happened in relation to or controlling for all other independent variables in the model (Hair, Anderson, Tatham, and Black 1995).

There are a number of ways of expressing this "degree." One is by an "odds ratio," which, expressed in a simple way, is a ratio of the odds that X will happen given a unit of change in the independent variable to the odds of X not happening, and ultimately shows the strength of association between the independent and dependent variables—with the closer the odds ratio to 1, the less the strength of the association.[9] This was the measure used in the original *Tool Box*. Another way of expressing the value of the contribution of an independent variable is by a "Delta-p" statistic that says every unit change in the independent variable changes the *probability* that X will happen by Y percent given the values of the other variables in the model (Peterson 1985; Cabrera 1994). The narrative of *The Toolbox Revisited* relies on Delta-p,[10] and the logistic model tables provide Delta-p statistics only for those parameter estimates that are statistically significant since there is no way to determine the statistical significance of the Delta-p itself (Cabrera 1994).[11]

But in this paper there is a major methodological departure from the original *Tool Box* study: there are seven (and not five) steps in the model employed, all driven by the empirical history of the NELS:88/2000 students. Following St. John, Paulsen, and Starkey (1996), the blocks of variables in each step were entered "in a sequence that parallels the order in which students pass through well-established stages of persistence behavior" (p. 194) on their way toward bachelor's degree completion (or not). Each of the seven steps, too, is cumulative. That is, variables in one step that meet the statistical criteria for remaining in the model are carried forward to the next step. This extended accounting, which we will call a "logistic narrative," allows "a meaningful examination of the direct effects of variables on persistence, as well as their interactions with the variables entered in successive steps" (St. John, Paulsen, and Starkey 1996, p. 194).

The reader can already tell that there is a great deal of technical material in this presentation, but it is presented in the spirit of the U.S. Department of Education's goal of building a culture of evidence. The author trusts that reports such as *The Toolbox Revisited* will contribute to the

---

[9] Odds ratios, as Peng, So, Stage, and St. John (2002) remind us, are not odds. Their interpretation is not as transparent as the original *Tool Box* assumed them to be. And while an R^2 statistic is presented in the logistic tables of this study, it cannot be read the way one would interpret an R^2 in a linear regression, i.e., it does not indicate the percent of variance in the dependent variable that is explained by the independent variables (Long, 1997). For that reason, it is called a "pseudo R^2" (Cabrera 1994) and is one of a number of measures of goodness-of-fit. As blocks of variables are added to the model in the stepwise manner followed here, the pseudo R^2 should increase.

[10] For the computation of Delta-p, I am using a shortcut recommended by Paul Allison of the University of Pennsylvania: bp(1-p), where b is the logistic coefficient and p is the probability for the dependent variable in the model. This heuristic produces slightly higher values than the formula advanced by Petersen (1985).

[11] For all technical issues, please see Appendix D.

attainment of that goal. Some of the technical material is placed in appendices so that researchers have access to documentation, and all readers have access to reference material.

Who Are We Talking About? And Who Are We *NOT* Talking About?

As was the case for the original *Tool Box*, the basic universe of analysis in *The Toolbox Revisited* does *not* consist of everybody who started out in the cohort. We have to be very clear about this. The basic question of both studies is:

> What demographic, high school performance, postsecondary entry, and postsecondary history (attendance patterns, academic performance) factors are convincingly associated with bachelor's degree attainment for 12th-graders who subsequently attended a four-year college at any time in their undergraduate careers?

This is not a question about completing high school, completing high school on time, or completing high school on time with a standard diploma (as opposed to a GED or certificate of attendance).[12]

This is not a question about entering the postsecondary system. We are not talking about "access." Nor is it a question about "persistence" to the second term or the second year following entry to postsecondary education. It certainly is not about "retention" in the same institution to the second term or the second year.

This is a question about *completion* of academic credentials—the culmination of opportunity, advisement, choice, effort, and commitment.

The question is carefully worded. The universe does not include people who never reached the 12th grade. In fact, as a consequence of the sampling design and weighting of the two longitudinal studies, both essays include only those students who were in the 12th grade *in the same year,*[13] along with those who graduated from high school. The definition of the universe also requires that we have demographic information, high school transcripts,[14] test scores, and postsecondary transcripts for everybody whose careers are subject to analysis. Not everybody can present all this information, and, with rare exceptions (involving some aspects of high school records, and as explained in Appendix C) both the original *Tool Box* and *The Toolbox Revisited* decline to impute any of this information.

---

[12]For details on the high school graduation status of those who were eighth-graders in 1988, see Appendix L, table L1.

[13]For details on those in the NELS:88/2000 cohort who, though in the 12th grade in 1992 along with others, had previously been held back at least one year in the course of their schooling, see Appendix L, table L2.

[14]Only 21.3 percent (s.e. = 1.17) of the NELS:88/2000 who were in the 12th grade in 1992 were missing high school transcripts, compared with 73.7 percent (s.e. = 2.58) of those who had either dropped out of high school or were not in-grade. Nearly 100 percent of the former group graduated from high school with a standard diploma.

There are two other notable features of the basic question. First, both essays argue that, regardless of what students *say* on a survey about their education expectations, it is what they actually *do* that counts. So the only students we can talk about honestly with respect to bachelor's degree attainment are those who set foot in a bachelor's degree-granting institution at some time. This criterion obviously includes students who started their postsecondary careers in community colleges and other types of sub-baccalaureate institutions. Second, the term used to describe the relationship between the dozens of independent variables describing demography, high school performance, postsecondary entry, and postsecondary history and the dependent variable of bachelor's degree completion is "convincingly associated." Neither essay claims "cause" or "prediction."

To illustrate how these conditions restrict the universe, let us start with 2.93 million 1988 eighth-graders in the NELS:88/2000 cohort. Table 1 lays out the stages of contraction of the basic population until we reach the subject universe of this study.

Table 1. From macro to micro: Contraction of the universe of 1988 eighth-graders to the universe subject to analysis in *The Toolbox Revisited*

Description of Universe	Percent	Descending weighted N[a]
A. Initial universe of 1988 eighth-graders	100.0	2.93M
B. Of (A), those who were in the 12th grade in 1992	83.6 (0.98)	2.45M
C. Of (B), those who continued to postsecondary education at any time through December 2000	81.7 (1.28)	2.0M
D. Of (C), those who presented complete high school transcripts, test scores,[b] complete postsecondary transcript records, and socioeconomic status information	80.5 (1.01)	1.61M
E. Of (D), those who attended a four-year college at any time.	73.5 (1.00)	1.19M
Net percentage of 1988 eighth-graders in the universe	41	1.19M
Net percentage of 1992 12th-graders in the universe	51	1.19M

[a]Like other NCES longitudinal studies, the NELS:88/2000 cohort is a stratified sample, in which each student is assigned a weight to represent other similar students in the cohort (see Curtin, Ingels, Wu, and Heuer 2002).
[b] See definition of SRTSQUIN in Glossary.
NOTES: Standard errors are in parentheses.
SOURCE: National Center for Education Statistics: NELS:88/2000 postsecondary transcript files (NCES 2003-402 and Supplement).

Looking more closely at our universe in terms of the types of schools attended, we find that 20.2 percent (s.e. = 1.13) started in community colleges, and 41.0 percent (s.e. = 1.29) earned credits from community colleges, whether or not they started at community colleges. While we will describe the attendance patterns of the NELS:88/2000 cohort in more detail later, the point is that the universe under analysis is not limited to those who attended *only* four-year institutions, and that the community college plays a significant role in the careers of the group of students under consideration.

To repeat: Our subject universe consists of half the 1992 12th-grade students in the NELS:88/2000 cohort. We are *not* talking about:

- students who did not graduate from high school or those who graduated with something other than a standard diploma (G.E.D. or Certificate of Attendance);
- students for whom we do not have full high school records (transcripts, grades, test scores);
- students for whom socioeconomic status could not be determined;
- students who did not enter any postsecondary institution by December 2000, when they were 26 or 27 years old; and
- students who entered the postsecondary system, but never set foot in a bachelor's degree-granting institution.

That is the other half. Some 22.2 per cent (s.e. = 1.05) of 1992 12th-graders who attended a four-year college at any time are in this "other half" because they are missing key information that excludes them from the universe under analysis. Readers interested in the demographic differences between included and excluded students due to missing data elements are referred to Appendix E.

Comparative demography of the subject universe

Given the strong boundaries drawn around the subject universe, how does its demography compare to less restrictive definitions? Table 2 sets out the major demographic categories, and compares the target subject universe with (a) all 1988 eighth-graders who participated in the last survey of the NELS:88/2000 in 2000, (b) all participants in the 1992 survey, whether or not they were in school or in the 12th grade,[15] and (c) all 1992 12th-graders who attended *any* postsecondary institution by December 2000.

As readers work from left to right across the columns of table 2, they will notice that gender balances are even until the moment of entry to postsecondary education, at which point women pull ahead of men. The same type of observation applies to the race/ethnicity distribution: At the point of entry to postsecondary education, the proportion of African-Americans, Latinos, and American Indians declines, while that of whites and Asians rises. In the universe for this study,

[15]The reader should note that, unlike the High School & Beyond/Sophomore cohort study, the NELS:88/2000 sample was "refreshed" in 1992 to be representative of 12th-graders in that year. The "refreshed" students are included in our analyses.

Table 2. For each of four definitions of the universe of students in the NELS:88/2000, percentage distribution by gender, race/ethnicity, socioeconomic status quintile, and second language background

Demographic variable	1988 eighth-graders	All 1992 survey participants	All 1992 12th-graders who entered postsecondary education	1992 12th-graders who attended a four-year college at any time and met other criteria to be subjects of this study[a]
Gender				
Men	49.7 (1.01)	49.9 (0.83)	46.5 (0.93)	48.8 (1.27)
Women	50.3 (1.01)	50.1 (0.83)	53.5 (0.93)	51.2 (1.27)
Race/ethnicity				
White	71.7 (1.50)	71.5 (1.30)	74.9 (1.29)	78.2 (1.31)
African-American	12.9 (1.26)	12.7 (0.94)	10.3 (0.90)	9.4 (1.03)
Latino	10.5 (0.87)	10.4 (0.84)	9.1 (0.88)	7.0 (0.72)
Asian	3.5 (0.32)	3.7 (0.31)	4.8 (0.43)	4.7 (0.42)
American Indian	1.4 (0.43)	1.7 (0.55)	0.7 (0.23)	0.6 (0.18)
Second language background				
Nonnative speaker of English	8.6 (0.68)	10.1 (0.83)	10.0 (0.90)	7.4 (0.67)
Native speaker of English from a second language household	3.3 (0.33)	2.7 (0.21)	2.4 (0.23)	2.2 (0.28)
Socioeconomic status quintile				
Highest quintile	21.3 (0.92)	21.1 (0.88)	29.1 (1.08)	38.5 (1.52)
2nd quintile	20.8 (0.79)	21.0 (0.69)	25.3 (0.88)	26.4 (1.24)
3rd quintile	20.7 (1.10)	19.8 (0.68)	20.2 (0.73)	17.7 (0.85)
4th quintile	19.6 (0.83)	19.2 (0.66)	15.4 (0.61)	11.7 (0.59)
Lowest quintile	17.6 (0.93)	18.9 (0.85)	10.0 (0.73)	6.8 (0.50)

[a]1992 12th-graders with known socioeconomic status and high school records (transcripts and test scores), who graduated from high school by December 1996, and attended a four-year college at any time.

NOTES: Standard errors are in parentheses. Columns for gender, race/ethnicity, and socioeconomic status quintile may not add to 100.0 percent due to rounding.

SOURCE: National Center for Education Statistics: NELS:88/2000 postsecondary transcript files (NCES 2003-402 and Supplement).

the proportion of whites rises even further, while that of Asians, American Indians, and African-Americans[16] holds steady, and that of Latinos declines. There are no statistically significant differences in the proportion of students who were nonnative speakers of English[17] until the final boundaries are drawn for the universe for this study.

The most dramatic and expected changes in the distributions of table 2 are by socioeconomic status quintile, with quantum leaps in the proportion of students from the top two quintiles as soon as one crosses the postsecondary line, and parallel declines in the proportion of students from the bottom two quintiles. Only the third quintile (the 41st–60th percentile) remains stable until the final contraction of the cohort for the universe used in this study.

What do these demographic changes within the universes of students who might be the subjects for a study mean? *The Toolbox Revisited*—and *Answers in the Tool Box* before it—is a study about students who graduate from high school and go on to college. Given historical data, it is not surprising that this group will evidence a higher SES profile and a lower percentage of under-represented minorities than others in the same grade cohort. Since the 1980s, women have been in the majority in this group.[18] Within our subject universe, demography is not necessarily destiny, as the original *Tool Box* demonstrated. For the comparison group—the other half that either does not graduate from high school, graduates but doesn't continue its education, or graduates and continues but never at a four-year college—*The Toolbox Revisited* says: If we want more people to wind up with at least a bachelor's degree in life, here are some guidelines based on the experience of people who tried.

Summary of Part I

What do *Answers in the Tool Box* and *The Toolbox Revisited* do, and what do they not do? Both studies use the histories of 12th-graders who subsequently attended a four-year college at any time (entered in any term and not just the fall term, entered as part-time as well as full-time students, entered in community colleges as well as four-year institutions) to indicate what factors in those histories are associated with completing a bachelor's degree—not in four years, not in six years, but whenever the longitudinal tracking ended (8.5 years from high school graduation for the class of 1992; 11 years for the class of 1982). They do not ascribe cause or pretend to predict. They recognize that what is associated with degree completion in one generation may not be associated with it in the next, or that the strength of association may change. Conditions and populations change, after all. Rigid prediction is a risky call, and besides, that's not what the data and statistical standards allow one to do.

---

[16]The difference in the African-American proportion of the two universes is not statistically significant.

[17]Nonnative speakers were defined as those who said their first language was not English and, in grade 10 and/or 12 (the 1992 survey) indicated that they spoke to their mothers most or all of the time in their first language.

[18]Though to the extent to which the group includes students who commenced their postsecondary studies in community colleges—and it does—that majority will be a little less.

[THIS PAGE INTENTIONALLY LEFT BLANK]

Part II
Variables Explored and Used in This Analysis

With two major exceptions—high school academic curriculum intensity and the composite high school performance variable we call "Academic Resources," both of which are covered in Part III—the construction and allied information for most of the variables explored in *The Toolbox Revisited* are detailed in the Glossary (starting on p. 179). Whenever the reader asks for details on "How was that defined?" or "How did they get that?" the Glossary is the place to go.

The purpose of this section is to provide the reader with an advance reference list of the variables considered and used in this analysis. The reader should keep in mind that "variables" are *representations* of realities (e.g., first-year college grades) or constructs (e.g., transfer). We use them as a shorthand.

The variables listed and described are presented in the order of the steps of the logistic narrative for which they were considered. The collection represents neither a "fishing expedition" nor a "mind dump," as a majority of the variables considered were determined by the attempt to replicate the original *Tool Box* study with a more recent parallel cohort. A quick summary of their properties can be found in figure1.

Demographic background variables defined

1) NNSE—Nonnative speaker of English. A dichotomous variable marking those students whose first language was not English *and* who, in grade 12, reported that they conversed in that language with their mothers most or all of the time.

2) IMMIG—Parent immigrant status. A dichotomous variable indicating whether the student's parents were immigrants to the United States within the previous 10 years.

3) BROSIS—Number of siblings. A dichotomous variable marking students with three or more siblings, versus those with one, two, or none.

4) FIRSTGEN—First generation postsecondary student. A dichotomous variable indicating students for whom neither father nor mother ever attended a postsecondary institution.

5) FAMINC—Family income. This variable was first set in six bands, then trichotomized to yield upper-, mid-range, and low-income populations.

6) URBAN—A dichotomous variable indicating whether the student's high school was located in an urban area.

7) NEWCHILD—A dichotomous variable to mark students, male or female, who became parents by the time they were 20 years old.

8) RACE—A dichotomous race/ethnicity variable, with under-represented minority (African-American, Latino, and American Indian) = 1 and White and Asian = 0.

9) GENDER—A dichotomous variable in which male = 1 and female = 0.

10) SESQUINT—Socioeconomic status quintile. See Glossary.

High school background variables defined

1) EDUANTIC—Education anticipations. A three-level variable: (a) consistently (in grades 10 and 12) expected to earn a bachelor's degree; (b) raised expectations to the bachelor's degree between grades 10 and 12; and (c) either lowered expectations from the bachelor's level between grades 10 and 12 or never expected to earn a bachelor's degree.

2) CLSSRNKQ—High school class rank/GPA quintile. See Glossary and Appendix C for accounts of construction and limited imputation, respectively.

3) SRTSQUIN—Senior year test score quintile. A test of general learned abilities was administered to NELS high school seniors and the results set out in percentiles. For those who did not take that test but for whom SAT or ACT scores were available, those scores were substituted using an equipercentile concordance methodology, weighted, and set out in quintiles. See Glossary for a more detailed account.

4) HIGHMATH—Highest level of mathematics reached in high school. A five-level variable with calculus and precalculus at the high end and Algebra 1 and prealgebra at the low end. See Glossary.

5) SCIMOM—High school momentum in science and mathematics. A three-level variable combining highest level of mathematics with numbers of credits earned in core laboratory science. See Glossary.

6) FLAN—Number of units of foreign language in high school on a five-level scale.

7) ADVANCE—Number of Advanced Placement (AP) courses. Three values based simply on the number of AP courses recorded: three or more, one or two, and none. See Glossary for a full account of identifying AP course work.

8) HSCURRQ—Academic intensity of high school curriculum, in quintiles. This variable is the core of the analysis of students' precollegiate histories, and, hence, is described in detail in Part III and Appendix F.

9) ACRES—Academic Resources. A quintile index representing a composite of students' pre-collegiate attainment (curriculum plus class rank/GPA plus senior year test score). ACRES is the dominant precollegiate variable in both the original *Tool Box* and *The Toolbox Revisited.* The construction of this variable is described in detail in Part III.

Postsecondary entry variables defined

1) FIRST4—A dichotomous variable indicating whether the first postsecondary institution attended by the student was a four-year college.

2) DOCT—Another dichotomous variable indicating whether the first postsecondary institution attended was a doctoral degree-granting institution.

3) SELECT—A dichotomous variable indicating that the first institution attended by the student was either highly selective or selective.[19] See Glossary for details on selectivity.

4) NODELAY—A dichotomous variable marking students who entered postsecondary education within seven months of high school graduation.

5) ACCELCRD—Acceleration credits. A sum of all college credits earned by both course work prior to high school graduation and by examination. The values of this variable were set at three levels: more than 4 credits, 1–4, and zero.

First-year performance variables defined

1) LOWCRED—A dichotomous variable marking students who earned less than 20 additive credits earned in the first calendar year of attendance. For descriptive data on the relationship between number of credits earned in the first year and highest degree, see Appendix L, table L4.

2) FRSHGRAD—GPA in the first calendar year of attendance. Grade point averages were determined for the first *full calendar year* of postsecondary attendance and were then set out in quintiles. FRSHGRAD is a dichotomous variable that divides the highest two quintiles from the other three.

---

[19]Institutional selectivity in the postsecondary files of all three grade-cohort longitudinal studies conducted by the National Center for Education Statistics has five values: highly selective, selective, nonselective, open-door, and not ratable. The first three of these values were based on the selectivity cells developed by the Cooperative Institutional Research Project (CIRP) at UCLA for its annual survey (since 1966) or entering freshmen. For the distribution of NELS:88/2000 postsecondary students by selectivity of first institution attended, see Appendix L, table L3.

3) FREM—A dichotomous variable indicating any remedial course work in the first calendar year of attendance.

4) FCOLMATH—Another dichotomous variable indicating whether the student earned any credits in college-level mathematics during the calendar year following first enrollment. "College-level mathematics" was defined to include college algebra, finite math, statistics, precalculus, calculus,[20] and a category of "liberal arts mathematics" courses that require the equivalent of high school Algebra 2 as a prerequisite, and include such topics as game theory, basic combinatorics, and foundations of numerical methods.

Financing postsecondary schooling variables

There are three dichotomous financing variables in both *Answers in the Tool Box* and *The Toolbox Revisited*: GRANTS, LOANS, and STUWORK. Each indicates only whether the student used that form of financing during his/her early postsecondary career. The reader is referred to the text of Part IV for elaboration.

Attendance pattern variables defined

1) TRANSFER—community college to four-year. With students going back and forth between community colleges and four-year colleges, it is important to mark transfer as a permanent change of venue, a migration that is formally recognized by system rules. A transfer student is one who (a) started in a community college, (b) earned more than 10 credits from the community college before (c) enrolling in a four-year college and (d) earning more than 10 credits from the four-year college. The only time limit set for these changes of venue and credit accumulation is the length of the longitudinal study. In the case of the NELS:88/2000, that means 8.5 years from the modal high school graduation data of June 1992. This is a dichotomous variable.

2) FOURTRAN—A dichotomous variable indicating transfer from one four-year college to another. The algorithm for classic transfer from a community college to a four-year college was fairly easy to construct. But to distinguish a true four-year-to-four-year college transfer required an indirect route. See Glossary for details.

3) MULTINS—A dichotomous variable indicating that the student attended more than one institution. This is a macro-vision of otherwise multidirectional student behavior.

4) SUMMER—Number of credits earned during summer terms, set in three bands: more than 4, 1–4, and none.

---

[20]The category of "calculus" includes not only the standard sequence but also special "short calculus" or "brief calculus" courses, and specialized introductions to calculus for business, economics, and life science majors.

5) PARTTIME—A dichotomous variable tagging students whose enrollment intensity was *ever* part-time**.** The construction of this variable involves complex algorithms, and the reader is referred to the Glossary for details. (For an account of enrollment intensity in both the NELS:88/2000 and the Beginning Postsecondary Students longitudinal study of 1995/96–2001, see Appendix L, table L5).

Extended postsecondary performance variables defined

1) TREND—Trend in student's GPA: rising, flat, or falling. Cumulative undergraduate GPA was measured at three points in time—at the end of the first calendar year following initial enrollment, at the end of the first two calendar years following initial enrollment, and at the end of the student's undergraduate career, no matter when that occurred. See Glossary for further elaboration.

2) CUMMATH—Number of credits earned in college-level mathematics**:** more than 4, 1–4, and 0.

3) CHANMAJ—A dichotomous change-of-major variable. See Glossary for a full description.

Final factors variables defined

1) NOSTOP—In all three NCES postsecondary transcript-based grade-cohort studies, noncontinuous enrollment was defined as *more than* a one semester (or its equivalent, e.g., two quarters) stop-out period. In the dichotomous variable, NOSTOP, the student is considered continuously enrolled even with one semester (or two quarters) off.

2) WRPT Ratio—A dichotomous variable. On one side of the dividing line are students who withdrew from or repeated 20 percent or more of all courses in which they enrolled (ratio of non-penalty withdrawal and no-credit repeat grades to all grades received).

Summary: Locus of Responsibility

Figure 1 presents the basic statistical characteristics for 39 of the major variables described above that were either tested, used in trials, and/or employed in the final logistic narrative of *The Toolbox Revisited.* Seven of these variables describe demographic characteristics, and another three label types of financial aid that ultimately are offshoots of demography. Of the remaining 29 variables, 14 are principally matters of student choice (e.g., changed major), five are indicators of student academic effort (e.g., first-year grades), seven reflect interactions of student choice plus student effort plus opportunity to learn (e.g., highest high school math), two mark interactions of student effort and institutional judgment or guidance (e.g., first-year remediation), and one (education anticipations) reflects student experience, attainment, and self-assessment, along with the encouragement of family and peers. The student is at the center of all these representations. The locus of responsibility for the way each of these variables will tilt lies as much with the student as with external forces. *The Toolbox Revisited* is optimistic that most students can make it all come out right. We will return to this optimism in Part VII.

Figure 1. Values, means, standard deviations, use of variables considered, and step no., if used, in the logistic narrative of *The Toolbox Revisited*, with universe confined to 1992 12th-graders with complete high school records and known socioeconomic status who attended a four-year college at any time through December 2000

Variable	Values	Programming name	Mean	S.D.[a]	Used	Step no.	Relationship to variables in the original *Tool Box*
Nonnative speaker of English	2[b]	NNSE	0.1472	0.3544	No		New

Part III
What Is and What Happens Before Matriculation

There are at least three distinct ways of setting up Step 1 in the progression of multivariate analyses that lead us to appreciate what makes a difference (and how much of a difference) in completing a bachelor's degree for students who attended a four-year college at any time. The first step covers both student demographics and high school performance. Let us cover the demographics first because they do not present complex analytic choices.

What If We Knew Nothing Except Demography?

The demographic background of students is marked as of a set moment in time (in our case, in grade 12). It is what students look like, where they are living, their parents' education(s), occupation(s), and income(s), and other features of the student's family. Demographic characteristics may be subject to special attention in education policy from local to national levels, but, with the exception of the student's marital and parental status, are not subject to change.

Demographic variables are normally considered in the context of other aspects of student experience, behaviors, and attitudes when attainment of any kind (e.g., high school graduation, test scores, grades, college degree) is the dependent variable. Indeed, that is the way this analysis treats demographic characteristics. But to demonstrate what happens to the demographic variables in the analysis, this section opens with a stark presentation. If someone asked us to explain bachelor's degree completion for 1992 12th-graders who subsequently attended a four-year college at any time, and all we knew about them were demographics, what would the various associations of demography with degree attainment look like?

Table 3 presents a logistic exploration that started with nine demographic variables described in Part II above. The socioeconomic status quintile variable is not included, but two of its components (family income and parents' highest level of education) are present to serve as proxies for SES. Two of the nine demographic variables—whether the student was a nonnative speaker of English and family immigrant status—were not accepted into the logistic equation.

Whether there were nine variables or seven, however, this logistic model fails to reach significance as a *model,* regardless of whether independent variables within the model turn out to be significant. The t value for the intercept falls below the threshold of 0.765 this study uses for keeping independent variables under consideration, and the proportion of concordant probabilities predicted at 63 percent is the lowest–by far–of any logistic model in this study.

Of the independent variables within the model, four are significant, even though that significance is undercut by the statistical characteristics of the model as a whole. The most significant ($p < 0.01$) is first generation college status, with a Delta-p statistic that says the probability of completing a bachelor's degree is reduced by roughly 21 percent for first generation students.

Race/ethnicity and gender are significant at $p <.05$, with the messages of the Delta-p that minority status reduces the probability of earning a bachelor's degree by 17 percent, and being male reduces that probability by 11 percent. Falling in the highest third of family income is marginally significant.

Table 3. Logistic account of the relationships among major demographic variables and bachelor's degree attainment for 1992 12th-graders who attended a four-year college at any time

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p
Intercept	0.2250	0.1869	0.69		
Race/ethnicity	**-0.7257**	**0.1434**	**2.90**	**0.05**	**-0.1660**
Gender	**-0.4760**	**0.1072**	**2.54**	**0.05**	**-0.1089**
Parenthood	-1.6285	0.5255	1.77	†	†
Siblings	-0.3619	0.1109	1.87	†	†
Family income	**0.3870**	**0.1111**	**2.00**	**0.10**	**0.0885**
First generation	**-0.9137**	**0.1420**	**3.69**	**0.01**	**-0.2089**
Urban high school	0.1839	0.1217	0.87	†	†

†Variable did not reach the minimum level of significance (p<.10) in a two-tailed test.
NOTES: Statistically significant variables are in bold. $G^2 = 6288.09$; $df=5144$; $G^2/df = 1.222$; $X^2(df) = 413.76(7)$; pseudo $R^2 = .077$. Proportion of concordant probabilities predicted = 63.0. Root design effect = 1.75.
SOURCE: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

But the most important message is the failure of the purely demographic analysis itself. If the statistical model does not reach a convincing level of significance, and all the variables inside the model are basically cut from the same cloth, then even if some of those variables are significant within the model, the cloth is frayed. That failure sets up a hypothesis that will unravel in the course of subsequent steps of the logistic narrative: Among students who attended a four-year college at any time, student demographics and family demographics may have, at best, indirect connections with degree completion. In fact, at the moment high school academic history is included in the multivariate account, demography plays a considerably reduced role at the same time that the logistic model becomes more persuasive.

High School Background and History

This is where the academic momentum story begins, where the major contributions of the original *Tool Box* were most prominent, and where the story continues to be of considerable importance.

There were four core high school background and performance variables in the first step of the logistic inquiry in the original *Tool Box*: senior year test score, a combined index of class rank and GPA, academic curriculum intensity, and the student's education "anticipations." The first three of these variables were combined in a composite index of "Academic Resources" that proved to have lasting positive repercussions through students' postsecondary histories.

Before we examine the results of the Step 1 logistic model, we should (a) revisit education "anticipations," and (b) provide a detailed account of how *The Toolbox Revisited* deals with high school curriculum.

"Anticipations" versus "aspirations"

Both the original *Tool Box* and this study employ a variable that some people will interpret as indicating students' education "aspirations." But this construct is carefully labeled "anticipations," and is *not* based on the student's answer to a question asked only once (for example, in a 12th-grade survey or in a freshman registration line). Rather, "anticipations" is built from sets of questions asked in both the 10th grade and the 12th grade, and describes the *consistency* and *level* of the student's abstract expectations and concrete plans.

Perhaps as a by-product of the national visibility of discussions on secondary-to-postsecondary transitions that followed the release of *A Nation at Risk* in1983, along with a burst in recruitment of minority students by both colleges and professionally-oriented organizations such as the National Action Committee for Minorities in Engineering, the proportion of 12th-graders who *consistently* expected to earn at least a bachelor's degree more than doubled from 22.5 percent (s.e. = 0.58) among 1982 12th-graders to 59.4 percent (s.e. = 1.02) among 1992 12th-graders. Continuing one's education after high school, at some point and "in some form of postsecondary education" is now a norm of expectations among high school graduates: 92.6 percent (s.e. = 0.54) of NELS:88/2000 students who graduated from high school with any kind of diploma, whether "on-time" in 1992 or later, expected to continue their education in a postsecondary setting. That which is a norm of behavior is like breathing in and breathing out. When virtually everyone expects to continue, the serious curricular "disconnect" between K-12 and postsecondary systems eloquently dissected by Venezia, Kirst, and Antonio (2003) is even more fraught with hazards and ironies. "Anticipations," one can surmise, will not play as significant a role in a logistic account of bachelor's degree completion as it did in the original *Tool Box*.[21]

To aspire is an active concept. In our ordinary usage, it means to hope, seek, wish, or yearn. When Kao and Tienda (1998) describe "aspirations" as "a realistic evaluation of likely outcomes" (p. 352), they are not describing "aspirations" as we normally understand the term. Qian and Blair (1999), too, indicate that they use the "aspirations" to describe expectations or plans

[21]Even there, the variable floated in and out of significance over the steps of the logistic model (see Adelman 1999, pp. 80–81).

"rather than a wish" (p. 622). And that's just the point: With these rare exceptions, the literature on education "aspirations" consistently confounds an emotively-laden term applied to motivation, desire, or drive with an assessment of possibility based in experience (Mezias 1988). Underneath the consistency-by-level construct of the educational "anticipations" variable used in both the original *Tool Box* and in this study is what Kao and Tienda (1998) document as a growth from abstract attitudes about a very distant possibility when students are in junior high school to a rational judgment based on both school experience and input from parents and peers as the time draws closer to high school graduation. There is no doubt that the consistency-by-level formulation of our anticipations variable is influenced by what happens to students between grades 10 and 12.

A different interpretation of expectations is implicit in Venezia, Kirst, and Antonio (2003): Expectations become assumptions, more passive than "aspirations." Their principal thesis—that students falsely assume that the momentum inherent in a high school diploma is sufficient not merely to enter a postsecondary environment ("the easy part," in their words) but to complete a credential—is all the more powerful when these assumptions end in less than completion. The principal culprit lies in poorly articulated (secondary-to-postsecondary) curricula (Conley 2005), a topic addressed in Part VI of this essay.

Academic Intensity of Secondary School Curriculum

Think of a series of moving walkways in an airport. Passengers expect that one leads to the next, and don't think too much about what's happening along the way. What the most perceptive of contemporary analysts of the curriculum paths from high schools into colleges of any kind have observed (Venezia, Kirst and Antonio; and Conley) might be described as a disconnect in both the location and speed of these successive moving walkways, so that the passengers stepping mindlessly off the first and heading to the second trip, stumble into the moving hand rail, and desperately grasp at their luggage so that it doesn't get stuck in the space between the two segments. This issue was imperfectly highlighted in the original *Tool Box* and is worth extended preliminary attention here.

The "differential course work" hypothesis, originating in the work of Pallas and Alexander (1983) and Alexander and Pallas (1984) in relation to high school test scores, and validated by *Answers in the Tool Box* with a longer time frame and a bachelor's degree attainment dependent variable, remains the core of the presentation in *The Toolbox Revisited* as well. With these forebears as guidance, we are going to look at the components of the curriculum variable, alternative presentations of those components for multivariate analyses, and some critiques of the measure. In the past decade, a number of short-hand representations of the high school curriculum, e.g., the New Basics as advocated in *A Nation at Risk* (1983), "minimum college-qualified" (Berkner and Chavez 1997), and "track location" (Lucas 1999; Lucas and Berends 2002) have become common in both the research literature and the general press. The New Basics are the best known of these heuristics. The highest level of these "new basics"

—which simply counted Carnegie units[22] (four of English, three each of mathematics, science, and social studies, and two of foreign language)—has been labeled "rigorous" (McCormick 1999), even though three units of mathematics could amount to no more than plane geometry and the science in question could lack any laboratory components. After the publication of the original *Tool Box*, the literature added criteria for highest level of math, core laboratory science, and Advanced Placement course work to the judgment of "rigor," and sought a trichotomous presentation with labels such as "core curriculum or less," "mid-level," and "rigorous" (Horn and Kojaku 2001).

Quite frankly, the word "rigorous" is somewhat of a misnomer since a course requiring a high concentration of intellectual effort can be presented in a relaxed manner with comparatively low standards for success. Put another way, calculus or laboratory chemistry, for example, can be taught in a very laid-back fashion, while an otherwise "ordinary" survey of U.S. history can require the search for, discovery, and cataloguing of original source material, readings in archival methods, and frequent examinations and project presentations with criterion-referenced grading standards. Both the original *Tool Box* and *The Toolbox Revisited* prefer the term, "academic intensity," defend the continuous variable of academic curriculum intensity as a more flexible language of accounting, and decline to invoke labels of "college qualified," "at risk," and others.

The academic curriculum intensity variable is called HSCURRQ. It takes a weighted distribution of NELS:88/2000 students across 31 levels of academic curriculum intensity and quality (there were 40 levels in the records of the High School Class of 1982, the subjects of the original *Tool Box*), and divides the distribution by quintile. Each level of academic curriculum intensity is a distinct configuration of numbers of Carnegie units[23] earned in core academic areas and other distinct notations about students' course of study. For example, in both data sets, at the highest level, one finds students who, between grades 9 and 12, accumulated.[24]

3.75 or more Carnegie units of English;
3.75 or more Carnegie units of mathematics;
highest mathematics of either calculus, precalculus, or trigonometry;
2.5 or more Carnegie units of science *or* more than 2.0 Carnegie units of core laboratory science (biology, chemistry, and physics);
more than 2.0 Carnegie units of foreign languages;
more than 2.0 Carnegie units of history and/or social studies;
more than 1 Advanced Placement course; and
no remedial English; no remedial mathematics.

---

[22]A Carnegie unit is the basic credit system for U.S. secondary schools. It is generally recognized as representing a full year (36–40 weeks) in a specific class meeting four or five times per week for 40–50 minutes per class session (Martinez and Bray 2002).

[23]It is important to note that the Carnegie unit thresholds indicated, e.g., 3.75 units of English, are not determined *a priori*, but rather from the empirical distribution of Carnegie units standardized across the NELS high school transcripts in their edited version. See the descriptive windows for all the high school curriculum variables on the NCES data sets in CD # 2003-402 and its June 2004 Supplement.

[24]For mean numbers of Carnegie units earned in major curriculum areas, see Appendix L, table L6.

These are minimums. In fact, at the highest level of academic curricular intensity, students had accumulated an average of 4.30 Carnegie units of English, 4.34 units of mathematics (94 percent having reached precalculus or calculus), 3.63 units of core laboratory science, 3.76 units of foreign languages, and 3.79 units of history and other social studies, along with an average of three AP courses. That is an impressive portfolio.

To this particular configuration, the NELS:88/2000 version of the highest level of academic curriculum intensity adds any Carnegie units in "computer science," a far more frequent and integrated elective in the high school curriculum by 1990, when the NELS students were in the 10th grade, as opposed to 1980, when the High School & Beyond/So students were in the 10th grade (the mass availability and marketing of PCs began in 1984).

Each subsequent level in a descending logical cascade subtracts something from this configuration (see Appendix F) until a relatively smooth distribution is achieved. Nothing is perfect in these algorithmic adjustments; and whatever lumpiness in distribution remains is assuaged in the quintile version.

In light of recent literature on the effects of AP course-taking versus scores on AP examinations (e.g., Geiser and Santelices 2004; Klopfenstein and Thomas 2005), it is important to note that in both the original *Tool Box* and in this study, AP course work is *not* treated as a discrete variable, rather as *part* of the overall index of academic curricular intensity. However, in a moment we will demonstrate what happens when AP is invoked as a distinct independent variable in alternative constructions of the first step of our core logistic model.

The basic critique of this account of high school curriculum has much merit: Numbers of courses (expressed in Carnegie units) in specific subject areas are not equivalent to high content standards or performance standards in those courses (Barth and Haycock 2004). In the cascading curriculum levels of the Academic Intensity variable, a student could accumulate three units of watered down history and social studies and still have three units. A national transcript accounting has no way of knowing what is demanded in thousands of history and social studies courses offered in 1100 high schools, a point made in the staff research for *A Nation at Risk* (see Adelman 1983). The only domestic examples available for those who argue for test-driven high content standards in individual high school subjects such as U.S. history or chemistry or Algebra 2 are the College Board achievement tests (now called SAT II) and the New York State Regents. Some other states (e.g., Michigan) have tests in place for merit-based scholarships that cover broad areas of the curriculum (e.g., math, science) and language skills (reading, writing) but not specific subjects. In this respect, they are closer to the ACT examination, though at a less demanding level (Bishop 2004). The high school transcripts that serve as our evidence are very inconsistent in entering SAT II subject exam scores, so we have nothing on which to rely for an external validation of content. Getting beyond course titles to content standards is addressed in Part VI of this study.

Altonji's work (1996) offers a second important critique. He would have us control high school curriculum variables for school effects and "quality of courses," but admits that whatever one tries for proxy measures, the results would be "imperfect." Altonji draws our attention to the fact that more than half the variance in the mean number of Carnegie units earned in academic

subjects by the NLS-72 cohort[25] was across schools, indicating disparities in opportunity to learn, teacher quality, and student talents and proclivities. One might put Altonji's conclusion more baldly: Students from higher SES backgrounds attend high schools that serve similar students, schools in which parental expectations and involvement are high, and schools in which curriculum offerings and teacher quality follow SES demands and can afford to do so because the tax base is higher. These students tend to enter college and earn degrees at higher rates than students from "lesser" backgrounds and from schools that accompany those backgrounds, therefore, the influence of the academic intensity of high school curriculum will be overstated.

The implicit response of the original *Tool Box* made explicit in *The Toolbox Revisited* is that there are inequities in opportunity to learn and proclivity to learn that are reflected in the geo-demography of schools, but in a logistic account of bachelor's degree attainment in which the results are reported with the Delta-p statistic, socioeconomic status will modulate some of the effects of curriculum. The message encourages all high schools to offer the requisite curricula, to make sure they have teachers who can deliver that curricula, to believe that their students can all reach higher levels of academic intensity in preparation, and to encourage their students to do so—no matter what students' intentions for subsequent education or work may be. As the principles of the *No Child Left Behind* legislation are applied in high schools, this is a large part of what they mean.

Highest level of mathematics and changes in high school course-taking

In comparing the high school records of the HS&B/So (High School Class of 1982) with those of the NELS:88/200 (High School Class of 1992), and looking only at earned Carnegie units, what we principally witness is an improvement of precollegiate preparation of students in mathematics

Table 4. Percentage of 1982 and 1992 12th-graders in academic high school programs whose high school curriculum fell below selected content and intensity thresholds

	Class of 1982		Class of 1992	
Curriculum markers	**All 12th-graders**	**In academic program**	**All 12th-graders**	**In academic program**
Percent of students with:				
Highest level of mathematics *less than* Algebra 2	60.2 (0.78)	35.4 (1.02)	37.7 (1.11)	24.2 (1.24)
Maximum of one year of core laboratory science	60.1 (0.82)	37.1 (1.04)	34.3 (1.17)	21.0 (1.22)
Maximum of one year of foreign language	28.3 (0.88)	14.3 (0.75)	41.5 (1.30)	28.4 (1.47)

NOTES: "Core laboratory science" is confined to biology, chemistry, and physics. Standard errors are in parentheses. Weighted N for students in academic program: HS&B/So = 1.5M; NELS:88/2000 = 1.8M.
SOURCES: High School & Beyond/Sophomore Cohort (NCES 2000-194) and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

[25]The National Longitudinal Study of the High School Class of 1972, the first, most elaborate, and longest (1972–86) of the NCES grade-cohort longitudinal studies

and science, a change that affects the amount of remediation necessary in four-year colleges, as well as mathematics course-taking at the college-level (Adelman, Daniel, and Berkovits 2003). We also note an unsettling increase in the percentage of students taking a maximum of one year of foreign language course work (though that percentage spread might be mitigated somewhat if we accounted for the increase in bilingual heritage language users between the two cohorts). Table 4 sets forth some basic threshold markers in these curricular areas.

Thresholds are suggestive, but not conclusive, of the shape of change in curricular preparation. By reverse logic, table 4 says only that X percent of students are getting beyond point Q in secondary school study. It does not say how far beyond, and that may make more of a difference in academic momentum. The mathematics analysis in the original *Tool Box* was a proxy for the general metaphor of momentum, and it may be instructive to compare the results of those calculations—a distribution and a logistic—to what emerges from the NELS:88/2000 involving all the rungs on the "math ladder." Tables 5, 6, and 7 do so, confining their universes only to students who were in the 12th grade in the year they were scheduled to be in the 12th grade. They do not restrict the universes to those who entered postsecondary education, let alone to those attended four-year colleges at some time. These are very inclusive groups.

Table 5 confirms other observations in these data sets: The efforts following *A Nation at Risk* to move students further ahead in high school mathematics had positive results. Higher proportions of students were reaching Algebra 2 and higher levels. Bachelor's degree attainment rates for those who moved at least one step beyond Algebra 2 in high school were stable, but declined at every level at or below Algebra 2. Table 5 provides a framework that needs to be validated in a more convincing way, and that is the purpose of table 7. Table 7 presents the results of logistic analyses and does so in odds ratios (departing from the presentation of other logistics in *The Toolbox Revisited*) to match the way in which this table was presented in the original *Tool Box* study.[26]

From the write-ups and presentations of the original *Tool Box* study a principle for high school curriculum guidance arose: "One step beyond Algebra 2 doubles the odds that you will earn a bachelor's degree." What does that mean, i.e., how does one read table 7? An odds ratio indicates that every unit of change in an independent variable (in this case, each step up the math ladder) increases the odds of X happening versus the odds of X *not* happening by Y (the odds ratio). For table 7, the data for the full model—using only highest mathematics and socioeconomic status quintile—are presented first, in bold. In both cohorts, the odds ratio says that every step up the math ladder multiplies the odds of earning a bachelor's degree by roughly 2.5 versus an odds ratio for each step up the socioeconomic status quintile measure of 1.68 (for the class of 1982) and 1.78 (for the class of 1992). These data are statistically significant ($p < .05$ or better).

[26]The High School Class of 1982 data in table 7 are slightly different from those in the previous presentation in *Answers in the Tool Box* (table 6, page 17) because a more accurate 12th-grade flag for that data set has been developed to match the NELS:88/2000.

Table 5. Bachelor's degree attainment rate by highest level of mathematics reached in high school by 1982 and 1992 12th-graders

	Class of 1982		Class of 1992	
Level of math	Percentage reaching this level of math	Earned bachelor's	Percentage reaching this level of math	Earned bachelor's
Calculus	5.2 (0.36)	82.1 (2.45)	9.7 (0.54)	83.3 (2.72)
Precalculus	4.8 (0.37)	75.9 (2.43)	10.8 (0.65)	74.6 (2.04)
Trigonometry	9.3 (0.51)	64.7 (2.32)	12.1 (0.81)	60.0 (3.32)
Algebra 2	24.6 (0.75)	46.4 (1.54)	30.0 (1.08)	39.3 (2.31)
Geometry	16.3 (0.65)	31.0 (1.92)	14.2 (0.87)	16.7 (1.87)
Algebra 1	21.8 (0.69)	13.4 (1.33)	16.5 (0.92)	7.0 (1.24)
Pre-algebra	18.0 (0.66)	5.4 (1.19)	6.7 (0.53)	3.9 (1.34)

NOTES: Standard errors are in parentheses. The columns for level of math may not add to 100.0 percent due to rounding.
SOURCES: National Center for Education Statistics: High School & Beyond/Sophomore Cohort (NCES 2000-194) and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The balance of the table takes each level of high school mathematics, and runs a logistic regression *for that level*, with bachelor's degree completion as the dependent variable, and SES quintile as the sole control. For the class of 1982, reaching calculus in high school increased the odds of earning a bachelor's degree by a very impressive 8.18 to 1. For the class of 1992, the odds ratio for calculus was still in the same range at 7.52 to 1. The parameter estimates for the calculus line are almost identical (2.102 versus 2.018). These are consistent results.

When one looks at the columns in table 7 for the class of 1982, one notices that the sign of the parameter estimate moves from negative to positive territory between geometry and Algebra 2, and the value of the parameter estimate rises above 1.0 between Algebra 2 and trigonometry. The odds ratio more than doubles in each of those steps, but only in the step between Algebra 2 and trigonometry (the "one step beyond") is the parameter also positive. For the class of 1992, all those relationships move up one rung on the "math ladder," principally because a higher percentage of this group (than the percentage for the class of 1982) reached precalculus or calculus while a lower percentage failed to get as far as Algebra 2. The critical boundary for math momentum now lies firmly beyond Algebra 2.

But therein lies the rub, for not everyone has the chance to reach beyond Algebra 2. Differential lack of opportunity-to-learn was a major theme in the original *Tool Box* and is just as prominent a theme in this study of a cohort a decade later. Table 6 illustrates this unhappy situation. It asks what proportion of students—by race/ethnicity and socioeconomic status quintile—attended high schools that offered key math courses beyond Algebra 2.

If mathematics momentum is as important as we contend it to be, one can see the ripples of opportunity—or lack of opportunity—that start in high school offerings. In the matter of calculus, Latino students and those from any socioeconomic status quintile other than the highest are at a distinct disadvantage with respect to the opportunity even to confront the subject. African-American students join the other groups in less access to both trigonometry and statistics. While this issue will be revisited, it deserves underscoring here: The task of providing quality secondary school curricula to *everybody*, the *paths* to AP, the *paths* to the kind of learning challenges students will face in higher education, is enormous. If the promise of *No Child Left Behind* is to be realized at the secondary school level, it is first and foremost through the equitable provision of opportunity-to-learn.

Table 6. Percentage of 1992 12th-graders who attended high schools that offered courses[a] in statistics, trigonometry, and calculus, by race/ethnicity and socioeconomic status quintile

	Percent attending high schools that offered:		
Demographic group	Calculus	Trigonometry	Statistics
Race/ethnicity			
White	58.6 (1.67)	76.9 (1.29)	27.7 (1.62)
African-American	50.8 (4.14)	67.0 (3.90)	19.5 (2.71)
Latino	44.6 (4.04)	59.9 (3.55)	18.2 (2.44)
Asian	61.3 (4.31)	71.9 (3.61)	30.1 (3.94)
Socioeonomic status quintile			
Highest quintile	71.6 (1.93)	83.1 (1.64)	34.0 (2.30)
2nd quintile	56.2 (2.32)	73.2 (2.13)	27.1 (2.01)
3rd quintile	54.1 (2.39)	71.4 (2.33)	24.9 (1.92)
4th quintile	49.3 (2.46)	70.3 (2.28)	20.3 (1.80)
Lowest quintile	43.5 (2.86)	63.7 (2.66)	18.5 (2.06)

[a] Responses are based on surveys of school administrators and math teachers of NELS students in 1990. Where the administrator did not answer the question, the math teachers did not indicate that they taught the subject, and students did not earn any credits in the subject, the calculation assumes that the school did not offer the subject. This approach may underestimate the percentage of high school offering the subjects at issue.

NOTES: Standard errors are in parentheses.

SOURCES: National Center for Education Statistics: NELS:88/94 (NCES 96-130), and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402).

Since "highest high school mathematics" is a critical sorting component in the construction of the composite variable describing the academic intensity of a student's secondary school curriculum, the ramifications of more students completing courses beyond Algebra 2, it is hypothesized, will ironically diminish (however modestly) the explanatory power of curriculum and raise the power of academic performance (class rank/GPA). To illustrate with a metaphor: If it was said that a student who reaches precalculus in high school and earns a C has a better chance of finishing a bachelor's degree than a student who gets only as far as Algebra 2 with an A-, we now have to raise the bar for performance in precalculus to at least a B- in order for the prediction to hold.

Table 7. The math ladder for 1982 and 1992 12th-graders: Odds ratios and parameter estimates of earning a bachelor's degree at each rung, controlling for socioeconomic status quintile

	1982 12th-graders				1992 12th-graders			
Variable	Odds ratio	parameter estimate	Adjusted standard error	*p*<	Odds ratio	parameter estimate	Adjusted standard error	*p*<
Highest math	**2.56**	**0.938**	**.0426**	**.01**	**2.50**	**0.918**	**.0467**	**.01**
Socioeconomic status quintile	**1.68**	**0.520**	**.0359**	**.02**	**1.78**	**0.571**	**.0449**	**.05**
By highest level of mathematics:								
Calculus	8.18	2.102	.0426	.01	7.52	2.018	.1936	.05
Precalculus	6.34	1.846	.1895	.05	4.91	1.591	.1592	.05
Trigonometry	3.76	1.352	.1267	.05	3.05	0.860	.1422	.10
Algebra 2	1.82	0.599	.0867	.05	0.89	-0.115	.1030	†
Geometry	0.63	-0.468	.1108	†	0.24	-1.434	.1812	.10
Algebra 1	0.19	-1.666	.1386	.02	0.07	-2.688	.2788	.10
Pre-algebra	0.06	-2.778	.2614	.05	0.05	-3.088	.6684	†

† Variable did not reach the minimum level of significance (p < .10) in a two-tailed test.
NOTES: For both 1982 and 1992 12th-graders, the universe consists of all students for whom highest mathematics in high school could be determined, SES data were available, and highest postsecondary credential at the end of the cohort study period was known. Root design effect for the high school class of 1982 (HS&B/So cohort)=1.59; root design effect for the high school class of 1992 (NELS:88/2000 cohort)=1.98. NELS:88/2000 goodness-of-fit data for the full model: G^2 = 8289.25; *df* = 9135; G^2/df = 0.91; percent concordant probabilities predicted = 84.3. HS&B/So cohort goodness-of-fit data for the full model: G^2 = 8371.74; *df* = 9288; G^2/df = 0.892; percent concordant probabilities predicted = 80.0.
SOURCES: High School & Beyond/Sophomore Cohort (NCES 2000-194); NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The general improvement in the high school curriculum profile of the NELS:88/2000 cohort is reflected, at least among students who subsequently attended a four-year college at any time, in diminished postsecondary remediation for that population. Table 8 sets out the distribution of what in the original *Tool Box* study was called the "remedial problem," a logical cascade that distinguishes not only the amount of remediation a student takes in college, but also the kind of remediation at issue. The logical cascade begins with remedial reading, then sorts out those students whose only remediation consists of one or two courses in mathematics, then divides the balance of the remedial population between those who required more than two remedial courses and those who required only one. The type of remediation at issue for both these residual populations is usually writing, but also includes courses devoted to basic study skills and general developmental work. If the population included students who never attended a four-year college, this distribution would look very different.[27]

Table 8. Percentage of 1982 and 1992 12th-graders who attended a four-year college at any time, by type and amount of remedial courses taken in postsecondary education

Type and amount of remediation	High School Class of 1982	High School Class of 1992
Any remedial reading	10.0 (0.56)	7.8 (0.72)
Remedial math only (1–2 courses)	14.0 (0.65)	9.8 (0.65)
More than 2 remedial courses of any kind other than reading	14.5 (0.72)	8.9 (0.64)
Only 1 remedial course other than reading	9.0 (0.50)	6.5 (0.41)
No remedial courses	52.5 (1.04)	66.9 (1.07)

NOTES: (1) Standard errors are in parentheses. (2) Columns may not add to 100.0 percent due to rounding.
SOURCES: High School & Beyond/Sophomore Cohort (NCES 2000-194) and NELS:88/2000 Postsecondary Transcript Files (2003-402).

[27]Among all NELS:88/2000 students who participated in the 1992 survey and subsequently attended *only* community colleges, 64.5 percent (s.e. = 1.88) took at least one remedial course and 43.7 percent (s.e. = 1.98) took more than one. Among those who attended only sub-baccalaureate trade schools, which often do not require remediation, 32.4 percent (s.e. = 5.89) took at least one remedial course and 21.9 percent (s.e. = 6.07) took more than one. There is a considerable difference between the norms and requirements of community colleges versus those of other sub-baccalaureate institutions in the matter of remediation, and we should not mix the two in analyses of remediation.

Summary of high school curriculum and performance variables

To remind the reader of our tools before heading into Step 1 of the logistic narrative: For the high school curriculum components of the analysis we have a composite variable called HSCURRQ, and four variables set forth in Part II above describing discrete components of HSCURRQ that we can test as proxy measures for the composite—highest level of mathematics, science momentum (a combination of highest math and core laboratory science credits), foreign language credits, and number of Advanced Placement courses. In a moment all these will appear in a correlation matrix that will provide a preview of how they might play out in multivariate analyses.

For our other performance measures, we bring forward from Part II a quintile presentation of the student's high school class rank/GPA, and a quintile presentation of senior year test score.

Academic Resources

The original *Tool Box* advanced a notion explored and developed by Karl Alexander of Johns Hopkins and his associates in numerous exemplary contributions to the research literature: A student's academic background was far more important than demographic variables such as gender, race/ethnicity, family composition, and socioeconomic status in relation to test performance (Alexander and Pallas 1984), entering higher education (Thomas, Alexander, and Eckland 1979), and, in one study, degree completion (Alexander, Riordan, Fennessey and Pallas 1982). How does one reflect a composite idea of "academic background" of students coming out of high school and into postsecondary education? The key measure of Academic Resources (or ACRES, as the original *Tool Box* variable was called in order to elicit the idea of academic cultivation), combined curricular record, academic performance (class rank/GPA) as an indicator of student effort, and an external measure in the form of performance on tests of general learned abilities. These three components, as we have seen, are set out in quintiles. To get a preliminary idea of their relative strength in relation to bachelor's degree completion and to equalize the conditions of judging degree-completion rates by performance quintiles, table 9 takes all on-time high school graduates in 1992 and indicates the percentage who completed a bachelor's degree by December 2000 by quintile of each of the three components of Academic Resources. To be included in table 9, the student's record had to contain positive values for all three components.

Table 9 offers some hints of what multivariate analysis will confirm. Compared to the distributions for academic curriculum intensity and class rank/GPA, the test score quintile variable yields weaker degree completion rates in its highest two quintiles. This is a clear sign that the test score quintile will not have as strong an association with degree completion as the curriculum and performance factors. At first glance, it looks as if class rank/GPA will be fairly dependable, but it has one minor bump. The reader is directed in table 9 to the percentage of eventual bachelor's recipients from the lowest quintile of class rank/GPA (13 percent) compared to the percent of bachelor's degree completers in the lowest quintile of test scores and academic curriculum (about 9 percent in both cases). The differences are statistically significant in a

descriptive account such as that of table 9, but how meaningful they turn out to be must await a multivariate context. In the meantime, one would posit that the class rank/GPA measure may not prove as strong as the curriculum measure.

Table 9. Percentage of on-time 1992 high school graduates who continued their education in any postsecondary institution who completed bachelor's degrees by December 2000, by quintile performance in the three component variables of Academic Resources

	Percent completing bachelor's degree				
Population	Quintiles of Academic Resources components				
	Highest	Second	Third	Fourth	Lowest
All on-time1992 high school graduates who continued to postsecondary education at any time					
Curriculum	81.7 (1.50)	60.5 (2.14)	35.5 (1.93)	23.4 (1.99)	8.7 (1.37)
Class rank/GPA	78.8 (1.47)	59.1 (2.24)	40.3 (2.11)	25.7 (2.16)	13.0 (1.94)
Senior test score	74.9 (1.72)	53.9 (1.92)	37.2 (2.16)	26.7 (2.41)	8.9 (1.31)

NOTES: Standard errors are in parentheses. Weighted N = 1.6M.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

A multivariate analysis involving these variables, in fact, confirms our suspicions, and its results are presented in table 10. The model is the foundation for construction of the composite variable, Academic Resources, and is derived from ratios of the standardized beta estimates of the three high school performance indicators produced by a logistic regression with bachelor's degree attainment as the dependent variable and no controls (the logistic regression itself can be found in Appendix L, table L7). The change in these ratios between those for the High School Class of 1982 and those for the High School Class of 1992, while still leaving academic curriculum with the highest weight, narrows the gap between curriculum and performance, and lowers the strength of test scores as a component of Academic Resources. Given the differences in overall participation in the variable, i.e., the proportion of 12th-graders for whom all three components have positive values, some of the change may be an artifice of the NELS:88/2000 data set. But the principal message is one observed when commenting on the change in the distribution of students by highest level of mathematics studied in high school: The higher the average level of mathematics attainment, the more student effort, reflected in grades, will count. This theme will continue to play out when our story crosses the matriculation line into postsecondary education; and it was one of the principal points made by DesJardins, McCall, Ahlburg and Moye (2002) in their critique of the original *Tool Box* study.

When using all three measures—curriculum, class rank, and ACT test score—in a traditional linear analysis predicting first-year college grades, Pike and Saupe (2002) found curriculum to be the strongest, though their curriculum variable was dichotomous (students either meeting or not meeting the entrance specifications for a selective state university), which would naturally increase its power. Even when they introduced indirect effects of high school characteristics —control (private/public), size, mean ACT score of students, and mean proportion of students who attended the university—the parameter estimates for this curriculum variable were significantly greater than those for test scores or class rank. While *The Toolbox Revisited* is not in the business of predicting first-year grades, it is gratifying to note research that has similar respect for the propulsive power of course of study.

Table 10. Component weights of the high school Academic Resources variable for 1982 12th-graders and 1992 12th-graders who presented positive values for all three components

Components of Academic Resources	1982 12th-graders	1992 12th-graders
Academic curriculum intensity	.41	.42
Classrank/GPA	.30	.33
Senior test score	.29	.25

NOTE: Columns will add to 1.00.
SOURCES: High School & Beyond/Sophomore cohort (NCES 2000-194), and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

A second message bears repeating from its formulation in the original *Tool Box*: Student effort in curriculum participation and performance over the three *years* of high school (grades 10 to 12) reflected in the transcript data is worth considerably more than performance on a three-*hour* test on a Saturday morning. Test scores are a natural consequence of the academic intensity of curriculum and quality of student effort reflected in grades, and the weakening position of the test score variable in the ACRES configuration for the NELS:88/2000 cohort is a natural outcome of improvements in academic curriculum participation of the post-*A Nation at Risk* era.

Correlations

Now that we have all the precollegiate variables explained and in place, the process of bringing zoom and macro lenses of multivariate analysis to bear begins. The first stage sets forth a correlation matrix of precollegiate academic variables including three outcomes: on-time high school graduation, basic postsecondary "access," and bachelor's degree completion. Table 11 presents the Pearson's *r* results. Some of these correlations are weak, suggesting that one or both of the variables in question will not add to the explanatory power of a logistic regression. On-time high school graduation, for the most noted example, is not related to anything (this was also true in the parallel correlation matrix in the original *Tool Box*). Other relationships are not surprising, e.g., Advanced Placement has almost no bearing on entering postsecondary education (96.7 percent [s.e. = 1.48] of NELS 12th-graders with any AP courses entered the postsecondary sphere, versus 75.9 percent [s.e. = 1.01] of those with no AP course work).

Table 11. Correlations of major precollege Academic Resources variables and high school graduation status, college entry, and bachelor's degree attainment by December 2000 for 1992 12th-graders

	Curriculum intensity quintile (CURRQ)	AP courses (APCRS)	Highest math (5 levels) (HMATH)	Science momentum (3 levels) (SCIMOM)	Foreign language (3 levels) (FLAN)	Class rank/GPA quintile (RANK)	Senior test quintile (TEST)	On-time HS grad, standard diploma (ONTIME)	Post-secondary entry (PSENT)
CURRQ	-----	0.368	0.777	0.774	0.645	0.572	0.581	0.167*	0.352
APCRS		-----	0.438	0.366	0.270	0.326	0.317	0.050*	0.111*
HMATH			-----	0.869	0.519	0.618	0.634	0.124*	0.301

True to its position in the construction of the composite academic curriculum intensity variable (abbreviated here as CURRQ), in fact, Advanced Placement does not exhibit as strong a correlation with the composite as do the mathematics, science momentum, and foreign language components. Why? Because AP is invoked as a sorting criterion in only six of those 31 levels of academic curriculum intensity (see Appendix F), while highest mathematics is invoked in 25 levels, foreign languages in 18, and core laboratory science or all science in 30. Common sense says that we will find higher correlations of these other components with the composite curriculum variable.

But among those other components, the correlation between the highest level of mathematics and science momentum (which includes highest math in its definition) is so strong (0.869) as to set off collinearity bells. The clear message is to use only one of them in any multivariate analysis. The highest level of mathematics was dropped because the variable represents only one curricular area, whereas SCIMOM carries two. Likewise, following Pedhazur's (1982) rules of thumb for identifying potential collinearity problems from correlations, table 11 advises that if we use the high school academic curriculum index, we should not invoke either highest level of math or science momentum in the same multivariate model.

The only other observations of the correlation matrix of table 11 worth special attention are:

- When bachelor's degree completion is the reference point, the relative correlations of the curriculum, class rank/GPA, and test score variables are in roughly the same relationship observed in the more complex construction of the composite Academic Resources variable: Curriculum exhibits the strongest correlation, followed by class rank/GPA, followed by test score.
- However, when the referent variable is simply entering postsecondary education, (a) the correlation coefficients are much lower, and (b) the test score variable is slightly stronger than class rank/GPA.

The bottom line of these two conclusions: What counts for completion will be more potent than what counts for mere entrance (the "easy part," in the words of Venezia, Kirst, and Antonio, 2003).

Step 1: The First Logistics

In the commentaries and critiques of these aspects of the original *Tool Box*, two potent questions were raised:

> 1) Is a composite variable such as Academic Resources, a variable that yokes together very different types of measures (a basically qualitative curriculum index, class rank and GPA, test score), as convincing as these measures taken separately in any multivariate account of degree completion (DesJardins, McCall, Ahlburg, and Moye 2002)?
>
> 2) Unlike class rank/GPA and senior test score, the academic curriculum intensity variable is built from components, some of which are high profile in their own right, e.g., Advanced Placement and highest level of mathematics reached in high school. If we substitute the major components for the composite in an account of degree completion, will they be as convincing?

In light of these questions, three distinct ways of setting up the first step in the progression of logistic analyses that lead us to appreciate what makes a difference (and how much of a difference) in completing a bachelor's degree for students who attended a four-year college at any time were explored. The first step covers both student demographics and high school performance.

What happens to all those demographic variables in the "demography only" logistic of table 3 when these three competing approaches were tried out? With the exception of gender, race/ethnicity, and becoming a parent by age 20, the minute the high school performance variables enter, the demographic variables disappear. Taken individually, none of them—first postsecondary generation status, second language dominant, recent immigrant status, family income, number of siblings, and urbanicity of community in which the student's high school was located—meet the statistical criteria for either entering or staying in the logistic models employed in this study. But two of these variables, family income and level of parents' education, play dominant roles in the construct of socioeconomic status, which itself more than qualifies for the logistic treatment.

Repetition of a special note on the components of the high school academic curriculum intensity variable is necessary in the context of this first step in the logistic narrative. With the exception of Klopfenstein and Thomas (2005), a spate of recent reports and commentaries on the Advanced Placement program (e.g., College Board 2005) claim that the original *Tool Box* demonstrated the unique power of AP course work in explaining bachelor's degree completion. To put it gently, this is a misreading. AP is only a *component* of the academic curriculum intensity in both the original *Tool Box* and this replication. But to test the misreadings, AP was tried out as one of three variables that might serve as proxies for curriculum intensity. The other two variables tested as substitutes were a measure of momentum in science (SCIMOM) which includes elements of HIGHMATH and Carnegie units earned in both core laboratory science and all science courses, and number of Carnegie units earned in foreign languages.

So, three distinct approaches to logistic regression models were tried out for Step 1. The first, table 12, keeps the composite variable Academic Resources, and includes nothing else. The second divided Academic Resources into its three components. And the third dropped the high school academic curriculum intensity variable and replaced it with its three proxy components: science momentum, foreign language study, and AP.

Which one of these three versions should be carried forward in the stepwise analysis? In the first version (table 12), maintaining the composite of Academic Resources, only Academic Resources and socioeconomic status quintile are statistically significant (though with a p value of <0.10, SES is a barely influential presence) The Delta-p statistic says that each step up the five-quintile ladder of Academic Resources improves the probability of degree completion by about 15 percent. The Delta-p applied to socioeconomic status quintile says that for each step the probability of degree completion increases by about 7 percent. Expectations do not make a difference, and the demographic variables, while all carrying negative parameter estimates, do not meet the criteria for statistical significance either. Message: At this stage, and in this formulation, the composite representation of student learning in high school, Academic Resources, is a very persuasive construct.

The second and third versions of the Step 1 logistic can be found in Appendix G, and both are far less convincing. In the second version, Academic Resources was divided into its three components: curriculum, performance (class rank/GPA), and test score. The test score component, with a t statistic of 0.35 (far below the threshold requirement of 0.765), disqualifies this version from the logistic narrative. This result also reinforces our previous observation that when both academic curriculum participation and the quality of student effort within that curriculum (grades) improve, test scores will automatically rise and paradoxically become less important with reference to the dependent variable of degree completion.

In the third version of Step 1, of the three proxy variables for high school academic curriculum intensity, only science momentum (that combination of highest level of math and number of Carnegie units in core laboratory science) emerged as statistically significant. Neither Advanced Placement nor foreign language study reached the threshold level of significance, and, with a t statistic of 0.75, foreign language study was on the borderline of disqualification in terms of further consideration. The senior test score quintile variable did not even meet the minimum statistical criterion for entrance. Had we taken this version forward into subsequent stages of student history we would have only one proxy for high school curriculum (science momentum), and no traces of the external measurement of general learned abilities that the senior year test

score quintile conveys. At least the composite index of high school performance, Academic Resources, includes a trace of external assessment.

Table 12. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time—demographic and high school background, version 1: Using the composite variable for high school Academic Resources

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p

Summary decision: The composite variable, Academic Resources, stays in the logistic narrative; other versions of representing high school performance fail.

THIS PAGE INTENTIONALLY LEFT BLANK

Part IV
Matriculation and Beyond: The Features of Postsecondary History

On reflection, the original *Tool Box* made a mistake in the order and boundaries of the blocks of variables entered in its analysis. Following high school background, and tracking students who ultimately attended a four-year college at any time, it jumped first to financial aid, for which the High School & Beyond/Sophomore data set contained detailed information (including unobtrusive Pell Grant files) covering the first four years of a student's postsecondary history. It then considered a configuration of attendance patterns that covered everything from the timing of entry to postsecondary education to extended aspects of attendance such as whether the student *ever* left his or her first institution of enrollment and *never* returned to that institution. Thirdly, it followed this mixture of time periods with a block of first-year performance indicators. The order and content of these three blocks of variables scrambled time and student history.

The Toolbox Revisited unscrambles that sequence so that momentum can be more clearly observed. We begin with the transition from secondary school to postsecondary matriculation, and focus on timing of entry and type of first institution. We then move on to first-year performance, the importance of which is fully justified by the research literature. Only after accounting for the first year do we confront financial aid (which, in the NELS:88/2000 data set, covers only the first two years of post-high school history, and is the weakest section of the study, by far).[28] Longer-term attendance patterns and extended performance (curriculum and trends in grades) come later, as they should.

In shaping the universe for analysis so that a full history is visible, one minor change to the boundaries will be exercised. The NELS:88/2000 cohort was scheduled to graduate from high school in the spring of 1992. Not all of them did, so the upper boundary for high school graduation will now be set at December 1996. Very few cases are affected,[29] but, as the NELS history ends in December 2000, the point of changing the upper boundary is to allow enough time for late high school graduates to build a postsecondary history.

In entering this sequence, the reader should note that the master program generating the mass of student-level variables included on the restricted NCES data sets of transcript-based files for both the HS&B/So cohort and the NELS:88/2000 was basically the same, hence, there were no

---

[28]Financial aid comes *after* first-year performance because the story line is more interested in the potential relationship of aid to completion among those who are *already enrolled.* If the topic was initial access, then the financial aid package for the first year would be part of the postsecondary entry configuration of variables. The NELS:88/2000 unfortunately does not allow us to distinguish modes of financing postsecondary education in the first year from those of the second year.

[29] Those who earned a high school diploma of any kind *after* December 1996 constituted 2.7 percent of all 1992 12th-graders (s.e. = 0.16) and 0.7 percent of all 1992 12th-graders who subsequently attended a four-year college (s.e.= 0.16).

algorithmic differences that would account for change in student behaviors such as attendance patterns and academic performance. There are minor exceptions, and these will be noted in the narrative.

Step 2: Matriculation

The research literature has long held that where one starts out in higher education has enormous consequences, particularly with reference to completing degrees (Velez 1985). The vast majority (78.7 percent; s.e. = 1.15) of the universe under study here started out in a four-year college. Do any characteristics of that first institution stand out in multivariate analysis?

Only selectivity of the first institution was admitted to the Step 2 logistic model (the fact that the institution was a four-year college was not admitted). To be sure, there are other characteristics of the first institution of attendance. But if the dichotomous "selective" variable turns out to have but modest, if any, significance in the account, it is unlikely that other stock institutional characteristics—size, control, residential/commuter ratio—will have any influence, either. The best of the institutional characteristics variables in the literature is probably Stoecker, Pascarella and Wolfle's (1988) "size." This is not a simple measure, rather a factorial scale that includes total enrollment, student/faculty ratio, and public control. However attractive the concept, institutional size rarely breaks through as a stand-alone factor in literature with large national samples because of student taste—some like it large, some like it small—and taste is too variant. All this does not mean that where one starts out is irrelevant to completion, rather it directs our attention to other features of student academic history. More to the point, with 64.8 percent (s.e. = 1.06) of NELS:88/2000 students who attended a four-year college at some time attending more than one institution, and 26 percent (s.e. = 1.01) attending more than two, the task of ascribing influence to institutional characteristics is daunting (for a discussion of this issue, see pp. 81–84).

In addition to the selectivity variable (SELECT), Step 2 includes NODELAY, a marker for direct entry to postsecondary education following high school graduation. It also includes a new variable, ACCELCRD, made possible by the construction of the NELS:88/2000 postsecondary transcript file to reflect the practice of dual-enrollment that expanded during the period the High School Class of 1992 was attending high school and that has become much more visible since then. ACCELCRD sums all college credits earned by course work prior to high school graduation, along with credits earned by examination—including AP, the College Level Examination Program (CLEP), and institutional challenge exams. Most of these credits were earned either prior to matriculation or during the first term of enrollment, though some were earned at later points in the student's undergraduate career. A previous brief analysis of this phenomenon (Adelman 2004a, pp. 55–56) suggested that acceleration might have a bearing on degree completion since the descriptive data indicated a positive relationship between the number of "acceleration" credits earned and both (a) high school academic curriculum intensity quintile and (b) selectivity of the first institution attended.

Table 13 sets forth the relationships of the variables in play at the postsecondary matriculation stage to bachelor's degree completion for students who attended a four-year college at any time. Academic Resources is still in a commanding position, and the Delta-p statistic indicates that with each step up the quintiles of Academic Resources the probability of completion increases by 12.8 percent. Socioeconomic status quintile is still significant, though again, marginally so. Of all the new variables, no delay of entry alone is statistically significant, and its Delta-p says that students who enter college directly from high school increase the probability of bachelor's degree attainment by 21.2 percent, a very persuasive marker.

Table 13. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary entry phase

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p
Intercept	-4.2124	0.6588	2.02	0.01

[a] Variables did not meet threshold criterion for statistical significance

NOTES: Statistically significant variables are highlighted in bold. Standard errors adjusted by root design effect = 2.19. G^2 = 5060.17; *df* =4913; G^2/df = 1.030; X^2 (df) = 1101.0 (9); pseudo R^2 = 0.2127; percent concordant predicted probabilities = 78.5.

SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The selectivity of the first institution of attendance, while yielding a positive parameter estimate, does not reach the threshold of significance, and the *t* value for acceleration credits, at 0.73, falls just below the threshold for retention in the overall statistical model. The case of acceleration credits is one for which the author hoped for a better outcome, but once a rule is set, it is observed: The variable is dropped from subsequent steps. The demographic variables are

retained, but don't tell us much. And education expectations barely stays under consideration with a *t* value of 0.78. Beattie's human capital analysis (2002) downplayed education expectations as a central feature of explaining outcomes, particularly in consideration of group differences. It turns out that, even with a more sophisticated variable (our "anticipations") than the customary way of marking "aspirations," Beattie is right.

Step 3: First-Year Performance

Now that we have our universe of 1992 12th-graders in college, no matter where they started out, the most prominent initial marker of progress is a configuration of first-year academic performance indicators—and by "first year" is meant the *first calendar year* following the month in which the student first enrolled in their "true" first postsecondary institution after high school graduation.[30]

Most research on the critical first year of postsecondary education takes as its subjects students who start out in the fall term, and, by custom-and-usage, measures of retention (whether term-to-term or year-to-year) begin with fall enrollments. The transcript data, however, teach us that not all students commence postsecondary study in the fall term, and that there is a modest bias in drawing a universe based on fall term beginners only. For all 1992 12th-graders who entered postsecondary education at any time, 82.1 percent (s.e. = 0.83) started in the fall term, 5.8 percent (s.e. = 0.46) started in the summer term, and 12.1 percent (s.e. = 0.71) began in the winter or spring terms (depending on local academic calendars). While the full data on first term of entrance are presented in Appendix L, tables L8a and L8b, it is important to note here that Latino and African-American students are less likely than white students to commence postsecondary study in the fall term, and the same is true when students from lower socioeconomic status quintiles are compared with students from the highest socioeconomic status quintile. Any measure of retention or completion that confines its universe to students who began their postsecondary careers in the fall term is, to put it gently, grossly incomplete.

The cumulative number of variables qualifying for the logistic narrative increases by 50 percent when our field of vision opens out to first-year performance. The logistic model of the original *Tool Box* included three first-year performance variables, two of which were major contributors to understanding degree completion, and are carried forward: a marker for earning less than 20 credits in the first calendar year and a tag for students whose first calendar year GPA fell in the top 40 percent of the GPA distribution for that period. *The Toolbox Revisited* adds dichotomous variables indicating whether the student took any remedial courses in the first calendar year, and

[30]The "true" first institution of attendance excludes (1) colleges and community colleges in which the student was enrolled prior to high school graduation; (2) institutions in which the student was enrolled during the summer immediately following high school graduation and prior to fall term postsecondary entry (unless the institution was the same in both periods); and (3) "false starts," that is, cases in which the student enrolled, but then withdrew during the first term of attendance, only to enroll and complete course work in a different institution at a later point in time (in these cases, the second institution is the "true first institution"). The true first *date* of attendance is the first month of enrollment at the true first institution.

whether the student earned any credits in college-level mathematics during that period. The mathematics variable, identified as potentially potent by Astin and Astin (1993), represents a major departure in the way *The Toolbox Revisited* approaches its subject, for it introduces the potential association of *postsecondary* curriculum with degree completion (the original *Tool Box* did not raise this issue).

The first calendar year of attendance is the year in which students' preparation for postsecondary education is most sorely tested (Pascarella and Terenzini 1991), and in which both remediation and college-level mathematics study serve as indicators of that preparation. The lower division curriculum sets out course "gateways" through which students must pass in both universities (Hanson 1998) and community colleges (Boughan 2001). Every school can identify its list from high enrollment courses[31] and there is no question that most of these gateways require a direct connection to the content of high school curricula that define "readiness." Remediation stalls student momentum toward those gateways; college-level mathematics itself is a gateway.

In a different approach, American College Testing (2004) defines "college readiness" as a remediation-free postsecondary experience, and sets its benchmarks for "readiness" as

> . . . The level of achievement [based on ACT test scores] for students to have a high probability of success (a 75 percent chance of earning a course grade of C or better, a 50 percent chance of earning a B or better) in such credit-bearing college courses as English Composition, [College] Algebra, and Biology. . . (p. 1).

With all due respect to ACT, earning a C—or even a B—in college algebra is not why most students go to school. There are better ways to benchmark, starting with the Academic Resources index of total high school performance in which curriculum (including highest level of mathematics reached in secondary school) dominates and test scores do not. Instead of a grade in a single course, we then acknowledge the proportion of students who completed credits in *any* of five core college-level math courses during the first year of attendance, and, among those who became non-incidental students (i.e., earned at least an adjusted semester's worth of credits), the proportion who *ever* completed credits in those courses. In table 14, one notes right away that among those who start in community colleges and complete college-level math courses in the first year, college algebra is the dominant math course. Among those who start in four-year colleges, it is not the dominant math course, even though it ranks at the top in terms of student participation.[32]

---

[31]Hanson's (1998) list from the University of Texas at Austin ranges from Ecology, Evolution, and Society, to Introduction to U.S. and Texas Government, to General Psychology, to Calculus I and II for Science and Engineering Students.

[32]For more discrete details on credits earned in college-level mathematics, the reader is directed to table L9, Appendix L.

Ironically, the ACT study helps explain why curriculum quality emerges as more influential than test scores in building the Academic Resources composite, and justifies continuing to track curriculum (in this case, using mathematics momentum) across the matriculation line. The test scores are dependent variables that respond directly to increases in the concentration and level of study in each of the major secondary school content areas (see, e.g., Florida Department of Education 2005). The ACT study sees value-added in each step up the math curriculum ladder in terms of scores on the ACT math test. So when the dependent variable is degree completion, it is this curriculum—more than the test score—that sets the value-added tone.

Table 14. Percentage of 1992 12th-graders who earned credits in five categories of college-level mathematics courses in the first calendar year of attendance, and among non-incidental students,[a] the percentage who ever earned credits in those five categories, by type of institution first attended

College-level math category	Percent completing during first calendar year of attendance, starting in:		Among all students earning more than 10 credits, percent who ever earned credits in
	Four-year colleges	Community colleges	
College algebra	21.7 (1.01)	17.0 (1.19)	28.2 (0.92)
Precalculus	18.6 (0.85)	4.9 (0.77)	17.4 (0.69)
Calculus	17.6 (0.96)	1.6 (0.26)	16.8 (0.74)
Finite mathematics	4.6 (0.54)	0.9 (0.30)	6.4 (0.46)
Statistics, probability	5.3 (0.42)	2.3 (0.58)	19.6 (0.82)

[a] A non-incidental student is defined as one who earned more than 10 undergraduate credits.
NOTES: Standard errors are in parentheses. Weighted Ns: four-year college beginners = 1.14M; community college beginners = 789k; all who earned more than 10 credits = 1.84M.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

But does that mean that curriculum continues to have the same influence in a postsecondary setting? The issue comes up twice in the sequence of logistic models, first in table 15, which presents the results of the Step 3 logistic: first-year performance variables. What do we see?

- Earning less than 20 credits in the first calendar year following postsecondary entry is a distinct drag on degree completion. The Delta-p says that falling below the 20-credit threshold lessens the probability of completing a bachelor's degree by a *third*!

- First-year grades, a proxy for both student effort and acclimation to the academic demands of a new environment (Pascarella and Terenzini 1991), move in the opposite direction from low credits: If one's first-year GPA falls in the top two quintiles, the probability of earning a degree increases by nearly 22 percent.

Table 15. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: First postsecondary year performance

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p
Intercept	-3.5834	0.6054	3.33	0.01

† Variables did not meet threshold criterion for statistical significance
NOTES: Statistically significant variables are highlighted in bold. Standard errors adjusted by root design effect = 1.78. $G^2 = 4411.64$; $df = 4764$; $G^2/df = 0.926$; X^2 (df) = 1516.37(12); pseudo $R^2 = 0.2893$; percent concordant predicted probabilities = 83.3.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

- Academic Resources and socioeconomic status are the only other statistically significant variables. The Delta-p story for socioeconomic status quintile remains at roughly the same level: Each step up the SES ladder increases the probability of degree completion for this population by 6 percent or so. The Delta-p strength for Academic Resources, however, falls from 12.8 percent in the postsecondary entry model to 7.5 percent here, a natural consequence of the introduction of other competing curricular and grade-based variables.

- The two new curricular variables for remediation and college-level mathematics produce *t* statistics that justify carrying them forward, but do not reach even a threshold statistical significance level of $p<0.10$.

In the last observation there is a surprise that calls out for explanation. The parameter estimate for remediation in the first year is positive, not negative as conventional wisdom would assume. Students in this group who took any remedial courses in the first year earned bachelor's degrees at a 48.7 percent rate (s.e. = 2.70) compared to 69.9 percent (s.e. = 1.26) of those who did not take remedial courses in the first year (not in table). That is a significant and meaningful difference from which, one might assume, remediation would be a negative. But there are other variables in this model that determine the sign and strength of the parameter estimate and its statistical significance. In a study of the academic careers of traditional-age community college students, the author found that remediation (one dichotomous variable marking any remedial reading, and one multi-level variable based on type and number of remedial courses) did not affect either transfer or (for students who did not transfer) completion of an associate degree (Adelman 2005a). Other recent research, using a very sophisticated targeting of students whose need for remediation may differ according to the school they enter, goes beyond the finding that remediation is not a drag on degree completion to demonstrate that, in terms of persistence, remediation yields decidedly positive results (Bettinger and Long 2005). Two studies do not make for a definitive conclusion, but the evidence that students who successfully pass through remedial course work gain momentum toward degrees is beginning to build.

As for the other variables in the Step 3 model, we note that NODELAY drops out of the statistically significant range with an indirect message of "once a student is in college, their performance counts more than when they arrived." In other words, the ramifications of delayed entry can be overcome, but only with the kind of considerable effort reflected in first-year credit accumulation and first-year grades. The reader will note of table 16, however, that when financial aid variables are part of the logistic model, NODELAY rises back above the significance threshold.

Step 4. Adding Financial Aid to the Equation

There is a major difference between the High School & Beyond/So and NELS:88/2000 data sets in the nature and temporal coverage of financial aid information. For the HS&B/So, an unobtrusive Pell Grant file provided data on at least one type of grant-in-aid. Student reports covered four years (1982–86) of other types of grants-in-aid, loans, and work (including, but not confined to, college work-study from all sources) while enrolled. Three dichotomous variables resulted: GRANT, LOAN, and STUWORK. In the original *Tool Box* study, based on the HS&B/So data, GRANTS and STUWORK were modestly significant contributors to the explanation of bachelor's degree completion in both the financial aid and attendance pattern steps of the model, but fell below the threshold of statistical significance as soon as first-year and extended performance factors were taken into consideration.

The NELS:88/2000 financial aid information covered the period 1992–94 only, i.e., the first two years following the modal high school graduation date for the cohort. In the initial input versions of the data in 1994 (the third NELS follow-up survey), the information was provided by students for each institution attended, and in answer to the question, simply phrased, "besides your previous savings, how are you paying for this?" The options were grants, loans, work, parents, and other forms of aid. For students who attended more than one institution during the 1992–94 period, it is thus possible for different combinations of financial aid types to be attached to the

discrete attendance cases. For our purposes, if a student reported using any one form of financial aid or support (grants, loans, work-study or campus job) at *any* institution attended, a positive entry was recorded for that *type* of financial aid or support for that student.

Table 16: Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary financing

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p

† Variables did not meet threshold criterion for statistical significance
NOTES: Statistically significant variables are highlighted in bold. Standard errors adjusted by root design effect = 1.78. G^2 = 4396.88; *df* =4763; G^2/df = 0.923; X^2 (df) = 1519.14(13); pseudo R^2 = 0.2915; percent concordant predicted probabilities = 83.4.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

For those who ask about the importance of initial financial aid package offerings to students' choice of where to enter the postsecondary system, the NELS:88/2000 is of little help. The Beginning Postsecondary Students longitudinal study of 1995/96–2001, on the other hand, has the data elements but does not provide convincing guidance: For traditional-age students (i.e., those who began at age 20 or younger)in the BPS95/96–2001, 7 percent (s.e. = 0.7) of those who

started at four-year colleges and had applied to more than one school and 3.4 percent (s.e. = 1.6) of those who started at community colleges and had applied to more than one school said the financial aid package was the principal reason for their selection.[33] Such percentages do not merit further inquiry.

We come to Step 4 of the logistic model, then, with a weak collection of dichotomous financial aid variables, and the results must be judged in that light. As table 16 reveals, only the variable indicating whether the student received College Work-Study funds from any source or held a campus job was even admitted to the *Toolbox Revisited* model, and even then, produced a *t* statistic of 0.66, below the 0.765 required for carrying forward to the next step. Before that next step is taken, though, this narrative needs an important pause.

A Critical Pause for the Second Calendar Year

The literature on postsecondary persistence, retention, and attrition has historically taken its pauses and measures at the end of the student's first academic year. A more constructive notion for plotting the path of academic momentum on the far side of the postsecondary matriculation line may be to give students two full calendar years following the initial date of enrollment before taking their progress pulses, yet the research on this possibility has been surprisingly limited to date (see Smith 1995, and Nora, Barlow and Crisp 2005).[34] Looking backwards from the final degree completion status of our NELS:88/2000 universe to mark cumulative change to the end of the second calendar year following entry on key indicators provides a richer framework for advisement.

"Retention" and its paradoxes

No national database will support the assertion that a quarter of four-year college entrants and half of community college entrants "do not return for their second year" (Kazis 2004, p. 4). Contrary to this negative conventional wisdom, the proportion of students in the universe for this study who "persisted" to the second postsecondary year is substantial. The definition of "persistence" is active and student-centered, marks a calendar academic year as July 1 through the following June 30, and runs as follows:

> Whenever the student first enrolls and earns credits in postsecondary education (summer, fall, winter, spring) marks the first academic calendar year of their postsecondary history.
>
> If the student enrolls and earns credits at *any* time and at *any* institution during the next academic calendar year, that student has "persisted."

---

[33]National Center for Education Statistics, BPS95/96–2001 Data Analysis System; NCES 2003-173.

[34]Nora, Barlow, and Crisp (2005) offer a potentially promising analysis of a cohort at one nonselective four-year institution that is undercut somewhat by lack of data on age distribution and the fact that retention and six-year graduation rates are confined to that institution. But the authors include cumulative GPA to the second year, enrollment intensity, remediation, three core courses (what this study calls "gateways"), and a rough course withdrawal factor—all of which speak in favor of their approach.

"Retention," which puts the student in a passive role vis-a-vis a specific institution, is not the right word to describe this sequence: It's "persistence." There are two important points to underscore: (1) This definition reveals an extremely high rate of persistence, but (2) whether we talk about institutional "retention" or student "persistence," the true measure is not the fact of the event, rather the *quality* of the student's record going forward. The second academic calendar year offers students the opportunity to recapture any lack of momentum of the first. In that respect, the second year may be even more important than the first.

The unhappy paradoxes of retention rates and retention quality[35] are revealed in table 17. The universe for the table is confined to students with complete records. The proportion of students who enrolled sometime, somewhere in the second academic calendar year following entrance to postsecondary education is about 90 percent for all NELS:88/2000 postsecondary students and 96 percent for those with standard high school diplomas who subsequently attended a four-year college at some time (and in this group, just about everybody who started in community colleges). These data ought to destroy the mythologies of low first-to-second year retention (which, by the formulas most commonly applied, include only students who started full-time and in the fall semester and returned to the same school the following fall semester). This account gives students credit for persisting, and gives students who started in sub-baccalaureate trade schools credit for earning a certificate in their first year and then going on their way.[36]

However, this account also shows that, even when one confines the universe to the group being followed in *The Toolbox Revisited*, roughly one out of five entered the second year with low credit momentum, and roughly one out of six carried low first year GPAs. The overlap, too, is considerable: 40 percent of those coming out of their first year with fewer than 20 credits were also in the bottom quintile of first year GPA (not in table). Low credit momentum is also due to the number of courses taken in the first year, with 41.7 percent (s.e. = 2.46) of those who earned less than 20 credits attempting seven or fewer courses—a proxy for part-time status—versus 2 percent (s.e. = 0.27) of those who emerged with 20 or more credits. The reason for counting course attempts and not credit attempts is a by-product of the volume of remedial courses (which do not carry additive credits). Half of the low first-year credit group were tied up in remediation, versus 17 percent of those who reached or exceeded the 20-credit threshold.

---

[35]As Tinto (1987) noted, "The point of retention efforts is not merely that individuals be kept in college, but that they be retained so as to be further educated." (p. 136) Poor retention quality significantly lowers the odds of further education.

[36]The persistence rates for all 1992 12th-graders noted in this paragraph are slightly different from those previously reported (Adelman 2004a, table 3.4, p. 42), where the weight for known postsecondary participants (not the weight for students with complete records) was used.

Table 17. Percentage of 1992 12th-graders with complete postsecondary records who persisted in postsecondary education from their first calendar year of enrollment to a second calendar year, by type of institution first attended, and, of those who persisted, percentage with lagging first-year performance

Student group	Persisted	Earned one-year certificate	Did not persist	Of those who persisted, first-year performance indicators: Less than 20 credits	In lowest GPA quintile
All 12th-graders	89.7 (0.57)	0.9 (0.13)	9.4 (0.55)	33.2 (1.12)	17.4 (0.81)
Type of first institution					
Four-year college	95.2 (0.59)	0.1 (0.03)	4.7 (0.59)	15.9 (0.91)	15.2 (0.86)
Community college	84.0 (1.12)	0.4 (0.10)	15.6 (1.11)	60.7 (1.93)	21.5 (1.76)
Other sub-baccalaureate	71.5 (3.06)	14.8 (2.52)	13.7 (2.01)	31.4 (5.17)	11.9 (2.70)
All with standard high school diploma by December 1996 who attended a four-year college at any time	95.8 (0.50)	0.1 (0.03)	4.2 (0.50)	21.9 (0.98)	15.5 (0.88)
Type of first institution					
Four-year college	95.2 (0.59)	0.1 (0.03)	4.7 (0.59)	15.9 (0.91)	15.2 (0.86)
Community college	97.9 (0.87)	2.1 (0.87)	#	44.0 (2.93)	15.7 (2.72)
Other sub-baccalaureate	Low N[a]	Low N[a]	Low N[a]	Low N[a]	Low N[a]

Rounds to zero.
[a] Reporting standard not met.
NOTES: Standard errors are in parentheses. Row totals for the three persistence/retention columns may not add to 100.0 percent due to rounding. Weighted N for all 12th-graders with complete postsecondary records: 1.88M; for all 12th-graders with complete postsecondary records who attended a four-year college at any time and who earned a standard high school diploma by December 1996: 1.38M

Momentum at the end of the second calendar year

First-year background certainly helps explain some of what transpires in student histories by the end of the second year. Tables 18 and 19 offer a skeleton of two-year performance so that future research on the momentum hypothesis can become more sophisticated than this outing. The information is presented in two separate tables to make sure the messages are clear. The most overwhelming phenomenon to note in table 18 is that by the end of the second calendar year, those who never earned their bachelor's degree were already 25 credits behind those who did (57.4 credits earned by those who eventually received a bachelor's degree versus 31.6 for those who did not earn the degree), and for those who were behind, there was no difference between starting in a four-year college and starting in a community college. One set of "culprits" was attendance pattern related: lower percentage full time, lower percentage continuously enrolled, lower percentage getting to and beyond 20 credits in the first calendar year. All these factors decrease the probability of completion.

Credit momentum is clearly in play. For the universe of this study, the mean number of credits earned within two calendar years of the date of entry was 49.5 (s.e. = 0.51). It takes a lot of work in the second calendar year for those whose additive credit totals in the first year were less than 20 to reach that mean, and only 3.6 percent (s.e. = 1.03) did, compared with 77.6 percent (s.e. = 1.02) for those who earned 20 or more credits in the first year.

But a second set of negative vectors is clearly that of academic performance. In table 18 the spread in mean grade point average between those who eventually earned the degree and those who did not is substantial by the end of the second year, and it is not surprising that nearly one in five of those who never earned any credential had already become status dropouts (see table 19). The data remind us of a common sense fact that few analysts or commentators ever acknowledge when writing about student academic careers after high school: A measurable proportion of postsecondary students will not perform well (for GPAs of status dropouts, by timing of permanent departure from postsecondary education, see Appendix H, table H4). Higher education has standards, and some students will, in fact, be placed on academic probation or be formally dismissed for academic reasons, i.e., flunk out. These compressed signals are not as likely to be entered on official records as graduation with honors (*cum laude*, etc.). [37]

[37]Compressed signals are used to mark extremes of academic performance. The American Association of Collegiate Registrars and Admissions Officers has reported that 90 percent of its member institutions enter graduation with honors on transcripts (AACRAO 2002), and, in a 2005 survey of transcript practices , found that 70 percent enter academic probation or dismissal (www.aacrao.org/pro_development/surveys/transcript05.htm).

Table 18. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, credits earned and GPA at the end of the second year following initial enrollment in postsecondary education, and extended postsecondary attendance and performance markers, by ultimate bachelor's degree status

Selected attendance and academic performance markers	Of those who earned bachelor's		Of those who attended a four-year college, but did not earn bachelor's	
Earned 20 or more credits in first year	90.8 (0.79)		46.8 (1.88)	
Always full-time	79.3 (1.04)		37.9 (1.85)	
Continuously enrolled	93.5 (0.58)		45.7 (1.93)	
Cumulative credits and GPA two years from entry				
	average credits	mean GPA	average credits	mean GPA
All students in universe	57.4 (0.35)	2.91 (0.14)	31.6 (0.86)	2.13 (0.36)
Started in four-year college	58.8 (0.30)	2.92 (0.14)	32.1 (0.85)	2.03 (0.39)
Started in community college	49.2 (1.30)	2.84 (0.42)	31.6 (2.20)	2.37 (0.81)
If no remedial courses in first year	58.8 (0.36)	2.97 (0.14)	34.1 (1.13)	2.19 (0.32)

NOTES: Standard errors are in parentheses.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

Table 19 serves another function in the narrative, namely, to look back from the end of the longitudinal study in December 2000, and ask what percentage of postsecondary students were no longer enrolled and had not earned a credential of any kind, by timing of the gap between their first month and last month of enrollment? These students are called "status dropouts" (though they may return to postsecondary education at a later date). While the general subject of timing and reasons for departure is elaborated in Appendix H, table 19 looks at the eventual dropout population only by their status at the end of the second year of attendance. It says, very simply that:

(a) of those who never earned a credential, 23 percent became status dropouts by the end of the second year;

(b) of all those who ultimately became status dropouts over an 8.5 year period, roughly a third did so by the end of the second year;

(c) for those who dropped out in either the first or second year, GPAs were decidedly below thresholds required for degrees, but

(d) when asked why they left without a degree, less than 6 percent cited academic reasons (also see Appendix H, table H2).

Yes, the status dropout rate proves higher during the first year than the second, but by the end of the second year, the loss of academic momentum is very evident.

Table 19. Status dropout rates at the end of the second year following initial enrollment in postsecondary education of 1992 12th-graders who attended a four-year college at any time, and allied academic performance data

Timing of departure	Percent of those who never earned a degree who became status dropouts	Percent of all who ultimately became status dropouts	Mean grade point average at end of enrollment	Percentage of dropouts who said they left for academic reasons
Left postsecondary without credential, never returned:				
during first 11 months	13.1 (1.62)	19.1 (1.33)	1.68 (0.81)	5.9 (1.92)
during months 12–23 after first enrollment	10.3 (1.26)	13.3 (1.56)	1.98 (0.68)	5.6 (1.40)

NOTES: Standard errors are in parentheses. Weighted N for status dropouts in first two years = 103k.

Curriculum gateways

As significant in the panorama of student performance through the end of the second calendar year are rates of participation in specific courses identified as curricular gateways in four-year colleges by Hanson (1998) and in community colleges by Boughan (2001). The taxonomy of postsecondary courses used to code the transcripts for both the High School & Beyond/ Sophomore cohort and the NELS:88/2000 data files includes over 1100 discrete course categories[38] of which 645 were used to answer the following question: "What percentage of students in the *Toolbox Revisited* universe successfully completed credits in each course category between the month they first entered postsecondary education to a point two calendar years later?" Table 20 presents the 25 academic course categories[39] in which the highest percentage of those who eventually earned bachelor's degrees garnered credits during that time span, and for each course category, also presents matching percentages for students who attended a four-year college at any time but who did not complete a bachelor's degree.

[38]The most recent version, *Taxonomy of Postsecondary Courses Based on the National Transcript Samples, 2003*, is available at www.ed.gov/rschstat/research/pubs/empircurr/index.html.

[39]Though their enrollments were substantial, physical education activities, health information, physical conditioning, orientation, and personal development courses were excluded.

Table 20. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, course participation rates by the end of the second year following initial enrollment in postsecondary education, by ultimate degree status

	Percentage of students who earned credits by the end of the second year following initial enrollment	
Course	Earned bachelor's	Did not earn bachelor's
English composition	82.3 (1.03)	53.4 (1.40)
General psychology	61.5 (1.18)	32.2 (1.19)
General biology	35.2 (1.24)	12.4 (0.87)
Introduction to sociology	34.4 (1.12)	19.6 (1.08)
U.S. history surveys	32.6 (1.22)	14.9 (0.97)
Micro/macroeconomics	30.3 (1.14)	9.3 (0.88)
General chemistry	30.1 (1.05)	7.5 (0.74)
College algebra	26.7 (1.20)	13.9 (0.94)
U.S. government	25.3 (1.12)	10.4 (0.74)
Calculus	23.7 (1.11)	3.2 (0.43)
Precalculus	22.4 (0.95)	5.8 (0.68)
Oral communication	20.4 (1.03)	11.0 (0.72)
Introduction to philosophy	18.9 (1.05)	5.0 (0.49)
Literature: general	18.9 (1.03)	5.0 (0.56)
Spanish: intro and intermed	18.8 (1.01)	5.9 (0.61)
Western civilization	17.0 (0.93)	6.5 (0.62)
Introduction to computing[a]	15.8 (0.90)	10.9 (0.81)
Introductory accounting	15.7 (0.81)	7.2 (0.56)
Statistics (mathematics)	14.4 (0.79)	3.7 (0.68)
World civilization	12.1 (0.93)	4.0 (0.50)
General physics	12.1 (0.83)	2.3 (0.42)
Public speaking	11.2 (0.78)	6.2 (0.67)
Music appreciation	10.9 (0.84)	3.8 (0.45)
Drama criticism/history	10.7 (0.73)	2.9 (0.46)
American literature	10.3 (0.71)	1.7 (0.28)

[a] This is not "introduction to computer science."

NOTES: Standard errors are in parentheses. Weighted N for bachelor's recipients = 935k; for those who did not earn bachelor's = 513k. All row estimate comparisons are significant at $p<.05$.

SOURCE: National Center for Education Statistics: NELS:88/2000 postsecondary transcript files (NCES 2003-402 and Supplement).

This is a story that moves curriculum details forward from high school. It is empirically-driven, which is to say that the volume of course participation identifies the gateways for both community college transfer students and those who started in four-year colleges in the NELS:88/2000 cohort. Given the disparity in the number of credits accumulated by the end of the second academic calendar year between those who eventually earned the bachelor's degree and those who did not, the spreads in participation rates in these 25 course categories are not surprising. The ratios of these percentage participation rate contrasts are 7:1 in calculus, 6:1 in American literature, 5:1 in general physics, 4:1 in general chemistry, and more than 3:1 in precalculus, micro/macroeconomics, introduction to philosophy, general literature surveys, statistics, history/criticism of drama, and world civilization. These courses cover the full range of traditional lower-division distribution requirements (akin to pick one from bin A, two from bin C, etc.) in four-year colleges and general studies associate degree requirements (the bulk of the transfer curriculum) in community colleges, with the standard non-remedial English composition and college algebra the most visible gateways for the community college group (Boughan 2001).

The list of 25 discrete categories in table 20 invites aggregation and, with aggregation, the inclusion of other lower division courses that serve gateway roles. For example, there are four college-level mathematics courses among the 25, and they certainly can be aggregated as we have already done in our assessment of first-year performance. General biology is not the only introductory biology course category in the taxonomy used. Some institutions still use a zoology-botany sequence; others open the study of life forms with cellular biology; others, still, offer the option of human biology as a starting point. All of these course categories are in the taxonomy, and joining them with general biology in an aggregate allows a broader and more accurate coverage of participation in gateways to upper division course work requiring a grounding in the biological sciences.

Table 21 takes this alternative approach to describing the curricular participation of students who earned bachelor's degrees and those who did not. Table 21 uses 14 aggregate gateways, two of which are single-course categories repeated from table 20 (general psychology and micro/macroeconomics). While Appendix I provides a listing of all course categories under each aggregate, a few notes are necessary in the text:

- Humanities other than literature covers multidisciplinary introductions to the humanities, introduction to philosophy, ethics, and introduction to religious studies (usually a comparative religions survey). It does not include foreign languages.

- "Foundation business" is included for two reasons. First, business fields have historically claimed the largest percentage of majors among traditional-age bachelor's degree completers and a substantial proportion of associate degrees awarded to traditional-age students by community colleges (Adelman 2004a, tables 5.1, p. 61 and 5.4, p. 65). Secondly, prospective business majors appear to take at least one introductory gateway course in the area during their first two years (introduction to business, business law or business legal environment, and/or introductory accounting).

Table 21 displays not only the percentage of students in the bachelor's and no-bachelor's groups who earned credits in each of the 14 aggregates, but also, for those who earned any credits in the aggregates, the average number of credits earned. The reader will notice first, that the use of aggregates narrows the difference in participation rates between the two groups. For example, in the category of standard English composition, the difference in participation rates between those who eventually earned a bachelor's degree and those who didn't is 82.3 percent to 53.4 percent (table 20); but when the category becomes "college-level writing," and includes technical writing, creative writing, and advanced essay, the participation difference narrows to 84.5 percent to 68.6 percent. That is still a significant gap, though not as severe as others in table 21. For the record, the credits earned in the aggregates of table 21 account for 59 percent of all credits earned by students in this study during their first two years of postsecondary education.

Table 21. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, participation rates in lower-division course category aggregates and average number of credits earned in each aggregate by the end of the second year following enrollment in postsecondary education, by ultimate degree status

	Earned bachelor's degree by December 2000		**Did not earn bachelor's degree by December 2000**	
Course aggregate[a]	Percentage completing credits	Average credits earned	Percentage completing credits	Average credits earned
College-level writing	84.5 (0.95)	4.96 (.046)	68.6 (2.05)	4.83 (.091)
Oral communication	35.6 (1.21)	3.38 (.054)	26.2 (1.59)	3.15 (.080)

[a]For a listing of courses under each aggregate, see Appendix I.

NOTES: Standard errors are in parentheses. Weighted N for those who earned bachelor's degrees: 935k; for those who did not earn bachelor's degrees: 513k.

SOURCE: National Center for Education Statistics: NELS:88/2000 postsecondary transcript files (NCES 2003-402 and Supplement).

At the same time—and with few exceptions—the differences in average credits earned in the 14 aggregates are negligible, statistically insignificant, or meaningless—or all three of the above. In other words, when students who did *not* earn a degree took courses in these aggregates, they earned credits at the same rate as those who *did* earn the degree. The problem is still that a much lower percentage of those who did not earn degrees even pass through these gateways.

What does this account of the second calendar year mean?

The sequence of steps of the logistic narrative of what matters in degree completion in *The Toolbox Revisited* moves from first-year performance (with an apostrophe of financial aid considerations) to longer-term vistas of attendance patterns and extended performance. It does not make a distinct stop at the end of the second year. And yet by the end of students' second year, a significant spread in credit generation, academic performance, and curricular participation has opened up between those who eventually completed bachelor's degrees and those who did not. An event history account appropriate to the analysis of withdrawal (e.g., DesJardins, Ahlburg, and McCall 1999) would include a measurement at this point. So as the logistic narrative heads into consideration of attendance patterns (Step 5), the reader might ask what would happen if we took first year-credits and first-year GPA and replaced those variables with *second*-year cumulative measures.

An experimental logistic was constructed in response to that hypothetical question (see Appendix L, table L10). What happened? The Delta-p statistic for the credits variable barely budged and the Delta-p for GPA declined but slightly, i.e., at first glance, it doesn't make a difference whether one uses first- or cumulative second-year measures. At the same time, though, the strength of that cumulative second-year credits substitute[40] wreaked havoc on critical variables that would otherwise be highlighted under attendance patterns, e.g., community college transfer and four-year-to-four-year transfer. As we will note in a moment, disentangling the consequences of different kinds of multi-institutional attendance is more critical to the analysis of degree completion than status at the end of the second year.

What about the gateway lower-division courses taken by the end of the second calendar year? Are any of them key portals to degrees? Beyond college-level writing (a requirement) and college-level mathematics, this is not a fair question, for the answer depends on a student's major and the requirements of the degree-granting department. Consider an English major who took general physics, the introductory micro/macroeconomics sequence, and introduction to design to satisfy distribution requirements. None of these courses (which are gateways to upper-division offerings in other fields) is a portal to completing a degree in English, though one could argue that they provide literature majors with analytic tools, reference points, and contexts that can only

[40]The variable for cumulative credits to the end of the second calendar academic year was constructed in a manner different from the dichotomous presentation of first calendar academic year credits. Cumulative credits is a categorical variable with four levels based on empirical mean credits earned and standard deviation (49 and 19 respectively): 0–29, 30–49, 50–69, and 70 or more.

enrich their interpretive powers. In fact, it could also be argued that the distribution courses gathered in the 14 aggregates of table 21 are secondary in propulsive power to the second level of course work in specific fields. For example, "everybody" takes general psychology, but those who log experimental psychology and developmental psychology are establishing a beachhead in the field, and those courses become the real portals to the degree.

One might use the number of curricular "gateways" through which students had passed by the end of their second calendar academic year as an independent variable, but the national samples with which we work in grade-cohort longitudinal studies would require consensus of academic administrators as to the curricular locations and expected threshold numbers of these gateways, and that consensus is simply not available. In fact, given the variety of presentations of postsecondary curricula across over 3,000 degree-granting institutions, that consensus may be impossible. This is ultimately a matter for local configuration and analysis (for a course cluster approach, see Zhai, Ronco, Feng, and Feiner 2001) as well for future research that would revisit the differential course work hypothesis in *postsecondary* contexts that appeared in the literature a decade ago (e.g., Ratcliff et al. 1995; Kroc, Howard, Hull, and Woodard 1997). As this pause in the narrative of *The Toolbox Revisited* demonstrates, though, those analyses cannot be profitably engaged on the basis of the student's first-year work alone. The second year is just as important.

Step 5: Postsecondary Attendance Patterns

One of the principal contributions of *Answers in the Tool Box* was to document, on a national scale, what college and community college registrars, institutional research officers, and enrollment managers had known for some time: the increasingly complex enrollment patterns of postsecondary students (Hearn 1992; Kearney, Townsend, and Kearney 1995). This complexity has steadily accelerated since the 1970s, when the first high school cohort tracked by the National Center for Education Statistics attended college (for historical comparisons of multi-institutional attendance patterns, see Appendix L, table L11). It is not merely a case of the proportion of non-incidental[41] undergraduates attending more than one school increasing from 47 to 57 percent;[42] it is more a question of *how* they attended more than one school, and in what combinations and order (Adelman 2004a, pp. 45–50).

The most critical distinction on this dynamic landscape is between transfer and multi-institutional attendance. Transfer is a migration that is formally recognized by system rules, a sequential movement from a *de jure* status in one institution to a *de jure* status at a second institution (or third, or fourth). Furthermore, the student's stay at the second institution is not a short visit. So, for example, the beginning community college student who earns 46 credits at the first school and 5 credits at the second is a multi-institutional student not a transfer student. In the context of

---

[41]"Non-incidental" means students who earned more than 10 credits in their undergraduate careers. Those who earned 10 or fewer credits do not accumulate enough history for analysis of attendance patterns.

[42]Kuh et al. (2001) found that 53.2 percent of the 32 thousand seniors who participated in the 2000 National Survey of Student Engagement had attended more than one institution.

a four-year student's history, earning 102 credits at the first school (ultimately, the degree-granting school), 21 credits at a different four-year college and 9 credits at a community college along the way, involves a situation in which *credits* are transferred, not the student. But the student who begins at a community college and earns 44 credits at the community college before attending a four-year college, then earns 55 credits from the four-year college and is still enrolled at the four-year college at the end of our tracking period is a transfer student.

Whether and how students attend more than one school may also depend on student performance in the first calendar year of enrollment. Using the five-year Beginning Postsecondary Students longitudinal study of 1989–94, McCormick (2003) demonstrated that for students who started in four-year institutions, the higher the first-year self-reported GPA, the more likely the student would stay put, whereas for students who started in two-year colleges, a higher GPA was associated with transfer, hence, with multi-institutional attendance. Do these findings hold up in a transcript-based longitudinal study such as the NELS:88/2000? Table 22 outlines the corroboration: For four-year college students, McCormick's observation is unconditionally seconded; for community college students, the difference between attending one school and two schools strongly supports the argument.

Table 22. Relationships of grade point average (GPA) in the first year of attendance to number of institutions attended by 1992 12th-graders, by type of first institution attended

Type and number of institutions	First year GPA
Started in four-year college	
One institution	2.74 (0.03)
Two institutions	2.61 (0.04)
Three or more institutions	2.53 (0.04)
Started in community college	
One institution	2.39 (0.05)
Two institutions	2.59 (0.04)
Three or more institutions	2.45 (0.09)

NOTES: Standard errors are in parentheses.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The students in the subject universe of this study were even more mobile than the NELS:88/2000 cohort as a whole: 35.9 percent (s.e. = 1.17) attended only one institution, compared with 46.2 percent (s.e. =1.04) of all NELS students who earned any postsecondary credits. And our subjects were more likely to attend *more than two* institutions than the larger universe (25.3 percent (s.e. = 1.15) versus 20 percent (s.e. = 0.81). This higher degree of

mobility invites us to identify the deeper structures of attendance so that we can better sort the relationships between starting point, performance, migration, and degree completion.

For those students who attended more than one school, table 23 lays out some basic patterns. One should be very careful in reading them. The universe consists of the 64 percent of 1992 12th-graders who not only attended a four-year school at any time *but also* attended more than one institution as undergraduates. Institutional mobility is built into the definition. It is not surprising (in fact, it is outrightly redundant) that reverse transfers do not earn bachelor's degrees and that classic community college transfers who earn bachelor's degrees receive them from an institution other than the one first entered.

Those obvious observations aside, the most intriguing students in this configuration are what de los Santos and Wright (1990), Borden (2004), and others have called "swirlers." The basic definition of "swirling" follows a pattern first observed in the High School & Beyond/ Sophomore cohort data and was labeled "alternating sectoral enrollment." In this pattern, the student starts in either a four-year college or a community college, and moves back and forth between them for at least one cycle, accumulating more than 10 credits from both sectors in the process. In the sample isolated in table 23, 63 percent of these cycles began in four-year colleges

Table 23. Combinations of institutions attended by 1992 12th-graders who attended a four-year college at any time who also attended more than one school, and percentage earning bachelor's degrees under each combination

		Earned bachelor's degree	
Institutional combination	Percent attending	Total	From other than first institution
Two or more four-year colleges	31.8 (1.41)	82.3 (1.52)	42.3 (2.57)
Reverse transfer (four-year to community college)	9.7 (1.00)	<0.1 (0.42)	N.A.
Community college to four-year college (including classic transfers)	24.0 (1.37)	58.1 (2.97)	99.7 (0.26)
Alternating sectoral enrollment ("swirling")	15.4 (1.24)	39.1 (3.77)	69.7 (4.55)
Four-year-college-based student attending community colleges for incidental course work	14.3 (1.01)	86.4 (2.32)	24.6 (4.39)
Other combinations	4.7 (0.62)	4.6 (1.42)	45.1 (13.5)

NOTES: Standard errors are in parentheses. Column for attending may not add to 100.0 percent due to rounding. Weighted N=753k.

and 37 percent in community colleges (s. e. = 3.98; not in table). Furthermore, 57.6 percent of the students engaged in just one cycle of alternating enrollment while 42.4 percent rotated through two or more alternating cycles of attendance (s.e. = 4.05; not in table). Among the major categories of students who attended more than one school in table 23 there is a broad range of bachelor's degree completion rates (39 to 86 percent), and the "swirlers" are at the low end of that range.

What's the point? Attendance patterns, as accounted for in the history of the High School Class of 1982 (the HS&B/So), presented paradoxes. As a dichotomous variable in the original *Tool Box*, multi-institutional attendance evidenced no association with bachelor's degree attainment; classic community college transfer bore strong and positive fruit; but the more general phenomenon of attending more than one institution and not returning to the first institution of enrollment evidenced a strong negative relationship to degree completion. These paradoxes are unwound in table 24, the logistic account of the associations between the increasingly complex postsecondary attendance patterns of the 1990s and degree completion.

As befits the topic of attendance patterns, the variables considered and admitted to the Step 5 logistic model are those of time and place:

Ever part-time:	flagging those students who, at some time in their undergraduate careers, enrolled part-time in an academic term other than a summer term;
Summer:	number of credits earned during summer terms in three bands: none, 1–4, and more than 4;
Classic transfer:	community college to four-year after earning more than 10 credits from the community college;
Four-to-four:	four-year college to four-year college transfer; and
Multiple schools:	marking students who attended more than one institution, whether they formally transferred or not.

Actually, one major time-related attendance pattern variable is purposefully left out of the equation, continuous enrollment—or NOSTOP, as it is abbreviated. NOSTOP was one of the most powerful of the postsecondary history variables in the original *Tool Box*. Given the length of the grade-cohort postsecondary histories in the longitudinal studies,[43] a student was allowed a one-semester (or its equivalent, and exclusive of summer terms) stop-out period and still considered continuously enrolled. When this variable is entered into the logistic model, its positive value and extraordinary statistical significance do not permit us to ascertain fully how

[43]Up to 12 years for the High School Class of 1972 (NLS-72), 11 years for the High School Class of 1982 (HS&B/So), and 8.5 years for the High School Class of 1992 (NELS:88/2000).

Table 24. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary attendance patterns

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p
