In a similar vein, Marxist theorist and veteran Black activist C.L.R. James identified the Black scholar's role as being "to learn and understand and let people know what is happening," and its historical background. He concluded, mirroring Drake's call for intellectual task, the Black scholar's function was "to illustrate, understand it [the struggle] and he must be able to explain it in historical and social terms, otherwise the education that he has and the money he may be getting are of no use to the Black people as a whole. He has a function to perform. He does not have to teach people to go and fight as they fought in Watts... but you [have to] have mass support for any work ... that you may do."[47] James, along with economist George Beckford, emphasized linking intellectual production with the masses. The scholars emphasized the need to "disenchant" the prevailing representations of Blacks, representations that created the paradigms of "value and authority" and shaped the dominant political languages. Producing a counter narrative was a necessary task, according to the Drake, James, and the other invited scholars.[48]

The invited scholars identified countering the dominant representation of Blackness as an essential task in the struggle for Black liberation and the focal point

of any Black perspective.[49] Drake, in his lecture on Allison Davis's *Deep South*, identified the significance of Davis's work in its economic analysis and his emphasis on the "learned behavior to race relations." Drake concluded, "Davis took the emphasis away from genetics and the widespread historical belief that race prejudice was somehow inherited. He clarified the point that it was the *system*, not the genes, that had to be studied if one wanted to effect meaningful social change."[50]

Similarly, James stressed the need to write histories that represented a strong viewpoint, "The writers, particularly, in England," he noted, "usually tried to be what is called fair to both sides, well balanced, but you can't write a well-balanced history of revolution because a revolution is something that creates disorder and unbalances everything. And if you are going to write on both sides, you write nothing!"[51] He explored the importance as models of his classic *Black Jacobins* and W.E.B. Du Bois's *Black Reconstruction* with his classic. James concluded that his work "tried to show that black people were able to make historical progress, they were able to show how a revolution was made, they were able to produce the men who

could lead a revolution and write new pages in the book of history."[52] The Institute's examination of such books, confirmed its goal of controlling the definitions of Blackness.

Although, the spring reorganization meetings and summer symposium strengthened organizational resolve, there was still internal confusion over the correct perspective among the staff. This source of this confusion reflected the race versus class dispute that had preoccupied the Black intellectual community since the beginning of the twentieth century. Rather than seeing the two positions as complementary, Black intellectuals often held the other position as being reactionary. The Institute of the Black World's attempt to merge the analysis of Marxism and Nationalism represented an attempt to move beyond the debate and toward the Black Radical Tradition. In political scientist Cedric Robinson's classic, *Black Marxism*, he identifies a Black Radical Tradition in which many twentieth-century Black intellectuals used Marxism as a "staging area" or a conduit into the tradition. IBW's association and study of Black intellectuals such as DuBois, James,

and Drake recognized the limitations of Marxism. As Robinson stated, "Marxism, the dominant form that the critique of capitalism has assumed in Western thought, i[DEW5]ncorporated theoretical and ideological weaknesses that stemmed from the same social forces that provided the bases of capitalist formation."[53] The Black Radical Tradition, although starting with the critique of capitalism, recognized that production was not the organizing principle of society, rather race and racial ideology was the mode of inclusion and exclusion. As Robinson stated:

> The social cauldron of Black radicalism is Western society. Western society, however, has been its location and its objective condition but not – except in a most perverse fashion – its specific inspiration. Black radicalism is a negation of Western civilization, but not in the sense of a simple dialectical negation. It is certain that the evolving tradition of Black radicalism owes its peculiar moment to the historical interdiction of African life by European agents. In this sense, the African experience of the past five centuries is simply one element in the mesh of European history: some of the objective requirements for Europe's industrial development were met by the physical and mental exploitation of Asian, African, and native American peoples. This experience though, was merely the condition for Black radicalism – its immediate reason for and object of being – but not the foundation for its nature or character. Black radicalism, consequently, cannot be understood within the particular context of its genesis. It is not a variant of Western radicalism whose proponents happen to be Black. Rather, it is a specifically African response to an oppression emergent from the immediate determinants of European development in the modern era and framed by orders of human exploitation woven into the interstices of European social life from the inception of Western civilization….[54]

[54] Robinson, *Black Marxism*, 72 – 73.

The SRS exemplified this tradition, however, some staff members within the Institute, reflecting the ideologically rigid times of the 1970s, saw a conflict between Marxist and Pan-Africanist analysis.

Internal Institutional Problems

While the 1971 Summer Research Symposium succeeded in generating ideas and debate on the role of Black intellectuals in the struggle for Black liberation, the development of a Black perspective, one that could orientate the staff and provide analysis of the Black struggle, remained nebulous. In fall 1971, much of the administrative staff still believed IBW was not attaining its goals. They presented a series of grievances to the Executive Committee. They located the problems engulfing IBW in three areas – an ideological division, poor leadership, and weak finances. While the last two concerns will be addressed later, the perceived ideological division signified the failure of the central intellectual tasks of the Institute.

The inability to define precisely "the Black perspective" began to divide the Institute. Rather than a Black Radical Tradition, the staff saw a split between Pan-African and Marxist tendencies in the Institute that was "fundamental and irreconcilable."[55] A group of staff members, which included long time administrative assistant Sharon Burke, identified the Pan-African line, generally associated with Vincent Harding, as "preoccupied with the reclaiming of the history

[55] IBW Staff Caucus, "Reorganization Begun, But Incomplete," IBW Papers Box (Reorganization Aug. 1969 - Nov. 1971), Folder (Nov. 1971 1 of 2).

of African peoples." According to several staff members, this tendency looked at pre-industrial African civilizations as better social systems and the goal must be to "restore or preserve that existence in new African ways in this century." The assumed moral superiority of African society placed it in direct moral opposition to the devastating effects of Western culture. The political language of Blackness that formed the basis of the Pan-African tendency motivated Harding to assert that the "Black man is truth or close to the truth, Blackness is the truth of truth…." Harding used the discourse to challenge the values of America. He insisted that the reinterpretation of the Black experience must begin with a reinterpretation of Africa, and had to address Africans in the New World. Because of Harding's leadership of IBW, much of the original staff were inclined towards this broad framework, including A[dew6].B. Spellman, Lerone Bennett, Joyce Ladner, and Sterling Stuckey. It was this type of discourse that allowed some organizations such as Karenga's US to promote a new African value system to replace "degenerating" Western cultural values. This focus implicitly linked IBW with the cultural nationalism of Karenga.[56]

Pickney links IBW to educational nationalism a derivative of cultural nationalism.

Derrick White –

The other tendency in IBW, according to the staff, was a Marxist orientation. The Institute's personnel believed that Marxism shaped the mission "to educating and organizing an oppressed people to take power." Moreover, it did not view capitalism and scientific principles as being oppositional to Black history, but as components to be addressed and transformed. From the staff's perspective, William Strickland represented and developed this strain of thought through his analysis of James Boggs and his opposition to Pan-Africanism evidenced in the debate he precipitated over the "African struggles" sign.[57]

The inability to create a cohesive perspective, from the staff's perspective, fostered an aura of conservatism in IBW. Staff members accused IBW of being a "bourgeois organization," rather than a revolutionary one. In addition, the staff thought IBW reflected this conservatism on issues of class, sex, religion, and lifestyle. As Sharon Burke stated,

> It's as if the ferment in the White world were defined as merely White and degenerate, and therefore of no concern to those waging a serious Black struggle, whereas I suspect that they (Women's Lib, Gay Lib, consumer movements, music movements, etc.) are serious movements too. Not silly, diversionary, divide-and-conquer fades, but consequences of a new stage of historical development. Not signs of decay, but of something being born.[58]

[58] Ibid. 6.

The staff viewed the ideological split in the organization as pointing to the two directions the organization could develop – a "bourgeois, class-oriented, educational institution" or an "organization dedicated to educating and politicizing the masses to take power."[59]

Both Vincent Harding and William Strickland responded to the staff's criticisms. Both believed that the staff had made their analysis on faulty information and encouraged them to revisit the reorganization documents. Strickland believed the staff documents portrayed a false dichotomy between Pan-Africanist and Marxist interpretations. Moreover, he viewed the dichotomy as one based on differing understandings of the role of intellectuals to the social order, as one "between the politics of idealism and the politics of social change." Strickland insisted that the intellectual's role was to provide analysis, and characterized Harding's position as one who viewed "the artist/intellectual as being important in its own right." Furthermore, Strickland distrusted Pan-Africanism because of its manipulation by the "black petty bourgeoisie," but he was not opposed to Pan-African links.[60]

Harding added, in a separate response, that the two views were "complementary and non-antagonistic in their differences." He admitted struggling

with how to reach the Black masses, believing that in order to reach this potential revolutionary group, IBW must go through other institutions such as schools and churches. Harding concluded that the type of education needed "must include a sense of one's history and identity, a clarification of the nature of the earlier oppressions and struggles against them and the successes and failures of the past. It must include an accurate analysis of the structures and mechanism of oppression, past and present and contemplated; it must include many-sided analysis of the present situation and what is necessary for successful organization and struggle."[61] Harding and Strickland point to the reconciliation of the perceived opposition between Pan-Africanism or Romantic Black Nationalism and Marxism, one that formed an essential component of the Black Radical Tradition.

The staff's view that Marxism and Nationalism were antagonistic represented an a-historical understanding of the ideologies. Marxism and Nationalism were both reactions to the Liberal-Positivist framework ushered in by the Enlightenment. Liberalism sought to displace the supremacy of Christian thought by providing alternative rationalizations for society. The Enlightenment established reason as the source of authority displacing the divine, such that humans (mankind) and not God or nature was dominant. Man demonstrated his dominance through progress, in

---

[61] Memo From Vincent Harding, "Response to: 'Reorganization Begun, But Incomplete,'" IBW Papers, 3, 11.

which he conquers nature using the scientific method.[62] Nationalism countered the scientific principles and "discovered the truth not in the observation or consciousness of objects but in the self-consciousness or introspection of the subject not in the motions of the stars but in the motions of the human heart."[63] It opposed reason with feeling and individuality with community developed from customs and traditions. Moreover, the lack of normative values found in positivist history, which searched for absolute knowledge through the process of greater perfection, led to Marx's historical reinterpretation of dialectical materialism, which saw change occurring only through the struggle of opposites in the economic realm. Although Nationalism and Marxism challenged the framework set forth by Liberal-Positivism, both reconstituted the framework with their reliance on a similar premise – the human as a natural organism.[64]

While both Nationalism and Marxism grew from the ground cultivated by Liberal Positivism, IBW's call for a Black perspective was an attempt to find a more foundational theoretical framework. A Black perspective placed race as the organizing principle, rather than mode of production (Marxism) or the imagined community of ethnicity (Nationalism). Race supplied the ontological and epistemological locus for society. Race, not in the genetic sense, but in the sense of

being and non-being, was implied in IBW's Black perspective, one that connected them to the Black Radical Tradition. IBW sought to fashion an intellectual perspective that bridged these two perspectives and provide a "new synthesis," which could analysis the systemic exclusion of Blacks.[65]

The question of - what do representations do and how do representations function in the cultural system - were central to IBW's understanding and aspirations in developing a Black perspective. IBW struggled in fully articulating this new synthesis or Black viewpoint and the staff's belief in a split reflected the limitations of each stance to explicate independently Black exclusion in the 1970s. Because Liberalism racialized and proletariatized Blacks, the masses became the "truth," revealing Black exclusion on the bases of race and class. This "created" authenticity of the Black masses often flattened the class conflicts within the Black community. While this position provided an excellent critique of the American social system, from the systemically dispossessed, it also reinscribed the very framework it was opposing. In creating this oppositional force, Black Powe[DEW7]r intellectuals created a biologized, working-class family as nation. Scholar Wahneema Lubiano points to this contradiction as "an example of the limitation of a political imagery that tries to do the work of 'creating' the potential black revolutionary subject, but which cannot account for any possible middle-class black agency – including its own." The inability to assess the middle-class agency,

[65] "Summary of the Minutes, IBW Reorganization Meeting, Friday, 19 November 1971," IBW Papers, Box (Reorganization Aug. 1969 - Nov. 1971), Folder (Nov. 1971 1 of 2).

especially as revolutionary intellectuals contributed to the struggles the Institute had in developing a Black perspective.[66] The reorganization meetings, Summer Research Symposium, and staff conflict pointed to the need for a new synthesis, beyond Liberalism, Black Nationalism and Marxism, an analytic frame that IBW attempted to articulate. Despite the confusion, the Institute of the Black World viewed a Black Agenda as the clearest expression of a potential new synthesis. During reorganization, the Institute concluded, "the Black agenda will become the highest organization expression of the basic program of the Institute…." The agenda will "identify and define the most crucial issues, problems and areas of need now facing the national black community, to properly explain the historical and political sources of the present oppressive situation, to identify the real nature of the colonial predicament, and to propose and advocate approaches to fundamental change to as large and influential a black constituency as possible."[67] The desire for a Black perspective drove the Institute's development of a Black Agenda, one that merged with the plans at 1972 National Black Political Convention in Gary, Indiana.

Globalization can be defined as an increase in world-wide interconnectedness. It is a process, the power and momentum of which are derived from growth in market and capitalism and technological advances in communication. Most of the debate about globalization concerns economic dimension of this complex process, but it is clear that the phenomenon also has socio-political, cultural and ecological dimensions.The rapid growth in world trade, foreign direct investment, and cross-border financial flows over the last two or so decades have been the main manifestations of the increasing globalization of the world's economy.

There is little doubt that globalization has produced significant gains at the global level. In many quarters, however,unqualified optimism about the benefits of globalization is giving way to a more moderate view which acknowledges that these gains have been concerntrated in a few countries, while a large part of the world is left with only the costs.

The purpose of this paper is to examine the likely implications of the emerging world order on African economies and societies. It is argued that the massive shift in the global balance of power that has followed the collapse of communism has had profound implications for global stability, as well as the prosperity and development of Africa. It will further be argued that, given Africa's exceptionally fragile political and social structures as well as vulnerable economies, only a few countries like South Africa and Mauritius are likely to register some success.

Best wishes.
Dirk Kotze

AAPS CONGRESS 2005

ABSTRACT

Topic:
The 'local state' in African societies and its relevance for constitutional conflict resolution and the ethics of development

Dr Dirk Kotzé
Department of Political Sciences, University of South Africa, Pretoria

States in Africa are often described as 'failed states' or 'weak states'. However, in most instances the populace continue to live a more or less socially organised life, though not necessarily regulated life. It suggests that the national state might be weak or only visible in the capital city, but at lower levels of society the functions associated with organised public life do exist. Notions of the state as a national state and defined in terms of state-society relations are the most dominant state paradigm, but cannot accommodate this notion of organised society without formal state structures. Globalisation also suggests a decline in national state sovereignty and the emergence of trans- or supranational and regional 'state' entities. However, many societies in Africa appear to be structured in exactly the opposite framework, namely in subnational or 'local' states, in the absence of a strong national state. This has various implications for peace processes in the DRC, Burundi, Côte d'Ivoire, etc. and the dominant institutional paradigm of conflict resolution, which is premised on institutional/constitutional engineering or 'rehabilitation' of the national state. It leads to the another component of the proposed paper, namely to look briefly at the ethics of development, and specifically political development and the ethical challenges globalisation poses for it.

Implementing Good Governance in Central Africa Through Science and Technology

By

Ms. Yazini April, Africa Institute of South Africa
Yazinia@ai.org.za
Dr. Byron Price, The State University of Rutgers
byprice@andromeda.rutgers.edu

ABSTRACT

Since the 1980's, the challenge of good governance application in Africa has dominated international discussions. This debate is currently influenced by the emergence of digital democracy, which has all the attributes of forming relationships that characterize good governance. However, most African countries have not developed the necessary technological knowledge to implement good governance, and effectively engage with the industrialized community. Instead, due to the rapid growth of technology, Africa is grappling to become technologically literate under a short period. In an effort to prevent Africa from becoming marginalized socially and economically, the Africa Institute of South Africa, (AISA) and the e-Governance Institute at The State University of Rutgers have embarked on an e-governance research project that will facilitate the application of science and technology for economic growth, poverty reduction, and good governance in Central Africa.

In an attempt to address the question raised by the *African Association of Political Science Call for Papers* as to whether development efforts in Africa are sustainable, this paper will outline the research methodology of good governance application that will be implemented in Cameroon, Gabon, and the Democratic Republic of Congo. The paper will also examine the sustainability of African development by utilizing electronic governance, and research in social sciences as a mechanism to bridge the technological divide between Africa and the rest of the international community.

A paper Abstract submitted to the 15th Biennial AAPS Congress on the Theme: "Globalization, Development Governance" June 27-29 2005, Cairo, Egypt.

The paper discusses globalization as a new phase and contemporary process of imperialism. The ideological foundation of the dominant globalization is neo-liberalism in its emphasis on economic and political liberalism and its consequential rejection of social democracy and Keynesian state intervention.
The Developed countries dominate all the structures of the Global Political Economy namely, security, production, trade, finance and knowledge.

The paper points out that the World Trade Organization is one of the organizations where neo-liberalism is at its best in allowing the developed countries to safeguard their interest of dominating the trade structure in GPE. Under International Agreement on Trade related Aspects of Intellectual Property Rights (TRIPS), patents are granted for products and processes with protection set at 20 years from the date of application. All WTO members are expected to introduce a new and standardized levels of protection. The 30 least developed countries majority of which are in Africa have until 2016 to pass legislation requiring Patent protection for Pharmaceutical and agricultural chemicals.

The paper argues that the monopoly granted to patents allows the patent holder to charge high prices depriving the poor of an essential product or technology This is more so in the era of HIV/AIDS where the poor in Africa need more medicines to neutralize the deadly diseases.

The paper recommends networking of civil society organizations in order to put pressure on states of developing countries particularly Africa to unite and speak with one voice at the global level. Where possible developing countries should, make alliances with countries of the North (e.g. Scandinavian countries) that promote a social market. This will help to challenge neo-liberal globalization in favor of what I may term as social globalization. Social globalization is an inclusive process in which the gains made through global economic, social, political interactions are shared by the global citizenry, particularly the vulnerable, marginalized and the poor.

Globalization pressures precipitated an energetic series of South African-Nigerian initiatives, which pushed the Pan-African project of African unity to critical mass and take-off.

The re-invention of the OAU as the AU includes its democratisation through the Pan-African Parliament, African Court of Human Rights and People's Rights, and ECOSOCC. This occurs in an innovative broader matrix of drawing in civil society, ranging from diaspora NGOs to the hundreds of corporations of the NEPAD Business Groups. These had no equivalents in the old OAU.

One intellectual consequence of this is to challenge the Western conceptual partition of Africa into "sub-Saharan Africa" versus "the Middle & Near East". A thickening mesh of continental institutions and continental programmes render this concept an eroding anachronism with lessening heuristic value. Similarly, the DRC, conventionally regarded as part of the central African region and its institutions, is effectively shifting into the SADC ambit.

The AU has also revived the Abuja-born AEC treaty, to which the NEPAD programme gives impetus. The AEC had no secretariat after 1991, until it became a responsibility of the AU Commission in 2002, as well its cognate NEPAD secretariat.

The qualitative jump between the old OAU and the new AU and its associated projects is best problematised not through not discourse analysis, but focus on the operationalization and the allocation of resources. The creative off-book financing of the PAP costs by the host country, plus the PSC's success in attracting far more EU and other donor funding for peace-keeping than its OAU and ECOWAS precedents, is mitigating the failure of many AU member governments to pay their annual fees. Huge challenges ahead include that the AU so far still remains an elite project.

THE STATE IN AFRICA-RECONCILING ECONOMIC MANAGEMENT WITH DEMANDS FOR DEMOCRACY

Abstract for the African Association of Political Science 15th Biennial Congress, June 27-29 2005, Cairo, Egypt

by ANNIE BARBARA CHIKWANHA,
Researcher, Afrobarometer Network
Institute for Democracy in South Africa
6 Spin St, Church Square,
Cape Town 8001, South Africa
Tel: 27 021 467 505 fax: 27 021 465 7541

The nineties ended on a rather sad note as most Africans expressed dissatisfaction with the economic reforms that have informed much of the neo-liberal discourse in the last two decades. The high levels of dissatisfaction contribute to the dominance of economic criteria in evaluating regime performance in Africa and yet political factors are just as important in mapping out the future trajectory. Contradictions surrounding globalisation are sometimes highlighted by the preference for continued state protection that the poor in largely agrarian economies have become acclimatised to. Using the Afrobarometer[1] public opinion data, this paper presents the ordinary Africans' perspectives of state capacity in economic management. It also presents data on the extent to which Africans demand democracy. This is evidenced by their rejection of all forms of authoritarian rule yet the supply of democracy they get is appalling. The challenge then becomes that of reconciling management of their fragile economies with the citizens' expectations for democratic governance. Citizens' attitudes and opinions towards their political systems reveal much about the status and direction of democracy in their countries and as the ultimate consumers of what democratic governments can supply, they offer the most conclusive assessments of the quality of economic and democratic governance. The paper starts with an assessment of economic performance at both the individual and national levels as well as popular assessments of the impact of economic reforms ushered in by the structural adjustment programmes. This is followed by a section on assessments of state capacity with regard to policy implementation in selected sectors. Citizens' views of authority and legitimacy of the system as well as popular assessments of the quality of democratic governance conclude the public opinion data. Lastly, a discussion on reconciling economic management and democratic governance within the current global vibe concludes the paper.

[1] The Afrobarometer is a systematic survey of ordinary Africans' views and attitudes towards democracy, economics and civil society. The surveys are conducted in countries that have introduced some degree of democratic and economic reform. The surveys on which this paper is based on were conducted in 1999-2001 and 2002-2003 in the following 15 countries: Botswana, Carbo Verde, Ghana, Kenya, Lesotho, Namibia ,Nigeria, Malawi, Mali, Mozambique, Senegal, Tanzania, Uganda, Zambia and Zimbabwe.

Dear Dr Julius E Nyang'oro,

My mane is Dr Mostafa Kharoufi, Sociologist an Geographer. As a researcher, I spent amost ten years doing research and coordinating programs in some arab countries like Egypt, Sudan, Tunisia, Algeria and Morocco. I published some articles and a book on the issue of governance....

Othman Benjelloun who was in South Africa talked to me about the 15the Biennial Congress Organized by The African Association of Political Science which will be held in Cairo on 27-29 of june 2005, on the Theme of Globalisation, Sustainable Development and Governance in Africa. As I am really interested, I am sending a summury of my paper in order to participate to this important Conference..

I am looking forward to hear from you and I thank you very much.

Sincerely

Mostafa Kharoufi

(See attached file: Abstract Gouv Khraoufi.doc)

Gouvernance et participation au Maroc : un édifice qui reste à consolider

Mostafa Kharoufi, Sociologue et géographe, Rabat

Le Maroc entreprend depuis le début des années 1990 un ensemble de réformes politiques et institutionnelles. Ce pays connaît une évolution qui place le thème de la gouvernance et de la participation de la population au cœur du débat sur la démocratie et le développement de ce pays. En effet, recherchant outils et actions de gouvernance participative innovants, le Maroc tente de relever les défis auxquels il est aujourd'hui confronté et de répondre aux nouvelles perspectives de développement économique, social et culturel.

Il faut dire que les méthodes traditionnelles de gestion y ont montré leur limites ; d'autant que la crise du modèle de développement emprunté depuis quatre décennies et les mouvements sociaux qui se sont exprimés (parfois violemment) dans les villes au cours des années 1980 et 1990 ont non seulement remis en cause l'ordre post-colonial, mais également la capacité du pouvoir politique à résoudre les problèmes du chômage et à répondre aux aspirations des jeunes générations. Ceci a suscité l'apparition de revendications politiques et syndicales axées sur le thème de la justice sociale, des droits de l'homme et de la femme et de la critique des valeurs occidentales (avec notamment l'émergence de deux phénomènes antithétiques : les associations féministes et les mouvements islamistes). Ces deux mouvements canalisent, à des degrés inégaux, les aspirations des nouvelles générations nées après l'indépendance...

Sur la base de la thématique de la gouvernance, cette communication propose de revisiter l'histoire et le présent, replaçant l'évolution des réformes tentées au Maroc dans les moments cruciaux qu'a connus le pays, leurs limites et leurs insuffisances. Les 50 années qui séparent le Maroc de son indépendance sont riches d'enseignement et demeurent source de déception. Au début des années 1960, après deux décennies d'évolution lente mais moins problématique, le pays a connu des avancées, même si les progrès accomplis sont parfois partiels, mais fut également ébranlé par une série de ruptures.

Le propos vise à esquisser un état des lieux du Maroc, en se plaçant sur des terrains particulièrement cruciaux comme celui de l'évolution constitutionnelle, des libertés publiques, de la question du genre, de l'administration, dans une perspective historique comme à travers les enjeux du présent et de l'avenir. Les interrogations sur les liens existants entre le développement durable et la gouvernance recueilleront également une attention particulière.

Globalization of Skin-whitening and its Effects African Women.

Amina Mire (PhD candidate)
The Institute for Women's Studies and Gender Studies of the University of Toronto

Abstract

Skin-whitening is an emerging globalized economic and cultural enterprise. The practice of skin whitening per se is not knew; what marks the emerging practice of skin-whitening different from earlier regimes of skin-whitening practices, is its systematic conflation of the aesthetics of white supremacy to the biomedical concept of 'health promotion.' This is because while many of the older forms of skin-whitening products and related technologies were based on, often illegal trafficking of cheap but toxic chemical agents, which came to public attention, particularly in African, by news paper articles bearing the disfigured faces of African women caused by skin-whitening creams and soaps, the emerging skin-whitening biotechnology is positioned to eliminate 'health risks' as well as to 'purify,' 'cleanse' or otherwise transform the faces and bodies of all women to 'radiant' whiteness. In this way, the emerging discourse of skin-whitening biotechnology and its concomitant aesthetics of white supremacy have been materially and technologically transformed to a new globalized capitalist commodity of skin-whitening. Some of the leading western based cosmetics, pharmaceutical and biotechnology firms are currently engaged in the research and the mass production of new regimes of skin-whitening products and related technologies. However, I will demonstrate in this paper that the emerging discourse of skin-whitening systematically recuperates, albeit in different material and historical contexts, older western colonial concerns with 'racial degeneracy' and the "polluting" effects of blackness. Using visual and text based advertising for popular skin-whitening creams such as Venus de Milo 'Complexion Cream,' which target African women, I will critically examine the complex and contradictory ways in which the new aesthetics of skin-whitening is resisted, and in some cases, taken up by African women.

La gouvernance démocratique ne saurait être, ni un préalable, ni une conséquence absolue du développement, elle en constitue à la fois une fin et un moyen. Une fin parce que davantage de développement induit nécessairement plus de possibilités pour l'exercice des libertés socio-politiques, un moyen car une gouvernance démocratique bien pensée permet une contribution de tous à l'effort de développement socio-économique. Elle ne saurait pas être réduite à un modèle unique. En effet, en dépit des fondements universels des principes de droits et de libertés humaines, une bonne gouvernance ne pourrait partir que du contexte local dans lequel elle s'exprime pour s'enraciner au service du développement. Dès lors, l'évaluation de son niveau de réalisation dans toute société devrait s'appuyer à la fois sur les préoccupations à caractère global et un questionnement des particularités locales. En faire une conditionnalité à l'aide au développement des pays africains moins avancés, autant que la renier à leurs peuples en en faisant une conséquence absolue, constituent deux des aberrations qui nuisent au développement humain durable.

La véritable problématique à laquelle notre communication tentera de répondre, serait donc de savoir si la gouvernance démocratique est un préalable au développement. Autrement dit, est-il pertinent de la conditionner à l'aide au développement des pays africains ? N'est-il pas absurde de la rejeter en la réduisant à un luxe inaccessible aux plus pauvres ? Et s'il y'a une définition universellement admise de la démocratie, saurait-elle pour autant être réduite à un modèle unique, dominant soit-il ?

Paper: *Unbalanced institutional developments? Regionalism and Governance reform in Sub-Saharan Africa*

This paper focuses on identifying and understanding regularities in institutional reform in developing countries, looking in particular at the case of Sub-Saharan Africa.
In search of systematic patterns in the way institutions evolve, the paper builds and tests a model of unbalanced institutional development in the context of globalization and increasing regional integration. In most African economies, reform has progressed more "successfully" in areas of macroeconomic management and trade-related institutions. These reforms have been boosted by the needs of resource-based export sectors, globalization and regional economic integration. Furthermore, most of these reforms are triggered and maintained within the realm of high politics. On the other hand, reform in judicial institutions, the distribution of land, territorial administration and other social institutions face far more resistance to change. These forms of institutional persistence are present due to high complementarity with informal social norms and the requirement of widespread support through mass politics. Reminiscent of the discipline's theoretical models of "balanced" economic development, this paper questions the need for a parallel process of balanced institutional growth. Are these dual institutional economies sustainable? Is the type of institutional isomorphism we find in macroeconomic and trade-related institutions eminently exogenous? Does it necessarily trickle over endogenously to other more resilient institutions? Or can the latter be changed through exogenous forces of reform such as regional governance networks of the type emerging in Southern Africa? Finally, insights into processes of institutional change complement the cross-country analysis through the recent examples of Botswana, Mozambique and South Africa.

Globalization and New Forms of Violence in Africa

By

Victor A.O. Adetula, PhD

Department of Political Science

University of Jos,

PMB 2084, Jos,

NIGERIA.

ABSTRACT

Africa is experiencing new forms of violence whose causes have become increasingly differentiated and complex with the dawn of globalization. Changes in the general conditions for political and economic development in Africa owning to the dynamics of globalization have intensified new forms of violence on the continent. Ethnic and religious conflicts now occur as part of transnational relations in post-colonial Africa. And women trafficking, child slavery, cross-border robbery and other cross-border crimes are in the increase all over Africa in addition to mineral resources-driven conflicts. There is indeed the sense in which it can be said that the relationship between globalization and new forms of violent in Africa demonstrate the reactions and responses of the World's poor to the realities of the expanded capitalist mode of production. How much of the changes in the patterns and trends in violence are necessarily the consequence of increased globalization of production processes? It is therefore necessary to investigate globalization-induced violent conflicts in Africa. We argue that the upsurge in "transnational communities" and the significant engagement of new social movements with networking across national frontiers in Africa are dominant expressions of profound social transformations associated with globalization. Three underlying assumptions are central to our conceptualization on the relationship between globalization and new forms of violence in Africa. First is that violence conflicts in Africa are now being influenced by key elements of globalization which include global expansion of production, trade and finance and also the less-acknowledged but effectual forms of globalization such as global expansion of ideas, culture and norms. Secondly, that most of the globalization-induced violence in Africa are beyond the regulatory and control frameworks of the territorial state. Thirdly, that the growth of transnational social networks in Africa has contributed to transnational violence in Africa.

POLITICAL PATHOLOGY AND CRIMINALIZATION OF THE ELECTORAL PROCESS IN NIGERIA: IMPLICATIONS FOR GOVERNANCE AND GLOBALIZATION

ABSTRACT

Many critics of globalization as it affects the developing countries have persistently argued that their weak economy and corrupt and inept leadership would at best make them participate in globalization in a subjugated position. This suggests that the extent to which any country would maximize her benefits of globalization depends largely on the extent to which its domestic economy and governance are prospering.

Nigeria is the most populous country in Africa. It is also endowed with enormous economic resources. A combination of the two factors presents the country as 'the giant of Africa'. Unfortunately the continued underdevelopment of the Nigerian state, weakened further by its criminalization, has turned those two factors against the people, thereby engendering a country fraught with kleptocracy, mismanagement and impoverishment of the masses.
Considering the fact that no country can achieve sustainable development without proper management of its human and material resources in an ordered civil society rooted in democracy, this paper is intended to examine the process of recruitment of governmental leaders in Nigeria. In that context, it is expected to examine critically the role of political pathology in criminalizing the Nigerian electoral process.

By providing an indepth insight into the persistent failure of several efforts at democratization in Nigeria, and the consequent militarization of the political system, the paper will provide some answers to the question of the weak and subjugated position of 'the giant of Africa' in the process of globalization.

In view of the fact that many African countries have similar socio-economic and political antecedents, the work will contribute towards the quest for sustainable democratization and development in Nigeria and several other African countries in the context of globalization.

Dear Sir,

I would be very grateful if you could kindly consider this abstract for the AAPS Conference. I am sending it today as I only received information on the conference a few hours ago. I presented the paper at the conference, Africa Without Borders at the University of Winsconsin-Madison in October, 2005. Your conference would be a wonderful opportunity to improve the paper for publication.

Explaining Regional Integration in Africa: Constructivist Dreams Versus Institutionalist Realities. Ridwan Abimbola Agboluaje, Centre of International Studies, University of Cambridge.

From what sources have impulses of integration in Africa sprung and what can these origins tell us about the realisation of their goals? This paper proposes to use theories and concepts on the state and regional integration to examine the limited success of post-colonial integration projects in Africa and evaluate recent developments and strategies of integration. Realist-institutional theories of the state tell us that a state 'becomes' when an entity exists that is willing and able authoritatively to define a community against a 'non-self' or "enemy" for the whole community emerges (F. Meinecke: 1994, M. Berezin: 1997). This conceptualisation of the state may apply to African integration projects which were in many ways inspired by a desire to protect peoples with a common experience of external subjugation from the reoccurrence of such. Besides, integration projects are argued to be also forms of state-building (P.Huxtable: 1996). But some perspectives on regional integration suggest they are internal projects resulting from capable states agreeing to pool their sovereignty to enhance the advancement of material national goals (A. Milward: 1993, S.Krasner: 1993, P.Anderson, 1996). This leads us to recall the instuitionalist idea of the state as a result of the ordering of self-interested interactions by individuals and groups (D.Easton: 1965). Constructivists tell us that a state exists 'when the action of various individuals is oriented to the belief that it exists or it should exist'(C.Cutler: 2001). The common historical experience of Africans and the realities of independence have bequeathed structures of sovereign states to them and inspired them to construct supranational political structures; encompassing an overlap of institutionalist and constructivist impulses. According to Collier, the

post-colonial experience demonstrates that Africa can develop only when African states subject their decision-making to supranational institutions with clear rules of membership and high benefits of participation rather than donor conditionality (Collier: 1992). Collier's institutionalism appears to reverse the state formation sequences advanced above and seems to have anticipated the New Partnership for African Development. These perspectives demonstrate that there are bi-directional tensions between Africans states as they are and their evolution into higher forms of statehood which integration may represent. They also alert us to the contradictory interactions between ideas, history and material structures in making states "become". The application of these perspectives to the African experience may beneficially inform current integration projects as the analysis of Africa's unique experience may also contribute to the theories.

Dear Professor Nyang'oro:

I am responding to the Call for Papers that was published in the AAPS Newsletter May-August 2004. Please accept to review the proposal that is attached for the 15th Biennial Congress of the African Association of Political Science to be held in Cairo, Egypt, from June 27-29, 2005.

Sincerely,

Jean-Germain Gros

Chinese Economic Success and Lessons for Africa: Possibilities and Limits

Abstract: When economic historians write the history of the last decades of the 20th century, they will have good cause for casting China as the success story of that *fin de siècle*. From 1979 to 1997 China's annual GDP grew by an average of 10 percent, an accomplishment matched (and surpassed) only by the former Soviet Union in the 1920s and 1930s. Chinese industrial production in the late 1990s was seven times larger than in 1978, and total trade fourteen times larger over the same period. But there is more: Economic growth in China has resulted in improved standards of living for some Chinese people; real income per capita more than quadrupled between 1979 and 1997, thereby lifting more than 200 million out of absolute poverty. Historians are less likely to be excited about Africa's economic performance in the closing years of the 20th century, and indeed since decolonization in the 1960s. For Africa, by every imaginable index of socio-economic development, from economic growth to life expectancy, has been moving backward rather than forward. The statistics are telling, if not to say depressing: Sub-Saharan Africa accounts for just 1 percent of world industrial production, down from 4 percent in the 1960s. The sub-region experienced virtually no economic growth in the last two decades of the 20th century, in spite of Structural Adjustments Programs (SAPs), which were supposed to set Africa on a path of sustainable development. It continues to be ravaged by HIV/AIDS, which has drastically reduced life expectancy in some countries (e.g., Botswana, where adult life expectancy is now under 40 years). Naturally, the polarity in economic and social achievement between China and Africa will elicit scrutiny, as well it should. This paper examines Chinese economic policy since the liberalization in 1979 undertaken by Deng Xiaoping, with the ultimate aim of highlighting the promises and limits of the Chinese model to Africa. Simply put, the paper asks, what is the key to Chinese economic success and can Africa borrow it to unlock its own development?

Hi Perry:
I am authorizing the use of the research fund for your travel to the conference at Purdue University. Please use the usual procedure for travel by submitting the receipts to Travis within one week of your travel. South Building is very strict in enforcing that rule. Travel well.
Best,
Julius

AFRO-AMERICAN STUDIES 102: THE BLACK EXPERIENCE (II)
SUMMER TERM 2007

Dr. Perry A. Hall, Instructor **Office Hours by appointment**
Office: 202 Battle Hall
966-5496 **Email : hallpa@email.unc.edu**

COURSE OBJECTIVES:

To survey materials reflecting the social, cultural, and political breadth of the African-American experience, emphasizing historical periods after the Civil War.
To present a variety of perspectives from past and contemporary thinkers that illustrate patterns of consistency and variation regarding African-American cultural, social and political life.
To document and analyze the struggles of black communities for self-determination, social justice, and cultural authenticity.

COURSE REQUIREMENTS:

1. 2 On-Line Quizzes	**(MAY 25-29 & JUNE 8-11)**	**25% of Final Grade**
2. In-Class Midterm Exam	**(JUNE 4)**	**30% of Final Grade**
3. In-Class Final Exam	**(JUNE 19 8-11 a.m.)**	**30% of Final Grade**
4. Attendance		**10% of Final Grade**
5. Participation		**5% of Final Grade**

(See website for details of attendance policy)

REQUIRED TEXTS:

Hine, Darlene Clark, William C. Hine, & Stanley Harrold. **The American Odyssey: Volume Two.** Upper Saddle River, New Jersey: Prentice-Hall, 3rd Edition, 2005

Sidran, Ben. **Black Talk.** New York: Da Capo Press, 1971.

RESERVE READINGS: The articles or chapters listed as (RESERVE) on the reading schedule are available through the Reserve Desk of the Undergraduate Library. They contain an important set of readings from the following sources:

2 chaps. from: Du Bois, W.E.B. **The World and Africa: An Inquiry Into the Part Which Africa Has Played In World History.** New York: International Publishers, 1965.

2 chaps. from: Wilson, William Julius. **The Declining Significance of Race.** Second Edition. Chicago: University of Chicago Press, 1980.

3 chaps. from: Giddings, Paula. **When and Where I enter: The Impact of Black Women on Race and Sex in America.** Bantam Books, 1984.

Article: Rollins, Judith. **"A Part of a Whole: The Interdependence of the Civil Rights Movement with Other Social Movements."** Phylon, 47, No. 1,1986.

2 essays from Crawford, Vicki L., Jacqueline Anne Rouse, and Barbara Woods. **Women in the Civil Rights Movement : Trailblazers and Torchbearers, 1941-1965**. Brooklyn, N.Y. : Carlson Pub., 1990.

INTERNET ARTICLES: These articles will be available through links on the course Web page

"Systematic and Thematic Principles," chap 5 in Hall, Perry A. **In the Vineyard: Working in African American Studies.** University of Tennessee Press, 1999.

READING ASSIGNMENTS

First Week

MAY 15: Introduction
MAY 16: INTERNET: **"Systematic And Thematic Principles."** Excerpt from Chap 5 in Hall, Perry A. **In the Vineyard: Working in African American Studies.** University of Tennessee Press, 1999.
MAY 17: RESERVE: **"The Collapse of Europe,"** (W.E.B. Du Bois, The World And Africa).
MAY 18: RESERVE: **"The White Masters Of The World."**(W.E.B. Du Bois, The World And Africa).

Second Week

MAY 21: RESERVE: **Slavery and Plantation Hegemony** (Wilson, William Julius The Declining Significance of Race, Chap. 2 and excerpt from Chap. 3), pp. 24-41; RESERVE: **"Segregation and the Rise of the White Working Class,"** (William Julius Wilson, The Declining Significance of Race, Chap. 3 **EXCERPT**, pp. 42-52**);** HINE: Chap. 11, **"African Americans and the Civil War" (excerpt)** pp. 260-268.
MAY 22: HINE: Chap. 12, **"The Meaning of Freedom: The Promise of Reconstruction, 1865-1868,"** pp. 290-311; HINE: Chap. 13,"**The Meaning of Freedom: The Failure of Reconstruction**, p. 314-333.
MAY 23: HINE Chap. 14, **" White Supremacy Triumphant: African Americans in the South in the Late Nineteenth Century**, p. 340-363. RESERVE: **"Segregation and the Rise of the White Working Class,"** (William Julius Wilson, The Declining Significance of Race, Chap. 3 **EXCERPT**), pp. 52-61**;**
MAY 24: HINE, Chap. 15, **" Black Southerners Challenge White Supremacy,** p. 366-393; RESERVE: **"To Sell My Life as Dearly as Possible: Ida B. Wells and the First Antilynching Campaign."** (in Giddings, pp. 17-31).
MAY 25: RESERVE: **"Defending Our Name."** (in Giddings, pp. 85-94); RESERVE: **"To Be a Woman, Sublime: The Ideas of the National Black Women's Club Movement (to 1917)." (**in Giddings, pp. 95-117).

ONLINE QUIZ 1 (MAY 25- 29)

THIRD WEEK

MAY 29: SIDRAN: Chap. 1: **Oral Culture and Musical Tradition: Prehistory and Early History (Theory)**," pp. 1-29; SIDRAN: Chap. 2: **"The Black Musician in Two Americas: Early History-1917,"** pp. 30-52.
MAY 30: HINE: Chap. 16, **" Conciliation, Agitation, and Migration: African Americans in the Early Twentieth Century,** pp. 396-429.
MAY 31: HINE: Chap. 17, **" African Americans and the 1920s,** p. 432-455; SIDRAN: Chap. 3: **"The Jazz Age: The 1920s,"** pp. 53-77.
JUNE 1: HINE: Chap. 18, **" The Great Depression and the New Deal,** p. 462-487.

JUNE 4: MID-TERM EXAM

FOURTH WEEK

JUNE 5: HINE: Chap. 19, **" Black Culture and Society in the 1930s and 1940s,** pp. 490-515; SIDRAN: Chap. 4: **"The Evolution of the Black Underground,"** pp. 78-115.
JUNE 6: HINE: Chap. 20, **" World War II Era and Seeds of a Revolution, p.** 518-541; RESERVE: **"Part of a Whole: The Interdependence of the Civil Rights Movement and Other Social Movements."**
JUNE 7: HINE: Chap. 21, **"The Freedom Movement, 1954-1965,** pp. 548-579.
JUNE 8: RESERVE. **"Ella Baker and the Origins of Participatory Democracy."** (from Women In The Civil Rights Movement) pp. 51-69; **"The Role of Black Women in the Civil Rights Movement,"** Anne Standley (in Women In The Civil Rights Movement,) pp. 183-202.

ONLINE QUIZ 2 JUNE 9-12)

FIFTH WEEK

JUNE 11: HINE: Chap. 22, **"The Struggle Continues, 1965-1980,** pp. 582-613.
JUNE 12: HINE: Chap. 23, **"Modern Black America: 1980 to Present,** pp. 576-603.
JUNE 13: HINE: Chap. 23, **"Black Politics, White Backlash: 1980 to Present,"** pp. 616-641.
JUNE 14: HINE: Chap. 24, **"African Americans at the Dawn of a New Millennium,"** pp. 644-667.
JUNE 15: Course Review

FINAL EXAM: MONDAY, JUNE 19: 8-11 A.M

Subject:	FORMAL NOTICE: State Health Plan Changes and Special Enrollment Period

---

TO: All Employees

FROM: Brian Usischon, Director, Benefit Program Administration

The new state budget recently signed by the Governor includes several State Health Plan benefit changes, as well as rate increases for the 2007-2008 and 2008-2009 benefit years. Due to these changes, the State Health Plan is allowing employees to enroll in a plan or switch to a different plan option. This special enrollment period begins immediately and continues through Sept. 14, 2007.

Benefit and rate changes, and their effective dates, for both the Indemnity and PPO plans are located here: http://www.shpnc.org/RateBenChange_2007.html. *Please review this information carefully to ensure you are aware of any changes that may impact your coverage.* The Indemnity plan premiums will increase by 11.4 percent on all coverage tiers, and rates are guaranteed through June 30, 2008. The PPO plan premiums will increase by 11.2 percent on all tiers, and these rates are guaranteed for two years. Please keep in mind that the benefit deductions for October are typically withheld from September paychecks. Therefore, please return forms as quickly as possible to prevent retroactive adjustments to your paycheck.

*** How to Make Plan Changes

All current State Health Plan members will be mailed an enrollment kit at their home address beginning Aug. 6. This package will include:
-- Information on the rate and benefit changes
-- New rate sheet
-- Special fall enrollment form with instructions for completion and return

A copy of the kit is available on the State Health Plan Web site at http://www.shpnc.org/sp_fall_enrollment.html. If you do not receive an enrollment kit at your home, please print a copy from the Web site if you would like to make changes.

If you do not want to make any changes to your current State Health Plan election, you DO NOT have to complete a new enrollment form. If you do not submit a completed form, you will automatically remain on your current plan.

If you wish to make a plan change, please complete the October 2007 State Health Plan enrollment form. To continue your dependents' coverage you must list each dependent on the enrollment form. All forms must be complete and submitted to the Benefit Program Administration Office no later than Sept. 14.

Return completed forms as follows:
-- Fax forms to 962-6010
-- Send forms through campus mail to Benefit Program Administration, CB# 1045
-- Drop your forms in the green "Benefits Programs" drop box at the front entrance of the Administrative Office Building at 104 Airport Road

*** Campus Information Sessions

The Benefit Program Administration Office will hold three information sessions to review the State Health Plan changes and to answer any questions. Dates and locations will be announced in the near future.

*** PPO Network Update

Please review this link (http://www.shpnc.org/news-20070802.html) for important information concerning the Moses Cone Health System located in Greensboro, NC.

*** Indemnity Plan

Because of provisions that were made during the 2007 legislative session, the Indemnity plan will no longer be available after June 30, 2008. Employees who choose to remain on the Indemnity plan at this time will have an opportunity during the spring 2008 Annual Enrollment to select one of three improved PPO plans that best meets their health care needs.

*** Have Any Questions?

If you have any questions about the State Health Plan changes, please refer to the following contacts:
-- State Health Plan Web site at www.shpnc.org
-- Customer Services for Indemnity plan questions at 800-422-4658
-- Customer Services for PPO plan questions at 888-234-2416
-- Medco Customer Services for pharmacy questions at 800-336-5933

If you have any questions about this enrollment, contact your HR Facilitator, or your HR Generalist at 843-2300.

---

Travis and Debby,
Here are updated versions of the syllabi that I sent on Friday. I made a few minor changes to them. Please make copies of these instead, if you haven't already made copies.

Here's what I said about copis in my earlier message -- "Please make 45 copies for AFAM 266 and 55 copies for AFAM 254. Double-sided copies are fine.
I can also post the syllabi on Blackboard, but it's hard to know how many hard copies should be made in that case. Let me know what you would prefer."

Thanks,
Kia

AFAM 254: Blacks in Latin America
Fall 2007
Tuesday, Thursday 9:30 - 10:45 am
New West 219

Dr. Kia Caldwell
Office: Battle Hall 208
Office Hours: Thursdays 11-12 (or by appointment)
Telephone: 962-0539
Email: klcaldwe@email.unc.edu (for weekdays only)

COURSE DESCRIPTION: This course examines the development of African descendant communities in Latin America and the Caribbean. We will focus on the cultural, social, and political dimensions of slavery and race relations in countries such as Brazil, Mexico, and Cuba. We will also explore the impact of nationalist ideologies on contemporary racial dynamics and the ways in which members of Afro-Latin and Afro-Caribbean communities have struggled for full citizenship and social justice.

COURSE FORMAT: In-class time will consist of discussions, lectures, small group work, and video screenings. The videos screened in class are important course materials and every effort should be made to view any that are missed. Most videos will be available in the Non-Print collection of the Undergraduate Library.

REQUIREMENTS:
Readings – It is essential to complete all of the assigned readings in order to ensure your success in this course. You should complete all readings prior to the class meeting for which they are assigned and be prepared to discuss and critique them during our class sessions.
Attendance – Your attendance at all class sessions is required for successful completion of this course. Absence from more than 3 classes will result in a severe grade penalty for the attendance portion of your grade. A pattern of late arrivals to class will also result in a grade penalty.
Class Participation – You will be expected to participate in class on a regular basis. During our class meetings, we will engage in discussions which will require active participation from as many students as possible. Your participation in class discussions in the form of comments and informed questions will be encouraged throughout the semester. Ultimately, you will maximize your learning experience by participating in class and helping to create a dynamic classroom environment.
Writing Assignments – You will complete a variety of writing assignments in this course. Your written work will include critical essays based on the course readings and films, an essay based at attendance at a campus/community event that is relevant to the course, and an essay on the book *Benedita da Silva: Afro-Brazilian Woman's Story of Politics and Love.*
Deadlines – Late work will not be accepted without prior permission. Work that is not received by the deadline will receive a grade of "0."
Honor Code – You should familiarize yourself with and follow the standards of academic integrity and academic conduct outlined in the UNC Honor Code (http://honor.unc.edu). Possible Honor Code violations include plagiarism, and giving/receiving unauthorized assistance during exams and in completing course assignments.

COURSE TEXTS AND MATERIALS:
- George Reid Andrews. *Afro-Latin America*. Oxford University Press, 2004.
- Medea Benjamin, Maisa Mendonça, and Benedita da Silva. *Benedita da Silva: An Afro-Brazilian Woman's Story of Politics and Love*. Food First Books, 1997.

- Anani Dzidzienyo and Suzanne Oboler, eds. *Neither Enemies nor Friends: Latinos, Blacks, Afro-Latinos.* Palgrave, 2005. (Also available as an electronic book through online library catalog).

Reserves (eres) - Several required readings will be placed on both electronic reserve and hardcopy reserve at the Undergraduate Library. You may access the electronic reserve items through the UNC libraries website (http://eres.lib.unc.edu).
Blackboard (Bbd) - Important course materials will also be posted on Blackboard (http://blackboard.unc.edu).
A Library Research Guide is available on the Stone Center Library Website: http://www.lib.unc.edu/stone/afam_latin_guide.html.

ASSESSMENT:

- Preparation, Attendance, and Participation 10%
- Map Exercise 15%
- Essay on Campus/Community Event (2 pages) 10%
- Critical Essays (three 3-page papers) 30%
- Essay on Benedita da Silva's memoir (4 pages) 25%
- Final Exam 10%

ASSESSMENT SCALE:
90-100 points = Exemplary = A (90-93 A-; 94-100 A)
80-89 points = Very Good = B (80-83 B-; 84-86 B; 87-89 B+)
74-49 points = Satisfactory = C (74-76 C; 77-79 C+)
69-73 points = Needs Improvement = C-
60-68 points = Needs Considerable Improvement = D
59 and below = F

DEADLINES:

Map Exercise	September 11
Critical Essays	September 18, October 30, December 4
Essay on Benedita da Silva's Memoir	November 13
Essay on Campus/Community Event	Due by November 20

Course Topics and Required Readings
(subject to adjustment)

Week 1

August 21	Course Introduction and Overview
August 23	Read "Introduction" in *Afro-Latin America* Look at material on Dominican Republic, on Miami Herald Site on Afro-Latin Americans (link on Bbd) Film: Lourdes Portillo, *Mirrors of the Heart* (1993)

Film: *Benedita da Silva*

Week 13: Social Inequality and Social Policy

November 13 — **Essay on Benedita da Silva's memoir is due**
Chapter 6, *Afro-Latin America*

November 15 — Arocha, "Inclusion of Afro-Colombians: An Unreachable National Goal?" (Bbd)
Martins, Medeiros, and Nascimento,"Paving Paradise: The Road from 'Racial Democracy' to Affirmative Action in Brazil" (Bbd)

Week 14: Transnational Cultural Linkages

November 20 — Fernandes and Stanyek, "Hip-hop and black public spheres in Cuba, Venezuela, and Brazil" (eres)
Optional: Anderson, Chapter 5 - *Neither Enemies, nor Friends*
Film: Jeff Zimbalist, *Favela Rising* (2006)

November 22 — **Thanksgiving Holiday - No Class**

Week 15: Afro-Latins in the U.S.

November 27 — Johnson, Chapter 13 - *Neither Enemies nor Friends*
Sawyer, Chapter 14 - *Neither Enemies nor Friends*
Hernandez, "Latino, African-American Violence on Rise Since Riots" (Bbd)

November 29 — Duany, Chapter 9 - *Neither Enemies nor Friends*
Optional: Mirabal, Chapter 10 - *Neither Enemies nor Friends*
Film: Rosie Perez, *Yo Soy Boricua* (2004)

Week 16

December 4 — **Critical Essay #3 is Due**
Final Discussion and Course Evaluations

December 11 — Final Exam 8-11 am

AFAM 266/WMST 266: Black Women in America
Fall 2007
Tuesday, Thursday 12:30-1:45 pm
Stone Center 210

Dr. Kia Caldwell
Office: Battle Hall 208
Office Hours: Thursdays 11-12 (or by appointment)
Telephone: 962-0539
Email: klcaldwe@email.unc.edu (for weekdays only)

COURSE DESCRIPTION: This course examines the experiences of black women in the United States from historical and contemporary perspectives. The experiences of black women in other areas of the African diaspora, particularly Brazil, will also be explored through course readings and films. Students will gain knowledge of the experiences and challenges faced by black women and develop the skills necessary to analyze black women's struggles for equality and social justice. This course will provide students with the conceptual and theoretical tools needed to analyze contemporary gender relations in African-American communities and pressing social issues which have a disproportionate impact on African American women, such as HIV/AIDS, poverty, reproductive rights, and media images.

COURSE FORMAT: In-class time will consist of lectures, small group work, group presentations, and video screenings. The videos screened in class are important course materials and every effort should be made to view any that are missed. Most videos will be available in the Non-Print collection of the Undergraduate Library.

REQUIREMENTS:
Readings – It is essential to complete all of the assigned readings in order to ensure your success in this course. You should complete all readings prior to the class meeting for which they are assigned and be prepared to discuss and critique them during our class sessions.
Attendance – Your attendance at all class sessions is required for successful completion of this course. Absence from more than 3 classes will result in a severe grade penalty for the attendance portion of your grade. A pattern of late arrivals to class will also result in a grade penalty.
Class Participation – You will be expected to participate in class on a regular basis. During our class meetings, we will engage in discussions which will require active participation from as many students as possible. Your participation in class discussions in the form of comments and informed questions will be encouraged throughout the semester. Ultimately, you will maximize your learning experience by participating in class and helping to create a dynamic classroom environment.
Online Assignments – There are several online assignments during the semester. You will be expected to scan the required websites prior to class and discuss these sites in your reading response papers.
Group Research Project and Research Presentations – Each student in the course will contribute to a group research project focusing on a specific issue related to African American women. You will also do a group presentation related to your final research project. It is important that every group member share the responsibility of preparing for and giving the group presentation, as well as completing the final research project.
Writing Assignments – You will complete a variety of writing assignments in this course. Your written work will include response papers based on the course readings and an essay on a campus or community event related to the course.
Deadlines – Late work will not be accepted without prior permission. Work that is not received by the deadline will receive a grade of "0."

Honor Code – You should familiarize yourself with and follow the standards of academic integrity and academic conduct outlined in the UNC Honor Code (http://honor.unc.edu). Possible Honor Code violations include plagiarism, and giving/receiving unauthorized assistance during exams and in completing course assignments.

ASSESSMENT:

Preparation, Attendance, and Participation	10%
Writing Assignments	
4 Response Papers (2-3 pgs.)	40%
Reflection Paper on Campus/Community Event (2-3 pgs.)	10%
Group Presentation and Research Project	30%
Final Exam	10%

DEADLINES:

Response Papers (choose 4 of the following dates):

August 30, September 18, October 4, October 25, November 1, November 6

Reflection Paper on Campus/Community Event: Due by **November 20**

Final Project: There will be several deadlines for materials related to the research project throughout the semester. The final project is due on **December 4.**

COURSE TEXTS AND MATERIALS:

Required Texts

- Beverly Guy-Sheftall. *Words of Fire: An Anthology of African-American Feminist Thought.* New York: The New Press, 1995.
  Note: This book is referred to as *WOF* in the syllabus
- Kia Lilly Caldwell. *Negras in Brazil: Re-envisioning Black Women, Citizenship, and the Politics of Identity.* New Brunswick, NJ: Rutgers University Press, 2007.

Reserves - A number of readings will be placed on electronic and hardcopy reserve at the Undergraduate Library. You may access electronic reserve items through the UNC libraries website (http://eres.lib.unc.edu).

Blackboard - Course materials will also be posted on Blackboard (http://blackboard.unc.edu). Referred to as Bbd in syllabus.

A Research Guide on Black Women in America is available on the Stone Center Library Website: http://www.lib.unc.edu/stone/black_women.html

ASSESSMENT SCALE:

90-100 points = Exemplary = A (90-93 A-; 94-100 A)
80-89 points = Very Good = B (80-83 B-; 84-86 B; 87-89 B+)
74-49 points = Satisfactory = C (74-76 C; 77-79 C+)
69-73 points = Needs Improvement = C-
60-68 points = Needs Considerable Improvement = D
59 and below = F

Course Topics and Required Readings

(subject to adjustment)

Week 1
Course Introduction

August 21	Course introduction and overview
August 23	Guy-Sheftall, Introduction to *Words of Fire*

Week 2
Black Women and U.S. Slavery: Revisionist Perspectives

August 28	Jones, "My Mother Was Much of a Woman: Slavery" (eres)
August 30	Davis, "Reflections on the Black Woman's Role in the Community of Slaves" in *WOF*

Week 3
19th century Black Women Leaders

September 4	Selections by Maria Miller Stewart (2), Sojourner Truth (2), Frances Ellen Watkins Harper, and Anna Julia Cooper in *WOF*
September 6	Wells-Barnett, "Lynch Law in America" by Ida Wells-Barnett in *WOF* Giddings, "To Sell My Life as Dearly as Possible": Ida B. Wells and the First Antilynching Campaign in *Where and When I Enter* (eres) Film: *A Passion for Justice*

Week 4
The Black Women's Club Movement and Woman Suffrage

September 11	Terrell, "The Progress of Colored Women" in *WOF* Giddings, "To Be a Woman, Sublime": The Ideas of the National Black Women's Club Movement (to 1917) in *When and Where I Enter* (Bbd)
September 13	Giddings, "The Quest for Woman Suffrage" in *When and Where I Enter* (Bbd) Dunbar-Nelson, "The Negro Woman and the Ballot" in *WOF*

Week 5
Conceptualizing the Intersection of Race, Gender, and Class

September 18	Beale, "Double Jeopardy: To Be Black and Female" in WOF King, "Multiple Jeopardy, Multiple Consciousness: The Context of a Black Feminist Ideology" in *WOF*
September 20	**Research Workshop with Raquel Cogell, Librarian, Stone Center Library**

Week 6
Black Feminism in the United States

September 25	Lorde, "Age, Race, Class, and Sex: Women Redefining Difference" in *WOF* Crenshaw, "Mapping the Margins: Intersectionality, Identity Politics, and Violence Against Women of Color" (Bbd)
September 27	The Combahee River Collective, "A Black Feminist Statement" in *WOF* Smith, "Some Home Truths on the Contemporary Black Feminist Movement" in *WOF*

Wallace, "Anger in Isolation: A Black Feminist's Search for Sisterhood" in *WOF*

Week 7
Gender in African American Communities

October 2 — Cole and Guy-Sheftall, "Collisions: Black Liberation Versus Women's Liberation" (eres as Ebook)
Painter, "Hill, Thomas and the Use of Racial Stereotype" (Bbd)
Optional: Mitchell, "Anita Hill's Afterlife" (eres)
Film: Clarence Thomas and Anita Hill

October 4 — Ransby and Matthews, "Black Popular Culture and the Transcendence of Patriarchal Illusions" in *WOF*
Bailey, "Students at Spelman College Protest Nelly's Video 'Tip Drill'" (Bbd)

Week 8
Gender, Race, and Class in Brazil

October 9 — *Negras in Brazil* - Introduction & Chapter 1
Optional: *Negras in Brazil* - Prologue

October 11 — *Negras in Brazil* - Chapter 2
Film: *Black Women in Brazil*

Week 9
Gender, Race, and Class in Brazil

October 16 — *Negras in Brazil* - Chapters 3 & 4

October 18 — **Fall Break**

Week 10
Black Women's Activism in Comparative Perspective

October 23 — *Negras in Brazil* - Chapters 5 & 6
Optional Reading: *Negras in Brazil* - Epilogue
Online: Scan two websites for Afro-Brazilian women's organizations (links on Bbd); bring 1 page response to class.
Film: *Benedita da Silva*

October 25 — Springer, "No Longer Divided against Ourselves" and "Barbecue and Bake Sales Won't Fund a Movement" (eres)

Week 11
Special Topics: The Body and Reproductive Rights

October 30 — Hunter, "The Beauty Queue: Advantages of Light Skin" (Bbd)
Film: *Black Women on the Light, Dark Thang*

November 1 — Roberts, "The Dark Side of Birth Control" (Bbd)
Online: Scan Websites for The Black Women's Health Imperative and the International Women's Health Coalition (links on Bbd)

Week 12
Special Topics: HIV/AIDS and Black Sexual Politics

November 6 — Collins, "Why We Can't Wait: Black Sexual Politics and the Challenge of HIV/AIDS" (Bbd)
Internet Assignment: Search for websites focusing on African American women and HIV/AIDS; bring a 1 page description of 2 sites to class.

November 8	Cole and Guy-Sheftall, "Having Their Say: Conversations with Sisters and Brothers" (eres & Bbd)

Week 13

November 13	Research Presentations
November 15	Research Presentations

Week 14

November 20	Research Presentations
November 22	**Thanksgiving Holiday**

Week 15

November 27	Research Presentations
November 29	**Research Day**

Week 16

December 4	**<u>Final Projects are Due</u>** Cole and Guy-Sheftall, "Where Do We Go From Here?" (eres & Bbd) Final Discussion and Course Evaluations
December 11	**Final Exam 12-3 pm**

Subject: Re: Departmental Travel Funding

Hi Kia:

Thanks for this. This is what we will do: We should combine the balance of what you still have remaining in your travel funds from the College with the research fund. Obviously the research fund will cover the bulk of the expenses.

Please do not forget to write to me a short report of how the money was spent and its benefit to you professionally.

A reminder: All receipts need to be submitted to Travis within one week of completion of travel. The College is very strict about that rule.
Best,
Julius

Subject: INFORMATIONAL: Important Information on NCFlex Convenience Cards

---

FROM: Brian Usischon, Director, Benefit Program Administration

Aon Consulting, the NCFlex vendor responsible for the administration of the Health Care and Dependent Day Care flexible spending accounts, has been experiencing unforeseen technical difficulties with the NCFlex Convenience Card (debit card) and has decided to change the Convenience Card vendor. This change was originally planned to take place at the end of the calendar year but is now going to happen earlier.

The current 2007 gray NCFlex Convenience Card will be deactivated sometime between Nov. 9 and Nov. 12, 2007. To minimize any disruption in service, participants will automatically receive a new burgundy NCFlex Convenience Card to use for the remainder of 2007, and to use in 2008 as well if you reenrolled in one of the spending accounts during the 2008 annual enrollment. The new card will be mailed to participants' home addresses during the first week of December.

Employees can continue to access amounts contributed to the spending account by submitting a claim form and asking for reimbursement for eligible expenses they incur. A letter was sent yesterday to all employees who have a NCFlex Convenience Card. An email with the same information will also be sent to all employees who have email addresses on file with Aon Consulting.

If you have any questions, call the NCFlex FSA Customer Service Center at 1-877-371-2926. Customer service representatives are available Monday through Friday from 8:00 a.m. until 6:00 p.m.

Claim forms are available at www.ncflex.org. Click on Resources, select Forms and print the Spending Account Claim Form.

This email is sponsored by: Office of Human Resources

==========

"INFORMATIONAL:" email will only be sent to those who have indicated that they do want to receive mass email. To set your informational mass email preference, logon to the on-line directory web site at https://dir.unc.edu/dir/update.

Course Overview
This course is designed to provide you with a working knowledge of the African continent. You will be able to apply this knowledge in interpreting current events in Africa as they are reported in the national media. This course will also prepare you for more advanced courses in African Studies, anthropology, geography and international studies, among others. There are 54 countries in Africa, 48 are considered "sub-Saharan": we will focus on these. This huge expanse encompasses incredible diversity: because of this it will only be possible to provide an introduction to the many issues related to Africa's development but a major focus of this course will be on natural resources and development. Other topics we will study during this semester are the geography of Africa, pre-colonial societies and kingdoms, colonialism and the struggle for independence, contemporary politics and economics, and African religious beliefs.

Objectives:
Upon completion of this course you will be able to:
1. Identify all African countries on a map
2. Describe the major socio-political and ecological regions of Africa
3. Describe the general lives of Africans, both past and current
4. Discuss European rationalizations for the colonization of Africa and the impact this had on traditional African cultures
5. Describe the links between Africa and both Eastern and Western worlds centuries before colonization
6. Explain how colonial policies led to the rise of African Nationalism and the drive for Independence
7. Discuss modern African literary and political figures
8. Discuss the role of global politics in the policies and actions of modern African nations

In order to meet these objectives, we will use a mixture of lecture, discussion, literature readings and film.

Required Texts: The following texts are available at Student Stores, Amazon.com or other online booksellers, and/or on reserve at Davis Library/available online.

Required: *Africa South of the Sahara,* Robert Stock (Second Edition); *Things Fall Apart,* Chinua Achebe (any edition). Other readings will be on Reserve at the UL or available online through links posted on Blackboard. Recommended: *Understanding Contemporary Africa,* April A. Gordon and Donald L. Gordon (Fourth Edition). I will place at least one chapter on reserve, but for those with prior experience in Africa, this book will provide greater depth than the Stock text.

Course Requirements: All students are expected to attend all classes and to complete all assigned readings. Attendance and participation will be considered in assigning final grades. Your final grade will be based on the assignments listed below. Please take note of the dates on which the assignments are due. **Late assignments will be penalized.**

Map Quiz (Jan 25)	10%
Midterm (Feb 22)	30%
Caine Prize Review (Nov 9)	15%
Country Journal (Dec 3)	15%
Final Exam (Dec. 7)	30%

Map Quiz: This is a short evaluation of your ability to identify the nations and capitals of the African continent. You can find a map and a list of countries and their capitals in the text *Africa South of the Sahara* (Map 1.3, page 18 and the list with capitals on page 20). Use this map to study for the map quiz. In order to receive full credit your spelling must be correct. **Note that you must learn both the countries and their capitals.**

Caine Prize Short Story Review: Critique of one story short-listed for the Caine Prize for contemporary African writing (4 pages).

Country Journal: You will be assigned a country to follow in the news throughout the semester. In the journal, keep track of your country and major events in the news. If your country does not make frequent appearance in the major Western newspapers, search the internet for African papers and websites. See the "Links" section of the Blackboard website. In addition to the articles, you must write a "Top 10" list for your country (6 pages).

Exams: the exams will be multiple choice, matching, short answer and essay. The final exam essays will be cumulative.

Attendance: Class sessions are an important component of the course. Attendance will be kept for each class. While you will not receive a grade for your attendance, it will be taken into consideration when assigning final grades, particularly for students whose grades are borderline. It is the responsibility of each student to sign the attendance sheet. Falsification of the attendance sheet will be treated as a violation of the honor code. If you miss a class it is **your duty** to check the Blackboard site and talk to classmates about what was covered in class.

Notes about Assignments:
1) Assignments must be handed to me or in my office mailbox by 4pm on the due date.
2) Late assignments will be penalized.
3) Papers with massive proofreading errors will be returned ungraded for correction.
4) Hardcopies of assignments must be turned in for credit

Finally, if you have a general question, please use the forum provided on the blackboard website.

Tentative Course Schedule: Topics and Readings:

The course is divided into roughly three sections. Each of these is then further split into subtopics. Questions to guide your reading can be found on Blackboard.

I. INTRODUCTION

1) **Looking at Africa** (Jan. 9 – Jan. 25)

This section is designed to introduce you to the continent of Africa. We will examine some features of the physical, ecological and human geography of the African continent. We will also discuss some preconceptions and stereotypes that we have concerning Africa so that we may overcome these stereotypes and view Africa more objectively.

Readings: **Stock, chapters 1-6; Wainaina** "How to write about Africa"
http://www.granta.com/extracts/2615

Friday Jan. 25: Map Quiz

II. AFRICA IN HISTORICAL PERSPECTIVE (MOSTLY POLITICAL)

2) **The African Past (pre-colonial)** (Jan 28 – Feb 1)

During this section you will learn about pre-colonial Africa. We will begin by addressing the different types of societies that have flourished on the African continent. We will examine the economic activities undertaken by these societies and their social organization. From there we will consider some of Africa's pre-colonial kingdoms. You will learn what these kingdoms were, how they were governed, and why they rose to prominence. We will touch on the issue of how these ancient kingdoms are currently relevant to the African diaspora.

Readings: **Stock,** chapter 7**, Gordon and Gordon** pp 31-41, **Achebe,** *Things Fall Apart* (first half);

3) **The Colonial Experience and the Struggle for Self Determination** (Feb 4 – Feb 11)

This section explores one of the most transformational eras in the history of the continent. At the end of this section you should understand which of the European powers engaged in colonialism, which territories these nations claimed, why they embarked on imperial projects in Africa, the different ways in which European countries administered their colonies, the impact that colonialism has had on the people of Africa, and why colonialism came to an end.

Readings: **Stock,** chapter 8**; Gordon and Gordon,** chapter 4 pp 57-70**; Achebe**, *Things Fall Apart* (second half);

5) **Independent Africa** (Feb 13 – Feb 20)

Independence did not prove to be the solution to Africa's problems that many hoped it would be. In this section we will examine some of the political problems that African nations have confronted since independence. You will develop an understanding of the characteristics of post-colonial political regimes in Africa and the challenges that African nations have faced in attempting to forge and maintain democratic forms of government. We will also introduce the concept of "development"

Readings: **Stock,** chapter 9; "My Parent's Bedroom" by Uwem Akpan
http://www.newyorker.com/archive/2006/06/12/060612fi_fiction?printable=true, **Gordon and Gordon:** chpt 4, pp 71-102 (rec).

Friday, February 22: Midterm

III. CONTEMPORARY AFRICA: THE STRUGGLE FOR "DEVELOPMENT"
In the previous sections we have discussed the basic geography and layout of the continent and developed an appreciation for the past and present political structures which influence current African lives. In this section we will examine a series of topics which influence the development and everyday lives of those living in modern African societies.

6) **Population and kinship** (Feb 25 – Feb 29)
The location, movements and growth of human populations have enormous impact. This section investigates these changes in population as well as the within-family relationships which influence populations and the character of past and future African societies.
Readings: **Stock,** chapters 10-13; **Martin and O'Meara,** chapter 9 (on reserve)

7) Rural and Urban Economies (March 3 – March 19, bisected by Spring Break)
The economies and futures of rural and urban Africans are very different from each other and from similar populations in the United States. In this section we will examine how rural Africans (>75% of the population) live and how the growing urban populations are faring. We will also discuss food security in this chapter—a crisis facing both urban and rural populations and one frequently highlighted in the western media.
Readings: **Stock,** chapters 13-15, & 17

8) Women, children and health (March 24 – March 28)
The status of women and children and the quality of the health care system are important topics for the prospect of sustainability and development. By the end of this section you should understand how these topics relate to development and what steps are currently being taken to improve the situation.
Readings: **Stock,** chapters 19-21, Other TBA

9) Resources (March 31 – April 4)
Africa has always been a site of resources used in global markets. These resources are both important sources of capital for African nations and central sources of conflict. In this section we will particularly focus on the political ecology of oil, water and conservation and how these relate to stability and the future of Africa.
Readings: **Stock,** chapters 22 - 24, **Ghazvinian** pp. 1-82, Other TBA (conservation).

10) Economics (April 7 – April 14)
Finally, in this section we examine 'development.' What is development? What can bolster economic development and why have past attempts to bolster economic development failed in Africa? Specifically we examine how Africa features in the world economy, how national economies are faring and the role of civil society and local movements in promoting development. You will also be familiar with the Millennium Development Goals by the end of this section.
Readings: **Stock**, chapters 25-27; "Jimmy Carter's Eyes" by **E. C. Osundu**
http://www.bu.edu/agni/fiction/online/2006/osondu-jimmy.html , Lords of Poverty reading TBA.

IV: CASE STUDIES & WRAP UP

11) No good news out of Africa? (April 21-25)

We have been on a whirlwind tour of a huge continent and a long history. In the last few days of the course, we will try to integrate past, present and future to explore what might be in store for Africa in the coming decades. In particular we will highlight some of the positive developments over the recent past which bode well for the future.

Readings: **Gordon and Gordon:** chapter 13

FINAL EXAMS: MONDAY, MAY 5 AT 12 PM

African Studies 101: Introduction to Africa, Section 005
Spring 2008 — Dey 305
MWF 11:00 – 12:00
Dr. Amy Cooke

Email: acooke@email.unc.edu Phone: 919-966-5496
Office: 106 Battle Hall Office Hours: MWF 9:45-10:45 and by appt.

Course Overview
This course is designed to provide you with a working knowledge of the African continent. You will be able to apply this knowledge in interpreting current events in Africa as they are reported in the national media. This course will also prepare you for more advanced courses in African Studies, anthropology, geography and international studies, among others. There are 54 countries in Africa, 48 are considered "sub-Saharan": we will focus on these. This huge expanse encompasses incredible diversity: because of this it will only be possible to provide an introduction to the many issues related to Africa's development but a major focus of this course will be on natural resources and development. Other topics we will study during this semester are the geography of Africa, pre-colonial societies and kingdoms, colonialism and the struggle for independence, contemporary politics and economics, and African religious beliefs.

Objectives:
Upon completion of this course you will be able to:
1. Identify all African countries on a map
2. Describe the major socio-political and ecological regions of Africa
3. Describe the general lives of Africans, both past and current
4. Discuss European rationalizations for the colonization of Africa and the impact this had on traditional African cultures
5. Describe the links between Africa and both Eastern and Western worlds centuries before colonization
6. Describe the current development status of Africa and explain how natural resources, population growth and health services influence economic development.
7. Discuss modern African literary and political figures
8. Discuss the role of global politics in the policies and actions of modern African nations

In order to meet these objectives, we will use a mixture of lecture, discussion, literature readings, guest lectures and film.

Required Texts: The following texts are available at Student Stores, Amazon.com or other online booksellers, and/or on reserve at Davis Library/available online.
Africa South of the Sahara, Robert Stock (Second Edition); *Things Fall Apart,* Chinua Achebe (any edition). Other readings will be on Reserve at the UL or available online through links posted on Blackboard. Recommended: *Understanding Contemporary Africa,* April A. Gordon and Donald L. Gordon (Fourth Edition). I will place two chapters on reserve, but for those with prior experience in Africa, this book will provide greater depth than the Stock text.

Course Requirements: All students are expected to attend all classes and to complete all assigned readings. Attendance and participation will be considered in assigning final grades. Your final grade will be based on the assignments listed below. Please take note of the dates on which the assignments are due. **Late assignments will be penalized.**

Map Quiz (Jan 25)	10%
Midterm (Feb 22)	30%
Caine Prize Review (Nov 9)	15%
Country Journal (Dec 3)	15%
Final Exam (Dec. 7)	30%

Map Quiz: This is a short evaluation of your ability to identify the nations and capitals of the African continent. You can find a map and a list of countries and their capitals in the text *Africa South of the Sahara* (Map 1.3, page 18 and the list with capitals on page 20). Use this map to study for the map quiz. In order to receive full credit your spelling must be correct. **Note that you must learn both the countries and their capitals.**

Caine Prize Short Story Review: Critique of one story short-listed for the Caine Prize for contemporary African writing (4 pages).

Country Journal: You will be assigned a country to follow in the news throughout the semester. In the journal, keep track of your country and major events in the news. If your country does not make frequent appearance in the major Western newspapers, search the internet for African papers and websites. See the "Links" section of the Blackboard website. In addition to the articles, you must write a "Top 10" list for your country (6 pages).

Exams: the exams will be multiple choice, matching, short answer and essay. The final exam essays will be cumulative.

Attendance: Class sessions are an important component of the course. Attendance will be kept for each class. While you will not receive a grade for your attendance, it will be taken into consideration when assigning final grades, particularly for students whose grades are borderline. It is the responsibility of each student to sign the attendance sheet. Falsification of the attendance sheet will be treated as a violation of the honor code. If you miss a class it is **your duty** to check the Blackboard site and talk to classmates about what was covered in class.

Notes about Assignments:
1) Assignments must be handed to me or in my office mailbox by 4pm on the due date.
2) Late assignments will be penalized.
3) Papers with massive proofreading errors will be returned ungraded for correction.
4) Hardcopies of assignments must be turned in for credit

Finally, if you have a general question, please use the forum provided on the blackboard website.

Tentative Course Schedule: Topics and Readings:

The course is divided into roughly three sections. Each of these is then further split into subtopics. Questions to guide your reading can be found on Blackboard.

I. INTRODUCTION

1) **Looking at Africa** (Jan. 9 – Jan. 25)

This section is designed to introduce you to the continent of Africa. We will examine some features of the physical, ecological and human geography of the African continent. We will also discuss some preconceptions and stereotypes that we have concerning Africa so that we may overcome these stereotypes and view Africa more objectively.

Readings: **Stock, chapters 1-6; Wainaina** "How to write about Africa"
http://www.granta.com/extracts/2615

Friday Jan. 25: Map Quiz

II. AFRICA IN HISTORICAL PERSPECTIVE (MOSTLY POLITICAL)

2) **The African Past (pre-colonial)** (Jan 28 – Feb 1)

During this section you will learn about pre-colonial Africa. We will begin by addressing the different types of societies that have flourished on the African continent. We will examine the economic activities undertaken by these societies and their social organization. From there we will consider some of Africa's pre-colonial kingdoms. You will learn what these kingdoms were, how they were governed, and why they rose to prominence. We will touch on the issue of how these ancient kingdoms are currently relevant to the African diaspora.

Readings: **Stock,** chapter 7**, Gordon and Gordon** pp 31-41, **Achebe,** *Things Fall Apart* (first half);

3) **The Colonial Experience and the Struggle for Self Determination** (Feb 4 – Feb 11)

This section explores one of the most transformational eras in the history of the continent. At the end of this section you should understand which of the European powers engaged in colonialism, which territories these nations claimed, why they embarked on imperial projects in Africa, the different ways in which European countries administered their colonies, the impact that colonialism has had on the people of Africa, and why colonialism came to an end.

Readings: **Stock,** chapter 8**; Gordon and Gordon,** chapter 4 pp 57-70**; Achebe**, *Things Fall Apart* (second half);

5) **Independent Africa** (Feb 13 – Feb 20)

Independence did not prove to be the solution to Africa's problems that many hoped it would be. In this section we will examine some of the political problems that African nations have confronted since independence. You will develop an understanding of the characteristics of post-colonial political regimes in Africa and the challenges that African nations have faced in attempting to forge and maintain democratic forms of government. We will also introduce the concept of "development"

Readings: **Stock,** chapter 9; "My Parent's Bedroom" by Uwem Akpan
http://www.newyorker.com/archive/2006/06/12/060612fi_fiction?printable=true, **Gordon and Gordon:** chpt 4, pp 71-102 (rec).

Friday, February 22: Midterm

III. CONTEMPORARY AFRICA: THE STRUGGLE FOR "DEVELOPMENT"
In the previous sections we have discussed the basic geography and layout of the continent and developed an appreciation for the past and present political structures which influence current African lives. In this section we will examine a series of topics which influence the development and everyday lives of those living in modern African societies.

6) **Population and kinship** (Feb 25 – Feb 29)
The location, movements and growth of human populations have enormous impact. This section investigates these changes in population as well as the within-family relationships which influence populations and the character of past and future African societies.
Readings: **Stock,** chapters 10-13; **Martin and O'Meara,** chapter 9 (on reserve)

7) Rural and Urban Economies (March 3 – March 19, bisected by Spring Break)
The economies and futures of rural and urban Africans are very different from each other and from similar populations in the United States. In this section we will examine how rural Africans (>75% of the population) live and how the growing urban populations are faring. We will also discuss food security in this chapter—a crisis facing both urban and rural populations and one frequently highlighted in the western media.
Readings: **Stock,** chapters 13-15, & 17

8) Women, children and health (March 24 – March 28)
The status of women and children and the quality of the health care system are important topics for the prospect of sustainability and development. By the end of this section you should understand how these topics relate to development and what steps are currently being taken to improve the situation.
Readings: **Stock,** chapters 19-21, Other TBA

9) Resources (March 31 – April 4)
Africa has always been a site of resources used in global markets. These resources are both important sources of capital for African nations and central sources of conflict. In this section we will particularly focus on the political ecology of oil, water and conservation and how these relate to stability and the future of Africa.
Readings: **Stock,** chapters 22 - 24, **Ghazvinian** pp. 1-82, Other TBA (conservation).

10) Economics (April 7 – April 14)
Finally, in this section we examine 'development.' What is development? What can bolster economic development and why have past attempts to bolster economic development failed in Africa? Specifically we examine how Africa features in the world economy, how national economies are faring and the role of civil society and local movements in promoting development. You will also be familiar with the Millennium Development Goals by the end of this section.
Readings: **Stock**, chapters 25-27; "Jimmy Carter's Eyes" by **E. C. Osundu**
http://www.bu.edu/agni/fiction/online/2006/osondu-jimmy.html , Lords of Poverty reading TBA.

IV: CASE STUDIES & WRAP UP

11) No good news out of Africa? (April 21-25)

We have been on a whirlwind tour of a huge continent and a long history. In the last few days of the course, we will try to integrate past, present and future to explore what might be in store for Africa in the coming decades. In particular we will highlight some of the positive developments over the recent past which bode well for the future.

Readings: **Gordon and Gordon:** chapter 13

FINAL EXAMS: MONDAY, APRIL 28 AT 12 PM

From: nzongola@email.unc.edu
Sent: Monday, January 28, 2008 4:29 PM
To: Deborah A Crowder <dacrowde@email.unc.edu>
Cc: Travis Gore <stgore@email.unc.edu>
Subject: AFRI 101 and 523
Attach: AFRI 101 Course Oultine, Spring 2008 REVISED.docx

Dear Debby,

In view of my travel schedule, I have made slight modifications to my AFRI 101 Course Syllabus, and I would like to request that you please ask Travis to print 65 copies for me (on one sheet of paper, front and reverse) to distribute to the class.

I would like to confirm the following two class periods for which Travis's assistance is also needed in AFRI 101, 11:00 am in 107 Wilson Hall

Thursday, February 7: Show the Film "From Congo to Zaire"

Thursday, February 14: Administer the Map Quiz (which I will give him before I leave town next Monday).

For AFRI 523, 210 Stone Center from 3 to 5:50 pm, he already has the Lumumba film to show in that class.

I have prepared indepndent work assiggments for students in both classes for the other days of my absence.

Thank you for your usual cooperation.

Best regards,
Georges

AFRI 101: INTRODUCTION TO AFRICA

The University of North Carolina at Chapel Hill
Department of African and Afro-American Studies
SPRING 2008
Tuesday and Thursday, 11:00 am to 12:15 pm
107 Wilson Hall

Instructor: Professor Georges Nzongola-Ntalaja
Office: 303 Stone Center
Office Hours: TR, 2-4 pm; W, 2-3 pm; and by appointment

Course Summary
This course is an introduction to the study of the African continent, its peoples, history and contemporary problems of development in a globalized world. It is designed to introduce students with little or no knowledge of Africa to the academic study of Africa in the social sciences and the humanities. The course consists of a survey of the African past, society and culture, and contemporary political, economic and social issues.

Course Requirements
Class attendance and participation: 10% of the final grade
Map quiz (knowledge of the contemporary map of Africa) on Feb. 14: 20% of the grade
A take-home mid-term exam, to be used to fulfill the student's writing requirements (Questionnaire distributed on Jan. 31; Exam papers due on Feb. 21): 30% of the grade
Final Exam (Tues., May 6 at 8 am): 40% of the final grade

Required Texts: To be read for class discussions
UNDERSTANDING CONTEMPORARY AFRICA, 4th Edition, by April A. Gordon and Donald L. Gordon
SO LONG A LETTER, by Mariama Ba
A MAN OF THE PEOPLE, by Chinua Achebe

<u>Course Outline and Readings</u>

Weeks 1-2: Course Introduction
R/Jan. 10: Course Overview
T/Jan. 15: Africa: Problems and Perspectives
R/Jan. 17: The Contemporary Map of Africa

Gordon & Gordon, ch. 1-2

Weeks 3 to 5: The African Past
T/Jan. 22: Precolonial Africa
R/Jan. 24: Film: "Africa: A History Denied," Time-Life Lost Civilizations Series
T/Jan. 29: Colonial Africa
R/Jan. 31: Decolonization and Independence
T/Feb. 05: Library Research on the African Past (for the Mid-term Exam)

R/Feb. 07: Film: "From Congo to Zaire," by Belgavox

Gordon & Gordon, ch. 3, 4 and 5, pp. 23-71 and 109-114

Week 6: Review and Assessment
T/Feb. 12: Independent Study for the Map Quiz (No Class Session)
R/Feb. 14: Map Quiz

Weeks 7 to 9: Africa Since Independence (1): Political and Economic Issues
TR/Feb. 19-21: African Politics
TR/Feb. 26-28: Africa in the World Economy
TR/Mar. 04-06: Africa in International Affairs

Gordon & Gordon, ch. 4, 5 and 6, pp. 71-107 and 114-201
Achebe, entire

Week 10 (Mar. 11-13): SPRING RECESS

Weeks 11 to 15: Africa Since Independence (2): Society, Culture and Human Development
TR/Mar. 18-20: Social Organization in a Changing World
TR/Mar. 25-27: The Environment and Development
TR/Apr. 01-03: Women and Social Change in Africa
TR/Apr. 08-10: Religion in Africa
TR/Apr. 15-17: Literature, Arts and Popular Culture

Gordon & Gordon, ch. 7-12
Ba, entire

Week 16: Conclusions
T/Apr. 22: Lessons of Contemporary Africa
R/Apr. 24: Final Review Session

Recommended for Further Reading:
AFRICA, Third Edition, edited by Phyllis M. Martin and Patrick O'Meara
AFRICA: A BIOGRAPHY OF THE CONTINENT, by John Reader

Debby,

May I once again bother you with another syllabus revision, this one for AFRI 523, which I need for the class this afternoon? About 35 copies (both sides of one sheet) should suffice.

Thanks in advance,
Georges

AFRI 523: CENTRAL AFRICA: HISTORY AND POLITICS SINCE 1871
The University of North Carolina at Chapel Hill
Department of African and Afro-American Studies
SPRING 2008
Wednesday, 3:00 – 5:50 pm
Stone Center, Room 210

Instructor: Professor Georges Nzongola-Ntalaja
Office: 303 Stone Center
Office hours: TR, 2-4 pm; W, 2-3 pm; and by appointment

Course Summary
This course is a survey of the history and politics of Central Africa, with emphasis on the Democratic Republic of the Congo (DRC), the country which lies at the core of the region. The course will focus on the Congo Free State (1885-1908), the Belgian Congo (1908-60), and the Congo since independence, including the Congo crisis of 1960-65, the Mobutu regime (1965-97), and the Congo wars since 1996. The involvement of regional and international actors in these wars will also be examined. The course is designed to introduce the student to the political structures and dynamics of this region of Africa from a historical perspective.

Course Requirements
Class attendance and participation: 10% of the final grade
One book review paper (approx. 1000 words; due on Wed., Feb. 27): 15% of the final grade
Mid-term exam (Wed., March 5): 15% of the final grade
Research paper (approx. 3000 words; due on Wed., April 23): 30% of the final grade
Final Exam (Mon., May 5 at 4 pm): 30% of the final grade

Required Texts: To be read for class discussions
THE CONGO FROM LEOPOLD TO KABILA: A PEOPLE'S HISTORY, by Georges Nzongola-Ntalaja
THE CONGO WARS: CONFLICT, MYTH AND REALITY, by Thomas Turner

<u>Course Outline and Readings</u>

Week 1: Course Introduction
Jan. 09: Course Overview and Introduction to Central Africa

Weeks 2 to 8: Colonialism and the Struggle for Independence
Jan. 16: The Congo in the European Scramble for Africa, from Ujiji (1871) to Fashoda (1898)
Jan. 23: Film: "Congo: White King, Red Rubber, Black Death," by Peter Bates
Jan. 30: The Congo Free State and the Belgian Congo
Feb. 06: Library Research for the Book Review
Feb. 13: Film: "Lumumba," by Raoul Peck
Feb. 20: African Resistance to Colonialism in the Congo, 1945 to 1960
Feb. 27: Independence and the Congo Crisis, 1960-65

Nzongola, ch. 1-3

Recommended Readings:
THE RACE TO FASHODA: EUROPEAN COLONIALISM AND AFRICAN RESISTANCE, by David Levering Lewis
THE KING INCORPORATED: LEOPOLD THE SECOND AND THE CONGO, by Neal Ascherson
THE HEART OF DARKNESS, by Joseph Conrad
KING LEOPOLD'S GHOST: A STORY OF GREED, TERROR, AND HEROISM IN COLONIAL AFRICA, by Adam Hochschild
KING LEOPOLD'S SOLILOQUY, by Mark Twain
REFORM IN LEOPOLD'S CONGO, by Stanley Shaloff
BLACK LIVINGSTONE: A TRUE TALE OF ADVENTURE IN THE NINETEENTH CENTURY CONGO, by Pagan Kennedy
KING LEOPOLD'S LEGACY: THE CONGO UNDER BELGIAN RULE, 1908-1960, by Roger Anstey
THE ASSASSINATION OF LUMUMBA, by Ludo De Witte

Week 9: Mid-Term Exam
March 09: The exam will be based on Nzongola, ch. 1-3 and the two films.

Week 10: SPRING RECESS

Weeks 11-12: The Post-colonial State
March 19: The "Second Independence" Movement in Congo-Kinshasa
March 26: Mobutu's Zaire: The Rise and Fall of an African Dictator

Nzongola, ch. 4-6

Recommended Readings:
THE CRISIS IN ZAIRE: MYTHS AND REALITIES, edited by Nzongola-Ntalaja
HISTORY OF CENTRAL AFRICA: THE CONTEMPORARY YEARS, edited by David Birmingham and Phyllis M. Martin

Weeks 13-15: The Congo Wars
April 02: The Rwanda Genocide and its Repercussions in the Great Lakes Region
April 09: The Congo Wars: Nature, Actors, and Issues
April 16: The Congo Wars: Impact on the Congo and Central Africa

Nzongola, ch. 7-8; Turner, entire

Recommended Readings:
CONSPIRACY TO MURDER: THE RWANDAN GENOCIDE, by Linda Melvern
SURVIVING THE SLAUGHTER: THE ORDEAL OF A RWANDAN REFUGEE IN ZAIRE, by Marie Beatrice Umutesi
THE AFRICAN STAKES OF THE CONGO WAR, edited by John F. Clark
THE DEMOCRATIC REPUBLIC OF CONGO: ECONOMIC DIMENSIONS OF WAR AND PEACE, by Michael Nest, with Francois Grignon and Emizet F. Kisangani
THE CONGO: PLUNDER AND RESISTANCE, by David Renton, David Seddon and Leo Zeilig

Week 16: Conclusions
April 23: Final Review Session

Dear Debby,

Attached please find the Map Quiz for my AFRI 101 class, to be administered by Travis on Thursday, in Wilson Hall, Room 107, at 11:00 AM.

There are four pages, the first two containing the questionnaire to be filled out by students and handed back to Travis, and the last two consisting of the two maps on which the quiz is based. The instructions are quite clear, I think.

Once again, many thanks for your kind assistance in taking care of this.

Best regards,
Georges

Subject: MAP QUIZ for AFRI 101-004
To: Deborah A Crowder <dacrowde@email.unc.edu>

Dear Debby,

Attached please find the Map Quiz for my AFRI 101 class, to be administered by Travis on Thursday, in Wilson Hall, Room 107, at 11:00 AM.

There are four pages, the first two containing the questionnaire to be filled out by students and handed back to Travis, and the last two consisting of the two maps on which the quiz is based. The instructions are quite clear, I think.

Once again, many thanks for your kind assistance in taking care of this.

Best regards,
Georges

JUBILEE ASSIGNMENT

Bantam Books has received a very promising manuscript by Margaret Walker. It is a historical novel that deals with slavery, free black people and the Civil War. The publishers like the story told in the novel and believe that it has the potential to become a best-seller. Still, before they publish it, they want to know whether Ms. Walker's fiction is based on a solid understanding of what life was like for the people who were slaves. So, Bantam hires you as a historical consultant. Your job is to assess the historical accuracy of Jubilee pp. 3-260

For the most part, does the book seem to be factually sound? What parts of Walker's novel illuminate subtle truths about slaves and slavery? What parts are misleading? What is your

slaves and slavery? What parts are misleading? What is your

evaluation of the way that he portrays the development, the

significance and the complexity of African-American culture? Is

her depiction of the lives of slave women adequate and accurate-?

Of free black people? Are there things left out of the book that

you think should have been included in order to convey an

understanding of what it was like to be a slave or a free black

person?

Obviously, you will not be able to cover everything in Jubilee

Concentrate on the parts of the novel that will allow you to make

the points that you want to make most clearly and effectively.

Conclude your evaluation with an overall recommendation to the

publishers. On balance, do you conclude that the novel provides

general readers with an accurate portrayal of slavery and the

people who were slaves and free blacks? Or do you conclude that,

on balance, the historical inaccuracies in Jubilee are so great

that Bantam ought not risk its reputation by publishing it?

Organize your paper however you see fit. You may be as creative,

or as straightforward as you choose to be. 5-7 pages (approx 300 words per page) Footnotes and outside research are not required

here ya go

AFRI 70: AFRICAN PLICY PROBLEMS
SPRING 2003

Instructor: Professor Bereket H. Selassie
Office: Battle Hall.
Office Hours: Tues. and Thurs 11-12.

READING MATERIAL
Main Texts:
1. William Tordoff, Government and Politics in Africa
2. Course Pack
3. Additional material will be assigned from time to time, as appropriate.

COURSE REQUIREMENTS
Class Attendance and Participation
Two short Semester Papers (6-8 pages) and one long Paper (16-18 pages)
--First Paper, due February 5; Second Paper, due April 2.
--Long Semester Paper, due last day of class.

GRADING REQUIREMENTS

Attendance and Participation	10 points	(10% of final grade)
Two short Papers	25 points each	(50% of final grade)
Long Semester Paper	40 points	(40% of final grade)

COURSE SUMMARY
This course explores the policy dilemmas facing African governments in the political, economic and socio-cultural spheres, and some of the responses given by governments to the challenges. A political economy perspective will inform the discussions through much of the course and examples will be drawn from the experiences of different countries. Special attention will be paid to the following five basic themes:
--Problems of national unity and stability
--Problems of economic development
--Problems of democracy
--Problems of social justice
--Problems of human rights.

READING GUIDELINES
For the 1st half of the Semester [January 22-March 12]
Session I: Introduction and Explanation of Course Requirements and related matters.
Sessions II and III: Comparative and Theoretical Perspectives. For these two sessions, read Tordoff, pages 1-26 and Course Pack, pages 1-25.
Session IV: Historical Legacies and Independence Movements. Read Tordoff, pages 28-80.

Readings for the 2nd Semester half [Mar.19—last class] will be announced

Sessions V and VI: Problems of National Unity and Human Rights

Sessions VII and VIII: Problems of Democratic Transition

Sessions IX and X: Problems of Economic Development and Social Justice

Sessions XI and XII: Conclusion and Review

The University of North Carolina at Chapel Hill
RECOMMENDATION FOR EPA PERSONNEL ACTION
(Please type. See instructions on reverse side.)

☐ INITIAL APPOINTMENT ☒ REAPPOINTMENT ☐ PROMOTION ☐ OTHER (specify):

CURRENT INFORMATION TO BE COMPLETED BY NOMINEE

1 Name: _____ Social Security No. _____
Last *First* *Middle*

2 Address: _____ Telephone No. _____

3 Date of Birth: _____ Birthplace: _____ Citizenship: _____ Race: _____ Sex: _____
Country *Code* *Code*

4 Are you related by blood or marriage to any person now employed by The University of North Carolina at Chapel Hill?

☐ Yes ☒ No If yes, give the relative's name, relationship and department name: *(See back of form.)*

5

EDUCATION	Name and Location of College or University	Degree, Diploma, or Certificate	Date Conferred	Major
Baccalaureate				
Graduate or Professional				
Other				

6

EXPERIENCE	Name of Employer	Rank or Title	Employment Dates
Current			
Previous			

7 **Attach curriculum vita including:** (a) other professional experience and activities, (b) memberships in scholarly and professional organizations, (c) publications, and (d) contracts and grants received. *(See back of form.)* CV attached: ☒ Yes ☐ No

8 I hereby certify that all information above is accurate and complete to the best of my knowledge. I understand that I am required to provide my Social Security Number so that the University can satisfy its income-reporting and withholding obligations under North Carolina and federal laws. I am voluntarily providing my Social Security Number on this form and permit the University to use it as an identifier for its other internal recordkeeping and data processing operations.

Signature: Date:

TO BE COMPLETED BY INITIATING UNIT

9 Is this position contingent on the availability of funds? ☐ Yes ☒ No

10 Date of nominee's first UNC-CH EPA appointment: Rank: Department:

TO BE COMPLETED FOR EPA NON-FACULTY NOMINEE ONLY

Title: Date:

Form AP-2 Instructions

An AP-2 form is to be completed for a new appointee who is Exempt for the Personnel Act (EPA) and to effect any subsequent changes in appointment. Only the section TO BE COMPLETED BY NOMINEE should be completed for student appointments. Also, this form should be submitted only for the initial appointment of a student. (See PD-7 Manual for exceptions.) For any subsequent student appointment, indicate on the PD-7 form, "AP-2 form on file".

Line 3 RACE and SEX. Enter the appropriate numerical Race Code and the Sex Code as follows:

Race Code

1 = White (not of Hispanic origin). Persons having origins in any of the original peoples of Europe, North Africa, or Middle East.
2 = Black (not of Hispanic origin). Persons having origins in any of the black racial groups.
3 = American Indian or Alaskan Native. Persons having origins in any of the original peoples of North America.
4 = Asian or Pacific Islander. Persons having origins in any of the original peoples of the Far East, Southeast Asia, Pacific Islands (China, Japan, Philippines, Korea, American Samoa, etc.), or Indian subcontinent.
5 = Hispanic. Persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish origin or culture, regardless of race.

Sex Code

M = Male
F = Female

Line 4 A relative, in general, includes the following:

Brother, Brother-in-law	Guardian or Ward	Sister, Sister-in-law
Daughter, Daughter-in-law	Half-Brother, Half-Sister	Son, Son-in-law
Father, Father-in-law	Husband, Wife	Stepdaughter, Stepson
First Cousin	Mother, Mother-in-law	Stepfather, Stepmother
Grandfather, Grandmother	Nephew, Niece	Uncle, Aunt
Grandson, Granddaughter		

Line 7 a. List all post-degree training and/or experience

c. Categorize publications under the following headings and list the inclusive page numbers, authors (in actual order), and publication (or in press) dates.

Book	Monograph
Book Chapter	Refereed* Article
Book Review	Other Article
Dissertation	Published Note or Abstract

* *Refereed Article:* If in press, in addition to the above information, list the target publication date. Also, if the article has been submitted and/or accepted for publication, list the number of manuscript pages and date submitted and/or accepted.

d. Provide titles or topics of contracts and grants for which you were Principal Investigator or Co-Principal Investigator, and identify funding agencies, beginning and ending dates, and total amount of awards.

Line 10 Date of nominee's first UNC-CH EPA appointment is the date of most recent continuous permanent or temporary appointment.

Line 12 Complete the PRESENT APPOINTMENT section only if nominee is currently employed by the University and is recommended for reappointment, promotion, and/or an additional title as follows:

Base Unit:	Enter the name of the nominee's present primary department, institute, or school.
Rank:	Enter the present rank held in the base unit.
Date Action Effective:	Enter beginning and ending dates of present appointment in base unit.
Joint Unit and **Joint Rank:**	Enter the name of each additional unit in which faculty rank is presently held and the corresponding rank.
Date Action Effective:	Enter beginning and ending dates of present joint appointment.

Complete the PROPOSED APPOINTMENT section as follows:

Base Unit:	Enter the name of the nominee's proposed primary department, institute, or school.
Rank:	Enter the proposed rank held in the base unit.
Date Action Effective:	Enter beginning and ending dates of proposed appointment in base unit.
Joint Unit and **Joint Rank:**	Enter the name of each additional unit in which faculty rank is proposed and the corresponding rank.
Date Action Effective:	Enter beginning and ending dates of proposed joint appointment.

Term Proposed: Check the appropriate block. If a probationary term at the rank of instructor, assistant professor or associate professor, or if a fixed term appointment, enter the duration of appointment.

Line 14 Letters of recommendation as required by divisional review procedures (Academic Affairs or Health Affairs).

Line 15 Recommendation is initiated by the Department Chairman or Dean, as appropriate, and submitted to the appropriate Administrative Office for review and approval.

Alphonse Mutima
Independent Studies

COURSE PROPOSAL

Course Name and Level: Elementary Swahili

Course Numbers: SWAH 001 and 002

Swahili 001 and 002 constitute the level of Elementary Swahili. Each will respectively be taught in four and a half months. Each has its objectives. These objectives are developmental in nature.

SWAH 001

SWA 001 is the first half of Elementary Swahili. It is for students with no or minimal proficiency. It focuses on 1) developing oral and aural proficiency for survival communication and, 2) fundamental grammar for simple sentence building.

SWAH 002

SWA 002 is the second half of Elementary Swahili. This course is for students who have successfully completed SWA 001 or students with some prior knowledge of Swahili who can produce simple sentences. The course focuses on 1) attaining oral and aural proficiency to function in daily communication situations; 2) developing reading and writing skills for functional literacy; 3) learning foundational grammar for complex sentence building.

Textbooks:

There will be two major textbooks used for SWAH 001 and 002

Russell, John. **Swahili-a Complete Course for Beginners** (NTC/Contemporary Publishing, 1996)

Zawawi, Sharifa. **Fast-Track Kiswahili** (Audio-Forum. Jeffrey Norton Publishers, Inc. 1999)

Both texts are accompanied with audio tapes. Their contents and structures fit the needs of a heterogeneous student body.

Dictionaries:

Awde, **Swahili-English/English-Swahili Dictionary** (Hippocrene Books, Inc., 2000)

Benjamin (Ed.), **The Kamusi Project: Internet Living Swahili Dictionary.**
This dictionary can be accessed through the World Wide Web: http:// www.Yale.edu/Swahili

Both dictionaries are available for student self-help.

Teaching Approaches:

Both courses (SWA 001 and 002) will be consecutively taught in nine months. Students that have access to computers will be taught via online. Those without the possibility of having access to computers will be taught through correspondence.

Online courses and telephone use:

Language acquisition includes four skills: 1) listening/comprehension, 2) speaking, 3) reading and, 4) writing. The lack of classroom interaction between the instructor and the students on one hand and interaction among students on the other hand requires the use of a website and telephone communications. The use of telephone calls between the instructor and the student seems necessary for the acquisition of listening/comprehension and speaking skills. Since both textbooks are accompanied with audio tapes, the telephone will be used reasonably to avoid high financial costs on the part of the students.

Correspondence courses and telephone use:

Students without access to a computer will be able to take both courses through a correspondence medium. They will use the same textbooks and will communicate with the instructor via the telephone and the post office to send and receive their assignments.

SWAH 001 and 002

Swahili: A Complete Course for Beginners will be used for SWAH 001. Its units are organized in dialogues that are culturally based. The English definition of vocabulary, the explanation of the Swahili grammar in English and pictures will be helpful to the student. The units in this textbook will include: 1) How are you, 2) Going to the post office, 3) In the hotel, 4) At the market, 5) At the craft shop, 6) Cooking at grandmother's, 7) Traveling is good, 8) A bus journey, 9) A good room, 10) Invitations, 11) Learning a language, 12) A day of troubles. The textbook also contains the maps of Tanzania and Kenya, two major Swahili-speaking countries. The Fast-Track Swahili content reinforces the content of the textbook used in Swahili 001. It is based on Globalization. Its units are also organized in translated dialogues that are enriched by interactive exercises. The students are given the opportunity to repeat words and sentences and reply to questions generated from the tapes. There are a lot of opportunities for self-correction. The units will include: 1) Meeting businesspersons and a journalist, 2) A Swahili family, 3) Education, 4) People's age, 5) Invitation, 6) Asking for directions, 7) Talking to the taxi driver and to the conductor, 8) Shopping, 9) At the post office, 10) Arranging long-distance phone calls, 11) In a restaurant, 13) When At customs, 14) in the hotel.

In "Fast-Track Swahili, every dialogue is illustrated by a picture that helps the learner fully understand the content and the meanings of words.

Weekly lessons:

In both media of instruction and in both courses, the lessons will be taught around units. Weekly lessons will be organized around one unit. Since the last units tend to be larger, two weekly lessons at that juncture could be organized around one unit, depending on the students' progress or needs. Graded assignments such as homework, quizzes, tests and final exams will be given to the students and graded via the web site for the students that will be using the online medium of instruction. With respect to the students that will be using the correspondence medium, assignments will be sent via the post office. Each week, there will be two homework assignments and a quiz. Also the students will have a monthly test and a final exam at the end of the term. Testing speaking skills will be conducted twice a week through short telephone calls. To make sure that the students are making progress in their learning process, the instructor will communicate with each one of them through email or phone calls. Such a way of communicating will help address any need or difficulties that the students might experience.

B. Hurmence, My Folks Don't Want to Talk About Slavery, 1984.

My Folks Don't Want Me To Talk About Slavery

Edited by Belinda Hurmence

Josephine Smith

Age 94 when interviewed at
1001 Mark Street, Raleigh, N.C.
by Mary A. Hicks

I was borned in Norfolk, Virginia, and I don't know who we belonged to, but I remembers the day we was put on the block at Richmond. I was just toddling around then, but my me and my mammy brought a thousand dollars. My daddy, I reckon, belonged to somebody else, and we was just sold away from him just like the cow is sold away from the bull.

A preacher by the name of Maynard bought me and Mammy and carried us to Franklinton, where we lived till his daughter married Dr. John Leach of Johnston Country; then I was give to her.

All my white folkses was good to me, and I reckon that I ain't got no cause for complaint. I ain't had much clothes, and I ain't had much to eat, and a –many a whupping, but nobody ain't never been real bad to me.

I remembers seeing a heap of slave sales, with the niggers in chains, and the speculators selling and buying them off. I also remember seeing a drove of slaves with nothing on but a rag betwixt their legs being galloped around before the buyers. About the worst thing that ever I seed, though, was a slave woman at Louisburg who had been sold off from her three-weeks-old baby, and was being marched to New Orleans.

She had walked till she was give out, and she was weak enough to fall in the middle of the road. She was chained with twenty or thirty other slaves, and they stopped to rest in the shade of a big oak while the speculators et their dinner. The slaves ain't having no dinner. As I pass by, this woman begs me in God's name for a drink of water, and I gives it to her. I ain't never be so sorry for nobody.

It was in the month of August, and the sun was bearing down hot when the slaves and their drivers leave the shade. They walk for a little piece, and this woman fall out. She dies there side of the road, and right there they buries her, cussing, they tells me, about losing money on her.

Dear Faculty / Staff Members:

Come see former Carolina Basketball greats at the Dean E. Smith Center on October 17th 2006 when the Charlotte Bobcats take on the Washington Wizards in a NBA preseason basketball game. As an employee of the University of North Carolina you can receive discounted tickets in both the lower and upper levels of the Dean E. Smith Center. To purchase these tickets please click the link below or copy and paste the web address into your web browser:

http://ev10.evenue.net/cgi-bin/ncommerce3/SEGetEventInfo?ticketCode=PR%3AUNC%3ASE07%3ANBA1%3AEMPLOYEE&linkID=unc&shopperContext=&caller=PR&appCode=&prc=EMPLOYEE

We look forward to seeing you in the Dean E. Smith Center for a night of exciting NBA preseason basketball!

Subject: Travel

Hi Professor Selassie,

I have good news about your travel. They are going to go ahead and process your travel so that you can get your money soon and then they told me that if you can get your receipt in at a later time that they will reimburse you for that as well.

Thanks,

Travis

AFRI 101: INTRODUCTION TO AFRICAN CIVILIZATION
SPRING 2007

Instructor: Professor Bereket H. Selassie
Office: 209 Battle Hall
Office Hours Tues. and Thurs. 11-12

READING MATERIAL

1, Main Text: April A. Gordon and Donald L. Gordon, Understanding Contemporary Africa, 4th Edition. This is required reading.
2. Chinua Achebe, Things Fall Apart

Additional readings will be assigned from time to time, as appropriate.

COURSE REQUIREMENTS AND GRADING

Map Quiz	15 points	(15% of final grade)
Report of Things Fall Apart	5 points	(5% of final grade)
Mid-Semester Exam	35 points	(35% of final grade)
Final Exam	45 points	(45 of final grade)

NB Grade Equivalent:

A = 96-100;	A- = 91-95		
B+ = 87-90;	B = 81-86;	B- = 77-80	
C+ = 70-76	C = 63-69;	C- = 59-62	D =below 59 (I do not believe in F

COURSE SUMMARY

As an introduction to African Civilization, this Course offers general discussion on the essential ingredients of the African world—its history, geography, culture, government and society. Any attempt at wide coverage necessarily sacrifices depth of treatment, and vice versa. Accordingly, only those aspects that are representative of the countries and their governments have been selected for special focus as bases of discussion, or for reading assignments. Videos or films by African scholars and/or filmmakers will also be shown, as indicated in the timetable below.

SCHEDULE & READING GUIDELINES

Sessions:

1. Roll Call and Overview
2. "Triple Heritage" Video/Film show
3. Historical Context. Read Text, pages 1-6; and 23-53
4. Geographic Overview. Read Text, pages 7-22
5. Impact of Colonial Rule. Read Text, pages 60-64
6. "Hopes on the Horizon." Video/Film show
7. African Reaction to Colonial Rule. Read Things Fall Apart
8. Independence and the Politics of Nation-building. Read Text, pages 64-76
9. Economic Dimension of Independence. Read Text, pages 109-150

10. African International Relations I: Decolonization, Pan-Africanism and Economic Dependence. Read Text, pages 155-173

Map Quiz: February 15

11. African International Relations II: The Role of Foreign Powers in African Affairs. Read Text, pages 173-189
12. Religion in Africa. Read Text, pages 317-347 [**Note Map 11.1 on page 345]**
13. Law and Society
14. Third Video/Film show
15. African Literature—Discussion on Things Fall Apart
16. Current Crisis Areas of Africa
17. Globalization and Regional Problems

Spring Break: March 91-19

Mid –Semester Exam: March 20

18. Nigeria and South Africa Compared [Reading to be assigned]
19. Ethiopia and Liberia Compared [Reading to be assigned]
20. African Environmental Problems. Read chapter 8 of Text
21. Conflict and the Challenge of Democracy and Development
22. First and Second Report on the Environment
23. Third and Fourth Report on the Environment
24. Review of Recurrent Themes—Overview
25. Review of Recurrent Themes—General/Historical
26. Review of Recurrent Themes—Social Economic
27. Review of Recurrent Themes—Political/Strategic. Conclusion

The University of North Carolina at Chapel Hill
RECOMMENDATION FOR EPA PERSONNEL ACTION
(Please type. See instructions on reverse side.)

☐ INITIAL APPOINTMENT ☐ REAPPOINTMENT ☐ PROMOTION ☐ OTHER (specify):

CURRENT INFORMATION **TO BE COMPLETED BY NOMINEE**

1 Name: _____
Last *First* *Middle*

2 Address: _____ Telephone No. _____

3 Date of Birth: _____ Birthplace: _____ Citizenship: _____ (*Country*) Race: _____ (*Code*) Sex: _____ (*Code*)

4 Are you related by blood or marriage to any person now employed by The University of North Carolina at Chapel Hill?

☐ Yes ☒ No If yes, give the relative's name, relationship and department name: *(See back of form.)*

5

EDUCATION	Name and Location of College or University	Degree, Diploma, or Certificate	Date Conferred	Major
Baccalaureate				
Graduate or Professional				
Other				

6

EXPERIENCE	Name of Employer	Rank or Title	Employment Dates
Current			
Previous			

7 **Attach curriculum vita including:** (a) other professional experience and activities, (b) memberships in scholarly and professional organizations, (c) publications, and (d) contracts and grants received. *(See back of form.)* CV attached: ☒ Yes ☐ No

8 I hereby certify that all information above is accurate and complete to the best of my knowledge.

Signature: Date:

TO BE COMPLETED BY INITIATING UNIT

9 Is this position contingent on the availability of funds? ☐ Yes ☒ No

10 Date of nominee's first UNC-CH EPA appointment: Rank: Department:

TO BE COMPLETED FOR EPA NON-FACULTY NOMINEE ONLY

11 Position Title: Date Action Effective -- Beginning: Ending:

TO BE COMPLETED FOR FACULTY NOMINEE ONLY

12

	Present Appointment (if applicable)		Proposed Appointment	
Base Unit				
Rank				
Date Action Effective	Beginning	Ending	Beginning	Ending
Joint Unit				
Joint Rank				
Date Action Effective	Beginning	Ending	Beginning	Ending

If the nominee is currently holding tenure to retirement, indicate the initial date tenured: _____

Term Proposed: ☐ Tenure to Retirement ☐ Probationary term of _____ years Fixed term of _____

13 If initial appointment (including initial tenure track), interviewed by: _____

14 Letters of recommendation by:

RECOMMENDED BY

15 This recommendation meets the University's requirements as follows: Nepotism Policy: ☒ Yes ☐ No

Affirmative Action Plan: ☒ Yes ☐ No ☐ Not Applicable Credentials Verification: ☐

Signature: _____

Title: Date:

Form AP-2 Instructions

An AP-2 form is to be completed for a new appointee who is Exempt for the Personnel Act (EPA) and to effect any subsequent changes in appointment, reappointment, or promotion.

Line 3 RACE and SEX. Enter the appropriate numerical Race Code and the Sex Code as follows:

Race Code

1 = White (not of Hispanic origin). Persons having origins in any of the original peoples of Europe, North Africa, or Middle East.
2 = Black (not of Hispanic origin). Persons having origins in any of the black racial groups.
3 = American Indian or Alaskan Native. Persons having origins in any of the original peoples of North America.
4 = Asian or Pacific Islander. Persons having origins in any of the original peoples of the Far East, Southeast Asia, Pacific Islands (China, Japan, Philippines, Korea, American Samoa, etc.), or Indian subcontinent.
5 = Hispanic. Persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish origin or culture, regardless of race.

Sex Code

M = Male
F = Female

Line 4 A relative, in general, includes the following:

Brother, Brother-in-law	Guardian or Ward	Sister, Sister-in-law
Daughter, Daughter-in-law	Half-Brother, Half-Sister	Son, Son-in-law
Father, Father-in-law	Husband, Wife	Stepdaughter, Stepson
First Cousin	Mother, Mother-in-law	Stepfather, Stepmother
Grandfather, Grandmother	Nephew, Niece	Uncle, Aunt
Grandson, Granddaughter		

Line 7 a. List all post-degree training and/or experience

c. Categorize publications under the following headings and list the inclusive page numbers, authors (in actual order), and publication (or in press) dates.

Book	Monograph
Book Chapter	Refereed* Article
Book Review	Other Article
Dissertation	Published Note or Abstract

* *Refereed Article:* If in press, in addition to the above information, list the target publication date. Also, if the article has been submitted and/or accepted for publication, list the number of manuscript pages and date submitted and/or accepted.

d. Provide titles or topics of contracts and grants for which you were Principal Investigator or Co-Principal Investigator, and identify funding agencies, beginning and ending dates, and total amount of awards.

Line 10 Date of nominee's first UNC-CH EPA appointment is the date of most recent continuous permanent or temporary appointment.

Line 12 Complete the PRESENT APPOINTMENT section only if nominee is currently employed by the University and is recommended for reappointment, promotion, and/or an additional title as follows:

Base Unit:	Enter the name of the nominee's present primary department, institute, or school.
Rank:	Enter the present rank held in the base unit.
Date Action Effective:	Enter beginning and ending dates of present appointment in base unit.
Joint Unit and **Joint Rank:**	Enter the name of each additional unit in which faculty rank is presently held and the corresponding rank.
Date Action Effective:	Enter beginning and ending dates of present joint appointment.

Complete the PROPOSED APPOINTMENT section as follows:

Base Unit:	Enter the name of the nominee's proposed primary department, institute, or school.
Rank:	Enter the proposed rank held in the base unit.
Date Action Effective:	Enter beginning and ending dates of proposed appointment in base unit.
Joint Unit and **Joint Rank:**	Enter the name of each additional unit in which faculty rank is proposed and the corresponding rank.
Date Action Effective:	Enter beginning and ending dates of proposed joint appointment.

Term Proposed: Check the appropriate block. If a probationary term at the rank of instructor, assistant professor or associate professor, or if a fixed term appointment, enter the duration of appointment.

Line 14 Letters of recommendation as required by divisional review procedures (Academic Affairs or Health Affairs).

Line 15 Recommendation is initiated by the Department Chairman or Dean, as appropriate, and submitted to the appropriate Administrative Office for review and approval.

Hi All,
I have been given a task from my higher up of finding out if these classes are meeting in one of our GPC or if they are in your departmental rooms. Can you please take a look at your attachment, find your class, and tell me where you think this class meets. I have until Oct. 1st to find this info so I won't start hounding after you for about a week. But the sooner I know the better! Thanks a 999,999! I am saving my thanks a million for another day, ya never know when one might need it!
Derek

Subject: paychecks

Hi Mrs. Snipes,

My name is Travis Gore and I work in the department of African and Afro-American studies. I am the one that picks up paychecks for our department. I might not be able to pick up the paychecks next Friday if I have to head out of town due to some last minute arrangements. I haven't cleared it with my boss yet but I plan to talk to her this afternoon. So If that is the case, I just wanted to make sure I had everything covered and I was wondering how to go about getting the paychecks.

Thank you.

Travis Gore

Is there anyone else that you can place this responsibility to? IF so,
then you will need to have the department chairman send a signed memo to
my attention with the name of the person that can pick up checks so this
can be added to the check pick up log.
Thanks!
Betsi

Travis,

Here is a copy of my syllabus for Afri 480. I believe that I have 40 students enrolled.

You can leave the copies on my desk or in my box.

Thanks

African Studies 480: Ethnography of Africa

This course uses ethnography (detailed case studies) to introduce you to the study of African cultures and societies. By examining ethnographic texts you will learn about topics in African studies such as systems of thought, aesthetics and arts, the economy, politics, social organization, and identity. You will also learn about the production of ethnographic texts as a sub-discipline of anthropology and the issues that this raises with respect to the politics of representation.

Course Requirements: All students are expected to attend all classes and to complete all assigned readings. Attendance and participation will be considered in assigning final grades. Your final grade will be based on the assignments listed below. Please take note of the dates on which the assignments are due. Late papers will be penalized.

First Quiz (Feb 12)	15%	Presentation (Optional)	15%
Second Quiz (Mar 27)	20%	Analytic paper (April 24)	20%
Final exam (May 6)	20%	Attendance and participation	10%

Readings and Attendance: The ethnographic genre, by definition, is comprised of written texts. The only way to master this genre is to engage in a close textual reading of the assigned texts. Therefore, it is essential that we read the assigned readings and come to class prepared to discuss these readings.

Analytic Paper: You will have the opportunity to write an analytic essay (7 pages) on either 1) an ethnography written on a particular African ethnic group, or 2) an ethnographic examination of an issue relevant to African studies. This should be an examination of one monograph length text. Article length manuscripts are not acceptable. I strongly encourage everyone to select a text to examine before April 1 and to check with me to make sure that the text you have selected is appropriate.

Presentation: You will have the opportunity to make a short (10 to 15 minute) presentation on your paper. This is an optional assignment for which there are a limited number of spaces. These spaces will be made available on a first come basis. If you decide not to make a presentation the 15% allocated for this assignment will be evenly distributed between the other assignments. If you sign up to make a presentation you will be required to complete this assignment.

Texts: The following texts are available at the Student Store. They are also on reserve at the Undergraduate Library: Course Pack for Afri 480; E. E. Evans-Pritchard. *The Nuer*. Oxford University Press; Charles Piot, *Remotely Global,* Chicago University Press; Leslie Sharp, *The Sacrificed Generation*, Unviersity of California Press.

The Honor Code is, as always, in effect for this course.

Readings and Topics:

Introduction: Jan 10

Classic Approaches to Politics and Social Organization (Jan 15 – Jan 24)

- E.E. Evans-Pritchard, *The Nuer*

Witchcraft and Ritual (Jan 29 – Feb 7)

- Evans-Pritchard, "The Notion of Witchcraft Explains Unfortunate Events," *Coursepack*
- Douglas, Mary, "Animals in Lele Religious Symbolism" *Coursepack*

First Quiz: Feb 12

Systems of Belief (Feb 14 – Feb 26)

- Barber, Karin, "How Man Makes God in West Africa," *Coursepack*
- Kopytoff, Igor, "Ancestor's as Elders in Africa," *Coursepack*

The Meanings of Money and Work (Feb 28 – Mar 6)

- Bohannan, Paul, "Some Principles of Exchange and Investment among the Tiv," *Coursepack*
- Hutchinson, Sharon, "The Cattle of Money and the Cattle of Girls Among the Nuer," *Coursepack*
- Charles Piot, *Remotely Global*

Sex and Gender (Mar 18 – Mar 25)

- Van Allen, "Sitting on a Man," *Coursepack*
- Mona Etienne, "Women and Men, Cloth and Colonization," *Coursepack*

Second Exam: Mar 27

Ethnography and Colonialism (Apr 1 – Apr 10)

- Ranger, Terence, "The Invention of Tradition in Colonial Africa." *Coursepack*
- Frantz Fanon, "Algeria Unveiled," *Coursepack*
- Lesley Sharp, *The Sacrificed Generation*

Presentations (Apr 15 – Apr 24)

Final Exam: May 6 (8 am)

*** This syllabus is subject to change as deemed appropriate by the instructor.**

To: undisclosed-recipients:;

Greetings,

Please find attached the link to download the Astra Scheduling Software to your computer. Please let us know if you have any questions.

Just a reminder, DO NOT USE SCREEN 134 in SIS which is the meeting pattern screen.

We are also not using the software at this time to do any event scheduling.
Further training is necessary for event scheduling.

An additional email will be sent with information regarding dates and times for Astra workshops.

Have fun!
Renee

Scheduling Team Lead
Office of the University Registrar
Suite 3100, CB#2100
Student Academic Services Building-North
University of NC at Chapel Hill
Chapel Hill, NC 27599-2100
(919)962-6093 * (919)843-8709 fax
rsherman@email.unc.edu

Installing the Ad Astra client

Step 1: Download the software

Go to http://classrooms.unc.edu/astra.6.setup.exe and save the file to your local computer.

Step 2: Install the software

Double-click the astra.6.setup.exe file to begin the installation.

An install wizard appears that will walk you through the steps of installing the Ad Astra client. Click *Next* to go to the next screen. Choose where you would like to install the software on your local hard drive. By default, it will install Ad Astra to C:\AstraSchedule. Click *Next*.

On the screen that follows, you will select the components of Ad Astra you wish to install. Put a checkmark next to only **Astra Schedule.** You will not have access to the other components of this application. Click *Next*.

On the following screen - Select Program Manager Group - click *Next*.

You are ready to install Astra Schedule Client. Click *Next* to begin.

The software installs. Click *Finish* to end.

Step 3: Configuring Astra client

On your desktop, you will see a shortcut entitled 'AstraSchedule'. Double-click this shortcut to start the Astra software.

Use the following settings to connect to the Astra server.

Enter your username and password. You are ready to begin using Astra!

Civilian Leadership Transformation and Effective Dialogue Between the Military and Civilian Leadership

Readings:

E. Gryimah-Boadi, "Africa: The Quality of Political Reform"

George McAleer, "Leaders in Transition: Advice From Colin Powell and Other Strategic Thinkers"

African Leadership Council "Code of African Leadership"

Brigadier-General Daniel K Frimpong "Leadership and the Challenges of Command: "The Ghana Military Academy Experience"

Eboe Hutchful, "Demilitarising the Political Process in Africa: Some Basic Issues"

Introduction:

1. The primary context in the discussion of civilian and military leadership in Africa is the "democratizing" process which has been underway in Africa since the late 1980s.

2. In the period 1965-1990, any discussion of either civilian or military leadership in Africa was conducted in the context of military rule or one-party political systems. Either way, the relationship between the two elements was greatly affected by the "undemocratic" nature of their existence.

a) For the military, the institution had violated the cardinal rule of military professionalism by carrying out coups d'etat.

b) For civilian leadership, it no longer had legitimacy because of muzzling alternative voices in society.

The two sides reflected the lack of democracy; and also violated the basic principles of the Hutingtarian thesis of "Objective Control" and "Subjective Control" of the military. ef: Samuel P Huntington, Soldier and State

3. The lack of democracy also meant that no effective dialogue could take place between civilian and military leadership. The consequences of this lack of effective dialogue led to (a) ineffective civilian leadership, and b) ineffective military leadership.

Changing Context of Politics in Africa

1. In the 1990's, Africa became part of the global surge in democratization. The main elements of democratization included:

a) Multi-partysm
b) emergence of an active civil society
c) the retreat by the military to the barracks
d) the acceptance of global standards for human rights as con?? in the various international instruments.

2. These changes necessitated the rethinking of leadership on the part of both civilian and military leadership. Elements of this "rethinking" included:

a) the nature of civil-military relations
b) constitutionalism and the rule of law
c) Professionalism in the military
d) Civilian responsibility to the military

The "rethinking" on the relationship between the civilian and military sectors has necessitated the following:

a) To critically examine the types of leadership one finds in both the civilian and military sectors (the need to have/develop "strategic" thinkers);
b) To think about security sector reform and the implications for both civilian and military sectors.

Reconceptualization of Security and Its Implications for Leadership

-African scholars, leaders and commentators have been in the forefront in accepting and embracing the new conceptualization of security; from military security to HUMAN security.

This reconceptualization has implications for the type of leadership that needs to be developed in Africa; and does affect the way military and civilian leadership relate to each others (discuss this in detail): economic underdevelopment; globalization; civil conflict; social development; etc)

What are the difficulties (in terms of practice) associated with the adoption of Human Security as the operational concept?
How are militaries dealing with it?
How are civilians dealing with it?

Strategic Thinking/Strategic Leadership
The practice of leadership is always contextual, but there are some qualities as characteristics that can be universally applied. These standards may help us assess whether one is a good leader or not.

Questions to be asked in this context:
a) What is ethical leadership?
b) What is effective leadership?

c) What is strategic leadership?
d) Do leadership qualities differ/transferable from civilian to military?
e) What has been Africa's experience with strategic leadership?
f) What needs to be done?

Questions for participants:

Afro-American Studies 102:
The Black Experience since 1865
Fall 2008
Dr. Kenneth Janken

How to reach me
My office telephone number is 962-1519.
My email address is "krjanken@email.unc.edu".
My office is 301 Battle Hall.
My office hours are Wednesday mornings, 9:15-11:15. Please stop by!

If you have computer or Blackboard issues, call the Information and Technology Services Response Center at 962-4357. You may be able to borrow a laptop for the midterm and final if yours needs repairs. *I am sorry, but I am unable to help you with your technology problems.*

Required Readings – also available on two-hour reserve in the U.L.
Nell Irvin Painter, *Creating Black Americans*
Women in the Civil Rights Movement, ed. Vicki L. Crawford, et. al.
John David Smith, *Black Voices from Reconstruction*
Selected readings available on the Blackboard course page. Follow "Course Documents" link.
Selected readings on e-reserve. See the library's e-reserve page for the links.

Course Requirements

1. Weekly homework (usually a 250-word essay) *due at the beginning of class on Tuesdays*, worth 6% of final grade. The assignment will be posted to Blackboard on Fridays. In order to receive credit for this portion of the grade, students may miss no more than one homework assignment. Students who miss two or more assignments will receive no credit. I will not accept late assignments.
2. Of the weekly homework assignments, I will choose two for grading. Each graded assignment is worth 12% of the final grade.
3. A midterm exam worth 35% of final grade. **Midterm date: October 2**
4. A final exam, worth 35% of final grade.
5. Class Attendance. Students who regularly miss class will not pass.

About computers in class
Graded work produced in class must be written on your laptop computer using Securexam software. To learn about this software, visit http://securexam.unc.edu/. More information will be forthcoming.

Otherwise, I do not allow students to use laptops in class. Also, please turn off cell phones, PDAs, iPods and MP3 players, and other electronic devices that will only distract you and me from what is happening in class.

Weekly Topics

WEEK ONE (August 19, 21): Introduction to the course; the Civil War.
READINGS: *Creating Black Americans*, chapters 4 and 5.

WEEK TWO (August 26, 28): Reconstruction.
READINGS: *Black Voices from Reconstruction*, chapters 1-5.

WEEK THREE (September 2, 4): Reconstruction.
READINGS: *Black Voices from Reconstruction*, chapters 6-10 and conclusion..

WEEK FOUR (September 9, 11): Moving toward the Nadir.
READINGS: *Creating Black Americans*, chap. 7, section titled "The Destruction of Democracy"; and link on Blackboard: *1898 Wilmington Race Riot Report*, chapters 2-3.

WEEK FIVE (September 16, 18): Disfranchisement and violence in North Carolina.
READINGS: link on Blackboard: *1898 Wilmington Race Riot Report*, chapters 4-5.

WEEK SIX (September 23, 25): Campaign against lynching.
READINGS: Links on Blackboard: Ida B. Wells, "Lynch Law in America"; Patricia Schechter, "Unfinished Business: Ida B. Wells against Lynching, or, How Antilynching Got Its Gender," in *Under Sentence of Death*, ed. Fitzhugh Brundage.

WEEK SEVEN (September 30, October 2): Protest and accommodation
READINGS: *Creating Black Americans*, chap. 8; links on Blackboard to Booker T. Washington's "Atlanta Compromise" speech and W.E.B. Du Bois's critique of Washington.

WEEK EIGHT (October 7, 9): World War I, the Great Migration, & the New Negro.
READINGS: *Creating Black Americans*, chap. 9.

WEEK NINE (October 14): Strategy alternatives in the Great Depression.
READINGS: *Creating Black Americans*, chap. 10; link on Blackboard to Du Bois, "A Negro Nation within the Nation"

WEEK TEN (October 21, 23): War, Post-war, and Cold War.
READINGS: *Creating Black Americans*, chapters 11 and 12.

WEEK ELEVEN (October 28, 30): Preparation for the Civil Rights Movement.
READINGS: *Women in the Civil Rights Movement*, chapters 15, 5, 8, 11, and 6.

WEEK TWELVE (November 4, 6): The civil rights revolution.
READINGS: *Creating Black Americans*, chap. 13; *Women in the Civil Rights Movement*, chapters 2, 3, and 7; link on library e-reserves to the *Journal of American History* 91 (June 2004). I will assign selected articles from this journal.

WEEK THIRTEEN (November 11, 13): Radicalism and Black Power I.
READINGS: *Creating Black Americans*, chap. 14.

WEEK FOURTEEN (November 18, 20): Radicalism and Black Power II.
READINGS: Link on Blackboard to "From Black Power to Multicultural Organizing in Greensboro."

WEEK FIFTEEN (November 25): Affirmative action.
READINGS: Link on library e-reserves to the *Journal of American History* 91 (June 2004). The article to read is Thomas J. Sugrue, "Affirmative Action from Below."

WEEK SIXTEEN (December 2): The Present.
READINGS: *Creating Black Americans*, chap. 15 and epilogue.

In-class final exam will be Friday, December 12, 9-11. If final is take-home, it must be uploaded by 11:15 A.M. on Friday, December 12.

Curriculum in African and Afro-American Studies

Policies on Faculty Personnel Actions

April 6, 1995

I. Introduction

The principal aims of the Curriculum in African and Afro-American Studies are to preserve, to increase, and to transmit knowledge and understanding of African and Afro-American Studies. These aims are furthered by the scholarly activity of the faculty and by their teaching of a variety of courses at different levels to undergraduate and graduate students. In hiring and promoting faculty, the curriculum seeks to maintain its high standards of teaching and of scholarship. It also encourages service to the curriculum, the University, the professional community, and the State. The Curriculum in African and Afro-American Studies seeks to be as objective, fair, and honest as possible in matters of hiring and promotion. It reaffirms at this time its goal of quality combined with diversity. All hiring and promotion take place within the context of curriculum needs and resources (chiefly salary funds), as well as the rank and tenure patterns within the curriculum. The curriculum subscribes wholeheartedly to the guidelines of Affirmative Action and commits itself to make personnel decisions with all possible justice to both the University and the individuals concerned.

The curriculum's policies are subject to those set forth in the following University publications. The most recent edition of each document takes precedence.

A. The Code, Board of Governors, UNC, (August 1988 edition).

B. Trustee Policies and Regulations Governing Academic Tenure in the University of North Carolina at Chapel Hill, (July 1, 1994 edition).

C. The Faculty Code of University Government, the

University of North Carolina at Chapel Hill (January 1991 edition).

D. Affirmative Action Plan, University of North Carolina at Chapel Hill, (most recent edition).

E. Administrative Guide for the Processing of Personnel Action in the College of Arts and Sciences, Office of the Dean, College of Arts and Sciences, the University of North Carolina at Chapel Hill. (most recent edition).

F. Memorandum from the Dean on Personnel Procedures in the College (January 5, 1994).

This statement is supplemental to, and subject to, the above policies. Each faculty member has the responsibility to become familiar with their provisions.

II. Standards

Some of the standards that this curriculum applies to the evaluation of candidates are qualitative and cannot be expressed quantitatively. Therefore, they inescapably entail subjective judgment. It is therefore not possible to reduce the evaluation of academic personnel to the purely objective determination that certain things have been done and a specific period of time has passed.

The Department may recommend any candidate for promotion and/or permanent tenure before the expiration of his or her probationary term if the quality of the candidate's record justifies an early recommendation.

Prerequisite to the appointment or reappointment of any candidate is the prospective and continuing need for the services that he or she, as a teacher-scholar-artist-performer in a particular field, is qualified to carry out. Where this need does not exist, or has disappeared or may disappear, or where program change or curtailment of funding obliges the University to discontinue support, appointment or reappointment is precluded. However, an appointment of an individual to a tenure-track position is based on the belief that the appointment meets a continuing need of the curriculum.

The following standards will be employed in evaluations for reappointment, promotion, and tenure:

(a) A demonstrated commitment to teaching excellence is a prerequisite for the consideration of tenure. While its presence without the other two general standards also being met will not bring tenure, its absence is sufficient to deny tenure.

(b) A demonstrated commitment to quality research [or its equivalent in artistic performance and creative activity] is a prerequisite for the consideration of tenure.

(c) Service to the University and the State and to one's academic profession is an additional consideration in the overall assessment of a faculty colleague. Service is not deemed a substitute for excellence in teaching and excellence in research.

A. Standards of Teaching

The Curriculum in African and Afro-American Studies expects and encourages teaching of the highest quality. Although it is not possible to enumerate here all criteria of teaching, a good teacher is one who prepares his or her course with the discrimination and skill needed for good scholarship; responsibly formulates the objectives of the course and uses imaginative ways of achieving them; commands the attention of students; stimulates their interest; enlarges their minds; improves their thinking; and, to the extent that it is possible, makes them active rather than passive participants in the course. An excellent teacher demands substantial accomplishment and high standards of work, grades all work fairly, is articulate and resourceful, and bases what he or she teaches on evidence and sound method. In addition, where appropriate, such a teacher conscientiously provides helpful advice and guidance to both graduate and undergraduate students on an individual basis, directs theses and dissertations, and serves on committees that critically examine and evaluate such research projects. In short, what the curriculum looks for is an individual's generous involvement in teaching.

B. Standards of Research [and Creative Artistic Activity]

The Curriculum in African and Afro-American Studies expects and encourages its faculty to be actively involved throughout their careers in significant scholarly research [or creative artistic activity]. Scholarship is understood as the advancement of knowledge and understanding and consists substantially of original research or interpretation that is part of a coherent project. The central result of scholarship is publication. The Curriculum in African and Afro-American Studies strongly encourages such publication as an obvious way of extending knowledge and of sharing the fruits of scholarly thought and investigation with a wider audience that can be both critical and appreciative.

At the same time, the curriculum insists on regarding quality of publication as more important than quantity. Artistic creative activity is for some faculty in the curriculum what scholarship is for others.

Exhibition or performance is for faculty engaged in artistic creative activity what publication is for faculty engaged in scholarship. The curriculum expects its artistic creative faculty to be involved significantly in exhibition or performance. Again, the curriculum insists on regarding quality of exhibition or performance as more important than quantity.

C. Standards of Service

A service assignment is well done when its goals are pursued diligently, imaginatively, and responsibly, with concern for deadlines and appropriate results. Conscientious and efficient performance combined with collegiality, tact, and

resourcefulness bring credit to the individual and the curriculum and will be recognized.

Instructors and assistant and associate professors without permanent tenure are expected to undertake only those service functions the curriculum chair may assign, and to concentrate their efforts on teaching and scholarship. Although their main business is teaching and research, junior members of the curriculum will be called upon to perform a number of service activities: work on curriculum committees, cooperation in programs benefiting North Carolina high school students, and the like. An attitude of cooperation, collegiality, and competent performance of these duties is expected in service activities.

III. Criteria for Specific Personnel Actions

A. Fixed-term faculty ranks: Lecturer and its equivalent

Lecturer, artist-in-residence, writer-in-residence, and the traditional academic ranks from instructor through professor accompanied by one of the prefix qualifications "adjunct," "clinical" or "research," are of a fixed-term duration.

Such an appointment is appropriate for one who possesses unusual qualifications for teaching, research, academic administration, or public service from an academic base, but for whom none of the professorial ranks nor the instructor rank is appropriate. These appointments are also appropriate if the continued availability of special funding for the position is a matter of concern or for other valid institutional reasons. Initial appointment may be for a fixed- term of from one to five years. Subsequent appointments for fixed- terms of one to five years duration may be made either in direct succession or at intervals. Each is considered an initial appointment. Every such appointment or reappointment is dictated by unusual needs and situations. Qualifications are therefore determined by the curriculum chair, in consultation with the curriculum advisory committee and/or the ad hoc search committee entrusted with the search for the position.

B. Instructor

The candidate approved by the curriculum to be recommended for an appointment as an assistant professor but who, when approved, is still completing a doctoral dissertation, will be recommended for an appointment as instructor for one year with the special provision that upon conferral of the doctorate he or she will be reappointed at the rank of assistant professor, and with the further proviso that the effective date of his or her appointment at the rank of assistant professor will be retroactive to the effective date of his or her current appointment as instructor, or to the July 1 or January 1 immediately preceding the date of conferral. Such an appointment will carry the title "instructor with special provision."

C. Assistant Professor

This rank denotes a tenure-track position, with an initial appointment for four years and the possibility of reappointment for three additional years.

1. Standards for initial appointment

Clear promise of excellence in teaching, scholarship, and service and completion of all requirements for the doctorate or other terminal degree and the degree's conferral are required.

2. Reappointment for a second probationary term or promotion

The initial review and recommendation for reappointment or promotion occurs by the end of the third year of the initial probationary appointment. For an assistant professor already serving in the curriculum, reappointment is based on (a) demonstrated excellence in teaching, (b) concrete evidence of serious and original scholarship [or significant artistic creative activity], (c) appropriate service to the curriculum, and (d) the needs and resources of the curriculum and University.

D. Associate Professor

In evaluating past performance, present achievements, and promise for the future, the following factors will be considered: (1) the candidate's teaching should be very good in several courses and clearly distinguished in at least one area; (2) the candidate must have made scholarly contribution(s) of demonstrable value to the field of inquiry [or serious and substantial contribution to his or her artistic field]; (3) the candidate must be recognized as a helpful and valued colleague, one who has willingly and conscientiously performed needed services within the academic community; (4) the candidate's contributions must be deemed consistent with the needs and resources of the curriculum and University.

Promotion to associate professor confers tenure. Tenure is a permanent commitment by the curriculum and the University. Recommendation for tenure requires a judgment not only about the past and present achievements of the candidate but about his or her potential for future achievements as well as the projected needs of the curriculum and the University. While emphasizing proven excellence in teaching and research, the curriculum remains very much concerned, in questions of tenure, that a person show promise of continuing achievement in all three areas, teaching, research, and service. A professional judgement on the part of the faculty and the Chair about both the future direction and needs of the curriculum and a careful assessment informed by outside references about the qualification of the candidate for helping to meet those needs is necessarily a part of any tenure decision.

The curriculum will decide whether to recommend tenure following an initial appointment as an associate professor on the basis of the criteria outlined above for promotion to associate professor. Under exceptional circumstances, an associate professor appointed from outside the curriculum may be recommended for an appointment with tenure.

E. Full Professor

A candidate for full professor should have made significant contributions in the field beyond those expected of an associate professor with tenure. As a scholar, artist, or creative performer, the candidate should have a record of sustained research and high quality publication, or sustained artistic creativity, and distinctive achievements sufficient to have gained significant recognition in the field. The candidate should have a demonstrated commitment to continued excellence in teaching. The candidate should have a record of service that demonstrates the capacity for constructive contributions to the curriculum and the University.

F. Joint Appointments

In order to be recommended for a joint tenure-track appointment in the Curriculum in African and Afro-American Studies , a faculty member must meet the standards for the rank for which he or she is being considered and must simultaneously meet the standards for the same rank in another curriculum, so that he or she will have the same rank in both curriculums. A joint appointment is not extended as a courtesy. The curriculum will initiate or approve a joint appointment, and participate in the recommendation it requires, only if the joint appointment effectively meets a serious curriculum need.

G. General Recruiting Procedures

Recruiting of new faculty is undertaken with three considerations in mind: (1) that constant attention is given to the dictates of justice so that recruiting complies with governmental and university requirements; (2) that all aspects of recruiting are conducted with unfailing courtesy; (3) that recruiting is undertaken with a view to the curriculum's future development as well as its immediate needs.

IV. Procedural Sequence for Reappointment, Promotion, and Conferral of Tenure

Assistant Professor

a. In the third year after the initial appointment to a four-year term, Assistant Professors are reviewed and recommended for either reappointment to a second probationary term of three years or non-reappointment.

b. If reappointed, Assistant Professors are reviewed during their sixth year for consideration for promotion to Associate Professor, with conferral of tenure; non-reappointment; or under distinctly exceptional circumstances, reappointment at the rank of Assistant Professor with conferral of tenure.

c. If not recommended by the Chair to be reappointed at the end of the initial or the second probationary term, the Assistant Professor will be notified of the Chair's recommendation by the Chair no later than 12 months before the end of his or her current probationary appointment term.

d. When an Assistant Professor receives permanent tenure at that rank, he or she must be reviewed for promotion at least every third year after the conferral of tenure.

Associate Professor

a. No later than the fourth year of an initial appointment to a five-year term, Associate Professors are reviewed for reappointment as Associate Professor, with tenure; promotion to Professor; or non-reappointment.

b. If recommended by the Chair not to be reappointed at the end of the probationary five-year term, the Associate Professor must be notified of the Chair's recommendation by the Chair no later than 12 months before the end of his or her probationary appointment.

c. When an Associate Professor has completed five years in rank and has been reappointed with tenure, then he or she must be reviewed for possible promotion to Professor every third year thereafter.

d. An Associate Professor promoted to that rank at the University of North Carolina at Chapel Hill must be reviewed in his or her fifth year in that rank and every third year thereafter for possible promotion to Professor.

e. An Associate Professor appointed from outside the University without tenure may be reappointed with tenure before the end of his or her initial appointment. He or she will then be reviewed for promotion in the fifth year after the initial appointment as Associate Professor and every third year thereafter until promotion to Professor.

Hi Travis,
Eunice and I are planning a round table on the election. It will take place next Monday at noon - you booked Toy Lounge for it. We'd like to have some juices/sodas and bottled water and will need help getting the drinks to Toy Lounge. Would you and our student assistant be able to help us? I could put the drinks in my car, but the closest parking would probably be near Memorial Hall. We could try to take the drinks between 11:30 -12:00. Please let me know if you have any suggestions and if some type of cart might be a possibility.

Thanks,
Kia

Afri 368: Political Protest and Conflict in Africa

This course surveys contemporary forms of political conflict and protest in Africa. The objective is to use political conflict as a lens through which to discuss and understand current social and political realities on the African continent. A limited number of sites of political conflict will be examined in detail. This term these sites will include Kenya, Southern Africa, the Guinea Coast (Sierra Leone and Liberia), and Rwanda. We will examine the nature, causes, and consequences of these conflicts. These case studies will be used to discuss topics that are broader than but closely related to political conflict. These topics will include, but will not be limited to, ideologies of political opposition, ethnicity and nationalism, child soldiers, famine and refugees, and everyday forms of resistance to state power.

Course Requirements: All students are expected to attend all classes and to complete all assigned readings. Attendance and participation will be considered in assigning final grades. Your final grade will be based on the assignments listed below. Please take note of the dates on which the assignments are due. Late assignments will be penalized.

Map Quiz (Jan 29)	10%	Research Paper (Apr 23)	25%
Midterm Exam (Mar 5)	20%		
Final Exam (Apr 30)	20%	PresentaitonPresentation (optional) 15%	
		Participation	10%

Map Quiz: This is a short evaluation of your ability to identify basic geographic and political features of the African continent. You can find a map and a list of countries and their capitals in the text *Understanding Contemporary Africa,* edited by Gordon and Gordon (page 22). Use this map to study for the map quiz. Other maps might be outdated or use alternative spelling. **Note that you are expected to learn both the countries and their capitals.**

Research Paper: You will have the opportunity to write a research paper on a topic of your choice. All students will be required to submit a proposed topic and preliminary bibliography before April 11. You must have a satisfactory working bibliography by this date.

The Honor Code is, as always, in effect for this course.

Texts: The following texts are available at Student Store. They are also on reserve at Undergraduate Library.

The Wretched of the Earth, Frantz Fanon; *A Complicated War: The Harrowing of Mozambique*, William Finnegan; *Weep Not Child*, Ngugi Wa Thiongo; *We Wish to Inform You That Tomorrow We Will be Killed with our Families*, Philip Gourevitch; *The Graves are not yet Full: Race Tribe and Power in the Heart of Africa*, Bill Berkeley; *Blood Diamonds*, Greg Campbell.

The following texts and readings are on reserve at the Undergraduate Library.

Understanding Contemporary Africa, edited by April Gordon and Donald Gordon; *Africa*, edited by Phyllis Martin and Patrick OMeara; *Divide and Rule*, Africa Watch; *The Revolutionary Years: West Africa Since 1800*, J.B. Webster and A.A. Boahen; 'The Coming Anarchy' (photocopy), Robert Kaplan; 'Rebellion in Liberia and Sierra Leone,' Paul Richards in *Conflict in Africa* by Oliver Furley (ed). 134-70.

Course Topics and Readings:
(The texts and readings marked with an asterisk (*) are on reserve at the Davis Library.)

Jan 13 Introduction

History and Politics (January 15 - January 27)

Much of the contemporary African political experience has been shaped by the colonial era. During this section, we will discuss the colonial experience in Africa. We will look at the factors that led to the European domination of the continent during the twentieth century and the reasons that the colonial era ended. We will also consider the ways by which the colonial rule of the various European powers differed from each other.
Readings: *'The Colonial Era,' Martin and O'Meara, 3-45, 135-155; Frantz Fanon, 'Concerning Violence' and 'On National Culture'

Map Quiz: Jan 29

Continuity and Disrupture: Kenya (Feb 3 – 17)

Our first case study will be Kenya. We will begin by examining what has come to be referred to as the Mau Mau uprising. This uprising represented an attempt on the part of the Kikuyu peoples to regain control of their ancestral lands from European settlers. The outcome of this uprising was the independence of Kenya. We will close by considering the current political situation in Kenya. This will allow us to gain an understanding of the extent to which independence change the nature of the political violence in Africa. It will also allow us to examine the ways by which current African regimes use violence as strategy to maintain power.

Readings: Ngugi Wa Thiongo, *Weep Not Child*; 'African Politics,' Gordon and Gordon, 53-90; *Africa Watch, 1-18

Undoing Racial Politics: Southern Africa (Feb 19 - March 3)

This section will examine political violence in Southern Africa during the era of apartheid. While we will examine the situation in South Africa, we will pay particular attention to the impact that the policies of apartheid had on the neighboring nation of Mozambique. After Mozambique belatedly won its independence from Portugal in the 1970s, its leadership aligned with the Soviet Union and attempted to implement Marxist policies. This placed Mozambique on the frontline of both the Cold War and the struggle against white minority rule in South Africa.

Readings: 'South Africa,' Gordon and Gordon, 335-370; Finnegan, *A Complicated War: The Harrowing of Mozambique*; Bill Berkeley, *The Graves are Not Yet Full*, chapter 4.

Mid-term Exam: Mar 5

Conflicts 'without ideology': The Guinea Coast (March 17 - 26)

During this section we will examine one of the more recent eruptions of wide spread political violence in Africa. Beginning in 1990 in Liberia this uprising has wrecked havoc in several nations along the West African coast: Liberia, Sierra Leone, Guinea, Guinea Bissau, and Senegal. Unlike Mozambique's civil war, this conflict erupted in the political vacuum created in this region of Africa after the end of the Cold War. The combatants are perceived by many to lack ideologically derived commitments and thus rely on tactics that are unusually brutal. In addition to examining the reasons for this conflict and the impact that it has had on the region, we will evaluate the ways by which 'outsiders' have attempted to understand this conflict as ideologically empty.

Readings: *Webster and Boahen, pp. 111-136, 361-373, Stephen, *Kaplan 'The Coming Anarchy, *Richards 'Rebellion in Liberia and Sierra Leone;' Bill Berkeley, *The Graves are Not Yet Full*, chapters 1 and 2, Greg Campbell, *Blood Diamonds*.

Genocide: Rwanda (March 31 - April 9)

We will close with an examination of what were perhaps the most tragic events of the second half of the 20th century. In Rwanda in 1994 some members of Hutu ethnic group attempted to eliminate the Tutsi people. Conservative estimates place the number of lives lost during this genocide at over 500,000. We will examine issues related to this outbreak of ethnic violence such as the nature of ethnicity in Rwanda and the history of relations between these peoples. We also examine the why the international community was unable and/or unwilling to intervene.

Readings: Philip Gourevitch, *We Wish to Inform You That Tomorrow We Will be Killed with our Families*; Bill Berkeley, *The Graves are Not Yet Full*, chapter 6.

Student Presentations (April 14 - 23)

Final Exam (April 30, 4 pm)

*** This syllabus is subject to change as deemed appropriate by the instructor.**

Dey 307

African Studies 480: Ethnography of Africa

This course uses ethnography (detailed case studies) to introduce you to the study of African cultures and societies. By examining ethnographic texts you will learn about topics in African studies such as systems of thought, aesthetics and arts, the economy, politics, social organization, and identity. You will also learn about the production of ethnographic texts as a sub-discipline of anthropology and the issues that this raises with respect to the politics of representation.

Course Requirements: All students are expected to attend all classes and to complete all assigned readings. Attendance and participation will be considered in assigning final grades. Your final grade will be based on the assignments listed below. Please take note of the dates on which the assignments are due. Late papers will be penalized.

First Quiz (Feb 12)	15%	Presentation (Optional)	15%
Second Quiz (Mar 31)	20%	Analytic paper (April 23)	20%
Final exam (Apr 29)	20%	Attendance and participation	10%

Readings and Attendance: The ethnographic genre, by definition, is comprised of written texts. The only way to master this genre is to engage in a close textual reading of the assigned texts. Therefore, it is essential that we read the assigned readings and come to class prepared to discuss these readings.

Analytic Paper: You will have the opportunity to write an analytic essay (7 to 10 pages) on either 1) an ethnography written on a particular African ethnic group, or 2) an ethnographic examination of an issue relevant to African studies. This should be an examination of one monograph length text. Article length manuscripts are not acceptable. I strongly encourage everyone to select a text to examine before April 1 and to check with me to make sure that the text you have selected is appropriate.

Presentation: You will have the opportunity to make a short (10 to 15 minute) presentation on your paper. This is an optional assignment for which there are a limited number of spaces. These spaces will be made available on a first come basis. If you decide not to make a presentation the 15% allocated for this assignment will be evenly distributed between the other assignments. If you sign up to make a presentation you will be required to complete this assignment.

Texts: The following texts are available at the Student Store. They are also on reserve at the Undergraduate Library: Course Pack for Afri 480; E. E. Evans-Pritchard. *The Nuer*. Oxford University Press; Charles Piot, *Remotely Global,* Chicago University Press.

The Honor Code is, as always, in effect for this course.

Readings and Topics:

Introduction: Jan 13

Classic Approaches to Politics and Social Organization (Jan 15 – Jan 27)

- E.E. Evans-Pritchard, *The Nuer*

Witchcraft and Ritual (Jan 29 – Feb 10)

- Evans-Pritchard, "The Notion of Witchcraft Explains Unfortunate Events," *Coursepack*
- Douglas, Mary, "Animals in Lele Religious Symbolism" *Coursepack*

First Quiz: Feb 12

Systems of Belief (Feb 17 – Feb 26)

- Barber, Karin, "How Man Makes God in West Africa," *Coursepack*
- Kopytoff, Igor, "Ancestor's as Elders in Africa," *Coursepack*

The Meanings of Money and Work (Mar 3 – Mar 17)

- Bohannan, Paul, "Some Principles of Exchange and Investment among the Tiv," *Coursepack*
- Hutchinson, Sharon, "The Cattle of Money and the Cattle of Girls Among the Nuer," *Coursepack*
- Charles Piot, *Remotely Global*

Sex and Gender (Mar 19 – Mar 26)

- Van Allen, "Sitting on a Man," *Coursepack*
- Mona Etienne, "Women and Men, Cloth and Colonization," *Coursepack*

Second Exam: Mar 31

Ethnography and Colonialism (Apr 2 – Apr 9)

- Ranger, Terence, "The Invention of Tradition in Colonial Africa." *Coursepack*
- Frantz Fanon, "Algeria Unveiled," *Coursepack*
- Lesley Sharp, *The Sacrificed Generation*

Presentations (Apr 14 – Apr 23)

Final Exam: April 29 (8 am)

*** This syllabus is subject to change as deemed appropriate by the instructor.**

Hi Professor,

We were able to finally get your Ford account straight from the previous travel. In reviewing the San Francisco travel we saw that you wanted to charge the trip to your Arts and Sciences allotment with the remainder to the Ford account. I am missing a piece of information for the A & S form: title of conference presentation. Also, I am pretty confident that they will give you the entire amount from A & S due to the date you booked the ticket--we'll know shortly --if not we can change part of the charges to Ford. Thanks. Travis

Hello sir,

Debby said she talked to Tim and he thought about having a lunch meeting on Monday. I am not sure where yet but you can talk to Debby.

Thanks

Gore

Office Hours: Mon. 11-12 and by appt.

African Studies 101: Introduction to Africa

This course is designed to provide you with a working knowledge of Africa. You will be able to apply this knowledge in interpreting current events in Africa as they are reported in the national media. This course will also prepare you for more advanced courses in African Studies, anthropology, and international studies, among others. Some of the topics we will study during this semester are the geography of Africa, pre-colonial societies and kingdoms, colonialism, African Nationalism, contemporary politics and economics, and African religious beliefs.

Course Requirements: All students are expected to attend all classes and to complete all assigned readings. Attendance and participation will be considered in assigning final grades. Your final grade will be based on the assignments listed below. Please take note of the dates on which the assignments are due. Late assignments will be penalized.

Map Quiz (Sept. 11)	10%		
First Quiz (Oct. 7)	30%	Final Exam (Dec. 16)	25%
Second Quiz (Nov 11)	30%	Attendance	5%

Map Quiz: This is a short evaluation of your ability to identify the nations and capitals of the African continent. You can find a map and a list of countries and their capitals in the text *Understanding Contemporary Africa,* edited by Gordon and Gordon (page 22 of the 2nd edition). Use this map to study for the map quiz. In order to receive full credit your spelling must be correct. **Note that you must learn both the countries and their capitals.**

First and Second Quizzes: These are tests designed to evaluate your knowledge of the materials covered since the last quiz.

Final Exam: The final exam will be cumulative.

Attendance: Class sessions are an important component of the course and attendance will be kept for each class. It is the responsibility of each student to sign the attendance sheet. In order to receive credit for attendance you must sign the attendance sheet in class. Falsification of the attendance sheet will be treated as a violation of the honor code.

It is your responsibility to make sure that I receive all of your assignments. Please note that UNC policy does not allow faculty to communicate with students concerning confidential issues via email as email is an insecure form of communication. All questions concerning grades must be address in private during office hours or through printed communication. This syllabus may be revised during the semester at the discretion of the instructor.

The Honor Code is, as always, in effect for this course.

Texts: The following texts are available at Student Store and/or on reserve at the undergraduate library.

Required: *Africa*, Phyllis Martin and Patrick O'Meara (Indiana, 1995); *How Europe Underdeveloped Africa*, Walter Rodney (Howard University Press, 1981); *Things Fall Apart,* Chinua Achebe (Heinemann, 1962); *Weep Not, Child*, Ngugi Wa Thiongo (Heinemann, 1964); *The Challenge for Africa*, Wangari Maathai (Pantheon, 2009)

Course Schedule: Topics and Readings:
Introduction (Aug 26)

1) **Looking at Africa** (Aug. 28 - Sept. 4)
This section is designed to introduce you to the continent of Africa. We will examine some features of the physical and human geography of the African continent. We will also discuss some preconceptions and stereotypes that we have concerning Africa

so that we may overcome these stereotypes and view Africa more objectively.
Readings: **Martin and O'Meara**: chs. 1, 2

Sept. 11: Map Quiz

2) **Pre-Colonial Societies and Ancient Kingdoms** (Sept. 9 – 18)
During this section you will learn about pre-colonial Africa. We will begin by addressing the different types of societies that have flourished on the African continent. We will examine the economic activities undertaken by these societies and their social organization. From there we will consider some of Africa's pre-colonial kingdoms. You will learn what these kingdoms were, how they were governed, and why they rose to prominence. We will touch on the issue of how these ancient kingdoms are currently relevant to the African diaspora.
Readings: **Martin and O'Meara**: chs. 4, 5, 6, 9, 10; **Rodney**: 33-70

3) **The Triple Heritage of Religion** (Sept. 21 – 28)
Religion has been an important institution in defining African societies. Although most Africans are now Muslim or Christian, the continent has its own rich religious traditions. In this section we will examine some of Africa's religious traditions. We will look also at the impact that Islam and Christianity have had on the continent. You will gain an appreciation for these different religious traditions and the unique expressions they have found in African societies.
Readings: **Martin and O'Meara:** ch. 5; **Achebe**, *Things Fall Apart* (first half)

4) **European Explorations** (Sept 30 – Oct 5)
This section will examine the European 'discovery' of Africa in the 1400s up to the partition of Africa and the era of colonialism that began in the late 1800s. We will examine the nature of interactions between Europeans and Africans during this period with a special focus on the era of the trans-Atlantic slave trade.
Readings: **Rodney** 73-90

October 7: Quiz

5) **The Colonial Experience** (Oct 9 – Oct. 28)
This section explores one of the most important eras in the history of the continent. At the end of this section you should understand which of the European powers engaged in colonialism, which territories these nations claimed, why they embarked on imperial projects in Africa, the different ways in which European countries administered their colonies, the impact that colonialism has had on the people of Africa, and why colonialism came to an end.
Readings: **Martin and O'Meara**: chs. 7, 21; **Achebe**, *Things Fall Apart* (second half); **Rodney**: 95 – 145; 149-201; 205 - 281

6) **African Nationalism** (Oct. 30 – Nov. 9)
African Nationalism was one unforeseen outcome of the colonial era. In this section we will examine how African Nationalism developed and the ways by which it was a response to the European domination of the continent. We will develop an appreciation for different expression of African Nationalism, its connections with Pan-Africanism, and the role that African Nationalism played in the achievement of African Independence.
Readings: **Ngugi wa Thiongo**: *Weep Not Child*

Nov. 11: Quiz

7) **Post-Colonial Africa** (Nov 13 – Dec. 9)
Independence did not prove to be the solution to Africa's problems that many hoped it would be. In this section we will examine some of the political problems that African nations have confronted since independence. You will develop and understanding of the characteristics of post-colonial political regimes in Africa and the challenges that African nations have faced in attempting to forge and maintain democratic forms of government.
Readings: **Martin and O'Meara:** chs. 16, 18, 19, 20; **Maathai**: Chs. TBA

Final Exam (Dec. 16, 8am)

Travis,

Attached is the records retention and disposition schedule for African and Afro-American Studies. It was done in 1995, so it could be a bit out of date now. Let me know if you have questions.

Best,
Susan

THE UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL
RECORDS RETENTION AND DISPOSITION SCHEDULE

CURRICULUM IN AFRICAN AND AFRO-AMERICAN STUDIES
OFFICE OF THE DIRECTOR AND ADMINISTRATIVE SUPPORT OFFICES

Item 1. Academic Committees File Records concerning curriculum academic committees. File includes correspondence, minutes of meetings, notifications, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Academic Records File RESTRICTED ACCESS file. Individual student academic records. File includes awards and honors, changes of grades, recommendations, reference copies of transcripts, and other related records. For a breakdown of this file series, see "Student Files" below. Record copies of these files are maintained by the University Registrar's Office or by the Registrar of the School of Medicine.

Retention & Disposition Instructions:
Retain until administrative value ends, then segregate "record copy" items from duplicate or convenience copies. Retain "record copy" items in the original folder for **sixty** years after initial enrollment date, then transfer to the custody of the University Archives for appraisal and final disposition. Destroy duplicate or convenience copies in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Accident Reports File (Personnel) RESTRICTED ACCESS reports of accidents involving curriculum personnel. Record copies of Workers' Compensation claims are held by the Health and Safety Office.

Retention & Disposition Instructions:
Retain five years after termination of employment or until completion of actions and resolution of issues involved in any litigation, claim, audits, or other official action, whichever occurs later, then destroy in office in accordance with the General Statutes of North Carolina 20-166.1(i), 97-92(b) and 132-1.1 regarding confidentiality of records.

Item 1. Accident Reports File (Property/Equipment) Reports of accidents involving curriculum property and/or equipment.

Retention & Disposition Instructions:

Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Accounting (State and Trust Funds) File Records concerning various accounts granted to or administered by the curriculum. File includes correspondence, ledgers, receipts, and other related records. See also "Budgets File."

Retention & Disposition Instructions:
Retain five years or two years after released from all audits or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Accreditation File Records concerning curriculum accreditation. File includes correspondence, guides, questionnaires, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Affirmative Action File RESTRICTED ACCESS records concerning curriculum participation in affirmative action/equal opportunity programs. File includes correspondence, guidelines and directives, records concerning tenure and promotion, reports, and other related records. Record copies of Affirmative Action Reports are held by the Affirmative Action Office.

Retention & Disposition Instructions:
Retain three years or until administrative value ends, whichever occurs later, then destroy in office in accordance with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding confidentiality of personnel records.

Item 1. Annual Reports File Reports concerning annual summary of activities.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Applications for Admission to Program File (Enrolled Students) RESTRICTED ACCESS file includes applications, correspondence, recommendations, and other related records.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Applications for Admission to Program File (Students Denied Admission) RESTRICTED ACCESS file includes applications, correspondence, recommendations, and other related records.

Retention & Disposition Instructions:

Retain one year or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Applications for Admission to Program File (Students Accepted But Did Not Enroll) RESTRICTED ACCESS file includes applications, correspondence, recommendations, and other related records.

Retention & Disposition Instructions:

Retain one year or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Applications for Employment File RESTRICTED ACCESS records concerning applications for employment within the curriculum. File includes correspondence, recommendations, resumes, and other related records.

Retention & Disposition Instructions:

(A) Retain application materials of successful candidates until official offer of employment is accepted or administrative value ends, whichever occurs later, then transfer materials to employee's Personnel File.
(B) Retain application materials of unsuccessful candidates for three years after date position is filled or until administrative value ends, whichever occurs later, then destroy in office in accordance with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-19 and 132-1.1 regarding confidentiality of personnel records. See Personnel File.

Item 1. Applications for Graduation File Completed student applications to graduate.

Retention & Disposition Instructions:

Retain until administrative value ends, then destroy in office.

Item 1. Budgets File Reference copies of budgetary records. File includes budget authorizations, budget reports, requests for budget changes, and other related records.

Retention & Disposition Instructions:

Retain five years or until administrative value ends, whichever occurs later, then transfer final versions of end-of-year reports to the custody of the University Archives for appraisal and final disposition. Destroy in office remaining records.

Item 1. Calendars of Events File Reference copies of university calendars of events.

Retention & Disposition Instructions:

Retain until administrative value ends, then destroy in office.

Item 1. Career Planning/Placement Records File Records maintained to assist students in locating employment after graduation. File includes job interview forms, resumes, student profile data sheets, and other related records. Does not include personally identifiable information.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Change of Grade File RESTRICTED ACCESS records concerning students' requests for changes of grade. File includes request forms and related correspondence.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Chronological File Reference copies in chronological order of outgoing correspondence, directives, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Class Schedules File Reference copies of curriculum class schedules.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Committees and Councils File Records concerning various committees and councils with which curriculum deals. File includes correspondence, minutes of meetings, notifications, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Comprehensive Examination Results File RESTRICTED ACCESS file. Listings of student comprehensive examination scores.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Comprehensive Examinations File RESTRICTED ACCESS file. Completed student comprehensive examinations for degrees.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Conferences and Workshops Attended File Records concerning conferences and workshops attended by curriculum personnel. File includes agendas, correspondence, handouts, programs, and other related records.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Conferences and Workshops Conducted File Records concerning conferences and workshops conducted by curriculum personnel. File includes agendas, correspondence, critiques, handouts, programs, questionnaires, reports, reservations, training materials, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Contracts, Agreements, and Leases File Contracts, agreements, and leases for services, facilities, and equipment used by curriculum.

Retention & Disposition Instructions:
Retain three years or until administrative value ends, then destroy in office.

Item 1. Correspondence File Records concerning the administration of the office. File includes directives, memoranda, official office correspondence, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Course Evaluations by Students File Course evaluations completed by students.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Course Listings File Listings of courses currently offered by curriculum.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Course Syllabi/Outlines File Syllabus or outline of each course taught by curriculum.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

CURRICULUM IN AFRICAN AND AFRO-AMERICAN STUDIES

Item 1. Course Title Directory File Directories of courses currently offered by curriculum.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Credits by Examination File RESTRICTED ACCESS records concerning academic credits awarded to students by special examination. File includes examination results, reference copies of transcripts, and other related records.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Degree Listings File Listings of curriculum students who tentatively are scheduled to receive degrees at end of semester.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Drop/Add Forms File RESTRICTED ACCESS file. Completed student drop/add forms.

Retention & Disposition Instructions:
Retain one year or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Energy Conservation File Records concerning energy conservation measures undertaken by curriculum. File includes correspondence, inspection reports, and other related records.

Retention & Disposition Instructions:
Retain three years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Enrollment File RESTRICTED ACCESS file.
Student enrollment books for each course in curriculum.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Evaluations (Medical/Psychological) File: RESTRICTED ACCESS file including reference copies of medical and psychological evaluations of students. Record copies of these files are maintained by the Student Health Service.

Retention & Disposition Instructions:
Retain five years after graduation or termination of enrollment or until administrative value ends, whichever occurs later, then destroy

in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Faculty Awards and Honors File Records concerning awards and honors to faculty members within the curriculum. File includes approvals, recommendations, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Faculty Listings File Listings of faculty in the curriculum.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Faculty Recruitment File RESTRICTED ACCESS records concerning the recruitment of faculty members for the curriculum. File includes applications, correspondence, forms, interview notes, policies, reports, resumes, and other related records.

Retention & Disposition Instructions:
(A) Retain application materials of successful candidates until official offer of employment is accepted or administrative value ends, whichever occurs later, then transfer materials to employee's Personnel File.
(B) Retain application materials of unsuccessful candidates for three years after date position is filled or until administrative value ends, whichever occurs later, then destroy in office in accordance with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding confidentiality of personnel records.

Item 1. Final Examinations File RESTRICTED ACCESS file. Completed student examinations.

Retention & Disposition Instructions:
Retain one year or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Financial Aid File RESTRICTED ACCESS records concerning financial aid awarded to students and student assistants within curriculum. File includes accounting records, applications, approvals, and other related records. Record copies of these files are held by the Student Aid Office.

Retention & Disposition Instructions:

Retain five years after termination of enrollment or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Fire and Safety File Records concerning fire and safety inspections within curriculum. File includes correspondence, inspection reports, and other related records.

Retention & Disposition Instructions:
Retain three years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Grade Distribution File RESTRICTED ACCESS file. Listings of student grade distributions by course and by instructor.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Grade Listings File RESTRICTED ACCESS file. Listings of student grades for each course taught by curriculum. File includes final grade rolls and other related records. Record copies of these files are maintained by the University Registrar's Office or by the Registrar of the School of Medicine.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Graduate Listings File Listings of student graduates within curriculum.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Grant Proposals File (Curriculum) Records concerning proposals for curriculum grants. File includes correspondence, drafts, proposals, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Grant Proposals File (Individual Faculty) Records concerning proposals for grants for individual faculty members. File includes correspondence, drafts, proposals, and other related records.

Retention & Disposition Instructions:

Retain five years or until administrative value ends, whichever occurs later, then destroy in office upon authorization from the Office of Contracts and Grants.

Item 1. Grants File (Curriculum) Records concerning grants awarded to and/or administered by curriculum. File includes administrative documents, audits, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Grants File (Individual Faculty) Records concerning grants awarded to individual faculty members. File includes administrative documents, correspondence, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office upon authorization from the Office of Contracts and Grants.

Item 1. Grievances File RESTRICTED ACCESS records concerning disputed employee grievances. File includes formal grievance documents and related correspondence.

Retention & Disposition Instructions:
Retain five years after completion of actions and resolution of issues involved in any litigation, claim, or other official action, whichever occurs later, then destroy in office in accordance with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding confidentiality of records.

Item 1. Individual Placement Test Scores File RESTRICTED ACCESS file. Placement test scores for each student taking test.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Instructor Class Grading Records File RESTRICTED ACCESS file. Copies of class rolls, quiz papers and other grading records.

Retention & Disposition Instructions:
Retain three years or until administrative value ends, whichever occurs later, then destroy in office in accordance with the provisions of 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Internships/Assistantships File RESTRICTED ACCESS records concerning student internships and assistantships within curriculum. File includes accounting information,

applications, approvals and disapprovals, class rolls, records of credit earned, and other related records.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Financial Aid File.

Item 1. Leave File RESTRICTED ACCESS records concerning leave by curriculum personnel. File includes leave requests, monthly leave reports, yearly leave recapitulations, and other related records.

Retention & Disposition Instructions:
Retain until employee termination, then file final leave totals in the employee's Personnel Record File. Destroy other records in office in accordance with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding the confidentiality of personnel records.

Item 1. Loan Recipients' Enrollment Verifications File RESTRICTED ACCESS records concerning the verification of each loan recipient's enrollment, proposed major, probation status (if applicable), number of credit hours, and other loan stipulations (if any). See also "Student Loans File."

Retention & Disposition Instructions:
Retain five years after termination of enrollment, or one year after completion of any university-administered loan-repayment program, or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Mailing Lists File File includes lists of names and addresses that receive curriculum mailings.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Maintenance Services File Records concerning maintenance services conducted for curriculum. File includes correspondence, maintenance reports, work orders, and other related records.

Retention & Disposition Instructions:
Retain two years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Master Course File Records concerning each course taught by curriculum faculty. File includes course schedules.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

CURRICULUM IN AFRICAN AND AFRO-AMERICAN STUDIES

Item 1. New Course Proposals File Records concerning each proposed new course. File includes course descriptions, justifications, projected schedules, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Newsmedia Clippings File Reference copies of newsmedia and magazine clippings concerning curriculum.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Organizations and Associations File Records concerning various faculty, student, and professional organizations and associations with which curriculum deals. File includes announcements, correspondence, minutes, publications, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Parking Assignments File Records concerning staff parking assignments. File includes copies of applications for and lists of staff parking assignments.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Pass/Fail Forms File RESTRICTED ACCESS file. Completed student pass/fail forms.

Retention & Disposition Instructions:
Retain one year or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Payroll Time Sheets File (Staff & Students) RESTRICTED ACCESS file.

Retention & Disposition Instructions:
Retain for three years or until administrative value ends, whichever occurs later, then destroy in office in accordance with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding the confidentiality of personnel records.

Item 1. Permanent Record of Courses File File includes reference copies of Permanent Record of Courses.

Retention & Disposition Instructions:

Retain until administrative value ends, then destroy in office.

Item 1. Personnel File (EPA) RESTRICTED ACCESS records concerning curriculum personnel exempt from provisions of the State Personnel System Act. File includes applications, resumes, job descriptions, personnel action forms, and other related records.

Retention & Disposition Instructions:

Retain for **sixty** years after date of employee's first University appointment, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Personnel File (EPA - One-Time-Payments) RESTRICTED ACCESS records concerning employees hired to fulfill temporary, short-term duties. "One-Time-Payments (OTPs)" apply to honoraria paid to visiting lecturers and consultants as well as to university staff and students who undertake duties outside, and not in conflict with, their regular work. File contains reference copies of personnel action forms and other related records.

Retention & Disposition Instructions:

Retain three years after payment date or one year after release from all audits or until administrative value ends, whichever occurs later, then destroy in office in accord with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding the confidentiality of records.

Item 1. Personnel File (SPA) RESTRICTED ACCESS records concerning curriculum personnel subject to provisions of the State Personnel System Act. File includes applications, resumes, job descriptions, personnel action forms, and other related records.

Retention & Disposition Instructions:

Retain for five years after date of employee termination or five years after last personnel action, then transfer file to Employee Records Office for retention and disposition. Transferred files should include PD-105 (Personnel Action Form) - pink copies, vacation and sick leave records, and letters of recommendation. Performance Management Work Plans and Evaluations, miscellaneous supervisory notes, Time Sheets and other remaining records should be removed and destroyed in accord with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding confidentiality of personnel records.

Item 1. Photographs File Photographic prints and negatives of curriculum-related subjects.

Retention & Disposition Instructions:

Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Placement Tests File RESTRICTED ACCESS file. Completed tests administered to determine each student's aptitude.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Placement Test Scores Listings File RESTRICTED ACCESS file. Listings of student placement test scores.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Policies and Procedures File Record and reference copies of current office policies and procedures.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Position Descriptions File Reference copies of job descriptions for each non-faculty position within the curriculum.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Programs File Records concerning curriculum academic programs. File includes accounting records, administrative documents, correspondence, program proposals and descriptions, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Prospective Graduates File Listings of prospective graduates at end of each semester.

Retention & Disposition Instructions:
Retain one year or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Publications File Articles, brochures, and books published by curriculum.

Retention & Disposition Instructions:
Transfer ten copies of each publication bearing the university's imprint to the State Documents Clearinghouse, North Carolina State Library, when received from printer, in accordance with the General Statutes of North Carolina 125-11.7/11.8. For publications issued without the university's imprint, three copies should be sent directly to the NORTH CAROLINA COLLECTION, CB# 3930,

WILSON LIBRARY (962-1172). One copy of the publication should be retained in the files of the office of origin for eventual transfer, as scheduled, to the University Archives. Destroy remaining copies in office when reference value ends.

Item 1. Purchase Orders File Purchase orders for supplies and equipment.

Retention & Disposition Instructions:
Retain five years or one year after released from all audits or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Receipts File Records detailing amounts received by curriculum from various sources. File includes ledgers, receipt books, and other related records.

Retention & Disposition Instructions:
Retain five years or one year after released from all audits or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Reference File Reference information concerning subjects pertinent to or of interest to the curriculum. File includes directives and guidelines, news articles, publications, reports, and other related records.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office.

Item 1. Repeat Course File RESTRICTED ACCESS records concerning students' attempts to repeat courses in order to raise grades. File includes requests/disapprovals and other related records.

Retention & Disposition Instructions:
Retain two years or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Reports File Record and reference copies of curriculum reports.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Research Projects File Records concerning various curriculum research projects. File includes correspondence, project descriptions, reports, and other related records.

Retention & Disposition Instructions:

Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Scholarship Awards File RESTRICTED ACCESS records concerning individual scholarship awards to students within curriculum. File includes accounting records, applications, approvals, correspondence, recommendations, and other related records. Record copies of awards are maintained in the Office of Scholarships and Student Aid.

Retention & Disposition Instructions:

Retain one year, then transfer to student's Academic Record File.

Item 1. Scholarship Reference File Reference copies of information concerning scholarship awards to students within curriculum. File includes descriptions of scholarships, eligibility criteria, guidelines, procedures, regulations, and other related records.

Retention & Disposition Instructions:

Retain until administrative value ends, then destroy in office.

Item 1. Search Committee File (For Administrative Officials, i.e. Dean) RESTRICTED ACCESS records concerning activities of specially-formed search committees charged with recruiting new or replacement administrative officials. File includes applications, correspondence, lists of committee members, minutes of meetings, and other related records.

Retention & Disposition Instructions:

Maintain file in accordance with confidentiality requirements of the State Personnel System Act (G.S. 126).
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Search Committee File (For Individual Faculty) RESTRICTED ACCESS records concerning activities of specially-formed search committees charged with recruiting new or replacement faculty. File includes applications, correspondence, resumes, and other related records.

Retention & Disposition Instructions:

Retain three years after completion of committee charge or until administrative value ends, then destroy in office in accordance with the General Statutes of North Carolina 126-22, 126-23, 126-24, 126-29 and 132-1.1 regarding confidentiality of personnel records.

Item 1. Self-Studies File Self-studies conducted by curriculum. File includes correspondence, questionnaires, recommendations, reports, and other related records.

Retention & Disposition Instructions:

Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Special Gifts File Records concerning special gifts to curriculum. File includes accession information, agreements and stipulations, correspondence, descriptions of gifts, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Speeches File Record and reference copies of speeches delivered by the curriculum head or other members of the curriculum administrative staff.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Staff/Faculty Meetings File Records concerning curriculum staff and faculty meetings. File includes minutes of meetings, reports, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then transfer to the custody of the University Archives for appraisal and final disposition.

Item 1. Student Awards and Honors File RESTRICTED ACCESS records concerning curriculum awards and honors to students. File includes approvals, recommendations, reference information, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Student Files - Active RESTRICTED ACCESS records concerning individual student's academic performance. File includes applications, changes of grade information, recommendations, reference copies of transcripts, and other related records.

Retention & Disposition Instructions:
Retain until student graduates or registration lapses for two years, then transfer records to either "Student Files - Graduated" or "Student Files - Inactive" as appropriate.

Item 1. Student Files - Graduated RESTRICTED ACCESS records concerning individual student's academic performance. File includes applications, changes of grade information,

recommendations, reference copies of transcripts, and other related records. Record copies of student academic records are held by the University Registrar's Office and by the Registrar's Office, School of Medicine.

Retention & Disposition Instructions:

Retain until administrative value ends, then segregate "record copy" items from duplicate or convenience copies. Retain "record copy" items in the original folder for sixty years after initial enrollment date, then transfer to the custody of the University Archives for appraisal and final disposition. Destroy duplicate or convenience copies in office in accordance with 20 U. S. C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Student Files - Inactive RESTRICTED ACCESS records concerning individual student's academic performance. File includes applications, changes of grade information, recommendations, reference copies of transcripts, and other related records. Record copies of student academic records are held by the University Registrar's Office and by the Registrar's Office, School of Medicine.

Retention & Disposition Instructions:

Retain until administrative value ends, then segregate "record copy" items from duplicate or convenience copies. Retain "record copy" items in the original folder for sixty years after initial enrollment date, then transfer to the custody of the University Archives for appraisal and final disposition. Destroy duplicate or convenience copies in office in accordance with 20 U. S. C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Student Loans File RESTRICTED ACCESS records concerning university loans to students within curriculum. File includes accounting information, applications, authorizations, correspondence, financial statements, and other related records. Record copies of student loan files are maintained by the Office of Scholarships and Student Aid. See also "Loan Recipient's Enrollment Verification File."

Retention & Disposition Instructions:

Retain five years after termination of enrollment, completion of university - administered loan repayment programs or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Student Rankings File RESTRICTED ACCESS file. Listings of student graduate rankings in curriculum.

Retention & Disposition Instructions:

Retain five years or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C.

1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Student Records Changes File RESTRICTED ACCESS records concerning changes in student academic records. File includes justifications, notices of approval/disapproval, requests, and other related records other than "Change of Grade" forms. Record copies of student academic records are held by the University Registrar's Office and by the Registrar's Office, School of Medicine.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Student Reference File RESTRICTED ACCESS file. Reference copies of records concerning students' activities within curriculum. File includes correspondence, evaluations, internship records, and other related records.

Retention & Disposition Instructions:
Retain one year, then transfer to student's Academic Record File.

Item 1. Student Teaching Certification File RESTRICTED ACCESS records concerning student certifications for teaching. File includes applications, check sheets, class schedules, correspondence, drop-add forms, grade sheets, transcripts, and other related records.

Retention & Disposition Instructions:
Retain until administrative value ends, then segregate "record copy" items from duplicate or convenience copies. Retain "record copy" items in the original folder for sixty years after initial enrollment date, then transfer to the custody of the University Archives for appraisal and final disposition. Destroy duplicate or convenience copies in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Summer School File Reference information concerning courses taught by curriculum during each summer school session. File includes administrative records, listings of instructors, schedules, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Supplies and Equipment File Records concerning supplies and equipment. File includes accounting records, inventories, operating manuals, warranties, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Surplus Property File Records concerning surplus property and its disposition. File includes accounting information, inventories, records of disposal, and other related records.

Retention & Disposition Instructions:
Retain five years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Telephone Billings File Reference copies of monthly office telephone bills.

Retention & Disposition Instructions:
Retain five years or two years after released from all audits or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Tenure File RESTRICTED ACCESS records concerning the awarding of tenure to university faculty members. File includes correspondence, recommendations, and other related records.

Retention & Disposition Instructions:
Retain one year after completion of all actions and resolution of issues involved in any litigation or other official action, then transfer records to the employee's Personnel File.

Item 1. Textbook Orders File Records concerning orders of textbooks and other references ordered by curriculum. File includes orders and related correspondence.

Retention & Disposition Instructions:
Retain two years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Textbook Requests File Requests for textbooks and other reference publications for curriculum.

Retention & Disposition Instructions:
Retain two years or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Transfer Admissions File RESTRICTED ACCESS records concerning transfer admissions to university by students entering curriculum. File includes applications, notices of acceptance or rejection, recommendations, transcripts, and other related records. Record copies of student admission materials are held by the Undergraduate Admissions Office and the Office of the University Registrar.

Retention & Disposition Instructions:
Retain until administrative value ends, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Transfer Equivalents File RESTRICTED ACCESS records concerning grade transfer equivalents from other institutions. File includes correspondence, transcripts, and

other related records. Record copies of student admission materials are held by the Undergraduate Admissions Office and the Office of the University Registrar.

Retention & Disposition Instructions:

Retain until administrative value ends, then destroy in office in accordance with 20 U. S. C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Travel Reimbursements File Records concerning reimbursements for travel and related expenses for staff. File includes authorizations, documentation of payments, requests for reimbursement, and other related records.

Retention & Disposition Instructions:

Retain five years or one year after released from all audits or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Travel Requests File Requests for travel authorizations. File includes authorizations and related correspondence.

Retention & Disposition Instructions:

Retain five years or one year after released from all audits or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Veterans' Benefits File RESTRICTED ACCESS records concerning veterans' benefits awarded to students in curriculum. File includes amounts disbursed, applications, approvals, dates of enrollment and attendance, and other related records.

Retention & Disposition Instructions:

Retain five years after termination of enrollment or until administrative value ends, whichever occurs later, then destroy in office in accordance with 20 U.S.C. 1232g (Family Educational Rights and Privacy Act of 1974) regarding confidentiality of records.

Item 1. Work Orders File Reference copies of work orders submitted to Maintenance Office/Physical Plant.

Retention & Disposition Instructions:

Retain one year after completion of work or until administrative value ends, whichever occurs later, then destroy in office.

Item 1. Workers' Compensation File RESTRICTED ACCESS records concerning Workers' Compensation claims filed by curriculum staff. File includes claims and related correspondence. Record copies of Workers' Compensation claims are held by the Health and Safety Office.

Retention & Disposition Instructions:

Retain five years after termination of employment or until completion of actions and resolution of issues involved in any litigation, claim, audits, or other official action, whichever occurs later, then destroy in office in accordance with the General Statutes of North Carolina 20-166.1(i), 97-92(b) and 132-1.1 regarding confidentiality of records.

Sir,

Adam asked me to send this to you so you could look at it and you can
even send an email saying that you have reviewed
it and will sign it on Monday.

Thanks.

Gore

This E-mail was sent from "R10442" (Aficio MP 2510).

Scan Date: 10.29.2009 10:33:53 (-0400)
Queries to: scanner@unc.edu

Over the last several months the University has been the subject of a number of security breaches. As a point of fact, the UNC IT Security Office reports that there are approximately 3000 attempts made on campus systems per hour, and while there are tools in place to intercept many of these at our network edge there clearly needs to be reasonable measures taken beyond that to protect our systems.

Therefore, in order to improve the security of computers in the College of Arts and Sciences, the Office of Arts and Sciences information Services (OASIS) will be performing maintenance on the computers and printers in your department on 11/11/2009.

In order to minimize disruption, this work is scheduled to take place from 8:30am to 9:30am and again from 4pm to 6pm. During both of those time periods on-site OASIS representatives will need access to your computer. In the morning, the disruption should last no more than 10 minutes per computer. However from 4pm to 6pm OASIS will run several security related updates on your computer. In order for those updates to complete successfully it is critical no one interact with your computer during that time. Signage noting this requirement will be posted at each computer during the afternoon updates.

The following morning OASIS representatives will be on-site to help address any issues that might have cropped up.

If you are out of town or your computer is otherwise unavailable an OASIS representative will make an appointment with you to complete these security updates in the days following 11/11/2009

Once the work is completed you will logon to your computer using your ONYEN in the AD.UNC.EDU domain. You will therefore no longer need to use your ASNTDOMAIN1 user account. Your ONYEN and ONYEN password will then get you to your file shares, printers, and Citrix just like your ASNTDOMAIN1 account used to.

In summary, better security and one less password to remember (and change). These updates will also provide your on-site technical support staff with more robust tools to support you and your computers.

Frequently asked questions:

- Who is OASIS? http://oasis.unc.edu
- What is AD.UNC.EDU? http://help.unc.edu/6355
- What if I am a Macintosh user? Macintosh users are unaffected by this change at this time.
- What if I am a Windows Laptop user? Laptop users will be evaluated on a case-by-case basis. If you are currently using your laptop to login to ASNTDOMAIN1 then it is very likely you will, after this process, be logging into AD.UNC.EDU
- Will I still be able to get to my Z: drive? Yes.
- Will I still be able to get to my departmental shared drive? Yes.
- Will I still be able to print to my printer(s)? Yes.
- If you have an additional questions OASIS representatives will be on-site on 11/12/2009 to answer them for you.

The HistoryMakers is a part of the Black Studies Center database.

Black Studies Center - Contains Full Text

The HistoryMakers®

- Browse by occupation
- Browse by subject category
- Browse by theme

The HistoryMakers

Key Facts
Coverage: 20th and 21st centuries
Total Sources Covered: 100 videos and transcripts

This resource is a digital archive of 100 videos of oral history interviews of contemporary African Americans, produced in partnership with The HistoryMakers (www.thehistorymakers.com), a non-profit organization founded by Julieanna Richardson in 1999 with the mission of uncovering and preserving the untold stories of America.

The HistoryMakers is available as an add-on module to the Black Studies Center. These digital oral histories depict those have broken barriers and accomplished significant achievements across the twentieth and twenty-first centuries in business, science, education, government, entertainment, sports, and other fields. These are 2-3 hour digitized videos, fully subject-indexed, available for online viewing in full, or in segments. Search or browse through the list by name, occupation, or theme. Watch and hear firsthand experiences, education and career struggles and triumphs. Create accounts of ancestor history, childhood, Civil Rights era relevant playlists for your class, research papers, or projects.

Highlights of the collection:

- A wide array of disciplines and occupations are represented: scholars, physicians, entrepreneurs, artists, musicians, sports figures, political leaders, and social activists, among others.
- The stories behind many African American firsts - in science, business, government, law, and education – are told, many for the first time.

- Details of family histories and the social dynamics of the Black family across the US and through generations are revealed.
- Riveting, first-hand accounts of segregation and discrimination in society, the military, business, and education are conveyed.
- Key figures in the 1950s and 1960s Civil Rights movement describe the unknown and fascinating stories behind the planning and the participation in sit-ins, demonstrations, and marches.
- The 1960s and 1970s are portrayed by personal accounts in the Black Power movement, the Black Panther Party, and the Black Arts movement.
- Contemporary figures, such as Barack Obama, Jesse Jackson, Jr., and artist Leon Stull, a Marvel Comics graphic artist and hip-hop musician, offer new generational perspectives to the African American experience.

Functionality features include:

- Subject-indexed video and transcript sections for effective finding and viewing
- Video content that is browseable by name of interviewee, occupation, and theme
- Searchable transcripts that may be downloaded as PDFs
- Captioned video playback, which may be turned on or off while viewing
- Video clip creation by users, which may be saved in MyArchive

Happy New Year!

I checked on this and they told me that its not the Nelson Mandela Auditorium. They said that room was 1015. Your room is smaller than that but still holds up to 64.

Subject: Re: Reserving Room: Job talks - Boyd and Macauley

Hi Eunice,

The dates and times requested were available so I filled out a
reservation form for each of them and faxed it to Rob Moore. I will let
you know as soon as I get a confirmation from him. Please let
me know if there is anything else I can do to help.

Thanks,

Travis

Subject: INFORMATIONAL: Milk Thistle for Hepatitis C Study!

We Are Conducting A Study with Milk Thistle in Patients with Hepatitis C

Silymarin is the active ingredient in Milk Thistle. Milk Thistle has been used by patients with liver disease for centuries. Milk Thistle may have protective effects on the liver but this has not been studied well enough to know for sure.

The purpose of this phase 2 study is to explore the safety and effectiveness of milk thistle in treating patients with chronic hepatitis C virus (HCV) who did not clear the virus after taking conventional antiviral therapy.

If you are interested in this study, please call:
(919) 966-0764, email: pea@med.unc.edu.

TONIGHT!

NEW CURRENTS IN CONTEMPORARY ART

UNC-Chapel Hill Master of Fine Arts Exhibition
Public Reception
6:00 - 8:00 PM

Join the Student Friends of the Ackland for a public reception celebrating *New Currents in Contemporary Art* tonight (Friday, April 17)!

Now's your chance to enter the cab of an eighteen wheeler on the Ackland's front lawn, stand under an undulating felt sculpture, experience an interactive interrogation booth, and don 3-d glasses to watch drawings jump from their frames - just a few of the experiences brought to you by artists John Hill Jr., Gretchen Huffman, Nestor Armando Gil, Angela Grisales, Erin Paroubek, Edie Shimel, and Dave Sinkiewicz. Free.

Subject:	INFORMATIONAL: In a romantic relationship? Participate in a UNC research study with your partne

---

What makes romantic relationships work? Help us find out!

You are invited to participate in a new scientific research study designed to understand what makes relationships work. Whether you are in a blissful relationship, think your relationship could use a boost, or if you think you have a perfectly "normal" relationship, we are interested in what you have to say.

People who have been involved in a heterosexual romantic relationship for at least one year (no upper limit), and have been living with their partner for at least 6 months are eligible to participate in the study with their romantic partner. Each couple will be compensated with up to $120 for their participation, with chances to receive gift certificates ($50 to $100) to a local restaurant.

After an initial online questionnaire (20-30 minutes), the study involves two 75-90 minute visits to our laboratory on the UNC campus, four weeks apart. In the lab, at the beginning and end of the study, we will record your physiology and interactions with your romantic partner, and will collect samples of your saliva to measure your naturally-occurring hormone levels. During the intervening four week period, we'll ask you to provide a snapshot of your everyday life by responding to a brief (3-5 minute) questionnaire online each night. Finally, on 4 to 6 occasions during this four week period, we will ask you to supplement your normal, everyday interactions with your partner by setting aside 20-30 minutes to talk alone together. The second lab session will allow us to assess the role that these different factors play in your relationship, and to answer any additional questions you have. We anticipate that time spent in this study with your partner and in answering private questionnaires will average less than 6.5 hours over the course of the month.

We would love to hear from you, and we would be more than happy to give you further information about the study. Please do not hesitate to contact us if you would like more information, or would like to sign up for the study: UNC.Relationships.Study@gmail.com, or 919-843-0092.

For measurement purposes, in addition to the above, you are NOT eligible for this study if you:
- Are under 24 year old.
- Are currently taking antidepressants or have been recently diagnosed with depression or an anxiety disorder.
- Are a woman who is: over 40, postmenopausal, pregnant (or plan to become pregnant during the course of the study), within 6 months postpartum, nursing (lactating), or have had an oophorectomy (i.e., ovaries must be intact).
- Are a man on steroid medication.

We look forward to hearing from you, and will return your email or phone call as soon as possible. Sessions will begin immediately.

Sincerely,
[SIGNATURE]

p.s. This study is being conducted through the University of North Carolina-Chapel Hill Psychology Department, and has been approved by the UNC-CH Internal Review Board.

Subject: INFORMATIONAL: Subjects needed for study on Bipolar Disorder

---

Do you have Bipolar Disorder? Do you want to see your brain?

UNC-Chapel Hill's Center of Excellence for Research & Treatment of Bipolar Disorder (CERT-BD) is looking for participants for their research studies on Bipolar Disorder.

You may qualify if you:

- Are 8-65 years old
- Are currently diagnosed with Bipolar Disorder or suspect you may have Bipolar Disorder
- Are in good physical health
- Are not using illegal drugs
- Are not currently pregnant

You will receive a study-related psychiatric evaluation, MRI and neurocognitive testing. You may be eligible for study medication. Financial compensation for participants is provided.

For more information, please call 888-843-6421 (24 hour line) or visit http://www.med.unc.edu/cert-bd

WebEvent Reminder

Title: Deadline for Nominations for Award in Management 2009
Date: Friday, April 24, 2009
Time: Unspecified

Description: An annual Award in Management was established in 2005 to acknowledge the dedication and hard work of the administrative managers in each of our units who coordinate and serve as liaisons with the Dean's Office.

Nominations for the 2009 College of Arts and Sciences Award in Management are due by Friday, April 24, 2009. The criteria for the award are listed on the attached nomination form. Up to three letters of support addressed to La-Eula Davis (Dean's Office, CB # 3100, 205 South Building) will be accepted.

The 2009 award recipient will be announced on Wednesday, June 10th at the Arts and Sciences Manager's Award Luncheon.

Again, the nomination deadline is Friday, April 24th .

Return nominations to:

La-Eula Davis
College of Arts & Sciences
CB# 3100, Dean's Office
Phone#: 2-1165
Fax#: 2-2408

Subject:	FORMAL NOTICE: Bain & Co. Interim Report Now Featured on University Budget Web Page

---

Dear Students, Faculty and Staff:

We've posted more new information to the the Carolina Budget Information Web page, accessible at www.unc.edu. The latest addition is a video presentation to provide the University community with an interim report on the work we're doing with the help of Bain & Company, the global business consulting firm that is helping us identify innovative ways to streamline operations, become more effective, and perhaps achieve additional cost savings. With the academic year winding down, we wanted everyone to have the opportunity to know the current status of this work and how it will continue to move forward over the summer.

I hope you'll take the time to view the presentation.

Sincerely,

Holden Thorp

Subject: INFORMATIONAL: Do you know a child with autism?

The ASPIRE research team is currently conducting a study involving children and adolescents with autism spectrum disorder (including Pervasive Developmental Disorder-NOS and Asperger's Disorder). We want to compare children (ages 2.5-17 years) who are not taking medication to children who are taking medication.

We are currently looking to enroll children who do not want to take any medication for the next year.

We are also looking for children who wish to begin study medication for the next year.

Participation will include:
* A comprehensive diagnostic assessment of autism spectrum disorder
* Physical exam and cognitive assessments for child
* Questionnaires for a parent/legal guardian to complete
* Appointments at UNC Hospitals with a doctor who specializes in autism

Please contact the study coordinator, Cheryl Alderman, for more information:

Subject: INFORMATIONAL: Research study about Asthma and Ozone exposure

---

The Environmental Protection Agency (on the UNC campus) and the UNC Center for Environmental Medicine, Asthma and Lung Biology are seeking individuals ages 18 to 50 with mild asthma. The purpose of this research study is to learn if volunteers who have asthma and have a particular genotype, known as the GSTM1 null genotype, have increased response to ozone compared to volunteers with asthma who have the GSTMI sufficient genotype. Volunteers will be studied for six days, approximately 18 hours, over about 1 month. Following screening and training sessions, there will be one 3-day study session and a brief follow up visit 5 to 10 days later. Experiments will involve breathing tests, light exercise, blood samples, sputum induction, genetic testing and exposure to ozone. For more information, please call Westat EPA Recruiting at 966-0604. Approved 2-3-09 by the Committee on the Protection of the Rights of Human Subjects Biomedical Institutional Review Board. IRB # GCRC 2371. This email is sponsored by: U.S. Environmental Protection Agency Human Studies Division, located on the UNC-Chapel Hill campus, and the UNC Center for Environmental Medicine, Asthma and Lung Biology.

Subject:	INFORMATIONAL: Children with Repaired Cleft Lip and Palate Needed for Speech & Listening Study

---

The UNC Division of Speech and Hearing Science's Speech Science Laboratory is currently recruiting children between 7 - 11 years old with repaired cleft lip and palate to help us learn more about how children perceive and produce certain speech sounds.

In order to participate in the study, your child will receive a language and hearing screening and short listening test lasting approximately 60 - 75 minutes. If your child passes this screening, he/she will be asked to complete another session of speaking and listening tasks, lasting approximately 60 - 75 minutes, at the Speech Science Laboratory on the UNC campus. If your child passes the screening and completes the study, you will receive $40 for your child's participation.

If you are interested in participating, please contact Kerry Callahan-Mandulak in the Division of Speech and Hearing Sciences at mandulak@email.unc.edu or 919.358.6282.

The principal investigator for this study is Kerry Callahan-Mandulak, MA, CCC-SLP, Doctoral Candidate, Department of Allied Health Sciences.

This project #08-2100 has been approved by the Biomedical IRB, for the period from 01/07/2009 to 01/06/2010.

This email is sponsored by: Division of Speech and Hearing Sciences, Department of Allied Health Sciences

---

the ackland is going green

And you can help! Starting this summer, more of the Ackland's printed materials will arrive in your inbox, not your mailbox.

As the world becomes more wired and environmental concerns grow, the Ackland believes that we can communicate just as effectively - if not more so - by using electronic communication as our primary means of contact. Each year, this simple step will save thousands of reams of paper *and* thousands of dollars - money better spent bringing you the type of world-class exhibitions and programs you've come to expect.

We know there might be some difficulties during this transition and want to do all that we can to keep you informed. This means it's more important than ever that we have your preferred name and email address. Let us know about any updates to your contact information via the E-News link on our homepage or by writing to ackland@email.unc.edu. Add ackland-e-news@listserv.unc.edu to your address book so that these messages don't get blocked by your server.

Keep an eye on your email from now on for special exhibition announcements, Ackland event invitations, and our weekly E-News. In addition, our website will feature increasingly detailed calendar listings and more ways for you to learn, give, register, and explore the collection.
We'll see you at the Ackland!

ART TODAY WORKSHOP AN ACKLAND-KIDZU COLLABORATION

4:30 - 5:30 PM

Art, animals, and nature are combined in this program for four- to eight-year-olds. Participants will explore how artists depict and create texture in the exhibition *New Currents in Contemporary Art*, then head to the Kidzu Children's Museum to make their own texture collages.

Registration required and limited | $5
To register, call Kidzu at 919.933.1455

Friday, May 8

ART AFTER DARK

Museum open until 9:00 PM
Music 5:30 - 6:15 PM
Gallery Talk 6:45 PM

Visit the Ackland this Friday for Art after Dark! During these special evening hours, enjoy our cash bar (beer and wine), light refreshments, and live music. May 8's Art after Dark will feature a ***New Currents in Contemporary Art*** gallery talk with exhibition artists and music from the **Raging Grannies**. The **Raging Grannies** originated in Canada in 1987 as a group of mature women who wore bright clothes and sang satirical words to old-time music to protest for peace and social justice. The group's popularity drifted south and the Triangle group began about ten years ago. There are twelve to fifteen active members ranging in age from mid-fifties to early eighties. Free.

IN THE GALLERIES:

At the Heart of Progress: Coal, Iron, and Steam since 1750

New Currents in Contemporary Art

Sage in the Bamboo Grove: The Legacy of Sherman E. Lee

Metamorphosis in Ovid's Poetry and Early Modern Art

NEXT WEEK:

Tuesday, May 12
Curators Clinic
1:00 - 4:00 PM

Sunday, May 17
Because We're Still Here (and Moving) Video Contest Reception and Screening of Winners
2:00 - 4:00 PM

Please visit our calendar for a full listing of special programming and events.

SEEING YOUR WORLD
A SUMMER ART PROGRAM FOR CHILDREN

June 22 - June 26

This summer the Ackland presents **Seeing Your World**, a week-long summer art program for children ages nine to twelve. The program runs June 22 - June 26, 9:00 AM - 12:00 PM daily.

Participants will investigate original art in the Ackland's galleries, practice the techniques used to make them, and learn new ways to see and understand through art. Time will be spent exploring the ways different artists depict the world around them, and children will create their own collages, multi-media boxes, and poetry. Daily snacks are included.

The program is $100 for Museum members, $125 for non-members. Pre-registration is required. Limited scholarships are available. For more information or to register, contact Senior Museum Educator Beth Shaw McGuire at 919.962.0479 or bas5705@email.unc.edu.

VOLUNTEER GALLERY TEACHERS NEEDED

See art in new ways as a volunteer gallery teacher at the Ackland. Interactive, learner-centered teaching, primarily for kindergarten – twelfth-grade students, is the core of our program. Ackland educators are now interviewing candidates for the upcoming training class beginning September 2009. This two-year sequence includes intensive training about works of art in the Ackland Collection, teaching strategies to use in the galleries, mentoring with an experienced gallery teacher, and teaching independently in the galleries. To learn more about the Ackland's volunteer gallery teacher program, attend an information session at the Museum on Wednesday, May 12, 10:00 AM - 12:00 PM, or Tuesday, June 2, 10:00 AM - 12:00 PM. To RSVP, or for more details, please contact Museum Educator Leslie Balkany at lbalkany@email.unc.edu or 919.962.3342.

For more information on the Ackland visit www.ackland.org.

These and other public programs are made possible by generous support from the Ackland Art Museum members and friends like you!

Subject:	INFORMATIONAL: SASB North Closing on Several Evenings in May, June

UNC STUDENTS, STAFF, AND FACULTY:

This is a notice from the UNC Department of Public Safety (DPS) that the North Student Academic Services Building (SASB North) will be closed during early evening hours on several dates this summer so that UNC Police personnel can conduct drills in that location as part of their annual in-service training. The dates and times are as follows:

* Tuesday, May 12, 5 p.m. until 9 p.m.
* Tuesday, May 19, 5 p.m. until 9 p.m.
* Wednesday, May 27, 5 p.m. until 9 p.m.
* Tuesday, June 2, 5 p.m. until 9 p.m.
* Tuesday, June 9, 5 p.m. until 9 p.m.

During these times, signs noting the closure will be placed near all entrances to SASB North, and entry doors will be locked. The building will be open on its normal schedule during all other times.

For more information or to see a map showing the location of SASB North, visit the following link:

http://www.dps.unc.edu/NewsLinks/SASBTrainingWeb/SASBTrainingFlyer.pdf

If you have further questions, please call the UNC Department of Public Safety during regular business hours (Mon.-Fri., 7:30 a.m. - 5 p.m.).

Thank You,
UNC Public Safety

Subject: INFORMATIONAL: 40-55 Year Olds Needed for Hearing Research Study

---

HEARING RESEARCH STUDY

We are currently recruiting 40-55 year olds with normal hearing, and no history of ear problems. The research study will consist of two or three visits of one hour each. There may also be other long-term studies that you qualify for. Participants will sit in a soundproof room and listen to sounds presented over headphones. Participants will be compensated for their time at a rate of $10 per hour.

The purpose of this research study is to obtain a better understanding of hearing. The research study takes place in MacNider Hall (next to the Health Sciences Library).

If you are interested in participating in the research study please contact Sara Mamo at smamo@med.unc.edu.

Subject: INFORMATIONAL: Healthy Infants Needed for Speech Study

---

The UNC Craniofacial Center is conducting a research study on infant vocalizations following cleft palate repair. We are currently seeking infants without cleft lip or palate to serve as a comparison group.

To be eligible for the study, infants must:
- be between 8 to 11 months of age
- be learning English as a first language
- not have developmental delays
- not have known syndromes
- not have known sensory-neural hearing loss
- pass a screening procedure

This is a longitudinal study that will occur at the UNC Craniofacial Center. If your infant passes the screening, we will study him/her three times during the year until he/she is approximately 24 months old. We will video tape your infant, record his/her vocalizations, and monitor his/her nasal breathing using a simple technique. Each visit will take approximately 30 minutes. We will compensate you $25 per visit. Payment will be by check and we will require a social security number for payment purposes only.

To find out more information about this study, you may email cplante@med.unc.edu, or david_zajac@dentistry.unc.edu, or call 919-966-1362.

Study approved by UNC Biomedical IRB (Study # 07-0068)

Subject:	INFORMATIONAL: Seeking parent-child pairs for study of narrative language & perception

---

We are currently recruiting parent-child pairs to participate in a pilot study of narrative language and perception. We are looking for parents under 55 years of age with children 5-18 years of age. Participation will consist of one 15-25 minute visit per parent-child pair. Participants will view an illustrated picture book on a computer monitor and narrate the story. During storytelling, participants' eye movements will be tracked with a remote eye tracking instrument that reflects an invisible light off of the eye to track eye movement, and which causes no harm or discomfort. Parent-child pairs will be compensated $10 per pair for their time.

The purpose of this research study is to obtain information about the usefulness of the measures for use in a study of narrative and perceptual strategies of individuals with autism.

If you are interested in participating in this research study, please contact Kaitlyn Wilson at kwilson@med.unc.edu.

Approved 10/17/08 by the Office of Human Research Ethics, Biomedical Institutional Review Board. IRB #07-1792.

---

The Boettiger Lab at UNC Chapel Hill is conducting a study to explore the role of learning in addiction. We are recruiting volunteers who are between the ages of 18 and 40 who have a substance abuse history but are currently abstinent.

Your participation would require you to come to our laboratory in Davie Hall on the University of North Carolina campus for two separate sessions and complete learning-related tasks on the computer for about 1.5
hours per session. For your participation, you will be compensated with $10/hour for the behavioral task and $20/hr if you participate in the imaging study.

Other requirements:
o No history of seizure, head injury, loss of consciousness, or other known neurological problems
o No psychiatric diagnoses (aside from substance abuse/dependence)
o Not currently using any psychoactive drugs (including antidepressants)
o Normal color vision

If you meet these requirements and think you may be interested in participating please send an e-mail to cablab.unc@gmail.com and include the following information:

To: Hartlyn, Jonathan
Subject: Fixed-term faculty policy question
Dear Jonathan,
I'm currently a member of the Faculty Council Committee on Fixed-term Faculty. Thank you for joining our committee meeting recently. The information you were able to provide was very helpful. As the Committee continues to develop a proposal for a new set of professional titles for fixed-term faculty in the College, we realized we need more information on current policies regarding fixed-term appointments, ranks, and degrees held. Or, we want to know if the College does not yet have a policy on these issues. (Please note that I'm also checking with Ron Strauss to see if there are any University-wide policies we should be aware of.)

- For example, if you make a policy (perhaps concerning titles or promotion) for fixed-term faculty holding a doctoral degree, which is a terminal degree, do those same policies apply to masters degrees that are "terminal degrees"? [ie: MFA degrees]
- How does the College define a "terminal masters"?
- Because of supply and demand, some departments may need to hire fixed-term faculty to teach who hold masters degrees, but in fields where a masters degree is not a terminal degree. Is that person allowed to hold the same professional fixed-term ranks as people with doctorates and terminal masters degrees?
- Are fixed-term faculty without a terminal masters eligible for promotion from Lecturer to Senior Lecturer and to Master Lecturer?
- Instead of a College-wide policy, are these decisions let up to each department?

I would appreciate any information you can share with me and our committee--or a suggestion of where to direct these questions. If you prefer to talk by phone, I'll be happy to set up a time.

Thank you,
Susan

Subject: FORMAL NOTICE: Symantec Antivirus End of Life - July 30, 2013

As announced previously, in response to customer feedback about Symantec antivirus software and the changing needs of the University, the decision has been made to change vendors for antivirus software. To comply with the UNC-Chapel Hill license agreement with Symantec, all UNC-Chapel Hill-provided Symantec antivirus software MUST be removed from all computing devices (servers, laptops and desktops) before the Symantec license expires on August 1, 2013. Furthermore - Access to the Symantec servers will be blocked on July 30, 2013, per our contractual obligations to stop using the product.

For personally owned devices, Information Technology Services (ITS) has tested and recommends some free options that are available from the Shareware site at shareware.unc.edu. The recommended software is free to all UNC-Chapel Hill students, faculty and staff and can be retained on your personally-owned device even after you leave UNC-Chapel Hill.

The recommended antivirus product for Windows devices is:
* Microsoft Security Essentials
*
https://help.unc.edu/help/migration-from-symantec-to-microsoft-antivirus/
The recommended antivirus product for Apple Macintosh devices is:
* ClamX Antivirus
* https://help.unc.edu/help/clamx-antivirus/

If you have any questions or encounter any problems as you make this antivirus switch, please call 962-HELP for assistance.

For university owned/managed computers, users should contact their departmental IT support staff for any questions regarding this transition. If you do not know who your departmental IT support person is, or if your unit does not have a departmental IT support person, please call 962-HELP for information about what you need to do for this transition.

UNC-Chapel Hill is transitioning to Microsoft System Center Endpoint Protection (SCEP) For Windows and Mac devices. Please refer to the following document for further information regarding how migration of antivirus software is being handled.
http://help.unc.edu/help/what-is-the-universitys-recommended-anti-virus-software

Thank you for your cooperation.

Sincerely,

Ramon Padilla Jr.

Subject: McMillan poverty proposal
Attach: McMillan Proposal April 2012 FINAL - JLL corrections.doc

---

Here's the proposal that I was discussing with Taylor before his death. I'd add one or two additional fellows. The idea was that if the UNC portion were funded, Bob would go to Duke to match. August 2014 will mark the 50th anniversary of the War on Poverty. Would be fabulous to launch with a conference that fall, supported in part by income from this endowment.

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

PROPOSAL TO TAYLOR MCMILLAN FOR A GIFT TO SUPPORT THE UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

The University of North Carolina at Chapel Hill, the nation's first public university, serves North Carolina, the United States and the world through teaching, research and public service. We embrace an unwavering commitment to excellence as one of the world's great research universities.

Our mission is to serve as a center for research, scholarship and creativity and to teach a diverse community of undergraduate, graduate and professional students to become the next generation of leaders. Through the efforts of our exceptional faculty and staff, and with significant support from North Carolina's General Assembly, we invest our knowledge and resources to enhance access to learning and to foster the success and prosperity of each rising generation.

With *Lux, Libertas* —light and liberty—as its founding principles, the University has charted a bold course of leading change to improve society and to help solve the world's greatest problems. Private support is critically important to the University's efforts to stay the course in this era of financial upheaval and uncertainty.

SUMMARY

The University of North Carolina at Chapel Hill respectfully proposes a gift of $500,000 to establish the Sanford Fellows program within the College of Arts and Sciences. In addition to receiving summer fellowships, Sanford Fellows will be invited to compete for grants from a program-administered Innovation Fund. This project will complement both a joint UNC-Duke curriculum focused on battling poverty and building prosperity in North Carolina and the Frank Porter Graham Lecture Series. The fellows will honor the legacy of Governor Terry Sanford, a protégé of Frank Porter Graham who in the 1960s made North Carolina a leader in national efforts to end racial and economic inequality. The project is spearheaded by James Leloudis, Professor of History and Associate Dean for Honors at UNC, and Robert Korstad, Professor of History and

Public Policy at Duke. Leloudis and Korstad recently published a prize-winning study of the North Carolina Fund, the model antipoverty agency that Sanford founded in 1963. The Fund relied heavily on students who conducted antipoverty work at the community level, and in the process raised up a generation of leaders who devoted their lives and careers to expanding economic opportunities for all North Carolinians. This project aims to revitalize that work and confront today's problems of inequality and uneven economic development across the state.

- Sanford Fellows: 2 sophomore-summer and 2 junior-summer fellowship per year at $5,000 each = $20,000
- Innovation awards: 1 award per year at $5,000 = $5,000
- Total: $25,000 per year

The project will be housed in UNC's Honors Program and administered by the Associate Dean for Honors.

The Opportunity

North Carolina needs innovative ideas and creative leaders who are prepared to act outside the bounds of conventional wisdom to address the state's most pressing issues—high unemployment and poverty. Both UNC and Duke are filled with young people who are eager to focus their attention, time, and talent on helping to solve some these problems. Many are searching for opportunities to connect with the communities around them and translate what they discuss in the classroom into real-world solutions. UNC and Duke stand ready to prepare students for the challenges of their time, and to harness the power of their talents for innovation, entrepreneurship, and civic engagement for the creation of more inclusive prosperity in our state.

The Project

We aim to create a Sanford Fellows program in which undergraduate students will explore issues of poverty and prosperity from a wide range of disciplinary perspectives and develop the entrepreneurial mindset necessary to translate classroom lessons into sustainable initiatives. They will also hone their research and leadership skills, cultivate the competence and respect needed to engage people who come from life circumstances different from their own, and create the networks required to build alliances that cut across social and political divisions.

The ideas that follow were developed through a year-long course on poverty and ethics that Professors Leloudis and Korstad taught for UNC and Duke students, a similar multidisciplinary colloquium they led for faculty from both campuses, and the success of the Frank Porter Graham Lecture Series.

Curriculum Background

The curriculum will include coursework, experiential learning opportunities, and translational projects:

- Gateway Course: A UNC Honors course will serve as the gateway to the program. Open to students from both campuses, this course will provide students a broad overview of poverty grounded in history, sociology, economics, and public policy.

- Four additional courses from either campus: During the remainder of their study, students will complete at least four additional courses from a roster of offerings at the two campuses. A more limited number of new courses will be purpose-built with course development funds administered by the program.

- Portfolio: In each of their four supplemental courses, students will be required to focus one paper or project on North Carolina, and to collect their work in a digital portfolio.

- Final Project and Certification: All students will be required to complete either a senior honors thesis or capstone project. Students who fulfill all of the requirements of the curricular pathway will be honored in a ceremony at the end of their senior year and will receive certification of their participation in the program.

Sanford Fellows

Each year, two sophomore students from UNC will be selected on a competitive basis from curriculum participants and awarded Sanford Fellowships. They will be offered an immersion experience in the translation of academic knowledge into effective policy making and social action. This part of the program will be designed to develop the civic capacities of a new generation of leaders who will be called on to provide solutions to the persistent challenges of poverty—to build what Terry Sanford called "a new day in North Carolina." The Sanford Fellowships will include:

- Summer Internships: During the summer after their sophomore year, the Sanford Fellows will complete an eight-week internship with a local community organization, learning about the challenges that people face in poor and marginalized areas of the state. Then, in the summer after their junior year, they will spend eight weeks in Raleigh interning with a state agency, advocacy group, legislator's office, or policy think tank.

- Monthly Dinner Discussions: During the students' junior and senior academic years, they will be invited to a series of monthly dinners with thought leaders in areas of education, environment, economics, politics, and media.

- Innovation Fund: Sanford Fellows will be invited to compete for grants from a program-administered Innovation Fund. Their proposals will be judged by a panel of distinguished social entrepreneurs, community partners, and faculty.

- Alumni Network: Sanford Scholars will benefit from ongoing networking opportunities with UNC and Duke alumni who are actively involved in economic development and antipoverty work across the state.

Faculty Directors

James Leloudis and Robert Korstad are natives of North Carolina who have written award-winning books on the history of the state in the 20th century. Their most recent work is *To Right These Wrongs: The North Carolina Fund and the Battle to End Poverty and Inequality in 1960s America*, published in 2010 by the University of North Carolina Press. Leloudis and Korstad also directed the Moral Challenges of Poverty and Inequality Project, co-sponsored by the Kenan Institute for Ethics at Duke (where they held appointments as Senior Fellows), UNC's Honors Program, and the Center on Poverty, Work, and Opportunity at UNC's School of Law.

Conclusion

Your generous philanthropy will help the University of North Carolina at Chapel Hill fulfill its vital mission to provide excellence in education now and in the future. Through support for the Sanford Fellows, you will help shape the next generation of leaders who will be champions of freedom, democracy, and the disadvantaged, just as Frank Porter Graham was in his day. Your

support will help attract the best and brightest students to Carolina—students who, in turn, will shape the future economic prospects for all North Carolinians—poor and non-poor alike.

Bobbi:

Thanks for the quick response and congratulations on your leave. Yea!

You thought about the class makes sense (even if you were teaching next year) but we will definitely see if we can pull something together on the homefront and include this. I'lll keep you posted as we proceed.

And an exhibition would be very cool, I think, if that would be possible.

Enjoy the remainder of the break.

Subject: FW: Final examination rule

Bobbi – In April 2012 you advised me to contact Rob Bruce regarding a final exam policy issue (Rob was on a subcommittee for the Academic Plan). The Undergraduate Bulletin states "No special preparation quizzes may be given during the last five days of classes (last two days of classes for summer school) before the beginning of the final examination period." The Registrar's Office states the policy slightly differently "No instructor shall give a quiz within one week (five class days) preceding the final examination period."
Every semester there's a student(s) or instructor(s) who brings this to our attention. In many cases it's when an instructor has scheduled three "midterm" exams over the course of the semester, with the third falling during the last week of the semester.
I followed-up with Rob yesterday. Rob said the regulation was sent forward to the subcommittee but no action was taken. Is this something that could/should be taken up with Ed Policy or the Registrar? Rob is happy to speak with Chris Derickson if there's support from Undergrad Education for a review/change.
Thanks,
Nick

Subject: Final examination rule

Dear Dr. Bruce,

Greetings from the Office of Undergraduate Education!

Bobbi Owen mentioned that you might be interested in an issue that came up last week regarding final exams because it may relate to the work you're doing as a member of a subcommittee for the Academic Plan. (I believe your group is looking at reducing the number of rules and regulations at UNC.)

A policy listed in the Undergraduate Bulletin states that "No special preparation quizzes may be given during the last five days of classes (last two days of classes for summer school) before the beginning of the final examination period (p. 397)." The Registrar's Office states the policy slightly differently on the Spring 2012 Final Examination Schedule: "No instructor shall give a quiz within one week (five class days) preceding the final examination period."

Several students objected to a test that was scheduled for the third to last day of classes. The instructor of the class scheduled three tests and final exam in the course, with the third test falling on the third to last day of classes. The test schedule was listed on the syllabus from day one. Several students felt this was in direct violation to the final examination rule. The Registrar's Final Exam Schedule prohibits any quiz, while the undergraduate bulletin prohibits "special preparation quizzes." In this particular case it was a test, not a quiz or a preparation quiz. The students were asked to take the test because it was listed on the syllabus.

In your work on the subcommittee, you may want to clarify what is, and is not, acceptable to give during the last five days of classes (i.e., preparation quiz, quiz, test, etc.).

Please let me know if you have additional questions or if you're not the correct person to contact.

All the best,

Nick

docs of cda

A guide to life in the CDA:

This is not an exhaustive list. There are other publications you should read, like the Faculty Handbook, the Undergraduate Manual, PATP Handbook or the Hazard Communication-Awareness Training Program. Check with your supervisor to see if you are required to read any of these publications.

-A-

Additional Duties Pay: See overloads

Archives: There is an archival storage room in the CDA. The Chair of the DDA has ultimate oversight on its contents. Contact McKay Coble with any questions.

A/V Equipment: Includes TV/VCR/DVD players, projectors, portable sound systems and related equipment. All portable equipment not assigned to a room is stored in 152, a closet near CDA room 101. There is one projector stored in the closet near the restrooms on the 2nd floor. Please reserve all equipment with Betty Futrell. Betty has the key. If there is a mechanical failure, Betty should be made aware and arrangements will be made to repair the object. It is up to each individual faculty member to have training and understanding of classroom equipment. There are several training sessions provided by the university during the year. Please check the OASIS website for class lists. Betty will not be able to provide any training. The first priority of all A/V equipment is the educational mission of the department.

Awards: Students may be awarded merit prizes for worked accomplished in the DDA. These awards are determined by the DDA faculty in April.

-B-

Breakfast: Country Junction every Friday at 8:00am

Building Maintenance: Any problems with the building should be reported to Jamie Strickland or Michael Rolleri. This includes items such as light bulbs, plumbing issues, etc. A maintenance ticket will be issued or the concern will be handled in house. For after hour problems and emergencies, UNC Dispatch 962-3456 should be called.

Building Improvements: Thoughts and concerns about building improvements should be brought to your supervisor.

Bulletin Boards: There are bulletin boards throughout the CDA to post important information. All bulletin board postings need the approval of the Chair or Associate Chair. Undergrad callboard is outside of room 105

-C-

Calendars: There will be a simple CDA events calendar posted on the 2nd floor between the restrooms. All other electronic calendars can be provided through the UNC email system. If you are on the EXCHANGE system you can request PRC calendars from the PRC Production Manager.

Call Board: See bulletin boards.

Cash Advances: Please see Scott Martinez for information on cash advances and processing for Dramatic Art and Frank Bermel for PRC cash advances.

Classrooms: The reservation book for the CDA classrooms 102-105 is located in the reception area. 101 is DDA classes, DDA/PRC rehearsals, room is reserved through Michael Rolleri. Classes are assigned first, followed by DDA rehearsals, performances and events and PRC rehearsals and events. All other requests are first come first served. Classrooms can be reserved by checking the calendar for the room in question, signing up for the space and time and filling out the appropriate form. See Michael Rolleri, Production Manager, for questions. The entire CDA community should work to keep the rooms clean and organized by following the guidelines posted in each room regarding the number of chairs, tables and cubes. Please remember to turn off the lights and close all windows when finished using the room.

Computers: All computer related questions and concerns should be routed to OASIS and the UNC IT department. You can call 962-HELP or fill out a ticket on the website- https://www.unc.edu/ar-bin/websub/index.pl

OASIS technician assigned to the DDA is Ron Odom. ronodom@unc.edu

Confidential Papers: If you have confidential papers that you need to dispose of, please make sure the documents are not part of the university records retention, which must be archived. See Jamie Strickland with questions about records retention.

Copiers: There are 4 copiers located on the 2nd floor of the CDA. Each requires a code to operate. Please do not perform maintenance on any of these machines (toner replacement, etc). To save paper, copiers are equipped to send an email scan of the copied item. Please consider this option. Only copies for exams are covered by the DDA. Please see Betty for the exam copy code. All other copies will be billed directly to your copy code and you will be charged .05 cents per copy.

Course Evaluations: Instructors will administer course evaluations to their students at the end of each term. Either by electronic means or paper, students will evaluate Drama courses once a semester. Faculty may access their own evaluations after their final grades are turned in. Evaluations are confidential and are only available to the instructor of record and the DDA chair.

Peer classroom evaluations are assigned by the chair and instructors will be evaluated at least one course per year.

-D-

Dogs/Cats, etc: Please note the official policy of the University; no animals are allowed in University buildings.

Defibrillators (AED): There are two defibrillators in the building. One is located on the second floor by the women's restroom and the other is located on the first floor next to the concession stand and Ken Strong hallway. In an emergency always call 911. Any questions contact Michael Rolleri (see First Aid)

-E-

Election: Elections for Orange County are held in the Paul Green Theater lobby, usually in November and May. If there is a primary run-off they will be here in June too.

Email: All employees are responsible for creating and maintaining a University e-mail address. You are required to use your UNC email while conducting University business. This includes student employees. Employee email should not be Auto-Forwarded to an external email account.

Emergencies: 911, 919-962-3456, 919-962-6565 (police dispatch)

External Activities for Pay: Faculty or EPA non-Faculty employees are required to file a "Notice of Intent to Engage in EPAP" request through the online system at least ten (10) days before engaging in the external activity. External Professional Activities for Pay (EPAP) requests should be submitted on-line: https://apps.research.unc.edu/air

-F-

Fax Machine: There is one fax machine in the CDA. It is in CDA 223, the office of University Manager, Jamie Strickland. Please do not enter the office when the door is shut. If Jamie is not in, the fax machine will not be accessible. Please plan accordingly or make other arrangements.

Fire Safety: No open flame, candles, incense or smoking are allowed in the CDA. Any requests for exception need to be in an email to Michael Rolleri with a minimum of 48 hours notice. In the fall there will be training in how to use a fire extinguisher, please watch your email or check with your supervisor.

Note: all productions that wish to use cigarette smoking must obtain permission from the DDA chair.

First Aid Kits: are maintained by the PRC Production Manager. They are placed throughout the building. If there is an incident requiring first aid, please follow basic first aid protocol. And always take special care with bodily fluids. Remember, "if it's warm, wet and not yours, don't touch it." There are small blood-borne pathogen kits with each first aid kit. (see Defibrillators (AED)

Football Game Day: In the fall, parking is limited on game day. If you are an employee with an ND permit, you can park in the deck on game day providing you are working.

Four-Thirty: Betty Futrell and Jamie Strickland leave for the day.

-G-

Glass Displays: Glass Triangles in the lobby will be coordinated by PRC through the Production Manager Michael Rolleri.

Guests: Guest Speakers, Directors, etc. not affiliated with the University MUST complete and submit Independent Contractor forms, for review by Disbursement Services, before being paid for services. Please make sure that you clear all work, even for current UNC employees or students, before promising payment. There are situations that will prohibit us from paying individuals. Please see Scott Martinez (DDA) or Frank Bermel (PRC) for forms and instructions. All requests MUST be approved by the University before anyone can begin work. NO EXCEPTIONS. Failure to obtain pre-approval may result in denial of payment. Unpaid volunteers, interns, and visiting scholars will require pre-approval by HR and be required to complete a background check before beginning their assignment. Please contact Jamie Strickland (DDA) or Heidi Reklis (PRC) to complete request forms.

Guests will be asked to provide additional information for flight reservations as required by the TSA.

-H-

Health and Safety: The Health and Safety supervisor for the CDA is Michael Rolleri. This includes all emergency procedures and workplace safety issues for the DDA and PRC. Please see Michael with any questions.

Housekeeping: Housekeeping issues should be brought to Jamie Strickland's attention. For emergencies or after hour issues please call 962-3456.

-I-

Independent Contractors: (See Guests)

Interns: (See guests)

ITS: Information Technology Services (see computers)

-J-K-

Ken Strong Gallery: The Ken Strong Gallery is named in honor of former faculty member and PlayMakers' company member Ken Strong. The gallery celebrates not only Ken's life but undergraduate productions here at UNC.

Kenan Theater: The scheduling of the Kenan Theater will be through Michael Rolleri, Production Manager. For Any issues, concerns or questions related to the Kenan Theater, please see Michael.

Kenan Theatre Company (KTC): KTC is the company in which the undergraduates produce shows. The KTC consists of student producers and a student board which is led by the director of undergraduate production.

Keys: Key requests/concerns for the CDA can be made through Jamie Strickland. Lost keys should be reported immediately. You will be responsible for replacing any lost/stolen keys and for any re-keying costs. (see security)

Kitchen and Kitchenette (2nd floor): A key for access to the catering kitchen can be obtained from Michael Rolleri. You must be 21 or older to obtain this key. It is up to the individual to clean up after each use. If you have questions about the equipment in the kitchen please ask Michael. The kitchenette on the 2nd floor should be maintained by everyone. Please do not leave dirty dishes in the sink and remove all unwanted food from the refrigerator.

-L-

Leave (SPA and EPA Non-Faculty):
Vacation: Vacation leave shall be scheduled in advance and approved by the employee's supervisor. Time taken must be recorded in TIM (Time Management System)

Sick: Employees must give the supervisor reasonable advance notice of the need to use sick leave. In the event of an emergency or

other unplanned absence, the employee must notify the supervisor as close to the beginning of the work schedule as possible. To avoid misuse of sick leave privileges, management may require a statement from a medical doctor or other acceptable evidence that the employee was/is unable to work due to personal illness or injury, family illness or injury, or death in the family. Time taken must be recorded in TIM (Time Management System).

Lockers: There are lockers on the first floor near the classrooms and in the dressing rooms for the Paul Green Theater. You may sign out a locker by completing the registration sheet at the reception area near the stairwell. You must provide your own lock. Locks will be cut off if the locker is not registered.

-M-

Mail: Campus and US mail trays are located on top of the faculty and staff mailboxes. Mail is picked up and delivered to our campus box once in the morning and once in the afternoon except on holidays. Please do not put mail in the mailbox outside of room 102. University business mail requiring a stamp will need to be placed in the mail tray upstairs.

Maintenance: see building maintenance

Meet and Greet: on the first day of rehearsal for PRC and PRC2 shows there is an informational and social meeting before the read through. These gathering are usually held in the Paul Green or Kenan Theatre. **All students, staff and faculty are welcome.**

-N-O-

OASIS: Office of Arts and Sciences Information Services (See Computers)

Office Hours: All faculty members in the DDA are expected to keep scheduled office hours or make provision for appointments with students.

Office Supplies: Please do not remove office supplies from the reception area near Betty's desk. All general office supplies must be purchased through epro. Personal reimbursements and P-card purchases will not be permitted for these items. Betty Futrell oversees ordering supplies for the DDA and Scott Martinez oversees ordering supplies for research accounts. Heidi Reklis, PRC General Manager, oversees ordering supplies for PRC.

One Card: The UNC One Card is a multipurpose identification and on-line accounts card. You can use it for anything on campus from Chick-Fil-A ® to Parking Tickets. It is the official ID card for students, faculty, & staff of The University of North Carolina at Chapel Hill. Your One Card provides access to certain facilities & events and also serves as your UNC Library card

ONYEN: "ONYEN" is the name for UNC's campus-wide identifier that you can use to gain access to various electronic resources on campus. It is an acronym for the "Only Name You'll Ever Need." The distinctive name is intended to prevent confusing it with the myriad other user-ids that exist across campus. (see PID)

Overload Activities: Overloads are additional duties undertaken by an EPA employee at the University. An overload activity request must be submitted and approved in advance by department Heads and the Dean. There are limits to the amount of pay that be received. Please see Jamie Strickland.

-P-

Packages/Shipping: The FedEx and UPS pickup/drop off is located in the reception area. Check requests, including personal reimbursements, and P-card purchases for these charges will not be permitted.

Parking: You will be contacted if you are eligible for a permit. Please contact the Parking Coordinator for the DDA, Jamie Strickland, for any questions related to Wait List parking or Parking Alternatives. You can also contact DPS for parking related questions. DDA and PRC have no control over parking around the CDA.

Paul Green Theater: The scheduling of the Paul Green Theater will be through the PRC Production Manager. For any issues, concerns or questions related to the Paul Green Theater please see Michael Rolleri.

Phones: Any voicemail issues should go through the help desk at 962-HELP. Please see Jamie Strickland for phone line issues. There is a public phone available for faculty/staff use at the empty reception desk. For local calls, please dial 7 + area code + number to dial outside of the University. For long distance calls, a PIN code is needed. Please have your supervisor contact Jamie Strickland.

PID: The Personal ID Number (PID) is an identification number assigned to all persons with a university relationship, as defined by an official university department. This number is designed to give all persons a universal number (PID or Person ID) that is unique to the University of North Carolina at Chapel Hill. The number is nine digits long and is the primary record keeping key for all departments within the university and must be used for all communication.

PlayMakers Repertory Company: PRC (as we informally call it) is professional LORT (League of Resident Theatres) regional theatre. PRC resides in the CDA along with the DDA and most members of the company teach for us. Conversely all members of the DDA faculty also work for PRC in their area of specialty.

Printers: There are 2 networked printers for faculty and staff use. Please do not perform any maintenance on these unless you have been instructed properly. If you need access to a printer on your desktop computer please contact UNC IT/OASIS. Some printers have restricted access. If you have any questions about a specific printer or plotter, please ask. Ink and paper for personal printers in individual offices or other common areas cannot be supported by the DDA.

Purchasing/Payment Timelines: Please allow sufficient time for processing when requesting payment of an invoice or reimbursement of out of-pocket expenses.

Reimbursement of out of-pocket expenses can vary between one and four weeks based on type of expense and University affiliation. You will be required to complete a W-9 for reimbursement and travel requests. Personal reimbursements are subject to approval by the Chair.

-Q-

Questions? Ask them- we have an open door policy in the CDA and it takes all of us to remember how it all works!

-R-

Recycling: Recycling bins are located throughout the CDA. A paper and magazine bin is located in the reception area and a bin for bottles and cans is located in the kitchenette. Please do not leave cardboard food boxes on the counters in the kitchenette as housekeeping is not responsible for cleaning this area. All cardboard should be taken to the recycling bin outside by the dumpsters. Bins are emptied every other Thursday. You are responsible for removing recycling from your office.

Rehearsals: The DDA and PRC hold an open rehearsal policy. All are welcome to attend rehearsal for all productions in the CDA. It is expected that courtesy and rehearsal room protocol be displayed during your time in the rehearsal. There may be times when a rehearsal is closed and it will be marked plainly on the room door.

Rehearsal Hall: Reservations for the Frey Rehearsal Hall (aka-PRC Rehearsal Hall) other than DDA classes are scheduled through the PRC PM Michael Rolleri.

Reimbursements: Please see Purchasing/Payment Timelines.

Rentals of the CDA: Rental requests for the classrooms 101-105, Rehearsal Hall and the Paul Green Theatre will be handled by Michael Rolleri. Rental requests for the Kenan Theater

will be handled by Michael Rolleri and David Navalinsky.

Research Funds: Any purchases made using research funds are the property of the University and must remain with the department upon separation from the University. Please see Scott Martinez for questions relating to your research fund accounts.

-S-

Safety Meeting: Every Friday at 5:30 in the Scene Shop.

Security: On weekdays access to the 2nd floor will normally be locked when the last DDA administrator leaves for the day. Usually around 4:30-5pm. Please plan accordingly if you are meeting someone, to make arrangements to get them upstairs. The exterior doors will be locked between 5:30-6. The electronically locked doors remain open from 7:30am-11pm whenever the university is open. There are 2 electronic lock doors in the CDA: by the Cobb dorm entrance and in the front entrance of the Kenan lobby. They are marked with yellow stickers. On show days it is the responsibility of the House Management to lock and unlock the front doors for the audience. The PRC shop staff or Stage Management will lock the rear section of the Paul Green Theater during rehearsals and shows. If you unlock a door, please lock it.

Smoking: Smoking is prohibited within 100 feet of any university building. This includes the second floor balcony and the area outside by the catering kitchen. Smoking is also prohibited in any state owned vehicle.
If smoking is deemed a necessary part of a production, permission must be granted by the DDA chair.

Software: Please contact Jamie Strickland if you would like to order software through the University's Information Technology Purchase System. An account number will need to be provided for departmental charges. Any charges for software for at home use will need to be reimbursed to the DDA.

Summer School and Summer Pay: Faculty may teach Summer School or take on additional work for pay with UNC during the summer. The department will send out faculty requests for summer school and decide on which classes to offer and teaching needs based upon our available budget. Pay limits also apply to summer compensation.

Surplus: All equipment going to UNC surplus must go through Michael Rolleri.

-T-U-V-

TIM: The Time Information Management System is the official time capturing system utilized to track SPA employee hours for accurate calculation of payment as well as to track leave for accurate reporting records for SPA and Permanent EPA employees. Employees must approve their time cards in TIM for hours worked or leave taken by their designated pay period close. If time cards are not approved, employees may not receive timely payment.

Undergraduate Production Board: This board headed by David Navalinsky determines the season and practices of undergraduate production. The positions are specific and receive a stipend.

Vehicles: You must be a university employee to drive a state vehicle. You must submit a copy of your driver's license to Michael Rolleri. The truck can be signed out through the PRC Assistant Technical Director. The Costume Shop car can be signed out through the Costume Shop Manager. If you are ticketed while driving or for parking, you will be responsible for payment.

Visiting Scholars: (See Guests)

Volunteers: (See Guests)

-W-

Wireless Network: If you have a UNC issued ONYEN and PID you can register any wireless device. Please refer to this website for any questions.
https://onyen.unc.edu/cgi-bin/unc_id/services

Special arrangements can be made for PRC guest artists through the Company Manger.

Paul Eliot Green
Playwright and Humanist

(17 March 1894 - 4 May 1981) An American playwright best known for his depictions of life in North Carolina during the first decades of the twentieth century. He received the Pulitzer Prize for Drama for his 1927 play, ***In Abraham's Bosom***.

Green's output was not only confined to plays. He penned the screenplay for the 1932 film ***The Cabin in the Cotton*** and also wrote extensively on the subject of his beloved North Carolina. He helped Richard Wright adapt his novel Native Son to the stage in 1940. He also was a founder of the North Carolina Symphony Orchestra and the Institute for Outdoor Drama. He served UNESCO travelling around the world to lecture on human rights and drama. Green served as a professor of drama at UNC until his death in 1981.

---

Hi, Bobbi.
Please see attached. The meeting presenters were:
Fred Clark, Professor of Romance Languages, Academic Coordinator Carolina Covenant Scholars Program
Taffye Clayton, Vice Provost for Diversity and Multicultural Affairs and Chief Diversity Officer
Cynthia Demetriou, Director for Retention, Undergraduate Education
Brian Hogan, Research Assistant Professor, Chemistry
Kelly Hogan, Senior Lecturer, Biology
Donovan Livingston, Academic Advisor, Upward Bound, Carolina Higher Education Opportunities Programs
Lee May, Dean and Director of The Academic Advising Program, College of Arts and Sciences
Harold Woodard, Dean and Director of the Center for Student Success and Academic Counseling
Kindly let me know if I can provide you with any additional information.
Best, Cynthia

Retention Brief: Overview and Opportunities

Fred Clark, Professor of Romance Languages, Academic Coordinator Carolina Covenant Scholars Program
Taffye Clayton, Vice Provost for Diversity and Multicultural Affairs and Chief Diversity Officer
Cynthia Demetriou, Director for Retention, Undergraduate Education
Brian Hogan, Research Assistant Professor, Chemistry
Kelly Hogan, Senior Lecturer, Biology
Donovan Livingston, Academic Advisor, Upward Bound, Carolina Higher Education Opportunities Programs
Lee May, Dean and Director of The Academic Advising Program, College of Arts and Sciences
Harold Woodard, Dean and Director of the Center for Student Success and Academic Counseling

Good morning.

Dr. Clark, Dr. Clayton, Dr.s Hogan and Hogan, Mr. Livingston, Dr. May, Dean Woodard, and I thank you for the opportunity to provide a snapshot of the current state of retention at Carolina.

Our goal today is to provide a brief presentation and, perhaps more importantly, engage in a discussion about strengthening degree completion at Carolina.

In a single generation, the United States has fallen from 1st place to 12th place globally in college graduation rates.

First let's talk a look at the current state of undergraduate retention nationally.

As the country has struggled with economic recession over the last 7 years, the association between education and economic growth has been a constant refrain in national dialogues.

President Barack Obama has maintained that the future of American prosperity relies on a better-educated workforce and has put forth a national call to increase college graduation rates.

Through the American Graduation Initiative, the President unveiled an agenda and a vision for the United States to retake the world lead in college graduation rates by 2020. The United States currently ranks behind 11 countries in the share of young workers with college degrees.

Meeting the goals of the American Graduation Initiative necessitates that higher education institutions implement proactive retention and degree completion strategies.

50% of high school graduates

entering institutions of higher education

in the United States graduate

The national undergraduate graduation rate hovers around 50 percent meaning that only half of the high school graduates entering institutions of higher education in the United States graduate.

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

4-year graduation rate: 81%

5-year graduation rate: 88%

6-year graduation rate: 89%

So, where do we stand?

Our 4 year graduation rate is 81%

Our 5 year rate is 88%

And

Our 6 year rate is 89%

How does this compare to our peer institutions?

For 6 year graduation rates, we are at the bottom of the pack

BUT

Not by much.

In fact, with some intentional reorganization and investment, it is a very reasonable expectation that we could take the lead.

But first, let's look at what these rates really mean.

In 2007 we had over 20,000 applicants for Admission. We picked the best and brightest to put together an entering cohort of 3880 first-year students.

At the end of 4 years, 733 of those young men and women we admitted did not graduate.

If you think of all of the parents and children who came to one of our 18 Orientation sessions across the span of the summer, that is 733 families - or 2 full Orientation days worth of people – who did not have a graduate in 4 years.

Students From Low-Income Families

Now we are going to take a look at some of the student groups who are among the least likely to persist.

We ARE making very positive advancement with these groups, but what you will see is that there is much more we can do.

First, we'll look at students from low-income families.

The Carolina Covenant is closing the gap in academic achievement between low-income students and their more affluent peers. By 2012, the gap in four-year graduation rates between Covenant Scholars and all undergraduates had narrowed by two-thirds.

In particular, you can see the significant difference the Covenant has made in the success of undergraduate men of color.

The Covenant is a very important program at Carolina and should CONTINUE to positively influence student success.

Transfer Students

Transfer students are another critical group.

They are among the least likely of all students to persist.

In particular, transfer students from NC community colleges are less likely to persist.

The C-STEP program has made dynamic contributions to encouraging transfer student degree completion.

However, with just 55% of transfer students graduating in 4 years, you can see that there is still much work to be done.

First Generation College Students

Approximately 20% of our undergraduates are FGCS.

First Generation College Students

- 20% of undergraduates at UNC-Chapel Hill are first generation college students.
- We proudly call our first generation college students "Carolina Firsts."
- Carolina Firsts contribute to the great cultural and intellectual life of our vibrant and diverse undergraduate community.

3,231 Carolina Firsts

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

We proudly call our undergraduate FGCS "Carolina Firsts."

There are about 3,231 Carolina Firsts on campus right now.
Undergraduate Retention www.studentsuccess.unc.edu

Over the last 6 years, we have done a lot to encourage FGCS success. Carolina Firsts is a series of programs and services designed to promote degree completion for FGCS. This slide contains pictures from our annual Graduation Recognition and Pinning Ceremony in which FGCS invite a person pivotal to their success to come pin them at a ceremony on the day before graduation.

Undergraduate Retention www.studentsuccess.unc.edu

First Generation College Students

- 55% of Covenant Scholars
- 50% of Transfer Students

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

But still there is much work to be done…

55% of Covenant Scholars are Carolina Firsts.

And 50% of transfer students are Carolina Firsts.

The four-year graduation rate for all undergraduate is 81%.

However the graduation rate for Carolina Firsts it is 62%.

That is a deficit of 19%.

Increasing FGCS degree completion is critical to raising the overall graduation rate for our institution.
Undergraduate Retention www.studentsuccess.unc.edu

Undergraduate Males of Color

Undergraduate males of color have much to contribute to our community and we must do more to support their advancement to degree completion.

six-year grad rates in nc*

	Black Men	Students Overall	% Difference
Appalachian State University	50.4	63.2	-12.8
East Carolina University	44.9	55.5	-10.6
North Carolina State University at Raleigh	54.5	71.2	-16.7
University of North Carolina at Asheville	43.0	56.7	-13.7
University of North Carolina at Chapel Hill	62.9	84.2	-21.3
University of North Carolina at Charlotte	45.7	51.3	-5.5
University of North Carolina at Greensboro	43.5	51.5	-8.0
University of North Carolina at Pembroke	27.4	34.8	-7.4
University of North Carolina School of the Arts	50.0	55.4	-5.4
University of North Carolina-Wilmington	51.2	66.5	-15.3
Western Carolina University	44.1	48.3	-4.2

*across four undergraduate student cohorts at each institution, as opposed to one snapshot in time.

The difference in the overall graduation rate and the black male graduation rate is far greater at Carolina than at any of the other UNC system school listed on this slide.

	4 Years	5 Years	6 Years	
All Students	80.5	88.6	89.5	
Men of Color FGCS	[redacted]	74.7	77.3	
Men of Color Not FGCS	73.1	83.1	83.8	

In particular, undergraduate men of color who are also FGCS are not being retained and graduated from Carolina.

STEM Degree Completion

Another area of particular concern is STEM degree completion.

Ethnicity/Race	Total with SAT Score			STEM Status						STEM Degree			Non-STEM Degree			No Any Degree		
				STEM Degree		Non-STEM Degree		No Any Degree		SAT	SAT Verbal	SAT Math	SAT	SAT Verbal	SAT Math	SAT	SAT Verbal	SAT Math
	N	%	**Mean**	N	**%**	N	%	N	%	Mean	Mean	Mean	Mean	Mean	Mean	Mean	Mean	Mean
Total	2,968	100	**1312**	1,671	**56.3**	968	32.61	329	11.1	1,343	655	689	1,273	625	648	1,265	617	648
Race and Ethnicity Unknown	124	4.2	**1344**	67	**54.0**	49	39.52	8	6.5	1,374	677	697	1,308	648	660	1,306	663	644
Hispanics of any race	120	4.0	**1243**	47	**39.2**	59	49.17	14	11.7	1,277	628	649	1,214	605	609	1,252	614	639
American Indian or Alaska Native	24	0.8	**1211**	10	**41.7**	7	29.17	7	29.2	1,253	607	646	1,161	557	604	1,201	589	613
Asian	359	12.1	**1343**	249	**69.4**	75	20.89	35	9.8	1,354	646	708	1,321	632	689	1,310	621	689
Black or African American	309	10.4	**1145**	96	**31.1**	145	46.93	68	22.0	1,190	586	604	1,127	556	570	1,119	540	579
White	2,009	67.7	**1335**	1,187	**59.1**	630	31.36	192	9.6	1,355	663	693	1,305	641	664	1,311	644	667

Aggregate Data: Likelihood a Student will Earn a Grade above C- in Chemistry

COMMENTS FROM BRIAN

- **3.7% increase in exam performance** for all students (regardless of race) after controlling for student ability
- **6.9% increase in exam performance** for black students, halving the achievement gap seen in the low structure course. (A gap that did not close for Latin@ students.)
- **Closure of an achievement gap for first generation students** compared to non-first generation students.

Kelly Hogan and Sarah Eddy. (2103) How and For Whom Does Active Learning Work? A study of the Behaviors, Attitudes, and Achievement of Diverse Students; submitted

What we know about STEM degree completion is that trained faculty make a difference. Student-centered as opposed to faculty-centered instruction and ACTIVE classrooms promote success in STEM majors.

In this chart you can see that with student-centered instruction there is a dramatic influence on the performance of students from historically underrepresented populations

Student-centered instruction can close the achievement gap for FGCS in the sciences.

This type of instruction moves away from the “sage on the stage” to the “guide on the side.”

The instructor provides the structure to excel and holds students accountable.

Through this method of instruction, the instructor continuously measures the climate of learning and students excel.

-- COMMENTS FROM KELLY --

Mapping Retention Efforts at UNC-Chapel Hill

In this room today, we have experts on retention and student success who truly appreciate Carolina's challenges. One thing I can say is that there is A LOT we are doing right.

BUT we are not working as effectively and efficiently as we could.

For example, let's map our current retention efforts at Carolina.

This is just a sample of the retention programs on campus. We have many programs located in many places across campus but no common infrastructure.

Programs use different approaches to student success.

Each programs uses a different approach to student success.

We do not have a common definition of student success nor do we have a common theoretical framework.

Programs use different measurements for student success.

Programs are evaluated and assessed using different measures and different definitions of success.

Programs are located at different levels of the organization with different levels of resources.

Programs are also located at all different levels of the organization will different levels of resources.

Some of the programs at the very bottom of this stack struggle to operate on little or no budget and are under frequent threat of losing vital student service positions.

We need to organize from here…

…to here. We need connection and leadership.

This will help us to move in the same direction.

To Head In The Same Direction

- A common definition of student success
- Clear measures of student success
- A common theoretical framework for student success practices
- **Retention and graduation goals**

To head in the same direction, we need:

A common definition of student success

Clear measures of student success

A common theoretical framework for student success practices

Retention and graduation goals

Undergraduate retention must truly be made a priority for the University.

21st Century Vision

"We believe UNC-Chapel Hill must now build on this success by strengthening and further coordinating campus services and by establishing a focused, University-wide effort to foster a culture of success and completion for all students. Such a culture will focus on the strengths of our students rather than their weaknesses, and it will learn from students how the University can support and encourage them more effectively.

We recommend that the University establish—and within ten years achieve—the goal of leading all AAU public universities in four- and six-year graduation rates for undergraduate students by enhancing coordinated support services and by eliminating disparities in retention and graduation rates for students of all races, ethnicities, incomes, disabilities, and educational backgrounds."

Only if degree completion is made a priority will we meet the Board of Trustee's 21st Century Vision recommendation to lead all public universities in 4 and 6 year graduation rates.

UNC-Chapel Hill could have the highest graduation rate of all public universities.

We could have the highest graduation rate of all public universities. It is attainable.

And now is the time to do it.

Why Now?

There are several important reasons why now is the opportune time to hone in on undergraduate degree completion.

First, the demographics of North Carolina are rapidly changing. We need to be better prepared for our future students. We need to create an academic culture in which all students have the opportunity to be successful.

Second, we are in an era at Carolina of dynamic faculty pedagogical innovation. We should capitalize on this innovation to promote a culture of student success among all undergraduates.

Third, Carolina is receiving national recognition for its advancements in course redesign. It is important to capitalize on redesign efforts to promote a culture of inclusive student success.

What We Need

1. Strategic Organization
2. Leadership, Sustainability, & Accountability
3. Faculty Involvement
4. Investment in Student Support Services
   - ✓ Investing in the “front line”
   - ✓ Removing barriers to service
5. Assessment Support

So here is what we believe we need:

We need strategic organization for enrollment management. We need leadership, accountability, and sustainability to create a culture of student success with engaged faculty involvement. It is critical that we invest in student support services and that assessment and organizational learning is prioritized. We need to use clear and timely data to inform practice.

Right now we have a maze of programs and services. We need intentional, strategic organization with very clear goals.

Achievement Equity

We need a solid foundation from which to do our work. This would include leadership and accountability. It would give us a common vision from which to enhance retention work. This should be a vision of achievement equity - affording all students the opportunity to achieve.

With these strategies we can lead all public universities in four- and six-year graduation rates for undergraduate students. We can eliminate disparities in retention and graduation rates for students of all races, ethnicities, incomes, abilities, and educational backgrounds.

-- COMMENTS FROM TAFFYE --

Positive College Outcomes

Leadership and accountability will also lead us to more effectively collaborate across campus.

Strategically organizing and leading from an enrollment management perspective would bring together access, transition, retention, and graduation in to one unified approach for positive college outcomes.

We also need faculty involvement. It is imperative for faculty to appreciate student demographics and diversity. Incentives and affirmations should be offered for faculty to implement student success practices.

Invest in Student Support Services

An investment in student support services is critical. Our student support services have been unwound – they need to be strengthened and require reinvestment to become stronger.
Student Support Services - advisors, learning specialists, tutors – are the front line to student success. They need resources and we need to remove barriers to service.

We would be much stronger and function much more efficiently with well-resourced support services.

-- COMMENTS FROM HAROLD --

Finally, we need a common form of measurement for success that works with clearly established goals.

Student success paradigm shift from surviving to thriving in college.

We could build a culture of resiliency in which student-strengths are realized, students develop self-efficacy, and feel confident navigating the research university.

If the call to action presented here is met it would result in a culture shift where retention efforts are about thriving not just surviving in college.

Opportunities

1. Strategic Organization
2. Leadership, Sustainability & Accountability to Move Us Towards Achievement Equity
3. Faculty Involvement
   - ✓ Appreciation of demographics and diversity
   - ✓ Incentive for practices promoting student success
4. Investment in Student Support Services
   - ✓ Investing in the “front line”
   - ✓ Removing barriers to service
5. Assessment Support

So again, here are our opportunities.

Strategic Organization
Leadership, Sustainability & Accountability to Move Us Towards Achievement Equity
Faculty Involvement
Appreciation of demographics and diversity
Incentive for practices promoting student success
Investment in Student Support Services
Investing in the “front line”
Removing barriers to service
Assessment Support

One last thought…

+ 5 Points in 5 Years

200 Students Per Year

One last thought before we head in to our discussion -

Our graduation rate has gone up 5 points in the last five years. That means on average 200 more students are graduating each year.

We have done this without organization and with few resources – without truly unifying our efforts -

If we organized and made degree completion a priority, we really could have the highest graduation rates among all public institutions. It is attainable.

Discussion

	All Students	Men of Color FGCS	Men of Color Not FGCS
4 Years	80.5	59.5	73.1
5 Years	88.6	74.7	83.1
6 Years	89.5	77.3	83.8

To resize chart data range, drag lower right corner of range.

	4 Years	6 Years	Do Not Graduate
FGCS	62.00%	18.00%	20.00%
All Undergraduates	81%	7%	12%

To resize chart data range, drag lower right corner of range.

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

Retention Brief: Overview and Opportunities

BACKGROUND

The 21st Century Vision Committee on Access and Completion

"We believe UNC-Chapel Hill must now build on this success by strengthening and further coordinating campus services and by establishing a focused, **University-wide effort to foster a culture of success** and completion for all students. Such a culture will **focus on the strengths of our students** rather than their weaknesses, and it will learn from students how the University can support and encourage them more effectively.

We recommend that the University establish—and within ten years achieve—the **goal of leading all AAU public universities in four- and six-year graduation rates for undergraduate students** by enhancing coordinated support services and by **eliminating disparities in retention and graduation rates** for students of all races, ethnicities, incomes, disabilities, and educational backgrounds."

The White House Summit on College Access and Success and Chancellor Folt's Commitment

"UNC will provide up to $4 million over the next four years to launch a university-wide initiative to improve graduation rates for all undergraduates, with a focus on low-income, first-generation and underrepresented students. The university plans to build on its already-outstanding graduation rates — 82 percent after four years, 89 percent after five years and 90 percent after six years – by enhancing coordinated support services."

THE CURRENT STATE OF RETENTION AND DEGREE COMPLETION AT CAROLINA

The University has made advancements in undergraduate retention and degree completion. The four-year graduation rate has increased 5 points in 5 years meaning that, on average, 200 more students are graduating per year. This increase has been accomplished despite the lack of a clear strategic or organizational structure for retention efforts across campus. If programs and supports were strategically organized from a University-wide enrollment management approach, the potential for advancement in retention and degree completion would significantly increase positioning the University to meet the recommendation of the 21st Century Vision Committee and become a national leader in undergraduate degree completion.

NEEDS ASSESSMENT

Retention and degree completion programs and supports across campus lack:

- A common definition of student success
- Common measures of student success
- A common theoretical framework for student success practices
- Retention and graduation goals
- Consistent resources and support

RECOMMENDED STRATEGY

1. Strategic Organization of Retention and Degree Completion Programs and Supports
2. Leadership, Sustainability, and Accountability
3. Faculty Involvement
    - Appreciation of demographics and diversity
    - Incentive for practices promoting student success
4. Investment in Student Support Services
    - Investing in the "front line"
    - Removing barriers to service
    - Normalizing "help-seeking" behavior
5. Assessment Support

RECOMMENDED APPROACH

It is recommended that an enrollment and degree completion strategy is made a University-wide priority and implemented from strengths-based perspective. This will result in a culture shift where retention efforts are about thriving not just surviving in college. Historically, retention work has been dedicated to pathology with a focus on ameliorating students' problems (Shushok & Hulme, 2006). We a recommend different approach which appreciates what is right with students, identifies individual strengths, and encourages optimal academic functioning. This approach will result in flourishing students who are fulfilled, accomplished, and learning. Flourishing requires building and capitalizing on human strengths and capacities (Fredrickson & Losada, 2005).

RESULTS

If the recommended strategy was implemented from a strengths-based perspective, it would provide a solid foundation from which to provide proactive retention and degree completion strategies. It would promote achievement equity at Carolina affording all students the opportunity to achieve. With these strategies we can lead all public universities in four- and six-year graduation rates for undergraduate students. We can eliminate disparities in retention and graduation rates for students of all races, ethnicities, incomes, abilities, and educational backgrounds.

Fredrickson, B. L., & Losada, M. (2005). Positive affect and the complex dynamics of human flourishing. *American Psychologist, 60*, 678–686.

Shushok, F. r., & Hulme, E. (2006). What's right with you: Helping students find and use their personal strengths. *About Campus*, 11(4), 2-8.

Hi Bobbi,
In collaboration with Mike Strader and Donna Bickford, I have finalized the attached 1-page (back to front) fundraising sheets for undergraduate research. This format follows examples that I liked from Departments of Psychology. We have obtained photo releases for all students depicted.
Please do let me know if you approve of these or have any edits.
Best,
Krista

OUR@UNC.EDU
220 GRAHAM MEMORIAL
919-843-7763

From supporting mentored research projects to embedding opportunities for research experiences in the classroom, the Office for Undergraduate Research (OUR) promotes inquiry-based learning at Carolina.

More than 179 students major in the Fine Arts at Carolina. They include students majoring in Art History, Studio Art, Dramatic Arts, and Music.

During their 2013 SURF, Christina Lai and Ina Liu commissioned Chinese composer Yuying Weng to write a piece of classical music combining Chinese and Western musical elements.

These departments combine to provide a dynamic and thriving community of outstanding faculty who work together to educate and mentor undergraduates. In the modern age, no undergraduate education is complete without the opportunity to engage in a mentored research experience or hands-on, experiential education embedded within a course.

Undergraduate degree programs in the fine arts depend on private funding to enhance opportunities, expand access to research materials, and promote student excellence. With funds dedicated to the Fine Arts, OUR ensures that all Carolina students can have the opportunity to work on research projects with the guidance of outstanding faculty at UNC-Chapel Hill.

Through these mentored research projects and hands-on, experiential learning opportunities, students gain self-confidence, develop leadership skills, and apply their creative expertise to contemporary problems. Rachel Johnson, who received a Summer Undergraduate Research Fellowship (SURF), made a film about public pools in Greensboro, NC. Johnson said, "my SURF funding gave me the opportunity to shoot my first full length documentary. It has spring- boarded me into the creation of more mature works and has given me the opportunity to explore what aspects of filmmaking interest me most."

For Professor Don Oehler, private support through OUR provided a Graduate Research Consultant (GRC) to facilitate students' exposure to research in his course. He noted that, "having a GRC was one of the most helpful and rewarding ancillary classroom teaching experiences in my 43 years on this campus. Anyone teaching a course on our campus who qualifies for a GRC and does not take advantage is missing a wonderful opportunity. Everyone wins in the process. Everyone!"

Faculty and graduate students who engage in mentored research with undergraduates often co-author conference presentations and publications with their students. Beth Grabowski, who mentored Gray Swartzel in 2013 wrote, "SURFs are extraordinary opportunities for creative arts students. Often, this is the first time that students are individually responsible for negotiating the details of a larger scale creative project; I have seen some remarkable artistic and personal growth happen over the summer months."

Established in 1999, the Office for Undergraduate Research (OUR) expands opportunities for undergraduates to explore innovative ideas to solve social problems, develop new technology and entrepreneurial opportunities, and engage in creative performance and expression.

OUR serves over 16,162 undergraduate students in the Fine Arts and Humanities, Natural Sciences and Social Sciences and 2,208 students in professional degree programs such as business, education, nursing, journalism, and public health. OUR's capacity to promote undergraduate research and support excellence among Carolina's youngest scholars depends on the generous contributions of private donors. Funding priorities for OUR include:

Enhancing Support for Summer Undergraduate Research Fellowships (SURFs).

- *SURFs* are essential to the education of UNC-Chapel Hill students seeking to become leaders, innovators, and entrepreneurs in all careers.
- With the guidance and mentorship of faculty, undergraduate research fellows learn new analytic skills, develop their capacity to communicate ideas to the general public, and experience the thrill of discovery.
- Each SURF award is $3,000. By raising $500,000 this year, we can double the number of Carolina students who can participate in undergraduate research.

Establishing an Endowment to Support Research-Exposure Courses.

- Experiential learning opportunities through hands-on research increase retention, degree completion, and the likelihood of advancement to graduate school.
- Through the *Graduate Research Consultant program*, faculty receive $750 to embed experiential research opportunities into the curriculum and provide students with a graduate-student mentor and personalized attention.
- Over 21,000 students have received course credit for research-exposure courses since the program's inception 10 years ago.

Recognizing Excellence in Mentorship.

- *Graduate Student* and *Faculty Undergraduate Mentorship Awards* recognize and encourage mentoring of undergraduates in the Professional Schools, Fine Arts and Humanities, Natural Sciences, and Social Sciences.
- With support from private donors, OUR aims to provide four awards of $500-$1,000 each to recognize excellence in mentorship among both graduate student and faculty supporting undergraduate research.

SINCE 2005, OUR HAS FUNDED OVER 800 RESEARCH-EXPOSURE COURSES DESIGNED TO ENGAGE STUDENTS IN MENTORED RESEARCH FACILITATED BY FACULTY AND GRADUATE STUDENTS.

JOIN US IN SUPPORTING INNOVATION AND SCHOLARSHIP! A GIFT OF $750/COURSE WILL SUSTAIN THE DEVELOPMENT OF MENTORED RESEARCH OPPORTUNITIES THROUGH RESEARCH-EXPOSURE COURSES.

Celebrating Undergraduate Research.

- At the annual *Celebration for Undergraduate Research*, OUR showcases the work of 200 undergraduates in the Fine Arts and Humanities, Social Sciences, and Natural Sciences. Contributions to OUR provide support the cost of equipment, room reservations, and other supplies for this celebration of undergraduate achievements.

- Each year, OUR provides *Research Conference Travel Awards* of up to $500 to support the participation of undergraduates in professional conferences. Contributions to OUR for ensure that undergraduate researchers can share their results with senior colleagues from around the world.

Marissa Heyl (Anthropology & Journalism, 2006), a fellowship recipient who researched artisan communities in India, says that undergraduate research "planted the seeds that allowed me to cultivate my passion into a venture that is not only viable, but supports artisan livelihoods and pramates threatened textile arts around the world."

Endowing the Future of Undergraduate Research at Carolina

- A named endowment of $20,000,000 would ensure that generations of Carolina Scholars would have the support needed from OUR to establish themselves as future scientists, scholars, entrepreneurs, and artists with world-wide recognition.

Brandon Rafalson (American Studies, 2012) received a fellowship to compare and contrast schools of improvisational comedy in Chicago.

From supporting mentored research projects to embedding opportunities for research experiences in the classroom, the Office for Undergraduate Research (OUR) promotes inquiry-based learning at Carolina.

More than 964 students are currently majoring in the Humanities at Carolina. They include students majoring in English, Romance Languages, and Philosophy, as well as new programs like the interdisciplinary Medicine, Literature and Culture.

Amber Giffin (American Studies 2012) received a research fellowship to study the role of music in contemporary Cherokee society.

These departments combine to provide a dynamic and thriving community of outstanding faculty who work together to educate and mentor undergraduates. In the modern age, no undergraduate education is complete without the opportunity to engage in a mentored research experience or hands-on, experiential education embedded within a course.

Undergraduate degree programs in the humanities depend on private funding to enhance opportunities, expand access to research materials, and promote student excellence. With funds dedicated to the Humanities, (OUR) ensures that all Carolina students can have the opportunity to work on research projects with the guidance of outstanding faculty at UNC-Chapel Hill.

Through these mentored research projects and hands-on, experiential learning opportunities, students gain self-confidence, develop leadership skills, and apply their expertise to contemporary problems in the humanities.

Jonathan McClure, who received a Summer Undergraduate Research Fellowship (SURF), explored the impact of urbanization on Walt Whitman's poetry. McClure said, "The deeper critical thinking and writing skills that I have learned from the SURF experience will continue to benefit me in my undergraduate courses and beyond."

For Professor Ellen Welch, private support through OUR provided a Graduate Research Consultant (GRC) to facilitate students' exposure to research in her course. She noted that with the GRC's "expert mentorship and guidance, students succeeded in crafting individualized research plans that unlocked the meaning and tone of their objects of study."

Faculty and graduate student mentors who engage in mentored research with undergraduates often co-author conference presentations and publications with their students. Erin Carlston, who mentored Deborah Thurman in 2013 said, "For undergraduates, pursuing their own original research is an opportunity for intellectual and personal maturation that's not quite like anything else they can do at college. As a faculty member it's a great privilege, and also a wonderful learning experience, for me to get to "tag along" on these fascinating educational adventures."

I have attached my reproduction paper.

Plaid Silk Bodice

Research Paper – Full Description

By: Leah Pelz

This day bodice, dating from the early 1860s, is made of plaid silk paper taffeta with a solid brown glazed linen interior. The seams are machine stitched with finishing work done by hand.

Figure 1: Original Garment Front

Figure 2: Original Garment Back

Figure 3: Original Garment Interior

There are several features of this bodice that identify it with the early 1860s. In *The Cut of Women's Clothes 1600-1930,* Nora Waugh explains that center front closures, the separation of bodice and skirt, and the use of bold plaid silks for daywear are common traits for women's wear in the period of 1850-1869 (140-1). Other details frequently seen in garments of this era include dropping the armhole onto the upper arm, shifting shoulder seams back, and using curved princess seams in the back to create the illusion of a tiny waist (Payne, 512). Waugh states that the bishop sleeve first emerged in 1856 with "gathered or pleated top and bottom round the wrist" (140). Further, wide sleeves of the early 1860s grew far slimmer by the middle of the decade (Hunnisett, 86 & Payne, 514). Hunnisett also writes that though deep points at center front and back of

bodices was the norm throughout the Gothic Era and into the Crinoline years, this trend ended around 1866 (86).

While the interior is now very damaged, it, along with boned darts and seams, would once have been a secure base to aid in the close fitting nature of bodices of the time period. This bodice likely would have been worn with a lightly boned corset (Hunnisett, 87).

Bodice

The background of the silk is a champagne color with a series of horizontal taupe stripes and an intermittent group of vertical rust stripes. The repeat of the plaid is 1 5/8" x 9". The bodice is cut with the grain parallel to center front. It closes center front with twelve 5/8" brown covered buttons and hand-bound buttonholes that are ¾" long and about 1" apart. The extension is only 3/8" wide. The silk is cut in three pieces- front, side back, and center back on the fold. The glazed linen is only cut with a front and a back. The front of the bodice is flatlined to the glazed linen. Center front on both sides of the body is self-faced by turning back the taffeta's selvage into a 1 ¼", whereas the linen's edge is caught into the buttonholes on the right and its selvage turns back 1 ½" on the left side. None of the selvages along center front have been secured to the flatlining in any way other than being caught into the buttonholes and the buttons.

Figure 4: Detail of Buttonholes & Discolored Buttons

Two darts are taken through both layers of fabric, and the dart pickups are pressed toward the side seams to be used as bone casing. The first dart is about 7" long with a 6 ¾" steel bone, and the second dart is about 10 1/8" long with a 9 ¼" steel bone. The bones are slipped between the silk and linen lying closest to the body and encased by 1/8" running stitches. The excess dart interior is trimmed away and hand overcast. The side seams are pressed toward the front and finished in the same manner as the darts with a 6" steel bone.

Figure 5: Detail of Dart

The center back of both the silk and the linen are cut on the fold. However, the linen does not have a side back seam; the side back of the paper taffeta curves into the armhole. The seam allowance is folded back along the seam line and edge stitched by machine to the back piece. The shoulder seam is set back much farther than the natural shoulder, and it angles rather sharply to the back as seen in Figure 2. This causes the back to have an elegant and slimming diamond shape. The seam allowance of the shoulder seam is pressed toward the front and overcast together. There are two stacked bones at center back with a 5/8" wide casing made of the glazed linen that is whip stitched to the linen of the bodice. The longer bone measures 7 ¾" and the shorter is 5 ¾".

Figure 6: Top Stitched Side Back Seam

Figure 7: Side Back Interior

Bias pieces of the paper taffeta encase 1/16" twisted cotton cording that finishes the hem and neckline. The cording is applied to the bodice using a running stitch and is turned to the inside with a ¼" whip stitched finish. The same cording sets off the armhole. The bottom edge of this bodice comes to deep points both at center front and

center back, which suggests it is to be worn over the skirt. Another indicator is the 7 small bent wire hooks stitched intermittently along the waist so that the bodice can hook onto the skirt as seen in Figure 3. The hooks are placed at center back, both side seams, on each the second darts, and halfway between the darts and side seams.

Figure 8: Detail of Corded Hem

Sleeve

The back seam of the sleeve is straight on both sides, so it was likely cut as two pieces because the silk was not wide enough to accommodate it being cut in a single piece. The front seam is curved and has two ½" tucks that further exaggerate the curve. The corners along the hem and front seam are pieced on both sleeves, likely to conserve fabric, but it is covered by the decorative outer sleeve. The left under sleeve is pieced straight across a stripe about 1/3 of the way down from the armhole. There are ten tucks, varying from ½" to ¾" deep, along the hem of the sleeves.

Figure 9: Detail of Sleeve Tucks

The outer sleeve is cut on the bias and caught in the front sleeve seam. The finished edge is bagged out with the linen. One point along the edge is slashed with one side pleated down to create peaks. The top portion and the edge nearest the back seam

are hand stitched to the sleeve. The outer sleeve is caught into the corded hem of the sleeve, and the seam allowance of the cording acts as a 1 ½" hand stitched facing.

The bagged out edge of the outer sleeve and the hem are finished with a brown box pleated China silk trim. It is 1 1/8" wide with edges that are machine stitched in white. The box pleats are 3/16" each and held in place with two rows of white chain stitching. The trim is unevenly basted to the sleeves with the center of the trim matching the finished edges. Each of the four peaks of the outer sleeve is finished with a covered button.

Figure 10: Detail of Trim

Damage

The interior linen is disintegrating badly, though the flatlining in the sleeves is in much better condition than that of the bodice. The exterior silk is in very good condition. There are several very small holes throughout the silk, as well as a number of bright orange spots. The orange appears to be the result of water damage because it is mostly seen as rings on the left sleeve and underarms. Figure 4 shows discoloration of many of the buttons, and a few sections of the trim on the sleeves are disintegrating, especially along the hem.

Figure 11: Disintegrating Interior

Figure 12: Damaged Trim

Reproduction

I draped the reproduction pattern on a size 10 form. The bodice is a plaid silk taffeta flatlined with cotton satin, while the sleeves are flatlined with Tremode. The side back seams are trimmed and serged rather than topstitched like the original garment. The side seams and shoulders are also serged. Center front is self-faced, but the silk is turned back and slip stitched instead of using the selvage. I stitched eggs made of batting and cotton satin at the front muscle points to help fill the natural hollow between the bust and arm. The keyhole buttonholes are done by machine, and the buttons are covered with the same silk as the trim. The sleeves are one piece and edged with knife pleated trim.

Subject: Revised Request for One Time Funding

Bobbi:

After talking with you regarding the amount of funding available, please accept this revised request.

Undergraduate Retention is requesting $2500 to update print and web materials with the new academic eligibility rules. We will update our postcards, resources books, and advising posters. These materials are distributed throughout Orientation and across campus from various student support service locations as well as at Undergraduate Retention events and workshops. The $2500 will go towards printing and design fees (approximately $1500 for the resources books and $500 each for the postcards and posters).

Thank you, Cynthia

Bobbi,
I'd love for you to take a look at this. I am crossing my fingers that Larry will say yes to these renovations (and the cost of them) and that we can spend some Clayton money this spring to help in the outfitting of furniture/computers, etc. I recall you said you might have a little money too. After you and I chat about this, I will get back to Larry.
I am HOPING this will work out.

Lee you are in my head! I was about to email you on this. We had to delay our meeting with the projects group one week due to the snowmageddon.
We just received a schematic on the space (attached). Also attached is the first floor plan for reference.
Seminar space 171 offers three offices, and 172 offers three offices and a reception area. This arrangement would preclude the need of using the open space at the end of the hall (Room 177). The creation of an office (Room 179) appears simple. 171, 172, on the other hand will require some above-the-ceiling effort.
In total there would be seven offices and one reception area in the two seminar rooms (171, 172) plus two offices adjacent to Room 177 (173, 179).
All, please review and offer your thoughts. At this point we are also asking some logistical questions on time, materials, and cost. The above the ceiling work will be the most critical. In addition, we will need to address phone and networking …
Thanks!
Larry

Subject: Save the date - GO! Global Orientation on Culture and Ethics, April 5

Watch this video on the GO! Global Orientation on Culture and Ethics & **save the date: Saturday, April 5th!** GO is designed to help students who are traveling internationally evaluate expectations, anticipate potential cultural and ethical challenges, prepare for engagement in communities, and develop intercultural competencies. Insights will be offered for experienced travelers as well as those getting their first international opportunity. Registration is free and will be coming soon.

CGI EVENTS + RESOURCES

International Coffee Hour

Tuesday, April 8, 5:00 - 6:00 PM
EspressOasis Café, FedEx GEC

Join us for a monthly social hour to bring together international UNC community members and students excited about international engagement. Chat about opportunities and challenges on campus. Meet staff from the hosting offices with great resources to share. This month's hosts are the **Graduate School** and the **Preparing International Teaching Assistants Program**.

2013-2014 Fulbright Specialist Program Cycle IVB Deadline

Application Deadline: April 14, 2014

The Fulbright-Specialist Program (FSP) promotes linkages between U.S. scholars and professionals and their counterparts at host institutions overseas. The program awards grants to qualified U.S. faculty and professionals, in select disciplines, to engage in short-term collaborative two to six-week projects at eligible institutions in over 140 countries worldwide. Shorter grant lengths give Specialists greater flexibility to pursue projects that work best with their current academic or professional commitments.

CGI Summer Internship Opening

CGI Academic Year Internship openings

GLOBAL ANNOUNCEMENTS

FUNDING

Conference Presentation Awards

These awards offer modest support to faculty and staff who are presenting important scholarly work at major conferences abroad.

Faculty Working Groups

These groups meet regularly to critique scholarly works, host visiting speakers, organize conferences, develop grant proposals, and embed research into the curriculum.

Matching Funds

Limited funds are available for globally-themed projects that deepen knowledge and understanding of our complex world. Projects must already have a financial commitment from another UNC unit.

Student Learning Circles

These circles receive funding for an academic year to support activities such as speaker series, brown bag lunches, workshops, publications, film screenings, and service-learning projects.

RESOURCES

See Funded Projects

You can view a complete list of funding recipients and abstracts in our awardee directories.

International Internship Database

Weekly International Student Support Groups

Thursdays, March 6, March 13
2:00 - 3:15 PM International Student and Scholar Services, FedEx Global Education Center, 2nd floor
Wednesdays, March 12
3:30 - 4:30 PM Room 2511 of the Frank Porter Graham Student Union

The adjustment to a new environment and academic setting can be challenging in many ways. This weekly drop-in group provides an opportunity for international students to meet one another, obtain support and guidance and discuss their experiences. Preeti Vidwans, clinical psychologist, will be available for drop in hours Wednesday and Thursdays.

UNC Global Passport Drive

Tuesday, March 18 and Wednesday, March 19, 10:00 - 3:00 pm
Room 4003, FedEx GEC

Officials from the U.S. Department of State are on campus once a year to accept passport applications and renewal applications and to answer questions from Carolina students, faculty, staff and their families. Application forms are available at the event, or can be downloaded from the U.S. State Department website.

Undergraduate International Studies Fellowship Program

Application Deadline: March 19, 2014

UNC Chapel Hill students with limited or no abroad travel experience can be awarded up to $2,500 toward academic research or study in an international setting during the fall, spring or summer terms.
More info: Chris Wallace chrislw@email.unc.edu

Summer Award Opportunity: the Gerald Unks Travel Fellowship

Deadline: March 20, 2014

The Vice Chancellor for Student Affairs administers the Gerald Unks Travel Fellowship, awards made to deserving Carolina students with applicable travel plans. Up to $4,000 is available for three students.

Add your experiences and glean from others' in this online resource for UNC students by UNC students with feedback on completed internship experiences.

Faculty International Expertise Database

Access over 800 bios of UNC faculty members with global interests. It's a great resource for students when planning your own global engagement projects!

March 10, 2014

MEMORANDUM

TO: Professor Bobbi Owen
FROM: James W. Dean, Jr.
Executive Vice Chancellor and Provost
SUBJECT: Retention Working Group

In 2012, the UNC-Chapel Hill Board of Trustees and Chancellor Holden Thorp convened a 21st Century Vision Committee on Access and Completion. Among their recommendations was establishment of a goal that within 10 years UNC-Chapel Hill would lead all AAU public universities in four- and six-year graduation rates for undergraduate students "by enhancing coordinated support services and by eliminating disparities in retention and graduation rates for students of all races, ethnicities, incomes, disabilities, and educational backgrounds."

Chancellor Folt and I also consider retention and graduation of all undergraduates a critical issue for the campus. UNC-Chapel Hill has a fine record in this regard compared to any set of peer institutions, and we have excellent programs and services in place. But we know we can do better and are therefore seeking ideas on ways to move forward.

To elicit those ideas, I am convening a Retention Working Group to suggest ways in which UNC-Chapel Hill can work towards achieving the 21st Century committee's recommended goal of leading in undergraduate retention and graduation. I write to inform you that I am inviting Cynthia Demetriou, Harold Woodard and Lee May to participate as members of this group. Their charge is to prepare a "rough cut" of strategic scenarios to be submitted for my review in the next three to four weeks. The expectation is that their ideas can stimulate our thinking on how best to close the remaining gap at UNC-Chapel Hill in retention and graduation for all undergraduates.

The group is drawn from faculty and staff who engage daily in a variety of student support activities and who have demonstrated a passion for addressing retention and graduation issues. Jean Elia, Associate Provost for Strategy and Special Projects, will work with the Retention Working Group as they deliberate and prepare the scenarios. They are not charged with delivering a proposal but to draw on their expertise to suggest options on how to "make the whole greater than the sum of the parts." Through Jean on my behalf, the group will receive their charge via email later today. You will be copied on the communication.

I hope you join me in encouraging this group to think broadly and deeply about how we can help all of our students achieve success during their years at Carolina.

Making Connections: Carolina's Undergraduate Curriculum

Carolina's general education curriculum is one of the most rigorous among major universities in the United States today. All undergraduates, regardless of their intended major(s), are required to spend about two years taking courses spanning the arts and sciences. Students complement these courses with additional in-depth studies in their chosen major(s).

Through the Making Connections Curriculum students sharpen their skills in oral and written communications, foreign language, critical thinking, quantitative reasoning and ethical decision-making. They also are expected to become globally aware and to acquire hands-on experience through research, internships, study abroad and/or community engagement.

We believe this is the best preparation for leadership in a fast-changing world. A recent University survey of alumni who graduated 5 and 10 years ago confirms that our approach to undergraduate education has enhanced students' success after graduation. Respondents said their general education courses, studies in their majors, and experiential opportunities were very important to their careers and graduate studies. About 92% of the respondents are employed or in school. About 60% began graduate or professional school within five years and 70% within 10 years. Nearly all (97%) expressed high satisfaction with their Carolina education.

Pope Center Report: Common Goals

A recent report by the John W. Pope Center for Higher Education takes issue with our general education curriculum for allowing students to choose from range of courses that it says are "narrow and idiosyncratic."

Nevertheless, we share some common assumptions about what a general education curriculum should accomplish. We agree that the general education curriculum is one of the most valuable aspects of a student's college education, because it emphasizes "knowledge, skills and reasoning that are applicable to all careers." It should help a student become "well rounded" and provide opportunities to "organize thoughts and write well... use logical, scientific, probabilistic, or other forms of reasoning, an awareness of mankind's past activities and ideas...and the power of analysis."

We also agree that "in today's world, in which graduates will likely change jobs numerous times....such skills are paramount for their success."

In fact, UNC's Making Connections Curriculum is designed to foster life-long learning in a fast-changing world. We want our students to graduate with knowledge, abilities and tools that can help them adapt to any economic climate, good or bad.

Differences

Despite these common goals, we find important differences on specific requirements and overall approach to general education.

<u>Global Awareness:</u> For example, the Pope Center's report proposes that we reduce our foreign language requirement. We live in an increasingly global society and work in a global economy. Our graduates will face clients, patients, customers or students from all over the world, including many who do not speak English. The ability to communicate in another language will be an asset in a competitive global economy.

Experiential Education: The Pope Center's report is also critical of the experiential educational choices we offer students. Yet these are the kinds of opportunities that respondents to our alumni survey said we should increase. Moreover, 79% of employers interviewed for *Raising the Bar* want college graduates to be able to apply knowledge and skills to real-world setting through internships or other hands-on experiences. Students graduating today must be able to prove that they can analyze complex problems, create solutions, work well independently and in teams, manage multiple tasks, and meet deadlines. It's essential that they have opportunities to gain practical experiences in these areas to make them competitive for work and graduate studies.

Core Courses vs. Lifelong Learning: The Pope Center's report favors prescribing a shorter list of classes that promote a narrow set of ideas or great books based on Western values and perspectives. However, the courses that one might have thought most important twenty years ago would probably be different from courses prescribed today. Faculty and students from different regions and perspectives would disagree on what knowledge should be deemed most fundamental for an educated person. Our approach favors teaching students how to discover knowledge by applying analytical skills, approaches, methods and reasoning.

Students who master literary analysis should be able to read and analyze a vast body of literature from Shakespeare to lesser known newer authors. They will carry that ability with them for the rest of their lives.

Similarly, students who learn quantitative reasoning in one class, should be able to apply that reasoning to any area. And students who master the scientific method in a physics lab, should be able to test their hypothesis in any science class.

Corrections/Clarifications

We also need to correct and clarify a few points in the Pope Center report.

GE Courses: The Pope Center's report said that students could choose from over 4,700 courses to fulfill their general education requirements. Though we are not sure where they found that total, it's understandable how they might miscalculate. We found 2,953 courses that could fulfill at least one GE requirement. The problem is that some courses are cross-listed and others may fulfill more than one requirement, which means they may be repeated 2-4 times on the list. While we haven't been able to determine how many individual courses are represented on the list (without repetitions), the number used by the Pope Center is probably at least double the actual number.

Connections: The Pope Center's report also says that students can satisfy some of the Connections requirements by overlapping with another required course. Students must satisfy these requirements – even if it means taking additional courses.

Supplemental General Education: This requirement no longer applies to students pursuing a B.S. degree with a major in psychology.

Curriculum Reform Timeline

1980-1982: Weldon Thornton, Professor of English, leads the revision and implementation process for new General Education requirements: *Perspectives*

1982-2006: *Perspectives* General Education Requirements in effect

1988-1989: *Perspectives* General Education curriculum evaluated; recommendations approved by Faculty Council in March 1990

1995-1999: Self-study for SACS reaffirmation and Intellectual Climate Task Force Report both recommended additional direct student-faculty interaction and student engagement in more active forms of learning across the curriculum. As a result, First-year Seminars, the Summer Reading Program, a Service Learning program, and a full-time Academic Advising Program were launched. In addition, the Office for Undergraduate Research was established and plans were made to review the General Education requirements

2000-2001: Chair (Laurie McNeil, Professor of Physics and Astronomy) and steering committee appointed; student and faculty surveys conducted, outcome goals posted

2001-2002: Satellite committees (17) appointed, convened, and reported findings

2002-2003: Forums, revisions, and adoption process via the Administrative Board of the College of Arts and Sciences, the Educational Policy Committee, and Faculty Council

2004-2005: Implementation Committee formed; criteria document created; budget considerations begun

2005-2006: Courses evaluated; undergraduate bulletin re-written; all courses were renumbered into a new system; communication efforts began

2005-2006: SACS Decennial Reaffirmation of Accreditation occurred. QEP (Quality Enhancement Plan) focused on implementing the curriculum, increasing the number of full-time advisors, and supporting international initiatives

2006-2007: New General Education requirements, *Making Connections* were implemented for entering first-year students; annual evaluation process begun.

2010-2011: Systematic review of general education requirements conducted once the first class graduated (4 years after implementation); changes recommended and routed through the Administrative Board of the College of Arts and Sciences, Educational Policy Committee, and Faculty Council

2011-2012: Changes implemented; annual evaluation process resumed

2014-2015: Preparation for SACS Decennial Reaffirmation of Accreditation

2015-2016: SACS Decennial Reaffirmation of Accreditation

2016-2017: Systematic review of general education requirements conducted

General Education Requirements
Frequently Asked Questions, November 11, 2013

When were these Gen Ed requirements implemented? What was the process used?
The General Education Requirements currently in place, Making Connections, were implemented with the entering first year class in Fall 2006 and apply to all students who earn a baccalaureate degree. They were developed in response to the question "What does an educated citizen need to know in the twenty-first century?" Surveys of alumni, faculty, staff, and students were conducted after which faculty-led committees discussed possibilities. A steering committee led by Dr. Laurie McNeil, Professor of Physics and Astronomy, led the process. Prior to implementation, the requirements were vetted by the Administrative Board of the College of Arts and Sciences and the Educational Policy Committee, and approved by Faculty Council

Are they ever evaluated?
A process to evaluate the requirements began immediately upon implementation. After the first class graduated four years later, in 2010, a systematic review was done. As a result of that review, led by Dr. Abigail Panter, Professor of Psychology, some changes were made and a commitment to continue the evaluation process reiterated. Nearly 400 randomly chosen syllabi were examined for adherence to the criteria. As a result of the review, the requirement that all students take ENGL 105 was implemented and supplemental general education requirements for students pursuing a BA degree were simplified. Evaluation continues with a systematic review scheduled for 2016-2017.

Were criteria established for them? Are those criteria still valid?
During the process of implementation, a "criteria document" was developed. It has been revised about every two years to keep it relevant and current. When new courses are proposed for inclusion, they are subject to the published criteria. When a proposed course and its syllabus do not meet the criteria, it is rejected. The criteria specify content as well as requirements for final examinations, the amount of writing, etc., http://www.unc.edu/depts/uc/Faculty/GenEd_criteria.pdf
In 2012 Faculty Council approved a Statement on the Contents of a Course Syllabus, a set of guidelines intended to encourage faculty members to provide students with complete information about course goals, procedures, content, and evaluation: http://www.unc.edu/depts/uc/Faculty/Course_Syllabus_Statement_OUCwebsite.pdf.

Who has oversight?
Because General Education requirements apply to all undergraduate students, Faculty Council is the final authority, through its elected Educational Policy Committee. Because all first- and second-year undergraduate students are in the College of Arts and Sciences (specifically in the General College), its Administrative Board is also involved. The Senior Associate Dean for Undergraduate Education has oversight which is accomplished by the Associate Dean for Curricula (Erika Lindemann) and the Curriculum Director (Nick Siedentop).

When will they be revised again?
Revising General Education requirements is a once-in-a-generation undertaking which translates to every 15 or 20 years. They will be systematically reviewed in 2016-2017. It is not likely that a wholesale change would be made before the entering class of 2020 arrives on campus.

17.0 Honor Court
18.0 Student Athlete Development
19.0 Supporting Injured Student-Athletes Who No Longer Will Participate
20.0 Federal Graduation Rate Progress
21.0 Follow-up Tracking After Graduation
22.0 Goal Setting

ASPSA (Sept 2011)	Revitalize the Faculty Advisory Committee. There has been a faculty advisory committee for the ASPSA since the late 1980s which has been an important resource for the professional staff in the program. In recent years, it has met less often and new members have not been appointed when departures have occurred. A vigorous advisory committee, consisting of tenure-track and fixed-term faculty, as well as some appropriate full-time professional staff (EPA non-faculty) members would be a useful asset. The committee meetings should be posted and open as is the case for all other University committees.	8.0 Faculty Relations & Governance	The new ASPSA Advisory Committee was established in fall 2011.

ASPSA (Sept 2011)	Committee members should be appointed by the Senior Associate Dean for Undergraduate Education to staggered terms. Organizational support should be provided by the Director of ASPSA who would be an ex officio (voting) member. The Associate Dean and Director of the Center for Student Success and Academic Counseling (CSSAC) and the Senior Associate Athletics Director for Student-Athlete Services would also be ex officio (voting) members, as would the chair of the Faculty Athletics Committee. The advisory committee should define its role and expectations and hold meetings on a regular basis (perhaps twice a semester and once each summer for a total of five times each year). This format would be consistent with other advisory committees at Carolina. Among the items the advisory committee could consider would be ways to address the impact of curricular changes for undergraduates such as ENGL 105 which will be iinplemented in Fall 2012, academic standards (for example, the impact of probation on student-athletes), and the mechanisms for program evaluation and assessment.	8.0 Faculty Relations & Governance	The new ASPSA Advisory Committee was established in fall 2011. Beginning in fall 2013 and ongoing the committee is appointed by the Provost. Currently the Committee meets at least twice per semester and once in the summer. Program evaluation models and identification of metrics for assessment are ongoing.

NCAA Public Infractions (March 2012)	A revitalized faculty advisory committee will oversee the changes in ASPSA. Among other issues, this advisory committee will emphasize the institution's commitment to a thorough and ongoing assessment of ASPSA's program. The faculty advisory committee will serve not only an oversight function, but also as a resource for strategic planning and advice on day-to-day issues. This committee also will coordinate with ASPSA to develop and conduct annual assessments of the programming provided to student-athletes.	8.0 Faculty Relations & Governance	The new ASPSA Advisory Committee was established in fall 2011. Beginning in fall 2013 and ongoing the committee is appointed by the Provost. Currently the Committee meets at least twice per semester and once in the summer. Program evaluation models and identification of metrics for assessment are ongoing.

Hartlyn-Andrews (May 2012)	Recommendations with regard to policies and practices: The policies and procedures that have been addressed or are being addressed in the AFAM department's review and revision of its instructional practices include, but are not limited to: 1. Grades and grade proxies; 2. Authority and procedures for submitting change of grade forms; 3. Grade protests and grade changes 4. The use of temporary AB and IN grades; 5. Independent study courses during the academic year and summer sessions (implemented University wide); 6. Oversight of pedagogical formats appropriate to the size, level, and nature of courses; 7. Approval processes for providing courses in independent study format (implemented University wide); and 8. Monitoring of department course listings and instructors of record during the academic year and during summer sessions (implemented University wide).	8.0 Faculty Relations & Governance	This recommendation is mostly related directly to the AFAM Department. Discuss with Jonathan Hartlyn Senior Associate Dean of A&S Social Sciences and Eunice Sahle, Dept Chair AFAM.

Hartlyn-Andrews (May 2012)	The AFAM (now African and African-American Diaspora Studies) department's review and revision of policies and procedures are also focusing on the following: 1. Recognizing and developing departmental governance structures that ensure faculty involvement, oversight, and accountability for decision-making; 2. Prescribing the role and responsibilities of the Department Chair and other faculty who assume leadership roles at the behest of the chair; and 3. Prescribing the roles and responsibilities of all staff in the department.	8.0 Faculty Relations & Governance	This recommendation is mostly related directly to the African and African-American Diaspora Studies Department. Discuss with Jonathan Hartlyn Senior Associate Dean of A&S Social Sciences and Eunice Sahle, AAAD Dept Chair.

Hartlyn-Andrews (May 2012)	The review committee recommends that the AAAD Studies Department Chair submit a state-of-the-department report to the Senior Associate Dean before the beginning of academic year in fall 2012 that summarizes the results of the department's review and revision of policies and procedures and that informs the College of any difficulties arising from departmental policies and procedures or any other problems with governance, faculty performance or instruction of which the College should be aware.	8.0 Faculty Relations & Governance	This recommendation is mostly related directly to the African and African-American Diaspora Studies Department. Discuss with Jonathan Hartlyn Senior Associate Dean of A&S Social Sciences and Eunice Sahle, AAAD Dept Chair.
Hartlyn-Andrews (May 2012)	As with all other units in the College of Arts and Sciences, the AAAD Studies department will also implement recommendations put forward by the Dean of the College based on the review of College-wide policies and practices on independent studies and directed readings courses which took place under the direction of Bobbi Owen, Senior Associate Dean for Undergraduate Education, and the Administrative Boards of the College.	8.0 Faculty Relations & Governance	This recommendation has been implemented University wide for all undergraduates as per the Independent Study Task Force (April 2012).

Hartlyn-Andrews (May 2012)	Furthermore, we recommend that the relevant findings in this report be shared with the Dean of the Summer School since all courses during summer sessions are administered through the Summer School, rather than the College of Arts and Sciences.	8.0 Faculty Relations & Governance	Check with Summer School Dean to confirm that this has been implemented.
Hartlyn-Andrews (May 2012)	Recommendations with regard to student work: The review committee recommends that academic credit and course grades assigned to students enrolled in the courses discussed in this report should not be changed. Given that almost three years have elapsed since the bulk of the irregularities described in the report took place, there is no fair and consistent way to reconsider the permanent grades assigned to these students. University policies do not require that student work be preserved for more than a year.	8.0 Faculty Relations & Governance	The grades were not changed, but students who were enrolled in the Type 1 courses were offered the opportunity to take additional courses tuition free.

Special Subcmte of the FEC (July 2012)	There should be regular auditing of student registrations/transcripts. There must be, for example, regular monitoring of the clustering of student-athletes into particular majors and courses as well as any anomalies in data. There are many valid reasons why students might cluster in courses or majors, but academic deans need to ensure that there are legitimate reasons for any patterns found.	8.0 Faculty Relations & Governance	This recommendation has been implemented by the FAR, [a member of the FAC?] the Registrar and the Senior Associate Dean for Undergraduate Education.
Special Subcmte of the FEC (July 2012)	There should be regular oversight of department chairs' teaching activities (including summer school), as well as auditing of all teaching loads across Carolina Courses Online (administered by the Friday Center), summer school, and the regular academic year. Deans should share data on clustering of any kind and be in touch regularly.	8.0 Faculty Relations & Governance	Ask Karen Gill (Dean of Arts and Sciences) and Provost Jim Dean if this is happening. Two issues: 1. Monitoring of student-athlete clustering in courses is currently being implemented 2. Need an update on the review of dept chairs and coordination and sharing data among deans and department chairs.

Special Subcmte of the FEC (July 2012)	There is an obvious need to reframe the problem of Nyang'oro's misconduct as an administrative problem—not an issue of the entire department. The University needs to vocally offer full and consistent support to that department.	8.0 Faculty Relations & Governance	This recommendation is not related to the responsibilities of the Working Group.
Special Subcmte of the FEC (July 2012)	There should be a widely publicized set of criteria for evaluating the performance of department chairs. This is an area where it would be useful to see what best practices can be adopted here.	8.0 Faculty Relations & Governance	Need an update on the review of dept chairs and coordination among deans
Special Subcmte of the FEC (July 2012)	To improve communication and increase transparency, we propose regular publication of status reports to the faculty detailing progress on implementation of all recommendations.	8.0 Faculty Relations & Governance	There is regular reporting to the Faculty Council from the Chancellor, the Provost and the FAC. The Working Group also is working on this and has compiled a list of all recommendations and responses. [Check with Joel re communications plan for ongoing reporting online]

Special Subcmte of the FEC (July 2012)	The ASPSA's FAC members need independent access to course enrollment and grade stats on student-athletes; currently the committee is more advisory, but perhaps we need to change the charge to make it more of a watchdog. We have been encouraged to learn that incoming FAC chair Joy Renner is seeking changes in the organization of the committee to better reflect its role in oversight of student-athletes and in its advisory capacity to the Chancellor. For example, while the FAC does an exit survey, someone from the Athletics Department is always present, diminishing the value of these surveys.	8.0 Faculty Relations & Governance	The FAC and the ASPSA Advisory Committee are two separate committees. The FAC monitors and reviews course clustering information and has implemented a revised student-athlete exit process that includes focus group discussions. A revised online exit survey for senior student-athletes is being implemented.

Special Subcmte of the FEC (July 2012)	The Committee's (FAC) charge is voluminous and unrealistically all encompassing with regard to the campus intercollegiate athletics program. We encourage the committee to better target its efforts to issues related to the academic experience of student-athletes. We propose that a partnership between the Department of Athletics and the College be established to look for ways of integrating athletes into campus life "beyond the game."	8.0 Faculty Relations & Governance	Each FAC member represents three perspectives while in Committee meetings. 1. The perspective of a UNC faculty member. 2. As a topic expert in one area of athletics, lending a more thorough analysis of that topic and bringing issues or concerns or suggestions for the Committee to discuss. These topics include Admissions, Academics, Advising, Alignment, Student Athlete Experience, Policies and Procedures, and Administration and Operation. 3. As a person knowledgeable about a specific team to which that FAC member has been assigned to become familiar with their schedules and the culture and philosophy of each team. In it's Strategic Plan, the Department of Athletics has identified alignment with other areas of the University.

Special Subcmte of the FEC (July 2012)	A closer partnership between faculty and officials within the Athletic Department would facilitate opportunities to talk privately and not in the press. One salutary outcome would be an increased focus on what is going right with student-athletes and not just what is going wrong.	8.0 Faculty Relations & Governance	These partnerships have been established and ongoing through the FAC, the ASPSA Advisory Committee, the Subcommittee on Special Talent Admissions and the Student-Athlete Academic Initiative Working Group.

Special Subcmte of the FEC (July 2012)	Need for Institutional Transparency Regarding Athletics: We believe that the cumulative effect of the proliferation of committees with limited charges to examine discrete areas of institutional governance has been more confusing than clarifying, and that their conclusions and recommendations will be viewed at best as not comprehensive and at worst self-serving. Further, the repeated revelations in area newspapers of information not previously or clearly reported in the University's official statements and reports on academic fraud involving athletes on campus undermine the University's assurances of the comprehensiveness of these reports. We believe that the best and most credible approach is for the Chancellor to commission an outside entity or commission to examine the state of academics and athletics at Carolina. We recommend the appointment of an independent panel, composed of individuals outside the university with experience in higher education administration that will be charged with the task of looking broadly at athletics and academics. It is our hope that such a panel of distinguished experts will both highlight what we are doing right and identify areas of deficiencies in organization and procedure, point to best practices that can be brought to bear on these deficiencies, encourage buy-in by all parts of the University community in solutions, and create a path forward towards implementation.	8.0 Faculty Relations & Governance	The Martin Report and the Rawlings Report were an independent group composed of . . . . It met initially in Spring 2013 and issued is final report in fall 2013. It looked broadly at . . . and recommended . . . . The Provost's Student-Athlete Academic Initiative Working Group focuses on academic processes related to student-athletes and attempts to reconcile any conflicting or inconsistent recommendations in the various reports and reviews.

Special Subcmte of the FEC (July 2012)	Is it reasonable to expect that student-athletes not cluster in courses and majors? Why or why not? Is clustering an inherently a bad thing? If not, in what cases is it suspect? How can we encourage student-athletes to look broadly at options for majors? How can coaches, academic counselors, academic advisors and the faculty participate in this goal?	8.0 Faculty Relations & Governance	The process for review of clustering in particular courses is described above. FAC reviews student-athlete majors each year and compares the percentage of student-athletes in majors compared with the overall student-body. Various groups work with student-athletes to help them explore potential majors: Majors Night at ASPSA, academic advisors through regular discussions with student-athletes. Also, FAC previously established task forces to remove barriers to student-athletes participating in specific majors (e.g., education and nursing). Additionally, CAS academic advisors are dedicated to student-athletes and provide guidance in course and major selection.

Special Subcmte of the FEC (July 2012)	How can we affirmatively integrate student-athletes into the broader undergraduate academic culture? What would it take to provide national leadership on this issue? What can the faculty actually do to achieve this goal, and how can they be better equipped to aid in the education of all students?	8.0 Faculty Relations & Governance	Academic advisors can help ensure that student-athletes are aware of academic opportunities throughout the University. The FAC is preparing a guide to help faculty support student-athletes in their classes. UNC's Athletic Director is involved in initiatives to address these issues nationally.

Baker Tilley (December 2012)	**Course-related Risks** • A student receives credit and a grade for a course in which an inappropriate amount of work was required of and/or performed by the student. • A student's grade is changed without authorization by the instructor of record for the course. • A student receives a grade and credit for a course based on work that was not assigned and/or evaluated by the instructor of record. • The course assignments and the grading standards are inconsistent across courses and/or sections of the same course. • Course assignments and grading standards are inconsistent with University expectations or requirements. • A course does not have an approved syllabus before the first day of class. • The Standard Course Numbering system does not identify the type of a course. • The Standard Course Numbering system does not clearly identify the level of course.	8.0 Faculty Relations & Governance	Contact Bobbi Owen to discuss and refer to SACS report New policies are in place to address these risks: New course numbering system Syllabus requirement for all courses New system for recording grades and grade changes etc.

Baker Tilley (December 2012)	**Instructor-related Risks** • Contact hours with instructors for a course do not meet University expectations or requirements. • The University appoints or reappoints a department chair who is unqualified or unprepared or has not performed at a satisfactory level. • An instructor's course load exceeds or does not meet University standards. • Summer School instructor contracts are not executed in a timely manner.	8.0 Faculty Relations & Governance	Contact Bobbi Owen to discuss and refer to SACS report
Baker Tilley (December 2012)	**Academic Administration-related Risks** • The individual who assigns grades to students is not authorized to do so or cannot be identified. • The individual who submits changes for temporary and/or permanent grades is not authorized to do so or cannot be identified. • University Administrators do not effectively monitor course sections to identify related anomalies.	8.0 Faculty Relations & Governance	Contact Bobbi Owen to discuss, department dashboard.

Martin Report Summary & Addendum (January 2013)	I will close by sharing with you my astonishment at the growing trend among faculty at most institutions in America to award high grades to all but a few students. Back in the day, when I was teaching undergraduates, it was normal that the national average of all grades was approximately C+ (a 2.5 GPA). For some reason, this has steadily risen to 3.3 GPA, even higher if you take out mathematics and the physical sciences, which still maintain their integrity with averages of 2.5 GPA. It is as if the instructors are unwilling or unable to distinguish between good performance and great performance, or maybe want to help weaker students get admitted to graduate and professional schools. In my opinion, this is part of the cultural malaise in higher education that looked the other way when one or two launched the pattern of anomalous courses here that we have examined. The mutual mantra (The Inverse Golden Rule of Academia) is: I won't question how you teach and grade your courses, if you won't question mine. This was justified by some as Academic Freedom, a system originally for protecting the jobs of instructors whose personal political and social views were unpopular. In my view, for anyone to offer phantom courses that don't meet is not academic freedom, but academic misconduct. I am pleased to tell you that there is a growing minority of faculty here who are pressing for reforms against this insidious grade inflation. Grade Inflation is aptly named, for it devalues the academic currency of higher education. So you can count me on the side of the reformers, before grades get devalued to where they mean nothing.	8.0 Faculty Relations & Governance	This issue is being addressed by UNC's Education Policy Committee's subcommittee on contextualized grading.

UNC BOG Academic Review (Feb 2013)	The campus has significantly strengthened Academic Affairs oversight of the education of student-athletes. In addition, UNC-Chapel Hill has taken numerous other steps, including: • Establishing new departmental governance structures; • Adopting monitoring systems to ensure standard practice in handling course syllabi; • Annually reviewing faculty teaching assignments; • Creating and using a new centralized data base that will allow only authorized access to grades and grade changes, and monitoring of suspicious clustering; • Restricting independent study courses to juniors and seniors with a GPA of 3.0 or higher; • Limiting faculty to no more than 2 independent study students per term; and • Requiring the Summer School to ensure that faculty are aware of teaching time frames and their required course structures.	8.0 Faculty Relations & Governance	These recommendations have been implemented.
UNC BOG Academic Review (Feb 2013)	Tightening of the requirements for independent study courses;	8.0 Faculty Relations & Governance	These recommendations have been implemented.
UNC BOG Academic Review (Feb 2013)	Development of electronic processes and systems that will end the paper reporting that contributed to the academic misconduct by Nyang'oro and Crowder;	8.0 Faculty Relations & Governance	Electronic processes provide oversight but the process of reporting grades still relies on ethical behavior.

UNC BOG Academic Review (Feb 2013)	Development of electronic processes that will permit tracking of suspicious instances of clustering. (A regular process was implemented in the summer of 2012 to analyze course enrollments for members of all athletic teams at the beginning of each semester and summer term. The results are reviewed by a committee comprised of the Senior Associate Dean for Undergraduate Education, the University's Faculty Athletic Representative (FAR) to the Atlantic Coast Conference (ACC) and NCAA, and the University Registrar. Each lecture class with student athlete enrollments greater than 20% of the total class enrollment is flagged and reported by the Senior Associate Dean for Undergraduate Education and to the dean, or designee, of the college/school offering the course. The dean is required to follow up with the instructor of record for each identified class, and, if necessary, the chair of the department teaching the class, to gather information about the circumstances. The findings are reported to the Senior Associate Dean for Undergraduate Education, who produces a summary report that is shared with the FAR, University Registrar, FAC, and Advisory Committee to the ASPSA.)	8.0 Faculty Relations & Governance	The Registrar, the FAR and the Dean for Undergraduate Education regularly monitor any clustering of student-athletes in particular majors and courses. Representatives of the FAC participate in reviewing the process on an annual basis and discuss whether there are issues that need to be brought for discussion to the entire committee.

UNC BOG Academic Review (Feb 2013)	Reemphasis of the roles and contributions of the Faculty Athletics Committee (FAC) and the Faculty Athletic Representative (FAR)	8.0 Faculty Relations & Governance	This recommendation has been implemented through restructuring of the FAC and continued involvement of FAC members and the FAR on various University committees.
UNC BOG Academic Review (Feb 2013)	Acquisition and use of Baker Tilly's model for risk assessment and internal controls applicable to academic integrity as a best practice for reviewing and protecting academics at each campus;	8.0 Faculty Relations & Governance	This recommendation is outside of the purview of the Working Group.
UNC BOG Academic Review (Feb 2013)	Development and implementation of systems and procedures similar to those developed for implementation by UNC-Chapel Hill at each campus;	8.0 Faculty Relations & Governance	This recommendation is outside of the purview of the Working Group.
UNC BOG Academic Review (Feb 2013)	Adoption of processes for the annual review by the Chancellor, or his or her designee, of all faculty teaching assignments and enrollments across all academic departments;	8.0 Faculty Relations & Governance	Ask Jim Dean or Bobbi Owen
UNC BOG Academic Review (Feb 2013)	Implementation of strategic planning processes to improve faculty engagement in athletics.	8.0 Faculty Relations & Governance	In it's Strategic Plan, the Department of Athletics has identified alignment with academics, and the FAC focuses on alignment, as well.

Rawlings Report (Sept 2013)	Insure that the chancellor, subject to the general oversight of the governing board, system administration, or both, has ultimate authority, responsibility, and accountability for the administration of intercollegiate athletics, and state in writing any exceptions to this authority, responsibility, and accountability.	8.0 Faculty Relations & Governance	UNC's Director of Athletics has responsibility and overview of intercollegiate athletics and reports directly to the Chancellor.
Rawlings Report (Sept 2013)	Insure that the chancellor has delegated authority, responsibility, and accountability for the administration of the athletics department to the athletics director, and state any exceptions to that delegation.	8.0 Faculty Relations & Governance	UNC's Director of Athletics has responsibility and overview of intercollegiate athletics and reports directly to the Chancellor.
Rawlings Report (Sept 2013)	Clarify the role and responsibility of any other institutional officer or board or committee that has responsibility for issues relating to intercollegiate athletics, or that plays an advisory role in intercollegiate athletics. Faculty committees in particular should have clearly-defined charges, roles and responsibilities.	8.0 Faculty Relations & Governance	The roles and responsibilities of the FAC, the FAR, the ASPSA Advisory Board, the Subcommittee on Special Talent Admissions, the Provost and his direct reports all have been more clearly defined with regard to intercollegiate athletics.
Rawlings Report (Sept 2013)	Establish an annual internal audit and an external audit every four years to test adherence to these measures.	8.0 Faculty Relations & Governance	Audits would be considered by the Chancellor of the Provost.

Jacqueline Lawton Itinerary

Wednesday March 19th

- 3PM arrive at RDU – Caroline Strange. Take to Carolina Inn & to DDA
- Meet with Hannah Grannemann
- Meet with Adam Versenyi & tour the building
- 7PM Dinner Lantern - Adam Versenyi, Kathy Williams, Ray Dooley. Return to Carolina Inn

Thursday March 20th

- 8-9am Breakfast with Karen O'Brien at Carolina Inn
- 9:30-10:45 Teach Alumni Hall (Karen's class). Bring to DDA.
- 11:30 – 1pm Lunch with Joe Haj
- 1:30 -3:30pm Rehearsal
- 4-5pm Playwriting Workshop
- 7PM Dinner 411 West - Greg Kable and Jan Chambers. Pick up & return to Carolina Inn.

Friday March 21st

- 9:30am-10:30am Breakfast with Jiayun Zhuang at Carolina Inn. Bring to DDA.
- 11-11:30am Meet with David Navalinsky
- 11:30am-1pm Lunch and Open Meet & Greet. DDA Conference Room
- 1-1:45pm break
- 2-2:30PM meet with Terry Rhodes.
- 2:30-3PM Coffee with Joseph Megel. Bring back to DDA.
- 3PM – 4PM Meet with PlayMakers Staff
- 4PM meet with Adam Versenyi
- 7PM Dinner Carolina Inn - Kathy Perkins and Bobbi Owen

Saturday March 22nd

- Free Day

Sunday March 23rd

- Back to airport for 5:40pm flight – Caroline Strange

UNC
COLLEGE OF
ARTS & SCIENCES

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

OFFICE OF UNDERGRADUATE
CURRICULA

CAMPUS BOX 3504
300 STEELE BUILDING
CHAPEL HILL, NC 27599-3504

T 919.843.7773
F 919.843.6557

TO: Chairs, Directors of Undergraduate Study, and Scheduling Officers
FROM: Erika Lindemann, Associate Dean for Undergraduate Curricula
SUBJECT: Independent Study
DATE: March 17, 2014

As students begin to see their advisors prior to registering for fall 2014 classes, I would like to remind everyone about procedures governing independent study. You will find this information on the Office of the University Registrar's website under the title "UPM #30 Independent Study Policy" at http://registrar.unc.edu/academic-services/policies-procedures/university-policy-memorandums/independent-study-policy.

At the bottom of the UPM is a link to the College of Arts and Sciences Learning Contract, which can be used to describe the expectations for various types of independent study courses, as defined in the first section of the UPM. Units are free to adapt the template to their own needs so long as the required information and space for approval signatures are retained. Approved learning contracts should be kept on file in the unit for a minimum of four years.

Students planning to undertake independent study in fall 2014 should be discussing their plans with instructors now so that the learning contract can be approved this semester and the student can preregister for the appropriate course.

Be aware that registration for an independent study course must be completed after the learning contract has been approved and **no later than the last day of "late registration"** (the end of the first week of classes in a fall or spring semester or the equivalent date in each summer session). In fall 2014 the deadline is **Monday, August 25, 2014**.

Among other regulations, the policy restricts the number of students that an instructor may supervise in an independent study course to two students per semester or summer session plus two additional students who are working on an honors thesis (but see the section "Limits and Exclusions" for exceptions). Units should create sections of a course for each instructor supervising an independent study.

If you have any questions or concerns, please feel welcome to email Nick Siedentop (nick_siedentop@unc.edu) or me (ulinde@email.unc.edu). Thank you for helping to ensure that independent study students are registered in a timely fashion.

---

Bobbi, the contextual grading resolution was adopted by Council on 4/15/2011 and is attached.
I wrote to Harold to see if he could locate the Patrick Akos report. In the meantime, for fun, I've attached the one Doris Betts chaired in the 1988.
Best,
Erika

Resolution 2011-3. On Reporting Contextual Grade Information on Undergraduate Student Transcripts

The Faculty Council enacts:

Section 1. Definitions. As used in this Resolution, the following terms have the meaning indicated:

1. "Reportable course section" is a course section in which at least ten (10) students received quality points.
2. "Median grade" is the mid-point of an array from highest to lowest of grades awarded in a course section to students receiving quality points. When the number of students in the course section is not an even number, the grade immediately below the mid-point shall be deemed the median.
3. "Percentile range" is a function of the relative rank of a particular grade within the distribution of grades in the course section. The relative rank shall be calculated by dividing the grade's rank in the set of grades awarded in a course section by one less than the number of such students in the course section: $\left(1-\left(\frac{n-r}{n-1}\right)\right)*100$ where n is the number of students earning quality points in the course section and r is the rank of the grade within the course section. The percentile range shall be derived by calculating this relative rank for the top and the bottom of each grade within the course section and expressing it as a percentage.
4. "Schedule point average" is the mean of the median grades for the reportable course sections taken by the student, weighted by the number of credit hours for which each course section was taken.

Section 2. Contextual grade information to be recorded on transcripts. Transcripts for students beginning undergraduate study at the University during or after the Fall, 2012 semester shall include the following contextual grade information:

1. For each reportable course section, a notation of the median grade attained by students receiving quality points in that section.
2. For each reportable course section, a notation of the percentile range in which the student's earned grade falls.
3. For all course sections, a notation of the total number of students taking the course section, or size.
4. For each term, a schedule point average reported for each term separately and cumulatively across terms.
5. For each term, a count of the number of course sections in which the student achieved below, at, and above the course section median. The count shall be reported for each term separately and cumulatively across terms.

Section 3. Explanatory material on transcripts. The explanatory material provided with transcripts shall include this or similar explanation of the enhanced grade reporting provisions: "The transcript provides contextual grade information for each course section in which at least 10 students receive quality points (a grade for GPA credit). The median grade attained in the course section is provided in square brackets after the earned grade. The percentile range in which the student's earned grade falls is reported in square brackets after the quality points. The course section size is reported to the right of the percentile range. For each term, a Schedule Point Average (SPA) is provided. The SPA represents the average median grade for all students enrolled in the student's mix of course sections. For each term, a count of course sections in which the student achieved above, at, and below the course section median is provided. More information on interpreting contextual grades may be found at http://regweb.unc.edu/contextual."

The registrar shall host and maintain a website containing information on the enhanced grade reporting provisions and any additional information appropriate for interpreting contextual grade information.

Section 4. Implementation.

1. Beginning for the Fall, 2012 semester, the registrar shall provide via electronic or paper reporting an

instructor grade report to each instructor of one or more undergraduate course sections during that term. The instructor grade report shall include, but is not limited to, the following information, provided via an easily interpretable graphic report:

   a. The mean grade issued for that instructor's course section in that semester.
   b. Mean grades issued for other sections of the same course and for other courses in the instructor's department, division, school, and university.
   c. Frequency of issuance of each letter grade range (A, B, C, D, F) across the same classifications as in b. above.
   d. Historical trends in grades issued across the same classifications as in b. and c. above.

2. Beginning for the Fall, 2012 semester, the registrar shall provide an online facility providing full grade distribution information for course sections held in Fall, 2010 and later. This information shall include median and percentile range as well in order to provide comparability with official transcripts. The information shall be searchable by section, course, semester, instructor, department, and school, and shall include aggregate grade information across these categories.
3. To the extent practicable, the registrar shall provide enhanced transcripts via secure electronic delivery that contain full distribution information as in 2.) above as an option available at students' discretion.
4. To the extent that any element of this Resolution cannot be reasonably implemented by the date listed, it shall be implemented as soon as possible thereafter.
5. To the extent that any element of this Resolution proves impracticable, the registrar shall report this situation to the Educational Policy Committee for consideration of amendment.
6. To the extent that any part of this Resolution requires further clarification, the registrar shall consult first with the Enhanced Grade Reporting Implementation Committee, then with additional stakeholders if necessary to determine the appropriate course of action.
7. The Educational Policy Committee shall design and implement an evaluation scheme for this Resolution, to include information about grading patterns as well as students', instructors', and transcript recipients' experiences with the program.
8. In the Fall of 2017, or five years after implementation of the main body of this Resolution, whichever comes later, the Educational Policy Committee shall evaluate the provisions' success and provide its evaluation to Faculty Council. At its discretion, the Educational Policy Committee may make recommendations for changes at that point.
9. The full text of this Resolution, including incorporated Exhibits, shall be published on the Registrar's website and made accessible for students, faculty, staff, and the public.

Comment: This resolution is presented by the Enhanced Grade Reporting Implementation Subcommittee of the Educational Policy Committee. Members of the subcommittee are Andrew J. Perrin (Sociology), chair; Donna Gilleskie (Economics); Christian Iliadis (Physics); and Holly Boardman (undergraduate student). The resolution implements Faculty Council Resolution 2010-3 On Enhanced Grade Reporting

Examples illustrating implementation of the resolution are contained in the attached Exhibits.

Exhibit D - Contextual Grade Information (to be placed on the registrar's website as a Registrar's Policy Memorandum or similar)

Beginning in Fall, 2012, the transcript provides additional contextual grade information. This information is provided for each class in which at least 10 students receive quality points ("reportable class"). The transcript contains the following information:

For each reportable class:

- The *median grade* attained in the class. In classes with an even number of students where the median would fall between two grades, the lower grade is used.
- The *percentile range* in which the student's earned grade falls. The percentile is calculated by dividing the grade's rank in the class by one less than the number of students in the class and subtracting this from 100%. This is the percentage of the other students in the class who achieved higher than the student. The percentile range is obtained by calculating the rank for the top and the bottom of each letter grade in the class. This is an easily-interpreted measure of the student's performance relative to other students in the course section. It is essentially the percentile rank in which the student falls, adjusted so the top rank is always 0% and the bottom is always 100%.

For example, in a class containing the following grades:

A A A- A- B+ B+ B+ B B B B B- B- C+ C+ C+ C+ C C C C C- D D F

a grade of A- is the 3rd and 4th grade among 25. The top A- would therefore be 1-((25-3)/(25-1)) = 8%. The bottom A- would be 1-((25-4)/(25-1)) = 12%. The percentile range would be reported as [8% - 12%]. That means that between eight and twelve percent of the other students in the class achieved higher than this student in this class.

For this class, the full list of ranks would be:

- A: [0% - 4%]
- A-: [8% - 12%]
- B+: [17% - 25%]
- B: [29% - 42%]
- B-: [46% - 50%]
- C+: [54% - 67%]
- C: [71% - 83%]
- C-: [87% - 87%]
- D: [92% - 96%]
- F: [100% - 100%]

- The *class size*. This is reported for all classes, not only reportable classes.

For each term:

- The *Schedule Point Average (SPA)*. The SPA is the average of the median grades for the student's reportable classes, weighted by the number of credit hours for each of these classes. The SPA may be understood as a central grade for a student enrolled in the specific schedule reported on the transcript. A GPA above the SPA indicates that, on average, the student exceeded this central grade. A grade below the SPA indicates that, on average, the student achieved below the central grade. The SPA is reported separately for each term and cumulatively over the course of the student's college career.
- The number of classes in which the student achieved above, at, and below the class median.

This number is provided separately for each term and cumulatively over the course of the student's college career.

Interpreting Contextual Grade Information

Using the median grade in the class and the count of classes in which the student did better, worse, and the same as the class median, you may evaluate how the student performed compared to other students in each class.

Using the percentile range, you may determine how many of the other students in each of this student's classes achieved higher than this student did. This is a range because in many classes, several students receive the same grade.

Comparing the student's Grade Point Average (GPA) with the Schedule Point Average (SPA), you may evaluate the student's achievement compared to the achievement of an average student across all classes the student took. If the student's GPA is higher than the SPA, the student achieved higher, on average, than other students in the same classes. If the GPA is lower than the SPA, the student achieved lower, on average, than other students in those classes.

Contextual grade information is provided in order to offer the best possible information about students' relative achievement in their classes at UNC. There may be many effects that explain the class's median grade, the percentile range of each grade in any given class, and therefore the SPA.

EXHIBIT E

Grade summary

Spring, 2009

This document is provided to individual instructors and department heads each semester by the Educational Policy Committee. It contains course grade information summarized at different levels: overall, within A&S, by division, by department, by course number, by section number.

Course Information:

Semester:	Spring 2009	Department:	Economics (ECON)
School:	Arts and Sciences	Course:	ECON 410
Division:	Social Sciences	Section:	ECON 410-001

REPORT OF THE AD HOC COMMITIEE ON ATHLETICS AND THE UNIVERSITY

December 15, 1989 Faculty Council Meeting

The committee was appointed in response to a resolution adopted by the Faculty Council on February 19, 1988. Its charge, as formulated in that resolution, is the following:

> ... to (1) examine all relevant aspects of the University's intercollegiate athletics program, its scope, procedures, financing and other resources, and its relations to private entities operating under the aegis of the University, (2) report to the Faculty the facts with respect to the foregoing, and in what ways and to what extent, if any, these may be at variance with the University's purposes and standards of conduct, and (3) make recommendations for action by the Faculty and the administration, as appropriate.

We have carried out the investigations called for in this charge and are pleased to report that the Department of Athletics, the Educational Foundation, and other offices and agencies of the University have provided all the data for which we have asked and have been frank, cooperative, and helpful. We began our inquiries with two meetings that were open to all members of the faculty. As a committee we have met with the Chancellor, two former chancellors, five former chairmen of the Board of Trustees, the President Emeritus of the University of North Carolina, the President of the Student Body, several of the coaches, and other knowledgeable persons. Our subcommittees have independently consulted many additional people. We have solicited the experience and opinions of randomly selected student-athletes by means of a questionnaire and have interviewed student-athletes chosen at random from teams in a variety of sports, including football and basketball. Some of our subcommittees and members have conducted special studies and inquiries in their own lines of interest. Our efforts, in short, have been laborious. We hope the report will be useful to the University.

The authors of the resolution under which this committee was appointed wrote that" ... the University should ... strive to set, and to be seen as setting, the highest standards in the conduct of all its undertakings." We have tried in our work to observe that precept and to apply it in the judgments we have made.

The information we have accumulated is contained in several subcommittee reports and other documents. As a whole, these are too voluminous to be circulated with this report, so we have filed them with the Secretary of the Faculty so that he can make them available, as and when requested, to those members of the University community who wish to study them. They are, in effect, appendices to this report.

Our recommendations appear in the pages that follow, beginning on page 7. There are thirty-two of them. Because their content and arrangement can be correctly understood only in the light of the introduction that follows, we ask our colleagues to read the introduction before passing to the recommendations.

We are deeply grateful for the help given us by Professor Joseph H. Bylinski, who analysed for us the financial information provided by the Department of Athletics and the Educational Foundation. Professor Lawrence B. Rosenfeld formulated the original design of our questionnaires and gave us an analysis of the results. Finally, we are greatly indebted to our secretary, Ms. Ann R. Zappa, of the Chancellor's Office, for indispensable aid of many kinds.

I. INTRODUCTION

Three features of our program of intercollegiate athletics deserve notice at the head of this report. The first is the Faculty Committee on Athletics, which, two years ago, was changed from an appointive committee to an elective one. Under the leadership of Alumni Distinguished Professor Richard G. Hiskey, that committee has developed excellent procedures for monitoring and evaluating the admission of student-athletes and their academic achievements and problems. One of our recommendations (No. 32) is that the purview of this committee be broadened. The second is the establishment by the Department of Athletics of an academic support center for student-athletes, directed by Mr. John G. Blanchard. This center is well equipped and well directed. It has long been needed. It will be a vital component of all efforts to improve and enrich the educational side of our program of intercollegiate athletics.

Third: In the course of our inquiries we have perceived no indications that our program of intercollegiate athletics is in conflict with the Constitution and Bylaws of the National Collegiate Athletic Association, and we have been impressed with the care taken in our Athletic Department, and by the coaches and their staffs, to avoid such conflict. If we take the NCAA regulations as a standard of judgment, we believe our program is one of the best in the country. All this reflects credit on the Department of Athletics, under the leadership of its Director, John Swofford, and his staff, the coaches and their staffs, and all those agencies of the University administration and faculty that interact with our program of intercollegiate sports.

Our charge, however, is to determine how, and to what extent, our intercollegiate athletics program" ... may be at variance with the University's purposes and standards of conduct." On that issue our finding is that all intercollegiate athletic programs of NCAA Division I-A[1], including our own, are in varying degrees in conflict with the purposes and standards of universities in general. That is to say, the intercollegiate athletic programs of The University of North Carolina at Chapel Hill, and all other 1-A universities are part of a nationally competitive athletic system which, in its current state, is in conflict with university principles and priorities. Every university, in its athletic programs, exploits the maximum competitive options the system allows. No university will reform its programs until the system itself is reformed and the reforms are made obligatory for all. And the system, as regulated by the NCAA, strongly resists reform. The result is a deadlock between reform and opposition to reform. Either that deadlock is resolved, or the troubled partnership of universities and intercollegiate athletics will sooner or later be terminated.

This perception, and others to which our investigations and studies have led us, are widely held in public opinion. The exceptional degree of public distrust and discontent with intercollegiate athletics shown recently in polls[2] and in the press reflects a growing sense, inside and outside the universities,

that intercollegiate sports programs are out of proportion to their functional place in the academic world, that some student-athletes are not students and do not genuinely represent the student bodies of which they are nominally members, that the effort to enroll them and keep them eligible results frequently in a corruption of the academic process, and that the ideal of amateur collegiate sportsmanship engraved in the NCAA constitution[3] has been overwhelmed by an abundance of money and an intensity of competition and publicity that drive intercollegiate sports toward professionalism.

Some of this public discontent is caused by publicized violations of NCAA standards in which boosters provide money, cars, and rent-free apartments to athletes[4], universities enroll heavily recruited athletes who have neither the ability nor the inclination to study, and administrative officers and faculty members favor athletes with exceptions that are not available to other students, so that the athletes can maintain their academic eligibility to compete. Out the NCAA standards themselves are inconsistent with academic values. The playing and practice seasons and game schedules allowed in the NCAA bylaws are excessive. Hours of practice, which the NCAA does not try to limit, have risen in some universities and in some sports to levels that deny student-athletes the time and energy they need to earn their degrees. In their present form, in fact, the NCAA bylaws offer student- athletes no protection against demands of practice, travel, and play that impede their efforts to succeed as students and prepare themselves for careers other than those of professional sports.

We think it obligatory to say in this report that intercollegiate athletics --for all the drama, enjoyment, and sociability it provides--is a university function of secondary importance. The primary functions are teaching and learning, research, and public service. But intercollegiate sports, except for those who participate in it, is primarily entertainment. Aside from the two hundred to four hundred student-athletes each Division I university recruits, students learn nothing from intercollegiate athletics that they could not learn from watching professional sports on television or attending analytical courses on sports. The NCAA itself declares that student-athletes are students first and athletes second [5]. It classifies intercollegiate athletics as an avocation or a recreational pursuit.[6] Although it insists that athletic programs must be ·maintained as a vital component of the educational program ... '[7] we have discovered no meaningful sense in which that is accomplished except by subsidizing the education of the student-athletes themselves, which, in many athletic programs, is overwhelmed by requirements of practice and play that obstruct the education of student-athletes and prevent some of them from earning their degrees.

The scale on which Division 1-A athletic programs operate obliges them to solicit donations on a large scale, year after year, to pay operating costs, build and amortize facilities, and constitute endowments for sports programs. It drives universities that cannot fund these efforts into debt. It compels all Division 1-A revenue sports programs to pursue opportunities to play in bowl games and post-season tournaments in order to secure big television fees. The size and extent of athletic facilities on the campus and the excessive exposure intercollegiate sport receives in the media nourish a public misunderstanding of the purposes and priorities of higher education. That misunderstanding takes root in the minds of many students and remains rooted when they become alumni. Here and there, the system of competitive intercollegiate sports has generated coalitions of coaches, administrators, faculty members, trustees, and boosters who intimidate or manipulate administrators and faculty members, reward some student-athletes in ways the NCAA prohibits, and maintain by illicit methods

the eligibility of student-athletes who would otherwise have become ineligible to play. Finally, while university administrations and athletic staffs are mortal, the competitive pressures under which they work are eternal. Accordingly, a program that has for years been responsible and constructive may become corrupt, as responsible administrators and coaches are succeeded by others more responsive to the mandate to win at all costs.

Efforts to correct the anomalies presented by intercollegiate sports have been resisted in the universities and in the NCAA. One theme in the history of American intercollegiate sports is that of a continuous struggle between the partisans of wide competitive freedom and those of restraint and reform. This has never been a struggle purely of athletes against academics. In all the major groups involved--university administrators, faculty members, students, alumni, directors of athletics, conference officials, coaches, players, former players, and journalists --there are, and have been, both libertarians and reformers. Some of the reformers are coaches: although the amplitude of achievement and reward in their profession is on the line, most of them care about their players and the players' future, and some coaches are outspoken critics of the inability of the NCAA to sustain its principles and enforce its regulations.[8] Correspondingly, while some university administrators and faculty members are partisans of reform, others are libertarians. Most, however, are simply indifferent to the effect of unbridled athletic competition on their institutions.

These divisions are apparent in the proceedings of the NCAA. In the Annual Convention of that organization, each of the 791 participating colleges and universities and each of the 79 member conferences casts one vote. A representative who casts the vote of a college or university is appointed by his or her institution to do so and presumably votes according to instructions of his or her administration. But the fact that the efforts of reformers on significant issues have been so often blocked indicates that many presidents and chancellors are either disinterested in or misinformed on the issues, or hostile to regulation and restraint. Why is this so?

The American system of competitive intercollegiate sports is driven by motivations that are deeply rooted in the society and the culture and very difficult for universities to resist. There is the academic tribalism by which fans and boosters choose an institution and support its teams with fervor, money, and loyalty to the death. There are the compulsions of competition, under which winning is not everything it's the only thing, and nice guys finish last.[9] There is the unremitting pressure to win that bears constantly on coaches, athletic directors, presidents, and chancellors. (In the eyes of the press and the fans, every loss is a humiliation, and must be accepted as such.) There is the irresistible dogma, which was foreshadowed as early as the 1880s, [10] that the status and growth of academic institutions are somehow linked to the performance of their athletic teams in the revenue sports (football and men's basketball), the conference championships they win, and their prominence in post-season play. Most university administrative officers and faculty members seem to have assumed that winning teams in the revenue sports are essential to alumni loyalty and the success of funding drives. Some of them have been intimidated by coalitions of boosters represented in boards of trustees, and, in fact, some presidents have had to resign for trying to reform their academic programs against the will of such coalitions.

Faculties, also, have not given the reform of intercollegiate athletics the active support it requires. The reason is that faculty efforts to investigate and reform athletic programs have until recently received little support from the administrations or even from the faculties themselves, and further efforts have seemed like a poor investment of time. Most faculty members, we surmise, have reasonably concluded that sports programs carried to excess are necessary evils that should be left in the discreet care of the administrators, who are paid well enough to assume responsibility for them. These and other reasons account for the success with which reform has been opposed in the NCAA and in the institutions themselves.

One of the major obstacles to reform is the disadvantage any university faces when it tries unilaterally to reform its own athletic programs. Being under formidable pressure to have its teams compete at the limit of opportunity the intercollegiate system allows, it cannot sustain for long, against that pressure, reforms that reduce the competitive strength of its teams, as most desirable reforms would do. To cut schedules and practice time at any university, for example, would give its student athletes more time for study. But it would also leave them at a disadvantage against teams and squads that had acquired the greater experience of longer schedules and the benefits of more extensive and intensive practice and conditioning. Athletes who compete consistently under handicaps not of their own making and endure losing seasons year after year are likely to become chronically discouraged and bitter, losing their morale and their regard for their institutions. Under those circumstances, it becomes difficult or impossible for coaches to recruit the talent needed to achieve any success at all. The trouble with unilateral reform, therefore, is that it violates what the NCAA calls the principle of equity in competition,[11] by denying athletes under a unilaterally reformed program the so-called "level playing field."

There are, of course, alternatives to unilateral reform, and we have considered them at some length. One is to persuade the Atlantic Coast Conference to accept the reforms this University considers necessary and to schedule non-conference games only against other schools subject to the same reforms and restraints. Given the aspirations of some ACC members for national primacy in the revenue sports, that hope may be utopian. Other options would be to organize and affiliate with a new conference composed of schools that would adopt the reforms we propose for ourselves, or to drop to a less demanding level of competition in the NCAA classifications, such as Division 1-AA (which is that of the Ivy League) or Division II. One difficulty in that approach is that it would take several years to rearrange the scheduled games for which we have already contracted. Another is that it would be hard to detach the schools with which we like to be affiliated from their current schedules and conference memberships. Finally, it would distress our alumni and other fans to deprive them of their annual reckonings with the hereditary enemies in the ACC.

A final option, which has not received the public discussion and institutional consideration it deserves, is for this university and others to withdraw completely from intercollegiate athletic competition. This is the simplest and most decisive solution to the problems of intercollegiate athletics, the one most likely, if instituted, to settle those problems once and for all. It is also the solution that is most likely, wherever proposed, to shake the foundations of the Republic. Recommendations to abolish Congress, or rescind the Louisiana Purchase, would be less controversial than the proposal that any major university renounce intercollegiate athletics. Nevertheless, we regard withdrawal from

intercollegiate athletics as a serious alternative to the present state of things, which is intolerable, and we think that unless major national reforms arc enacted and enforced the withdrawal of colleges and universities from intercollegiate competition, singly or in groups, is a valid and realistic option.

In consideration of the foregoing, your committee has chosen as a basis for its recommendations the following strategy of reform: (1) that the University should immediately and unilaterally implement all those reforms it approves that do not place its athletes at a competitive disadvantage; (2) that for a period of five years thereafter the University should join the leadership of current reform efforts in the NCAA and vigorously press for the adoption, by the NCAA or any agency that may displace it, of the remaining reforms that this University has approved; (3) that at the expiry of five years the University should consider, in the light of conditions then prevailing, implementing those remaining reforms that this University has approved that have not been accepted by the NCAA, however they may affect the competitiveness of our athletes and their teams.

Although we have no illusions about the prospects of achieving decisive reforms in an organization so divided as the NCAA, we are encouraged by the appearance, in 1984, of a serious reform effort that has recently begun to accelerate. That effort began with the adoption by the NCAA of Proposition 48, which requires, as a minimum for awarding an athletic grant-in-aid to an incoming freshman, that he or she have graduated from a secondary school with at least a 2.0 average in a stipulated 13-course core curriculum. But no recipient of such an award may play or practice in a varsity sport during his freshman year unless he has scored 700 (out of a possible 1600) on the Scholastic Aptitude Test or 15 (out of a possible 36) on the American College Test. Although these requirements are modest, they exclude the possibility that any NCAA institution will again, to its embarrassment, be found to have admitted an illiterate on a grant-in-aid and retained him during his four years of eligibility, as has occasionally happened.[12]

Proposition 48 was initiated and promoted by a group of college presidents. In the course of the struggle over Proposition 48, the NCAA created a Presidents Commission, to be elected by the chief executive officers of all member institutions, which has the right to review activities of the Association, put matters of concern on the agenda of the Annual Convention, order the agenda, and call special meetings of the Association.[13] That Commission continues to be active. Recently it has proposed that the NCAA reduce the length of the basketball season of Division I, by a month, reduce spring football practice, and require publication of the graduation rates of student athletes. These matters will be referred to the Annual Convention in January, 1990.

To this evidence of progress must now be added the recent formation of a blue-ribbon national commission to serve for two years under the chairmanship of Rev. Theodore Hesburgh, former president of Notre Dame University, to define and study the problems of intercollegiate sports and make major recommendations to remedy them. The vice chairman and one of the organizers of his commission is President Emeritus William C. Friday of the University of North Carolina. Richard Schultz, Executive Director of the NCAA, will also be a member. The Knight Foundation of Akron, Ohio, has provided two million dollars to support the committee and its work.[14]

Finally, we observe that the NCAA in January of this year added to its constitution (Art. 2, Principles for Conduct of Intercollegiate Athletics) some progressive commitments that had not appeared there before.[15] It remains to be seen, of course, when and how they will be embodied into specific, enforceable bylaws. Among them are the following:

> 2.2 The Principle of Student-Athlete Welfare. Intercollegiate athletics programs shall be conducted in a manner designed to protect and enhance the physical and educational welfare of student-athletes.
>
> 2.8 The Principle Governing Recruiting. The recruiting process involves a balancing of the interests of prospective student-athletes, their educational institutions and the Association's member institutions. Recruiting regulations shall be designed to promote equity among member institutions in their recruiting of prospects and to shield them from undue pressures that may interfere with the scholastic or athletics interests of the prospects of their educational institutions.
>
> 2.9 The Principle Governing Eligibility. Eligibility requirement shall be designed to assure proper emphasis on educational objectives, to promote competitive equity among institutions and to prevent exploitation of student-athletes.
>
> 2.11 The Principle Governing Playing and Practice Seasons. The time required of student-athletes for participation in intercollegiate athletics shall be regulated to minimize interference with their opportunities for acquiring a quality education in a manner consistent with that afforded the general student body.

These are promising signs. But your committee believes that these and other efforts to solve the problems presented by the conflicts between intercollegiate athletics and American higher education will be strongly opposed by large and powerful groups motivated by strong currents in the culture. We seriously advise the Faculty Council and the General Faculty to give organized and concerted support to all movements likely to result in the adoption by the NCAA of the general reforms the Council may choose to recommend to the Chancellor. Unless the Council is prepared to recommend the road of immediate unilateral reform, it should persuade the Faculty to encourage other faculties across the country, and organizations like the American Association of University Professors, to support national reforms, whether the Presidents' Commission of the NCAA and the new national commission recommend them or not.[16]

To conclude: The character and scale intercollegiate sports has assumed, and the resources it has acquired, in the last twenty years make it necessary for all faculties to assure that their athletic programs are subordinated to the educational purposes and values of their institutions and that the educational integrity of their institutions is maintained. We hope the Faculty and Administration will see fit to enact the reforms recommended in this report and approve other measures as the need for them becomes apparent. It is our conviction, in any case, that a massive national movement for the reform of athletics in all American universities is now required. And the proper place of this University in that movement is in the vanguard, where its leadership will be useful.

***

In this report we recommend many additional improvements in the regime of intercollegiate athletics at Chapel Hill. Some of them are specific to this University and, if approved, can be enacted immediately. Others will benefit from adoption on the national level, during the next five years. All are listed and discussed in the pages that follow. It is now the task of the Faculty Council to evaluate them and, on the basis of its deliberations, to make its own recommendations to the Chancellor.

II. RECOMMENDATIONS

A. RECOMMENDATIONS FOR NATIONAL AND LOCAL REFORM

The first nine recommendations are for national reforms in intercollegiate athletics. For five years the University should support them aggressively and do its best to obtain their adoption by the NCAA, the ACC, and other conferences and governing bodies. The University should then resolve to adopt them unilaterally.

1. The season of play in each sport should not exceed the number of weeks in a standard academic semester. It may, if desirable, be divided between the two academic semesters in an academic year.

2. In any sport, the number of competitive events additional to those required by the Conference shall be considerably reduced.

3. During the playing season, the time a student-athlete allots to practice, suiting up, taping up, required team conditioning, chalk talks, travel, orientation, games, films and post-game analysis, and all other obligatory team activities should not exceed 360 hours for the season. These hours need not be distributed evenly among the fifteen weeks, but in no case should they exceed thirty per week. Each coach, or some member of his or her staff, must keep a seasonal log of the time required for athletes participating in the sport he or she coaches and at the end of each week in the semester should submit a cumulative copy of the log to the Director of Athletics.[7]

4. The fifteen off-season weeks in the academic year are reserved chiefly for academic growth and progress. Physical conditioning, light workouts, and unsupervised play should be allowed, but such activity required of student-athletes should not exceed fourteen hours per week. Spring practice in football should be entirely eliminated.

5. The freshman year of every student-athlete should be used primarily forcoming to terms with the demands a university makes upon its students, mastering fundamental concepts, improving oral and written expression, and establishing habits of study and self-discipline that will enable him or her to profit from the educational opportunities open here to undergraduates. Accordingly, freshmen should be ineligible for varsity play. But since no young athlete can neglect the development of his or her stamina and skills for a year, we recommend that freshman student-athletes be allowed two hours per day of physical conditioning and practice in the sport, with or apart from the varsity, on days of classes, plus four hours of optional conditioning on weekends. They should also be permitted to sit on or near the bench at varsity games. But no freshman student-athlete should suit up for a varsity game or travel with the varsity to away games.

6. The maximum number of years of varsity eligibility should be three. All "red-shirting" should be abolished except in the case of a student-athlete who stands to lose a season of play

because of physical injury certified by a physician, or temporary withdrawal from the university by reason of verified family problems, or some other difficulty recognized as valid by the NCAA and by the Faculty Committee on Athletics.

7. The contract of every coach should include, as a primary obligation, responsibility for the regular academic progress of the student-athletes under his or her supervision. Every NCAA member academic institution should be required to report to the NCAA its graduation rates for each annual cohort of athletes, along with rates of dismissal, probation, advancement, and academic honors, of whatever kind. They should be shown to all potential recruits

8. In the national discussion of Proposal 42 it has been alleged that universities have an obligation to admit outstanding athletes who are academically underqualified. The reason given is that there is no other way in which those athletes can obtain the exposure they need in order to be drafted by a professional team or selected for competition in the Olympic Games. But no university is under any such obligation. The NCAA should make this clear.

9. Because many problems of intercollegiate athletic programs arise from the admission to universities of athletes who are unprepared, or unable, or disinclined to succeed in university studies, we recommend that an NCAA member institution not admit any athlete whose qualifications, measured against the admissions criteria of the institution concerned, do not meet the admission standards that are generally applicable, including affirmative action, within the institution to which they apply.

B. RECOMMENDATIONS FOR LOCAL REFORM ONLY

The following reforms apply only to this University. If approved, they may be implemented immediately at Chapel Hill.

10. Out-of-state student-athletes should be recruited and enrolled so as to raise the average SAT score of out-of-state student-athletes, at the end of five years, to equal the average SAT scores of other categories of out-of-state admittees, such as the children of out-of-state alumni; and in the out-of-state quota the University will reduce to a maximum of 50 per year the admissions of athletes who are non-competitive in that admission category.

11. The number of new grants-in-aid in each sport should be increased in proportion as the average graduation rate of student-athletes in that sport exceeds that of the student body, and decreased as the average graduation rate of student-athletes in that sport falls below that of the student body.

12. Every coach and his or her staff should ensure that all student-athletes understand the primacy of their educational objectives and are encouraged to have clear academic goals. They should follow course-tracks that will qualify them for the pursuit of those goals.

13. The Faculty Committee on Athletics should arrange for exit questionnaires or personal interviews to include, among other things, the evaluation of coaches, whenever a student-athlete leaves an academic program, whether for graduation or for other reasons.

14. After a probationary period, a head coach shall have a fixed-term contract and appropriate benefits and shall be dismissed only for just cause. Dismissal shall be by the Chancellor, acting after consultation with his Advisory Committee. Coaches will be evaluated on all capacities having to do with their contributions to the athletic, academic, and personal growth of the student-athletes who come under their leadership. A coach should be evaluated on several criteria, and his or her won-loss record shall be only one of the considerations by which his or her status in the University is determined.

15. The University should make a special effort to involve student-athletes more fully in the life of the student body. University housing should continue to be planned so that student-athletes live among non-athletes. Training tables should be opened, for a fee, to all students.

16. The faculty should extend to student-athletes the same respect and consideration, no more and no less, that is accorded as a matter of right to students in general. The student-athletes we have interviewed unanimously wish to be considered on the same basis as all other students and not to be identified with athlete-stereotypes.

17. The University should propose to the Southern Association of Colleges and Schools that a review of the academic support and advising programs of departments of athletics be included in its recurrent institutional self-studies of member institutions. The review should cover the grades and graduation rates of student-athletes and their progress toward degrees.

18. The institutional representative who casts the University's vote in the NCAA and the ACC should report annually to the Chancellor and to the Faculty Council on how the University's vote has been cast on each issue brought before these bodies and why.

19. The University should encourage the ACC to recognize and honor annually the member athletic department that appears to have achieved the best balance between the athletic and; academic responsibilities of student-athletes. It should continue to publicize the outstanding academic achievements of the student-athletes of the member institutions.

20. The University should provide to all students who need it the same kind and level of academic support that is provided to student-athletes.

21. As far as possible, every student should have an opportunity to participate on a non-intercollegiate basis in the sport of his or her choice. The University should carefully preserve, maintain, and expand tennis and basketball courts and other athletic facilities

near the dormitories for the use of students. The intramural sports program should be emphasized. These needs should be given a high priority in the allocation of space on the campus.

22. The University should enlarge and improve its athletic facilities for the University community. Greater access to the Koury natatorium should be permitted to members of the University community.

23. Both the Chancellor and the General Faculty should be represented on the Executive Committee of the Educational Foundation. The Faculty's representative on that Board should be a member of the Faculty Athletics Committee elected by his colleagues.

24. It is the sense of the faculty that simultaneous membership on the Executive Committee of the Educational Foundation and the Board of Trustees creates the potential for actual or apparent conflict of interest.

25. The Educational Foundation should present its annual budget to the Chancellor for his review and endorsement. The Chancellor should consider with his Advisory Committee any major new fund commitments contemplated by the Educational Foundation. The Educational Foundation should consider using to a greater extent its accumulated capital surplus and any annual surplus of income over expenditure to support i) athletic activities for the general student body, ii) academic support programs for students from the general student body, and iii) expanded scholarship funds to be awarded on the basis of need and merit.

26. The Educational Foundation should establish relations and operations with the Development Office in the same modes as now apply to all other major fund-raising foundations in the University.

27. Financial statements and budgets of the Educational Foundation should be open to the public.

28. The practice of re-selling seats in the Student Activities Center in perpetuity should cease and all possible steps should be taken to reassign to students such seats as lapse.

29. The mix of programmed events in the Smith Center, other than athletics, should correspond to the educational, intellectual, and cultural interests of the various constituencies composing the university as envisioned in Chancellor Christopher Fordham's memorandum to the Director of Athletics dated October 14, 1987.

30. Whenever major sports or entertainment events take place on the campus, whether at the Student Activities Center or Kenan Stadium, an adequate number of parking places should be set aside for use of faculty and staff who have to work during the events.

31. The present elected Faculty Committee on Athletics should advise both the Director of Athletics and his Department, and the Chancellor, meeting frequently with those officials.

32. The charge of the Faculty Committee on Athletics should include oversight of matters covered in Recommendations 1-6, 10-13, and 15-16, or such of them as may be adopted.

Respectfully submitted,
The Ad Hoc Committee on Athletics
and the University

[composed of former Chairmen of the faculty of the Chancellor's Advisory Committee]

NOTES

[1] In January, 1988, 105 of the 791 universities, colleges, and schools that held membership in the NCAA were in Division IA, which is the domain, par excellence, of big-time university sports. Nine conferences were members of that division. The other divisions and their memberships were I-AA (87 institutions and 8 conferences), I-AAA (100 institutions and 20 conferences), II (179 institutions and 15 conferences), and III (320 institutions and 27 conferences). For these totals we are indebted to Mr. Ted C. Tow, Associate Executive Director of the NCAA.

[2] For example, a public opinion poll of March, 1989, shows strong disapproval, even among fans and blacks, of overemphasis on sports in higher education, the payment of money (as distinct from tuition, fees, room, board, or required course-related books) to athletes, and low standards of admission and eligibility for athletes. Respondents also believe it is common for professors to give student-athletes higher grades than they deserve and for the universities and boosters to make under-the-table payments to athletes. As reported in The Raleigh News and Observer, April 8, 1989, p. 5B. In a recent

Harris poll, about 75 per cent of the persons polled believe that intercollegiate athletics is "out of control." Cited by President Emeritus William C. Friday of The University of North Carolina in ibid., August 4, 1989, pp. 1C and 2C.

[3] 1989-90 NCAA Manual: Constitution, Operating Bylaws, Administrative Bylaws, Administrative Organization (Mission, Kansas, National Collegiate Athletic Association, March, 1989), Constitution, Art. 2.6, "The Principle of Amateurism": "Student-athletes shall be amateurs in an intercollegiate sport and their participation should be motivated primarily by education and by the physical, mental and social benefits to be derived. Student participation in intercollegiate athletics is an avocation, and student-athletes should be protected from exploitation by professional and commercial enterprises." Ibid., Art. 2.10, 'The Principle Governing Financial Aid": "A student-athlete may receive athletically related financial aid administered by the institution without violating the principle of amateurism, provided the amount does not exceed the cost of education authorized by the Association." Also Operating Bylaws, Art. 12.

[4] In a recent survey of current and former National Football League players, nearly a third of the respondents reported having accepted, while undergraduates at various colleges and universities, payments that were in violation of NCAA regulations. Fifty-three per cent of the respondents "...said they saw nothing wrong with breaking NCAA rules to get extra cash." Most of the payments were made covertly by alumni and other fans -- slid under the doors of dormitory rooms, or passed from hand to hand in a post-game handshake. Others came from the sale of complimentary game tickets, for as much as $1,000 each. Out of 3,500 players contacted in this poll, 1,182 responded. The percentages of those reporting having accepted money illegally ranged from 19 per cent in the Atlantic Coast Conference, to 67 per cent in the Southeast Conference, with the Big Ten and Pacific Ten falling in between, at 36 per cent and 39 per cent respectively. The Raleigh News and Observer, November 17, 1989, pp. 1B and 2B; ibid., November 18, 1989, pp. 1B and 6B.

[5] 1989-90 NCAA Manual, Constitution, Art. 2.6. quoted supra, note 3. Also Art. 2.4, 'The Principle of Sound Academic Standards": 'The admission, academic standing and academic progress of student-athletes shall be consistent with the policies and standards adopted by the institution for the student body in general." But regardless of such statements of principle, it is in the academic world at large the academic standing of an athlete that alone determines whether he is a member of the student body.

[6] Ibid., Constitution. Art. 2.6 (encore), quoted in note 3, and Art. 1.2 ("Purposes"), (a) [The purposes of this Association are] "(a) To initiate, stimulate and improve intercollegiate athletics programs for student-athletes and to promote and develop educational leadership, physical fitness, athletics excellence and athletics participation as a recreational pursuit."

[7] Ibid., Constitution, Art. 2.4. Also Art. 1.3.1: "Basic Purpose."

[8] Quotations from the remarks of Division I-A football coaches written in a poll conducted by the sports journalists of the Rocky Mountain News (Sunday, August 21, 1988), pp. 1-S, 12-S, and 13-S. Some of the coaches, in their remarks, reflected a strong sense of responsibility toward their athletes and respect for the academic standing of their institutions. One of them wrote, "The win-at-all-costs attitude forces coaches to take short cuts to succeed." There is, among the respondents, a belief that the NCAA, by strengthening its investigation and enforcement capacities and imposing the so-called "death penalty" on Southern Methodist University, has probably reduced the amount of competitive cheating in the coaching profession. Those who observe NCAA regulations want to see the offending programs punished severely. We are indebted to Bob Willis, of the Rocky Mountain News sports staff, for having sent us a copy of the issue in which the poll is reported.

Little Brown and Company, 1980), pp. 867, 925. The attributions, of course, are to Vince Lombardi and Leo Durocher.

[10] George E. Peterson, The New England College in the Age of the University (Amherst, Amherst College Press, 1964), p. 37. For rebuttals to the idea that big-time college sports generate giving to the academic programs of institutions rather than merely to their athletic programs see (1) Allen L. Sack and Charles Watkins, "Winning and Giving," in Sport and Higher Education, eds. Donald Chu, Jeffrey O. Segrave, and Beverly J. Becker (Champaign, Illinois, Human Kinetics Publishers, Inc., 1985), pp. 299-306, and (2) "Oft Repeated Argument: Do Winning Teams Spur Contributions? Scholars and Fund Raisers are Skeptical," Chronicle of Higher Education, January 13, 1988, p. 1.

[11] 1989-90 NCAA Manual, Constitution, Art. 27.

[12] In January of this year, the NCAA amended Proposition 48 by passing Proposal 42 (to become effective in 1990), which makes the award of grants-in-aid contingent not only on the 2.0 average in the core curriculum but also on the minimal scores stipulated earlier for the SAT or ACT. Proposal 42, however, has been vigorously contested by Coach John Thompson and others on the ground that the vocabulary sections of the two tests contain words and expressions with which blacks and members of other minorities are unfamiliar and thereby discriminate racially against minorities. Its repeal in the NCAA Annual Convention of January, 1990, is a strong possibility.

[13] 1989-90 NCAA Manual, Constitution, Art. 4.5.

[14] Knight Foundation, News Release, Akron, Ohio, September 27, 1989.

[15] These declarations are obviously commitments to policy. The specific legislation by which the commitments will be made effective have yet to be proposed. Perhaps some of them will be brought before the Annual Convention in January, 1990.

[16] After this report was written, but before it was presented to the Faculty Council, some members of the North Carolina Conference of the American Association of University Professors adopted a resolution recommending measures intended to strengthen faculty oversight and control of intercollegiate athletics at all institutions of higher learning in North Carolina. Copies of the resolution have been sent to the President of the University of North Carolina and the Chairman of its Board of Governors. The recommendations are: (1) that chairs of faculties or of faculty senates serve ex officio on boards of trustees, along with student body presidents; (2) that members of faculty committees exercising oversight over intercollegiate sports programs be elected by their faculties, and that tenured faculty members be elected as chairs of such committees; (3) that all academic advising programs be located, or relocated, in the division of academic affairs, to be supervised by a tenured faculty member; (4) that the fund-raising efforts of any booster club be made subject to the supervision of the chief fund-raising officer of the university concerned, and that an annual report of the club's finances be provided to the faculty of the institution; (5) that abuses of the grade "incomplete" be curbed by specific procedures devised for that purpose. We believe that the members of the Chapel Hill faculty, and all other North Carolina faculties, should individually, corporately, and aggressively support measures of this kind. Reported in The Raleigh News and Observer, October 29, 1989, p. 30A.

[17] The basis for this recommendation is an estimate that allocates the 168 hours of a student-athlete's week according to three needs in order of priority: 1st, the student-athlete's personal needs for sleep, meals, getting about the campus, and seven hours of leisure per week; 2nd, the student-athlete's academic needs for lectures, recitations, labs, class preparation, and, during the term, preparing out-of-class papers and studying for major examinations; 3rd, time devoted to intercollegiate athletics. Here is the percentage distribution of time for the term:

Personal needs	50%
Academic needs	29%
Intercollegiate athletics	15%
Unallocated	6%

The principle involved here is that the time needed for a student-athlete's education must be accorded and protected, since that is the purpose of the grant-in-aid he or she is given. Obviously, the observance of that principle will compel sharp reductions of practice in all its forms, scheduled competitive events, and travel time. We are aware of the scale of those reductions and have no hesitation in recommending a personal regimen for student-athletes that necessitates those adjustments. We conceive education, moreover, as consisting not of the minimal satisfaction of a minimal number of courses that require the minimal possible exertion, but rather as a line of study and inquiry involving a number of courses chosen for the student's intellectual and professional interests. The following is a quotation from a letter published in The New York Times in March, 1989: "I believe intercollegiate athletics can only be justified as part of higher education and that the young men and women who participate in athletics must be bona fide students, receiving, in exchange for their

participation in athletics, an education of high quality which stretches them intellectually just as the athletic programs stretch them physically." The writer of that letter is Chancellor Paul Hardin.

Subject: RE: Drama Online
Attach: Copy of Drama Online Title List_USCAN (2).xlsx; Drama Online Brochure 2014.pdf

---

Your trial is available here: http://www.dramaonlinelibrary.com/ and it will run until June 9.

Dear Dramatic Art Faculty,

As Adam mentioned, we currently have a trial that runs until June 9 of the new Drama Online database. The trial link is above and the title list and brochure from Bloomsbury are attached. All titles on the list should be incorporated into the database by June.

I shall contact the representative to see if she might set up a couple of times for a tutorial, if anyone is interested -- it's simply a matter of linking to a site & dialing in for a conference call. The trial is active now, and the tutorial is, of course, optional. I would certainly appreciate your input. If the response is positive, then I shall put it forward as a candidate for year-end, one-time money.

Best regards,

Tommy

Tommy Nixon
Subject Librarian for Classics, Dramatic Art, & English/Comparative Literature
Davis Library, CB#3922
University of North Carolina at Chapel Hill
208 Raleigh Street

Subject: Drama Online

Dear All,

Karen has been in contact with Tommy Nixon in Davis Library about the database Drama Online. The Library has access to Drama Online on a trial basis. Karen and Tommy are offering to set up demonstrations of the database. They should be contact shortly.

Best,

Adam

DRAMA ONLINE

Discover.Read.Study.Perform.

— A complete digital library of —

THE MOST STUDIED, PERFORMED & CRITICALLY ACCLAIMED PLAYS

— from the last 2,500 years —

HIGHLY COMMENDED FOR PUBLISHING INNOVATION FROM ALPSP

'Drama Online blazes the trail for a new era of digital theatre publishing.'

— DR CHRIS MEGSON, ROYAL HOLLOWAY, UNIVERSITY OF LONDON

Designed for the Literature and Theatre classroom

A NEW PARTNERSHIP FROM:

BLOOMSBURY

methuen drama

FABER DIGITAL

DRAMA ONLINE

DRAMA ONLINE is the ultimate online resource for plays, critical analysis and performance for libraries, educators, students and researchers.

Developed in partnership by Bloomsbury Publishing Plc and Faber and Faber Ltd, **Drama Online** features the pre-eminent drama titles from the Methuen Drama, Arden Shakespeare and Faber lists, to form a collection of the most studied, performed and critically acclaimed plays from the last two and a half thousand years.

From the Works of Aeschylus to the Present Day

Access to the finest dramatic literature* including:

- The unrivalled scholarship of **The Arden Shakespeare**
- Realist works from **Ibsen** and **Chekhov**
- Major foreign works in translation from **Bertolt Brecht**, **Luigi Pirandello**, **Eduardo De Filippo**, **Frank Wedekind** and more
- Comic masterpieces from **Oscar Wilde** and **Noël Coward**
- Modern classics from **Tom Stoppard**, **Caryl Churchill**, **Alan Ayckbourn**, **Mark Ravenhill**, **Brian Friel**, **John Osborne**, **Christopher Hampton**, **Alan Bennett**, **Willy Russell** and **David Hare**
- New writing from **Polly Stenham**, **Katori Hall**, **D.C Moore**, **James Graham**, **Rebecca Lenkiewicz** and **Lucy Prebble** and theatre companies such as Complicité and Filter

The collection will be continually updated with the very latest drama from new and established writers.

With Supporting Practical, Critical and Contextual Works on:

- Acting and performance
- Theatre craft and technical theatre
- Critical interpretations, theatre history surveys and major reference works on authors, movements, practitioners, periods and genres

*Some territorial rights restrictions apply.

Biographical information, photos, and listed works for each playwright

Drama Online features over 1,000 titles

Interactive chart illustrates character appearances by act and scene

At the heart of Drama Online is instant access to hundreds of full-text plays and reference works, with a clean, tablet-compatible interface that connects users with the joy of reading and studying theatre. Enhancing their experience, users will find numerous tools unique to Drama Online.

Drama Online Play Tools

- An intuitive e-reader featuring scholarly editions, in-text annotations, as well as page and line numbers corresponding with the print edition
- Advanced and full text search capabilities. Filter results by genre, period, theme, cast size, gendered roles, word-length, and more
- Visual aids for study and rehearsal, including a Words and Speeches Graph and a Character Grid for each play
- Part books: character lines and stage directions readily available for each individual role
- Monologue search: filter results and read each monologue within the context of the entire play
- Personalized experience: bookmark, highlight, annotate texts, save searches, and view search history

Advanced Features for Librarians

- Unlimited concurrent access via IP recognition, Shibboleth, library cards, or username and password
- COUNTER compliant usage statistics
- Library branding
- Free MARC records available for all titles
- Cross referencing via DOI (Digital Object Identifiers) and OpenURLs

FREE TRIALS

Register for your free trial by contacting **dramaonline@pcgplus.com** or your local representative.

RECOMMEND TO YOUR LIBRARY

Drama Online is available to institutions via subscription or purchase. Contact **dramaonline@pcgplus.com** for a quote or more information.

www.dramaonlinelibrary.com

DRAMA ONLINE

'Drama Online promises to reinvent performance studies for a ground-breaking digital environment.'

Professor Jonathan Bollen, lecturer in Modern Drama and Performance Studies, University of Birmingham

Clean reader interface with embedded footnotes

Comparative, qualitative reference tool measures words and speeches by scene and character

DRAMA ONLINE

Discover.Read.Study.Perform.

*'The new **Drama Online** Library website is the next generation of sophisticated online tools for students, actors, researchers, librarians, and lovers of theatre. Take Methuen Drama, Arden Shakespeare, Bloomsbury and Faber, with their extraordinary collections and preeminent scholarship. Combine their resources. Place them into an elegant, intuitive and deep interface. And watch this become the most important bookmark on your browser.'*

— PROFESSOR ROCCO DAL VERA, UNIVERSITY OF CINCINNATI

*'With instant search access to hundreds of plays, and reference works **Drama Online** is fast becoming the essential site for theatre and performance.'*

— GEOFFREY COLMAN, HEAD OF ACTING, CENTRAL SCHOOL OF SPEECH AND DRAMA

***Drama Online** – curated by some of the wisest publishers in the business – sets the stage for a new generation of readers, writers, and thespians to not only find, but also actively work with plays. It is a new, exciting way to engage with the stage, while never losing sight of the treasured heritage of theater and the performing arts.'*

MICHAEL ARNZEN, PROFESSOR OF ENGLISH, SETON HILL UNIVERSITY

'Surely this is the best expression to date of the digital revolution as far as literary studies are concerned.'

— DR PAUL EDMONDSON, HEAD OF LEARNING AND RESEARCH, THE SHAKESPEARE BIRTHPLACE TRUST

Subject: RE: RE: Curriculum matters

Mark your calendars for **Wednesday, April 2 from 11am to 12pm**. I will send you the location of the meeting in the next few days, but it will either be in Steele Building or South Building.
Thanks for providing your availability and I look forward to our discussion in a few weeks.
Best,
Nick

Colleagues:
Dean Owen asked me to schedule a meeting so we can discuss this topic further. As per Tim's suggestion, I'm including Ni Perkins from Undergraduate Admissions. And per Dean Owen's suggestion, I am including Charlotte Waterhouse and Lee May from the Academic Advising Program.
I will send out a Doodle Poll in a few minutes. Please submit your available ASAP so we can schedule a meeting for late next week.
Ni, Lee, and Charlotte – We will be discussing the new distance learning regulations for the College of Arts and Sciences (attached).
Best,
Nick

Thanks for your message, Bobbi. I hope you do have a bit of catch-up time this week.
Thanks, also, for suggesting that we meet. We think that getting together in person would be helpful and suggest that Ni Perkins from UG Admissions be included. Let us know when you have time to get together.
Until we meet, I would like to ask that if any other students show up on your radar screen with too many online hours, such as the one you mentioned in your message, that you let us know so that we can work with you and the student to find a reasonable solution.
Along that same line, we hope that no student who took more than 24 hours of CCO courses before the new policies were put into place will be penalized for that. Until Nick notified us that the new 24 hour policy no longer was limited to students who matriculated in the College, we were not telling students of specific limits on the number of CCO courses they could take. These students should not be held accountable for a retroactive policy about which they could not have known and about which we could not have advised them. Both of our units are looking out for students, I know, and we will work with you as always.
We look forward to getting together with you, Nick, and Erika at your convenience.
Enjoy the rest of break!
Tim

Dear Tim,
Sorry I took so long to respond. Thanks to Spring Break I have a bit of time to catch up.
Thank you for your message, and for your continued partnership with the College. I agree that we want to advise our students properly, both those who matriculate to the College and shift to Part-time Classroom Studies for a variety of reasons as well as those who start as non-degree seeking part-timers and subsequently pursue a degree (we often are aware of that intention).

You mention below that the wording is too broad, specifically that it also applies to degree-seeking students in Education, Journalism, Business Administration, etc. When taking the phrase out of context, I can see how you might think that but the Distance Learning Task Force Report was approved by the Administrative Boards of the General College and College of Arts and Sciences, so the policies can actually apply only to students receiving degrees in the College, not the professional schools, although our colleagues in those units generally follow the College's lead.
It is important to the College that students take a majority of their courses on-campus so that faculty members and students can learn from one another. If a student waits until their final semester to matriculate to the College (which can and does happen from time to time), then under the current practice, the student would only be required to follow the limits in their final semester and could potentially have more than 24 CCO hours applying towards their degree. More importantly, they could take numerous courses in their majors and minors which we don't allow.

Nick Siedentop sent the policy out to your folks after a part-time student getting close to graduation came to see an advisor in Steele Building and was surprised to learn that 27 hours of CCO courses would not all count and no more history courses could be taken that way.

How can we close this loophole? Is there a way to adhere to the spirit of the new guidelines while also working hard to help students meet their academic goals? Would getting together help -- after Spring Break?
Bobbi

On 3/11/2014 2:32 PM, Sanford, Timothy R. wrote:

Nick & Others --
I have not seen any comments on our discussion from Bobbi, but we remain concerned about this issue because we do not want to provide inaccurate advice to any of our students.
Since we have talked about the wording, I have been thinking about that a bit. I think the wording is too broad but not because of the inclusion of Part-time Classroom Studies students. Rather, the wording seems too broad because it says "all new and continuing full and part-time degree seeking students" which means that it also applies to degree seeking students in Education, Journalism, Business Administration, etc. That was why the phrase specifying that the policy applied only to students who had matriculated in the College was in the original wording. That excluded the students in Education, etc.
And, as we have tried to point out politely before, the matriculation phrase also excludes degree seeking students in Part-time Classroom Studies who have not applied to the College for transfer nor paid the required application fee. We do agree that full-time A&S students who become part-time and shift to Part-time Classroom Studies would be considered to have matriculated in the College.
If I have missed something, please say so. We are partners with the College, and we want to make sure the Part-time Classroom Studies Students are properly advised and well served before they transfer to the College or any of the professional schools.
Thanks for your assistance and patience.
Tim

Thanks, Nick. I'm sorry but I wasn't really questioning the wording as much as the intent. The wording seems to change the students to whom the regulations apply, but I don't think that was intended when the regulations were approved. This has been an issue, matriculation as when the policies apply, but I was not aware any change had been made.
Almost the weekend!
Tim

Subject: RE: Curriculum matters
Hi Tim,
Thanks for your message. The text in my email message comes directly from the Distance Learning Task Force Report (page two, under Policy

Recommendations).
"The regulations would apply to all new and continuing full-time and part-time degree-seeking students, and they refer to CCO, Summer School, Semester Online, and other for-credit UNC-Chapel Hill courses offered completely via similar modalities."
http://www.unc.edu/depts/uc/AB/10-29-13/Distance%20Learning%20Task%20Force%20Report%20-%20Boards%20approved.pdf
My interpretation – though I was not a member of this task force – is that the new policy ***does*** apply to a part-time degree-seeking student in Continuing Studies, even if they haven't matriculated to the College. Thanks for copying Bobbi Owen on this message. Perhaps she can confirm.
I hope you enjoy the weekend, too. It should be lovely on Sunday.
Best,
Nick

Subject: FW: Curriculum matters
Hi Nick –
Thanks for sharing this with Jennie and Melissa. However both of them are concerned that the wording of your message makes it seem as though all degree seeking Part-time Classroom Studies students are subject to these policies. As I am sure you know, the policy has been applied to students once they matriculated in the College meaning they were accepted into Arts & Sciences rather than being in Part-time Classroom Studies. I was in the meeting of the Distance Learning Task Force when they adopted these recommendations to the Administrative Boards, and there was no mention of changing the way in which the policy was applied. Hence, we will continue to advise our students that these policies do not apply to Part-time Classroom Studies students until they matriculate in the College.
If there has been some additional change, I would appreciate your letting me know about that.
Thanks very much and have a good weekend.
Tim

Subject: Curriculum matters
Dear Jennie and Melissa,
Greetings from the Office of Undergraduate Curricula!
Over the past year there have been several curriculum-related policy changes that I wanted you to be aware of. You may already know about these changes, but it doesn't hurt to double check.

Distance Learning

The Administrative Boards of the College of Arts and Sciences and General College approved the Distance Learning Task Force recommendations, effective immediately. The regulations apply to all new and continuing full-time and part-time degree seeking students, and they refer to CCO, Summer School, Semester Online, and other for-credit UNC-Chapel Hill courses offered completely via similar modalities.

1. The maximum number of credit hours, all of which must be designated UNC-Chapel Hill or Semester Online, that can be counted toward an undergraduate degree in the College of Arts and Sciences is 24. There can be no exceptions to this upper limit.
2. First-semester, first-year students may not enroll in for-credit online courses unless unusual circumstances prevail, nor may first-year students take an online course in the summer prior to matriculation.
3. Full-time undergraduate students may enroll in a maximum of one for-credit online course (currently CCO or Semester Online) per regular semester (after the first semester, if they are a first-year student) and a maximum of two for-credit online courses per summer.
4. Degree-seeking students who are not enrolled may take a maximum of two for-credit online courses in a regular semester or summer.
5. No more than two for-credit online courses in any one department, curriculum, or professional school may count toward a major or minor in the College of Arts and Sciences.
6. Self-Paced courses cannot count toward a degree in the College of Arts and Sciences, other than in exceptional circumstances.
7. It is the responsibility of the Senior Associate Dean for Undergraduate Education, in consultation with the Associate Dean and Director of the Academic Advising Program, to determine whether students in unusual circumstances warrant an exception to these policies.

Faculty Council Resolutions

1. **Resolution 2014-2.** Deadline for Dropping Courses. All incoming first-year students have a two week deadline to drop a course. To help mitigate this change, these students will be allowed to drop a course between the 2nd and 8th week of classes, but they'll receive a WC grade on their internal transcript; students are allowed no more than 16 hours of WC grades during their undergraduate career.
2. **Resolution 2014-3.** The number of courses/credits that a student can "declare" on the Pass/D+/D/Fail system was increased from 11 hours to 16 hours.
3. **Resolution 2014-4.** The minimum cumulative GPA eligibility standard for undertaking a senior honors thesis project in any undergraduate degree program is 3.3. Departments may set a higher GPA standard for courses taken "in the major."
4. **Resolution 2014-5.** New eligibility standards were adopted. The first two standards are the same; they added a third standard requiring students to earn a passing grade in at least two-thirds of attempted semester credit hours each term, including summer school. Please refer to the chart on the Resolution.

Please let me know if you have any questions.
Best wishes,
Nick

>
> Dear Erika and Stephanie,
>
> Thank you very much for your feedback. I am in the process of addressing your concerns and questions. I do have some questions and concerns of my own:
>
> 1. I can amend the language of the proposal to state that retroactive credit for the Latina/o Studies Graduate Certificate cannot be gotten, but what does "cannot be gotten after the fact mean" in our case? Does it mean that any graduate student who has taken courses before the establishment of the Certificate cannot petition to have those courses included even after he or she has declared an interest in the Certificate and submitted a viable application to be accepted once the LS Certificate in approved? Can you clarify exactly what this means for currently interested graduate students who have written letters, etc? I understand that not all Certificates operate this way. It would seem that the Latin American Studies certificate and the Cultural Studies certificate allow for the counting of courses taken before applying for "admission" to the Certificate program.
>
> Can one or both of you provide the exact language you wish us to include in our Certificate and the exact rationale for excluding the work that graduate students who are interested in the Certificate have done? It seems a shame that currently enrolled students who have done their coursework cannot count some or all eligible coursework toward the potential acquisition of the LS Certificate. Please clarify what "after the fact" means. After *what* fact? And why? Thank you. I want to make sure that our Proposal is aligned with the current criteria for Certificates.
>
> 2. I will include the following language from the UNC Program in Latina/o Studies website to explain, once again, the difference between Latina/o Studies and Latin American Studies. Here is the explanation that has been on our website for more than *10 years* and that successfully justified the creation of the undergraduate program in Latina/o Studies currently in existence at UNC Chapel Hill, the first one in the Southeast and now one of three (UNC-Chapel Hill, Duke, and Vanderbilt). The criteria that justified the creation of the undergraduate program should be sufficient for the creation of a graduate certificate. Our focus is what is happening in the United States or in relation to the United States. Latina/o Studies is not just about recent immigrants but also about the peoples and cultural production of peoples who have been within what is today considered the United States for more than 500 years. Latina/o Studies is not area studies (as with Latin American Studies) -- it is ethnic and comparative ethnic studies. it has a very different institutional history of development from Latin American Studies. The overlap is migration, but that is only one aspect of Latina/o Studies subject matter.
>
> Latina/o Studies as a field is constituted out of the transdisciplinary study of Latina/o cultural production and experience in terms of a whole variety of factors. Latinas/os are defined as people of Latin American and/or Iberian heritage living and working **in the United States or U.S.-based** but also moving between the U.S. and the rest of the Americas. Latinas/os are ethno-racially diverse, of African, indigenous, Asian, and European descent; linguistically diverse, speaking varieties of English, Spanish, Portuguese, Spanglish, African, Asian, and indigenous languages; and culturally diverse, coming from more than 35 countries and 5 continents. **Unlike Latin American Studies where the primary focus is on the cultures and experiences of various parts of Latin America (an umbrella term covering Mexico, Central America, the Caribbean, and South America), Latina/o Studies takes as its primary concern the presence of Latin America, Spain, Portugal, and the myriad combinations of Hispanic-Native-African-Asian-and-European non-Hispanic cultures within the borders of the United States.** However, Latina/o Studies is not confined within those borders either to the extent that its subjects of study (and the very creators of the field itself) are in motion and in flux, coming and going, continually crossing borders and boundaries. In this respect, it does share some of the transnational and transcultural scope, momentum, and issues of Latin American Studies **but with its own foci, its own perspectives, that owe a great deal to Ethnic Studies and the knowledge produced in and through various intersecting civil rights movements. Latina/o Studies does not duplicate the work of Latin American Studies; it draws on it and complements it. Ideally, this scholarly relation works in reverse, too. An excellent book on the relation of Latin American and Latina/o Studies in the era of transnationalism and globalization is Critical Latin American and Latino Studies, edited by Juan Poblete (University of Minnesota Press, 2003).**
>
> 3. I see no problem with seeking a letter of support from Terry Rhodes, Senior Associate Dean for Fine Arts and Humanities in the College of Arts and Sciences. Is the logic for getting one from Jonathan Hartlyn that he is the Senior Associate Dean for the Social Sciences and our certificate entails a mixture of the Humanities and the Social Sciences? Please let me know.
>
> 4. I do not understand why I must get a letter from Lou Perez as Latina/o Studies is a separate endeavor from Latin American Studies and has a very different institutional history. Latin American Studies is area studies and Latina/o Studies is ethnic & comparative ethnic studies. Also, the UNC Program in Latina/o Studies is housed in the Department of English & Comparative Literature and not with Latin American Studies. It *never* has been housed with Latin American Studies at UNC Chapel Hill. Most significantly, Latin American Studies has never sought approval for any of their programs from our department of English & Comparative Literature or from our Latina/o Studies program or from me as director since 2004 of the UNC Program in Latina/o Studies, so I do not see why I must seek approval from them. This is not a reciprocal situation. **It would be like asking American Studies to seek approval from European Studies or African American Studies to seek approval from African Studies in order to exist.** That would not be done. It would not be intellectually or politically defensible. So, I do not understand why it is being done in our case. There is no reason for Latina/o Studies to have to seek academic validation from Latin American Studies. Can you please explain to me the rationale behind this request and the request that I seek a letter from Lou Perez in particular? He has never had to ask for a letter from me or from our board for anything. ISA (the Institute for the Study of the Americas) and our Program are different entities and do not duplicate work or programs. Had this question not been settled back in 2004, the UNC Program in Latina/o Studies housed in the Department of English & Comparative Literature would not exist. It does exist and has existed in the Department of English & Comparative Literature for more than 10 years. I apologize if I sound a bit adamant about this request, but it does not align with the fundamental purpose, scope, & institutional positioning of our Latina/o Studies Graduate Certificate Proposal.

5. Can you provide some essential suggestions for metrics you would like to see in terms of self-evaluation of our LS Graduate Certificate Program?

I may have more questions, but these are some of the most fundamental ones that I need answered as I implement your suggestions and address your questions.

Thank you once again for working with me and I look forward to our continued efforts toward producing the final proposal.

All best wishes,

María

Subject: Latina/o Studies Graduate Certificate

Dear Maria,
Thank you again for your efforts to develop a graduate certificate in Latina/o studies. I have now had a chance to read the proposal carefully and have discussed it with Stephanie Schmitt, who will be providing you with her own feedback when she is able. In anticipating issues/questions our administrative boards might raise, I want to share the following concerns with you in hopes that you can revise the proposal before submitting a final version.
1. The proposal states that students who have already met some of the requirements "could claim retroactive credit for the criteria they have met" ("First Term the Certificate Would be Offered"). This will not be possible, given the Graduate School's regulation that certificates will not be offered "after the fact" (See http://handbook.unc.edu/certificate.html). Item 9 correctly acknowledges that "Retroactive credit for the Latina/o Studies Graduate Certificate cannot be gotten."
2. Item 1 explains that the focus of the certificate is on Latina/o populations living within the geographical borders of the United States and that this focus "should not be confused" with Latin American Studies. Faculty members reviewing this proposal will want more help to understand the distinction you are making. Can you add a few more sentences explaining this difference? It would also help to explain how this certificate differs from the graduate certificate in Latin American studies. To assure board members that the proposed certificate is regarded as a positive development among Latin Americanists, especially the Institute for the Study of the Americas, a letter of support from Prof. Louis Pérez would be essential. If he declines to support the proposal, you will want to include an explanation of his reasoning.
3. Requiring a conference paper or academic presentation at UNC-Chapel Hill may be tricky since students do not have much control over whether conference organizers will accept the student's proposal to make such a presentation. This may not be a huge problem, but it could be for some students; if so, then what do the students do? Item 1.3 also should make clear that the "conference paper or academic presentation" should be on a Latina/o Studies topic.
4. Item 9 mentions that admission will be based on a one-page statement of intention. The section would be stronger if it included more detail about the process. When during the academic year will applications be received? Will a call for applications be publicized; if so, how? Will the director of the certificate program will be the only person reviewing applications? What role, if any, do members of the advisory board have in determining admissions?
5. Item 10 does not provide a three-year, semester-by-semester projection of enrollments and course offerings. Members of our boards want to know how many students are expected to be working on this certificate at any one time and how many of the proposed courses will be offered in any one semester or academic year. Information about course offerings is especially needed to demonstrate not only that sufficient graduate courses exist but that they also will be offered with enough regularity to permit students to complete their certificate.
6. Item 12 should list by name and departmental affiliation the members of the certificate program's advisory board (which I assume is distinct from the advisory board for the UNC Program in Latina/o Studies). If the two advisory boards involve the same 20 individuals, it would be good to know how such a large board will function to review applications, advise students, and evaluate the certificate program.
7. The response to Item 13 appears to misunderstand the prompt: Describe the evaluation plans for the Certificate Program. We would want to see explicit plans for evaluating the certificate program, not the students in it. Item 13.5 begins to address program assessment but is too general and mentions only one of several measures that, together, would provide valuable information about how the certificate program is serving students.
As I mentioned in an earlier message, the Administrative Boards of the General College and the College of Arts and Sciences will hold one more meeting this academic year, on April 22. Materials for that meeting's agenda must be sent to me as an email attachment no later than Friday, April 12. Please also request letters of support from Senior Associate Deans Terry Rhodes and Jonathan Hartlyn as well as Prof. Louis Pérez; these letters can be sent to me at ulinde@email.unc.edu. Though revising the application form may be challenging, given this time frame, your efforts to address questions that board members may have will be helpful as the proposal proceeds through the review process.
I will be attending a conference this week but will be back in the office on Monday, March 24. If you have questions or concerns, I'll be glad to talk with you then.
Best wishes,
Erika

2014 University Leadership Education and Development (ULEAD) Program

TO: Deans, Directors and Department Heads

FROM: Felicia A. Washington, Vice Chancellor for Workforce Strategy, Equity, and Engagement

The Office of Human Resources, a unit of the Division of Workforce Strategy, Equity, and Engagement, has opened applications for the University Leadership Education and Development (ULEAD) program. ULEAD targets high-performing, high-potential managers and gives them the tools and skills they need to meet the challenges of the changing higher education landscape and take the next step in their careers. ULEAD emphasizes strategic thinking, communication, innovation, and negotiation.

Pre-program elements of ULEAD begin in late spring, and the program runs through the fall semester. The curriculum includes a series of classes, a 360 multi-rater assessment, peer coaching, and team projects designed to contribute in real and innovative ways to improving university effectiveness. Participants receive the benefit of learning from the world-renowned faculty of the Kenan-Flagler Business School, as well as other highly regarded professionals.

To provide the maximum opportunity for interaction and networking, ULEAD selects 15 representatives from UNC-Chapel Hill and 3 from NC Central University. Participants must be high-performing, highly motivated managers who are directly responsible for at least one supervisor or for a program of significant size and complexity. Applicants are nominated by their managers, and must receive approval from their Dean, Vice Chancellor, or designee.

Applications are being accepted for ULEAD 2014 tbrough April 3.

For more information on ULEAD, including tbe full program schedule and a link to the online application, visit http://hr.unc.edu/training-talent-development/specialized-programs-and-resources/ulead/.

If you have questions, please contact William Frey in the Office of Human Resources at 962-9685 or will_frey@unc.edu.

I am planning on reaching out to another faculty member in either Music or Dramatic Art with basically the same proposal, so any feedback on it, given that change, would be most helpful. I still plan on using Oasis's Will Bosley for his expertise.

Hi Professor Megel,
Dr. Terry Rhodes, Senior Associate Dean for Fine Arts and Humanities is handling the Interdisciplinary Grants this year for the Dean's office and asked that I get in touch with you regarding your email to Dean Gil.
For the team teaching initiative, grants are available to teams of two (2) or more faculty that wish to develop interdisciplinary undergraduate or graduate courses. Proposed course(s) must be offered during the regular academic year and must be taught at least twice. The chairs of the units in which the faculty team members are appointed must approve the course(s) and teaching schedules of the faculty involved. The grants, which may not exceed $16,000, may be used in a variety of ways (e. g., salary and benefits for graduate assistance, supplies, travel expenses, or summer salary and benefits for the faculty). The size of the awards will vary according to the needs of the applicants.
The proposal you have sent for review doesn't appear to involve two (2) or more faculty. Is that correct? I'm not finding any documentation that Will Bosley is coded in the system as a faculty member. Unfortunately, this proposal doesn't fall within the guidelines. If you would like to discuss further, please give me or Dr. Rhodes a call.

COMM 566
MEDIA IN PERFORMANCE
SPRING 2014

TUES/THURS 9:30 – 10:45
Swain 110 & Beasley Media Center 018 Graham Memorial

Co-Instructors

Joseph Megel
Office: Swain 106
843-7067
megel@email.unc.edu
Office Hours: Tues & Thurs
11:00a.m. – 1:30p.m.
or by appointment

Will Bosley
014Graham Memorial

wbosley@unc.edu
Tues- Thurs
1p.m. – 3p.m.
or by appointment

Graduate Research Consultant: Rebecca Nesvet (English)

We also have the privilege to have guest instructors who bring a lot of experience to the class.

Guest Instructor: Dominic Abbenante (Playmakers Rep)
Guest Instructor: Brooks deWetter-Smith (Music)

Class Objective

To introduce the concepts of multi-media theatre and build performance works that marry live and mediated elements toward creating a fully integrated experience.

Course Description

Due to the dynamic nature of technology, this is subject to change.

Over the course of the semester, students will be introduced to the concept of Multimedia Theater, while acquiring the skills and critical approaches to creating multi-media works. This is a project-based course that is designed to bring together the methods and practices of live performance and digital media, both time based and interactive/spontaneous. In this course, interdisciplinary teams will stage performances/experiences. This course will emphasize the technical mechanics of multimedia performances, but will also cover the basics of lighting design, sound design, narrative creation (story and character), dramaturgy and interdisciplinary teamwork. Students will come from different disciplines and bring their various skills to the creative process.

During the course of the semester, students will be required to create four collaborative performance projects in groups/ensembles. Each student will participate in, and contribute to the creation of new works in an ensemble consisting of artists from different interdisciplinary backgrounds. Each group will be required to create, rehearse, and perform short works by group members. Students will also be required to critique the performances of their classmates.

Students will work with a variety of technologies, including, but not limited to: Playback Control and distribution systems (Isadora), Telephony, VOIP, Video Conferencing, HD Video, Digital Projection, LCD Displays, Digital Audio technologies (MaxMSP, Modul8, ProTools), Photoshop, NLE suites, Theatrical Lighting, and PA amplification systems.

Students in this course will learn:

1. How to work in interdisciplinary teams toward a creative vision.
2. The mechanics of various technologies.
3. The importance of story and experience design.

Reading

Thompson, Lynn, Theatre Topics, "Teaching and Rehearsing Collaboration." Vol. 13. 2003

Jones, Robert Edmund. *The Dramatic Imagination*. New York. Routledge, 2004.

Various articles and readings will be added throughout the semester.

Web Research Project

You will be asked to search the web for mediated performance, and choose at least one positive and one flawed example. You will post links to these videos on Sakai (Forum folder entitled Web Research Project) and then write a response on each (a paragraph or two), describing how media is being used to enhance or detract from the story being told. How is the media characterized in the performance?

Some examples, but we encourage you to find your own examples.

Mummenschanz, "Masks."
Mummenschanz, "Ragtime."
Matthew Bourne, "Dorian Gray" and "Edward Scissorhands"

Blue Man Group.
Wooster |Group, "House/Lights."
Robert LePage/Ex Machina, "The Andersen Project"; more here
Peggy Shaw/Clod Ensemble, "Must: The Inside Story"
John Hurt in Samuel Beckett, "Krapp's Last Tape"
Richard Foreman.
"Notre-Dame de Paris"
RadioTheatre NYC
Lucien Bourjeily, "66 Minutes in Damascus."
Natasha Tsakos, "Awake."
Paperhand Puppet Intervention
Basil Twist, "Dogugageshi."

Required Performances

You are required to attend three (out of four) performances, and write a journal entry about your experience of the work and the efficacy of the integration of the media. (How well media serves storytelling)

Tramp's New World written and directed by Rob Jansen,
Media design by Jared Mezzocchi and Shane Glaughlin and
Locally Alex Maness
Swain Hall Studio Six – Jan. 24/25 @ 7:30p.m.

Process Series: *Ice Music*
Composed by Lowell Liebermann, choreographed by Carey McKinley,
videography by Brooks de Wetter-Smith
Thursday, February 13 at 8:00pm
Mandela Auditorium, FedEx Global Education Center

Love Alone by Deborah Salem Smith: A Portrait of Grief and Healing
Playmakers Rep Squared
Invited dress Feb. 25 at 7:30
Paul Green Theater

The Misdirection of Henry Walker adapted by Rob Hamilton
from the book *Mr. Sebastian and the Negro Magician by Daniel Wallace.*
Performance March 27-April 6
Swain Studio Six

Optional Bonus Performance:

Our Country's Good by Timberlake Wertenbaker, directed by Joseph Megel
April 10 – 14
Paul Green Theater

Projects

There are three major projects (two smaller ones) which will comprise the majority of your grade. Each project will be created in a collaborative group. You will be assigned a different group for each project, and you will also be assigned responsibilities in that group.

Introductions: an exercise exploring the use of media in performance
Each student will be asked to bring in a piece of media they like or are drawn to and create a performance introducing themselves and integrating media into their performance. (no letter grade)

Project 1: Performing dramatic text
Student groups will work with an assigned dramatic text and create a multi-media performance based solely upon that text. You must use all the language of the text (or section of the text) that you adapt to the stage. The key to this project will be the full integration of media into the performance, essential to its experience, rather than the sense that the media was "added" on. (5-10 minutes in duration) Your adapted script is due on performance day.

You can choose among these texts which are all available on the web:

Edward Albee, "Zoo Story"
Ray Bradbury, "The Veldt"
Ambrose Bierce, "An Occurrence at Owl Creek Bridge."
Jorge Luis Borges, "La Rosa de Paracelso" ("The Rose of Paracelsus")
Ursula K LeGuin, "The Ones Who Walk Away from Omelas"
Ntozake Shange, "Advice" (Sakai)
Guillermo Reyes "The Gay Little Immigrant That Could" from *Men on the Verge Of a His-Panic Breakdown.*

Project 2: Devising a performance
Based upon an agreed upon idea, theme or concept (using news article, web pieces, interviews, etc.) the group will devise a work, creating a fully scripted experience based upon multiple sources (at least three), and present it to class. (5-10 minutes in duration). A fully written script is due on performance day.

Flash Project: Music as Script
You will have just two weeks to choose a piece of music and create a performance using live and mediated elements. Guest Professor Brooks deWetter-Smith will guide us through the process of creating performance inspired by and derived from music. (5 minutes)

Project 3: Open Choice
Groups may create their own final mediated performance. (10-15 minutes in duration) For this project, students will submit a brief (3-5 pages) paper detailing their personal processes and observations of the group approach to the project. Proposals for final project must be approved by Professors. Our GRC will be available as a resource for research development.

The only content restrictions on these projects are:

1. No Gun Violence
2. No Pornography

[This is not because we object to them on moral or ethical grounds, but rather because these approaches have been done and this course is meant to encourage innovation.]

Journals

Each Group Member must pass in journals February 11, March 6 and April 24. There should be a minimum of one entry per week. These journals are to help us understand your process outside of the classroom, while also asking you to become a conscious multimedia artist inside a collaborative production. Journaling can be a place of brainstorming and wrestling with ideas of performance. Journaling should include reflections and perception on required performance attendance. Journaling can cover anything surrounding the success and pitfalls of your class projects. How is the media affecting the space? Are your collaborators affecting your process? What are you struggling with? What surprises are you encountering? This is your chance to let the instructors understand your individual process, so let us know what you're experiencing/thinking. These will be passed in and returned with comments, so these must be paper based, not electronic.

Papers

A short three to four page paper is due after Project 3, describing the developmental experience and collaborative process.

Final Process paper: Each student will be required to write a six to eight page paper discussing the experience of the creative process, collaboration and what you have learned over the semester. You will reference assigned readings, required performances, and reflections on each project collaboration. You will reflect on the good, the bad and the ugly. First draft will be due April 26. Redrafts will be do at final exam.

Grades

This is a project-based course. Most projects will last roughly four weeks, done in groups picked by the instructors and changing with each assignment. Students will be given a group and an individual grade. Prompt class attendance is mandatory. Each student may have two excused absences a semester. Each unexcused absence will drop your individual grade and may effect your team's success. For this reason it is a good idea to encourage your teammates to attend class. Significant lateness will count as ½ an absence in this calculation. For the semester, grades will be based:

- 15% Attendance, Participation, Assignments (including flash project) & Journals
- 15% Project 1
- 15% Project 2
- 25% Final Project 3
- 15% Final Process Paper
- 15% on instructor/peer evaluations

The project final grade is based upon your progress as well as the final performance.

Communication

Most communication for and about this class will take place either via the course sakai website or by email. Students are required to check their university e-mail and the course website(s) daily.

This course has a public website on which content from this course may be posted. Students will be cited on the public website only with their permission.
www.mediainperformance.web.unc.edu

Space Reservations

Please review these procedures for space reservations. Since we are using Studio Six for our class, you will have special permission to have access to studio six. When making reservations you will need to contact Rob Hamilton as well as the UNC performance coordinator.
http://comm.unc.edu/resources/performance-space-reservations-2/

Social Responsibility: Peer Evaluations and the Use of Your Work

One aspect of this course is that when an individual focuses on the group/society they live/work in, rather than on himself or herself, everybody can benefit. There are two explicit examples of this in MiP: First, you will be asked to evaluate your peers, both to assist in the course grading and to provide feedback to them as human beings. We will cover the details of this in class. Second, you will soon be asked to sign a document

granting UNC, and your peers the right to show your work from MiP (with attribution) for academic and other purposes, including putting together demo reels, for example.

Where and How You Should Work in This Class

This course is likely to have students from art, english, drama, music, social sciences, computer science and other majors. These disciplines all have different standards for how they communicate, how they train their students, and how they evaluate the quality of work. It is *EXTREMELY* important that students in this course be tolerant of the different cultures that are represented. *Based on experiences in the real world with these kinds of interdisciplinary teams, one of our goals is "getting through the semester without a fistfight".* To help meet that goal, there are a few basic standards that all reasonable cultures have in common:

- Be Honest.
- Treat everyone with respect.
- Listen when it's someone else's turn to talk, and actively solicit input from each team member.
- Show up, on time, for any meetings you schedule.

Finally, we expect you to do all work for this course in Swain or the BeasleyMRC. There may be other campus resources that may be leveraged for your project. Details to follow. If you work by yourself, you will be missing the whole point of this course.

Roles within Media in Performance

The goal of Media in Performance (MiP) is to take students with varying talents, backgrounds, and perspectives and put them together to do what they couldn't do alone. The MiP class is divided into assignments or "rounds". At the beginning of each round you will be placed in a different team of four to five students, each with one of the following assigned roles:

- Writer
- Actor/Performer
- Video/Audio/Projection technologist
- Environmental Designer/Scenographer

Every student will be assigned a primary role and a secondary role. We assign roles to guarantee that every team has every skill needed to stage a successful experience. You are responsible for filling the role you are assigned in a team, but you are NOT constrained to working within your assigned role only. There will likely be a few cases where, due to "talent shortages", some students will need to make use of their secondary roles on teams. We will make every effort to make sure no one gets stuck in roles they are not well suited for, but students should expect to have to make occasional sacrifices, and step up to unexpected challenges. Although we hope to allow students the opportunity to perform each role they are qualified for, there is no guarantee that this will be the case. The instructors have final decision-making powers over teams and roles.

MiP Discussion/Calendar

MiP Calendar Revised Jan 6, 2014

Thursday, Jan 9

Instructor Intros, Syllabus Overview, Defining "Mediated"

Assignment: Introduce yourself integrating a piece of media you like. **Due Jan 14**

Assignment: Web Research Project. **Due Jan 23**

Assignment: Group Performance 1. **Due Feb 6**

Tuesday, Jan 21 – Thursday Jan 23

Isadora 2, Projection, Media design & story – An unsteady alliance

Tramps New World Performance Jan 24/25 (7:30p.m.)

Assignment: Read *The Dramatic Imagination.* **Due January 30.**

Tuesday, Jan 28 – Thursday Jan 30

Live Performance, the Script is only the beginning, Lighting Design

Tuesday Feb 4 – Thursday Feb 6

Audio Design, Montage

Proj 1 performances (Feb. 6)

Assignment**:** Read: "Teaching and Rehearsing Collaboration" – On Sakai. Due Feb 11

Tuesday Feb 11 – Thursday Feb 13

Modes & Methods for collaboration, *Process Journals due*

Assignment: Reading on Devised Collaboration tba**. Due Feb 18**

Assignment: Group Performance 2. **Due March 6**

Required Performance: Process Series*: Ice Music* Performance Feb 13 @ 8p.m.

Tuesday Feb 18 – Thursday Feb 20

Media as performer in the room, trusting your collaborators

Assignment: Story Structure tba. **Due Feb. 25**

Tuesday Feb 25 – Thursday Feb 27

Audience-elephants in the room, Story.

Required Performance: *Love Alone* (Feb. 25 - invited dress 7:30p.m.)

Tuesday March 4 – Thursday March 6
Creating Characters with depth,
Proj 2 performances, *Process Journals – (*Due March 6*)*

SPRING BREAK

Tuesday March 18 – Thursday March 20
Writing for Technology, what the Audience doesn't know
Assignment: The Script is the Music. **Due March 27**

Tuesday March 25 – Thursday March 27
Music as script, where do you go? **Music Proj performances**
Assignment: Group Performance 3. **Due April 22**
Misdirection of Henry Walker Performance March 27-April 6

Tuesday April 1– Thursday April 3
The perfect balance of live performance and media

Tuesday April 8– Thursday April 10
Workshop of Final Projects, Discussion of Final Process Paper
Assignment: Final Paper draft one**. Due April 24**

Tuesday April 22– Thursday April 24
Proj 3 performances, *Process Journals due* ***Jury for Public Show***

Wednesday May 1 – Public Performance 4p.m.

FINAL EXAM May 2 @ 8a.m.
Final Process Paper Due
\

Included below, in its entirety, is perhaps one of the best documents I have ever seen on the subject of working in groups. (Either single or interdisciplinary) You will notice it was compiled for an entirely different class at an entirely different university. Don't let this fact diminish these words in ANY way. That particular class at that particular university has provided a great deal of influence in the design of this class. Remember, the story need not be "original" if it is well told.

Tips for Working Successfully in a Group

By Randy Pausch, for the Building Virtual Worlds course at Carnegie Mellon, Spring 1998

Meet people properly. It all starts with the introduction. Then, exchange contact information, and make sure you know how to pronounce everyone's names. Exchange phone #s, and find out what hours are acceptable to call during.

Find things you have in common. You can almost always find something in common with another person, and starting from that baseline, it's much easier to then address issues where you have differences. This is why cities like professional sports teams, which are socially galvanizing forces that cut across boundaries of race and wealth. If nothing else, you probably have in common things like the weather.

Make meeting conditions good. Have a large surface to write on, make sure the room is quiet and warm enough, and that there aren't lots of distractions. Make sure no one is hungry, cold, or tired. Meet over a meal if you can; food ***softens*** a meeting. That's why they "do lunch" in Hollywood.

Let everyone talk. Even if you think what they're saying is stupid. Cutting someone off is rude, and not worth whatever small time gain you might make. Don't finish someone's sentences for him or her; they can do it for themselves. And remember: talking louder or faster doesn't make your idea any better.

Check your egos at the door. When you discuss ideas, immediately label them and write them down. The labels should be descriptive of the idea, not the originator: "the troll bridge story," not "Jane's story."

Praise each other. Find something nice to say, even if it's a stretch. Even the worst of ideas has a silver lining inside it, if you just look hard enough. Focus on the good, praise it, and then raise any objections or concerns you have about the rest of it.

Put it in writing. Always write down who is responsible for what, by when. Be ***concrete***. Arrange meetings by email, and establish accountability. Never assume that someone's roommate will deliver a phone message. Also, remember that "politics is when you have more than 2 people" – with that in mind, always CC (carbon copy) any piece of email within the group, or to me, to **all members** of the group. This rule should ***never*** be violated; don't try to guess what your group mates might or might not want to hear about.

Be open and honest. Talk with your group members if there's a problem, and talk with me if you think you need help. The whole point of this course is that it's tough to work across cultures. If we all go into it knowing that's an issue, we should be comfortable discussing problems when they arise -- after all, that's what this course is really about. Be forgiving when people make mistakes, but don't be afraid to raise the issues when they come up,

Avoid conflict at all costs. When stress occurs and tempers flare, take a short break. Clear your heads, apologize, and take another stab at it. Apologize for upsetting your peers, even if you think someone else was primarily at fault; the goal is to work together, not start a legal battle over whose transgressions were worse. It takes two to have an argument, so be the peacemaker.

Phrase alternatives as questions. Instead of "I think we should do A, not B," try "What if we did A, instead of B?" That allows people to offer comments, rather than defend one choice.

Subject: [FORMAL NOTICE] SACS Reaccreditation

To Deans, Directors, Department Chairs and other senior-level administrators:

UNC-Chapel Hill has begun preparations for seeking reaffirmation by the Southern Association of Colleges and Schools (SACS) in 2016. I'm pleased that Provost Jim Dean will lead this effort, which will be coordinated by Executive Vice Provost Ron Strauss and Assistant Provost Lynn Williford, our SACS Accreditation Liaison.

Accreditation is required to receive federal funding and also provides quality assurance for the public. More importantly, the process gives us an opportunity to identify our strengths as well as areas in which we can improve our effectiveness in carrying out our mission. A full review occurs every 10 years with a Fifth-Year Interim Report required at the midpoint. Our 2012 Fifth-Year Interim Report was well-received by SACS.

Our success in achieving reaccreditation will depend on the expertise and careful, dedicated work of our leadership and many other individuals across our campus. The process involves documenting our compliance with over 90 standards and federal requirements and developing a proposal for a new Quality Enhancement Plan (QEP) to improve student learning.

You will hear more about the SACS reaccreditation process in the coming months. Please support our efforts by responding to requests from the Provost's Office to serve on committees and helping us document our excellent work at Carolina.

Evidently, Bosley attends every session to help with techinical issues (not paid extra -- just as part of his OASIS work?) and Joseph is there every class session as well. I told him that we would review, but that there were issues with labeling Will as a "co-instructor" in that he's not been assigned a faculty appointment.

Hi Professor Megel,
Dr. Terry Rhodes, Senior Associate Dean for Fine Arts and Humanities is handling the Interdisciplinary Grants this year for the Dean's office and

asked that I get in touch with you regarding your email to Dean Gil.
For the team teaching initiative, grants are available to teams of two (2) or more faculty that wish to develop interdisciplinary undergraduate or graduate courses. Proposed course(s) must be offered during the regular academic year and must be taught at least twice. The chairs of the units in which the faculty team members are appointed must approve the course(s) and teaching schedules of the faculty involved. The grants, which may not exceed $16,000, may be used in a variety of ways (e. g., salary and benefits for graduate assistance, supplies, travel expenses, or summer salary and benefits for the faculty). The size of the awards will vary according to the needs of the applicants.
The proposal you have sent for review doesn't appear to involve two (2) or more faculty. Is that correct? I'm not finding any documentation that Will Bosley is coded in the system as a faculty member. Unfortunately, this proposal doesn't fall within the guidelines. If you would like to discuss further, please give me or Dr. Rhodes a call.

Class Objective

To introduce the concepts of multi-media theatre and build performance works that marry live and mediated elements toward creating a fully integrated experience.

Course Description

Due to the dynamic nature of technology, this is subject to change.

Over the course of the semester, students will be introduced to the concept of Multimedia Theater, while acquiring the skills and critical approaches to creating multi-media works. This is a project-based course that is designed to bring together the methods and practices of live performance and digital media, both time based and interactive/spontaneous. In this course, interdisciplinary teams will stage performances/experiences. This course will emphasize the technical mechanics of multimedia performances, but will also cover the basics of lighting design, sound design, narrative creation (story and character), dramaturgy and interdisciplinary teamwork. Students will come from different disciplines and bring their various skills to the creative process.

During the course of the semester, students will be required to create four collaborative performance projects in groups/ensembles. Each student will participate in, and contribute to the creation of new works in an ensemble consisting of artists from different interdisciplinary backgrounds. Each group will be required to create, rehearse, and perform short works by group members. Students will also be required to critique the performances of their classmates.

Students will work with a variety of technologies, including, but not limited to: Playback Control and distribution systems (Isadora), Telephony, VOIP, Video Conferencing, HD Video, Digital Projection, LCD Displays, Digital Audio technologies (MaxMSP, Modul8, ProTools), Photoshop, NLE suites, Theatrical Lighting, and PA amplification systems.

Students in this course will learn:

1. How to work in interdisciplinary teams toward a creative vision.
2. The mechanics of various technologies.
3. The importance of story and experience design.

Reading

Thompson, Lynn, Theatre Topics, "Teaching and Rehearsing Collaboration." Vol. 13. 2003

Jones, Robert Edmund. *The Dramatic Imagination*. New York. Routledge, 2004.

Various articles and readings will be added throughout the semester.

Web Research Project

You will be asked to search the web for mediated performance, and choose at least one positive and one flawed example. You will post links to these videos on Sakai (Forum folder entitled Web Research Project) and then write a response on each (a paragraph or two), describing how media is being used to enhance or detract from the story being told. How is the media characterized in the performance?

Some examples, but we encourage you to find your own examples.

Mummenschanz, "Masks."
Mummenschanz, "Ragtime."
Matthew Bourne, "Dorian Gray" and "Edward Scissorhands"

Blue Man Group.
Wooster |Group, "House/Lights."
Robert LePage/Ex Machina, "The Andersen Project"; more here
Peggy Shaw/Clod Ensemble, "Must: The Inside Story"
John Hurt in Samuel Beckett, "Krapp's Last Tape"
Richard Foreman.
"Notre-Dame de Paris"
RadioTheatre NYC
Lucien Bourjeily, "66 Minutes in Damascus."
Natasha Tsakos, "Awake."
Paperhand Puppet Intervention
Basil Twist, "Dogugageshi."

Required Performances

You are required to attend three (out of four) performances, and write a journal entry about your experience of the work and the efficacy of the integration of the media. (How well media serves storytelling)

Tramp's New World written and directed by Rob Jansen,
Media design by Jared Mezzocchi and Shane Glaughlin and
Locally Alex Maness
Swain Hall Studio Six – Jan. 24/25 @ 7:30p.m.

Process Series: *Ice Music*
Composed by Lowell Liebermann, choreographed by Carey McKinley,
videography by Brooks de Wetter-Smith
Thursday, February 13 at 8:00pm
Mandela Auditorium, FedEx Global Education Center

Love Alone by Deborah Salem Smith: A Portrait of Grief and Healing
Playmakers Rep Squared
Invited dress Feb. 25 at 7:30
Paul Green Theater

The Misdirection of Henry Walker adapted by Rob Hamilton
from the book *Mr. Sebastian and the Negro Magician by Daniel Wallace.*
Performance March 27-April 6
Swain Studio Six

Optional Bonus Performance:

Our Country's Good by Timberlake Wertenbaker, directed by Joseph Megel
April 10 – 14
Paul Green Theater

Projects

There are three major projects (two smaller ones) which will comprise the majority of your grade. Each project will be created in a collaborative group. You will be assigned a different group for each project, and you will also be assigned responsibilities in that group.

Introductions: an exercise exploring the use of media in performance
Each student will be asked to bring in a piece of media they like or are drawn to and create a performance introducing themselves and integrating media into their performance. (no letter grade)

Project 1: Performing dramatic text
Student groups will work with an assigned dramatic text and create a multi-media performance based solely upon that text. You must use all the language of the text (or section of the text) that you adapt to the stage. The key to this project will be the full integration of media into the performance, essential to its experience, rather than the sense that the media was "added" on. (5-10 minutes in duration) Your adapted script is due on performance day.

You can choose among these texts which are all available on the web:

Edward Albee, "Zoo Story"
Ray Bradbury, "The Veldt"
Ambrose Bierce, "An Occurrence at Owl Creek Bridge."
Jorge Luis Borges, "La Rosa de Paracelso" ("The Rose of Paracelsus")
Ursula K LeGuin, "The Ones Who Walk Away from Omelas"
Ntozake Shange, "Advice" (Sakai)
Guillermo Reyes "The Gay Little Immigrant That Could" from *Men on the Verge Of a His-Panic Breakdown.*

Project 2: Devising a performance
Based upon an agreed upon idea, theme or concept (using news article, web pieces, interviews, etc.) the group will devise a work, creating a fully scripted experience based upon multiple sources (at least three), and present it to class. (5-10 minutes in duration). A fully written script is due on performance day.

Flash Project: Music as Script
You will have just two weeks to choose a piece of music and create a performance using live and mediated elements. Guest Professor Brooks deWetter-Smith will guide us through the process of creating performance inspired by and derived from music. (5 minutes)

Project 3: Open Choice
Groups may create their own final mediated performance. (10-15 minutes in duration) For this project, students will submit a brief (3-5 pages) paper detailing their personal processes and observations of the group approach to the project. Proposals for final project must be approved by Professors. Our GRC will be available as a resource for research development.

The only content restrictions on these projects are:

1. No Gun Violence
2. No Pornography

[This is not because we object to them on moral or ethical grounds, but rather because these approaches have been done and this course is meant to encourage innovation.]

Journals

Each Group Member must pass in journals February 11, March 6 and April 24. There should be a minimum of one entry per week. These journals are to help us understand your process outside of the classroom, while also asking you to become a conscious multimedia artist inside a collaborative production. Journaling can be a place of brainstorming and wrestling with ideas of performance. Journaling should include reflections and perception on required performance attendance. Journaling can cover anything surrounding the success and pitfalls of your class projects. How is the media affecting the space? Are your collaborators affecting your process? What are you struggling with? What surprises are you encountering? This is your chance to let the instructors understand your individual process, so let us know what you're experiencing/thinking. These will be passed in and returned with comments, so these must be paper based, not electronic.

Papers

A short three to four page paper is due after Project 3, describing the developmental experience and collaborative process.

Final Process paper: Each student will be required to write a six to eight page paper discussing the experience of the creative process, collaboration and what you have learned over the semester. You will reference assigned readings, required performances, and reflections on each project collaboration. You will reflect on the good, the bad and the ugly. First draft will be due April 26. Redrafts will be do at final exam.

Grades

This is a project-based course. Most projects will last roughly four weeks, done in groups picked by the instructors and changing with each assignment. Students will be given a group and an individual grade. Prompt class attendance is mandatory. Each student may have two excused absences a semester. Each unexcused absence will drop your individual grade and may effect your team's success. For this reason it is a good idea to encourage your teammates to attend class. Significant lateness will count as ½ an absence in this calculation. For the semester, grades will be based:

- 15% Attendance, Participation, Assignments (including flash project) & Journals
- 15% Project 1
- 15% Project 2
- 25% Final Project 3
- 15% Final Process Paper
- 15% on instructor/peer evaluations

The project final grade is based upon your progress as well as the final performance.

Communication

Most communication for and about this class will take place either via the course sakai website or by email. Students are required to check their university e-mail and the course website(s) daily.

This course has a public website on which content from this course may be posted. Students will be cited on the public website only with their permission.
www.mediainperformance.web.unc.edu

Space Reservations

Please review these procedures for space reservations. Since we are using Studio Six for our class, you will have special permission to have access to studio six. When making reservations you will need to contact Rob Hamilton as well as the UNC performance coordinator.
http://comm.unc.edu/resources/performance-space-reservations-2/

Social Responsibility: Peer Evaluations and the Use of Your Work

One aspect of this course is that when an individual focuses on the group/society they live/work in, rather than on himself or herself, everybody can benefit. There are two explicit examples of this in MiP: First, you will be asked to evaluate your peers, both to assist in the course grading and to provide feedback to them as human beings. We will cover the details of this in class. Second, you will soon be asked to sign a document

granting UNC, and your peers the right to show your work from MiP (with attribution) for academic and other purposes, including putting together demo reels, for example.

Where and How You Should Work in This Class

This course is likely to have students from art, english, drama, music, social sciences, computer science and other majors. These disciplines all have different standards for how they communicate, how they train their students, and how they evaluate the quality of work. It is *EXTREMELY* important that students in this course be tolerant of the different cultures that are represented. *Based on experiences in the real world with these kinds of interdisciplinary teams, one of our goals is "getting through the semester without a fistfight".* To help meet that goal, there are a few basic standards that all reasonable cultures have in common:

- Be Honest.
- Treat everyone with respect.
- Listen when it's someone else's turn to talk, and actively solicit input from each team member.
- Show up, on time, for any meetings you schedule.

Finally, we expect you to do all work for this course in Swain or the BeasleyMRC. There may be other campus resources that may be leveraged for your project. Details to follow. If you work by yourself, you will be missing the whole point of this course.

Roles within Media in Performance

The goal of Media in Performance (MiP) is to take students with varying talents, backgrounds, and perspectives and put them together to do what they couldn't do alone. The MiP class is divided into assignments or "rounds". At the beginning of each round you will be placed in a different team of four to five students, each with one of the following assigned roles:

- Writer
- Actor/Performer
- Video/Audio/Projection technologist
- Environmental Designer/Scenographer

Every student will be assigned a primary role and a secondary role. We assign roles to guarantee that every team has every skill needed to stage a successful experience. You are responsible for filling the role you are assigned in a team, but you are NOT constrained to working within your assigned role only. There will likely be a few cases where, due to "talent shortages", some students will need to make use of their secondary roles on teams. We will make every effort to make sure no one gets stuck in roles they are not well suited for, but students should expect to have to make occasional sacrifices, and step up to unexpected challenges. Although we hope to allow students the opportunity to perform each role they are qualified for, there is no guarantee that this will be the case. The instructors have final decision-making powers over teams and roles.

MiP Discussion/Calendar

MiP Calendar Revised Jan 6, 2014

Thursday, Jan 9

Instructor Intros, Syllabus Overview, Defining "Mediated"

Assignment: Introduce yourself integrating a piece of media you like. **Due Jan 14**

Tuesday, Jan 14 – Thursday Jan 16

Tech Orientation, Isadora Basics

Assignment: Web Research Project. **Due Jan 23**

Assignment: Group Performance 1. **Due Feb 6**

Tuesday, Jan 21 – Thursday Jan 23

Isadora 2, Projection, Media design & story – An unsteady alliance

Tramps New World Performance Jan 24/25 (7:30p.m.)

Assignment: Read *The Dramatic Imagination.* **Due January 30.**

Tuesday, Jan 28 – Thursday Jan 30

Live Performance, the Script is only the beginning, Lighting Design

Tuesday Feb 4 – Thursday Feb 6

Audio Design, Montage

Proj 1 performances (Feb. 6)

Assignment**:** Read: "Teaching and Rehearsing Collaboration" – On Sakai. Due Feb 11

Tuesday Feb 11 – Thursday Feb 13

Modes & Methods for collaboration, *Process Journals due*

Assignment: Reading on Devised Collaboration tba**. Due Feb 18**

Assignment: Group Performance 2. **Due March 6**

Required Performance: Process Series*: Ice Music* Performance Feb 13 @ 8p.m.

Tuesday Feb 18 – Thursday Feb 20

Media as performer in the room, trusting your collaborators

Assignment: Story Structure tba. **Due Feb. 25**

Tuesday Feb 25 – Thursday Feb 27

Audience-elephants in the room, Story.

Required Performance: *Love Alone* (Feb. 25 - invited dress 7:30p.m.)

Tuesday March 4 – Thursday March 6
Creating Characters with depth,
Proj 2 performances, *Process Journals – (*Due March 6*)*

SPRING BREAK

Tuesday March 18 – Thursday March 20
Writing for Technology, what the Audience doesn't know
Assignment: The Script is the Music. **Due March 27**

Tuesday March 25 – Thursday March 27
Music as script, where do you go? **Music Proj performances**
Assignment: Group Performance 3. **Due April 22**
Misdirection of Henry Walker Performance March 27-April 6

Tuesday April 1– Thursday April 3
The perfect balance of live performance and media

Tuesday April 8– Thursday April 10
Workshop of Final Projects, Discussion of Final Process Paper
Assignment: Final Paper draft one**. Due April 24**

Tuesday April 22– Thursday April 24
Proj 3 performances, *Process Journals due* ***Jury for Public Show***

Wednesday May 1 – Public Performance 4p.m.

FINAL EXAM May 2 @ 8a.m.
Final Process Paper Due
\

Included below, in its entirety, is perhaps one of the best documents I have ever seen on the subject of working in groups. (Either single or interdisciplinary) You will notice it was compiled for an entirely different class at an entirely different university. Don't let this fact diminish these words in ANY way. That particular class at that particular university has provided a great deal of influence in the design of this class. Remember, the story need not be "original" if it is well told.

Tips for Working Successfully in a Group

By Randy Pausch, for the Building Virtual Worlds course at Carnegie Mellon, Spring 1998

Meet people properly. It all starts with the introduction. Then, exchange contact information, and make sure you know how to pronounce everyone's names. Exchange phone #s, and find out what hours are acceptable to call during.

Find things you have in common. You can almost always find something in common with another person, and starting from that baseline, it's much easier to then address issues where you have differences. This is why cities like professional sports teams, which are socially galvanizing forces that cut across boundaries of race and wealth. If nothing else, you probably have in common things like the weather.

Make meeting conditions good. Have a large surface to write on, make sure the room is quiet and warm enough, and that there aren't lots of distractions. Make sure no one is hungry, cold, or tired. Meet over a meal if you can; food ***softens*** a meeting. That's why they "do lunch" in Hollywood.

Let everyone talk. Even if you think what they're saying is stupid. Cutting someone off is rude, and not worth whatever small time gain you might make. Don't finish someone's sentences for him or her; they can do it for themselves. And remember: talking louder or faster doesn't make your idea any better.

Check your egos at the door. When you discuss ideas, immediately label them and write them down. The labels should be descriptive of the idea, not the originator: "the troll bridge story," not "Jane's story."

Praise each other. Find something nice to say, even if it's a stretch. Even the worst of ideas has a silver lining inside it, if you just look hard enough. Focus on the good, praise it, and then raise any objections or concerns you have about the rest of it.

Put it in writing. Always write down who is responsible for what, by when. Be ***concrete***. Arrange meetings by email, and establish accountability. Never assume that someone's roommate will deliver a phone message. Also, remember that "politics is when you have more than 2 people" – with that in mind, always CC (carbon copy) any piece of email within the group, or to me, to **all members** of the group. This rule should ***never*** be violated; don't try to guess what your group mates might or might not want to hear about.

Be open and honest. Talk with your group members if there's a problem, and talk with me if you think you need help. The whole point of this course is that it's tough to work across cultures. If we all go into it knowing that's an issue, we should be comfortable discussing problems when they arise -- after all, that's what this course is really about. Be forgiving when people make mistakes, but don't be afraid to raise the issues when they come up,

Avoid conflict at all costs. When stress occurs and tempers flare, take a short break. Clear your heads, apologize, and take another stab at it. Apologize for upsetting your peers, even if you think someone else was primarily at fault; the goal is to work together, not start a legal battle over whose transgressions were worse. It takes two to have an argument, so be the peacemaker.

Phrase alternatives as questions. Instead of "I think we should do A, not B," try "What if we did A, instead of B?" That allows people to offer comments, rather than defend one choice.

Subject: [FORMAL NOTICE] SACS Reaccreditation

CORRECTED
March 20, 2014

To Deans, Directors, Department Chairs and other senior-level administrators:

UNC-Chapel Hill has begun preparations for seeking reaffirmation by the Southern Association of Colleges and Schools (SACS) in 2016. I'm pleased to lead this effort, which will be coordinated by Executive Vice Provost Ron Strauss and Assistant Provost Lynn Williford, our SACS Accreditation Liaison.

Accreditation is required to receive federal funding and also provides quality assurance for the public. More importantly, the process gives us an opportunity to identify our strengths as well as areas in which we can improve our effectiveness in carrying out our mission. A full review occurs every 10 years with a Fifth-Year Interim Report required at the midpoint. Our 2012 Fifth-Year Interim Report was well-received by SACS.

Our success in achieving reaccreditation will depend on the expertise and careful, dedicated work of our leadership and many other individuals across our campus. The process involves documenting our compliance with over 90 standards and federal requirements and developing a proposal for a new Quality Enhancement Plan (QEP) to improve student learning.

You will hear more about the SACS reaccreditation process in the coming months. Please support our efforts by responding to requests from the Provost's Office to serve on committees and helping us document our excellent work at Carolina.

With thanks,
James W. Dean, Jr.
Executive Vice Chancellor and Provost

Subject: [academic_eligibility_committee] Eligibility Committee Meeting Notes 3/20/2014

Dear Committee:

Thank you for meeting this morning. Our discussion with Phil Asbury was very helpful. Phil, I have sent you the Outlook meeting invitation for all future committee meetings and hope that you will join us as you your schedule permits.

At today's meeting we discussed the need to meet with the committee stakeholders. Dean Owen is not available for our next scheduled committee meeting. I have thus sent out an invite for next Thursday 3/27 from 10-11 a.m. in Steele Conference Room B.

The agenda items for the stakeholder meeting reflect today's discussion and are as follows:

1. Satisfactory Academic Progress (SAP) and Academic Eligibility Standards are not the same.
2. Concerns about the Faculty Council Resolution:
    a. The chart contains errors and should be amended or removed
    b. The 9 credit hour standard is redundant (can it be removed?)
    c. Does the resolution meet GA FUSS standards for summer?
3. How will withdrawals influence eligibility calculations?
    a. For summer: i.e., Morehead-Cain example – student with a 4.000 who withdraws from one summer course will be on probation for fall.
    b. If a student withdraws from an entire term after census, does the student fail the 2/3 rule?
4. Hardcoding the policy is recommended (our current plan for implementing the code is a "work around")

I will bring copies of these agenda items to the meeting. Kindly let me know if you have any corrections or questions.

Thanks again,
Cynthia

Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

The University held only one summer term in 2011 with two sessions. We designated all course sections offered in the first and second sessions as t
Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

2011 Summer I

The University held only one summer term in 2011 with two sessions. We designated all course sections offered in the first and second sessions as t

Excluded all course sections with no student-athletes

Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University

Did not include course sections with all grades issued as "NR" and/or "NG"

Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)

Did not include lab course sections

Did not include recitation course sections

Did not include correspondence course sections (i.e., course sections 851 and above)

Excluded all course sections with no student-athletes
Students are counted as “Student-Athlete” if they were a student-athlete at anytime during their tenure with the University
Did not include course sections with all grades issued as "NR" and/or "NG"
Did not include any course sections with TREQ as the subject (i.e., subject used for transfer credits)
Did not include lab course sections
Did not include recitation course sections
Did not include correspondence course sections (i.e., course sections 851 and above)

Subject: Costar

Have you had a chance to upload Leah's paper on Costar? You have done Candy's for the image award, I think. I don't think it is super important to have it before the conference. I don't know if she will have her computer and be able to go to her paper, but it could be neat and get the word out about website. We have postcards about the site and they could identify their projects on that if someone were interested.

School-Determined Requirements

CHAPTER 1

In this chapter, we discuss student eligibility requirements that don't require information from the Department's systems. The school determines on its own whether the student meets these eligibility requirements. In some cases, the financial aid office will need to get information from other school offices, such as the admissions office or the registrar, or from other organizations, such as high schools or testing agencies.

REGULAR STUDENT IN AN ELIGIBLE PROGRAM

A person must be enrolled as a *regular student* in an eligible program to receive FSA funds (exceptions are discussed later in this chapter). A regular student is someone who is enrolled or accepted for enrollment in an eligible institution for the purpose of obtaining a degree or certificate offered by the school. The requirement for an eligible program is discussed in *Volume 2, Chapter 2.*

Student eligibility

34 CFR 668.32

See *Volume 2, Chapter 2* for eligible program requirements.

A school must document a student's enrollment in an eligible program at the time of admission, and it must have a system to notify the financial aid office if the student leaves the program. It must also document that an aid recipient is a regular student.

Regular student example

HEA Sec. 484(a)(1), (b)(3), (4);
34 CFR 668.32(a)(1)

Lem Community College (LCC) allows anyone with a high school diploma or the equivalent to enroll in any course. Many of LCC's students do not intend to receive a degree or certificate; they are not regular students. LCC requires those who want to receive a degree or certificate to complete a form stating which degree or certificate they are studying for and to meet periodically with an academic advisor. LCC considers them to be regular students.

▼ *Conditional acceptance.* Some schools admit students provisionally, for example, until they provide further documentation, such as academic transcripts or test scores, or demonstrate an ability to succeed in the program by receiving acceptable grades in program coursework. Typically, the school will limit these students' enrollment in terms of number of courses or enrollment status until they meet the necessary conditions.

Students admitted as conditional are regular students only if the school officially accepts them into the eligible degree or certificate program. The Department does not define official acceptance or admission. If the student is merely allowed to take some courses before being officially admitted to the program, she is not considered a regular student and is not eligible until she is officially admitted.

Trial periods of Enrollment

DCL GEN-11-12

You may offer trial periods of enrollment to allow a student to "try out" a program, without incurring charges or receiving Title IV aid, before deciding to continue the program as a regular student and applying for Title IV aid. For full details, see the above DCL.

Schools may offer a trial or conditional period during which a student attends a program without incurring program charges or receiving FSA funds. If he continues beyond the trial period and enrolls as a regular student, the school can pay him FSA grants for the entire payment period and loans for the period of enrollment.

▼ *Continuing education.* Regular students may receive aid for classes they take in a school's continuing education department as long as the classes apply to their degree or certificate program.

Conditional acceptance examples

1. Jantz University allows students to take graduate courses before they have taken the GRE, but it limits them to no more than three courses and does not admit them into its graduate programs until they have submitted acceptable GRE scores. They aren't regular students, and since the school hasn't admitted them, they aren't eligible for FSA funds.

2. When Park University accepts students into its graduate programs, it requires that the students receive no grade lower than a "B" in the first three courses. During this time, the school considers students to be admitted into the program, so they are eligible for FSA. If, however, students receive a grade lower than a B in any of the first three classes, their admittance will be withdrawn and they then will be ineligible for FSA funds.

Continuing education examples

1. Park University has a continuing education department that offers many on-line (telecommunications) courses that students in other departments of the school may take and that apply to the degree or certificate program in which the students are enrolled. These are regular students who are eligible for FSA funds.

2. Jantz University has a continuing education department that offers many courses. Some students enroll in these courses without being admitted to the university. They are not regular students and are not eligible for FSA funds.

Remedial coursework

34 CFR 668.20

Teacher certification coursework

34 CFR 668.32(a)(1)(iii)

Remedial coursework

Remedial coursework prepares a student for study at the postsecondary level (as opposed to preparatory coursework, which prepares a student for a given program), and a student enrolled solely in a remedial program is not considered to be in an eligible program. If acceptance into an eligible program is contingent on completing remedial work, a student cannot be considered enrolled in that program until she completes the remedial work.

However, if the student is admitted into an eligible program and takes remedial coursework within that program, he can be considered a regular student, even if he is taking all remedial courses before taking any regular courses. You may count up to one academic year's worth of these courses in his enrollment status for federal aid. For the purpose of this limit, that is 30 semester or trimester hours, 45 quarter hours, or 900 clock hours. If the remedial classes are non-credit or reduced-credit, you must determine how many credit hours they are worth to count toward the student's enrollment status (see "Enrollment status" section in this chapter).

A remedial course cannot be below the educational level needed for a student to successfully pursue her program after one year in that course. Also, remedial courses must be at least at the high school level, as determined by the state legal authority, your school's accrediting agency, or the state agency recognized for approving public postsecondary vocational education. If that agency determines that a remedial class is at the elementary level, the school must abide by that determination, and the class cannot be included for FSA purposes. Nor can FSA funds be used for a remedial course that uses direct assessment of student learning instead of credit or clock hours.

You can't use non-credit remedial hours to determine a student's enrollment status if the course is part of a program that leads to a high school diploma or its recognized equivalent. A student is never permitted to receive funds for training or for coursework prior to the completion of high school, even if the GED or high school training is offered at postsecondary schools or is required for the postsecondary program.

Similar to other remedial coursework, a student may receive FSA funds for English as a second language (ESL) courses that are part of a larger eligible program. There are differences though: ESL courses don't count against the one-year limitation on remedial coursework, and they need not be at the secondary school level.

If your school permits a student to enroll in ESL or other remedial courses that don't apply to his degree or certificate, be aware that awarding FSA loans or Pell Grants over a series of semesters for such work can exhaust his eligibility for Pell Grants and/or FSA loans before he completes his program.

Preparatory coursework

A student not enrolled in a degree or certificate program is eligible for Direct Subsidized/Unsubsidized Loans (and a parent may receive Direct PLUS Loans on behalf of a dependent student) for up to one year if she is taking coursework necessary for enrollment in an eligible program. See the discussion under Direct Loans in chapter 6 of this volume.

Teacher certification coursework

A student may receive Federal Work-Study (FWS), as well as Direct Subsidized/Unsubsidized Loans, and Perkins Loans (and a parent may receive Direct PLUS Loans on behalf of a dependent student) if he or she is enrolled at least half time in required teacher certification coursework, even if it does not lead to a degree or certificate awarded by the school. To qualify, the coursework must be required for elementary or secondary teacher certification or recertification in the state where the student plans to teach and must be offered in credit or clock hours (courses using direct assessment in lieu of credit or clock hours are not eligible). An otherwise eligible student may also receive a TEACH Grant. Optional courses that the student elects to take for professional recognition or advancement, and courses recommended by your school but not required for certification, do not qualify. You should document that the courses are required by the state for teacher certification.

A student with a bachelor's degree who is enrolled in a postbaccalaureate teacher certification program can receive a Pell Grant in limited situations. See chapter 6 of this volume.

Students with intellectual disabilities

Students with an intellecual disability (see margin note) can receive funds from the Pell Grant, FSEOG, and FWS programs. They must be enrolled or accepted for enrollment in a comprehensive transition and postsecondary program (as defined in 34 CFR 668.231) for students with intellectual disabilities and must maintain satisfactory academic progress as determined by the school for this program. These students:

- do not have to be enrolled for the purpose of obtaining a degree or certificate, and
- are not required to have a high school diploma or its recognized equivalent.

Except for the statutes governing need analysis, the Secretary has the authority to waive any Pell Grant, FSEOG, FWS, or institutional eligibility provisions necessary to ensure that programs enrolling students with intellectual disabilities are eligible for these three types of federal student aid and that eligible students receive those funds.

Students with intellectual disabilities

HEA Sec. 484(s)
34 CFR 668.230–233
20 U.S.C. 1091, 1140

Students who:

1) have mental retardation or a cognitive impairment characterized by significant limitations in intellectual and cognitive functioning and adaptive behavior as expressed in conceptual, social, and practical adaptive skills; and

(2) are currently or were formerly eligible for special education and related services under the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1401), including students who were determined eligible for special education or related services under the IDEA but were homeschooled or attended private school.

See 668.233(c) for documentation requirements.

ELEMENTARY OR SECONDARY ENROLLMENT

A student enrolled in elementary or secondary school is not eligible for aid from the FSA programs, even if she is simultaneously enrolled in an eligible college program. A student is considered to be enrolled in secondary school if she is pursuing a high school diploma or if she has completed the requirements for a diploma, has not yet received it, and either she is taking college coursework for which her high school gives credit or her high school still considers her to be enrolled there.

An adult pursuing a GED (not a high school diploma) is not considered to be enrolled in secondary school. However, as stated earlier, a student can't get aid for GED training. An adult can take a course offered by a high school, such as a driver's education course, without being considered enrolled there.

Elementary/secondary enrollment

HEA Sec. 484(a)(1)
34 CFR 668.32(b)

Secondary school enrollment examples

Lida is a junior in high school and enrolls in an electronics technician program at Lem Community College (she is above the age of compulsory school attendance for her state and therefore can be admitted as a regular student at LCC). The coursework is offered evenings and weekends, so she can still attend her high school classes. The electronics technician program is an eligible postsecondary program, and Lida will receive a certificate from Lem when she completes the program. However, she is not eligible for aid because she is still enrolled in high school.

Owen, a regular student at Jantz University, decides to take a driver's education course at the local high school during the summer. This does not mean he is enrolled in secondary school.

Academic qualifications

HEA Sec. 484(d)

34 CFR 668.32(e)

Checking foreign diplomas

High school diplomas/transcripts from other countries are acceptable toward the student eligibility general requirement, as long as the diploma is equivalent to a U.S. high school diploma.

Schools can hire a credential evaluation service to do this, or schools may do this on their own if they are qualified to do so. If you pay a service to evaluate a foreign credential for this purpose, you may either pay the cost, or you may have the student pay the cost. You may only have the student pay the cost if you require the evaluation as part of your admission process for all students who have a foreign credential. You cannot require only students who are applying for federal student aid to pay to have their credential evaluated because that would amount to a fee being charged to complete the FAFSA, which is prohibited under HEA 483(a)(6). Because the cost of evaluating a foreign credential must be incurred as a charge of admission prior to enrollment in an eligibile program, it cannot be included in the student's Cost of Attendance (COA).

College diploma mill definition

An entity that:

1. Charges someone a fee and requires him to complete little or no education or coursework to obtain a degree, diploma, or certificate that may be used to represent to the general public that he has completed a program of postsecondary education or training; and
2. Lacks accreditation by an agency or association that is recognized as an accrediting body for institutions of higher education by the Secretary (pursuant to Part H, Subpart 2 of Title IV) or a federal agency, state government, or other organization that recognizes accrediting agencies or associations.

ACADEMIC QUALIFICATIONS

To receive FSA funds, a student must be qualified to study at the postsecondary level. A student qualifies if she:

- has a high school diploma (this can be from a foreign school if it is equivalent to a U.S. high school diploma);
- has the recognized equivalent of a high school diploma, such as a general educational development or GED certificate;
- has completed homeschooling at the secondary level as defined by state law; or
- has completed secondary school education in a homeschool setting which qualifies for an exemption from compulsory attendance requirements under state law, if state law does not require a homeschooled student to receive a credential for their education.

A student may self-certify on the FAFSA that he has received a high school diploma or GED or that he has completed secondary school through homeschooling as defined by state law. If a student indicates that he has a diploma or GED, your school isn't required to ask for a copy (except as noted below), but if your school requires a diploma for admission, then you must rely on that copy of the diploma or GED and not on the student's certification alone.

Checking the validity of a high school diploma

If your school or the Department has reason to believe that the high school diploma is not valid or was not obtained from an entity that provides secondary school education, you must evaluate the validity of the student's high school completion. Students who indicate on their FAFSA that they graduated high school must give the name, city, and state of the high school. FAFSA on the Web will not allow students to skip these items, and it will have a drop-down list of both public and private high schools populated by the National Center for Education Statistics (NCES). Inclusion on the list does not mean that a diploma from the school is valid, nor does exclusion from the list mean that the diploma is invalid. Note also that diplomas from unaccredited high schools can be valid and qualify students to receive FSA funds, as well as to meet college admission standards.

Acceptable documentation for checking the validity of a student's high school completion can include the diploma and a final transcript that shows all the courses the student took. For students who completed their secondary schooling outside the United States, comparable documents can help, as can the services of companies that determine the validity of foreign secondary school credentials. Another resource is the department of education in the state in which the high school is located, if that department has jurisdiction over the high school. Colleges are also free to consult with each other as they develop their procedures for checking the validity of high school diplomas.

The ISIR will not provide any more information than what the student submitted on the FAFSA. We do not expect you to check the high school data for every student against other information obtained by your school during admissions, but if you have reason to believe the high school diploma

is dubious—e.g., the college knows the student bought the diploma or transcript and was required to perform little or no work—you must validate the diploma.

A student's self-certification is not sufficient to validate a high school diploma that is in question. It should be remembered that for a college to be an eligible institution, it must admit as regular students only those with a high school diploma or the recognized equivalent or who are beyond the age of compulsory school attendance. As in other areas of FSA administration, schools have final authority in meeting this requirement. The Department does not plan to have an appeal process or to intervene in reasonable judgments of school administrators, such as a decision to move a high school from a college's acceptable to unacceptable list or a case where one school has different lists than another.

Recognized equivalent of a high school diploma

34 CFR 600.2

Example: Sal enrolls in the bachelor's degree program at Glesser College. She didn't graduate from high school and doesn't have a GED. Glesser looks at her high school records to see if she excelled academically in high school. Because she had a C average, she doesn't meet Glesser's standard for admitting students who excel academically and therefore doesn't have the equivalent of a high school diploma. If she were enrolled in a two-year program that counted as two years of her bachelor's degree, she'd have the equivalent of a high school diploma when she completed that program and would be eligible for FSA for the last two years of her degree program. However, since Sal never went to college before, she is not eligible for federal student aid.

Recognized equivalents of a high school diploma

The Department recognizes several equivalents to a high school diploma:

- A GED;
- A certificate demonstrating that the student has passed a state-authorized examination (for example, the California High School Proficiency Exam) that the state recognizes as the equivalent of a high school diploma (note that certificates of attendance and/or completion are **not** included in this qualifying category);
- An academic transcript of a student who has successfully completed at least a two-year program that is acceptable for full credit toward a bachelor's degree; or
- For a student who enrolls before completing high school, a transcript indicating the student has excelled in high school. The student must no longer be enrolled in high school, must satisfy your school's written policy for admitting such students, and must be starting a program that leads at least to an associate's degree or its equivalent.

Homeschooling

Though homeschooled students are not considered to have a high school diploma or equivalent, they are eligible to receive FSA funds if their secondary school education was in a homeschool that state law treats as a home or private school. Some states issue a secondary school completion credential to homeschoolers. If this is the case in the state where the student was homeschooled, she must obtain this credential to be eligible for FSA funds. She can include in her homeschooling self-certification that she received this state credential.

Homeschooled students

HEA Sec. 484(d)(3),
34 CFR 668.32(e)(4)

An eligible *institution* is defined in part as one that admits as regular students only those who have a high school diploma or equivalent, are beyond the compulsory age of attendance for the school's state, or are dually enrolled at the college and a secondary school.

Homeschooled students and institutional eligibility

HEA Sec. 102(a)(b)(c)

For students who finish homeschooling at a younger age, the Department considers them to be beyond the age of compulsory attendance if your school's state would not require them obtain a secondary completion credential as provided under state law, or if not required by state law, has completed

State regulations (for homeschooling & other purposes)

http://www2.ed.gov/admins/comm/choice/regprivschl/index.html

ATB options limited

Consolidated Appropriations Act 2012
GEN-12-09

a secondary school education in a home school setting that qualifies as an exemption from compulsory attendance under state law. See also *Volume 2, Chapter 1.*

Ability-To-Benefit (ATB) test

New students who do not have a high school diploma, or an equivalent such as a GED, and who did not complete secondary school in a homeschool setting are not eligible for Title IV funds. Such students can no longer become eligible by passing an approved "ability-to-benefit" test or by satisfactorily completing at least six credit hours or 225 clock hours of college work that is applicable to a degree or certificate offered by the student's postsecondary institution.

However, students who were enrolled in an eligible educational program of study before July 1, 2012 may continue to be considered Title IV eligible under either the ATB test or credit hour standards, as discussed in Volume 1, Chapter 1 of the 2011-12 FSA Handbook. To utilize the prior standards, the student need not have received Title IV funds for the enrollment prior to July 1, 2012; merely establishing eligibility in an eligible program is sufficient to continue using the ATB and credit/clock-hour alternatives. A basic method for determining a student's eligibility for ATB grandfathering options is as follows:

- Question 1: Did or will the student attend an eligible program at any Title IV institution prior to July 1, 2012? If yes, the student may use any of the ATB alternatives to become eligible for Title IV, HEA student assistance. If no, continue to Question 2.

- Question 2: Did the student, prior to July 1, 2012, officially register at a Title IV institution, and is the student scheduled to attend an eligible program? If yes, the student may use any of the ATB alternatives to become eligible for Title IV, HEA student assistance. If no, the student may not use the ATB alternatives to become eligible for Title IV, HEA student assistance.

For a student who qualifies to use one of the alternatives through enrollment in an eligible program prior to July 1, 2012, you must document that the student qualifies to use one of the ATB alternatives. Such documentation could include documentation from NSLDS that shows a student's prior receipt of Title IV funds, or a transcript or other receipt that demonstrates enrollment in an eligible program. For more examples on grandfathering alternative methods for establishing Title IV eligibility for students without a valid high school diploma, see Dear Colleague Letter GEN-12-09.

Satisfactory Academic Progress

HEA Sec. 484(c),
34 CFR 668.16(e)
34 CFR 668.32(f)
34 CFR 668.34
The SAP regulations were rewritten in 2010 and appear in the October 29, 2010, *Federal Register*.

SAP new/conflicting information requirements

You must have an established procedure for reviewing and addressing additional information that may have an impact on SAP reviews. For example, if you review SAP at the end of a spring term and receive late notification of a grade change for the previous fall or spring term, you must recheck SAP using that new information.

SATISFACTORY ACADEMIC PROGRESS (SAP)

To be eligible for FSA funds, a student must make satisfactory academic progress, and your school must have a reasonable policy for monitoring that progress. The Department considers a satisfactory academic progress policy to be reasonable if it meets both the qualitative and quantitative criteria explained in this section.

Your SAP policy must be at least as strict as that for students who are not receiving FSA funds at your school, and it must apply consistently to all educational programs and to all students within categories, e.g., full-time, part-time, undergraduate, and graduate students. The policy must require an academic progress evaluation at the end of each payment period for students in programs lasting one year or less. For all other programs, the policy must require annual reviews and must correspond with the end of a payment period. For programs greater than one year, your policy may also call for progress reviews after each payment period. If you review at each payment period, you must review SAP after a summer term if the student attends the summer term.

Grades and pace of completion

Your school's policy must specify that both the quantitative (time-based) and qualitative (grade-based) standards are reviewed at each evaluation point. Each may include a payment period-based standard but are required to include a cumulative standard. You may review SAP more frequently, (for example, monthly), but the more frequent reviews would not replace the review that is required to be conducted at the end of the payment period.

Your policy must specify the *qualitative* standard (grade point average or GPA) that a student must have at each evaluation or, if GPA is not an appropriate qualitative measure, a comparable measure against a norm. In addition, the Higher Education Act requires a specific qualitative review at the end of the student's second academic year. Students enrolled in a program of more than two academic years must have a GPA of at least a "C" or its equivalent or must have an academic standing consistent with your school's graduation requirements.

Having a standing consistent with the requirement for graduation means you could use an escalating GPA instead of a fixed one. For example, if your school uses a 4-point scale, it could require students to have a 2.0 average by graduation but allow their average to be lower earlier in their program. If your policy permits such a progression and a student falls below a C average, you must be able to document that her average is consistent with the academic standard required for graduation. Remedial coursework must be included in the qualitative assessment of Satisfactory Academic Progress. The courses need not be included in the student's GPA; however, your school must have some means of assessing a student's academic progress in remedial coursework.

Your policy must also specify the *quantitative* standard (pace) at which students must progress through their program to ensure that they will graduate within the maximum timeframe, and each academic progress check must measure this. You calculate the pace at which a student is progressing by dividing the total number of hours the student has successfully completed by

Satisfactory progress definitions

Appeal—A process by which a student who is not meeting SAP standards petitions the school for reconsideration of his eligibility for FSA funds.

Financial aid probation—A status a school assigns to a student who is failing to make satisfactory academic progress and who successfully appeals. Eligibility for aid may be reinstated for one payment period.

Financial aid warning—
A status a school assigns to a student who is failing to make satisfactory academic progress. The school reinstates eligibility for aid for one payment period and may do so without a student appeal. This status may only be used by schools that check SAP at the end of each payment period and only for students who were making SAP in the prior payment period they were enrolled in or who were in the first payment period of their program.

Maximum timeframe—
- For an undergraduate program measured in credit hours, a period no longer than 150 percent of the published length of the program.
- For an undergraduate program measured in clock hours, a period no longer than 150 percent of the published length of the program as measured by the cumulative number of clock hours the student is required to complete and expressed in calendar time. (Note that a student in a clock hour program cannot receive aid for hours beyond those in the program; the maximum timeframe applies to the amount of calendar time the student takes to complete those hours.)
- For a graduate program, a period the school defines that is based on the length of the program.

the total number he has attempted. You may include, but aren't required to include, remedial courses when making the quantitative assessment.

Checking a student's pace of completion allows for variations of enrollment status since you look at the percentage of classes successfully completed rather than the number. Also, you can use a graduated completion percentage for each year of a program. For instance, your policy can permit students to complete a lower percentage of their classes in the first academic year but require them to complete an increasing percentage in subsequent years so that they finish their program in time. A student is ineligible when it becomes mathematically impossible for him to complete his program within 150% of the length of the program. In this situation, an appeal would be possible if your school accepts appeals.

Your policy must explain how GPA and pace of completion are affected by course incompletes, withdrawals, and repetitions, and by transfer credits from other schools. At a minimum, transfer credits that count toward the student's current program must count as both attempted and completed hours. You may have reasonable rules for students who initially enroll in specific courses but modify that enrollment within a limited time. However, your policy cannot exclude from the progress review courses in which a student remained past the add/drop period and earned a grade of "W" (or its equivalent), nor can it routinely exclude certain hours attempted, such as those taken during a summer session.

Generally, all periods of the student's enrollment count when assessing progress, even periods in which the student did not receive FSA funds. However, your policy may permit that for students who change majors, credits and grades that do not count toward the new major will not be included in the satisfactory progress determination. You may limit how many times a student can in this way "reset" academic progress by changing majors.

A review of SAP is not complete until both the qualitative and quantitative measures have been reviewed. If a satisfactory progress check shows that a student does not have the required GPA or is not maintaining the required pace, she becomes ineligible for FSA funds unless she is placed on financial aid warning (if your school reviews SAP at the end of each payment period) or probation (after a successful appeal), as explained below. Your policy must describe both of these statuses if it allows for them, and it must provide for notification to students of the results of any evaluation that affects their eligibility for FSA funds.

Financial aid warning

Only schools that check satisfactory progress at the end of each payment period may place students on financial aid warning as a consequence of not making satisfactory progress. A school may use this status without appeal or any other action by the student. Warning status lasts for one payment period only, during which the student may continue to receive FSA funds. Students who fail to make satisfactory progress after the warning period lose their aid eligibility unless they successfully appeal and are placed on probation. Schools do not need to use the warning status; they can instead require students to immediately appeal to be placed on probation.

Grades and SAP: Academic amnesty/renewal

Some schools have academic amnesty/renewal procedures through which a student can apply to have credits attempted and grades earned in previous semesters excluded from the calculation of the student's grade point average. The FSA program regulations make no provision for the concept of academic amnesty or academic renewal. Therefore, a school must always include courses applicable to a student's major (whenever taken) in evaluating a student's satisfactory academic progress (both quantitative and qualitative components). This may, however, be an item that is subject to appeal if the school's policy permits such appeals.

Completed program, no degree

A student who completes the academic requirements for a program but does not yet have the degree or certificate is not eligible for further additional FSA funds for that program.

Retaking a program

Your school may permit a student to receive FSA funds for retaking a program that she has completed before. For more details, see "Eligibility and enrollment status for retaking coursework" sidebar later in this chapter.

Grades for test-based credits

Some schools have developed tests in accord with their academic standards, such as language proficiency tests, which students can take and receive course credit. If such credits count toward the student's program, the grades for those credits count in the student's GPA for all FSA purposes.

Appeals, financial aid probation, and academic plans

All schools may use the financial aid probation as part of their satisfactory progress policy. When a student loses FSA eligibility because he failed to make satisfactory progress, if the school permits appeals, he may appeal that result on the basis of: his injury or illness, the death of a relative, or other special circumstances. His appeal must explain why he failed to make satisfactory progress and what has changed in his situation that will allow him to make satisfactory progress at the next evaluation.

If you determine, based on the appeal, that the student should be able to meet the SAP standards by the end of the subsequent payment period, you may place him on probation without an academic plan. You must review the student's progress at the end of that one payment period, as probation status is for one payment period only. If you determine, based on the appeal, that the student will require more than one payment period to meet progress

Satisfactory Academic Progress Examples: Four-Year Programs

Four-year credit-hour program with appeal: Students in a bachelor's degree program at Glesser College must complete 120 credits and may attempt up to 180 credits (120 x 150%). Glesser reviews a student's academic progress once per year and has a pace of completion of 2/3 or 66.67% of the classes that students attempt; it requires a cumulative GPA of 1.50 after the first year, 1.75 after the second year, and 2.0 after the third year and beyond.

In his first semester, Homer fails one course and withdraws (late in the term) from one of his five courses (15 credits). He takes four courses in his second semester and again fails one and withdraws from one. Though his GPA is 1.71, he isn't making SAP by the end of the first year because he completed only 15 credits out of the 27 he attempted, and two thirds of 27 is 18. Homer applies for an appeal, but because his only reason for not making SAP is that he wasn't able to concentrate on college after being in high school, and because he doesn't offer evidence showing what has changed, the aid administrator at Glesser denies his appeal, and he is ineligible for aid in his second year.

Even if Homer had a more convincing reason for failing at SAP, such as being injured in a car accident, the administrator might still have denied his appeal because she saw little improvement or variation in Homer's pace of completion and did not determine that he would likely be making SAP a year later. If Homer's academic performance improves by the end of his second year so that he is meeting the SAP criteria, he can again receive FSA funds.

Four-year credit-hour program with warning and appeal: Krieger University checks SAP every quarter, which permits it to use financial aid warnings. Students must complete 144 credit hours to receive a BA or BS degree, and they may attempt up to 216 credit hours to complete a program. Students must complete at least half of the credits they attempt in their first year and 75% of their credits in each year after that. They must have no less than a 2.0 GPA at all times.

Gina finishes her first year at Krieger with a 2.25 GPA and completes all of the credits that she attempts, so she is making SAP. After the first quarter in her second year, she again completes all of her classes but poor grades leave her with a 1.94 GPA. The aid administrator places her on financial aid warning for one quarter and informs her that she is not meeting the SAP standards. Gina does poorly in the next quarter as well, and her GPA drops to 1.85. The aid administrator informs her that she can't continue on warning status and needs to submit an appeal explaining why she is failing to make SAP and why she thinks that will change and allow her to again make SAP.

Gina brings the administrator an obituary showing that her mother died recently, which required that she help with family affairs and caused her to lose her focus at school. She asserts that is over now. The administrator places her on probation and suggests that she might take fewer courses. But Gina enrolls full time and again receives poor grades, causing her GPA to drop to 1.80. The administrator informs Gina that she has become ineligible for FSA funds but that she can become eligible again if she raises her GPA to 2.0 or that she can submit another appeal (the latter appeal must be based on a reason different from the first appeal) and this time request to be placed on an academic plan.

Satisfactory Academic Progress Examples: One-Year Programs

One-year credit-hour program with financial aid warning: Carver University has a program that a full-time student can complete in 24 semester hours. Because this is a one-year program, Carver must check SAP every payment period. Their policy is that students must complete the program by the time they have attempted 36 (150% of 24) hours, and the pace of completion is 2/3 or 66.67%. They require a 2.0 GPA at all times.

Suzie plans to take two classes (eight hours) each semester. In the first term, she fails one class and gets a B in the other. Her GPA is 1.5 and her pace of completion is 50%, so Carver automatically places her on financial aid warning and informs her of this. In her second semester, Suzie gets a C (in the class she failed in the first semester) and an A, raising her GPA to 2.25 (Carver counts all grades for retaken classes), and she has completed 75% of her classes, so she restores her aid eligibility.

Clock-hour program with appeal: Frisson Community College has a 900-clock-hour program that normally takes eight months to complete. Frisson allows a maximum timeframe of 12 months to complete the program, and students must complete at least 300 clock hours out of the 450 clock hours of each payment period (four months) and maintain a 2.0 GPA. Because the program is so short and financial aid warnings would delay a rigorous review of students' academic performance until late in (or the end of) the program, Frisson decides not to use warnings. Instead, it requires students to submit an appeal when they are not meeting SAP standards.

After the first four months, Jerry's GPA is 3.0, but he completes only 250 of the 300 clock hours that were required for the payment period. Frisson informs him that he must submit an appeal to continue to receive FSA funds. Jerry tells the administrator that he was diagnosed with depression, which prevents him from doing as much as he'd like. He provides a note from his psychiatrist and affirms that he is doing better since he has gotten regular treatment. The administrator grants his appeal and puts him on financial aid probation since she determines that Jerry can finish the program in the remainder of the year. She drafts a plan that allows him some flexibility in his pace of completion and that requires him to check with her once a month to inform her of his progress in his classes.

After four more months, Jerry's GPA is 3.3, and he has completed 580 hours out of the 600 required under Frisson's published SAP policy, which would normally make him ineligible for FSA funds. But because he is progressing according to his personal SAP plan and is predicted to complete the program within the maximum timeframe, he may still receive aid.

standards, you may place him on probation and develop an academic plan for the student. You must review the student's progress at the end of one payment period as is required of a student on probation status, to determine if the student is meeting the requirements of the academic plan. If the student is meeting the requirements of the academic plan, the student is eligible to receive Title IV aid as long as the student continues to meet those requirements and is reviewed according to the requirements specified in the plan.

Your school determines the process and documentation required for an appeal. It may decide to require more extensive information on an initial appeal and some type of an update statement on a subsequent appeal.The regulations do not specify what must be included in an academic plan. The school and the student should develop a plan that ensures that the student is able to meet the school's satisfactory progress standards by a specific time, though an academic plan could instead take the student to successful program completion. Students must also appeal to change their plan. They must explain what has happened to make the change necessary and how they will be able to make academic progress.

Reestablishing aid eligibility

Your policy, even if it does not permit appeals, must explain how students who are not making satisfactory academic progress can restore their eligibility for FSA funds. Other than when a student is placed on financial aid warning or probation or has agreed to an academic plan as outlined above, he can regain eligibility only by taking action that brings him into compliance with your school's satisfactory progress standards.

The requirement that a student complete a number of credits or enroll for a number of academic periods without receiving FSA funds, or that he interrupt his attendance for one or more academic periods, may be part of your academic progress policy. However, neither paying for one's classes nor sitting out for a term affects a student's academic progress standing, so neither is sufficient to reestablish aid eligibility.

ENROLLMENT STATUS

A student must be enrolled at least half time to receive aid from the Direct Subsidized/Unsubsidized and Direct PLUS Loan programs. The Pell, TEACH Grant, and Campus-Based programs don't require half-time enrollment, except for postbaccalaureate Pell Grants for teacher education, and for Perkins and FWS, for students enrolled in a program for a teaching credential. But enrollment status does affect the amount of Pell a student receives; see *Volume 3, Chapter 3*.

To be enrolled half time, a student must be taking at least half of the course load of a full-time student. Your school defines a full-time workload, but it must meet the minimum standards in the FSA regulations. The definition of full time for FSA purposes can differ from that used for other purposes at your school, such as the definition used by the registrar's office.

Your definition of a full-time workload for a program must be used for all students in that program and must be the same for all FSA-related purposes, including loan deferments. You can't accommodate a student with a learning disability or other handicap by allowing her a full-time enrollment status lower (for Title IV financial aid purposes) than the minimum standard (see the margin note on students with intellectual disabilities).

▼ *Minimum standards for full-time enrollment.* A student's workload may include any combination of courses, work, research, or special studies that your school considers sufficient to classify them as full time. This includes, for a term-based program, one repetition of a previously passed course that is not due to the student failing other coursework. The regulations specify a minimum standard for undergraduate students but not for graduate students. For undergraduates, full-time status must be at least:

- 12 semester hours or 12 quarter hours per academic term in an educational program using a semester, trimester, or quarter system;
- 24 semester hours or 36 quarter hours per academic year for an

Full-time student definition

34 CFR 668.2(b)

Counting non-credit or reduced-credit remedial work in enrollment status

A student can receive aid for a limited amount of remedial coursework that is included as part of a regular program. As long as the student qualifies for aid for remedial courses, you must include the remedial courses in the student's enrollment status.

Some schools give no credit or reduced credit for remedial classes. To determine enrollment status, credit hours for the remedial class should be the same as for the comparable full-credit class. If you're using credit hours, you can compare the number of classroom and homework hours of study that the remedial course requires with the hours required for similar courses offered for full credit. Clock-hour schools should use the number of classroom hours attended in the remedial program.

34 CFR 668.20

Enrollment status for students with intellectual disabilities

Because a comprehensive training program for students with intellectual disabilities can include work for which the school awards no credit, such as audited courses, the school must develop equivalencies in credit hours for such work, just as it must do with non-credit remedial coursework. This will allow the school to determine the enrollment status for students in these programs.

Half-time enrollment

HEA Sec. 428(b)(1)(A),

34 CFR 668.2(b)

A school may choose to define half time as half of the minimum full-time standard established in the regulations even if this is less than half the full-time standard established by the school. For example, if a school sets 14 semester hours as full time, it could use 6 semester hours (one-half of the regulatory full-time minimum of 12) as half time instead of 7.

educational program using credit hours but not using a semester, trimester, or quarter system, or the prorated equivalent for a program of less than one academic year;

- 24 clock hours per week for an educational program using clock hours;
- a series of courses or seminars equaling 12 semester or quarter hours over a maximum of 18 weeks;
- for a program that measures credit hours and uses nonstandard terms, the number of weeks of instruction in the term divided by the number of weeks of instruction in the academic year, multiplied by the number of credit hours in the academic year;
- the work portion of a cooperative education program in which the amount of work performed is equivalent to the academic workload of a full-time student; or
- for correspondence coursework, a courseload commensurate with the full-time definitions listed here, and at least half of that load must be non-correspondence coursework that meets half of the school's requirement for full-time students.

Your school must have a written policy stating what enrollment status the work portion of a co-op program is equivalent to. If it equals a full-time academic load, the co-op student is considered full time regardless of how many credits are earned for the co-op work.

A student taking only correspondence courses is never considered to be enrolled more than half time. See *Volume 3* for more on Pell and enrollment status and correspondence courses.

If a student is enrolled in courses that do not count toward his degree, they cannot be used to determine enrollment status unless they are eligible remedial courses. This means you cannot award the student aid for classes that do not count toward his degree or certificate. Also, federal student aid can be awarded only for learning that results from instruction provided or overseen by the school. It cannot be awarded for any portion of a program based on study or life experience prior to enrollment in the program, or based on tests of learning that are not associated with educational activities overseen by the school.

Eligibility and enrollment status for retaking coursework

34 CFR 668.2(b)

The regulatory definition for full-time enrollment status (for undergraduates) has been revised to allow a student to retake (one time only per previously passed course) any previously passed course. For this purpose, passed means any grade higher than an "F," regardless of any school or program policy requiring a higher qualitative grade or measure to have been considered to have passed the course. This retaken class may be counted towards a student's enrollment status, and the student may be awarded Title IV aid for the enrollment status based on inclusion of the class.

A student may be repeatedly paid for repeatedly failing the same course (normal SAP policy still applies to such cases), and if a student withdraws before completing the course that he or she is being paid Title IV funds for retaking, then that is not counted as his or her one allowed retake for that course. However, if a student passed a class once then is repaid for retaking it and fails the second time, that failure counts as their paid retake, and the student may not be paid for retaking the class a third time. If your school has a policy that requires students to retake all of the coursework for a term in which a student fails a course, any courses retaken that were previously passed in this case are not eligible for Title IV aid.

If a student withdraws from all Title IV eligible courses in the payment period or period of enrollment and continues to attend only the course(s) that he or she is completing or repeating for which he or she may not receive Title IV aid during that period, the student is a withdrawal for Title IV purposes. This is because a student is considered to be attending a Title IV eligible program only if he or she is attending one or more courses in that program for which the student is receiving Title IV, HEA program funds.

STUDENTS CONVICTED OF POSSESSION OR SALE OF DRUGS

A federal or state drug conviction (but not a local or municipal conviction) can disqualify a student for FSA funds. The student self-certifies in applying for aid that he is eligible; you're not required to confirm this unless you have conflicting information.

Drug convictions

HEA Section 484(r)

34 CFR 668.40

A student who self certifies that he or she has a qualifying drug conviction will receive a "C" code and comment code 053, 054, 056, 058, or 052 on his or her SAR and ISIR. See the SAR Comment Code and Text Guide on IFAP.

Convictions only count against a student for aid eligibility purposes (FAFSA question 23c) if they were for an offense that occurred during a period of enrollment for which the student was receiving federal student aid—they do not count if the offense was not during such a period, unless the student was denied federal benefits for drug trafficking by a federal or state judge (see drug abuse hold sidebar). Also, a conviction that was reversed, set aside, or removed from the student's record does not count, nor does one received when she was a juvenile, unless she was tried as an adult.

The chart below illustrates the period of ineligibility for FSA funds, depending on whether the conviction was for sale or possession and whether the student had previous offenses. (A conviction for sale of drugs includes convictions for conspiring to sell drugs.)

	Possession of illegal drugs	Sale of illegal drugs
1st offense	1 year from date of conviction	2 years from date of conviction
2nd offense	2 years from date of conviction	Indefinite period
3+ offenses	Indefinite period	

If the student was convicted of both possessing and selling illegal drugs, and the periods of ineligibility are different, the student will be ineligible for the longer period. Schools must provide each student who becomes ineligible for FSA funds due to a drug conviction a clear and conspicuous written notice of his loss of eligibility and the methods whereby he can become eligible again.

Drug abuse hold

The Anti-Drug Abuse Act of 1988 includes provisions that authorize federal and state judges to deny certain federal benefits, including student aid, to persons convicted of drug trafficking or possession. The Central Processing System maintains a hold file of individuals who have received such a judgment. All applicants are checked against this file to determine if they should be denied aid. This is separate from the check for a drug conviction via question 23; records matching the drug abuse hold file receive a rejected application (reject 19 and comments 009 or 055 on the SAR and ISIR). See the *ISIR Guide* on the IFAP publications page for more information.

A student regains eligibility the day after the period of ineligibility ends (i.e. for a 1st or 2nd offense); or when he or she successfully completes a qualified drug rehabilitation program that includes passing two unannounced drug tests given by such a program. Further drug convictions will make him ineligible again.

Students denied eligibility for an indefinite period can regain eligibility after completing any of the following 3 options:

1) Having the conviction reversed, set aside, or removed from the student's record so that fewer than two convictions for sale or three convictions for possession remain on the record;

2) successfully completing an approved rehabilitation program (as described below, which includes passing two unannounced drug tests from

such a program); or

3) completing two unannounced drug tests which are part of an approved rehab program (the student does not need to complete the rest of the program).

Incarcerated students
HEA Sec. 401(b)(8) and 484(b)(5)
34 CFR 600.2 and 668.32(c)(2)

In such cases, the nature and dates of the remaining convictions will determine when the student regains eligibility. It is the student's responsibility to certify to you that she has successfully completed the rehabilitation program; as with the conviction question on the FAFSA, you are not required to confirm the reported information unless you have conflicting information.

When a student regains eligibility during the award year, you may award Pell Grant, TEACH, and Campus-Based aid for the current payment period and Direct Loans for the period of enrollment.

Standards for a qualified drug rehabilitation program

A qualified drug rehabilitation program must include at least two unannounced drug tests and satisfy at least one of the following requirements:

- Be qualified to receive funds directly or indirectly from a federal, state, or local government program.
- Be qualified to receive payment directly or indirectly from a federally or state-licensed insurance company.
- Be administered or recognized by a federal, state, or local government agency or court.
- Be administered or recognized by a federally or state-licensed hospital, health clinic, or medical doctor.

Conflicting information
34 CFR 668.16(b)(3) and (f)

If you are counseling a student who will need to enter such a program, be sure to advise the student of these requirements. If a student certifies that he has successfully completed a drug rehabilitation program, but you have reason to believe that the program does not meet the requirements, you must find out if it does before paying the student any FSA funds.

INCARCERATED STUDENTS

A student is considered to be incarcerated if she is serving a criminal sentence in a federal, state, or local penitentiary, prison, jail, reformatory, work farm, or similar correctional institution (whether it is operated by the government or a contractor). A student is not considered to be incarcerated if she is in a halfway house or home detention or is sentenced to serve only weekends.

Incarcerated students are not eligible for FSA loans but are eligible for FSEOGs and FWS. They are also eligible for Pell Grants if not incarcerated in a federal or state penal institution. See *Chapter 6* for more information on this and on sex offenders who were incarcerated but are now subject to an involuntary civil commitment.

You may accept the student's written self-certification that he is no longer incarcerated.

CONFLICTING INFORMATION

In addition to reviewing data provided by the Department's application system and NSLDS (as discussed in the rest of this volume), your school must have an internal system to share information relevant to the student's eligibility, such as his or her academic standing. The FSA program regulations require a school to develop an adequate system to ensure the consistency of any data related to a student's application or eligibility for Federal Student Aid regardless of the source of that data. Your school is responsible for reconciling all inconsistencies that it receives with one exception: if the student dies during the award year, you aren't required to resolve conflicting information.

If your school has conflicting information for a student or you have any reason to believe his application is incorrect, you must resolve such discrepancies before disbursing FSA funds. If you discover a discrepancy after disbursing FSA funds, you must reconcile the conflicting information and require the student to repay any aid for which he wasn't eligible, unless he is no longer enrolled for the award year and will not re-enroll. Refer to the *Application and Verification Guide* and *Volume 2, Chapter 3* for more information.

Gaining eligibility examples

Roy enrolls in a one-year certificate program at Carver University. Carver won't officially admit Roy before he provides an academic transcript from his previous school, but it lets him start classes in the fall. Carver receives Roy's transcript after he's attended for a month and officially admits him. He's still in his first payment period when admitted, so he can receive Pell and Campus-Based funds for his entire period of enrollment. The school can also use the program length of one year as the period of enrollment for which Roy can receive a loan.

Chavo is finishing his senior year in high school; his classes end June 4. He decides to start classes in the winter at Carver on January 11. The second payment period begins on May 17. Chavo isn't eligible for aid when he first starts classes at Carver. However, when he becomes eligible after June 4, Carver can disburse Pell and Campus-Based funds to Chavo retroactively for the current payment period that started on May 17 (but not for the payment period that started in January) and a Direct Loan for the current period of enrollment, which does include the payment period that began in January.

CHANGE IN ELIGIBILITY STATUS

A student's eligibility status can change during the award year, which almost always affects whether he can be paid. The special rules for changes in satisfactory academic progress status were discussed in the SAP section. For more details on Pell Grant status changes within and between terms, see *Volume 3, Chapter 3.*

Gaining eligibility

A student who *applies for aid* by filling out a FAFSA is eligible for aid for the entire award year. A student who *gains eligibility* is one who was previously ineligible for some reason. In general, a student who gains eligibility may receive Pell Grant, TEACH Grant, and Campus-Based funds for the entire payment period and Direct Loan funds for the period of enrollment in which he or she becomes eligible.

A student is eligible for Pell Grant, TEACH Grant, and Campus-Based aid for the entire award year, not just the payment period, in which he or she becomes eligible by meeting the requirements for citizenship (including becoming an eligible noncitizen), having a valid Social Security number, or being registered for Selective Service.

Losing eligibility

A student cannot receive any federal student aid after losing eligibility for it unless he/she qualifies for a late disbursement.

Losing eligibility example

Steve is a student at Jantz University. At the end of September, after the start of the fall term, he is convicted in a state court for possession of drugs. It is his first offense, and he isn't incarcerated, but he is ineligible for aid. Jantz gave Steve his first Direct Subsidized loan disbursement at the beginning of the semester in September and was going to disburse a Perkins Loan to him in October. Now Jantz can't disburse the Perkins Loan. Steve doesn't have to pay back the first disbursement of his Direct Loan immediately (though he will have to pay it back once he enters repayment), but he can't receive additional FSA funds until one year elapses or he successfully completes a qualified drug rehabilitation program.

Eligibility Requirements for Specific Educational Programs

See *Volume 2, Chapter 2* for more information on the topics below. Note that a school may not refuse to provide FSA funds to a student because he is enrolled in correspondence or distance education courses unless they are not part of an eligible program.

Correspondence courses

HEA Sec. 484(k)

34 CFR 600.2

34 CFR 668.38

A correspondence or "home study" course is one for which the school provides instructional materials and exams for students who don't physically attend classes at the school and who are studying independently. When a student completes a portion of the materials, he takes the related exam and returns it to the school for grading. If the course uses video cassettes or discs, it is a correspondence course unless the school provides the same instruction to students who physically attend the school that year. Distance education courses are not considered correspondence courses.

A student enrolled in a correspondence course can only receive FSA funds if the course is part of a program that leads to an associate's, bachelor's, or graduate degree; if the program leads to a certificate, the student is not eligible for aid for that course. There are also restrictions regarding cost of attendance for correspondence courses; see *Volume 3, Chapter 2*.

Distance education courses

HEA Sec. 103 and 484(l)

34 CFR 600.2

34 CFR 668.38

Distance education refers to instruction delivered to students who are physically separated from their instructor, to support regular and substantive interaction between student and instructor, whether in real time or through time delay. Technologies used may include the Internet; one-way and two-way transmissions through open broadcast, closed circuit, cable, microwave, broadband lines, fiber optics, satellite, or wireless communications devices; audio conferencing; or, if used in conjunction with the previous technologies, video cassettes, DVDs, and CD–ROMs. If a course does not qualify as a distance education course, it is considered to be a correspondence course.

Students can receive FSA funds for distance education courses under these conditions: the courses must belong to an eligible program, and the school must have the capability to effectively deliver distance education programs as determined by an accrediting agency that is recognized by the Department and that has the evaluation of distance education programs within the scope of its recognition. Short-term certificate programs of less than one year offered via distance education are eligible for FSA funds, and they are not considered correspondence programs.

Students studying abroad

HEA Sec. 484(o)

34 CFR 668.39

A student in a study-abroad program is eligible for aid if the program is approved for academic credit toward her degree by the eligible home school at which she is enrolled as a regular student. The home school must have a written agreement with the foreign school (or with another U.S. school that contracts with the foreign school) or a single written arrangement with a study-abroad organization to represent an agreement between the home school and the foreign school.

Subject: Academic Eligibility Committee

Dear Bobbi -

Phil has been keeping me in the loop about campus discussions regarding academic eligibility, GA standards, and federal Satisfactory Academic Progress. He has suggested that I also become a part of the newly formed committee working on these issues. Can you get me on that committee (in addition to Phil)? I assume you are the appointing authority but am not sure.

Thank you, and have a good weekend.

Shirley

Hi Shirley -
I asked Cynthia to get us together soon - you and me and Phil with her and think that would be a good first step. Chris and I charged the group to oversee implementation (you can certainly be involved) after the Faculty Council action in the fall. As they have proceeded with implementation lots of questions are being raised.
If I remember right, Phil is away for most of the next two weeks but you and Cynthia and I could meet if you wanted this week (I am away Thursday afternoon and Friday).

Here are some possibilities and my office is available -
Monday from 12:30-1:30 or 3-4 or Wednesday from 12-2. I have cc'd Cynthia and will hope to hear back from you both (and Phil if I misunderstood his schedule).

Hi from NYC.

Thank you, Bobbi -- we need to wait until after Phil is available to attend of possible. That would not be until the week after next as he will be gone until Monday, April 7. He will likely say "go ahead" but that is because he is inclined to step away from the risk he perceives in our eligibility policies right now. Confidentially, he has already asked for me to consider replacing him on the Committee and I have said no, because I need his expertise.

If it cannot wait, then surely I will assist but would prefer to wait.

Hi Bobbi:

I am afraid I will have to decline this request too. First Tuesday of the month is faculty meeting. I was waiting for confirmation that we were actually going to meet, and I just got it. Sorry.If you could meet a little earlier in the afternoon, that would work. Faculty meeting starts at 3:30.

On another note, some of the Royster Fellows who taught a FYS are writing an article describing their experience teaching an interdisciplinary class. They are wondering if they can use FYS evaluations in the paper? I assume they mean quotations from the comments section. Is this legal?

Thanks.

Drew

Subject: EPC Resolutions
Attach: Resolution 2014-8 and 2014-9 EPC 03-18-14.docx

Here are Resolutions 2014-8 and 2014-9 enacting latest EPC amendments to Academic Regulations. We will fit these into the agenda for next Friday.
(I think it would be more precise to say in the last sentence of 2014-9 up to 21 hours, but I left it as is.)

Resolution 2014-8. On Requests to Change the Date of a Final Examination

The Faculty Council enacts:

The fifth paragraph of the faculty legislation pertaining to Final Examinations, as published in the Undergraduate Bulletin, is amended as follows:

"A course instructor may, due to highly unusual circumstances, petition for a change in the examination schedule. The instructor must submit the request in writing to his or her chair ~~The petition must be made before the first day of final examinations,~~ no later than the last day of late registration for that term, and it must be cleared by the ~~department head~~ chair and the appropriate dean before consideration by the provost. If the petition is approved, the course instructor assumes responsibility for making special arrangements to give the examination to any student who has a schedule conflict as a result of the change."

This amendment is effective July 1, 2014.

Resolution 2014-9. On Increasing the Maximum Credit Hours in a Semester from 20 to 21

The Faculty Council enacts:

The first paragraph of the faculty legislation pertaining to Academic Course Load, Fall and Spring Semesters, as published in the Undergraduate Bulletin, is amended as follows:

"To meet the minimum graduation requirement of 120 academic hours within the eight-semester limit, students should average 15 hours each semester. However, four-hour foreign language courses and four-hour laboratory science courses often account for course loads of 16 to 18 hours. Students may not enroll in more than 18 academic hours unless they have earned a 3.000 grade point average in the preceding regular semester and have a cumulative 2.500 grade point average. Exceptions require the approval of the student's dean. With approval of their dean, seniors meeting graduation requirements during their final semester in residence may enroll in ~~20~~ 21 academic hours if they have a cumulative and preceding semester grade point average of 2.000."

This amendment is effective July 1, 2014.

Subject: My Recommendation re: eligibility
Attach: Trying to make 3 Policies 1 (FUSS, SAP, 2007 elig rules).docx

---

Hi, Bobbi.
I am trying to see if I could get all 3 policies (GA FUSS, SAP, and 2007 Eligibility Rules) in to 1 comprehensive policy.
Attached is my current version, but it is not quite there yet. It is still out of compliance with SAP for summer. SAP says that you cannot "routinely exclude certain hours attempted, such as those taken during a summer session." The attached policy is routinely excluding summer for the 2/3 rule. I need some more time to think about that part of the policy.
I recommend giving this policy to the committee for a few weeks to work out all of the potential scenarios and possible pitfalls. Then take the policy back to Faculty Council April 24th to request an amendment.
The goal would be to develop one policy that fulfills SAP and the GA FUSS requirements AND includes the most effective parts of the 2007 eligibility rules. I don't think you can come up with this policy unless you give the people who work with eligibility on a day to day basis some time to play with it and see what works and where the policy falls short.
Let me know your thoughts and if you would like to talk.
Thanks, Cynthia

Academic Eligibility

Effective May 13, 2014, all undergraduate students are subject to the same student success standards, as defined below, regardless of when they began college.

Academic status is calculated at the end of the fall semester, the spring semester, and at end of Summer Term I and Summer Term II. Academic status determines eligibility for enrollment in the following fall or spring semester. Upon admission to UNC-Chapel Hill, a student is in Good academic standing. At the end of each enrolled semester, students will have one of the following academic statuses:

Good – eligible to enroll in fall semester, spring semester, and summer terms

Ineligible – ineligible to enroll in fall and spring semesters; eligible to enroll in summer terms but not eligible for federal student aid

Academic Warning – eligible to enroll in fall semester, spring semester, and summer terms; during the fall and spring semesters student is required to complete an academic intervention

Comment [Code1]: Old "probation"

Probation – students can only receive probation by appeal; eligible to enroll in fall semester, spring semester, and summer terms; during the fall and spring semesters student is required to complete an academic intervention

Comment [Code2]: Old "continued probation"

Academic status is determined through three student success standards:

1. **Cumulative Grade Point Average.** Students must maintain a 2.000 cumulative UNC–Chapel Hill grade point average. Students enrolled via Part-time Classroom Studies must maintain a 2.000 cumulative UNC–Chapel Hill grade point average after having attempted nine or more credit hours.

2. **Academic Semester Credit Hours.** Full-time undergraduates must have the following number of academic semester credit hours passed. Transfer credits accepted by the University are counted in semester credit hours passed:

    - 9 academic hours to enter a second semester
    - 24 academic hours to enter a third semester (30 hours is recommended)
    - 36 academic hours to enter a fourth semester
    - 51 academic hours to enter a fifth semester (60 hours is recommended)
    - 63 academic hours to enter a sixth semester
    - 78 academic hours to enter a seventh semester (90 hours is recommended)
    - 93 academic hours to enter an eighth semester
    - Special permission of the dean to enter a ninth semester (105 hours is required)

3. **Ratio of Attempted-to-Completed Semester Credit Hours.** Undergraduates must earn a passing grade in at least 66.67% of attempted semester credit hours *during fall and spring semesters*. (By-Examination and placement credits are excluded from this calculation.)

Comment [Code3]: This is the only place I think we would still be out of compliance with the federal aid regulations because it does NOT include summer terms. Student Aid could run a list of all students in the summer who received aid and do not pass 66.67% of their attempted hours and send them a financial warning letter. - ?

Attempted Semester Credit Hours*	Credit hours that must be completed with a passing grade
1	1
2	1.5
3	2
4	3
5	3.5
6	4
7	5
8	5.5
9	6
10	7
11	7.5
12	8
13	9
14	9.5
15	10
16	11
17	11.5
18	12
19	13
20	13.5
21	14

*as of census date (approximately 10 days into the semester)

WE grades (withdrawal with extending circumstances) DO NOT COUNT in attempted hours

WW grades (withdrawal without extending circumstances) COUNT in attempted hours; students can receive no more than 16 credits hours of WW during their tenure at UNC-Chapel Hill

IN grades (incompletes) COUNT in attempted hours

Students who meet each of the three standards will have an academic status of **Good** and will be eligible to enroll in classroom courses in the following fall or spring semester.

At the end of fall and spring semesters, students who fall short of any of the three standards will have an academic status of **Academic Warning** if they were not already on Academic Warning or Probation in the most-recently-enrolled fall or spring semester.

Comment [Code4]: Old "probation"

Students with extraordinary circumstances, who were on Academic Warning and did not return to Good by the end of the semester, may appeal for one semester of **Probation**.

Comment [Code5]: Old "continued probation"

Students who fall short of any of the three standards at the end of an enrolled fall semester will have an academic status of **Ineligible** if they were on Academic Warning or Probation in that fall semester. Students with an academic status of Ineligible may not enroll in classroom courses in a spring or fall semester. However, they may seek to regain eligibility, as discussed in the section "Restoration of Academic Eligibility."

Students who fall short of any of the three standards at the end of an enrolled spring semester will have an academic status of **Academic Warning – Summer** if they were on Academic Warning or Probation in that spring semester. Students with the status of Academic Warning – Summer are encouraged to attend summer school at UNC-Chapel Hill to restore their academic eligibility. The status of Academic Warning - Summer will change to Ineligible if good academic standing is not restored before the beginning of that year's fall semester.

Students who fall short of any of the three standards at the end of an enrolled Summer Session I will have an academic status of **Academic Warning – Summer** if they were on Academic Warning or Probation in the most recently enrolled spring or fall semester. The status of Academic Warning - Summer will change to Ineligible if good academic standing is not restored before the beginning of that year's fall semester.

Students who fall short of any of the three standards at the end of an enrolled Summer Session II will have an academic status of **Ineligible** if they were on Academic Warning or Probation in the most recently enrolled spring or fall semester.

Students with an academic status of **Ineligible** cannot enroll in classroom courses in fall or spring semesters.

All students, regardless of their academic status, may enroll in summer school; however, students with an academic status of Ineligible are not eligible for federal financial aid.

Hello Bobbi,

Thank you so much for checking in about the Jan. 11th Summer Reading meeting. After talking with Kevin, we will have one more short meeting (30-45minutes) after the meeting on the 11th to facilitate the final and official vote. I anticipate the final meeting will be the week of Jan. 17th. I'll work with Paula and Bettina's staff to identify your availability to attend the meeting the week of Jan. 17th. It's been a pleasure working with this year's committee.

Thanks so much and enjoy the winter break,

Shandol

Hello,

I wanted to confirm that our next Summer Reading Committee Meeting is scheduled for Wednesday, Jan. 11th at 5:30pm. The meeting will be held in the Office of New Student & Carolina Parent Programs located in SASB South, Suite 3318 (SASB South is located on the corner of Manning and Ridge Rd., please take the elevator up to the 3rd floor and our office is located just to your left out of the elevator). We will provide dinner at the meeting.

Each year, News Services prepares a document on the final titles. Kevin asked to share this document (attached) with you in case you find the information helpful.

Last, thanks so much for your patience on the distribution of the books. If you are missing a title, please contact me at schoover@email.unc.edu as soon as possible so that we can make arrangements to get you the book(s). We truly appreciate your time and work to read over the break. We look forward to seeing you on Jan. 11th.

Thanks so much,
Shandol

Cc:	Williford, Lynn E <lynn_williford@unc.edu>; Owen, Bobbi A <owenbob@unc.edu>
Subject:	Resolution
Attach:	FCResolution_1-31-2012.docx

Joe and Andrea –
Lynn Williford and I have made an attempt at crafting "resolution" language with the attached file about credit hours. Hope it is a good basis for you. We are not resolution writers so simply tried to include all the relevant text.
Bobbi

Preface. As outlined in the SACS/COC Policy concerning credit hours "Students, institutions, employers, and others rely on the common currency of academic credit to support a wide range of activities, including the transfer of students from one institution to another." In addition, "...the federal government has relied on credits as a measure of student academic engagement as a basis of awarding financial aid."

Resolved: The University of North Carolina at Chapel Hill abides by the Federal Definition of a Credit Hour (described in *34 CFR 600.2*, effective July 1, 2011) as follows:

> **Federal Definition of the Credit Hour.** For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:
>
> > 1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or
> >
> > 2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.
>
> It is noted that Federal regulations provide institutions with some flexibility to take into consideration alternative delivery methods, types of coursework, measurements of student work, academic calendars, disciplines, and degree levels when determining credits to be awarded for student work. The Federal definition does not dictate particular amounts of classroom time versus out-of-class student work. Credits may be awarded on the basis of documentation of the amount of work a typical student is expected to complete within a specified amount of academically engaged time. The basic requirement is that a credit hour reasonably approximate the minimum amount of work in #1 above.

Further, be it resolved that:
The University of North Carolina at Chapel Hill adopts this credit hour policy for all courses that award academic credit (i.e. any course that appears on an official transcript issued by the University) regardless of mode of delivery including self-paced, online, hybrid, lecture, seminar, laboratory, etc. This credit hour policy applies to all levels of course, (graduate, professional, undergraduate) for all credit-bearing programs (degrees and certificates) taken by degree and/or non-degree seeking students. Schools and programs are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in #1 and #2 above.

Further, be it resolved that:

1. The University of North Carolina at Chapel Hill adheres to the Carnegie unit for contact time (750 minutes for each credit awarded) in its official Academic Calendar
2. Additional guidelines and procedures for implementing and monitoring compliance with Federal requirements and accreditation standards related to credit hours should be

recorded in a University Policy Memorandum (UPM) maintained by the University Registrar.

College of Arts & Sciences
Proposal to Create Large Lecture Classes

The College proposes to pilot large, innovative interdisciplinary courses that involve faculty in other schools as co-teachers and guest lecturers. These courses will enable students and faculty from various schools and departments to focus on major problems of our time. Such courses — team-taught, multidisciplinary, technologically-supported, and research-oriented — will draw on existing strengths in teaching, research, and engagement among our faculty. Where appropriate, they will be designed to make full and effective use of blended teaching-learning approaches and interactive technologies, and to offer advanced graduate students meaningful opportunities to instruct, mentor, and collaborate with undergraduates. Once the courses are implemented, the program will have a substantial impact in addressing the bottlenecks students currently face in registering for their general education requirements. We are proposing eight large lecture courses, each at 3 credit hours and average enrollment of 400 undergraduate students.

The Academic Plan of the University suggests that to reach its potential, Carolina requires a more focused campus-wide approach to generate and make available centrally administered seed funding to seize compelling opportunities for interdisciplinary research, education, and public service.

Carolina long has encouraged effective collaborations on important academic endeavors that cross many traditional disciplinary boundaries. One of the University's strengths is that the faculties at such a large, decentralized research university have mobilized around many diverse topics. Building on this cross disciplinary culture is the most critical building block for setting strategic academic priorities, allocating resources, and enhancing Carolina's national leadership among public universities.

So appropriate to course content, faculty at every level should adopt innovative course formats, including interdisciplinary and inquiry-based seminars that reflect student input. Students seek more opportunities to participate in class and in on-line discussions and to express their ideas and test them in dialogue with other faculty and students.

Examples of proposed courses (8 anticipated):

- Environmental Law and Policy (continued support)
    - In addition to helping students master the basics of several specific legal regimes governing environmental problems in the US (e.g., endangered species, hazardous waste contamination, air pollution) the course is designed to introduce "big" topics, both in law and in policy formation, that shape the contributions and roles law plays in solutions to environmental problems. The course will also introduce some general aspects of the US legal system and give you opportunities to try such lawyering skills as writing a brief, arguing an appeal, and negotiating a multiparty agreement.

- Global Water Resources
    - As an introductory course in water resources, the purpose is to engage students in the major issues about the Earth's freshwater resources, its availability, uses, and natural hazards. Issues to be addressed include uses that are common to developed countries, major urban centers in less well developed countries, and basics of water supply and sanitation in dispersed settlements. The course will be a cross-campus certificate program and/or concentration in CEE in hydrology and water resources. UNC already has existing capacity in upper level courses to develop some kind of concentration. The water course provides a unifying entry point for recruitment and could also be designed to handle a general education requirement as well.

- Inequalities: Causes and Consequences
    - This course could consider issues of socio-economic, ethnic, and political inequality and then compare trends regarding different inequalities in the United States with those in selected other countries and regions of the world. It could draw on faculty from multiple departments including African and Afro-American Studies, Anthropology, Geography, Political Science, Public Policy, and Sociology. Depending on its focus, Asian Studies and History would also be possibilities.

- Entrepreneurship
    - Proposal to be developed

- Global Cinema
    - The courses would focus on film history, theory, and critical analysis as well as overall cinema literacy for today's world. One way the two semesters might be divided is historical. The first semester would cover film from its beginnings to 1945, while the second semester would extend from 1945 to the present.

- Carolina Neuroscience
    - This initiative will build upon the existing strengths in the teaching and research of our faculty and highlight the multidisciplinary and technologically-sophisticated nature of the field. The course would have wide appeal to students from many departments on campus, and serve as the gateway course for the new Neuroscience minor.

Requirements per course:

- 300-400 student enrollment with appropriate faculty and TA support
- 7 Teaching Assistants per course at $10,000 each plus benefits
- 1.5 faculty per class at $90,000 per FTE plus benefits

Total Funding Estimate for 8 courses

- Faculty: $348,000
- TA's: $868,000
- Total required for teaching personnel = **$1,216,000**

I don't think that most of Robert Pitts's comments are related to 6-digit department numbers and wonder where he is getting his info. Nick recently identified a problem re ENVR majors that Chris Derickson helped resolve.

On 2/17/2012 3:55 PM, Norwood, Roberta A wrote:
The suggested agenda and time allocated looks okay to me. The item on department codes may take a little longer than 10 minutes? – or it could be a brief overview with more discussion to take place in the Operational group meeting next month?

The agenda item on department codes is in reference to concerns about reporting with dept. #'s in Student Records which are currently 4 digits and in Finance/HR, dept. #'s will be a total of 6 digits – 4 for the department and 2 for the sub-department.

Here is an excerpt from Robert Pitts describing the issue from his perspective:

… For instance, we were seeing Health Policy & Management students showing up in our Public Health Leadership department, and students who looked like they were getting degrees from the Dean's Office ("School of Public Health"). The descriptions in the census file were off or misleading, OIRA's reports were incorrect, and they couldn't change them because of the lockdown of the census instance. This is compounded by the fact the neither Sherry Rhodes or I have been successful getting a list of what these values are and how they are linked on the student side. It would help if we could have an "academic structure" report or query to help verify the system, our records and OIRA's reports.

Also attached are the suggested SPH department identifiers for the HR/Finance ERP system. Since this is a 6 digit field, the last two digits being sub-department, we have many, many more department identifiers than were ever in the student system. Many of these should not be linked to academic plans, but others should. The only way your group is likely to know which ones go where is to ask us (likely me) to do a cross-walk for you.

For example 460101 (School of Public Health - Dean's Office) would not have enrollment tied to it, but 461001 (Health Policy and Management) would. Another example would be Nutrition which we hope will have 4 department numbers, only 1 of which would have enrollment/academic plans tied to it.

So, the translation of these student side departments to the new Finance/HR departments is pretty critical, and if the old values are not cleaned up first the mapping there will be quite a mess to try to resolve afterwards. I would like to help sort that out if I can get the information to do so (i.e. I need to see the Dept IDs tied to academic plans on the student side, similar to the third file which is my own database reference to academic plan and old department ID).

Reporting, too. 30 minutes?

I will let you create the agenda which might be something like this:

starts at 10:30 -

- reporting strategies, progress and tools, including data warehouse (30 min)

- departmental codes - how those will align between Student Records and HR (10 minutes)

- Support vs project challenges and opportunities (20 minutes)

11:30-12:30 Hobson's demo and lunch
12:30 - 1:00 Q and A

Maybe the reporting is at the end and seques into the Hobson's demo.

Independent Study Task Force

Draft Report February 25, 2012

Task Force Members: Allen Anderson (Music), Deborah Jones (Psychology), Erika Lindemann (English and Comparative Literature and Undergraduate Education), Danielle Heider (Romance Languages (French) and Linguistics, class of 2012), Bobbi Owen, Chair (Dramatic Art and Undergraduate Education), Gary Pielak (Chemistry), Lillie Searles (Biology), and Heather Williams (History).
Additional Review by: James Grinias, GPSF representative to EPC; Lily Roberts, Student Government representative to EPC.

Meetings: September 27, November 10, November 22, 2011; January 12, 2012; together with full Administrative Boards, January 24, 2012; February 23, 2012; with full Administrative Boards, February 28, 2012; ???

Process: In a letter dated September 9, 2012, Karen Gil, Dean of the College of Arts and Sciences, requested that Bobbi Owen, Senior Associate Dean for Undergraduate Education, have the Administrative Board of the College of Arts and Sciences develop guidelines for undergraduate independent study courses and directed readings courses. Bobbi Owen created a task force drawn largely from members of the Board and invited others in order to include departments where independent study was prevalent. Beginning in late September 2011, the group began developing responses to Dean Gil's specific requests to develop guidelines that include the following information:

1. Expectations concerning student assignments and contact hours with the instructor.
2. Conditions under which an active (approved) course may be taught in a different format (such as directed readings, independent study).
3. Conditions under which a course may be taught as a directed readings course before it is submitted for a permanent course number.

The Task Force reviewed the following materials:

- Current protocols related to enrollment and assignment of faculty to independent study courses across the University (College and Professional Schools with undergraduate degree programs);
- Existing policies related to independent study;
- Fall 2011 enrollments for 2,355 students in 421 courses numbered below 700 and broadly defined in the Standard Course Numbering System as independent study;
- Grading patterns for the 421 courses in fall 2011 numbered below 700 and broadly defined in the Standard Course Numbering System as Independent Studies;

Forty-two units responded with copies of their protocols used for independent studies. Among the most elaborate ones, containing carefully articulated guidelines and forms, were protocols from the Departments of Biology, Chemistry, Dramatic Art, History, and Psychology. Many units had a process in place, some more informal than others. Some units did not have a process at all – and in some cases developed one as a result of the request. The protocols provided an excellent basis for developing a

set of minimum guidelines that the task force recommends being used throughout the College of Arts and Sciences (see below).

Existing Policies that Govern Independent Study Courses

1. The UNC Policy Manual, section 400.1.6 (adopted 7/12/1996, amended 07/01/07)

"All UNC campuses must ensure that every course offered for academic credit adheres to the standard of a minimum of 750 scheduled minutes of instructional time or the equivalent per credit hour. The time may include required examination periods, but may not include study days."

Implications: instructional contact minutes for one credit hour = 750 minutes (12.5 hours); for three credit hours = 2250 minutes (37.5 hours)

2. 2012-2013 *Undergraduate Bulletin*

"The University offers a variety of independent study experiences for students. Such courses, including directed readings and research courses for an individual student, are offered for academic credit through departments and curricula. Twelve hours of graded independent study credit may be counted toward graduation, though no more than six hours may be taken in any one semester. Students may participate in formalized programs, or they may make individualized contracts for work under the supervision of a member of the permanent faculty at the department/curriculum level. For information about independent studies courses in their majors, students should consult the director of undergraduate studies in their major department or curriculum."

Implications:

- "Independent study experiences" seems to serve as an umbrella term for "directed readings" and "research courses" for individual students (or at most, small groups of students)
- A standard numbering scheme "typically" should be used for such courses.
- "Twelve hours of graded independent study credit may be counted toward graduation"
- "No more than six hours may be taken in any one semester."
- Such work should be supervised by members of the permanent faculty.
- Individualized contracts are assumed.
- DUSes are sources of information about such courses and how they fit into major/minor requirements.

3. University Policy Memorandum "Standard Course Numbering System" (September 2006) See Appendix A.

- 190, 290, 390 Undergraduate Special Topics Courses
- 195, 295, 395 Undergraduate Research Courses
- 196, 296, 396 Undergraduate Independent Study/Reading Courses
- 199, 299, 399 Undergraduate Experimental Offerings

- 496, 596, 696 Undergraduate/Graduate Independent Study/Reading Courses
- 499, 599, 699 Undergraduate/Graduate Experimental Offerings
- 691H, 692H, 693H, and 694H Senior (*Undergraduate*) Honors Thesis

4. Role of Final Examinations in Independent Study Courses (2011-2012 *Undergraduate Bulletin* p. 397)

- "Undergraduate courses taught on campus must include a final assessment (*i.e., final examination*) unless the provost grants an exception."
- "Chairs (*i.e., heads of instructional units*) must give permission for faculty to use nontraditional examinations, such as a portfolio of a semester's work or a take-home examination."

5. UNC-Chapel Hill Credit Hour Policy (Appendix XXX) Resolution 2012-1. Adopted February 10, 2012

"**Section 1.** The University of North Carolina at Chapel Hill hereby adopts the Federal Definition of a Credit Hour (described in *34 CFR 600.2*, effective July 1, 2011) as follows:

> **Federal Definition of the Credit Hour.** For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates
>
> > 1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or
> >
> > 2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours."

Implications:

- Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit,
- "an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours"

Fall 2011 Enrollments in "Independent Study" Courses

The review of fall 2011 registrations (see Appendix D) did not raise concerns regarding the pattern of enrollments but did reveal inconsistent use of the Standard Course Numbering System. At census, a total of 2,355 students enrolled in 421 courses numbered below 700, broadly defined in the Standard Course Numbering System as Independent Studies. A close examination revealed

- 345 registrations for honors thesis
- 299 registrations for internships
- 3 registration errors (corrected)
- 793 registrations for regular courses
- 472 registrations for undergraduate research
- 242 registrations for service learning
- 201 registrations for traditional independent study

A total of 2,330 grades were awarded, 25 fewer registrations than at census. The grading patterns were consistent with courses for which permission of instructor is required, among them honors thesis, internships, undergraduate research, service learning, and traditional independent study. 179 A, 18 A-, 6 B+, 7 B, 3 B-, 1 C, 1 C-, 6 PS, 5 SP, and 6 IN grades were awarded to the 201 (or 200) registrations for traditional independent study. The regular courses in the analysis had broader distribution. Credits varied from 1-3 hour increments.

Comment [BO1]: This section is new. Please review.

The task force considered whether pass/fail was appropriate for internships, mentored undergraduate research, service learning, and traditional independent study and decided that letter grades were appropriate except when a department wished to provide such a course on a pass/fail basis only. This occurs most commonly with one-hour courses, including internships and service learning. Honors courses cannot be taken pass/fail.

Recommendations

The members of the task force expressed strong support for the benefits of undergraduate research, and honors thesis, and the value of internships and service learning. The recommendations have been carefully crafted to avoid reducing the numbers of students who are able to participate in undergraduate research and graduate with honors or highest honors. At the same time they acknowledge that the growth in the student population at the University of North Carolina at Chapel Hill as well as the inevitable turnover of faculty members make it important to have – and follow – guidelines for undergraduate independent study and directed readings courses.

Comment [BO2]: The preface to the recommendations resulted from the meeting yesterday. Please review.

I. **Standard Course Numbering System**. The Standard Course Numbering System should be followed, not only in the College of Arts and Sciences, but also campus wide.

Comment [BO3]: Order slightly revised to put similar things together.

- All courses that are standard offerings but are currently incorrectly numbered should be renumbered as soon as possible (likely summer 2012). See Appendix D for the full list.
- The sequence of numbers for special topics courses should be expanded to 490, 590, and 690, to accommodate special topics courses that can enroll both undergraduate and graduate students.
- The sequence of numbers currently used for undergraduate and graduate "experimental offerings" should be eliminated and repurposed. These courses are actually special topics courses. Only the departments of anthropology, city and regional planning, and economics use the "experimental numbers" and are willing to renumber their experimental courses as "special topics" courses.

Comment [EL4]: Found this late last week. PLAN 499 also shows 1-21 variable credits. I've written the department to ask that a revision request be submitted to get the credit hours changed.

- A series of numbers should be identified – and used – for Internships and Service Learning (repurposed experimental numbers)
  - Proposed Internship numbers: 299, 499, 699
  - Proposed Service Learning numbers: 199, 399, 599
- The sequence of numbers for Undergraduate Research Courses should be expanded to 495, 595, 695.
- The reserved numbers for undergraduate research do not identify all courses that have a research basis. The ConnectCarolina system of "tagging" courses should be employed to identify all courses that are research intensive, leaving the reserved X95 numbers for those specifically related to undergraduate research.

II. Independent Study Courses. The College of Arts and Sciences should

- Adopt standard usage for the following terms, which are at present often used interchangeably: Traditional Independent Study, Directed Readings, Mentored/Directed Research, Honors Thesis, Internships, Field Work (aka Field Research), Practicum, Service Learning, Special Topics, and Experimental Course (as defined in Appendix B);
- Adopt College-wide guidelines for Independent Studies to include a contract (see draft contract in Appendix C).
  - The contract stipulates the expected number of hours per week of work expected from the student, meeting requirements between course instructor and student, reading and writing assignments and due dates, assessment information describing how the final grade will be determined, a brief (100-word) work plan, and a formal approval process.
  - When a department chair is involved, the Senior Associate Dean is the approver. Departments may add additional information but may not eliminate items from the recommended content of the contract.
  - The Director of Undergraduate Studies, the Chair of a Department or Curriculum, and the Senior Associate Dean have an important responsibility to review the contracts carefully and monitor the numbers of students being supervised by individual faculty members and within established research groups.
- Restrict the number of students a faculty member may supervise during a semester or summer session to two students in traditional Independent Study courses, directed readings, or mentored research, because they count toward service rather than the faculty member's course load. The limitation of two students does not apply to
  - Formal research methods courses, such as ANTH/FOLK 675 Ethnographic Method, GEOL 501 Geological Research Techniques, and LING 422 Research Methods in Phonetics and Laboratory Phonology (see Appendix ??? for a longer list), which are taught according to the standard class time format. A syllabus serves as the contact.
  - Faculty research laboratories, research programs, or established research groups in departments where many students are engaged in a research effort. The contract applies.

Comment [BO5]: Detailed analysis of the course inventory needs to be done to verify that these are the best numbers to use.

Comment [EL6]: I had a note (but don't remember who suggested it) that these courses should be X93, not X99. I still prefer X99 because I think it will involve renumbering fewer courses.

Comment [BO7]: This note got lost in my folder and is now included.

Comment [EL8]: We keep tripping over those history seminars, don't we? I don't think that we should work around them—at least not until we've asked the department if they could work around our proposed sequence, perhaps renumbering their troublesome 395 seminar to 398. That would be simplest.

Comment [BO9]: Should we separate numbers for 3 credit courses such as the history seminars from mentored research?

Comment [BO10]: Revised and reordered. Please review.

Comment [EL11]: Compiling a comprehensive list in the short time remaining would be challenging unless you already have such a list.

- When mentored research is occurring for more than two students outside the department, for example in the Lineberger Comprehensive Cancer Center. The contract applies.
- Directed readings courses, not included in course load, for three to five students pursuing the same reading list. The contract applies.

- Create sections for each faculty member in a department/curriculum supervising traditional independent studies, internships, mentored research, directed readings, etc. so it is clear who is teaching whom. Separate sections for individual faculty members already exist at the dissertation level, making it a familiar strategy to use.
- Restrict offering active (approved) courses as an independent study except in unusual circumstances and follow the established approval process. "Unusual cirecumstances" might include
  - An individual student who needs a specific course for graduation that will not be offered in the immediate future.
  - An individual student prohibited from attending a regularly scheduled specific course needed for graduation due to residing far from campus, such as in another state).
  - Tutorial Independent Study may be utilized for this purpose (see appendix LLL) provided all approvals are obtained, including the Department chair and the Associate Dean (or Director) for Undergraduate Curricula. Registration for a traditional independent study in the department of the student's major, following the College-wide guidelines above, might also be possible.

Comment [EL12]: This phrase is unclear to me. Does it mean that the contract applies? If so, can this be reworded "and with approved contracts?

III. Special Topics. While special topics courses have appropriate uses, permitting new or visiting faculty to offer timely courses or develop new ones, topics courses should be avoided for long-term or repeated use. The College should

- Limit the number of times the same Special Topics course can be offered to no more than two.
- Require secondary titles for all Special Topics courses when they are scheduled in ConnectCarolina and make a course description and/or tentative syllabus available prior to the registration period so that students can make informed choices when selecting courses.
- Consider the implications of including Special Topics courses in requirements for majors and minors; approving courses based on their variable content requires making adjustments to individual students' Tar Heel Tracker.
- Remind departments/curricula that Special Topics courses cannot fulfill General Education requirements because of their variable content (see Criteria For General Education Requirements at http://www.unc.edu/depts/uc/Faculty/GenEd_criteria.pdf).
- Add 490, 590, 690 to the currently reserved numbers 190, 290, 390 for Undergraduate Special Topics Courses. 890-899 already exist for graduate-level Special Topics courses.

Comment [EL13]: "at" gets ride of parentheses within parentheses.

IV. Honors Thesis. Honors Carolina has a long-standing program of senior honors thesis work, allowing students to graduate with honors or highest honors. This program has some inconsistencies that might be addressed with policies similar to those recommended concerning independent studies, using one of the following two models

- In the most widely used model, departments schedule a two-semester senior thesis sequence taught by a member of the faculty who serves as the department's honors director. In the Department of History, for instance, those courses are HIST 691H and 692H. In this model
    - The course size is generally between 10 and 20.
    - A syllabus is provided on the first day of classes.
    - The courses count in the normal course load of the departmental honors director, provided there are at least 10 students registered, but not for the faculty members supervising/advising the students
    - Each student enrolled in the senior thesis courses also has a faculty adviser whose scholarly expertise encompasses the student's research topic. Service as a thesis adviser does not count in faculty course loads.
- In other units, each faculty member supervising an honors thesis is assigned a section of the course(s). In this model
    - The number of students being supervised should be limited to two.
    - A contract similar to the independent study contract should be developed.
    - Supervising/advising an honors thesis should not count in the normal course load of a faculty member.
- In some departments in the sciences, students participate in mentored undergraduate research during the first semester of their senior year after which they are allowed to register for 692H or 694H in the second semester to pursue graduation with honors or highest honors. During the first semester the relevant policies concerning mentored research apply, and in the second semester the relevant policies concerning honors apply.

Comment [BO14]: Is this necessary to include?

Comment [EL15]: I'd include this only if you want to establish a third model. This model sounds similar to the first model, so I'd omit this bullet.

Also, if you keep this, the margin for the bullet needs to be realigned.

V. Limits on Counting Independent Study Credit Toward Graduation. Current policy states that "Twelve hours of graded independent study credit may be counted toward graduation, though no more than six hours may be taken in any one semester" (2011-2012 *Undergraduate Bulletin*). The College of Arts and Sciences should

- Exclude the six-hour registration (two three-credit courses) for honors from this total. Students enrolled full time in supervised student teaching, an approved global study program, or an off-campus internship should also be able to pursue an honors thesis and be able to graduate with honors or highest honors.
- Raise the limit within a fall or spring semester from six to 12 credit hours. The Federal definition of full-time enrollment is 12 credit hours, and some students have course work that takes place completely in off-campus sites (student teaching, off-campus internships, etc.), so theycannot be enrolled in additional on-campus course work.
- This change would have to be approved by Faculty Council via the Educational Policy Committee after which the *Undergraduate Bulletin* would be revised to incorporate this new information.

Comment [BO16]: Leloudis asks: Are senior thesis courses (usually two for a total of six hours) counted in the twelve-hour limit on independent study, or could a student who does a thesis also count up to twelve hours of non-thesis independent study credit toward graduation?

If the former rather than the latter, we'll want to be sure students are aware of the rule very early in their careers. I could imagine students doing three independent study courses before the senior year, deciding to do a thesis, and then finding themselves a course short of graduation because one of the three independent study courses no longer counted.

Comment [EL17]: Something funny is going on in this sentence. Did my revision capture what you intended to say?

VI. Miscellaneous

- The recommendations contained in this report should be provided to the Educational Policy Committee for consideration for adoption campus wide.

Appendix A (note the draft watermark should not be on this page – it is an official document.)

Office of the University Registrar

UPM # 4 Standard Course Numbering System

PURPOSE
Effective Date: September 2006
This memorandum is intended to clarify the standard course numbering system and to point out some variations and limitations.

1. GENERAL PROVISIONS
All courses authorized for degree credit must be numbered according to guidelines established by the University. The numbering schemes may vary by academic unit and may change over time.

2. STANDARD COURSE NUMBERING SYSTEM
a. For all courses in the DN, LW, and MD academic units, and for courses in the GU academic units prior to Fall 2006, the numbers assigned to courses are normally categorized as follows:

- **001-049** Courses primarily for first and second year undergraduates
- **050-099** Courses primarily for third and fourth year undergraduates
- **100-199** Courses for advanced undergraduates and graduate students
- **200-299** Courses for graduate students only
- **300-399** Seminar and Research courses for graduate students
- **400-499** Numbers reserved for special categories of registration
- **600-699*** ** Interdisciplinary courses for undergrad and graduate students
- **700-799*** ** Interdisciplinary courses for graduate students only

****Interdisciplinary numbers are assigned in sequence**. Departments in the DN, LW & MD academic units should contact the University Registrar for the next valid number when establishing these courses. Course must involve two or more campus schools/academic units to qualify for interdisciplinary numbering.

b. For courses in the GU academic unit starting in Fall 2006, the numbers assigned to courses are normally categorized as follows:

- **000-009** Reserved for University Registrar
- **050-089** First-Year Seminars
- **009-399** Undergraduate Level Courses
- **100-189** Introductory Undergraduate Courses*
- **190, 290, 390** Undergraduate Special Topics Courses

- **195, 295, 395** Undergraduate Research Courses
- **196, 296, 396** Undergraduate Independent Study/Reading Courses
- **199, 299, 399** Undergraduate Experimental Offerings
- **400-699** Courses for advanced undergraduates and graduate students
- **496, 596, 696** Undergraduate/Graduate Independent Study/Reading Courses
- **499, 599, 699** Undergraduate/Graduate Experimental Offerings
- **691H, 692H, 693H, 694H** Senior (*Undergraduate*) Honors Thesis
- **697, 698** Capstone Courses (*Undergraduate*)
- **700-994** Graduate only courses
- **799** Graduate Experimental Offering
- **890-899** Graduate Special Topic
- **900-991** Graduate Research
- **992, 993** Master's Thesis
- **994** Doctoral Dissertation
- **995-999** Reserved for University Registrar

* **Foreign Language Courses** should be numbered in this manner: 101,102 and 401, 402 - Beginning level; 203, 204 and 403, 404 - Intermediate level; 601, 602 and 603, 604 - Graduate foreign language requirement

3. AVAILABLE SUFFIXES

a. For all courses in the DN, LW, and MD academic units, and for all courses in GU academic units prior to Fall 2006 the following suffixes may be used:

- **A** - First part of a series of courses, or an advanced course
- **B** - Second part of a series of courses
- **C** - Third part of a series of courses, or correspondence course
- **E** - Denotes elective credit for the Dental School
- **H** - Honors course or course for advanced students
- **L** - Credit-bearing laboratory course
- **M** - Open to majors only
- **R** - Denotes a review course
- **X** - Denotes no graduate credit. Satisfies language reading knowledge examination. For undergraduates, denotes an intense language review course

b. For courses in the GU academic unit starting in Fall 2006 (*with the exception of subject = MBA), the following suffixes may be used:**

- **H** - Honors course or course for advanced students
- **L** - Credit-bearing laboratory course
- **I** - Interdisciplinary course

* **MBA courses** may use any other suffix not listed above, but should not use the suffixes H, L or unless they are used for the specific course content as designated for each suffix.

4. LIMITATIONS ON NUMBERING AND SUFFIXES

Alphabetic suffixes are limited to one. More than one suffix and hyphenated course numbers are incompatible with the system, now in use. A course number should not be re-assigned to another course having a different content until at least five years after the previous course was taught. This is to prevent the same course number from appearing twice on a student's record representing two different courses.

DRAFT

Appendix B (Draft IV: 2-9-12)

Independent Study Definitions

I. Independent Study

Independent study provides a mechanism for students to work as individuals (or in small groups) on a specific topic with a faculty member for academic credit. Topics are focused rather than general and are not usually pursued in scheduled courses. A final written paper (the standard used for courses fulfilling General Education requirements is a minimum of ten pages), report, or artistic product is required. At least three hours of independent work per week is required for each unit of credit.

Independent study is of five types: Traditional Independent Study, Directed Readings, Directed and/or Mentored Undergraduate Research, Internship/Practicum, and Honors Thesis.

1. *Traditional Independent Study:* The pursuit of a topic of interest by a student (generally a major or minor), under the supervision of a faculty member with expertise related to the topic.
   Examples:
   HIST 296 Independent Studies in History
   MATH 290 Directed Exploration in Mathematics
   JOUR 296 Individual Study

2. *Directed Readings:* Systematic analysis of an approved bibliography in the student's area of interest.
   Examples:
   ART 396 Directed Readings in Art History
   BIOL 296 Directed Reading
   SLAV 244 Directed Readings in a Slavic Language

   Examples combining 1 and 2:
   ANTH 396 Independent Reading or Study in Anthropology
   SOC 396 Independent Study and Reading

3. *Directed and/or Mentored Undergraduate Research:* Investigative, fact-finding work supervised by a faculty mentor and conducted outside a conventional classroom—in a laboratory, in field sites, in a library, or in other places in which research activity takes place.
   Examples:
   CHEM 395 Research in Chemistry for Undergraduates
   FREN 396 Research for Advanced French Students
   GEOG 295 Undergraduate Research in Geography
   PSYC 395 Independent Research

4. *Internship/Practicum:* Supervised work experience designed to give students first-hand knowledge of the practice of a discipline. In a practicum students are likely to be supervised by

faculty members or academic practitioners; in an internship students tend to work under the direction of a permanent employee in a corporation, governmental entity, or other institution outside the university. In either case, students participate in a supervised, reflective experience that encourages them to integrate classroom and work experience in ways that help them develop a professional identity.

Examples:
AMST 397 Internship
COMP 392 Practicum
DRAM 395 Professional Theatre Laboratory
HIST 297 Internship in History

5. *Honors Thesis:* Two semesters of independent research for which the student, under the guidance of a full-time faculty supervisor, is responsible for designing and completing a research project or creative activity in accordance with the guidelines established by Honors Carolina and the academic unit.

II. Service Learning

Service Learning is a teaching and learning strategy that integrates meaningful, supervised community service, usually off campus, with instruction and reflection to enrich the learning experience, teach civic responsibility, and strengthen communities.

Examples:
COMM 668H The Ethnographic (Re)Turn
DRAM 288 Theatre for Social Change: Latina/o Performance Traditions
HBHE 610 APPLES Alternative Spring Break
PSYC 294 Service Learning in Psychology

III. Special Topics

A placeholder course that permits departments and curricula to offer specialized courses for which there may be only occasional demand or to develop new courses. In the latter case, the department/curriculum should apply for a permanent number for the new course after it has been offered twice as a Special Topics course. A Special Topics course may also be known as an "Experimental Course."

Examples:
ANTH 199 Experimental Course in Anthropology I
ENTS 490 Special Topics in Environmental Science and Studies
FOLK 690 Studies in Folklore
GEOL 390 Special Problems in Geology
HIS 490 Special Topics in History
PSYCH 499 Current Topics in Psychology

Appendix D

Comment [BO22]: This information may not be needed

Course Registrations in Fall 2012 for Independent Study Courses

<Insert table of the 2500 courses>

Notes Concerning table:

Courses Carrying 12 or More Credit Hours

All of the courses that currently show 1-21 hours of variable credit are in the process of being revised to no more than 12 credit hours. People didn't notice the credit hours and told me that the courses are never offered for that much credit in any case.

School of Nursing: "Clinical contact time varies by study option and course but averages approximately 12 to 16 hours per week." However, no undergraduate NURS course carries more than eight hours credit.

School of Education: SOE offers several 12-credit courses, but they constitute full-time work in schools.

- 467 Planning for Teaching in the Middle Grades Lab (1–12).
- 502 Preschool/Kindergarten Student Teaching and Seminar (3–12).
- 518 Student Teaching in Elementary Grades (12).
- 569 Teaching Internship (12).

School of Public Health: Melissa Hobgood in the School of Public Health plans to submit CRAS transactions to make the following courses 1-12 hours of variable credit.

- BIOS 397 Readings in Biostatistics (1–21).
- BIOS 540 Problems in Biostatistics (1–21).

Department of Computer Science: COMP 393 Internship (6–12). This is a course for the Co-op program, in which students work off campus in RTP for a summer and a semester.

DRAFT

Appendix E

Formal research methods courses (partial listing)

- **AFAM 395 Field Research Methods in African Studies (3).** Recommended preparation, AFRI 101. This course will prepare students to conduct field research in Africa by looking at how to write a proposal, how to get research permission, and how to collect qualitative data.
- **ANTH 675 Ethnographic Method (FOLK 675) (3).** Intensive study and practice of the core research methods of cultural and social anthropology.
- **BMME 400 Introduction to Biomedical Engineering (1).** Seminar introducing students to biomedical engineering research, including literature search, faculty presentation of ongoing research, and student discussion of research papers.
- **CLSC 630 Education and Research in Clinical Laboratory Science (3).** Majors only. Introduction to the basic principles of clinical laboratory education including objectives, learning formats, test development, and clinical teaching. Introduction to research methods and designs used in clinical laboratory medicine.
- **FREN 500 Research Methods in French and European Studies (3).** Provides training in research methodology either for a B.A. honors or M.A. thesis topic related to contemporary European studies. Students will learn to conceptualize an original research project and to identify and assess the current intellectual debates in their chosen areas of research.
- **GEOL 501 Geological Research Techniques (2).** Permission of the instructor. An introduction to methods of obtaining, analyzing, and presenting geologic and paleontologic data.
- **IDST 196: Introduction to Research (1).** The work must involve at least four hours per week of mentored research in a campus research laboratory. P/F only.
- **LING 422 Research Methods in Phonetics and Laboratory Phonology (3).** Prerequisite, LING 200, 520, 523, or SPHS 540. Focuses on the practical skills required to carry out basic experiments in speech production or perception. Includes training in a general-purpose programming language (such as Perl) for automating repetitive tasks, experiment-control software, audio stimulus manufacture and editing, palatography, aerodynamic measurements, and other laboratory techniques relevant to student interests.

DRAFT

Appendix XXX

Resolution 2012-1. On Adopting the Federal Definition of the Credit Hour.

The Faculty Council enacts:

Section 1. The University of North Carolina at Chapel Hill hereby adopts the Federal Definition of a Credit Hour (described in *34 CFR 600.2*, effective July 1, 2011) as follows:

> **Federal Definition of the Credit Hour.** For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:
>
> > 1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or
> >
> > 2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Section 2. This credit hour policy applies to all courses at all levels (graduate, professional, and undergraduate) that award academic credit (i.e. any course that appears on an official transcript issued by the University) regardless of the mode of delivery including, but not limited to, self-paced, online, hybrid, lecture, seminar, and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

Section 3.

1. The University of North Carolina at Chapel Hill adheres to the Carnegie unit for contact time (750 minutes for each credit awarded) in its official Academic Calendar
2. Additional guidelines and procedures for implementing and monitoring compliance with Federal requirements and accreditation standards related to credit hours should be recorded in a University Policy Memorandum (UPM) maintained by the University Registrar.

Comment: As outlined in the SACS/COC Policy concerning credit hours "Students, institutions, employers, and others rely on the common currency of academic credit to support a wide range of activities, including the transfer of students from one institution to another." In addition, "…the federal government has relied on credits as a measure of student academic engagement as a basis of awarding financial aid."

It is noted that Federal regulations provide institutions with some flexibility to take into consideration alternative delivery methods, types of coursework, measurements of student work, academic calendars, disciplines, and degree levels when determining credits to be awarded for student work. The Federal definition does not dictate particular amounts of classroom time versus out-of-class student work. Credits may be awarded on the basis of documentation of the amount of work a typical student is expected to complete within

DRAFT

a specified amount of academically engaged time. The basic requirement is that a credit hour "reasonably approximate" the minimum amount of work specified in Section 1, above.

Tutorial Independent Study

DRAFT

UNC
THE WILLIAM AND IDA FRIDAY
CENTER FOR CONTINUING EDUCATION

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

THE FRIDAY CENTER
CAMPUS BOX 1020
CHAPEL HILL, NC 27599-1020

fridaycenter.unc.edu

Tutorial Independent Study

For UNC-Chapel Hill undergraduate courses not offered by Self-paced Courses, it may be possible to enroll in a tutorial arrangement through Credit Programs for Part-time Students. If special circumstances warrant, a student and instructor of a regular University course may adapt the course to a Self-paced Courses format. This arrangement is subject to the approval of the department chairperson, the appropriate dean, and Credit Programs for Part-time Students in the Friday Center for Continuing Education.

In Tutorial Independent Study, the student and faculty member agree on a program of learning activities that can be completed away from the University campus (although occasional conferences with the instructor may be arranged). Approval for Tutorial Independent Study is granted only in instances where a learning experience of high quality can be achieved through distance education methods.

The tutorial option makes it possible for students to continue their education despite special difficulties created by factors such as employment, travel, or illness. It is not recommended for students who can arrange to take the course through other means, and it may not be used as a means of attending a course offered on campus. The courses for which Tutorial Independent Study is appropriate are those having a clearly defined content rather than those bearing such titles as "readings," "topics," "seminar," or "individual study."

In order to enroll in a course through Tutorial Independent Study, the enclosed application form must be completed and signed by the student and the instructor. The signatures of the department chairperson and dean of the school or college offering the course must also be obtained before the form is returned to the Self-paced Courses office. To be considered eligible for NC tuition rates, the student must also complete and send in the enclosed Residency Status form. When final approval is given, the student should complete a Self-paced Courses application and submit it along with the tuition (current tuition rates) dependent on a student's NC residency status. An education and technology fee will also be charged. Upon payment of the tuition and fee, the course work agreed upon by the student and instructor may begin.

The policies governing Tutorial Independent Study are the same as those for regular courses in the Self-paced Courses program as described in the Self-paced Courses catalog. The instructor and student should be completely familiar with these policies before reaching a Tutorial Independent Study agreement.

In addition, the instructor is asked to become acquainted with the procedures outlined in the Self-paced Courses *Instructor's Guide*. Please note that the reporting of grades and credit is the responsibility of Self-paced Courses. The instructor should contact Self-paced Courses (919-962-1134, 800-862-5669) to find out about compensation for instruction. In instances where the tutorial student is submitting the assignments directly to the instructor, half of the payment to the instructor is initiated at the time the student enrolls and half at the time the student completes the course. If assignments are submitted and returned through the Self-paced Courses office, payment is made on a per-assignment basis and is determined by the number of assignments in the course.

9/26/2011

Tutorial Independent Study Application Form

The University of North Carolina at Chapel Hill

This form should be submitted to Adelecture Programs and Services at the Friday Center for Continuing Education.

Student's Name _____

TO THE INSTRUCTOR:

Once the Tutorial Independent Study application has been fully approved and the student has formally enrolled, you will receive a copy of this form. The student then may begin the correspondence course of study and submit assignments. You will receive assignments either directly from the student or from the Independent Studies office, depending on which arrangement has been specified. Payment will be made to you according to the schedule indicated above. Enclosed with the copy of this form will be a stamped-paid "Instructor's Cover Sheet" to be used for reporting to Independent Studies the student's exam grades and final course grade. A re-examination is required, though you are free to report the student's actual grade. Submit all grades to Independent Studies.

We encourage all instructors, and particularly those who are new at the Independent Studies program, to consult the information sheet accompanying the application. In addition, a copy of the Independent Studies "Instructor's Guide" and to Student Independent Studies if you have questions.

Subject: Online courses proposals for summer 2013
Date: Thu, 22 Mar 2012 14:01:38 -0400
From: Yopp, Jan Johnson <jan_yopp@unc.edu>
To: Owen, Bobbi A <owenbob@unc.edu>

Hi, Bobbi,

Since you are getting close to the end of the SACS report, I decided to go ahead and share with you the proposals for courses to be converted to online for summer 2013. There are four undergraduate courses from the College (one from JOMC and one graduate level from EXSS). The four that would be of interest to you are:

* ANTH 238, Human Ecology of Africa, to be taught by Colin Thor West. Satisfied SS Gen Ed.

*ASIA 333, The Mahabharata: Remembered and Reimagined, to be taught by Pamela Lothspeich. This course satisfied an EE but as online and asynchronous, I say it would not unless it became a hybrid that would actually have time for students to do their performances

*ARAB 150, Introduction to Arab Cultures, to be taught by Sahar Amer. Course is required for the Arab Cultures majors and satisfies BN and LA.

*SPAN 260: Introduction to Spanish and Spanish American Literature, to be taught by Raul Brown.

All have the approval of their department chairs.

Let me know if you see any problems. I plan to send out letters accepting these proposals no later than Tuesday, March 27.

These faculty, following our usual procedure, will take two courses on how to teach online, one in May and the other in June, offered through CFE.

Thanks. Hope your desk is getting even more cleared of SACS's odds and ends.

> I've linked all of the syllabuses except the honors thesis. I have a question about that one. Neither of the honors thesis documents you forwarded mention anything about the amount of time/credit hours that should be spent on the thesis project. However, I did find the attached document that includes this statement:
>
> > Most academic units require that senior honors thesis students participate in a two-course sequence (6 credit hours) designed to guide them through the process of research and project development. When such courses are offered, they must be taught by a member of the faculty. Academic units with few senior thesis candidates may organize their students' work through independent study. In either case, it is incumbent upon academic units to ensure that senior honors thesis students devote the equivalent of 6 credit hours to their projects.

Erika -
Hope you do not read this until tomorrow. It is even dated tomorrow. I went though the comments I had, including Gary's, and turn it over to you before sharing with the entire group. The fonts are all the same now and I believe that the appendixes are in the correct order (but please check them as well). Whew (and the SACS stuff is proceeding as well as can be expected)!

Independent Study Task Force

Draft Report March 19, 2012

Task Force Members: Allen Anderson (Music), Deborah Jones (Psychology), Erika Lindemann (English and Comparative Literature and Undergraduate Education), Danielle Heider (Romance Languages (French) and Linguistics, class of 2012), Bobbi Owen, Chair (Dramatic Art and Undergraduate Education), Gary Pielak (Chemistry), Lillie Searles (Biology), and Heather Williams (History).
Additional Review by: James Grinias, GPSF representative to EPC; Lily Roberts, Student Government representative to EPC.

Meetings: September 27, November 10, November 22, 2011; January 12, 2012; with full Administrative Boards, January 24, 2012; February 23, 2012; with full Administrative Boards, February 28, 2012; March 15, 2012, with full Administrative Boards, April 17, 2012, etc.

Process: In a letter dated September 9, 2012, Karen Gil, Dean of the College of Arts and Sciences, requested that Bobbi Owen, Senior Associate Dean for Undergraduate Education, have the Administrative Board of the College of Arts and Sciences develop guidelines for undergraduate independent study courses and directed readings courses. Bobbi Owen created a task force drawn largely from members of the Board and invited others in order to include departments where independent study was prevalent. Beginning in late September 2011, the group began developing responses to Dean Gil's specific requests to develop guidelines that include the following information:

1. Expectations concerning student assignments and contact hours with the instructor.
2. Conditions under which an active (approved) course may be taught in a different format (such as directed readings, independent study).
3. Conditions under which a course may be taught as a directed readings course before it is submitted for a permanent course number.

Executive Summary

The Task Force reviewed protocols being used at the University related to enrollment and assignment of faculty to independent study courses across the University and existing policies concerning independent studies. The members also reviewed enrollments and grades for the Fall 2011 semester for students enrolled in course sections broadly defined in the Standard Course Numbering System as independent study for undergraduates.

The members of the Task Force expressed strong support for the benefits of independent study, undergraduate research, and honors thesis, and the value of internships and service learning. The Task Force provides detailed recommendations concerning independent studies, special topics courses, use of the standard course numbering system, and honors theses and suggests that many of the recommendations contained in the full report would be useful campus wide. The recommendations are not intended to reduce the numbers of students who are able to participate in undergraduate research and graduate with honors or highest honors – which are valuable experiences at the heart of the mission of research universities. At the same time they acknowledge that the growth in the undergraduate student population at the University of North Carolina at Chapel Hill as well as the

inevitable turnover of faculty members make it important to have – and follow – guidelines for undergraduate independent studies.

The recommendations respond to the charge from Dean Gil and include the following

Independent Study Courses. Expectations concerning student assignments and contact hours with the instructor should be recorded on a formal contract for independent studies that should be made available electronically. It would stipulate the same information that appears on a syllabus for a regular course (effort expected, meetings with the instructor, assignments and due dates, grading information, etc.) and have a formal approval process. Limits should be placed on the number of independent studies each faculty member should supervise in each term and active (approved) courses should not be taught in an independent study or directed readings format unless unusual circumstances exist. Standard usage should be adopted for the many terms that are used – some appropriately and some not – for independent studies.

Honors theses are a specialized form of independent-based study with a faculty member, although the limits for counting independent studies toward graduation should not include registration for an honors thesis. However, registration for an honors thesis should conform to one of the two models currently in use.

Special Topics. Special topics courses are not independent studies. Sometimes referred to as experimental courses or directed readings, they allow new and/or visiting faculty to offer new courses quickly but they need to include the actual course title and should not generally be offered more than twice as special studies courses. A course description and/or tentative syllabus should be available prior to the registration period so that students can make informed choices.

Standard Course Numbering System. The Standard Course Numbering System should be followed, not only in the College of Arts and Sciences, but also campus wide. This will necessitate renumbering some courses, expanding numbers to be used in reserved sequences, and identifying specific numbers to identify internships and service learning. Reporting will be clearer as a result.

DRAFT

Report

The Task Force reviewed the following materials:

- Current protocols related to enrollment and assignment of faculty to independent study courses across the University (College and Professional Schools with undergraduate degree programs);
- Existing policies related to independent study;
- Fall 2011 enrollments for 2,355 students in 421 courses numbered below 700 and broadly defined in the Standard Course Numbering System as independent study;
- Grading patterns for the 421 courses in fall 2011 numbered below 700 and broadly defined in the Standard Course Numbering System as Independent Studies.

Existing Protocols for Independent Study Courses

Forty-two units responded with copies of their protocols used for independent studies. Among the most elaborate ones, containing carefully articulated guidelines and forms, were protocols from the Departments of Biology, Chemistry, Dramatic Art, History, and Psychology. Many units had a process in place, some more informal than others. Some units did not have a process – and in some cases developed one as a result of the request. The protocols provided an excellent basis for developing a set of minimum guidelines that the task force recommends being used throughout the College of Arts and Sciences.

Existing Policies that Govern Independent Study Courses

The UNC Policy Manual, section 400.1.6 (adopted 7/12/1996, amended 07/01/07) states that "All UNC campuses must ensure that every course offered for academic credit adheres to the standard of a minimum of 750 scheduled minutes of instructional time or the equivalent per credit hour. The time may include required examination periods, but may not include study days." The implications of the statement include the following:

- Instructional contact minutes for one credit hour = 750 minutes (12.5 hours); for three credit hours = 2250 minutes (37.5 hours)
- For independent study, an equivalent is necessary

The 2011-2012 edition of the *Undergraduate Bulletin* states that "The University offers a variety of independent study experiences for students. Such courses, including directed readings and research courses for an individual student, are offered for academic credit through departments and curricula. Twelve hours of graded independent study credit may be counted toward graduation, though no more than six hours may be taken in any one semester. Students may participate in formalized programs, or they may make individualized contracts for work under the supervision of a member of the permanent faculty at the department/curriculum level. For information about independent studies courses in their majors, students should consult the director of undergraduate studies in their major department or curriculum." According to this statement, "Independent study experiences" serves as an umbrella

Comment [BO1]: Erika will verify quotation is correct now that Owen removed the reference to 2012-2013

term for "directed readings" and "research courses" for individual students (or at most, small groups of students) and "Twelve hours of graded independent study credit may be counted toward graduation." It is also clear that current policy states that "No more than six hours may be taken in any one semester" and that such work should be supervised by members of the faculty. The passage appropriately refers students to the Directors of Undergraduate Studies for information about such courses and how they fit into major/minor requirements. That an individualized syllabus is provided is assumed, as one would be available for any other course.

University Policy Memorandum # 4, Standard Course Numbering System, last revised September 2006 (See Appendix C) reserves a series of numbers for independent study and related courses, including

- 190, 290, 390 Undergraduate Special Topics Courses
- 195, 295, 395 Undergraduate Research Courses
- 196, 296, 396 Undergraduate Independent Study/Reading Courses
- 199, 299, 399 Undergraduate Experimental Offerings
- 496, 596, 696 Undergraduate/Graduate Independent Study/Reading Courses
- 499, 599, 699 Undergraduate/Graduate Experimental Offerings
- 691H, 692H, 693H, and 694H Senior (*Undergraduate*) Honors Thesis

Final Examinations are required in all undergraduate courses offered at the University, including independent studies. Page 397 of the 2011-2012 *Undergraduate Bulletin* states "Undergraduate courses taught on campus must include a final assessment (*i.e., final examination*) unless the provost grants an exception." It also includes the provision that "Chairs (*i.e., heads of instructional units*) must give permission for faculty to use nontraditional examinations, such as a portfolio of a semester's work or a take-home examination." This means that the role of final exams for independent study courses may vary based on the intended result for the semester, and that the department chair can approve a nontraditional final exam.

Recent campus legislation concerning the definition of credit hours also has a bearing on independent study courses. UNC-Chapel Hill accepts the provision from the U.S. Department of Education, subsequently adopted by the Southern Association of Colleges and Schools (SACS), which accredits the University. On February 10, 2012, Faculty Council adopted Resolution 2012-1, "UNC-Chapel Hill Credit Hour Policy" (Appendix B). The policy includes the following statements which reference independent studies and related coursework:

"**Section 1.** The University of North Carolina at Chapel Hill hereby adopts the Federal Definition of a Credit Hour (described in *34 CFR 600.2*, effective July 1, 2011) as follows:

> **Federal Definition of the Credit Hour.** For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or
2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours."

The policy contains two elements relevant to independent study courses. First, that "not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work" specifies that students should expect to devote a minimum of nine hours each week to each three-credit course (the usual value) they take. Second, this standard applies to all courses, including "laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours."

Students approved to do an independent study are expected to be self-motivated and largely self-sufficient and expect to spend at least three-hours per week per credit hour working on an independent study. Faculty members supervising an independent study must meet on a regular basis throughout the semester with students pursuing an independent study under them.

Comment [BO2]: I came away with lots of notes for this paragraph. Is this ok now?

Fall 2011 Enrollments and Grades in "Independent Study" Courses

The review of fall 2011 registrations did not raise concerns regarding the pattern of enrollments but did reveal inconsistent use of the Standard Course Numbering System. At census, a total of 2,355 students enrolled in 421 courses numbered below 700, broadly defined in the Standard Course Numbering System as Independent Studies. A total of 2,330 grades were awarded. Credits varied from 1-3 hour increments. A close examination revealed

- 345 registrations for honors thesis
- 299 registrations for internships
- 3 registration errors (corrected)
- 793 registrations for regular courses incorrectly numbered as independent work
- 472 registrations for undergraduate research
- 242 registrations for service learning
- 201 registrations for traditional independent study

Comment [BO3]: Should this list be in a different order?

Within the 201 Independent Study registrations, the vast majority (84.9%) of grades assigned across courses that fall under were As, regardless of department. 6.8% were Bs and less than 1% comprised all other grades. The regular courses in the analysis had broader distribution. Faculty members are expected to have consistent grading standards regardless of course content, level at which it is taught, or format. Each syllabus should contain assessment information and that criteria must be followed, even for independent study.

Comment [BO4]: Better?

The task force considered whether pass/fail was appropriate for internships, mentored undergraduate research, service learning, and traditional independent study and decided that letter grades were

appropriate except when a department wished to provide such a course on a pass/fail basis only. The pass/fail-only grading basis occurs most commonly with one-hour courses, among them most internships and service learning courses. Honors courses cannot be taken pass/fail.

Detailed Recommendations

I. **Independent Study Courses.** The College of Arts and Sciences should

- Adopt standard usage for the following terms, which are at present often used interchangeably: Traditional Independent Study, Directed Readings, Mentored/Directed Research, Honors Thesis, Internships, Field Work (aka Field Research), Practicum, Service Learning, Special Topics, and Experimental Course (as defined in Appendix A);
- Adopt College-wide guidelines for Independent Studies to include a contract (see draft contents for contract in Appendix D). The contract should be made available as an electronic template and have routing included in it. The template would have minimum expectations and allow departments to customize it for their own needs.
  - The contract stipulates the expected number of hours per week of work expected from the student, meeting requirements between course instructor and student, reading and writing assignments and due dates, assessment information describing how the final grade will be determined, a brief (100-word) work plan, and a formal approval process. When a department chair is involved, the Senior Associate Dean is the approver. Departments may add additional information but may not eliminate items from the recommended content of the contract.
  - Faculty members are required to establish a regular meeting schedule with students doing an independent study (for example one hour per week or two hours every other week; the specified hours could be spread out over the length of the term rather than occur weekly). However, contact between a faculty member and student must occur throughout the semester rather than merely at the beginning and end of the semester or summer session.
  - Registration for an independent study course, including the approval process, must be completed no later than the last day of "late registration" which is the end of the first week of classes in a fall or spring semester (or equivalent in each summer session).
  - The Director of Undergraduate Studies and the Chair of a Department or Curriculum have an important responsibility to review the contracts carefully and monitor the numbers of students being supervised by individual faculty members and within established research groups.
- Create sections for each faculty member in a department/curriculum supervising traditional independent studies, internships, mentored research, directed readings, etc. Separate sections for individual faculty members already exist at the graduate level, making it a familiar strategy to use.
- Restrict the number of students a faculty member may supervise during a semester or summer session to two students in traditional Independent Study courses, directed readings, or mentored research. Independent studies and directed readings are not

Comment [BO5]: Consider order of this list

Comment [BO6]: Erika – do we mean practica? The document should be consistent.

DRAFT

generally considered part of the faculty member's teaching responsibility but are rather considered service. The limitation of two students does not apply to

- Formal research methods courses, such as ANTH/FOLK 675 Ethnographic Method, GEOL 501 Geological Research Techniques, and LING 422 Research Methods in Phonetics and Laboratory Phonology (see Appendix E for a longer list), which are taught according to the standard class time format. A syllabus serves as the contract for these courses which are not traditional independent study.
- Capstone courses, such as ART 697 and PHIL 698 where students register for a specific course taught by a faculty member, as part of normal teaching responsibilities), generally in their major or minor, and work on an individual or group project. The project may be under the supervision of the course instructor or another faculty member (not considered part of their normal teaching responsibilities). As with the formal research methods courses, a syllabus serves as the contract for these courses which are not traditional independent study.
- Faculty research laboratories, research programs, or established research groups in departments where many students are engaged in a research effort. The contract applies. The individual contract still applies.
- When mentored research is occurring for more than two students outside the department, for example in the Lineberger Comprehensive Cancer Center. The individual contract still applies; faculty members from a department or curriculum must assign course grades.
- Directed readings courses, not included in a faculty members teaching responsibilities, for three to five students pursuing the same reading list. The individual contract still applies.

Comment [BO7]: Erika – Can you find a different example because we are about to redo Art?

- Restrict offering active (approved) courses as an independent study except in unusual circumstances. Tutorial Independent Study may be utilized for this purpose (see Appendix E) provided all approvals are obtained, including the Department chair and the Associate Dean (or Director) for Undergraduate Curricula. Registration for a traditional independent study in the department of the student's major, following the College-wide guidelines above, might also be possible. Examples of appropriate use of this format include
  - An individual student needing a specific course for graduation that will not be offered in the immediate future.
  - An individual student prohibited from attending a regularly scheduled specific course needed for graduation due to residing far from campus, such as in another state.

II. **Honors Thesis.** Honors Carolina has a long-standing program of senior honors thesis work, a specialized form of independent-based study that allows students to graduate with honors or highest honors. Registration for honors theses should follow one of two formats:

Comment [BO8]: Review this section which has been revised.

1. Departments schedule a two-semester senior thesis sequence taught by a member of the faculty who serves as the department's honors director. In the Department of History, for instance, those courses are HIST 691H and 692H. In this format

Comment [BO9]: Odd spacing. Need Paula to fix all of Section II.

- The course size is generally between 10 and 20 students.
- A syllabus is provided on the first day of classes.
- The course is among the courses being offered by the department as honors courses, provided there are at least 10 students enrolled. If an individual thesis is supervised by another faculty member it is not included in his or her teaching responsibilities.
- Each student enrolled in the senior thesis courses also has a faculty adviser whose scholarly expertise encompasses the student's research topic. Service as a thesis adviser does not count in faculty course loads.

2. Each faculty member supervising an honors thesis is assigned a section of the course(s). In this format
    - The number of students being supervised should be limited to two.
    - A contract similar to the independent study contract should be developed.
    - Supervising/advising an honors thesis does not count in the normal teaching responsibility of an individual faculty member.

III. Limits on Counting Independent Study Credit toward Graduation. Current policy states that "Twelve hours of graded independent study credit may be counted toward graduation, though no more than six hours may be taken in any one semester" (2011-2012 *Undergraduate Bulletin*). The College of Arts and Sciences should

- Exclude the six-hour registration (two three-credit courses) for honors from this total. Students enrolled full time in supervised student teaching, an approved global study program, or an off-campus internship should also be able to pursue an honors thesis and be able to graduate with honors or highest honors.
- Raise the limit within a fall or spring semester from six to 12 credit hours. The Federal definition of full-time enrollment is 12 credit hours, and some students have course work that takes place completely in off-campus sites (student teaching, off-campus internships, etc.).
- This change would have to be approved by Faculty Council via the Educational Policy Committee after which the *Undergraduate Bulletin* would be revised to incorporate this new information.

IV. Special Topics. Special Topics Courses are not independent study. While special topics courses have appropriate uses, permitting new or visiting faculty to offer timely courses or develop new ones, topics courses should be avoided for long-term or repeated use. The College should

- Limit the number of times the same Special Topics course can be offered to no more than two occurrences, similar to the model developed for first-year seminar courses numbered 89.
- Require secondary titles for all Special Topics courses when they are scheduled in ConnectCarolina and make a course description and/or tentative syllabus available prior to the registration period so that students can make informed choices when selecting courses.

- Consider the implications of including Special Topics courses in requirements for majors and minors; approving courses based on their variable content requires making adjustments to individual students' Tar Heel Tracker.
- Remind departments/curricula that Special Topics courses cannot fulfill General Education requirements because of their variable content (see Criteria For General Education Requirements at http://www.unc.edu/depts/uc/Faculty/GenEd_criteria.pdf).
- Add 490, 590, and 690 to the currently reserved numbers 190, 290, 390 for Undergraduate Special Topics Courses. 890-899 already exist for graduate-level Special Topics courses.

V. Standard Course Numbering System. The Standard Course Numbering System should be followed, not only in the College of Arts and Sciences, but also campus wide. The following recommendations are intended for the University Registrar to implement with the Office of Undergraduate Curricula, understanding that there may be other issues to address, including the prohibition against reusing a number again within a five-year period.

- All courses that are standard offerings but are currently incorrectly numbered should be renumbered as soon as possible (likely summer 2012). See Appendix D for the full list.
- The sequence of numbers for special topics courses should be expanded to 490, 590, and 690, to accommodate special topics courses that can enroll both undergraduate and graduate students.
- The sequence of numbers currently used for undergraduate and graduate "experimental offerings" should be eliminated and repurposed. These courses are actually special topics courses. Very few departments (anthropology, city and regional planning, and economics) use the "experimental numbers" and are willing to renumber their experimental courses as "special topics" courses.
- A series of numbers should be identified – and used – for Internships and Service Learning (repurposed experimental numbers). A detailed analysis of the course inventory is necessary before confirming which numbers are best to use.
  - Proposed Internship numbers: 299, 499, 699. Note that several departments use numbers ending with 93 and that additional analysis is necessary by the University Registrar prior to renumbering any courses
  - Proposed Service Learning numbers: 199, 399, 599
- The sequence of numbers for Undergraduate Research Courses should be expanded to 495, 595, and 695. The reserved numbers for undergraduate research do not identify all courses that have a research basis nor do they indicate courses taught for one hour of credit, three hours of credit or variable credit.
- The ConnectCarolina system of "tagging" courses should be employed to identify all courses that are research intensive, leaving the reserved X95 numbers for those specifically related to undergraduate research.

Comment [BO10]: Does this bullet point need to be revised?

VI. Implementation

Comment [BO11]: Is this the right word?

- The Task Force recommends that this report should be provided to the Educational Policy Committee for consideration for adoption campus wide.

Comment [BO12]: This seems awkward to Owen although the sense is there.

- The Task Force recognizes that some of the recommendations require electronic forms to be developed, policies to be changed, other parts of the University involved, and a

communication effort launched. As many of the recommendations that can be implemented with the beginning of the fall 2012 semester should occur and the remaining ones by the beginning of the fall 2013 semester. For example,

- The elements of the independent study contract including the approval process do not require an electronic form to be implemented. A paper form can be used until the electronic one is available.
- Revising the Standard Course Numbering System should occur as soon as possible to avoid adding to the confusion that already exists as well as renumbering courses to comply but that may take additional time to accomplish campus wide.
- Anything else?

Comment [BO13]: Anything important to add?

DRAFT

Appendix A

Independent Study Definitions

I. Independent Study

Independent study provides a mechanism for a student to work on a specific topic with a faculty member for academic credit. Topics are focused rather than general and are not usually pursued in scheduled courses. A final written paper (the standard used for courses fulfilling General Education requirements is a minimum of ten pages), report, or artistic product is required. At least three hours of independent work per week is required for each unit of credit.

Independent study is of five types: Traditional Independent Study, Directed Readings, Directed and/or Mentored Undergraduate Research, Internship/Practicum, and Honors Thesis.

1. *Traditional Independent Study:* The pursuit of a topic of interest by a student (generally in their major or minor), under the supervision of a faculty member with expertise related to the topic.
   Examples:
   HIST 296 Independent Studies in History
   MATH 290 Directed Exploration in Mathematics

2. *Directed Readings:* Systematic analysis of an approved bibliography in the student's area of interest.
   Examples:
   ART 396 Directed Readings in Art History
   BIOL 296 Directed Reading
   SLAV 244 Directed Readings in a Slavic Language

   Examples combining 1 and 2:
   ANTH 396 Independent Reading or Study in Anthropology
   SOC 396 Independent Study and Reading

3. *Directed and/or Mentored Undergraduate Research:* Investigative, fact-finding work supervised by a faculty mentor and conducted outside a conventional classroom—in a laboratory, in field sites, in a library, or in other places in which research activity takes place.
   Examples:
   CHEM 395 Research in Chemistry for Undergraduates
   FREN 396 Research for Advanced French Students
   GEOG 295 Undergraduate Research in Geography
   PSYC 395 Independent Research

4. *Internship/Practicum:* Supervised work experience designed to give students first-hand knowledge of the practice of a discipline. In a practicum students are likely to be supervised by faculty members or academic practitioners; in an internship students tend to work under the

Comment [BO14]: Erika - Do we mean Practica? We should be consistent.

direction of a permanent employee in a corporation, governmental entity, or other institution outside the university. In either case, students participate in a supervised, reflective experience that encourages them to integrate classroom and work experience in ways that help them develop a professional identity.
Examples:
AMST 397 Internship
COMP 392 Practicum
DRAM 395 Professional Theatre Laboratory
HIST 297 Internship in History

5. *Honors Thesis:* Two semesters of independent research for which the student, under the guidance of a full-time faculty supervisor, is responsible for designing and completing a research project or creative activity in accordance with the guidelines established by Honors Carolina and the academic unit.

II. Service Learning

Service Learning is a teaching and learning strategy that integrates meaningful, supervised community service, usually off campus, with instruction and reflection to enrich the learning experience, teach civic responsibility, and strengthen communities.

Examples:
COMM 668H The Ethnographic (Re)Turn
DRAM 288 Theatre for Social Change: Latina/o Performance Traditions
HBHE 610 APPLES Alternative Spring Break
PSYC 294 Service Learning in Psychology

III. Special Topics

A placeholder course that permits departments and curricula to offer specialized courses for which there may be only occasional demand or to develop new courses. In the latter case, the department/curriculum should apply for a permanent number for the new course after it has been offered twice as a Special Topics course. A Special Topics course may also be known as an "Experimental Course."

Examples:
ANTH 199 Experimental Course in Anthropology I
ENTS 490 Special Topics in Environmental Science and Studies
FOLK 690 Studies in Folklore
GEOL 390 Special Problems in Geology
HIST 490 Special Topics in History
PSYC 499 Current Topics in Psychology

Appendix B

Resolution 2012-1. On Adopting the Federal Definition of the Credit Hour.

The Faculty Council enacts:

Section 1. The University of North Carolina at Chapel Hill hereby adopts the Federal Definition of a Credit Hour (described in *34 CFR 600.2*, effective July 1, 2011) as follows:

> **Federal Definition of the Credit Hour.** For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:
>
> > 1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time, or
> >
> > 2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Section 2. This credit hour policy applies to all courses at all levels (graduate, professional, and undergraduate) that award academic credit (i.e. any course that appears on an official transcript issued by the University) regardless of the mode of delivery including, but not limited to, self-paced, online, hybrid, lecture, seminar, and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

Section 3.

1. The University of North Carolina at Chapel Hill adheres to the Carnegie unit for contact time (750 minutes for each credit awarded) in its official Academic Calendar
2. Additional guidelines and procedures for implementing and monitoring compliance with Federal requirements and accreditation standards related to credit hours should be recorded in a University Policy Memorandum (UPM) maintained by the University Registrar.

Comment: As outlined in the SACS/COC Policy concerning credit hours "Students, institutions, employers, and others rely on the common currency of academic credit to support a wide range of activities, including the transfer of students from one institution to another." In addition, "…the federal government has relied on credits as a measure of student academic engagement as a basis of awarding financial aid."

It is noted that Federal regulations provide institutions with some flexibility to take into consideration alternative delivery methods, types of coursework, measurements of student work, academic calendars, disciplines, and degree levels when determining credits to be awarded for student work. The Federal definition does not dictate particular amounts of classroom time versus out-of-class student work. Credits may be awarded on the basis of documentation of the amount of work a typical student is expected to complete within a specified amount of academically engaged time. The basic requirement is that a credit hour "reasonably approximate" the minimum amount of work specified in Section 1, above.

Appendix C (note the draft watermark should not be on this page – it is an official document.)

Office of the University Registrar
UPM # 4 Standard Course Numbering System

PURPOSE
Effective Date: September 2006
This memorandum is intended to clarify the standard course numbering system and to point out some variations and limitations.

1. GENERAL PROVISIONS
All courses authorized for degree credit must be numbered according to guidelines established by the University. The numbering schemes may vary by academic unit and may change over time.

2. STANDARD COURSE NUMBERING SYSTEM
a. For all courses in the DN, LW, and MD academic units, and for courses in the GU academic units prior to Fall 2006, the numbers assigned to courses are normally categorized as follows:

- **001-049** Courses primarily for first and second year undergraduates
- **050-099** Courses primarily for third and fourth year undergraduates
- **100-199** Courses for advanced undergraduates and graduate students
- **200-299** Courses for graduate students only
- **300-399** Seminar and Research courses for graduate students
- **400-499** Numbers reserved for special categories of registration
- **600-699*** ** Interdisciplinary courses for undergrad and graduate students
- **700-799*** ** Interdisciplinary courses for graduate students only

****Interdisciplinary numbers are assigned in sequence**. Departments in the DN, LW & MD academic units should contact the University Registrar for the next valid number when establishing these courses. Course must involve two or more campus schools/academic units to qualify for interdisciplinary numbering.
b. For courses in the GU academic unit starting in Fall 2006, the numbers assigned to courses are normally categorized as follows:

- **000-009** Reserved for University Registrar
- **050-089** First-Year Seminars
- **009-399** Undergraduate Level Courses
- **100-189** Introductory Undergraduate Courses*
- **190, 290, 390** Undergraduate Special Topics Courses
- **195, 295, 395** Undergraduate Research Courses
- **196, 296, 396** Undergraduate Independent Study/Reading Courses
- **199, 299, 399** Undergraduate Experimental Offerings
- **400-699** Courses for advanced undergraduates and graduate students
- **496, 596, 696** Undergraduate/Graduate Independent Study/Reading Courses

- **499, 599, 699** Undergraduate/Graduate Experimental Offerings
- **691H, 692H, 693H, 694H** Senior (*Undergraduate*) Honors Thesis
- **697, 698** Capstone Courses (*Undergraduate*)
- **700-994** Graduate only courses
- **799** Graduate Experimental Offering
- **890-899** Graduate Special Topic
- **900-991** Graduate Research
- **992, 993** Master's Thesis
- **994** Doctoral Dissertation
- **995-999** Reserved for University Registrar

* **Foreign Language Courses** should be numbered in this manner: 101,102 and 401, 402 - Beginning level; 203, 204 and 403, 404 - Intermediate level; 601, 602 and 603, 604 - Graduate foreign language requirement

3. AVAILABLE SUFFIXES

a. For all courses in the DN, LW, and MD academic units, and for all courses in GU academic units prior to Fall 2006 the following suffixes may be used:

- **A** - First part of a series of courses, or an advanced course
- **B** - Second part of a series of courses
- **C** - Third part of a series of courses, or correspondence course
- **E** - Denotes elective credit for the Dental School
- **H** - Honors course or course for advanced students
- **L** - Credit-bearing laboratory course
- **M** - Open to majors only
- **R** - Denotes a review course
- **X** - Denotes no graduate credit. Satisfies language reading knowledge examination. For undergraduates, denotes an intense language review course

b. For courses in the GU academic unit starting in Fall 2006 (*with the exception of subject = MBA), the following suffixes may be used:**

- **H** - Honors course or course for advanced students
- **L** - Credit-bearing laboratory course
- **I** - Interdisciplinary course

* **MBA courses** may use any other suffix not listed above, but should not use the suffixes H, L or unless they are used for the specific course content as designated for each suffix.

4. LIMITATIONS ON NUMBERING AND SUFFIXES

Alphabetic suffixes are limited to one. More than one suffix and hyphenated course numbers are incompatible with the system now in use. A course number should not be reassigned to another course having a different content until at least five years after the previous course was taught. This is to prevent the same course number from appearing twice on a student's record representing two different courses.

Appendix D

Note: This contract is to be developed as an electronic form that can be customized and routed. This is a list of minimum contents and contains areas where pull down menus would be useful.

Tutorial Independent Study

Comment [BO15]: Need a cleaner copy and to have the format correct.

DRAFT

UNC
THE WILLIAM AND IDA FRIDAY
CENTER FOR CONTINUING EDUCATION

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

THE FRIDAY CENTER
CAMPUS BOX 1020
CHAPEL HILL, NC 27599-1020

fridaycenter.unc.edu

Tutorial Independent Study

For UNC-Chapel Hill undergraduate courses not offered by Self-paced Courses, it may be possible to enroll in a tutorial arrangement through Credit Programs for Part-time Students. If special circumstances warrant, a student and instructor of a regular University course may adapt the course to a Self-paced Courses format. This arrangement is subject to the approval of the department chairperson, the appropriate dean, and Credit Programs for Part-time Students in the Friday Center for Continuing Education.

In Tutorial Independent Study, the student and faculty member agree on a program of learning activities that can be completed away from the University campus (although occasional conferences with the instructor may be arranged). Approval for Tutorial Independent Study is granted only in instances where a learning experience of high quality can be achieved through distance education methods.

The tutorial option makes it possible for students to continue their education despite special difficulties created by factors such as employment, travel, or illness. It is not recommended for students who can arrange to take the course through other means, and it may not be used as a means of attending a course offered on campus. The courses for which Tutorial Independent Study is appropriate are those having a clearly defined content rather than those bearing such titles as "readings," "topics," "seminar," or "individual study."

In order to enroll in a course through Tutorial Independent Study, the enclosed application form must be completed and signed by the student and the instructor. The signatures of the department chairperson and dean of the school or college offering the course must also be obtained before the form is returned to the Self-paced Courses office. To be considered eligible for NC tuition rates, the student must also complete and send in the enclosed Residency Status form. When final approval is given, the student should complete a Self-paced Courses application and submit it along with the tuition (current tuition rates) dependent on a student's NC residency status. An education and technology fee will also be charged. Upon payment of the tuition and fee, the course work agreed upon by the student and instructor may begin.

The policies governing Tutorial Independent Study are the same as those for regular courses in the Self-paced Courses program as described in the Self-paced Courses catalog. The instructor and student should be completely familiar with these policies before reaching a Tutorial Independent Study agreement.

In addition, the instructor is asked to become acquainted with the procedures outlined in the Self-paced Courses *Instructor's Guide*. Please note that the reporting of grades and credit is the responsibility of Self-paced Courses. The instructor should contact Self-paced Courses (919-962-1134, 800-862-5669) to find out about compensation for instruction. In instances where the tutorial student is submitting the assignments directly to the instructor, half of the payment to the instructor is initiated at the time the student enrolls and half at the time the student completes the course. If assignments are submitted and returned through the Self-paced Courses office, payment is made on a per-assignment basis and is determined by the number of assignments in the course.

TO THE INSTRUCTOR:

Once the Tutorial Independent Study application has been fully approved and the student has formally enrolled, you will receive a copy of this form. The student then may begin the approximation course (if study has approval assignments). You will receive assignments either directly from the student or from the Independent Studies office, depending on which assignment has been submitted. Payment will be made to you according to the schedule indicated above. Enclosed with this copy of this form will be a Mid-Term Approximation, Cover Sheet to be used for reporting to Independent Studies the student's exam grade and final course grade. If no examination is required, simply use the sheet to report the student's course grade. Submit all logbook to Independent Studies.

We encourage all instructors, and particularly those who are new to the Independent Studies program, to consult the information sheet accompanying the application, to relevant pages of the Independent Studies "Instructor's Guide," and to contact Independent Studies if you have questions.

Subject: RE: New subject code and concentration in GSLL

Erika -
I so appreciate your views on this and should have been more elaborate. I want to support any and all efforts from them to really merge - and if ECL was headed this may would probably be thinking the same thing. I feel responsible for the problems in art because I should have been more careful about how units used numbers and was not except in a few places, like Computer Science and even there did not get it all right. I apologize for the work load and will provide whatever assistance I can - even if it means extending pay to a temp or a graduate student over the summer. Your brain power and Nick's are needed to get this right - not to actually make the changes.
We will talk abut this when I am back (the new track is worrisome to me) - this won't happen soon, or at all if we can't sort it out.

Subject: RE: New subject code and concentration in GSLL

As we set about to renumber ART courses as ARTH and ARTS, the GSLL proposal makes no sense to me. By the logic of your message, Bobbi, we should be reserving ART for honors, FYS, and some special topics courses that overlap. We are not planning to do that. ARTH and ARTS will have separate honors thesis courses, for example.

I'm hoping that there are some compelling reasons for the contemplated GSLL project. I suspect that neither Clayton Koelb nor Bill Andrews has any appreciation of the huge effort it will take to renumber these courses, especially in an academic unit that already has a ton of subject codes. Call me skeptical.

Safe travels, Bobbi. Enjoy some R&R.

Thanks for checking with your colleagues. Yes, HIST and GLBL would be involved too.

I agree that GSLL would be useful in some cases (Honors, FYS, some special topics, etc.).

Cheers,
Nick

Subject: Re: New subject code and concentration in GSLL

Thanks, Nick, for bringing this to our attention. I have not heard about this and will check in with Jonathan Hartlyn as well as with Bill Andrews. Not only EURO, but HIST and GLBL seem to be involved.

I do like the use of GSLL for honors thesis and courses that are between and among (perhaps including FYS). I will be back to you about this before the end of the semester because summers are useful times for some things even though the heavy lifting for course approvals and catalog is in the fall.

Bobbi

On 3/23/2012 5:14 PM, Siedentop, Nicholas J wrote:
Bobbi –
I just got off the phone with Valerie Bernhardt. Evidently the Department of GSLL had a faculty meeting this week to discuss adding a new subject code (GSLL) and creating a new concentration in Central European Studies.

Valerie thinks (but is not certain) that the chair has already conferred with Bill Andrews on the new concentration. Have you heard anything? I expressed possible overlap with the major in Contemporary European studies.

Regarding the new course code, they wish to move some GERM and SLAV courses over to the new GSLL subject, especially when the content doesn't fit neatly into either GERM or SLAV (or RUSS, etc.) They'll also use GSLL 691H, 692H, and drop the GERM and SLAV Honors courses. It sounds like they won't be adding many new courses, just revising existing course (Valerie estimated between 20-30). I expressed my reluctance to pursue a new subject code, but didn't want to push back too much if it's already been discussed in South Building.

If you're okay with both items above, I can work with the chair, DUS, and Valerie on how to submit the materials.

Thanks,
Nick

Jim -
I agree this is a good thing to do - but wonder about the difference between a graduate student and an intern. Do you want a graduate student - or do you want to have an intern? I believe you need to advertise for something like 3 days for an intern. Off to LA but back for Robertson Sunday and Monday.
Bobbi

On 3/26/2012 10:36 AM, Leloudis, James L wrote:

Bobbi,

Friederike and I would like to recruit a graduate student intern to assist with management of our honors study abroad programs and Burch seminars. With growth in the size of honors, it's becoming increasingly difficult for SPA staff to support Friederike as they have in the past. The internship, I think, is a promising solution. We should be able to recruit very talented applicants from local graduate programs in higher ed administration and from SIT in Vermont. We'll cover the cost from Burch funds.

I've attached a copy of the position description. Jason has run it by Teresa, who says that we can hire an intern as an EPA-Temp employee. Wanted you to see this before we go any further.

Really appreciated your last minute help on Sunday. We were all getting rather tired at the very end, and it certainly helped when you and Lynn came in and gave us the freedom to "triage" the final edits down to just a handful. (LW was so busy nailing down the last minute assessment stuff that she hadn't had time to focus on how to accomplish the final edit pass.) I'm sure that she appreciated your staying until the very end.

See you soon, I hope. Are you planning to come over for a piece of cake?

Subject: RE: Abbey Fellow

A faculty member cannot keep the Abbey stipend while on leave but we have generally extended it for the same period when someone was away (Dan was on leave for a semester when he was in the position). This might mean commitment over 3 1/2 years for a 3 year appointment.

You might consider an "application" process. What would someone do for "value added" during a term as an Abbey Fellow. It should be above and beyond what is currently being done - and might be a good opportunity for creative interactions with students (and Steele Building). There should be expectations for programming beyond what someone who likes working with undergrads would normally do.

Bobbi

Beverly -
I write once again to offer you the possibility to recommend the appointment of an Abbey Fellow to a three-year term to me. If it is going to be effective July 1, I need to move tbe paperwork forward soon.

We have just released webpages for the Abbey Fellows which may be useful information for you.

http://abbeyfellows.unc.edu/.

Bobbi

Subject: Re: EPA Non Faculty Appointments

The list does follow the funding source and if you want the appointments to continue, you need to deal - only - with that aspect of their work. Becky will take care of the primary appointments when they occur in a different unit (and whether a secondary appointment continues is separate from the primary one). The big point is that we need to have some reason for continuing.
Make sense?

> I was surprised to see one of two HHMI science seminar instructors (Meg Harney) on this list. I guess the list must follow the funding source. Going forward, it is very unlikely that we will fund a science seminar instructor for more than one semester, so an "systematic review" doesn't make much sense, but we'll do whatever we are asked. Will Becky develop guidelines for people whose primary appointment is in another unit and or who have multiple EPA part-time appointments (eg Nalin Parikh)? Will I need to coordinate my review with other units who are required to review him?

> Hello,

I'm the Records Services Archivist for the university. My department is charged with determining and communicating records retention policy to the university. Recently, I was directed to University Policy Memorandum #8, and I wanted to let you know regarding point 6 under "Examinations," that the retention of student coursework for one year is not advice but is a legal mandate to retain those records made by the NC Department of Cultural Resources. The full retention policy is as follows: "Destroy in office examinations, tests, term papers, and homework one year after completion of course for uncontested grade results. If challenged, destroy after resolution of challenge."

I am concerned that some faculty members will see this policy memorandum and take the one year retention policy to be a suggestion and not a legal requirement. I would suggest amending the language in that section.

If you have any questions, feel free to contact me at the email address or phone number below.

Best,

Lawrence

Hi Rachel,

I have been having trouble finding a moment of time during the workshop when I had access to the internet and to Sakai.

I submitted grades for MASC 310 over a week ago (before I left). I followed the instructions that you had sent and hit the submit button. Are you sure that they were not submitted?

I am now able to download from Sakai and have all the final exam scores from the TA's. I still need to enter research paper grades by hand and to normalize the scores (this will take an hour or so). I am in London where it is 4:30 and I have a commitment at 5:00. I will continue working later this evening. Tomorrow I will be traveling all day and will not be able to get online, so I will finish early Sunday morning.

I'm sorry for all the inconvenience this has caused, but it's been very hard to get everything graded and entered remotely.

The 72 hour deadline for returning Grade Reports is critical. We must be able to reliably determine academic eligibility information to report to Deans' Offices.
Timely eligibility information enables Deans' Office to assess as early as possible whether or not a student may continue enrollment for the next term.

New Features

The grade roster now has a new feature. When selecting the "Approved" status, after the save button has been pressed, the message shown below pops up. This new message is a way to verify that grades have successfully been approved and submitted to our office. If someone does not get the popup, then they will know that their grades are not in an approved (post-able) status.

<image001.jpg>

Submitting Grades

<!--[if !supportLists]-->• <!--[endif]-->**Every registered student (those that appear on your grade roster) must have an appropriate grade designation (no blanks).** Rosters cannot be approved without all grades being entered. If a student did not show up for the final examination or has not been attending classes, a grade of "AB" or "FA" must be assigned. Use a Post-Semester Registration/Drop/Add Form to remove or add a student to a course after the Official Grade Rosters have been generated for the semester.

<!--[if !supportLists]-->• <!--[endif]-->The beauty of an electronic grading system is that the instructor of record can enter grades by computer/internet from anywhere in the world. By doing so, his/her digital signature is recorded as having assigned the grades. The University prefers the "signature" of the instructor of record.

Assigning Grades

<!--[if !supportLists]-->• <!--[endif]-->The Report for Assignment of Temporary Grade of AB or IN to Undergraduates form.

You may use the Comment Section of the IN/AB reporting form should you wish to explain the assignment of a "FA" grade.

<!--[if !supportLists]-->• <!--[endif]-->Refer to University Procedures Memorandum (UPM) No. 24 for University grading policies and grade definitions.

<!--[if !supportLists]-->• <!--[endif]-->Even if you know an undergraduate student has elected to take your course under the **PS/D+/D/F** option, you must assign an appropriate letter grade for their performance. **The computerized grade table will convert grades of "C-" or better to "PS."**

<!--[if !supportLists]-->• <!--[endif]-->Only the appropriate grades for a student will appear in the drop down selection.

Tips when entering and approving grades

<!--[if !supportLists]-->• <!--[endif]-->**Save Early and Save Often! -** When ready to approve grades, select approve from the drop down menu next to (fill in the field name) and save to submit grades for posting.

<!--[if !supportLists]-->• <!--[endif]-->Grades will not be posted if the roster is not set to **approved** status (See the new feature area above for more details).

<!--[if !supportLists]-->• <!--[endif]-->For assistance, concerns, or questions email grades@unc.edu.

<!--[if !supportLists]-->• <!--[endif]-->You may find our training documentation on grading useful: http://registrar.unc.edu/AcademicServices/Grades/index.htm

I agree with your assessment. GRC's are enhancements for FYS so the funds could be used and that seems an appropriate use of the Cobey and King and Lupton. We should talk about the Davis fund and think about what we prefer to do with it (reviewing the fund authority makes sense).
Hope our paths cross soon.

Subject: FYS GRCs
Bobbi – I met with Pat last week, and she mentioned your discussion about using FYS trust funds to fund FYS GRCs. I'm seeing this as a budget allocation question within Undergraduate Education, so it is completely up to you. Looking back across the past 3 years, we average approximately 10 FYS with GRCs per year, so the cost would average $7500. Looking at our current FYS spreadsheet (attached), I see two alternatives: 1. We could take the money from Lupton and Cobey. 2. We could try to make a change in the Davis money and devote it to GRCs rather than new courses.
What do you think? If the issue is more complicated than I'm seeing, let's plan to discuss it at our next meeting.
Thanks,
Steve

Subject: Putting EPC on the FC Agenda for September 14, 2012 meeting

Dear Anne,

I have been dealing with a bit of fallout from the April and May meetings and it looks like our new Chair will have lots of things to discuss and resolutions to ask for approval at the September 14, 2012 Faculty Council meeting—She will need time for discussion and a number of separate resolutions—Recommendation from the Evaluation of Priority Registration System, Approval of the Syllabus Retention policy (5/3/12 OUC request—Theresa, will explain in another email), Honor System Taskforce Recommendation of XF grade, Independent Studies Taskforce Recommendations, and the Change in eligibility standards we passed at the 5/2/12 meeting (though Bobbi may want to run this one through FEC this summer).

Andrea

P.S. Breathe, Theresa, breathe, I detailed notes on all of this stuff.

Bobbi,

Karen wants you to include this information in your remarks (taken from the reviews we did of faculty teaching assignments):

Independent Study Enrollments

As part of the review of independent study practices, the Independent Study task Force reviewed Fall 2011 enrollments for 2,355 students in 421 courses numbered below 700 (broadly defined as Independent Studies). The review did not raise concerns regarding the pattern of enrollments, but did find inconsistent use of the Standard Course Numbering System, which has been addressed in the new policies being adopted in the College.

Thanks,

Dee

We are looking at offering one or more ROTC classes here at Durham Tech through the UNC-CH ROTC. These four military science courses are not protected by the CAA. Since UNC-CH would be teaching the course, via, on-line, would you give credit for it, even if it is not transferable? See link to course description below.

Military Science:
MSI 110 (1 SHC), 120 (2 SHC), 210 (2 SHC), 220 (2 SHC).

UNIVERSITY OF NORTH CAROLINA - CHAPEL HILL
APPROVAL TO OFFER AN EXISTING COURSE OFF-CAMPUS

Your approval is requested to offer an existing course on an off-campus basis. Off-campus courses are limited to those already approved and listed in the Undergraduate Bulletin or Graduate Catalog. Off-campus faculty hold an appropriate faculty appointment in the University of North Carolina at Chapel Hill. Course content, contact hours, and evaluation procedures meet the same criteria used in offering the course on campus. Participants in off-campus courses are in good standing academically and have a level of preparation comparable to that of on-campus students. Credit from UNC-CH is granted to students successfully completing the off-campus course. The use of this credit in a degree program is at the discretion of the degree-granting institution. If you have any questions please contact Off-Campus Credit Studies, The Friday Center of Continuing Education (919) 962-2649.

Course ART 287 — Program code _____
Course Location Polk Correctional, Butner, NC — **Term Offered** 2nd SS 2012
Contact Hours 45

To: "Bartolone, Regina F" <regbart@email.unc.edu>
Subject: Internal Call for Proposals - NSF Science, Technology, Engineering, and Mathematics Talent Expansion Program (STEP)

NSF Science, Technology, Engineering, and Mathematics Talent Expansion Program (STEP)

Internal Deadline

June 22nd

Program activities under the STEP Type 1 competition should be efforts aimed at adapting and implementing best practices that will lead to an increase in the number of students (United States citizens or permanent residents) obtaining STEM degrees at institutions with baccalaureate degree programs or completing associate degrees in STEM fields or completing credits toward transfer to a baccalaureate degree program in STEM fields at community colleges.

The goal of the project must be to increase the total graduation numbers of such students at the institution(s), and all STEP proposals must include specific numerical targets for these increases. If a project focuses efforts on only a subset of STEM fields, increases in those fields must not be at the expense of degrees granted in other STEM fields. Projects may focus on the retention and/or recruitment of undergraduate students into STEM fields. Outreach efforts are appropriate only if the efforts can be expected to result in additional STEM majors and graduates at the submitting institution(s) within the grant period.

All Type 1 projects are considered to be institutional efforts. A Type 1 proposal should be identified as falling into one of two categories: 1A or 1B.

A **Type 1A** proposal is submitted by an institution that has not previously been the lead institution on a STEP Type 1 award.

As examples, Type 1A or 1B projects might propose a comprehensive effort that uses some combination of the following approaches in order to increase the number of graduates in STEM fields:

- Programs that intend to increase the number of students persisting in STEM courses and majors by focusing directly on the quality of student learning, including efforts that encourage (a) high-caliber teaching, including enabling faculty to spend additional time teaching participating students in smaller class settings, including in the laboratory environment; (b) opportunities to implement new pedagogical approaches such as the implementation of active learning strategies, web-based course strategies, distributed and collaborative digital teaching tools, or interactive course modules; and (c) training of teaching assistants;

- Programs that expand the capacity of institutions of higher education to incorporate current advances in science, technology, engineering, and mathematics (STEM) into the undergraduate learning environment;

- Programs including interdisciplinary approaches to undergraduate STEM education;

- Bridge programs that enable students at community colleges to matriculate directly into baccalaureate STEM programs;

- Programs among collaborating academic institutions designed to increase the number of pathways available for achieving a degree in STEM, or to improve the articulation among programs at the institutions;

- Mentoring programs that involve faculty or peer student mentoring;

- Programs that focus on increasing enrollments in STEM undergraduate majors through the incorporation of strategies targeted at traditionally underrepresented students (low-income, ethnic and racial minority students, first-generation college students, women, and persons with disabilities);

- Programs that (a) facilitate student exposure to potential careers, including cooperative programs with industry or government that place students in internships as early as the summer following their first year of study; (b) provide part-time employment in industry during the school year; or (c) provide opportunities for undergraduates to participate in industry- or government-sponsored research;

- Programs to encourage undergraduate research, particularly in the early undergraduate years, on- or off-campus;
- Programs that assist institutions of higher education in states that participate in the Experimental Program to Stimulate Competitive Research (EPSCoR) to broaden the STEM student base or increase retention in these fields;
- Programs that recruit and retain Veterans in STEM fields;
- Programs that provide financial incentives to students entering and persisting in the study of STEM; or
- Other approaches to achieving program goals.

The intent of a STEP project should be to make a significant impact on the culture at an institution(s) with the expectation that major portions of the impact will be sustained after the completion of the project. The most competitive proposals are those based on an institutional self-study that has determined when and why students leave STEM majors at the institution or identifies untapped recruitment opportunities and that focuses on changing the situation through appropriate strategies. A project that supports only a targeted cohort of students without including strategies for on-going institutional change is not likely to be competitive. Finally, although the use of scholarships is allowed as one part of a larger strategic effort to retain students, if the project is intended to rely largely on scholarships, it should be submitted to the NSF Scholarships in Science, Technology, Engineering, and Mathematics (S-STEM) Program.

For projects that are considering outreach to high school students, such activities are appropriate only if they will recruit students to the proposing institution(s) and if the high school students will be entering and progressing through undergraduate STEM majors within the five-year period of the proposed project. In most cases, this requires that outreach and recruitment efforts be limited to juniors and seniors in high schools that have a history of sending their graduates to the proposing institution(s).

Outcomes

The outcomes expected of funded Type 1A and Type 1B STEP projects include all of the following:

- Significant progress toward achieving the specific proposed increases in the number of students who are United States citizens or permanent residents obtaining STEM degrees at institutions with baccalaureate degree programs or completing associate degrees or completing credits in STEM fields at a community college toward transfer to a baccalaureate degree;
- A description of the activities that have been institutionalized as a result of the project;
- A description of the expectations, following the end of the grant period, for continued efforts at the institution to increase the number of STEM degrees in established or emerging fields at institutions with baccalaureate degree programs or completing associate degrees in established or emerging fields or completing credits in STEM fields at a community college toward transfer to a baccalaureate degree;
- An evaluation, using the preliminary indicators and benchmarks defined in the proposal, that informs the institution and others about the effectiveness of specific implementation strategies; and
- Effective dissemination of project processes and results to the broader community.

All Type 1A and Type 1B grants will be reviewed during their third year to determine whether satisfactory progress has been made, with continued funding contingent on the result of the third-year review.

In addition to the individual project evaluation, Principal Investigators of all Type 1 awards will be required to participate in evaluation activities related to the Directorate for Education and Human Resource's program monitoring and program evaluation.

NSF deadline: September 25, 2012

ORD deadline: June 22, 2012

Number of applications per institution: An institution that awards baccalaureate degrees is allowed to submit only one Type 1 proposal, or to be part of only one consortium submitting a Type 1 proposal.

Estimated number of awards: 15-20 Type 1 awards

Anticipated funding amount: $30,000,000 per year

Cost sharing: Inclusion of voluntary committed cost sharing is prohibited

Indirect costs (F&A) limitations: Not Applicable

Other budgetary limitations: Grant duration is expected to be 5 years for Type 1A and 1B proposals

Grant duration for Type 1A and 1B awards is expected to be 5 years, with the final 2 years of funding contingent on determination that satisfactory progress has been made by the awardee during the first 3 years. The level of funding for which institutions can apply is based on their total enrollments of undergraduate students (full-time equivalents). Institutions enrolling 5,000 or fewer undergraduate students may request up to a total of $500,000 for a period of five years, those enrolling between 5000 and 15,000 undergraduate students may request up to a total of $1.0 million for five years, and those enrolling more than 15,000 undergraduate students may request up to a total of $2.0 million for five years. Consortia of institutions are eligible to request funds within these limits based on their total, combined undergraduate enrollment. Such consortial requests must

provide clear evidence that the proposed partnership is both meaningful and important to the success of the project. In addition, consortia for which the lead institution is one that awards baccalaureate degrees may request additional funds if the consortium includes one or more institutions that award only associate degrees, and if the institution(s) that awards associate degrees has a leadership role in the project and will receive significant funding under the request. In such cases the total that may be requested is raised from $500,000 to $600,000, or from $1.0 million to $1.2 million, or from $2.0 million to $2.5 million according to the guidelines above based on the total enrollments of undergraduate students (full-time equivalents). For Type 2 proposals, individuals or organizations are eligible to request up to a total of $1.5 million.

For both Type 1 and Type 2 proposals, the budget should include provisions for the Principal Investigators and several additional project personnel to attend an annual meeting of STEP Principal Investigators in the Washington, DC area.

To view the full solicitation please click on the link below.

To meet NSF's **September 25, 2012** deadline, please send the following information to Regina Bartolone, Associate Director, Office of Research Development, regina_bartolone@unc.edu, in ONE document (either PDF or Word) by no later than **June 22, 2012**:

1. A three to five page project summary
2. CVs of the PIs (please limit each CV to four pages)
3. A list of potential collaborators both internal and external to UNC
4. A preliminary budget
5. The names of three UNC-CH faculty member who could speak knowledgeably about the project in the event of a need for an internal review. Please DO NOT include the names of chairs or deans on this list. Collaborators named on the project may not serve as reviewers.

Please do not hesitate to contact us with questions at either regina_bartolone@unc.edu or 962-7504

Tina -

I write to ask if it is possible to add the Teaching Awards Banquet to the list of things you check before scheduling the

Sorry I need to be at the Teaching Awards banquet on April 26, but will attend the Friday meeting for A&S Foundation.

Bobbi

(Tammy McHale said to write to you.)

Dick,
I noticed the WaPo piece here (what news I read online while traveling is the WaPo). Interesting. I point out, however, the article's reference to a continued lack of a model for revenue (for anyone: university, Coursera, or faculty). The flipped classroom aspect has a certain logic to it, and one that some faculty may want to pursue. This sort of extreme altruism might look nice, but I'm not sure it will persist without some reward for somebody.

On 7/17/2012 11:20 AM, Kohn, Richard H wrote:
Bobbi and Wayne,

The articles below from today's Washington Post and New York Times provide some updates to the issue of developing online courses at UNC, and my own interest in putting together an American military history course along the lines that I taught for History and PWAD, for online instruction. It seems that something of a race is developing, and that the Coursera Company started by the two Stanford computer science professors is moving to sign up other universities--now another dozen, including Duke and UVA. I know Wayne's away and we'll discuss in September when I'm back in Chapel Hill. I'll keep you both informed about anything further that I find. At the end of August, I'll meet with my PhD student, who lives in Duluth, about helping--he's taught military and American history online for several years.

Very best to you both,

Dick

NEW YORK TIMES
July 17, 2012
Universities Reshaping Education on the Web
By TAMAR LEWIN<http://topics.nytimes.com/top/reference/timestopics/people/l/tamar_lewin/index.html>

As part of a seismic shift in online learning that is reshaping higher education, Coursera<https://www.coursera.org/>, a year-old company founded by two Stanford University<http://topics.nytimes.com/top/reference/timestopics/organizations/s/stanford_university/index.html?inline=nyt-org> computer scientists, will announce on Tuesday that a dozen major research universities are joining the venture. In the fall, Coursera will offer 100 or more free massive open online courses, or MOOCs, that are expected to draw millions of students and adult learners globally.

Even before the expansion, Daphne Koller<http://ai.stanford.edu/~koller/bio.html> and Andrew Ng<http://ai.stanford.edu/~ang>, the founders of Coursera, said it had registered 680,000 students in 43 courses with its original partners, Michigan, Princeton, Stanford and the University of Pennsylvania.

Now, the partners will include the California Institute of Technology; Duke University; the Georgia Institute of Technology; Johns Hopkins University; Rice University; the University of California, San Francisco; the University of Illinois, Urbana-Champaign; the University of Washington; and the University of Virginia, where the debate over online education was cited in last's month's ousting — quickly overturned — of its president, Teresa A. Sullivan. Foreign partners include the University of Edinburgh in Scotland, the University of Toronto and EPF Lausanne, a technical university in Switzerland.

And some of them will offer credit.

"This is the tsunami," said Richard A. DeMillo<http://www.scs.gatech.edu/people/richard-demillo>, the director of the Center for 21st Century Universities at Georgia Tech. "It's all so new that everyone's feeling their way around, but the potential upside for this experiment is so big that it's hard for me to imagine any large research university that wouldn't want to be involved."

Because of technological advances — among them, the greatly improved quality of online delivery platforms, the ability to personalize material and the capacity to analyze huge numbers of student experiences to see which approach works best — MOOCs are likely to be a game-changer, opening higher education to hundreds of millions of people.

To date, most MOOCs have covered computer science, math and engineering, but Coursera is expanding into areas like medicine, poetry and history. MOOCs were largely unknown until a wave of publicity last year about Stanford University's free online artificial intelligence course attracted 160,000 students from 190 countries. Only a small percentage of the students completed the course, but even so, the numbers were staggering.

"The fact that so many people are so curious about these courses shows the yearning for education," said Molly Corbett Broad<http://www.acenet.edu/AM/Template.cfm?Section=ACE_Experts_List&Template=/CM/HTMLDisplay.cfm&ContentID=34060>, president of the American Council on Education. "There are going to be lots of bumps in the road, but this is a very important experiment at a very substantial scale."

So far, MOOCs have offered no credit, just a "statement of accomplishment" and a grade. But the University of Washington said it planned to offer credit for its Coursera offerings this fall, and other online ventures are also moving in that direction. David P. Szatmary, the university's vice provost, said that to earn credit, students would probably have to pay a fee, do extra

assignments and work with an instructor.

Experts say it is too soon to predict how MOOCs will play out, or which venture will emerge as the leader. Coursera, with about $22 million in financing, including $3.7 million in equity investment from Caltech and Penn, may currently have the edge. But no one is counting out edX<http://www.edxonline.org/>, a joint venture of Harvard and the Massachusetts Institute of Technology, or Udacity<http://www.udacity.com/>, the company founded by Sebastian Thrun<http://robots.stanford.edu/> of Stanford, who taught the artificial intelligence course last year.

Each company offers online materials broken into manageable chunks, with short video segments, interactive quizzes and other activities — as well as online forums where students answer one another's questions.

But even Mr. Thrun, a master of MOOCs, cautioned that for all their promise, the courses are still experimental. "I think we are rushing this a little bit," he said. "I haven't seen a single study showing that online learning is as good as other learning."

Worldwide access is Coursera's goal. "EPF Lausanne, which offers courses in French, opens up access for students in half of Africa," Ms. Koller said. Each university designs and produces its own courses and decides whether to offer credit.

Coursera does not pay the universities, and the universities do not pay Coursera, but both incur substantial costs. Contracts provide that if a revenue stream emerges, the company and the universities will share it.

Although MOOCs will have to be self-sustaining some day — whether by charging students for credentials or premium services or by charging corporate recruiters for access to the best students — Ms. Koller and university officials said that was not a pressing concern.

About two-thirds of Coursera's students are from overseas, and most courses attract tens of thousands of students, an irresistible draw for many professors. "Every academic has a little soapbox, and most of the time we have five people listening to us," said Scott E. Page<http://www.cscs.umich.edu/~spage/bio.html>, a University of Michigan professor who taught Coursera's model thinking course and was thrilled when 40,000 students downloaded his videos. "By most calculations, I had about 200 years' worth of students in my class."

Professors say their in-class students benefit from the online materials. Some have rearranged their courses so that students do the online lesson first, then come to class for interactive projects and help with problem areas.

"The fact that students learn so much from the videos gives me more time to cover the topics I consider more difficult, and to go deeper," said Dan Boneh, a Stanford professor who taught Coursera's cryptography course.

The Coursera contracts are not exclusive, so many of its partner universities are also negotiating with several online educational entities.

"I have talked to the provost at M.I.T. and to Udacity and 2Tor<http://2tor.com/>," which provides online graduate programs for several universities, said Peter Lange, the provost of Duke University. "In a field changing this fast, we need flexibility, so it's very possible that we might have two or three different relationships."

One looming hurdle is overcoming online cheating.

"I would not want to give credit until somebody figures out how to solve the cheating problem and make sure that the right person, using the right materials, is taking the tests," said Antonio Rangel, a Caltech professor who will teach Principles of Economics for Scientists in the fall. Udacity recently announced plans to have students pay $80 to take exams at testing centers operated around the world by Pearson, a global education company.

Grading presents some questions, too. Coursera's humanities courses use peer-to-peer grading, with students first having to show that they can match a professor's grading of an assignment, and then grade the work of five classmates, in return for which their work is graded by five fellow students. But, Ms. Koller said, what would happen to a student who cannot match the professor's grading has not been determined.

It will be some time before it is clear how the new MOOCs affect enrollment at profit-making online institutions, and whether they will ultimately cannibalize enrollment at the very universities that produce them. Still, many professors dismiss that threat.

"There's talk about how online education's going to wipe out universities, but a lot of what we do on campus is help people transition from 18 to 22, and that is a complicated thing," said Mr. Page, the Michigan professor, adding that MOOCs would be most helpful to "people 22 to 102, international students and smart retired people."

Eventually, Ms. Koller said, students may be able to enroll in a set of MOOCs and emerge with something that would serve almost the same function as a traditional diploma.

"We're not planning to become a higher-education institution that offers degrees," she said, "but we are interested in what can be done with these informal types of certification."

WASHINGTON POST
U-Va. takes major step in online education
By Daniel de Vise<http://www.washingtonpost.com/daniel-de-vise/2011/02/28/ABCdyJL_page.html>, Updated: Tuesday, July 17, 2:00 AM

The leadership crisis<http://www.washingtonpost.com/local/education/u-va-upheaval-18-days-of-leadership-crisis/2012/06/30/gJQAVXEgEW_story.html> that rent the University of Virginia last month arose partly out of fear that other elite schools were moving into the vanguard of a coming digital revolution, and that U-Va. stood to be left behind.

That argument, advanced by the leader of the university governing board, turned out to be based on a faulty premise. Almost no one on campus knew at the time the breadth of the collective investment that U-Va. was already making in online education.

On Tuesday, the investment will yield a major payoff. The university is joining a prestigious online consortium led by two Stanford University professors. With one stroke, the Virginia public flagship heads toward the front of a potentially transformative movement to online learning on a global scale.

The university's participation in Coursera<https://www.coursera.org/>, an initiative to offer free online courses to the masses, answers a criticism that loomed large in the recent power struggle in Charlottesville that began with the abrupt resignation of President Teresa Sullivan<http://www.washingtonpost.com/local/education/teresa-sullivan-the-ousted-u-va-leader-who-may-regain-the-post/2012/06/25/gJQAcSVx2V_story.html> and ended with her reinstatement.

U-Va. Rector Helen Dragas<http://www.washingtonpost.com/local/education/helen-dragas-the-leader-who-forced-out-u-vas-president/2012/06/21/gJQA4ds5sV_story.html>, who leads the governing Board of Visitors, thought university leaders had ignored the Internet at their peril, like the music industry and media companies before them. In the months preceding her attempt to oust Sullivan, Dragas had read various articles about a coming online "tsunami" that would upend higher education, e-mailing one to a board colleague under the heading "why we can't afford to wait."

As it turns out, university leaders weren't waiting.

Officials from U-Va.'s Darden School of Business first contacted Coursera in April, after learning that the Silicon Valley start-up had attracted venture capital and was expanding from Stanford to other top-tier universities, according to Milton Adams, the university's vice provost for academic programs. A Darden delegation visited Coursera in early June, a few days before Sullivan resigned.

In the ensuing debate, Dragas singled out an apparent lack of online vision at U-Va., which, she reasoned, seemed to have "no centralized approach" for online education.

That critique gave new urgency to the Coursera partnership. Last week, university officials contacted Daphne Koller, co-founder of the initiative, and negotiations accelerated. U-Va. signed a contract over the weekend. Its participation will require no financial investment from U-Va., except for staff time, and yield no revenue for the university.

Founded in fall 2011, Coursera offers a platform for partner universities to experiment with a vast global audience. Students earn no college credit and the universities make no money. But

many in higher education see future potential for both. More than 680,000 students from 190 countries have taken Coursera classes.

"These are some of the best universities in the United States," Adams said. "This is a great opportunity for us to experiment ourselves, and to try to learn from our colleagues."

Over the past decade, online instruction has exploded in higher education. But the nation's top universities have been slow to embrace online for core undergraduate and graduate programs. The movement seemed at odds with the residential, dialectical learning experience that is their chief product.

Now, opposition is melting away. A compelling body of research has shown that some online initiatives yield improved outcomes at reduced cost, an irresistible proposition.

"We don't want to be another industry that didn't see change coming and, because they didn't see it in time, they're dead," said James Dean, dean of the business school at the University of North Carolina, which is known for its online experimentation.

Any lingering doubts were swept away in May, when Harvard and MIT announced a $60 million partnership to offer free online courses to the public under the edX brand.

Coursera, chief rival to edX, is responding Tuesday by expanding from four institutions to 16. The new partners include Johns Hopkins University<http://www.washingtonpost.com/local/education/colleges-looking-beyond-the-lecture/2012/02/03/gIQA7iUaGR_story.html>, the University of Illinois, Duke University and CalTech.

"I think people are recognizing that this kind of experience is where a lot of the future of higher education lies," said Koller, a Stanford computer scientist.

EdX and Coursera allow top schools to expand their global brand and share their intellectual capital with the world in the manner of academic missionaries. Perhaps as important, the online laboratories allow each institution to cultivate an internal digital culture.

"Simply put, online learning can substantially improve on-campus learning as well," said Anant Agarwal, president of edX. "The way we educate students really hasn't changed much in centuries."

Some educators suggest that the global online platforms offer more flash than substance, and that financial benefits for schools are dubious.

"There's no income from it. Nobody's made a case that there will be any income from it," said Marva Barnett, director of the Teaching Resource Center at U-Va. "Why is this such a desirable thing?"

Like many of its peers, U-Va. has lacked a central approach to online instruction. Until this month, no one had taken an inventory of the school's online offerings.

Now, faculty are racing to take stock, and the emerging digital portrait is surprisingly rich. U-Va. offers at least 11 fully online degrees, all at the graduate level, and 15 professional certificates. Scores of undergraduate classes are taught partly online, and nearly every professor conducts at least some class business over the Internet.

"Almost all the faculty at U-Va. are doing it. The breadth and scope are shocking," said William Guilford, an associate engineering professor who completed a quick tally of the university's online efforts last week with a 53-member task force.

Sullivan has an ambitious plan to retool introductory courses as "hybrids," replacing much of the human labor with technology and freeing professors to focus on higher-level classes. Her initiative would go further than most elite universities have dared in replacing human instructors with software.

Partly in response to Dragas, faculty leaders have announced a campus-wide "challenge," offering $10,000 grants to professors who draw up "technology-enhanced" courses as a way to jump-start Sullivan's initiative. The deadline is midnight Thursday.

Dragas declined an interview but offered a prepared statement that seemed to applaud the university's efforts.

"The rapidly escalating application of technology in the delivery of higher education, especially by well-respected institutions, is a significant development — one worthy of substantive inquiry that should include appropriate input from internal constituencies and expert resources," she said.

"Without the benefit of such a study, the Board of Visitors has certainly not formed an opinion about the University's future in this area. The Board's primary interest is in the University's development of a strategy that promotes the highest order of excellence in the quality of our students' learning and enrichment, especially in a resource-constrained environment."

Over the past few years, several initiatives have pushed online instruction into more college classrooms.

One is known as instructional "flipping," an adaptation of the age-old classroom lecture that is fast taking root in K-12 schools and colleges. Students view recorded lectures as homework, freeing professors to use class time for discussion, group exercises and problem-solving.

Another is "computer-mediated" instruction, which asks students to complete courses online in a series of self-paced lessons, a technique Virginia Tech<http://www.washingtonpost.com/local/education/at-virginia-tech-computers-help-solve-a-math-class-problem/2012/04/22/gIQAmAOmaT_story.html> has pioneered in introductory math. Some skeptical parents, who pay tens of thousands of dollars a year in tuition, wonder whether their children are getting their money's worth from this arrangement. But advocates say the model can yield vast savings for a university without sacrificing student achievement.

"The student learning has in most cases improved, and it certainly hasn't diminished," said William "Brit" Kirwan, Maryland state university chancellor. "This highly interactive online education is going to be a dominant trend in higher education. Is it going to replace every course in the university? No."

The newest development is the wave of global online platforms, which give Harvard, Stanford and now U-Va. a stake in a movement that Dragas last month had suggested was an "existential threat" to the flagship university.

I'm seeing this as a budget allocation question within Undergraduate Education, so it is completely up to you. Looking back across the past 3 years, we average approximately 10 FYS with GRCs per year, so the cost would average $7500. Looking at our current FYS spreadsheet (attached), I see two alternatives: 1. We could take the money from Lupton and Cobey. 2. We could try to make a change in the Davis money and devote it to GRCs rather than new courses.

I support this request and agree that it can be implemented for the fall 2012 semester. Before we extend this strategy to spring 2013, or make it standard policy,
I ask that the ASPSA faculty advisory committee have this as an item on their next agenda for thier input and consideration.
I apprecaite your committment, Lee, to personally sign off on these requests.

Subject: Elite Athletes on International Teams

Hi Bobbi,
Yesterday I met with Robert Mercer, Susan Maloy, and Tony Yount about the small number of athletes who, over time, play on international teams. As you know, these students are absent from campus for extended time and need to be enrolled as full time students in order to play for UNC when they return to campus. There are usually a very small number of these students and they have a unique opportunity to represent the United States (in most cases) and UNC. This fall we will have students playing for the Womens' Soccer World Cup in Japan and Greece, one Olympic athlete, and several on the Under 21 National Field Hockey Team. We discussed options to determine a protocol to address this issue when it arises. Our proposal is that we would like to be somewhat flexible with the way students use their allotted 18 hours of CCOs that may count toward their degree. We will hold all students to that standard but would like the flexibility of allowing them to take more than two on line courses in a semester, if necessary, to compete on one of these teams. Students eligible for me to sign off on the permission would include only those on national teams with international competitions. Beyond taking CCOs it will be the responsibility of the student to work with their instructors to communicate their situation, seek permission for necessary absences, and have a plan in place to complete all coursework. No staff member will intervene on their behalf with any faculty member. In any given year the number of these students should only be a "handful", however, this fall there are eight students who meet this criteria. Are you able to support this type of approach? As always, students will be encouraged to be proactive if they make such a choice to compete. I am available at any time if you wish to discuss this. Robert and colleagues will not move forward until we have your input.
Best,
Lee

> > The news reports look bad. But it's more of the same bad. We had an awful case of academic fraud. We know it was prevalent during our four-and-a-half year review period, and we've acknowledged that it's possible and even likely that the serious issues we identified might have gone back further than our review period. We started the review in 2007 because that's when the first course irregularities that came to our attention occurred. The further back you go, the less reliable and available the data are. The review showed us what the problems were, what the patterns were, who was responsible, and what we needed to do to fix it. We are cooperating fully with the Board of Governors panel, and we've said repeatedly that if the panel recommends further review, we'll certainly comply.
> > We're moving forward on multiple fronts to address the issues that have arisen from our review of African and Afro-American Studies, and I wanted to give you a report of those actions. We know we still have much to do to restore confidence in the University's academic integrity. While the most significant of our actions was to force the retirement of Julius Nyang'oro, we have affected many other changes that will ensure, going forward, that this never happens again.
> > The following changes and improvements have been guided by the multiple reviews that have been conducted in the last two years, including:
> > The Review of Courses in the Department of African and Afro-American Studies
> > Report on Academic Support Program for Student-Athletes
> > Independent Study Task Force Report
> > Faculty Executive Committee Report
> > Summer School policy changes
> > **Changes in the Academic Support Program for Student Athletes**
> > Over the summer, College Dean Karen Gil, Athletic Director Bubba Cunningham and I have been seeking ways to strengthen programs that address academics, athletics and the intersection of the two. Our plans reflect excellent ideas from Senior Associate Dean Bobbi Owen, members of the Faculty Executive Committee and other faculty. I think they are also consistent with the recommendation in the 2011 report by ECU Chancellor Steve Ballard's UNC Task Force on Athletics and Academics that Academic Affairs must be "fully in control" of academic support services related to athletics.
> > Our plans, which we are implementing now, include:
> > <!--[if !supportLists]-->• <!--[endif]-->**Transforming the Academic Support Program for Student Athletes:** In order to move forward with new best practices, the College is reorganizing this essential program and launching a national search for a new director; the search committee is chaired by Steve Matson, dean of The Graduate School. The new ASPSA director will report solely to the College and have the authority to manage the program's budget. Harold Woodard, director of the Center for Student Success and Academic Counseling, is serving as interim director of the ASPSA; former director Robert Mercer is now working in the James M. Johnston Center for Undergraduate Excellence.
> > <!--[if !supportLists]-->• <!--[endif]-->**Expanding the Summer Bridge Program:** The College will expand its successful,

summer residential academic support program to incorporate student-athletes who may need assistance with their personal and academic transition from high school to the University community.

- <!--[if !supportLists]--> <!--[endif]--> **Expanding Academic Advising:** Each student-athlete is assigned a primary academic advisor through the Academic Advising Program. The College will strengthen the role of such advisors by adding two new positions to monitor and oversee academic advising for student-athletes. Advising will have an office in the Loudermilk Center.
- <!--[if !supportLists]--> <!--[endif]--> **Coordinating and clarifying the relationship between Academic Advising and the Athletic Support Program for Student Athletes.** The College will enhance its training and supervision of academic advisors and academic counselors to strengthen their distinct and complementary roles and responsibilities.
- <!--[if !supportLists]--> <!--[endif]--> **Strengthening faculty involvement in athletics.** We are strengthening relationships among the Academic Support Program for Student-Athletes Faculty Advisory Committee, the Elected Faculty Athletics Committee of the Faculty Council and the faculty representative to the ACC/NCAA Representative. Professor Joy Renner, the new chair of the Faculty Athletics Committee, spent the summer meeting with members of the committee, the administration and Athletics Department to discuss how the committee can better ensure academic integrity and full integration of student-athletes into the life of the University. To meet the complex challenges associated with balancing academic and athletic excellence, it's essential that faculty be visibly engaged in relevant policies and practices.

Improvements in the Department of Athletics

New Athletic Director Bubba Cunningham has been working closely with Dean Karen Gil as they consider improvements in their respective areas. He and Karen are determined to strengthen the connections between academics and athletics.

Bubba recently completed a comprehensive analysis of the department and has reorganized to strengthen the department. As a result, he has hired two new staff members.

Senior Associate Athletic Director Vince Ille comes from the University of Illinois where he was first an assistant athletic director for compliance and then a senior AD. He will be the liaison with academic advising and counseling for student-athletes. Bubba has made clear that these functions remain independent of athletics and are part of the College of Arts & Sciences. Vince will coordinate with the College. He will also supervise the compliance program and work with staff to minimize the risk of NCAA infractions.

Associate Director Paul Pogge was associate AD for strategic planning and partnerships at the University of Denver. He will assist in coordinating student-athlete eligibility, the NCAA's Academic Progress rankings, risk assessment and summer camps.

Selection of firm to review and certify academic controls
We have selected Baker Tilly Virchow Krause, LLP, a national accounting and management consulting firm to review and certify new policies and procedures put in place in the African and Afro-American Studies department, the College of Arts and Sciences and the Summer School.

As you know, several members of our Board of Trustees have been instrumental in helping us identify an outside firm. Our goal with this, as with all the improvements we've put in place, is to prevent any recurrence of what has happened in Africa and Afro-American Studies. This is one more important safeguard the University can undertake to be sure this doesn't happen again.

FEC subcommittee

The Faculty Executive Committee issued a report that supported the administration's approach to the review. I met with them last week and discussed their recommendations, next steps and an action plan. I let them know that a reorganization was in the works for the Academic Support Program for Student-Athletes and that we intended to eliminate the ambiguity between advising and counseling. We also discussed my appointing outside academic experts to help examine the appropriate future relationship between academics and athletics at the University.

Hunter Rawlings to lead panel of outside experts

I'm pleased to tell you that Hunter Rawlings, president of the Association of American Universities, has agreed to lead the effort to help us examine the appropriate future relationship between academics and athletics at the University.
I told the FEC that I especially appreciate this recommendation because it acknowledges the complicated relationship between academics and athletics. It's a challenge to find the right balance, but we have to find it. In some ways, because of everything that's happened here, we have the opportunity to do that. It allows us to look at ourselves now and to project where we want to be in the future.
As you know, the AAU is the association of 61 preeminent public and private research universities. We try to focus on the important work that our universities do for the world, but increasingly, those of us at large public research institutions are spending time on athletics. I convinced Hunter that this was important work that we could do together … not just for Carolina, but for all major research universities that are struggling to get it right in athletics.
Hunter's credentials are perfect for leading this effort. He's a member of the American Academy of Arts and Sciences. He has served as president of the University of Iowa and Cornell University. His degrees are in classics – from Haverford and a Ph.D. from Princeton. And while he was at Haverford, he was the star of the men's basketball team, and he pitched for the baseball team.
We are planning a September launch of this effort. Our goal is engage the entire community in a meaningful discussion and analysis of the role of athletics in the life of the University.
A wide range of improvements in the department, the College and the University

The Department of African and Afro-American Studies now has outstanding new leadership, and the department, College of Arts

and Sciences and Summer School all have new policies and procedures in place to prevent irregularities going forward. We reviewed those with you at your trustee meeting in May.

Moving forward

A lot is happening now, and we are engaging people across campus in these discussions. I am determined that are going to be a stronger university as a result of this. Athletics is important to this university and to all great public research universities. So we have to find that right balance.

As always, I welcome your perspectives.

Dear Provost Carney:

I hope this email finds you well.

I have been working with Dr. Crimmins and colleagues across campus on an NSF grant proposal to encourage undergraduate retention and graduation in the STEM disciplines. This grant, should it be funded, will bring in two million dollars to help students traditionally disadvantaged in the STEM disciplines earn a baccalaureate degree.

Attached you will find the current version of the project description. There are still some details missing in the attached document (we are awaiting a response from our external evaluator), but there is enough information there to give you a clear understanding of the program.

I am currently collecting **letters of support**. As you know, letters of support are an important part of the grant proposal process and I am hoping that you might consider writing such a letter. Your commitment to this endeavor is greatly valued and would be most appreciated. Attached, I have provided a draft letter which you may edit and update as you see fit. Dr. Crimmins is the PI and, as such, the letter is addressed to him.

If you are able to write a letter, **please send it to me as a PDF by September 10th 2012**.

I truly appreciate your support and consideration. I am glad to meet should you have any questions.

Sincerely, Cynthia

Cynthia Demetriou • Director for Retention

Description: Description: Description: signature-1

Science, Technology, Engineering, and Mathematics Talent Expansion Program (STEP)

NSF Grant
Proposal Type: 1A

Due Date: September 25, 2012
Program Title: *Transfer Summer Bridge: STEM Talent Expansion Program*

OVERVIEW

Through an academically rigorous summer bridge experience, the *Transfer Summer Bridge: STEM Talent Expansion Program* will increase the number of community college junior transfers who graduate with STEM degrees from 55 to 100 students annually; a 82% growth over baseline.

The proposed activity offers significant intellectual merit and broad impact. The program will contribute to the knowledge base on broadening participation of traditionally disadvantaged populations in science, technology, engineering, and mathematics (STEM). It will also encourage widespread adoption and institutionalization as an evidence-based practice for promoting STEM undergraduate degree obtainment.

Embracing an unwavering commitment to excellence as a research university, the University of North Carolina at Chapel Hill (UNC-CH) is uniquely positioned to be a model of innovation in STEM undergraduate education. With light and liberty as its founding principles, the University has charted a bold course of leading change to improve society and to help solve the world's greatest problems. The program presented in this proposal extends these founding principles to meet the demands of a global society increasingly reliant upon science and technology.

To develop a national workforce prepared to bolster a healthy economy, meet demands for national security, and elevate the quality of life and standard of living in the United States, this program will ensure more non-traditional students earn baccalaureate degrees within STEM disciplines. This will be accomplished by improving the transition, academic performance, and retention of transfer students including first-generation college students, rural students, veterans, and students from low-income families. The program will enhance participants' critical thinking and problem solving skills as well as introduce transfer students to the academic rigor of scientific study at a research institution. Participants will engage in high impact educational practices, including conducting undergraduate research, interacting with faculty in a small class environment, and participating in a residential living-learning community. From this program, new transfer students will learn how to navigate a large, public university as well as appreciate curricular and co-curricular expectations and opportunities. The program will provide intentional academic advisement and career development promoting the acquisition of critical skills and competencies which will directly translate into employability in STEM fields.

The centerpiece of this program is a new summer bridge experience for transfer students. This experience is based on UNC-CH's Summer Bridge Program, a proven model for first-year student success operating at the University for more than 30 years. While summer bridge programs are a best practice nationally recognized to encourage freshman student success, few bridge programs focus specifically on transfer student success. This program will build off the knowledge and experience of the 30-year success of the UNC-CH Summer Bridge Program while chartering new territory for summer bridge programs overall by applying the summer bridge experience to junior transfer students pursuing STEM disciplines. The program will become a new model for transfer student success to be adapted at universities across the country. Program participants will be community college junior transfer students intending to major in a STEM discipline at UNC-CH. The program will cover tuition, fees, housing and living expenses during the summer the students are enrolled in the program so that they may fully concentrate on transitioning to the University and excelling in their summer courses.

The role of faculty and innovative instruction in STEM disciplines are key features of this program. The program includes classroom-level interventions to develop more effective pedagogical practices in STEM courses. Student learning in STEM can be vastly improved when instructors move from traditional, transmission-style instructional practices to student-centered, interactive instruction (Handelsman et al., 2004). This program includes faculty workshops and curriculum development which will support a conceptual shift from teacher- to learner-centeredness and the use of evidence-based instructional practices. The program is designed with a continuous evaluation plan which will provide early and frequent empirical feedback which will enable the program to adapt and evolve based on the evidence of what works to improve teacher effectiveness and accelerate student performance.

JUSTIFICATION/NEED FOR PROGRAM

As global competition increases and as the demographics of the United States change, the importance of increasing the graduation rate of STEM students from diverse backgrounds cannot be overstated (Lopez, 2006). In particular the success of community college transfer students, first generation college students, students from low-

income families, rural students, and students from historically underrepresented populations are critical to building a strong base of students in the STEM fields. The number of students transferring from two-year colleges to four-year Universities is rising (Ishitani, 2008). Many low-income, first-generation college students begin their studies at a two-year community college (Engle & Tinto, 2008). According to a report from the Pell Institute, low-income, first-generation students were less likely to persist in mathematics and science majors than their peers (Engle & Tinto, 2008). An institutional self-study of undergraduate student success at UNC-CH (Retention Task Force, 2010) revealed that community college transfer students at UNC-CH are among the least likely to graduate and are more likely than other students to be first generation and from a low-income family. The results of this self-study reflect a national trend of low four-year degree completion rates among transfer students.

Transfers are more likely to be non-traditional age college students and underprepared for the academic rigors of the research university. Transfer students commonly experience dissonance between the academic rigor and culture of their previous institution and their new university. Transitioning to a university where the course work is often at a much higher level than their previous institution and where other students have already formed networks of support contribute to transfers feeling discouraged and academically inadequate (Cejda, 1997; Hills, 1965; Laanan, 1996, 2001; Townsend, 2008; Townsend & Wilson, 2006). Many transfer students in STEM majors experience a decline in academic performance, face challenges connecting with students and staff, and perceive scholarship, internship, or lab opportunities to be inaccessible, discouraging them from continuing in the sciences (Ishitani, 2008). Due to these factors, many transfer students in STEM feel that science majors in the university environment are designed to discourage students from persisting rather than to encourage interest, skills-development, and efficacy (Chang, 2006). Transfer students graduate at a significantly lower rate and are likely to drop their STEM major during or shortly after their first semester at the University. To increase the overall number of college graduates with STEM degrees, it is necessary to increase the persistence of transfer student STEM majors and offer supportive pathways to degree attainment.

Undergraduate education in the STEM disciplines is critical to the development of human resources. Innovative programming in STEM undergraduate education will prepare current students to meet future workplace expectations. This program will serve as a platform to create a stronger and more well-informed workforce, not just for North Carolina, but for the nation. The program proposed here will serve as a model of best practice for STEM education and for transfer student success to be replicated at institutions of higher education across the country.

Compatibility with University Mission

The University of North Carolina at Chapel Hill has consistently invested knowledge and resources to enhance access to learning and to foster the success and prosperity of each rising generation. UNC-CH is committed to college access and affordability as well as the engaged learning and success of all admitted undergraduates. Increasing the number of transfer students graduating in STEM areas is compatible with UNC-CH's educational mission to teach a diverse community of undergraduates to become the next generation of leaders.

PRIOR EFFORTS TO INCREASE INTEREST AND SUCCESS IN STEM

Since 2006, the University has been redesigning large enrollment STEM courses to increase undergraduate interest and success in STEM. Course redesign and evidence-based instructional practices are high-impact approaches to engaging students at the course level. Redesign efforts began with a precalculus course in the Mathematics Department. Reports on more recent course redesign projects in biology and physics are available at http://cfe.unc.edu/reports/. A new initiative sponsored by the Center for Faculty Excellence (CFE) is providing support for the redesign of additional courses in astronomy, biology, chemistry, and mathematics. Information on the CFE100+ projects is available at http://cfe.unc.edu/100plus/lcrgp.html. The *Transfer Summer Bridge: STEM Talent Expansion Program* will continue these efforts around evidence-based instructional practices and course redesign, by providing faculty workshops for instructors of STEM courses.

The University also has a laudable history of providing opportunities to foster the academic success of students from historically-underserved communities who are interested in the sciences. The foci of these efforts have been to diversify the health-sciences and STEM teaching workforces as well as to create pathways to doctoral study and research careers. Many of these efforts are designed as enrichment programs that encourage minority and low-income students to enroll and graduate from STEM-related programs. The efforts listed below have a record of producing graduates and professionals in the STEM-fields, some with far-reaching results spanning a period of more than 20 years. Hallmarks of these programs include individualized and cohort mentoring opportunities with graduate students, faculty, and professionals around a STEM-related project; rigorous academic training in the sciences; and funding for research and training opportunities over the summer. Most programs are supported or sponsored by a professional school or academic department at the University.

Relevant prior efforts include but are not limited to:

- Alliance for Graduate Education and the Professoriate (AGEP)
- Medical Education Development (MED) Program (School of Medicine)
- North UNC-CH Health Careers Access Program (NC-HCAP)
  Summer Enrichment Program
- Summer Public Health Fellowship Program (Gillings School of Global Public Health)
- Increasing Diversity and Enhancing Academia (IDEA) Program (UNC Institute for the Environment)
- North UNC-CH Alliance to Create Opportunity Through Education (NC OPT-ED)
- Office for Undergraduate Research
  - Future Scientists and Clinicians Fellowship
  - Science and Math Achievement and Resourcefulness Track (SMART) Program
- UNC Baccalaureate Education in Science and Teaching (UNC BEST) Program
  (Departments of Biology, Chemistry, Geological Sciences, Mathematics, Physics and Astronomy; School of Education)

These programs are working to actively foster the academic success of students from historically-underserved communities who are interested in the sciences; however, none of these successful programs focus specifically on the unique needs of transfer students. To continue to increase the number of STEM graduates, it is necessary to begin to focuses directly on creating a pathway for transfer students to earn undergraduate degrees in STEM disciplines. Adding the *Transfer Summer Bridge: STEM Talent Expansion Program* to the list of programs above will be a significant first step towards creating this critical pathway. Furthermore, many of transfer bridge participants will likely transition directly into these programs; this direct pipeline will enable the university to leverage multiple initiatives working in partnership to create a greater impact and help with program institutionalization.

Though not focused on producing STEM graduates, the UNC-CH Student Transfer Excellence Program (C- STEP) has enabled more than 300 talented low- and moderate-income community college students to successfully transfer to UNC-CH from one of nine partner community colleges since its establishment in 2006. C-STEP participants engage in special events and academic advising at their community college and at UNC-CH to prepare them with the resources, perspectives and strategies to obtain a bachelor's degree from the University. Many C-STEP students endeavor to pursue STEM-related majors and careers. The C-STEP Program will be a key partner in this new initiative.

The *Transfer Summer Bridge: STEM Talent Expansion Program* will build on the C-STEP infrastructure. Participants for the bridge program will be recruited through C-STEP's nine partner institutions:

Alamance Community College
Cape Fear Community College
Carteret Community College
Craven Community College
Central UNC-CH Community College
Durham Technical Community College
Fayetteville Technical Community College
Sandhills Community College
Wake Technical Community College

Working with these institutions increases the program's ability to make early connections with students before they transfer to UNC-CH. These connections will provide critical academic advising and build a foundation for a successful academic and social transition to the four-year University. The academic advisor and the program coordinator will visit with all admitted students at their community college prior to enrollment in the bridge program.

PROGRAM OVERVIEW

Increasing the STEM major completion rate of students from historically underrepresented populations requires a multifaceted approach including robust academic, financial, and social support (National Research Council, 2012). *Transfer Summer Bridge: STEM Talent Expansion Program* offers these critical supports as well as early intervention, engagement with faculty, high expectations, opportunity for growth, and leadership development.

Early Connections and Recruitment

Through the nine C-STEP partner community colleges, the *Transfer Summer Bridge: STEM Talent Expansion Program* will begin outreach and recruitment one year prior to participant transfer. The program will recruit 15 participants during the first year and grow to 25 participants by year five of the grant. Program participants will apply to UNC-CH early and will receive early notification of admission. The Program Coordinator will work directly with students while they are still enrolled in community college to determine appropriate course selection at the

community college as well as critical guidance on how to prepare, academically and socially, for the transition to the University.

Traditionally, junior transfer students begin their academic career at UNC-CH during the fall semester. This program will provide students with the supports and resources to enroll during summer sessions I and II (see Table 1. *Transfer Summer Bridge: STEM Talent Expansion Program* Overview). This will provide the opportunity for transfer students to become familiar with the academic rigor as well as the social and cultural climate of the University prior to their first semester of full-time enrollment.

The Program Coordinator and the Academic Advisor will partner with the Center for Faculty Excellence to offer faculty workshops on:

1. broadening the population of traditionally disadvantaged students in STEM disciplines
2. appreciating the needs of community college transfer students
3. strategies, tools, and resources to implement evidence-based instructional practices in STEM courses
4. culturally inclusive pedagogies in STEM

The Summer Bridge: Summer Sessions I and II

During summer sessions I and II, prior to their first semester of full-time enrollment, program participants will arrive at UNC-CH, live in a residential Living-Learning Community, enroll in 8-9 credit hours, and participate in curricular and co-curricular programming. The tuition, fees, and housing of program participants will be paid so that participants can focus exclusively on their academics and transition to the University. Students will participate in an orientation program as well as intensive academic advising, degree planning, and tutoring. During the first summer session, all participants will have two common courses: a STEM major course and a 1-credit course called "Navigating the Research University." During summer session I, students will also have a meeting with a faculty member in their department to choose an appropriate STEM course for summer session II.

During summer session II, all participants will take a 1-credit course called, "Critical Thinking and Problem Solving in the Sciences," as well as one course in their STEM major selected through one-on-one consultation in their academic department. Program management will work with the student and faculty to place the student in a paid part-time research position in an on-campus lab or research facility for the fall semester. Faculty members will mentor the participants through the research placement.

Throughout the summer, participants will engage in a University-wide orientation as well as a program-specific orientation. They will begin to form bonds with their cohort by participating in multiple curricular and co-curricular activities. These bonds and activities with peers will foster connected learning experiences. Active and connected-learning have been shown to significantly influence students' feeling of belonging and confidence within the academic environment and increase their desire to persist (Braxton et al., 2000).

Staying on Track: The Cohort and Living-Learning Community, Research Experiences, and Continued Common Coursework

Research has demonstrated that faculty-student and student-to-student interactions are critical to student success in STEM (Astin, 2005; Cole & Espinosa, 2008; Kuh & Hu, 199, 2001; Milem & Berger, 1997; Pascarella and Terenzini, 2005). With this in mind, the program will continue to create dynamic opportunities for students to learn from their peers and from one-on-one interactions with faculty members. This will occur by sustaining the cohort established in the summer throughout the academic year. Students will have the opportunity to continue to reside in the Living-Learning Community, will continue to have common coursework during the fall and spring semesters, and will continue to engage in part-time research/work in faculty labs or research centers. Research experiences with faculty members are shown to encourage undergraduate students' interest in and aptitude for STEM careers (Espinosa 2009; Hunter et al. 2006; Laursen et al., 2010; Seymour et al. 2004). Such experiences help students to develop the social connections, skills and knowledge contexts of STEM-career culture (Eagan, 2011).

Becoming Leaders: The End of the First Year

At the end of the first year, program participants will be encouraged to present at the campus symposium on undergraduate research as well as to apply for a summer undergraduate research fellowship (SURF). Participants will also be invited to apply to become a peer mentor for the incoming group of students. Two peer mentors will be hired to live in the community, mentor students, and attend and help facilitate summer activities. Mentors will receive training, be provided housing, and will receive a small stipend.

Table 1. *Transfer Summer Bridge: STEM Talent Expansion Program* Overview

Prior to Enrollment		
• The Program Coordinator and the Academic Advisor will visit community colleges and work with partners to provide students with guidance on community college course selection and how to prepare for transfer. • Participants will take Calculus I and Calculus II in community college. • Program participants receive early admission notice. • Program participants take AP Calculus Exam (paid for by program). The AP Exam will be used as a diagnostic measure to inform appropriate course placement. • The Program Coordinator and the Academic Advisor will work with the Center for Faculty Excellence to offer faculty workshops. • Students and faculty will be connected. Students will have the opportunity to interact with faculty and ask questions as well as discuss course selection and curricular offerings.		
ACTIVITIES	COMMON COURSEWORK	OPPORTUNITIES & INCENTIVES
Summer Session I		
Orientation Residence in on-campus Living-Learning Community Academic Advising and Degree Planning One-on-one meeting with faculty in major department to discuss STEM course selections	STEM major course (3-4 cr) EDUC 130: Navigating the Research University (1 cr)	Tuition, Fees, and Housing Individual and Group Tutoring
Summer Session II		
Placement in lab for fall and spring semesters Academic Advising and Degree Planning Residence in Living-Learning Community	STEM major course (3-4 cr) *Critical Thinking and Problem Solving in the Sciences* (1 cr)	Tuition, Fees, and Individual and Group Tutoring
Fall Semester		
Residence in Living-Learning Community Work in Lab Faculty Mentoring in Lab Academic Advising and Degree Planning Career Development	IDST 301: Junior Transfer Seminar (3 cr)	8 hours of paid lab work per week Individual and Group Tutoring
Spring Semester		
Residence in Living-Learning Community Work in Lab Faculty Mentoring in Lab Academic Advising and Degree Planning Career Development	Modes of Inquiry (1 cr)	8 hours of paid lab work per week Individual and Group Tutoring Present at campus symposium on undergraduate research Apply for SURF(Summer Undergraduate Research Fellow) Apply to be a peer mentor
Summer of 2nd Year		

Students with SURF funding work in lab and/or carry out supervised research. Two students chosen to be peer mentors live in the living-learning community to mentor the new group of transfer students who move into the community for their transfer bridge experience. Peer mentors provided housing and a small stipend.

KEY PROGRAM COMPONENTS

This program has been intentionally designed to respond to the unique needs of transfer students in STEM disciplines. Each fall 850 transfer students enroll at UNC-CH as full-time, degree-seeking undergraduates. At any given time, 20-25% of UNC-Chapel Hill's total undergraduate population is made up of transfer students. New transfer students are five times more likely to end up on academic probation after their first semester than any other student. Junior transfer students from community colleges are the least likely of all undergraduates to earn a degree from UNC-CH. In particular, junior transfers in STEM disciplines struggle to persist to degree completion. Table 2 defines the major challenges to student success that are the root causes of junior transfer student failure to persist in STEM degree programs. These causes have been identified through a University self-study (Retention Task Force, 2010) as well as through extensive interviews and discussions with students, faculty, and staff. In addition to the challenges to student success for transfer STEM majors, this table presents the programmatic components of the *Transfer Summer Bridge: STEM Talent Expansion Program* designed to meet each of these challenges.

Table 2. Challenges to STEM Degree Completion for Junior Transfer Students and Program Design

Challenge to Student Success	**Programmatic Component Addressing Challenge**
ACADEMIC	
students lack an integrated approach to scientific study	*Critical Thinking and Problem Solving in the Sciences* course
students struggle to apply their scientific knowledge to real-world problems	*Critical Thinking and Problem Solving in the Sciences* course
students struggle to move from memorization of scientific concepts to application	*Critical Thinking and Problem Solving in the Sciences* course
students lack pertinent knowledge regarding transfer credits and course selection	academic advising and consultation prior to transferring
ill-prepared for future course placement	assessment of prior knowledge to determine appropriate course selection (i.e.: all participants will take the AP Calculus Exam prior to enrollment; exam scores and individual consultations with faculty will inform course placement)
students take few courses in STEM during community college	community college outreach and early advisement concerning which courses to take prior to transfer (i.e.: participants will be advised to take some STEM courses in community colleges and required to take Calculus I and Calculus II while enrolled in community college)
junior transfer students frequently need to repeat or take lower-level coursework before moving on to upper-level courses; this delay puts them off track to graduate in two years	participants will receive early advisement in the community college to prevent this from happening; in cases in which it still occurs, students will be able to take the course(s) during the summer prior to enrollment
limited organizational, time management, and study skills	*Navigating the Research University* course
students unaware of or reluctant to use academic resources	*Navigating the Research* University course
PSYCHOSOCIAL	

negative self-perceptions; "impostor" syndrome	living-learning community, co-curricular engagement, faculty and peer mentoring
social integration	living-learning community, co-curricular engagement, faculty and peer mentoring
students perceive peers as competitive	participant cohort
ADMINISTRATIVE BARRIERS	
late registration/all courses gone	early admission/early registration
students need to take major courses in sequence and often "lose a semester" taking a low-level course or the first course in the major	identify and offer more courses, such as COMP 401, in the summer
semester limitations; students must meet cumulative major requirements in 4 semesters	summer coursework, intensive academic advising, and possible additional semester for students who need it
decentralized services	Program Coordinator and Academic Advisor provide direct referrals to campus services and resources
WORK AND LIVING CONDITIONS	
transfer students are more likely to commute to campus and work more hours	paid on-campus housing, participation in living-learning community, and financial incentives

Program Component Descriptions and Definitions

Active Faculty Involvement – The role of active faculty participation in this program cannot be understated. Faculty will engage directly with students, teach courses, guide research experiences, and mentor students. Faculty will also assess participants' prior knowledge and guide appropriate course selection. Faculty will provide advisement on individual academic performance and academic opportunities outside of the classroom. Faculty will also be engaged in workshops to implement evidence-based instructional practices in STEM courses and to appreciate the unique needs of transfer students and traditionally disadvantaged populations in STEM. A workshop on culturally inclusive pedagogies in STEM will be developed and offered on an annual basis.

Summer Bridge – A 10 week intensive academic and residential program to hone the academic skills, behaviors, and perspectives of new students prior to their first full-time semester of enrollment at the University. The bridge experience enhances students' transition to the University by introducing students to University expectations and culture.

***Navigating the Research University* Course** – This one-credit course was developed three years ago to provide students with knowledge to succeed at a research university. Students enrolled in the course consider what it means to have a liberal arts education and learn about the roles of motivation, resiliency, and self-advocacy in education. Students also reflect on their current work toward academic success and their path to graduation. Course evaluations have demonstrated that transfer students find this course especially valuable. All participants of the *Transfer Summer Bridge: STEM Talent Expansion Program* will take this course during the first Summer Session to aid in their transition as well as guide them to critical supports and resources on campus.

***Critical Thinking and Problem Solving in the Sciences* Course** – Participants will enroll in this one-credit course during the second summer session. The course will implement innovative pedagogical strategies to provide students with experiential activities framing, analyzing, and solving scientific problems. Activities will provide opportunities for students to think critically about the use of mathematics and science in solving problems.

Junior Transfer Seminar Course – This three-credit course was developed four years ago to enhance the transition of new junior transfer students to the University. This small seminar, consisting of only junior transfer students, gives students the opportunity to work closely with an instructor in a small class environment and to meet with other transfer students. The course emphasizes class discussion as well as learning in creative ways. The seminar also helps students refine their communications skills and ability to speak clearly, and to write persuasively. Participating in the seminar helps transfer students build a network of peers with the common experience of transferring. In particular, this course will help transfer STEM students enhance critical communication, inter-relational, and collaborative learning skills and competencies vital to employability in today's workforce.

STEM Major Courses –Based on the results of the AP Calculus exam, academic advising, and in-depth one-on-one conversation with a faculty member, students will select STEM courses of their choice for Summer Sessions I and II. Enrollments in STEM courses offered during the summer tend to be smaller than inthose offered during the traditional academic year. Taking one major course at a time during the summer will provide students the opportunity to focus intensely on the course (they have only 1 other credit of required coursework) in a smaller class setting. Additionally, it will enable students to work towards meeting degree requirements. Faculty teaching summer STEM courses will be encouraged to attend the spring faculty workshops which will provide faculty with tangible tools, models, and resources to implement evidence-based instructional practices in the courses.

***Modes of Inquiry* Course -** During the spring semester of their first full academic year at UNC-CH, all participants will enroll in this one-credit course. In this course, which has been taught at the University for several years, a different faculty member actively engaged in research visits the class each week. Over the course of the semester, students interact with more than a dozen faculty members. Faculty connect with students during each session sharing the research methodologies, knowledge, and personal experiences that contribute to their intellectual work. The course is designed to cultivate an environment in which students feel empowered to ask questions and make connections with renowned faculty that increase self-efficacy in the STEM majors.

Calculus I and II and the Advanced Placement Exam - Prior to enrollment at the University, all participants will be required to complete Calculus I and II at their community college. The course content of Calculus I and II provides the foundational knowledge necessary to earn a degree in most STEM majors. Students who do not have a solid grasp of basic calculus competencies before beginning courses at the University are at a disadvantage to persist in the sciences. All participants will also complete the Advanced Placement (AP) exam prior to enrolling at the University. The AP exam serves as a reliable assessment tool for students' competency in calculus. The AP exam presents a more comprehensive picture of a student's readiness for University-level science courses than course grades. Faculty and advisors will use the participants' AP calculus scores to guide them toward the most appropriate mathematics and science course selection once enrolled at the University.

Residential Living-Learning Community - Living-learning communities in partnership with faculty in the academic disciplines promote student success by increasing quality faculty-student interaction around academic tasks and providing a culture of community support and mentorship within the university environment (Cook & Lewis, 2007; Kuh, Douglas, Lund, & Ramin-Gyurnek, 1994; Kuh et al., 2005; Laufgraben & Shapiro, 2004; Pascarella & Terenzini, 2005; Smith, MacGregor, Matthews, & Gabelnick, 2004). UNC-CH's Living-Learning Communities (LLC) give students a unique, inclusive residential learning experience that connects classroom learning with residence life. All program participants will live in a Living-Learning Community designed specifically for the *Transfer Summer Bridge: STEM Talent Expansion Program* during the summer sessions. Students will have the option to continue living in the community for the duration of the first-year. Two peer mentors/program alumni will live in the community with new students and will serve as guides to the bridge experience.

Undergraduate Research – Providing opportunities for participants to engage in research is a critical component of this program. Participants will learn about both quantitative and qualitative inquiry. During the fall and spring semesters students participate in paid lab experiences. Faculty will mentor students in their labs and incorporate the participants into their research teams. Participants will be encouraged to present research at the University's annual symposium on undergraduate research as well as to apply to be a SURF (Summer Undergraduate Research Fellowship). Two participants each year will receive SURFs.

Mentoring – Participants will be mentored by faculty, peers, and staff. Faculty will mentor students working in their labs. Each year two second-year program participants will be invited to live in the Living-Learning Community and serve as peer mentors during the summer. These mentors will be provided housing and a small stipend. They will participate in program activities with new students. The Program Coordinator and the Academic Advisor will serve as mentors to participants. These staff members will be readily available to work with all program participants.

Academic Advising - Clear and supportive academic advising is critical to student retention and persistence in STEM (Sutton & Sankar, 2011). The *Transfer Summer Bridge: STEM Talent Expansion Program* will have a full-time position with the title Academic Advisor and Tutorial Coordinator. This person will be devoted to meeting transfer student advising needs both before and after transfer. The Academic Advisor will connect with the various STEM departments across campus and advocate for transfer student needs.

Individual and Group Tutoring - Tutoring promotes a positive and successful experience with STEM courses (Tsui, 2007). The Learning Center at UNC-CH supports a thriving and long-standing tutoring program encouraging undergraduate excellence in STEM disciplines. The Math-Physics Help Center provides individual support during both summer sessions and the academic year. The *Transfer Summer Bridge: STEM Talent Expansion Program* will enhance these programs by providing support for a Mathematics and Science Learning Specialist/Tutorial

Coordinator. This individual will coordinate individual and group tutoring for program participants as well as work to develop participants' academic skills such as time management, test-taking strategies, active learning strategies, and reading comprehension.

Career Development – The skills and competencies students acquire through the program studies will directly translate into employability in STEM fields. University Career Services and the STEM academic departments will offer multiple career development workshops and activities throughout the year. Participants will take a career self-assessment, explore internship opportunities and job shadowing, learn about resume writing, learn about applying to graduate and professional schools, and practice core career development skills such as how to conduct a job search, interviewing, and resume writing. The program will take full advantage of its location in the Research Triangle and will seek to connect students to local STEM career resources.

Program Orientation – In addition to the mandatory transfer orientation program required for all new transfer students, participants will attend a program orientation designed to welcome them to the Living-Learning Community and define program expectations. During the orientation, participants will sign a contract affirming their commitment to the program.

Early Admission/Early Course Selection – Students are more likely to be successful if they feel they have received correct and timely information regarding course requirements, scholarships and career options and receive help balancing schedules with other life obligations (Sutton & Sankar, 2011). Providing participants with early admission and early course selection will help them choose the best courses for their success.

Program Coordinator – A program coordinator will be hired to oversee outreach, recruitment, and program implementation. The program coordinator will work closely with program collaborators and will work directly with students to help fulfill degree requirements. The program coordinator will also lead the internal evaluation team.

Table 3: Program Logic Model

Program Goals: (1) To increase the number of transfer students earning baccalaureate degrees in STEM disciplines. (2) To support a conceptual shift from teacher- to learner-centeredness and the use of evidence-based instructional practices in STEM undergraduate education. (3) To create a model for widespread adoption.				
Situation	**Inputs/Resources**	**Activities**	**Short-Term Outcomes**	**Long-Term Outcomes**
To develop a national workforce prepared to bolster a healthy economy, meet demands for national security, and elevate the quality of life and standard of living in the United States, more non-traditional students, including transfer students, must earn baccalaureate degrees within STEM disciplines.	NSF Funds Institutional Contributions Community College Partnerships	Early Outreach and Recruitment Living-Learning Community Academic, Social, Financial, and Career Development Supports	Broadened participation in STEM degree programs. Improved transition, academic performance, and retention of transfer students.	Increase in STEM baccalaureate degrees. Contribution to the knowledge base on broadening participation of traditionally disadvantaged populations in STEM.
To improve undergraduate STEM success, instructors must move from traditional, transmission style instructional practices to student centered, interactive and evidence-based instruction.	Active Faculty Involvement Administrative Support Collaboration with the Center for Faculty Excellence	Faculty Workshops Course Development Curriculum Revisions	Adoption of evidence-based instructional practices. Effective use of pedagogical techniques, materials, and curricula. Instruction tailored to the news of diverse populations.	Enhanced student learning and performance. Improved student achievement. Faculty resources and network for pedagogical innovations.

Faculty must be key players and lead change agents to enhance undergraduate STEM education and degree completion.	Support from Senior Academic Leadership Administrative Systems and Resources	Adoption of Programmatic Components and Materials Dissemination	Institutionalization of Program	Adoption of Program at Other Institutions

EXPECTED MEASURABLE OUTCOMES

Current Undergraduate Enrollment and Graduation

The total undergraduate student enrollment at UNC-CH is 18,430. The 4-year graduation rate for all undergraduates is 80%. In 2010-2011, 4596 undergraduate degrees were awarded; 22.29% of these degrees were in STEM disciplines.

Each fall, UNC-CH admits approximately 850 transfer students. Of the 850 students, approximately 300 are junior transfer students. About 41% of junior transfer students, 125, start their first full semester at the university intending to major in a STEM discipline. Many abandon the STEM major after the first semester. Junior transfers are the least likely to complete a degree. On average, only 44% of junior transfer students graduate within four years of starting their college careers.

Numerical and Percentage Increases Expected During the Grant Period

The General Administration of the University of North UNC-CH set a goal for the Chapel Hill campus to raise the junior transfer 4-year graduation rate to 50%. The *Transfer Summer Bridge: STEM Talent Expansion Program* will work towards meeting this goal.

The Transfer Summer Bridge: STEM Talent Expansion Program will work with 18-25 junior transfer students from community colleges intending to major in a STEM discipline. The program will help these students effectively meet the demands of their major so that they will graduate in their chosen STEM discipline.

Currently, each year approximately 55 junior transfers at UNC-CH earn a baccalaureate degree in a STEM discipline. Over the course of this five year grant, this program will seek to growth the number of STEM degrees awarded to junior transfer students from 55 to 80 annually.

Table 4. Increases in Junior Transfer STEM Degrees

Grant Year	**0**	**1**	**2**	**3**	**4**	**5**	**1 year post-grant**
Program Participants	_	15	18	20	22	25	25
Total Junior Transfer STEM Degrees	55	55	70	73	75	77	80
Increase in STEM Graduates	_	_	27%	33%	36%	40%	45%

A critical aspect of the transfer summer bridge program described in this proposal is that it will serve as a model to be replicated at other institutions of higher education. With this in mind, the potential increase in the number of students graduating with baccalaureate degrees in STEM disciplines is unlimited. UNC-CH aims to serve as a model for transfer summer bridge programs. Institutions across the country will be able to learn from our strategies and practices and, subsequently, implement transfer bridge programs on their campuses. UNC will share information freely with any other interested institutions.

Integration of Research and Education

One of the principal strategies in support of NSF's goals is to foster integration of research and education. This program will infuse education with the excitement of discovery and enrich research through the diversity of learning perspectives.

Integrating Diversity into NSF Programs, Projects, and Activities

Broadening opportunities and enabling the participation of all citizens -- women and men, underrepresented minorities, and persons with disabilities -- is essential to the health and vitality of science and engineering. NSF is

committed to this principle of diversity and deems it central to the programs, projects, and activities it considers and supports. The *Transfer Summer Bridge: STEM Talent Expansion Program* will broaden opportunities for community college transfers including first-generation college students, students of color, students from low-income families, rural students, and veterans. It will accomplish this through direct support to these students as well as through innovative programming and pedagogical approaches.

PROGRAM MANAGEMENT AND IMPLEMENTATION DETAILS

To ensure a seamless implementation, collaborators across the University have been identified, and operational teams have been developed. Furthermore, key roles and responsibilities have been identified. Much of the program will be built upon pre-existing infrastructure and among groups with a history of success working in partnership. Faculty members are at the core the program leadership, management, and implementation. Faculty will serve as senior leadership as well as at the ground level teaching, mentoring, and guiding research experiences. Table 5 identifies the program collaborators as well as their role in the grant.

Table 5. *Transfer Summer Bridge: STEM Talent Expansion Program* Collaborators

Name	Title	Department	Institution	Role in Grant
Leadership				
Michael Crimmins	Dist. Professor and Sr. Associate Dean	Chemistry	UNC-CH	Principal Investigator
Advisory Committee				
Bobbi Owen	Dist. Professor and Sr. Associate Dean	Undergraduate Education	UNC-CH	Advisory Committee Chair
Donna Bailey	Professor, Director of TA Development Program	Center for Faculty Excellence	UNC-CH	Advisory Committee
Taffye Clayton	Vice Provost, Professor	Diversity and Multicultural Affairs	UNC-CH	Advisory Committee
Winston Crisp	Vice Chancellor, Professor	Student Affairs	UNC-CH	Advisory Committee
Kevin Jeffay	Assoc. Department Chair, Dist. Professor	Computer Science	UNC-CH	Advisory Committee
Elizabeth Jordan	Senior Lecturer	Psychology	UNC-CH	Advisory Committee
Jennifer Krumper	Lecturer	Chemistry	UNC-CH	Advisory Committee
Shirley Ort	Associate Provost and Director	Scholarships & Student Aid	UNC-CH	Advisory Committee
Gidi Shemer	Lecturer Advisor	Biology	UNC-CH	Advisory Committee
Joe Templeton	Dist. Professor of Chemistry	Chemistry	UNC-CH	Advisory Committee
Harold Woodard	Associate Dean and Director	Center for Student Success and Academic Counseling	UNC-CH	Advisory Committee
Peter Mucha	Department Chair, Dist. Professor	Mathematics	UNC-CH	Advisory Committee
Cheryl Keeton	Dean of Mathematics and Sciences	Mathematics and Sciences	Wake Technical Community College	Advisory Committee
Kara Battle	Assistant Dean	Biology	Durham Technical Community College	Advisory Committee
Management Team				
Cynthia Demetriou	Director for Retention	Undergraduate Education	UNC-CH	Director
Candice Powell	Retention Specialist	Undergraduate Education	UNC-CH	Assistant Director
TBD	Program Coordinator	Undergraduate Education	UNC-CH	Program Coordinator
TBD	Academic Advisor	Academic Advising	UNC-CH	Academic Advisor
Implementation Team				
O. Ray Angle	Director	University Career Services	UNC-CH	Career Development

				Coordinator
Donna Bickford	Associate Director	Office for Undergraduate Research	UNC-CH	Undergraduate Research Coordinator
Robin Blanton	Academic Skills Counselor	The Learning Center	UNC-CH	Tutoring Coordinator
Rebecca Egbert	Senior Assistant Director	Admissions	UNC-CH	Community College Liaison
Steve Farmer	Vice Provost	Admissions	UNC-CH	Admissions
Annice Fisher	Asst. Director, Academic Engagement and Assessment	Housing & Residential Education	UNC-CH	Living-Learning Community Coordinator
Erika Lindemann	Associate Dean, Professor	Undergraduate Education (Office of Undergraduate Curricula)	UNC-CH	Curriculum Development Coordinator
Judith Meece	Professor of Educational Psychology	School of Education	UNC-CH	Evaluation Consultant
Jan Yopp	Dean of Summer School, Professor	Summer School	UNC-CH	Summer Course Coordinator
Institutional Support Network				
Katherine Moore	Director of Admissions and Student Services , Clinical Assistant Prof	School of Nursing	UNC-CH	Campus Partner
Rumay Alexander	Director, Office of Multicultural Affairs, Clinical Professor	School of Nursing	UNC-CH	Campus Partner
Kristen Swanson	Dist. Professor, Dean	School of Nursing	UNC-CH	Campus Partner
Pamela Rowsey	Associate Professor	School of Nursing	UNC-CH	Campus Partner
Carla White	Director of Recruitment and Diversity Initiatives	School of Pharmacy	UNC-CH	Campus Partner
Anna Maria Siega-Riz	Associate Dean for Academic Affairs, Professor	School of Public Health	UNC-CH	Campus Partner
Eric Everett	Professor, Associate Dean for Research	School of Dentistry	UNC-CH	Campus Partner
Rosalyn Beecham Green	Director	UNC-CH Higher Education Opportunities Program	UNC-CH	Campus Partner

Leadership - Dr. Michael Crimmins, Distinguished Professor and Senior Associate Dean of the Chemistry department, is the Principal Investigator and provides primary oversight and leadership for achieving the technical success of the project, while also complying with financial and administrative policies and regulations. Dr. Crimmins promotes institutional support for the project and provides insight, experience, and expertise working with undergraduate STEM majors. Please see the Appenidix for letters of support from University senior leadership.

Advisory Committee - The Advisory Committee includes leaders within STEM academic departments, the Office of the Provost, and leaders in the community colleges system who will serve as a sounding board for ideas and decisions on program implementation and operations. The Advisory Committee will be chaired by Bobbi Owen, Distinguished Professor and Senior Associate Dean of Undergraduate Education. The chair will be in direct contact with Dr. Crimmins and the Management Team. The chair will gather the Advisory Committee on a regular and consistent basis to provide feedback on program development, sustainability, and opportunities for growth.

Management Team - The Management Team consists of two current, full-time administrators within the Office of Undergraduate Education as well as two full-time employees who will be hired to manage the development, implementation and maintenance of the program. The Management Team oversees the daily operations of the program and will work closely with the Implementation Team. The University will fund the two new positions after the fiver-year grant period ends.

Implementation Team - The Implementation Team consists of campus partners within offices of student support and administrative management who build and actualize the program infrastructure. Team members plan,

coordinate, and support various components of the program. They also provide expertise and resources to support academic courses and activities. They serve as a liaison to inter and intra-institutional partners regarding program needs.

Institutional Support Network - The Institutional Support Network consists of leaders within the STEM-related professional schools and graduate programs. The network will provide insight on academic challenges of transfer students in accessing STEM and STEM-related careers and facilitate opportunities for career development. The network with also serve to connect students interested in STEM and STEM-related careers to services and resources.

PROGRAM EVALUATION

The program evaluation will involve rigorous study of program goals and objectives through both internal and external evaluation teams (see Table 6).

The goal of the internal evaluation will be to provide ongoing, continuous evidence-based feedback to inform program implementation, maintenance, and efficacy. The internal evaluation team will be led by the program coordinator who will work closely with an internal evaluation consultant, Dr. Judith Meece. Dr. Meece is a faculty member in the School of Education at the University of North UNC-CH at Chapel Hill in the Educational Psychology, Measurement and Evaluation program. The program coordinator and internal evaluator will continuously collect and analyze data to inform ongoing programmatic decisions, curricular revisions, and overall management.

The goal of the external evaluation will be a quasi-experimental study of the program. The study will examine junior transfer student enrollment, retention, and completion of STEM programs of study. The evaluation will compare the academic progress and activities of program participants with non-program participants. _____ will serve at the program's external evaluator. The external evaluator will work directly with the program's leadership, advisory committee, and management team to refine the evaluation plan and to determine an appropriate comparison group for the quasi-experimental study design. The external evaluation team will provide annual reports as well as a cumulative final report.

Table 6. Program Evaluation

PART 1: Plan for Continuous Evaluation		
Purpose: an internal evaluation team will provide ongoing evidence-based feedback to program stakeholders to inform program implementation activities and decisions as well as program maintenance and efficacy		
Program Goals & Benchmarks	**Data Sources**	**Timeline**
Increase the retention rate of junior transfer STEM majors	Institutional Records	Each Fall and Spring Semester
Monitor the academic eligibility standings of program participants	Institutional Records	Each Summer, Fall and Spring Semester
Increase the number of junior transfer STEM graduates	Institutional Records	Annually
Increase diversity of students enrolled in STEM majors	Institutional Records	Annually
Enhance students' academic preparation for STEM-related majors through outreach to CC institutions		
Increase students' critical thinking skills in mathematics and science		
Enhance faculty and student mentoring relations in STEM-related disciplines		
Course completion and performance in STEM-related major		
Time-to-graduation		
PART 2: Plan for Quasi-Experimental Study		
Purpose: an external evaluation team will evaluate the casual impact of the program on the target population using a nonequivalent group design		
Program Goals & Benchmarks	**Data Sources**	**Timeline**

Create a comparison group	Institutional Records	First Semester of Program
Increase the retention rate of junior transfer STEM majors	Institutional Records	Annually and Cumulatively
Increase the number of junior transfer STEM graduates	Institutional Records	Annually and Cumulatively
Increase diversity of students enrolled in STEM majors	Institutional Records	Annually and Cumulatively
Enhance students' academic preparation for STEM-related majors through summer bridge experience		
Increase student's career aspirations in STEM-related fields		
Enhance faculty and student mentoring relations in STEM-related disciplines		
Selection and continued enrollment in STEM-related major		
Course completion and performance in STEM-related major		
Time-to-graduation		

DISSEMINATION PLAN

To encourage the widespread adoption of this program at colleges and universities across the country, sharing empirical evidence of program outcomes as well as tools for implementation and efficacy is crucial. To facilitate this, the program will provide program evaluations, best practices, and strategies for implementation through:

1. The Program Website
2. A Workshop for Practitioners
3. Professional Organizations (i.e.,The National Institute for the Study of Transfer Students, The Consortium on College Student Retention, The National Academic Advising Association, The Reinvention Center)
4. Conference Presentations
5. Journal Articles and Reports (i.e., Journal of STEM Education, Journal of College Student Retention)

Results and findings from rigorous study of the program will be disseminated through these five venues. The workshop will be held at UNC-CH during year four of the grant and will involve inviting colleagues from other institutions to attend a two-day workshop on program implementation at their institution.

PROGRAM SUSTAINABILITY AND INSTITUTIONALIZATION

The *Transfer Summer Bridge: STEM Talent Expansion Program* is a critical component of UNC-CH's larger institutional strategy for increasing undergraduate STEM degrees. This program will be sustained and institutionalized. Table 4 demonstrates the program's far-reaching University and partner support. UNC-CH has a history of sustaining and growing results-driven, innovative programs in undergraduate education. The University has sustained the first-year summer bridge model for more than 30 years. This transfer student version of the model will be sustained as well. The Office of Undergraduate Education, the center of pioneering practices in undergraduate learning, has committed curriculum expertise and guidance, support services, and professional staff time and resources to sustain this program. The Summer School is greatly investing in the program by providing the infrastructure for adding new courses, contracting with faculty to teach the courses, offering course development grants to develop the new courses described in this grant proposal, and making a commitment to pay faculty salaries. The College of Arts and Sciences has also committed unwavering support to the program. As the largest unit on campus, the College of Arts and Sciences forms the academic core of the undergraduate experience. College faculty, who have been recognized for their outstanding research, teaching and engagement, have committed their support to the program. The College is also committed to continuing the two full-time professional positions after the grant period ends. Furthermore, the University is preparing for a new capital campaign that will begin within the next five years. *Transfer Summer Bridge: STEM Talent Expansion Program* will be a part of this vast fund raising effort.

INTELLECTUAL MERIT OF PROPOSED ACTIVITIES

The proposed activity of this program will set a precedent for advancing knowledge and innovation in undergraduate STEM education. In particular the *Critical Thinking and Problem Solving in the Sciences* course will

inspire pedagogical innovation through the development of curriculum incorporating experiential activities framing, analysing and solving problems in STEM disciplines. These courses will also challenge students to develop a holistic understanding of scientific inquiry across disciplines. This program will also propel advances in academic advising and living-learning communities.

The faculty workshops will contribute to the pedagogical practices in STEM education. The workshops will include classroom-level interventions to develop more effective instructional practices in STEM courses. Empirical study of the program will provide evidence of what works to improve teacher effectiveness and accelerate student performance.

The Principal Investigator and the program team are most qualified and prepared to successfully implement this program. Intentionally building on the infrastructure at UNC-CH, the program will leverage many of the systems, resources, and services already in place and fully functioning to enhance undergraduate retention and graduation. The program collaborators (see Table 4) are leaders in their fields and represent broad institutional support for this program. The team of collaborators has the support, resources, and knowledge at their fingertips to effectively and efficiently move forward with program implementation.

BROADER IMPACT OF PROPOSED ACTIVITIES

The activity of this program advances discovery and understanding while promoting advancements in teaching, learning, and student support services. Program participants will engage in a dynamic living-learning community that will stretch the boundaries of the classroom to encourage academic as well as personal growth and understanding. Participants will also work closely with faculty members engaging in both quantitative and qualitative research. Focusing specifically on transfer students, this program will broaden the participation of underrepresented groups in the STEM disciplines including first-generation college students, rural students, students from low-income families, students of color, and veteran students. The program will enhance the infrastructure for research and education by encouraging undergraduate participation in faculty research and labs, by strengthening partnerships between the University and community colleges, designing experiential pedagogical practices in a new undergraduate courses (*Critical Thinking and Problem Solving in the Sciences*) that will be required for participants as well as open to all undergraduates, and by building upon previous efforts to increase interest and success in STEM. The results of this program will be broadly disseminated through higher education practitioner publications and professional organizations. The transfer bridge program will become a model for implementation at other universities to increase the number of undergraduate STEM degrees. This effort will contribute to meeting the demands of our global and inclusive society increasingly in need of science and technology graduates. Graduates of this program will be the professionals in tomorrow's workforce leading innovation, meeting the demands for national security, elevating quality of life, and bolstering a healthy economy.

Michael Crimmins, PhD
Distinguished Professor and Associate Dean
Department of Chemistry
C644 Kenan Labs
Campus Box 3290
Chapel Hill, NC 27599

Dear Dr. Crimmins,

I write to enthusiastically endorse your 2012 NSF STEM Grant proposal, *Transfer Summer Bridge: STEM Talent Expansion Program*. The Provost's Office leads the University in its academic planning and in the setting of academic values, policies, and practices. My review of the proposal confirms that the *Transfer Summer Bridge* program is exceptionally well-aligned with our institutional practices and academic plan. The program will contribute significantly and most positively to our core research, teaching and service missions to solve problems and prepare our students for life and work in the 21st century.

While I currently serve as the University's chief academic officer overseeing academic operations across the University's 13 schools as well as the College of Arts and Sciences, the University Library and a variety of centers, I have also served as a professor of physics and astronomy since 1980. My experiences teaching undergraduate students and supporting the faculty who teach them has allowed me to appreciate the unique challenges students encounter on the way to earning an undergraduate in the STEM fields. I believe this program skillfully addresses these challenges and will provide pathways to undergraduate STEM degree obtainment.

As you are well aware, encouraging the success of populations traditionally disadvantaged in STEM disciplines is of critical importance. The *Transfer Summer Bridge* program presents a sound framework to meet the needs of these capable and ambitious students, and I am dedicated to helping the program succeed. Your program is supported by some of our institutions most outstanding faculty as well as Carolina's robust research program.

I am confident this program will not only increase the number of STEM baccalaureate degrees at UNC-Chapel Hill, it will also function a model to be replicated at other research universities.

Please continue to keep me abreast of the program's progress, as well as opportunities to provide support.

Sincerely,

Bruce W. Carney
Executive Vice Chancellor and Provost

Dear Sub-committee Teaching Awards 2012-13 Chairs,
How are you doing? I hope this email finds you doing well. I also hope that you are all having a great start of the fall semester.
Quick email here to ask you all a small favor; After speaking with Debbie today, our nominee's pool doesn't seem to be as substantial as it has been the past few years. Even though we are still a little over two weeks from the October 1st application submission deadline, Debbie and I thought that it would be good idea if each one of us could send an email to the faculty and students in our units advertising once again this year teaching awards nominations deadline. Debbie is working on making sure we have the awards and nomination submission deadlines advertised in the DTH the week prior to the October 1st deadline.
Again, thank you all again for all your help with this year's project. Please don't hesitate to contact either Debbie or I if you need help with anything or have any questions.
Have a great end of the week and weekend.
Take care,
Claudio
P.S. Below is some information you can use on your email to your units with information about the awards.

From the University:

Each year, UNC formally acknowledges the central role of teaching and mentoring by recognizing faculty, staff and students. The University Committee on Teaching Awards offers numerous awards based on nominations by members of our university community. Please take a moment to think of those who are deserving of these awards and nominate them via the website: http://provost.unc.edu/teaching-awards. All nominations must be submitted online. You may address questions to claudio@email.unc.edu<mailto:claudio@email.unc.edu> or to Ms. Debbie Stevenson at debbie_stevenson@unc.edu<mailto:debbie_stevenson@unc.edu>.

Deadline: October 1, 2012

Subject: RE: UVP activities

I wonder if, given we have MIT and Duke (and others) involved with MOOC, etc. and other freeware/shareware course (information) providers that we could not do an effective round table discussion about
what is valuable in an undergraduate setting for these offerings. Some places are beginning to offer credit (after taking a proctered examination). Is this the wave of the future. If we are giving it (degrees) away, can we also
charge for them? MIT went this way and then backed off a bit but are again involved as are other big-time schools.

Subject: UVP activities

Colleagues,

I am trying to put the finishing touches on the UVP agenda. So far we have a session on fund-raising, one on how to approach hudget cuts & one on what strategies to deploy when your campus in the news, for unhappy reasons, e.g. pepper spray for Davis, leadership challenges for UVA, athletics at Virginia.

We need one more session, and I'm trying to think of something that's active, rather than having the group sit through a 4th panel of some sort. Recall that in 2010 we had groups of student affairs professionals and UVPs break-out and report back on how the two offices could better work together.

I'm turning to you b/c you are good idea people! One thought I had was just to go around the room and ask each attendee to identify the program or accomplishment for which they have the most pride? Another notion I had was to forecast program review in some way, e.g. divide the room into groups of six or so and ask each group to come up with the way in which they organize a program review for an honors program, an undergraduate research unit, a first year seminar program, maybe each group of six would have a different one? Another topic that people wanted attention to was faculty productivity. Again, in groups of six or so have folks create a path that would lead to faculty being able to reach more students? Do any of these seem viable? Any other ideas?

Thanks!

Pat

Expanding Course Evaluation Options

- **Background:**
  - Digital Measures online system (Course Response) implemented over 3 years ago and scanning services were terminated per former provost.
  - College of Arts & Sciences response rates have fallen from 70% to 50%. Student feedback indicates that many see little value in course/instructor evaluations and find them intrusive if not conducted in class. Without making course evaluations mandatory, significant improvement in response rates appears unlikely.
  - Current contract expiring -- Digital Measures will continue offering existing Course Response services, but no further development or enhancements of functions.
  - ITS is not interested in re-establishing course evaluation paper scanning services.

- **Requirements for course evaluation services on campus:**
  - Offer multiple methods of administration (paper, online, other?)
  - Customizable instruments and reports
  - Variable scheduling of evaluation periods and report release dates
  - Decentralized administrative responsibilities and control (if customization is desired).
  - No new IT resources or personnel

- **Scantron Corporation** offers a multi-functional software product for one-time purchase by the University. Features:
  - Multiple administration options: Online, paper scannable, mobile devices
  - Evaluation instruments and methodology customizable down to course level.
  - Administration roles can be decentralized to any level (school, dept).

- **Implications of Scantron implementation for the College of Arts & Sciences:**
  - Institutional Research & Assessment would continue to coordinate campus-wide services, software, and servers, and load course data into the system.
  - College and its depts. would assume administration of their own course evaluations, ideally assigning existing department coordinators responsibility for:
    - Creating evaluation instruments (using web-based tool) and report formats
    - Specifying methods (online, paper) to be used for each dept or course
    - Setting up evaluation period dates
    - Printing paper forms, if desired
    - Scanning paper forms
  - Following training, dept coordinators should be able to use Scantron web tools to set up processes for their departments with relative ease.
  - Scanner will be purchased and set up in a central location where dept coordinators can scan their own forms, with assistance available as needed. The College might want to purchase their own scanner and have it available for their staff in OASIS (or have OASIS do the scanning).

Implementation of Scantron system may occur as early as fall 2012, but can continue with Digital Measures system as long as needed.

Information sessions and demonstrations can be arranged for department coordinators and OASIS staff.

For more information, please contact Lynn Williford (lynn_williford@unc.edu).

BEVERLY E. PERDUE

BIOGRAPHY

Governor Perdue will have served the citizens of North Carolina for more than 25 years when her term as Governor ends in January, 2013. In her role as the State's 73rd chief executive officer, she manages a budget of more than $51 billion, some 275,000 State employees, and is responsible for the welfare of 9.6 million citizens. Having been elected Governor in 2009, she earlier served as Lieutenant Governor (2001 to 2009), as a State Senator (1991 to 2000), including eight years as President of the Senate, and as a member of the State's House of Representatives (1987 to 1991). Her earlier career included 12 years as a gerontologist and senior leadership roles with various health care and human services organizations in North Carolina, and five years as a public school teacher in Florida and Georgia.

Governor Perdue has earned a reputation as an innovative, disciplined and transformative chief executive officer and steward of North Carolina's resources, balancing the best interests of both the public and private sectors, often through public/private partnerships, locally, nationally and globally (offices in China, Japan and the EU). Facing a budget shortfall of 11% when she took office, Governor Perdue consolidated 13 State agencies into eight, prioritized and reduced spending, and invested heavily in education, technology and transportation infrastructure in the State, all while seeking to attract employers and investment to the State. North Carolina is ranked among the top ten states for job creation since 2008, having created more than 100,000 new jobs in the past four years, while nearly $22.5 billion of investment has been committed. Exports grew by 8.3% in 2011. The State has become a recognized leader in the fields of education, research and development, defense and aerospace, information technology, biotechnology and nanotechnology, pharmaceuticals, financial services, "green" technology and energy, and heavy manufacturing. It has also attracted considerable television and movie production. This has all been accomplished while balancing the State's budget every year, creating a $200 million reserve fund, and fully funding the State's employee retirement system. North Carolina is one of only eight states to maintain an AAA rating over the past four years.

Dr. Perdue became the first female elected Lieutenant Governor in 2002, an office she held until her election as Governor in 2009. In a role that has traditionally held little statutory responsibility and had even less impact, Lieutenant Governor Perdue led the State's effort to increase and enhance its military presence in the face of substantial pressure from the Federal Base Realignment and Closure Commission (BRAC) to do the opposite. The result was a substantially increased military presence in North Carolina, including the US Army Forces Command and Headquarters for the US Army Reserve Command. North Carolina's military economy grew from $17.5 billion in 2004 to more than $23.0 billion in 2012, and it is projected to be $27.0 billion in 2013. Lieutenant Governor Perdue launched the North Carolina Military Foundation following BRAC to attract 21st century defense, aerospace and homeland security jobs to the State. During this same period, Dr. Perdue chaired the North Carolina Health & Wellness Trust Fund (HWTF), the private-public partnership that oversees the State's portion of the Master Settlement Agreement with the tobacco industry. Under her leadership, HWTF negotiated a multi-million dollar partnership with Blue Cross and Blue Shield to tackle childhood obesity, as well as launching the first ever multi-media campaign to reduce teen smoking resulting in 53,000 fewer teens smoking in North Carolina since 2003. Lieutenant Governor Perdue also led the creation of Senior Care, a State prescription drug program recognized by the AARP as the best prescription drug program for seniors in the US. As Lieutenant Governor, working with public/private partnerships, Dr. Perdue established North Carolina's first virtual public school with leading technology companies in the state as well as a green business fund to seed innovation in emerging green companies.

Dr. Perdue entered public life with her election to the House of Representatives from the 3rd District (Craven County) in 1987. She was elected to the State Senate in 1991 and served for nine years. She served as Co-Chair of the Senate Appropriations Committee from 1995 to 2000, where she negotiated and prioritized spending for an $18 billion budget at the time. Senator Perdue served as the leader for tax policy and financial legislation in the Senate, as well as leading on issues related to education.

Prior to elected office, Dr. Perdue served as Director of Geriatric Services for Carolina East Medical Center, where she conceived and led an award-winning model of coordinated patient care from hospital admission to community placement within this leading public facility for three years. Earlier she was a Health Care Policy and Grant Writer for East Carolina Regional Medical Center, where she conceived, developed and wrote award-winning grant proposals to various foundations, including a $1 million grant from the Robert Wood Johnson Foundation, as a model of coordinated health care for the frail, disabled and elderly who would otherwise have been institutionalized in long-term care facilities. Dr. Perdue coordinated an integrated team of professionals, volunteers and families, serving more than 1,000 patients over a three-year period. She earlier served as Director of Human Resources for Neuse River Council of Governments, where she led a variety of human resources initiatives funded by the Federal and State governments for a 10-county multi-regional planning commission. Dr. Perdue began her career as a public school teacher in Florida and Georgia.

Her academic background includes a PhD in Educational Administration and a Masters of Education degree in College Administration from the University of Florida, as well as a BA degree in History from the University of Kentucky.

Governor Perdue and her husband reside in New Bern, North Carolina.

> "Anytime you have a class consisting solely of student-athletes, it raises questions. In that respect, this class stands out from the other problematic courses we identified. We want answers too. We welcome the SBI's involvement in this. We are cooperating fully. If we learn more during the course of their investigation, we will take further corrective action. Throughout our investigation of these questionable courses, the University has taken strong and decisive action as the facts warranted. This week, we informed Professor Nyang'oro he must repay $12,000 he received for a 2011 summer school course that he didn't teach appropriately. We also voluntarily released the report documenting the questionable courses. The two people implicated in these irregularities are no longer at the University. We appointed new leadership in the department. The College of Arts and Sciences has new policies and strict new procedures for independent study courses. And we contacted the NCAA last summer when questions about the courses first arose."

Here are pdf copies of resolutions adopted recently with amendments incorporated.

Resolution 2012-10. On Revising the Standards for Continued Academic Eligibility for Undergraduate Enrollment.

The Faculty Council resolves:

Beginning with the Spring Semester, 20013, the Academic Eligibility Regulations as found in the online Undergraduate Bulletin are revised as follows:

"Academic Eligibility

The University expects all students to study and perform to the best of their abilities. The eligibility standards listed below do not suggest acceptable academic performance, but rather minimum levels. Students failing to meet these standards are not making good use of their educational opportunities.

~~First-year students entering the University on or after May 14, 2007 are required to meet the requirements listed below. These standards will apply to sophomore transfer students beginning Fall 2008 and to junior transfer students beginning Fall 2009.~~

Eligibility standards

Good Standing entitles a student to enroll in a fall or spring term. The requirements for ordinary Good Standing are as follows.

A 2.0 cumulative grade-point average and the following number of credit hours passed:

9 hours to enter a second semester
24 hours to enter a third semester
36 hours to enter a fourth semester
51 hours to enter a fifth semester
63 hours to enter a sixth semester
78 hours to enter a seventh semester
93 hours to enter an eighth semester
Special permission of the Dean to enter a ninth semester (See guidelines*)

A student who falls short of these standards will be considered in "good standing–on probation" for one semester provided he or she passed at least nine credit hours of graded coursework in the preceding semester and was not already on probation. Probation is considered good standing.

Academic Ineligibility

Students who do not qualify for automatic probation or who do not meet cumulative eligibility standards after a probationary term are academically ineligible and may not enroll in a spring or fall term.

Appeals

Students may, under extraordinary circumstances, present an appeal in writing to the dean of their school (for students in the College of Arts and Sciences, this is the Associate

Dean for Advising). The Dean will refer the appeal to the administrative board of his/her school."

Resolution 2012-11. On Guidelines for Course Syllabi.

The Faculty Council resolves:

Preamble

In the section, Suggested Classroom Procedures, in the 2012-13 Undergraduate Bulletin, p. 402, the following statements appear: "In general, instructors are strongly encouraged to follow the guidelines for course design and classroom procedures recommended by the Center for Faculty Excellence. When students enter into a learning relationship, they have certain needs and expectations. They are entitled to information about course procedures, content, and goals. Instructors should provide a syllabus that describes the course and methods of evaluation. Particular attention should be paid to several areas of special concern to students, including provision of reserve readings and grading policy. .... The Faculty Council endorses the following guidelines for the faculty–student relationship. This endorsement shall not be construed as faculty legislation, is not intended to establish a contractual undertaking by the University or any individual, and shall not constitute the basis for civil action in a court or a claim in any administrative or judicial body of the University of North Carolina at Chapel Hill."

The purpose of this Resolution is to establish guidelines for use by the College of Arts and Sciences and the several professional schools in establishing requirements for course syllabi appropriate to their various learning environments.

Guidelines

Each course offered for credit has a syllabus that addresses the elements detailed below. A syllabus must be provided to students no later than the first day of class and is retained by the respective department or educational unit of the University for a period of at least 4 years.

Course Identifiers: The course number, section number, department, term, and times at which the class meets are stated.

Instructor Identifiers: The instructor's name, office location, office hours, phone number(s), email address, and web address are provided.

Target Audience: The syllabus explains how the course fits into a broader educational program and to whom the course is targeted.

Course Prerequisites: The syllabus explains course prerequisites or other important rules that describe who is eligible to take the course, who can obtain credit, and how to satisfy any special course registration requirements.

Course Goals and Key Learning Objectives: The syllabus states course goals and key learning objectives. It is important for students to understand what they will accomplish by taking the course. Course goals and objectives are not simply statements about course topics. They are descriptions of competencies that students should expect to develop in the course.

Course Requirements: The syllabus explains what kinds of work students must do to successfully complete the course, such as whether students will be discussing literature, working problems, or undertaking other activities. The syllabus also lists any other requirements such as mandatory recitations, labs, term papers, or mandatory activities

outside of class meeting times.

Dates: As far as possible, the dates of all examinations and due dates for important assignments are listed.

Grades: The rules that the instructor uses to assign grades are explained in sufficient detail to clearly inform students as to how their grades will be determined. In particular, the syllabus states how student participation in class will be assessed.

Course Policies: The instructor explains his or her expectations for student conduct during the course. Examples include the consequences of missing an exam; whether regular attendance is expected; the consequences for missing class too often; whether or not late work is accepted and, if so, how late work is penalized. The syllabus states that the course final exam is given in compliance with UNC final exam regulations and according to the UNC Final Exam calendar.

Course Resources: The syllabus provides a list of required text books and other course resources, and an explanation of how to access them. It also lists teaching assistants for the course and provides their contact information, and explains whether and how Sakai is used.

Honor Code: The syllabus explains requirements for the course that could have Honor Code consequences, such as whether students are permitted to work together on problem sets, what help they are permitted to obtain in preparing various assignments, and whether exams are closed or open book.

Time Table: The syllabus contains a course calendar that gives topics and assignments for each class meeting.

Syllabus Changes: It is appropriate to include in the syllabus a clause that informs students of possible modifications, such as "The professor reserves to right to make changes to the syllabus, including project due dates and test dates. These changes will be announced as early as possible."

Submitted by the Educational Policy Committee.

> **Comment:** The teaching – learning process develops from clearly communicated expectations. A course syllabus serves as a concise vehicle for providing course scope, defining course parameters, establishing course goals, and setting expectations. It is the blueprint from which faculty establish course structure and students build their experiences. Key syllabus components provide students with the framework to move through the course predictably and systematically.

Resolution 2012-11. On Revising the Regulation Concerning Independent Studies for Credit.

The Faculty Council resolves:

The academic regulation concerning independent studies for credit found on page 52 of the 2012-13 Undergraduate Bulletin is amended as follows:

"Independent Studies for Credit

The University offers a variety of independent study experiences for students. Such courses, including directed readings and research courses for an individual student, are offered for academic credit through departments and curricula. Twelve hours of graded independent study credit, excluding honors thesis courses, may be counted toward graduation.~~, though no~~ No more than ~~six~~ twelve hours may be taken in any one semester. Students may participate in formalized programs, or they may make individualized contracts for work under the supervision of a member of the permanent faculty at the department/curriculum level. For information about independent studies courses in their majors, students should consult the director of undergraduate studies in their major department or curriculum."

Resolution 2012-13. On Support for Chancellor Holden Thorp

The General Faculty of the University of North Carolina at Chapel Hill, convened in special session September 18, 2012, affirms its support for Chancellor Holden Thorp and respectfully requests that UNC President Thomas Ross decline to accept Chancellor Thorp's announced resignation. We believe that, despite the difficulties of the present moment, Holden Thorp remains the best person to lead our university through these challenging times. With the university's Faculty Executive Committee, the College of Arts and Sciences Council of Chairs, and other campus groups, we urge that President Ross, the UNC-Chapel Hill Board of Trustees, and the UNC Board of Governors continue to provide the support the chancellor needs to remain in office.

Resolution 2012-14. On the UNC Strategic Plan

The Faculty Council resolves:

The faculty of the University of North Carolina at Chapel Hill fully endorses the Resolution on the UNC Strategic Plan passed by the UNC Faculty Assembly on September 21, 2012.

Be it further resolved that, to fully embrace the University of North Carolina mission "to discover, create, transmit, and apply knowledge to address the needs of individuals and society," the faculty of UNC-Chapel Hill request that the membership of the UNC Advisory Committee on Strategic Directions be expanded to include faculty representation from this university and from other UNC campuses.

Submitted by the Faculty Assembly Delegation.

Comment: The Faculty Assembly of The University of North Carolina adopted the following resolution on September 12, 2012.

> **UNC Strategic Plan Input**
> Approved by the UNC Faculty Assembly
> September 21, 2012
>
> WHEREAS, The UNC System is initiating strategic planning process for 2013-18 to set current and future priorities, resource planning and allocation, program planning, review and refinement of academic missions reflecting the University's deep commitment to help North Carolina respond to changing state needs and economic challenges, and
>
> WHEREAS, the Faculty of the UNC system have responsibility for developing, delivering, and assessing the curriculum, and
>
> WHEREAS, the Faculty develop, pursue, and publish original research expanding the knowledge foundation on which our future depends, and
>
> WHEREAS, the Faculty advise, mentor, and engage students in the activities that lead directly to their future occupations and improve their quality of life, and
>
> WHEREAS, all these components contribute immensely to both current job creation and our citizens' preparedness for the future, and

WHEREAS, the Charter of the Faculty Assembly provides "The Assembly shall, through appropriate channels, advise the Board of Governors of the University of North Carolina, the General Assembly, and other governmental agencies and officers on matters of University-wide importance, and The Assembly shall advise and communicate with the President of the University of North Carolina with regard to the interests of the faculties and other matters of university-wide importance."

THEREFORE BE IT RESOLVED, that the Faculty be informed of strategic planning activities and a mechanism be created to solicit input at the campus level throughout the process so as to achieve effective outcomes and the strong faculty buy-in, and

RESOLVED, that in order to define and support measures that advance the quality of the University system representatives of the Faculty Assembly be informed during the strategic planning process, and that the President of the University, in collaboration with the Chair of the Faculty Assembly, create a faculty group to interact and collaborate with the Business/Political community advisory committee for the University's strategic planning.

Subject: Weekly Update for 10-01-2012 to 10-05-2012

Dear Dean Owen,

Last week, I worked on the following:

1. Completed the first rollout of the Overloads form. Julia and Dean Wyrick are now testing it.

2. Worked on the Majors/Minors form.

3. Helped Debbie and Jamie fix a couple of bugs with the Event Registration system and helped them download the data.

4. After meeting with Dean Shuster and Gary Miller, we have decided to commence work on building the new Advising website in WordPress. We will be approaching it by initially recreating the more "static" sections of the website, i.e., sections that have pages that need little or no revision, and will continue to build the new website section by section. Towards this end, I have requested space for the new site from ITS and will begin working on it as soon as it becomes available.

5. Java training and continued working on the Senior Reviews form.

Geeta

>> I reviewed the proposal for the graduate certificate in **Participatory Research** and have a few comments. Overall it looks terrific.
>
> 1. 1. The course on "Community Based Participatory Research" is numbered **HBHE 710** (not HB 710) - course prefixes must be 4 characters. it appears on p.3 and 4.
>
> 2. 2 Selecting the "core course" on or before May 1st of each year does not provide continuity from year to year. Also, what happens if they can't find a core course to offer? And, it is the case that graduate students don't preregister very often but it may help you to know about demand (and teaching load implications) earlier. You might make this date March 1 if at all possible. If there are a couple of possibilities perhaps it would be helpful to list them instead of having it look like a course needs to be developed, especially as it is so central to the proposal.
>
> 3. 3. Under item #5.2 (elective course), **COMM 664** "Field Methods" will be renumbered to **COMM 695** and **ANTH 599-16** will be **inactivated**, effective fall 2013. Your proposal should be updated to reflect these course changes.
>
> 4. 4 Under item #5.3 (practicum), the proposal states that the practicum should be arranged as an independent graduate research course with an affiliated faculty member of the student's advisor, using ANTH 921 and 922 as examples. You should confirm that other departments (who are likely to participate in this certificate program) have comparable courses already on the books.
>
> 5. 5. Under item #5.4 (additional training), students are expected "to enroll once for credit in the 'Informational and Seminar Series Workshop Course.'" Has this course been created? If so, you should provide the course number.
>
> 6. The proposal would benefit on p. 2 with some specifics concerning the demand for this certificate; a statement simply asserting "demonstrated interest"would be more compelling if it included something like "a survey of the 30 students currently enrolled in the Ph.D. programs in sociology and anthropology indicate that more than half of them would pursue this certificate if offered." (NOTE that I made up those numbers!)
>
> 7. I don't understand what you want to happen (see page 5) a student identified a faculty supervisor who is someone "other than an affiliated faculty" member. Would the advisory committee consider adding someone? Would the The Graduate School allow someone not on the Graduate School faculty to serve? Would you make a temporary appointment? I may be making too much of this statement and actually wonder if it needs to be addressed at all.

Notes from EPC meeting.

From Evernote:

EPC meeting notes 11/7/2012

Updates to last month's minutes were passed.

VI. Independent Study Task Force Report - campus wide adoption. No response means people are very busy. Should not move forward until we get wider information. Suggestion to have a meeting with a handful of units that would be impacted the most. Perhaps DUSes can provide written feedback to chairs and chairs can provide to Bobbi. Specific questions should be provided to get more meaningful results.

IV. Honor System and XF grade. Required 4 credit course. Faculty are unlikely to want to teach this course because students are forced to take it. Would other students want to take it? If a student is on probabation they can't represent University. How does this impact graduate students? Can they TA? More specific definition of the word probabation. Student results on the Honor Court system is wildly inconsistent. Lost the faith of faculty. Plagiarism can be taught in ENGL 105. Everything must be passed by Faculty council, student congress, and chancellor. What would you do for seniors who receive XF? Ninth semester?

Blogging policy, brief discussion. If blogging in the public sphere is required it should be listed in syllabus. Teach students how to blog professionally and responsibily. Center for faculty excellence has done presentations on this topic. Teacher Ed is doing a lot of blogging. Students can take an alias when posting, and faculty would know the alias for grading/evaluation Will be reviewed in spring.

Jane-
I appreciate your reconsideration after feedback from Harold Woodard and others about delaying closing one of the classes. A minimum of 10 students is needed to "make" the two classes and having them at two different times is especially helpful.
More after registration closes, I am sure.
Happy turkey day next week.
Bobbi

Subject: SBAC Placement Policy Survey - North Carolina Update

I am writing in regards to the placement policy survey sponsored by the Smarter Balanced Assessment Consortium. Since the survey was opened on October 29, 2012, the following institutions in your state have completed the survey:

Brevard College
Elon University
Gardner-Webb University
Meredith College
Montreat College
University of North Carolina at Charlotte
University of North Carolina School of the Arts
University of North Carolina at Wilmington

In addition, it is our understanding that the data for the 58 community colleges in the state will be submitted separately in one file.

The survey is open until December 7, 2012. Your efforts to encourage the remaining institutions to participate would be greatly appreciated.

Should you need further information or have questions about this survey, please contact Jacqueline King, director of higher education collaboration for Smarter Balanced (Jacqueline.King@smarterbalanced.org).

If you have any questions about accessing the online or paper version of the survey, please feel free to contact me at any time.

Best,

Amy

Subject: Smarter Balanced - Placement Survey Request -- DUE DATE = December 7th

Dear Colleague:

The Smarter Balanced Assessment Consortium (www.smarterbalanced.org), in which our state is a member, is sponsoring a national survey to better understand current placement policies at two- and four-year colleges and universities in its member states. The survey also will help us better understand the range of placement policies at colleges and universities in our state as we prepare for the new Smarter Balanced college readiness assessments that K-12 schools will begin implementing in 2014-15.

The survey is now open and can be accessed using the following link:

http://fs11.formsite.com/jblassoc/placementpolicysurvey/index.html

Please complete this survey as soon as practical; the data collection window will close on **December 7, 2012**. We need all campuses to respond to this request by this closing date. The survey should take no more than 10 minutes to complete.

Should you need further information or have questions about this survey, please contact me (chapman@northcarolina.edu)

Thank you for your assistance with this important initiative.

Sincerely,

Alisa Chapman

IMPORTANT NOTICE REGARDING NEW RULES FOR ACADEMIC ELIGIBILITY

The Faculty Council enacted new academic eligibility rules in 2007 for undergraduates who began college in or after May 2007. Most students who began college before May 2007 remained subject to the rules that were in place when they entered UNC-Chapel Hill.

However, as of January 1, 2013, the 2007 academic eligibility rules apply to all undergraduate students, including applicants for readmission, regardless of when they began college.

Two elements of the new academic eligibility rules are particularly noteworthy:

-- Under the new rules, students must maintain a minimum cumulative UNC-Chapel Hill grade-point average of *2.000* every semester.

-- Under the new rules, students who have fallen below the minimum standards amid extenuating circumstances can request permission to enroll *on academic probation* for one semester in order to restore their good standing.

If you were in academic good standing when last enrolled but you do not meet the standards of the new academic eligibility rules, please consult your dean's office to learn how to request permission to be readmitted on academic probation.

A summary of the rules is provided below. For further details about the new academic eligibility rules, you can consult the *Undergraduate Bulletin.*

If you have questions:

-- If you are seeking readmission to the *College of Arts and Sciences*, consult www.studentsuccess.unc.edu , or any of your advisors in Steele Building.

-- If you are seeking readmission to one of the University's *professional schools*, consult the advisors in your school's dean's office. (You might already be subject to the new rules.)

2007 ACADEMIC ELIGIBILITY RULES
(condensed)

The requirements for ordinary Good Standing are as follows:

A 2.000 cumulative UNC-Chapel Hill grade-point average and the following number of academic semester credit hours passed:

9 academic hours to enter a second semester
24 academic hours to enter a third semester (30 hours is recommended)
36 academic hours to enter a fourth semester
51 academic hours to enter a fifth semester (60 hours is recommended)
63 academic hours to enter a sixth semester
78 academic hours to enter a seventh semester (90 hours is recommended)
93 academic hours to enter an eighth semester (not just 90, as under the old rules)
Special permission of the dean to enter a ninth semester

Withdrawal Process

November 27, 2012

Topic: An external financial aid consultant identified two federal compliance issues and one mechanical issue with the current withdrawal process

Compliance Issues

1) The University must have a specified office responsible for the withdrawal process
2) The withdrawal process must be defined by the University and made public to students

Mechanical Issues

1) Students currently use a paper form, taken from office to office, in order to complete the withdrawal process

Goals of a new Process

1) Preserve current advising practices so that students receive proper guidance prior to withdrawal
2) Streamline the process and alleviate the paper form if possible
3) Capture the legal withdrawal date, as defined in Federal regulations, consistently for all students

Proposal

Federal Withdrawal Date – Is defined in federal regulations as the date the student begins the official withdrawal process

Proposal

1) Establish The Registrar's Office as the designated office responsible for capturing and entering the withdrawal date into PeopleSoft

2) Write a policy that describes the official withdrawal process. In developing the policy, ensure that students receive the advice they need from multiple offices in order to make an informed decision.

3) Students who decide to continue with the process and officially withdraw would then submit a form to the Registrar's Office (electronically or in-person). The date of that transaction establishes the legal, federal withdrawal date which is captured and entered into University records. The legal date then cannot be altered since it is defined by federal regulations

Questions:

1) Does PeopleSoft deliver a method of capturing the withdrawal date in automated fashion?
2) If this is not delivered, do we ask students to print a form and bring it to the office?
3) Can we create a webform that captures the date each student submits the withdrawal form?
4) Will this new process cause work to be shifted from advisors onto the Registrar's Office?

Karen-
It would be good for Nick and Erika to update this list at the same time they do the undergraduate bulletin and let Dee know about any changes needed on the website. German and Slavic, Women's and Gender Studies, etc. from last year and these effective July 1 this year. There are lots of lists but we can keep these straight! I don't have the list in front of me but still see Int'l Studies in some places and that is two years back.

Hope you are feeling better - I am.

Looks ok to me, but I wonder if too many questions are asked and not enough answers provided. What is the minimum GPA (up down or unchanged) and yes - a UNC-Chapel Hill faculty member needs to be instructor of record, for example.

> Dear Karen,
> Nick and I have talked, and I will gladly provide an updated list of departments and curricula to Vin at the meeting tomorrow. That list will be a revised version of the listing that currently appears on p. 47 of the Bulletin. Since we list departments and curricula alphabetically, division by division, I propose that we represent it this way: "Biomedical Engineering (joint with the UNC School of Medicine and North Carolina State University)." Would that work?
>
> We are in the process of updating the Bulletin and have a plan for incorporating Tuesday's Administrative Boards' decisions into the next edition. Briefly stated, we plan to keep the listing for the Department of Biomedical Engineering in its current location, within the College of Arts and Sciences section (not in the School of Medicine section), but we will revise the first paragraph of the entry to make it clear that this is a joint department with CAS, SOM, and NCSU. The material describing the BS major in applied science will be moved to that section.
>
> The section of the Bulletin devoted to the renamed Department of Applied Physical Sciences (formerly CASE) will be significantly shorter.

On Nov 29, 2012, at 1:56 PM, "Siedentop, Nicholas J" <nick_siedentop@unc.edu> wrote:

According to the resources I found, the **current BME department is joint between UNC and NC State**. (http://www.bme.ncsu.edu/ and attached letter.) The action from this week's meeting was to extend the joint department into the CAS.

Regarding the degrees:

- The MS and PhD degrees in biomedical engineering are joint degrees
- The BS in biomedical engineering is offered at NC State (not joint)
- The BME concentration in applied sciences is offered at UNC-Chapel Hill (not joint). And it will remain not joint even after this week's action.

Cheers,

Nick

> Nick and I have talked, and I will gladly provide an updated list of departments and curricula to Vin at the meeting tomorrow. That list will be a revised version of the listing that currently appears on p. 47 of the Bulletin. Since we list departments and curricula alphabetically, division by division, I propose that we represent it this way: "Biomedical Engineering (joint with the UNC School of Medicine and North Carolina State University)." Would that work?

>

> We are in the process of updating the Bulletin and have a plan for incorporating Tuesday's Administrative Boards' decisions into the next edition. Briefly stated, we plan to keep the listing for the Department of Biomedical Engineering in its current location, within the College of Arts and Sciences section (not in the School of Medicine section), but we will revise the first paragraph of the entry to make it clear that this is a joint department with CAS, SOM, and NCSU. The material describing the BS major in applied science will be moved to that section.

>

> The section of the Bulletin devoted to the renamed Department of Applied Physical Sciences (formerly CASE) will be significantly shorter.

>

> Be assured that we're on it, that Dee and we are keeping one another informed, and that SOM will be clearly indicated in any references to the joint Department of Biomedical Engineering. Please let me know if you have further questions or if I can help in any way.

Dear Members,

Our final meeting to present the winners to the Chancellor is scheduled for December 6th – 12:00-1:30 in 039 Johnston Center. Chancellor Thorp will review and approve your recommendations then contact the professors. This information remains confidential until he publically announce the winners at the basketball game in February.

If you have not already submitted your citations to me and Claudio please do so no later than close of business on December 3rd. Please send these documents as "word" attachments. Be prepared to read an excerpt from your citation at the luncheon. I've attached last year's program to give you some ideas in preparing your documents.

I need to give a final count to the caterer, so also please let me know if you will not be able to attend. Otherwise, there's no need to reply and I'll look forward to seeing you next Thursday.

You have done a fabulous job this year and I thank you!

Have a great weekend!

Debbie

The Inaugural Marian Drane Graham Scholars Program
Summer 2013

THE UNIVERSITY OF NORTH CAROLINA
General Administration

The Marian Drane Graham Scholars Program is a six-week immersive and experiential summer program designed to provide students the opportunity to develop leadership skills and a better understanding of key issues facing public higher education. The program is open to rising juniors and seniors attending one of the sixteen constituent institutions of higher education in the University of North Carolina. Scholars will be mentored by UNC leadership, spend time in the UNC General Administration offices in Chapel Hill, NC, travel to at least five UNC campuses (each scholar's home campus), visit with key policy leaders in state government and businesses, and meet with UNC General Administration staff in Washington, DC.

Scholars will also have the opportunity to work in a state government agency approximately fifteen to twenty hours per week to further their knowledge of how higher education impacts the state of North Carolina. Finally, the Scholars will, in conjunction with their faculty sponsor at their home institution, develop and present a capstone project outlining the role of higher education in North Carolina from experiences in the agency placement. Through these experiences, it is anticipated that each scholar will develop a deep appreciation for the complexities of higher education and state government and an understanding of key policy issues.

The position carries a stipend of $3000.

Knowledge, Skills, and Abilities for Internship Placement:

- Strong project management or organizational skills;
- Research, editing, and proofreading skills;
- Ability to work as a team where ongoing collaboration is a must;
- Ability to handle multiple projects and deal with uncertainty;
- Ability to contribute individually and participate in cross-functional teams;
- Proficiency with MS Office Suite.

Students from all academic disciplines may apply, but applicants must meet the following minimum criteria:

- Be a rising junior or senior pursuing their bachelor's degree from a constituent institution within the University of North Carolina with a minimum cumulative GPA of 3.0;
- Have a faculty sponsor at the scholar's home institution that is willing to assist in development of a capstone project;
- Have a passion for how higher education in North Carolina relates to our future and to policy, local and federal government policy, the military, financial aid, and/or economic development;
- Be willing and able to live in apartment-style housing on the campus of North Carolina State University in Raleigh, NC, from May 11 through June 23, 2013.

Please submit a resume, letter of interest, a letter of recommendation from your faculty sponsor, and unofficial transcripts to Dr. Karrie Dixon, Associate Vice President of Academic and Student Affairs at kdixon@northcarolina.edu ***no later than January 30, 2013 at 5pm***. Should there be any questions prior to this date, please contact John Johnston at jwjohnston@northcarolina.edu.

Candidates chosen for an interview will be notified by Monday, February 11, 2013. Interviews will take place February 14 – 21, 2013. Up to five Scholars will be selected and notified on Friday, March 1, 2013.

The anticipated start date is Monday, May 13, 2013 and end date of Friday, June 21, 2013.

The University of North Carolina, *Chartered in 1789, UNC was the first public university in the United States and the only one to graduate students in the eighteenth century. Today, UNC is a multi-campus university composed of all 16 of North Carolina's public institutions that grant baccalaureate degrees, as well as the NC School of Science and Mathematics, the nation's first public residential high school for gifted students.*

For class

Freshman Convocation
August 21, 1994

Good Evening. As I begin this convocation address, I want to introduce to you a small, but highly selective group of faculty who have chosen to join us this evening. They are here in person to represent the most important of the many reasons you are here -- the academic excellence at the University of North Carolina at Chapel Hill. They are also here as an indication of the seriousness with which we take our responsibilities to you. All of these faculty members are widely recognized and well respected scholars in their fields of specialization, but they are also superb teachers, selected for special awards given in recognition of their excellence in teaching undergraduates. Others are advisors, department chairs, faculty members regarded by students and colleagues as caring for and about teaching.

Introductions:

First, let me present some distinguished teachers who currently hold or previously held Bowman and Gordon Gray Professorships:

Christopher M. Armitage, Bowman and Gordon Gray Professor of English

William L. Barney, Bowman and Gordon Gray Professor of History

S. Beth Grabowski, Bowman and Gordon Gray Professor of Studio Art

George W. Houston, Bowman and Gordon Gray Professor of Classics

Sara Mack, Bowman and Gordon Gray Professor of Classics

Joel J. Schwartz, Bowman and Gordon Gray Professor of Political Science

John Sheets, Bowman and Gordon Gray Professor of Religious Studies, Emeritus

Thomas Warburton Jr., Bowman and Gordon Gray Professor of English

Cecil W. Wooten, Bowman and Gordon Gray Professor of Classics

??? (No Response)

?Robert A. Bain, Bowman and Gordon Gray Professor of English

?Judith M. Bennett, Bowman and Gordon Gray Professor of History

?Sue E. Goodman, Bowman and Gordon Gray Professor of Mathematics

? J. Lee Greene, Bowman and Gordon Gray Professor of English

?John F. Kasson, Bowman and Gordon Gray Professor of History

?Joy S. Kasson, Bowman and Gordon Gray Professor of American Studies

?Theodore H. Leinbaugh, Bowman and Gordon Gray Professor of English

?A. Conrad Neumann, Bowman and Gordon Gray Professor of Marine Sciences

?William J. Peck, Bowman and Gordon Gray Professor of Religious Studies

?Patricia J. Pukkila, Bowman and Gordon Gray Professor of Biology

?Kenneth J. Reckford, Bowman and Gordon Gray Professor of Classics

?Michael K. Salemi, Bowman and Gordon Gray Professor of Economics

?Lawrence M. Slifkin, Bowman and Gordon Gray, and Alumni Distinguished Professor of Physics, Emeritus

?Jurg Steiner, Bowman and Gordon Gray Professor of Political Science

?Thomas A. Stumpf, Bowman and Gordon Gray Professor of English

?Weldon E. Thornton, Bowman and Gordon Gray Professor of English

Other faculty members on the platform are:

John Florin, Professor and Chair, Department of Geography

Joseph C. Lowman, Professor Psychology and Assistant Dean, College of Arts and Sciences

??? Did not respond

?A. Reid Barbour, Professor of English

?Carolyn C. Cannon, Associate Dean College of Arts and Sciences

?Fred M. Clark, Professor of Portuguese and Assistant Dean of The General College

?Peter A. Coclanis, Professor of History and Associate Dean for General Education

?James L. Coke, Professor of Chemistry

?Carole Crumley, Professor of Anthropology

?William A. Darity, Jr., Boshamer Professor of Economics

?Slayton A. Evans, Jr., Kenan Professor of Chemistry

?Patricia G. Gensel, Professor of Biology

?Bernadette Gray-Little, Professor and Chair, Department of Psychology

?Melinda Meade, Professor of Geography

?D. Soyini Madison, Professor of Communication Studies

?Donald W. Misch, Professor of Biology

?Marilyn A. Scott, Professor of Germanic Languages

These distinguished faculty and others like them will, if you let them, bring you new worlds. They will, if you let them, change your lives, just as you change ours by coming to Carolina.

As members of the Class of 1998, you open the third century of higher education at the University of North Carolina at Chapel Hill. You are also the first students for whom it is obligatory to fulfill The "Cultural Diversity Requirement" which applies to all first-year students, regardless of major entering UNC this fall. The purpose of this requirement is to afford students the opportunity to gain a better understanding of cultural diversity as it affects their lives in our increasingly pluralistic society. This is the first addition to the curriculum in 15 years but is only one of many changes during the 200 year history of UNC.

The original Board of Trustees approved the framework for the curriculum in December 1793, balancing, they believed, the classics with the sciences. In January 1795 when the University officially opened, there was one professor, a few books, one building completed and read for use and several others under construction, but no students. The first student, Hinton James arrived on February 9, 1795 having walked, as legend has it, from somewhere near Wilmington, North Carolina. Other students, some delayed by bad roads made even worse by the bitter cold winter, arrived as the news of the university's opening spread across the state. By the end of the first academic year in July 1795, there were 41 students.

The first curriculum was defined rigidly, as were most other aspects of students' lives. In the first year, all students took English grammar, Roman history and Roman literature and the Greek testament. In the second year, all students studied arithmetic, bookkeeping, geography (including the use of globes) and Greek history and literature. In the third year, Mathematics (including Geometry), Natural Philosophy and Astronomy formed the basis of study and in the fourth year students studied Logic, Moral Philosophy, Principles of Civil Government, Chronology; both Ancient History and Modern History, the Belles Letters and "(quote)...whatsoever may appear necessary to the officers of the University" (unquote). In addition, there were weekly lectures on the Principles of Agriculture, Botany, Zoology, Mineralogy, Architecture and Commerce.

Students attended classes six hours each day, Monday through Friday and three hours on Saturday. Attendance at prayers twice a day was required and morning prayer was at sunrise. Curfew was at 8:00 PM "when the students shall return to their lodgings and not leave them until prayers the next morning." Every member of the University community was required to attend divine service on Sunday morning and on Sunday afternoon students were examined on the general principles of religion and morality. Tuition cost between $8.00 and $15.00 per year, depending on the course of study. The first professor was paid a salary of $300.00, plus two-thirds of the tuition money and was provided with housing.

Students paid $30.00 for board and $5.00 for room rent for one year. Breakfast (warm bread, coffee and tea, or chocolate) was served at 8:00 AM; dinner (bacon and greens or beef and turnips, fresh meat or poultry, puddings or tarts and fresh bread) was served at 1:00 PM and supper (coffee, tea or milk with bread or biscuit or potatoes and all other kinds of vegetables as available) was served "(quote) Before or after candlelight at the discretion of the faculty"(unquote). The trustees also decreed that dining tables would have a clean cloth every day.

Final examinations were oral and were conducted in the presence of the faculty and the Board of trustees -- a formidable event according to reports from students. By 1810 it was necessary to take entrance examinations, some written and some oral which included reading, writing, spelling and a knowledge of *Aesop's Fables.*

Major changes in required courses have occurred throughout the past 200 years, notably in 1868, when the four year curriculum of a regular progression of classes was abandoned for a two year progression with the remaining two years being dedicated to a particular course of study. At the time, the curriculum review committee was "(quote) fully impressed with the advantages of the Classics and Mathematics as trainers of the mind" (unquote). They believed, however, that sufficient time could be found to secure the result without neglecting other studies." (766, Battle) Loftier standards of admission (abilities in Greek, Latin, English, algebra, and ancient and modern

geography were required for admission) and more stringent final examinations were also adopted along with an emphasis on the sciences and a de-emphasis on the classics.

In 1902, changes were again made reflecting expanded undergraduate courses of study in Latin, Greek, English, History and Political Economy, Chemistry, Biology and Botany, English, Mineralogy and Pharmacy.

In the 1920s, the first two years continued to allow little choice for students: English, both composition and literature, Mathematics, Greek or Latin, German or French, and History were all mandatory; but beginning in the third year the selection became wider and students were allowed to specialize, although restrictions prevented too narrow a scope.

More recently, in 1980, the curriculum was reformed to include the basic skills and perspective requirements which remain in place today. The foundation for the general education requirements rest on:

1. the ability to write clearly and effectively
2. the ability to read proficiently
3. the ability to speak effectively
4. the ability to reason clearly and analytically and to deal effectively with abstract ideas
5. the ability to use mathematics effectively

and

6. the ability to use and comprehend a foreign language.

The curriculum continues to change because it must ensure that UNC's version of the liberal arts education speaks to the nature of the society in which it flourishes and to the individuals who comprise, influence and are influenced by that society. All the changes in course requirements reflect the changes in our world and the ways we learn and use our knowledge. And, the curriculum will continue to change a we refine our goals and continue to understand the world in which we live.

While this University was founded to educate wealthy white young men from North Carolina, it now provides education to a increasingly diverse student body -- students from every state in the union, international students, people of color, women...!!!

The course of study reflects these shifts as well including the newest requirement to take a course in cultural diversity. Our methods of teaching, of presenting course materials and using resources have changed. Our libraries echo enormous technological advances. In 1795 there were only a few books in all of Chapel Hill. Now, the libraries contain volumes numbering in the millions which are accessed through computers instead of card catalogues. The libraries also have extensive non-print holdings, including CD's which contain more information than many books, even long books could possibly hold.

For entrance, we consider class rank, the breadth and difficulty of your high school courses and the grades you earned in them, scores on standardized achievement tests and even how well previous students from your secondary school have done at UNC.

As you begin your own course of study which still contains prescribed requirements but allows you more choice than ever before with which to fill these requirements, remember the foundation on which this curriculum rests. The goal of The University of North caroloina at Chapel Hill's liberal arts education is to help students

1. become self-educating individuals
2. make responsible value judgments and decisions within our pluralistic society

and

3. work and live creatively in a technological world.

Recently in a scholarly journal I read the comments made by a professor as he was accepting a national award for teaching mathematics. His metaphor for learning was very appropriate for our health-conscious society and I want to share it with you. The author compared learning with exercise, with working-out. It is a rather simple task to teach someone the basics of exercise, say of lifting weights. You can be easily taught what a dumbell or a barbell is and what you are supposed to do with them. In the same ways, you can learn an aerobics routine easily and quickly. However the benefits to your body come with repetition, long term repetition, even life-long repetition. Perhaps you could put a weight, a dumbbell in your hand, hold your elbow at your side and lift the weight to your shoulder 1,000 times in one session...but the benefits to your body would not be as great as they would be if you did 10 repetitions 100 days in a row (or longer). Learning is the same...Your teachers can readily give you the tools and resources with which you can access anything you want to know. We can show you how to find information, help you think critically, give you an appreciation for the world in which you live but this information will little value or meaning unless you use it, unless you exercise it, over and over again for the rest of your life. It should come as no surprise to you that The University of North Carolina at Chapel Hill is a terrible trade school. What we do best is education...establishing what we hope will become the life-long exercise of learning...gaining knowledge and insights simply for the value of gaining knowledge and insights.

Perhaps at one time, it was possible to learn everything there was to know. Today, it is impossible and we as a faculty will feel that we have accomplished our goal if you leave here not knowing the answers to all the questions you will ever be asked, but rather knowing how to find the answers. Welcome to the University of North Carolina at Chapel Hill. We are glad you are here, and we are ready `for you.

Thank you.

Not "active military service" per se, and not EE credit (which needs an academic component). What the Ad Boards did approve on April 7, 2012, is granting up to 12 hours of course credit for leadership training in the military. An excerpt from the minutes, under New Business:

"Owen explained that the Departments of Military Science, Naval Science, and Aerospace Studies had developed a policy and procedure for awarding a maximum of 12 hours (more likely 3 to 6 hours) of transfer credit toward the major for educational training in leadership schools during military service. Students are eligible for such credit if they are currently serving in the military or have been honorably discharged. In the unlikely event that active duty or retired military personnel seek one of the ROTC minors, campus policies apply (half the courses have to be taken on campus)."

The form supporting this agenda item is attached.

Also attached is the supporting document for the April 20, 2011, Ad Boards meeting approving credit for the LFIT requirement for honorably discharged veterans. An excerpt from those minutes, under New Business:

"The Administrative Boards approved the following policy: that entering students who are either active-duty military or honorably discharged veterans have fulfilled the lifetime fitness General Education requirement by virtue of their active military fitness training. The approval comes with the endorsement of the Department of Exercise and Sport Science and is effective immediately."

Let me know if you need me to look further.

Best,

Erika

Eligibility for Need-Based Financial Aid

To receive financial aid from programs administered by the Office of Scholarships and Student Aid, a student must be enrolled in a degree or recognized certificate program and be making satisfactory progress toward the completion of a degree or certificate from the University. Once all requirements of the degree are met, students may no longer receive financial aid as an undergraduate student. The student may not be in default on a loan previously received for college expenses nor owe a refund on a scholarship, grant, or loan from an earlier enrollment period. In addition, the student must establish through the application process that the financial resources of the student and family are not sufficient to meet the cost of attending the University.

Subject: RE: syllabi

The guidelines on wihch this was based were exactly the same in the graduate record as in the undergraduate bulletin.
I am cognizant that we need to pick our battles (final exams are mandatory in all couses in which undergraduate students are enrolled). Maybe we should be getting sylalbus for all courses in which undergraduate students are enrolled! I can hear the responses - do you mean a syllabus for a dissertation (if they had one, would time to degree be reduced)!

Perhaps the best wording would be syllabus for all "traditional classroom-based courses" remembering of course that independent studies in the College all require contracts.

I don't have much access from here but will be in better shape once I get to the University of Minnesota tomorrow morning. If the letter is much delayed the deadline probably has to be moved.

Bruce,

I know Bobbi is traveling, and I hope she will speak up if I am wrong. But the guidelines state that: "Each course offered for credit has a syllabus that addresses the elements detailed below."

Also, the cover message that Bobbi drafted asks the deans to provide documentation "…for all of the classes offered in your unit."

It is a little bit confusing that the Guidelines start out quoting the Undergrad Bulletin, but I've always been under the impression that this initiative was truly University-wide in terms of level as well as the units to which it applied.

I look forward to hearing Bobbi's final answer.

I am charged with gathering info about practicum and recommending uniform policy. In April. Deb will not appear in February.
We can talk later.

Dear Dean Gil --

During your recent visit to the Department of Geological Siences, I indicated that we were nearly ready for the unveiling of our reconstruction of the Triassic reptile Postosuchus alisonae. This is the fossil discovered in 1994 in the Triangle Brick Co. quarry by two UNC geology majors, and collected, prepared, and reconstructed by myself and my undergraduate and graduate students during the following 16 years. We published this as a new species in 2008.

I would like to schedule this unveiling at a campus location toward the end of February. Can you suggest an appropriate site? We could leave the reptile on display for a month or so before sending it to the NC Museum of Natural Sciences in Raleigh for permanent display.

Having this unveiling on our campus would certainly highlight UNC's contribution to the project.

Sincerely -- Joseph Carter.

Mike,

The Planetarium would be an obvious place, but I haven't had much look getting responses from those folks (about other issues). I could suggest that Joe try there. BTW, he didn't check

with me before sending the email to Karen.

I can't think of many other places for such an exhibit. Student Union? Davis Library? It is a very cool reptile and was excavated from the very sedimentary package that is the object of fracking lust. And the reconstruction was done mostly by a series of First-Year Seminars. Actually, that makes me think that somewhere in Graham Memorial would be an appropriate place.

Thank for the quick review. I agree with your thoughts. Course syllabi for spring 2013 is ideal. we are seeking this for the report due March 1 and may need to do in future. Syllabus are for grads and undergrads but independent study contracts only for undergrads. I was looking for a place for this semester and wonder if Alexis (or Yulia) is possible for the short term. We are slammed trying to reconstruct degree requirements on top of May graduation clearance.

Bobbi
This is great. I have a few suggestions for the form to make it clear who in the department is responsible for 'filing' the independent study forms and syllabi. I've passed the suggestions to Dee and asked her to work on a revised draft. Here are my thoughts in case you have any comments on my suggestions.

I thought rather than "compliance" (I was not sure what you meant people to write in yes or no??), we could have a column for the name and title of the department person responsible. And then a place for their signature (maybe rather than comments). I also thought we want to ask for the location of the independent study contracts as well as course syllabi, so maybe we can have the location for both parts of the form. Location could say - physical location, website, or electronic address. (I think some might put their syllabi on the equivalent of our s drive or some other electronic file that is not necessarily a website. Finally, I think it might be good to have a line at the bottom for the chair to sign, something like "I verify that the department is in compliance with the new policies for independent study and course syllabi." Sign name.
To address the issue that some depts. may think sample syllabi are enough, do you think it should say Course Syllabi for Spring 2013? Is the plan to have this form completed every semester?
Rather than having them come in to Alexis, it might make sense for someone in undergraduate education to keep track of these if we are doing it every semester. If any forms do not come in, we need someone to contact departments, etc.
Dee knows we want to get this out today so she will work on the revision for our review.
Thank you

>
> Hi Bobbi!
>
> I have attached the ppt I will use tomorrow afternoon. If I understood you correctly you will be identifying the members of the subcommittee and referring to their charge. I thought that would segue into my remarks of what FAC has learned about the process and some of the figures that are of interest to our campus community right now. It appears one of the most frequent "myths" I hear is regarding the number of athlete "academic risks".
>
> Wanted to let you see what I was covering to be sure it works okay with the UGA advisory committee report and your comments about Special Talent admits.

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

The Faculty Athletics Committee Update
Friday, February 8, 2013

Admissions

- Information/Education Phase
  - Discussions – UGA & Layna Mosley and Beverly Foster, FAC topic experts
  - Reviewed documents –
    - Charge to the Special Talent Admission Subcommittee
    - Statement on Evaluation of Candidates
    - Summary of Admission Practices
    - Data handouts with additional statistics provided at second session

Admissions

- Athletics is permitted to recommend up to 160 first-year students for admission
- Covered under the "special talent" clause which provides for students "who give evidence of possessing special talents for University programs requiring such special talents." (same clause covers Departments of Music and Dramatic Art)

Admissions – Reviewed by Subcommittee

- The # of students is relatively small and has generally been trending downwards over time.
- 2013 - expected # is 16 - down from 23 in each of the last two years, using the current criteria;
- Down from 30, using the previous lower thresholds, in 2001
- Down from the middle 30s in the 1990s
- Of the 16 this year, all have predicted first-year grade-point averages above 2.0.

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Admissions

- Complex review of applicants for potential for success
- Seven most recent cohorts enrolling at UNC six or more years ago, the six-year graduation rate was 56 % with another 25% either still enrolled or left the University with cumulative grade-point averages of 2.0 or higher.
- Reviewing past practices to learn about the success or failure of previous students to inform the current decisions

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Admissions

- Subcommittee working with the Athletics Department and the Academic Support Program for Student Athletes (ASPSA)
- Improving academic profile of the 160 admitted athletes

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Admissions

- Three groups: 1) predicted first-year GPAs below 2.3, along with any others who require review by the subcommittee; 2) predicted GPAs between 2.3 and 2.6; 3) predicted GPAs of 2.6 or higher.
- Over the last six years - Half of the students were in the first two groups combined and the other half in the third group.
- Working with athletics to reduce the share in the first two groups and increase the share in the third. (this plan is consistent with the athletics dept's new strategic plan)

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Admissions

- Literacy skills question
- Fall 2012 First-year class included 26 students who scored below 450 in Critical Reading or below 17 in English.
- Of these 26 students, 18 were recruited athletes; the others were not.
- The # of students with verbal test scores at these levels has generally trended downward over time, both among all students and among recruited athletes.

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Admissions

- In 2005, the # of first-year athletes with such scores was 25; 2012 the # was 18; 2013 projected to be 12.

Admissions

- The 26 students with scores at this level who enrolled at Carolina last fall have now completed their first full semester.
- Sixty-two percent of them, including 56 percent of the recruited athletes, have GPA averages at or above 2.3. The range in the averages is wide: from 0.97 to 3.68 for the non-athletes, and from 1.07 to 3.46 for the athletes.

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Admissions – Current Summary

- Process in place for improving the academic profile of our entering student athletes
- Admissions profile trends moving in the right direction
- At FAC year end - more data to analyze and review in context of other information – student athlete exit data, advising resources, and academic support programs

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

February - Advising

- Topic Experts – Beverly Foster and Eileen Parsons

- Information/Education Phase
- Lee May, Associate Dean and Director of Academic Advising
- Brent Blanton, Associate Director of Student Success and Academic Counseling

>
> Hi Stephanie,
> John Stephens has sent me the most recent version of the TAM dual-degree proposal (attached). I also have a letter of endorsement from Dean Hartlyn (also attached), so I think we're ready to put this item on the Ad Boards agenda for February 26. Do you have any reservations about our acting on it at this time? Is it in acceptable shape from The Graduate School's perspective?

Dual MA-degree program proposal
TransAtlantic Masters Program in the Center for European Studies*
January 2012

1. Background

This year marks the fifteenth anniversary of UNC-CH's TransAtlantic Masters (TAM) program. At the same time our program's newer track (TAM II), focused on European governance, turns five. The Center for European Studies is proud to host TAM – a highly successful and innovative program of graduate instruction which affords MA students the opportunity to study the transatlantic partnership on both sides of the Atlantic. Our 5th and 15th anniversaries give us the opportunity to marvel at the accomplishments of our graduates and to think of new ways to attract top applicants and best serve our future students. At this time TAM II students may opt to pursue a UNC-CH MA in Political Science, Concentration European Governance, or to seek one of the Masters degrees from their European host university. We now wish to expand our degree offerings and make it possible for TAM II students to simultaneously earn *both* the existing UNC-CH MA in Political Science, European Governance and one of the European MA degrees within two year's time.

2. Rationale: Market demand, funding opportunities and outlook for graduates

Based in part on feedback we have received from our applicants and students, our motivation to offer a dual degree is fuelled by the desire to maintain our competitive edge in what is becoming an increasingly saturated MA-degree market. While we remain fairly unique in the US, in recent years consortial MA programs such as ours have grown in number throughout Europe. In essence, with this initiative we are responding to changing market circumstances. Further, we are taking action to ensure that our graduates remain among the most competitive as they pursue international careers. We believe that we will attract more students to TAM if we are able to offer a dual degree. Graduates of our program will gain an advantage on the job market and a greater flexibility in their job searches if they have two credentials to put forward – an American MA degree as well as a European one. As a result of the Bologna Process and EU funding initiatives, we increasingly see that our European counterparts are offering joint- or double- degrees. When we consider our program's long term sustainability and as we set targets for program growth, the dual-degree offering remains a high priority.

*This proposal was prepared by Sarah A. Hutchison, TAM's Associate Director. It draws some of its structure from a previous dual BA-MA degree proposal put forward by the Linguistics Department.

3. Current structure

TAM II students now begin the program by studying for one full academic year at UNC-CH. They then go on to complete a second year of study and research at one of our TAM II partner sites: the VU University, Amsterdam OR the Universitat Pompeu Fabra (UPF) in Barcelona OR the University of Bremen in Germany. All classes are offered in English. Coursework focuses on European governance and social policy, and there is an emphasis on qualitative and quantitative research methods.

While at UNC-CH in the fall semester, students take three required courses and one elective; they also participate in the Speakers Series offered by the Center for European Studies. Two required courses and one elective course are offered in the spring semester. After the summer, TAM II coursework resumes in Amsterdam, Barcelona, or Bremen. VU University Amsterdam, UPF, and the University of Bremen all have strong offerings in social policy. In Amsterdam, courses focus on such topics as comparative welfare states, international political economy, international security, and global environmental governance. At UPF, course titles include Techniques of Statistical Analysis I, Electoral Systems, Multiculturality and Immigration Policies, The Welfare State, Globalization and European Integration, Democracy and Political Liberalism, Social Policy and the Welfare State, Electoral Competition and Voting Behavior, and Migration and Society. In Bremen, social policy coursework focuses on the economy and on health policy. During the second semester overseas, TAM II students focus on their thesis research and preparation. TAM II European degree seekers do not pass oral or written exams as these are not a part of our European partners' degree requirements. In the case of TAM II UNC-degree seekers, students follow the established requirements on file with the Graduate School.

Upon completion of coursework and a thesis, TAM II students currently earn either a Master of Arts in Political Science from UNC, the UPF Master in Political and Social Sciences, or the MA from the University of Bremen. At this point it is not possible for our students to earn a single degree from the VU University, Amsterdam.

4. Proposed dual-degree structure

In order to make our proposed dual-degree trajectory possible, we will make some specific curricular and scheduling changes to the current structure. We will require an extra second-semester course and will also extend the duration of the dual-degree track. TAM II students currently remain in the program for four semesters and graduate at the end of the fourth semester in May. Our dual-degree students will instead finish at the end of two calendar years and graduate in August due to the difference in European academic calendars. Dual-degree-seeking students will pay the same tuition fee of $20,000 as all other enrolled TAM students. Due to its status as an off-model and off-campus studies program, TAM tuition does not align with the normal graduate tuition rate. Beginning in the fall of 2013, TAM students will pay $5,000 per semester.

TAM II dual-degree students will spend their first year in the program at UNC-CH. They will then go overseas to one of the TAM II partner sites to complete English-language coursework and a thesis in their second year.

While at UNC, TAM II dual-degree seeking students will begin the program with 5 courses.

Fall Semester at UNC-CH:
POLI 733: Comp Pol Econ: European Integration: Theories, Institutions and Decision-Making Processes (3 credits)
POLI 745: Varieties of Democratic Capitalism (3 credits)
POLI 788: Statistics and Data Analysis (3 credits)
POLI 891: Special Topics: US-EU Lecture Series (1 credit)
Plus one elective course (3 credits) such as POLI 438, 490, 632, 721 or PUBH 510. These offerings will vary by semester.
Semester's Credit total: 13

In the second semester, students will remain at UNC and take 4 courses.

Spring Semester at UNC-CH:
POLI 630 - Political Contestation (3 credits)
POLI 631 - European Security, The Enlarging EU and the TransAtlantic Relationship (3 credits)
Plus two elective courses (6 credits) such as POLI 432, 784 , POLI 432 or ECON 461. These offerings will vary by semester.
Semester's Credit total: 12

The 25 credits students earn at UNC can be understood as 68.75 ECTS if one uses a conversion ratio of 1 UNC credit to 2.75 ECTS. This conversion mechanism is relevant only to the University of Bremen where the MA-degree program is two years in duration and where, as a result, the UNC credits must be transferred to and accredited by the overseas institution.

In the third semester, dual-degree seeking students will take courses at their overseas site.

Fall Semester in Europe: at VU University Amsterdam, UPF, or the University of Bremen. During this semester students will be overseas and enrolled at their European host university. For TAM accountability purposes, students will also be enrolled in POLI 813: Comparative Welfare States (3 credits), POLI 890: Directed Reading (3 credits), and POLI 891: Special Topics (3 credits) at UNC. Semester's Credit total: 9

Spring Semester in Europe: at VU University Amsterdam, UPF, or the University of Bremen. In their final full semester TAM students will take any remaining required courses at their European

site (usually one research methods class) and focus primarily on their thesis research and writing. The European site will provide a thesis supervisor as will UNC. As a result, the thesis will be approved and accepted by both sites. In some instances a university-based research internship may be required or optional, but in all cases the internship will have direct relevance to the student's thesis. During this spring semester students will be enrolled on the UNC-CH side in two courses: POLI 890: Directed Reading (2 credits) and POLI 993: MA Thesis (3 credits). Credit total: 5

Summer I and II Sessions in Europe: In both summer sessions students will remain enrolled for MA thesis and directed-reading credits only as they make progress on their thesis. POLI 890: Directed Reading (2 credits) and POLI 993: MA Thesis (3 credits). Credit total: 10

Within the proposed TAM II dual-degree program, the 20% rule for the transfer of course credit will apply. According to *The UNC-CH Graduate School Handbook* "up to 20 percent of the total hours required for the master's degree may be...transferred from another approved institution." After completing 25 credit hours towards their UNC-CH MA degree in their first year, students will go overseas to take courses at their European site. Though credits earned abroad will accrue on the UNC side, since students will remain enrolled at Carolina throughout the duration of the program, these overseas classes will only count towards the European degree and will not be a part of the 30 credits students need to earn the UNC MA. The fall-semester directed reading course and thesis credits (5 credits total on the UNC side) will, however, be counted on the UNC side. All three European sites have assured us that it will pose no problems with their institutional requirements to double count the thesis itself. Further, the European institutions will not require oral or written MA thesis exams within the context of this dual-degree initiative.

UPF and VU University, Amsterdam offer one-year MA programs into which our students will enter at the start of their second year in the TAM dual-degree program. Bremen offers a two-year MA program in Social Policy. The Bremen-UNC reciprocity grid is also included here and entitled "Study Plan TAM Master Social Policy Bremen."

5. Overseas partner site degree requirements

At the VU, students take courses within the Faculty of Social Sciences and will pursue the MSc in Political Science. The academic year is divided into two semesters which are each divided three periods. Students can choose between 4 tracks: Comparative European Politics (CEP), International Relations and Transnational Governance (IR), Global Environmental Government (GEG), and Policy and Politics (PP). Over the course of the academic year, students must earn 60 ECTS credits by way of 7 courses total and a thesis.

The VU University, Amsterdam's MSc in Political Science:

Period 1: Sept to Oct	Period 2: Nov to Dec	Period 3: Jan to Feb.	Period 4: March to May	Period 5 & 6: May to August
Theories and Approaches in Comparative European Politics (6 ECTS, all tracks)	**IR, GEG & CEP tracks** Two courses (each 6 ECTS) in Selected Issues: • Transnational Political Economy • Comparative Political Institutions • Global Environmental Governance • EU Politics and Multilevel Governance • International Security	Political and Policy Research: Philosophy and Design (6 ECTS)	Workshop in 4 thematic groups (12 ECTS): a) International Relations b) Global Environmental Governance c) Comparative Policy & Politics	MSc Thesis in Political Science (18 ECTS) Specializations: - International Relations - Comparative European Politics - Global Environmental Governance - Policy and Politics
Theories and Approaches in International Relations (6 ECTS, **IR, GEG & CEP tracks**)				
Theories of Public Administration (6 ECTS, **PP track**)	**PP track** (each 6 ECTS)**:** • Comparative Political Institutions **or** • EU Politics and Multilevel Governance **and** • International Governance **or** • Governance of Security and Policing			

At UPF in Barcelona, dual-degree TAM students will seek the MA of Research in Political Science housed within the Department of Political and Social Sciences. The UPF MA of Research consists of 60 ECTS (European Credit Transfer System) and involves taking 8 courses in total (5 compulsory and 3 optional), and doing a Final Research Paper. The academic year is divided into three terms. The first term takes place from Sept to December, the second from January to March, and the third from April to August.

UPF's MA of Research in Political Science:

Term 1: Sept. to Dec.	Term 2: Jan. to March	Term 3: April to Aug.
Required: Techniques of Statistical Analysis I (5 ECTS credits) **AND** Fundamentals of Political and Social Research (5 ECTS credits)	**Required**: Techniques of Statistical Analysis II (5 ECTS credits) **AND** Idioms of Analysis in Political Science (5 ECTS credits)	**Required**: Getting Started in Political Research (5 ECTS credits) **AND** Master Thesis (20 ECTS credits)
Electives: Students must take three from the list below over the course of Terms I and II (all courses value 5 ECTS credits). Not all courses are offered every year.		
•Actors and Institutions in •Public Policy Analysis Migration and Society •Democracy and Political Liberalism: Theoretical and Institutional Features •Electoral Systems •Federalism and Federations: Political Theory and Comparative Politics •The Welfare State, Globalization and European Integration •The Construction of the EU and its Consequences on the European Population •Qualitative Research Methods •Citizenship and Democracy in the European Union •Social Network Analysis •Causal Modeling •Multilevel Political Competition: Parties, Citizens and Elections •Diversity and Immigration policies •The Management of Complex Organizations •Problems and challenges of Democratization •Comparative analysis of Political Parties •Comparative Political Economy		

In Bremen, the situation is a bit more complex than it is at the VU or UPF as Bremen offers a two-year MA in Social Policy. The grid below reveals how dual-degree seeking TAM II students who elect to go to Bremen will sepnd their two years in the program:

Semester	Corresponding Module	CP ECTS	Courses
1. Sem. **Aug. to Dec.** *Chapel Hill*	**SozPol M 1** Introductory Courses	8	POLI 745: Varieties of Capitalism
		8	POLI 788: Statistics and Data Analysis
	SozPol M 3 Comparative and European Social Policy Theories of the Welfare State	3	POLI 891: US-EU Lecture Series
		8	POLI 733: European Integration: Theories, Institutions and Decision-Making Processes
2. Sem. **Jan. to May** *Chapel Hill*	**Sozpol M 4** Governance, Administration and Management	8	POLI 721: Public Policy and Administration or another related elective
		8	POLI 630: Political Contestation
	SozPol M 5 Theories of the Welfare State	8	POLI 631: European Security (or an Independent Study on Comparative Welfare States with John Stephens)
	Sozpol M 6 Policies	9	PUBH 510: Interdisciplinary Perspectives in Global Health *or* any other course in the fields of „Work and Social Security“ or „Health Politics/Health Economy“
Total		60	
3. Sem. **Sept. to Jan.** *Bremen*	**Sozpol M 7** Research Internship	18	Research Internship plus Internship Report
	SozPol M 2 Law and Economy of the Welfare State	12	Seminar Series „Social Policy in Germany: Structures, Economy and Law“ Comparative Social Policy Seminar or International and European Social Policy Seminar
4. Sem. **Feb. to Aug** *Bremen/Chapel Hill*	**Sozpol M 8 und M 9** Research Unit 1 and 2	9	Research Design/Examination Colloquium
	Masterarbeit	21	Master's Thesis
Total		60	

After arriving in Bremen in September, TAM II students will take the Social Policy in Germany: Structures, Theories and Economics series, another class on social legislation, and they will intern at the ZeS or SfB. The internship will involve writing a 20-page report. In the next semester students pass a Research Design / Examination Colloquium (en bloque) and complete their thesis.

Though TAM students will remain enrolled in UNC courses while taking courses in Europe these classes will not be needed to earn the UNC MA degree. This enrollment simply provides accountability on the UNC side and ensures that the students remain eligible for financial aid and have access to electronic library resources.

In the final semesters of the program students will receive training in research and project design at their European site and produce an MA thesis in accordance with the regulations of both UNC-CH's Graduate School and their overseas host institution. They will benefit from advisors at both schools. In some cases an internship will be a required (Bremen) or optional (VU University, Amsterdam) part of their study program in Europe.

6. Admission

Applicants to our dual-degree program will identify themselves at the application stage and will make separate applications to each degree-granting institution. Applicants will submit materials via the Graduate School's ApplyYourself online portal. With the applicant's written consent, these materials will be passed along to the relevant partner site for review. Those admitted to the dual-degree program will be selected by an admissions committee composed of two or more professors and a coordinator of each partner university. Selection criteria match those of the UNC-CH's Graduate School. The application deadline will be in early January each year. If volume is low, applications may be accepted on a rolling basis until mid April or early May.

7. Supporting materials

TAM II Core Courses:

All Track II TAM students take the following four courses at UNC-CH during the Fall semester. These courses were specifically designed to introduce students to the EU and focus on comparative approaches to the institutions, politics, policies, and societies of nations.

POLI 745: Varieties of Democratic Capitalism (3 credits)
Professor: John Stephens
The course will examine the development of different types of welfare states in Europe and North America. The course will be structured around the concept of "welfare states regimes", as defined by Gøsta Esping-Andersen in his path breaking book, Three Worlds of Welfare Capitalism. The course moves back and forth from broad conceptual issues to examination of developments in five countries which represent the different welfare state types: the United States and Britain as liberal welfare states, Sweden as a social democratic welfare state, Germany

as a Christian democratic welfare state, and Italy as a southern or Mediterranean variant of the Christian democratic regime.

POLI 891: US-EU Lecture Series (1-credit class)
Professor: John Stephens
This weekly lecture series will draw primarily on the expertise of international faculty. Topics will focus on EU and/or US foreign and domestic politics as well as on contemporary transatlantic relations. Each week, two TAM students will be required to research the up-coming topic and speaker; these students will introduce the lecturer and will lead the discussion following the talk. TAM students will also be required to participate in a weekly on-line discussion forum focused on the lectures.

POLI 733: Comp Pol Econ: European Integration: Theories, Institutions and Decision-Making Processes (3 credits)
Professor: Christiane Lemke – a visiting professor from the University of Hannover in Germany will teach this class. Professor Lemke is currently based at NYU and serves at the Max Weber Chair in German and European Studies. The seminar will begin with a brief introduction of the European integration process, then cover major theories of integration, the institutions of the EU, including the most recent EU-reform process and some major policies of the EU.

POLI 788 – Statistics and Data Analysis (3 credits)
Professor: Justin Gross
This course focuses on the application of statistical analysis to quantitative data in order to study theoretically and substantively interesting questions about politics and policy. We start by briefly considering some basic issues of empirical social science: concept formation, measurement of concepts and variables, validity and reliability, explanations and hypothesis formation, the challenge of assessing causation, and comparisons and relationships between variables. We then move to the basics of statistical inference. We consider attributes of single variables, including their distributions and measures of central tendency and dispersion. We consider measures of association among two or more variables and demonstrate how to quantify the precision of estimates, via confidence intervals and hypothesis testing. We next turn our attention to regression techniques, including simple bivariate and multiple regression as well as logistic regression. Finally, we consider how to ascertain whether important assumptions of regression hold, what goes wrong when the assumptions do not hold, and some techniques for dealing with these problems.

TAM II Students will also choose one fall elective course. The 2012 list of choices is as follows:

1. POLI 632 - The EU as a Global Actor (3 credits)
Professor: DAAD Professor Holger Moroff
The seminar focuses on the EU's external relations and foreign policies. The EU is not a classical actor in international relations as it enjoys more decision making powers than an international organization and less than a unitary state. However, these powers vary according to the degree of integration in different policy fields. We shall look at a diverse set of EU external policies ranging from trade and soft security issues to diplomatic and military developments as well as US-EU relations.

2. HIST 890: Transatlantic Relations from the Cold War to the Present:
The Atlantic Security Alliance & the U.S. and the Unity of Europe (3 credits)
Professor Larres
This course considers transatlantic relations and the U.S. desire to construct a more united European continent since the end of World War II. On the background of the intensifying Cold War with the Soviet Union, U.S. policy toward Western Europe had two major strands: 1. the security dimension exemplified by the creation of NATO and the Atlantic security alliance, including Washington's nuclear predominance; 2. the western world's ambition to build a united Europe ('ever closer union') that would eventually lead to a federally organized United States of Europe on the model of the U.S.A. Both strands overlapped, complemented and competed with each other over time. Within both strands serious difficulties, animosities and power struggles developed and have continued to the present day. American hegemony in the transatlantic alliance has never remained unchallenged. In fact since the 1960s and early 1970s an ever intensifying transatlantic power battle can be observed.
This course will focus on both of the above strands with perhaps a somewhat greater emphasis on the second strand that tends to be neglected in the literature. We will consider and analyze the complex history and politics of transatlantic relations during both the Cold War and the post-Cold War years; we will thus deal with the years from the Marshall Plan of 1947 to the Maastricht treaty of 1991/92 and beyond, including the Euro crisis (and Washington's response to the crisis) of the last few years. Please see the attachment if this course interests you.

3. POLI 438 - Democracy and International Institutions in an Undivided Europe (3 credits)
Professor: Milada Vachudova Explores the collapse of communist rule in 1989, and the reaction of international institutions to the challenges of democratization, economic transition, ethnic conflict and European integration in an Undivided Europe.

4. POLI 490 – The Extreme Right in Europe (3 credits)
Professor: Erica Edwards
This is a new course which will examine recent political trends in Europe involving the rise of nationalism and extreme right-wing parties. Issues of particular interest will include identity and immigration as well as the extreme right's views on the EU Special attention will be given to countries such as The Netherlands, Switzerland, Italy, France and Belgium.

5. PUBH 510 - Interdisciplinary Perspectives in Global Health (3 credits)
Professor: Margaret Bentley, Associate Dean of Global Health, UNC's Gillings School of Global Public Health

This course will explore contemporary issues, problems and controversies in global health through an interdisciplinary perspective; examine the complex tapestry of social, economic, politic and environmental factors that affect global health; analyze global health disparities through a social justice and human rights lens; and expose students to opportunities in global health work and research.

6. RUES/PWAD/POLI 469 - Ethnic Conflict and International Intervention in the Former Yugoslavia (3 credits)
Professor: Robert Jenkins
This course focuses on factors leading to the breakup of socialist Yugoslavia, the nature of conflicts in this territory throughout the 1990s, and the various efforts of the international community to end conflict and promote post-conflict reconstruction and development. We will explore how ethno-nationalist identity and mobilization have developed and transformed up to the most recent events. We will also examine the evolution of international intervention from the beginnings of conflict through current efforts. We will end by discussing implications of intervention, ethnic conflict, and nation building in Iraq.

7. POLI 721 - Public Policy and Administration (3 credits)
Professor Virginia Gray
Alternative explanation of public policies and policy-making processes; introduction to policy analysis as a way to inform choices among policy options; policy implementation through administrative practices and procedures

In the spring semester, TAM students take two required courses and one (or two) elective classes. Elective courses vary.
In 2013 they included: POLI 784 (Intermediate Statistics), POLI 432 (Tolerance in Liberal States) or ECON 461 (European Economic Integration).

Required classes are usually:
POLI 630 - Political Contestation (3 credits)
Prof Erica Edwards
With the expansion of the European Union's jurisdictional authority over a range of policy areas, the introduction of a single currency, EU enlargement, and the negotiation of four successive treaties in less than two decades, European integration is motoring full speed ahead. But not all citizens are pleased with the speed or direction in which the European endeavor is moving. There appears to be real potential for political mobilization against the European project within national political arenas.
This course ties into these latest developments in the European integration process by exploring the potential for political contestation concerning EU matters in national politics. The aim of this course is to familiarize students with both the main theoretical approaches and the extensive empirical work dealing with the effects of European integration on domestic politics. Specifically, we will focus on the impact of the integration process on political parties and party strategy, electoral campaigns as well as voting behavior in national elections and EU referenda.

POLI 631 - European Security, The Enlarging EU and the TransAtlantic Relationship (3 credits)

Prof. Milada Vachudova
Since the collapse of communism from 1989 to 1991, the European Union has faced a fundamentally different geopolitical neighborhood and an evolving relationship with the United States. In this upper level, graduate course, we will explore how Europe has addressed new challenges to its security in its neighborhood and beyond. We will also explore the EU's attempts to construct a unified foreign policy as well as a security policy backed up by military capabilities under EU command. All the while we will examine the EU's relationship with NATO and with the United States, and how the two powers cooperate -- or don't -- on the world stage. Topics we will cover will include the Yugoslav wars, minority rights, the relationship with Russia, policy towards the post-Soviet states (especially Ukraine and post-war Georgia), terrorism, immigration, energy dependence and global warming.

February 7, 2013

Erika Lindemann, Associate Dean
Undergraduate Education
Campus Box 3504
Carolina Campus

Dear Dean Lindemann:

I am writing to you to endorse the proposal for a TransAtlantic Masters dual-degree from the Center for European Studies (to be awarded through the Department of Political Science and a European University). This proposal is to go before the Administrative Board of the College of Arts and Sciences on February 26, 2013.

I am pleased to support this proposal as Senior Associate Dean for Social Sciences and Global Programs in the College of Arts and Sciences.

The integrated course of study presented within the proposal includes rigorous, cross-cultural academic training focused on social policy. The dual-degree proposal reveals the efforts of the Center to deepen inter-institutional ties with its partners across the Atlantic and to offer students the opportunity to earn a U.S. and a European MA degree in the span of two years. In this way the Center for European Studies also keeps pace with its European partners, many of whom have already established dual- and joint-degree programs with other universities, and seeks to strengthen its reputation for innovation in the field of international education. By offering a dual-degree, the program will attract more applicants and uphold its strong reputation as an experiential-learning pioneer. This new initiative is a fitting way for TAM to expand its offerings and to build upon its success as it marks its fifteenth anniversary this year.

Please do not hesitate to contact me should you require further information or have questions.

Sincerely,

Jonathan Hartlyn
Senior Associate Dean for Social Sciences and Global Programs
Kenneth.J. Reckford Professor of Political Science

cc: John Stephens, Director, Center for European Studies

Subject: Clarification re: student teaching/independent study courses

Dear Provost Carney,
I went back to our registrar today to clarify the issues we discussed yesterday. She tells me that the new numbers to be assigned to our practica, internship and independent study courses have changed to the numbers below in line with direction from Dean Bobbi Owen and Erika Lindemann.

- 493 – Practica
- 593 – Student Teaching/Internship
- 693 – Graduate Practica Student Internship – MAT
- 496, 596 & 696—Independent study numbers

So, the issue is the total number of credit hours as we discussed rather than the course numbers per se. For example, our Elementary Ed undergraduates will have 20 hours of these numbers, i.e., 493 and 593, to complete their licensure requirements. If they have taken any additional independent study courses prior to being admitted to the SOE, then obviously that number grows.

I hope this is helpful in your consideration. I appreciate your thoughtfulness in trying to make certain that this works for the entire campus.

Best,
Deb

Subject: RE: Moving the "ammendment" to a FC resolution

The IS report has been adopted by the College. The provost asked EPC to consider adopting it campus wide. The barrier to adopting it campus wide was the 12 hour limit which EPC resolved y
esterday with a rider to the IS report (which I believe is a friendly rider) now drafted as an amendment.
Had the IS report been written with the entire campus in mind it would have had that included in the exceptions to the limit of 2 and the 12 hour rule (as with established research labs).

Therefore, the entire report has to be adopted with the rider (appendix, addition, etc.) from yesterday.

It is for undergrads only.

Subject: RE: Moving the "ammendment" to a FC resolution

Hi Theresa,

Hmm, well the thing I am unclear on is that the language for Resolution 2012-12, "On Revising the Regulation Concerning Independent Studies for Credit," does not limit itself to the College, but could be assumed to apply to all units offering undergraduate courses. So I am unclear about what else you propose to get adopted "campus wide"---maybe I am forgetting something?

If I'm correct that the original resolution already applies campuswide, then the only thing to approve would be your new resolution/amendment, right?

Maybe Bobbi has other insights…

Subject: Moving the "ammendment" to a FC resolution

Dear Bobbi and Anne,
It seems to me, after reviewing my notes from this morning's EPC meeting, that moving the "special circumstances pertaining to professional schools" amendment to the previously endorsed Guidelines for Independent Studies actually requires two steps: first, to propose that those guidelines be adopted campus wide, and next that the guidelines be amended according to the "special circumstances.." document. At EPC today, we only approved the amendment itself, not the campus-wide adoption.
Thoughts? And how urgent is it that this go before FC before April 5?
Please advise,
Theresa

Thanks, Theresa. So do you think that EPC understood that they would be sending along to Faculty Council a recommendation that proposes adoption of that entire IS report, with all of its many subsidiary recommendations (including recommendations regarding course numbering and that sort of thing)? That looks extremely complex to me, but, again, maybe there have been developments of which I'm unaware that render this observation irrelevant. :)

Anne

Anne,
Thanks for looking at this with an eye toward both clarifying the proper protocol for moving this "amendment" through the faculty council approval process and trying to figure out where it belongs as a University policy. This confusion was exactly what I had, much less eloquently, been questioning yesterday. My understanding (admittedly limited) is that your statement below "the amendment proposed {is} an addendum to the Independent Study Task Force Report, which will then, in turn, be sent to Faculty Council for adoption in its entirety for application to undergraduate education university-wide" is correct - and reflects how I'd imagined this process moving forward.
Bobbi and Bruce,
do you see problems with proceeding in this manner?
Thanks,
Theresa

Cc: Raphael-Grimm, Theresa
Subject: Re: Moving the "ammendment" to a FC resolution

Ok, thanks for your patience while I try to understand. I think the source of my confusion lies in how the undergraduate programs within the professional schools are understood/classified/set up and described in the Bulletin, and in what, specifically, action is being proposed for Faculty Council.

With regard to the Bulletin, here is how the logic appears to me—please correct me where I am wrong:

* Resolution 2012-12<http://faccoun.unc.edu/wp-content/uploads/2011/03/Res2012-12OnIndependentStudyFinal.pdf> amends the language on "page 52 of the 2012-13 Undergraduate Bulletin . . ."
* The language on p. 52 of the undergraduate bulletin falls within a section of the bulletin (starting on p. 48) that pertains to "Requirements for Degree Programs within the College of Arts and Sciences."
* Therefore, Resolution 2012-12, as presently written, would appear to apply only to the College.
* However, a closer reading of that section of the Bulletin (pp. 48-52) does reveal that there are references (e.g. on p. 49) to the fact that "a maximum of 24 semester hours . . . from professional schools . . . may be taken for credit toward a degree from the College of Arts and Sciences."
* So, is that how the professional schools become involved here in a discussion of regulations that appear, at first glance, only to apply to the College?
* If so, then I do see the logic of the proposed language presented at EPC yesterday (attached) that states that "the limits established by Faculty Council Resolution 2012-12 "On Revising the Regulation Concerning Independent Studies for Credit" shall not apply to appropriately supervised out-of-classroom internships/practica for a professional school's undergraduate program."

However, what I don't understand is this: is the amendment proposed a modification of Resolution 2012-12 (which as Bruce says below, applied only to the College—but which, according to the logic above, is a bit murky, at least to me, on that front)? Or, is the amendment proposed an addendum to the Independent Study Task Force Report, which will then, in turn, be sent to Faculty Council for adoption in its entirety for application to undergraduate education university-wide? I ask this because it appears that there are many OTHER recommendations within the IS task force report besides the 12-credit-hour limit, which is the only matter addressed in Resolution 2012-12.

I would be happy to chat by phone with Bruce, Bobbi, or Theresa to clarify what is needed; I need to be able to bring Joe up to speed, as he will be helping to draft the resolution(s). Bobbi, I know you are presently out of town, so Bruce or Theresa, if we should chat today, please let me know when to phone you. I will be unavailable this morning from about 9-10:15, but should be able to call any time after that.

Best,
Anne

So this would not, then, be an amendment to Resolution 2012-12, but rather a resolution proposing adoption of the entire IS report for the campus, with this particular rider added on? Sorry if am not following completely.

>
> In thinking about the action wanted from Faculty Council, it appears that the main action desired is adoption of the entire ISTF report campuswide. So I made that the main action item of the resolution, with the "comment" section discussing the specifics of the sorts of revisions that will need to be made in the report before it is fully applicable. I guess part of what you need to determine now is whether you want any of that specific language (formerly known as the "amendment") included in the main body of the resolution. Also, it seemed that we needed some kind of deadline for implementation in the resolution . . . but you can say if you don't want that. If we don't have it, it feels a little mushy to me.
>
> In any case, see if this is at all on the right track . . . or feel free to revise and recirculate.

This is a wonderful document (I love it when you talk data talk). it is useful for this report as well as for the future.
Once the dust clears, we should add a date column to the 4 internal report docs (before using them more widely) to match.
Well done!

Subject: strategies

Chris and Bobbi,

Attached is the implementation status matrix for those plans reviewed by Baker Tilly, adopted from their original matrix, but with my own rewording of all the direct quotes they pulled from reports to be more succinct. It was somewhat awkward to complete because a lot of the items (particularly in their column labeled "implemented recommendations") seemed to focus on the AFAM department's changes as opposed to more wide-ranging changes that have also occurred, which I had not noticed until trying to address each row the past couple of weeks. But we can't quarrel with their document.

I ask that you both please take a look particularly at the last two columns to make sure I have not over-reported actual completion actions or their dates. If anything is misleading or just flat-out wrong or ill-stated, please make direct corrections on this worksheet. None of these are actions I had anything to do with directly or know much about except through reading reports, so your expertise should "rule" in any case.

Chris -- after our conversations and emails last night, I think there is still one row still needing information from you that shows up a few times: "Further limit the time periods in which schedulers..." If you can complete it, go ahead, and if it seems to be completely subsumed by another row, just delete that row every time it appears.

Thanks,

Lynn

Subject: SOWO First Year Seminar

Dear Jack,
It was nice chatting with you this morning. As I mentioned, I will submit SOWO 89 (First Year Seminar: Special Topics) in the Course Request Approval System (CRAS). I believe Joelle Powers is the course approver for SOWO, so she'll receive an automated message from CRAS shortly.

Here's the link to the online First Year Seminar Prospectus Form<http://fys.unc.edu/for-faculty/first-year-seminar-prospectus-form/>. The deadline for completing this form is October 1 for a spring 2014 seminar.

Here's the link to the General Education criteria document<http://www.unc.edu/depts/uc/Faculty/GenEd_criteria.pdf>. I'm happy to review a draft of a syllabus before the instructor submits the Prospectus Form; that way I can recommend the most appropriate Gen Eds.

Thanks again for your interest in developing a new First Year Seminar. Please don't hesitate to call or email if you have any questions.

Best,
Nick

Dean Owen,

I had a busy last week.

1. On Monday, following the technical committee meeting, I helped some of the members with their respective sections on the new Advising website. Later on, I did some Access-related work and worked on the Summer Bridge database.

2. On Tuesday, I made some edits to the new Change of Major form. Following that, I worked some more on MS-Ascess and the Wysija plug-in tool in WordPress.

3. On Wednesday I had a few meetings with Beth, Roger and Julia, and communications with Jeff VanDrimmelen about summer orientation information and creating an application for use by advisors for summer orientation. I helped Charlotte Waterhouse with some website-related work and researched tools that will allow a tablet, i.e., an iPad, to access the shared drive remotely and query an MS-Access database.

4. On Thursday, I had meetings with Julia, Dean Shuster and Roger Kaplan about the summer orientation application. I also made a fix to the new Online Change of Major form. I finished off the day by working on the design of the Senior Reviews form in Dreamweaver.

5. On Friday, the Major/Minor form went live. There have been no major issues so far and it appears to be working well. In the morning, I did some more work on the new Advising website. I also had more meetings with Dean Shuster and Julia about the Summer Orientation information, as well as communications with Jeff VanDrimmelen about the same. Most of the afternoon was spent working on the Senior Reviews form with Tae in Howell and on MS-Access related issues.

I did not take any leave during this period.

Sincerely,

Geeta

Dean Owen,

Described below is a list of activities that I performed last week.

Monday

- Attended the Technical Committee meeting to get the group's consensus regarding the appearance and layout of the home page. This involved the choice of the page template, menus and menu items, events calendar and social media. Each of us also gave an update on our progress for our assigned sections.

- Worked on the Summer Bridge application.

- Provided training to Ken Shugart on how to upload and update worksheets on the new website.

Tuesday

- Performed some fixes on the current website. There was a problem with a couple of broken links on one of the pages as well as a link embedded in a pdf form.

- Made some updates to the Major/Minors form at the behest of Roger Kaplan.

- Continued with my work on the new website. I also explored a new plug-in feature on the website called Wysija which allows email communications to be sent out to students en masse. The difference between using this and the listserv is that it allows graphics to be included in the text.

Wednesday

- Continued familiarizing myself with the Wysija plug in and testing it.

- Worked on the Senior Reviews form with Tae in Howell.

- Did some Java training.

Thursday

· Explored some of the features in MS-Access database and tested some queries and code that I had written with a view to incorporating them in the new version of the Graduation Application database and the Summer Bridge database.

· Attended the Campus Solutions Demo by the Registrar's Office at Hamilton. At this point the super users such as myself are still unable to create our own custom queries. However this tool has heen useful in obtaining reports. Since the departure of Dr. Faxian from IR, I have had to create my own reports, including a list of students for the School of Business Workshops event registration and mailings. The OBIEE tool has been very helpful in this regard.

· Met with a work-study student who was sent to see me by Gary Miller. She wanted to obtain some information regarding different approaches to creating an online application.

Friday

· On Friday morning, I met with Ken Shugart again to help him with some of the issues he was having with WordPress and the new website.

· Met with Julia to discuss some issues she had brought up with the Major/Minor form specifically relating to how the data would be stored and how it would affect their business procedures going forward. There were also some validation issues with the form that she raised. I conferred with Roger about the latter issue and, after that, proceeded to include the additional validation features into the form and did some testing.

· Set up the School of Business announcements via the Wysija tool with a view to sending them out on Monday.

I did not take any time off during the week.

Sincerely,

Geeta

Dean Owen,

I was very busy last week working on the new website to get it ready for the internal launch last Friday. Some sections are not yet ready but we wanted to give the rest of the departmental staff a chance to review it as well as an opportunity to familiarize themselves with the new look and feel of the website. It was launched department-wise on Friday and we are now obtaining feedback from them as well as checking the different sections for any errors and broken links. Besides working on the new website, I also made some updates to the major/minor declaration form, worked on the new Summer Bridge application and database, and the Graduation Application Database.

02-11 to 02-15

1. On Monday morning, the Web Committee met to discuss how to proceed with the launch. Apart from working on my own sections, I have also been assisting Matthew Harvey, Dean Shuster and Linwood Webster with their respective sections.

2. On Tuesday and Thursday, I helped Matthew Harvey with some problems he was having with his section of the website.

3. On Wednesday afternoon, I met with Linwood Webster to help him with his section. Later that afternoon, I met with Beth Shuster and we worked together on her section of the website.

4. On Thursday, I met with Marcus Collins where we made revised the Summer Bridge application which will be launched today. I will also be updating the Summer Bridge database application.

5. On Friday, I met with Roger Kaplan to discuss some modifications to the online Major/Minor Declaration form and also creating online versions of a few other existing paper forms at Academic Advising.

I did not take any time off last week.

02-04 to 02-08

I meant to send this to you last week, but was so caught up in my work that it slipped my mind. I apologize for that.

Most of this week was spent on working on the new website, the Summer Bridge application and database and modifications to the graduation database. In addition to that, I also had meetings with the following staff:

1. On Monday I met with the rest of the members of the Web Committee to take stock on what we have accomplished so far and how to proceed from that point.

2. On Tuesday I met with Tae for work on the Senior Reviews form.

3. On Thursday I met with Roger Kaplan to discuss creating an online version of a paper form, i.e., the CCO Course Approval form. Also on Thursday, I also met with Linwood and Beth to assist them on their work on the new website.

I took some time off this week for a dental appointments on Monday morning and Tuesday afternoon (at lunch time), and a medical appointment on Thursday afternoon. I have already accounted for the time I took off with Paula.

Sincerely,

Geeta

The enclosed message and attachments from Dean Gil and Shannon Kennedy, Interim Senior Associate Dean and Executive Director of the Arts and Sciences Foundation, are being sent to all department chairs and several program directors in the College.

# # #

Dear Colleagues,

At the Chairs' Retreat in September, we discussed the need for the College of Arts and Sciences to begin planning now to establish priorities for the University's next capital campaign. To help us get started, we are asking you to create a brief case statement highlighting your unit's top three funding priorities. It's essential that we receive input from you and your colleagues so that the Arts and Sciences Foundation has an accurate understanding of your program's mission and its most important funding needs and objectives for the future.

Please plan to complete the case statement by March 1, 2013.

You may use the attached template to begin considering and planning the components of your case statement. This template is designed to help you highlight your program's background and mission, size and scope, priority needs, and strategies for fulfilling them. Please briefly describe your top three priorities, explain why they are important, and tell us what you would need to fulfill them.

We are working with Andy Lang and OASIS to create a web-based template, which you will be able to use to finalize your case statement. The web template will be available soon. Meanwhile, we hope the attached paper template, and samples of two sample departmental case statements, are helpful as you begin the process within your unit.

If you have any questions about this, please contact your Senior Associate Dean and/or Shannon at the Foundation office. Thank you for your help in gathering this important information for the next campaign.

We look forward to learning about your priorities.

With best regards,

Karen and Shannon

Karen M. Gil, Dean, College of Arts and Sciences

Shannon Kennedy, Interim Senior Associate Dean and Executive Director, Arts and Sciences Foundation

Product Summary – Acalog Overview

We're often asked what differentiates a true academic catalog management solution from generic content management software. Virtually all of our customers use content management software to publish their general website, but they use Acalog to manage and present both their print and e-catalogs.

Generic content management systems are designed to publish content as "pages" of information. Listing courses or programs involves creating a "page" and the need to hand edit the information, as well as a manual process for keeping the pages updated as courses are added or removed. This is a tedious process that often results in errors since it can be very difficult to track specific changes across a very large collection of content, either in a print based system like Microsoft® Word, or a Web-based content management system designed for publishing Websites. Acalog is a unique solution that provides a much more efficient process, with increased accuracy, by leveraging the power of a relational database.

Acalog provides a direct, real-time connection between the editorial environment, termed the *Publisher*, to the online catalog, which is delivered through an e-catalog portal we call the Acalog *Gateway*. The *Gateway* is integrated seamlessly with the look and feel of a college or university Website. Once a catalog manager approves a catalog for publishing, all that is required to make the catalog available is to set a global lock (preventing further changes by editorial account holders), and then changing the status of the catalog to "published". The catalog becomes instantly available via the *Gateway*. This is an administrative user function, and there is no intervention required from the Webmaster or IT staff at the institution.

Our Approach to Academic Catalog Management

When we looked at creating a more efficient way for managing academic catalogs, including the need to publish an interactive e-catalog while supporting the need to print, we noticed several very important things that distinguish academic information from typical narrative content on college and university websites. We discovered:

- *The organization of academic information at colleges and universities is very structured and hierarchical. A university has schools and colleges; they have departments; and departments have courses. Majors may belong to either colleges or to departments, depending on the structure of the institution.*

- *Not all academic information is just "pages" of narrative content. Courses are data specific (particularly with regard to supporting integration with Banner, Peoplesoft, Datatel, etc. and other student information systems [SIS]), and programs also lend themselves to being managed as data (particularly the many repeated references to courses).*

- *Since course information is typically stored as distinct data points in an SIS, we should store it that way in Acalog, and provide you with ways to control the way the data points are arranged using a template for precisely consistent display of course details.*

- *Course information is repeated frequently across a large number of majors, programs, and degree plans. By using a database, we can free you from having to repeat course information over and over again as is required in "page"-based content management systems. You should never have to edit a program to simply modify a course; it should happen automatically when you modify the course itself.*

- *While majors, programs, and degree plans are all unique, they contain concentrations that are lists of courses. And in some cases, those lists of courses, such as a general education requirement, may be identical across a large set of programs. Just like courses, you should be able to reference the shared content, update it in one place, and have it automatically updated everywhere, correctly and instantly.*

Understanding this helped us realize that the tremendous power of a relational database could be used to help catalog managers eliminate weeks of tedious work chasing edits around a catalog. Why should you have to edit 30 programs to change a single course description? You shouldn't. And with Acalog you don't.

In Acalog, a course exists in the database only once, but may be displayed in many different areas of the catalog. This allows courses to be edited and modified in a single location, automatically updating all the programs, majors or other areas where the course is referenced in the catalog. If a typographical error is found in a

published catalog, the correction may be made in real-time, and the error is automatically updated everywhere the course is referenced.

For illustrative purposes, consider as an example the need to modify a course description. A course may be referenced in any number of places in the catalog content. In Acalog, the course information is truly referenced, never duplicated. In this case, we'll assume the course is referenced in 60 different degree programs, and listed on a departmental Web page via the API. To make the change, an editor (or manager) would choose to work in the particular catalog in the *Publisher*, navigate to the Courses module, run a search or filter to locate the course, open the course for editing, make the change, and then save the edit. Once approved for publishing, the course change would instantly show as updated in all 60 programs, and on the departmental Web page listing, with no need to make the edit in 60 locations. An export to Microsoft® Word at that point would also reflect the change for every reference.

After implementation, our customer care team takes over and provides a level of quality support unmatched in our industry – becoming a true partner with the catalog managers. The team is also responsible for new feature announcements, moderating and participating in customer forum discussions, arranging ongoing or supplemental consulting and training, periodic reviews of client gateways, and maintaining our online educational site, Acalog University. These are just a few of the ways in which customer care ensures our clients leverage Acalog to its fullest potential.

Digital Architecture provides support and hosting for all Acalog clients. An annual contract for provision outsources hardware and network services, support, and automatic upgrades to the core product.

How Acalog Works

Acalog is a hosted solution that consists of two Websites. We call the administrative interface the Publisher. It is linked in real-time to an e-catalog portal, the Gateway, which is an automatically generated and dynamic (HTML-based) version of the catalog with no need for additional formatting. The resulting e-catalog(s) made available via the Gateway can be seamlessly integrated with your institutional Website, and present e-catalog end users with an intuitive, consistent, and user-friendly navigation.

Acalog presents all catalog content in an entirely web-based format, allowing different platforms such as PC, MAC and Linux to access the content via a current browser. Acalog supports all common browsers, with specific testing done on Internet Explorer 6+, Firefox 2+, and Safari 4+.

The *Publisher* provides a single, electronic platform to create, organize, edit, archive, and print academic catalogs and related campus publications. It includes a robust collaborative edit-approval workflow system (the *Version Auditing* module). Every edit in any catalog can be tracked using system- and user-generated "snapshots," which include timestamps, user IDs, comments, approval records, or even administrative documents (such as syllabi or accreditation checklists). The audit trail is maintained for the life of the catalog, and can be referenced at any future date, if necessary.

Key features of the Acalog *Publisher* include the ability to:

- Empower departmental editors to make changes in the system, while keeping a comprehensive audit trail of every edit.
- Support any number of editors working on their own schedule or concurrently.
- Use the built-in tracking-and-approval workflow to end the paper chase associated with your current curriculum change-approval process.
- Attach critical curriculum documents administratively to courses and programs.
- Dynamically integrate course information with your e-catalog and online schedule, or course equivalency system.

- Publish your new e-catalog with the push of a button, and make critical corrections in real-time.
- Export directly to Microsoft® Word.
- Deliver the updated e-catalog to students months ahead of printed documents.

Acalog provides a robust print export module permitting the catalog, or portions of the catalog, *to be exported to a Microsoft®* Word document (or documents, if selected). The semantic aspect of the Acalog export to Word is critical to supporting an efficient pagination process. Layout personnel can be assured that every possible style in the entire document is defined and consistent throughout, making it very easy to make style changes to the entire document, or to flow the document into pagination software such as QuarkXPress or InDesign for the creation of table of contents, index and other elements.

Institutions may create "export maps" for selected content, and "export print style sheets" including custom font choices that may be saved and used, as needed, ensuring consistency across sections or even publications.

These maps allow catalog content to be reorganized, and/or selectively set to be excluded from the export. This means you may format and prepare content for display online and yet present the information via the export in a manner more consistent with printed publications. Exports may be used for print catalogs, converted to PDF, or used to share data with other administrative units on campus. We have many customers who create export maps to export abbreviated catalogs for specific schools or departments.

Acalog includes a collaborative edit-approval system called Version Auditing which enhances traditional academic curriculum change processes through workflow supporting one-click distribution of edits for review and approval to individuals or groups as well as routing of items during stages which may not require an approval or rejection. Users and groups involved, as well as the process followed, can be customized to your institution's needs. Acalog does not force institutions to conform to a generic or pre-established workflow.

Every edit in any catalog can be tracked using system- and user-generated "snapshots," which include timestamps, user IDs, comments, approval records, or even administrative documents (such as syllabi or accreditation checklists). The audit trail is maintained for the life of the catalog, and can be referenced at any

future date, if necessary.

These snapshots can be compared using redlining tools similar to that found in Microsoft® Word. Changes made can be seen either side-by-side or merged to show changes using redlining tools. This occurs within a single interface. Users can select any snapshot from a drop down menu to compare to any other snapshot.

Users may also access a list of all audit or route events awaiting their review. Catalog managers may access a list of all events and changes made to catalog by all users. This list can be filtered by date to report on new, changed, working, approved or final.

When using Version Auditing, editors can be associated with others in the approval chain. These "event auditors" will be automatically brought into the process. Editors also have the option to select specific individuals or groups to be included. Notifications will be automatically sent to users in the approval chain via system-messaging and/or email and will appear in an Alerts menu when the user logs into the administrative interface. This means that the system does not require those individuals managing the process to take extra time to notify faculty and staff to make additional changes or review and approve items.

Distribution of items for informational purposes is supported as well. Acalog includes functionality that allows editors to "route" an item to pre-established groups. As a practical example, let's say a department editor makes a change that is then approved by the department chair but institutional processes require that the faculty senate be notified of the approval. The department chair can simply route the item to the faculty senate group and all members of the senate will receive notification and any comments the chair elects to include.

Also, through effective use of granular permissions, departments and colleges (in addition to administrative staff) may establish schedules while avoiding being forced into a generic process. Additionally, reminding reviewers who may be holding up the process via email can be accomplished with the click of a button.

Version Auditing does not require the intervention of IT staff or a webmaster in either the use, implementation or management of the feature.

A Configuration & Tools component is included with the Version Auditing module that permits catalog managers to fine tune the workflow in support of campus

policies and objectives.

The Acalog e-catalog *Gateway* is far more than a mere repository for catalog content. Studies show that of the 16 items of information described as very important to students visiting a college or university Website, half typically are found in the academic catalog, and at the very top of the list are majors and programs[1]. In partnership with our customers, we've designed the e-catalog *Gateway* as a powerful tool with unique features that reinforce a school's brand, build relationships with prospective students, and help direct them to admissions.

Key components of the Acalog Gateway include:

- *Seamless Website Integration*. The Acalog e-catalog Gateway uses configurable cascading style sheet technology to match the look and feel of your institutional Website. E-catalogs can be published and archived with zero impact on campus IT staff, or exported to Microsoft® Word.

- *Powerful Catalog-Specific Search*. Power users quickly find programs and majors, courses, or administrative content in current or archived catalogs, exclusive of general website content. It is also possible to link directly to any element of content in the e-catalog from other areas of the institutional Website and even to integrate certain catalog content, such as courses, or course lists, dynamically into institutional Web pages, such as departmental pages, via a Web-services API (application programming interface).

- *Social Network Integration*. Facebook and Twitter links for any catalog item encourage students to keep friends and family informed during their college search, while also generating links back to your Website for their friends who are likely prospective students themselves.

- *Mobile Device Support*. We've used Acalog's powerful API to build a smart phone specific version of the e-catalog portal Gateway. We know that today's students not only rely extensively on the Internet for their information needs, but also increasingly expect to be able to access *information dire*ctly from their phones or other mobile computing devices, presented in a visual format specific to the small screen interface. Mobile device support is just one more example of how Acalog's unique focus on academic catalog information

[1] Noel-Levitz, James Tower, NRCUA. "Circling Over Enrollment: The E-Expectations of the Parents of College-Bound Students", 2008.

allows us to quickly respond to the needs and expectations of our customers. This capability is pre-built, and requires no work on the part of a school's IT staff.

- *Personalization and a Path to Admissions.* The Acalog e-catalog *Gateway* provides a personal portfolio for users to create their own personal e-catalog. And if they're ready, to share the contents of the portfolio with school admissions counselors.

- *Rich Media FlashPoint™ Links. Include student testimonials or other* rich media alongside *academic* content to help distinguish your programs from those at competing institutions.

curriculog™
Curriculum Management

Curriculum. **Managed.**

Curriculog is the culmination of years of research with input directly from our customers on what they need in a curriculum management solution. It integrates with student information and degree audit systems, streamlines curriculum approval processes, and makes approved courses and programs available for catalog publishing.

Comprehensive. The workflow component supports an unlimited number of customizable forms and rule-based routing processes, including exception handling, committee meeting agendas, impact and bottleneck reports, and even program and course assessment mapping.

Automated. Role-based management allows approval processes to be created that are automatically populated with participants the moment a proposal is identified with a department or institutional unit. Proposal originators can run a workflow simulation prior to launch showing every participant associated with each approval step, and Curriculog will highlight any gaps that could lead to bottlenecks or stuck processes.

Configurable. The comprehensive user dashboard allows participants to view all active proposals, and to easily keep track of their own, those they are watching, and proposals for which they have active tasks. Configurable fields enable institutional terminology and designations to be used for ease of training and user acceptance.

Smart. Exception handling allows proposals to be held, cancelled, or custom routed on the fly to accommodate special circumstances, or to address the ad-hoc need to include a particular role or individual in an approval process. Committee steps allow custom agendas to be created for any number of proposals, with the ability to create printable versions, and assign group approval privileges for individual participants.

We've spent a decade working with hundreds of colleges and universities that rely on our proven e-catalog publishing solution, Acalog. We're known for our world-class product support and training programs. We're respected for our focus on constant innovation and enabling technology solutions. We know the process of creating, assessing, and developing courses and programs can be cumbersome, complex, and time consuming. And, we're ready to help.

For more information, please contact our business development group at learnmore@digarc.com, or give us a call at 866-328-9012 x201.

Key Experience

"We have chosen Curriculog and are 100% confident in our choice. It not only meets, but far exceeds our needs and expectations. Combined with Digital Architecture's best-in-class customer service and eagerness to work with us directly to make our processes better, Eastern Michigan University is happy and excited to implement the best available solution for our curriculum management"

Subject: RE: OUC Case Statement

Yes. Close, very close.

For priority #2, I suggest buying seminars and re-ordering statement:
PRIORITY # 2: Extend the program of seminars for entering transfer students, especially juniors.
Put the the part about coordinating " In collaboration with the Office of Undergraduate Retention" in the narrative.

Then - it is possible to "buy" a seminar for 15K plus benefits (current rate), so propose 20K each and make it 100K annually as an expendable fund (need 2 million endowment).

This makes three items, course development funds (which could be for FYS), transfer seminars, and enhancement funds.

It says it to Unit Chairs and Directors, but it's asking them if they are going to supervise an independent study or research course. I could send it to , or I could edit and send directly to all faculty. Which did you want?

Fall 2013 First-Year Admissions

- A record 30,820 students applied for admission—an increase of 5 percent over last year and 43 percent over five years ago. This was the eighth consecutive record for first-year applications.

- The pool was extraordinary. The number of candidates scoring 1500 or higher on the SAT (Critical Reading and Math combined) or 34 or higher on the ACT increased by 25 percent compared to last year. The number of candidates completing five or more college-level courses and earning all or nearly all As increased by 10 percent.

- The projected admission rate for North Carolinians rose to 50.1 percent from 49.8 percent last year. The rate for out-of-state students fell to 14.3 percent from 14.7 percent last year.

- Of the 997 North Carolinians who applied early action and were previously deferred, 210 (or 21 percent) were admitted. Of the 1,166 out-of-state students who were deferred, 25 (or 2 percent) were admitted.

- The 2,873 admitted out-of-state students come from 48 states, the District of Columbia, and 51 countries. Ten percent are children of alumni; 10 percent are first-generation college. Of those reporting race or ethnicity, 49 percent identified themselves as other than white; 22 percent identified themselves as African American, American Indian, or Latino/Latina. The number of global students rose by 7 percent to 355.

- Seventy-eight percent of the admitted out-of-state students scored 1400 or higher on the SAT or 32 or higher on the ACT, compared to 64 percent last year. The average SAT score for admitted out-of-state students increased by 15 points to 1447.

- The 4,894 admitted North Carolinians come from 97 counties. Eighteen percent are the children of alumni; 18 percent are first-generation college. Of those reporting race or ethnicity, 30 percent identified themselves as other than white; 16 percent identified themselves as African American, American Indian, or Latino/Latina. Forty-two percent were born outside North Carolina.

- Thirty-one percent of the admitted North Carolinians scored 1400 or higher on the SAT or 32 or higher on the ACT, compared to 26 percent last year. The average SAT score for admitted North Carolinians increased by one point to 1319.

- Among admitted North Carolinians, 60 percent completed five or more college-level courses and earned all or nearly all As, compared to 56 percent last year. Of those whose schools provided official ranks in class, 44 percent ranked in the top 3 percent and 59 percent in the top 5 percent.

- Places on the waiting list were offered to 969 North Carolinians and 1,412 out-of-state students. Twenty percent of the waiting-listed out-of-state students scored 1500 or higher on the SAT or 34 or higher on the ACT; 66 percent completed five or more college-level courses and earned all or nearly all As.

Subject: FW: Question on Certificate proposal
Attach: Certificate Journalism & Media Proposal.doc

Karen, Jonathan, and Terry -

I write to alert you to this proposal. The College has been clear that it will not allow certificates for undergraduate students, a long-standing decision that is well documented. The last certificate offered was in Women's Studies, discontinued when the degree program was approved and the department established (initially as a curriculum). That is about the same time minors were implemented. Certs are generally 3-4 courses and minors 4-5. This is 4 courses, mostly from the College.

JOMC and Business both offer certs to undergrads which have not been open to College students. This proposal would change that - any student who minors in JOMC would he eligible. In addition, course availahility in SPAN and HIST and ECL is always difficult and the faculty busy and yet, courses are being made available and the co-director is from ROML.

I can ask the question about whether a minor is possible instead of a cert but thought you should be aware. Also, know that JOMC has been advertising this cert without getting it approved (including using College courses) so this is a bit of a back-track.

I am away at the beginning of the week but can bring this to SADS on Thursday next. The graduate school serves as home for all cert programs even if for undergrads - which has worked well to date.

Bobbi

Subject: FW: Question on Certificate proposal

Bobbi, Erika - I now have a pretty good proposal for the Certificate Program in Latino Media Studies.

Is this proposal one that would be required to go to your Board for feedback and approval before I can bring it to our Board? It is for undergraduate students -- JOMC majors (like their others) but involving College departments.

Thanks -
Stephanie

Hello, Stephanie,

Thanks you very much for reviewing the proposal. I haven"t been working with anyone at the College of A&S. I will really appreciate your help on this.

I'm hoping that you will call a special meeting before the fall semester, but I understand that this may not be possible. We have a senior who is currently enrolled in the Certificate Program and eager to have it in his transcript. He is graduating in the summer.

Thanks,

Lucila

To: Microsoft Office User <lcvargas@email.unc.edu<mailto:lcvargas@email.unc.edu>>
Subject: RE: Question on Certificate proposal

Dear Lucila - thanks for sending the draft over. I think it looks quite good. Do you know if the College of Arts and Sciences will need to hear this proposal or not? They would typical hear them first and then our Board would hear them. I can ask them if you haven't been working with anyone yet. Our last Board meeting was actually last week, but there is a possibility that we will call a special one to hear a follow-up and I might be able to include this one. Otherwise, we would hear this proposal in our first fall semester meeting. So waiting for the final letter would be fine depending on the timing.

Best -
Stephanie

Subject: Question on Certificate proposal

Dear Associate Dean Schmitt,

I have been waiting for about ten days for one of the letters of support for the Certificate in Latino Media and Journalism and it seems that this process is going to take a few more days. It has been complicated because a history class that we would like to include used to be offered by the Dept. of History, but it's now offered by the Institute for the Study of the Americas and the director is on leave.

I'm anxious to submit the proposal. I was wondering if you will be willing to accept it, on a preliminary basis, without this letter.

It's attached, in case you would like to take a look at it. The folder contains the proposal, the letter from the Journalism School, and support letters from Romance Languages, Geography, English, and Music.

Thanks,

Lucila Vargas

University of North Carolina at Chapel Hill
Certificate Program Application Form

Please use this application form as a guide for your Certificate Program proposal.

Name of Proposed Certificate Program: Certificate in Media and Journalism Studies

Sponsoring Academic Unit: School of Journalism & Mass Communication

Administering Unit, if different:

Primary Contact Name: Dr. Lucila Vargas

Address and CB #: 3365

Phone Number: 919-942-4526 **Email:** lcvargas@email.unc.edu

First Term the Certificate Would be Offered: Fall 2013

---

1. Describe the Certificate Program and provide a statement of educational objectives.

The proposed Certificate Program will consist of the four requirements listed below (9-12 credit hours). It will be offered to degree-seeking, residential undergraduate students majoring or minoring in Journalism and Mass Communication. It will be an interdisciplinary Program in collaboration with the Department of English and Comparative Literature (through its Latino Studies Minor and Program), the Department of Geography, the Department of History, the Department of Music, and with the Department of Romance Languages and Literatures.

Certificate students will acquire a knowledge base about U.S. Latinos and the media catering to them. Students will also develop Spanish-language composition and Spanish-English translation skills. Thus, students will improve their proficiency in Spanish language as well as their effectiveness to communicate with, and about, Latinos.

The Certificate will be a cultural competence development program. Developing cultural competence requires the kind of intensive learning that only takes place in courses devoted to diversity. Nonetheless, even in these courses students seldom achieve beyond the first two dimensions of cultural competence, which are *cultural awareness* and *cultural knowledge*. An advanced level of cultural competence calls for an emphasis on *cultural skills* and *cultural practice*. According to Suárez-Balcazar and her colleagues (2011), this level entails "developing professional practices and behaviors designed to improve service delivery to diverse populations" as well as "experiencing other cultures and learning to appreciate diversity in society" (p. 5).[1] Such an advanced level is better attained through vertical programs.

Include a statement about the need for such a Certificate Program, and specifically why there is a need to offer this Certificate at UNC-Chapel Hill. Is the Certificate offered at other universities or community colleges?

At present, the School of Journalism & Mass Communication has two undergraduate Certificate Programs, one in Sports Journalism and a second one in Business Journalism. Both Programs have been offered for eight years and both have been very successful. At the School, we have found that students who specialize in the above areas gain an edge in the job market.

A Certificate in Latino Media and Journalism will give students a similar edge because media and communication firms have an urgency to recruit employees who understand the Latino consumer. Latinos, with now 52 million, now constitute over 17% of the total U.S. population, up from 13% in the year 2000.[2] Such population growth is due to nativity and it will continue, regardless of immigration levels, because Latinos are the nation's youngest ethnic/racial group. Their buying power has also been increasing at a fast rate. In 2010, the Hispanic market was estimated at $1 trillion; the projection for 2015 is 50% more: 1.5 trillion.[3]

Although 64% of Latinos were born in the U.S., they have a deep attachment to their cultural roots and prefer media that speak to their cultural uniqueness, whether in Spanish or in English. Historically, Latinos have been served by Spanish-language media, which is an economic sector seeing steady job growth, new business creation and overall expansion. For example, the top Spanish-language television network Univision is now a serious competitor to CBS, ABC, NBC, and Fox. But as more Latinos speak English, bilingual and English-language media catering to Latino audiences have appeared; even media giants News Corporation (Fox) and Disney's ABC have entered the Latino media market.

Another important reason for creating the Certificate is that, among practitioners and scholars in related fields, it is well known that there is a dire need of Latino journalists and strategic communication professionals. Up until now, UNC-CH in general, and the JOMC School in particular, have not attracted sizable numbers of Latino students, but this is changing. In the spring of 2013, 1,484 undergraduates enrolled at UNC-CH identified as Latino; this is 8.36% of the total undergraduate student population. At the JOMC School, there are 102 (8.27%) Latino majors plus 7 minors.[4] Moreover, current demographic trends indicate that North Carolina's Latino college student population will grow in the next few years. It is projected that in 2017, about 23% of all high school graduates will be Latinos. The Certificate will be an attractive incentive for prospective Latino students to major in journalism and mass communication. It will have symbolic value as well, signaling that the university welcomes Latinos and their culture.

Thus, the Certificate will further the goals of diversity plans of both UNC and the JOMC School. It will also advance the university's internationalization strategic objective of preparing students to live in a global and multiethnic society, especially its specific goal of "expand(ing) courses and programs that enhance students' knowledge of the world, including foreign language instruction."[5]

The Certificate will be a curriculum innovation that responds to the nation's current demographic shift. At present, the only Certificate Programs in Latino media and journalism are offered by The University of North Texas and by the University of Texas at Austin. The proposed Certificate will be the third of its kind in the nation and the first in South East.

2. Describe the demographics of the target student population for the Certificate Program. Double click each box that applies and describe the intended audience.

{ FORMCHECKBOX } Undergraduate Students
{ FORMCHECKBOX } Graduate Students
{ FORMCHECKBOX } Professional Students:
{ FORMCHECKBOX } Degree-seeking, Matriculated Students
{ FORMCHECKBOX } Non-Degree-Seeking Students

3. **Why is the Certificate Program necessary beyond offering the program as a minor, supporting area, or specialization/concentration/track?**

The proposed Certificate seeks to offer students a specialized credential that will add value to their degree. It will be noted in the student's transcript. Official recognition of having attained the Certificate will improve future graduates' prospects when either looking for a job or applying to graduate programs.

4. **Provide specific courses and other requirements for the Certificate Program. Separate listings of courses may be included with the proposal.**

Students must complete 12 credit hours to receive the Certificate. Prospective students must demonstrate Spanish-language proficiency at the fifth-semester level before being accepted in the Program. This requirement may be satisfied by either completion of a fifth-semester Spanish-language course or by a language examination. The curriculum will include the following four requirements:

1. Advanced Spanish proficiency. This requirement may be satisfied by successfully completing one of the following: (a) Proficiency examination, (b) SPAN 300 Spanish Composition and Grammar Review (c) SPAN 326 Spanish Grammar and Composition for Heritage Learners, (d) SPAN 335 United States Hispanic Community or (d) SPAN 375 The Spanish of the US.
2. SPAN 369, Introduction to Translation.
3. Introductory course to the study of Latina/os, which may be fulfilled by MUSI 147 Introduction to Latina/o American Music, LTAM 291 History of Latina/os in the United States, ENG 364 Introduction to Latina/o Studies, GEO 430 Social Geography: Global Migrations Local Impacts, or GEO 452 Mobile Geographies: Migration.
4. JOMC 443 Latina/o Media Studies.

Pease see attached description of courses.

5. **Provide a statement on the relationship of the Certificate Program to degree programs within the unit(s). To what extent will requirements for the Certificate overlap with requirements for bachelor's, master's or doctoral degrees? Confirm how course credit transfer policies will be applied to students.**

Up to one (3 credit hours) course counting towards either a major or minor in Journalism and Mass Communication, a (double) major in Spanish, a minor in Spanish, or a minor in Latino Studies may count towards the Certificate. Students may pursue the Certificate concurrently with the above programs. Course credit transferred from other colleges or universities will not count toward the Certificate.

6. **Will the Certificate Program be offered jointly with another university? If yes, describe the relationship with the joint unit.**

No

7. **Will the Certificate Program be offered on campus, as a distance education program, or a combination? Describe any distance education components in detail.**

It will be offered on campus.

8. **Describe the admissions criteria and process in detail. Differentiate between processes for degree-seeking students and non-degree-seeking students, where applicable. Include information about residency for tuition purposes as needed.**

Only students with a declared major or minor in JOMC will be eligible to apply to the Certificate. To be in good standing, students must maintain a GPA of 3.0 in all Certificate courses. Deadlines for applying will be February 2 and October 2 of each year. To apply, students will need to submit a resume and a signed letter stating the following:

1. UNC identification number
2. Email address
3. Major(s) and minor(s)
    a. If JOMC major: Sequence (e.g., PR, Visual Communication)
4. Year in school
5. GPA
6. Expected graduation date
7. Certificate courses already taken
8. Certificate courses currently taking
9. Relevant cultural experience (volunteer work, study abroad, etc.)

9. **Provide a three-year, semester-by-semester projection of enrollments and course offerings.**

Projection of course offerings

Projection of enrollments

Fall 2013	*Spring 2014*	*Fall 2014*	*Spring 2015*	*Fall 2015*	*Spring 2016*
4	3	7	5	10	7

10. Provide a three-year projection of the Certificate Program's financial plan. Include the impact on campus resources, such as classrooms and instructional faculty/personnel. Also include plans for tuition and billing, if separate from standard rates across schools.

The Program will build on efforts that have been developed independently by several academic units on campus. Given that all the required courses to complete the Certificate's curriculum are currently offered, there will be no need to create new courses. The impact on campus resources will be minimal in the first three years because enrollments are expected to be in the single digits.

The Program's major costs will come from publicity to promote enrollment growth and from administrative support. The Certificate will be a part of the JOMC School's Latino Journalism and Media (Latijam) initiative, which has an annual budget coming from the School. Latijam Director, Dr. Lucila Vargas, has agreed to add the administrative duties of the Certificate Program to her workload. Dr. Julia Cardona Mack, Certificate Program Associate Director, has agreed to provide administrative support as well. The budget for the first three academic years is as follows:

Budget 2013-2016

2013-2014	$1,000 (Latijam budget)
2014-2015	$1,000 (Latijam budget)
2015-2016	$1,000 (Latijam budget)

11. List all faculty members who will be responsible for planning and participating in the Certificate Program. Programs are encouraged to provide advising for students through the identification of one faculty member as the director of the Certificate.

JOMC School's Dr. Lucila Vargas will direct the Certificate Program and Dr. Julia Cardona Mack (Department f Romance Languages and Literatures) will be the Associate Director. Both have agreed to provide advising to Certificate students. Other faculty who teach courses that will be accepted for the Certificate are the following: Dr. Ruy Burgos (Department of Romance Languages and Literatures), Dr. Altha Cravey and Dr. Nina Martin (Department of Geography), Dr. David García (Department of Music), Dr. María DeGuzmán and Dr. Laura Halperín (Department of English and Comparative Literatures), and Dr. Zaragoza Vargas (Department of History/Latin American Studies). All have agreed to participate in the Certificate Program and to assist the Program Director and Associate Director in planning, implementation, and evaluation of the Certificate.

12. Describe the evaluation plans for the Certificate Program.

Beginning in May 2014, the Program Director and Associate Director will conduct a yearly formative evaluation aimed at determining the challenges faced by Certificate students as well as possible areas of opportunity. The data for this evaluation will come from applications, notes on advising sessions, miscellaneous communications with students, graduation and drop out

records, a Certificate student survey, and qualitative exit interviews with the Program's graduating seniors and, when possible, with students who may opt to drop out of the Program.

Beginning in May 2015, an online survey will be sent to Certificate graduates every year. The survey's purpose will be to gather information about their employment and their opinions on the value of the Certificate for career advancement.

13. Appropriate letters of support should be included with the proposal. All units sponsoring and participating in a Certificate Program should approve the proposal and provide support letters, including letters from units supporting the Certificate through resources (e.g., faculty time, course slots). Approval letters from the home school should accompany the proposal submitted to the Graduate School for final approval.

Subject: Re: Faculty Executive Committee records request

Thanks Anne,

I saw that you had taken the minutes for this meeting. Can you tell me if you recollect a discussion about this change between the draft version of the report and the final version released by the FEC?

Draft (page 6): "Although we may never know for certain, the involvement of Debbie Crowder seems to have been that of an athletics supporter who managed to use the system to 'help' players; she was extremely close to personnel in athletics."

Final (page 6): "Although we may never know for certain, it was our impression from multiple interviews that a department staff member managed to use the system to help players by directing them to enroll in courses in the African and Afro-American Studies Department that turned out to be aberrant or irregularly taught."

I do not see anything in the minutes that reflect a discussion for or against this change, and I'm told by one of the report's three authors that they do not have any recollection of discussing that change.

Also was this meeting tape recorded?

Thanks again,

Dan Kane

Dear Dan,

My apologies for the delay. I sent the minutes to the records officer in University Counsel's office last week and thought that she was taking care of getting them to you along with anything else that could be located in terms of intermediate drafts. But perhaps there was a mis-communication somewhere along the line.

In any case, here are the minutes.

Best regards,
Anne

Anne,

It's been a week since this request. If this was an open meeting, which I have no reason to doubt otherwise, the entire minutes are public record. They are the most basic of public records and by law should be produced immediately upon request.

As for the word documents, I do not think we are talking about an extensive amount of records here. Just those that reflect the changes between the draft and final versions.

I am cc'ing Peter Hans, chairman of the UNC Board of Governors, and Wade Hargrove, chairman of the UNC Board of Trustees, regarding this request.

Thanks,

Dan Kane

Anne,

That's correct. I do not believe either of these documents would pose a public records question, considering that I have the draft and final versions of the report.

Dear Dan,

Just a followup to our phone conversation this morning regarding your request for records related to the development of the final version of the Faculty Executive Committee's special report of July 2012 on the academic fraud issue at UNC-CH.

Before gathering the materials, I want to be sure I understand correctly what you are asking for:

1. Faculty Executive Committee meeting minutes from the summer of 2012 when the FEC subcommittee report draft was being discussed and edited before final release.

2. Draft versions of the FEC subcommittee report that might indicate who edited the document, what edits were made, and when.

As I mentioned in our conversation, we do have meeting minutes, but the second request may be more difficult. I am copying the university records officer, Regina Stabile, on this message so that she is aware of your request and can assist me in compiling relevant materials in a way that does not release legally protected personal information.

Please confirm that I've understood your request correctly, and Regina and I will work to get you what we have.

Kind regards,
Anne Whisnant

- Continued my work on the Summer Bridge database.
- Commenced working on the Online FERPA form.
- Attended the Oasis meeting.
- After the Oasis meeting, I worked with Ying on the Senior Reviews form.
- Upon returning to Steele, I had a meeting with Lara Wind regarding user access to the Senior Reviews form and the new Graduation Database features.
- I ended the day by meeting with Dean Shuster where we discussed user inputs and outputs to the Summer Orientation application.

Thursday

- I had a dental appointment in the morning and got in at 11 am (I have already accounted for this time with Paula).
- Upon arriving, I continued with the Graduation Database updates and worked on my weekly report (for the previous week).
- In the afternoon, I met with Baskin Cooper from Oasis to resolve some connectivity issues with my laptop and my smartphone, i.e., inability to log in to VPN on my laptop and unable to access UNC Email on my smartphone.
- Following that, I continued working on the FERPA form including setting up Onyen authentication and doing some testing.

Friday

- Holiday

Sincerely,

Geeta

Among the topics discussed were website integration with the Dean's Office, appointment sign-in integrations, incorporating sign-ins with the Advising Walk-in System and the Summer Orientation Application. The committee was asked to look into Google Drive and Evernote technology.
> - Following the Tech Committee meeting, I had a meeting with Dean Shuster concerning the Summer Orientation Application. We discussed the system inputs, input file layouts and where and how to obtain them.
> - After the meeting, I worked on fixes to the website including some fixes to the Worksheets Section, the carousel and Google Analytics.
> - I spent a portion of the afternoon working on the FERPA and an updated version ofthe Credit Overloads forms.
> - I had a short meeting with Dean May and another meeting with Dean Shuster where we had more discussions on the input data.

- Towards the end of the day, I continued my work with the Summer Orientation project and also made a fix to the Change of Major form

Tuesday

- On Tuesday morning, I got in a bit late due to car trouble. After arriving, I worked on the FERPA Form.
- I continued my work on the Summer Orientation Application, i.e., sourcing the necessary input files from the various departments.
- In the afternoon, I worked on the Graduation Database and did more work on the Summer Orientation data.

Wednesday

- In the morning, I met again with Dean Shuster to work on the design of the Summer Orientation Application.
- I spent the rest of the morning working on the Summer Bridge Application
- The first part of the afternoon was spent working on the Senior Reviews form with Tae in Howell.
- I finished off the day doing some research and testing of the MS-Access reporting feature.

Thursday

- I started the day with some email communications mostly relating to the Summer Orientation Application input data.
- I continued working on the data aspect of the Summer Orientation Application.
- I had another meeting with Dean Shuster on the Summer Orientation application where we discussed the design and layout of the input files and the user interface and reports.
- Following that meeting, I had a meeting with Dean Wyrick about the new Credit Overloads form and spent the rest of the afternoon working on the form and issues relating to it.

Friday

- In the morning I worked on the Summer Bridge database and formatted the data from the Online Summer Bridge Employment Application before importing it into the database.
- Following that, I continued my work with the Credit Overloads form, made some website updates and launched the form.
- In the afternoon I focused on making some fixes to the Change of Major form.
- I rounded off the day working some more on the Summer Bridge database

Sincerely,

Geeta

Subject: Eligibility Meetings

Hi Bobbi,
I am circling back to you about the eligibility meetings. Our next one on the calendar is tomorrow at 3 and as you know you and I will be at the admissions advisory board at 3:30. I do not see any more on the calendar going forward. What would you like to do? Come by the 3pm meeting in South Building to "bring some closure"? Schedule another meeting for that? Some other suggestion?
I am interested in reaching out to Gary Lloyd witb some message about tomorrow (not sure if there is any pressing business) and also tbink about delivering the message you and I had discussed to the whole group.
Thoughts?
Lee

I was responding to your statement: "Some think that final exams only need to be kept for two years." which is good practice. There is a policy that states that if a faculty member leaves the University they are supposed to provide two years worth of course materials to the chair. This actually conflicts the one that says final exams have to be kept for one year!

Two years is safe! Syllabus must be kept for 4 years (the life cycle of a student).

Bobbi,

You specifically state that the syllabus must be kept for four years. For how long must the other course records be kept?

Thanks,

Terri Gault

Subject: Re: FW: FROM THE DEAN'S OFFICE AND REGISTRAR: Electronic Grade Change Process

Course records are student's final exams (which are not the property of the student), the spread sheet recording attendance, any other materials collected by the prof and not returned to the students, course materials like the prof's copy of midterms, and the professor's copy of the grade roster (in prior years). The syllabus is required for 4 years.

That will be necessary, and likely the chair will act in the place of a faculty member. We'll all need to be careful about keeping course records for faculty members who leave the University for that same period of four years that we now retain all other records.

Paper forms will also be used for any changes prior to fall 2011 which should occur only rarely.

We are working on a set of guidelines to distribute later this semester.

Dear Ms. Konczal and Dean Owen,

Thank you for the attachments provided in your email. We absolutely agree that the certification of plan requirement completions is done in the Dean's offices of both institutions. We do have in our files examples of past years when the notifications to us came from the Robertson Scholars office. We understand, however, that these would not have been sent without prior approval from the Dean's offices. We are updating our procedure documentation to indicate that all certification of plan requirements at the sister institution will come directly from the Dean's offices of the respective school rather than through the Robertson office .

In regards to the majors/minors/certificates listing and specifically, the minor in Education requested for 3 UNC students, UNC CH does now offer a minor in Education. This plan was approved to begin Summer I term in 2012. Should the Duke minor be approved for the UNC students since the approval of the minor at UNC did not occur until these students' junior year? That is the area in which we need the guidance of the Dean's offices. That guidance in the past has been provided in the form of the list referenced here. Is it possible to update that list to incorporate curriculum changes at both institutions or should approval from both dean's offices be the final word on any request?

Danny and I appreciate your guidance and will update our procedure documentation to be in alignment with the direction provided.

Thank you,

Roberta

Subject: RE: Robertson Scholars from UNC earning certificates at Duke
Importance: High

Danny,

This is a change in procedure. The Robertson Program cannot certify completion of plan requirements. They are a third party to the process. The information exchange regarding Robertson Scholars must take place between the two Dean's Offices, which subsequently convey decisions to the respective Registrar's Offices. On our side, we **do not** give permission to the Robertson Program to authorize the Duke Registrar's Office to post plans to the Duke transcript. Only the Trinity Dean's Office can do so after receiving certification from Dean Owen or her proxy. I have attached copies of emails that provide examples from last year of the process that is in place.

Also, is a minor in Education available at UNC? If not, the Scholars are eligible to earn the certification. A list of majors, minors, and certificates that

did not overlap at the two schools was created in 2008. However, that list was not intended to be definitive. Many curriculum changes have occurred at the schools since that time. The policy states, "Robertson Scholars may, if they wish and are able, complete a second major, minor, or a certificate at the sister institution. The credential can be earned only if the program is not offered at the home institution." The policy, itself, does not specify particular plans.

Please advise,

valerie

Elaine,

If remarks are to be added to the student's UNC-CH records indicated below, you can submit those to us through signed certificate and minor requests on Robertson letterhead. (However, it should be noted that a minor in education at Duke is not an approved minor that can be added as a transcript remark at UNC-CH.)

Valerie, if remarks are to be made on any further UNC-CH student's transcripts, you can submit those requests to the Robertson program, who can in turn submit the appropriate paperwork to our office for processing.

Thank you,

Daniel Collins

May 24, 2013

To: The Administrative Boards of the College of Arts and Sciences and the General College

The faculty advisory committees for the Curriculum in Contemporary European Studies, the Transatlantic Masters Program, and the Center for European Studies requests approval to create a dual BA-MA program that enables students to complete an undergraduate degree in Contemporary European Studies (EURO) and the research-focused track of the TransAtlantic Masters (TAM 2) within five years.

The proposed EURO-TAM accelerated BA-MA degree program stands out for its unique international component. Students in the program would complete four years of coursework at UNC-Chapel Hill, followed by one year of graduate study and research at one of three renowned European universities. Based on career placement data on TAM alumni from the past fifteen years, we expect that EURO-TAM graduates will be well-prepared for successful international careers.

Feedback from current EURO majors suggests that many students will embrace the challenge of completing a demanding and competitive program that increases the affordability of graduate school. Given the uniqueness of the program, we anticipate that the dual EURO-TAM degree will attract outstanding students to UNC from across North Carolina and the United States.

I have attached a copy of our proposal for your review. Please note that we have submitted a separate request to revise the current requirements for the EURO major. The EURO-TAM proposal is based on these projected changes but will be amended to reflect the Board's final decision regarding the curriculum.

Please let me know if you need any additional information.

Sincerely,

John D. Stephens
Director, Center for European Studies

The EURO-TAM Dual BA-MA

The EURO-TAM degree program enables students to complete a BA in Contemporary European Studies and the research-focused track of the TransAtlantic Masters within five years. A unique intensive program comprised of four years of coursework at UNC-Chapel Hill and one year of graduate study at one of three renowned European universities, the EURO-TAM degree prepares students for international careers in a variety of fields, including administration, diplomacy, business, policy-making, public service, marketing consulting, teaching, and research. We expect the program to attract outstanding students to UNC-CH from across North Carolina and the U.S.

The BA in Contemporary European Studies (EURO)

The Curriculum in Contemporary European Studies provides students with 1) a broad cross-disciplinary understanding of modern Europe and the European Union; 2) a focused understanding of contemporary Europe from the perspective of a selected social science discipline; and 3) advanced proficiency in a modern European language. Students are especially encouraged to combine the major with a second major in a non-interdisciplinary field such as political science, economics, or history. Through its unique combination of advanced coursework, quantitative analysis, and language training, the EURO curriculum provides the intellectual building blocks to study contemporary Europe through a sophisticated framework. Students completing the major will be well-prepared for further graduate or professional study of contemporary Europe and for a wide range of international careers.

Core Requirements

• EURO/HIST 159: *20th Century Europe*

• EURO/POLI 239: *Introduction to European Government*

Theme of Concentration

• Four courses must be taken from one of the two themes listed below (asterisked courses require approval, based on the appropriate course topic).

• One course must be taken from the theme outside the student's concentration.

• One additional course must be taken from Theme 1, Theme 2, or the list of approved elective courses on contemporary Europe.

• Of the total 8 courses required for the major in Contemporary European Studies, three must be numbered 400 or above.

Theme I. Contemporary Europe: Integration and Enlargement: ECON 461, 560; ECON/EURO/PWAD 460; EURO/POLI 442; FREN 378; GEOG 464; POLI 195*, 232, 236, 430, 433, 438, 495*; POLI/PWAD/RUES 469; POLI/PWAD/SOCI 260; POLI/SOCI 439

Theme II. Contemporary Europe: Histories and Cultures: ANTH 377; ASIA 452, 490*; EURO/SPAN 362; FREN 331, 377, 504; GERM 349; GERM/HIST/POLI/SOCI 257; GERM 270/JWST 239/RELI 239; HIST 260, 292H*, 391*, 458, 463, 469, 475, 481, 490*; HIST/JWST/PWAD 262; HIST/WMST 259; ITAL 343; LING/SLAV 306; PWAD/SLAV 467; SLAV 196; SPAN 340

Elective Courses on Contemporary Europe: ANTH 449; ART 283; CMPL 385, 466, 468; CMPL/EURO/FREN 332H; CMPL 374/WMST 373; COMM/GERM 275; DRAM 289; ECON 434; ENGL 278, 378; ENGL/PWAD 659; FREN 372, 373, 398*; GERM 255, 280, 350, 381, 382, 390*, 391*, 655; GERM/SLAV 251; GERM/WMST 250; HIST 466; HUNG 280; ITAL 242, 331, 333, 335, 382, 398*; JWST/PLSH 412; MUSC 253, 284, 285; PHIL 224, 229, 494; POLI 432, 472; SLAV 101, 198; SPAN 635

Additional Requirements

• A modern European foreign language through level 5

Contemporary European studies majors are required to complete a minimum of five semesters of a western European language, or document fifth-semester proficiency through university placement tests. One approved literature course taught in the language may also count as a theme or elective course if included in the course listings above. Majors are strongly encouraged to apply their language proficiency skills in languages across the curriculum (LAC) courses and complete a UNC-approved study abroad program in the target language.

The TransAtlantic Masters, Research Track (TAM 2)

The research-oriented track of the TransAtlantic Masters Program focuses on European governance and social policy, with an emphasis on qualitative and quantitative research methods. Students study for one full academic year at UNC-Chapel Hill (for EURO-TAM students, this year would coincide with the senior year), followed by a year of study and research abroad at one of three institutions: the VU University in Amsterdam, the Universitat Pompeu Fabra in Barcelona, or the University of Bremen in Germany. All classes offered abroad are taught in English.

During the first semester at UNC-CH, students take three required courses and one elective. They also participate in the fall Speakers Series offered by the Center for European Studies. Courses focus on such topics as comparative politics of industrial societies, comparative social policy, democratization, the European Union, and multilevel governance. Over the fall break, students travel to Washington, D.C. for site visits and an annual gathering with TAM alumni. Two required courses and one elective are offered in the spring semester and students may elect to pursue independent study projects with individual professors.

After the first academic year ends in early May, students are encouraged to pursue relevant summer internships in Washington, D.C. or Brussels. The associate director of TAM provides guidance on locating internship opportunities.

During the fall of year two, coursework begins at VU Amsterdam, UPF, or the University of Bremen. All three universities have strong offerings in social policy. In Amsterdam, courses focus on comparative welfare states, international political economy, international security, and global environmental governance. Some research internships may be available to TAM students who study at the VU. At UPF, course titles may include *Statistical Analysis I*, *Electoral Systems*, *Multiculturality and Immigration Policies*, *The Welfare State*, *Globalization and European Integration*, *Democracy and Political Liberalism*, *Social Policy and the Welfare State*, *Electoral Competition and Voting Behaviour*, and *Migration and Society*. In Bremen, research internships are readily available and serve as an integral part of the program. In addition, social policy

coursework focuses on the economy and on health policy. During the second semester overseas, TAM II students focus on their thesis research and preparation.

Student Demand

Interviews conducted with EURO majors indicate a high level of interest in the opportunity to combine the BA and TAM into a five-year dual degree. Given the typical profile of EURO students, we expect that many will embrace the challenge of completing a demanding and competitive program that increases the affordability of graduate school. To date, the rigorous EURO curriculum has tended to attract highly motivated and academically exceptional students. EURO graduates, on average, enter UNC-CH with 19.7 Advanced Placement or by-exam credits. Because the degree requires at least four courses to be taken at the 400-level or above, many of our majors already enroll in upper-level courses alongside TAM students; during their undergraduate career, roughly half of EURO alumni completed coursework that satisfied requirements for the TAM degree (POLI 438, RUES 469, POLI 891 taken as 495). All of our past EURO graduates succeeded in completing double majors and more than ¾ also finished a minor. With the exception of one student, all also participated in study or work abroad during their undergraduate careers. After graduating from UNC-CH, more than 70% went on to pursue graduate or professional degrees—including the TransAtlantic Masters—in a variety of fields such as Economics, German Studies, Information Science, Law, Museum Studies, Political Science, and Public Administration.

Publicity and Student Recruitment

The EURO-TAM Program will be advertised to current and incoming UNC students through the usual channels: the admissions office, student orientation, academic advising, the annual Majors Expo, the CES website and biweekly e-newsletter, and the EURO and TAM webpages. Additionally, the Center for European Studies (CES), as a U.S. Department of Education National Resource Center and network coordinator of the ten European Union Centers of Excellence in the United States, will utilize its resources and outreach activities to market the EURO-TAM Program to high school students, teachers, and advisors within North Carolina and nationwide. Special efforts will be made to reach magnet, charter, and International Baccalaureate schools, schools with strong foreign language programs, and students participating in AP courses, EuroChallenge, Model EU, and Model UN. On-site presentations and classroom visits will be offered to schools in NC, and CES staff will work with the EURO advisor and TAM associate director to identify and recruit promising candidates.

Application and Admission

Undergraduate students who are interested in the EURO-TAM BA-MA program should contact both the EURO advisor and the TAM associate director as soon as possible, in order to strategically plan their program of study. Students should continue to meet with the EURO advisor at least once each semester to track their progress. To be eligible for admission into the EURO-TAM program, candidates should meet the following requirements by the end of their sixth semester of undergraduate study:

- Officially declare EURO as their primary or secondary major;
- Complete six semesters (or the equivalent) of a modern European foreign language;
- Successfully complete both core courses (HIST/EURO 159: *20th Century Europe* and POLI/EURO 239: *Introduction to European Government*);
- Enroll in at least three theme courses;
- Maintain a minimum GPA of 3.2.

Students must apply for admission to the TAM program in January of their sixth semester. The annual deadline will be posted on both the EURO and TAM websites at http://www.unc.edu/euro/ and http://www.unc.edu/depts/tam/. Applicants will be required to submit the following materials to the Graduate School:

1. Graduate School application;
2. Undergraduate transcript(s);
3. TOEFL or IELTS scores (only applies to international students from non-English-speaking countries);
4. Two letters of recommendation from faculty members affiliated with the EURO curriculum;
5. A 500-word statement of purpose;
6. A 10-page excerpt from an academic essay written for an approved EURO course.

The application fee will be waived for all currently-enrolled EURO majors. Although GRE scores will not be required, EURO-TAM applicants will be encouraged to submit them as supporting materials.

In addition to the six items above, the following materials must be submitted to the TAM office:

7. TAM Program application;
8. TAM foreign language evaluation(s);
9. Financial certificate (only applies to non-residents of the U.S.).

Application materials will be reviewed by the Graduate School and the TAM Admissions Committee, which consists of European Studies faculty.

The EURO-TAM program will take ten semesters to complete. Admitted students who have earned 60 baccalaureate credits (2 years or the equivalent) may begin taking courses at the post-baccalaureate level. Up to three graduate-level courses (9 credit hours) taken during the BA phase of the program may subsequently be counted toward the MA, as long as students also take enough courses within eight semesters to meet the 120-credit BA graduation requirement. The 9 transferred credit hours may not count toward the 120-credit hours for the undergraduate degree. Upon completion of all coursework and the thesis, students will earn a UNC-Chapel Hill Bachelor of Arts in Contemporary European Studies and a Master of Arts in Political Science, Concentration on European Governance.

See page 6 for a sample student course plan. As the plan indicates, EURO-TAM students who enter UNC with sufficient AP credit and foreign language proficiency may be able to complete

an undergraduate double major, a language minor, and study abroad for a semester, in addition to earning the TAM degree.

Outlook for Graduates

Over 200 TAM degrees have been awarded since the program was launched fifteen years ago. Career placement data suggests that EURO-TAM degree recipients can expect promising employment opportunities. According to a recent survey of TAM graduates, approximately ¼ currently serve in the U.S. Government, ¼ are employed at NGOs or think tanks, ¼ hold positions in the private sector, and ¼ work in higher education.

The success of past graduates is undoubtedly maximized by the individualized career guidance and special professional development opportunities offered through the TAM program. In addition to their academic training, TAM candidates participate in CV and cover letter workshops, site visits to Washington, D.C. and New York City, alumni roundtable discussions, focus groups, and networking events. Our active and generous network of TAM alumni can also assist recent graduates in cultivating professional contacts and locating employment prospects.

EURO-TAM Dual Degree: Sample Course Plan

This student enters UNC-CH with 12 AP credits and places into 4th semester French. She earns a TAM II degree, a double major in EURO and POLI, and a minor in French, and studies abroad during the fall semester of her 3rd year.

Hooray. I will send the dates tomorrow. How about identifying someone as your designee for times when you cannot come and we can put the dates on that persons schedule as well and put them on the listserv so they are aware.
Enjoy your last night - what is left of it - and travel back easily.

Bobbi

You will probably want to provide the updates for section IV of the Academic Integrity Regulations. I've copied the text below:
IV. Supervision and Evaluation of Faculty and Faculty Administrators

A. All campuses will have guidelines on the number of undergraduate independent studies a faculty member may teach per term. If campuses choose to enumerate a limited number of circumstances under which exceptions to these limits may be approved, guidelines must enumerate the required individuals (by position) who must grant approval. (September 2013)
B. All campuses will have criteria and processes to ensure the regular review and evaluation of all aspects of performance of department chairs. (September 2013)
I'll have a draft for you to review on the other sections by noon.

Subject: Chart needed

Hi Nick -
When you have the chance tomorrow (Monday), will you please send a copy of the chart that was developed due to the budget cuts that necessitated a shift of duties, effective July 1, 2013 from an *associate* dean for First Year Seminars and Academic Experiences (held until that date by Steve Reznick) to an *assistant* dean for First Year Seminars (Drew Coleman, effective July 1).

Thanks - I feel sure I have it somewhere(!)

Bobbi

Ben --
I spoke to Debra Beller about the communication plan and a draft communications for the GreyHeller Firewall and VPN. She would like to review with Stan Waddell before sending to the EACC. He is out of the office this week, but she will get with him early next week and then we will send the documents to you to share with the EACC.
Thank you,
Mechelle

>
> Bobbi's extraordinary service has strengthened our senior team in the dean's office and improved undergraduate education in major ways with the assistance of a wonderful team that she continues to build. Under her oversight, the First Year Seminar Program, the Office for Undergraduate Research and Honors Carolina have attracted national recognition and expanded their learning opportunities; Honors doubled its size. Bobbi was instrumental in transforming the undergraduate general education requirements. She encouraged strategic enhancements in the Academic Advising Program and the Center for Student Success and Academic Counseling that have provided more focused support for all students. These initiatives contributed to increases in our graduation and retention rates, which continue to be the highest for all UNC campuses and among the highest for major public universities nationwide. The Office of Distinguished Scholarships has helped students successfully apply for highly competitive awards resulting in more Rhodes scholarships at Carolina than any other public university in the past decade, and more Luce Scholarships than any public or private university.
>
> Bobbi is also helping us develop even more experiential learning opportunities for undergraduates.
>
> In addition to her responsibilities in the dean's office and her continued scholarship and publication activity, she has served the entire University by overseeing the accreditation and review process, a massive undertaking.

MEMORANDUM **September 20, 2013**

TO: Bobbi Owen, Senior Associate Dean for Undergraduate Education, College of Arts and Sciences, UNC Chapel Hill

FROM: Silvia Tomášková, PhD, Acting Director, Center for Slavic, Eurasian & East European Studies

SUBJECT: Proposed Concentration in Russian, Eurasian and East European Studies (REEES) in Global Studies MA

The Curriculum in Russian and East European Studies of the Center for Slavic, Eurasian and East European Studies (CSEEES), proposes to add a track dedicated to Russian, Eurasian and East European Studies (REEES) to the Master of Arts in Global Studies program. The new track would offer a regional and language specialization, an addition to the more general and globally focused master's program.

The proposed track builds on the existing MA in Russian and East European Studies, which has been offered at UNC-CH since 1999. Similarly to other area studies centers, the strength of the program has always been in training students in the region's history, culture, politics and languages. While this will continue to be the focus of the concentration, the program will draw upon the opportunities and challenges of new global flows, connections and reconfigurations. Students in the REEES track will gain the opportunity to situate their training and knowledge in a larger and a more comparative framework, working side-by-side with Global Studies MA students pursuing other concentrations.

The CSEEES Advisory Board and the Director of the Center for Slavic, Eurasian and East European Studies discussed this opportunity over an extended period of time in the 2012-13 academic year. We also held several meetings with the leadership of Global Studies and look forward to working together to guide students in the new program. Attached please find the Memorandum of Understanding drawn between the Directors of CSEEES and Global Studies, and a sample of a joint course plan that outlines the two tracks.

Signature:

Silvia Tomášková

Silvia Tomášková
Acting Director, CSEEES

Concentration in Russian, Eurasian and East European Studies (REEES) in Global Studies Master of Arts Program

Background to the program

The interdisciplinary Curriculum in Russian and East European Studies at the University of North Carolina at Chapel Hill has offered MA degrees to a select group of students since 1999. While small in size, the program has excellent graduation and completion rates and just as importantly it has excellent placement rates. Fifty percent of graduates of the program have joined the military or have gone to work in the US government, while the rest work for a range of national and international NGOs, businesses and educational programs. The U.S. Department of Education has recognized the RUES MA as the preeminent program of its kind in the South and the only program of its kind within the UNC system. In the field of Russian, Eurasian and East European Studies, UNC Chapel Hill ranks as one of the premier institutions in the world, on par with programs at Georgetown University, The University of Michigan, University of Wisconsin-Madison, Indiana University at Bloomington, University of Illinois at Urbana-Champaign and The Ohio State University. This recognition is supported by the size of financial awards received from the Department of Education: the Center for Slavic, East European and Eurasian Studies, jointly with our partner Duke University CSEEES, was awarded $2.1 million in the last round of Title VI grants – the largest such award in the United States. The funding is not restricted to graduate students; from academic year 2006-2007 through 2012-2013 UNC CSEEES awarded $1,949,000 in FLAS fellowships to both undergraduate and graduate students. The Center for Slavic, Eurasian and East European Studies has a community of nearly fifty core and affiliated faculty on campus.

Description of the program

Cognizant of the importance of studying global systems and how they play out in different world regions on one hand, and the growth of global studies at UNC Chapel Hill on the other, the leadership of RUES seeks to bring historic strengths in Russian and East European Studies into a conversation with the emerging field of Global Studies. The result, the Concentration in Russian, Eurasian and East European Studies (REEES) in the Global Studies MA will do just that. The program and concentration will equip students with global knowledge and awareness, and provide them with regional specialization. Core courses will be rooted in the post-communist reconfigured region of Eastern Europe and Eurasia, while electives will be chosen particularly from Global Studies and from other relevant academic units. REEES graduates will have the deep regional and language training that employers demand, as well as the broader context to render them competitive on a global stage. With its training in languages, history and politics of a region, the REEES Concentration will complement the Global Studies MA focus on issues with contemporary significance and policy relevance.

The degree is designed to train professionals to handle the multi-dimensional tasks of a complex global society. As a two-year interdisciplinary program, the REEES Concentration in the Global Studies MA will enable students to pursue a rigorous and coherent program of study

of issues with contemporary global significance and policy relevance. All students will start with a solid background basis in the history of the region in the *History of Russia and Eastern Europe course* (HIST 783). Knowledge of history is absolutely essential for understanding contemporaneous conflicts, alliances, and potential solutions to problems in the region. This graduate level 3 credit course has been taught successfully for over a decade and has been the stepping stone for all RUES courses in the past. The historical background will be combined with the gateway course of the Global Studies MA program, *Introduction to Research and Theory in Global Studies* (GLBL 700). In addition to serving as an introductory survey of issues and topics in global studies, this graduate level course will serve the purpose of building the cohort of the incoming class in the Global Studies MA in both tracks. Considering that this is a professional master's degree, an alumni network will be essential for all future graduates of the program. Approved language training will fulfill the remaining credits of the REEES Concentration. Historically all graduates of the RUES MA have undergone language training. We continue to believe that it is essential for all professionals with regional specialties in the global context to have familiarity with foreign languages. Past experience has demonstrated that this will serve the students well in the competitive job market and prepare them for a wide range of career opportunities. Language training may be substituted by methods courses in appropriate academic units for native speakers of the region. This may be carried out only with a prior approval and a consultation of the Director of Graduate Studies of the REEES Concentration.

The second semester of the program will require students in the REEES Concentration to complete one additional required three credit core course: *Identities and Transitions* (GLBL 730, formerly RUES 730). The course has been a required course, successfully building on HIST 783, linking issues of the past with present-day post-shifts, instabilities and new alliances, while connecting them to larger global concerns. REEES Concentration students will continue their language training, for the most part a sequence of the language taken in the first semester. The second semester will provide opportunity for electives focused on thematic Global Studies MA courses or electives from other academic units tailored to specific student interests. REEES Concentration students will be interested in *The Global Economy* (GLBL 701), *Global Politics, Institutions and Societies* (GLBL 702), and we envision particular interest in *Global Migration and Labor Rights* (GLBL 703), given its theoretical and policy importance in Eastern Europe and Eurasia. Although these courses are global in a general nature, enrolled students will work on topics and research seminar papers in their area of interest. REEES Concentration students will be strongly encouraged to enroll in Global Studies MA electives, benefiting from the expertise of the Global Studies MA faculty, while applying the acquired knowledge to the area of their concentration.

All students historically enrolled in the RUES MA have continued their graduate work during the summer following the first year. Language training, either in the relevant country of the region, or at select summer language programs in the United States has been by far the most common path. This will continue to be the course of study in the REEES Concentration, in addition to internships or targeted placements relevant to the student's field of study. Regardless of their

chosen summer experience, students will be registered in the Global Studies MA internship course (GLBL 712).

The second year of the program in the REEES Concentration of the Global Studies MA will focus on the production of an MA Thesis, a path that has been historically taken by all RUES MA students. Students will have to register for *MA Thesis Project* (GLBL 993) both semesters. Under the supervision of the primary advisor, each student will use the Fall semester to choose a topic and draft an outline the MA Thesis. In the Spring semester students will focus on the production of the thesis. Students will also continue with their language training, so that by the end of their program they will have received two years of intensive language instruction. In addition they will choose each semester an elective graduate level course relevant to their thesis topic and a future professional path. All REEES concentrators will be advised to choose electives from the Global Studies MA offerings, GLBL 701, 702 or 703, depending on their interests and availability of offerings in any particular semester.

All Global Studies MA students, regardless of their concentration, will be required to complete 36 credits. Students enrolled in the Concentration in Russian, Eurasian and East European Studies program will satisfy these requirements. In addition, they will be able to pursue intensive language study and a thesis project, as employers have come to expect from graduates with a designated regional expertise.

Justification for the program

The REEES Concentration within a Global Studies MA program will highlight issues of current and emerging global significance as they are situated in a specific region of the world. It will equip highly trained professionals in government, business, education, private and non-profit sectors with knowledge and conceptual skills needed in international work. In-depth knowledge of a region, language skills and the ability to make global connections will prepare graduates of the program for the job market locally, nationally and internationally. Global Studies are inherently interdisciplinary and draw on the strengths of experts in many fields. The REEES Concentration within the Global Studies MA program will build on this expertise and anchor it in a region that continues to be one of central importance to global problems and their potential solutions. The significance of Russia, Eastern Europe and Eurasia will not diminish, even as the region has been re-configured. The need for experts who understand the imbrication of the local and the global in this part of the world continues to be high and we look forward to training professionals with solid education.

Program curriculum

Overview of Two-Year Global Studies MA Course Plan
(already approved)

We recognize that Global Studies MA course offerings will vary based on faculty availability. Student plans will be modified as necessary in consultation with the Director of Graduate Studies.

First Semester:
GLBL 700 Introduction to Research and Theory in Global Studies (3 credits)
GLBL 701 The Global Economy (3 credits)
Elective or 1 methods course appropriate to the student's concentration

Second Semester:
GLBL 702 Global Politics, Institutions and Societies (3 credits)
GLBL 703 Global Migration and Labor Rights (3 credits)
Elective or 1 methods course appropriate to the student's concentration

Third Semester:
GLBL 712 course work, research and/or internship (up to 9 credits)
OR
Elective courses taken at UNC Chapel Hill (up to 9 credits)

Fourth Semester:
GLBL 992 Research and Writing Credit (3 credits)
Electives to fill out the 36 credit requirement

In total: 18 Core Course credit hours taught by Global Studies faculty, and 18 elective credit hours, including up to 9 credit hours earned in internship, field research, and/or classes

Proposed Concentration in Russian, Eurasian and East European Studies (REEES) Course Plan

First Semester:
GLBL 700 Introduction to Research and Theory in Global Studies (3 credits)
HIST 783 History of Russia and Eastern Europe (3 credits)
Approved language course **OR** methods course appropriate to student's concentration (3 credits)

Second Semester:
GLBL 730 (formerly RUES 730) Identities and Transitions (3 credits)
Approved elective: GLBL 702 Global Politics, Institutions and Societies (3 credits) **OR** GLBL 703 Global Migration and Labor Rights (3 credits)

Approved language course **OR** methods course appropriate to student's concentration (3 credits)

Summer
GLBL 712 course work, research and/or internship **OR** approved language study (up to 6 credits)

Third Semester:
GLBL 993 Thesis Project (3 credits)
Approved language course **OR** methods course appropriate to student's concentration (3 credits)
Approved elective: GLBL 701 The Global Economy (3 credits)

Fourth Semester:
GLBL 993 Thesis Project
Approved language course **OR** methods course appropriate to student's concentration (3 credits)
Approved elective: GLBL 702 Global Politics, Institutions and Societies **OR** GLBL 703 Global Migration and Labor Rights (3 credits)

In total: 15 Core Course credit hours, (including 6 MA Thesis credit hours) taught by REEES and Global Studies faculty, 12 Language credit hours taken at UNC-CH or Duke, 9 elective credit hours earned in internship and/or graduate level classes.

Year	Semester	Global Studies MA	Credits	REEES Concentration	Credits
1	1	GLBL 700 Introduction to Research and Theory in Global Studies	3	GLBL 700 Introduction to Research and Theory in Global Studies	3
1	1	GLBL 701 The Global Economy	3	HIST 783 History of Russia and Eastern Europe	3
1	1	Elective	3	Language training	3
1	2	GLBL 702 Global Politics, Institutions and Societies	3	GLBL 730 Identities and Transitions	3
1	2	GLBL 703 Global Migration and Labor Rights	3	Language training II	3
1	2	Elective	3	Elective: GLBL 701, 702, 703	3
	Summer			Language training or GLBL 712 Internship	(up to 6)
2	3	GLBL 712 Internship or	9	GLBL 993 MA Thesis	3
2	3	Elective	above	Language training III	3
2	3	----------	above	Elective: dependent on offering GLBL 701	3
2	4	GLBL 992 Research and Writing	3	GLBL 993 MA Thesis	3
2	4	Elective	3+	Language training IV	3
2	4	----------	above	Elective	3
		Total	**36**		**36**

A comparison with a selection of graduate programs

The graduate programs below were selected for their distinguished reputation in Russian, East European and Eurasian Studies. These programs would potentially compete for similar students as the REEES Concentration in the Global Studies MA at UNC-CH. Similarities and differences are described, highlighting what will distinguish the UNC-CH REEES Concentration program.

1) ***The School of Global and International Studies (SGIS) at Indiana University at Bloomington***:
http://www.indiana.edu/~reeiweb/graduate/degrees.shtml

The Russian and East European Institute (REEI) in the SGIS at Indiana University at Bloomington offers two Master of Arts programs in Russian and East European studies tracks – a regular course based track and a mid-career track for professionals; five three year dual degree programs – MA/MIS combined with a Library and Information Science degree; MA/MLS combined with the same program; MA/MPA combined with a Public and Environmental Affairs degree; MA/MPH combined with a Public Health degree; MA/MBA combined with the Kelley School of Business degree; and one 106 credit degree MA/JD offered jointly with the Law School.

The 3-year programs at IU are geared towards professional fields and provide training for specific careers with a regional focus. The REEES Concentration in the Global Studies MA at UNC-CH will offer a 2-year training that, while region specific, will provide a more general training for a broad range of careers, stressing understanding of local and global connections.

2) ***The University of Texas at Austin, LBJ School of Public Affairs***
http://www.utexas.edu/lbj/degreeprograms/mgps

The Master of Global Policy Studies and Russian Studies dual degree consists of 49 credit hours; the dual program offers two complimentary master's degree programs, completed in three years. A preparation for targeted career paths, the program combines global policy studies with an area concentration.

The program at UT-Austin is offered through the School of Public Affairs, training professionals for a specific policy career. The focus in the area specialization is Russian Studies. The REEES Concentration at UNC-CH will offer a wider range of area training – East European and Eurasian, in addition to Russian studies. The program proposed here will offer topical courses that will address policy implications in a broader context.

3) ***The University of Washington Henry M. Jackson School of International Studies***
http://jsis.washington.edu/advise/catalog/reecas_ma.shtml

The 2-year interdisciplinary MA program in Russian, East European, and Central Asian Studies is designed to provide a terminal degree for students preparing for careers in government and non-governmental organizations, journalism, business, or teaching at the pre-college level.

The UWA program is the closest to the REEES Concentration. Offering language and area training, the program only requires a Research Methods and a Thesis course. Thus we believe that the UNC-CH MA degree will provide a more rigorous training with a common set of skills and knowledge base, preparing our graduates for the job market.

4) ***Georgetown University, School of Foreign Service***
http://ceres.georgetown.edu/academics/ma/
A 42 credit hour program that crosses several disciplines – anthropology, history, economics, government – the MA in Eurasian, Russian and East European Studies is specifically aimed at careers in the foreign service, requiring knowledge of two languages at the advanced level.

The REEES Concentration at UNC-CH will be offered to students interested in a broader range of career paths.

5) ***The University of Michigan, Center for Russian, East European and Eurasian Studies***
http://www.ii.umich.edu/crees/academics/graduate/reesma

An area focused program that provides solid language training, the CREEES at the UMI is currently a part of the Weiser Center for Europe and Eurasia. The 2-year program offers an area and disciplinary concentration. In addition to a standard MA in REEEs, the Center also offers a dual MA degree jointly with the Business School, the Law School, and the School of Public Policy.

The UNC-CH REEES Concentration will differ from the UMI program in its attention to global connections, being a part of the Global Studies MA.

6) ***The University of Toronto, Munk School of Global Affairs***
http://munkschool.utoronto.ca/ceres/study-at-ceres/#graduate

The MA in European, Russian, and Eurasian Studies at the University of Toronto is a 2-year program that distinguishes itself by offering every student a summer or a semester long fieldwork experience in selected countries of Eastern Europe. Similarly to the UMI program, the focus of the MA is specialization in an area with solid language training. Additionally the MA in ERES at the University of Toronto may be combined into a dual degree program MA/JD at the law school, MA in Jewish Studies, or MA in the Collaborative Graduate Program in Ethnic and Pluralism Studies.

Same as above – global connections will make the REEES Concentration program at UNC-CH competitive.

7) ***Carelton University, Institute of European, Russian and Eurasian Studies***
http://www6.carleton.ca/eurus/prospective-students/ma-program/

A 2-year MA in European, Russian and Eurasian Studies is an area specific interdisciplinary program that concentrates on language training and experiential learning through internships. The Ottawa based program is mainly aimed at Canadian students who wish to enter foreign service and/or careers in the Canadian government. The program is most similar to the Georgetown School of Foreign Service MA, thus not being in a direct competition with the new REEES Concentration in the Global Studies MA at UNC-CH.

Attachment: A copy of the signed Memorandum of Understanding between the Curriculum in Russian and East European Studies (RUES) and the Global Studies MA Program.

MEMORANDUM OF UNDERSTANDING
Between the Curriculum in Global Studies and the Curriculum in Russian and East European Studies

The two curricula agree that from July 1, 2014, the Master of Arts (MA) in Russian and East European Studies (RUES) will become a concentration in the MA in Global Studies. Officially, the MA in RUES will become a concentration in the MA in Global Studies (GLBL), with the title Russian, Eurasian, and East European Studies (REEES). Administration of the REEES concentration will be managed by the Director and Advisory Board of the Center for Slavic, Eurasian, and East European Studies (CSEEES), as described below. Administration of the MA in Global Studies as a whole will be managed by the Curriculum in Global Studies (CGS).

The Curriculum in Global Studies and the Curriculum in Russian and East European Studies agree to the following items:

1. The Director of the Center for Slavic, Eurasian, and East European Studies (CSEEES) will serve as the Director of Graduate Studies (DGS) in Russian, Eurasian, and East European Studies (REEES). If the Director of CSEEES does not serve as the DGS for the REEES track, that appointment will be made in consultation with the Chair of Global Studies.
2. The Associate Director of CSEEES shall assist the CSEEES Director in the academic planning, management, instruction, and advising of the REEES concentration.
3. The Advisory Board of the CSEEES, appointed by the Senior Associate Dean for Social Sciences and Global Programs in the College of Arts and Sciences in consultation with the Director of the CSEEES, will constitute the REEES Advisory Board. The Director of Graduate Studies for the MA in Global Studies (GLBL) will serve as an *ex officio* member of the REEES Advisory Board.
4. The Director of Graduate Studies for REEES will work closely with the REEES Advisory Board in carrying out her/his duties.
5. The REEES concentration will have a distinct admission process, coordinated by the REEES Director of Graduate Studies. The Admissions Committee for REEES will continue to be appointed by the Director of CSEEES.
6. The Director of Graduate Studies for the Global Studies MA will be a member of the Admissions Committee for the REEES concentration.
7. The REEES Director of Graduate Studies will be a member of the Admissions Committee for the Global MA concentration.
8. A committee overseeing the Global MA as a whole will be constituted by the Director of Graduate Studies for the MA GLBL, the Director of Graduate Studies for REEES and the Chair of the Curriculum in Global Studies, who will chair it. As the Global MA program evolves and grows, the Chair of the Curriculum in Global Studies may provide for additional members to join this committee.
9. The REEES Advisory Board and the Director of the CSEEES will have responsibility for the intellectual content of the concentration in Russian and East European Studies, including concentration requirements. Any changes in requirements and operations of the REEES Program will be vetted by the REEEES Advisory Board and only made after consultation with the Director of the CSEEES.

10. As a new master's program, the MA in Global Studies will receive one guaranteed master's merit assistantship for two years from The Graduate School. To ease the transition, The Graduate School will also work with the program accordingly to assist in supporting REEES concentration students. After two years, the MA in Global Studies will receive resource allocations from The Graduate School consistent with other master's programs.
11. Students in the REEES concentration will receive academic advising from the REEES Director of Graduate Studies, who will communicate with the Director of Graduate Studies for the Global MA in order to meet administrative requirements and approvals.
12. The existing curricular requirements for the MA RUES will be the basis for the requirements for the REEES concentration, subject to necessary adjustments to satisfy additional credit requirements for the MA in Global Studies. Students in the REEES concentration will be encouraged to take other MA GLBL courses.
13. Existing RUES courses will be given GLBL course numbers and future courses for the REEES concentration will be added with GLBL course numbers.
14. The Department Manager of the CSEEES will continue to provide student services support for the REEES concentration. The CSEEES will continue to make available a workroom for use by REEES students.
15. Advertising of and recruitment for the REEES concentration will be the responsibility of the CSEEES. The CSEEES will continue to maintain a website for promoting and administering the REEES Program. CSEEES will continue to seek funding from external and internal University sources to meet these needs.
16. The CSEEES will continue to administer independently the U.S. Department of Education Title VI programs, including the Foreign Language and Area Studies (FLAS) Fellowships. Students in the MA in Global Studies with interest in languages approved for CSEEES awards are strongly encouraged to apply to CSEEES for FLAS Fellowships.
17. The CSEEES will continue to administer the Graduate Certificate in Russian and East European Studies.
18. The Directors of Graduate Studies for the Global MA and the REEES concentration will jointly prepare revisions to the Global Studies listing in the Graduate Bulletin.
19. The Chairs of the two Curricula will prepare and submit to the College of Arts and Sciences a request for funds to cover any costs associated with the merger of the degree programs.

Agreed to on this day, Aug 20, 2013

Andrew Reynolds, Chair, Curriculum in Global Studies

Robert Jenkins, Director
Curriculum in Russian and East European Studies
and Center for Slavic, Eurasian, and East European Studies

Silvia Tomášková, Acting Director, Fall 2013

Italian 398 * Fall 2013

Narrating the Rise and Fall of Italian Fascism: Between History, Fiction and Film
MW 2:00-3:15
Dey Hall 215

Professor Marisa Escolar
139 Dey Hall
Escolar@email.unc.edu
Office hours: MW 3:15-4:15 and by appointment

Course description: Once defined as "a mysterious object that resists capture by a clear and rational historical definition," fascism has been a frequent subject for Italian writers and directors, and we will examine representations of this moment, paying attention to its translation from fiction to film. At the same time, we will see how the narrative of fascism intertwines with personal conflicts regarding negotiations of gender, sexuality, race and religion, whether the narratives obscure, contradict or echo one another.

Policies

Basic Guidelines for Papers
All papers and assignments should be typewritten, stapled, double-spaced in 12-point Times New Roman font with 1.25" margins. A page is approximately 270 words; a paragraph is approximately 90. When submitting revisions, please submit all previous drafts with my corrections as well. Please don't ask me to submit assignments electronically: I hate to say no.

Late Papers / Assignments
Papers are due at the start of class. Late papers will be dropped 1/3 letter grade per day [A to A- etc.], including papers turned in after class is over. Exceptions may be made in the cases of a documented medical emergency, religious observance and organized, authorized campus activities (sport events, academic conferences, etc.). Completing your assignments on time is essential for your grade, for your progress in the class, and for the class as a whole. Class will be more productive and enjoyable if you come prepared.

Student-Instructor Communication
I encourage you to meet with me to discuss your performance in the class, as well as your papers, both in the planning phases and after you have received my feedback. To do so, please come to office hours or make an appointment via email. I check my email regularly every day before 5 pm, and you can expect a prompt reply. Messages received after 5pm may not be answered until the following day. Likewise, please maintain a valid email address and check sakai regularly for assignments. **Note:** While I am always available to discuss papers in office hours, I cannot *correct* advance drafts nor comment on drafts submitted via email.

Accessibility
All reasonable efforts will be made to accommodate students with disabilities in accordance with university policy. Information about specific resources provided by the Accessibility Resources and Service may be found online at http://accessibility.unc.edu/ or by calling 919-962-8300.

UNC Honor Code

According to the Office of Student Conduct website, "The University of North Carolina at Chapel Hill has had a student-led honor system for over 100 years. Academic integrity is at the heart of Carolina and we all are responsible for upholding the ideals of honor and integrity. The student-led Honor System is responsible for adjudicating any suspected violations of the Honor Code and all suspected instances of academic dishonesty will be reported to the honor system. Information, including your responsibilities as a student is outlined in the Instrument of Student Judicial Governance. Your full participation and observance of the Honor Code is expected."

"At UNC, plagiarism is defined as "the deliberate or reckless representation of another's words, thoughts, or ideas as one's own without attribution in connection with submission of academic work, whether graded or otherwise." (*Instrument of Student Judicial Governance*,Section II.B.1.). Because it is considered a form of cheating, the Office of the Dean of Students can punish students who plagiarize with course failure and suspension." See http://writingcenter.unc.edu/handouts/plagiarism/ and http://studentconduct.unc.edu/ (919-962-0805) for more information.

Although the internet may make plagiarism easier, it also makes it easier to detect. If you are ever in doubt about a specific citation issue, please see me before the paper is due.

Graded work

-**Participation (20%)**: You are expected to keep up with the readings and homework and to participate actively in class discussions. Please have the readings completed by the day they are assigned. If you bring electronic devices to class to access course materials, please only use them for that purpose. Texting or using other social media during class will result in your being marked absent for the day. (If you have an emergency and need to contact someone, please step out into the hallway.)

You are allowed three absences during the semester (including illness, personal travel, etc. – for approved academic, athletic or religious absences, please see me in advance), after which your **final** grade in the course will be dropped 2 points per absence.

-**Discussion forum (20%)** You will have weekly directed writing assignments that you will post on Sakai. You should also familiarize yourself with your classmates' posts to be able to refer to them in discussion. These will be due on Sunday evening by 8pm; no late assignments accepted.

You will **facilitate discussion** (15%) on one of the assigned readings. 48 hours prior to the class that you facilitate, you will submit a series of questions via email to me, and I will give you feedback. By the following class, you will submit a one-page reaction to the experience of facilitating: a summary of what was discussed in terms of content, which questions worked well and which were less successful, etc. Your grade will be based on the questions, the discussion and the reaction paper.

You will write **3 short papers (3 pages) (30%)** on two different novels/films, in which you go beyond the issues raised in class. If you are an Italian major taking this course for credit for the major, please see me about writing some of your assignments in Italian.

You will take a **final exam** (15%) on the day and time scheduled by the registrar. No rescheduling!

Required books:
To buy online:
The Shortcut by Ennio Flaiano, translated by Stuart Hood
Beautiful Antonio by Vitaliano Brancati, translated by Patrick Creagh

Available in the campus bookstore:
Garden of Finzi Continis, Giorgio Bassani
The Conformist, Alberto Moravia
Italian Fascism: Its origins and Developments, **Third edition**, Alexander De Grand

Films - Highly recommended (you must make arrangements to see the entire film prior to the class in which it is discussed; we will not screen films in class)

The Conformist, Bertolucci (available on amazon.com & instant play Netflix)
Bell'Antonio, Marco Bolognini (amazon)
Time to Kill, Giuliano Montaldo (amazon)
Garden of Finzi Continis, Vittorio de Sica (amazon)

Note: this schedule is subject to change with notice, please check Sakai regularly for announcements.

Week1		
Wed Aug 21	Introduction to class	
Week2		
Monday Aug 26	Historical background – De Grand Ch 1-4	
Wed Aug 28	Moravia – Conformist 1-63	
Week3		
Wed Sept 4	De Grand Ch 5-6 Moravia – Conformist 64-107	
Week4		
Monday Sept 9	Moravia – Conformist 108-178

Jim,

This student below is an alum (perhaps KF) living locally who came to ITS to see if there was interest in an on-line tutoring application that would allow students to obtain tutoring from UNC tutors. Again, it is on-line, via a SKYPE like capability that was fairly slick and welcoming. It permits scheduling, and might be an enhancement to the current student offerings. Is there a way to connect him to someone in this area so him he can chat about the possibilities? I normally wouldn't press this, but I am sensitive to his institutional connection. Please advise and I can followup or feel free to forward to the appropriate area. Thanks.

Chris

Chris,

I wanted to follow up with you to see if you had gotten a chance to consider the option of having Upswing provide unlimited tutoring access at one to students during the midterm period.

From a former student's perspective, I think this would add tremendous value, as students are always looking for assistance during those times. It will also help to build some student-relevant data on the concept of online tutoring.

If you would like, I can come in sometime soon and show you all a demo of what this could look like.

Please let me know your thoughts and whether you would like to consider this moving forward.

All the best,

Alex

Hello Chris, Kim, and Michael,

I hope everything is going well during the first couple of months of the school year. I wanted to (1) Update you on what we have been doing to date, and (2) Provide you an option that could help quickly determine demand for a platform like ours.

Update and Moving Forward:
First, since our meeting, we have deployed the Upswing platform and have gotten about 40 qualified tutors to register in a variety of different subjects.

Last time we met, it was recommended that I reach back out during September and Kim would introduce Upswing to the Academic Advising department. Please let me know if you need any additional information about the team/platform before making the connection.

2-Day Pilot to Test UNC Demand:
Second, I have an idea about how we can help you and your teams affordably determine demand for Upswing at UNC. I would like to provide open access to Upswing for all students in one or more of the libraries in the days leading up to mid-terms.

We would only need one computer to operate this, and it can be used on an unlimited basis during this period. Best of all, the entire experience could be created for no more than $500.

Please let me know your thoughts and whether or not this is something you think your department would want to fund as a pilot.

If you have any additional questions, please feel free to contact me directly.

All the best,

Please do. My recollection is that we were going to take it to the ad board as well because of the implications for College courses.

JOMC majors only - right? No College students can do this.

Subject: RE: Question on Certificate proposal

Dear Lucila - thanks for sending the draft over. I think it looks quite good. Do you know if the College of Arts and Sciences will need to hear this proposal or not? They would typical hear them first and then our Board would hear them. I can ask them if you haven't been working with anyone yet. Our last Board meeting was actually last week, but there is a possibility that we will call a special one to hear a follow-up and I might be able to include this one. Otherwise, we would hear this proposal in our first fall semester meeting. So waiting for the final letter would be fine depending on the timing.

Best -
Stephanie

Subject: Question on Certificate proposal

Dear Associate Dean Schmitt,

I have been waiting for about ten days for one of the letters of support for the Certificate in Latino Media and Journalism and it seems that this process is going to take a few more days. It has been complicated because a history class that we would like to include used to be offered by the Dept. of History, but it's now offered by the Institute for the Study of the Americas and the director is on leave.

I'm anxious to submit the proposal. I was wondering if you will be willing to accept it, on a preliminary basis, without this letter.

It's attached, in case you would like to take a look at it. The folder contains the proposal, the letter from the Journalism School, and support letters from Romance Languages, Geography, English, and Music.

Thanks,
Lucila Vargas

Subject: Guest Coaches - JMU
Attach: Text.htm

Folks - we have our two Guest Coaches for the JMU game and our lunch guest for the Friday Kickoff Luch w/ Coach Davis!

Cynthia Demetriou - Retention Coordinator in Arts & Sciences
Cynthia's position is new this year and was established as part of the Chancellor's retention initiatives. Cynthia is the person who will developing the new eligibility procedures.
Here is some more information on Cynthia:

BA - English, State University of Stony Brook
Ed.M. - Arts in Education, Harvard University
Professional Experience - Manager of Advisement Systems, Adelphi University

Steve May - Communications, Director of Undergraduate Studies
B.A. and M.A., Purdue University; Ph.D., University of Utah. Interpersonal and Organizational Communication. Dr. May's interests include interpretive and critical studies of organizational communication, post-structuralist theory, and boundaries among work/family, labor/leisure, and private/public. He is currently studying therapeutic discourse in the work place.

Remember, this game is one of our Friday lunch games (used to be Thursday Lunch). Cynthia and Steve will join us for lunch on Friday as will faculty members from Communications and Sociology (including Howard Aldrich, Chair of Soc). Coach Davis will speak at the lunch. The location for this lunch will be the 4th floor recruiting room-12:00 - 1:00.

Cynthia and Steve May will also join us for dinner (4th floor) on game day and on the sidelines for the game.

Now, different this year, Steve Reznick will be participating with us in Guest Coaching duties. So, on the sidelines for JMU will be Steve Reznick, Steve May, Cynthia Demetriou and one member from our staff (academics). Further, Steve Reznick will help with introductions for the Friday lunch.
*sideline passes from Corey

OK - I believe that's all. I'll send updates and Friday lunch #'s first of next week.

Subject: Guest Coaches for VT
Attach: Text.htm

This weeks Guest Coaches for VT are:

Dr. Margaret (Peggy) Jablonski, Vice Chancellor for Student Affairs

Native of Springfield, Mass
Doctorate, Boston University
Masters Degree, UMass-Amherst
Bachelors Degree, UMass-Amherst

Peggy has worked at Carolina since August of 2004.

Dr. Steve Reznick, Professor of Psychology

Steve is a UNC graduate (Winston-Salem, RJ Reynolds High), who left us for awhile but has been back since 1998, serving as Professor of Psychology and Director of the Program on Developmental Psychology. As of this summer, he is also Associate Dean for First Year Seminars, a job that is keeping him VERY busy. He is also President of the Faculty-Staff Recreation Association (the Farm), Chairs Committee for Priority Registration, member of the Faculty Athletic Committee and the Admissions Sub Committee.

John Blanchard and Beth Bridger will be hosting Peggy and Steve this weekend.

Note - there will not be a Thursday Academic Lunch or a Friday Football Lunch this week. Also, Peggy will be driving herself up for the game and spending part of the game in the VT Presidents box. I believe Peggy and Steve will drive back from VT together. Joe Haydon is confirming the travel plans with Peggy and Steve.

* Please make sure Coach Davis knows who the Guest Coaches are before traveling.

Go Heels!

Subject: Guest Coaches and Friday Lunch for USC

Folks, here is the Guest Coaching information for the USC game. Sorry for the delay but there were some last minute changes.
The Guest Coaches for this weekend are:

Patrick Grogan from the Registrar Office. Patrick is a Records Analyst working almost exclusively with NCAA and student-athlete issues. Patrick has been very important in working with our Compliance Office formulating and setting up key policies and procedures.

Barbara Polk - Associate Director of Admissions. Barbara is the admissions liaison for the Department of Athletics. Barbara works very closely with the Compliance Department (initial eligibility), Academic Support, and all of our sport coaches.

Both Patrick and Barbara will eat with us on the 4th floor on game day and watch the game from the sideline.

There will be a Faculty Lunch with Coach Davis this Friday. The lunch will be in the 4th floor recruiting room. Please note that the lunch will start at 12:30 to accommodate University Day.
Guests for the Faculty Lunch are:

Guest Coaches - Patrick Grogan and Barbara Polk.

The Registrar's Office:

Alice C. Poehls, Assistant Provost and University Registrar
Crystal Lineberry, Records Analyst, Office of the Registrar
Donna Redman, Associate Director, Office of the Registrar

The Office of Diversity and Multi Cultural Affairs:

Dr. Archie Ervin, Associate Provost and Director
Ms. Terri Houston, Director, Recruitment and Multicultural Programs
Dr. Cookie Newsom, Director, Diversity Education and Research
Ms. Chese'qua Evans, Outreach and Support Coordinator
Mr. Josmell Perez, Multicultural Programs Coordinator
Ms. Lynne Degitz, Communications Specialist
Ms. Beverly Wood, Administrative Assistant
Ms. Margie Scott, Office Assistant

Office of Scholarships and Student Aid:

Jackie Copeland, Assistant Director of Client Services and NCAA, will be joining us with three new members from the financial aid department.

Coach Davis's table:

Patrick Grogan, Office of the Registrar
Barbara Polk, Associate Director of Admissions
Alice Poehls,, University Registrar
Archie Ervin, Associate Provost - Multi Cultural Affairs
Cookie Newsom, Director of Diversity Education
Jackie Copeland, Assistant Director of Scholarships and Student Aid
Steve Reznick, Faculty Department of Psychology, Faculty Athletic Cmt, Admission Cmt, Priority Registration Cmt (Chair)

The Agenda will be the same as the last Faculty Lunch, with times approximatley as follows:

12:30 - Guests arrive

12:50 - Introduce Guest Coaches and Steve Reznick (Robert Mercer)

12:55 - Introduce Coach Davis (Steve Reznick)

1:00 - 1:15 - Coach Davis

1:15 - 1:20 - Video

1:20 - 1:25 - Closing (Robert Mercer)

After the video and everyone finishes lunch a tour of the facility will he offered.

Go Heels!

Letter of Transmittal to Accompany the Proposal for Priority Registration

A complex system of priority registration that is based on assorted traditions, permissions, and precedents has evolved at the University of North Carolina at Chapel Hill. There is a long history of efforts to establish a formal priority registration policy on our campus, and the goal of the Proposal for Priority Registration that is attached here is to provide a transparent, systematic mechanism for administering priority registration under appropriate scrutiny.

Informal conversations in fall 2006 led the Faculty Committee on Athletics to establish a task force to explore the possibility of proposing a priority registration system that would assist varsity athletes and other students who have notably difficult scheduling issues due to their university obligations. I was asked to Chair this task force. The initial members of the task force were Lissa Broome, Jack Evans, George Lensing (all from the Faculty Committee on Athletics), John Blanchard (Department of Athletics), and Robert Mercer (Academic Support Center for Student-Athletes).

To launch this endeavor, I consulted with various individuals regarding the groups of students who should be candidates to be covered by priority registration and the steps that would lead to a registration priority proposal being implemented. Conversations with Senior Associate Dean Bobbi Owen, Provost Bernadette Gray-Little, and Associate Dean of Academic Services Carolyn Cannon indicated that education majors, students with disabilities, and allied health majors were obvious candidates. Also, a plan emerged whereby if the Faculty Committee on Athletics endorsed the task force's proposal, the proposal would then be forwarded to the Registrar, and she would seek advice from the Educational Policy Committee regarding the proposal's merits pursuant to the charge of that committee to act "as a council of advice for the university registrar in administering faculty regulations concerning . . . registration."

To expand the task force's expertise, I consulted with Dean Tom James of the School of Education and on his advice, invited Jane Smith, Licensure Officer and Coordinator of Teacher Recruitment and Retention to join the task force. Subsequently, I also asked Anne Bryan, Director of Student Affairs of the School of Education to join. Beverly Foster, Chair of the Educational Policy Committee and Director of Undergraduate Studies in the School of Nursing; and Harold Woodard, Associate Dean of Student Academic Counseling, also agreed to join the task force.

After an initial meeting in December, the task force met four times and corresponded via e-mail. Our deliberations were focused on preparing the attached Proposal for Priority Registration. This

proposal addresses the general issue of priority registration and does not address enrollment priorities for select groups of students in particular courses (e.g., honor student enrollment in honor's classes, or eligibility for courses with supplemental instruction). Another issue that this proposal does not address is the problem facing a student who is off campus due to a university sanctioned event on the specific day when that student is expected to register for classes. These issues are adequately covered by current policies. It is our understanding that UNC currently allows students with learning disabilities to register before their classmates in order to reduce barriers to their academic success. The present proposal would formalize this policy and extend it to a broader group of students who are deemed eligible.

We consulted with the University Registrar Alice Poehls and Applications Analyst Megan Keefe regarding the feasibility of the plan. The Registrar also helped us compile the registration priority policies at other ACC schools and at universities that we consider to be our "comparables" by updating a report prepared by the previous Registrar, David Lanier, in 2002 (Survey of Registration Priorities for Athletes 2007 – attached). She also gathered new data regarding priority registration policies at our peer institutions (Registration Priority for Athletes and Others at Selected Universities – attached). We also examined information gathered by Robert Mercer concerning registration policies for athletes at schools in the ACC and some of our comparables (SA Registration Procedures at Comparable Universities – attached). On the basis of these data, we are confident that our proposal is feasible and well within the boundaries that have been adopted by comparable institutions.

One important aspect of our deliberations was to determine how many student athletes would be eligible to be considered for priority registration. Under the guidelines of our proposal, the Athletics Department could nominate a student-athlete for priority registration during a semester in which the student's practice obligation is at the NCAA maximum of 20 hours per week. John Blanchard prepared a table (attached) showing the number of weeks per semester in which varsity athletes are practicing at the NCAA maximum of 20 hours per week. One sport (cross country) has no official practices in the spring semester, so under the guidelines of our proposal, athletes who only participate in cross country (and are not members of the track & field team) would not be eligible for priority registration for that semester. Several sports practice at the 20 hour limit for only a few weeks a semester (e.g., baseball and softball in the fall semester). These students could be nominated for priority registration, but the Priority Registration Advisory Committee might advise against it on a sport-by-sport or student-by-student basis.

The Faculty Committee on Athletics reviewed the Proposal on May 1, 2007, endorsed it, and forwarded it to the Educational Policy Committee. Subsequently, Lissa Broome and Jack Evans raised the issue of priority registration with the Executive Committee of the Faculty Council. During the summer of 2007, I met with Student Body President Eve Carson to review the proposal, and I provided documentation to be posted on the Student Government website. I also met with Melissa Exum, Theresa Maitland, Jim Kessler, and Fred Clark to review the implications of this policy for students with special needs.

The Educational Policy Committee reviewed the Priority Registration Proposal on October 10 and October 17, and voted to return the Proposal to the task force with the request that clarifications be made regarding the scope of students who would be covered, the focus on groups of students rather than individual students, the expectations regarding annual reports, and the explicit inclusion of a four-year sunset provision that would require reauthorization of the Proposal after a thorough review by the Educational Policy Committee in collaboration with Faculty Council. A straw poll suggested that Educational Policy Committee members would vote in favor of the proposal if it incorporated the recommended changes.

I consulted with Lissa Broome and reconvened the task force with some change of membership. Specifically, Jane Smith was no longer available, but Anne Bryan continued to represent the School of Education. I also asked Theresa Maitland, Jim Kessler, and Fred Clark to join the task force. Modifications were made in the Proposal to incorporate the suggestions from the Educational Policy Committee. The Faculty Athletics Committee reviewed the revised policy on November 6, 2007 and approved it unanimously. The Educational Policy Committee reviewed the revised policy on November 7, 2007, made one minor modification, and approved it unanimously.

To summarize, we have made a diligent effort to formulate a priority registration system that solves obvious problems and has appropriate limitations and oversight to avoid misuse. The modifications suggested by the Educational Policy Committee are improvements. We look forward to a broad discussion of the proposal, and hopefully, its eventual implementation.

Sincerely,

J. Steven Reznick, Ph.D.
Professor and Director, Program in Child Development

Proposal for Priority Registration – November 7, 2007

Rationale

Some groups of undergraduate students encounter unusual challenges in our registration system that inhibit their academic progress and threaten their timely graduation. For example, students with physical or learning disabilities may require reasonable accommodations in order to reduce barriers to their academic success. Education majors in teaching programs spend the second semester of their senior year off campus as student teachers, and during their junior and senior year must complete specific courses required for certification in their areas of specialization. Nursing students must spend significant amounts of time in clinical rotations in order to meet licensure requirements. Varsity athletes must fit their class schedules with their practice/competition schedules so that they can make progress toward their degrees as required by the University and the NCAA. This proposal suggests a process for priority registration that provides a flexible but transparent approach to these issues.

Mechanism

A process for determining how students qualify for priority registration is described in subsequent paragraphs. Those students who qualify for priority registration will be allowed to register ahead of their cohort. UNC has adopted a new registration ordering plan in which the order in which students register is based on the number of semesters completed. Students who qualify for priority registration would receive the earliest assignment times for their semester cohort. In other words, a sophomore who receives priority registration would register before other sophomores but not before any juniors or seniors.

The Registrar will convene a Priority Registration Advisory Committee (the PRAC) that will meet each semester to review the student groups who have been recommended for priority registration. Members of the PRAC will be appointed by the Registrar and will include faculty, students, and administrators representing a range of interests and expertise. We recommend that the PRAC include some individuals who have had experience in educational policy, academic advising, and disability services.
