Each semester, prior to the start of registration, an official who has responsibility for students who are potentially eligible for priority registration (e.g., a Dean, Director, or Department Chair) will send the Registrar a list of students who are recommended for priority registration and a rationale for the need for priority registration given the demands of the students' activities. The Registrar will forward these rationale statements to the PRAC along with a tally of the number of students being proposed (i.e., the Registrar will not give PRAC an actual list of names). In the interest of transparency and accountability, the PRAC's meetings will be open to the public, and all rationale statements and tallies as well as the PRAC's decisions will be publicly available. Having received advice from the PRAC, the Registrar will adjust assignment times for those students who are selected for priority registration.

The PRAC will review summary data regarding the operation of priority registration (e.g., the specific courses that are selected during priority registration) and suggest modifications to the Priority Registration Policy as needed. The Registrar will consult with the PRAC and seek advice from the Educational Policy Committee

regarding any amendments to the Priority Registration Policy. The Registrar will present an annual report to the Educational Policy Committee indicating the number of students who were granted or denied priority registration, and evaluating whether course selection during priority registration appears to be serving its intended purpose.

The Priority Registration Policy proposed here will be in effect for a trial period of four years. After four years, the Registrar will request that the Educational Policy Committee in collaboration with Faculty Council review how well the policy is working and make a formal recommendation regarding whether the policy should be continued as is, modified, or allowed to lapse.

Limitations

As a general rule, we recommend that no more than 25% of the seats in each section be available for priority registration. The Registrar and the PRAC will monitor the distribution of priority registration students across sections to determine whether any sections are being selected disproportionately. If significant over-enrollment occurs in selected courses, the Registrar will work with the department involved so that seat availability in selected courses is capped at 25% during the next priority registration.

Eligibility for Priority Registration

Priority registration will be extended to undergraduate students who encounter unusual challenges in our registration system that inhibit their academic progress and threaten their timely graduation. It is difficult to establish an a priori definition of "unusual", but the Priority Registration Task Force has identified three groups that would be exemplars of these unusual registration challenges. Thus, these student groups are eligible to be considered for priority registration if the students in the group meet any of the following conditions:

- The student engages in an activity that formally represents the University and by virtue of that representation is required to attend practices and events during hours in which classes are offered (e.g., varsity athletes during a semester in which the student's practice obligation is at the NCAA maximum of 20 hours per week);

- The student is enrolled in a degree program requiring that at least one semester be spent off campus (e.g., student teaching), that specific courses in Arts and Sciences be successfully completed in order to obtain licensure (e.g., Education majors), or that requires significant time be devoted to clinical practice (e.g., nursing, allied health, etc); or

- The student has a disability for which priority registration is an approved accommodation.

Other groups that may have comparable registration challenges may be proposed for priority registration by an official who has responsibility for their program (e.g., a Dean, Director, or Department Chair), and these groups will be reviewed by the PRAC. Individual students may not apply directly to the Registrar for priority registration.

Corey,
Since these nominations are based on academics AND ATHLETIC performance, I am sending the academic information to you as I cannot be the judge on the athletic aspect.

If you want me to submit all the names that's fine with me.
Please advise.....
Thanks.
cr

Subject: Su I class schedule
Attach: Text.htm; ath_athlete course breakdown-su i.pdf

I am attaching the current SU I session of classes.
Beth Bridger will send you the most updated tutoring/review schedule we currently have by the end of the day.

PLEASE NOTE: Depending on GRADES and ELIGIBILITY status, we may have to change some classes. As usual, many grades are not up on the system until the day or two (maybe) BEFORE THE SUMMER I SESSION BEGINS. As a consequence, we will not know the FINAL GPA until all grades are posted. We do not control this, so you will need to be flexible (like us) with the time frame that we are given by the faculty.
As we update both classes and review sessions, we will send the templates over to you so that you can make adjustments. Thank you for your continued patience.....

If you have any questions, please let me know.
cynthia

The gap in our economy is between what we have and what we think we ought to have - and that is a moral problem, not an economic one.

Major recruiting tool: “Concierge-style” academic support

The growth industry in big-time college athletics is academic support.

It was just four years ago that we posted a Clips summary of a lengthy New York Times feature about a 16-year old man-child named Michael Oher, a 320-pound left tackle with all the God-given gifts – size, strength, speed, quickness – to protect QBs from the next generation of Lawrence Taylors.

A shoo-in to be a star on a college football field, Oher seemed destined to be a star on Mississippi's football team and a failure in its classrooms.

Oher was the son of a crack-addicted single mom, he could barely read as a teenager, and he shuffled through 11 schools in nine years.

Nonetheless, with some, er, energetic and, ah, creative tutoring and high school correspondence courses (all within the rules, mind you), Oher was accepted into the University of Mississippi.

And now – drum roll please -- at a school that graduates fewer than 60% of all students within six years, Oher has cleared every hurdle and is on track to graduate in just four years.

Oher’s story speaks volumes about the state of big-time college athletics.

Like thousands of student-athletes, Oher benefited from tutoring help and comprehensive academic support services. At Ole Miss, 14 full-time academic support staffers work with student-athletes. More than 60% of the Rebels' 390 athletes receive at least some tutoring, and together they averaged about 1000 sessions a week, in just the fall season.

Many schools spend more than $1 million annually on academic support, with some spending hundreds of thousands of dollars more in 2008 than they did in 2004, the AP found. Eight BCS schools reported spending increases of more than 70% percent in the last five years. Four — South Florida, Illinois, Georgia and Kansas — more than doubled spending.

Helping athletes graduate has become its own academic profession. The National Association of Academic Advisors for Athletics (NAAA) has nearly doubled its membership to around 1000 in just two years.

Some example of investments in academic support:

Ole Miss: a one-year old $5 million renovation to its 23,500 square-foot center.

Mississippi State: a brand new $10 million building.

South Carolina: a new $13 million facility.

Oregon: a new, three-story center is in the planning stages.

Oklahoma: a $7.5 million, 30,000 s.f. facility, plus $2.45 million helping athletes last year.

Amounts spent on helping student-athletes: Florida ($1.67 million), Texas ($1.90 million), Ohio State ($1.89 million), Kentucky ($1.86 million), Tennessee ($1.83 million), Georgia ($1.77 million).

Some say that concierge-style academic support for athletes is unfair because it is not available to the general student population. Others say that when schools recruit underprepared students, and demand thousands of hours of practice and travel time, they owe them extra help. Take your pick.

"It grates," said Kenneth Holum, a University of Maryland professor and chair of the faculty senate. "Why are the athletes more deserving than other students? We try hard to give all the students an equal chance to profit from the material we're providing them, and other students don't have this opportunity."

Oversight is a $64,000 question. Whom do the academic advisers work for? The players? Coaches? The school?

Said Nathan Tublitz, a University of Oregon neuroscientist who works with the Coalition on Intercollegiate Athletics, "It's a straightforward potential conflict of interest." Since programs need athletes to stay eligible, "it's in their best interest to find advisers to make sure they will be eligible, whether they do it the right way or the wrong way," he said.

Other critics say that enhanced academic services contribute to the isolation and "clustering" of student-athletes in certain courses and majors.

Says David Ridpath Ohio University professor, and head of The Drake Group, "The big problem with these academic centers for me is very clear . . . . . The goal is to keep the kids eligible, and there's a big difference between keeping kids eligible and helping them get a viable college education."

More later . . . . . .

This 653 word summary – with attendant commentary – was distilled by College Clips Editor Nick Infante from a 2458 word article entitled "Schools invest in athletes' degrees" by Chris Talbott, from an AP feed on 12-20-08.

The source article can be accessed in its entirety at:

PASS BOOK CHECK

Purpose: *The purpose of reviewing the PASS Book each week with your at-risk students is to have a conversation and working knowledge about the upcoming academic week. This will help you see the "big picture" for these students along with the information from your weekly reports. As noted by our Dean of Students, Dean Sauls, time management is a crucial tool to academic success and avoiding Honor Court situations.*

Students in study table (all Freshmen and Upperclassmen under a 2.3 GPA) are required to fill out their PASS Books.

Upperclassmen do their PASS Book on Fridays
Freshmen do their PASS Book on Sundays

Best day to "check" the PASS Book is Monday as you will then talk with them at the start of the week they have planned for on Friday/Sunday.

1. Check the Green Grade Tracker Sheets for any updated grades
2. Check the Blue Weekly Planning Sheets for the following:
    a. Any upcoming quizzes, tests, papers, projects
    b. Required course readings
    c. "Extra" reminders from the Academic Staff
        i. Advising Appointments
        ii. Professor Office Hours
        iii. Tutor sessions
        iv. Plays/Required Course Events
3. Sign and Date the bottom of Blue Weekly Planning Sheet each week

Subject: NCAA Degree Completion Program

Attach: TEXT.htm

Coaches:

The nominations for the NCAA Degree Completion Program are now available to former student-athletes via the NCAA website. I bring this to your attention in hopes to solicit some names of former student-athletes that have exhausted their eligibility but are still pursuing their undergraduate degree.

The NCAA established this program to assist student-athletes who have exhausted their eligibility for institutional financial aid (in five years). Applicants must have completed eligibility for athletics-related aid at a Division I member institution before applying and must be within 30 semester hours of their degree requirements.

Student-athletes receiving the award will receive an amount equivalent to tuition and fees, and they will also receive a book allowance based on the number of hours in which they are enrolled.

Please contact me or your Academic Counselor with questions or potential applicants.
Below are the official requirements:
To be considered for this award, the student-athlete must have completed eligibility at an NCAA Division I member institution; enrolled originally in or before January 2007; exhausted institutional eligibility for athletics-related aid (five years) and be within 30 semester hours or 45 quarter hours of completing an undergraduate degree.

All of the applications are reviewed by a committee of representatives from seven NCAA Division I member institutions. Funds ordinarily allow awards to be made to less than one-half of the applicants. Therefore, it is important to stress to your students that they must fill out the application completely and provide supporting documents in order to be considered for this award.

The completed application and supporting documents must be mailed to me at the national office and be postmarked no later than September 23. The committee will make its decisions on funding by October 31.

Subject: Week 1 kickoff stats

Attach: TEXT.htm; image001.gif; image002.gif; 2007 ACC Football Kickoff Stats Comparison.xls

---

In light of the kickoff rule changes for this season, we thought we would start tracking some cumulative conference stats on this play. Attached is what we tracked this week. For next week and beyond, we will determine a baseline comparison number from last year's stats, but at least wanted to get you what we have at this point. If there are other specific aspects of this report you would like to see in future weeks, please let me know and we will make every effort to accommodate.

Thank you. Have a great week.

The 2007 Dr Pepper ACC Championship Game will be played on Saturday, December 1st in Jacksonville Municipal Stadium at 1pm on ABC

ATLANTIC COAST CONFERENCE

OFFICE OF THE COMMISSIONER

FOR IMMEDIATE RELEASE
Wednesday, December 12, 2007

ACC Announces Future Sites for Football Championship Game

GREENSBORO, NC—The Atlantic Coast Conference has awarded its future Football Championship Games to Tampa Bay and to Charlotte, John Swofford, the Commissioner of the ACC, announced Wednesday.

Swofford announced that the league has awarded its football title game to Tampa Bay for the 2008 and 2009 seasons and to Charlotte for the 2010 and 2011 seasons. The decision was reached unanimously Wednesday morning on a conference call of the league's athletics directors and faculty athletics representatives which culminated a seven-month bid and selection process which began last June.

The sequencing of the cities was largely influenced by a city-wide convention in Charlotte in 2008, which limited access to key Uptown hotels and ancillary event areas. The awarding of the Championship Game for four years allowed the Conference to meet each city's request to host the event for a consecutive two-year period.

"We are extremely excited about the future of the ACC Football Championship game at these sites," said Swofford. "Both Tampa Bay and Charlotte are tremendous destinations in terms of their football venue, community support and partnership with the Atlantic Coast Conference. Both locations have outstanding leadership as well as surrounding communities that have embraced the opportunity to continue the growth of our championship game."

The ACC's Football Championship Games on December 6, 2008 and December 5, 2009 will be held at Raymond James Stadium, home of the Tampa Bay Buccaneers of the National Football League, the Outback Bowl, as well as Super Bowls XXXV (2001) and XLIII (2009).

MEDIA RELATIONS & VIDEO SERVICES (336) 851-6062 • MEDIA RELATIONS FAX (336) 854-8797 • ADMINISTRATION FAX (336) 316-6097

"We are excited about the opportunity to not only host, but to also grow this game to a level that's befitting of the Atlantic Coast Conference," said Jeff Adams, Chairman of the Tampa Bay Sports Commission. "Based on the overwhelming support we have received from the Tampa Bay community, we are confident that we will meet and exceed the ACC's expectations."

The Conference's title games on December 4, 2010 and December 3, 2011 will be held at Bank of America Stadium, home of the NFL's Carolina Panthers and the Meineke Car Care Bowl.

"Charlotte is delighted to have been chosen to host the 2010 and 2011 ACC Football Championship Games," said Tim Newman, CEO of the Charlotte Regional Visitors Authority.

"With many amenities coming on line by 2010 including the NASCAR Hall of Fame and several new hotels and entertainment venues within walking distance of Bank of America Stadium, ACC fans will have a great time in Charlotte for those games.

"We wish Tampa Bay much success for 2008 and 2009 and look forward to bringing the Championship to a great centralized location for all ACC Fans in 2010 and 2011. Many fans will get a preview of what Charlotte now offers when we host the 2008 ACC Men's Basketball Championship next March."

The first three Dr Pepper ACC Football Championship Games were held in Jacksonville, Fla. Ticket information for the 2008 Dr Pepper ACC Football Championship Game can be found by visiting www.accchampionship.com. --ACC--

From: Mike Finn, Associate Commissioner, Football Media Relations

Re: 2007 Football ACC All-Academic Team

Date: January 10, 2008

Attached are the nomination forms for the 2007 Football All-Academic Teams. The All-ACC Academic Teams are based on a combination of the student-athlete's academic achievement and athletic performance.

Nominate any player who achieved a minimum 3.00 grade-point average for his/her last semester/quarter and has at least a cumulative 3.00 GPA for his/her career.

Starting this academic year, the all-academic teams for both the fall and winter sports will be solely based on the student-athlete's academic performance through the fall semester; whereas, in the past, the winter sports student-athlete's performances have been based on both the fall and winter semesters.

The reason for the change was due to the winter sports' (basketball, wrestling, track and swimming and diving) previous summer announcements lacked impact and media exposure.

The All-ACC Academic teams for the fall sports will be announced at their regular schedule in late January. The All-ACC Academic teams for the winter sports will be announced in late February.

The All-ACC Academic team nomination forms are attached.

If you wish to submit your form electronically, please be sure to save the document before sending it via email to ensure that the information you entered is not lost. You may also print the completed form out and submit your nominations via fax (336-369-1211). Once nominations are received the All-ACC Academic Teams will be selected by a committee appointed by the Commissioner.

Once nominations are received the All-ACC Academic Teams will be selected by a committee appointed by the Commissioner. The deadline for All-Academic teams and Scholar Athletes of the Year will be Friday, January 25, 2008.

Memorandum

TO: ACC Head Football Coaches

FR: Mike Finn, ACC

RE: 2010 Dr Pepper ACC Football Championship Game Weekend

DA: November 19, 2010

CC: John Swofford

Michael Kelly

ACC Athletics Directors

ACC Football Operations Directors

ACC Sports Information Directors

With the 2010 Dr Pepper Atlantic Coast Conference Football Championship Game approximately two weeks away I wanted to remind you of your responsibilities, should your team qualify to play the ACC Championship Game, or should you or one of your players be chosen any of the following ACC Football Awards by the Atlantic Coast Conference Media Association (ACSMA) or by the Conference itself:

1. ACC Coach of the Year
2. ACC Offensive, Defensive and Overall Rookie of the Year
3. ACC Offensive, Defensive and Overall Player of the Year
4. The ACC Jacobs Blocking Trophy (top blocker in the ACC)
5. The Jim Tatum Award (top football scholar-athlete)
6. The Brian Piccolo Award (most courageous football student-athlete)

ACC Awards Winners, Friday, Dec. 3, ACC Night of Legends, 6-10 pm

If you or one of your players are chosen for any of the above awards, they will need to appear at the ACC Night of Legends which will be held on Friday, December 3 at the Charlotte Convention Center, beginning at 6 pm. The ACC will pay for transportation and hotel costs and we would strongly suggest the award winners be in Charlotte by noon on Friday if possible. Allison Doughty (adoughty@theacc.org; 336-854-8787, ext. 265), Associate Director of Football Operations, will contact you or your Sports Information Director to make travel arrangements on Sunday, November 28, or as soon as the voting on the Awards are complete. You or your player are invited to be in Charlotte for the entire weekend and, if available, would be introduced to the Bank of America Stadium crowd during the Championship Game on Saturday, but your lone obligation is to be present or to make sure your player is present for the Night of Legends on Friday. We would encourage you to accompany your player to the Night of Legends as well. Ground transportation and a host will be provided to each coach and player by the Charlotte Local Organizing Committee. If you are not participating in the Championship Game your hotel accommodations will be at the Championship Headquarters which is the Charlotte Westin Hotel at 601 South College Street in Charlotte, 28202 (704-375-2600).

Should your team be in the Championship Game please be aware of the following responsibilities:

Sunday, Nov. 28-Coaches Teleconference, 4 pm

You will take part in a Media Teleconference for the Championship Game on Sunday, Nov. 28. The Head Coach of the Coastal Division champion will be on the call from 4-4:30 pm, while the Atlantic Division Champion Head Coach will be on the call from 4:30-5 pm

Monday, Nov. 29-Players Teleconference, 11:30 am

Three of your prominent, starting players will need to be available for a Teleconference with the media on Monday,

Nov. 29 at the following times:

11:30-11:38 am-Coastal Division Player One

11:38-11:46 am-Coastal Division Player Two

11:46-11:54 am-Coastal Division Player Three

11:55-12:03 pm-Atlantic Division Player One

12:03-12:11 pm-Atlantic Division Player Two

12:11-12:19 pm-Atlantic Division Player Three

Friday, Dec. 3-Dr Pepper ACC Championship Game Press Conference, 1 p.m.

Both participating head coaches will take part in the Championship Game Press Conference, which will be held in the Panthers Auditorium of Bank of America Stadium, and which will begin at 1 pm and will end at 2 pm. From 1 p.m. until 1:30, the Coastal Division Head Coach will be with the print and electronic media, while the Atlantic Division Head Coach will be interviewed by ESPN and the ACC Network. From 1:30 until 2 pm, the Atlantic Division Head Coach will be with the print and electronic media and the Coastal Division Head Coach will be interviewed by ESPN and the ACC Network.

Friday, Dec. 3-Team practices at Bank of America Stadium Stadium, 2:20-4:30 p.m.

Pre-Game practice at Bank of America Stadium is optional. However, should you choose to have a practice, the first 15 minutes of the practice will be open to media still and video photographers.

Saturday, Dec. 4-Dr Pepper ACC Championship Post-Game Press Conference

After the game, the winning coach and team will remain on the field to accept the ACC Championship Game Trophy from Commissioner Swofford. Due to the late starting time of the Championship Game and while waiting for the Awards Presentation to be set up, the winning football coach will be interviewed by a "pool reporter" on the field following his post-game interview for broadcast television. Mike Hogewood of the ACC Network will serve as the "pool reporter." This interview will be relayed live into the media work room and the media interview room for media who are writing on deadline. After the awards ceremony, the winning coach and team will head to the locker room for a 10-minute "cooling-off" period. Following the "cooling off" period for the losing team, the coach and one player will appear in the interview area (Panthers Auditorium) for a 10-minute interview session. The winning coach and two players will then follow immediately thereafter. Designated players from both teams will be made available to the media in designated areas adjacent to the respective team locker rooms.

Please Note:

Regardless of any personal regular-season radio or television contracts, the coach is first obligated to the entire media staffing the championship game and must report to then interview room immediately after the 10-minute cooling-off period. The coach cannot delay a post game interview with the covering media to conduct a program for a single, radio, newspaper, television or internet reporter unless requested to grant a short interview (not to exceed four minutes) by ABC/ESPN. After fulfilling this commitment to the entire media covering the game, the coach and player may participate in special interviews.

Failure to comply with these rules and regulations may subject the coach and/or institution to a fine by the Commissioner.

Should you have any questions regarding any of the above, please feel free to contact me (336-316-6091; mfinn@theacc.org), Michael Kelly (336-854-8787, ext. 270; mkelly@theacc.org) or Allison Doughty (336.854.8787 ext. 265; adoughty@theacc.org) at the Conference Office.

Subject: IMPORTANT: Amateurism Clearinghouse Update - Request for Final Certification

---

Coaches,
I have an update from the Amateurism Clearinghouse. Please contact all of your prospects right away to inform them that they must return to the Clearinghouse website to finalize their answers to the amateurism questionnaire and to formally request a final amateurism certification in order for a final certification decision to be made.

After April 7 the Clearinghouse began issuing final amateurism certification decisions for those prospects who have made the request. Prospects need to log in with their personal identification number and check the box titled Final Authorization for amateurism certification. Prospects who have not registered with the Clearinghouse as of today, will be able to request a final certification immediately upon completion of the amateurism questionnaire. It is the prospects responsibility to log in to their record and complete this step. It is important to note that NO final amateurism certification will be rendered without the prospects request. The sooner they take care of this, the sooner this step in the initial eligibility certification process will be behind us, (although, we, as an institution, must continue to monitor their amateur status until they arrive for the fall semester). Please inform them that once they make the request for a final cert, they can no longer make changes or additions to their amateurism questionnaire. That being said, it is important for them to update/include all of their participation information at this time.

Shoshanna has been sending you weekly status reports with notes regarding your prospects who still need to complete the questionnaire as well as those who need to adjust their answers as instructed. Hopefully you are finding this helpful and that you are contacting your prospects with this information. We will continue to update you on final certifications that become available in the near future.

If you have any question about this, please let me know. Remember that this is a new process, and like any new process it will have its fair share of kinks to work through that could take some time. With that being, all the more reason to have your prospects jump on this as soon as possible.

Thank you very much for your prompt attention to this important matter for the eligibility of your prospects.

Subject: Prospect Form

Attach: TEXT.htm; Athlete Prospect Form.doc

Dear All,

I hope everyone is well. I'm writing with a quick reminder about your prospect lists. If you have not already done so, please get your lists to me (mpyecha@admissions.unc.edu<mailto:mpyecha@admissions.unc.edu>) by November 1. We want to make sure your students are well identified as we begin to read applications for the 2008 entering class.

Also, the faculty committee will be meeting on October 29 to review committee cases for the early signing period. If you have a prospect that is a definite, or potential, committee case, please talk with John Blanchard ASAP. The October 29 meeting is the only one currently schedule prior to November signing so we want to make sure everyone/thing is covered.

If you have any questions, please let me know.

Thanks! - Missy

Coaches,

Attached is the updated summary of all transcript reviews that we've done for the class of 2011. You should have received a copy of each individual recruit in your area. If you have not received it or would like another, please let me know so that I can get you one.

I'll send out another update after you return with additional transcripts from this final week of spring recruiting.

Subject: Admissions Update

Attach: TEXT.htm

Dear All,

I hope everyone is enjoying the summer and finding a little time for some much deserved R and R.

Even as the summer heats up (literally), we are preparing for the 2011-2012 application year. With that in mind, I write to update you on a few changes in the admissions process and in the way our staff will work with you during the coming year.

The Application
As you may/not have heard, we have joined the Common Application Organization and, as members, will be using the Common Application this year. All first year and transfer applicants, except those applying for a health affairs program, will apply with either the Common Application or the CFNC application. We will no longer have the UNC-only application. Students can visit our web site, www.admissions.unc.edu<http://www.admissions.unc.edu>, to find links to these application sites or they can go directly to the sites. The address for the Common Application is www.commonapp.org<http://www.commonapp.org>. The address for CFNC is www.cfnc.org<http://www.cfnc.org>. Either application is fine with us, although most of your out-of-state recruits will be more familiar with the Common Application. Applications should be submitted electronically, although both sites offer the student the option of downloading an application form. Please let us know if you have a recruit who is interested in applying for one of the public health majors and we□ll provide you with the information for that application.

Application Fee
The application fee is now $80.00. As always, we will happily accept a few waiver request submitted by the student□s counselor. Transfer students may request that someone in their current school□s financial aid office submit the waiver request on their behalf.

Application Deadlines
We anticipate an increase in the number of applications we will receive this year as a result of our joining the Common Application. In order to accommodate this increase, we have adjusted our application deadlines. The new deadlines and notification dates are as follows:

Early action:	Deadline of October 15 and notification on/around January 30
Regular deadline:	Deadline of January 5 and notification on/around March 23

Prospect Form
Attached is an updated version of the prospect form and we ask that you begin using the attached in lieu of the former version. We have made a few minor changes to the form. The most significant change can be found above the signature line. There you will find a place to indicate if you would like us to send a pre-admit letter. We will ONLY send that letter if you check □yes□ to this question. Also, please note the following message at the top of the form:

THIS FORM MUST BE COMPLETED ELECTRONICALLY. HANDWRITTEN FORMS WILL BE RETURNED TO THE SUBMITTING COACH AND WILL NOT BE PROCESSED FOR REVIEW. INCOMPLETE FORMS WILL ALSO BE RETURNED FOR COMPLETION.

Having a completed form that is legible is essential!!!!

Committee Case Definition
We are now considering the SAT writing section in our admissions decisions for all applicants. With that in mind, we are adding this test component to the official committee case definition. Any one of the following SAT scores will result in the student being an official committee case: critical reading score below 420, a writing score below 420, a math score below 400 or a combined critical reading and math score below 900.

Admissions Staffing
As many of you know, Herb Davis, one of our associate directors, retired at the end of May. Rather than hire someone to take over Herb□s role, we have consolidated and reassigned responsibilities. Kyle has assumed increased responsibilities in our office and will no longer be the contact for any specific team. He will, however, continue to work closely with us in the early evaluation and review of transfer students. I will once again be the contact for all teams. Missy will retain her role in working with Lance and being available to assist in a variety of other ways. These changes are now in effect.

I apologize for the length of this message but wanted to pass all of this information on to you as quickly as possible. We are working with John and Beth to identify the earliest available time we can meet with you to answer your questions and address your concerns. In the meantime, please feel free to either call, email or stop by for a visit if you have questions about these changes or anything else related to admissions.

Enjoy what is left of the summer. I look forward to seeing you soon.

Subject: RE: Admissions Prospect Form

Attach: TEXT.htm

Dear Phil, (with a copy to other coaches)
Thanks for the question. It□s definitely a good one!
Leaving the middle name blank does not make the form incomplete. In some cases the student may not have a middle name or prefers not to use it. As long as we have the address, date of birth, email, parent alum, disciplinary action information, education information, sport, responses to the □other questions□ and signature, the form will be considered complete.
A quick additional note about the disciplinary information: I know that in the early stages of learning about a prospect you may not have had the opportunity to learn about the student□s disciplinary record. If you are indicating that you are unsure about providing a slot, you may submit the prospect form with the disciplinary question unanswered. At the time you wish to provide a slot, however, we do need the answer to the disciplinary/criminal/legal action question.
Thanks, again, for asking.

Hi Barbara,

Hope you had a good summer...does leaving the middle name section "blank" make the Athlete Prospect Form "incomplete"? Thanks. -Phil

Dear All,

I hope everyone is enjoying the summer and finding a little time for some much deserved R and R.

Even as the summer heats up (literally), we are preparing for the 2011-2012 application year. With that in mind, I write to update you on a few changes in the admissions process and in the way our staff will work with you during the coming year.

The Application
As you may/not have heard, we have joined the Common Application Organization and, as members, will be using the Common Application this year. All first year and transfer applicants, except those applying for a health affairs program, will apply with either the Common Application or the CFNC application. We will no longer have the UNC-only application. Students can visit our web site, www.admissions.unc.edu<http://www.admissions.unc.edu>, to find links to these application sites or they can go directly to the sites. The address for the Common Application is www.commonapp.org<http://www.commonapp.org>. The address for CFNC is www.cfnc.org<http://www.cfnc.org>. Either application is fine with us, although most of your out-of-state recruits will be more familiar with the Common Application. Applications should be submitted electronically, although both sites offer the student the option of downloading an application form. Please let us know if you have a recruit who is interested in applying for one of the public health majors and we'll provide you with the information for that application.

Application Fee
The application fee is now $80.00. As always, we will happily accept a few waiver request submitted by the student's counselor. Transfer students may request that someone in their current school's financial aid office submit the waiver request on their behalf.

Application Deadlines
We anticipate an increase in the number of applications we will receive this year as a result of our joining the Common Application. In order to accommodate this increase, we have adjusted our application deadlines. The new deadlines and notification dates are as follows:

Early action:	Deadline of October 15 and notification on/around January 30
Regular deadline:	Deadline of January 5 and notification on/around March 23

Prospect Form
Attached is an updated version of the prospect form and we ask that you begin using the attached in lieu of the former version. We have made a few minor changes to the form. The most significant change can be found above the signature line. There you will find a place to indicate if you would like us to send a pre-admit letter. We will ONLY send that letter if you check "yes" to this question. Also, please note the following message at the top of the form:

THIS FORM MUST BE COMPLETED ELECTRONICALLY. HANDWRITTEN FORMS WILL BE RETURNED TO THE SUBMITTING COACH AND WILL NOT BE PROCESSED FOR REVIEW. INCOMPLETE FORMS WILL ALSO BE RETURNED FOR COMPLETION.

Having a completed form that is legible is essential!!!!

Committee Case Definition
We are now considering the SAT writing section in our admissions decisions for all applicants. With that in mind, we are adding this test component to the official committee case definition. Any one of the following SAT scores will result in the student being an official committee case: critical reading score below 420, a writing score below 420, a math score below 400 or a combined critical reading and math score below 900.

Admissions Staffing
As many of you know, Herb Davis, one of our associate directors, retired at the end of May. Rather than hire someone to take over Herb's role, we have consolidated and reassigned responsibilities. Kyle has assumed increased responsibilities in our office and will no longer be the contact for any specific team. He will, however, continue to work closely with us in the early evaluation and review of transfer students. I will once again be the contact for all teams. Missy will retain her role in working with Lance and being available to assist in a variety of other ways. These changes are now in effect.

I apologize for the length of this message but wanted to pass all of this information on to you as quickly as possible. We are working with John and Beth to identify the earliest available time we can meet with you to answer your questions and address your concerns. In the meantime, please feel free to either call, email or stop by for a visit if you have questions about these changes or anything else related to admissions.

Enjoy what is left of the summer. I look forward to seeing you soon.

Subject: Admissions Update

Attach: TEXT.htm

Dear All,

As you review your weekly reports you may begin to see the following notation in our comment section: PALR. That simply lets us know that you have requested a pre-admit letter. Don□t be too concerned if it does not appear for everyone for whom you have requested a letter. We are in the process of updating the records and have not quite gotten through the entire list yet. It should, however, be there by the time the reports run next week. In addition, we will continue to note if the pre-admit letter is actually being mailed and the date it is being mailed. If you have requested a letter but we cannot send it for some reason, that will be explained in the comments section.

You may also see □No slot/pre-admit requested□. That is simply an easy/quick way for us to note whether a letter has been requested. There is no additional impact on that student□s review. If the situation changes and you would like to request a pre-admit letter, just send an email to Missy and me and we will get the letter in the mail or explain why we cannot send one.

As a reminder, when submitting a prospect form, please include the student□s full name and the one email address the student wants to use in the admissions process. Without these pieces of information, we cannot guarantee that we will be able to identify the correct student. In addition, as you review the reports, please let us know if you see students listed who you are no longer recruiting. Once they have been identified, you will see the □NLR□ notation in our comments.

We have also had a change in the review of committee cases. After much discussion, the committee has decided that we may remove cases from committee consideration. This will be done just as it has been done in the past, on a case-by-case basis. As this happens, the appropriate note will be added to the comments section of the report. While we will use discretion in removing cases, we will not remove anyone who is MCR or MAR deficient.

I will be away from the office October 25-30 but will be available by email. If you need us for anything, please feel free to send me an email or contact Missy.

Please let me know if you have any questions/concerns. Thanks and have a great, winning weekend!

Barbara

Subject: RE: NFLPA rule
Attach: TEXT.htm; UAAA.pdf; 1988 Kentucky statute.pdf; 1988 Florida statute.pdf; 1989 Oklahoma statute.pdf

---

Coach Davis,

There doesn't seem to be anything like that to ever come from the NCAA or the NFLPA. It wasn't until the NFLPA put in their current rule in 2007 that either organization limited contact with currently enrolled student-athletes.

The most likely source of that type of prohibition is a past state statute. Most states have not adopted the Uniform Athlete Agents Act (UAAA) - see attached - to make things as consistent as possible. But back in the late 1980's, there seemed to be a run on individual states putting their own laws in to place regarding sports agents.

I've found the different restrictions for three of them from around that time - Oklahoma, Florida, and Kentucky - and they all vary slightly in what kind of contact agents can have with student-athletes prior to exhausting eligibility. For instance, Kentucky prohibited any kind of contact until after they exhausted while Florida did not. Oklahoma was actually in the middle because they prohibited contact until after exhausting except for a university overseen interview period prior to the student's final season.

If you need anything else, just let us know. Thanks!!

Lance

>>> <butchdavis@uncaa.unc.edu> 7/23/2010 2:29 PM >>>

Lance:
There was a one time a rule that make it completely illegal for players to talk to agents. When specifically did this rule change? Also, look into any legislation that prohibits financial planners from talking to college student-athletes no matter their year/age.
Thanks!

Subject: NFLPA rule

Corey and Kevin,

The rule that prohibits agents from having contact with players until after their junior year is actually an NFLPA rule and it went in to effect in 2007. It sounds like the rule change came about partly due to pressure from college coaches, according to one thing I found. The NCAA doesn't have anything that prohibits interaction between the two parties.

Attached is a document from the NCAA that goes in to the do's and don'ts of the NFLPA's regulations. If you need anything else, just let us know. Thanks!!

Lance

N.C. Gen. Stat. §§ 78C- 85-105 (2003)

Article 9.
Uniform Athlete Agents Act.

§ 78C-85. Title.

This Article may be cited as the "Uniform Athlete Agents Act". (2003-375, s. 2.)

§ 78C-86. Definitions.

The following definitions apply in this Article:

(1) Agency contract. - An agreement in which a student-athlete authorizes a person to negotiate or solicit on behalf of the student-athlete a professional-sports-services contract or an endorsement contract.

(2) Athlete agent. - An individual who enters into an agency contract with a student-athlete or, directly or indirectly, recruits or solicits a student-athlete to enter into an agency contract. The term includes an individual who represents to the public that the individual is an athlete agent. The term does not include a spouse, parent, sibling, or guardian of the student-athlete or an individual acting solely on behalf of a professional sports team or professional sports organization.

(3) Athletic director. - An individual responsible for administering the overall athletic program of an educational institution or, if an educational institution has separately administered athletic programs for male students and female students, the athletic program for males or the athletic program for females, as appropriate.

(4) Contact. - A communication, direct or indirect, between an athlete agent and a student-athlete to recruit or solicit the student-athlete to enter into an agency contract.

(5) Endorsement contract. - An agreement under which a student-athlete is employed or receives consideration to use on behalf of the other party any value that the student-athlete may have because of publicity, reputation, following, or fame obtained because of athletic ability or performance.

(6) Intercollegiate sport. - A sport played at the collegiate level for which eligibility requirements for participation by a student-athlete are established by a national association for the promotion or regulation of collegiate athletics.

(7) Person. - An individual, company, corporation, partnership, association, or any other legal or commercial entity.

(8) Professional-sports-services contract. - An agreement under which an individual is employed or agrees to render services as a player on a professional sports team, with a professional sports organization, or as a professional athlete.

(9) Record. - Information that is inscribed on a tangible medium or that is stored in an electronic or other medium and is retrievable in perceivable form.

(10) Registration. - A certificate issued by the Secretary of State evidencing that a person has satisfied the requirements of an athlete agent pursuant to this Article.

(11) Student-athlete. - An individual who engages in, is eligible to engage in, or may be eligible in the future to engage in any intercollegiate sport. If an individual is permanently ineligible to participate in a particular intercollegiate sport, the individual is not a student-athlete for purposes of that sport. (2003-375, s. 2.)

§ 78C-87. Service of process; subpoenas.

(a)By acting as an athlete agent in this State, a nonresident individual appoints the Secretary of State as the individual's agent for service of process in any civil action in this State related to the individual's acting as an athlete agent in this State.

(b) The Secretary of State may issue subpoenas for any material that is relevant to the administration of this Article. (2003-375, s. 2.)

§ 78C-88. Athlete agents; registration required; exceptions; void contracts.

(a)Except as otherwise provided in this section, an individual may not act as an athlete agent in this State without holding a certificate of registration under G.S. 78C-90 or G.S. 78C-92.

(b) Before being issued a certificate of registration, an individual may act as an athlete agent in this State for all purposes except signing an agency contract if: (i) a student-athlete or another person acting on behalf of the student-athlete initiates communication with the individual; and (ii) within seven days after an initial act as an athlete agent, the individual submits an application for registration as an athlete agent in this State.

(c) A North Carolina licensed and resident attorney may act as an athlete agent in this State for all purposes without registering pursuant to this section if the attorney neither advertises directly for, nor solicits, any student-athlete by representing to any person that the attorney has special experience or qualifications with regard to representing student-athletes and represents no more than two student-athletes.

(d) An agency contract resulting from conduct in violation of this section is void, and the athlete agent shall return any consideration received under the contract. (2003-375, s. 2.)

§ 78C-89. Registration as athlete agent; form; requirements.

(a)An individual seeking registration as an athlete agent shall submit an application for registration to the Secretary of State in a form prescribed by the Secretary of State. The application must be in the name of an individual and, except as otherwise provided in subsection

(b) of this section, signed or otherwise authenticated by the applicant under penalty of perjury and must state or contain the following:

(1) The name of the applicant and the address of the applicant's principal place of business.
(2) The name of the applicant's business or employer, if applicable.
(3) Any business or occupation engaged in by the applicant for the five years immediately preceding the date of submission of the application.
(4) A description of the applicant's: a. Formal training as an athlete agent. b. Practical experience as an athlete agent. c. Educational background relating to the applicant's activities as an athlete agent.
(5) The names and addresses of three individuals not related to the applicant who are willing to serve as references.
(6) The name, sport, and last known team for each individual for whom the applicant acted as an athlete agent during the five years immediately preceding the date of submission of the application.
(7) The names and addresses of all persons who are: a. With respect to the athlete agent's business if it is not a corporation, the partners, members, officers, managers, associates, or profit-sharers of the business. b. With respect to a corporation employing the athlete agent, the officers, directors, and any shareholder of the corporation having an interest of five percent (5%) or greater.
(8) Whether the applicant or any person named under subdivision (7) of this subsection has been convicted of a crime that, if

committed in this State, would be a crime involving moral turpitude or a felony and identify the crime.

(9) Whether there has been any administrative or judicial determination that the applicant or any person named under subdivision (7) of this subsection has made a false, misleading, deceptive, or fraudulent representation.

(10) Any instance in which the conduct of the applicant or any person named under subdivision (7) of this subsection resulted in the imposition of a sanction, suspension, or declaration of ineligibility to participate in an interscholastic or intercollegiate athletic event on a student-athlete or educational institution.

(11) Any sanction, suspension, or disciplinary action taken against the applicant or any person named under subdivision (7) of this subsection arising out of occupational or professional conduct.

(12) Whether there has been any denial of an application for, suspension or revocation of, or refusal to renew the registration or licensure of the applicant or any person named under subdivision (7) of this subsection as an athlete agent in any state.

(b) An individual who has submitted an application for registration or licensure as an athlete agent in another state or who holds a certificate of registration or licensure as an athlete agent in another state may submit a copy of the application and certificate in lieu of submitting an application in the form prescribed pursuant to subsection (a) of this section. The Secretary of State shall accept the application and the certificate from the other state as an application for registration in this State if the application to the other state satisfied all of the following criteria:

(1) Was submitted in the other state within six months immediately preceding the submission of the application in this State and the applicant certifies that the information contained in the application is current.

(2) Contains information substantially similar to or more comprehensive than that required in an application submitted in this State.

(3) Was signed by the applicant under penalty of perjury.

(c) An application filed under this section is a "public record" within the meaning of Chapter 132 of the General Statutes. (2003-375, s. 2.)

§ 78C-90. Certificate of registration; issuance or denial; renewal.

(a) Except as otherwise provided in subsection (b) of this section, the Secretary of State shall issue a certificate of registration to an individual who complies with G.S. 78C-89(a) or whose application has been accepted under G.S. 78C-89(b).

(b) The Secretary of State may refuse to issue a certificate of registration if the Secretary of State determines that the applicant has engaged in conduct that has a significant adverse effect on the applicant's fitness to act as an athlete agent. In making the determination, the Secretary of State may consider whether the applicant has:

(1) Been convicted of a crime that, if committed in this State, would be a crime involving moral turpitude or a felony.
(2) Made a materially false, misleading, deceptive, or fraudulent representation in the application or as an athlete agent.
(3) Engaged in conduct that would disqualify the applicant from serving in a fiduciary capacity.
(4) Engaged in conduct prohibited by G.S. 78C-98.
(5) Had a registration or licensure as an athlete agent suspended, revoked, or denied or been refused renewal of registration or licensure as an athlete agent in any state.
(6) Engaged in conduct the consequence of which was that a sanction, suspension, or declaration of ineligibility to participate in an interscholastic or intercollegiate athletic event was imposed on a student-athlete or educational institution.
(7) Engaged in conduct that significantly adversely reflects on the applicant's credibility, honesty, or integrity.

(c) In making a determination under subsection (b) of this section, the Secretary of State shall consider: (i) how recently the conduct occurred; (ii) the nature of the conduct and the context in which it occurred; and (iii) any other relevant conduct of the applicant.

(d) An athlete agent may apply to renew a registration by submitting an application for renewal in a form prescribed by the Secretary of State. The application for renewal must be signed by the applicant under penalty of perjury and must contain current information on all matters required in an original registration.

(e) An individual who has submitted an application for renewal of registration or licensure in another state, in lieu of submitting an application for renewal in the form prescribed pursuant to subsection (d) of this section, may file a copy of the application for renewal and a valid certificate of

registration or licensure from the other state. The Secretary of State shall accept the application for renewal from the other state as an application for renewal in this State if the application to the other state satisfied the following:

(1) Was submitted in the other state within six months immediately preceding the filing in this State and the applicant certifies the information contained in the application for renewal is current.

(2) Contains information substantially similar to or more comprehensive than that required in an application for renewal submitted in this State.

(3) Was signed by the applicant under penalty of perjury.

(f) A certificate of registration or a renewal of a registration is valid for one year.

(g) An application filed under this section is a "public record" within the meaning of Chapter 132 of the General Statutes. (2003-375, s. 2.)

§ 78C-91. Suspension; revocation; refusal to renew registration.

(a) The Secretary of State may suspend, revoke, or refuse to renew a registration for conduct that would have justified denial of registration under G.S. 78C-90(b).

(b) The Secretary of State may deny, suspend, revoke, or refuse to renew a certificate of registration or licensure only after proper notice and an opportunity for a hearing in accordance with the Administrative Procedures Act pursuant to Article 3 of Chapter 150B of the General Statutes. (2003-375, s. 2.)

§ 78C-92. Temporary registration.

The Secretary of State may issue a temporary certificate of registration while an application for registration or renewal of registration is pending. (2003-375, s. 2.)

§ 78C-93. Registration; renewal of fees.

An application for registration or renewal of registration must be accompanied by a fee in the following amount:

(1) Application for registration $200.00

(2) Application for registration based upon a certificate of registration or licensure issued by another state 200.00

(3) Application for renewal of registration 200.00

(4) Application for renewal of registration based upon an application for renewal of registration or licensure submitted in another state 200.00. (2003-375, s. 2.)

§ 78C-94. Required form of contract.

(a) An agency contract must be in a record, signed or otherwise authenticated by the parties.

(b) An agency contract must state or contain the following:

(1) The amount and method of calculating the consideration to be paid by the student-athlete for services to be provided by the athlete agent under the contract and any other consideration the athlete agent has received or will receive from any other source for entering into the contract or for providing the services.

(2) The name of any person not listed in the application for registration or renewal of registration who will be compensated because the student-athlete signed the agency contract.

(3) A description of any expenses that the student-athlete agrees to reimburse.

(4) A description of the services to be provided to the student-athlete.

(5) The duration of the contract.

(6) The date of execution.

(c) An agency contract must contain, in close proximity to the signature of the student-athlete, a conspicuous notice in boldface type in capital letters stating:

WARNING TO STUDENT-ATHLETE

IF YOU SIGN THIS CONTRACT:

(1) YOU SHALL LOSE YOUR ELIGIBILITY TO COMPETE AS A STUDENT-ATHLETE IN YOUR SPORT;

(2) IF YOU HAVE AN ATHLETIC DIRECTOR, WITHIN 72 HOURS AFTER ENTERING INTO THIS CONTRACT, BOTH YOU AND YOUR ATHLETE AGENT MUST NOTIFY YOUR ATHLETIC DIRECTOR;

(3) YOU WAIVE YOUR ATTORNEY-CLIENT PRIVILEGE WITH RESPECT TO THIS CONTRACT AND CERTAIN INFORMATION RELATED TO IT; AND

(4) YOU MAY CANCEL THIS CONTRACT WITHIN 14 DAYS AFTER SIGNING IT. CANCELLATION OF THIS CONTRACT SHALL NOT REINSTATE YOUR ELIGIBILITY.

(d) An agency contract that does not conform to this section is voidable by the student-athlete. If a student-athlete voids an agency contract, the student-athlete is not required to pay any consideration under the contract or to return any consideration received from the athlete agent to induce the student-athlete to enter into the contract.

(e) The athlete agent shall give a record of the signed or otherwise authenticated agency contract to the student-athlete at the time of execution.

(f) The waiver of attorney-client privilege does not affect those privileges between client and attorney when the attorney is not an athlete agent. (2003-375, s. 2.)

§ 78C-95. Notice to educational institution.

(a)Within 72 hours after entering into an agency contract or before the next scheduled athletic event in which the student-athlete may participate, whichever occurs first, the athlete agent shall give notice in a record of the existence of the contract to the athletic director of the educational institution at which the student-athlete is enrolled or the athlete agent has reasonable grounds to believe the student-athlete intends to enroll.

(b) Within 72 hours after entering into an agency contract or before the next athletic event in which the student-athlete may participate, whichever occurs first, the student-athlete shall inform the athletic director of the educational institution at which the student-athlete is enrolled that he or she has entered into an agency contract. (2003-375, s. 2.)

§ 78C-96. Student-athlete's right to cancel.

(a)A student-athlete may cancel an agency contract by giving notice of the cancellation to the athlete agent in a record within 14 days after the contract is signed.

(b) A student-athlete may not waive the right to cancel an agency contract.

(c) If a student-athlete cancels an agency contract, the student-athlete is not required to pay any consideration under the contract or to return any consideration received from the athlete agent to induce the student-athlete to enter into the contract. (2003-375, s. 2.)

§ 78C-97. Required records; waiver of attorney-client privilege.

(a)An athlete agent shall retain the following records for a period of five years:

(1) The name and address of each individual represented by the athlete agent.

(2) Any agency contract entered into by the athlete agent.

(3) Any direct costs incurred by the athlete agent in the recruitment or solicitation of a student-athlete to enter into an agency contract.

(b) Records required to be retained by subsection (a) of this section are open to inspection by the Secretary of State during normal business hours.

(c) Where a student-athlete enters into an agency contract regulated under this Article, the student-athlete will be deemed to waive the attorney-client privilege with respect to records

required to be retained by subsection (a) of this section, subject to G.S. 78C-94(f). (2003-375, s. 2.)

§ 78C-98. Prohibited conduct.

(a) An athlete agent, with the intent to induce a student-athlete to enter into an agency contract, shall not:

(1) Give any materially false or misleading information or make a materially false promise or representation.

(2) Furnish anything of value to a student-athlete before the student-athlete enters into the agency contract.

(3) Furnish anything of value to any individual other than the student-athlete or another registered athlete agent.

(b) An athlete agent shall not intentionally:

(1) Initiate contact with a student-athlete unless the athlete agent is registered under this Article.

(2) Refuse or fail to retain or permit inspection of the records required to be retained by G.S. 78C-97.

(3) Fail to register as required by G.S. 78C-88.

(4) Provide materially false or misleading information in an application for registration or renewal of registration.

(5) Predate or postdate an agency contract.

(6) Fail to notify a student-athlete before the student-athlete signs or otherwise authenticates an agency contract for a particular sport that the signing or authentication shall make the student-athlete ineligible to participate as a student-athlete in that sport. (2003-375, s. 2.)

§ 78C-99. Criminal penalties.

An athlete agent who violates any provision under G.S. 78C-98(a) is guilty of a Class I felony. (2003-375, s. 2.)

§ 78C-100. Civil remedies.

(a) An educational institution has a right of action against an athlete agent or a former student-athlete for damages caused by a violation of this Article. In an action under this section, the court may award costs and reasonable attorneys' fees to the prevailing party.

(b) Damages suffered by an educational institution under subsection (a) of this section include losses and expenses incurred because, as a result of the conduct of an athlete agent or former student-athlete, the educational institution was injured by a violation of this Article or was penalized, disqualified, or suspended from participation in athletics by: (i) a national association for the promotion and regulation of athletics; (ii) an athletic conference; or (iii) reasonable

self-imposed disciplinary action taken to mitigate sanctions likely to be imposed by an athletic organization.

(c) A right of action under this section does not accrue until the educational institution discovers, or by the exercise of reasonable diligence would have discovered, the violation by the athlete agent or former student-athlete.

(d) Any liability of the athlete agent or the former student-athlete under this section is several and not joint.

(e) This Article does not restrict rights, remedies, or defenses of any person under law or equity. (2003-375, s. 2.)

§ 78C-101. Administrative penalty.

The Secretary of State may assess a civil penalty against an athlete agent not to exceed twenty-five thousand dollars ($25,000) for a violation of this Article. (2003-375, s. 2.)

§ 78C-102. Uniformity of application and construction.

In applying and construing this Uniform Act, consideration must be given to the need to promote uniformity of the law with respect to its subject matter among states that enact it. (2003-375, s. 2.)

§ 78C-103. Electronic Signatures in Global and National Commerce Act.

The provisions of this Article governing the legal effect, validity, or enforceability of electronic records or signatures, and of contracts formed or performed with the use of those records or signatures, conform to the requirements of section 102 of the Electronic Signatures in Global and National Commerce Act, Pub. L. 106-229, 114 Stat. 464 (2000), and supersede, modify, and limit the Electronic Signatures in Global and National Commerce Act. (2003-375, s. 2.)

§ 78C-104. Severability.

If any provision of this Article or its application to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of this Article which can be given effect without the invalid provision or application, and to this end the provisions of this Article are severable. (2003-375, s. 2.)

§ 78C-105. Rules.

The Secretary of State may, in accordance with Chapter 150B of the General Statutes, adopt rules necessary to carry out the provisions of this Article. (2003-375, s. 2.)

Kentucky employs a seemingly much simpler solution to address agent misconduct by prohibiting any contact whatsoever with an athlete until the expiration of his collegiate eligibility. The Kentucky legislation imposes a criminal prohibition on recruiting or soliciting, directly or indirectly, a student athlete to enter into an agent contract, professional sports services contract, or other sports related contract before the student athlete's eligibility for collegiate athletics has expired (Kentucky Athlete Agents Act of 1988). The statute does not prohibit activity by agents once an athlete's eligibility has expired, and, like many of the more recent statutes, has no agent registration requirement (Cosgrove, 1990).

Nevada has also followed this current trend of choosing not to impose licensing and registration requirements on sport agents. Rather, its regulatory scheme, emphasizes the potential damage which can flow from an agent whose activities have caused a student athlete or institution to violate rules of the NCAA to which the institution is a member. Nevada became one of the first states to statutorily list the specific revenue items that may be considered in calculating a damage claim against an unscrupulous agent, including loss of television revenue, a decline in ticket sales, loss of post-season revenue, and other opportunities through which the institution would have realized revenue if the NCAA rules had not been violated (Nevada Athlete Agents Act of 1989). Tennessee has enacted similar provisions (Tennessee Athlete Agents Act of 1988).

Agent-specific legislation has not been the panacea many anticipated. States have appeared less than enthusiastic to devote their limited resources to policing legislative requirements. Not surprisingly, agents prone to abuse have ignored these statutory provisions and continued to conduct business as usual. In addition, differing state requirements have created an administrative nightmare for many honest agents doing business in several states. This, coupled with a perceived lack of enforcement, often encourages the breach of these provisions. State legislation is also criticized as being primarily designed to keep student athletes eligible and playing for state universities, rather than protecting the athletes and their future professional careers, since many classes of athletes are left unprotected by most legislative schemes. State regulatory efforts also, for the most part, create no objective standards for competency to which an agent must rise for entry into the profession. As evidenced throughout this discussion, the failure to require special training of athlete-agents is one of the major difficulties with the industry as a whole. Finally, a potentially fatal flaw of state-by-state regulation is that such laws may not pass constitutional muster. Under the commerce clause of the United States Constitution, Congress is authorized to regulate interstate and foreign commerce. The regulation of sports agents would appear to be within the federal commerce power since many agents do operate simultaneously in many different states (Dunn, 1988).

■ OTHER REGULATORY EFFORTS

Agent-specific legislation is not the only legal means used to regulate the conduct of athlete agents. Other common law or statutory remedies, while not specifically directed at agents, have been used to attempt to control their abusive conduct. For example, the common law civil remedies of breach of contract,

HeinOnline -- 2 J. Legal Aspects Sport 24 1992

and/or after the signing of a representation contract, waiting periods for valid contracts, the creation of causes of action in favor of colleges and universities for agent misconduct resulting in damages, and an abandonment or modification of the onerous registration requirements common in earlier legislative schemes (Rodgers, 1989-90).

The statement of legislative intent in the first section of the Florida statute illustrates the focus of this current legislative trend:

> The Legislature finds that dishonest or unscrupulous practices by agents who solicit representation of student athletes can cause significant harm to student athletes and the academic institutions for which they play. It is the intent of the Legislature to protect the interests of student athletes and academic institutions by regulating the activities of athlete agents which involve student athletes at colleges or universities in the state. (Florida Athlete Agents Act of 1988).

The Florida statute is arguably the most stringent in the country, as the state targets both the agent and the athlete for civil and criminal penalties for statutory violations (Rodgers, 1988-89). Indicative of the current legislative trend, the Florida statute does not, for example, prohibit contact between an athlete and an agent prior to the expiration of the athlete's collegiate eligibility. It does, however, sanction offering inducements to sign, and requires both the athlete and the agent to give notification of the signing of a representation contract prior to participating in any athletic event or within 72 hours of the signing, whichever first occurs. The athlete is given 10 days after this notification to rescind the contract. Failure to notify renders the contract void and also constitutes a criminal offense for both the athlete and the agent (Florida Athlete Agents Act of 1988). Only Florida, Iowa and South Carolina have such a provision imposing criminal sanctions on athletes for failing to give notice of signing (Rodgers, 1988-89). Florida's statute also holds the student or agent liable in damages that result to the college from an athlete's subsequent ineligibility if the student or agent fails to notify the athletic director that the student has entered into a contract (Florida Athlete Agents Act of 1988).

Other legislative schemes incorporate a variety of novel provisions which deserve some mention. The Indiana statute provides another example of notice provisions; however, in Indiana, the notice by the agent to the athletic director of the university or college involved is required 10 days prior to the execution of the representation contract (Indiana Failure to Disclose Recruitment Act of 1988). Only Georgia, Ohio and Minnesota have a similar provision requiring this prior notice (Rodgers, 1988-89).

Minnesota is one of only a few states that specifically include non-collegiate athletes within the scope of its legislation. The Minnesota statutory definition of "student athlete" includes not only current college athlete but "any individual who may be eligible to engage in collegiate sports in the future" (Minnesota Athlete Agents Act of 1988). High school athletes, for example, such as baseball or hockey players who are commonly drafted out of high school, are protected under the Minnesota statute but would not receive the same protection under most other state regulatory schemes. Only Louisiana, Maryland, Mississippi, Oklahoma, and Kentucky have similar provisions (Rodgers, 1988-89).

HeinOnline -- 2 J. Legal Aspects Sport 23 1992

Oklahoma Act requires sports agents to fill out an application and provide information concerning the sports agent's occupation, training, and experience in areas such as contracts, contract negotiation, complaint resolution, arbitration or civil resolution of contract disputes, federal income taxation, and federal estate planning.[122] Another similarity between the two acts is that the Oklahoma Act requires sports agents to file copies of the fee schedule and proposed contract with the Secretary of State.[123]

The Oklahoma Act's sanctions for violations are also similar to those of the California Act. For example, the Secretary of State may suspend or revoke a sports agent's registration for any violations of the Oklahoma Act.[124] Also, any sports agent who knowingly or intentionally violates the Act is guilty of a misdemeanor and subject to a five-hundred dollar fine, imprisonment of one year, or both.[125]

Despite many of the similarities to the California Act, the Oklahoma Act is aimed at regulating a sports agent's involvement with athletes at the amateur level. As a result, the Oklahoma Act focuses particularly on a sports agent's involvement with Oklahoma NCAA students and Oklahoma non-NCAA students.[126] For example, section 821.64(A)(6) of the Oklahoma Act is similar to section 12.3 of the NCAA Bylaws in that it focuses on a contractual agreement between a sports agent and an student-athlete in which a sports agent agrees to represent a student-athlete in negotiations with professional sports teams.[127] However, to compensate for such a provision and to help Oklahoma NCAA student-athletes plan for a possible career in professional sports, the Oklahoma Act permits an NCAA college or university to sponsor sports agent interviews on its campus before

---

122. *Id.* at § 821.62(C)(3).

123. *Id.* at § 821.63(C)(E).

124. OKLA. STAT. ANN. tit. 70, § 821.62(I) (West 1989).

125. *Id.* at § 821.66(A).

126. The Act is particularly aimed at two types of athletes. First, the Act covers "Oklahoma NCAA athletes." An Oklahoma NCAA athlete is generally "any athlete who is eligible to participate in intercollegiate sports contests as a member of a sports team at an institution of higher education that is located in this state and that is a member of the National Collegiate Athletic Association." Second, the Act covers "Oklahoma non-NCAA" athletes. An Oklahoma non-NCAA athlete is generally "an athlete in a team sport who resides in this state who is not an Oklahoma NCAA athlete." *Id.* at § 821.61(4)(5).

127. OKLA. STAT. ANN. tit. 70, § 821.64(A)(8) (West 1989) states that a registered sports agent may not:

> . . . [C]ontact, directly or indirectly, an Oklahoma NCAA athlete to discuss the athlete agent's representation of the athlete in the marketing of the athlete's athletic ability or reputation or enter into any agreement, written or oral, by which the athlete agent will represent the athlete until after completion of the athlete's last intercollegiate contest, including postseason games, and may not enter an agreement before the athlete's last intercollegiate contest that purports to take effect at a time after that contest is completed.

Id. at § 821.64(A)(8).

HeinOnline -- 24 Val. U. L. Rev. 501 1989-1990

the student-athlete's final year of NCAA eligibility.[128] To be eligible to participate in the interviewing process, sports agents must be registered with the Oklahoma Secretary of State and agree to represent a student-athlete only when the student-athlete's NCAA eligibility has expired.[129]

Despite the Oklahoma Act's apparent attempt to build and expand upon the California Act, the Oklahoma Act has many limitations. For example, one provision states that a maximum fee limitation can only be applied to multi-year contracts negotiated by a sports agent between an Oklahoma non-NCAA athlete and a professional sports team.[130] Such a restriction places no maximum fee limitation on single year contracts, on individual sport contracts, and on contracts involving Oklahoma NCAA athletes.[131] Consequently, a sports agent can charge an athlete any amount as compensation when negotiating single year contracts, individual contracts, and contracts involving Oklahoma NCAA athletes.[132] The maximum fee limitation further provides that a sports agent may not collect, in any twelve month period, a fee that exceeds the amount the athlete would receive under the contract during that twelve month period.[133] A sports agent thus could collect up to 100 percent of an athlete's compensation. Such a restriction is not a limitation at all because sports agents could conceivably charge fees that equal the amount which an athlete receives as compensation.

---

128. *Id.* at § 821.65. This section also provides that the sports agents must follow the specific rules of each institution the sports agents interview at regarding the time, place, and duration of the interviews. Also, the interviews must be conducted in "that final year during a period not to exceed ten consecutive days." *Id.*

129. *Id.*

130. OKLA. STAT. ANN. tit. 70, § 821.63(D) (West 1989) states:

> If a multi-year professional sport services contract is negotiated by a registered athlete agent for an Oklahoma non-NCAA athlete who has never before signed a contract of employment with a professional sports team, the athlete agent many not collect, in any twelve-month period, for the services of the agent in negotiating the contract, a fee that exceeds the amount the athlete will receive under the contract in that twelve-month period.

Id.

131. Note, *supra* note 4, at 1058. *See also* Sobel, *supra* note 59, at 759 (stating that at first glance, the Oklahoma Act appears to have a maximum fee limitation. However, on inspection, it is obvious that the Act only covers a narrow class of athletes, and insofar as amounts are concerned, "are more generous towards agents than any of the other agent regulation plans.").

132. Note, *supra* note 4, at 1058 ("By excluding single-year and individual sport contracts and those involving NCAA athletes from its fee restriction, the measure has extremely limited impact.").

133. OKLA. STAT. ANN. tit. 70, § 821.63(D) (West 1989). Apparently, this provision was aimed at high school players and was intended to prevent sports agents from collecting and charging fees based on a player's "signing bonus" that would exceed the amount the player would actually receive. Sobel, *supra* note 59, at 760.

FYI ~ interesting and very concerning!

Thanks,
Larry

This is why college athletes need to be careful

T.J. SIMERSTeague Egan, the student agent with the golf cart, could be taking USC on a dangerous ride

Sterling Brewster, left, and Teague Egan of 1st Round Enterprises with their golf cart. (Mel Melcon / Los Angeles Times)

T.J. Simers (http://www.latimes.com/sports/columnists/la-columnist-tsimers,0,1973522.columnist) Egan says he wants to 'represent every USC kid' in the NFL, but his friendships with Trojans players such as freshman running back Dillon Baxter could represent trouble with the NCAA. The big mystery: Why did the NFL Players Assn. certify him as an agent?
By T.J. Simers
November 29, 2010.
Meet Teague Egan, noted golf cart chauffeur, and the country's first certified NFL (http://www.latimes.com/topic/sports/football/nfl-ORSPT000007.topic) student agent, well meaning, he says, but with the potential to destroy USC (http://www.latimes.com/topic/education/colleges-universities/university-of-southern-california-OREDU000019271.topic)'s hopes of recovering from NCAA (http://www.latimes.com/topic/sports/national-collegiate-athletic-association-OREDU0000001.topic) sanctions.

A budding entrepreneur, Egan is probably known best in USC circles for not knowing the rules as a certified NFL agent, resulting in the one-game suspension of Dillon Baxter.

His goal now is to represent four to six of his friends, who also happen to be USC football players, in the upcoming NFL draft signing them as clients as soon as Sunday.

He says he has no written agreement or understanding with any of the football players, which would be an NCAA violation. But he knows his friends, he says, and he knows it will happen.

"Like [NFL agent] Drew Rosenhaus who represented every Miami kid after going to school at Miami," he says. "I intend to represent every USC kid."

It prompts the question does USC have enough compliance officers on staff?

Anywhere else maybe it's just an offbeat story, but holy Reggie Bush (http://www.latimes.com/topic/sports/football/reggie-bush-PESPT008576.topic), it sure looks like the wrong place and wrong time to interject a headstrong 22-year-old student agent.

"I was in the bar the other night and all of them [football players] came in," Egan says. "We were all there together and they said they had my back; we're still all friends. They said it's absurd they are being told who they can and can't be friends with."

Did you buy them a round of drinks? I asked, knowing he's an agent looking to sign clients and the fact his dad owns Alamo Car Rental and has been funding his son's efforts.

"No, not anymore," he says, the "anymore" just one more concern for USC's compliance officers.

Under National Football League Players Assn. guidelines, once Egan became certified Oct. 1 as an agent, he could no longer have any relationship with his "friends," if they were underclassmen football players. But as Egan will tell you, Baxter is one of his friends. Baxter is also a freshman.

"When he became an NFL agent, he poisoned the well," says David Roberts, USC's vice president for athletic compliance. "And everybody who works for him is painted with the same brush."

Egan and his partners contend they were friends with football players long before he became an agent. It's the rebel in him. He would prefer to argue the validity of the rules now, and changes that should be made, rather than necessarily following them.

As Egan will tell you, he's got places to go even if it is in a golf cart, which has not been registered per USC rules and never should have been on campus.

"My aspirations and goals are bigger than anybody you have ever met in life," Egan says, and he certainly sounds like Drew Rosenhaus.

As ambitious as Egan is, the NFLPA essentially legitimized a "runner" in certifying a USC student an agent. It's a dreadful precedent at a time when officials are already talking about the need for more control over agents and runners.

In this case, sometimes a friend, as far as players are concerned, and sometimes an agent, who admits, "I can afford to pick up the tab for friends, because I come from a blessed background."

The NFLPA has some explaining to do, which is going to be hard to do if officials remain in hiding. I understand the NFLPA's embarrassment.

The NFLPA doesn't certify anyone as an agent unless they have both undergraduate and advance degrees. Egan doesn't graduate until May.

Egan asked for a waiver based on his experience as a negotiator, his whole, short life already an experience.

In high school he spent $4,000 of his dad's money trying to develop a bottle with two compartments to make it easier to pour mixed drinks. He put together a plan to put a retractable roof over the Miami Dolphins (http://www.latimes.com/topic/sports/football/miami-dolphins-ORSPT000189.topic)' stadium, flying around the country to talk to experts.

He moved on to college, noticing there were no fast food places near the USC freshman dorms. He wanted to open a pizza parlor.

Later he went into the party business, calling it "1st Round Entertainment." He promised downtown L.A. clubs large crowds in exchange for a percentage of drinks sold. To draw crowds, he offered free admission, a free drink and limo rides.

"We had four limos and piled 50 kids at a time into them," he says. "Cost us $1,100."

Egan says he, along with three student partners, took a loss on the four parties they arranged. But it still met with NFLPA approval.

Fast forward to summer 2009, Egan's 21st birthday and a vacation in Nantucket. He's no struggling entrepreneur.

He's listening to a pair of rappers and gets the idea to start 1st Round Records. He signs Sam Adams when maybe other kids would've been drinking them, and a short time later Adams' "Boston's Boy" album is No. 1 on iTunes. Then Egan opens an office at Sunset and La Brea. Doesn't every college senior?

How appropriate that one of Adams' songs is "Driving Me Crazy," USC blindsided by the NFLPA's willingness to certify one of its students as an NFL agent and now trying to get a grip on it.

"It's unfortunate, but he's got the keys to a pretty powerful machine," Roberts says. "And unless it's operated properly and ethically, there could be consequences for a lot of people."

Egan has no such concerns, he says, shifting his attention to discussions he's currently having with Lady Gaga's (http://www.latimes.com/topic/entertainment/music/lady-gaga-PECLB0017764580.topic) manager and a possible partnership with Anil Ambani, the sixth-richest man in the world.

Believe him or not, maybe think of him as a rich kid at play or the next millionaire, but before he heads off to his macroeconomics class, he says, "I'm just getting started."

And here USC thought it might finally be finished with the NCAA.

Cynthia and Corey,

Attached is the list of 40 incoming players with their status listed as I know it. The first 26 are the GIAs and the next 14 are the walk ons. The admit status codes are as follows:

COMPLETE - Admitted and application is in and processed. Cynthia, you should be able to pull up their PID #s in your system now.

Admitted - Admitted but application is not yet completed.

HOLD - On hold (prep school signees)

Cynthia, call me to discuss this when you get it.

Thanks,

Rick

Thanks to those of you who have submitted your reviews, a reminder (to those who have not had the chance to conduct WPPRs for your staff) of the dead-line for SPA performance reviews sent in this previous memo. If you have any questions please let me know, as the dead-line is quickly approaching.

Joyce

It's that time again!!! Attached you will find the memo concerning Work Plans and Performance Reviews as well as the forms to complete your reviews and adjustments to work plans. Please be sure to note the deadline for submission of these forms (June 6). It is extremely important that all forms are completed and returned to my office by the deadline in order for ratings to be entered into the system. Ratings not entered will result in increases not being awarded---should the legislature award increases this year, which at this time we have not decision. Thanks in advance for your prompt attention to this matter, and please call if you have any questions.

RE: Performance Reviews for SPA Employees

It is time to complete the Annual Performance Reviews for the **period ending May 31, 2003**. This is also the appropriate time to update Work Plans for each employee. If the Work Plan is current and does not need updating, simply submit a copy of the current Plan and write at the top in red ink "Work Plan remains the same for the period to end May 31, 2004". If the Work Plan has changed, please submit a new Work Plan Form (copy attached) for the period ending May 31, 2004. The Performance Review should be completed on the most current form, a copy of which is attached. (**REMINDER**: the Work Plan and Performance Review cycle is June 1 to May 31).

Upon completion of each evaluation and work plan:

1. give a copy of each to the employee.
2. keep a copy of each for your files.
3. **send the original** WORK PLAN on which the Performance Review was based to my office for our files.
4. **send the original** PERFORMANCE REVIEW to my office for our files.
5. **send the original** Work Plan for the period ending May 31, 2004 (if revised), or a copy of the current unchanged Work Plan (indicate "Remains unchanged for the period ending May 31, 2004" at the top) to my office for our files.

As required by the Office of State Personnel, we must report over-all Performance Reviews on each employee, and retain a copy of each Work Plan on which they were evaluated. **Please note that Performance Reviews, Work Plans on which the reviews were based and the Work Plans for the period ending May 31, 2004 should be completed and returned to our office NO LATER THAN June 6, 2003.**

Evaluations must be reported to Employee Records and entered into the Payroll system in order for any increases that may be awarded to be recognized in paychecks a current basis. **It is imperative that you complete and return your performance reviews by the aforementioned date. Reviews not received by this deadline will result in the employee not receiving increases for which they may be eligible.**

Please be advised that the Legislature has not yet made any decisions concerning increases for 2003-2004. I will notify you immediately as soon as that information is available.

If you have any questions concerning this process, please call Joyce at 962-7850.

Dr. Carolyn Callahan, University of Virginia
Faculty Representative

Dr. G. Wayne Clough, Georgia Tech
President

Paul Dee, University of Miami
Director of Athletics

John Rocovich, Virginia Tech
Rector of Board of Visitors

John Swofford, Atlantic Coast Conference
Commissioner

Jim Weaver, Virginia Tech
Director of Athletics

Ron Wellman, Wake Forest University
Athletic Director

BRIAN MORRISON: We will begin the press conference with opening statements from the panel members. Following the opening statements we will then have a question and answer session. I'd like to at this time introduce Dr. Wayne Clough President of ***Georgia Tech***. {PRIVATE }

DR. G. WAYNE CLOUGH: Thank you, Brian. It's my pleasure to welcome everybody with what we believe is a historic press conference for the Atlantic Coast Conference. I am speaking on behalf of my colleagues. It is a group of the nations most distinguished presidents and chancellors that whom for the past few months have worked long and hard on behalf of the welfare of our great conference.

The issue of expansion of our conference has obviously recently been the subject of considerable press coverage but this topic has been on our agenda for all of our meetings for many years every since I have been here, which is nine years. Expansion is a topic we don't take lightly because of the many ramifications it has for our student athletes, our alumni, our boards of trustees, friends and publics.

We believe the ACC is a very special conference where student athletes have the opportunity to excel at the highest level both in athletics and as students. We put the welfare of our student athletes at the top of our list of concerns in all of our discussions. We also value the common heritage of all of our member institutions as being among the nations' top research universities. For 50 years the ACC has been committed to the best of collegiate sports and we believe our record speaks to this ethic.

Over time our conference has expanded as the appropriate circumstances presented themselves. The possibility of further expansion of our conference has been a natural and ongoing topic of discussion because of rapid changes in the national picture for intercollegiate athletics and contacts that are made from time to time with us by other universities about their interest in possibly being members of the ACC. The Council of Presidents and the Commissioner are charged with maintaining the strength of our conference for the present as well as for the generations that will follow. This calls for us to consider from time to time the potential of expansion and the optimum size of the membership of the conference. Our process in deciding issues related to expansion is deliberative and governed by our bylaws. Some would call it the process too slow. But it does allow for careful consideration of all points of view and many of these when you have to consider all of the constituencies and the points of view that we must represent as presidents.

In regards to this particular stage of ACC expansion we developed a set of guiding principles, what we call upon, to help us make our decisions. It considered matters such as student welfare, financial stability, similarity of institutional cultures, academic compatibility and future opportunities.

In the end our process produced what is a logical and positive result. And we're here today to formally welcome two knew members to the ***Atlantic Coast Conference***. They have indicated their willingness to join with us in making a great conference and even better one and they bring very considerable strengths in all aspects of intercollegiate athletics. We also satisfied that they have nationally recognized university profile and institutional cultures that fit with the existing membership of the ACC.

Even though in the past we have not shared membership in athletics conference with either of these two schools, we haven't placed multiple interactions on the playing fields as well

as through research and student learning activities that we believe makes the prospect for expansion with these universities very positive.

We expect all of these to be reinforced now that these institutions are joining us in the ACC. to Virginia Tech and all of our colleagues there at this fine institution we're pleased to welcome you to the ACC. It's been a long time coming. We look forward to the strengths of Virginia Tech will forward us by a strong national and international reputation.

Maybe we'll get to finish that game ***John***, one of these days that was stopped because a little lightning storm some day in the near future.

To the University of Miami and our colleagues there, President Shalala, we're pleased to welcome you to the ACC. Extending the geographic footprint of the ACC to the south Florida and using your distinguished representation will enhance our impact as a conference nationally as well as globally. Working with these outstanding new members, both through shared academic and athletics agendas, we believe the best days of the ACC lie ahead.

Now it's my pleasure to turn the podium over to our Commissioner, John Swofford. But in doing so, I want to state in the strongest terms on behalf of all of my colleagues on the Council of Presidents how much we appreciate his diligence, patience, and hard work in helping us reach the conclusion on conference expansion. .

JOHN SWOFFORD: Thank you, President Clough. Obviously we have been through a very thorough analysis of our future as a conference and I believe that with the decision of our Council of Presidents we have landed at a superb place. This exercise has been about positioning our conference for the future, to ensure that the best opportunity exists for our member schools to continue to reach their full potential athletically as individual institutions as well as to continue to reach our full potential collectively as a conference.

With the addition of the University of Miami and Virginia Tech, that most definitely has been accomplished.

Both Miami and Virginia Tech are institutionally academically, athletically and geographically compatible with our nine current members. In short, they both fit. This is the ACC's fourth expansion. The ACC started very quickly with expansion when ***Virginia*** was asked into the League about six months after the League was formed. Followed by Georgia Tech in 1978 and most recently of course, with Florida State in 1991 each extension of the ***Atlantic Coast Conference*** benefited the League, it's student athletes, and it's fans. I have no doubt that this expansion and extension will do the same.

The ACC is stronger today than yesterday and may well be at its strongest point in its history. We're also much better equipped as a conference to meet the challenge of tomorrow in a successful way. Some would like the world to always stay as it is and I understand that. Sometimes I would like that as well. But it seldom, if ever, does in athletics, or in any other part of life, our conference from our strategic planning committee to our athletics directors and faculty representatives, and on through the Council of Presidents, came to the conclusion that our best path in a changing landscape was to grow. And I believe that a superb decision was reached to invite Miami and Virginia Tech to join us.

We're thrilled that Dr. Shalala and ***Paul Dee*** at the University of Miami that Dr. ***Steger*** and ***Jim Weaver*** and John Rocovich at Virginia Tech have chosen to accept our invitation to join the ***Atlantic Coast Conference***. I think that this will truly enhance all of us and we're here tonight to celebrate Virginia Tech and the University of Miami becoming an integral part of the ***Atlantic Coast Conference***.

We look forward to having you as colleagues and having you as a part of what we consider to be a very special family. And Jim and Paul, if you will stand up a minute I have got something to give to the two of you.

The one thing I think I figured out too if you look at our seal over there, President Clough, this really didn't come up in the discussion, but maybe one reason we ended up where we did and landing where we landed which I think is a terrific place to be for the future of our League, is that we couldn't figure out how to do a different seal and we could keep the same seal and simply add two stars in various places within the footprint and keep it that way. But certainly the fact that you are already here, you are a part of the geographic footprint of the League and fit in every other way, I think makes this a very special occasion and certainly as I said earlier the right fit for Miami, for Virginia Tech and for the ***Atlantic Coast Conference***. We have got a little -- I think we got the right colors here, ACC and Miami and ACC hat. I have got to tell you when Paul and President Shalala called me Monday morning about 10:30, the first comment was ready or not here we come (laughter). And that was a good sign, I thought. And the second comment was President Shalala saying ***John***, I don't know if you could imagine this but Paul is

actually jumping up and down. (Laughter).

PAUL DEE: He's given an overstatement. (Laughter).

JOHN SWOFFORD: I have yet to be able to imagine that. Welcome, we're looking forward to working with you. I am giving this to you on behalf of the nine Athletic Directors that will be your colleague in the ACC and we're thrilled to death that you will be with us.

PAUL DEE: Thank you very much (applause).

Jim, you could probably jump higher than Paul. But for many years a number of people have felt that Virginia Tech was a natural fit in the Atlantic Coast Conference and I am just glad and our League is just thrilled that that time has finally come. We welcome you and look forward to working with you.

JIM WEAVER: Thank you very much. (Applause).

DR. G. WAYNE CLOUGH: Thank you, ***John***. I'd like to call on ***Ron Wellman*** the Athletic Director of Wake Forest University.

RON WELLMAN: Thank you, President Clough. Paul told me a little bit ago that he will demonstrate his 43-inch vertical leap immediately after this and that has been part of the one-on-one interviews so you will all want to be a part of that I am sure. So Paul, we look forward to that.

Tonight we welcome two outstanding institutions, to the ACC Virginia Tech and Miami we're thrilled to have them as a part of our conference.

They have a strong leadership, they have outstanding programs and they are literally a perfect fit for the ACC. As you well know and have documented daily in the media this has been a long twisting unpredictable and oftentimes frustrating path to this wonderful conclusion. I want to tell you that we would not be here tonight if it weren't for the strength of the leadership in the ACC office. ***John*** Swofford and his staff did a superb job of ushering this process from the beginning to the very end. They have demonstrated strength, sensitivity, diplomacy, determination throughout the process, and all of the faculty, Athletic Directors and Athletic Directors and Presidents of the ACC are grateful for what they did. Anyone can hold the helm at sea when the waters are calm. Rarely are the waters calm during this process; yet our Commissioner forged ahead and weathered all of the storms. As a result tonight the ACC is stronger than it was a few days ago. We welcome Virginia Tech and Miami to our group. We look forward to working with them very, very closely in the future, and we thank ***John*** and his staff for the superb leadership that they have demonstrated over the last some people say two months, I say two years. Thank you very much. (Applause).

DR. G. WAYNE CLOUGH: I'd like to introduce Dr Carolyn Callahan of the University of Virginia.

DR. CAROLYN CALLAHAN: I want you to know that I warned everybody that it was very dangerous to let a faculty member get behind a lectern since we only speak in one hour segments - been trained that way. I just saw some of you look at your watches. What I want to say is that I see the ACC now having reached a point after many months of deliberations and possibly walking along what appeared to be a very meandering path to a point where we're positioned to have great opportunity in the future. Our journeys lead us to a point where we're welcoming two great new partners into our League with eager anticipation of a great future. Our job now is to make sure we take advantage of the opportunities that are afforded by the new Alliance. So we recognize we must begin the hard work of integrating our two new partners into a League that has pride in its academics and it's athletics, both in its high profile sports and in its Olympic sports but we look forward to that task with excitement and high expectations because we see so many opportunities to build on the academics and athletics relationships that many of us already have with Virginia Tech and to extend academic invitations and athletics competitions to the University of Miami.

Now also comes a time, I think, when we have to move beyond considering the position of the ACC in the athletics world beyond the academy and athletics reputations of the institutions, beyond the opportunities offered to the coaches and the ADs in the conference to considering the most important people of all and that's our student athletes and their welfare.

The real success of this merger will be the extent to which we can use our abilities to create a League where the student athlete experience is maximized in the classroom and on the fields and in the courts. The ACC and its member institutions old and new are after all, about both quality educational programs, and opportunities for creating the most competitive athletics environments that we can. We're looking out for our students, our student athletes, and their welfare; that's the most critical part of this League. Our charge now is to work toward ensuring that the ACC continues to be a League based on academy

excellence, mutual respect, and sportsmanship as they coexist with keen athletic competition.

(Applause)

. JOHN ROCOVICH: Virginia Tech is pleased to received an invitation for membership in the Atlantic Coast Conference. It confirms that the ACC and its member schools hold our athletics program and our university in high regard. We share historic cultural and geographical ties with those universities. We have academic partnerships with many of them. With the strength of our athletics program and our status as a leading research university, we believe we're a great fit for the ACC. To illustrate several of those partnerships, the university in Virginia Tech operate – the University of Virginia and Virginia Tech operate together for off-campus graduate centers within the state and the University of Virginia and ***Virginia*** Tech are also partners with Corillean (phonetic) health systems in the unique Corillean biomedical institute. Wake Forest University and Virginia Tech began in 2001 a joint school of biomedical engineering offering joint degrees. ***Maryland***, Georgia Tech, ***North Carolina*** State, UVA and Virginia Tech are partners in running the NASA National Institute of Aerospace. Duke, Georgia Tech and Virginia Tech, among others, are partners in the National Lightrail (phonetic) project, an effort to link super high speed computers at major southern research universities. Duke, Florida State, Georgia Tech, North Carolina State, ***Virginia*** and Virginia Tech are university partners with the University of Tennessee at the U.S. department of Energy, Oakridge National laboratory. The University of Maryland and Virginia Tech have jointly operated a regional college of veterinary medicine now for over 25 years on both campuses. So you can see we have many long-term partnerships with ACC schools in the academic realm.

Our board of visitors discussed Virginia Tech's membership at a special meeting last Wednesday. I can tell you that our board of visitors is unequivocal and unanimous in its strong support for our move to the conference. We hardly accept this invitation. We're deeply grateful to ***John***, the President of the University of Virginia who has worked tirelessly for us seeking the best outcome for Virginia Tech. We acknowledge the many efforts of governor Mark Warner (ph)to seek resolution to the conflict and to seek an optimal situation for the two conferences and for Virginia Tech. We thank Attorney General Gerry Kilgore (ph) for his efforts. We also thank the ACC Commissioner ***John*** Swofford for bringing this opportunity to closure and for his visions, seeing the future of intercollegiate athletics and we thank our numerous supporters.

Let me address a point that I know the media would like me to discuss, the decision by the ***Atlantic Coast Conference*** to expand by adding teams from the BIG EAST conference has been stressful for all the schools involved. My university has been in an especially difficult and problematic spot. In a rapidly evolving situation where circumstances change, sometimes even by the hour, it is only possible to make decisions based on what is known at a particular moment. Although circumstances have been changed, our mission has remained constant. To act in the best interest of our university where I have the privilege to serve as rector of the Board of Visitors.

Given the inevitability of the ACC expansion our geographic proximity, our historic and cultural affinities as we will as current academic partnerships with many of these schools, it is clear that the affiliation with the ACC is in the best long-term interest and is the best fit for Virginia Tech and our extended university community.

As a backdrop to the current situation it's useful to note that people in this region have floated ideas across many decades about our reaffiliation with the ACC schools. Many of the current ACC schools comprised along with Virginia Tech the original Southern Conference in the first part of the 20th century an affiliation we shared for 30 years. More than half of our alumni live in ***Virginia*** or the Carolinas, the heart of traditional ACC country. We share similar academic profiles with many of these schools.

The sports framework for the extended Virginia Tech family includes the ACC, of all the BIG EAST schools considered by the ACC, only Virginia Tech shares this similarity, history, and proximity.

Regardless of what others may say, or the many unsolicited recommendations we have received, we have acted to position Virginia Tech for the future and this future is the very best future that we could have. The ACC has extended an offer of admission to the conference. It is clearly in the best long-term interest of our institution. As a public university, Virginia Tech is responsible to multiple constituencies, but first and foremost our obligation is to our students. Although I am concerned about the impact on other institutions, we must take the best long-term approach for the future of our institution.

In summary let me restate how pleased and indeed delighted we are with this move to the

Atlantic Coast Conference. I have tremendous respect for the faculty, students, and administrators at all of the ACC schools. Some of the nations best universities share this affiliation. It is very happy day for Virginia Tech. We have a strong fan base, we have an excellent sports venue, we have talented student athletes and coaches and a record of athletic success. The hokey nation is proud today. We look forward to a long and productive relationship with the Atlantic Coast Conference. Thank you. (Applause).

DR. G. WAYNE CLOUGH: Thank you, ***John***, after this you can explain to all the rest of the ACC schools what a hokey is, okay. Now I'd like to introduce Jim Weaver Director of Athletics of Virginia Tech.

JIM WEAVER: Thank you. I appreciate the opportunity to be here this evening. I regret that president ***Steger*** had plane problems and weather problems in Atlanta for this should be his evening as the leader of our university.

We're very pleased and very proud about the opportunity to join the Atlantic Coast Conference and I must tell you that and it is well documented that President Steger and Menis Ridenour (phonetic) and I made a visit there. I think it was about a 40 minute visit with John on the 6th of May, and when I looked at the pictures of the past commissioners and saw that the first commissioner was ***Jim Weaver***, and then I saw that the third commissioner was Bob James, who went to high school with my mother and father, I knew things would turn out well at the end of the process.

ACC affiliation is though Virginia Tech has finally come home since as John Rocovich alluded to in his remarks we have had so many prior relationships with the institutions in the ACC.

Our constituency is very excited about this special moment and I am so proud for them this evening.

In addition, I am proud for our university to be associated with such outstanding academic institutions as the members of the Atlantic Coast Conference.

This is also, ladies and gentlemen, a wonderful challenge for our coaches and for our student athletes at Virginia Tech and for them, I am excited. We'll do our very best to be a first class representative and member in all aspects of our athletics department. Our goal is to continue to develop a broad based athletics program inclusive of all 21 sports and our affiliation as a new member of the Atlantic Coast Conference will help that goal become reality. Thank you. (Applause).

DR. G. WAYNE CLOUGH: Let me ask our master high jumper Mr. ***Paul Dee*** to come forward. I would also like to mention for some of you who may not know it most of the schools in the southern portion of the ACC, Georgia Tech included, play regular sports schedules with Miami and we have a long standing baseball connection, tennis, all of our sports play regularly with Miami, so this -- bringing Miami in will actually make it easier to get some of these things done. Paul.

PAUL DEE: It's terrific to be in such a wonderful new group of people. I have a whole new constituency that will laugh at my jokes. But on behalf of President Shalala, who tonight was unable to be with us, she sends her thanks and her regrets. Her regrets at not being able to be with us this evening and her thanks for the tremendous invitation and the tremendous opportunity that has been provided to the University of Miami to become a member of the Atlantic Coast Conference.

Many years ago when Florida State came in to the conference - maybe not that many years ago - but the University of Miami was an independent (inaudible) Florida State as well. We went different ways. We had the benefit have coming to this conference and we have seen all of the things that it meant to them and to their fine university and all of them were not lost on us as we watched them grow into a tremendous university through this conference. They are our friends. We look forward to the friendships of all of the other schools in this conference.

As well, the friendship of Virginia Tech, having gone from very beginnings in 1990 to create a conference out of basically nothing, eight athletic directors getting together in ***Providence***, Rhode Island and saying we can play football and we can play with the best of them, we can play at the highest levels. And we did. And it was the people like Virginia Tech and the other schools of the BIG EAST. In coming here tonight, is bitter sweet for me and for the University of Miami because we really do wish to accept this invitation in the way that it is intended and the way it is meant but we also leave behind great friends and great universities in the BIG EAST conference that we hope we'll continue to compete with and to be friends with as we move forward.

I want to thank the presidents of the ***Atlantic Coast Conference*** for their efforts and for their invitation; for the administration for working this through for as long as it took to stay there and keep a steady hands-on the teller and John, you did just a tremendous job and we're very, very

appreciative of that. To the Athletics Administrators, particularly the Athletic Directors, another call that offered advice, counsel, and other things left on my answering machine. (Laughter) I really appreciated those as well most often filled with humor but certainly a warm invitation to join this conference.

Our faculty, are too a person, pleased and thrilled to becoming into the Atlantic Coast Conference, to be affiliated with and to be part of this great conference of not only athletics but of academics. I have several coaches who aren't quite as pleased, but they look forward to that in many ways. It was very interesting the other day we started counting and about nine of our coaches have in one way or the other been affiliated with the Atlantic Coast Conference, particularly Jim Morris and Perry Clark. Jim was the head baseball coach at ***Georgia Tech***. Perry Clark was assistant basketball coach at ***Georgia Tech***. Our assistant rowing coaches were from Duke. Head men's tennis coach was from Duke. Women's soccer coach and volleyball coach both from the University of Maryland. So we have an understanding and they have an understanding of what it takes to compete in this League and to a person, every single one of them was highly supportive of the university's move even though it meant that they would have to improve -- that they would have to work harder; that they would have to recruit harder. They really believed in what this League meant. It meant to them as students and as coaches and soon will mean to our students and the rest of our coaches. Again we're extremely pleased to be here. We're looking forward to the relationships that we'll build and the ones that we have, we're looking forward to extend. We want to thank all of you for this great invitation and for this great opportunity. Thank you (applause).

DR. G. WAYNE CLOUGH: It's been an interesting journey to get to this point. We're very proud to have arrived at this station with our great new colleagues. Regards to Donna Shalala and Charlie ***Steger***. We want to see them soon at our next ACC Presidents meeting.

BRIAN MORRISON: Thank you. We'll go ahead and open it to questions.

QUESTION & ANSWER SESSION

.

Q. Over the past 50 years the ACC has developed great rivalries in all sports and especially in the triangle. What steps will be taken to ensure that these rivalries continue while building new rivalries at the same time?

JOHN SWOFFORD: Well, that will be a fundamental aspect of our scheduling policy is once we have the input of our Athletic Directors and all of these Athletic Directors, the 11, in our discussions from a staff's standpoint and in all the different scenarios that had been run and discussed with the Athletic Directors, one common thread through all of that is a desire to maintain those special rivalries that do exist throughout the conference and certainly that will be a fundamental aspect of our scheduling policy. Right now with 11, you don't necessarily have to reinvent the wheel because the Big-10 has been operating quite effectively as 11 since Penn State joined that conference. But what we need to do is probably take a look at the Big-10 model as a jumping off place in terms of our scheduling policies with an 11-member conference and then see if we need to change or tweak that to meet the desires that other institutions have. One thing you want to do is to keep this as the best you can for the athletes, the best you can for the fans, and those kinds of natural rivalries are huge a huge plus, for the fans, for the athletes, they are a huge plus in our television negotiations as well. So there's every reason in the world to maintain those as best you possibly can.

Q. Jim, on May 16 the League decided to pursue three other schools. At that time did you think you guys were out of the running and describe your emotions the night, I assume Dr. ***Steger*** *called and said you guys were in. How did you feel?*

JIM WEAVER: How about if I answer the second part first and tell you I was elated when he called me, I guess it was Tuesday night or Wednesday night a week ago, the days have run together so I can't remember exactly which day it was. On May 16 which I think was the day that they – the ACC indicated the three schools that they were going to have dialogue with and we were not one of those three, the question was did I think we would get to this point? The answer is at that point the honest answer is no.

Q. Mr. Dee, when we all left Ponte Vedre on May 20 what would you say the percentage was that you'd end up in a conference whether it be this one or the BIG EAST with Virginia Tech?

PAUL DEE: At that time it was very interesting meetings that we had just concluded. There were different sides that had expressed

themselves. At that time as we were leaving was when I believe it became clear that there would be three schools that would go a little further in the process. I don't know that we ever thought about it in the sense of with or without Virginia Tech because there was the prospect that at that time or at least early on that there could be a conference of 13 and that that might be a possibility. ***Virginia*** Tech has been just an outstanding member of the conference that we have been in for the last thirteen years. All of the relationships that we have had including sharing National Championship games in our League and losing some football games have all been at Virginia Tech so they have been great friends of ours. Whether we thought about it or didn't, at that particular time it worked out very well.

Q. Commissioner, you have said you are very pleased with the outcome of this process in terms of where the presidents ended up. Procedurally if you had to do this over again and maybe next year you will have to do it over again, are there some things that you would do differently?

JOHN SWOFFORD: I think so. I think any time you go through a procedure of this nature that you don't go through very often that you -- I think you'd be foolish not to look back on it and see what you could learn from it and what could be adjusted and tweaked and changed for the betterment of the process. I don't think there's any question about that and we'll -- we'll do that. I think you should do that -- even if you felt completely comfortable with the procedure you should do that.

Q. Could you share with us one or two thoughts that you had specifically what you might do differently and could you enlighten us on what it's like to be on a conference call with this many people for this long?

JOHN SWOFFORD: (Laughs). Well, since you mentioned conference calls I think -- and I think that President Clough will probably want to speak to this too -- and I don't want to spend a whole lot of time talking about process because tonight is about the new members that are coming into the League, but there are two aspects of it that I would suggest that Jim and I have talked about this already a little bit is that one, you probably need more in-face meetings and fewer conference calls because I think the dynamics of being in the room with people is simply healthier for decision-making than conference calls. As hard as that might be with people that are as busy as presidents and travel as much as presidents and chancellors do. The other, quite frankly, is a process that puts us on a campus with an invitation not to follow, you know, I don't think that -- that part of the process very candidly didn't treat a couple of schools fairly in my estimation and didn't treat our own League fairly in my estimation. I think we need to look at that very candidly. Both are easily fixed, easily addressed. And I think we'll probably take a look at our bylaws which I think are fundamentally sound, but the world is probably very different today in terms of the information age and the fluidity of it and the fluidity of our decisions are made and change than when those bylaws were written in terms of expansion. So I think we'll take a fresh look at that as well.

But the point I would emphasize is in the end, I think we have ended up with a superb decision for the future of the Atlantic Coast Conference in two terrific institutions joining us that fit in every way.

DR. G. WAYNE CLOUGH: If I could change anything it would be that we would schedule conference calls -- instead of scheduling conference calls that are supposed to last an hour that end up lasting three hours, I'd really like to see them scheduled for three hours and only last an hour. I think everybody needs to understand that as we went through this -- the process that we had to go through by the bylaws, that each of us had to answer to a lot of constituencies and while, in some peoples' mind, I would get emails from people saying, please, make up your mind - but I was representing student athletes, alumni, boards that I have to answer to, and other constituencies, so each time we had a discussion it required a discussion with other constituencies and that just took a while. We would like to have shortened it and any time when we do this again certainly we'll look for a more efficient process in getting the decision making done.

Q. Commissioner, just wanted to ask if you could go over a little bit of your plan for the format for the League. You mentioned using the Big-10 as a model if it's 11. Can you talk about if you are allowed to have a Championship game eventually with 11, whether you divide into divisions at that point and if you could just discuss some of those scenarios.

JOHN SWOFFORD: Well, right now our anticipation is that we'll be operating as an 11-team League without divisions and we start there. We had made a decision as a League that had we gone to 12 we would not have divisions in basketball. But we would in football. And in most

of our Olympic sports there would be no need to have divisions as there will be no need to have divisions in the Olympic sports with 11. We'll need to talk about the men's and women's basketball tournament formats. That's probably you know, we want the input of our schools and the coaches and so forth before making that decision. It's really their decision to make, but that's not particularly complicated, quite frankly. I mean, there's an obvious format that probably we'll go with that will work that will, in all likelihood, add two games on Thursday to the one that we already have so there are three games on Thursday; then you are right back on Friday to the same format for the tournament.

If the NCAA changes its rule in terms of the football Championship game and reduces the number from 12 to 10, for instance, then we're going to have a conference call with all of you media representatives and ask you to vote on how to divide 11 teams into two equal and comparable divisions with one with 6 and one with 5 (laughter). That will be the trickiest part, you know, if we end up with that situation. I am sure it's doable. I don't have the answer tonight as to how it's doable, but that will be a challenge we'll meet one way or another.

Q. Dr. Clough, my understanding, correct me if I am wrong, you are on the Board of Directors of the 18 person group that will make the determination whether to change the bylaw that allows 10 or 11 -- can you talk about that, would you be, I mean, what do you think the chances of that happening are and the process?

DR. G. WAYNE CLOUGH: Clearly I would be supportive of it. As you mentioned, there are 18 votes there that have to be swung the way the NCAA legislated process works, first step is you have to go to the management counsel, Jack Evans is here from the University of North Carolina, represents the ACC on a management council. Those folks process and develop the legislation which works its way up to the Board of Directors. I would think that given our discussions and our expansion of our conference a lot of people will be interested in revising this rule. One of the challenges is of the 18 schools that are there a relatively small number of them are Division 1-A – they are Division 1s but not Division 1-As. So I think the temperature has to be taken of those schools as much as those who represent the Division 1-A conferences. And I don't know at this point what their feelings would be. Certainly the ACC is going to go forward with a recommendation that we attempt to do this.

Q. While I understand this is a night of celebration to welcome two new members, there has been a lot of talk about the perception of the ACC the way things have been handled, the way things have gone down throughout this whole process. Fence mending has been a phrase that has been thrown about and a lot. What steps would you want to take at this point to repair that reputation and also if someone could identify the members of the Council of Presidents that are here tonight.

DR. G. WAYNE CLOUGH: I don't know that fence mending is quite the right term. Certainly the ACC Council of Presidents and I am sure the AD and the faculty reps are like a family and in any family you are not going to agree on everything at any given time, but we have a history of once we decide to do something we all band together and go forward. We have a great record of collegiality on the Council of Presidents. It's been something I have just been thrilled about in my service with the ACC representing Georgia Tech. We'll do the same thing here. We're going to all band together because we have two new members, we want to bring in our family and develop that strong rapport that we have had for a long time. I think the conference needs to continue to work to say the things that are the right things about this conference. We still stand for what we believe is the best in college athletics. That hasn't changed. We may not have pulled this off in the best way possible and we're willing to admit that we had a less than perfect process, but at the same time, the outcome is a great outcome. And the conference hasn't changed.

Are other members of the Council of Presidents? I think I may be the only one here tonight.

Q. Dr. Shalala talked about maybe going to 12 teams at some point; that there was some assurance. Could you explain what that assurance is and what a timetable would be?

JOHN SWOFFORD: Well, I don't know that – and Wayne may want to respond to that too. I think right now we are where we are which is at 11. I think that a number of our schools, a number of our presidents are very interested at some given point in looking at 12. There's no particular timetable for that. I don't think any absolute guarantee that it will happen, but there's certainly a certain interest level with the number of our schools in continuing to look at that if there should be an opportunity that our presidents ultimately

feel is the right fit.

DR. G. WAYNE CLOUGH: Well, just first of all, there have been no conference calls scheduled on this subject I can guarantee you. We're going to take a rest.

But we obviously looked very hard at the possibility of going to 12 and I think there's a sentiment to do that, there's a certain logic to it. But we're not in any rush at this point. We think we have got two great new members and we need a little time to bring them into the fold and get going with our two new members before we jump to any other conclusions.

Q. Commissioner, if the legislation doesn't change and it stays with 11 and you don't have a Conference Championship, how do you plan to raise the revenues to allow all the 11 schools to get to reep the kind of financial rewards that the nine schools were receiving in the ACC?

JOHN SWOFFORD: Well, we think that it is workable and doable. The biggest challenge is really in the early years of this and this is a decision on the part of the conference as well as on the part of Miami and Virginia Tech, I am sure, that's for the long haul, and positions, this group of schools and this conference in a manner that gives it the greatest stability for the future in every respect. I think that it would be fair to say that many in our conference throughout this evaluation felt that there may well have been greater risk in staying at nine than going to 10 or 11 or 12.

Q. President Clough, can you tell me did you presidents vote on these two schools as a group or one each and what was the tally?

DR. G. WAYNE CLOUGH: I don't want to get into the vote breakdowns, but we made a decisions on Miami and Virginia Tech independently. We felt that we wanted both of them to come, but if one should not decide then certainly we hoped the other one would come. In other words, they were treated as individuals. Although we thought it was a great package we saw these institutions as separate institutions with great individual strengths and we wanted to treat them with that respect.

Q. Commissioner, what was the vote tally of these two schools?

JOHN SWOFFORD: I can't give you the vote tally but it had to be -- obviously there had to be at least 7 affirmative votes.

Q. Commissioner, now that Miami and Virginia Tech are in the League and a lot has been said about renegotiating the television contract for football, how much leverage do you expect to take to the negotiating table with them on board?

JOHN SWOFFORD: I think it is considerable. A lot of things go into contract negotiations, some of which you have no control over such as the timing and the state of the economy and the state of the marketplace when you go there. And that could be a considerable difference from you know, during a 6 to 12 month period. Sometimes you hit that very, very well and we have done that in the past and other times you don't hit it as well. So those are the uncontrollables, but in terms of the football television contract, first thing that we'll do is sit down and talk with our current partners at Jefferson Pilot, ESPN and ABC to talk about renegotiating the last two years of the current contract. After that when Virginia Tech and Miami are in for the third year and obviously the negotiations will take place prior to that point in time, but that becomes a jumping off place because that's a new contract from there forward. We're bringing in two schools that bring a lot across the board in this area and in all areas, but specific to football, it's two perennial national caliber football programs, both of whom have a superb history of television ratings and they bring that to the table which is most definitely leverage and they bring tremendous added inventory, if you will, in terms of the games that can be selected within our conferences as well as some non-conference games to potential bidders for the football television contract as well. So I think there's you know, significant -- we have been helped significantly in that particular regard with the addition of these two programs.

I think in terms of football while we're on it, I think we have also been strengthened significantly in terms of whatever happens in post-season football, you know, whether that's a continuation of the BCS or something similar to it, or even if the BCS went away and we were back to conferences having their own Tie-ins with Bowl games, you know, I think we're in excellent shape in that regard. So from a competitive standpoint, I think when you look at Olympic sports across the board, and then when you look at women's basketball, when you look at men's basketball, and the tremendous history and tradition that's here in the ***Atlantic Coast Conference*** and then you look at the football programs that now make up the ACC, it's exciting, I think. I think it's exciting for our athletes, exciting for our fans. Because there's an awful lot of balance there you know, and maybe at

some schools, with this sport and other schools with this sport and some with, you know, with both right now, but the strength of those programs in the ACC at this point in time with the addition of these two schools is tremendous.

Q. What again is the entry fee for the schools and has any sort of payment schedule been set up?

JOHN SWOFFORD: It's a $2 million entry fee and that's tied very consistently to what Virginia Tech and Florida State paid when they came into the League not the dollars themselves, but it's tied to the assets of the conference at that time and payment schedule is something that we're talking about right now. And is something we want you know, that's just about negotiating that out and making it work for our current institutions as well as the two institutions coming in.

Q. Dr. Clough, just wondering what might drive the push for 12 team what factor or factors?

DR. G. WAYNE CLOUGH: Well, I think again, going back through our deliberations we talked a lot about it. We talked about 13 and 14, and it has to work financially and it has to work in terms of the characteristics that we look for in an institution and those we believe are embodied in the two institutions that are here today. So I would think first of all, it would have to be the right institutions, somebody who brought characteristics that we would be very much looking for and has to financially work, and we certainly want to give consideration to the student welfare issues and how far one has to travel to get your playing done, things like that, it would be a series of factors that would go into it. But as I said we're not in a particular rush at this point in time. But at the same time we have had ample discussion that would say that there's a real strong sentiment to go to 12 at some point, but we're not in a rush.

Q. With the two schools joining the League in 2004 would each of you describe the process you will be going through retooling your football schedule and how soon do you see your schools having enough games to compete for the Championship?

JIM WEAVER: Quite honestly I think it's going to be easier for Paul and I to retool our schedules than it will be for some of the current member institutions simply because we had a series scheduled with ***North Carolina*** and NC State over the next four years, we began at Carolina in 04, 05 and 06 were State and 07 we concluded at home with Carolina and also ***Virginia***, which was a non-conference game will now be a conference contest for us. From our perspective next year we have LSU on the road, Western Michigan at home and we would anticipate maintaining the relationship that we have had which has been a long standing one is ***West Virginia***, so in theory the ***Virginia*** and ***West Virginia*** games having gone from a non-conference for ***Virginia*** and conference for ***West Virginia*** would flip-flop.

PAUL DEE: Back when we were an independent in 1990, 1991 and we decided to go to into the BIG EAST conference we had to reschedule 72 games over a 10 year period. This one I don't think will be very difficult at all because we'll simply substitute the 7 teams that we haven't been playing regularly, of course we played Florida State and that would be the 8th conference game, and substitute the other 7 for the 7 other games we played in the BIG EAST and then we would continue as we have to play non-conference schedule and this years non-conference schedule is Florida State, Florida and Tennessee, so be interesting down the road we play -- kids like to play games elsewhere; that's why we came into the League; that's why we're going to continue to play.

Q. You think maybe by 2004 each of you will be able to play 8 games against ACC schools.

JIM WEAVER: Yes.

PAUL DEE: Yes.

Q. Commissioner, can you talk about your level of apprehension this weekend waiting for the Miami vote after it was delayed, the latter part of last week and Paul, can you talk a little bit about the balancing act that you had to go through President Shalala I think said yesterday that the BIG EAST was desperate to keep you and the ACC was desperate to have you. Talk a little bit about that process through the weekend.

PAUL DEE: I would just say that President Shalala keeps her own counsel (laughter).

JOHN SWOFFORD: And that's what he told me which worried me a little bit.

PAUL DEE: I don't know that the word desperate might be best used here. It was an extremely interesting time to go through. The one thing that I can tell you about President Shalala is that she keeps her options open and we went through a tremendous series of discussions over the last 72 hours before the decision was made in part on Sunday evening and finally on Monday morning. She went through a lot of discussion.

She spoke to a tremendous number of people, our trustees, members of our staff, our coaches, she talked to our coaches a great deal. They had a great deal of influence on her and then she and I spoke for a good long time about a lot of issues on Sunday afternoon, we spent some time together at her home and I think that we understood the dilemmas that were there and we clearly had to select the best position for the University of Miami and as we said yesterday in our press conference that we really talking -- the one thing we really began to focus on that I think that in anything that you do of this magnitude, you must do it with a long, long reach. We had to look into the future and the stability of the University of Miami's athletics programs for many years to come. This was not a decision about a year, two years, or a series, or a series with some friends. This was about making a commitment to an organization to an athletic conference and to an academic conference and I think that that really became the focus of the decision making for President Shalala.

JOHN SWOFFORD: First of all, I said last week when President Shalala announced and told me that they were going to take the weekend to make their decision, I said at that time that I had fully respected that and understood that for the very reasons that Paul just spoke about. So I had absolutely no issues with that. Paul and I and Jeff Elliott and Wayne Roberts spent a lot of time on the phone on Friday and we had some more conversation on Saturday. I actually offered asked President Shalala and Paul if it could would be a good idea to fly down to Miami and sit and talk -- if there was anything left that they wanted to talk through, that we needed to finetune or discuss that were issues with them, that they wanted to talk through any further that I would immediately fly to Miami for the weekend and President Shalala said, John, I have a golf game scheduled on Saturday and on Sunday and if you come down here and mess either one of those up I am going to be very upset with you. I took that to mean that I probably shouldn't come to Miami. (Laughter). So I didn't. But nice weekend here in Greensboro, my wife Nora and I went to a movie and then went out and played nine holes of golf. She drove the cart and I pretended to be a golfer, just the two of us and enjoyed that a great deal and called all my AD's and said you know, when you get a chance this weekend pick up the phone and call ***Paul Dee*** and called some of my presidents and said when you get a chance this weekend call President Shalala and then just sort of you know, let go of it. You reach a point in a lot of these kinds of things where you have done everything that you can do. You just want to make certain that you don't leave any stone unturned and I think Paul and President Shalala both made it plain that they had everything that they needed to have from us in order to make the decision that they would make and you know, once you are comfortable with that you respect that and wait for an answer and fortunately that answer came about 10:30 Monday morning rather than 4 o'clock in the afternoon.

Q. Paul, USC travelled down to open your new basketball facility to play there. Go into a little detail about what that facility means for your basketball program and what it going to bring to the table of the ACC and direct of your basketball program?

PAUL DEE: One of the areas of where our program had not been fully funded and fully taken care of was our basketball programs. Miami had been over the years very successful in football and baseball and in fact from 1971 to 1985 we dropped basketball because we didn't have a place to play. The city of Miami didn't have a place to play -- well we had different places to play but we were like the Miami nomads, I think in the history of the university we played at 16 different venues in the city, the largest of which sat about 10. We played in a theater -- those of you that came down to the Hyatt Hotel and saw us play in a theater everybody was in their comfortable seats and on a stage was a court. We have had some interesting venues. But it had always been important to us that as a university to have our own facility, and through the help of a number of people and our fans, we were able to construct a brand new facility as you said and we opened it this January the 4th, and we had the great fortune to have that building opened with a great university ***North Carolina*** and we felt that it would be no more fitting way there and -- to bring in one of the great basketball teams in the country to help us open that arena. I don't know what word to use next but we won. And for those of you that saw it was a great game. ***Rice*** hits at the buzzer to go into overtime and we have a great game, but the night before we have been in Phoenix and played in the National Championship game in football and was quite a weekend to play in football and play at that high level and go home and open an arena that we wanted for 75 years, and we were just very proud that the university now has that facility and that facility is available as we move forward in this League.

JOHN SWOFFORD: I would add to that if I may, that knowing the tradition and history and importance of basketball in the ***Atlantic Coast***

Conference that Miami now having an on-campus facility was a real plus in terms of our ADs and presidents in the ACC.

Q. Commissioner, had you spoken about trying to keep a long the natural rivalries alive. Speak to the addition of that what are maybe of the biggest headaches as far as scheduling and -- (inaudible) ---

JOHN SWOFFORD: Initially we won't break into two divisions so that's really not an issue at this point in time. May become one in the future and basically I think whether it's in basketball or in football you have a situation in football where everybody will not play everybody every year and so the challenge there is to set up -- maintain the rivalries that you want to maintain on an annual basis, but then set up a rotation that's reasonable and fair and attractive and in basketball you would have some that would be -- you'd play some teams twice in a year home and home but others you would not, so you'd have to set up, you know, a similar type of rotation. And in terms of the particulars and specifics of that we're just not there yet. That's something we'll sit down with our schools and Athletic Directors inclusive of Jim and Paul before finalizing that. But certainly it's doable.

Q. What do you constitute the BCS League, there's some question whether the BIG EAST is one ---

JOHN SWOFFORD: Well, I think that's something that we'll just have to talk about when things settle a bit more. I would go into it expecting that the BIG EAST will make some changes, whether it's two more or more than two, would be my guess. And then I think there would have to be an evaluation with the Bowls, with ABC, the current contract holder and with the BCS board as to what that means. My guess is and quite frankly my hope would be that the BIG EAST, when that's all said and done would remain a BCS partner.

Q. When it comes to times to decide this is it too simplistic to say that the BCS commissioners to owe the BIG EAST one or is it still a product of the market place and the Bowls and ABC and everything else?

JOHN SWOFFORD: Well, I don't know. I think both of those things could enter into it. We're in the middle of a contract that includes you know, the conferences as listed and I can't speak -- it is something I have not been a part of a decision on, Dennis, at this point in time, so there's only so much I can really say about it.

Q. (Inaudible) if we went through 12 we would have a great conference, if we went to nine we would have a great conference. Now you have got 11, but where does the basic appeal come from to make a -- (inaudible) the group has been quoted extensively in numerous newspapers talking about the only thing that works is 12. It's very difficult for me to understand where all these 12 are coming from and how the mega conferences is the only way to go?

JOHN SWOFFORD: Well, I think the 12 comes obviously from that being the number to have the championship football game at the conference level and go into the two divisions and I think the fact that the perception and I think it's a real one that the Big-12 conference is stronger than the Big 8 or the Southwest Conference was, that the Southeastern Conference is stronger as 12 than it has ever been and I'd say both those conferences you know, the SEC basketballWise has gotten actually stronger as a 12-member conference, I think is fair to say. So I think that's where the perception comes from.

*Q. Commissioner, now with basketball players down in South Florida, now in **Virginia** can you go -- have you thought about all the locations for the athletics coast tournaments in the future about the spots about --*

JOHN SWOFFORD: We're already on what was a 10-ear rotation so we haven't talked about it beyond the current rotation, which takes us through 2011, so we're -- we have got a few years, I think, before we start talking about extending that.

Q. To try to maintain the rivalries that you have within a 16 games basketball schedule would it be possible to do as they do in the Big-10 have some non-conference ACC teams playing some non-conference games and also if it takes -- if it took 7 votes to get something done with nine, with 11, how many votes does it take to get something done now?

JOHN SWOFFORD: It's a simple majority in anything other than expansion.

Q. For expansion?

JOHN SWOFFORD: To get something done. In terms of are you asking in terms of expansion itself?

Q. Yes.

JOHN SWOFFORD: That's something that we will need to determine.

Q. Possible non-conference getting --

JOHN SWOFFORD: Sure, that's possible. If schools in the conference wanted to do that you know, they could do that; whether any will have an interest in doing so remains to be seen.

I think that's done a few times in the Big-10. Fred may know – Fred how many – not very often, I don't think, but.

VOICE: Last year had --

JOHN SWOFFORD: One, Indiana Purdue with –

VOICE: Yes.

JOHN SWOFFORD: But they weren't playing because of the rotations so they decided to play a non-conference game, is that the first time that they have done that?

VOICE: First that I know of.

Q. So much has been made about football. We were left with the impression that some of the basketball players felt that they have not been considered enough particularly the importance that basketball has played in this League through the years. Could you address that?

JOHN SWOFFORD: I think that this is a decision that's made totally as a conference and the normal processes that the AD, faculty rep, presidential level with the people on those campuses making the determination as to who they bring in an advisory capacity on the individual campuses. This has been discussed with football and basketball coaches, men's and women's basketball coaches over -- somebody help me, but probably over the last two or three spring meetings that we have had there have been discussions with the coaches' groups about the concept of expansion.

Q. When this all began two months ago there was very little talk of geographic footprint. Whether it worked out that way by playing or not, there's some talk about it now, did you learn anything by that and if and when you go to 12 will geographic footprint have a much larger role in determining what happens?

JOHN SWOFFORD: Well, President Clough may want to address this. I think what we learned from it ultimately is that in terms of a consensus and in reaching the 7-vote level that – that may be geography in the footprint came to mean more at the end of the process than it appeared to mean at the beginning and during a large part of the process because I do think that had something to do with bringing us to the consensus of where the presidents ended up.

DR. G. WAYNE CLOUGH: Well, I would just add that I think that was one of those definitely in the details kinds of issues that as we got closer and closer to thinking about a decision that we realized it was something that you needed to include in the mix and we in the early days we might not have thought about it as much as perhaps we did. We certainly appreciate the fact that for example in Florida almost all of the schools in the ACC have a large number of alumni and that's a great fit for us because that means we have got a lot of fans down in Florida, they will love our relationships and rivalries that we'll develop with Miami in addition to the great ones we already have with Florida State. As we got further into the process we started looking at a lot more of the details where our alumni really were, where we recruit our student from all those kinds of issues, so all played part and parcel in the decision process.

BRIAN MORRISON: I'd like to thank the Members of the Panel tonight for taking part in this press conference. That concludes the question and answer session. I'd like to thank you again for participating tonight and to the media.

Subject: Academic Eligibility-Football Handbook
Attach: Football Student Handout-Academic Requirements.xls

Corey,
Take a look at this grid to see if it looks ok to you.
If ok. then please let Lance know. If not, I'm open to suggestions....
I do not think it is necessary to have the %'s noted. If they have completed
the necessary Degree hours, they will meet the minimum % for satisfactory progress.

This is to replace the former page in the handbook....

Academic Eligibility

Year of Initial
Collegiate Enrollment

Fall 2003 and after

Prior to Fall 2003
(Fall 2002, 2001,2000,1999)

Student-athletes must meet two sets of eligibility requirements. UNC eligibility requirements must be met in order for the student to return to the University each year. NCAA requirements must be met in order for the student-athlete to participate in athletics each year.
The above grid represents minimum requirements for UNC and NCAA academic and athletic eligibility.

7/8/2003

Academic Eligibility

Entering **3rd Semester** of Enrollment at UNC	Entering **5th Semester** of Enrollment at UNC	Entering **7th Semester** of Enrollment at UNC	Entering **9th Semester** of Enrollment at UNC
1.800 cum GPA 24 Degree Hours >=18 credits earned during academic year (Fa & Sp)	1.900 cum GPA 51 Degree Hours >=18 credits earned during academic year (Fa & Sp)	2.000 cum GPA 78 Degree Hours >=18 credits earned during academic year (Fa & Sp)	2.000 cum GPA 105 Degree Hours >=18 credits earned during academic year (Fa & Sp)
1.500 cum GPA 24 Degree Hours >=18 credits earned during academic year (Fa & Sp)	1.800 cum GPA 51 Degree Hours >=18 credits earned during academic year (Fa & Sp) **	1.900 cum GPA 78 Degree Hours >=18 credits earned during academic year (Fa & Sp) **	2.000 cum GPA 105 Degree Hours >=18 credits earned during academic year (Fa & Sp) **

Subject: Color-Coded Recruiting Calendars

Coaches -
The NCAA has created color-coded recruiting calendars. Please find information about them and links to them below. Please contact me with questions and concerns. Thanks!
- Lisa

Development of Color Coded Recruiting Calendars. Color-coded recruiting calendars are being added to the NCAA website. Currently, all DI sports color coded calendars (for those sports that have recruiting calendars) are already posted on the page where the individual sport calendars appear. The links below show examples for men's and women's basketball. We have added a link to the recruiting calendars on the right side menu of the Administrators Home Page. Other color-coded recruiting calendars in both divisions are soon to follow. Please click on the links below to review the basketball calendars in adobe format. Just scroll to the bottom of the page to access the calendars. (Contact: Bo Kerin)

To: Holliday, Corey <cholliday@uncaa.unc.edu>
Subject: Fall 2003 Guest Coaches and Letter Templates
Attach: FlorinLetter F2003-Home.DOC; Fall2003GuestCoaches.xls

---

Corey,
If you have any questions, let me know. Please remember this is a working document (Excell) and that it will undoubtedly change as I get responses from the faculty.
The letters will go out on Tuesday (doug is on vacation until Monday) and I will be following up with the faculty the week I return.

Please call me (cell phone) regarding any grade situations. I will be taking home all eligibility sheets and susan maloy has copies. Please communicate with her rather than Jenny, as Jenny is not aware of ncaa rules as they pertain to satisfactory progress towards degree, degree credits, etc.....

thanks.
cr

If you get the media guides can you have them put them in my office while I'm gone?

Subject: Re: Game week schedule

Just a quick comment....

Many schedules need modifications. But most of those changes will not interfere with Monday afternoon practice. The guys scheduled for labs or specific classes on Monday afternoons are most likely already scheduled and I can determine that once I pull all the schedules. (I don't recall too many conflicts, but there are some)

I will be looking at schedules once I complete the compliance Satisf. Progrss sheets for eligibility. Once I pull those I can copy to you, but many will be changed once the guys can get online to add/drop starting the 23rd of August.

cr

>>> Corey Holliday 08/13/03 09:42AM >>>
Here's the FSU game week schedule. Let me know if you have any concerns or suggestions. Once the semester starts, we will pencil in study table on Sunday nights, unfortunately like last year the earliest it will be able to start will be 7:45 pm (but as the season went on Coach Bunting changed the Sunday routine and study table started at 7:00 pm). On Monday (September 8th and 15th), we may have to practice (which is usually the player's day off) in the evening because of the open week schedule and the Bruce Springsteen concert, so if you could send over the guys class schedules we can plan practice times for those two weeks.

Thanks

Subject: Staff Retreat

Corey,
The entire Academic Staff will be out of the office tomorrow. (Friday 15)
If you need to speak to me, please call me on my cell. I will be in meetings most
of the day, but there will be times that we will break and I can call you back if you need
to speak to me.

Academic eligibility evals are done from my end and going up to the Registrar
tomorrow or Monday. All is well.
I'll be looking at schedules this weekend
and next week. I'll touch base on Monday.
Have a good weekend.

Subject: Clemson sets six top goals

Clemson sets six top goals

By Duane Rankin
CLEMSON BUREAU
drankin@greenvillenews.com

CLEMSON - Clemson University revealed Thursday six priority goals within its strategic plan designed to improve the athletic department.

With an emphasis on providing a comfortable environment for minority student-athletes and constructing "championship quality facilities," the plan was developed by Carr Sports Associates of Gainesville, Fla., over the last year at a cost of $60,000.

"This document will become our reference point or road map for how we proceed at Clemson," Clemson athletic director Terry Don Phillips said. "It will be on a board in our conference rooms and it will be something we review on a daily basis to keep us on track in terms of achieving the goals set out in the report."

Phillips commissioned the consulting team that included former Atlantic Coast Conference commissioner Gene Corrigan and two other former athletic administrators, Gerald O'Dell and Bill Carr.

Carr Sports Associates made four visits to Clemson and worked 712 total hours on the plan. Phillips did similar work while serving as Oklahoma State athletic director.

"We were able to generate a net gain of about $1 million a year to the

athletic department (at Oklahoma State), after the debt service," he said. "I don't know that we could have done it and really stayed on point all the way without the strategic plan."

Clemson's 150-page document outlined 14 goals in its efforts to achieve the university's 2010 goals for athletics. The six priority goals, not ranked in order, are:

* Create a multicultural academic and social environment conducive to the success of minority student-athletes.
* Improve athletics' position within the ACC and NCAA Division I.
* Improve student-athlete retention and academic success.
* Ensure ACC and NCAA rules compliance and institutional control.
* Generate sufficient revenues to support athletics' strategic direction.
* Plan and build championship quality facilities.

Included in the report were numerous charts comparing Clemson to other athletic departments in the ACC, Southeastern Conference and NCAA.

The WestZone project at Memorial Stadium, already in the works under Phillips' direction, is mentioned in the plan and will provide a revenue stream to help finance other facility projects.

One area highlighted in the strategic plan is a comparison of athletic budgets and student athletic fees at Clemson to other ACC schools.

Clemson ranks seventh in money derived from annual student athletic fees. Maryland tops the ACC with a $303 annual fee to students that generates $7.5 million in athletic department revenue. Clemson charges students $78, which generates $1 million a year.

The note in the report says, "increase pending," but Phillips backed away from confirming that he plans to raise student fees for athletics.

"I can't say it's pending, but we're certainly going to address that issue and see what alternatives there are," Phillips said.

The report states: "While there are political sensitivities on the subject, student fees are a possible source of additional revenue for Clemson athletics. Because of multiple state budget cuts that have reduced Clemson's state funding by 26 percent in two years, student fees have already increased substantially."

Phillips said those cuts in funding by the state only add to the need for a strategic plan.

The strategic plan reinforces President James Barker's 2010 goals for athletics, which includes winning a national football championship, two championships in Olympic sports and making two Final Four appearances in basketball.

DEADLINE FOR NOMINATIONS:

SEPTEMBER 15, 2003

THE NATIONAL FOOTBALL FOUNDATION AND COLLEGE HALL OF FAME, INC.

2003 SCHOLAR-ATHLETE AWARDS
"The Most Prestigious Scholarships In College Football Since 1959"

CRITERIA

The qualifications are as follows:

- The nominee must be a senior or a graduate student, and in his final year of eligibility.
- The nominee must have attained a minimum grade point average of 3.0 on a 4.0 scale.
- The nominee must have shown superior academic application and performance.
- The nominee must have shown outstanding football ability and performance as a first team player.
- The nominee must have demonstrated outstanding school leadership and citizenship.

Only one candidate per institution may be submitted.

The National Football Foundation's Awards Committee utilizes a 40-40-20 grading system, whereby up to 40 points may be credited towards academic accomplishments; 40 points towards football performance; 20 points awarded for school/civic/community activities. **ALL FOOTBALL PLAYING INSTITUTIONS (I-A, I-AA, II, III and NAIA) ARE ENCOURAGED TO MAKE A NOMINATION.**

It was 44 years ago when The National Football Foundation unveiled an entirely new concept in college football, -- its National Scholar-Athlete program. In the history of American sports, this was the first time an organization honored young men, not only for their ability as football players, but also for their academic and civic leadership. The Foundation's National Scholar-Athlete Awards program consists of graduate fellowships, which are awarded on an annual basis to a select group of college football players in their senior year of eligibility who have demonstrated outstanding academic application and performance, exemplary school and community leadership and citizenship, and superior football performance, throughout their amateur career.

This fall, The National Football Foundation's Awards Committee will again select approximately 15 scholar-athletes from across the country for graduate fellowships, granting each $18,000 towards their postgraduate studies. The recipients will be selected from Division I-A, I-AA, II, III, and the NAIA. The college football Scholar-Athlete of the year will be awarded the Vincent dePaul Draddy Trophy, a $25,000 fellowship dedicated in memory of the Foundation's former chairman.

In addition to the $18,000 postgraduate scholarships, the Foundation also awards supplemental grants in specialized areas of postgraduate study. Scholarship winners may be eligible for these additional grants ranging from $1,000 to $5,000.

The recipients selected are guests of The National Football Foundation in New York for a two-day stay at the Waldorf-Astoria Hotel. They will be guests of honor, along with the Class of 2003 Division I-A inductees to the College Football Hall of Fame, at the 46th Annual Awards Dinner to be held December 9, 2003.

RE: Performance Reviews for SPA Employees

It is time to complete the Annual Performance Reviews for the **period ending May 31, 2004**. This is also the appropriate time to update Work Plans for each employee. If the Work Plan is current and does not need updating, simply submit a copy of the current Plan and write at the top in red ink "Work Plan remains the same for the period to end May 31, 2005". If the Work Plan has changed, please submit a new Work Plan Form (copy attached) for the period ending May 31, 2005. The Performance Review should be completed on the most current form, a copy of which is attached. (**REMINDER**: the Work Plan and Performance Review cycle is June 1 to May 31).

Upon completion of each evaluation and work plan:

1. give a copy of each to the employee.
2. keep a copy of each for your files.
3. **send the original** WORK PLAN on which the Performance Review was based to my office for our files.
4. **send the original** PERFORMANCE REVIEW to my office for our files.
5. **send the original** Work Plan for the period ending May 31, 2005 (if revised), or a copy of the current unchanged Work Plan (indicate "Remains unchanged for the period ending May 31, 2005" at the top) to my office for our files.

As required by the Office of State Personnel, we must report over-all Performance Reviews on each employee, and retain a copy of each Work Plan on which they were evaluated. **Please note that Performance Reviews, Work Plans on which the reviews were based and the Work Plans for the period ending May 31, 2005 should be completed and returned to our office NO LATER THAN June 2, 2004.**

Evaluations must be reported to Employee Records and entered into the Payroll system in order for any increases that may be awarded to be recognized in paychecks a current basis. **It is imperative that you complete and return your performance reviews by the aforementioned date. Reviews not received by this deadline will result in the employee not receiving increases for which they may be eligible.**

Please be advised that the Legislature has not yet made any decisions concerning increases for 2004-2005. I will notify you immediately as soon as that information is available.

If you have any questions concerning this process, please call Joyce at 962-7850.

RE: Performance Reviews for SPA Employees

It is time to complete the Annual Performance Reviews for the **period ending May 31, 2004**. This is also the appropriate time to update Work Plans for each employee. If the Work Plan is current and does not need updating, simply submit a copy of the current Plan and write at the top in red ink "Work Plan remains the same for the period to end May 31, 2005". If the Work Plan has changed, please submit a new Work Plan Form (copy attached) for the period ending May 31, 2005. The Performance Review should be completed on the most current form, a copy of which is attached. (**REMINDER**: the Work Plan and Performance Review cycle is June 1 to May 31).

Upon completion of each evaluation and work plan:

1. give a copy of each to the employee.
2. keep a copy of each for your files.
3. **send the original** WORK PLAN on which the Performance Review was based to my office for our files.
4. **send the original** PERFORMANCE REVIEW to my office for our files.
5. **send the original** Work Plan for the period ending May 31, 2005 (if revised), or a copy of the current unchanged Work Plan (indicate "Remains unchanged for the period ending May 31, 2005" at the top) to my office for our files.

As required by the Office of State Personnel, we must report over-all Performance Reviews on each employee, and retain a copy of each Work Plan on which they were evaluated. **Please note that Performance Reviews, Work Plans on which the reviews were based and the Work Plans for the period ending May 31, 2005 should be completed and returned to our office NO LATER THAN June 2, 2004.**

Evaluations must be reported to Employee Records and entered into the Payroll system in order for any increases that may be awarded to be recognized in paychecks a current basis. **It is imperative that you complete and return your performance reviews by the aforementioned date. Reviews not received by this deadline will result in the employee not receiving increases for which they may be eligible.**

Please be advised that the Legislature has not yet made any decisions concerning increases for 2004-2005. I will notify you immediately as soon as that information is available.

If you have any questions concerning this process, please call Joyce at 962-7850.

Subject: 2005 Fall Semester Schedule of Head Coaches' Meetings

Attach: coaches mtgs.xls

Folks,

Given my lack of prowess with technology, I thought I would send you another schedule of meetings that is "more legible," especially if you desire to print the schedule. The email I sent you yesterday with the meetings' schedule, well if you print it, IT LOOKS BRUTAL, and may be tough to read!!! Thus, see the attachment and print it if you wish!

Sorry for this "double sending" of the meetings' schedule, and have a great day!

Enjoy your weekend!

Larry

Atlantic Coast Conference Announces 2005-06 Academic Honor Roll

GREENSBORO, N.C. – The 50th annual Atlantic Coast Conference Academic Honor Roll, noting academic excellence by student-athletes for the 2005-06 school year, was released today by Commissioner John D. Swofford.

The Honor Roll is comprised of those student-athletes who participated in a varsity-level sport and registered a grade point average of 3.0 or better for the full academic year. In its first season as a 12-member league, the ACC set the conference record for the 20th consecutive year as 2,597 student-athletes were honored for their hard work in the classroom this past season. Duke led the conference in total selections for the 18th-straight year placing 362 student-athletes on the list. The Blue Devils narrowly edged Boston College for the top spot as the Eagles placed 359 athletes on this year's Academic Honor Roll. North Carolina was third with 275, while Maryland was fourth with 254. Virginia tallied 221 student-athletes, followed by Clemson (195), Florida State (187), NC State (184), Virginia Tech (177), Georgia Tech (147), Wake Forest (132) and Miami (104).

Headlining this year's Honor Roll are 16 five-time honorees from seven different schools. Florida State and Wake Forest each had three, five-time honorees, while Clemson, Georgia Tech, Maryland, North Carolina and NC State all had two a piece. The five-time honorees included Clemson's Josh Cribb and Bradley Gibson; Florida State's David Castillo, Lacy Janson and Andrew Wilson; Georgia Tech's Mike Barbosa and Adam Jones; Maryland's Michael Fleg and Mandy Pascual; North Carolina's Camilla Iheneto and Doug Kingston; NC State's Jesse Ledbetter and Abigail Kelkie; and Wake Forest's Wesley Allen, Anne Bersagel and Jill Miller.

Florida State's Garrett Johnson, a four-time member of the ACC Honor Roll, was named a Rhodes Scholar in 2006 and is the league's first Rhodes Scholar athlete since 1987. Johnson led the Seminoles to their first team Outdoor Track & Field National Championship this past year, while earning a pair of individual national titles in the shot put during the indoor and outdoor seasons.

Also included on this year's list were National Players of the Year in Duke's J.J. Redick, Georgia Tech's Kristi Miller, Maryland's Paula Infante, North Carolina's Andrew Miller and Virginia's Matt Ward. Redick, winner of the Sullivan Award as the country's top amateur athlete and ACC Male Athlete of the Year, led the Blue Devils to the ACC regular season and tournament championships. Miller was named the Honda Player of the Year in women's tennis as she led the Yellow Jackets to their second-straight conference championship. Infante was tabbed the ACC Female Athlete of the Year guiding the Terrapins to the 2005 NCAA Field Hockey national title. A first-team All-American, Infante was the recipient of the Honda Award. Selected as the sixth overall pick in the 2006 MLB Draft, junior south paw Andrew Miller of North Carolina won the Roger Clemens Award, given to the nation's top collegiate pitcher. Miller was also selected as Baseball America's Player of the Year. Ward claimed the Tewaaraton Trophy after leading the Cavaliers to the men's lacrosse national championship and a perfect 17-0 season with a 15-7 win over Massachusetts in the title match.

Wake Forest's Anne Bersagel, a five-time ACC Honor Roll honoree and the 2005-06 ESPN the Magazine Academic All-American Member of the Year was also featured on this year's list. NC State's Shaina Ervin, the 2006 ACC Softball Tournament MVP and a three-time Honor Roll member, led the Wolfpack to their first-ever ACC Softball Championship in just their third season of existence.

Miami's Kelly Jennings, a first-team All-American and the Seattle Seahawks' first round draft pick in the 2006 NFL Draft, was honored for the second time in his career. Also receiving honors for the second time in her career was Virginia Tech's Angela Tincher, the ACC Softball Player and Pitcher of the Year this past season.

Boston College women's basketball player Brooke Queenan and Clemson men's soccer player Bradley Gibson were both named to the Academic Honor Roll and are recipients of the 2006 ACC Weaver-James-Corrigan postgraduate scholarships.

A complete listing of the student-athletes on the 2005-06 ACC Honor Roll follows:

2005-2006 ACC Academic Honor Roll

Boston College (359): Joseph Adams 1 - Ice Hockey; Kristin Allain 1 - Softball; Carrie Amarante 1 - Sailing; Jamen Amato 1 - Soccer; Claire Arpin 1 - Rowing; Nicholas Asselin 1 - Baseball; Gregory Avallon 1 - Skiing; Subject: 2007 SPRING SEMESTER - HEAD COACHES' MEETING SCHEDULE

Attach: 2007 Spring Sem. Coaches Mtgs..doc

Colleagues,

Attached is the FINAL HEAD COACHES' MEETING SCHEDULE FOR THE 2007 SPRING SEMESTER. Please remember to CONTACT DR. BETH MILLER IF YOU ARE UNABLE TO ATTEND ANY MEETING. If you should have any questions concerning the schedule of these meetings, please contact Dr. Miller or me.

Take care and best wishes to both you and your family for a very HAPPY HOLIDAY SEASON!

Thank you and all the best.

Larry Gallo, Jr.

2007 Spring Semester Coaches' Meetings

January 17	Wednesday	8:30 AM	Koury Conference Room
February 14	Wednesday	8:30 AM	Koury Conference Room
March 28	Wednesday	8:30 AM	Koury Conference Room
April 30	Monday	8:30 AM	Koury Conference Room

Koury Conference Room ~ located in Koury Natatorium

Thank you,

Larry Gallo, Jr.

President Richard Brodhead
207 Allen Building
Duke University
Durham, NC 27708

Dear Dick:

We are pleased to submit the enclosed "*Report of the Campus Culture Initiative Steering Committee*". Since last April, when you established this Committee; we have been engaged in a thoughtful and comprehensive consideration of Duke's campus culture and ways to improve it. We have examined issues, analyzed data, and engaged in multiple conversations with individuals and groups across campus. We have arrived at a framing of fundamental and interrelated issues that guided our consideration of our recommendations. Although campus culture is broad, we understood that our focus was primarily on undergraduate life and recognize that there is additional work to be done with regard to graduate and professional students, staff, and the larger community.

The Committee's report and recommendations reflect the general sense of the majority of the Committee. Given the Committee's size and the diverse views of its members, it is not surprising that there were differences among members about issues and recommendations. The Committee, however, at its meeting today "endorsed this report as a thoughtful reflection of its work."

The Committee recognizes that this report is just one point in an ongoing conversation that must be sustained, and that the entire University community – students, faculty, staff, and alumni – must now engage in the discussion and the process of implementation through its regular administrative and deliberative processes.

We wish to underscore the effectiveness of the CCI Committee's structure and function–a committee comprised of faculty, students, staff, and alumni that engaged in collaborative problem solving across the units of academics, student affairs, athletics, campus services, and admissions. The Committee enjoyed the challenge of its charge and its sense of common purpose in working to make Duke an even greater community. With the submission of this report, the CCI Steering Committee concludes its work.

Bob Thompson

Vice-Chair, Campus Culture Initiative Steering Committee

THE REPORT OF THE CAMPUS CULTURE INITIATIVE STEERING COMMITTEE
FEBRUARY, 2007

OVERVIEW

Duke University is a university of the 21st century, emboldened and challenged by the dynamics of a changing world. Situated where it is—the global north, the United States, the American South—and designed as a research institution of higher learning, Duke has developed its identity, vision, and reputation over the years. By now, it has experienced a remarkable rise to prominence in the top echelon of the nation's research universities. This success has been fueled by the recruitment and support of outstanding faculty and students, by an innovative undergraduate curriculum, by dynamic graduate and professional schools, and by what former President Sanford referred to as Duke's "outrageous ambition" to become one of the great national and international centers of teaching and learning. As always, however, Duke is, and must be, in dialogue with the surrounding world about which its mission – academic, ethical, and social – is to produce, transmit, and transform knowledge. In an era of heightened mobility, ethnic diversity, economic flux, and digital circuitry, the University faces particular challenges in preparing students and pursuing research that deals with the complexities of today's world. As a leading research institution that is committed to teaching students to have the savvy, sensitivity, and skills to be global citizens, Duke University was intended to be, and is, more than an ivory tower. We reaffirm our commitment to being a worldly institution, one that takes seriously its place in the world and the place all of us—as students, faculty, and staff—assume both at Duke and in the wider world beyond.

Over the past fifteen years, Duke has systematically set a course to strengthen the undergraduate experience: these efforts began with the transformation of East as a first-year campus and have continued with the implementation of a new liberal arts curriculum, a residential plan that brought all sophomores to West, the creation of the West-Edens link and Keohane quad, and the current plans for re-imagining Central Campus. The Campus Culture Initiative represents yet another step in this ongoing process, identifying challenges and opportunities to move Duke forward to the next stage of its institutional development.

The Steering Committee has worked over a nine-month period to engage in a thoughtful and collaborative conversation about the Duke community, to gain a richer understanding of campus culture, to identify areas of strength as well as areas where there are problems or issues, and to make recommendations for improvement. In this process, the Committee recognized the momentum and accomplishment of the University; it reaffirmed that much good can and should be said about the Duke community. At the same time, it came to better understand how Duke is experienced differentially by different members of its community, that there are often pressures for conformity which work against our institutional vision as an inclusive academic community, and that engaging the notion of "difference" more deeply and directly will enable the University to accelerate its rise to the top.

To address these challenges, the CCI Steering Committee identified six interconnected areas for focusing attention and making recommendations:

- Curriculum and Experiential Learning
- Faculty-Student Interaction
- Residential Life, Dining, and Social Life
- Alcohol
- Athletics
- Admissions

The Committee recognizes that stewardship of the Duke community must be a collaborative process involving all its members, and that this report and its recommendations will need to be discussed and refined on a variety of levels – by the University's administration, faculty, students, and alumni. Indeed, the entire Duke community must take ownership and play a significant role in considering thoughtfully how best to enhance campus culture. The work ahead is to join together in this conversation with a sustained commitment to the University's advancement.

It is the hope of the Campus Culture Initiative Steering Committee that this report and its corresponding recommendations will promote important conversations, significantly help strengthen campus culture, and further advance Duke as an even greater and more excellent community of teaching and learning.

THE REPORT OF THE CAMPUS CULTURE INITIATIVE STEERING COMMITTEE
FEBRUARY, 2007

Since its founding in 1838 as Union Institute and transformation in 1924 into Trinity College, Duke University has experienced a remarkable rise to prominence in the top echelon of the nation's research universities. This change has been fueled by the recruitment and support of outstanding faculty and students, by an innovative undergraduate curriculum, and by dynamic graduate and professional schools, – in short, by what former President Sanford referred to as Duke's "outrageous ambition" to become one of the great national and international centers of teaching and learning. Complementing this pursuit of excellence has been a commitment to strategic analysis and self-evaluation to identify ways to strengthen the University as a whole. As a young university, Duke is particularly proud of its institutional flexibility and creativity, as well as its institutional courage not to shy away from tough issues.

While Duke continually strives to move forward, it has always had much of which to be proud. The University is proud of its students, faculty, and staff who constantly work hard to realize the ideals of a great university, who contribute on a daily basis to their individual and collective growth, and who have outstanding accomplishments in the generation, transmission, and application of knowledge in the service of society. Duke is renowned for the quality of its programs, the progress it has made in becoming a more diverse community, and its commitment to excellence in all of its endeavors.

As we move forward in a world increasingly characterized by change and the fragmentation of many communities, Duke – no less than other universities and our society as a whole – faces challenges. But great universities are those that change to meet significant challenges, and thereby act as agents of change through their leadership. If universities are to continue to nurture in students the ability to succeed in their personal and professional lives, they must find more effective ways for students to gain a deeper understanding of themselves and others, to develop even greater cross-cultural respect and appreciation, and to commit more readily to use knowledge in the service of society. Only by asking students and faculty alike to engage more fully in building community can universities instill in their students the ability to work toward common ground and, thereby, prepare them for leadership in the 21st century.

I. THE CAMPUS CULTURE INITIATIVE AND ITS PROCESS

Within this context, last spring's lacrosse event and its ensuing controversies evoked strong emotions and discussions about issues of race and gender, class and privilege, difference and respect, athletics and academics, and town and gown. While these social and cultural issues have long been of concern in our larger society and on Duke's campus, these events publicly challenged Duke to closely re-examine itself to find more effective ways to enhance the sense of social responsibility and mutual respect among members of its community. To assess the extent to which the University's institutional practices promote these values and behaviors and to make recommendations for

strengthening Duke's campus community, in April 2006 President Brodhead launched the Campus Culture Initiative (CCI; see Appendix 1: Committee Charge).

The work of the Campus Culture Initiative Steering Committee has been multifaceted, proceeding in four phases. In spring 2006, the Committee began to frame its approach to the charge and organize its work (see Appendix 2: Steering Committee Membership). From the beginning, the Committee sought to utilize relevant existing data[1] on aspects of campus culture, including the annual surveys conducted through the Office of Institutional Research and specific studies, such as the Campus Life and Learning Project and those conducted through the Trinity College Office of Assessment. In addition, the Committee connected with other groups and offices on campus that had relevant information and perspectives, such as the Women's Center, the Mary Lou Williams Center, the Center for Lesbian, Gay, Bisexual, and Transgender Life, and the Council on Civic Engagement. Over summer 2006, the Committee's work entered a second phase in which it focused on identifying key issues and opportunities for improvement and gathering data relevant to these issues. Over the Fall 2006 semester, the Committee analyzed and integrated information, formulated questions, and garnered input from the larger campus community through Town Hall meetings with faculty, students, and staff, and an array of individual and small group sessions (see Appendix 3: List of Meetings). During this time, members of the Committee met with the Presidential Council, provided updates to the University Board of Trustees, and gave the President a November 2006 oral report. The final phase began in January 2007, when the Committee developed a vision of undergraduate campus culture and formulated a set of interrelated recommendations to realize this vision, as represented in this report.

The report and recommendations presented here reflect the general sense of the majority of the Committee. Given the size of the committee and the diverse views of its members, it is not surprising that there were differences among members about specific issues and recommendations. The CCI Steering Committee, however, endorses this report as a reflection of its work.

The Committee understands that this report and the 28 recommendations it proposes will need to be subsequently discussed and considered on a variety of levels; it also recognizes that a number of committees appointed by the Provost, the Arts and Sciences Council, and the Academic Council are also concurrently working on issues critical to campus culture. Stewardship of the Duke community must be a collaborative process involving all its members, including administrators, faculty, students, and alumni. Indeed, the entire Duke community must take ownership and play a significant role in considering thoughtfully how best to enhance campus culture. The task now is to join together in this conversation with a sustained commitment to the University's advancement and to the necessary and essential work that lies ahead.

[1] The nature of the measures and corresponding data varied from controlled, longitudinal, panel studies of representative cohorts of students in the Campus Life and Learning Project, through surveys conducted annually across private research universities, to information and perspectives reported by individuals.

II. Duke as a Dynamic Institution

Universities are dynamic, continually evolving places, and in many ways, Duke University is synonymous with institutional change. From its earliest days as the Brown Schoolhouse to its conversion to Trinity College and subsequently to our modern-day University, Duke has taken advantage of opportunities and circumstances to adapt and transform itself. Duke has risen from a predominately regional university several decades ago to a national and international one of the highest rank today. And its trajectory has been particularly steep in recent decades. Over the past fifteen years, Duke has systematically set a course to strengthen the undergraduate experience. Some would argue that the 1995 conversion of East Campus to the First Year Campus marks the beginning of the University's recent commitment to enhance the undergraduate experience. Subsequent to that highly transformative decision, undergraduate reforms have included dramatic enhancements to curricular and experiential learning opportunities, the development of the Community Standard, new residential models and requirements, and a marked increase in the diversity of the student body. Simultaneously, faculty composition, roles, and demands have undergone their own transformation, as Duke's prowess as a research university grew exponentially. Students, too, have changed as the criteria for admissions have become more challenging.

The stimuli for these important changes in Duke as an educational institution have sometimes come from intentional institutional planning and thoughtful deliberation about the University's future, as was the case with the Duke's strategic plans, *Building on Excellence* (2001) and *Making a Difference* (2006). At other times, Duke has implemented changes, prompted by unanticipated circumstances, events, and incidents – both internal and external to the campus community, such as the 1968 MLK Vigil. In a moment that represents the impetus from unanticipated events, the Campus Culture Initiative represents another imperative for critical self-reflection. The University's challenge at this juncture is to take maximum advantage of this moment in its history to experience another transformative episode, one that future generations will look back to with the same regard and appreciation as they do for earlier decisions that expanded the Duke community physically, intellectually, demographically, and geographically.

III. The Committee's Guiding Vision: The Duke Academic Community

Foundational to the CCI, and to this report, is a vision of what Duke University – as an academic community and undergraduate culture – aims to achieve and embrace. Over the past decades, Duke has worked to provide a strong liberal education tailored to the particular strengths of a research university. Duke's institutional self-definition is reflected in its strategic plan, *Making a Difference* (September 2006), a principal goal of which is to foster in the University's graduates the ability to generate, evaluate, and apply knowledge in the service of society, and to become leaders who make a positive difference in the world.

To develop fully their abilities and talents, undergraduates must engage meaningfully in the life of the Duke academic community. An academic community can be viewed as an

interactive and ongoing conversation in which the community and its members grow in wisdom and understanding through inquiry and interaction. This conversation is not just confined to the classroom, but extends to every aspect of campus life and is the underlying narrative running through both academic and social encounters. Participation in this conversation is a privilege of being part of an academic community, and no social group should be excluded from that conversation; indeed, the quality of the conversation and scope of learning is significantly enhanced by the diversity of identities, experiences, and thoughts, and by the respectful nature of all participants' interactions. At Duke, this conversation takes place at a university founded recently enough to prize vision, ambition, and courage in the ongoing task of creating its own identity. The setting of the Duke conversation, by its location, is in the South, a region in which certain social groups have historically been excluded, and, by its time, in a period in which commitments to personal freedom and individual achievement, concerns over psychological stress and cultural diversity, and demands for moral engagement and social responsibility co-exist in complex ways. The University has a critical responsibility to ensure that this conversation is conducted along the lines of inclusion, civility, and respect, and in consonance with its institutional commitments and values. To exercise this responsibility, the University must work to recognize and empower those whose conduct of the conversation has been most enhancing for the community and those in whose lives and work the conversation has borne most fruit, and to identify and alter behaviors and habits that inhibit or devalue the conversation to which Duke aspires.

IV. Insights framing Committee recommendations

The CCI Steering Committee's work has focused on improvements that would realize and enhance its vision for Duke's undergraduate education. In this process, the Committee identified much good that can, and should, be said about the Duke community. At the same time, the Committee came to better understand problems that exist – ranging from simple acts of uncivil speech and intolerance to what some have called a "culture of excess" – and it worked to identify points of progress that could help Duke achieve its institutional aspirations. As the Committee wrestled with issues central to campus culture, it gained several insights that informed its thinking and its recommendations. The Committee came to appreciate the extent to which Duke needs to better articulate the meaning and educational value of difference in an academic community and the extent to which Duke needs to engage difference more deeply and directly. It came to a fuller awareness that strong forces currently exist for conformity to a particular view of what it means to be a Duke student. It understood the need to give stronger affirmation to alternatives to purported norms and to foster greater development of personal responsibility and community accountability. Finally, in framing its recommendations, the Committee came to endorse the integrative value of the University's "developmental model," which sees students' growth and development as a progression over the course of their four college years.

ENGAGING DIFFERENCE

Last spring's events evoked intense feelings, which had accumulated over time, and reactions on campus and beyond were polarized along dimensions of difference and group identities: gender/sexuality, race and ethnicity, and athletics. The Committee realized anew that gender/sexuality matters, that race and ethnicity matter, and that athletics matters in complicated ways. This is not to say that each member of these groups felt or expressed the same thoughts, but group identities were one contributing factor to the polarization that occurred. The sense of identity that an individual derives from being a member of a group serves basic needs for belongingness, distinctiveness, and respect, providing group members with an interpretive lens to bring meaning to the social world and their place in it. Group identities, however, also can have negative consequences, such as stereotyping, viewing others negatively, and pressures for conformity.

The strong reactions to the events of last spring were not confined to social life but also pervaded the classroom and larger community, threatening the belief of many that they belonged to, and were valued members of, the Duke and Durham communities. Some comments and opinions expressed were perceived by other members of the community to be hostile and insensitive to the possibility that others might feel differently. Some women and members of minority groups, and some athletes and their coaches felt devalued by the university community. Others could not understand how their commitments and good work – in race relations or community service, for example – seemed to be discounted so easily. The campus community was taken aback by the feelings and views expressed that often revealed fundamentally different experiences and perceptions of Duke along racial and gender lines.

Race: On Duke's campus, there are those for whom race, ethnicity, and identity are a daily concern; there are others for whom these are not concerns; and still others who seem unaware of these concerns at all. In short, Duke is experienced differentially, and despite efforts of students, former students, faculty, and administrators to address issues of race and ethnicity, some students, faculty, and staff do not always feel welcome. Indeed, reports to the President's Council on Black Affairs and statements from the Black Student Alliance have persistently highlighted race and ethnicity-based issues regarding housing, classroom culture, and social life experienced by Duke's students of color, including experiences with and/or perception of racial disrespect. These concerns have not been limited to Black students, but have also been expressed by other racial and affinity groups.

One response was to undertake the Campus Life and Learning Project to further the University's understanding of the multiple and interrelated factors that influence the quality of the educational experiences of undergraduate students from different racial and ethnic groups in Trinity College and the Pratt School of Engineering. Funded by the Andrew W. Mellon Foundation and subsequently by the University, this longitudinal project studied two consecutive cohorts of Duke students (those enrolling in 2001 and

2002 and graduating in 2005 and 2006). Some of the findings now available from the project indicate that:

- Across different racial and ethnic groups, student networks during the first two years, at best, remain as racially or ethnically homogeneous as they were during high school. At worst, they become even less racially or ethnically diverse.
- Black students as a group have lower GPAs than white students, even when adjusted for pre-college differences in test scores and background.
- In their first year at Duke, about 15% of Black students reported that Duke instructors treated them badly because of their race/ethnicity, compared with about 10% of Asian students, 8% of Biracial or Multiracial students, 5% of Latino students, and less than 3% of White students.
- During their second year at Duke, about 44% of Black students reported discrimination by faculty/staff, students, or other members of the university community, compared to about 28 % of Biracial or Multiracial students, 19% of Asian and Latino students, and about 11% of White students. When Black students were asked about where discrimination occurred, the responses were about evenly divided between residence hall, classroom, and other on-campus locations, with a smaller minority reporting off-campus locations.

These findings emphasize the degree to which race continues to matter and illustrate the gap that remains between Duke's aspirations and the perceptions and experiences of some minority students. In response to these findings regarding academic performance, Trinity College has implemented a system to track relevant markers and to assess ongoing initiatives through the Academic Resource Center. In addition, the University is currently in the process of establishing an ombudsman as a resource for students to pursue incidents of discrimination.

Survey data gathered annually by Duke's Office of Institutional Research provides information about students from Duke and a cohort of 20 private universities. These data address a number of issues important to campus life including the range of interactions across racial and ethnic boundaries, and the relationship of this interaction to students' intellectual and personal development:

- Duke Caucasian students and fraternity and sorority members are less likely than their peers at comparable institutions to engage in interactions with diverse peers.
- Duke students are less likely than their peers at comparable institutions to indicate that college contributed to their development in ability to relate well to others.
- Across cohorts and institutions, students who had substantial interracial interaction report significantly higher levels of skill development with regard to formulating creative ideas, relating well to others, functioning effectively as a team, identifying moral and ethical issues, developing an awareness of social problems, and appreciating the arts.

These findings are important because meaningful and sustained interaction across racial and ethnic boundaries is necessary, for both majority and minority cultures, to realize the

full educational benefits of a diverse community. Moreover, contemporary homeplaces and workplaces – those within and outside of the United States – are complex, requiring students to develop and negotiate a more nuanced relationship with difference.

Gender/Sexuality: Gender and sexuality matter at Duke in complex ways, both inside and outside the classroom. In an attempt to understand this complexity of the experiences of female, male and transgendered students and of gay, bisexual, and heterosexual sexualities, the Committee called upon a number of sources, including the research of the Women's Initiative, the experience of the Women's Center, faculty in Women's Studies, the work of the Lesbian, Gay, Bisexual, and Transgendered (LGBT) Task Force, findings from the Campus Life and Learning Project, and discussions with undergraduate students. Where available, the Committee relied on data gathered and analyzed across these various sources. Although troubling and intolerable aspects of campus culture such as incidents of sexual assaults and homophobia occur but are underreported for a number of reasons, these are no less deserving of the University's attention. The Committee took seriously the concerns and reported experiences of the many individuals with whom it spoke.

Academically, Duke's female students perform well. In the graduating class of 2006, for example, women as a group had a higher grade point average than men, and among Trinity students, more women than men completed a thesis for graduation with distinction. The classroom situation for the LGBT community understandably cannot be assessed with markers of group performance, such as grade point average or graduation with distinction. Comments by the LGBT community, however, indicated varying degrees of perceived enlightenment on the part of students and faculty about issues and perspectives that effect classroom dynamics.

There were aspects of social life that were characterized as problematic with regard both to gender and sexuality. Here, the Committee identified a number of issues to be addressed: aspects of the social environment that communicates disrespect of women and alternative sexuality, sexual assault fueled partly by a party scene that includes significant amounts of drinking, and the control of social space predominately by heterosexual males.

The Women's Initiative, as well as the Committee's own discussions, revealed a social environment often disempowering for women. Some Duke women describe a cultural ethos that is contradictory: women, like men, assume (and are expected to assume) high career ambitions, yet their social capital is often judged by physical appearance and sexuality. A number of students expressed the view that women's self-esteem is dependent upon attention and approval of men. One consequence of this social dynamic appears to be in some areas of student leadership, where women are significantly underrepresented.

Regarding contemporary relationships, college life has been described as lacking a dating culture, and intimacy is pursued more through hook-ups: casual sexualized connections that do not lead to a longstanding relationship. Most students acknowledge the presence of a hook-up culture that is heavily influenced by alcohol. While some find this to be

simply the state of affairs and some say it is empowering to all, including women, problematic aspects include the fine line between sexual acquiescence and assault and the pressure women feel to engage in a sexual activity in which much of their social capital is invested. Both men and women often describe this aspect of social culture as problematic.

Concerns about women's self esteem and sexual assault were linked repeatedly to a characterization of social space at Duke as "male-dominated." Controlling the real estate means setting the rules of social engagement which can undercut gender as well as sexual equity and lead to assault. Some members of the LGBT community report experiencing these same social dynamics. The LGBT Task Force has described Duke's campus as one where policies are often in fact gay- (or bi-, or transgender-) friendly but where the lived experience of LGBT students is that of intolerance, exclusion, and harassment.

In summary, these understandings about the social dynamics of race, gender, and sexuality converge, indicating that one aspect of the University's campus culture that puts its institutional and educational vision at risk is the perception and experience by some that Duke is an "alternative unfriendly" environment. Clearly, to improve campus culture, Duke must achieve a more inclusive academic community. To do so, the University needs to craft policies and practices that promote a more common identity as members of a community in which people of all backgrounds share a common purpose and values, treat each other with respect, engage differences, and hold themselves and each other responsible for acting in accordance with these shared core values.

Last spring's events revealed that Duke must do better in learning how to engage difference constructively. The University needs to go beyond fostering the expectation of tolerance for differences in cultures, beliefs, opinions, and behaviors, beyond learning "to agree to disagree" to avoid conflict. The University needs to promote moving beyond tolerance to respect and beyond "just putting up with" differences to finding positive value in each individual and the diversity among us. Respect is manifested in affirmation of the worth of traditions and identities other than one's own and in the civility with which members of the community engage each other. Authentic engagement with difference will at times result in conflict. Just as the conversation cannot end with superficial tolerance of difference, it also need not end with conflict, and the University's challenge is to prepare students for the increasing clashes of cultures and beliefs and their engagement and comfort with those who are culturally different. Engaging differences fosters more complex thinking and leads to greater self-understanding and identification of other possibilities and ways of life. To realize the educational benefits of difference, however, Duke must function as a community that fosters openness to new ideas and ways of thinking and that promotes fuller engagement with difference. *A diverse, inclusive, and engaged community that affirms difference is the social context necessary for the transformative educational experience that Duke intends to provide.*

FORCES FOR CONFORMITY AND BUILDING COMMUNTIY

The identity of an institution evolves over time and is shaped and reshaped by its members. Through its work, the Committee has come to understand the power of the ways in which the Duke campus is viewed, experienced, and portrayed by its members,

as well as by those outside of the campus community. In particular, the "W*ork hard-Play hard*," "*Day time Duke-Night time Duke*" and "*Effortless Perfection*" depictions of the "typical" Duke student reflect a strongly expressed view of the purported norm for being a Duke student that, in turn, becomes a formative and self-perpetuating force. Similarly, others provide depictions of campus culture and Duke students that can quickly be over generalized as the norm. For example, the most extreme representation of the social hierarchy, the "Duke 500" presented in *Rolling Stone,*[2] exists on campus but certainly does not reflect the experiences of the majority of Duke students. Whatever the actual number of these students might be, however, their influence is disproportionate. Students readily acknowledge pressures to conform to this purported Duke norm and their apprehensions about being accepted if they should choose an alternative way or identity.

The University as a community has the opportunity and responsibility to challenge the purported norm, to define what is, and what is not, normative for Duke, and reset the default more positively. Duke's challenge is to focus its efforts on presenting multiplicity and variety as the actual norm, with many ways to engage the opportunities for growth and fun provided in an academic community. Privileging inevitably communicates values, and the University must examine whom it is privileging and for what purposes, from admissions through funding and space allocation policies and procedures for academic, residential, and social groups.

Just as the Duke community is learning to constructively engage difference, it is also learning how to encourage its members to live up to the highest aspirations of the community and how to hold itself and each other accountable to act in accordance with community expectations for integrity, respect, and civility. Force and coercion have no place in an academic community that relies on reason, dialogue, and the competition of ideas. It is in this regard that the University must challenge the purported norms for social behavior. Through the efforts of the Honor Council and the Academic Integrity Council, the "Duke Community Standard" has evolved over time as an aspirational statement of student behavior that recognizes that students share with faculty and staff the responsibility for promoting a climate of integrity. Last summer, the Provost charged a committee to review the Community Standard and the ways in which the policy and practices could be more effective in promoting a culture of integrity in all academic and non-academic endeavors.

The University also has a responsibility to be clear about expectations and enforcement policies and the ways in which these are essential for the well-being of individuals and for the well-being and work of the University community. As students mature, they develop the capacities for self-regulation and civic engagement necessary not only for their own intellectual and personal growth but also for the health of the community. As with education in general, community development is at its best a collaborative process involving all members of the community. Duke University seeks to foster this collaborative responsibility among students, faculty, and staff for the stewardship of the community in the pursuit of its common goals.

---

DEVELOPMENTAL FRAMEWORK

The University recognizes that its students are quite accomplished on entering Duke but yet are still in a formative process of neurocognitive, personal, and social development. Furthermore, undergraduates have important developmental tasks to accomplish in their transition from adolescence to adulthood. The fundamental goal of undergraduate education is to enhance development and foster this transition. Foremost among these developmental tasks that students have to accomplish is to come to terms with new capabilities for thinking, feeling, and acting and to shape their identity accordingly. A second task is developing autonomy, not just in terms of independence, but also with regard to the capacities for self-motivation and self-regulation. The capacity for self-regulation emerges with neurocognitive development, which continues to occur during the undergraduate years, and the development of autonomy is fostered by social environments that afford choice and freedom from external pressure to behave or think in a certain way. A third task is to continue the process of developing competencies. This means not just acquiring knowledge and skills, but also the capacities for independent thought and discernment and interpersonal skills in terms of the capacity for empathy. This also means developing cultural competence as a component of one's character, which requires acceptance that heritage and experiences influence how individuals see themselves and others and openness to moving out of one's comfort zone to engage differences.

Duke's challenges are to recognize the inherent individual differences in the rate of development, to mitigate the forces that promote conformity to a particular view of what it means to be a Duke student, and to promote independence of thought and multiple ways of being. Duke's opportunity is to provide a campus culture in which openness and engagement with difference of all types – intellectual, cultural, social, religious, and socioeconomic – are expected and supported and to more effectively integrate the curricular and co-curricular dimensions of the undergraduate experience. To do so, the University must ask in what ways do academic, social, residential, dining, athletic, and recreational components of the undergraduate experience contribute to students developing the skills, dispositions, and character necessary for productive and meaningful lives.

V. RECOMMENDATIONS OF THE CAMPUS CULTURE STEERING COMMITTEE

Building upon these understandings, the Steering Committee identified six interconnected areas for calling issues into question and making recommendations: Curriculum and Experiential Learning; Faculty-Student Interaction; Residential Life, Social Life, and Dining; Alcohol; Athletics; and Admissions. The Committee believes that, taken together, these recommendations could significantly make a difference in Duke's campus culture, encourage students to take a fuller and richer advantage of their undergraduate experience, and better prepare them for leadership in the 21st century.

CURRICULUM AND EXPERIENTIAL LEARNING

Duke has accomplished something rare in higher education, which is a point of pride and national recognition: it has successfully revised the Arts and Sciences general education curriculum and established inquiry-based learning, multiple modes of inquiry, and crossing boundaries of knowledge as its defining characteristics. The Cross-Cultural Inquiry mode, in particular, relates to the Campus Culture Initiative. Currently, students are required to take two Cross Cultural courses to enhance their abilities to evaluate complex and difficult issues from multiple perspectives, to identify culture and cultural difference across time or place, and to encourage critical and responsible attention to issues of identity, diversity, globalization, and power.

Some 36% (1,091/3,054) of all Arts and Sciences courses now carry the Cross Cultural Inquiry code. Review of Cross Cultural Inquiry courses by offering department indicates the following distribution: Language and Literature (30%), History (12%), Cultural Anthropology (5%), African and African-American Studies (4%), and Women's Studies (2%). These data suggest that opportunities to engage cultural differences in an international context are more prevalent than those within a national context. The intent of this curricular requirement, however, was to ensure that Duke students develop the cross-cultural competencies to address the difference that confront us on a daily basis in this country. As the requirement now stands, it is not clear that all students will have this type of curricular experience before graduation. Therefore, one way to promote more understanding of, and engagement with, difference is to further refine the Cross Cultural Inquiry requirements to address differences of importance in the United States, and specifically, differences associated with race, ethnicity, class, religious, gender, and/or sexual preference. Discussions should also be initiated with the Pratt School about incorporating a similar curricular expectation for engineering students.

Duke has also been a leader in developing experiential learning as a pedagogy of engagement, in which the lessons of the classroom are applied and tested in real-world environments. In recent years, Duke has pioneered research-service-learning (RSL), which combines service-learning with community-based research. These sorts of real world experiences can lead students to develop an increased sensitivity to difference, a greater capacity for perspective-taking, and a deeper commitment to social justice. Engagement with the community – whether understood as Duke, Durham, the region, or the world – can also help to integrate individual student lives, foster connections between curricular and co-curricular spheres, and strengthen the many communities in which they are members.

The University needs to strengthen its civic engagement activities on campus and build a fuller and richer infrastructure to link students, faculty, and staff working in the areas of service and civic engagement across divisional, departmental, and curricular/co-curricular lines. Such resources as the Council on Civic Engagement, the Community Service Center, the Office of Service-Learning, and the "Learning to Make a Difference" website provide support for faculty and students engaged in civic, service, and community-based activities. The University, however, needs to commit significant resources to increase the

breadth and depth of civic engagement among Duke undergraduates and to create a Center for Civic Engagement to bring and coordinate, under one administrative umbrella, various current parallel efforts. Such a Center could offer workshops and faculty support to help integrate service-learning, community-based research, and service into the undergraduate experience.

And finally, Duke needs to seek ways to continue to explore issues of difference within its institutional and community discourse. One initiative to launch such a dialogue might be to host a conference "*Engaging Difference in the 21st Century*." Such a conference would build on the 1997 academic conference "*What Difference Does Difference Make?*" This latter event laid the foundation for curricular initiatives, Multicultural Center programs, and connections of faculty advisors with ethnic and affinity groups. Establishing a series of such programs on a regular basis would ensure a continuous infusion of ideas, perspectives, and approaches into the campus dialogue and curricular and co-curricular initiatives.

To enhance the curriculum and experiential learning, the Steering Committee offers the following recommendations:

1. *Modify the Cross Cultural Inquiry curricular requirements so that one of the two required courses has a primary focus on racial, ethnic, class, religious, and/or sexual/gender differences in the United States*
2. *Develop the necessary infrastructure to support and promote an increased array of experiential learning opportunities – international, domestic, and those that focus on Durham – that connect to substantive areas of scholarship and institutional priorities and that address one or more of these objectives: creating community, engaging difference, and promoting cross-cultural understanding*
3. *Initiate ongoing forums on issues of difference through such means as a conference that promotes dialogue and guides consideration of approaches and initiatives*

FACULTY-STUDENT INTERACTION

The rise in Duke University's status as a major research university has been achieved by maximizing the scholarly reputation and productivity of its faculty. Correspondingly, there has been less recognition given to faculty teaching, engagement with students outside of the classroom, and service to the academic community. To recruit and/or retain exceptional scholars, teaching responsibilities have often been reduced, and scholarly productivity is accurately perceived to be what matters most in decisions of tenure and promotion, compensation, and status in one's field. Changes in faculty culture are necessary, therefore, if Duke is to accomplish its vision as a great research university committed to undergraduate education.

While scholarly productivity must continue to be the primary faculty expectation, it can no longer be sufficient. What is needed is a new social contract between the University and the faculty that establishes the expectation that all regular rank faculty appointments in Arts and Sciences, the Pratt School of Engineering, and the Nicholas School of

Environment and Earth and Ocean Sciences have three primary responsibilities: scholarship, teaching/mentoring, and service to the academic community. These expectations, however, cannot be envisioned in terms of "one size fits all." Rather, the specific distribution of efforts will be individually specified and vary over time depending on responsibilities and research productivity.

To enable and better support faculty scholarship, teaching/mentoring, and service, the Committee recommends several changes to be further developed, discussed, and evaluated through collaborative efforts with faculty and Deans of Arts and Sciences, the Pratt School of Engineering, and the Nicholas School of the Environment and Earth Sciences. Among these are the consideration of an expanded leave policy to reward teaching and service through increased leave time, a more equitable distribution of teaching loads across departments, and redefining teaching loads to include mentoring as well as standard courses and service to the academic community. Furthermore, Duke must more intentionally align graduate and undergraduate education; for example, recent efforts to promote "vertically integrated research teams" of undergraduates and graduate students and their faculty mentors that support more undergraduate independent studies and theses and also provide valuable assistance and supervision experience to graduate students, has proven to be effective across a number of disciplines.

The University must also decrease the faculty administrative burden and streamline its often inefficient model for faculty governance by closely examining the number, size, and mode of functioning of committees and faculty bodies. For example, the Steering Committee identified more than 70 standing committees at just the university and school levels, and faculty often function on these committees as individuals, rather than as a representative of their departments or programs.

In addition to considerations of faculty time, the University must continue its efforts to promote the rigor and quality of undergraduate education, the quality of teaching and learning spaces, and teaching and research supervision. Duke's strategic plan calls for each department and program to institute a regular review of its curriculum, pedagogical approaches, and advising program. Departments and programs will need support to develop rigorous methods for the evaluation of teaching and learning and ensure that independent studies and theses are rigorous, require sustained student engagement and result in substantial academic papers or presentations that are evaluated and graded in accordance with the highest standards. Just such efforts are already underway in several departments with the assistance of the Trinity College Office of Assessment.

Enhanced faculty-student interaction is central to strengthening Duke's campus culture. The Spring 2005 Enrolled Student Survey, administered by Duke's Office of Institutional Research, provides one indication of student appraisal of current faculty-student interaction: when asked to evaluate how well Duke fosters faculty-student interactions outside of the classroom, 45% responded "very poor or poor" and 9% responded "well or very well." When asked to indicate the greatest single barrier to out-of-class interactions, 17% responded "lack of faculty interest" whereas 39% reported "lack of student interest" and 28% indicated the "lack of venues." Over the years, faculty have also expressed frustration when there is little undergraduate response to their efforts to make themselves available outside of the classroom; office hours and academic advising sessions routinely go unused by students. Thus, faculty-student interaction outside of the classroom is one

area for improvement in which there is both a shared desire and a shared sense of responsibility. The challenge is how to effectively promote meaningful and mutually rewarding faculty-student interaction outside of the classroom.

The Steering Committee recognizes that little can be expected from just increased faculty "push" for engagement with students and that increased "pull" by students is also needed for specific engagements to have personal value. The Committee heard many examples of successful and mutually rewarding engagements, and what they had in common was a connection of students and faculty around a mutual interest that often began in, but carried beyond, the classroom. As the number of students undertaking an independent study or thesis have increased, both faculty and students recognize the "value added" of directly engaging undergraduates in the inquiry and discovery processes.

In addition to mentoring research, the University must also seek to increase opportunities for faculty to engage with students in their social and residential lives. Faculty sponsorship of House Courses and extracurricular interest groups, such as in the visual and performing arts, provide venues for such intersection of interests. The Faculty-in-Residence Program has also proven to be an effective vehicle for outside of the classroom interactions and is in the process of being extended to include West and Central Campus. The expanded system of Residential Coordinators facilitates the hosting of programs in quads around specific themes or topics selected by students to which faculty are invited. Programs that enable faculty and students to dine together are successful but underutilized, and point to the compelling need to address the segmented dining practices and facilities that function as food courts rather than opportunities and places for community interaction.

Duke has made admirable gains in increasing the presence of women and minority faculty. At times, however, the impression has been that increasing diversity and increasing excellence were two separate, rather than related, objectives. Furthermore, the presence of women and minority faculty is as important for fostering faculty-student interaction as it is for academic excellence. Efforts to attract women and minority faculty to Duke will be enhanced by communicating diversity as a goal and value intimately attached to its institutional goal of excellence in research and undergraduate education.

To strengthen the role of faculty in the life of undergraduates and to enhance faculty-student interaction, the Steering Committee offers the following recommendations:

1. *Reaffirm faculty engagement with undergraduates as a core value of Duke University; make changes with regard to recruitment, leaves, teaching/mentoring loads; and decrease administrative burdens to better support the balance of faculty scholarship with teaching/mentoring responsibilities*
2. *Adopt a more efficient and effective approach to faculty service on committees by reducing the proliferation and size of faculty committees and by instituting a representational model of faculty committee assignment*
3. *Support faculty and departmental efforts to enhance the coherence, rigor, and quality of undergraduate teaching and learning experiences*

4. *Provide incentives and increase support for students to engage with a faculty mentor around a question/project that results in a thesis and increase opportunities for faculty to engage with students around areas of mutual interest*
5. *Redouble efforts to recruit women and minority faculty by emphasizing diversity not as an add-on activity, but as a value intimately attached to Duke's central institutional goal of excellence*

RESIDENTIAL LIFE, SOCIAL LIFE, AND DINING

One of the strengths of Duke's undergraduate education is that it is grounded in the context of a residential experience. As a residential university, Duke seeks to foster a richly diverse environment that supports classroom learning, promotes opportunities for students to connect with each other and with faculty to develop a strong and enduring sense of belonging, and provides opportunities for students to grow and develop, especially as they wrestle with issues of identity, autonomy and responsibility. The University seeks to build a residential community where students traverse intellectual and cultural boundaries across generations and over time, gaining cultural competency as a lived experience. In this type of community, relationships are rooted in mutual respect and civility, the dignity and self worth of all members are celebrated, and its members feel safe and secure.

Duke's residential life plan maps directly onto the University's developmental model, a model that currently integrates the vision for the East and West Campus experiences and that will be fully realized with the redevelopment of Central Campus. Each of these three campuses has a unique role to play: East Campus, with its diverse mix of all first-year students in its residential houses, provides a more inward looking orientation to the life and values of the academy and an opportunity to for students to develop their voices as members of a community. West Campus, with its system of quads, is intended to provide sophomores and upper-class students with deeper and more substantial intellectual and social engagements in preparation for more independent experiences, such as study abroad, service learning, and internships. Finally, Central Campus, with its apartment style-living and planned rich environment of language departments, cultural opportunities, and the arts, will provide the culmination, refining and consolidating students' intellectual and personal skills and fostering increased interaction with the Durham community and the world beyond Duke.

In 1995, the University launched the first phase of this model when it redesigned East as the first-year campus and enhanced the first-year experience through such means as the Focus Program, the Faculty-in-Residence Program, the Freshman Advisory Counselor Program, the Marketplace, Lilly Library programming and outreach, an expanded first-year Orientation, residentially-based first-year advising, and the development of East Campus "neighborhoods," all of which taken together provide an extensive array of support and interaction. The success of the East Campus experience in developing community and affirming the diversity of the first-year class is generally acknowledged; indeed, a common phrase on campus is that "Duke has done the first year right."

One of the positive aspects of the decision to house all first-year students on East Campus was that it captures the inherent diversity in the class. In contrast, "self-segregation" along racial lines became evident on the upper-class residences on West Campus, Trent Hall, and Central Campus. Indeed, even before students finished their first year, social hierarchies began to emerge and be reaffirmed through selective living group recruitment and housing choices. One of the motivations to close Trent Hall, build the West-Edens Link, and require all sophomores to live on West campus was to create more West Campus residential space to address perceived inequities in assignment and to have West Campus and Central Campus better reflect the racial composition of the undergraduate population. Some small gains were achieved in this regard, but in Fall 2006, the percentage of the respective racial and ethnic groups who resided on West Campus was 81.1% of the Caucasian students, 76.1% of the Hispanic/Latino students, 72.7 % of the Asian students, and only 58.4% of the African Americans students.

The decision to have all sophomores live on West resulted in sophomore minority students no longer having the option to live on Central. In conjunction with that policy change, the University made explicit commitments to minority students and to women to take steps to make West Campus more welcoming, including the movement of selective living groups out of the main quad residence halls. In addition, Student Affairs has been actively and incrementally restructuring and enhancing the West Campus experience through such efforts as the configuration of six West Campus quads, the establishment of quad councils, the expansion of the Faculty-in-Residence program on West, and the phased renovation of the plaza, West Union, and the West Campus residence halls.

While all of these initiatives have sought to carry over to West Campus the sense of the diverse community that characterizes East Campus, two significant factors undercut these efforts: the lack of social space and the privilege given to selective living groups to control West Campus residential and social space.

There is compelling and long-recognized need for social spaces on West Campus that can accommodate large group activities. Creating new large group spaces is absolutely key to the Committee's recommendations to improve undergraduate social life. Such spaces would provide equity of access for any quad, fraternity or sorority, organization, or social group to host events, and programming could be instituted in such venues to promote large, inclusive student gatherings of students. Finally, large group social space is essential in moving parties and other gatherings out of dormitory rooms.

The privilege given to selective living groups, and to men in particular, affects campus culture disproportionately. Of the 2,690 beds on West Campus in 2006-07, 793 beds (30%) are assigned to selective living groups, with fraternities occupying 443 beds (16%), and other selective living groups occupying 350 beds (13%). Of those in selective living groups, 77% are male and 23% are female. The privileging and distribution of space in any community is a tangible symbol of its priorities. Access to real estate means setting the rules of social engagement, and the University must face the fact that residential space, and control of it, continues to be experienced as gendered and alternative unfriendly because of the way it favors certain groups. The current differential

room assignment process, which distinguishes between selective living groups and other student blocks, is neither equitable nor does it reflect Duke's obligation to empower all students fairly.

Moreover, it is important to remember that East Campus previously afforded space to women as the historic Woman's College and, subsequent to the incorporation of the Woman's College into Trinity College, to those who sought an alternative to the West Campus living experience. One unanticipated outcome of the creation of the first-year campus was the elimination of an alternative housing environment for those students who sought to avoid the West Campus social culture. Students not wishing to engage in the "*Work-hard-Play hard*" culture of West Campus often moved to Central or off campus, further disrupting campus community. While the anticipated development of Central as a vibrant upper-class campus will address some of the need for different types of residential and social spaces, to fully realize the potential of an undergraduate living and learning community welcoming to all, Duke must promote a system of housing that fosters a more diverse and inclusive community, enables group affiliations and a wider variety of social programming, and assures more equitable distribution and governance of residential and social space.

For these reasons, the Steering Committee believes that, in conjunction with establishing new social and dining spaces on West Campus and the opening of new residential space on Central Campus, the preferential assignment of residential space to selective living groups must be discontinued. It is important to emphasize that the Committee's recommendation to discontinue the assignment of residential space to selective living groups is not based on a concern about the value of selective living and social/affinity groups but rather the recognition that the historical process of assigning common residential space to groups is inequitable in the context of the varied demographic character of the community that Duke has become. It also does not foster the engagement with difference that is an educational imperative for residential and social, as well as academic, life. While decoupling residential space and selective living groups is necessary to address the inequities of privileging control of social space, the Committee recognizes the need to foster social/affinity groups and Greek organizations that promote the development of friendships, camaraderie, common purpose, and social networks.

Dining and related facilities must also better support the University's educational and programmatic goals. The current dining experience was designed years ago to reflect managerial, financial and service assumptions that were then regarded as appropriate. These assumptions included expectations that undergraduate dining would generate university revenues as part of a larger array of auxiliary operations (including the bookstore, parking and housing operations), all expected to support institutional financial needs. Duke Dining has been nationally regarded for its attention to the student consumer marketplace and for enabling cost-effective, customer-friendly, and choice-oriented service. As a result, the dining program emphasizes speed, variety, and cost effectiveness. Moreover, this auxiliary model of dining has minimized capital investments in facilities. Consequently, the Marketplace (currently providing fewer than 400 seats to support the nearly 1,700 students, plus faculty and staff on East Campus) has not been expanded, nor

are the dining facilities in West Union and the Bryan Center adequate, comfortable, or up-to-date. Only a handful of niche alternatives sprinkled throughout academic buildings, such as the Refectory, the von der Heyden Pavilion, and Twinnies Café, offer the sort of positive, engaging dining facilities conducive to fostering community. Significant improvements to residential, dining and social facilities are necessary to provide a contemporary student life infrastructure – one that will foster faculty-student interaction, student self-governance and entertainment, and student inter-group interactions. Further, dining, in particular, should not be viewed as a for-profit operation or even a break-even operation; rather, the university should acknowledge that subsidizing dining represents an important mechanism for creating the infrastructure of a positive campus climate.

These changes in residential life and dining will augment social life by creating venues for interaction, both small and large, and by promoting social organizations within each of the University's three campuses. Duke has a rich array of social, religious, service, and thematic groups that have the opportunity to enrich the lives of their respective members and the community as a whole by aspiring to, and affirming what is best in these traditions. Thus, Duke can advance toward the vision of a "community of communities" engaged in common purpose.

To improve residential life, social life, and dining, the Steering Committee offers the following recommendations:

1. *Use the opportunity provided by the Central Campus project to re-envision and expand residential, dining, and social space on the West and East campuses*
2. *Establish the quad as the residential social organizational structure on West Campus to foster interaction within and between diverse communities and groups*
3. *Create additional spaces on West Campus, particularly large group spaces, accessible by all student social organizations/groups, which can be used for dining and/or social functions*
4. *Assign West Campus housing, in concert with the opening of Central Campus and the creation of additional social spaces on West, through a policy that enables small, non-contiguous blocking of students,*[3] *but discontinues the practice of assigning housing to selective living groups and social/affinity/interest groups*
5. *Change the Dining Services model so that operations are oriented towards community building among students, and between faculty, students, and staff; in particular, Dining Services should not be run as a profit center, but rather be an investment by the university in the social environment of the community*

[3] The Committee seeks to enable small groups of a size less than 12 students to live together, but not to allow contiguous blocks that would dominate the space; that is, rooms may be adjacent within the block, but blocks may not be contiguous within a quad. The particular number of students in the block is not specified because some degrees of freedom will be needed as implementation proceeds and to realize the intention in spaces of varying sizes and configurations with the residence halls.

ALCOHOL

Alcohol issues are not one single problem, but rather a series of three, interrelated problems that are viewed in multiple ways: "bad behavior," "impaired health," and "lost weekends." All three tend to involve heavy drinking – drunkenness – rather than drinking *per se*. With regard to bad behavior, drinking is a factor in much of the serious misbehavior, assault, property damage, injury, unwanted sex, and neighborhood disruption involving undergraduates. Drinking also creates a substantial legal liability to the University and is a significant risk to Duke's reputation. In terms of impaired health, a large minority of undergraduates engage in heavy drinking on a regular basis, putting their academic performance and their health at risk. Recent biomedical research on adolescent brain development underscores that heavy drinking can cause brain damage. The immediate threat is that students will be injured while drunk. Overdose appears to be a particular problem for first-year students: 37 were transported to the Emergency Room last year, and there were 7 transports of first-year students just during orientation week this year. The risk of another alcohol-related death in the Duke community is very real. Furthermore, several dozen students are seen in CAPS every year with serious symptoms of alcoholism, and far more than that will graduate with a heavy-drinking habit. Alcohol use also complicates other mental health problems and heightens impulsive behavior, both contributing to and creating high risk in vulnerable students. Beyond bad behavior and impaired health is the problem of alcohol-induced lost weekends; much weekend social life at Duke is organized around getting drunk, an activity that is alluring for many students, but ultimately unsatisfying. Where, how, and with whom Duke students socialize are important influences on campus culture.

The Office of Institutional Research surveys provide data on how Duke undergraduates report their experiences compared with their peers at comparable institutions and the relationship of partying to studying and academic performance:

- Duke students report higher levels of drinking in college and more frequent binge drinking (three or more occasions of 5 or more drinks in the last 2 weeks) than their peers at comparable institutions. It is, however, Duke students in Greek letter organizations, not independents, who set Duke apart from its comparison schools.[4]
- Duke students report less time studying and more time partying than their peers at comparable institutions.[5]
- Students who spend more time partying and binge drinking tend to devote significantly less time to studying and have significantly lower academic performance in comparison to other students.

---

[4] For example, in the 2003 survey, binge drinking was reported by 43% of Duke fraternity members and 29% of sorority members compared to 14% non-fraternity and 8% non-sorority members.

[5] For example in the 2003 survey, 20% of Duke students compared to 29% of their peers reported studying 20 or more hours a week and 14% of Duke students reported partying 11 or more hours a week compared to 9% of their peers.

These data indicate the degree to which Duke's challenges and opportunities relate to alcohol. The Committee identified a number of alcohol concerns that require further, systematic, evaluation, the first of which relates to the dilemma faced by professional staff because of the state law establishing 21 as the minimum drinking age. While universities do not sanction underage drinking, their policies often reflect a selective enforcement policy that targets some kinds of drinking and not others. This approach, taken by Duke and most other residential campuses, underscores the lack of clarity in current philosophy and policies. A focus on infractions around drinking leads to a punitive approach to drinking, while an emphasis on the lack of a healthy social life leads to an educational approach without sanctions. The right balance in terms of individual and community well-being needs to be determined through systematic study.

Duke's current array of programs, official rules, and informal enforcement practices lacks operational clarity. A survey of a number of professional staff members found that their top priority was to have clear guidance about how they should respond to alcohol-related infractions. The operational norms are further confused by the tradition of officials tolerating overt violations on some occasions, such as occur at tailgating, basketball bonfires, and Last Day of Classes. The lack of a clear set of principles for enforcement is a particular burden for Resident Advisers and Residential Counselors, and in October 2004, the Campus Council passed a resolution urging Residence Life and Housing Services to set clear enforcement priorities.

Complicating these issues is the fact that Duke lacks adequate treatment services. While Counseling and Psychological Services (CAPS) has the capacity to diagnose and mount brief interventions for students with serious drinking problems, it is not equipped to provide longer-term treatment. This lack of intensive local outpatient treatment options results in tremendous difficulties referring Duke students for treatment while they remain enrolled. Furthermore, many students' health insurance policies do not provide adequate coverage for this type of treatment, resulting in significant barriers to accessing appropriate care.

Finally, the University lacks what public-health workers call a system for monitoring progress against alcohol-related problems involving Duke students. There is currently no regular report of indicators of alcohol abuse and harmful consequences that could be used as a basis for judging whether the Duke trend is favorable or unfavorable and as a basis for evaluating specific interventions. Developing a useful formal monitoring system compels the University to clearly delineate its goals and corresponding policies and procedures to evaluate, and be accountable as a community, for its progress. This requires creating a system, based on public health principles, to identify incidents of dangerous levels of drinking and drunken behavior to determine trends and patterns and evaluate interventions. It also requires adopting an empirically-grounded framework, including an annual survey, systematic studies, and review of each case of alcohol overdose, to guide policy and initiatives, and within which to evaluate the effectiveness of practices.

To promote a more responsible approach to the culture of campus drinking, the Steering Committee offers the following interrelated recommendations:

1. *Re-orient social life on campus to reduce the centrality of alcohol and enable more non-alcohol events and venues*
2. *Establish attractive venues for controlled distribution of alcohol for students of age, including a large space able to accommodate 300-400 people*
3. *Clarify alcohol regulations and enforce these regulations consistently. Specifically, target disorderly and disrespectful behavior and dangerous drinking*
4. *Increase staffing and resources for the oversight of policies and practices and for alcohol/substance abuse prevention and treatment services*
5. *Implement an evidence-based approach, based upon public health principles, to alcohol policy, initiatives, and accountability.*

ATHLETICS

Athletics is an important element in the identity of Duke University. Division I competition within the NCAA has been a distinctive source of prestige and distinction, serving as a common bond across the entire University, across generations, and between the University and the community, of which Duke's men's and women's basketball successes are perhaps the most obvious examples. Duke has taken pride in its success in athletics. This success has several dimensions, embodied in commonly heard statements such as "great athletics and great academics," "Duke doesn't cheat," and in the fact that Duke student-athletes reflect the make up of the institution as a whole and graduate at the same rate as non-athletes.

Nationally, however, there are strong and persistent forces that create an "athletic-academic divide," between varsity athletics, on the one hand, and academic life on the other, particularly at selective universities and colleges. As documented in Bowen and Levin's 2003 book, *Reclaiming the Game: College Sports and Educational Values*,[6] the demands on student-athletes are ever-increasing in terms of early specialization, and practice, training, and travel times, while the expectations for academic engagement also are increasing. These national trends impact Duke as well, resulting in measurable differences between student athletes and non-athletes in terms of preparation, experiences, and academic performance, differences that are growing and evident across all three sports tiers of student athletes, both men and women. The athletic culture, in general, is perceived by some to be characterized by a sense of privilege, abuse of alcohol, sexual objectification, and anti-intellectualism. While most Duke athletes are representative and responsible members of the academic community, they increasingly report being subjected to negative stereotypes by members of the academic community.

The Steering Committee recognizes that there are divergent views about the role and place of athletics at Duke University and suggests that the essential question to be addressed is: "How can Duke make the adjustments necessary to continue to participate

[6] William G. Bowen and Sarah H. Levin, *Reclaiming the Game: College Sports and Educational Values*, Princeton: Princeton University Press, 2003.

in the NCAA at the Division I level in all sports and achieve its aspirations to be a great university?" In particular, the Committee identified important areas of common concern: admissions, time demands, and oversight.

Most of the 600 student athletes currently enrolled at Duke compile fine academic records, graduate on time, and contribute significantly to the undergraduate community. In fact, they would be valued members of the University community and role models whether or not they were engaged in a varsity sport. Concerns increasingly arise, however, because of competitive recruitment pressures that place students' academic performance and full participation in campus life at risk. This risk has become clear recently, in the wake of a university decision to allow football, with its many more scholarships, to recruit more athletes at the lower levels of admissions criteria as do men's and women's basketball, the other Tier 1 revenue sport athletes. Analyses conducted over the last four years indicate that this decision has increased the number of students who are not adequately prepared to benefit from, or contribute to, the work of the academic community, even with enhanced academic support services. This places Duke's admirable graduation rates at risk, reinforces negative stereotypes, and does not serve the best interests of these students themselves, their peers, or their faculty. In addition, varsity athletes, as a group, are disproportionately concentrated in fewer than half a dozen majors in the humanities and social sciences and in certain classes both within and beyond those majors. The admissions trade-offs extend beyond Tier 1 revenue sports. Up until the entering class of 2000, with the exception of men's and women's basketball and football, there were no significant group differences in the admissions profile of student-athletes playing the other sports and non-athletes. That is no longer the case: all three tiers of athletes now differ from non-athletes and from each other in Admissions Reader Rating scores.

In 1987, the NCAA took steps to legislate the length of the playing season, confining Division I teams to half the year (26 weeks) for "traditional" and "non-traditional" seasons. "The intent was to reduce the pressure on students to devote an inordinate amount of time to varsity sports," write Bowen and Levin, "but by the fall of 1998 it was obvious that students were spending more, not less, time on athletics."[7] They further recommend that "Seasons should be shorter; …determined efforts should be made to ensure that 'voluntary' activities are truly voluntary," and guidelines should "flatly prohibit missing a class, lab, or seminar for practice."[8] All the trends in recent years, however, have placed more – not fewer – demands upon student athletes, a situation that can place their health at risk and take an undue toll on the participants, their peers, and the institution as a whole. An important step that needs to be taken to lessen the athletics-academics divide is to work to mitigate athletic practice and travel time demands.

In terms of oversight, the University must bridge the academic and athletic divide by better integrating athletics in the undergraduate administrative structure, by making greater use of faculty on the Athletic Council, and by involving faculty in decisions about admissions and athletic policies. Such steps would foster the integration of student

[7] Bowen and Levin, p.281.
[8] Bowen and Levin, p. 282, 283.

athletes, as well as their coaches and support staff, in Duke's undergraduate educational mission.

The Steering Committee offers the following recommendations regarding athletics:

1. *Integrate athletics with the undergraduate administrative structure for academic and social life, including faculty membership on oversight committees*
2. *Raise the low end of the admissions requirements for athletes*
3. *Reduce the number of athletes admitted near the low end and reduce the number of teams afforded the prerogative to recruit athletes near the low end*
4. *Ensure full participation of student-athletes in campus academic and social life by decreasing practice and travel time demands on student-athletes*
5. *Provide academic support services for athletes that are targeted to the development of learning styles and skills essential for full participation in undergraduate academic life*

ADMISSIONS AND RECRUITMENT

By many measures, the admissions office has done an outstanding job of contributing to the rise in Duke University's prominence. Particularly with regard to increasing diversity, the admissions office has had a transformative impact, as reflected in the 41% students of color in the Class of 2010. The admissions office has also been responsive to university initiatives, as evidenced most recently by increasing the admission of students with artistic talents and engaging faculty in the review process for those applicants. A number of studies have been commissioned to better understand the characteristics of those who are and who are not attracted to Duke and why. There have also been ongoing appraisals of how Duke is perceived, whether current perceptions are accurate, and how the University might want to be perceived. Similarly there has been important consideration of the Duke brand and its influence on admissions, and there has been productive discussion about how the University might want to sharpen and refine its profile.

Over the years, the overall quality of Duke's students has risen. Students increasingly matriculate with extraordinary records of accomplishment and subsequently take advantage of the University's opportunities for intellectual growth. There are, however, some who do not engage fully in the intellectual work of the community. The University is concerned by the lack of some students' openness to new experiences and the kinds of deep learning that are the goals of liberal education and that provide a strong foundation for future life and work. Duke seeks to be a magnet for students who have the requisite openness and commitment to engagement necessary to benefit from, and contribute to, the full range of its educational experiences. As an indication of this intuitional priority, the Committee suggests evaluating applicants' response to a required application essay question on engagement and experiences with difference. In addition, faculty should be more integrally involved in the admissions decisions of students, athletes and non-athletes alike, by extending the model of Pratt faculty involvement to Trinity.

To ensure that the University represents this full range of educational experience, Duke must increase financial aid to attract minority students and international students at the top of the applicant pool. The University must aggressively recruit high-achieving

applicants from underrepresented groups by appealing more to those students' intellectual accomplishments and by reaching out to a more diverse group of schools and communities. To make the recruitment process as effective as possible, the University should review its recruitment materials, processes, and events to see that they align with its commitment to engaging difference and showcase its many cultures and communities. The Committee also recommends that the University improve its ethnically-based recruitment weekends with a more academic focus and communicate that Duke's approach to recognizing differences is through inclusiveness, not segmentation.

Admission selection criteria must also be reviewed to ensure full participation of all undergraduates in campus life. Accordingly, the Committee recognizes the need to raise the low end of the admissions standards, including those for legacies, development candidates, and athletes, so that all admitted students not only have the potential to graduate but have the preparation and commitment necessary to contribute fully to the intellectual life of the community.

To conduct this review effectively, the Committee recognizes the need to develop an admissions feedback system on student performance and an analysis of experiences that promote success during students' Duke academic careers. By institutionalizing such a system, the University will have information critical to inform and continuously refine admissions metrics, such as the Reader Rating system, admissions targets, and recruitment goals. This feedback system should complement a regular review of all components of the recruitment process, thereby ensuring consistency with the Duke's institutional values and goals of admitting students who respect and seek a community whose wealth of ideas and opportunities for learning represent the highest standards of excellence, who seek and achieve intellectual discipline and personal integrity, who are able to participate fully in the university's academic requirements, and who model, in conduct and commitment, the university's value of diversity and excellence.

To enhance the University's recruitment and admissions process, the Steering Committee offers the following recommendations:

1. *Increase the role of faculty in the admissions process*
2. *Ensure that recruitment materials, processes, and events communicate Duke's commitment to engaging difference and showcase Duke's many cultures and communities*
3. *Aggressively recruit international students and high-achieving applicants from underrepresented groups and increase financial aid to attract those students*
4. *Raise the low end of the admissions standards so that all students have the preparation and commitment to contribute fully to the intellectual life of the community*
5. *Develop a feedback system for student performance and a regular review of the recruitment process to ensure alignment with Duke's institutional goals*

CONCLUSION: CONTINUING THE CONVERSATION

From the beginning, the Campus Culture Initiative Steering Committee has sought to engage in a thoughtful and collaborative conversation about the Duke community, to gain a richer understanding of campus culture, and to identify areas of strength and make recommendations to advance Duke to the next stage in its institutional development. Over the past eight months, the Committee met weekly to engage actively with, and to examine critically essential and interrelated aspects of undergraduate life. It has reviewed historical data, research reports, and surveys; it has held student, staff and faculty discussion forums; and it has invited comments from members of the Duke and Durham communities. The Committee has engaged in individual conversations with numerous students and student groups, it has read e-mails and messages that have come to its attention, and it has met with those who sought to share their views. The recommendations proposed above reflect the Committee's collective sense of the next steps needed to significantly enhance the undergraduate experience.

The Committee recognizes that it has outlined an ambitious array of recommendations that will need be further discussed and implemented through the University's regular administrative processes. Some recommendations, such as how to promote civic engagement, support initiatives that are already under consideration, while others, such as changing the dining model, have significant budgetary implications. Still others, such as changes in faculty culture, will need extensive deliberations within departments and across schools. Indeed, the entire Duke community must play a significant role in considering thoughtfully how best to enhance campus culture. The real work ahead is to join in this conversation with a sustained commitment to the University's advancement.

At the same time, the Committee also acknowledges that there is much that it has not done. Using its charge as a baseline, the CCI Steering Committee intentionally focused its work on the undergraduate experience and did not address issues of campus culture related to other constituencies, such as graduate and professional students, staff, or the larger Durham community. Time also did not allow the Committee the opportunity to forge connections with similar initiatives to address University culture, such as those underway in the Division of Human Resources. The Committee did, however, find the CCI Committee structure and function – a committee broadly comprised of faculty, students, staff, alumni and a committee that collectively engaged in collaborative problem-solving across the units of academics, student affairs, athletics, campus services, and admissions – an effective model for strategic planning.

Great universities are dynamic and continually evolving institutions that adapt to, and promote, cultural change. Duke University has a tradition of excellence and vitality that fosters growth and innovation. In fact, Duke's commitment to advancement is among its most sterling characteristics. It is the hope of the Campus Culture Initiative Steering Committee that its work and recommendations can help strengthen campus culture and further advance Duke as an even greater and more excellent community of teaching and learning.

Appendix 2: Members of the Campus Culture Initiative Steering Committee

Appendix 3: Meeting List

Campus Culture Initiative: Charge to the Steering Committee
Richard H. Brodhead, President
April 18, 2006

Allegations springing from the party held by the men's lacrosse team have prompted strong feelings and much discussion about issues of race and gender, class and privilege, difference and respect, and campus and community. These issues have been of concern both on this campus and in our larger society for many years. Duke University has done much in the past to address these issues; nonetheless, we must use this occasion to take the measure of our campus culture and see where it could be improved. We need to promote a culture where all students seek to take responsibility for their behavior and to be fully respectful of the rights of others.

Duke has a tradition of stepping forward to address issues of fundamental importance to our educational mission. These have ranged from the defense of academic freedom, to increasing diversity, to curricular reform, to issues affecting women. In addressing campus culture, I encourage the Steering Committee to articulate a vision of what Duke can be, analyzing existing practices and formulating initiatives needed to realize the vision.

I ask that the Steering Committee:

- Formulate a clear statement of the values and behaviors that should guide Duke students in their relations with others;
- Evaluate and suggest improvements in the ways students develop personal responsibility, social responsibility, and civic engagement;
- Assess how students relate to each other and other members of the campus and community across bounds of race, gender and other social divisions and recommend ways to promote mutual respect;
- Assess the extent to which our institutional practices promote the values and behaviors we expect of students;
- Assess the role that faculty play in the development of student values and behavior, and make recommendations for increasing interaction between students and faculty in campus life; and
- Recommend initiatives to promote a more responsible approach to the culture of campus drinking, since alcohol abuse underlies many forms of thoughtless and dangerous conduct.

I ask that the Steering Committee provide me with an interim report of its work in progress no later than December 1, 2006, and a final report of findings and recommendations no later than May 1, 2007.

APPENDIX 2: CAMPUS CULTURE INITIATIVE STEERING COMMITTEE

Chair: Robert Thompson, Vice Provost for Undergraduate Education and Dean of Trinity College
Vice Chair: Larry Moneta, Vice President for Student Affairs

Faculty:
Anne Allison, Chair and Professor, Department of Cultural Anthropology
Philip Cook, Professor, Sanford Institute of Public Policy
Robert Cook-Deegan, Director, IGSP Center for Genome Ethics, Law and Policy
Jeffrey Forbes, Assistant Professor of the Practice, Department of Computer Science
Noah Pickus, Associate Director, Kenan Institute for Ethics*
Marie Lynn Miranda, Associate Research Professor, Nicholas School of the Environment
Barry Myers, Professor, Department of Biomedical Engineering
Suzanne Shanahan, Assistant Professor, Department of Sociology
Peter Wood, Professor, Department of History

Administrators:
Zoila Airall, Assistant Vice President for Student Affairs
Steve Nowicki, Dean of the Natural Sciences
Ben Reese, Vice President of Institutional Equity
Jackie Silar, Associate Athletics Director
Sam Wells, Dean of the Chapel

Students:
Trisha Bailey ('07)
Melissa Mang ('09)**
Chauncey Nartey ('07)
Iman Washington ('07)
Elliott Wolf ('08)

Graduate Student:
Audrey Ellerbee (G '09)

Alumni:
Charlotte Clark T '79, MEM '83 (Durham, NC)
J. Derek Penn T '79 B '84 (New York, New York)

* Replaced Elizabeth Kiss in June 2006 after Kiss's departure for Agnes Scott College to serve as its President
** Served through the end of summer 2006

APPENDIX 3: MEETING LIST

Between April 2006 and February 2007, the Campus Culture Initiative Steering Committee met on a weekly basis (32 meetings), as subgroups (25 meetings), and as conveners of special topics (14).

This appendix lists the guests invited to the Steering Committee and subcommittee meetings, meetings with the community, and meetings with Duke's senior leadership.

Co-Chair Robert Thompson had individual meetings with Robyn Wiegman (Women's Studies), Richard Hain (Mathematics), Joe Alleva (Athletics), Clint Davidson (Human Resources), Kemel Dawkins (Campus Services) and Jim Wulforst (Dining) about the Campus Culture Initiative. Thompson also met with 13 undergraduates, and Co-Chair Larry Moneta met with 4 undergraduates in individual meetings specifically about CCI outside of the list of meetings with student groups.

CCI Meetings with Senior Leadership

Date	Senior Leaders	CCI Steering Committee Participants
5/8/2006	Brodhead	Bob Thompson, Larry Moneta
8/7/2006	Brodhead	Bob Thompson
11/13/2006	Brodhead, Haltom, Lange, Riddell	Bob Thompson, Larry Moneta
11/16/2006	Brodhead, Lange	CCI Conveners
11/28/2006	Senior Leadership Group	Bob Thompson
11/28/2006	Brodhead	Bob Thompson, Larry Moneta
12/4/2006	Brodhead	CCI Conveners
12/13/2006	Senior Leadership Group	Bob Thompson, Larry Moneta
1/29/2007	Brodhead, Lange	Bob Thompson, Larry Moneta
2/14/2007	President's Council	Bob Thompson, Larry Moneta

CCI Meetings with Community

Student Groups and Organizations

Date	Audience	CCI Steering Committee Participants
8/30/2006	DSG Legislature	Larry Moneta
Sep-06	Baldwin Scholars	Zoila Airall
Sep-06	Campus Council	Larry Moneta
9/19/2006	Alspaugh Dialogue - Alcohol	Bob Cook-Deegan, Elliott Wolf
9/25/2006	Intercommunity council	Larry Moneta
10/5/2006	Residential Advisors	Larry Moneta
10/12/2006	LGBT Center - Alliance & Common Ground	Suzanne Shanahan
10/13/2006	Residential Advisors	Larry Moneta
10/15/2006	NPHC (National Pan Helenic Council)	Karla Holloway, Zoila Airall
10/16/2006	Beaufort Program student leaders	Larry Moneta
10/27/2006	Alspaugh Dialogue - Dean Sue on Culture at Duke: 'Old Duke, New Duke' and 'We Work Hard, We Play Hard'	Bob Cook-Deegan
10/18/2006	Residential Advisors	Larry Moneta
10/18/2006	Order of Omega	Larry Moneta
10/23/2006	BSA, NCCU students	Zoila Airall, Bob Thompson, Trisha Bailey, Chauncey Nartey, Iman Washington
10/25/2006	DSG Legislature	Robert Thompson, Zoila Airall
11/6/2006	Open session with Greeks	Larry Moneta, Zoila Airall, Charlotte Clark
11/6/2006	STUD (Students to Unite Duke)	Iman Washington
11/14/2006	Graduate & Professional Student council	Robert Thompson , Larry Moneta
12/5/2006	ASA	Iman Washington, Chauncey Nartey
12/7/2006	BSA	Iman Washington, Chauncey Nartey

Faculty Bodies

Date	Audience	CCI Steering Committee Participants
9/28/2006	A&S Department Chairs	Anne Allison, Steve Nowicki, Bob Thompson
10/12/2006	A&S Council	Robert Thompson
10/31/2006 - 11/1/2006	DUS Meetings	Robert Thompson

Town Hall Meetings

Date	Audience	CCI Steering Committee Participants
10/24/2006	Town hall meeting - faculty	Robert Thompson, Karla Holloway, Peter Wood, Trisha Bailey, Elliott Wolf
10/25/2006	Town hall meeting - students	Robert Thompson, Zoila Airall, Elliott Wolf, Audrey Ellerbee, Iman Washington
10/26/2006	Town hall meeting - staff	Robert Thompson, Zoila Airall, Elliott Wolf, Jacki Silar

CCI Meetings with Community

Small Group Sessions for undergraduates

Date	Audience	CCI Steering Committee Participants
9/13/2006	Small Gp Session - Gender/Sexuality	Anne Allison
9/13/2006	Small Gp Session - Race	Zoila Airall
9/15/2006	Small Gp Session - Athletics	*canceled*
9/15/2006	Small Gp Session - Athletics	*canceled*
9/17/2006	Small Gp Session - Alcohol	Suzanne Shanahan
9/20/2006	Small Gp Session - Race	Ben Reese, Zoila Airall
9/20/2006	Small Gp Session - Gender/Sexuality	Suzanne Shanahan
9/27/2006	Small Gp Session - Gender/Sexuality	Anne Allison
10/4/2006	Small Gp Session - Gender/Sexuality	Anne Allison, Suzanne Shanahan, Robert Thompson

Meetings with Boards, Alumni Groups

Date	Audience	CCI Steering Committee Participants
9/29/2006	Board of Trustees Undergraduate Affairs Group	Bob Thompson, Larry Moneta
9/29/2006	Homecoming panel on CCI	Noah Pickus, Suzanne Shanahan, Sam Wells, Chauncey Nartey, Trisha Bailey
11/10/2006	Trinity Board of Visitors	Bob Thompson
12/1/2006	Board of Trustees Undergraduate Affairs Group	Bob Thompson, Larry Moneta
12/1/2006	Board of Trustees, Emeriti	Bob Thompson, Larry Moneta
12/2/2006	Board of Trustees - full Board	Bob Thompson, Larry Moneta
2/23/2007	Board of Trustees Undergraduate Affairs Group	Bob Thompson, Larry Moneta
2/23/2007	Board of Trustees - full Board	Bob Thompson, Larry Moneta

Staff

Date	Audience	CCI Steering Committee Participants
11/1/2006	Undergraduate Leadership Group	Bob Thompson, Larry Moneta
11/29/2006	CAPS staff	Larry Moneta
12/18/2006	OSAF retreat	Larry Moneta
1/16/2007	Community discourse w/Student Affairs Staff	Larry Moneta

Guests Invited to CCI Meetings

Date	Guests	Office	CCI Meeting
5/11/2006	Richard Brodhead, Richard Riddell	President	Steering Committee
5/18/2006	David Jamieson-Drake	Office of the Provost, Institutional Research	Steering Committee
6/22/2006	Scott Swartzwelder	Clinical Professor of Psychiatry and Psychology and Neuroscience	Alcohol Subcommittee
	Stephen Bryan	Judicial Affairs	
6/29/2006	Bill Purdy, Jean Hansen	Student Health	Alcohol Subcommittee
6/30/2006	Michelle Rasmussen	Director, Academic Advising Center	Gender/Sexuality Subcommittee
	Joe Gonzales	Director of Second-Year Experience Coalition	
7/27/2006	Kathleen Smith	Chair of the on-campus Athletics Council and Faculty Athletics Representative	Athletics Subcommittee
8/10/2006	Kerstin Kemel	Head Coach, Women's Lacrosse Team	Athletics Subcommittee
8/24/2006	Melanie Mitchell	Kenan Institute for Ethics	Steering Committee
8/31/2006	Christoph Guttentag, Leonard Satterwhite	Admissions Office	Steering Committee
9/14/2006	George McLendon	Arts & Sciences	Steering Committee
9/15/2006	Janie Long	Director, LGBT Center	Gender/Sexuality Subcommittee
10/6/2006	Donna Lisker	Director, Women's Center	Gender/Sexuality Subcommittee
10/12/2006	Kemel Dawkins	Campus Services	Steering Committee
12/14/2006	David Malone, Tony Brown	Council on Civic Engagement	Steering Committee

Subject: 2007 FALL SEMESTER - HEAD COACHES' MEETING SCHEDULE

Attach: FALL '07 HEAD COACHES MTGS..doc

Colleagues,

Attached is the FINAL HEAD COACHES' MEETING SCHEDULE FOR THE 2007 FALL SEMESTER. Please remember to CONTACT DR. BETH MILLER OR LARRY GALLO, JR. IF YOU ARE UNABLE TO ATTEND ANY MEETING. If you should have any questions concerning the schedule of these meetings, please contact Dr. Miller or me.

Take care, and best wishes to both you and your family for a very enjoyable remainder of the summer!

Thank you and all the best.

Larry Gallo, Jr.

HEAD COACHES' MEETING SCHEDULE
FALL SEMESTER, 2007

Monday, August 20	**(Coaches' Retreat)**	12:15 PM	Koury Conference Room

Subject: Tar Heel athletic program earns top billing from STACK magazine.

North Carolina Program Ranked No. 1

Tar Heel athletic program earns top billing from STACK magazine.

Nov. 27, 2007

Magazine's "Elite 50" First to Rank Colleges Based on Academics, Athletic Opportunity and Overall Performance

New York, NY -- The University of North Carolina ranked No. 1 on STACK magazine's first ever college list of the nation's premier academic and NCAA Football, basketball and other Division I sports programs. Combining the best in athletics with the best in academia, the "Elite 50" list, announced today at www.stack.com/elite 50 , will be available in 5,500 high schools nationwide beginning Tuesday, November 27th, in STACK's November/December 2007 issue.

The 2008 edition of the "Elite 50" marks the first time any media outlet has released a stand-alone ranking of the country's leading college sports programs based on academics, athletic opportunity and overall performance. The "Elite 50" rankings also include sport-specific rankings for 14 individual NCAA sports including football, basketball and soccer as well as video tours of some of the "Elite 50" colleges through a branded STACK TV channel on www.stack.com .

The "Elite 50" methodology combines important academic and athletic data with STACK's internal research. The schools are ranked using key measures of

academic and athletic performance; overall academic rankings via U.S. News & World Report, athlete graduation rates, athlete indexes, national sport-specific rankings, championship history, professional successes, atmosphere, coaching staff tenure and more. This methodology enables athletes and parents to make an informed choice on an unbiased side-by-side comparison of sports programs. For more information on the "Elite 50" methodology, visit www.stack.com/elite50 .

About STACK
STACK is a multimedia high school sports brand that educates, inspires and entertains athletes. Through its formal partnerships with more than 7,000 high schools, STACK connects with millions of high school athletes each month. The STACK franchise includes STACK.com, STACKTV, MySTACK, STACK Magazine (500,000 circ.) and STACK Events. Since February 2005, STACK has pioneered in delivering safe and effective sports performance information and lifestyle content to this hard-to-reach market segment. STACK was founded by two former collegiate athletes, Chad Zimmerman and Nick Palazzo, to fight the burgeoning steroid epidemic among high school athletes and now is quickly expanding to help all athletes improve their performance safely and effectively. For more information, visit www.stack.com .

Subject: Q and A with Mr. Baddour

Question and answer session with Director of Athletics Dick Baddour on the settlement of the lawsuit between former women□s soccer player Melissa Jennings and Coach Anson Dorrance. The case was settled on January 14, 2008.

Why did Coach Dorrance and the University choose to settle now?

Because it is the right time for it to end. Neither the plaintiff nor the university see the benefit in proceeding further and Anson and his family certainly agree that enough is enough. For more than nine years, he□s had to defend himself in a case we believe has no merit. Think of how long that is. This case has lasted through nine soccer seasons, which is hard to believe. We came to a resolution four years ago with Debbie Keller and we thought the Jennings side of the case would be over soon after that. Here we are four years later. Nothing was resolved today that couldn□t have been resolved in 1998.

What do you mean by that?

Anson apologized to Ms. Jennings in 1998 for making comments in jest that the University thought, and in hindsight he agreed, were inappropriate. That□s what Anson apologized for in 1998 and it□s the exact same apology he is giving in 2008. The only difference is that the University is paying the plaintiff $385,000, which is intended to reimburse her for most of the attorneys□ fees she accumulated over the nine-year history of this case.

Did you settle because you thought Coach Dorrance would lose at trial?

Absolutely and unequivocally not. In fact, our attorneys have said for years that the best the plaintiffs could hope to do is get the case to trial. Two of the courts that ruled on the suit said there wasn□t enough substance to even send the case to trial. A third court said there was, but the legal

standard it used to determine that was to accept as fact everything the plaintiff claimed. And even then, that court was split.

So why settle if the University thought it would win?

No one wins in a trial, especially in a case like this. Our feeling is that even if we win the case as we would expect, the truth would get lost in the allegations, headlines, and the uninformed legal analysis that plays out in the media on a 24-hour basis. Anson□s reputation and integrity have been on the line for more than nine years and they have held up just fine, but he shouldn□t have to also endure a trial if we can find an endgame through a settlement.

You have to look between the lines and see what makes the most financial sense to all parties involved, not just the legal points. If this goes to trial and the University and Anson win as we expect, the plaintiffs are out of pocket at least $400,000, plus whatever additional attorneys□ fees they spend during a trial. So it makes sense for them to settle to recoup attorneys□ fees.

If it goes to trial and the court finds in favor of the plaintiff, even in the amount of $1, then the plaintiff could recover all of her attorneys□ fees from the University. We□d have to pay the attorneys□ fees AND we would have gone through a trial. That□s a risk that isn□t worth taking.

Why did the University settle for a higher amount than with the other plaintiff four years ago?

That□s the cost of our legal system. Ms. Jennings had four more years of attorneys, depositions, court proceedings, appeals, etc□ A lot of the legal work in this case occurred in the last four or five years, so it makes sense that the attorneys for the Jennings would have incurred more fees.

Where does the money come from?

It was paid from the athletic department□s 2007-08 operating budget. We certainly didn□t plan for this type of expenditure when we put together our budget for this academic year, but we will work diligently to find ways to account for it without negatively impacting our overall program.

Was Coach Dorrance asked to contribute to the settlement?

No. We have stood in support of Anson since the suit was filed. Nothing that has happened since 1998 has caused us to feel different about Anson or how we viewed the case. We supported him then, we support him now, and we stand up for our people and take responsibility as a department for the financial terms of the settlement.

Will Coach Dorrance be further disciplined by the University and/or the athletic department?

The allegations that were made in 1998 were unprecedented. There were no allegations against him in the 20 years before the plaintiffs made their claims and there have been no allegations of a similar nature in the 10 years since. Anson apologized for some comments he made in jest, and was reprimanded by the University back in 1998, but there was nothing he did that warranted this type of legal action. Anson has been a tremendous representative of the University of North Carolina for more than 30 years.

What have you heard from the current and former players?

Support □□ their overwhelming support for Anson, for Coach (Bill) Palladino and for the University of North Carolina. You have to remember back to August 1998. When this case was filed and we held the press conference to announce that it had been filed, we all wondered how it would affect the

soccer program and Anson□s ability to move forward as head coach. What happened? As soon as our press conference ended, the players on the 1998 team held their own press conference and stated in no uncertain terms that they were in unanimous support of Anson and of their belief that this case had no merit.

Many players wanted to testify on Anson□s behalf and it was tempting to pass on the settlement opportunity to allow that to occur. No one can tell the world about Anson and the program better than the players. That□s why, when Anson recruits high school soccer players to play for UNC, the best recruiters we have are the current players.

Is there anything positive that has come as a result of this entire case?

In a way that you wished never had to happen, we found out just how much the young women who have played here love competing for Anson and the University of North Carolina. We heard from player after player who said they became what they did in life because of the incredibly challenging, yet positive impact Anson, Bill, Chris (Ducar) and others in the program have had on them. Look, we□ve always known Anson is a great coach. But put the wins and the championships aside, because in the bigger scheme, they don□t matter. It□s about people and we are in the business of educating young people. And when all is said and done, we are so much better for having Anson as part of our program, our University and our lives. We heard it over and over.

The Place of Athletics at Carolina

J. Steven Reznick

(~750 words for the Institute for the Arts and Humanities newsletter "perspectives" section, described as "a short comment on an issue of interest to the university community. Due May 1."

Varsity athletics competition is a vibrant component of campus life at the University of North Carolina at Chapel Hill. Our recent national championships in men's basketball, women's soccer, and field hockey; our perennial strength in baseball, women's basketball, and men's and women's tennis; and our ongoing reemergence in football and men's lacrosse highlight the overall competitive success of our 28 varsity squads. This success on the field is complemented with comparable success in the classroom. The NCAA has established various metrics for assessing a squad's academic performance on the basis of graduation rates, grades, and progress towards degree. We monitor the data carefully, and all 28 of our varsity squads are consistently rated at impressive levels for all metrics.

Students chose to enroll at Carolina for various reasons, and our exciting athletics success is one of the many opportunities for engagement and entertainment within Carolina's outstanding social fabric. Further, strong varsity sports create a context in which club sports, intramurals, and recreational activities attain a high level of sophistication and participation. It is not coincidental that Lifetime Fitness is one of the "foundations" in our undergraduate curriculum!

My service on our Faculty Athletics Committee, our Undergraduate Admissions Committee, and the Athletics Council has given me an intimate perspective on Carolina athletics, and the more I have seen, the more impressed I have become with our unwavering commitment to doing the right thing in the right way for the right reasons. Carolina athletics fares extremely well in comparison to our competition, but the more important metric is our quality as viewed from various absolute perspectives.

Leadership. Athletics at Carolina has been shaped in many ways by Athletics Director Richard "Dicky" Baddour, who replaced John Swofford in that position in 1997. As Chancellor Hooker noted when Mr. Baddour was appointed, " … Dick's familiarity with, and inside knowledge of, Carolina athletics made him the top choice." With a BA in economics and an MA in education , both from UNC, over two decades of affiliation with the Athletics Department, and a moral compass that never drifts from the exemplary path, Mr. Baddour's leadership has maintained integrity as the central component in Carolina athletics.

Leadership is not just a top-down phenomenon. The Carolina Leadership Academy, which was the first program of its kind in collegiate athletics, was designed by Mr. Baddour and Associate Athletics Director John Blanchard to help our student-athletes, coaches and athletics administrators develop leadership skills to enhance success on and off the playing field. When Myles Brand celebrated the Academy's first birthday in 2005, his praise was appropriately exuberant: "This is an excellent example of putting the value and values of college athletics to work in enhancing the leadership among those involved in college sports."

Process. On some campuses, the Athletics Department is essentially a free-standing castle protected by a moat and drawbridge. At Carolina, the Athletics Department collaborates with the broader University community on all major decisions. For example, in 2004, Carolina confronted the possibility of using advertising at sports venues to help balance the Athletic Department's budget and make sure that our scholarship program and Olympic sports programs were strongly supported. A Task Force that included faculty, staff, students, trustees, and alumni explored the issue, various campus constituency groups were consulted, and a carefully crafted resolution emerged recommending that advertising be introduced in a limited and tasteful way. This open process, which addressed a serious financial challenge but balanced it with campus values, is not the modus operandi at many of the institutions that compete with us in the highest echelon of college athletics.

Another example of exemplary process is priority registration. Many of our peer institutions have an opaque system of priority registration in which student-athletes are allowed to register for courses before all other students. At Carolina, the policy that defines student groups who are eligible for priority registration was created by a task force representing a wide array of stakeholders, was reviewed by the Educational Policy Committee, and was approved by a vote of the Faculty Council. Student-athletes are one of many student groups at Carolina who are allowed to request permission to register before their classmates, but applications are scrutinized in a public meeting by a Priority Registration Advisory Committee composed of faculty, staff, and students before priority registration opportunities are granted.

Outreach. Why do we often see high school students on campus on their way to participate in a state championship? The N.C. High School Athletic Association, which was founded almost a century ago by famed UNC Professor Dr. Louis Round Wilson and UNC President Dr. Francis P. Venable, is a non-profit corporation that administers the state's interscholastic athletic program for 361 member schools and over 130,000 athletes annually. The NCHSAA's offices are located on University property on Finley Golf Course Road. The Department of Athletics, with endorsement from the University administration, hosts as many high school championships as possible to help us attain our goal of providing service to the state.

The Athletics Department is also doing a great job of reaching out to our campus community to engage them in the broad world of varsity athletics. One prime example is the series of Faculty/Staff Family Days generously hosted by the Athletics Department with the goal of connecting faculty and staff with Athletics Department representatives and with the coaches and players of some of our less well known varsity sports. The Family Day events held this semester at women's basketball, women's tennis, women's and men's lacrosse, baseball and softball were fun for all. For me, I learned a lot about lacrosse from former men's lacrosse coach and now Senior Associate Athletics Director Willie Scroggs' "Lacrosse 101" presentation, and that knowledge has encouraged me to follow our men's and women's lacrosse teams through their impressive seasons.

Given my current perspective on the exemplary role of Carolina athletics in our academic community, I am very disappointed when I hear a negative opinion about Carolina athletics that is based on inaccurate data. I do not want to sound like Pollyanna here, but I know that it is useful to pursue the facts before adopting opinions about Carolina athletics. For example, the Kenan Stadium construction goals are about renovation and not expansion; priority registration is about helping students who face unusual challenges and not about privileging athletes; and coaches salaries are based on market forces and are paid from the Athletics Department budget, which supports all 28 varsity sports and is almost completely self-sufficient. If you have questions or concerns about the place of athletics at Carolina, please ask our Faculty Athletics Committee to investigate. In the meantime, Go Heels!

Kurt,

I trust all is well!

Coach Davis and our administration has made a final decision that our 2010 Spring Football Game will be on Saturday, April 10th at 3:00 PM Eastern Time. If you should have any questions or concerns, please contact me as soon as possible. We are in our initial planning stages for this event and plan to proceed with this date and game time.

Have a great week!

Take care, and all the best.

Regards,
Larry

UNC

CAROLINA BLACK CAUCUS

Celebrating Our Community

Understanding Minority Male Persistence and Encouraging Student Success

Cynthia Demetriou[1], Ed.M. and Candice Powell[2], M.Ed.
Office of Undergraduate Education
Undergraduate Retention

THE UNIVERSITY of NORTH CAROLINA at CHAPEL HILL

Introduction and Theoretical Framework

Historically, higher education research has had an inherent pathology with a focus on repairing students' problems (Shankar & Hulme, 2006). To this end, much research education was studies fail to present an approach to why they succeed. Strength-based approaches to the study of undergraduate retention involve studying successful students. Studying what is right with students may illuminate new aspects of students' college experience which can in turn be applied to supporting all students.

The University of North Carolina at Chapel Hill has strong undergraduate graduation rates (70% of the entry cohort graduated within 4 years). However, minority male students are significantly less likely than non-minority males to graduate in a timely manner. African American, Hispanic, and Native American males are among the least likely to persist.

Purpose

Minority male failure to persist is widely studied (Lee, Sanders & Williams, 2005; Cuyjet, 2006; Griffin, Gonzales, Cole Pearson, Archibeque, Fransmanski, & Van Landingham, 2006; Gordon, 2004). Far less studies have examined the experiences of successful minority males (Fries-Britt, 2006; Harper, 2006). To inform best practices for retention, the authors conducted a study to explore the academic experiences of successful minority males at UNC-Chapel Hill. Study objects included:

- Describe minority male persistence at UNC-Chapel Hill.
- Identify characteristics and behaviors of successful minority male students at UNC-Chapel Hill.
- Collect student recommendations for enhancing the support of minority male students.

Method

Analysis

Quantitative → Survey results of successful students and non-students

Qualitative → Focus groups of successful students and non-students

Preliminary Findings

Successful minority male students at UNC-Chapel Hill:

I. **Are skilled at academic self-management**
II. **Have self-awareness of their academic strengths**
III. **Engage in learning activities outside of the classroom**
IV. **Are likely to intentionally engage with non-minority students**
V. **May or may not participate in mentorship**

I. Academic Self-Management

Academic self-management is control over internal and external factors influencing academic performance, including perspectives, characteristics or behaviors (Zimmerman, 2000).

*Responses demonstrated **self-agency** and **intrinsic motivation** to success in college. When asked which people had the most influence on their to excel academically, 92% of respondents ranked himself as having the highest influence. Other options included academic advisor, instructor, peers, family or other.*

92% of respondents indicated their "desire to excel" more influenced their academic success, followed closely by persistence (90%).

The majority of respondents (93%) met with an academic advisor two times in the previous semester.

50% of respondents indicated they modify their plans as their goals change and grow.

70% of respondents in course time management contributed to their academic success.

II. Awareness of Academic Strengths

93% of respondents indicated that they strongly agree or agree that they are aware of their non-academic strengths.

80% of respondents chose their academic major based on their interest in the subject. 79% chose their major because it aligned with their natural strengths and skills.

III. Learning Activities Outside of the Classroom

Learning experiences outside of the classroom appears to contribute significantly to the success of the majority of respondents.

- *80% of respondents indicated learning experiences outside of the classroom contributed greatly to their academic success*

- *50% of respondents indicated they were involved in an on-campus student organization*
- *67% of respondents participated in Undergraduate Research*

IV. Engagement with Non-Minority Students

An analysis of qualitative responses found engagement with non-minority students and non-minority-centered student organizations contributed to strong experiments (academic success).

> ***Q: What advice would you give a new minority male student at Carolina? (Response studies responses)***
>
> "Take a risk. Meet new people, be open to new experiences, and don't have your friends, people of your race, their resources, and sources your comfort zone."
>
> "Focus and engage."
>
> "Know you belong and seek the help/resources you need. Also, be open to learning new cultures."
>
> "Be aware of your surroundings and explore the many people and resources on campus."

V. Mentorship

About half of respondents indicated that they had a mentor who supported their academic success.

Most mentors were male (78%), with the majority being split between an equal percentage of white and African American mentors (35%, respectively). Most mentors were faculty members (43%).

50% of respondents who indicated they have a mentor said their mentor relationship is based on personality, and is not affiliated with any formal program.

Study Limitations

The response rate was just under 50%.

The newly defined successful, in part, by a good or higher cum GPA. Students with a cum GPA of 2.0 could also be defined as successful. The study may have benefited from changing the definition of success.

Findings are not generalizable to all minority male students. The study focused on a distinct group of students at a competitive, public research institution.

Discussion

A significant number of colleges and universities have created formal minority male mentoring programs (Cuyjet, 2006). An analysis of the survey responses in this study indicate that mentorship appears to be helpful, but not necessarily essential, for a significant majority of respondents. Very few respondents were mentored as result of a formal mentoring program.

Recommendations

Important goals for the University moving forward will be to intentionally:

- Encourage sustainable academic self-management skills that contribute to increased motivation, confidence and resiliency.
- Help minority male students identify their academic strengths and discover an aligning academic path.
- Encourage involvement in learning experiences outside of the classroom with diverse peers that challenge them cognitively, socially and culturally.

Subject: Budget Meeting Recap - March 31, 2009
Attach: TEXT.htm

Dear Dickie:

Below is a list of items we discussed in areas that the Football Program will be as conscientious with respect to budget concerns in an attempt to hold costs down:

1. Nike spending:

a. Every effort to stay within the allotment, as well as dialogue with Nike about unnecessary purchases.

2. Bowl game:

a. As stated, the $300,000 bowl overrun will be brought up at the ACC meetings (per Mike Kelly), that the costs have dramatically increased in the last four years for hotels, meals, transportation, etc. It also includes band members as well as bonuses for coaches for salaries that have increased since 2004.

3. Travel Party for road games:

a. Again, a discussion at the ACC meeting regarding the possibility for a cap on the number not to put the visiting team at a disadvantage competitively. An additional 6, 8, 10, 12 players is minimal.

4. Other expenses:

a. The area of most significant opportunity to save money is by downgrading from 767 to 757 aircraft for road trips. This should save approximately $100,000 for the UCONN and Boston College games.

5. Overtime:

a. The reclassification of Andre Williams and Marcus Berry from SPA to EPA and the possibility of Dominic Morelli should provide some reduction in overtime. A much more conscientious approach to using Equipment support (Jason and Mark), IT support (David), Video support (Darryl) and administrative support has dramatically been reduced since 2007.

Other areas that potentially could save funds:

A. Carolina Blues trip - $5,000

B. Lettermen's Weekend (golf and meal) - $25,000

C. Bus transportation to VA Tech game ($12,000) versus flying ($105,000) - $93,000 savings

D. Big Hitters Fall Preview in August (shirt and meal) - $10,000

E. Recruiting costs went down 2007 to 2008 $35,000

F. The Football Play Day (golf and meal) - $2,500

G. Wives/Senior Staff/VIP's Trip - $15,000

H. Eliminate Football 101 (women)

I. Eliminate monthly (Friday) Academic Luncheons - $10,000

J. Reduce the number of non-football attendees to the Football Senior Banquet- $1,500 - $2,000

K. Signing Day Reception - limit the number of invited guests to those who actually contribute to our recruiting efforts - $2,500 reduction

It is my understanding in including the contingency funds that may become available at some point during the summer, that we will have $565,830 which should be allocated by priority:

Group A Priorities:

. Players' locker room renovation - $300,000

. Building graphics - 2nd and 5th floor - $164,000

. Swofford chair replacements - $30,000

. Desks and conference tables - 4th floor - $75,000

. Training Table buffet line - $50,000

Group B Priorities:

. Building graphics - 1st floor hallways (price to be determined by Kevin Best)

. Steam room renovation - $35,000

. Tunnel renovation - $30,000

. Building graphics - Hall of Honor - $163,950

Group C Priorities:

. Practice field fence repair and replacement - $25,000

. Practice field pole repositioning - $10,000 (I question this cost estimate)

. Practice field video tower - $25,000

o None of category C priorities should be started without my approval

When you return from Detroit, we should discuss the two new elevators at Kenan Football Center.

Subject: Carolina 7 on 7 Beast on the Hill Camp Information

Attach: 7on7 camp coach proced.doc; Rules for 7 on 7 Passing Tournament.doc

---

Attached are documents that explain registration procedures and rules for our 7 on 7 Beast on the Hill camp which is Friday, July 24th. If you have questions please let me know. Thanks!!!

Carolina 7 on 7 Football Camp coaches,

We just wanted to drop you a note to clarify some of the procedures for our camp.

*) **Registration Information** – Registration will be held at Eddie Smith Indoor Facility (near the football practice fields – across from Boshamer baseball stadium). Registration will begin at 8:00 AM Friday, July 24th. If you have not sent all applications and forms in yet please do so prior to your arrival. At this late date unless you are using Fed Ex or express mail - you can bring money, applications, physicals and permission slips when you come. You may also FAX this information to (919) 962-8634. **Please remember we must have an application, physical, permission and payment for <u>each</u> camper prior to their participation.**

*) **Permission forms** - please make sure that these are signed by the parents or guardian and you bring them to registration or send prior to registration.

*) **Preparticipation Forms** – please be sure the form (verified with parent or guardian signature) that attests that the athlete has had a physical within the last calendar year (sometime between 7/24/08 – 7/24/09) is ready to be presented, if it has not been already submitted. We do not have to have actual physical forms, only this form signed attesting to the fact that they have had that physical.

*) **Payment** – we ask that individuals pay with cash only at registration **– no personal checks are accepted!** We will however take checks for a school or booster club. We will adhere to this policy due to the high number of returned NSF checks last year.

*) **Parking** – If you are bringing a bus you can come directly to Eddie Smith Indoor Facility drop your team off and we will assist you. Since it is a work day we will have to park the buses at the Dean Smith Center parking lot. Tell your players to remove anything they may need for the day since the bus will be parked a long distance from the action.

*) **Items to bring** – Make sure your players bring cleats as well as a shoe to wear on astro-turf (an astro-turf shoe, basketball bottom shoe or running type shoe) and helmets. You can bring footballs – especially if your quarterbacks are more comfortable with your brand football. We will supply footballs if you wish – we use Nike 3005. **Please bring 2 colors of practice jerseys or scrimmage vests also.**

If you have further questions please call our camp phone (919) 942-9747 or call Dominic Morelli (919) 843-1387 or Coach Browning (919) 966-2575.

Thank you for all your cooperation and assistance. We are looking forward to having a great camp and we are excited about having you here.

Carolina Football Camp Staff

DIRECTIONS TO CAROLINA FOOTBALL CAMP

FROM VIRGINIA, MARYLAND AND POINTS NORTH

Take I-85 South toward Durham, NC. At exit 174 stay left and follow US 15-501 South. Cross I-40 and go two miles. Take the left exit on the 15-501 By-Pass (exit is marked UNC-Chapel Hill). Once you are in Chapel Hill you will pass University Mall on your right and continue on to the next exit for Hwy 54 West. Take a left at the 1st light on to Country Club Drive then take an immediate right on to Ridge Road. Follow Ridge past until just before Boshamer Baseball stadium (on your left) and turn right into Eddie Smith parking lot.

FROM GREENSBORO, WINSTON-SALEM AND POINTS WEST

Take I-85 North toward Durham. Exit just past Burlington on Hwy NC 54 East (marked Chapel Hill). Follow 54 E approximately 25 miles to the second stop light and turn left on to Manning Dr. (marked Dean E. Smith Center and Kenan Stadium). Follow Manning Drive and take a right at the 1st light on to Ridge Road, go past Ramshead parking deck and Stadium Drive both on the left. You will see Boshamer Baseball stadium (on your left) and turn left into Eddie Smith parking lot.

FROM RALEIGH AND POINTS EAST

Take I-40 West toward Chapel Hill. Exit at 54 West, exit 273A (marked Chapel Hill) and follow 54 approximately 4 miles. Just past Glenn Lennox Shopping Center on your right and Harris Teeter on your left you will go under the first overpass of Hwy 54 West take a left at the 1st light on to Country Club Drive then take an immediate right on to Ridge Road. Follow Ridge until just before Boshamer Baseball stadium (on your left) and turn right into Eddie Smith parking lot.

FROM PITTSBORO, SANFORD AND POINTS SOUTH

Take US 15-501 North toward Chapel Hill over NC 54 overpass – you will then be on Columbia Street. At the 3rd light (start counting lights with the 1st light being the light at the end of the overpass) take a right on Manning Drive. Follow Manning past the hospital – take a left at the 7th light on to Ridge Road go past Ramshead parking deck and Stadium Drive both on the left. You will see Boshamer Baseball stadium (on your left) and turn left into Eddie Smith parking lot.

Rules for 7 on 7 Passing Tournament

1. **Field Dimensions:**
   A. Field Length—45 yards long
   B. Field Width—160 feet
   C. End Zone—10 yards deep

2. **Starting the Game:**
   A. A time keeper will be designated. All games will begin and end on the person's instructions. He will also announce the time remaining at the 10, 5 and 2 minute marks.
   B. Flip coin to determine which team will have first possession.
   C. First team listed on game schedule wears dark jersey color.
   D. Team in white will always align their team on the right sideline facing the end zone; team in dark will always align their team on the left sideline facing the end zone.
   E. Ball is placed on the right hashmark at the 45 year line.
   F. Referee will announce score before each offensive possession begins.

3. **Moving the Ball:**
   A. No kicking or punting
   B. Possession always begins at the 45 yard line at the right hash. No penalty will be assessed in excess of the 45 yd. line (loss of down will be assessed instead)
   C. Offenses always move in the same direction
   D. No player may run with the ball from a scrimmage play
   E. ***The offense must gain 10 yards for a first down***
   F. ***On all first down plays, the ball will be placed at the nearest 5yd. line***. (Example: if first down is obtained on the 34 yard line, ball will be placed on the 35 yard line so that the line to gain is always a five yard line.)

4. **Special Rules:**
   A. Blocking is permitted with arms extended (no shoulder blocking)
   B. Receiver/Ball carrier is legally down when touched below the neck with one or both hands. (Excessive force by shoving, pushing, or striking a blow will be penalized by automatic first down and 5 yards.) Expulsion of a player(s) if ruled unsportsmanlike & flagrant).
   C. Fumbles are dead balls at the spot with the last team retaining possession. **A muffed snap is not a fumble/dead ball**. The 4 second count remains in effect on snaps.
   D. Each **team will have 45 seconds to snap the ball once it has been marked down** (clock restarts on whistle ending previous play); **delay of game penalty will be loss of down plus 5 yards**
   E. The QB is allowed 4 seconds ("4 Carolina count") to throw the ball.
   F. A sack results in loss of down and –five yards from LOS

G. Game manager is placed on the sideline to record score and keep time for his field and to assist with crowd/player control.
H. Defenders must play ball on all throws (don't go through receiver); avoid collisions. Defenders may jam with hands, but not with face mask or shoulders.
I. Off-sides results in a five yard penalty and the play is dead
J. Illegal formation results in a five yard penalty.
K. Offensive and defensive pass interference penalties follow high school rules.
L. Interceptions may be returned ("blocking" rule applies). If an interception is returned beyond the 45 yard line (the offensive origination point); it is a touchdown and point after attempt should ensue.
M. Offensive team is responsible for retrieving and returning the ball to the previous spot or the new scrimmage spot. Clock does not stop and any delay by offense in retrieving and returning the ball to the referee will result in a delay of game and will be a 5 yard penalty from the succeeding spot.
N. The offensive center is not an eligible receiver. The ball must be snapped from the ground between the snapper's legs.
O. No taunting or "trash talking." (5 yd. penalty & expulsion if flagrant)
P. Players involved in fighting may be ejected from the game and tournament. If a team fight occurs, the team may be ejected from the tournament.
Q. Defense plays with 7 pass defenders (no rusher); team may substitute freely as in a game
R. Offense plays with 7 players; center may be used to snap only
S. Coaches--one offensive coach may be in the huddle, then move 10 yards behind the LOS once his team breaks the huddle. **Other coaches must be on the sidelines**

5. **Scoring:**
   6 points awarded for a TD, 1 point for PAT from 3 yard line, **2 point PAT from 10 yard line** (interception on PAT is dead ball) Official score is kept by field referee and recorded by game manager.

6. **Tie Breaker:**
   A. If there is a tie in standings, head to head is the first tie breaker. The second tie breaker is total points, the third is total points allowed, and the fourth is a coin flip.
   B. In overtime, after coin flip to determine first possession, teams will alternate 4 down series from the 10 yard line. A winner is determined when one team scores more during its possession than the other team scores.

7. **Time:**
   A. ***The games will last 25 minutes with a running clock.***
   B. No time outs. (**Exception**: Injuries. Both games on the field will halt until player(s) can be removed as soon as safety dictates.).

8. **Awards:**
   A. Championship awards will be presented for Flight I and Flight II
   B. Runners-up awards will be presented for Flight I and Flight II

Sportsmanship is of the utmost importance. This should be a positive event to help all teams to improve their skills and knowledge, to avoid injuries, and to prepare for the upcoming season.

Subject: Camp Season is Here!

Attach: TEXT.htm

Coaches,

As we approach summer camp season, please review the below Educational Column issued 3 years ago by the NCAA. The questions/answers included are still applicable this year. Please let us know if you have any questions about the information this column contains.

Thanks,
Amy

Educational Column
Attendance Restrictions at Institutional and Noninstitutional Camps/Clinics and Material Benefits Provided at Institutional Camps/Clinics (I)Date Published: April 9, 2009
Item Ref: 1

NCAA Division I institutions should note that pursuant to NCAA Bylaw 13.12.1.2, an institution's sports camp or clinic must be open to any and all entrants. An institutional camp or clinic is any camp that is owned or operated by the institution or an athletics department staff member at the institution and includes participants who are prospective student-athletes. An institution may limit the attendance at its sports camps and clinics only by number, age, grade level and/or gender. Further, Bylaw 13.12.2.3.3 permits athletics department personnel, in sports other than basketball, to serve in any capacity at a noninstitutional, privately owned camp or clinic that involves prospective student-athletes as participants, provided the camp is operated in accordance with restrictions applicable to institutional camps (e.g., open to any and all entrants, no free or reduced admission to or employment of athletics award winners, etc.). Finally, in accordance with Bylaw 13.12.1.5.4, prospective student-athletes may receive material benefits (e.g., awards, prizes, apparel) from an institution's sports camp or clinic only if the cost of the material benefits is included in the admissions fees charged for the camp or clinic.
Recently, the NCAA Division I Legislative Council reviewed issues related to the promotion of institutional camps and clinics. The council issued an official interpretation determining that an institution may advertise or promote an institutional camp or clinic in any way, provided any camp or clinic advertisement or promotion (e.g., camp brochure, Web site, newspaper or magazine advertisement) stipulates that the camp or clinic is open to any and all entrants (limited only by number, age, grade level and/or gender). The following questions and answers are designed to assist Division I institutions in the correct application of these bylaws.
Attendance Restrictions
Question: Is it permissible for an institution to limit the attendance at a sports camp or clinic based on the skill level of the participants (e.g., elite athletes, letter award winners, high school varsity athletes)?
Answer: No, it is not permissible for an institution to limit the attendance at a sports camp or clinic in any way based on skill level. The only permissible limitations on attendance are number, age, grade level and/or gender.
Question: May an institution advertise or promote an institutional sports camp or clinic as an "elite" camp or clinic?
Answer: Yes, an institution may use any words or phrases to advertise or promote its institutional camps and clinics, provided the advertisement or promotion states that the camp or clinic is open to any and all entrants, in accordance with camps and clinics legislation.
Question: If it appears that an institutional camp or clinic is open to any and all entrants (e.g., no reference to elite camp) is an institution required to include a specific statement stipulating that the camp or clinic is open to any and all entrants on all advertisements or promotions for the camp or clinic?
Answer: Yes, all institutional camp and clinic advertisements and promotions must include a statement stipulating that the camp or clinic is open to any and all entrants, regardless of how the camp or clinic is advertised.
Question: May an institution include a statement or description in a camp or clinic advertisement that states advanced techniques will be taught at a camp or clinic without violating the attendance restriction regulations?
Answer: Yes, a statement or description may be included in an advertisement to inform potential participants of the level of instruction that will be provided at the camp or clinic, including advanced techniques, to allow the participants to make an informed

decision about attendance at the camp or clinic. The advertisement, however, must stipulate that the camp or clinic is open to any and all entrants, in accordance with camps and clinics legislation.
Question: May an institution advertise and/or conduct a camp or clinic as a position camp? For example, may a volleyball program conduct a "setter's camp"??
Answer: Yes, institutions may conduct position camps provided no level of experience, skill or ability is required and the camp is open to any and all entrants. Any advertisements must include a statement stipulating that the camp or clinic is open to any and all entrants, in accordance with camps and clinics legislation.
Question: May an institution conduct an "invitation only" camp?
Answer: No. "Invitation only" camps are not permissible because attendance it is not open to any and all entrants, limited only by number, age, grade level and/or gender.
Question: Is it permissible for a coach to invite certain prospective student-athletes to a camp that is open to any and all entrants?
Answer: Yes, an institution's coach may invite certain prospective student-athletes to a camp, provided the camp is open to any and all entrants. However, an institution may not provide any type of priority registration for specific prospects. Additionally, an institution must abide by all applicable recruiting legislation when inviting certain prospects to a camp. For example, a coach may not call or write a prospective student-athlete in ninth grade to extend a camp invitation.
Question: May an institution reserve spots at a camp or clinic for specific prospective student-athletes?
Answer: No, an institution is not permitted to reserve spots at a camp or clinic for specific prospective student-athletes. For example, if a camp is limited to the first 100 entrants, the institution may not reserve 25 of the 100 places for the coach's top recruits. The coach would be permitted to invite those 25 recruits; however, if any of them are not within the first 100 to register, they would not be permitted to attend the camp or clinic.
Question: Is it permissible for an institution to conduct team camps without violating camps and clinics attendance restriction legislation?
Answer: Yes, an institution is permitted to conduct a team camp. A team camp must be open to any and all teams limited only by number of teams, age of the members of the teams, grade level of members of the teams (e.g., high school, middle school) and/or the gender of the teams.
It should also be noted that the promotion of team camps is held to the same restrictions as any other institutional sports camp or clinic. Therefore, team camp advertisements and promotions must include a statement stipulating that the camp is open to any and all teams, limited only by number, age, grade level and/or gender.
Question: May an institution's athletics department staff member work at a noninstitutional camp or clinic that is advertised as an elite camp or clinic?
Answer: Yes, provided the camp is conducted in accordance with the legislation regulating institutional camps or clinics. Therefore, in order for an athletics department staff member to be employed on a salaried or volunteer basis at a noninstitutional camp or clinic, advertisements or promotional materials must stipulate that the camp or clinic is open to any and all entrants. Athletics department administrators (e.g., rules compliance personnel) are encouraged to review noninstitutional camps/clinics advertisements and promotional materials prior to permitting coaches and other athletics department staff members to be employed.
Provision of Apparel and Awards
Question: May an institution provide apparel and/or other merchandise (e.g., equipment, posters, gifts) to camp or clinic participants?
Answer: Yes, an institution may provide apparel and/or merchandise to camp and clinic participants, provided the total cost of the items is included in each camp or clinic participant's admissions fee. If the cost of the items is not included in each participant's admissions fee, then the institution is providing participants an impermissible benefit. For example, if an institution provides each camp participant a basketball and a shirt valued at $45 but the camp admissions fee for each participant is only $40, the institution has provided an impermissible benefit to each participant who received those items.
Question: May an institution provide apparel and/or other merchandise (e.g., equipment, posters, gifts) that it receives free of charge or at a reduced rate to camp participants without including the normal retail cost of the item(s) in the participants admissions fee?
Answer: No, the institution must assign normal-retail value to the item(s) it provides to camp participants regardless of whether the institution received the item(s) free of charge or at a reduced rate. The normal-retail value of the item(s) must be included in the participants' admissions fee.
Question: Per Bylaw 13.12.1.5.4, the cost of awards received by prospective student-athletes at an institutional camp or clinic must be included in the admissions fees charged to participants at the camp. Does the full cost of each award have to be included in the admissions fee for each camp participant even though not all camp participants will receive an award? For example, if all awards provided at the camp cost $100, does the $100 have to be included in each camp participant's admissions fee?
Answer: No, the full cost of each award does not need to be included in each participant's admissions fees. However, the full cost of the awards must be included collectively in the admissions fee for all camp participants. For example, if the total cost of all awards to be given out at an institutional camp or clinic is $100 and the camp attendance is capped at 100 participants, each individual admissions fee would have to include an additional $1 used to cover the awards provided at the camp or clinic.

Subject: Summer Camp forms

Attach: TEXT.htm; Free or Reduced Admission Roster.pdf; Outside Coaches Employment Roster.pdf; Student-Athlete Employment Roster.pdf

---

Coaches,

Attached are the three required compliance forms for Summer Camps - the Free/Reduced Admission roster, the Outside Coaches Employment roster, and the Student-Athlete Employment roster - that we need submitted in our office.

If you haven't already submitted these forms, please do so prior to camp. If you are unable to complete these forms until after camp in order for us to have the most accurate information, that is fine but we will place holds for camp documentation in August if we do not have these forms for any June or July camps.

If you have any questions, just let me know. Thanks!!

Lance

"**O**" = Other (please explain).

THE UNIVERSITY OF NORTH CAROLINA

Outside Coaches Employment Roster

Per NCAA Bylaw 13.12.2.2, *High School, Preparatory School, or Two-Year-College Coaches*, a member institution or employees of its athletics department may employ coaches outside of its athletic program staff, provided:

a) The coach receives compensation that is commensurate with the going rate for camp counselors of like teaching ability and camp experience;
b) The coach is not paid on the basis of the value the coach may have for the employer because of his/her reputation or contacts with prospects; and
c) The coach is not compensated based on the number of campers he/she sends to camp.

Please complete the following chart **in its entirety** and submit to the Compliance Office at least one week prior to the first camp.

Subject: pilot mentioring program
Attach: ccannon.vcf

Hi Corey and Cricket,

I write this email to ensure that I am clear about the purpose and goals of the proposed pilot mentoring program, and understand the duties and responsibilities of the mentor and the prot□g□. Please clarify the following for me:

* It is my understanding that the Department of Athletics and the Academic Support Program will coordinate the program. Faculty/staff/administrators would serve as mentors, but not be involved in planning the details and coordinating the "group" efforts of the program. Is this correct?
* Is this a faculty mentoring program in which student athletes will be paired with just faculty? If that is not the case, I suggest renaming the program to reflect the involvement of other University personnel.
* What does it mean to be a "faculty/staff" coordinator? What is your plan if a "subcommittee" incoming first year student who does not want to participate in this pilot program? The program cannot be mandatory. How will you market it to □selected□ incoming first year students?
* What are profiles-GPA, SAT, HS Class Rank? Do mentors need "profiles" as much as they need general information about the student with whom they will mentor? Basic information such as favorite subjects, career/academic goals, interests, hobbies, likes, dislikes, hometown, etc., would be helpful. What do students expect or want from a relationship with a faculty/staff mentor?
* Should "mentors" provide students with biographical information? What information does students need think this program would be worth their while?
* How will you advertise the pilot program to faculty/staff? If you have more potential mentors than prot□g□s, how will you select participants for the program? What will you do to ensure that interested faculty/staff are not discouraged if they are not selected to be mentors for the pilot?
* Is it possible to have the mentor and prot□g□ meet before the beginning of the fall semester? The beginning of a new academic year is always extremely busy, and often overwhelming for new students. How about introductory meetings during the summer? Some of them will be here for Summer Bridge, summer orientation, and summer school.

Thanks for asking for feedback. I look forward to hearing from you soon.

Best,
Carolyn

Attach: TEXT.htm

Dear Mr. Eyles

I sincerely appreciate your taking time to write. It's extremely important to me and our staff that we present ourselves in a first-class manner. We feel it is an honor and a privilege to coach at UNC. As the Head Football Coach, I constantly have dialogue with our staff about the importance of embracing the community as well as the members of the University's faculty and staff.

In your email, you were indicate you are unable to identify with any certainty that the individual you encountered is even a member of our coaching or football support staff. I would be extremely surprised if it was a member of our staff as we do not use the track nor the bleachers for a training area. You may have encountered a member of one of the other 27 UNC sports with his wife, girlfriend, or assistant coach that commonly and routinely use the track as a training area. It's conceivable this individual is a member of the University's grounds crew. Regardless, I'm very sorry that you were insulted.

If you like, I could share this information with the individual in the Athletic Department that's responsible for the grounds crew staff, as this staff doesn't fall under my area of responsibility. As to your request to train on the track and the bleachers that adjoin the facility, that is something you should take up with the men's and women's track program. I have no responsibility over those facilities. Additionally, I have absolutely no control over parking.

I would be very sad and disappointed if it was a member of our staff, but I will use your email as another opportunity to remind our coaches and staff of our obligation to be leaders and role models in the community.

Subject: Re: Question
Attach: TEXT.htm

Coach Davis,

The NCAA could hit them with an Ethical Conduct charge - bylaw 10.01.1 - since what they did goes against the principle of "fair play" stated in that bylaw. It could be something that the school self-reports, imposes their own penalties, and hopes that the NCAA accepts those penalties as a resolution to the matter. If the school chose to ignore it, I think it's possible that the NCAA would ask the school why they don't think there is an ethical conduct issue. Although Notre Dame is not a member of a conference in football, we believe that it does violate NCAA rules governing ethical conduct.

If the school or the NCAA imposed penalties, we do not know what they would be. One would hope that the institution would handle the matter internally and satisfy all issues relating to ethical conduct.

I hope this helps answer your question. Thanks and good luck this weekend!!

Lance

PLAY 2: BLOCK IN THE BACK(agree. Missed call by SJ)
PLAY 3: BLOCK IN THE BACK (agree-Missed call by LJ)
PLAY 4: DT JUMPING AND LANDING ON PATFG (Unable to accurately determine if "leaper" started more than one yard behind LOS and was moving forward. He does land on a layer. Can't tell for sure...looks like foul)

OFFENSE:

***PLAY 5: 40 LEADS WITH HELMET ON QB* (agree- this is actually "spearing")**

PLAY 6: HOLDING ON 88. DEFENDER THROWS BLOCKER MORE THEN BEING HELD (Defender can use his hands to ward off and throw potential blocker off of himself. Not a clear foul; would not call)

PLAY :7 CATCH BY #1. BALL CONTROLLED BY TWO HANDS – LEFT FOOT DOWN, FOLLOWED BY RIGHT FOOT TOE DRAG – HIP (*Clarification of Catch/NO Catch -*

1) A player must gain complete control of the ball and get it to a position where that player could do something else germane to the game

2) If a player is upright and untouched and has completed #1 above and steps out of bounds or in the end zone – he has completed the catch. You must be absolutely sure and the video evidence must be indisputable that the entire catch process has been met

3) If a player is airborne with or without contact in the process of making the catch – when that player comes to the ground he must maintain possession of the ball

This was a very close reversal…but I concur that it was correctly called. These plays have been the subject of much discussion nationally for the past few years and the above language was agreed upon at the national NCAA/CFO clinic.)

DEFENSE:

PLAY 8: HOLD ON 54 (agree..but restriction is slight and quick)
PLAY 9: HOLD ON 41 (agree)
PLAY 10: HOLD ON 9 (yes)
PLAY 11: HOLD ON 9 (Yes)
PLAY 12: GUARD TACKLING 9 (Video shows jersey is grabbed-foul)
PLAY 13: HOLD ON 52 (minimal restriction)
PLAY 14: HOLD ON 97 (yes- agree)
PLAY 15: HOLD ON 9 (grab & restrict/ video supports jersey is grabbed and pulled)

Coach Davis,

I agree with the two points you have stated in your email. I spoke to the Conference Office about this matter before our bowl game and they fully understand that you did not agree with moving the Duke game from the last game of the season, and that this is not our request to the ACC Office for the 2009 season.

Our one request to the ACC Office for the 2009 season is that we don't play a home game on Saturday, October 31st. The Town of Chapel Hill has asked us to assist them in controlling the potential crowd in Chapel Hill on Halloween. Thus, not having a scheduled game in Chapel Hill on October 31st will assist The Town with their "crowd control efforts!"

On what date the Duke football game or any ACC opponent's future game will be played is in the hands of the Conference Office.

Thanks so much, and if you should have any further questions, please do not hesitate to contact me. Happy New Year!

Take care,
Larry

Just a heads-up, it's that time of year again. The NFL Draft is at the end of April. Many of the clubs have their own security or they hire security to do background checks on potential Draft-eligible players. I want to remind you that it is our policy that no one speaks to these individuals without prior approval from me.

Should you be contacted or approached, politely inform them that you must receive permission from the Head Coach. I remind you in dealing with NFL coaches and scouts, there are HIPPA laws that protect sensitive information about individuals. We do not want to put ourselves in the situation that could damage the University of North Carolina, our football program, or our student-athletes.

Please inform those individuals that work with and for you of this policy. If you have any questions on how to answer once permission is granted, feel free to contact me. Thank you for your cooperation on this matter.

Good Morning Dickie:

Thank you for coming over yesterday and going through Phases One and Two. The preliminary plan on Phase Two looks terrific!

Two items we did not discuss, one of which I definitely think should be a part of Phase Two, is the redo of the playing field. There's been a lot of discussion on the soil composition and how poorly the turf responds each year. Consideration should also be given to moving the hedges against the walls and adding field turf to the exterior of the game field. Previous quotes to redo the field seemed somewhat reasonable and the timing, if you're doing any major renovations to the end zone, probably makes sense.

The second item is will a Letterman's Lounge/Room be a part of the end zone project. Many have contacted Corey to see if such a room will be included.

Please give me your thoughts on these two items.

Thanks. I am very pleased with Phase II right now.

We'll look at the field and side lane area and get back to you. Right now, we have not included space for a letterman's lounge as we need all we have to replace and enhance what is there (as you know). We'll take a look at the space and see what (if anything) can be done. As it stands now, we are not replacing the Rams Rooms for the same reason.

Thanks for your suggestions.

Subject: Questions
Attach: TEXT.htm; UNC Meineke Car Care Bowl - 2009.pptx

Coach,

I have answered each of your questions below.

- How many tickets did we sell to our bowl game?

For the 2009 Meineke Car Care Bowl we sold 12,810 tickets directly from the UNC Athletics Ticket office. Many more tickets were sold to Carolina fans via ticketmaster and other bowl sources but we cannot track those as Carolina Fans.

- How much marketing did we do to bowl game sell tickets?

The marketing plan that we presented to the Meineke Car Care bowl is attached. This is the plan we followed to market ticket sales.

- Were you disappointed in the bowl game turnout?

Yes. Anytime we do not completely sell out a home game or a bowl game I am disappointed. I think there were several factors that limited our bowl game sales this season including the sales directly from our ticket office and overall bowl sales:

- The game date of 12/26 (day after Christmas) vs. two days after Christmas in 2008 and five days after Christmas in 2004. Some of our most ardent supporters who never miss home games or bowl games told us even they could not attend this year as their Christmas weekend plans were set with family.
- Economic Times Impact. Unemployment in North Carolina remains very high, this impacts our fan base and their ability to pay for $40 - $90 each tickets and the cost of traveling to and attending bowl games.
- Two years in a row to the same bowl game. This impact is certainly smaller than the date proximity to Christmas, but did have an impact.
- Pittsburgh sold only about 7,000 tickets to the game. Last year West Virginia sold over 20,000 tickets. This had a major impact on the overall game attendance and atmosphere.
- Losing our final regular season game.

- How did the 2008 bowl game compare in the above against our 2009 bowl game?

In 2008 we sold 22,200 tickets for the Meineke Car Care bowl directly from our office and many more were again sold to Carolina fans via ticketmaster and other bowl sources which we cannot track. The marketing elements we used in 2008 were very similar to those used in 2009. We spent approximately 25% more on marketing this year, as we added additional newspaper and radio advertisements when the initial response was slower than last year.

Coach, while I am disappointed in the turnout I am confident that we executed a solid and aggressive plan to market the bowl tickets. The factors listed above are by no means excuses, rather they are real factors we are working to overcome. Our tickets, marketing and Rams Club staffs are jointly developing plans to ensure that we are doing all we can do to market Carolina Athletics so we can continue to enjoy and grow the tremendous support we have had for many years. Additionally

the ACC is preparing a detailed report of tickets sales, attendance, and TV ratings for all bowl games for this year and previous years. We will use this report (expected to be completed in late January) to refine our planning and compare our results to other ACC schools and schools from other conferences. Some preliminary information indicates that other schools saw significant reductions in number of bowl tickets sold this year (i.e. Clemson - 4,000 for the Music City Bowl).

If you have any further questions or would like to discuss further, please let me know.

CAROLINA FOOTBALL

2009 Tar Heels

8 – 3

(as of 11/21/09)

5 wins vs. Bowl Teams

Tremendous fan support

Excellence on and off the field

meineke car care BOWL

CAROLINA FOOTBALL

- Carolina enters the final week of the regular season with a **8 – 3 record**, including wins over four bowl eligible teams, **ECU, Virginia Tech, Miami and Boston College,** and a 5th that needs one win to become bowl eligible, **Connecticut**. Carolina has won four games in a row including victories over **#14 Virginia Tech** in Blacksburg, **# 12 Miami** in Chapel Hill, Duke and Boston College.

- Carolina has won **eight games** in **back-to-back seasons** for the first time since 1996 and 1997.

- Carolina has sold **over 35,000 season tickets** for two years in a row in **2008 and 2009**.

- Carolina's average home attendance of **56,607 per game** in 2009 is the second year in a row over 56,000.

- **Head Coach Butch Davis** has a 71 – 36 career record and is widely regarded as **one of the best coaches in college football.**

CAROLINA FOOTBALL

- Carolina's defense is ranked **#5 in the country**, allowing just 261.6 yards per game. The Tar Heels are also **#7 in pass efficiency defense**, **#11 in run defense**, and **#12 in scoring defense**. Carolina's defense is the **#1 ranked unit in the ACC**.

- Carolina's **big play defense** has set a school record with **508 interception return yards** this season. That is the **most in the country** (the #2 team in the country has 396 interception return yards).

- Carolina ranks **fifth in the country in tackles for loss**, led by **All-America Candidate Robert Quinn** who is sixth in the country in sacks and seventh in tackles for loss.

- Carolina is **sixth in the nation** with **19 interceptions**, led by safety **Deunta Williams** with six and cornerback **Kendric Burney** with five (two for TDs).

- Junior Quarterback **T.J. Yates** is **2nd all-time at UNC** in passing yards, touchdowns, completions and completion percentage.

- Junior Tailback **Ryan Houston** has **18 career rushing touchdowns** including 9 in 2009.

- Carolina is **3 – 1 on the road** this year with wins at **Connecticut**, at **Virginia Tech** and at **Boston College**.

CAROLINA FOOTBALL

The University of North Carolina
A National Brand

- North Carolina finished **2nd in the 2008 – 2009 Learfield Sports NACDA Directors' Cup** for excellence across all sports.

- **Sports Illustrated** ranked North Carolina as the **4th most successful athletic program** for all sports in 2007 – 2008.

- UNC has been ranked **# 1 in Collegiate Licensing sales** for 5 of the last 8 years and has always been in the top 10. The next closest ACC school was 16th in the country last year.

- UNC's athletic website, TarHeelBlue.com, is **the number one (1) visited website in CBS Sports On-Line network** of 120+ Division 1 schools.

- The Tar Heel Sports Radio Network has **a monthly state-wide audience of over 1,000,000 listeners** (for both football and basketball).

CAROLINA FOOTBALL

The University of North Carolina
General Alumni Association
A brief look……..

UNC has the following alumni numbers:

Total Alumni Distribution by State / City:

North Carolina	**138,103**

Hello Clint:

I hope you are doing well. Great job last weekend with the Spring Game. What a phenomenal day for our football program and the University!

As a personal favor to me, could you possibly improve the seat location for the upcoming season tickets purchased by Thomas C. Shea, MD? Dr. Shea is the Director of UNC's Bone Marrow and Stem Cell Transplant Program for the Lineberger Comprehensive Cancer Center. He purchases his tickets as a member of UNC faculty, but has indicated his assigned seats are located towards the end zone and in the "nosebleed" section. I would greatly appreciate it if we could improve the location of his seats.

Please let me know if you can facilitate this change and what steps Dr. Shea would need to take to secure.

Thanks for your time and consideration.

Best regards,

Butch Davis

Dear Dickie:

I received a call this morning, Wednesday, April 21st, from Dave Brown at ESPN inquiring about the possibility of us playing in Texas Stadium for our opening game of the 2012 season against possibly Texas Tech University.

I am copying Larry Gallo on this email. Sometime in the near future if Larry and I could visit about this game it would be greatly appreciated. We currently have six home games in 2012. We would have to decide if the exposure for this type of game provides enough of a benefit to forego a 7th home game.

I'd like to hear your thoughts. Whenever you get a chance you can reply to this email or give me a call.

Attach: TEXT.htm

Dear Dickie:

I know this may seem like a redundant topic, but I am frustrated, disappointed, and very upset at the state of our playing fields and practice fields. This has been an on-going concern and a point of frustration and aggravation since I accepted the head coaching job.

Each spring followed by the summer and the season, the field at Navy Field has been a disaster. We have issues of poor sodding, terrible footing, ill-timed and poor attempts at fixing the problems. I honestly feel issues exist relating to safety. I believe we have had three major surgeries as a direct result of poor field conditions. As I have told you in the past, if this was the NFL, the Players' Union would probably sue the team. and agents would not let their players work on fields in this poor condition. My personal opinion is that this has hurt us in performance and recruiting. We are in serious jeopardy of not having a field for our football camps that begin in two weeks. There is no reasonable expectation that a sodded field can be ready in two weeks. We have not had one single activity on this field since April 9th (I assume that's six weeks ago). This field could have been sodded within this timeframe.

Our off-season conditioning program takes an enormous hit as we cannot work out in the Eddie Smith Center because of conflicts with other sports. We are constantly asked to stay off Navy Field in the spring and the summer. I have sent to you a DVD that I would like for you to view in its entirety. It will take about three minutes for you to get an appreciation for the poor condition of this field. I would very much like to discuss continued problem at your earliest possible convenience.

Please let me know when an appropriate time exists for us to discuss this situation.

Subject: Scheduling
Attach: TEXT.htm

Good Morning:

I'd like to make you aware of the NCSU 2010 football schedule. As you will recall, I have been a proponent of Thursday night football games for our program. There are several major factors that make these games desirable, not only from a marketing/branding and exposure across the country, there is a distinct competitive advantage to playing on Thursday night. In most cases Thursday night games get you ten days of practice, preparation, and the opportunity to get injured players healthier to participate in the game, not to mention a significantly more electric game day atmosphere.

This year NCSU will play at home on Thursday, September 16th against Cincinnati, followed by nine days of rest, preparation and extra practice time for Georgia Tech. Then on Thursday, October 28th they will again be coming off twelve days after a non-conference ECU game before they play FSU, followed by nine days before they play Clemson on November 6th .

1. Three major highly talented teams in the ACC
2. They will get additional practices, opportunities to get well
3. Two of the three are followed by non-conference games

Hopefully, you can see the competitive disadvantage for our program and a willingness in the future for us to accept Thursday night opportunities and to manage our scheduling to accommodate our team with some of these advantages.

Subject: Drug Testing
Attach: TEXT.htm

Dear John:

We haven't had an opportunity to speak recently concerning the UNC drug testing policy. I had a conversation with Corey Holliday recently and he felt that we were moving closer to possibly having an amendment to the policy that would allow for an individual to somewhat earn back a strike by going 18 months passing all drug tests and adherence to all education and counseling requirements. As you have asked before, I think this would be a very proactive approach and would allow us to potentially call for more random tests.

I know that Melissa Exum was on board with this philosophy, but unfortunately she is no longer with us. Could you give Corey or me an update?

I hope you've enjoyed a good summer. I look forward to hearing from you soon.

Subject: Football Parking
Attach: TEXT.htm

Dear Roger:

Thank you very much for your willingness to be involved in trying to help us resolve our parking situation. For complete understanding, the reason that we feel like our student-athletes need some "special" consideration relating to parking is the frequency, irregularity, and the amount of time that our players required to be at our facility. A typical day for our student-athletes usually involves:

1. 7am - treatment, rehab, and medical evaluations

a. A high percentage of players are required to lift in the morning before attending classes; many others choose to lift on days when they don't have classes that day

2. The possibility of meetings with coaches, Player Programs, Academic Support, tutoring, etc. exists in the mornings and early afternoons around their classroom schedules

3. Lunch is provided at the facility from 11am - 2pm

4. Players are encouraged to come in at their convenience around their free-time to watch and study opponent film on their own

5. We have a four-hour window from 2pm - 6pm when we meet with our players, install game plans, practice, receive treatment and therapy after practice, and review practice film

6. Dinner is served at the facility from 5:30 - 7pm

7. Probably 65% of our players are required to attend mandatory study hall in the evenings from 7 - 9-9:30pm

In any given year, we have somewhere in the neighborhood of 30 - 40 football players that live off-campus and are willing to purchase parking permits. They require parking that allows them the ability to frequently come and go throughout the course of the day because of the above schedule.

For all previous years, we have been allowed to issue parking permits that enabled our student-athletes to park under the stadium. This accommodated the majority for the aforementioned schedule. Since parking will no longer be allowed to anyone under the stadium, this has necessitated finding parking for all of our coaches, football support staff, and other football employees in addition to our student-athletes.

I am very sensitive as to how difficult it is on any college campus to accommodate parking needs. Dickie has done an excellent job in finding parking places for our staff. It is my understanding that no parking places in the new parking garage can be used by students. I don't know if that's true or not. There are a couple of hundred potentially available parking places in Rams Head Deck. Currently, we have 15 players that have paid for parking permission for the Rams Head Deck. We still have more than 20 players that were not allotted Rams Head Deck parking. Public Safety would like for them to park at the Smith Center. Because of the frequent number of times our players have to go back and forth to the Football Center, this is less than an ideal solution. If our players were just coming to campus and staying in one place for 12 hours it could be workable solution, but that's not the scenario with our student-athletes.

Roger, I really appreciate any help you can give. I hope that this email provides you with the necessary background, but if you need further clarification please feel free to give me a call.

Best regards,

Butch

Subject: Hello from Butch Davis
Attach: TEXT.htm

Good Afternoon Johnny:

I hope you're having a great summer. I tried to call this morning and the receptionist indicated you were on the road. I wanted to make sure that you knew I would love for you to be on the sidelines with the team in Atlanta. I'm saving four sideline passes for you to use for yourself and anyone else that you would like to join you. Certainly do not feel like you have to stay on the sidelines if you would prefer to be sitting in the stadium. I truly understand. I just want you to know how much I appreciate you and I want to make these available if you would like them.

I also heard a tiny rumor that you and Quail Hollow might be given the PGA Championship in the future. That would be awesome!

I'd love to talk to you sometime soon and get your feelings about Dustin Johnson and the ruling at this weekend's PGA Championship.

Have a great summer. I look forward to talking to you and seeing you soon. Give my best to Deborah.

Warmest regards,

Butch Davis

Subject: Summer Conditioning

Attach: Summer Conditioning Regulations.doc

Coaches and support staff,

Please see the attached outline detailing various regulations for summer activities, including summer conditioning with the strength staff, medical expenses, academic services and training room facilities, and workout apparel. This information applies to all sports other than football. Football staff, please ignore this email. You have your own set of regulations...

Regulations vary, depending on the status of the student-athlete or prospect. Therefore, it is critical that you be aware of each possible situation. In addition, please remember that all activity during the summer MUST BE VOLUNTARY. A definition of voluntary is included at the conclusion of the outline.

It is important that you share this information with all members of your staff, especially those who might not have received or read this email. Feel free to contact me if you have any questions. Thanks for your attention to this important issue.

Amy

Summer Conditioning

INVOLVEMENT OF STRENGTH AND CONDITIONING COACHES

1) With Current Student-Athletes
    a. Must have **department-wide responsibilities*** in order to be able to design and conduct specific workout programs for student-athletes during vacation periods (e.g., summer)
2) With Incoming Freshmen and 2-Year Transfers (**who have signed NLI's**)*
    a. Cannot prearrange conditioning activities for them
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room
    c. Cannot work directly with the prospective student-athletes
3) With Incoming Freshmen and 2-and 4-Year Transfers (**who have not signed NLI's**)*
    a. Cannot permit them to participate in voluntary weight-lifting or conditioning activities on our campus **unless the facilities are open to the public***
    b. Can only perform normal duties and responsibilities associated with the supervision of the weight room
    c. Cannot work directly with the prospective student-athletes

INCOMING FRESHMEN AND 2-YEAR TRANSFERS WHO **HAVE SIGNED** NLI'S:

1) Are permitted to use weight facilities that are closed to the public
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach, **but all conditions in (2) above are applicable**

INCOMING FRESHMEN AND 2-AND 4-YEAR TRANSFERS WHO **HAVE NOT SIGNED** NLI'S (WALK-ONS):

1) May not participate in weight lifting or conditioning activities on the institution's campus unless the facilities are open to the public
2) May participate in voluntary weight lifting or conditioning activities in the presence of a strength and conditioning coach, **but all conditions in (3) above are applicable**

* *Clarifications*:

1) <u>Department-Wide Responsibilities</u>:
    a. Job description must include duties that extend beyond one sport
    b. Could include working as a strength coach with at least one other sport, having Olympic sport weight room supervision hours, or having supervisory responsibilities over strength coaches that work with other sports
2) <u>Open to the Public</u>:
    a. Can be limited to the extent of being open to only Faculty and Students with valid identification (e.g., Student Recreation Center policies)
    b. Can have certain hours when facilities are open to the public (e.g., 8 am – noon: reserved for current student-athletes; noon – 4 pm: open to the public)
    c. Incoming freshmen who have not signed NLI's would be limited to the time period when the facility is open to the public
3) <u>Work with Incoming Freshmen and Transfers</u>:
    a. Strength coaches may provide them a written program for their workouts in the summer prior to full-time enrollment, **provided they have signed NLI's or have been officially accepted for enrollment by the institution**

b. However, the strength coach cannot, in any way, lead them through the program in the weight room
c. It is not permissible to circumvent this rule by allowing incoming freshmen to work out alongside current student-athletes who are being led through the same program by the strength coach, as this would constitute indirect administration of the program to the incoming freshmen
d. He/She can only be involved in the workout for supervisory (safety) purposes

MISCELLANEOUS SUMMER REGULATIONS:

1) Medical Expenses:
   a. An institution may provide medical expenses (including rehab and physical therapy expenses) for any student-athlete who sustains an injury while participation in voluntary conditioning activities during the summer that are conducted by an institution's strength and conditioning coach with department-wide duties
   b. An institution may not provide medical expenses for injuries sustained by a student-athlete engaging in voluntary summer conditioning activities that are not conducted by the strength and conditioning coach
   c. Since incoming freshmen and transfers are not permitted to participate in activities conducted by the strength and conditioning coach, the institution is not permitted to cover any medical expenses for these individuals
2) Academic Support Services and Training Room Facilities:
   a. If a prospect (high school, juco transfer) **has signed an NLI and is enrolled in the institution's summer term before his/her initial enrollment**, he/she may receive academic support services and utilize the institution's training room facilities
   b. If a 4-year transfer **has signed a written offer of financial aid and/or admission and is enrolled at the institution during the summer before full-time enrollment**, he/she may utilize these services
   c. If a prospect (high school, juco transfer) **has not signed an NLI, he/she may not utilize these services**
3) Summer Workout Apparel/Equipment:
   a. It is permissible for student-athletes to use institutional apparel during the summer (per the institution's normal issuance and retrieval policy), and the student-athletes may use institutional laundry services for this apparel
   b. It is permissible for student-athletes to retain and use institutional athletics equipment (per the institution's normal equipment policy) during a summer vacation period
   c. **It is not permissible to provide incoming freshmen or transfers with summer workout apparel,** as it is prior to their enrollment during a regular term of study (fall, spring) at the institution

ALL SUMMER WORKOUTS MUST BE VOLUNTARY (Per Bylaw 17.02.13):

1) The student-athlete must not be required to report back to a coach or other athletics department staff member (for example, strength coach, trainer, manager) any information related to the activity. In addition, no athletics department staff member who observes the activity (for example, strength coach, trainer, manager) may report back to the student-athlete's coach any information related to the activity;
2) The activity must be initiated and requested solely by the student-athlete. Neither the institution nor any athletics department staff member may require the student-athlete to participate in the activity at any time. However, it is permissible for an athletics department staff member to provide

information to student-athletes related to available opportunities for participating in voluntary activities (for example, times when the strength and conditioning coach will be on duty in the weight room or on the track). In addition, for student-athletes who have initiated a request to engage in voluntary activities, the institution or an athletics department staff member may assign specific times for student-athletes to use institutional facilities for such purposes and inform the student-athletes of the times in advance;

3) The student-athlete's attendance and participation in the activity (or lack thereof) may not be recorded for the purpose or reporting such information to coaching staff members or other student-athletes; and
4) The student-athlete may not be subject to penalty if he or she elects not to participate in the activity. **In addition, neither the institution nor any athletics department staff member may provide recognition or incentives (for example, awards) to a student-athlete based on his or her attendance or performance in the activity**.

Subject: NCAA will allow athletes to keep frequent-flier miles

---

NCAA will allow athletes to keep frequent-flier miles

By Seattle Times news services
E-mail this article
Print this article
Search web archive

Although the prospective cost of travel for schools in an expanded Atlantic Coast Conference has raised concerns among administrators, student-athletes in the ACC and other Division I schools might soon like the idea of long commercial-airline flights and the longer the better.

Effective Aug. 1, the NCAA will allow Division I athletes to accumulate frequent-flier miles earned during travel to and from intercollegiate competition. The rule, adopted by the Division I Board of Directors in April, is consistent with the intent of legislation passed in 2001 that permits athletes to receive miscellaneous benefits that have no cost to the athlete's school.

No athletes figure to accumulate more points than those competing for Hawaii of the Western Athletic Conference. Every trip by a Hawaii team to the mainland, the vast majority of which are on commercial flights, covers thousands of miles.

Hawaii reports that its men's basketball team and men's and women's swimming team each logged about 57,400 air miles during the 2002-03 season. Consumer Reports magazine approximates the value of each frequent-flier mile at 2 cents. That would have made the Hawaii men's basketball road trips worth about $1,148 per player.

Subject: URGENT: S-A MEDICAL INSURANCE INFORMATION !!!

Attach: ATHLETE INSURANCE INFORMATION.doc

Folks:

The world of health insurance continues to become an increasingly costly issue for our society. Needless to say, this issue continues to be a very difficult challenge for those of us in the field of intercollegiate athletics.

At Carolina, our medical expenses are escalating each and every year (i.e., during 2003-04 fiscal year, an increase of approximately $150,000) to a point that we all need to help in "getting our arms around" this financial drain on our Department. Therefore, I am requesting you to assist in obtaining medical insurance information from your respective sport's student-athletes. Folks, this is a must, and it is imperative that this be done before your student-athletes engage in any type of voluntary or mandatory team practices throughout the ENTIRE YEAR!!!

* A student-athlete who does not return the medical insurance form will not be allowed to participate in any practice until the form is received.
* This form must be completed by each student-athlete and/or, his/her parent/legal guardian regardless of whether or not they have their own medical insurance!
* The athletic trainer assigned to your sport will review your roster to ascertain if every student-athlete/parent/legal guardian on your roster has completed and returned the insurance form.

This email has been sent to each head coach, selected assistant coaches, administrative assistants/directors of operations of certain sports, and some team secretaries. Therefore, there is no excuse for not obtaining this medical insurance information from your

student-athletes according to the time table I shall describe below.

Procedures:

1. Print off the attached document - "medical insurance information form"

2. Mail the form to the parents/legal guardians of each of your student-athletes that you are expecting to be on your squad list during the 2004-05 year (i.e., returnees, transfers, incoming freshmen, medical exempts - EVERYONE!!)

3. The forms are to be returned either to you or one of your staff members

4. Once you have received the completed forms from ALL of your 2004-05 student-athletes, alphabetize the forms, attach a current 2004-05 roster, and give the forms to your respective sport's head athletic trainer. The trainer will review the forms and then send them to the appropriate staff in the Sports Medicine Unit of the Student Health Center.

5. This process should be completed, according to the above policy, by Friday, August 6, 2004.

Thank you for your immediate attention to this very important welfare issue concerning our student-athletes. Please be very diligent in obtaining this information in a timely fashion. I appreciate your cooperation and assistance in advance.

I am hopeful you are enjoying your summer. Take care.

Larry

Please return completed form as soon as possible with copy of insurance card, front and back to:
Head Coach (**Sport Specific**)

Folks,

I know Dan Hooker emailed some information to you a few days ago about one of mother nature's most deadly forces - lightning. After speaking with Dan, we noticed that not all of the Head and Assistant Coaches in our Department received this very important information. Thus, I have attached this information, and once again, sent it to all of you. I am sorry to "fill your in box" with more email if you have already received this information. Both Dan and I wanted to be certain that all of our coaches received these two lightning safety policies. Please feel free to share this very important safety information with whomever you wish, especially if they do not have email!

Thank you for your attention and cooperation. Have a good day and best of luck!

Take care,
Larry Gallo Jr.

Subject: Lightning Warning System

Attach: Lightning_Policy_(ACC_Tourn).do.doc

Everyone,
There was a recent incident of a lightning strike death of an athlete at a high school in Texas. The ESPN story is at http://sports.espn.go.com/sports/news/story?id=1883226 . They describe it as a bolt from the blue first strike. With this in mind, I asked our weatherdata service to give me some follow-up on this event and whether our system would be helpful to us to avoid this type of tragedy here.
The weatherdata research showed that this was not a first strike that there was some cloud cover and a previous strike had been recorded within a 12 mile radius of the site of the fatal strike 18 minutes prior to the fatal strike. The lesson for us from this is our weather service would have warned us of any activity like the activity in this incident and we would have been able to warn our athletes to be in a lightning safe shelter in plenty of time to avoid an event. The mistake that the coaches in Texas made was to ignore the weather and think that just because there was no or little rain that there was no danger. Coaches should be alert to possible weather as they prepare for practice and if there is a question about a lightning storm, then consult the training staff for more information. When a warning is given, heed the warning, clear the field by going to a lightning safe structure. Sitting in a car without contact with the doors or metal from the car is safer than an open structure. Only resume practice when there is an all clear from the weather service. Please keep this in mind when you are scheduling outdoor practices or conditioning. I have attached our lightning policy for your review, please call if you have any questions. Thanks, Dan

Atlantic Coast Conference Championships
(Proposal)

Severe Weather / Lightning Policy

Lightning is a dangerous phenomenon. Athletic teams that practice and compete outdoors are at risk when there is inclement weather. The Atlantic Coast Conference has developed a lightning safety policy to minimize the risk of injury from a lightning strike to participating student-athletes, coaches, staff, and guests. To monitor severe weather, the ACC game operations official and the facility manager will utilize a professional weather monitoring service. This professional weather monitoring service will provide up-to-date reports on approaching weather.

Prior to competition, the ACC game operations official will meet and greet umpires, officials or referees and explain that there is a means to monitor severe weather. When a storm is in the vicinity of practice or competition, the weather service will activate a communication system that will notify a game operation official and a member of the sports medicine staff of the weather warning. The communication system will be comprised of a text message on a pager and via a fax that will be sent to a designated machine at the host site. The information will include the beginning and the ending times of the weather warning and the type of weather activity expected. One person from ACC game operations and one person from the host sports medicine team may contact the weather service directly to clarify any information.

When the storm is (10-15 miles away – this distance should be specific to the site of the championship and the time required for safe evacuation of the playing area), practice or competitions should stop and the athletes should exit to designated safe area. When the storm passes 10 miles away from the grounds or the weather warning is canceled, then activity may resume. The host site will have established the designated safe area and the time needed to access this area. The distance of the weather front warning may need to be adjusted depending on the evacuation time needed reach the designated safe area.

The decision to stop activity and have the athletes exit the outdoor facility when adverse weather occurs will be made as follows:

-Before the start of the competition; the ACC game operations official and umpires will monitor the weather and make a decision to suspend activity in the event of imminent lightning or other weather related hazards to play. For lightning, this is based on recorded ground strikes within a 10 mile radius of the event. This distance may be adjusted depending on the time required for a safe evacuation.

-Once the contest has begun; the umpires will be advised by the game operation official of weather related problems requiring their attention and will have the ability to suspend play

at anytime. If the weather system continues to be a threat, they may suspend play for the duration of the weather warning. During the suspension, the umpires will consult with the game operations official to determine the projected weather delay.

-During practices; the host sports medicine staff will communicate the presence of adverse weather to the coaches. The coach should activate the evacuation policy until conditions clear.

If the team is asked to exit the field, they should go to the designated safe area and remain there until activity is allowed to resume by the game officials, coach or athletic trainers.

UNIVERSITY OF NORTH CAROLINA
ATHLETIC DEPARTMENT

SEVERE WEATHER/LIGHTNING SAFETY

Lightning is the most consistent and significant weather hazard that may affect intercollegiate athletics. The University of North Carolina subscribes to the Weather Data, Inc. Service. When there is a storm containing lightning in the vicinity of the UNC campus, the weather service pages the Sports Medicine alphanumeric pagers with specific information.

If the weather becomes a concern during an event or practice and you do not have an alphanumeric pager, please call Fetzer Athletic Training Room (962-2067) or page Dan (216-1922) or Chris (216-2277) for weather information. **DO NOT CALL** the weather service directly.

Everyone should be removed from the outdoor facility when lightning is approximately 10 miles away. Games or practice may resume when the storm has moved through and the closest lightning is beyond the 10-mile radius. The decision to remove people from an outdoor facility due to threatening weather will be made as follows:

1. Prior to a game, the athletic trainer will advise the games operations staff about weather related issues. The games operation staff has the responsibility to cancel delay or allow play.
2. During a game, the athletic trainer will advise the game officials about weather related issues. The game officials have the responsibility to stop and restart or cancel the game.
3. Prior to and during practice, the athletic trainer will advise the coach about weather related issues. The coach has the responsibility to cancel, delay, stop and restart the practice. The athletic training staff will follow the above protocol and will not remain on the field if the coach ignores the weather warning. The athletic training staff can get real time information from the Weather Data Service so the practice opportunity can be maximized.

If weather information is needed to help with practice or event planning, Dan Hooker (216-1922) and Chris Hirth (216-2277) can initiate calls to the Weather Data Service for forecasting. Weather Data's predications are excellent for imminent weather events but long-range forecast are equivalent to the National Weather Service or the local television meteorologist. If the forecast calls for thundershowers, call the Fetzer Athletic Training Room (962-2067) for an update before going out to practice and once at the practice site make sure communication devices are operational before beginning practice.

If the team is removed from the field, everyone should go to the closest safe structure and remain there until given an all clear by game official, coach or athletic trainer. The following safe structures have been identified for each facility:

SITE	SAFE STRUCTURES
1. Fetzer Field/Track	Field house, Soccer Center, Carmichael Auditorium, Woollen Gym
2. Navy Field	Locker Rooms, Boshamer Stadium, Offices/locker rooms
3. Boshamer Stadium	Locker Rooms
4. Kenan Stadium	Locker Rooms
5. Finley Practice Fields	Soccer Trailer, Vehicles
6. Softball Field	Vehicles
7. Tennis Center	Indoor Facility
8. University Lake	Boathouse

Coaches should also be familiar with the flash-to-bang method of estimating how far away lightning is occurring. Thunder always accompanies lightning, even though its audible range can be diminished due to background noise in the immediate environment and its distance from the observer. To use the flash-to-bang method, count the seconds from the time the lightning is sighted to when the clap of thunder is heard. Divide this number by 5 to obtain how far away (in miles) the lightning is occurring. For example, if an individual counts 15 seconds between seeing the flash and hearing the bang, 15 divided by 5 equals 3; therefore the lightning is approximately 3 miles away.

As a minimum, the National Severe Storms Laboratory (NSSL) strongly recommends that by the time the monitor obtains a flash-to-bang count of 30 seconds, all individuals should have left the athletic site and reached a safe structure or location.

According to the NCAA Committee on Competitive Safeguards and Medical Aspects of Sports, if individuals are unable to reach a safe structure, find a thick grove of small trees surrounded by taller trees or a dry ditch. Assume a crouched position on the ground with only the balls of the feet touching the ground, wrap your arms around your knees and lower your head. Minimize contact with the ground, because lightning current often enters a victim through the ground rather than by a direct overhead strike. Minimize your body's surface area and minimize contact with the ground. **DO NOT LIE FLAT!** Stay away from the tallest trees or objects (such as light poles or flag poles), individual trees, standing pools of water, and open fields. Avoid being the highest object in a field. **Do not take shelter under a single, tall tree.**

The NSSL staff recommends that everyone should ideally wait at least 30 minutes after the last flash of lightning or sound of thunder before returning to the field or activity.

Corrections to the 2005-06 NCAA Division I Manual*

Page(s)	Bylaw	Correction
93	13.1.3.1.2	Additional text added (**correction noted in bold and underlined**). 13.1.3.1.2 Exception -- Men's Basketball. In men's basketball, an institution is permitted to make one telephone call per month to a prospect [or the prospect's parents or legal guardian(s)] on or after June 15 of the prospect's sophomore year in high school through July 31 of the prospect's junior year in high school. An institution is permitted to make two telephone calls **per week** to a prospect [or the prospect's relatives or legal guardian(s)] beginning August 1 prior to the prospect's senior year in high school. An institution is permitted to make one telephone call per week to a two-year college prospect [or the prospect's parents or legal guardian(s)].
100	13.1.8.8-(a)-(4)	Bylaw cite is incorrect. Please replace 30.17 with 30.16.
100	13.1.8.8-(b)-(2)	Bylaw cite is incorrect. Please replace 30.18 with 30.17.
124	13.12.1.1.2	Additional text added (**correction noted in bold and underlined**). 13.12.1.1.2 Football and Basketball. An institution's football camp or clinic may be conducted only during two periods of 15-consecutive days in the months of June and July or any calendar week (Sunday through Saturday) that includes days of those months (e.g., May 28-June 3), unless such activities meet the provisions regarding developmental clinics set forth in Bylaw 13.11.3.1. The dates of the two 15-day periods must be on file in the office of the athletics director. An institution's basketball camp or clinic may be conducted only during the months of June, July and August, **or any calendar week (Sunday through Saturday) that includes days of those months** unless such activities meet the provisions regarding developmental clinics set forth in Bylaw 13.11.3.1. Violations of this bylaw shall be considered institutional violations per Constitution 2.8.1; however, such violations shall not affect the prospective student-athlete's eligibility.
127	13.12.3-(a)	Bylaw cite is incorrect. Please replace 30.18 with 30.16.
128	13.12.3-(b)	Bylaw cite is incorrect. Please replace 30.18 with 30.17.

Corrections to the 2005-06 NCAA Division I Manual*

Page(s)	Bylaw	Correction
148 and 149	14.3.1.1-(a)	Under "Additional academic courses," please remove reference to computer science. As of August 1, 2005, computer science course can be used only if the high school grants graduation credit in mathematics or natural/physical science and the courses appear on the high-school's core course list as a math or science course.
164	14.4.3.5-(a)	Remove "not" in the last sentence of the bylaw (**correction noted in bold and <u>underlined</u>**). 14.4.3.5 Exceptions to Progress-Toward-Degree Rule. (a) Missed term**.** One time during a student-athlete's entire period of collegiate enrollment, the provisions of Bylaw 14.4.3.1-(b)-(1) may be prorated at 12 hours per term of actual attendance if the student-athlete misses a complete term or consecutive terms during an academic year, subject to the following conditions: (1) The student-athlete engaged in no outside competition in the sport during the academic term or terms in which the student was not in attendance; and (2) At the time of certification, the student has fulfilled the progress-toward-degree requirements per Bylaw 14.4.3.1 for the terms in which the student was in attendance. A transfer student from a two-year college is not eligible to utilize this one-time exception during the first academic year of residence at the certifying institution in order to maintain eligibility during the second year in residence. **<u>Hours earned while enrolled as a part-time student during the "missed term" may be counted in meeting the progress-toward-degree requirements</u>**.

Corrections to the 2005-06 NCAA Division I Manual*

Page(s)	Bylaw	Corrections
171	14.4.3.6-(a)	Additional text added (**correction noted in bold and <u>underlined</u>**). (a) Medical absence. The credit hours required under the progress-toward-degree regulation of Bylaws 14.4.3.1 **<u>(b) and (c)</u>** and 14.4.3.5-(c) may be prorated at nine hours per term of actual attendance during an academic year in which a student misses a term or is unable to complete a term as a full-time student as a result of an injury or illness.
215	15.5.7.1.1.2.3.1	Bylaw cite in the first sentence is missing a number. 15.5.7.1.2.3 should read 15.5.7.1.1.2.3.
218	Figure 15-1	The footnote for the "Institutional Employee Dependent Tuition Benefit" should be 5 not 7.
240	17.02.11.4	The reference to football should be removed from this bylaw. It should read as follows: 17.02.11.4 First Day of Practice. The first day of practice may be conducted on the day when the last practice unit occurs, which is determined by counting backward from the day of the first permissible regularly scheduled contest. For example, in women's volleyball, practice may be held on the day that the 29th practice unit actually occurs, counting backward from the day of the first permissible regularly scheduled contest.
265	17.8.3	The reference to rugby is incorrect. Please replace with equestrian.
411-12	30.11.2-(b)	Additional text added (**correction noted in bold and <u>underlined</u>**). (b) September 16 through Tuesday of the week following the initial date for the spring signing of the National Letter of Intent [except for (1), (2), (3) **<u>, (4) (5) and (6)</u>** below] Women's basketball staff members shall not exceed 85 recruiting person days (see Bylaw 13.02.10). Academic year evaluations are limited to scholastic events.*:
412	30.11.3-(a)-(2)	Please remove the word "calendar" in between "42" and "days." Please see 13.1.8.9.3 and ER-2005-17 for details on the change.
428-29	31.2.3.3	The two references to "season of participation" is incorrect. Please replace "participation" with "competition."

* The LSDBi contains the most up to date version of the Division I Manual.

Coach Connors,

See below for the answer to your question. Unfortunately, during discretionary weeks, it is NOT permissible for strength and conditioning coaches to conduct workouts for student-athletes, even if they request that you do so. You may be there for safety and monitoring purposes only. You may provide them with a written workout, obviously, but it is up to them to conduct it on their own.

Thanks,
Amy

>>> "Babcock, Lindsey" <lbabcock@theacc.org> 4/25/2007 2:56 PM >>>

Amy,
Good question. During discretionary time the S/C coaches may be present for safety reasons ONLY and may NOT actually put them through a workout, even if the sa requests it.
Lindsey

Subject: FB Discretionary Time: 17.02.14

Lindsey,

This bylaw reads that "if the student-athlete opts to workout, the strength and conditioning coach may monitor the facility in use for health and safety purposes".

If the student-athlete asks the S/C coach to put them through a speed workout, would that be permissible under this legislation? The S/C coach would actually be conducting the workout.

Thanks,

Amy

Subject: Updated 2007 Required Reports to Prospects
Attach: 2005-06 APR Report Explanation Sheet.pdf

Coaches,
Please accept this email as a follow-up to the email and hard copy memo that you received from Shelly Green, which included all of the reports and documents that are required to send to prospects at the earliest opportunity after the institution's first arranged in-person encounter with the prospect (i.e., Graduation Rates, GSR, and APR reports and the NCAA banned drug list and initial eligibility standards).

The attached PDF is an updated APR Report Explanation Sheet for the 2005-06 APR report that is now required to send to prospects. This Explanation Sheet can also be found on the J drive in the Official Visits file. This document is self explanatory, and would be helpful to prospects as they review and attempt to understand our APR report. Please attach this document to the APR report that you send to all of your prospects throughout 2007-08.

Let us know if you have any questions.

Thank you,
Susan

Susan Maloy

Information about the NCAA Division I Academic Progress Rate Report

The 2005-06 NCAA Division I Academic Progress Rate (APR) Public Reports have been prepared by the NCAA, based on information provided by each Division I institution. All Division I institutions are required to distribute this report to prospective student-athletes and parents.

The APR report provides information about student-athletes at the institution who received athletics financial aid or for teams that do not award athletics aid, were recruited by the institution.

The report gives information about the academic progress and retention of student-athletes at the institution for the 2003-04, 2004-05 and 2005-06 academic years, unless otherwise noted. Once available, four years of data will be compiled to calculate a team's multiyear APR. The report provides an APR for each sport at the institution and national APR averages for various subgroups.

The APR is based on each student-athlete, having the opportunity to earn two points during each regular academic term of full-time enrollment (e.g., fall semester). One point is awarded if the student-athlete is academically eligible to compete the following regular academic term (or has graduated). The other point is awarded if the student-athlete returns to the institution as a full-time student the next regular academic term. The APR is calculated by adding all points earned by student-athletes over the past three academic years and dividing that number by the total possible points that could have been earned. That number is then multiplied by 1,000.

When a team's academic performance, measured by that team's APR, falls below 925, that team becomes subject to penalties if any student-athlete on that team did not return to the institution as a full-time student and was not academically eligible when the student-athlete left the institution. This penalty is known as a contemporaneous penalty and potentially limits the amount of athletics aid that the team may award.

A team becomes subject to incremental historical penalties each year the team's APR is below 900. These penalties range from an Occasion-One Penalty of a public warning to an Occasion-Four Penalty that could affect the institution's Division I membership status. After receiving a public warning, an institution's team must have a multiyear APR of at least 900 for three consecutive years or the team will be subject to the next level of penalties.

The Report

The APR report lists an institution's sponsored sports. The overall number of teams reporting data for that sport is listed in parentheses next to each sport.

The multiyear APR is the APR that is calculated based on academic data reported by institutions from the 2003-04, 2004-05 and 2005-06 academic years. Footnotes at the bottom of the report provide further clarification of issues that affect the APR:

a. (*) This symbol indicates that the data cell contains information about three or fewer student-athletes and due to federal privacy regulations, these data are not published.

b. (+) This symbol indicates that the team is not subject to a contemporaneous penalty due to a squad-size adjustment. Until the full four-year data set is available, a squad-size adjustment will be used for purposes of applying penalties. The squad-size adjustment helps ensure that low-performing teams are accurately identified given the smaller than intended data set.

c. (^) This symbol indicates that the team is not subject to a contemporaneous penalty because the team is performing better than the institution's general student body. If the team's graduation rate, based on the multiyear APR, is significantly better than the general student body, the team receives a waiver of any penalty.

d. (@) This symbol indicates that the team is not subject to historical penalties because the team has demonstrated academic improvement and a favorable comparison based on other academic or institutional factors.

e. (~) This symbol indicates that the team is not subject to historical penalties due to a squad-size adjustment. Until the full four-year data set is available, a squad-size adjustment will be used for purposes of applying penalties. The squad-size adjustment helps ensure that low-performing teams are accurately identified given the smaller than intended data set.

f. (%) This symbol indicates that the team is not subject to contemporaneous or historical penalties because the team's APR is based on one year of academic data.

g. (!) This symbol indicates that the team is not subject to historical penalties because the team's APR is based on two years of academic data.

The APR report also compares a team's APR with the APR of other Division I teams and ranks them by percentile. It is important to note that a team with a perfect APR of 1,000 may be ranked in the 80th percentile (0 = low rank, 100 = high rank) due to the large number of teams with this rate.

A team's APR (not percentile rank) is compared in several additional categories. A team's APR is compared to the average APR for all Division I teams in that particular sport. Additionally, a team's APR is further compared to the average APR of other teams in that particular sport at public institutions and private institutions. Finally, a team's APR is compared to the average

APR for teams in that particular sport at Football Bowl Subdivision institutions, NCAA Football Championship Subdivision institutions and Division I institutions. Bowl Subdivision and Football Championship Subdivision institutions sponsor football while Division I institutions do not.

ACC Head Football Coaches:

Attached is a chart that our compliance office put together to summarize the 2007-08 proposals specific to Football. Your respective Faculty Athletics Representatives are in the process of formulating institutional positions on these proposals for meetings next week so in the unlikely event that you have not been consulted about these by someone within your athletic department as of yet, I wanted to be sure you have this so that you could touch base with your AD or FAR if necessary regarding your thoughts.

Best wishes to all of you this weekend. Happy Thanksgiving!

Michael Kelly

Associate Commissioner/Football Operations

Atlantic Coast Conference

4512 Weybridge Lane

Greensboro, NC 27407

The 2007 Dr Pepper ACC Championship Game will be played on Saturday, December 1st in Jacksonville Municipal Stadium at 1pm on ABC

Football

Proposal Number	Title	Intent	Rationale	Source	Effective Date
2007-16-A	PERSONNEL AND RECRUITING — LIMITATIONS ON THE NUMBER AND DUTIES OF COACHES — RECRUITING COORDINATION FUNCTIONS	To eliminate the restriction that all recruiting coordination functions must be performed by a countable coach, while maintaining the prohibition that only an authorized countable coach may place calls to prospective student-athletes and be involved in off-campus recruitment activities.	Twelve years ago, recruiting coordinators were banned in football in an attempt to limit the size of football programs. Those efforts were not successful. Since the ban, football staff sizes have increased substantially. The combination of an increase in staff with a sharp limit on what these staff members can actually do has resulted in countless hours spent defining "recruiting coordination" and "clerical tasks," and in repeated attempts to regulate trivial activities such as ordering food for a recruiting banquet or preparing an official visit itinerary. Last year, the recruiting coordination ban was extended to all sports. Similar problems applying the legislation are now appearing in every sport and are having a particular impact on the role of volunteer coaches in the recruiting process. Most of the banned activities are administrative or logistical in nature, existing in the area between clerical and actual recruitment of prospective student-athletes. Since noncoaching administrators are already prohibited from all off-campus recruiting, no arms race in recruiting will break out if recruiting coordination is permitted. There is no inherent recruiting advantage in hiring noncoaching personnel since they cannot recruit prospective student-athletes. Administrative personnel decisions should be left to institutional discretion, not regulated by legislation.	Pacific-10 Conference.	August 01, 2008

Football

Proposal Number	Title	Intent	Rationale	Source	Effective Date
2007-18	PERSONNEL AND RECRUITING — LIMITATIONS ON THE NUMBER AND DUTIES OF COACHES — RECRUITING COORDINATION FUNCTIONS — EXCEPTION — NONCOACHING STAFF MEMBER — AFTER NATIONAL LETTER OF INTENT SIGNING OR OTHER WRITTEN COMMITMENT	To permit a noncoaching staff member to make telephone calls to or receive telephone calls from a prospective student-athlete (or the prospective student-athlete's parents, legal guardians or coaches) and prepare general recruiting correspondence (including electronic correspondence) to a prospective student-athlete (or the prospective student-athlete's parents or legal guardians), provided the prospective student-athlete has signed a National Letter of Intent or, for those institutions not using the National Letter of Intent in a particular sport or for a prospective-student-athlete who is not eligible to sign a National Letter of Intent (e.g., four-year college transfer), the institution's written offer of admission and/or financial aid.	As a general rule, an individual is considered to be a prospective student-athlete until he or she enrolls full time or participates in regular practice sessions. However, once a National Letter of Intent has been signed or, for those not eligible to sign an NLI (e.g., four-year transfer, institution does not subscribe), an offer of admission and/or financial aid has been accepted, an individual has committed to an institution and the recruitment process is, for all practical purposes, completed. Exceptions for communication with a prospective student-athlete after the signing of a National Letter of Intent (or acceptance of written offer of financial aid or admission) currently exist, but these exceptions are limited in scope. Any telephone calls or written correspondence with a prospective student-athlete concerning his or her recruitment after he or she has signed a National Letter of Intent (or an offer of admission and/or financial aid) would be minimal. Further, this proposal would allow an institution's chancellor or president, faculty athletics representative or director of athletics to send a congratulatory note to a prospective student-athlete after he or she has signed a National Letter of Intent (or an offer of admission and/or financial aid).	Big 12 Conference.	August 01, 2008
2007-32	RECRUITING — PERMISSIBLE RECRUITERS AND EVALUATIONS — HEAD COACH RESTRICTIONS — SPRING EVALUATION PERIOD — FOOTBALL	In football, to specify that the head coach shall not engage in off-campus recruiting activities during the April 15 through May 31 evaluation period.	It has become increasingly difficult for head football coaches to avoid contact with prospective student-athletes during the spring evaluation period. When head football coaches visit a high school while school is in session, they are in close proximity to students. In addition, the visibility of many high-profile coaches results in frequent unavoidable contact with any number of students. This proposal is intended to eliminate contact between a prospective student-athlete and head football coach during the spring evaluation period by prohibiting the head football coach from engaging in off-campus recruiting during the spring evaluation period. This proposal will also decrease the number of needless secondary violations and a significant amount of distrust that has occurred among coaches because of the difficulty in avoiding contact with prospective student-athletes during the spring evaluation period.	Southeastern Conference.	Immediate

Football

Proposal Number	Title	Intent	Rationale	Source	Effective Date
2007-36	RECRUITING — TELEPHONE CALLS TO PROSPECTIVE STUDENT-ATHLETES — PERMISSIBLE CALLERS — EXCEPTIONS — STRENGTH AND CONDITIONING COACHES	To permit strength and conditioning coaches to receive telephone calls from a prospective student-athlete, provided the calls relate to summer conditioning programs and such calls occur after the prospective student-athlete has signed a National Letter of Intent (NLI) or, for those institutions not subscribing to the NLI, after the signed acceptance of the institution's written offer of admission and/or financial aid.	For the safety of prospective student-athletes, institutional strength and conditioning coaches should be permitted to receive telephone calls from prospective student-athletes to discuss questions and/or proper techniques regarding summer conditioning programs. Other noncoaching staff members with sport-specific responsibilities are permitted to initiate and receive telephone calls, provided the calls relate only to general pre-enrollment administrative issues. Strength and conditioning coaches would only receive telephone calls. Moreover, there is no recruiting advantage since the prospective student-athletes have already signed a National Letter of Intent (NLI) (or, for those institutions not subscribing to the NLI, a written offer of admission and/or financial aid) with the institution.	Mountain West Conference.	August 01, 2008
2007-39	RECRUITING — CONTACTS AND EVALUATIONS — CONTACTS AFTER NATIONAL LETTER OF INTENT SIGNING OR OTHER WRITTEN COMMITMENT — FOOTBALL — CONTACTS DURING SPRING EVALUATION PERIOD — EDUCATIONAL INSTITUTION STAFF MEMBER PRESENCE	In football, to specify that during the spring evaluation period, coaching staff members may make two contacts with a prospective student-athlete who has signed a National Letter of Intent (or, for those institutions not subscribing to the National Letter of Intent, after the prospective student-athlete's signed acceptance of the institution's written offer of admission and/or financial aid) at the prospective student-athlete's educational institution and require that a staff member from the prospective student-athlete's educational institution (e.g., coach, academic counselor, principal) must be present during such contacts; further, to specify that any visit to the educational institution that includes only contact with a signed prospective student-athlete during the spring evaluation period shall be considered one of the institution's two permissible days at that institution.	Currently, football coaches may only have contact with prospective student-athletes who have signed a National Letter of Intent at their educational institutions during a contact period. Although coaches evaluate at educational institutions during the spring evaluation period, they must make other arrangements to have contact with the signed prospective student-athletes at other locations, such as a home or restaurant. This restriction creates greater recruiting costs and unnecessary bureaucracy. There is a benefit to prospective student-athletes when their coaches continue to monitor their academic progress. Allowing such contact to occur at the prospective student-athletes' educational institutions where academic counselors are also present, will result in better academic evaluations and will permit coaches to be more efficient during a busy recruiting period. Since the prospective student-athlete has already signed with the institution, there is no recruiting advantage gained by allowing such contacts.	NCAA Division I Championships/ Competition Cabinet (Football Issues Committee).	August 01, 2008

Football

Proposal Number	Title	Intent	Rationale	Source	Effective Date
2007-40	RECRUITING — CONTACTS AND EVALUATIONS — CONTACTS AFTER NATIONAL LETTER OF INTENT SIGNING OR OTHER WRITTEN COMMITMENT — FOOTBALL — CONTACTS DURING SPRING EVALUATION PERIOD	In football, to specify that during the spring evaluation period, coaching staff members may make two contacts with a prospective student-athlete who has signed a National Letter of Intent (or, for those institutions not subscribing to the National Letter of Intent, after the prospective student-athlete's signed acceptance of the institution's written offer of admission and/or financial aid) at the prospective student-athlete's educational institution; further, to specify that any visit to the educational institution that includes only contact with a signed prospect during the spring evaluation period shall be considered one of the institution's two permissible days at that institution.	This proposal would make the legislation related to football similar to most other sports by permitting coaches additional contact with prospects who have signed a National Letter of Intent or other written commitment. Such contact would be permitted when a coach is visiting an educational institution during the spring evaluation period, which provides coaches a cost effective opportunity to visit with prospects who have signed to attend the institution.	Southeastern Conference.	August 01, 2008
2007-42	RECRUITING — CONTACTS AND EVALUATIONS — FOOTBALL EVALUATIONS — SCHOLASTIC ACTIVITIES	In football, to specify that all evaluations shall be limited to regularly scheduled high school, preparatory school and two-year college contests, practices and regular scholastic activities involving prospective student-athletes enrolled at that institution.	Despite attempts to curb the increasing number of nonscholastic recruiting events in football, member institutions are continuing to see these events increase in frequency and sophistication. These events permit individuals with little or no role in the education of prospective student-athletes to become involved in their lives for the primary purpose of testing the prospective student-athletes' athletics ability. This proposal disassociates coaches from this activity before "third parties" become common in the sport of football. The intent of this proposal mirrors that of the original intent behind the current legislation regarding nonscholastic activities, that is, coaches should only attend legitimate high school and junior college practices and contests. It is in the best interests of prospective student-athletes to encourage that their time be spent in participation in scholastic activities, thereby giving them the necessary time to focus on their academic endeavors.	Southeastern Conference.	Immediate

Football

Proposal Number	Title	Intent	Rationale	Source	Effective Date
2007-43	RECRUITING — CONTACTS AND EVALUATIONS — FOOTBALL EVALUATIONS — SPRING EVALUATION PERIOD — SCHOLASTIC EVALUATIONS ONLY	In football, to specify that evaluations conducted during the spring evaluation period shall be limited to regularly scheduled high school, preparatory school and two-year college contests, tournaments and practices, and regular scholastic activities conducted under the supervision of a high school, preparatory school or two-year college coach.	This proposal is designed to place greater emphasis on the scholastic environment in the recruitment of prospective student-athletes. The recent proliferation of nonscholastic camps, clinics and combines, in which organizers attempt to showcase a prospective student-athlete's talents, has created an unhealthy recruiting environment that affects verbal commitments, media attention and college-choice decisions. It also has placed unnecessary pressure on prospective student-athletes to prepare for and attend these events during the academic year, potentially interfering with academic commitments. This proposal strives to increase the involvement of the prospective student-athlete's coach, to emphasize the importance of the scholastic environment and to establish a more appropriate and effective evaluation so that sound judgments can be made in the recruiting process. Football coaches still will be able to evaluate prospective student-athletes at non-football scholastic activities (e.g., district track meets, high school baseball tournaments). Further, football coaches will continue to be prohibited from evaluating prospects at events devoted to agility, flexibility, speed or strength tests (e.g., combines), even if such activity is conducted by a scholastic entity.	NCAA Division I Championships/ Competition Cabinet (Football Issues Committee).	August 01, 2008
2007-44	RECRUITING — OFFERS AND INDUCEMENTS AND TRYOUTS — USE OF ACADEMIC SUPPORT SERVICES/TRAINING-ROOM FACILITIES IN ALL SPORTS — VOLUNTARY SUMMER CONDITIONING IN FOOTBALL AND BASKETBALL	To eliminate the requirement that a prospective student-athlete must have signed a National Letter of Intent (NLI) (or, for an institution that does not use the NLI, a written offer of admission and/or financial aid) in order to receive academic support services and use the institution's training room facilities; further to specify that a student who is enrolled in the institution's summer term prior to the student's initial, full-time enrollment at the certifying institution may be provided such services and, in football and basketball, participate in voluntary conditioning activities during the summer with an athletic department's strength and conditioning coach.	Many incoming "walk-on" prospective student-athletes attend summer school prior to their initial enrollment to become acclimated to college studies as do those prospective student-athletes on athletics aid. Since "walk-on" student-athletes do not receive athletics aid during the summer, they are treated differently than those who are on athletics aid. Specifically, if they are enrolled in summer school, although athletics is not paying for their enrollment, they are precluded from using the academic center for academic needs or training-room facilities for medical needs during the summer prior to the start of the academic year or preseason practice. Additionally, "walk-on" prospective student-athletes are not permitted to work out in team weight rooms and participate in team strength and conditioning workouts during the summer. This proposal would allow "walk-on" prospective student-athletes to use the same academic support services and training-room facilities that incoming students can use if they are on athletics aid and it allows them to participate in the same voluntary athletically related activities. As a matter of student-athlete well-being, all prospective student-athletes should be treated the same during the summer.	Southeastern Conference and Southern Conference.	Immediate

Football

Proposal Number	Title	Intent	Rationale	Source	Effective Date
2007-54-A	ADMINISTRATIVE REGULATIONS — RECRUITING CALENDARS — FOOTBALL BOWL SUBDIVISION — FALL EVALUATION PERIOD — 42 EVALUATION DAYS	In bowl subdivision football, to specify that the fall evaluation period shall consist of 42 evaluation days during the months of September, October and November selected at the discretion of the institution and designated in writing in the office of the director of athletics.	Based on current legislation, bowl subdivision football coaching staffs typically send all seven coaches on the road for six days during the fall evaluation period. In contrast, championship subdivision football coaching staffs use the same number of recruiting person days (42) but are able to allocate those days as needed rather than being limited to sending seven coaches out to recruit on six days. The championship subdivision model permits flexibility such that one day of recruiting may involve three coaches on the road conducting evaluations, while the next evaluation day may involve six coaches. This more flexible approach results in more efficient use of travel and time, as coaches are able to schedule specific opportunities to observe prospective student-athletes rather than being required to use an evaluation day simply because other members of the coaching staff need to be on the road for recruiting purposes during a particular day.	Southeastern Conference.	August 01, 2008
2007-54-B	ADMINISTRATIVE REGULATIONS — RECRUITING CALENDARS — FOOTBALL BOWL SUBDIVISION — FALL EVALUATION PERIOD — 42 EVALUATION DAYS — SIX DAYS PER COACH	In bowl subdivision football, to specify that the fall evaluation period shall consist of 42 evaluation days during the months of September, October and November selected at the discretion of the institution and designated in writing in the office of the director of athletics; further, to specify that each authorized off-campus recruiters shall be limited to six evaluations days during the period.	This alternative proposal would permit the flexibility in scheduling recruiting evaluations intended by Proposal No. 2007-54-A, but would limit each individual coach to no more than six visits, thereby spreading the burden across the members of the coaching staff and avoiding one individual coach from becoming virtually a full-time recruiter.	Pacific-10 Conference.	August 01, 2008

Football

Proposal Number	Title	Intent	Rationale	Source	Effective Date
2007-75	FINANCIAL AID — INITIAL COUNTERS — FOOTBALL — MIDYEAR REPLACEMENT	In football, to permit an institution to replace a counter who graduates midyear or during the previous academic year (including summer) with a student-athlete who was an initial counter in a previous academic year and is returning to the institution after time spent on active duty in the armed services or on an official church mission.	This proposal provides an institution with flexibility in awarding athletics aid to football student-athletes who previously were counters and return to the institution after time spent on active duty in the armed services or on an official church mission. Currently, an institution is not permitted to replace a midyear graduate with an individual who initially enrolls at the institution, receives athletics aid and subsequently serves time in the military or on an official church mission because they are no longer an initial counter on re-enrolling at the institution. This creates a difficult situation for the student-athlete and the institution in that the institution is either placed at a significant competitive disadvantage by carrying fewer scholarships during the fall, while in season, or the re-entering student-athlete is forced to pay his own way on returning from his service, even though he was on athletics aid prior to leaving. This proposal permits an institution to provide aid to a student-athlete without a detrimental effect based on his military or church service.	Mountain West Conference.	August 01, 2008
2007-91	PLAYING AND PRACTICE SEASONS — FOOTBALL — PRESEASON PRACTICE — ACADEMIC ORIENTATION — FIRST-TIME PARTICIPANTS — INDIVIDUAL PHOTOGRAPHS	In football, to specify that an institution may take individual photographs of participating student-athletes after the evening meal on the academic orientation day.	Institutions that have an academic orientation day on the day prior to the start of the five-day acclimatization period are permitted to issue equipment and conduct medical exams after the evening meal on the academic orientation day. Allowing institutions to take individual photographs of the student-athletes who have participated in the academic orientation would have a minimal effect on the student-athletes' time and would provide a substantial benefit to sports information directors.	Big East Conference.	Immediate
2007-92	PLAYING AND PRACTICE SEASONS — FOOTBALL — ACCLIMATIZATION PERIOD AND SPRING PRACTICE — PROTECTIVE EQUIPMENT	In football, to specify that a student-athlete may wear lightweight, upper body protective gear (e.g., shock vest, spider pads, padded shirt) during the first two days of the acclimatization period and during noncontact spring practice sessions.	The contact that occurs during the first two days of the acclimatization period and during the noncontact spring practice sessions could potentially cause bruises to the upper body if a helmet strikes a student-athlete inadvertently. Student-athletes will be better protected from any advertent injuries that may occur during the noncontact practice days by wearing lightweight, upper body protective gear.	Big East Conference.	Immediate

Coach Davis:

Unfortunately, I am not the right person to answer your question. I work with the rules of competition, not recruiting, etc.

I will forward your message to Dennis Poppe and Damani Leach of our football staff for guidance and an answer.

Thank you for your e-mail.

Regards,

Ty

Subject: Ruling Question

Dear Ty:

Could you please explain to me the reasoning behind eliminating the head coach from the Spring Evaluation Period?

I have always felt that this was an extraordinarily important time to get to know and build relationships with high school coaches, guidance counselors, as well as an opportunity to evaluate the specific athletic skills of the players we may potentially recruit.

If you could reply to me with the reasoning and if there is any possibility that this ruling will be overturned.

Thank you in advance for your attention.

Regards,

Butch Davis,

Head Coach - UNC Football

AWARDS BANQUETS

As the end of the year approaches and you are planning your banquets, please remember that **family members and friends of all student-athletes, including those who have exhausted their eligibility (e.g., seniors), must pay the per person cost for attending the banquet**. NCAA legislation (Bylaw 16.6.1.6) allows us to cover banquet costs only for the student-athletes and their spouses and children. All other relatives and friends must pay to attend. The price to attend must include the cost of the meal, as well as linen rental, serving fees, cost of paper goods, catering charges, gratuities, etc. In order to calculate a per-person fee, divide the total cost for the event by the number of attendees.

COACHES CERTIFICATION EXAM

The Coaches Certification Exam for the 2008-09 academic year will be held on Thursday, May 29, 2008 in the Swofford Auditorium on the second floor of the Kenan Football Center. Beginning at 9 am, prior to the exam, the ACC will conduct an hour-long review session. Coaches, please mark your calendar to attend this exam and RSVP to Susan Maloy if you have not already done so. Please bring your 2007-08 NCAA manual to the exam. **UNC requires that all coaching staff members, including volunteer coaches and Directors of Operations, prepare for and take the exam, even if they do not recruit off-campus.**

NLI SIGNING PERIOD

The spring NLI signing period for all sports other than basketball, football, soccer, field hockey, and track and field begins April 9th and runs through August 1st. Coaching staff members from sports utilizing this signing period may make **unlimited** telephone calls to a prospect from April 9th through April 11th.

Please note that the sports associated with this NLI signing period are in a dead period from Monday, April 7th through Thursday, April 10th.

Men's and women's basketball spring signing period begins April 16th and ends May 21st. Basketball coaches may make **unlimited** phone calls to a prospect from April 16th through April 18th.

Please note that the sport of basketball is in a dead period from Monday, April 14th through Thursday, April 17th.

During a dead period, it is not permissible to make in-person recruiting contacts or evaluations on or off the UNC campus. This also prohibits official or unofficial visits to UNC's campus, as well as the provision of complimentary admissions to prospects for campus athletics contests. Please see Bylaw 13.02.4.4 for more details.

REMINDERS

- The deadline to submit all summer athletics grant-in-aid forms to Amy Herman is April 11, 2008.
- The deadline to submit all renewal and termination of athletics grant-in-aid forms to Amy Herman is April 25, 2008.
- Please submit all camp brochures to Lance Markos.

Please contact the Compliance Office at 2-6000 with any questions about this information.

Dead Period April 7-10

POST-NATIONAL LETTER OF INTENT

After prospects have signed NLI's, coaching staffs are permitted to contact them through unlimited phone calls and text messaging.

On the calendar day **after** a prospective student-athlete signs an NLI, coaches are also permitted unlimited contacts with or evaluations of the prospect. Any contact at the prospective student-athlete's educational institution in football and men's basketball shall be confined to the permissible contact periods.

However, no contacts can be made during dead periods, and contact at the site of a prospects competition is still governed by Bylaw 13.1.7.2. Other sport-specific regulations might also exist — see Bylaws 13.1.6 and 13.1.7.

COACHES CERTIFICATION EXAM

The group Coaches Certification Exams are complete for the 2008-09 academic year. Individuals still needing to take the exam must contact Jack Evans on their own to schedule a test date. Remember that your 2007-08 certification expires on July 31st, at which time you will no longer be permitted to recruit off campus until you have passed the 2008-09 exam. Please bring your 2007-08 NCAA manual to the exam. **UNC requires that all coaching staff members, including volunteer coaches and Directors of Operations, prepare for and take the exam, even if they do not recruit off-campus.** Dr. Evans' contact information is as follows: jack_evans@unc.edu , 843-2025

ELIGIBILITY MEETINGS

Susan Maloy will be notifying coaches regarding your scheduled team eligibility meeting. Remember that student-athletes may not participate in any countable athletically-related activity (e.g., 8-hour conditioning) prior to signing the Drug Testing Consent Form or completing their physical/updated medical history with their athletic trainer.

FEE-FOR-LESSON INSTRUCTION

Student-athletes can receive compensation for teaching sports skills in his or her sport on a fee-for-lesson basis, but numerous NCAA rules apply. **Prior to providing lessons, student-athletes must complete the appropriate paperwork.** Coaches should contact the Compliance Office for copies of this form.

PLAYING/PRACTICE SEASON PAPERWORK

Head coaches received playing/practice season paperwork last month. These need to be turned into Susan Maloy by Friday, July 25th.

CAMP

At least 1 week prior to the start of each camp, complete and submit the following forms to Lance in the Compliance Office:

- *Student-Athlete Employment Roster*
- *Outside Coaches Employment Roster*
- *Free or Reduced Admission Roster*

These forms should be signed and submitted even if they do not apply to your particular camps.

Please remember that all compliance documentation must be submitted on a monthly basis and is due by the 10th day of the following month. For the month of June, this includes Telephone Logs and Contact Logs. Please contact Shelly Green (2-7851) if you have any questions.

MEDICAL INSURANCE FORM AND PRESCRIPTION MEDICATION DOCUMENTATION

Coaches, per the email you received from Larry Gallo on 6/30/08, please send blank medical insurance forms to **all** student-athletes on your roster for the 2008-09 academic year, including returning, incoming, transfers, and medically-exempt student-athletes. This form must be completed by each student-athlete, regardless of whether or not they have their own medical insurance. You should then submit completed forms to the athletic trainer assigned to your sport.

All forms must be turned in to your athletic trainer by Thursday, July 31st. Student-athletes who do not return the medical insurance form will not be allowed to participate in any practice activities until their form is received. The form is located on the J: drive in the Compliance folder

Also explained in the email from Larry Gallo is the new NCAA policy on required documentation for student-athletes who are taking prescription medication for any reason, including, but not limited to, learning disabilities (such as ADHD). Because of the newer, and stricter, standards, it is imperative that student-athletes obtain appropriate documentation from their treating physicians and submit it to our Sports Medicine staff as soon as possible. Instructions regarding what paperwork is necessary and when/how it should be submitted was included in the 6/30/08 email from Larry Gallo.

Contact Period during August

Welcome to the first edition of the 2008-09 The Compliance Newsletter.

CONTACT WITH PROSPECTS

Telephone Calls: It is now permissible for any non-coaching institutional staff member to make and receive phone calls from NLI signees and their parents. Please note that this does NOT apply to incoming prospects who are eligible to sign an NLI, but have not done so (e.g., walk-on student-athletes). Only head and assistant coaches are permitted to make phone calls to, and receive them from, these individuals.

Written Correspondence: Additionally, any institutional staff member may now create and send general correspondence to prospects. All regulations governing this correspondence (i.e., restrictions in content and time period for sending) are still applicable.

Please contact the Compliance Office with any questions about this new legislation.

OFFICIAL VISIT REQUIRED PAPERWORK

At least five days prior to an official visit, the Compliance Office must have a copy of the Official Visit Approval Form, along with a transcript and appropriate test scores. The Student-Athlete Host Entertainment Form, as well as the Guidelines for Prospective Student-Athletes Form, must be submitted to the Compliance Office within one week following the official visit.

PHOTOGRAPHING PROSPECTS

Though it IS permissible for UNC staff members to photograph prospects when they are on their official visits to campus (to keep on file for future media guides, etc., after they potentially sign with us), it is NOT permissible to print the pictures for the prospects or send the pictures to them or their coaches via email. These pictures can be taken for internal purposes only.

DROP/ADD CLASS APPROVAL

Each semester (fall, spring, and summer), after the last day to drop a course using the web registration system, student-athletes must obtain written approval from their athletics academic counselor, in addition to their Arts & Sciences academic advisor, in order to add or drop a course. **PLEASE NOTE** that student-athletes must continue to attend class in the course(s) they wish to drop until written approval from both their advisor and counselor has been obtained.

TEAM ELIGIBILITY MEETINGS

Student-athletes are not allowed to participate in any countable athletically-related activities until they have completed the required eligibility paperwork! If any student-athlete is unable to attend their scheduled team eligibility meeting, arrangements can be made for the student-athlete to attend a meeting scheduled at another date and time. A student-athlete may also schedule an individual eligibility meeting (if no other options work with his/her schedule). Please contact Susan Maloy (2-9892) with any questions or schedule concerns.

NEW LEGISLATION: MEALS IN CONJUNCTION WITH COMPETITION

As of 8/1/08, coaches now have the following options with regard to meals in association with home and away competitions:

Home Games: For home competitions, institutions may provide student-athletes with meals beginning the evening prior to competition (dinner) and continuing at the institution's discretion until the student-athletes are released after competition. Following their release, student-athletes may receive either an additional meal or $15 in cash (but not both).

Away Games: For away competitions, coaches must choose one of the following two options:

1) **Option 1**: Provide student-athletes with 3 meals per day (or cash allowance if a meal is not provided), plus a pre- or post-game meal on game day; or
2) **Option 2**: Provide meals at the institution's discretion once the student-athlete reports on call until the team returns to campus.

Provision of cash: It should be noted that if Option 1 is chosen, cash MAY be provided in lieu of any of the three daily permissible meals. Additionally, upon return to campus, it is permissible, under Option 1, to provide a student-athlete with $15 in cash.

HOWEVER, if an institution chooses to provide meals per Option 2 (unlimited meals at the discretion of the institution), **AT NO TIME** can the institution provide the student-athletes with cash (including the $15 permitted under Option 1 upon return to campus).

Subject: impermissible event
Importance: High

FYI - the following e-mail may have found its way to your football coach's computer. The event DOES NOT meet the requirements of Bylaw 13.1.8.9.4. It is not a permissible event for your staff to attend. If you visit the Copperhead's web site (http://www.carolinacopperheads.org/NCHScombine.html). The event DOES NOT meet the requirements of Bylaw 13.1.8.9.4. It is not a permissible event for your staff to attend.

Greetings Head Football Coach & Staff ,

You and your staff, or athletics representative, are invited to be VIP guests at the NC High School Copperheads Combine in Raleigh NC, Oct. 26th, 1-4pm.
This event is a football combine that is harboring NC and regional talent that is not already committed or decided upon Division I schools. It is also an opportunity to see, and promote your program to rising high school athletes before their Senior year.
This combine is for NC based colleges and universities to recruit from, and to show case your university football program to high school players from all across the State.

You and your staff have the option of a University promotions tent for the Expo portion of the Combine, or you may just observe the event and enjoy our Private VIP Hospitality Tent catered by Entree Vous. Under Armour will be providing VIP / NFL guests as well.

This event is being sponsored by Under Armour, Omega Sports, PrepChamps.com, and Johnson-Lambe.

We hope you take advantage of this great opportunity and accept our invitation to a new annual NC event!
Please RSVP (groe@carolinacopperheads.org<mailto:groe@carolinacopperheads.org>) by Oct. 24th so that we may include you and your staff on the VIP Guest List.

The NC High School Copperheads Combine
Cardinal Gibbons High School (across from NC State's Carter Stadium)

Subject: Re: FW: NCAA Infractions Penalties Article
Attach: TEXT.htm

Coach Davis,

From the information that is currently out there, it appears the NCAA is still developing it's case. Their efforts seem to hinge on the court case that's still in progress against Reggie Bush from one of the guys who provided Bush's family with housing. Bush's lawyers have been dragging out the case and Bush and his family have yet to be formally deposed. It appears that the NCAA is waiting on their testimony in order to solidify their case since the Bush's have refused to cooperate with their investigators and the NCAA is unable to compel them to cooperate. If the case gets settled prior to any testimony, it will be interesting to see what the NCAA does. By refusing to cooperate, USC may be susceptible to an Ethical Conduct violation per bylaw 10.1 (a), as well.

Below is an article from a couple of weeks ago that gives an update on the situation. I wish there was more substantial information to update you with but right now, it seems to just be ongoing.

If you have any other questions, just let us know. Thanks and good luck this weekend!!

Lance

I just read this email in respect to the NCAA Infractions Committee on violators. I found it interesting.

What progress has been made by the NCAA regarding the University of Southern California providing cash, cars and housing for football players such as Reggie Bush, Carson Palmer and Matt Leinert, etc. It has been over two years . . . what's the status?

Folks,

Although you may not think it may be necessary to share this article (I have provided both the link to the original article and have pasted the article in this email) with the EVERYONE email list in our Department, I thought it was best to do so because "this type of stuff" will certainly effect EVERYONE in a Department of Athletics and would also cause many hardships within the University community.

Thanks so much and be careful out there!

Larry

NCAA infractions committee looks to get tough on serious violators

By Steve Wieberg, USA TODAY

Responding to complaints that it has been too soft, the NCAA's infractions committee is preparing to come down harder on college athletics' serious rules violators - returning to television sanctions, giving closer consideration to postseason bans and widening the use of scholarship cuts.
It also wants to levy monetary fines.

Josephine Potuto, a Nebraska law professor who is the immediate past chairman of the infractions committee, will lay out the recommendations Thursday to the association's Division I Board of Directors, which meets in Indianapolis. Though NCAA rules already provide for many of the measures, Potuto said the panel is looking for a go-ahead to move more aggressively than it has in recent years.

"The committee feels that, over the years, the penalties really have gotten out of synch with the magnitude of violations," Potuto said Wednesday.

"Increasingly, there were people on campus saying, 'There's no teeth here. Did they lose any scholarships? Were they taken out of the postseason? Were wins vacated? And if not, it couldn't have been a big case.' Only certain penalties really signal seriousness to anybody."

FIND MORE STORIES IN: Indianapolis | Nebraska | Texas Southern | Board of Directors

The NCAA's penalty structure has gone largely unchanged since 1985 and invited skepticism - some of it internal - that it effectively deters cheating in an era when the financial stakes and pressures in major-college athletics continue to rise.

Even in serious cases involving illicit extra benefits, recruiting and other competitive-edge violations, the punishment sometimes don't measure up to sanctions now in place for teams' academic deficiencies. Those start with scholarship cuts and escalate to recruiting and practice restrictions and ultimately postseason bans.

The prospective crackdown would subject offenders to:

The first bans on TV appearances in Division I since 1996. The restriction would extend to "all modes of video transmission," including video streaming and other internet appearances.

More scholarship cuts. Now limited to cases involving financial-aid violations, they would become "the norm" in all serious cases.

Fines, which the committee would assess sparingly but across a wider array of sports. They currently affect only basketball and programs forced to return shares of NCAA tournament revenue.

More bans on postseason appearances. Among other things, that would become a "presumptive" penalty in cases involving academic fraud and repeat violations.

Tournament or football bowl bans have been assessed in eight of 40 major infractions cases involving Division I schools in the past 3 1/2 years. But in only three, most recently involving Texas Southern softball in July, was the action initiated by the NCAA (the five remaining bans were self-imposed by schools and folded into a wider array of penalties handed down by the infractions committee).

One trend unlikely to change is the NCAA's reluctance to hit offending athletics programs with its strongest sanction, a ban on practice and competition - a complete shutdown known as the death penalty.

"I know that, often, the media talk about the fact that the committee is not imposing it in cases that have been extremely egregious," Potuto said. "But the thing that set SMU apart (in 1987, the only time the death penalty has been imposed in Division I) was the institutional effort by high-level administrators to hide the fact that they were committing violations - and repeatedly hide it. In the cases at least over the time I've sat on the committee, we have not had that circumstance.

"It's still in there for the kind of case where there's not only a failure of institutional control but an unethical-conduct approach. But in other cases where there are really serious violations - particularly if we ramp up the penalties now - there are other ways to get at those violations without effectively shutting down a program."

Schools have learned to come clean and cooperate in investigations, most anticipating it will help their case and ultimately minimize sanctions. Notably, Potuto's committee also is asking the NCAA board to eliminate that tack as a damage-control strategy.

A proposed rules change would stipulate: "Full and complete cooperation in investigations and in disclosure of violations is an obligation of membership and does not mitigate sanctions imposed on either institutions or their staff members." Failure to cooperate would represent an "independent violation."

The NCAA is a joke regarding violations: when is the NCAA going to make a decision on Reggie Bush, for example?

I nominate Bobby Knight to be employed by Miles Brand to oversee investigations of rules violations on the part of NCAA members! Knight was supposedly squeaky clean as a coach. I wonder if Knight has a cell phone like the last coach at Indiana?

just-thinking wrote: 5d 1h ago
The "Death Penalty" does more to injure the students than the institutions. Some of these kids (a few at least) actually do want an education and see an athletic scholarship as their ticket to higher education. If the NCAA imposes a "death penalty" then there must be a provision that the college/university offer all students on athletic scholarships an equivalent credit against tuition costs to continue their academic pursuits. Once the kids are taken care of, let the Athletic Departments suffer whatever fate is warranted.

You really need to get over your penis envy of USC. Name one school that has a better record in BCS Bowls over the last six years.
****
Well, DUH! Did you even read the article So Cal?

USC should have been given the "Death Penalty" in football over playing Reggie Bush while he was on the payroll. The NCAA looked the other way over the Holy Land of Southern Cal. Any other school in FBS would have had to return the Heisman Trophy and forfeit all it's games during the Bush era.

LSU has 2 Crystal Footballs in their trophy case. USC has only one.

The paper trophy (AP) means nothing.

The NCAA's infractions committee has been looking the other way since 1985, If they really want to do something attach the sanctions imposed also to the Head Coach This way he can't jump a sinking ship and sail away free & clear with another school.

The NCAA needs to correct the problem at it's source, the Head Coach.

I agree. The stinking agents need to be held accountable too. They know what they are doing is wrong! The NCAA won't do squat.....too much money to lose. Not to mention how they got burned by Rick Nueheisel and Jerry Tarkanian! Some one needs to police the NCAA!

Recommend | Report Abuse

Part of this 'supposed' reform needs to be attached to coaches too. Look at how many coaches have left after they get their university in trouble, just to be picked up for a huge contract to coach at another school leaving all of their punishment behind. Penalties need to follow the coaches! Perfect example: Cell-vin Sampson... the NCAA should have NEVER allowed him to even be able to go to Indiana after his previous actions. I have no attachment to either school... it's a system-wide problem that needs to be addressed immediately! Plus, if the coach's program is guilty of major violations, there should be a mandatory forfeit of contract buyouts. It kills me to see a guilty coach walk away from a university with a $500,000 'severance pay' in-hand. Don't reward the criminals!

Coach Davis,

This sounds like a recruiting service? Is that right? A company that will identify recruitable prospects for colleges?

If I'm understanding its business correctly, then you are not permitted to endorse such a company. Bylaw 11.3.2.5 (copied below) precludes such an endorsement by athletics department staff members.

Please let me know if I'm mistaken about the role of the company.

Thanks,
Amy

11.3.2.5 Recruiting Service Consultants.

Institutional athletics department staff members may not endorse, serve as consultants or participate on advisory panels for any recruiting or scouting service involving prospective student-athletes. (Adopted: 1/16/93)

>>> "Butch Davis" <butchdavis@uncaa.unc.edu> 7/14/2009 10:19 AM >>>

Hello Amy.

Would you please research and advise if it is legal for me to make a video endorsement for a website that will be trying to identify prospective college athletes (not limited to football). This is a start-up company and I have a relationship with the principal.

Please let me know as soon as possible. Thanks!

Subject: FB Proposals

ACC Football Coaches:

It was good to see you earlier this week in Greensboro. Please find attached the NCAA proposals that have been placed in the 2009-10 NCAA Legislative cycle that I briefly reviewed during our meeting. As mentioned these proposals will be voted on in January 2010 and some may be carried forward to the April 2010 meetings. The conference office will solicit institutional positions on all the proposals in November through your athletic directors and faculty athletics representatives. Please feel free to share with them your support or opposition on these proposals at that time.

On another matter, I was asked to put together a few talking points about the concept of permitting student-athletes to participate in six or less games without losing a season of eligibility. These may be helpful when talking with your athletics directors, faculty athletics representatives and Presidents/Chancellors. This is not intended to be an all-inclusive list but some general talking points:

. Do not describe this concept as being 4.5 years of eligibility.

. Do describe this concept as being an exception for the sport of football to indicate that a s/a would only use a season of competition if they competed in more than six games. If a s/a does compete in more than six games they would use one of their four season of eligibility.

. Would maintain the 4 years of eligibility, but this would be an exception to the current NCAA rules that stipulates that a student loses an entire season of eligibility by competing in one play in a contest.

. The NCAA five-year time clock would remain applicable.

. Would help coaches manage roster in better way.

. Can be used to motivate freshmen athletes since they would have an opportunity to compete.

. Would eliminate the NCAA medical hardship waivers. Thus, eliminating questions of whether a s/a actually had an incapacitating injury for that season or not.

As Commissioner Swofford indicated during the meeting, the ACC Council of Presidents will meet September 8-9 on the campus of Boston College and will review this topic at that time. Any discussions that can occur on your campus prior to this meeting would be helpful.

I hope this helps. Good luck with your upcoming season!

Best regards,

Shane

Football Related Proposals in the 2009-10 Legislative Cycle

Title	Source	Intent	Rationale
PERSONNEL -- BOWL SUBDIVISION FOOTBALL -- EMPLOYMENT WITHIN SEVEN YEARS OF GRADUATION OR EXHAUSTING ELIGIBILITY	Southeastern Conference	In bowl subdivision football, to specify that a graduate assistant coach shall have either obtained a baccalaureate degree or exhausted eligibility within the seven calendar years prior to the individual's employment.	There has been a proliferation of graduate assistant coach positions in football being filled by individuals with significant coaching experience. Originally, the graduate assistant position was intended as a developmental opportunity rather than as a position filled by a person with years of coaching experience. This proposal is intended to establish criteria that serves to better define the graduate assistant position as being a role filled by an individual with little or no coaching experience, which is associated with a relatively short time following the individual's completion of their initial baccalaureate degree program or completion of the individual's collegiate athletics eligibility.
RECRUITING -- TRYOUTS -- COMPETITION AGAINST PROSPECTIVE STUDENT-ATHLETES -- FOOTBALL	Southeastern Conference	In football, to specify that an institution (including varsity or subvarsity levels) shall not participate in a contest against any team that includes a prospective student-athlete.	Current legislation permits the scheduling of football contests, typically involving junior varsity teams, against preparatory schools, junior colleges or other non-collegiate opponents that include prospective student-athletes. These contests may result in a substantial financial payment being made to visiting teams or in recruiting activities involving

Title	Source	Intent	Rationale
			visiting team members taking place around these contests. Similar to recent action in basketball, which removed teams of comprised of prospective student-athletes as permissible opponents during exhibition games, this legislation is intended to preclude contests against teams of prospects in the sport of football. This legislation will remove a potentially questionable practice that may be associated with undue influence involving those involved teams of prospective student-athletes, and will also eliminate recruiting activity that may occur around contests involving prospective student-athletes.
ADMINISTRATIVE REGULATIONS -- RECRUITING CALENDARS -- FOOTBALL	Patriot League	In football, to revise the recruiting calendar to eliminate the quiet periods in January, as specified.	The original intent of the current recruiting calendar format was to provide for a total of six (6) contact weeks (Sunday through Saturday) during the winter contact period. Contact opportunities in January are critical for football programs that are trying to finalize their recruiting efforts prior to the National Letter of Intent signing period; however the current format creates the potential to lose recruiting opportunities in early January depending on how the calendar falls, and specifically when January 1st falls on a mid-week day. This revision would not increase the number of permissible contacts, but rather would ensure that the January contact period was consistent and allowed for the maximum number of January contact days on an annual basis. In addition, extending the first dead period through January 3 protects the original intent of providing an uninterrupted holiday season for both prospects and coaches.
RECRUITING -- EVALUATION DAYS -- FOOTBALL -- SPRING EVALUATION PERIOD -- 168 DAYS	Southeastern Conference	In football, to specify that the spring evaluation period shall consist of 168 evaluation days (excluding Memorial Day and Sundays) from April 15 through May 31, selected at the discretion of the institution and designated in writing in the	During the fall evaluation period, football coaches now have the flexibility to schedule evaluation opportunities on a day-to-day basis. This recruiting day approach permits efficient use of time and travel resources by only requiring use of recruiting opportunities during days when such a need exists, rather than forcing seven coaches to be on the road simultaneously due to a limit on the number of recruiting

Title	Source	Intent	Rationale
		office of the director of athletics.	weeks. By using the existing four week approach, which includes seven coaches engaged in off-campus evaluations on six days each week, it is possible to establish a 168 recruiting day limit. This flexible approach results in more efficient use of travel and time, as coaches are able to schedule specific opportunities to observe prospective student-athletes. This approach has worked well in the fall, and it is believed that the same concept should be adopted during the spring evaluation period.
RECRUITING -- LETTER-OF-INTENT PROGRAMS, FINANCIAL AID AGREEMENTS -- LIMITATION ON NUMBER -- FOOTBALL	Southeastern Conference	To limit the number of football prospective student-athletes who sign a National Letter of Intent (NLI) and/or institutional offer of financial aid with a member institution to no more than 28 from the February initial signing date through May 31st of each year.	Current NCAA legislation limits an institution to 25 initial football counters each academic year; however, neither the NCAA nor the NLI regulations preclude an institution from signing any number of football prospective student-athletes to a National Letter of Intent or institutional written offer of financial aid. Some institutions are signing an excessive number of football prospective student-athletes. This proposal encourages institutional personnel to discuss academic and admission criteria of each prospective student-athlete, rather than simply athletic ability, prior to sending the prospect a NLI or written offer of financial aid. This proposal should reduce the number of prospects signed by an institution that are unlikely to qualify academically through the NCAA Eligibility Center.
RECRUITING -- LETTER-OF-INTENT PROGRAMS, FINANCIAL AID AGREEMENTS -- NO WRITTEN OFFER PRIOR TO AUGUST 1 -- FOOTBALL	Big East Conference	In football, to specify that institutions are not permitted to provide a prospective student-athlete, directly or indirectly, with any type of written athletic scholarship offer until August 1st prior to the prospective student-athlete's senior year in high school.	Over the years a culture has developed in football in which prospective student-athletes are receiving letters from coaches at the beginning of their junior year in high school that essentially offer athletic scholarships. Although they are not able to sign a National Letter of Intent until their senior year, many prospective student-athletes view the early scholarship offer letters they receive as binding legal documents. This proposal will not only eliminate the time and resources spent by institutions to produce the above-mentioned letters, but will also eliminate the tremendous amount of confusion that exists among prospective student-

Title	Source	Intent	Rationale
			athletes when the letters are received.
RECRUITING -- OFFICIAL VISIT -- FIRST OPPORTUNITY TO VISIT -- JUNE IMMEDIATELY PRIOR TO SENIOR YEAR -- FOOTBALL	Big Ten Conference	In football, to specify that an institution may provide an official visit to a prospective student-athlete in June immediately preceding his senior year in high school.	Allowing official visits in June addresses a few distinct policy considerations. First, official visits for football prospects during the fall and winter can be challenging both in terms of logistics and the quality of the visit due to various issues (e.g., occurrence during the academic year, during the season for both the institution and prospect, during the holidays, during bowl participation, etc.). June is a period of time that is more likely to be convenient for all parties involved, and is a time when rising seniors commonly visit campuses as part of the process of choosing a college. Next, the need for early accurate assessments of a prospect's ability to succeed academically and assimilate culturally in a collegiate environment has never been more important. Higher quality visits in June (due to the opportunity for increased interaction between the staff and prospects) would lead to better assessments by both the institution and prospect. Moreover, by June, institutions will be able to assess the prospect's academic performance through spring of the junior year. This proposal would not affect individual or institutional limits on official visits, and all other legislation relating to official visits would continue to apply unchanged.
RECRUITING -- SPORTS CAMPS AND CLINICS -- TIME PERIOD FOR CONDUCTING CAMPS OR CLINICS -- FOOTBALL	Southern Conference	In football, to permit coaches to conduct and be employed at institutional or noninstitutional camps anytime during the months of June, July and August or any calendar week (Sunday through Saturday) that includes days of those months.	Under the current rule, an institution's football camp may be conducted only during two periods of 15 consecutive days in the months of June and July or any calendar week (Sunday through Saturday) that includes days of those months. In addition, coaches may only be employed at other camps (both institutional and noninstitutional) during these same two periods of 15 consecutive days. Given its restrictive nature, the current rule makes it extremely difficult for assistant coaches to work at other institutional and noninstitutional camps throughout the summer. Employment at other institutional and noninstitutional camps provides

Title	Source	Intent	Rationale
			assistant coaches with a means to supplement their income and serves as an important opportunity for professional development. Increasing the time period during which an institution's football camp may be conducted will alleviate scheduling conflicts that exist on campuses where numerous sports compete for access to a limited numer of facilities during the summer months.
RECRUITING -- SPORTS CAMPS AND CLINICS -- EMPLOYMENT AT NONINSTITUTIONAL CAMPS OR CLINICS AT ANY LOCATION -- FOOTBALL	Ivy Group	To allow football coaches to work at non-institutional/privately owned camps outside of a 50 mile radius from the institution.	To allow assistant coaches in particular to gain more coaching and camp/clinic experience. Additionally, allows coaches more flexibility in finding summer employment during the two 15 day declared periods. Original intent of the imposition of the 50 mile radius was to limit only institutional football camps from happening in locations other than the vicinity of the institution.
PLAYING AND PRACTICE SEASONS -- FOOTBALL -- FIRST CONTEST -- 14 WEEKS PRIOR TO DECEMBER 1	Conference USA	In football, to specify that an institution shall not play its first contest (game or scrimmage) with outside competition prior to the Thursday that is 14 weeks prior to December 1.	The number of weekends in the sport of football varies from year to year. Allowing institutions the opportunity to complete twelve football contests in a fixed playing season that always includes fourteen Saturdays prior to December 1st will permit greater flexibility in scheduling and establish consistency. Additionally, a standard playing season is in the best interest of student-athlete welfare inasmuch as it helps them fulfill academic obligations by increasing the total number of weekends off over the course of a twelve game season. Results of the GOALS and SCORE surveys reveal that football student-athletes reported more hours spent on athletics during the season. Further, stress reactions (e.g., physical and mental health issues) were reported at the highest rates among football players in the FBS subdivision.
PLAYING AND PRACTICE SEASONS -- FOOTBALL -- OUT OF SEASON ATHLETICALLY RELATED ACTIVITIES -- SUMMER CONDITIONING PERIOD	Mountain West Conference	In football, to specify that an institution may designate any consecutive eight week period outside the academic year as its summer conditioning period.	Proposal 2002-84 was adopted, in part, to reduce time commitments of student-athletes by designating legislative discretionary time. By permitting an institution to designate their summer conditioning time period it will allow more flexibility based on the institution's academic year calendar. The institution will be able to schedule their summer

Title	Source	Intent	Rationale
			conditioning time periods around the summer school terms that their student-athletes attend and are already on campus. In addition, by keeping the summer conditioning time period at nine weeks it will continue to provide all institutions the same amount of time to be involved in summer conditioning and not create any competitive disadvantages.
PERSONNEL -- FOOTBALL -- CONTACT AND EVALUATION OF PROSPECTIVE STUDENT-ATHLETES -- EXCEPTION -- FALL EVALUATION PERIOD -- WEEK IN WHICH NO COMPETITION IS SCHEDULED -- 10 COACHES AT ANY ONE TIME	Southeastern Conference	In football, during the fall evaluation period, to allow 10 coaches to recruit off-campus during a week (Sunday through Saturday) in which no competition is scheduled.	The recent change to calculate fall evaluation opportunities based upon evaluation days provides an opportunity for additional flexibility in use of evaluation opportunities. During a week (defined as Sunday through Saturday) when a football program has no games scheduled, all coaching staff members are able to travel for evaluation purposes due to the lack of practice and game preparation. Use of this open week to complete evaluations of prospective student-athletes is an efficient use of time and reduces the requirement for late night travel to a game sight after an evaluation during the day prior to an institution's game. There will be no increase in the total travel related to evaluations conducted during the fall since the evaluation day limit will remain at 42.
PERSONNEL -- FOOTBALL -- SUCCESSOR TO HEAD COACH ON CURRENT COACHING STAFF	Big East Conference	In football, to specify that a member of the coaching staff who has been publically designated as the successor to the head coach shall be subject to all legislation applicable to the head coach.	In recent years football programs have begun to publicly announce that an individual on its current staff will become the institution's next head football coach when the current head football coach retires. In addition to being an assistant coach, this person has also been given the title of "head coach in waiting." As the membership has supported legislative initiatives to restrict the off-campus recruiting activities of the head football coach, this designation has provided a distinct recruiting advantage. This proposal would eliminate that advantage by mandating that the "head coach in waiting" adhere to all legislation applicable to the head football coach.
PERSONNEL -- GRADUATE ASSISTANT COACH -- BOWL SUBDIVISION FOOTBALL --	Big 12 Conference	To allow graduate assistant coaches to coach while enrolled in less than 50 percent of the institution's	This application is similar to the current legislation for a student-athlete in their final semester/quarter. Graduate Assistant Coaches who need less than 50 percent of the

Title	Source	Intent	Rationale
LESS THAN 50 PERCENT OF FULL-TIME ENROLLMENT DURING FINAL TERM		minimum regular graduate program of studies, provided the student is enrolled in the final semester or quarter of the graduate program and the institution certifies that the student is carrying (for credit) the courses necessary to complete degree requirements.	institution's minimum regular graduate program of studies to graduate should be held to the same standards as a student-athlete who is eligible to compete in his/her last year of eligibility and who requires less than a full-time course load to graduate (see Bylaw 14.1.8.2.1.3). Graduate Assistant Coaches who meet all other requirements to serve in such capacity, should not be penalized for their academic success nor held to a higher standard than a student-athlete in this regard.

Subject: Spring Evaluations - Rule Clarification
Attach: TEXT.htm

Coaches,

I want to clarify a discussion point from yesterday's staff meeting. We were discussing the rule change for spring evaluations and that we will be using 168 evaluation days rather than 4 designated evaluation weeks. However, this new rule does not go into effect until next spring (Spring 2011). So, this year we will still have to determine our 4 weeks that we will be 'out' recruiting and then have up to 7 coaches 'ON' each day, just as we have done in previous years. The new rule is below.

Joe

2009-27

Status: ADOPTED, Effective 8/1/2010

Intent: In football, to specify that the spring evaluation period shall consist of 168 (216 for U.S. service academies)evaluation days (excluding Memorial Day and Sundays) from April 15 through May 31, selected at the discretion of the institution and designated in writing in the office of the director of athletics.

Rationale: During the fall evaluation period, football coaches now have the flexibility to schedule evaluation opportunities on a day-to-day basis. This recruiting-day approach permits efficient use of time and travel resources by only requiring use of recruiting opportunities during days when such a need exists, rather than forcing seven coaches to be on the road simultaneously due to a limit on the number of recruiting weeks. By using the existing four-week approach, which includes seven coaches engaged in off-campus evaluations on six days each week, it is appropriate to establish a 168 recruiting day limit during the spring evaluation period. This flexible approach results in more efficient use of travel and time, as coaches are able to schedule specific opportunities to observe prospective student-athletes. Further, this approach has worked well in the fall. The same concept should be adopted for the spring evaluation period.

Subject: Prospects Attending Professional Tryouts/Workouts on Visits
Attach: TEXT.htm

All,

Coach Davis asked me about this issue this morning at the exam. Please note that Bylaws 13.6.7.10 and 13.7.2.8 (copied below) prohibit us from allowing prospects on official or unofficial visits to attend professional tryout or workout activities. This would include our Pro Timing Day.

Coach mentioned that we have tentatively scheduled a Junior Day around our Pro Timing Day for next year, so that prospects can observe those activities. Unfortunately, this will not be permissible.
Please let me know if you have any questions about this.

Thanks,
Amy

13.6.7.10 Professional Tryout or Workout Activities.

During an official visit, a prospective student-athlete may not attend events in which professional tryout or workout activities occur. (See Bylaw 13.7.2.8.) (Adopted: 1/8/07)
13.7.2.8 Professional Tryout or Workout Activities.

During an unofficial visit, a prospective student-athlete may not attend events in which professional tryout or workout activities occur. (See Bylaw 13.6.7.10.) (Adopted: 1/8/07)

>>> Amy S. Herman 1/22/2007 2:04 PM >>>
Corey, Joe, and Andre,

The NCAA passed legislation making it impermissible for prospects to attend professional tryouts/workout activities while they are on an official or unofficial visit to campus. This would include, as an example, Pro Timing Day.

I believe you indicated that we do not use this as an entertainment activity for prospects on visits, so it hopefully will not be an issue.

Let me know if you have any questions.

Thanks,
Amy

THE UNIVERSITY OF NORTH CAROLINA

Coaches Designation Form (Football)

ACADEMIC YEAR 2010-2011

Per NCAA Bylaw 11.7.2, any individual who engages in coaching activities, regardless of compensation, must be designated as a Head Coach, Assistant Coach, Graduate Assistant Coach, or Undergraduate Assistant Coach and must fall within the coaching limitations set forth for Division I-A Football.

Please complete this form in accordance with the Division I-A Football regulations.

Head Coach _____

Assistant Coach _____

Assistant Coach _____

Assistant Coach _____

Subject: Written Offers Of Aid to Prospects
Attach: TEXT.htm

Coaches,

As you know, legislation is now in effect (beginning August 1, 2010) that prohibits institutions from providing a written offer of ahtletics aid, or indicating in any way in writing to a prospect that an athletics GIA will be offered, prior to August 1 of the prospect's senior year (Bylaw 13.9.2.2, copied below).

The NCAA issued an official interpretation today that says that it is also not permissible for an institution to provide this information in writing indirectly to a prospect. For example, coaches are not able to send written information of this nature to prospects' relatives, friends, high school/prep school coaches, guidance counselors, etc.

In other words, no written offer of aid can be provided to the prospect or anyone associated with the prospect prior to August 1st of the prospect's senior year.

Please let us know if you have any questions about this. I'm including both the bylaw and the interp below.

Thanks,
Amy

13.9.2.2 Written Offer of Aid Before Signing Date.

Prior to August 1 of a prospective student-athlete's senior year in high school, an institution shall not provide a written offer of athletically related financial aid or indicate in writing to the prospective student-athlete that an athletically related grant-in-aid will be offered by the institution. On or after August 1 of a prospective student-athlete's senior year in high school, an institution may indicate in writing to a prospective student-athlete that an athletically related grant-in-aid will be offered by the institution; however, the institution may not permit the prospective student-athlete to sign a form indicating his or her acceptance of such an award before the initial signing date in that sport in the National Letter of Intent program. (Revised: 4/29/10 effective 8/1/10)

Official Interpretation
Indirect Written Offer of Aid Before Signing Date (I)
Date Published: March 4, 2011
Type: Official Interpretation Item Ref: 2

Interpretation:
The committee confirmed that prior to August 1 of a prospective student-athlete's senior year in high school, it is not permissible for an institution to indirectly (e.g., through relatives, friends, high school, preparatory school, two-year college coach or any other individual responsible for teaching or directing an activity in which a prospective student-athlete is involved) provide a written offer of athletically related financial aid or indicate in writing to the prospective student-athlete that an athletically related grant-in-aid will be offered by the institution.
[References: NCAA Bylaws 13.4.1 (recruiting materials); 13.9 (letter-of-intent programs, financial aid agreements); and 13.9.2.2 (written offer of aid before signing date); and a staff interpretation (3/2/11, Item No. a), which has been archived]

Subject: Head Coaches Meeting Compliance Information (3.15.2011)

Attach: TEXT.htm; 3-15-11 Head Coaches Meeting Agenda (with notes).doc

---

Coaches,

See attached for the compliance agenda from the head coaches' meeting this morning (along with some notes that explain the topic). Note that all pieces of legislation covered on the agenda were included in the massive legislation document I sent earlier this spring after the legislation passed. I am attaching that document here, again, for ease of reference.

Please be very aware of the effective dates of the various pieces of legislation, as many of them do not go into effect until August 1, 2011!

Please let us know if you have any questions about the material included.

Thanks,
Amy

Head Coaches Meeting

Tuesday, March 15, 2011

1) Finalizing Amateurism Certifications, April 1st (Lance)
   - *On April 1st, all Fall, 2011 incoming students need to finalize their amateurism status with the NCAA Eligibility Center*
   - *This should only take about 5 minutes online and everyone should be done with this by April 8 to ensure a timely certification*

2) Admissions Applications (Lance)
   - *Deadline 2 admit letters will be sent out Friday*
   - *For those who still are missing items for their applications, please let me know if they are having trouble getting things to Admissions so that we can set up a plan to assist*

3) Coaches Certification Exam (Susan)
   - *Thursday, May 19, 2011*
   - *Review Session @ 10a, Exam to Follow*
   - *Swofford Auditorium (Kenan FB Center)*

4) ACS Update (Amy or Lance)
   - *All staffs will be required to use ACS for recruiting information beginning in Summer, 2011*
   - *Phone calls and text messages will all be monitored through this system, so coaches will be required to have all prospects' phone numbers entered into the system*
   - *If staffs choose to continue with other companies, they will still be required to input all required data into ACS (resulting in duplicated efforts)*
   - *Questions about system should be referred to Lance*

5) Legislation (Amy)
   - *2010-70 (**Immediate**): Summer Financial Aid to walk-ons during summer prior to receiving aid in fall*
   - *2010-21 (**Immediate**): "Tagging" during June, July, and August (no more than # of coaches in any day)*
   - *2010-47(**Immediate**): Video-Only Services*
   - *2010-85 (**May 1, 2011**): First Aid/CPR Certification for Strength Coaches; Sports Med Staff Authority during Voluntary Workouts Conducted by Strength Coach*
   - *2010-79 (**August 1, 2011**): Comp Admission to parents/guardians of seniors for one awards banquet*
   - *2010-84 (**August 1, 2011**): Increase in participation award values ($100 for seniors and $50 in other categories)*
   - *2010-65 (**August 1, 2011**): Change in definition of "recruited" for financial aid purposes – have to identify 2 different recruited statuses for each prospect*

- *2010-69-B (**August 1, 2011**): Legitimate outside scholarships (provided no connection between donor and institution) no longer will have to count against team limits, regardless of criteria for scholarship*
- *2010-31 (**August 1, 2011**): After prospect signs NLI or returns financial deposit: non-coaches can call, PSA can make unofficial visits during dead periods, telephone calls are unlimited, and electronic communication is unlimited*
- *2010-38-B (**August 1, 2011**): No media guides to PSAs on storage devices – email links or attachments only*
- *2010-41-A (**August 1, 2011**): Up to 2 additional comp tickets for unofficial visits to a PSA with a non-traditional family (additional parents only)*
- *2010-75 (**August 1, 2012**): Books up to $800 in equivalency calculations*

6) Compliance Staffing Updates (Amy)
   - *Erin last day is 3/18*
   - *Susan moving to academic center in near future*
   - *Amy maternity leave ~ 4/15/11*
   - *New Financial Aid person (hopefully early-mid April)*

Subject: Requesting Final Amateurism Certifications

Attach: TEXT.htm; Requesting Final Amateurism Certification.pdf

---

Coaches,

Today is the first day your Class of 2011's can request a finalized amateurism certification with the Eligibility Center. We want each prospect to have this completed no later than one week from today on April 8. Attached are instructions on how to request the certification online through their Eligibility Center portals; the process should only take about 5 minutes.

If you have any questions, just let me know. Thanks!!

Lance

Requesting Final Amateurism Certification

- Navigate to your "My Planner" page by logging onto your account at www.eligibilitycenter.org.

- Then select the red "Request Final Amateurism" button to begin.

Notes:

- There is a tool tip that says "Click here to complete the request final amateurism certification process for this sport" which is displayed when you place the mouse over the red button.

- **The "My Eligibility Status" section is only displayed if a successful payment has been made for your registration (via credit card or e-check) or has been marked as "Fee Waiver Approved."** College-bound student-athletes who have not paid or have a fee waiver pending will not be able to view the "My Eligibility Status" section and, therefore, cannot "Request Final Amateurism Certification."

- This page requires you to review your sports participation information and to check the box certifying that you have read and agree to the statements at the bottom of the page.

- You can click the edit icon (in the shape of a pencil) if you need to update any information. If you select this button, it will take you back to the "My Sports" section for this sport to make changes or review more details. Then, you will need to start the final amateurism request process at the beginning from the "My Planner" page.

- The "Continue – Request Final" button will not be available until you have checked the box stating you have read and agree to the statements on the page.

- Once you have read and agree to the statements, click the "Continue – Request Final" button.

- An orange box will appear stating "You have successfully requested your final amateurism certification for (your sport)."
- Click "Ok."

- The button will now appear blue (completed) and should read: "Final Amateurism Requested."

  Note: There is a tool tip that says "You have already requested final amateurism certification for this sport. Click here to view the information you submitted." It is displayed when you place the mouse over the blue button.

- If you click the blue button, you will get a read-only version of your sports-participation information (screen shot on Page No. 2).

- Once you have requested your final amateurism for a sport, you can no longer edit the information you provided.

***If you have registered for other sports you plan to participate in, follow the same instructions to request final amateurism for each sport.**

- Once you have completed your request(s), click on "My Task List" to mark this task(s) as complete.

NOTE: Each college-bound student-athlete will only get <u>one</u> task assigned, regardless of how many sports he or she has selected during registration.

- Under the "Open Tasks" tab, click the box to mark the "Request Final Amateurism Certification" task as complete.

- Click the green text "Click here once you have completed this task" to confirm you have successfully completed the task.

- Confirm you are sure you want to mark this task as complete by clicking "Yes" or "No."

- If you have no other tasks to complete, your task bar will turn blue. You can view this task or any other completed tasks under the "Completed Tasks" tab.

All,

See below for an update. I love how the NCAA doesn't really say that this service is okay, but they seem to be going in that direction...

Do any of you utilize this service? Let me know if you do, please.

Thanks,
Amy

Subject: beRecruited.com Issue
Importance: High

All,

I□m sure you all have been engrossed in the issues related to □beRecruited.com.□ After various staff discussions over the last few days, the information below provides the background and analysis on the issue:

Shortly following the adoption of Proposal No. 2009-56 in January 2010, questions were raised regarding the level of analysis that was necessary to satisfy the legislation. In April 2010, a modification of wording was adopted to clarify that in the information it provides to institutions, a recruiting service must provide individual analysis beyond demographic information or ranking for each prospective student-athlete in the information it disseminates. The intent of the modification was to require services to provide more information than general statements about prospective-student-athletes, such as the college level for which the prospect might be best suited (e.g., FBS prospect, FCS prospect) or skill level (e.g., excellent shooter).

Soon after the adoption of the modification of wording, based on the history and intent of the modification, the membership was provided (through conference contact correspondence and during regional rules seminars) more information regarding the individual analysis requirement of Bylaw 13.14.3-(e). The legislation does not require a recruiting service to provide its own analysis of individual prospects. The legislation is satisfied if the recruiting service provides information beyond demographics and rankings by which an institution (coach) may make an athletic or academic analysis of the individual prospect, regardless of the source of the information.

Demographic information, such as basic roster information (e.g., height/weight/class/position) and/or rankings or general statements of skill level are not enough. Such general information does not provide the institution with information from which it may make an athletic or academic analysis of a specific individual.

Specific examples were provided of information beyond demographic information or rankings that would satisfy the legislation. Among those examples were 40-yard times (an individual athletics assessment) and grade-point averages (an individual academic assessment). Such information provides some individual analysis for an institution to use in determining its level of interest in recruiting the prospect. If for example, the institution does not recruit linebackers who do not run at least 4.7 in the 40, this information provides analysis of each individual□s speed (as opposed to general statements such as □good speed in pads□ or □has adequate game speed□).

Therefore, based on a review of the history and intent of the legislation, and the information previously provided to the membership and various recruiting services, the individual information provided by □beRecruited.com□ (e.g., academic transcript, athletics statistics, letter of recommendation from coach) satisfies the requirement in Bylaw 13.14.3-(e) that the service provide individual analysis beyond demographic information or rankings for each prospect.

Subject: Prospects Who Repeat Junior Year

Attach: TEXT.htm

All,

I'm sure the situation described below happens fairly rarely, but wanted to share this with you anyway. Please let us know if you have any questions.

Thanks,
Amy

Contact with a Prospective Student-Athlete who Repeats Junior Year (I) Date Published: June 3, 2011
Type: Staff Interpretation
Item Ref: a

Interpretation:
The academic and membership affairs staff confirmed that an institution may make off-campus, in-person contact with a prospective student-athlete beginning July 1 following completion of his or her junior year even if the prospect will repeat the junior year; however, once the prospect begins classes as a junior for the following academic year, no further contact may occur until July 1 following the academic year or the first day of classes of the prospective student-athlete□s senior year, whichever is earlier.
[References: NCAA Division I Bylaw 13.1.1.1 (time period for off-campus contacts -- general rule; and staff interpretation (4/24/91, Item No. b), which has been archived]

Subject: Reporting Recruiting Activities

Attach: TEXT.htm; Coaches - Are you ready for July 1_.msg

Coaches,

Starting July 1, all sports will now be required to report all of their recruiting activities to the Compliance Office through ACS. For those sports who have not been using the system to report these activities for the past year, you will now need to begin doing so starting in July. This includes:

Off-Campus Contacts
Evaluations (except for the summer months when evaluations do not count)

You'll notice that the list above does not include phone call logs. That is because we will now be importing both cell phone and office phone records in to ACS to monitor recruiting phone calls. This will also allow us to monitor text messages.

In lieu of reporting phone calls to the compliance office, all sports will now be required to have completed contact information for all of their recruits loaded in to ACS. This includes any contact information for the prospect's parents as well as for the students themselves. (NOTE: You may still choose to log them for communication purposes among the staff.) It is incumbent upon each coaching staff to keep these records current for the sake of accuracy of our institutional monitoring efforts.

Also, ACS will be holding a training session on some of the basics as we get ready for the upcoming recruiting cycle later this week. The attached email has the details on how to register and I strongly encourage anyone to participate, especially those for whom which the recruiting piece is going to be new.

If you have any questions, just let me know. Thanks!!

Lance

Subject: UPDATE: New Phone Call Legislation

Attach: TEXT.htm

All,

The deadline for override votes has passed, and the legislation discussed below DID receive the 100 votes necessary to suspend the legislation until further action. Therefore, it will NOT go into effect on August 1st, and everyone should continue to operate under the

regulations set forth in the current legislation.

The Legislative Council and Board of Directors will meet in the coming weeks to determine if a change to the legislation is warranted. If they do not make changes, the legislation will be voted on at Convention in January through the override process. If they DO make changes, the legislation will go back into an override period.

We will keep you informed of any changes that take place. For now, it's business as usual with the legislation currently in your NCAA Manual. Please let us know if you have any questions about this!

Thanks,
Amy

>>> Amy Herman 6/22/2011 3:39 PM >>>
Coaches,

See below for an update regarding the new telephone call legislation that goes into effect August 1, 2011. As you'll see, it's received enough override votes to get voted on by the membership in January. However, since it hasn't received enough votes to actually suspend it, the legislation will be in effect from August 1 until the vote in January. Just FYI that you need to be prepared for it come August 1.

Let us know if you have any questions.

Thanks,
Amy

>>> "Babcock, Lindsey" <lbabcock@theacc.org> 6/22/2011 3:04 PM >>>

FYI as of this afternoon 2010-30 has 38 override votes. Therefore the Legislative Council and Board of Directors will discuss the proposal again and it will be up for an override vote by the membership in January. As a reminder, this legislation will remain in effect as of August 1, 2011. So coaches, in all sports other than football, need to be prepared for this to apply at least from August 1st through January.

Please forward to your staff as appropriate.

Thanks,
Lindsey

2010-30
RECRUITING -- TELEPHONE CALLS -- TIME PERIOD FOR TELEPHONE CALLS -- SPORTS OTHER THAN FOOTBALL

Intent: In sports other than football, to specify that an institution may make one telephone call per month to an individual (or the individual's relatives or legal guardians) on or after June 15 at the conclusion of the individual's sophomore year in high school through July 31 after the individual's junior year in high school, two telephone calls per week beginning August 1 prior to the individual's senior year in high school, and one telephone call per week to a two-year or four-year college prospective student-athlete (or the prospective student-athlete's relatives or legal guardians); further, in sports other than football for which a defined recruiting calendar applies, to specify that during a contact period that occurs on or after August 1 before an individual's senior year in high school, telephone calls may be made at the institution's discretion.

A. Bylaws: Amend 13.1.3, as follows:
13.1.3 Telephone Calls.
13.1.3.1 Time Period for Telephone Calls -- General Rule Sports Other Than Football. Telephone In sports other than football, telephone calls to an individual (or his or her relatives or legal guardians) may not be made before July 1 following the completion of his or her junior June 15 at the conclusion of the individual's sophomore year in high school (subject to the exceptions below); thereafter, staff members shall not make such telephone calls more than once per week. Thereafter, an institution may make telephone calls to an individual (or the individual's relatives or legal guardians) as follows:
(a) One telephone call per month on or after June 15 at the conclusion of the individual's sophomore year in high school through July 31 following the individual's junior year in high school.
(b) Two telephone calls per week beginning August 1 prior to the individual's senior year in high school.
(c) One telephone call per week to a two-year or four-year college prospective student-athlete (or the prospective student-athlete's relatives or legal guardians).
(d) In sports for which a defined recruiting calendar applies (see Bylaw 13.17), during a contact period that occurs on or after August 1 before an individual's senior year in high school, telephone calls may be made at the institution's discretion.
13.1.3.1.1 Exception -- Baseball, Cross Country/Track and Field, Men's Lacrosse, Women's Lacrosse, Softball and Women's Volleyball. In baseball, cross country/track and field, men's lacrosse, women's lacrosse, softball and women's volleyball, telephone

calls to an individual (or his or her relatives or legal guardians) may not be made before July 1 following the completion of his or her junior year in high school. Thereafter, such telephone calls shall be limited to once per week outside a contact period, but may be made at the institution's discretion during a contact period.
13.1.3.1.2 Exception -- Football. In football, one telephone call to an individual (or the individual's relatives or legal guardians) may be made from April 15 through May 31 of the individual's junior year in high school. Additional telephone calls to an individual (or the individual's relatives or legal guardians) may not be made before September 1 of the beginning of the individual's senior year in high school. Thereafter, such telephone contact is limited to once per week outside a contact period, but may be made at the institution's discretion during a contact period.
13.1.3.1.3 Exception -- Men's Basketball. In men's basketball, an institution is permitted to make one telephone call per month to an individual (or the individual's relatives or legal guardians) on or after June 15 of the individual's sophomore year in high school through July 31 of the individual's junior year in high school. Thereafter, outside a contact period, an institution is permitted to make two telephone calls per week to an individual (or the individual's relatives or legal guardians) beginning August 1 before the individual's senior year in high school. Outside a contact period, an institution is permitted to make one telephone call per week to a two-year or four-year college prospective student-athlete (or the prospective student-athlete's relatives or legal guardians). During a contact period that occurs after August 1 prior to an individual's senior year in high school, telephone calls may be made at the institution's discretion.
13.1.3.1.4 Exception -- Women's Basketball. In women's basketball, telephone calls may be made to an individual (or the individual's relatives or legal guardians) as follows:
(a) One telephone call during the month of April of the individual's junior year in high school on or after the Thursday after the conclusion of the NCAA Division I Women's Final Four.
(b) One telephone call during the month of May of the individual's junior year in high school.
(c) One telephone call on or after June 1 through June 20 of the individual's junior year in high school.
(d) One telephone call on or after June 21 through June 30 of the individual's junior year in high school.
(e) Three telephone calls during the month of July following the individual's junior year in high school, with not more than one telephone call per week [see Bylaw 13.1.6.2.2-(c)].
(f) Thereafter, one telephone call per week outside a contact period and unlimited telephone calls during a contact period.
13.1.3.1.4.1 Additional Restrictions -- Additional Communication With a Parent or Legal Guardian Who Serves on Staff of a Nonscholastic Team -- Women's Basketball. An In women's basketball, an institution may not have any additional communication with a parent or legal guardian of a prospective student-athlete who serves on the staff of his or her daughter's nonscholastic team unless the parent or legal guardian also serves as a head coach of his or her daughter's scholastic team and the additional communication is unrelated to recruitment of his or her daughter.
13.1.3.1.4.2 Additional Restrictions -- July Evaluation Periods -- Women's Basketball. In women's basketball, during the July evaluation periods, all communication with a prospective student-athlete, the prospective student-athlete's relatives or legal guardians, the prospective student-athlete's coach or any individual associated with the prospective student-athlete as a result of the prospective student-athlete's participation in basketball, directly or indirectly, is prohibited.
13.1.3.1.4.2.1 Exception -- Communication After National Letter of Intent Signing or Other Written Commitment -- Women's Basketball. In women's basketball, an institution may communicate with a prospective student-athlete (or the prospective student-athlete's relatives, legal guardians or coach) during the July evaluation periods, provided the prospective student-athlete has graduated from high school and signed a National Letter of Intent with the institution. For an institution not using the National Letter of Intent in women's basketball or for those prospective student-athlete's not eligible to sign the National Letter of Intent, communication may occur during the July evaluation periods, provided the prospective student-athlete has graduated from high school and signed the institution's written offer of admission and/or financial aid.
13.1.3.1.5 Exception -- Men's Ice Hockey. In men's ice hockey, an institution is permitted to make one telephone call per month to an individual (or the individual's relatives or legal guardians) on or after June 15 at the conclusion of the individual's sophomore year in high school through July 31 after the individual's junior year in high school. An institution is permitted to make one telephone call per week to an individual (or the individual's relatives or legal guardians) beginning August 1 following completion of the individual's junior year in high school.
13.1.3.1.6 Exception -- Women's Ice Hockey. In women's ice hockey, an institution is permitted to make one telephone call to an individual (or the individual's relatives or guardians) who is a resident of a foreign country on or after July 7 through July 31 following the completion of the individual's sophomore year in high school. An institution is permitted to make one telephone call per week to an individual (or the individual's relatives or legal guardians) beginning July 7 following completion of the individual junior year in high school.
13.1.3.2 Time Period for Telephone Calls -- Football. In football, telephone calls to an individual (or his or her relatives or legal guardians) may not be made before April 15 of the individual's junior year in high school. One telephone call to an individual (or the individual's relatives or legal guardians) may be made from April 15 through May 31 of the individual's junior year in high school. Additional telephone calls to an individual (or the individual's relatives or legal guardians) may not be made before September 1 of the beginning of the individual's senior year in high school. Thereafter, such telephone contact is limited to once per week outside a contact period, but may be at the institution's discretion during a contact period.
[13.1.3.1.7 through 13.1.3.1.8 renumbered as 13.1.3.3 through 13.1.3.4 unchanged.]
13.1.3.25 Additional Regulations.
[13.1.3.2.1 renumbered as 13.1.3.5.1, unchanged.]
13.1.3.25.2 Telephone Calls Initiated by Prospective Student-Athlete at His or Her Expense. Institutional coaching staff members (see Bylaw 13.1.3.47.1) may receive telephone calls placed by a prospective student-athlete at the prospective student-athlete's own expense at any time, including before July 1 following June 15 at the conclusion of the prospective student-athlete's junior sophomore year in high school.

[13.1.3.3 through 13.1.3.4 renumbered as 13.1.3.6 through 13.1.3.7, unchanged.]
13.1.3.58 Nonpermissible Callers.
[13.1.3.5.1 renumbered as 13.1.3.8.1, unchanged.]
[13.1.3.5.1.1 renumbered as 13.1.3.8.1.1, unchanged.]
13.1.3.58.2 Enrolled Student-Athletes. Enrolled student-athletes or other enrolled students shall not make or participate in telephone calls to prospective student-athletes at the direction of a coaching staff member or financed by the institution or a representative of its athletics interests; however, they may receive telephone calls at the expense of the prospective student-athlete on or after July 1 following the completion June 15 at the conclusion of the prospective student-athlete's junior sophomore year in high school. An enrolled student-athlete may receive telephone calls made at the expense of a prospective student-athlete prior to July 1 following the completion June 15 at the conclusion of the prospective student-athlete's junior sophomore year in high school, provided there is no direct or indirect involvement by athletics department staff.
[13.1.3.5.2.1 renumbered as 13.1.3.8.2.1, unchanged.]
13.1.3.69 Collect and Toll-Free Telephone Calls. Institutional coaching staff members (see Bylaw 13.1.3.47.1) may accept collect and toll-free (e.g., 1-800, 1-888) telephone calls placed by a prospective student-athlete and the prospective student-athlete's parents and legal guardians, provided the calls are placed not earlier than July 1 following completion June 15 at the conclusion of the prospective student-athlete's junior sophomore year in high school.
13.1.3.6.1 Exception -- Men's Basketball. In men's basketball, institutional coaching staff members may accept collect telephone calls placed by a prospective student-athlete and the prospective student-athlete's parents and legal guardians, provided the calls are placed not earlier than the conclusion of the prospective student-athlete's sophomore year in high school. The institution may use a toll-free number to receive such calls from a prospective student-athlete and the prospective student-athlete's parents or legal guardians.

13.1.3.6.2 Exception -- Women's Basketball. In women's basketball, institutional coaching staff members may accept collect and toll-free telephone calls placed by a prospective student-athlete and the prospective student-athlete's parents and legal guardians, provided the calls are not placed earlier than the date on which an institution may begin placing telephone calls to the prospective student-athlete (see Bylaw 13.1.3.1.3).
[13.1.3.7 renumbered as 13.1.3.10, unchanged.]
B. Bylaws: Amend 13.15.2.2, as follows:
13.15.2.2 Collect and Toll-Free Telephone Calls. Institutional coaching staff members (see Bylaw 13.1.3.47.1) may accept collect and toll-free (e.g., 1-800, 1-888) telephone calls placed by a prospective student-athlete and prospective student-athlete's parents and legal guardians, provided the calls are placed no earlier than July 1 following completion June 15 at the conclusion of the prospective student-athlete□s junior sophomore year in high school.
Source: NCAA Division I Recruiting and Athletics Personnel Issues Cabinet

Effective Date: August 1, 2011

Proposal Category: Amendment

Topical Area: Recruiting

Rationale: This proposal applies the current telephone call rule in men's basketball to all sports other than football. Based on the examination of the current recruiting model and feedback received from the membership, this proposal will help to bring uniformity to the telephone calls legislation. The proposal excludes football due to the fact that the current legislation is specific to the spring evaluation period. This legislative change will provide the opportunity, in most sports, for communication on a limited basis with prospective student-athletes at an earlier time. Such communication may be used to better assess a prospective student-athlete's academic preparedness and provide guidance regarding his or her high school academic curriculum. Such access would assist both institutions and prospective student-athletes in making sound recruiting evaluations and decisions. With the introduction of legislative proposals restricting verbal offers of athletics aid until July 1 following the completion of an individual's junior year in high school, additional opportunities are necessary to assist in developing a relationship between a coach and a prospective student-athlete and for a coach to obtain key information about a prospective student-athlete prior to making any verbal or written offers of financial aid.

Estimated Budget Impact: None.

Impact on Student-Athlete's Time (Academic and/or Athletics): None.

Position Statement(s):
Women's Basketball Issues Committee The committee supports the proposal and agrees with the sponsor's rationale, but notes that the sponsor should consider modifying the provision that permits two telephone calls per week beginning August 1 prior to the individual's senior year in high school to one telephone call per week.

Subject: Friday Rules Education Tidbit

Attach: TEXT.htm

All,

Happy Friday! Thought I would drop you a quick rules education email regarding contact with prospects who are involved in competition...

Please note that 13.1.6.2 prohibits contact (including telephone contact) with prospects who are competing or have reported on-call for competition. This includes situations in which a prospect might call you!

Therefore, if you ever answer a call from a prospect and the prospect notifies you that...

1) He/She has a competition later that day;
2) He/She has reported on-call with his/her team and is traveling to a competition; or
3) He/She is involved in a tournament that lasts several consecutive days.

...you must immediately terminate the call to prevent a violation.

Please let us know if you have any questions about this.

Thanks, and have a great weekend!

Amy

Subject: Prospects Participating in Recreational Activities During Visits

Attach: TEXT.htm

All,

As we approach the beginning of the academic year and the start of prospects' official and unofficial visits to campus, I need to remind all of you of the regulations in place regarding prospects participating in workouts or other recreational activities (e.g., pick-up games) with both current student-athletes and former student-athletes.

This email will be long, but it is critical that you read it thoroughly and fully understand all of its implications.

Bylaw 13.11.2.2, copied below, outlines the general regulation in place concerning these activities. Essentially, the activities cannot be organized or observed by members of the coaching staff (including strength and conditioning staff), nor can they be designed to test the athletics ability of the prospect.

As you can imagine, with a bylaw this basic, there are multiple interpretations of which you should be aware. I'm including the text of several of them below, as well, but will provide a summary here:

1) The facility does not have to be open to the general public if the prospect will be utilizing the facility solely with current student-athletes. However, if there is a fee associated with use of the facility, the prospect must pay the going rate associated with the use of that facility;

2) We may NOT provide workout apparel to a prospect who wishes to participate in these activities on our campus. He/She must supply his/her own clothing/shoes;

3) THIS ONE'S A BIT TRICKY: If a prospect wishes to engage in any recreational activities (e.g., pick-up games) with current and former student-athletes, the prospect must "initiate all the arrangements" and the facility must be open to the general public.

The question, of course, is "what does initiate all the arrangements" mean?!? Our interpretation of this is that the prospect must be the individual that asks either the coaches or the current student-athlete(s) if he/she can engage in these activities. Prospects can certainly not be expected to reserve/set up an institutional facility or contact all current/former student-athletes, which we believe is why the NCAA staff used the word "initiate" in their interpretation (copied below). Therefore, our stance on this is that the prospects simply need to be the ones to ask about the opportunity to engage in these activities. Once a prospect asks for the opportunity, it is then fine for the current student-athletes to assist in formalizing the arrangements. BUT THE PROSPECT MUST ASK FIRST, and the facility must be open to the public if former student-athletes are participating; and

4) The involvement of former student-athletes in these activities is a topic that is currently being reviewed by the NCAA staff. So please be on the lookout for future updates on this from me. As it currently stands, however, provided the interp copied below in green is met in its entirety, it remains permissible. Note that the last line of the interp states that "no recruitment activities occur".

This phrase is the sticking point in the mind of the NCAA. There is some indication that the NCAA staff believes that simply engaging in a pick-up game together results in a "recruitment activity" between the former student-athlete and the prospect. Certainly there is a fine line between scrimmage-related talk (e.g., "Get back on D!") and talk that would cross the line into recruiting, (e.g., "Sure would be fun to see you playing with these guys next year!"), which is why the NCAA is concerned.

Therefore, while we, as a compliance staff, are not going to tell you that prospects are not allowed to scrimmage with former student-athletes, we DO believe it's important that you understand that we are responsible for the actions taken by our former student-athletes/boosters. As a result, if a former student-athlete does engage in impermissible recruiting conversations with prospects, the NCAA will likely deal with it harshly, since we knowingly put the prospect and the former student-athlete into a situation where a violation was possible, maybe even likely.

Our advice to you is this: If you DO permit your prospects to scrimmage/work out with former student-athletes, ALL PARTIES (i.e., the prospects, the current student-athletes, and the former student-athletes) should be instructed as to what is permissible conversation. The Compliance staff would be happy to have this discussion with the parties involved if you believe that would be helpful in preventing a violation. If there is any concern at all about their ability to abide by these regulations, the joint activity should not be permitted.

Please let us know if you have any questions about this information. As I stated earlier, we will update you accordingly should the NCAA change their stance on this issue.

Thanks,
Amy

13.11.2.2 Recreational Activities.

A prospective student-athlete visiting a member institution may participate in physical workouts or other recreational activities during a visit to an institution's campus, provided such activities:
(a) Are not organized or observed by members of the athletics department coaching staff; and
(b) Are not designed to test the athletics abilities of the prospective student-athlete. (Revised: 1/11/94)

Staff Interpretation
Recreational Activities During Official or Unofficial Visit (I)Date Published: May 13, 2011
Item Ref: 1

Interpretation:
The academic and membership affairs staff determined that during an official or unofficial visit, a prospective student-athlete may participate in recreational activities in a facility (on- or off-campus) that is not open to the general public (e.g., campus recreation center, golf course, swimming pool), provided such activities are not organized or observed by members of the athletics department coaching staff (including strength and conditioning coaches) and are not designed to test the athletics abilities of the prospective student-athlete. Further, in situations in which there is a fee associated with the use of the facility (e.g., guest fee at a private facility used by the institution for practice or competition, admission fee for open swim session at institutional recreation center), a prospective student-athlete shall pay the going rate associated with the use of that facility.
[References: NCAA Division I Bylaws 12.1.2.1.6 (preferential treatment, benefits, or services), 13.2 (offers and inducements), 13.6 (official (paid) visit), 13.7 (unofficial (nonpaid) visit) and 13.11.2.2 (recreational activities); staff interpretations (5/26/10, Item No. 1) and (9/4/08, Item No. a), which has been archived]

Official Interpretation
Providing workout apparel to a prospect during campus visitsDate Published: August 25, 1994
Item Ref: 2

Interpretation:
2. Providing workout apparel to a prospect during campus visits: An institution may not provide workout apparel to a prospect who wishes to participate in recreational activities during a visit to an institution's campus. [References: NCAA Bylaws 13.12.2.3 (recreational activities) and 13.2.1 (offers and inducements -- general regulations)]

Staff Interpretation
Prospective Student-Athlete Arranging 'Pick-Up' Game with Enrolled or Former Student-AthleteDate Published: October 5, 1994
Item Ref: c

Interpretation:
c. Prospective Student-Athlete Arranging "Pick-Up" Game with Enrolled or Former Student-Athlete: The legislative services staff confirmed that it is permissible for a prospective student-athlete to arrange a "pick-up" game with an enrolled student-athlete or a former student- athlete, provided all the arrangements are initiated by the prospect, the facilities are open to the general public if the institution's facilities are used and no recruitment activities occur. [References: 13.12.1 (tryouts -- prohibited activities); 13.12.2.3 (recreational activities), and 1994 Official Notice, Proposal No. 167]

Subject: Posting Videos/Photos of SAs in Voluntary Summer Workouts - Follow-up

Attach: TEXT.htm

All,

Wanted you to see this information below. I believe it is consistent with what we've told you all before when asked about this situation, so it should not be new to any of you, but please let me know if you have any questions.

Thanks,
Amy

>>> "Babcock, Lindsey" <lbabcock@theacc.org> 8/18/2011 3:54 PM >>>

Hi Everyone

I just wanted to follow-up on this information that Seth sent out to you all a few weeks ago. On last week s CCACA call I raised this issue with the group. After discussion the following was agreed upon:

A. Posting Videos/pictures of student-athletes participating in summer voluntary workouts

Kathleen Batterson, Colonial, indicated that she had received several questions regarding the permissibility of an institution posting videos/pictures of its student-athletes participating in voluntary workouts over the summer. The group agreed that an institution posting this information would be impermissible. Babcock asked the group for feedback regarding the media taking footage and including clips of these workouts on news broadcasts. The media taking footage is much hard to monitor and define exactly what is permissible. Institutions should not play a role in assisting media entities in getting access to the student-athletes during the workouts. The group agreed that although media including pictures or videos of voluntary workouts in news stories or broadcasts might be permissible, these scenarios would need to be dealt with on a case by case basis.

This is more consistent with where we ve been with this issue in the past. Let us know if you have any further questions.
Thanks,
Lindsey

Subject: FW: [CCACA] Posting Videos/Photos of SAs in Voluntary Summer Workouts

Hello Group,

Please note the following information, which was shared over the CCACA listserve. Let us know if you have any questions.
Lately several of our institution□s Media Relations people have asked questions about posting videos and action shots of current student-athletes, and incoming student-athletes enrolled in summer school, showing them participating in voluntary summer workouts. SID□s are searching for stories for their schools□ websites to have some □Fan News□ during this □slow□ time. In some instances the local TV stations are filming summer workouts for their local news broadcasts (which may be permissible per Bylaw 12.5.3-(b), Media Activities Outside the Playing Season), and then the institution wants to post the segment on the school□s website. It is not permissible to post videos or even still photos showing SAs (including incoming SAs in summer school) participating in summer workouts. We referenced the following bylaw and secondary violations .
Bylaw: 17.02.13 - Voluntary Athletically Related Activities.
In order for any athletically related activity to be considered "voluntary," all of the following conditions must be met: (Adopted: 4/18/01)
(a) The student-athlete must not be required to report back to a coach or other athletics department staff member (e.g., strength coach, trainer, manager) any information related to the activity. In addition, no athletics department staff member who observes the activity (e.g., strength coach, trainer, manager) may report back to the student-athlete's coach any information related to the activity;
(b) The activity must be initiated and requested solely by the student-athlete. Neither the institution nor any athletics department staff member may require the student-athlete to participate in the activity at any time. However, it is permissible for an athletics department staff member to provide information to student-athletes related to available opportunities for participating in voluntary activities (e.g., times when the strength and conditioning coach will be on duty in the weight room or on the track). In addition, for students who have initiated a request to engage in voluntary activities, the institution or an athletics department staff member may assign specific times for student-athletes to use institutional facilities for such purposes and inform the student-athletes of the time in advance;
(c) The student-athlete's attendance and participation in the activity (or lack thereof) may not be recorded for the purposes of reporting such information to coaching staff members or other student-athletes; and
(d) The student-athlete may not be subjected to penalty if he or she elects not to participate in the activity. In addition, neither the institution nor any athletics department staff member may provide recognition or incentives (e.g., awards) to a student-athlete based on his or her attendance or performance in the activity.
[Note: Coaching staff members may be present during permissible skill-related instruction pursuant to Bylaws 17.1.6.2.2 and 17.1.6.2.3] (Revised: 4/29/04 effective 8/1/04)
Student-Athlete Reinstatement/Secondary Case

Secondary Case Number:
46186

SA Reinstatement Case Number:
0

Secondary Decision Date:
October 7, 2010

SA Reinstatement Decision Date:

Division: I
Involved Sports: Men's Basketball
Facts: An institution staff member posted a workout video of former SAs and current SAs on Facebook. The assistant athletic director for compliance discovered the posting, but on the following day the video post had been removed. The head coach had informed the institution staff member to have the post removed. Neither the head coach nor any institution staff members view the video.
Additional Facts: Level II
Institution Action: Compliance office met with involved staff member and advised that he cannot publish or record any information

during summer voluntary workouts. Letter of admonishment issued to involved staff member. Since it was the head coach's due diligence that caused the posting to be removed, no further actions were taken.
Enforcement Action: Filed.

Secondary Case Number:
41561

SA Reinstatement Case Number:
0

Secondary Decision Date:
October 2, 2009

SA Reinstatement Decision Date:

Division: I
Involved Sports: Men's Basketball
Facts: During the summer of 2009, the director of men's basketball operations videotaped men's basketball student-athletes participating in voluntary strength and conditioning activities. Specifically, the director of men's basketball operations videotaped a voluntary summer workout and the sports information director posted the video on the institution's official athletics Web site. The director of men's basketball operations and the sports information director mistakenly believed that it was permissible inasmuch as they did not explicitly mention in the video that it was a summer workout and the video included game footage from the previous academic year. The video was not viewed by any coaches and was taken down immediately once the violation was discovered.
Additional Facts: ---
Institution Action: Rules education was conducted with the director of basketball operations, the sports information staff, and the men's basketball team and coaches. A letter of admonishment will be issued to the director of basketball operations and the director of sports information.
Enforcement Action: No further action. Please note that relief from the standard penalty was provided in this instance.

Subject: Text Messaging Exception After Commitment

Attach: TEXT.htm

Coaches,

I got a question yesterday from a coach asking about when it becomes permissible for athletics department staff members to send text messages to walk-on prospects. I thought now was as good a time as any to remind ALL of you about the regulations concerning text messages, keeping in mind that the regulation precluding text messages to prospects also precludes sending them to prospects' relatives or legal guardians.

In terms of when the exception kicks in after a prospect makes a commitment to the institution... I've included the text of the actual bylaws below, but the bottom line is that we can begin sending unlimited text messages to prospects in either of the following two situations:

1) The DAY AFTER the prospect signs an NLI/ASA (so if he/she sign on a Wednesday, we can start sending text messages on Thursday); or

2) The DAY AFTER the institution receives an enrollment deposit from a walk-on prospect.

Obviously if you're hoping to use #2 above, you'll need to verify with us that the walk-on prospect has submitted his/her enrollment deposit prior to sending him/her a text message.

Please let me know if you have any questions about this.

Thanks,
Amy

13.4.1.2 Electronic Transmissions.

Electronically transmitted correspondence that may be sent to a prospective student-athlete (or the prospective student-athlete's parents or legal guardians) is limited to electronic mail and facsimiles. (See Bylaw 13.1.6.2.) All other forms of electronically transmitted correspondence (e.g., Instant Messenger, text messaging) are prohibited. Color attachments may be included with electronic mail correspondence, provided the attachment only includes information that is not created for recruiting purposes, except for items that are specifically permitted as printed recruiting materials (e.g., questionnaires), a media guide and video and audio materials, as permitted in Bylaw 13.4.1.5. Attachments other than a media guide and permissible video and audio materials shall not include any animation, audio or video clips and there shall be no cost (e.g., subscription fee) associated with sending the item attached to the electronic mail correspondence. [D] (Adopted: 4/28/05 effective 8/1/05, Revised: 12/12/06, 4/26/07 effective 8/1/07, 4/15/08, 4/29/10 effective 8/1/10, 1/15/11 effective 8/1/11)
13.4.1.2.1 Exception -- Electronic Transmissions After Commitment.

There shall be no limit on the forms of electronically transmitted correspondence sent to a prospective student-athlete (or the prospective student-athlete's relatives or legal guardians) beginning the calendar day after one of the following events occurs: (Adopted: 1/15/11 effective 8/1/11)
(a) The prospective student-athlete signs a National Letter of Intent (NLI) or the institution's written offer of admission and/or financial aid; or
(b) The institution receives a financial deposit in response to the institution's offer of admission.

Subject: Countable Hours and Participation Log Instructions

Attach: TEXT.htm; To Log Countable Hours in ACS.docx; To Track S-A Participation in ACS.docx

---

Coaches,

See attached for instructions on logging Countable Hours and Participation Logs. Logging Countable Hours started with the first day of classes for everyone, so there is a week in August that will need to be submitted by the September 10th deadline.

If you have any questions, just let me know. Thanks!!

Lance

To Log Countable Hours in ACS

1. Log-In to ACS using this link
    a. https://incontrol.acsathletics.com/Login.aspx
2. Select the 'Team Manager' tab and then click on Athletes in the sub-menu that appears.
3. Using the check boxes on the far right of each student-athlete's row, select those athletes that you wish to update.
    a. If you wish to select the whole team, check the box in the light blue bar in the header row above the first athlete on the list.
4. Once you have selected those athletes you wish to update, go to the Functions drop down menu slightly above the list of athletes on the right hand side.
5. Select 'Log Hours' and click Go.
6. On the next screen, select the week that you wish to update from the dropdown list of available weeks.
7. You will then be given the 7 days listed in the week you selected. Each day will have 4 dropdown menus in which you can select the type of activity and the duration of the activity.
    a. NOTE – we will be requiring that you submit the duration of the activity, similar to how we have always done it, as opposed to listing the time of day the activity took place.
    b. You will also have every student you selected in step 3 listed below the activities.
8. You may update the hours without submitting them to the Compliance Office by selecting either the 'Apply Changes to Displayed Athletes' button or the 'Apply Changes to Selected Athletes' button. Either option will allow you to return at a later date to update the hours and submit them at that time.
9. After Applying Changes to the athletes, their daily and weekly hour totals will be updated below.
10. Once you are satisfied with the accuracy of the information, you should select the 'Review Logs for this Week' button.
    a. Clicking this button will automatically display every student-athlete and the hours you have logged for them that week, regardless of whether or not you actually just updated them.
11. When you are satisfied that the hours are accurate, you must then click the 'Submit Hours to Compliance' button to formally submit them.
    a. Only after you complete this step will you officially be done for that week.

To Track S-A Participation in ACS

1. Log-In to ACS using this link
    a. https://incontrol.acsathletics.com/Login.aspx
2. Select the 'Team Manager' tab and then click on Competition Schedule in the sub-menu that appears.
3. The approved schedule will appear for your sport with a list of each event. Following the completion of a competition, click the 'Not Submitted' link in the Participation Log Status column.
    a. Note that this link will only be available after the date of the contest passes.
4. The following screen then displays each student-athlete on your roster with the option to check either 'Yes' for participating in the game or 'No' if they did not participate.
    a. The list of student-athletes for a particular game will reflect the roster as it stood at the time of the contest.
5. Once you've made the changes necessary for that specific competition, you may click either the 'Save and Return' button or the 'Save and Submit to Compliance' button, as you choose.
6. If you want to mass update all the student-athletes on your roster, you may check the 'Participated in Event' checkbox in the upper right under the Mass Update Participation Log field and then click 'Update Values'. Once the values are updated, you must then click a Save button in order for the information to be retained.

Subject: Contemporaneous Phone Call Documentation

Attach: TEXT.htm; Telephone Call Documentation.msg; Further NCAA Info Re_ Telephone Call Documentation.msg

---

Coaches,

With our transition to ACS for monitoring phone records, I thought it important to remind you of how the NCAA views voicemail messages left by coaches and situations in which family members of prospects might answer a phone call and inform you that the prospect is not home.

The applicable NCAA regulation is that if a coach makes telephone contact with a family member of a prospect, for example, and the conversation is not in excess of a greeting, it does not have to count against the call limits. For this to take effect, though, it would not be permissible for the coach to have ANY sort of recruiting conversation with the parents!

Unfortunately, the NCAA does not put a "time limit" on when a call becomes countable. Therefore, it's not really possible for us to put phone calls into a nice "box", so to speak, and say that, for example, any call that exceeds 1 minute "counts", and any call that registers as only 1 minute doesn't. As we all know, many a recruiting conversation can occur in less than one minute, and a "chatty" parent can make nothing more than a greeting exceed 2 minutes.

Because it is impossible to tell from a phone record what conversation, if any, took place between the coach who placed the call and the individual who answered (or voicemail, for that matter), the NCAA expects that coaches and institutions to take contemporaneous notes at the time of the call that will serve as documentation, should a question arise in the future.

For example, if a coach dials a prospect and leaves only a brief greeting on his/her voicemail, the coach should immediately make note in the prospect's file (preferably in ACS) that a non-countable call was placed at this date/time. Therefore, if the ACS system "flags" future calls as a potential violation, the coach will have documentation FROM THAT DAY to explain that the original call wasn't a countable one. This is the only "acceptable" answer to the NCAA.

So, while coaches no longer have to keep written phone logs for compliance purposes (due to us being able to upload all calls into ACS for monitoring), it IS still critical for coaches to maintain documentation to explain circumstances in which it might appear to our electronic monitoring system that a violation occurred.

To provide additional information on this subject, I am attaching two emails that were sent to you back in 2008 on this same topic. While much of them will include redundant information, I ask that you again read through them carefully so that you know what is expected in terms of documentation.

Please let us know if you have any questions.

Thanks,
Amy

Subject: Telephone Call Documentation
Attach: Header

Coaches,

We have received information from the NCAA, of which you all must be aware, regarding its stance on the enforcement of telephone call legislation.

In light of the recent NCAA violation cases at the University of Oklahoma and Indiana University involving excessive phone calls to prospects, the NCAA has released a formal statement clarifying its stance on the enforcement of telephone call legislation. For purposes of managing these two, and other similar, infractions cases, the NCAA enforcement staff established a "three-minute rule" by which to determine if a phone call would be considered a "countable" call toward NCAA telephone call limitations. The NCAA, in its latest statement, has indicated that this approach was taken in order to manage cases that involved voluminous calls in a fair and reasonable manner, since there was no contemporaneous documentation that could assist them through the process.

When word of this "3-minute rule" became public, some institutions incorrectly assumed that calls under 3 minutes in length were not countable calls toward the NCAA limitations on telephone calls (e.g., one call per week). Therefore, the NCAA believed it necessary to not only refute this interpretation, but also to make it clear to the membership how future infractions cases of this nature will be reviewed.

First and foremost, all telephone calls made to a prospect will be presumed to be a countable telephone contact. Therefore,any call made after the permissible call(s) is presumably a violation. To avoid potential issues in this area, the NCAA is now requiring that coaches keep contemporaneous documentation (e.g., phone logs/records) that indicate why the additional calls were necessary and NOT a violation (e.g., dropped call immediately returned). No longer will retroactive notes be sufficient for substantiating the occurrence of calls beyond the number permitted by NCAA legislation.

So what does this mean for you? Essentially, each time you have to place a call to a prospect AFTER you have already made the permissible telephone call(s) for that week/month, you will need to be sure to log the additional call on your phone logs and include an explanation as to why the call was made and why it was permissible. The best example is that of a dropped call. If you call a prospect for your one permissible call that week, and the call is dropped, you must: a) return the call IMMEDIATELY, and b) log the additional call, along with a note indicating that the return call was necessary because the first call was dropped. Therefore, if we ever have to compare your phone logs with your actual phone company records, we will have timely notes taken by you that explain the additional call.

I do not think that this will require much additional work on your part, since I am hopeful each of you is completing your phone logs "as you go", anyway. But we do ask that you take the necessary steps to protect yourselves and your program from future questioning within the realm of telephone calls.

Please let me know if you have any questions regarding these expectations.

Thanks,
Amy

Coaches,

Just passing on to you further information just released by the NCAA regarding the issue I explained last week. Please let me know if you have any questions. Much of this information is reiterating what I have already passed on to you, but there is some new information, particularly in the last paragraph about videoconferencing.

As before, let us know if you have any questions about this information.

Thanks,
Amy

Educational Column -- Issues Related to Telephone Calls (I)Date Issued: Aug 05, 2008
Type: Ed. Column
Item Ref: 1

Interpretation:
NCAA Division I institutions should note that pursuant to NCAA Bylaw 13.1.3.1, telephone calls to prospective student-athletes are limited generally to one call per week. In accordance with Bylaw 13.1.3.1.6, once the limit on permissible calls has been reached, an institution is prohibited from initiating another call during that same time period, regardless of whether direct conversation occurs during the additional call. Therefore, once a coach has made the permissible number of calls to a prospective student-athlete during a particular time period, the coach is not permitted to leave a voice message or have direct communication with the prospective student-athlete regardless of the length of the message or conversation.
Further, institutions should note that in determining whether a telephone call is countable, the institution must consider the content of the call and not necessarily the duration of the call, as the legislation does not specify a duration at which a call is considered countable. For example, if a coach calls a prospective student-athlete and is told the prospective student-athlete is unavailable, the call is not countable provided the coach ends the conversation without discussion of recruitment. However, if a coach calls a prospective student-athlete and is told the prospective student-athlete is unavailable, but the coach leaves a message regarding the merits of the program, the call is countable as recruitment has occurred regardless of the length of the call. Further, the use of automated or prerecorded voice messaging services by institutions is considered a countable call. Therefore, if a coach uses an automated or prerecorded voice messaging service to call prospective student-athletes and the voice messaging service leaves a message for a prospective student-athlete, the call is countable.
Additionally, when a telephone call is dropped (e.g., wireless service is lost), a second call initiated by the institution to the prospective student-athlete is presumed to be in violation of NCAA legislation. However, if an institution has contemporaneous documentation that the additional call was a continuation of the original call, the institution would not be required to self-report a violation. Institutions should assess whether the call was dropped inadvertently and/or for reasons beyond control of the institution and/or prospective student-athletes. For example, there is a difference between the prospective student-athlete ending the call because it was an inconvenient time and the coach's mobile phone dropping the call when driving through a tunnel. The institution has the burden of demonstrating that a second call that is a continuation of a dropped call should not be a violation by maintaining contemporaneous documentation.
Finally, Bylaw 13.02.14 specifies that videoconferencing and the use of videophones are considered telephone calls. Pursuant to Bylaw 13.1.3.2.2, if a prospective student-athlete initiates and pays the expenses of a telephone call (or videoconference), the call is not considered a countable telephone call. However, if an

institution's coach conducts a videoconference with a prospective student-athlete at the prospective student-athlete's high school and the prospective student-athlete uses the high school videoconference equipment at no cost, even if the prospective student-athlete initiates the call to the coach from the high school, the videoconference is considered a countable telephone call because the prospective student-athlete is not paying for the expense of the videoconference.
[References: NCAA Bylaws 13.02.14 (telephone calls), 13.1.3.1 (time period for telephone calls - general rule), 13.1.3.1.6 (application of telephone call limitations) and 13.1.3.2.2 (telephone calls initiated by prospective student-athlete at prospective student-athlete's expense); and a staff interpretation (2/6/91, Item Ref. f)]

>>> Amy Herman 7/30/2008 11:09 AM >>>

Coaches,

We have received information from the NCAA, of which you all must be aware, regarding its stance on the enforcement of telephone call legislation.

In light of the recent NCAA violation cases at the University of Oklahoma and Indiana University involving excessive phone calls to prospects, the NCAA has released a formal statement clarifying its stance on the enforcement of telephone call legislation. For purposes of managing these two, and other similar, infractions cases, the NCAA enforcement staff established a “three-minute rule” by which to determine if a phone call would be considered a “countable” call toward NCAA telephone call limitations. The NCAA, in its latest statement, has indicated that this approach was taken in order to manage cases that involved voluminous calls in a fair and reasonable manner, since there was no contemporaneous documentation that could assist them through the process.

When word of this “3-minute rule” became public, some institutions incorrectly assumed that calls under 3 minutes in length were not countable calls toward the NCAA limitations on telephone calls (e.g., one call per week). Therefore, the NCAA believed it necessary to not only refute this interpretation, but also to make it clear to the membership how future infractions cases of this nature will be reviewed.

First and foremost, all telephone calls made to a prospect will be presumed to be a countable telephone contact. Therefore,any call made after the permissible call(s) is presumably a violation. To avoid potential issues in this area, the NCAA is now requiring that coaches keep contemporaneous documentation (e.g., phone logs/records) that indicate why the additional calls were necessary and NOT a violation (e.g., dropped call immediately returned). No longer will retroactive notes be sufficient for substantiating the occurrence of calls beyond the number permitted by NCAA legislation.

So what does this mean for you? Essentially, each time you have to place a call to a prospect AFTER you have already made the permissible telephone call(s) for that week/month, you will need to be sure to log the additional call on your phone logs and include an explanation as to why the call was made and why it was permissible. The best example is that of a dropped call. If you call a prospect for your one permissible call that week, and the call is dropped, you must: a) return the call IMMEDIATELY, and b) log the additional call, along with a note indicating that the return call was necessary because the first call was dropped. Therefore, if we ever have to compare your phone logs with your actual phone company records, we will have timely notes taken by you that explain the additional call.

I do not think that this will require much additional work on your part, since I am hopeful each of you is completing your phone logs "as you go", anyway. But we do ask that you take the necessary steps to protect yourselves and your program from future questioning within the realm of telephone calls.

Please let me know if you have any questions regarding these expectations.

Thanks,
Amy

Subject: Volunteer Coaches Attending On-Campus Sporting Events

Attach: TEXT.htm

Coaches,

Please be aware that NCAA legislation (11.01.5) precludes institutions from providing volunteer coaches with complimentary admissions to games in sports other than their own. Therefore, it is not permissible, for example, to provide a volunteer coach in an Olympic sport with a complimentary admission for a football game, even if that volunteer is involved in on-campus recruiting activities with prospects (e.g., official visits).

If a volunteer coach is involved in recruiting activities with prospects on-campus and wishes to attend a game with that prospect, the volunteer coach will have to personally purchase a ticket to the game.

It's a lousy rule. I agree. But, unfortunately, "it is what it is".

Thanks,
Amy

Subject: Athletics Publications Educational Column

Attach: TEXT.htm; Athletics Publications.pdf

All,

Please see attached for an Educational Column that was released yesterday by the NCAA. I don't believe anything in here will be "new" to you, but thought it best to send it around for your review. As always, contact us with questions.

Thanks,
Amy

Title:

Recruiting -- Recruiting Materials -- Athletics Publications -- Provision of Athletics Publications to Prospective Student-Athletes (I)

Item Ref: 4

Date Published: September 19, 2011

Educational Column:

NCAA Division I institutions should note that an institution may produce a printed media guide; however, an institution shall not provide a printed media guide or any printed athletics publication not listed in NCAA Bylaw 13.4.1.1 to a prospective student-athlete, his or her parents or legal guardians, the prospective student-athlete's educational institution or any individual involved in the coaching of a prospective student-athlete. However, an institution may provide a media guide to a prospective student athlete via electronic mail, hyperlink or post the media guide on its website.

Further, it is not permissible to make a printed media guide or any other printed athletics publication not listed in Bylaw 13.4.1.1 available free of charge to a prospective student-athlete, his or her parents or legal guardians, the prospective student-athlete's educational institution or any individual involved in the coaching of a prospective student-athlete, even if such publications are available to other members or the general public free of charge. Finally, an institution may not create a printed portfolio of information (e.g., pictures) to be used in the recruiting process.

The following questions and answers are designed to assist the Division I membership with the application of this legislation. Please note that when a prospective student-athlete is referenced it also includes his or her parents or legal guardians, the prospective student-athlete's educational institution or any individual involved in the coaching of a prospective student-athlete.

Question No. 1: May an institution produce more than one media guide?

Answer: No. Institutions may have only one official media guide per sport; that being the publication that is provided to the media and related to the institution's sports program.

Question No. 2: If an institution produces a printed media guide, do the color, size and page restrictions apply?

Answer: Yes. A printed media guide remains limited to only one color of print inside the cover, a size not in excess of 8 ½ by 11 inches and a length of 208 pages. Any supplemental information (e.g., historical information, records) related to the media guide may be posted on the institution's website, printed in black and white and provided to the media.

Question No. 3: May an institution produce additional athletics publications (e.g., spring football prospectus, yearbook) and provide them to prospective student-athletes?

Answer: If an institution produces an additional athletics publication pursuant to Bylaw 13.4.1.3, posts the publication on the institution's website and it was not created for recruiting purposes, it may be sent to a prospective student-athlete via electronic mail as an attachment or a hyperlink. Further, such information may be printed on plain white paper with black ink and provided to a prospective student-athlete as an attachment to general correspondence, via facsimile or during a permissible on- or off-campus contact.

Question No. 4: If an institution produces a printed media guide, does the electronic version that is provided to prospective student-athletes have to be an exact reproduction of the printed media guide?

Answer: Yes. The electronic version of an institution's printed media guide must be an exact reproduction of the printed media guide.

Question No. 5: If an institution only produces an electronic media guide, do the color, size and page restrictions apply?

Answer: No, the color, size and page restrictions are not applicable if an institution only produces an electronic media guide.

Question No. 6: May an institution provide a printed media guide that is not created for recruiting purposes to a prospective student-athlete?

Answer: Regardless of whether a printed media guide is created for recruiting purposes, it is not permissible to provide it to a prospective student-athlete. It is also not permissible to print an electronic version of a media guide and provide it to a prospective student-athlete regardless of whether it is created for recruiting purposes.

Question No. 7: If an institution contracts with a third party to produce its printed media guides, is it permissible for a prospective student-athlete to receive a printed media guide from the third party free of charge?

Answer: No. The third party is acting on behalf of the institution to produce the printed media guide; therefore, it is not permissible for a prospective student-athlete to receive a printed media guide from the third party free of charge.

Question No. 8: If an institution sells its printed media guides to the general public (e.g., at the institution's bookstore), is it permissible for a prospective student-athlete to purchase a copy of the printed media guide?

Answer: Yes. Provided the media guide is purchased in the same manner and at the same cost as is available to the general public, it is permissible for a prospective student-athlete to purchase a printed media guide from the institution.

Notice about Educational Columns: Educational columns and hot topics are intended to assist the membership with the correct application of legislation and/or interpretations by providing clarifications, reminders and examples. They are based on legislation and official and staff interpretations applicable at the time of publication. Therefore, educational columns and hot topics are binding to the extent that the legislation and interpretations on which they are based remain applicable. Educational columns are posted on a regular basis to address a variety of issues and hot topics are posted as necessary in order to address timely issues.

---

All,

See attached for the agenda, and accompanying brief notes, that were discussed at the Head Coaches' meeting on Tuesday morning. We wanted all of you to have the opportunity to review this and discuss the topics with your head coaches who were in attendance at the meeting. Please let us know if you have any questions about this information.

Thanks,
Amy

Head Coaches' Meeting Agenda
(2011-2012 Academic Year, #2)
Tuesday, September 20, 2011

1) Official Visit Flight Times (48-hour Limit and Paying for Return Flight) (Amy)

If you are booking flights for prospects, both legs should be booked within ~51 hours of each other to stay within the 48-hour rule for length of visits. If a prospect wishes to stay in Chapel Hill for personal reasons after the official visit, we are NOT ABLE to pay for his/her return trip home. We would then only be able to pay for the first leg. In addition, we can have no further contact with the prospect after the 48 hours is over. Contact the Compliance Office prior to making this type of arrangement.

The Official Visit Approval Form has been edited to require coaches to provide copies of flight itineraries for prospects.

2) Recruits on Campus Visits (e.g., contact with boosters, former student-athletes) (Amy)

It is not permissible for prospects to have contact with boosters or former student-athletes when they are on campus for official or unofficial visits. Since they are on our campus, we are responsible for keeping prospects away from these individuals. Please take necessary steps to do so.

3) Tracking Student-Athlete Participation in ALL Contests (Susan/Lance)

Coaching staffs should be tracking individual student-athlete participation on a game-by-game basis in ACS. These records must be maintained throughout the season and will be monitored for completion on a regular basis. Instructions for tracking in ACS are attached.

To Track S-A Participation in ACS

1. Log-In to ACS using this link
    a. https://incontrol.acsathletics.com/Login.aspx

2. Select the 'Team Manager' tab and then click on Competition Schedule in the sub-menu that appears.

3. The approved schedule will appear for your sport with a list of each event. Following the completion of a competition, click the 'Not Submitted' link in the Participation Log Status column.
    a. Note that this link will only be available after the date of the contest passes.

4. The following screen then displays each student-athlete on your roster with the option to check either 'Yes' for participating in the game or 'No' if they did not participate.
    a. The list of student-athletes for a particular game will reflect the roster as it stood at the time of the contest.

5. If the event is more than one date or more than one contest, you must update their participation for each date or each contest. Click the "Continue to Next" box right above the roster on the left in order to advance to the next date or contest and repeat step #4 above.

6. Once you've made the changes necessary for that specific competition, you may click either the 'Save and Return' button or the 'Save and Submit to Compliance' button, as you choose.

7. If you want to mass update all the student-athletes on your roster, you may check the 'Participated in Event' checkbox in the upper right under the Mass Update Participation Log field and then click 'Update Values'. Once the values are updated, you must then click a Save button in order for the information to be retained.

Subject: Re: Financial Aid Estimate

Attach: TEXT.htm

Tom:

Thank you for this work ~ I am sure that it will be most helpful to all those involved with this process, especially to our coaches, financial aid staff, and prospective student-athletes.

Also, thank you Coach Mock and Sara Koenig for your efforts with this ~ much appreciated.

Take care, and have a good weekend.

Larry Gallo, Jr.

>>> Tom Timmermans 9/23/2011 2:02 PM >>>
Coaches,

In the past, if you wanted to find out if a PSA qualified for institutional financial aid you had to go through Jackie Copeland. Well, no longer!

The office of Scholarships and Student Aid (Jackie's office) has an online calculator, and with some information from the PSA and his/her parents, you can get an estimate in minutes.

All you have to do is:

1. Send the attached form to the PSA to gather the necessary information.

2. Once you receive the completed form from the PSA, go to the online calculator at https://npc.collegeboard.org/student/app/unc and follow the instructions.

Props go out to C.D Mock and Sara Koenig for putting together the PSA information form and Jackie Copeland for providing all of these estimates in the past. Thanks!

Let me know if you have any questions,

Subject: Expenses for Recruiting

Attach: TEXT.htm

Coaches,

See below for an Ed Column that was released yesterday by the NCAA. It's pretty self-explanatory, but the bottom line is that our coaches should never receive funding from an outside entity to cover recruiting expenses. For example, it is not permissible for a recruiting service, club team coach, or event operator to pay expenses for our coaches to attend an event for recruiting purposes. Expenses for recruiting must always be covered by the institution.

Please let us know if you have any questions about this.

Thanks,
Amy

Educational Column
Expenses from a Recruiting Service of Event Operator (I/II/III)Date Published: October 6, 2011
Item Ref: a

Educational Column:
NCAA member institutions should note that all funds for the recruitment of prospective student-athletes shall be deposited directly with the member institution, which shall be exclusively and entirely responsible for the manner in which such funds are expended. Therefore, it is not permissible for any outside organization or individual (e.g., recruiting or scouting service, event operator) to provide institutional coaching staff members with expenses (e.g., travel, lodging) to attend any event for recruiting purposes. Such expenses are considered funds donated for recruiting purposes and such funds must be deposited directly with the member institution, as opposed to being provided directly to an institutional coaching staff member(s). Further, any individual or organization that provides funds directly to the athletics department would be considered a representative of athletics interests and subject to all legislation applicable to that status (e.g., contact, telephone and evaluation restrictions).
[References: NCAA Division I Bylaws 13.1.2.4 (other restrictions, athletics representatives) and 13.14.4 (slush funds), Division II Bylaw 13.1.2.3 (other restrictions), Division III Bylaws 13.02.11 (representative of athletics interests) and 13.01.4 (recruiting by representatives of athletics interests), Divisions I and II Bylaws 13.02.14 (representatives of athletics interests) and 13.14.4 (slush funds), Divisions I, II and III Bylaw 13.14.1 (institutional control)]

Subject: Fwd: Ram Rules: PLEASE READ - "Friend" UNC Compliance!

Attach: TEXT.htm; IMAGE.gif; IMAGE.aspx_ID=0

Coaches,

Below is an email that went out to all student-athletes through ACS this morning. If you are concerned that your student-athletes might not read it, please take the time to follow-up with them in whatever manner you believe they will respond. The request we make is very simple. They simply need to "friend" Varsi Mon on Facebook, at the address listed in the email.

I've given them a deadline of next Wednesday. Please help us to get this taken care of.

Thanks,
Amy

Hi! This is Amy in the UNC Compliance Office. We hope you're wrapping up a great week of classes and are excited about the weekend!

As you know, the Department of Athletics has a Social Network Monitoring Policy (attached for your reference). Through this policy, we require that sport staff members regularly monitor the social networking sites of our student-athletes. One of the ways we are going to be doing this is through a central Facebook and Twitter page that will assist us electronically.

In order to do this, however, we must require that each of you "friend" the following Facebook page. The web address to do so is:

http://www.facebook.com/people/Varsi-Mon/100003018361696 (http://links.onmarketer-428.com/LinkClick.ashx/gkb25th24izu3pj67lgautsepe/2zpe3z4s7jqevcpdmnt7bb5hge)

For those of you that have Facebook accounts, we ask that each of you go to this link and click on "Add Friend" in the top right corner. That's all you have to do - we'll take it from there!

PLEASE COMPLETE THIS TASK NO LATER THAN WEDNESDAY, OCTOBER 12TH.

Thanks for your assistance with this. Your coaches are aware that this is taking place, and they will be in touch with you should you fail to "friend" this site by next Wednesday. Feel free to contact us with any questions or concerns.

Have a great weekend!

Amy Herman

Subject: Submission of Facility Use Forms

Attach: TEXT.htm; UNC Facilities Use Policy (July, 2011).docx

---

All,

Late last month, each of you received a memo and a binder in campus mail from Willie Scroggs that detailed our new Facility Use Policy (attached for your reference). In the letter, you were requested to maintain the binder and make sure that all former student-athletes or non-enrolled student-athletes signed/completed the enclosed forms in the following manner:

1) Appendix D: Signed once per academic year by each individual who utilizes the facility
2) Appendix E: Recorded use for each and every instance of facility use

In an attempt to make monitoring of these forms as easy as possible, we will proceed with the following plan:

1) All "Appendix D" documents should be forwarded to me upon their completion. Copies should be maintained on-file in the facility, as well. Since these must only be completed once each year, I believe it is easiest to just submit them as they are completed. If you have any on-file to-date, please go ahead and forward them to me through campus mail (being sure to keep copies for yourself).

2) Maintenance of Appendix E will obviously be an ongoing process. Therefore, we will monitoring of it in the same manner we currently handle other compliance documentation. At the end of each calendar month, the prior month's Appendix E should be submitted to me through campus mail, with copies kept on-file in the facility. If the facility was not used by any non-student-athletes (including former student-athletes) during the preceding month, the facility supervisor should send me an email indicating that no Appendix E will be turned in for that month.

Please let me know if you have any questions. We appreciate your assistance with this important monitoring process.

Thanks,
Amy

UNC Athletics Department Facilities Use Policy

This UNC Athletics Department Facilities Use Policy ("Policy") governs the policies, procedures and requirements of the Department of Athletics ("Department") of the University of North Carolina at Chapel Hill ("UNC") for the use of facilities under the control of the Department.

This policy applies to all indoor and outdoor athletic facilities controlled by the Department including, but not limited to: Kenan Stadium, Dean E. Smith Center, Koury Natatorium, Carmichael Arena, Boshamer Stadium, Eddie Smith Field House, Cone-Kenfield Tennis Center, Finley Golf Course, Chapman Golf Center, Henry Stadium, Anderson Softball Stadium, Fetzer Field, Belk Track, McCaskill Soccer Center, Finley Athletic Fields, Hamrick Cross Country Course, University Lake Boat House, any and all indoor meeting spaces within any of the above listed facilities, as well as the surrounding areas (excluding parking lots and decks).

The scheduling of Department facilities shall be administered by the designees of the Director of Athletics. Priority is given to UNC intercollegiate programs for facility use. Intercollegiate programs need to provide schedules for practice and meeting times to the Department as far in advance as possible. All requests for the use of Department facilities need to be written and, if approved, will be posted by a designee of the Director of Athletics on the "Athletic Facility Schedule" for confirmation.

Recognized UNC groups and Non-UNC groups must submit a request for facility use in writing, using the form attached to this Policy as **Appendix B**. This request will be administered by the appropriate facility designee. Conditions for use will be detailed, including costs associated with the use (e.g. facility use fee, expenses, etc.). These expenses and conditions for approved use are subject to compliance with all UNC, State and NCAA regulations and policies.

Facility use by outside groups is subject to availability and the adherence to this Policy. At least one facility staff person may be required to be on-site during facility usage. Additional set-up items must be approved by the Department. When using the designated facility, the group members are only authorized to enter the approved areas of the facility. Any unauthorized access to areas not specified in the contract without permission may result in additional fees and forfeiture of future rights to use the facilities. Please visit www.dps.unc.edu/Parking/parkingnav.cfm for visitor parking information.

Camps, Clinics and Individual Lessons

Camps, clinics and/or private lessons held in or on Department facilities must be approved by the appropriate Department Senior Staff member, scheduled through Department Facility Use Policy and subject to the following conditions:

- Compliance with all policies of the UNC and the NCAA
- Sports camps are charged $2 per camper per day, plus any camp related expenses

- Clinics, with revenue going back to the applicable UNC sport program, are charged any expenses incurred outside their normal program operation
- Private lessons are charged a percentage of the fee charged to cover facility use

Failure to comply with these required conditions could result in the loss of the right to host future camps, clinics, or private lessons at Department facilities.

Use of Sports Medicine Facilities and Athletic Trainers

- Non-UNC enrolled athletes may not utilize current Athletic Training equipment or personnel without the prior approval of the Director or Associate Director of Sports Medicine or appropriate designee.
- UNC Sports Medicine may require a document to be signed by non-UNC enrolled athletes releasing UNC Sports Medicine from liability for First Aid related injuries caused during or after participation at a UNC Athletic Facility and treatment by a UNC Sports Medicine Staff member (**Appendix D**).
- Individuals undergoing rehabilitation care from a UNC Sports Medicine Staff member will be considered a Private Patient for billing purposes and will be responsible for all charges for treatment and supplies used in their care.

Use of Athletic Department Facilities by Non-Current Athletes

- A document must be signed annually by non-UNC enrolled athletes using any UNC Athletic controlled Weight Room, Sports Medicine Facility, Indoor or Outdoor Field or Court acknowledging their compliance with any and all UNC and NCAA laws, rules and regulations (**Appendix D**).
- A log must be signed prior to each use of these facilities with the appropriate Facility Supervisor in order to track the frequency of use of the Facility (**Appendix E**).
- The Department has the right to revoke the facility use privilege of anyone who does not comply or whose behavior is detrimental to the Department in the Department's sole discretion.

Terms and Provisions for Facility Use for UNC and Non-UNC Groups:

- **1. Fee and Charges:** The facility use rates for each facility controlled by the Department are described in **Appendix A**. In addition to the facility use fee, the group or individual using the Department facility ("Facility User") also will be required to pay any abnormal clean-up charges assessed after an event, the costs of any other maintenance or other services required to support that particular event, as well as the hourly or overtime rate (depending on the time of day of the event) of a Facility worker to be on site prior to, during and after an event. A detailed listing of all additional costs will be provided to each Facility User prior to the execution of the Facility Use Agreement.
- **2. Equipment & Special Requirements:** Certain events held in facilities may require additional tables, chairs, athletic equipment, and/or related special equipment. If not included in facility use rates above, in some instances the Department may have these

items available for use at an additional charge or items may be rented from an outside group with all costs to be borne by the Facility User.

- **3. Insurance & Liability:** Non-UNC affiliated Facility Users shall provide to UNC a certificate of liability insurance from a carrier acceptable to UNC, as evidence of insurance coverage for the use of the Facility and the event. This insurance shall be primary coverage, and will contain no terms allowing the insurer to be subrogated to the rights of any injured or damaged person or entity. Insurance shall be in the following minimum amounts (Combined Single Limit): $1,000,000.00 per occurrence and $2,000,000 annual aggregate. A waiver of liability must be agreed to by the Facility User.
- **4. Catering:** Any group wishing to retain catering services in Kenan Stadium or other Department facilities must use the Department's contracted caterer (absent an exception granted by the Department). This caterer is the only caterer approved to use the kitchen area in the Blue Zone. Please contact Tar Heel Athletic Hospitality (Lizzie Stewart 843-3058) or the current contracted caterer of the Department regarding catering. If the contracted caterer chooses not to provide catering for the event, the leasing party may contract for food and beverage service through another caterer. However, caterers other than the contracted caterer may not have access to the kitchen areas in the Blue Zone.
- **5. Event and Technical Services:** For events requiring technical services, the Department will charge a fee for video or P.A. set-up, background music, etc. Requests for these services should be made through your event coordinator after room use approval is received from Athletic Facility Management. Field lighting for night time events held in various facilities will not be provided unless approved prior to the event. An additional fee will be charged.
- **6. Security:** The type and degree of security required to support a Facility User's event (if any) will depend upon the facility and nature of the event. UNC Campus Police, when required, will be booked by a Facility Manager, or agent of. All expenses associated with the provision of security during events held in facilities will be borne by the Facility User.
- **7. Parking Regulations:** Facility User shall become aware of, and comply with, all UNC parking regulations and rules. Facility User and its guests shall be subject to those rules and regulations. No dedicated or reserved parking spaces are available to Facility User. Unless specifically written otherwise above, Facility User is not gaining limited or exclusive access to any parking lots or facilities of the UNC.
- **8. Procedure to Request Use of Facilities:** To reserve the facility use date of a Department facility, Facility Users should contact the designated Department contact for the appropriate facility and submit a written request using the Facility Request Form (**Appendix B**):
    - Once date is approved and confirmed, discussions will begin regarding room specific questions, set up arrangements, catering information, and to arrange for contract issuance and payment requirements.
    - Upon the Department's receipt and approval of a completed Facility Use Request Form (**Appendix B**), a Facility Use Agreement (**Appendix C**) will be forwarded to the Facility User for execution. Once the Department has received two copies of the Facility Use Agreement signed by the Facility User, the Department will sign the document and return a fully executed copy to the Facility User. Once the Facility Use Agreement is signed and submitted, Facility User may cancel its use

of the reserved facility, but may incur a cancellation charge as more specifically described in the Facility Use Agreement.
    - Facility User must also present a Certificate of Insurance to the appropriate Facility Manager prior to facility use. The terms of insurance coverage are stated in Item #3 above.
    - Department Staff are instructed to follow this process and use designated forms.
- Due to UNC Intercollegiate sports program usage of each venue and Department use, facility requests will not be reviewed any earlier than 6 months prior to requested date of use.
- This Policy is subject to change from time to time at the discretion of the Department.
- All matters not expressly herein provided for shall be in the discretion of the Department.

Disclaimer

The views and opinions of individuals or groups holding events at UNC Athletic Department Facilities do not necessarily state or reflect those of the University of North Carolina's Department of Athletics or their employees.

Appendix B

REQUEST FOR USE OF UNC ATHLETIC DEPARTMENT FACILITIES

All UNC Athletic Department events have priority and all other events are scheduled on a first-come, first-serve basis. Special arrangements such as table and chair set-up, must be coordinated with the appropriate Facility Manager at least one week prior to the event.

It is the responsibility of the organization reserving the Facility to ensure that all set-up arrangements are made.

Reservations must be made in advance by completing this form.

Today's date: _____ **Facility Requesting:**_____

Name: _____ **Phone #:**_____

Email: _____

Department/Organization:_____

Name of Event: _____

Date of Event: _____

Brief Description: _____

_____

_____

_____

Time of Event:_____

****

Please return this form, contract and the attached diagram (if applicable) to the appropriate Athletic Facility contact.

Appendix C

UNC Athletic Department Facility Use Agreement

The following conditions for use of UNC Athletic Department Facilities have been established and must be adhered to by the group or individual reserving the facility:

- Date and Time of Event
- Expenses, in addition to the Facility Fee, can include, but are not limited to, any additional clean-up charges assessed after an event, the costs of any other maintenance or other services required to support that particular event, as well as the hourly or overtime rate (depending on the time of day of the event) of a Facility worker to be on site prior to, during and after an event.
- No food is allowed in the Facility unless it is catered by the caterer currently under contract with the representative of UNC Athletics with a designated pick-up and clean-up time. If the contracted caterer does not cater the event another caterer may be used. Contact for catering information is through Tar Heel Athletic Hospitality.
- Proof of insurance and must be provided at least three (3) days prior to the event.
- Reservation must be made in advance by contacting the appropriate Facility Manager and completing the **Request for use form**.
- Special set-up arrangements must be made with the appropriate Facility Manager at least fourteen (14) days prior to the event.
- In the event of a cancellation or change, the appropriate Facility Manager must be contacted three (3) days in advance.
- Clean-up immediately following the event.
- Facility Users must comply with any/all UNC and NCAA laws, rules and regulations.
- Facility User releases and forever discharges UNC and the Department from any and all liability, claims, and demands of whatever kind of nature, either in law or in equity, which arise or may hereafter arise from or in connection with its use of the facility, including, without limitation, any liability or claim that the Facility User may have against any of these entities with respect to any personal injury, illness, death, property loss, or property damage that may result from its use of the facility.

- Facility User shall indemnify UNC against any and all liability, claims, and costs of whatsoever kind of nature, for injury to or death of any persons, for loss or damage to any property in connection with or in any way incident to or arising out of this agreement, resulting in whole, or in part from the acts or omissions of the Facility User.

Appendix D

The University of North Carolina at Chapel Hill (UNC) Department of Athletics Facility Use Form for Outside Individuals (Including Former Student-Athletes)

- Individuals (including former UNC student-athletes) who are employed as or serve as liaisons between agents, runners, or financial advisors, or whose employment is in any way related to representation of players, are not permitted to use facilities.

- Individuals (including former UNC student-athletes) may not provide material benefits of any kind (e.g., meals, lodging, transportation, clothing, jewelry, training expenses, etc.) directly to any current student-athlete, even former teammates, without the express written consent of the UNC Compliance staff.

- Should an individual wish to provide any benefits to any current UNC student-athlete, he/she must, in advance, request permission from the UNC Compliance staff.

- Failure to abide by these regulations may jeopardize the eligibility of current UNC student-athletes. Violations of this policy will be dealt with severely and could result in the disassociation from the UNC Department of Athletics.

- If I become injured while I am in an athletics facility and UNC Sports Medicine Staff are available for first aid care, I will waive my liability for their acts of first aid. It is my expressed intent that this release and hold harmless agreement shall bind the members of my family and spouse, if I am alive, and my heirs, assigns and personal representative, if I am deceased, and shall be deemed as a RELEASE, WAIVE, DISCHARGE, and CONVENTION TO SUE the above named RELEASEES. I further agree that this Waiver of Liability and Hold Harmless Agreement shall be constructed in accordance with the laws of the State of North Carolina.

- UNC Sports Medicine offers medical services for the recovery from sports injuries and illnesses. Former student-athletes seeking such care will need to follow the procedures to set up a private patient account with UNC Sports Medicine. Campus Health Service will generate charges for this care. Medical liability will be established as the individual becomes a patient in the Campus Health System and will be governed by the laws of the state of North Carolina.

I have read, understand and will comply with the above conditions established for Facility Use by the UNC Department of Athletics.

Subject: NLI Signing Tutorial

Attach: TEXT.htm; IMAGE.png

Coaches,

The NCAA has released a NLI Signing Tutorial which can be found at http://www.ncaa.org/wps/wcm/connect/nli/nli/signing+tutorial/index.html. The tutorial explains everything you have always wanted to know about the NLI and what the signing of the NLI exactly means for both the PSA and institution. So if a PSA ever asks, please direct him/her to the tutorial.

Let me know if you have any questions,

Tom

To: Peal, Susan
Subject: NLI Update - Signing Tutorial

Conference Administrators: Please forward to your member institutions.

The Signing Tutorial has been added to the NLI website: www.national-letter.org . Make sure your coaches and prospective student-athletes check this out. The Signing Tutorial is an audio-visual feature that takes the PSA step-by-step through the NLI Provisions and Signing Page.

Thank you!
Susan

Subject: Fall Break Expenses

Attach: TEXT.htm

Coaches,

Better late than never with this reminder...

For those teams required to remain on campus for in-season (i.e., 20-hour week) practice or competition during Fall Break, we are permitted to provide expenses to your student-athletes for room, board, transportation, and entertainment.

Room and Board
It is permissible to provide either an actual meal or the per diem for that meal for up to three meals per day. Additionally, to assist with maintaining proper nutrition during this period, it is also permissible for you to provide an additional meal to your student-athletes during fall break (Thursday through Sunday). However, you may ONLY provide a meal in this scenario - it is not permissible for you to provide per diem for that additional meal.

It is also permissible to provide expenses for housing to student-athletes during Fall Break. For those students who stay at their parent's home during break, it is not permissible to provide housing expenses. However, it remains permissible to provide meals to such students.

Transportation
We may, of course, provide student-athletes with actual transportation expenses for travel from campus to competition sites and back to campus. If a student-athlete travels to the event site from a site other than campus, we may provide expenses equaling the cost of travel from campus to the event site and back. The student-athlete must pay any additional costs associated with his/her altered trip.

Entertainment
Finally, we may pay the ACTUAL costs, but may NOT provide cash, for reasonable entertainment during the course of Fall Break. The entertainment must be within a 30-mile radius from campus, unless it is in conjunction with a contest.

As a reminder, it is only permissible for us to provide these Fall Break expenses if the student-athletes are "in-season" in their 20-hour playing season, and are required to remain on-campus during the break for practice and/or competition. Programs in their declared "off-season" (8-hour weeks) are NOT permitted to provide ANY expenses to their student-athletes during Fall Break.

Fall Break officially began at 5 p.m. on Wednesday, October 19th. If you have any questions, please let us know.

Thanks,
Amy

>>> Jennifer Condaras <jcondaras@bigeast.org> 10/24/2011 8:45 AM >>>

The baseball team practiced yesterday afternoon for three hours. Prior to practicing, the coaches instructed the student-athletes to remove the tarps and prepare the field for practice. It took the student-athletes an hour to get the field ready.

How many hours of countable athletically related activities did the baseball student-athletes participate in yesterday?

A. 3 hours
B. 4 hours
C. All practices count as 1 hour
D. Practice is not considered a countable athletically related activity

The answer is B. NCAA Staff Interpretation- 10/20/11- Student-Athlete Performing Required Work other than Regular Employment (I)- states that any work performed by a student-athlete (e.g., field or facility preparation for practice or competition) that is required, supervised or monitored by a coaching staff member (including strength and conditioning coaches) or noncoaching staff member with sports specific responsibilities, other than regular employment in accordance with NCAA employment legislation, is a countable athletically related activity.

Subject: Updated Appendix D and E for Facility Use Policy

Attach: TEXT.htm; Revised Appendix D and E.pdf; UNC Facilities Use Policy (July, 2011).docx

---

All,

I have started receiving some forms pursuant to the email copied below. Through that process, I have discovered an oversight in the development of the forms that makes tracking quite difficult - we failed to put "Sport" and "Facility" lines on the documents!

I have edited the forms and am attaching the revised versions to this email in PDF format. I am also attaching the complete (corrected) policy as a Word document. Please start using the new forms immediately.

As a reminder, the staff member responsible for maintaining and collecting the Appendices should sign and date the Appendix D's before sending them to my office. If they're not signed when I receive them, I'll have to send them back to you!

Please let us know if you have any questions.

Thanks,
Amy

>>> Amy Herman 10/7/2011 11:33 AM >>>

All,

Late last month, each of you received a memo and a binder in campus mail from Willie Scroggs that detailed our new Facility Use Policy (attached for your reference). In the letter, you were requested to maintain the binder and make sure that all former student-athletes or non-enrolled student-athletes signed/completed the enclosed forms in the following manner:

1) Appendix D: Signed once per academic year by each individual who utilizes the facility
2) Appendix E: Recorded use for each and every instance of facility use

In an attempt to make monitoring of these forms as easy as possible, we will proceed with the following plan:

1) All "Appendix D" documents should be forwarded to me upon their completion. Copies should be maintained on-file in the facility, as well. Since these must only be completed once each year, I believe it is easiest to just submit them as they are completed. If you have any on-file to-date, please go ahead and forward them to me through campus mail (being sure to keep copies for yourself).

2) Maintenance of Appendix E will obviously be an ongoing process. Therefore, we will monitoring of it in the same manner we currently handle other compliance documentation. At the end of each calendar month, the prior month's Appendix E should be submitted to me through campus mail, with copies kept on-file in the facility. If the facility was not used by any non-student-athletes (including former student-athletes) during the preceding month, the facility supervisor should send me an email indicating that no Appendix E will be turned in for that month.

Please let me know if you have any questions. We appreciate your assistance with this important monitoring process.

Thanks,
Amy

Appendix D

The University of North Carolina at Chapel Hill (UNC) Department of Athletics Facility Use Form for Outside Individuals (Including Former Student-Athletes)

- Individuals (including former UNC student-athletes) who are employed as or serve as liaisons between agents, runners, or financial advisors, or whose employment is in any way related to representation of players, are not permitted to use facilities.

- Individuals (including former UNC student-athletes) may not provide material benefits of any kind (e.g., meals, lodging, transportation, clothing, jewelry, training expenses, etc.) directly to any current student-athlete, even former teammates, without the express written consent of the UNC Compliance staff.

- Should an individual wish to provide any benefits to any current UNC student-athlete, he/she must, in advance, request permission from the UNC Compliance staff.

- Failure to abide by these regulations may jeopardize the eligibility of current UNC student-athletes. Violations of this policy will be dealt with severely and could result in the disassociation from the UNC Department of Athletics.

- If I become injured while I am in an athletics facility and UNC Sports Medicine Staff are available for first aid care, I will waive my liability for their acts of first aid. It is my expressed intent that this release and hold harmless agreement shall bind the members of my family and spouse, if I am alive, and my heirs, assigns and personal representative, if I am deceased, and shall be deemed as a RELEASE, WAIVE, DISCHARGE, and CONVENTION TO SUE the above named RELEASEES. I further agree that this Waiver of Liability and Hold Harmless Agreement shall be constructed in accordance with the laws of the State of North Carolina.

- UNC Sports Medicine offers medical services for the recovery from sports injuries and illnesses. Former student-athletes seeking such care will need to follow the procedures to set up a private patient account with UNC Sports Medicine. Campus Health Service will generate charges for this care. Medical liability will be established as the individual becomes a patient in the Campus Health System and will be governed by the laws of the state of North Carolina.

I have read, understand and will comply with the above conditions established for Facility Use by the UNC Department of Athletics.

UNC Athletics Department Facilities Use Policy

This UNC Athletics Department Facilities Use Policy ("Policy") governs the policies, procedures and requirements of the Department of Athletics ("Department") of the University of North Carolina at Chapel Hill ("UNC") for the use of facilities under the control of the Department.

This policy applies to all indoor and outdoor athletic facilities controlled by the Department including, but not limited to: Kenan Stadium, Dean E. Smith Center, Koury Natatorium, Carmichael Arena, Boshamer Stadium, Eddie Smith Field House, Cone-Kenfield Tennis Center, Finley Golf Course, Chapman Golf Center, Henry Stadium, Anderson Softball Stadium, Fetzer Field, Belk Track, McCaskill Soccer Center, Finley Athletic Fields, Hamrick Cross Country Course, University Lake Boat House, any and all indoor meeting spaces within any of the above listed facilities, as well as the surrounding areas (excluding parking lots and decks).

The scheduling of Department facilities shall be administered by the designees of the Director of Athletics. Priority is given to UNC intercollegiate programs for facility use. Intercollegiate programs need to provide schedules for practice and meeting times to the Department as far in advance as possible. All requests for the use of Department facilities need to be written and, if approved, will be posted by a designee of the Director of Athletics on the "Athletic Facility Schedule" for confirmation.

Recognized UNC groups and Non-UNC groups must submit a request for facility use in writing, using the form attached to this Policy as **Appendix B**. This request will be administered by the appropriate facility designee. Conditions for use will be detailed, including costs associated with the use (e.g. facility use fee, expenses, etc.). These expenses and conditions for approved use are subject to compliance with all UNC, State and NCAA regulations and policies.

Facility use by outside groups is subject to availability and the adherence to this Policy. At least one facility staff person may be required to be on-site during facility usage. Additional set-up items must be approved by the Department. When using the designated facility, the group members are only authorized to enter the approved areas of the facility. Any unauthorized access to areas not specified in the contract without permission may result in additional fees and forfeiture of future rights to use the facilities. Please visit www.dps.unc.edu/Parking/parkingnav.cfm for visitor parking information.

Camps, Clinics and Individual Lessons

Camps, clinics and/or private lessons held in or on Department facilities must be approved by the appropriate Department Senior Staff member, scheduled through Department Facility Use Policy and subject to the following conditions:

- Compliance with all policies of the UNC and the NCAA
- Sports camps are charged $2 per camper per day, plus any camp related expenses

- Clinics, with revenue going back to the applicable UNC sport program, are charged any expenses incurred outside their normal program operation
- Private lessons are charged a percentage of the fee charged to cover facility use

Failure to comply with these required conditions could result in the loss of the right to host future camps, clinics, or private lessons at Department facilities.

Use of Sports Medicine Facilities and Athletic Trainers

- Non-UNC enrolled athletes may not utilize current Athletic Training equipment or personnel without the prior approval of the Director or Associate Director of Sports Medicine or appropriate designee.
- UNC Sports Medicine may require a document to be signed by non-UNC enrolled athletes releasing UNC Sports Medicine from liability for First Aid related injuries caused during or after participation at a UNC Athletic Facility and treatment by a UNC Sports Medicine Staff member (**Appendix D**).
- Individuals undergoing rehabilitation care from a UNC Sports Medicine Staff member will be considered a Private Patient for billing purposes and will be responsible for all charges for treatment and supplies used in their care.

Use of Athletic Department Facilities by Non-Current Athletes

- A document must be signed annually by non-UNC enrolled athletes using any UNC Athletic controlled Weight Room, Sports Medicine Facility, Indoor or Outdoor Field or Court acknowledging their compliance with any and all UNC and NCAA laws, rules and regulations (**Appendix D**).
- A log must be signed prior to each use of these facilities with the appropriate Facility Supervisor in order to track the frequency of use of the Facility (**Appendix E**).
- The Department has the right to revoke the facility use privilege of anyone who does not comply or whose behavior is detrimental to the Department in the Department's sole discretion.

Terms and Provisions for Facility Use for UNC and Non-UNC Groups:

- **1. Fee and Charges:** The facility use rates for each facility controlled by the Department are described in **Appendix A**. In addition to the facility use fee, the group or individual using the Department facility ("Facility User") also will be required to pay any abnormal clean-up charges assessed after an event, the costs of any other maintenance or other services required to support that particular event, as well as the hourly or overtime rate (depending on the time of day of the event) of a Facility worker to be on site prior to, during and after an event. A detailed listing of all additional costs will be provided to each Facility User prior to the execution of the Facility Use Agreement.
- **2. Equipment & Special Requirements:** Certain events held in facilities may require additional tables, chairs, athletic equipment, and/or related special equipment. If not included in facility use rates above, in some instances the Department may have these

items available for use at an additional charge or items may be rented from an outside group with all costs to be borne by the Facility User.

- **3. Insurance & Liability:** Non-UNC affiliated Facility Users shall provide to UNC a certificate of liability insurance from a carrier acceptable to UNC, as evidence of insurance coverage for the use of the Facility and the event. This insurance shall be primary coverage, and will contain no terms allowing the insurer to be subrogated to the rights of any injured or damaged person or entity. Insurance shall be in the following minimum amounts (Combined Single Limit): $1,000,000.00 per occurrence and $2,000,000 annual aggregate. A waiver of liability must be agreed to by the Facility User.
- **4. Catering:** Any group wishing to retain catering services in Kenan Stadium or other Department facilities must use the Department's contracted caterer (absent an exception granted by the Department). This caterer is the only caterer approved to use the kitchen area in the Blue Zone. Please contact Tar Heel Athletic Hospitality (Lizzie Stewart 843-3058) or the current contracted caterer of the Department regarding catering. If the contracted caterer chooses not to provide catering for the event, the leasing party may contract for food and beverage service through another caterer. However, caterers other than the contracted caterer may not have access to the kitchen areas in the Blue Zone.
- **5. Event and Technical Services:** For events requiring technical services, the Department will charge a fee for video or P.A. set-up, background music, etc. Requests for these services should be made through your event coordinator after room use approval is received from Athletic Facility Management. Field lighting for night time events held in various facilities will not be provided unless approved prior to the event. An additional fee will be charged.
- **6. Security:** The type and degree of security required to support a Facility User's event (if any) will depend upon the facility and nature of the event. UNC Campus Police, when required, will be booked by a Facility Manager, or agent of. All expenses associated with the provision of security during events held in facilities will be borne by the Facility User.
- **7. Parking Regulations:** Facility User shall become aware of, and comply with, all UNC parking regulations and rules. Facility User and its guests shall be subject to those rules and regulations. No dedicated or reserved parking spaces are available to Facility User. Unless specifically written otherwise above, Facility User is not gaining limited or exclusive access to any parking lots or facilities of the UNC.
- **8. Procedure to Request Use of Facilities:** To reserve the facility use date of a Department facility, Facility Users should contact the designated Department contact for the appropriate facility and submit a written request using the Facility Request Form (**Appendix B**):
    - Once date is approved and confirmed, discussions will begin regarding room specific questions, set up arrangements, catering information, and to arrange for contract issuance and payment requirements.
    - Upon the Department's receipt and approval of a completed Facility Use Request Form (**Appendix B**), a Facility Use Agreement (**Appendix C**) will be forwarded to the Facility User for execution. Once the Department has received two copies of the Facility Use Agreement signed by the Facility User, the Department will sign the document and return a fully executed copy to the Facility User. Once the Facility Use Agreement is signed and submitted, Facility User may cancel its use

of the reserved facility, but may incur a cancellation charge as more specifically described in the Facility Use Agreement.
    - Facility User must also present a Certificate of Insurance to the appropriate Facility Manager prior to facility use. The terms of insurance coverage are stated in Item #3 above.
    - Department Staff are instructed to follow this process and use designated forms.
- Due to UNC Intercollegiate sports program usage of each venue and Department use, facility requests will not be reviewed any earlier than 6 months prior to requested date of use.
- This Policy is subject to change from time to time at the discretion of the Department.
- All matters not expressly herein provided for shall be in the discretion of the Department.

Appendix B

REQUEST FOR USE OF UNC ATHLETIC DEPARTMENT FACILITIES

All UNC Athletic Department events have priority and all other events are scheduled on a first-come, first-serve basis. Special arrangements such as table and chair set-up, must be coordinated with the appropriate Facility Manager at least one week prior to the event.

It is the responsibility of the organization reserving the Facility to ensure that all set-up arrangements are made.

Reservations must be made in advance by completing this form.

Today's date: _____ **Facility Requesting:**_____

****

Please return this form, contract and the attached diagram (if applicable) to the appropriate Athletic Facility contact.

Appendix C

UNC Athletic Department Facility Use Agreement

The following conditions for use of UNC Athletic Department Facilities have been established and must be adhered to by the group or individual reserving the facility:

- Date and Time of Event
- Expenses, in addition to the Facility Fee, can include, but are not limited to, any additional clean-up charges assessed after an event, the costs of any other maintenance or other services required to support that particular event, as well as the hourly or overtime rate (depending on the time of day of the event) of a Facility worker to be on site prior to, during and after an event.
- No food is allowed in the Facility unless it is catered by the caterer currently under contract with the representative of UNC Athletics with a designated pick-up and clean-up time. If the contracted caterer does not cater the event another caterer may be used. Contact for catering information is through Tar Heel Athletic Hospitality.
- Proof of insurance and must be provided at least three (3) days prior to the event.
- Reservation must be made in advance by contacting the appropriate Facility Manager and completing the **Request for use form**.
- Special set-up arrangements must be made with the appropriate Facility Manager at least fourteen (14) days prior to the event.
- In the event of a cancellation or change, the appropriate Facility Manager must be contacted three (3) days in advance.
- Clean-up immediately following the event.
- Facility Users must comply with any/all UNC and NCAA laws, rules and regulations.
- Facility User releases and forever discharges UNC and the Department from any and all liability, claims, and demands of whatever kind of nature, either in law or in equity, which arise or may hereafter arise from or in connection with its use of the facility, including, without limitation, any liability or claim that the Facility User may have against any of these entities with respect to any personal injury, illness, death, property loss, or property damage that may result from its use of the facility.

- Facility User shall indemnify UNC against any and all liability, claims, and costs of whatsoever kind of nature, for injury to or death of any persons, for loss or damage to any property in connection with or in any way incident to or arising out of this agreement, resulting in whole, or in part from the acts or omissions of the Facility User.

Appendix D

The University of North Carolina at Chapel Hill (UNC) Department of Athletics Facility Use Form for Outside Individuals (Including Former Student-Athletes)

- Individuals (including former UNC student-athletes) who are employed as or serve as liaisons between agents, runners, or financial advisors, or whose employment is in any way related to representation of players, are not permitted to use facilities.

- Individuals (including former UNC student-athletes) may not provide material benefits of any kind (e.g., meals, lodging, transportation, clothing, jewelry, training expenses, etc.) directly to any current student-athlete, even former teammates, without the express written consent of the UNC Compliance staff.

- Should an individual wish to provide any benefits to any current UNC student-athlete, he/she must, in advance, request permission from the UNC Compliance staff.

- Failure to abide by these regulations may jeopardize the eligibility of current UNC student-athletes. Violations of this policy will be dealt with severely and could result in the disassociation from the UNC Department of Athletics.

- If I become injured while I am in an athletics facility and UNC Sports Medicine Staff are available for first aid care, I will waive my liability for their acts of first aid. It is my expressed intent that this release and hold harmless agreement shall bind the members of my family and spouse, if I am alive, and my heirs, assigns and personal representative, if I am deceased, and shall be deemed as a RELEASE, WAIVE, DISCHARGE, and CONVENTION TO SUE the above named RELEASEES. I further agree that this Waiver of Liability and Hold Harmless Agreement shall be constructed in accordance with the laws of the State of North Carolina.

- UNC Sports Medicine offers medical services for the recovery from sports injuries and illnesses. Former student-athletes seeking such care will need to follow the procedures to set up a private patient account with UNC Sports Medicine. Campus Health Service will generate charges for this care. Medical liability will be established as the individual becomes a patient in the Campus Health System and will be governed by the laws of the state of North Carolina.

I have read, understand and will comply with the above conditions established for Facility Use by the UNC Department of Athletics.

Subject: Quick Hitter - Officials for Practice

Attach: TEXT.htm; IMAGE.png

Coaches and Staff,

See below from the ACC. I feel like this is pretty obvious, since this would clearly be an on-court/field activity, but a reminder never hurts!

Thanks,
Amy

>>> "Babcock, Lindsey" <lbabcock@theacc.org> 10/26/2011 4:15 PM >>>

Noncoaching Staff Members Officiating in Practice
The NCAA clarified repeatedly that noncoaching staff members are not permitted to do any ON-COURT or ON-FIELD activities. Officiating during practice is an on-court activity. Therefore, a noncoaching staff member (e.g., DOBO, Admin Asst.) would not be permitted to officiate during practice. It□s been made very simple that these individuals may not do anything on the court or field.

Subject: 1.18.12 Head Coaches' Meeting Notes

Attach: TEXT.htm; 1.18.2012, Meeting #5.docx

All,

Please see attached for a summary of compliance topics reviewed at the January 18th Head Coaches Meeting.

There are two things, specifically, that I would like to mention regarding these notes:

1) Please read #3 carefully, as it reflects a change in the reviewing of off-campus recruiting expense reports. Effective immediately, all contacts and evaluations must be logged into ACS before we (the Compliance Staff) will be able to approve expense reports associated with off-campus travel.

2) I understand there was fairly lengthy discussion regarding the topic of contact surrounding prospects' competition. Specifically concerning to the coaches were situations in which teams of prospects "stop by" campus en route to competition. Since they have "reported on call" for competition at this point, NCAA regulations prevent us from having contact with them on these sorts of visits.

Should such situations arise, we suggest the following approach:

Should an institutional staff member (coach, administrative assistant, etc.) receive a phone call from, or be approached on-campus by, a team in-transit to competition, it is critical that the individual make very clear the NCAA regulations on the issue. If the team wishes to have a tour of campus, they should be directed to the Admissions Office. Unfortunately, it would not be permissible for sport-specific staff members to provide either a campus tour or an athletics facility tour. Once these regulations have been explained, the staff member should cease all contact with the prospects.

I hope this clarifies the issues in question, but please contact us if you have more specific questions.

Thanks,
Amy

Head Coaches' Meeting Agenda
(2011-2012 Academic Year, #5)

Wednesday, January 18, 2012

1) Legislation Update re: Grant-In-Aid Changes (Tom)

--There will be an override vote held in February regarding multi-year grants
--Legislation that would have exempted institutional aid from counting toward team limits (in combination with athletics aid) and the additional $2,000 "Miscellaneous Expense Allowance" is being reconsidered. Alternative proposal will be presented in April. Legislation is suspended, so we're back to all institutional aid counting if the s-a receives any GIA, and the $2,000 "Miscellaneous Expense Allowance" cannot be offered until further notice. We have to honor agreements for early signing period signees.
--Amy will send out emails with other legislative actions soon

2) NLI Signing Day – February 1 (Tom)

--Field Hockey, Football, Soccer, Track
--January 30 – February 2: Dead Period
--Unlimited Phone Calls (sport-specific)
--Text messaging can begin THE DAY AFTER the PSA signs (e.g., February 2nd)

3) Off-Campus Recruiting Expense Reports (Lance)

--As a result of recommendations made by the ACC during our Compliance Review in the fall, the Compliance staff will now be reviewing all off-campus recruiting expense reports
--<u>All contacts and evaluations must be logged into ACS before associated expense reports can be approved by our staff</u>; if we receive an expense report that is not logged in ACS, we will contact you and remind you to do so

4) Rules Education on Contact with Prospects Surrounding Competition (Lance)

--Bylaws 13.1.6.2 and 13.1.6.2.2
--"Contact" below includes in-person, passing of notes, verbally relaying information through a third party, and placing telephone calls to the prospect
--No contact with PSA on day or days of competition prior to the contest (In MBB, no contact with PSA, relatives, or legal guardians during entire day (before, during, AND after the contest)
--No contact once PSA reports on-call with his/her team (<u>including to travel to away contests</u>), even if such travel or reporting occurs days before the contest
--This precludes coaches from having any contact with teams who might stop by UNC on their way to a tournament elsewhere to practice, tour campus, etc. Should a team stop by unannounced, it would be permissible to direct them to the Admissions Office for a campus tour. No sport-specific employee (e.g., coach, Director of Operations) should provide any sort of campus or facility tour under these circumstances.
--If PSA is participating in a tournament on consecutive days, no contact until after final competition on the final day of the tournament
--If there is an "off" day during a tournament, can contact PSA after he/she has been released on the day before the "off" day
--If a team is on an extended road trip, can have contact with PSA after the first competition and before travel for the next competition commences
--Remember that the word "contact" above applies to telephone calls from a coach to a PSA, too!
--However, in sports other than basketball, if a PSA calls a coach while the PSA is on-call for competition, he/she can accept the call

--Coaches cannot send electronic correspondence to a PSA when the PSA is on-call and at the competition site; however, if the PSA is on-call but NOT at the competition site, coaches can send electronic correspondence

--Bottom Line: If you are unsure about permissible contact surrounding competition, call a Compliance staff member prior to the contact!

5) **Varsity Monitor Update – Social Media Monitoring Policy (Lance and Beth)**

--Coaches should still peruse sites, especially Twitter, but formal reporting not necessary with Varsity Monitor in place

Head Coaches' Meeting Agenda
(2011-2012 Academic Year, #6)

Tuesday, February 14, 2012

1) **Recruiting Policy (Amy)**
   --Expectations of coaches outlined on the "Guidelines for Athletics Department Staff" page
   --Link to University Alcohol Policy: http://www.unc.edu/campus/policies/studentalcohol.html
   --Department of Athletics' Policy requires that administrators and head coaches require that the entertainment of prospects not involve the use of alcohol
   --Coaches should review the policy with entire team at the beginning of the recruiting season

2) **Proposed Changes in Violation Structure and Penalty Matrix (Amy)**
   --Handout (Charts)

3) **Rules Education Position Update (Amy)**
   --Natalie Lutz has been hired to this full-time position.

4) **ACS Training (Lance)**
   --ACS Staff will be on-campus on February 23rd and 24th
   --Contact Lance to schedule a time for advanced training in any area of ACS

University of North Carolina at Chapel Hill
Department of Athletics

Recruiting Handbook

Effective 12/1/04, Revised 2/1/09

The University of North Carolina Athletics Mission Statement

The University of North Carolina at Chapel Hill Department of Athletics' mission is to sponsor a broad-based athletics program that provides educational and athletics opportunities to allow young men and women to grow, develop, and serve the interests of the University by complementing and enhancing its diversity and quality of life. Coaches, as educators, are fundamental to this process. In keeping with the University's efforts to offer programs of regional and national acclaim, the Department's athletics programs strive for competitive excellence within the Atlantic Coast Conference (ACC) and with other similar institutions. Through its athletics programs, the University seeks to unite students, faculty, staff, and alumni in a common and shared experience. The Department seeks to contribute to the diversity of the University by offering opportunities for enhanced racial, ethnic, cultural, and geographic representation.

The University of North Carolina Recruiting Philosophy

The University of North Carolina at Chapel Hill (UNC) is committed to providing prospective student-athletes meaningful opportunities to make informed decisions whether to pursue their academic and athletics futures at UNC. Recruiting visits bring prospective student-athletes to campus as part of their decision-making processes on where to enroll. These visits are to be a mutual exploration by prospective student-athletes and institutional officials, especially athletics personnel, regarding whether the institution and the prospective student-athletes are a good fit for each other. This philosophy is based on the concept that the prospective student-athletes are making decisions about where to pursue their academic and athletics futures, while, concurrently, the institution is evaluating prospective student-athletes' abilities to contribute to the University and athletics programs.

The primary consideration in selecting activities for these visits, therefore, should be to provide information that will assist prospective student-athletes and their families in making these decisions. Appropriate behavior is expected of all prospective student-athletes who visit the campus.

Athletics department personnel are expected to provide an educational experience in an environment that conforms to University and NCAA policies and missions. Student-athlete hosts are expected to adhere to these policies, as well as to provide all prospective student-athletes with safe and insightful student experiences at UNC. Finally, prospective student-athletes should behave in a manner consistent with the expectations of all UNC student-athletes, adhering to all ACC and NCAA regulations, as well as all State and federal laws.

Violations of the guidelines will be reported to the Director of Athletics. All suspected violations will be investigated thoroughly and dealt with seriously. Any infraction(s) found to be in violation of any of the guidelines will be reported to the Faculty Athletics Representative, Chancellor, ACC, and NCAA.

Development of Recruiting Policies

The Committee on Recruiting for the University of North Carolina at Chapel Hill began collecting information and meeting in early 2004. Through its diverse membership from both the Department of Athletics and the campus community, the committee gathered and reviewed information on all aspects of the University's on-campus recruiting processes. The Board of Trustees was also informed of the thorough review of the recruiting processes.

Information was obtained from the Committee, the Student-Athlete Advisory Committee, coaches groups, conversations with the ACC, and other universities. The Committee established a subcommittee to analyze the information collected.

The subcommittee developed this recruiting handbook that includes a recruiting philosophy statement, guidelines and concepts, and updated recruiting forms. It also establishes procedures for athletics administrators, head coaches, student hosts, and prospective student-athletes.

After consultation with faculty, student-athletes, and coaches regarding both the collection of receipts from student-athlete hosts and prospects (for student host money) as well as the establishment of a curfew/regulation of unstructured time, the subcommittee decided not to institute department-wide policies enacting these regulations. Instead, these decisions will be left to the discretion of each sport's head coach. The subcommittee believes the guidelines currently in place will create the "safe and insightful student experiences" the institution strives to provide to prospective student-athletes.

The handbook was reviewed by the Committee on Recruiting, the Faculty Committee on Athletics, and the Chancellor. The final copy will be on file with the Faculty Athletics Representative, the Chancellor, and the ACC office. It will also be distributed to head coaches, athletics administrators, and student hosts. In the event that changes to the recruiting policy are deemed necessary, the above individuals will be given the opportunity to comment on the proposed changes. Once changes are finalized, the Chancellor and Director of Athletics will formally approve the changes, and an approved version (along with the signatures of these two individuals) will be submitted to the ACC office.

GUIDELINES FOR ATHLETICS DEPARTMENT STAFF

The goal of campus recruiting visits is to provide prospective student-athletes with the opportunities to make informed decisions about their future academic and athletics careers at the collegiate level. These guidelines are intended to provide institutional staff members with the information necessary to provide these opportunities in a manner consistent with the regulations set forth by the NCAA.

Recruiting is a vital component for the success of our athletics program. Our goal is to attract not only great student-athletes, but also great people, who will enhance the overall University environment in a positive fashion. It is our responsibility to make sure all prospective student-athletes have positive and safe visits.

1. In preparation for an official visit, coaches will send a letter to prospective student-athletes, outlining expectations and describing available opportunities for the visit. If permitted by NCAA regulations, this information will also be provided to prospective student-athletes arranging unofficial visits to campus.
2. If air transportation is provided to prospective student-athletes to and from an official campus visit, the flights must be via a commercial airline at coach class airfare with no upgrades. Prospective student-athletes may be picked up at the airport by any member of the athletics department.
3. If prospective student-athletes drive to campus by personal or rental cars, mileage reimbursement may be provided at the rate used by UNC for institutional staff members. It is not permissible to cover the cost of prospective student-athletes' rental cars.
4. Student hosts must be either current student-athletes or students who are part of the institution's regular program for providing campus tours to prospective students. Student host regulations will be discussed at team eligibility meetings, and all student hosts will receive a copy of the recruiting handbook.
5. Head coaches (or their representatives) will meet with the student hosts and prospective student-athletes to set expectations for behavior and review the guidelines and forms. Head coaches will also provide the prospective student-athletes and hosts with visit itineraries that include contact information for necessary individuals (e.g., coaching/administrative staff, student-athletes).
6. Student hosts and prospective student-athletes must abide by all local, State, and federal laws, along with UNC, ACC, and NCAA regulations. Upon arrival, prospective student-athletes and their student hosts must sign the applicable forms (Guidelines for Prospective Student-Athletes, Student-Athlete Host Entertainment Form, Unofficial Visit Declaration) indicating that they will not engage in inappropriate behavior (e.g., drinking, use of drugs, gambling). By signing these forms, prospective student-athletes and student hosts will affirm their understanding of the guidelines. At the conclusion of an official visit, prospective student-athletes must sign a form (Prospect Official Visitation Form) affirming their visits' conformity to all UNC, ACC, and NCAA regulations.
7. When transporting prospective student-athletes around campus during official visits, coaches must use their personal vehicles or institutional vehicles generally used by personnel to transport prospective students on campus tours. Student hosts may also use their personal vehicles. Prospective student-athletes may not be provided with cars to use during their visit.
8. Prospective student-athletes (and prospective student-athletes' parents or legal guardians) must be housed either on campus with student hosts or in standard lodging. Those staying in dorms on unofficial visits must pay the $10 per night housing charge specified by UNC Housing. For those on official visits being housed in hotels, rooms may not be suites or include special accessories, such as Jacuzzis, unless those amenities are available to all patrons at that specific establishment. It is not permissible to decorate, in any degree, prospects' rooms of lodging, regardless of their location (e.g., hotel, dormitory, etc.).
9. The meals provided to prospective student-athletes and their parents or legal guardians on official visits should be comparable to those meals given to student-athletes during the academic year. Each day,

the institution may provide 3 meals and a reasonable snack (e.g., pizza, hamburger). On unofficial visits, meals cannot be purchased for prospective student-athletes or their parents or legal guardians.

10. Personalized recruiting aids (e.g., personalized jerseys, lockers, audio/video scoreboard presentations) and simulated game-day activities during prospective student-athletes' visits are prohibited. Prospective student-athletes may be present in the locker room before or after a competition. During the competition, however, prospective student-athletes must be seated in the regular seating areas. It is not permissible to publicize prospective student-athletes' visits in any way.
11. During campus visits, prospective student-athletes, student hosts, and coaches are prohibited from participating in activities involving the consumption of alcohol, drug use, or any violations of criminal law.
12. Gambling, of any type, during visits is prohibited.
13. Harassment, of any type, is impermissible. This includes, but is not limited to, racial, sexual, or religious harassment. Providing or purchasing sexual favors, purchasing or viewing pornography, or any other involvement with sexually-explicit material is inappropriate and strictly prohibited.
14. Campus visits should include meetings with Academic Support Program staff (e.g., team's academic counselor, Director of Student-Athlete Development), along with other campus personnel, if possible (e.g., meeting with faculty, attending class). At a minimum, the coach should review the academic packet, which is provided by the academic counselor, with the prospective student-athletes.
15. During official and unofficial visits, 3 complimentary admissions to campus athletics contests may be provided to prospective student-athletes and anyone accompanying them on the visit. The names of the prospective student-athletes and their relatives or friends must be placed on a pass list. Prospective student-athletes and their relatives or friends must sign the pass list and show identification to be admitted. No hard tickets may be issued.
16. Application of these guidelines will be monitored by the Compliance Office and designated coaches.

Your compliance with these guidelines is absolutely necessary and greatly appreciated. Appropriate disciplinary actions will be in accordance with University policy.

University Alcohol Policy

The University has a detailed policy concerning the use of alcohol by students. The following is a summary of the University Alcohol Policy. Students are responsible for knowing the full content of the policy. A complete copy of the policy may be obtained at http://www.unc.edu/campus/policies/studentalcohol.html or from the Student Affairs Office (966-4042).

Students under the age of 21 may not buy, possess, or consume alcoholic beverages. Students 21 and older may possess and consume alcohol in residence hall rooms, but may not sell or give alcohol to anyone under 21. Common source containers of alcohol (e.g., kegs) are not permitted on campus. Possession or consumption of alcohol is not permitted at any campus athletics event or performance or at any outdoor campus location. No student activities fees or other funds of a recognized student group may be used to buy alcohol.

If you are found to be in violation of the University Alcohol Policy you may:

- be referred for counseling, assessment, and/or alcohol education
- have your housing contract terminated
- be placed on housing contract probation
- receive a written reprimand
- be required to make restitution
- be referred to the Student Judicial System

As a member of the Community, you may:

- lose your driver's license
- be convicted of a felony or a misdemeanor
- obtain a criminal record, accrue fines, and possibly serve jail time

This is the University's Alcohol Policy. Both Student Hosts and Prospective Student-Athletes are required to abide by this policy.

Effective 12/1/04, Revised 2/1/09

Department of Athletics' Alcohol Policy

The Department of Athletics' policy regarding the use of alcohol at departmental events is as follows:

a. Alcohol may not be purchased or consumed during team travel.
b. Alcohol may not be served or consumed during team functions.
c. Alcohol may not be purchased by administrators or coaches for consumption by student-athletes.

Departmental events including prospective student-athletes and enrolled student-athletes may not involve the use of alcohol. In regard to prospective student-athletes, administrators and head coaches must require that the entertainment of prospective student-athletes not involve the use of alcohol. In regard to enrolled student-athletes, alcohol may not be served at gatherings held after athletics contests.

This is the Department of Athletics' Alcohol Policy. Head Coaches, Administrators, Student Hosts, and Prospective Student-Athletes are required to abide by this policy.

Effective 12/1/04, Revised 2/1/09

Key Points to Hosting a Recruit

1. When you know you are hosting a prospective student-athlete, plan ahead. Plan an itinerary with your coach and teammates. Make planning and hosting a team effort.
2. Establish a relationship with the prospective student-athlete based on trust and sincerity.
3. If you have a prior engagement (e.g., meeting with professor, study table) and it is not feasible for you to take your guest with you, you MUST make arrangements with a reliable teammate to stay with your guest for the time that you are away.
4. Treat the prospective student-athlete in the manner which typifies our athletics program. Give them a taste of the distinctive environment which makes UNC unique.
5. Be aware that your impression of the prospective student-athlete will be of interest to your coaches and teammates.
6. In the case of an EMERGENCY, notify the proper authorities immediately.
7. It is permissible for you to communicate with prospective student-athletes after they leave campus; however, it must be on your own initiative and cannot be at the direction of your coaching staff. Give the prospect your contact information (e.g., email address, instant messaging screen name) at the conclusion of the visit. Tell the prospect that he/she can contact you with any questions they may have after leaving campus.

Hosting Checklist

_____ Get as much information as possible from your coach about the prospective student-athlete.

_____ Have the prospective student-athlete complete the questionnaire.

_____ Check your schedule. Do you have any tests, projects, or homework assignments that you will need time to work on while the prospective student-athlete is visiting?

_____ Plan your hosting duties with teammates to allow for studying, if necessary.

_____ Determine the classes the prospective student-athlete will attend. Have him or her attend some classes in his or her potential major.

_____ Notify your dorm RA that you are having a guest (if applicable).

_____ Meet with your coach and the prospective student-athlete.

_____ Sign the Student-Athlete Host Entertainment Form.

_____ Get to know the prospective student-athlete. Find out his or her interests. What does he or she like to do with friends? Does he or she have any questions about UNC that you can answer?

THE UNIVERSITY OF NORTH CAROLINA

Unofficial Visit Declaration

We are pleased that you are visiting The University of North Carolina at Chapel Hill on an unofficial recruiting visit. The NCAA and the University have developed rules and regulations regarding unofficial visits. We have listed them below so that you may be aware of our policies.

1. You are permitted to visit our campus at your own expense an unlimited number of times, and these visits can occur at any point in your high school career.

2. UNC is not permitted to pay ANY expenses while you are visiting our campus. This includes transportation costs, housing, meal, or beverage expenses, and the cost of any entertainment. You are responsible for all of these expenses during your visit.

3. You may receive 3 complimentary admissions to a UNC athletics event. Admission must be through a pass list, as hard tickets will not be provided. These tickets can be used by you and anyone accompanying you on your visit.

4. If additional tickets are needed, you must purchase them in the same manner as any other member of the general public. UNC is not able to reserve additional tickets for prospects on an unofficial visit.

5. UNC can only transport you to view off-campus practice and competition sites in your sport, attend home athletics contests at a local facility, or view other institutional facilities within 30 miles of the campus. All other transportation is your responsibility.

6. UNC cannot provide you with parking privileges to utilize while attending a campus athletics event.

7. UNC cannot provide you with any gifts while you are on campus. This includes clothing, equipment, and UNC memorabilia. Game programs can be provided during an unofficial visit.

8. If you choose to stay in a UNC dorm during your visit, you are required to pay the regular institutional rate, which is $10 per night.

Please complete at the conclusion of the unofficial visit and submit to the Compliance Office:

Student Host Instructions (per NCAA Rules and Regulations):

These guidelines have been established to ensure that each prospect's visit to our campus is an enriching one. Serving as a student host is an important service to UNC and the Department of Athletics. Appropriate conduct is required of you by UNC, ACC, and NCAA standards:

1. You must be enrolled full-time at UNC.
2. You will be provided money with which to entertain only the prospect and his/her parents, legal guardians, or spouse. This money may not exceed $30/day, with an additional $15/day for each additional prospect that you entertain.
3. You may not give the prospect cash, nor may you use the entertainment funds to purchase or provide the prospect with alcohol, drugs, or gifts of value (e.g. souvenirs or clothing items).
4. You may not transport the prospect or anyone accompanying him/her more than 30 miles from campus.
5. No UNC institutional staff member or athletics booster may provide or arrange for you an automobile to use to transport the prospect or anyone accompanying him/her.
6. You should not allow the prospect to have a recruiting conversation, either on or off campus, with former student-athletes, alumni, or boosters of the athletics program. If an unplanned meeting occurs, only an exchange of greetings is permissible.
7. You may allow the prospect to participate in a workout or recreational activity during his/her visit, provided the activity is not organized or observed by members of the coaching staff and is not designed to test the athletics ability of the prospect.
8. You may receive a complimentary admission to a campus athletics event, provided you are accompanying a prospect to that event.
9. You may not allow the prospect to use alcohol or drugs during the visit. Underage drinking (below 21) is illegal in the State of North Carolina. In addition, you may not engage in any activity that violates criminal law.
10. The University of North Carolina at Chapel Hill will not tolerate harassment of any kind (e.g., racial, sexual, religious) by anyone associated with our athletics teams. You, as a student host, must be aware of the University's position on this type of activity and work to ensure that prospects you are hosting conduct themselves appropriately. Providing or purchasing sexual favors, purchasing or viewing pornography, or involving yourselves with any other sexually-explicit material is inappropriate and strictly prohibited.
11. You, along with prospects, must adhere to ACC and NCAA bylaws, as well as all State and federal laws, prohibiting gambling.

Your compliance with these guidelines is absolutely necessary and greatly appreciated. Failure to agree with and adhere to all guidelines may result in one or more of the following disciplinary actions: reprimand, probation, suspension, termination of grant-in-aid, cancellation of eligibility, or dismissal from the athletics program. You may also be subject to any penalties set forth by the University.

My signature below indicates that

- I have read and understand the above rules governing my role as a student host.
- I will use the $_____ provided me to host the prospect(s) named above in a manner consistent with the above regulations.
- I will return any unused funds to my head coach.

Arrival Date and Time ____/____/____ ____:____ AM/PM (circle one)

Departure Date and Time ____/____/____ ____:____ AM/PM (circle one)

We are pleased that you are visiting the University of North Carolina on an official recruiting visit. The NCAA and the University have developed rules and regulations regarding official visits. We have listed them below so that you may be aware of our policies.

1. You may take **no more than 5** expense-paid visits to Division I or II institutions, and only 1 of these may be taken to UNC.
2. The length of an official visit may not exceed 48 hours. This period begins when you first arrive on the UNC campus. If you remain at UNC after this time period has expired, you are responsible for any expenses associated with your return trip home.
3. UNC may pay round-trip expenses for you (e.g., mileage reimbursement, coach airfare). Unless your family or friends accompanied you in the same car, these individuals are responsible for their own travel expenses. No one associated with UNC may provide a car for your use during the official visit.
4. UNC may pay your actual costs for reasonable expenses (e.g. meals, lodging) incurred while traveling to and from campus on an official visit.
5. Entertainment may only be provided to you, your parents or guardians, and your spouse, and must occur within 30 miles of campus. Entertainment funds may not be used to purchase alcohol, drugs, or gifts of value (e.g. souvenirs or clothing).
6. You may not receive cash for entertainment purposes, nor may gifts, souvenirs, or athletics gear be given to you free of charge or at a reduced rate.
7. You, along with two people accompanying you, may receive complimentary admission, via a pass list, to a regular season campus athletics event, but such seating must be in the general seating area of the facility.
8. At no point is it permissible for you to have a recruiting conversation with former student-athletes, alumni, or boosters of the athletics program at UNC.
9. You may not participate in a physical workout or recreational activity that is organized or observed by any member(s) of UNC's coaching staff.
10. The use of alcohol or drugs during official visits is not allowed. Underage drinking (below 21) is illegal in the State of North Carolina. In addition, you may not engage in any activity that violates criminal law.
11. You must adhere to ACC and NCAA bylaws, as well as all State and federal laws, which prohibit gambling.
12. The University of North Carolina at Chapel Hill will not tolerate harassment of any kind (e.g., racial, sexual, religious) by anyone associated with our athletics teams. Student hosts are aware of the University's position on this type of activity, and work to ensure that the prospects they host conduct themselves appropriately. Providing or purchasing sexual favors, purchasing or viewing pornography, or involving yourself with any other sexually-explicit material is inappropriate and strictly prohibited.
13. If you have any concern about conduct during your visit, you are encouraged to talk to the head coach or an athletics administrator.

Your cooperation and adherence to these guidelines is absolutely necessary and greatly appreciated. Appropriate behavior is expected of our current student-athletes, as well. This is a great chance to experience the impressive opportunities available to student-athletes on the UNC campus. We hope you enjoy your visit!

To be signed by the prospective student-athlete and coach at the BEGINNING of the official visit:

- I have reviewed the above provisions and agree to abide by them on my official visit.

Prospect's Signature: _____ Date: _____

Administering Coach's Signature: _____ Date: _____

To be signed by the prospective student-athlete and coach at the CONCLUSION of the official visit:

- I affirm that I have conducted myself in accordance with the above guidelines for the duration of my official visit.

Effective 12/1/04, Revised 2/1/09

Prospect's Signature: _____ Date: _____

Administering Coach's Signature: _____ Date: _____

Dear

Congratulations on selecting the University of North Carolina at Chapel Hill as one of your official visits. You will be stepping onto 729 acres of one of America's most beautiful campuses and visiting one of the nation's top public universities (ranked 5th in the nation), as stated by U.S. News and World Report magazine's 2009 "America's Best Colleges" guide. UNC students have a long tradition of outstanding achievement in the classroom, on the playing field, and beyond.

UNC athletics is committed to providing educational and athletics opportunities that will allow our student-athletes to grow, develop, and continue to achieve. This visit is a mutual exploration. Along with allowing us to get to know you better, your visit will expose you to the exceptional opportunities available at UNC to develop academic scholarship, athletics excellence, leadership, and community service throughout your collegiate career.

We expect that your behavior during your visit will reflect the kind of behavior that we expect of all UNC student-athletes. We want you to have a wonderfully exciting and safe trip to our campus. Please take time to read all the information regarding your official visit and fill out the Prospective Student-Athlete Questionnaire available online at www.tarheelblue.com. This questionnaire will assist your host in planning your visit. In addition, the NCAA website (www.ncaa.org) might contain information that you will find useful throughout the recruiting process.

This is a great chance to understand the impressive opportunities available to student-athletes on the UNC campus. We hope you enjoy your visit!

Sincerely,

Proposed New Violation Structure

New Violation Structure:	**Level I**	**Level II**	**Level III**	**Level IV**
Definitions:	A Level I violation is a violation that seriously undermines or threatens the integrity of any of the NCAA enduring values [student-athlete (SA) success, the collegiate model, amateurism as a student model, competitive equity], including any violation that provides or is intended to provide a significant or extensive recruiting, competitive or other advantage, or significant or extensive impermissible benefit. Multiple Level II, III and/or IV violations may collectively be considered as a Level I violation. Individual conduct that is unethical may be classified as a Level I violation, even if the underlying institutional violations are not considered Level I.	A Level II violation is a violation that provides or is intended to provide a minimal to significant recruiting, competitive or other advantage; or includes a minimal to significant impermissible benefit; or involves a pattern of or systemic violations in a particular area. Multiple Level III and/or IV violations may collectively be considered as a Level II violation. Some limited individual conduct that is unethical or dishonest may be classified as a Level II violation, even if the underlying institutional violations are not considered Level II.	A Level III violation is a violation that is isolated or limited in nature; provides no more than a minimal recruiting, competitive or other advantage; and does not include more than a minimal impermissible benefit. Multiple Level IV violations may collectively be considered as a Level III violation.	A Level IV violation is a violation that is inadvertent and isolated; limited or technical in nature; results in a negligible, if any, recruiting, competitive or other advantage; or negligible, if any, impermissible benefit. Level IV violations will not impact eligibility.
Types of current violations that would be included in each category under the new structure:	Egregious major violations or cases. The "worst of the worst."	Significant violations or cases. Those that currently are borderline between secondary and major ("soft major/serious secondary").	Violations that provide some advantage or impermissible benefit that warrant staff review ("solid secondary" cases).	Minor or technical violations or cases. Those that do not result in any appreciable advantage and/or are not of national significance.
Types of violations that would be included in each category (not exclusive):	• Lack of institutional control (LOIC). • Significant failure to monitor (FTM) violations (e.g., intentional, negligent disregard). • Academic fraud. • Compromising an investigation and/or lying to investigators. • Other unethical-conduct violations. • Reckless indifference to or intentional conduct demonstrating lack of head coach control (current Bylaw 11.1.2.1). • "Buying players" and other "big money" violations. • Intentional violations or a blatant disregard for rules. • Other significant or extensive recruiting violations that provide, or were intended to provide, a significant or extensive advantage. • Significant extra benefits provided to enrolled student-athletes.	• Systemic violations that are not LOIC, intentional or negligent disregard or a significant FTM. • Intentional violations that do not rise to Level I. • Lack of head coach control that does not rise to a Level I threshold (current Bylaw 11.1.2.1). • Multiple recruiting violations (e.g., high volume of calls, violations related to the same prospect). • Violations that provide more than a minimal but less than an extensive/significant advantage or benefit.	• Inadvertent violations that are isolated or limited in nature. • Violations that result in no more than a minimal recruiting advantage (e.g., impermissible evaluations and recruiters). • Most extra benefit, financial aid, academic eligibility violations that are not extensive (e.g., loans, eligibility certification).	• Camp brochures. • Recruiting correspondence related to size, paper limitations. • Institutional promotional activities. • No IRL activation prior to official visit. • Other minor, paperwork and technical violations.

Proposed New Violation Structure

New Violation Structure (cont.):	**Level I**	**Level II**	**Level III**	**Level IV**
Examples of violations that could be included in each category (not exclusive):	• Institution is found to have lacked control of its athletics program. • Assistant coach arranged for tutor to write papers and provide answers to test questions for SAs in an English course. • Head coach arranged for booster to provide $25,000 and a job to prospective student-athlete's (PSA's) mother. • Women's soccer coach provides false and misleading information to investigators regarding involvement in an underlying secondary violation (only coach's violation is Level I; institution's violation is Level III). • Women's track coach permits two ineligible SAs to compete in multiple contests under the names of two eligible SAs who were not present at the events.	• Men's basketball coaches made 68 impermissible telephone calls and sent 42 impermissible text messages to 6 different PSAs over a 9-month period. • Football coaches had 3 impermissible contacts with a PSA, including one home visit during the dead period prior to the NLI signing date; provided PSA with impermissible transportation to make an unofficial visit; and provided $75 in impermissible benefits to PSA. • Assistant football coach knowingly attended a football camp at another institution outside of the two established 15-day periods. Assistant coach admitted to not only attending the camp, but doing so after he had been instructed not to attend. (Only the coach's conduct is Level II; the institutional violation is Level III.)	• Baseball SA competed in 3 contests prior to having his amateurism certified by the NCAA Eligibility Center. • Institution exceeded the permissible number of counters in women's volleyball by one during the 2009-10 academic year. • Assistant women's basketball coach telephoned a PSA prior to April of the PSA's junior year in high school. • Football program had personalized nameplates of PSAs hanging in locker room during PSA's official visit. • On multiple occasions, institution sent recruiting correspondence to PSAs prior to the permissible date.	• Institution used too big of an envelope to send recruiting correspondence to PSA. • SA's picture was not in camp counselor section of camp brochure. • Institution provided cream cheese with the bagels available to SAs.

New Violation Structure (cont.):	**Level I**	**Level II**	**Level III**	**Level IV**
Examples of actual major infractions cases and how they would be classified under the new structure:	• Violations involving 3 former athletics academic support services staff members involved in academic fraud with numerous SAs; impermissible benefits; lack of institutional control. • Ineligible competition; financial aid and extra benefits; impermissible telephone contact; recruiting inducements; unethical conduct; lack of institutional control. • Former head men's tennis coach provided more than $12,000 in impermissible financial aid to 5 men's tennis SAs over six years; impermissible loan; unethical conduct; improper certification; failure to monitor. • Unethical conduct by men's basketball coaching staff relating to academic fraud by providing substantial portions of course work for multiple SAs; providing false and misleading information; failure to monitor. • Impermissible phone calls and text messages; impermissible inducements; impermissible entertainment; impermissible recruiting of a PSA by a booster; unethical conduct; failure of the head coach to promote an atmosphere of compliance; failure to monitor.	• Extra benefits involving 201 SAs misusing the institution's textbook distribution program; failure to monitor. • Impermissible early transmission of recruiting materials (923 emails sent to 30 PSAs during a 1-year period). • Impermissible recruiting by a booster; extra benefits; failure to monitor. • High volume of impermissible telephone calls and text messages. • Exceeding football coaching staff limitations; playing and practice season violations; failure to monitor. • Over 7 years, 26 baseball SAs employed by the baseball program in the institution's work-study program received approximately $61,552 for work they did not perform; failure to monitor.	N/A	N/A

Proposed New Violation Structure

New Violation Structure (cont.):	**Level I**	**Level II**	**Level III**	**Level IV**
Processing:	COI panel – 6-7 (all voting members) • COI would consist of 18-24 individuals: 3-4 current or former presidents, vice-presidents or other senior institutional administrators; 3-4 faculty; 3-4 conference; 3-4 directors of athletics (ADs) or associate ADs (compliance); 3-4 former coaches; 3-4 public members with preference given to members of the judiciary. A minimum of 4-5 positions shall be allocated for women, and a minimum of 4-5 positions shall be allocated to ethnic minorities. At least one from each subgroup would be randomly selected to hear a case. • Chair (who is appointed by NCAA president) retains discretion to determine panel composition (expertise considerations), but assumption is panel selected randomly. • Each 6-7-person panel would have a vice-chair. Several individuals will be pre-identified as vice-chairs, and one vice-chair will be randomly selected for each panel. • Institution/involved individual could petition for hearing by an expanded COI panel consisting of 11 members (chair, 6-7-person panel selected to hear case and 3-4 other members) but only if the matter is of Association-wide import (matters of first impression, change from previous precedent, etc.). 11-person COI panel has discretion to grant or deny petition, or to expand panel size on its own initiative. • Hearings for Level I cases scheduled on a minimum of 10 occasions in a calendar year at national office.	COI panel – minimum of 3 (all voting members) • Members randomly chosen from pool of COI members. • Each 3-person panel would have a vice-chair. Several individuals will be pre-identified as vice-chairs, and one vice-chair will be randomly selected for each panel. • Cases may be reviewed via prehearing with a COI member to determine Level I or II processing. • Any Level II case may be reviewed on the written record at the request and agreement of the involved parties. • No expanded COI panel review available. • Hearings will be conducted via video-conference, unless an in-person hearing is requested, and will be presumed to be 4 hours or less. • Hearings for Level II cases scheduled each month. • Staff will provide NOA, which will include all evidence relied upon to support allegations, to institution and involved individuals, and will no longer produce a case summary. (Information contained in case summary would now be in NOA). Staff may produce a rebuttal brief to institution's/involved individual's response. • Time for institutions, and possibly involved individuals, if agreement, for submitting responses to NOA may be reduced from 90 to 60 days.	Staff • Staff determines violations and penalties. • Database available to membership identifies case precedent penalties.	Conference • Possible peer review. • Possible staff review on annual or quarterly basis.

Proposed New Violation Structure

New Violation Structure (cont.):	**Level I**	**Level II**	**Level III**	**Level IV**
Processing (cont):	• Full 18-24-member COI would meet at least once per year in person, with possible conference calls/videoconferences at other times, to discuss policy and procedural matters. • Cases may be reviewed via prehearing with a COI member to determine Level I or II processing. • Staff will provide Notice of Allegations (NOA), which will include all evidence relied upon to support allegations, to institution and involved individuals, and will no longer produce a case summary. (Information contained in case summary would now be in NOA). Staff may produce a rebuttal brief to institution's/involved individual's response. • Time for institutions, and possibly for involved individuals, if agreement, for submitting responses to NOA may be reduced from 90 to 60 days. • Staff/institutions/involved individuals will be required to submit allegations/responses online. • Hearing transcripts should be received by the COI within two weeks of the hearing. • Infractions report should be released to NCAA within four weeks after receiving hearing transcript. • Five or more media-savvy COI members pre-identified to hold press conferences, one randomly selected for each 6-7-person panel. • Accompanying recommendation is to increase the size of the COI staff.	• Institution has option of using "Rocket Docket" whereby responses are due within 30 days of receipt of NOA, and hearing will be conducted within 30 days of receipt of response. • Staff/institutions/involved individuals will be required to submit responses online. • Hearing transcript should be received by the COI within two weeks of the hearing. • Infractions report should be released to NCAA within four weeks after receiving transcript. • Five or more media-savvy COI members pre-identified to hold press conferences, one randomly selected for each 3-person panel. • Summary disposition (SD) process is available for Level II cases. SDs will be reviewed by a minimum 3-person COI panel. New SD process will be developed so that SD report can also serve as the infractions report. • For SDs in which there is disagreement on penalties, an expedited hearing will occur.		

New Violation Structure (cont.):	Level I	Level II	Level III	Level IV
Processing (con't):	• SD process is available; will be reviewed by a minimum 6-7person COI panel. New SD process will be developed so that SD report can also serve as the infractions report. • For SDs in which there is disagreement on penalties, an expedited hearing will occur.			

Appeal:	IAC
	• IAC currently consists of 5 members. IAC believes current structure can handle workload.
	• IAC workload will be monitored with option of moving to 10 individuals (two pools of 5).
	  ○ Chair (who is appointed by NCAA president) retains discretion to determine panel composition (expertise considerations), but assumption is panel selected randomly.
	  ○ Each 5-person panel would have a vice-chair.
	• Appeals will be considered via written submission, videoconference or in-person hearing.
	• Hearings are prescheduled.
	• (1) Pool of 4 or more individuals (e.g., FARs, public members with legal backgrounds, etc.) OR (2) designation of existing COI members to serve as NCAA membership advocates/representatives during appeals (similar to current COI appeal coordinators). These individuals will attend COI hearings and deliberations, but not participate. These positions will be staffed by COI staff (which needs to be expanded).
	• For in-person and videoconference hearings, transcripts should be received within two weeks of the hearing.
	• IAC report should be released to NCAA within four weeks after receiving transcript.
		IAC panel of 3
		• Chair (who is appointed by NCAA president) retains discretion to determine panel composition (expertise considerations), but assumption is panel selected randomly.
		• Each 3-person panel would have a vice-chair.
		• Appeals will be considered via written submission, videoconference or in-person hearing.
		• Pool of 4 or more individuals (e.g., FARs, public members with legal backgrounds, etc.) or designation of existing COI members to serve as NCAA membership advocates/ representatives during appeals (similar to current COI appeal coordinators). These individuals will attend COI hearings and possibly participate in COI deliberations.
		• For videoconference hearings, transcripts should be received within two weeks of the hearing.
		• IAC report should be released to NCAA within four weeks after receiving transcript.
			COI panel of 3
			• Appeal on written record only, after staff has reconsidered appropriateness of penalty.
				Conference
				• Appeal opportunity, if any, would be up to the conference.

Proposed Penalty Matrix
(WORKING DRAFT)
Version No. 3 (January 30, 2012)

Violation Level I	**Violation Level II**	**Competition Penalties: Postseason Ban *Competition penalties may be used singularly or in combination**		
Significant Aggravation		3(+) years		
Aggravation		2 to 3 years		
Standard		1 to 2 years		
Mitigation	Aggravation	0 to 1 year		
Significant Mitigation	Standard	0		
	Mitigation	0		
Violation Level I	**Violation Level II**	**Financial Penalties: Fine (Percent of total budget for sport program)**	**Financial Penalties: Negate revenue from sport program for years in which violations occurred**	**Financial Penalties: Reduce or eliminate NCAA monetary distribution for sports sponsorhip and/or grants-in-aid**
Significant Aggravation		3 to 5% (+)	Impose this penalty if greater than percent of budget fine.	Alternative financial penalty.
Aggravation		2 to 4%	Impose this penalty if greater than percent of budget fine.	Alternative financial penalty.
Standard		1 to 3%		Alternative financial penalty.
Mitigation	Aggravation	0 to 1%		Alternative financial penalty.
Significant Mitigation	Standard	0 to .5%		Alternative financial penalty.
	Mitigation	0 to .25%		Alternative financial penalty.
Violation Level I	**Violation Level II**	**Scholarship Reductions of Involved Sport(s) Program(s)**		
Significant Aggravation		37.5 to 50% (+)	(Reduction taken at first available opportunity.)	
Aggravation		25 to 37.5%		
Standard		12.5 to 25%		
Mitigation	Aggravation	0 to 12.5%		
Significant Mitigation	Standard	0 to 5%		
	Mitigation	0 to 2.5%		

Proposed Penalty Matrix

Subject: Working Outside Camps - Form Required!

Attach: TEXT.htm; Noninstitutional Privately Owned Camps and Clinics.pdf

---

Coaches,

This email applies to all sports other than Basketball and Football, as coaches/non-coaching staff members in those sports cannot work outside camps (with the sole exception of FB GA's).

For the rest of you, in order for UNC coaches and non-coaching staff members to work outside (non-UNC) camps, we have to be certain that these camps meet the various NCAA regulations in place for institutional camps (e.g., open to any and all entrants, no free or reduced admission to PSAs, etc.).

Regarding these requirements, the latest issue we've come across is situations in which the camp requires campers to obtain nominations from coaches, or otherwise appears to limit attendance based on the skill level of the camper. Just as we can't limit our UNC camps in this manner, neither can outside camps at which you wish to work. Per 13.4.3.1.2.1, if a camp is advertised or promoted toward a particular audience (e.g., elite camp), the advertisements or promotion of such camp must clearly indicate that the camp is open to any and all entrants (limited only by number, age, grade level, and/or gender).

While we have had a form in place to monitor this and all other outside camp requirements for several years, I wanted to be sure that all of you are aware of it and are pro-active in getting it completed PRIOR to working any outside camps. Failure to do so could result not only in a violation of institutional policies, but also in an NCAA violation, should the camp end up not meeting the various regulations in place.

Please see attached for this form. In order to assist us in monitoring the promotional materials associated with these camps, we have added a place for you to include the website link for the camp materials, If no such website advertisement exists, we ask that you submit to us a hard copy of the materials (e.g., camp brochure) along with the completed form.

Because there is really no other way for us to know if you are working outside camps, we must rely on you to be sure to take the steps necessary to complete these forms. Please let us know if you have any questions about this process.

Thanks,
Amy

Noninstitutional Privately Owned Camps/Clinics

In accordance with NCAA Bylaw 13.12.2.3.3, *Other Noninstitutional Privately Owned Camps/Clinics*, an institution's athletics department personnel may serve in any capacity (e.g., counselor, guest lecturer, consultant) in a noninstitutional, privately owned camp or clinic, provide the camp or clinic is operated in accordance with restrictions applicable to institutional camps. More specifically:

- An institution's basketball coaches and basketball-specific noncoaching staff members may not work outside camps, as they are limited to being employed only at their own institution's camps/clinics.
- In the sport of football, participation is limited to on-field Graduate Assistants (one camp each) during two periods of 15 consecutive days in the months of June and July or any calendar week that includes days of those months (as identified by football staff for institutional summer camps).
- The purpose of the camp or clinic must be designed to improve overall skills and general knowledge in the sport. The camp or clinic should include specialized instruction and may not be conducted as a tryout camp devoted primarily to agility, flexibility, speed and strength tests for prospects.
- The camp or clinic shall be open to any and all entrants (limited only by number and age). The camp or clinic may not select participants on an invitation-only basis or reserve spots for specific prospects.
- Promotional materials for the camp must indicate that the camp is open to any and all entrants.
- The camp or clinic shall not employ or give free or reduced admission privileges to any high-school, preparatory school or two-year college athletics award winner.
- A representative of an institution's athletics interests shall not pay a prospect's expenses to attend the sports camp or clinic.
- The camp or clinic shall not permit or arrange for a prospect to operate a concession to sell items related to or associated with the camp.
- Awards received from the camp or clinic must be included in the admission fees charged to the participants in the camp or clinic.
- No coach may serve (either on a salaried or a volunteer basis) in any capacity in a camp or clinic established, sponsored, or conducted by an individual or organization that provides recruiting or scouting services concerning prospects.

We, _____ (Athletics Department Staff Member) and

_____ (Camp/Clinic Representative), ensure that the

_____ (Camp/Clinic) is operated in accordance with NCAA Bylaw 13.13.2.3.3, *Other Noninstitutional Privately Owned Camps/Clinics*, as described above.

Subject: Signing Cell Phone Bills

Attach: TEXT.htm

Coaches and Sport-Specific Non-Coaching Staff,

Each month, you receive a copy of your cell phone bill through campus mail. As you know, these bills must be signed, dated, and returned promptly to Stephen Boyd in the Business Office. This applies to all coaches and staff members who have Departmentally-issued cell phones.

In response to a recommendation from our recent Compliance Review, we will be adding a statement to your cell phone bills that reads as follows:

"My signature below certifies that, to the best of my knowledge, all recruiting calls I made this month were permissible per NCAA regulations."

At the bottom of this stamped statement will be a signature/date line for you to complete. This will be the only location on the bill that you will need to sign and date before returning it to Stephen through campus mail.

Please let us know if you have any questions or concerns about this slight tweak in the processing of cell phone bills.

Thanks,
Amy

Subject: Award forms

Attach: TEXT.htm; IMAGE.jpg; IMAGE.bmp; UNC_Annual Participation Award.pdf; UNC_Special Event Participation.pdf; UNC_Championship Award.pdf; UNC_Special Achievement Award.pdf

---

Coaches,

Last fall, we as a compliance office underwent an ACC review. One of the recommendations from this review is to start tracking the awards given to student-athletes for participating in collegiate athletics. The NCAA has four different award categories. They are:

Annual Participation Award

Student-athletes can be given an award each year for participating in intercollegiate athletics. The values of UNC Monogram Awards, team-specific participation awards, and senior participation awards are combined to determine whether the limits (underclassmen: $225 Seniors: $425) have been met.
Complete this form at the end of your playing season.

Special Event Participation Award

Student-athletes who were eligible to participate in a special event (e.g., Conference championship contest or tournament, postseason NCAA championship contest or tournament, postseason bowl) may receive an award for their participation in such event.
Complete this form at the end of your playing season.

Championship Award

Student-athletes who were eligible to participate in the championship event may receive an award for winning an individual or team Conference (regular season or tournament) or National Championship.
Complete this form at the end of your playing season

Special Achievement Award

Awards may be provided each year to individual student-athletes and teams to recognize special achievements, honors, and distinctions. There are lots of different types of special achievement awards (e.g., team MVP, scholar-athlete, MIP).
Complete this form at the end of your playing season.

All forms must be completed at the end of your team's playing season and submitted to Tom Timmermans in the Compliance Office. Forms are required for all awards provided to student-athletes, beginning with the current (2011-2012) academic year.

All of the forms are attached but can also be found on the J drive (J -> Compliance -> Awards and Benefits).

Please don't hesitate to call or email with questions.

Thanks,
Tom

Carolina Athletics

Annual Participation Award

Coaches: Per NCAA Bylaw 16.1.4.1, student-athletes can be given an award each year for participating in intercollegiate athletics. The values of UNC Monogram Awards, team-specific participation awards, and senior participation awards are combined to determine whether the limits set forth below have been met. Please complete this form at the end of your playing season.

Sport: (Choose sport) Academic Year:

Monetary Limits

Underclassmen: $225 total Seniors: $425 total

Restrictions on Timing of Award

Student-athletes may receive annual participation awards once per year, per sport. Awards may not be provided to student-athletes prior to the day of the final home game of the regular season.

Values

A. MONOGRAM AWARDS

First Year Monogram Award	Fleece Jacket	$37.00
Second Year Monogram Award	Letter Jacket	$60.00
Third Year Monogram Award	Blanket	$65.00
Fourth Year Monogram Award	Ring	$109.00

B. GENERAL AWARDS (e.g., team photo)

Description of Item(s)	Value

C. SENIOR PARTICIPATION AWARDS

Awarded to seniors who have exhausted their eligibility (e.g., flowers, photos, jerseys, equipment)

Description of Item(s)	Value

Special Event Participation Award

Coaches: Per NCAA Bylaw 16.1.4.1, student-athletes who were eligible to participate in a special event may receive an award for their participation. Please select below the special event(s) in which your team participated and give a description and value of the awards provided to eligible student-athletes.

Sport: (Choose sport) Academic Year:

	Type of Award	Max. Value of Award	Permissible Awarding Agencies
☐	Participation in Conference championship contest or tournament.	$375*	- UNC - Management of event (may include Conference)
☐	Participation in postseason NCAA championship contest or tournament	$375 - UNC No limit - NCAA	- UNC - NCAA
☐	Participation in all-star game or postseason bowl	$400 - UNC $550 - Event	- UNC - Management of event
☐	Participation in other established meets, tournaments, and featured individual competition	$400*	- UNC - Management of event

Event name:

* The combined value of all awards received for participation in this type of event from UNC and the management of the event may not exceed this value.

Description of award(s)	Value

Recipient(s) (e.g., entire team, John Doe)

I understand the NCAA regulation set forth above (Bylaw 16.1.4.1) regarding the restrictions in place for special event participation awards. My signature certifies that, to the best of my knowledge, the information provided above regarding awards provided to my student-athletes is correct.

Carolina Athletics

Championship Award

Coaches: Congratulations on winning a Conference or National Championship! Per NCAA Bylaw 16.1.4.2, student-athletes who were eligible to participate in the championship event may receive an award for winning an individual or team Conference or National Championship. Please select below the championship that your team won and give a description and value of the awards provided to eligible student-athletes.

Sport: (Choose sport) Academic Year:

	Type of Award	Max. Value of Award	Permissible Awarding Agencies
☐	National Championship conducted by the NCAA	$415*	- UNC** - Conference**
☐	National Championship not conducted by NCAA	$415*	- UNC** - Conference**
☐	Conference Championship – regular season	$325*#	- UNC** - Conference**
☐	Conference Championship – postseason contest or tournament	$325*#	- UNC** - Conference**

* Each awarding agency may provide separate awards up to the maximum amount identified
# The combined value of both awards shall not exceed $325 if UNC wins the conference regular-season and postseason championships.
** Award may be provided by another organization recognized by UNC or Conference to act in its place.

Description of award(s)	Value

Recipient(s) (e.g., entire team, John Doe)

I understand the NCAA regulation set forth above (Bylaw 16.1.4.2) regarding the restrictions in place for championship awards. My signature certifies that, to the best of my knowledge, the information provided above regarding awards provided to my student-athletes is correct.

Prospective Student-Athlete Housing

To be completed by all incoming UNC student-athletes (Deadline: July 1st before initial year of enrollment)

Name: _____ Sport: _____

Cell: _____ E-mail: _____

Anticipated date of arrival in Chapel Hill: _____

Will you live anywhere else in the Chapel Hill area before moving in to your dorm room? ☐ Yes ☐ No

If no, please sign and submit the form. If yes, please complete the following:

Reason for early arrival: _____

Local address: _____

Rent: $ _____ ☐ per month ☐ per week ☐ per day

Will you have a roommate(s)? ☐ Yes ☐ No If yes, complete the below roommate information.

Roommate Name	Relationship *(e.g., UNC student-athlete, uncle)*	Phone Number

Did any UNC coach or staff member assist you in arranging this housing? ☐ Yes ☐ No

If yes, please explain: _____

Did any UNC student-athlete assist you in arranging this housing? ☐ Yes ☐ No

If yes, please explain: _____

Who else assisted you in arranging this housing? _____

My signature certifies that, to the best of my knowledge, the above information is accurate. If my housing plans change, I understand that I MUST notify the Compliance Office at (919) 962-6000 or compliance@uncaa.unc.edu.

ICE MILLER LLP
LEGAL COUNSEL

New Type of Violation Regarding PSA Summer Housing Found by Infractions Committee
Collegiate Sports Practice
October, 2011

The September 13, 2011, NCAA Division I Committee on Infractions Public Infractions Report regarding Boise State University noted several violations involving coaches who arranged free or reduced cost housing in the local community for prospective student-athletes ("PSAs") during the summer prior to their initial enrollment at Boise State. The Committee also cited Boise State for a lack of institutional control for, among other reasons, failing to implement and monitor policies and procedures to comply with NCAA rules about arranging housing for PSAs. Among other sanctions, the Committee imposed a scholarship reduction on the football program for three consecutive years. On September 27th, Boise State announced it would appeal the multi-year reduction in football scholarships, but not the other findings or penalties.

The PSAs' receipt of free or reduced cost housing clearly violated NCAA rules regarding offers and inducements set forth in Bylaws 13.2.1 and 13.2.1.1-(h). In prior infractions cases, the Committee has often highlighted this area as one the Committee expects schools to carefully monitor for compliance. However, in conjunction with an apparently new analysis of the bylaws governing this area which Boise State received from the NCAA Academic and Membership Affairs staff, the Committee also found a major violation when Boise State's coaches arranged local summer housing for PSAs even when the PSAs paid full and fair value for their expenses and documented their payments.

Specifically, in Finding B-2-b of the Report, the Committee stated the following:

> "The violations in the summer of 2009 occurred because of the coaches' involvement in the arrangements for housing. The committee noted that none of the prospective student-athletes were enrolled in an academic program during the summer of 2009 and, therefore, were not eligible to receive institutional housing. Under NCAA legislation, each such prospect would have been required to find alternative housing in the locale of the institution, which could include an apartment that would require signing a lease and providing a deposit, a hotel or potentially residing in a day-to-day extended-stay motel. All of these options would have resulted in a significantly higher cost to the prospect. It would have been permissible for a prospect to contact a student-athlete on his own initiative and made arrangements to stay with the student-athlete. **The concern here is that the coaches' arrangement of housing with student-athletes enabled prospective student-athletes to save time, effort and perhaps money. Regardless of the valuation, these violations are significant** because the provision of the impermissible housing opportunities allowed prospective student-athletes to participate in voluntary workouts; become acclimated to the campus;

> and engage in practices conducted by football student-athletes, all without having to incur the burden associated with finding independent housing options." (emphasis added)

The Committee has never before found a violation merely because coaches helped signed PSAs secure housing, as long as the PSAs paid their expenses and documented their payments. All of case precedents cited by the Committee in the Boise State Report involved some free or reduced cost housing. Likewise, the NCAA's LSDBi database does not include any interpretations or educational columns indicating that coaches who arrange local summer housing for signed PSAs violate NCAA recruiting rules, in the absence of a free or reduced cost arrangement (or an after-the-fact determination that a PSA was supposed to pay, but no one made sure he did).

The full extent of this new application of the bylaws is unclear. Boise State Finding B-2-b involved a situation in which twenty-three football prospects moved into the community during one summer. The football coaches were heavily involved in arranging for many of the PSAs' housing. According to the Committee, the PSAs would have incurred "significantly higher cost[s]" to reside in Boise for the period in question but for the housing arrangements facilitated by the coaches. According to the language of the Report, it "would have been permissible" for the PSAs to contact Boise State's current student-athletes "on [their] own initiative" and agree to the same local summer housing terms that the coaches arranged. Therefore, although the Boise State coaches' conduct triggered a violation, it is unclear whether lesser involvement by a coach in arranging summer housing would result in a violation. For example, it is unclear whether a coach who occasionally, non-systematically helps signed PSAs find summer housing with current student-athletes violates NCAA recruiting rules even when those PSAs pay full and fair value for the summer housing. However, based upon the Boise State case, such conduct should be considered to be a possible violation and not assumed to be permissible.

The decision in Boise State places institutions on further notice that they need to closely monitor payments for <u>and the arrangement of</u> PSAs' local summer housing in order to ensure compliance with NCAA legislation.

To further discuss lessons from the Boise State case or other NCAA compliance issues, contact Ice Miller's Collegiate Sports Practice team.

Subject: Please Update Your Squad Lists!

Attach: TEXT.htm; Change of Status Form.pdf

Coaches,

As we enter the summer, we need to get each team's squad list up-to-date, in terms of graduates, transfers, etc.

There are many reasons for this - here are a few off the top of my head:

1) So we can have squad lists ready for summer NCAA Drug Testing
2) So we can stop sending these former student-athletes rules education materials through ACS emails and text messages
3) So Varsity Monitor can stop monitoring their social networking sites

I'm attaching a blank Change of Status form. Please go through your 2011-2012 roster and send us a copy of this form for each student-athlete who, for whatever reason, is no longer a part of your team. These should be either sent hard copy or emailed to Tom.

Thanks,
Amy

Carolina Athletics

Change of Status

Coaches: Please use this form to indicate a student-athlete's change in status during the academic year. Indicating a change in status facilitates the maintenance of squad list.

Student-Athlete Name:

Sport: (Choose Sport)

PID:

Reason: (Choose Reason)

If other, explain:

Effective Date:

Student-Athlete on GIA: ☐ Yes ☐ No

Date to Terminate Aid: ☐ Now ☐ End of Sem. ☐ End of Year

Send Termination Letter: ☐ Now ☐ End of Sem. ☐ End of Year

Form Completed By: Date:

Submit by e-mail **Print and send to Tom Timmermans (Compliance)**

E-mail CC: Academic support, Sports medicine, Equipment Room, Athletics Communications, Fin. Aid. Office, Sport Administrator, Registrar Office, Campus Health, Public Transportation, Varsity Monitor.

Subject: Recruiting/Scouting Services - NCAA Approval
Attach: TEXT.htm

Men's and Women's Basketball and Football staffs,

Effective today, we can only be subscribed to recruiting/scouting services that have been approved by the NCAA. The NCAA list has been posted at the below website:

http://web1.ncaa.org/scouting/school_search

(Note that you must have an ncaa.org log-in to be able to access this site.)

We will need for one individual from each sport to submit to us a list of all recruiting/scouting services to which we have current subscriptions. We will review the list for their NCAA certification. If they do not appear on the NCAA's list, we will have to immediately cease using the service and cancel our subscription.

Please submit this list to us ASAP, as it would be a violation were we to use an uncertified service as of today. If you are unsure as to whether a service meets the definition of a "scouting service", please include it in your list and we can work to make that determination.

Additionally, in advance of any future subscriptions being purchased, we will need to include documentation of the service's NCAA certification with the paperwork for the check request. Without this documentation, the Business Office should not process the request for payment.

Thanks for your help with this.

Dear Ms. Ofstein:

I would like to apologize for the unacceptable conduct of several of our players. I regret the disruptions and inconveniences caused by the poor decision making of these individuals.

I have very high expectations of our players. I expect all of our players to be respectful of others and behave in a first-class manner. We have addressed the issues sited in your July 15th email and have reminded all of our players of our expectations for their behavior.

Again, I apologize and hope such incidents and behavior does not reoccur.

Regards,

Coach Butch Davis

Subject: INFORMATIONAL: UNC Employee Forum's Dell Computer Initiative--34% more off negotiated price

---

The UNC Employee Forum has worked with Dell to provide an additional 34% off the UNC Employee Forum Computer Initiative Price. Use the code on the coupon at http://forum.unc.edu/DATG473_unc.htm to order directly from the Dell UNC Employee Forum Computer Initiative site.

This coupon is in addition to the 12% discount and special offers that are normally available through the UNC Employee Forum Computer Initiative.

The coupon code will go live at 10:00 CST on Tuesday, August 30, and is available to the first 4000 customers or ends on September 6, 2005, whichever comes first.

To get to the UNC Employee Forum Computer Initiative Web site, go to www.unc.edu/forum and click on the link for the Computer Initiative.

Subject: Important Payroll Matters

Attach: Text.htm

Due to new procedures with time sensitive deadlines mandated by the federal government in the pay-rolling of new employees, ALL new temporary AND student employees must come to our office to complete their paperwork. PLEASE NOTE: this must be done on the employee's FIRST work day--with no exception. Paperwork may no longer be processed in advance, as mandated by federal regulations governing certain processes that all state agencies must now adhere to. HOWEVER, before a non-student temporary employee can start work, they must complete the criminal background investigation form, which you may completed in your area and sent to our office. Once the Office of Public Safety notifies us of the results, we will contact the hiring supervisor to notify you know that the employee can begin work (the crim check does not apply to student employees).

Please contact Tracy Harris (2-7852) or myself (2-7850) to arrange a time for the new employee to come to our office on their first day of work.

A FEW OTHER REMINDERS:

1. PLEASE contact Joyce PRIOR to entering into an agreement to pay someone for services rendered to be sure that we can in fact employee the individual.
2. Timesheet deadline reminder: timesheets are due to Tracy Harris by 10:00 on the Monday following payday. Several areas are turning timesheets in much later than this deadline, and this is creating a delay in the delivery of timesheets to payroll services.
3. Please share this information with those who may need to be made aware of these changes and updates but may not be on the recipient list or have access to email.

Please let me know if you have any questions, and thank you in advance for your prompt attention to these matters.

Joyce & Tracy

Subject: New time management system

Attach: Text.htm

As many of you may have read, the University is transitioning to a new time management system. This system has been in the design stages for quite some time, and we have been informed that they hope to "go live" with this new system the end of 2007. This transition will occur in stages, so the whole campus will not be converted at one time.

That being said, I have made arrangements for one of the project managers to come give a presentation/focus meeting for this system. It is essential that at least one person from your area who has signature authority for timesheets to attend this meeting so that you can see first hand this new system, and also to assist you in making plans in your area for managing this computerized system.

This time management system will effect ALL employees, SPA and EPA.

The meeting is scheduled for Tuesday, March 13th at 10:00 a.m. in the Educational Foundation Koury Natatorium conference room.

Please let me know who will be attending from your area so that we have an idea of how many will be attending.

Thanks for your attention to this important matter, and please let me know if you have any questions.

Joyce

Subject: Career Banding letters and information

Attach: TEXT.htm

I just wanted to say thanks to all of you for taking the time out of your schedules to attend the Career Banding training sessions for managers and supervisors. It was quite a lot of information to take in and process for all of us. I am in the process of getting packets ready for each of you that will include letters for each of the employees you are responsible for, and I have also put together folders with information that I hope will help you become more familiar with the new system, and facilitate your communicating the new information to your employees. Please review all of the information prior to giving employees in your areas their letters, and please contact me asap with your questions or concerns. I have a feeling that you may get the "Joyce Dalgleish....is on the phone" message, so please leave a message or email me and I will get back with you as soon as possible. It is my hope to get this information to you by the close of business tomorrow (Friday, May 2nd).
Please note, as stated in our sessions, that some employees may have concerns about where their POSITIONS were "walked over" into the new system, and assure them that their salaries are not effected with the changes.
Once again, MANY THANKS for attending the sessions, and thanks in advance for your assistance and patience as we all make the transition together.

Subject: Re: Additional info

That sounds like a good idea. Somehow, maybe we can find $10,000 in Chapel Hill.

>>> Charlie Adams <cadams1@email.unc.edu> 2/20/2007 10:07 AM >>>
Good morning. I failed to include two items when I emailed you yesterday. To stay in Chapel Hill and cover football and basketball we are going to need at least $10.000.00 more in sponsorship. Obviously, to bring an additional football championship we will need close to $20,000.00 in sponsorship and to bring in two additional football championships it will take close to $40,000.00 in additional sponsorship.This of course will be dependent if we are able to continue to cover indoor track, tennis and swimming if it returns to Chapel Hill.

Give all of this some thought and maybe we can get together in March for further discussion of these issues. I certainly hope we can resolve these issues to the the satisfaction of the NCHSAA and UNC athletics.

Have a good day.

Charlie

PS Good luck with your men and women's winter sports programs.

September 8, 2003

Our first road trip of the 2003 season is less than two weeks away. Kickoff for the Wisconsin game has been set for 11:00 AM central standard time. We will depart from the Kenan Football Center at 9:00 AM on Friday, September 19th. Please make plans to be on the busses at least 10 minutes early so we can leave on time. Parking at the Kenan Football Center is extremely limited. All employees with permits please park in your permit zone (Bell Tower, S-8, etc.). All students (players, managers, trainers, video, etc.) should carpool together as much as possible to reduce the number of cars and park inside the stadium gates (Gate 2 or 6). We encourage all couples traveling together on the trip to ride together with their spouse. We will return home immediately following the ball game and should arrive back at the Football center at approximately 9:00 pm on Saturday, September 20th.

Unlike years past, new FAA rules require all chartered aircraft passengers to be screened prior to boarding. In addition to passengers, all CARRY ON baggage must be screened. Any checked bags (for our charters checked bags are those that are left under the busses and loaded directly into the cargo area of the plane) do NOT have to be screened. In order to minimize delays from these new FAA rules, we will ask all of our travel party members to follow guidelines that other NFL, MLB, and NCAA teams have instituted. Please DO NOT plan to carry any baggage on the plane. When you get to the busses on Friday place your bags underneath the busses. Airport baggage handlers will then load all baggage under the bus onto the plane. If there are any items that you absolutely **must** have on the plane with you, please pack only the needed items in a clear, plastic zip lock bag (we will have these available for you as you board the busses). This will allow the screeners to quickly review your items without opening the bag. A list of prohibited carry on items is attached. We will follow these procedures on both our outbound flight to Madison, and on our return flight back to RDU. You must have with you a valid driver's license or other government issued photo identification.

Our dress code for coaches and staff will remain as it was last year, coat and tie on the outbound flight, and team sweat suits (casual) on the return flight. Our players will wear team sweat suits on both flights. Please minimize any jewelry or other metal items worn on either flight as this will again slow down the screening process.

If you have any questions about our trip or travel procedures please call me (919-962-9119) or Lance Markos (919-843-2572). We look forward to a great trip!

Rick Steinbacher

Smart Security Saves Time

Permitted and Prohibited Items

Prohibited items are weapons, explosives, incendiaries, and include items that are seemingly harmless but may be used as weapons—the so-called "dual use" items. You may not bring these items to security checkpoints without authorization.

If you bring a prohibited item to the checkpoint, you may be criminally and/or civilly prosecuted or, at the least, asked to rid yourself of the item. A screener and/or Law Enforcement Officer will make this determination, depending on what the item is and the circumstances. This is because bringing a prohibited item to a security checkpoint—even accidentally—is illegal.

Your prohibited item may be detained for use in an investigation and, if necessary, as evidence in your criminal and/or civil prosecution. If permitted by the screener or Law Enforcement Officer, you may be allowed to: consult with the airlines for possible assistance in placing the prohibited item in checked baggage; withdraw with the item from the screening checkpoint at that time; make other arrangements for the item, such as taking it to your car; or, voluntarily abandon the item. Items that are voluntarily abandoned cannot be recovered and will not be returned to you.

The following chart outlines items that are permitted and items that are prohibited in your carry-on or checked baggage. You should note that some items are allowed in your checked baggage, but not your carry-on. Also pay careful attention to the "Notes" included at the bottom of each section – they contain important information about restrictions.

The prohibited and permitted items chart is not intended to be all-inclusive and is updated as necessary. To ensure everyone's security, the screener may determine that an item not on the prohibited items chart is prohibited. In addition, the screener may also determine that an item on the permitted chart is dangerous and therefore may not be brought through the security checkpoint.

The chart applies to flights originating within the United States. Please check with your airline or travel agent for restrictions at destinations outside of the United States.

For updates and for more information, call our Consumer Response Center toll-free at 1-866-289-9673 or email TellTSA@tsa.dot.gov.

INTRODUCTION

Background

At least nine women have alleged sexual assault by University of Colorado football recruits or players dating back to 1997. Three have filed federal Title IX lawsuits against the University and numerous depositions have been taken. In January 2004, the deposition of Boulder District Attorney Mary Keenan[1] was released to the public. Keenan testified that she put the University on notice in February 1998 to stop using sex and alcohol to lure recruits. The governor and legislature threatened to convene inquiries unless the University launched its own investigation.

The University's Board of Regents adopted the resolution creating the Independent Investigative Commission on February 6, 2004, directing the Commission to:

- Examine the University's and Boulder Campus' policies and programs, and the implementation of those policies and programs, in the areas of sexual misconduct, student conduct, and alcohol and substance abuse awareness;
- Examine the Boulder Campus' athletic policies and programs with respect to sexual conduct and alcohol use, and the implementation of those policies and programs, including specifically the question of whether sex and alcohol are used as recruiting tools in the football recruiting program; and
- Provide a report to the Board of Regents containing the findings and recommendations of the Committee.

Methodology

From March 2 through May 14, 2004, Commissioners held 15 meetings and heard from 56 witnesses. These included University administrators and employees, football players and their parents, law enforcement officers, victim advocates and sexual-assault prevention experts. The Commission also reviewed more than 20,000 pages of documents, including sworn deposition testimony and exhibits from Lisa Simpson v. University of Colorado; internal memos, e-mails, handwritten notes and other correspondence; and disciplinary, criminal justice, recruiting and academic records. Thousands more

pages of policy manuals and financial records also were examined, including: sexual assault and sexual harassment protocols; alcohol and drug policies; NCAA, Big 12 and University rule books; and student and team handbooks.

The Commission made 10 Colorado Public Record Act requests to various agencies and dozens of informal requests to the University. It also retained a private investigator whose 85 interviews included current and former student-athletes, recruits and their parents, coaches and Athletic Department personnel. A nationwide, toll-free tip line (866-277-3200) established through Colorado Crime Stoppers and the Colorado Department of Public Safety produced 81calls, with 26 confidential and anonymous tips being forwarded to the private investigator. Crime Stoppers referred five calls to the special prosecutor.

Finally, Commissioners spent countless hours individually seeking information from a variety of people.

The results of these efforts form the basis for the findings and recommendations contained in this report.

To frame its investigation, the Commission focused on four critical incidents and the University's responses to them: the party and alleged sexual assault of a teenage girl by two recruits in 1997; the parties of December 68, 2001, and alleged sexual assault of student Lisa Simpson; the harassment and alleged rape of Katie Hnida; and the alleged rape of Athletic Department employee "Jane Doe."

Commissioners addressed four specific areas of inquiry:

- How was football recruiting conducted?
- Were sex and alcohol used as recruiting tools in the football program?
- Who knew about misconduct, and what actions did they take?
- What cultural influences were at play on campus and within the Athletic Department?

This report considers University, Athletic Department and football program policies and procedures as they relate to the football program generally and recruiting specifically. It also identifies campus cultural deficiencies that failed to predict and prevent dangerous situations involving football players, recruits and students.

The Commission offered a public forum for the issues facing the University. The panel is encouraged that investigations by the special prosecutor and outside University counsel will continue, and that findings and recommendations from Dr. John DiBiaggio, the president's special assistant, will complement the Commission's work.

Before turning to a detailed discussion of its findings and recommendations, the Commission acknowledges that the vast majority of student-athletes who compete on behalf of the University do so without bringing disrepute to the institution, the Buffalo athletic program, their coaches or teammates. Student-athletes devote an extraordinary amount of time and energy to their sports, providing entertainment and a source of pride for many in the University community. Student-athletes also provide diversity that might be difficult to achieve without athletic scholarships. Finally, the Commission understands that the University belongs to a highly competitive athletic conference. Other teams in the conference are located in communities that are more supportive of their football teams than Boulder is of the University's program. The tension between academics and athletics is particularly keen at the University of Colorado.

EXECUTIVE SUMMARY

The 50 findings and recommendations presented in this report focus both on the narrow questions asked of the Commission and on more sweeping related issues of campus and Athletic Department culture, personnel and compensation matters, admission and academic standards, sexual-assault protocols and alcohol abuse. Some of the recommendations could result in groundbreaking change. Others simply document the common-sense ideas expressed during the Commission's open hearings.

The Commission urges adoption of the Boulder Faculty Assembly recommendations[2] on institutional control and accountability to consolidate, integrate and codify responsibilities for the Athletic Department within the University. The athletic director should no longer report directly to the chancellor, but rather to the provost, who can provide more attentive supervision. In addition, the vice chancellor for Student Affairs should be required to develop, implement and coordinate campus-wide policies relating to sexual assault, sexual harassment and alcohol abuse, including those for the Athletic Department, and should report directly to the president and the chancellor on these matters.

The issues addressed in this report are not limited to the University of Colorado. The Commission's investigation only reaffirms the cultural challenges facing the nation today. Across the country, intercollegiate athletics have been undermined by a hyper-competitive recruiting "arms race" that is complicated by the presence of big money, lucrative media and easy access to alcohol and sex.

Sex, Alcohol and Recruiting

There is evidence demonstrating that sex, alcohol and drugs were used as football recruiting tools by some player-hosts and possibly a football recruiting assistant. Some player-hosts, who were chosen by coaches, used sex, alcohol and drugs to entertain recruits during official recruiting visits in hopes of enticing recruits to come to the University. There is no clear evidence that University officials knowingly sanctioned this or had direct involvement. There is widespread agreement that sex and

alcohol have long been staples of recruiting activities here and nationwide. Here, coaches and administrators knew or should have known this and did not take sufficient corrective action until March 2004. They did not fully explain the rules concerning recruit behavior to player-hosts or enforce the rules with consistent discipline. Hosts and coaches also did not adequately supervise the recruits.

Accountability

The University's leadership must be held accountable for systemic failings that jeopardized students' safety and allowed for ongoing misconduct in the football recruiting program.

The Commission recommends that President Elizabeth Hoffman evaluate whether Chancellor Richard Byyny, Athletic Director Richard Tharp and Head Football Coach Gary Barnett are capable of and committed to providing the leadership necessary to effect profound changes in culture, structure and reporting systems at the University.

Byyny and Tharp failed to effectively communicate and develop solutions to identified recruiting problems. This is reflected in Byyny's repeated requests for the Athletic Department to assert greater control over recruits, Tharp's lack of response to Byyny, his immediate supervisor, and Byyny's lack of follow-through with Tharp. Byyny, Tharp and Barnett minimized the importance of the recruiting problems, and the coach and his assistants provided insufficient supervision of recruits. Barnett behaved with insensitivity toward issues of sexual assault and sexual harassment and did not follow protocols in these areas.

Regents also should evaluate whether Hoffman can provide the leadership and vision needed to restore the University's integrity and reputation. As the University's chief administrator, Hoffman failed to exercise sufficient oversight until pressured by the governor and lawmakers. Regents, too, should examine what they have or have not done to advance the principles of the Knight Foundation Commission on Intercollegiate Athletics since their endorsement of them in 1992.

AREA OF INQUIRY NO. 1: HOW WAS RECRUITING CONDUCTED?

Competitive football demands competitive recruiting. Every year, about 115 Division I-A football programs jockey to attract the attention of a few top-flight recruits by offering scholarships, quality academics, unparalleled social experiences and a chance to join a celebrated football program. Coaches crisscross the country hoping a personal appearance in the living room of a recruit's home will make the difference, and recruits drop in on campus to experience a weekend at a big-time football school.

Against this backdrop, the NCAA, conferences and each institution all seek to keep the recruiting process from corrupting high school prospects, players, the university at large and everyone else with an interest in intercollegiate athletics. The task is daunting. From the 2003-04 Big 12 Conference Handbook:

> "One of the most visible areas in intercollegiate athletics is in the recruitment of student-athletes by member institutions. Staff members of the athletic departments have the primary responsibility for wholesome conditions and honorable conduct of individuals participating in the recruitment of student-athletes."[3]

But for decades, recruiting excesses have plagued intercollegiate athletics, including a 1962 scandal at the University of Colorado. In recognition of these difficulties, the first Knight Foundation Commission on Intercollegiate Athletics found in 1991 that:

> "Recruiting, the bane of the college coach's life, is one area particularly susceptible to abuse. While most institutions and coaches recruit ethically and within the rules, some clearly do not. Recruiting abuses are the most frequent cause of punitive action by the NCAA."[4]

The University of Colorado proved no exception. In October 2002, the NCAA's Committee on Infractions placed the University on probation for two years for 53 recruiting violations. Most dated back to Coach Rick Neuheisel's tenure, but the Committee found that the University demonstrated a lack of institutional control and accountability by failing to monitor the head coach and his staff. It called the violations "pervasive and systemic." Twenty-three of the violations involved improper contact

with recruits, known as "bumping." The Committee found that the sheer number of violations constituted a pattern of behavior and increased the case to a "major infractions" category. Other violations included excessive expense reimbursements, excessive entertainment and providing apparel and clothing to recruits.

Several University officials, in their appearances before this Commission, downplayed the severity of the infractions by citing the University's strong record of self-reporting and noting that the infractions were "minor" in nature. Karen Morrison, the University's director of NCAA compliance, said her office annually self-reports about 20 secondary or minor infractions, considered violations that do not result in significant competitive advantage. A recent internal audit of the football program uncovered two secondary infractions and calls by former employee Nathan Maxcey on his University-issued cell phone to an escort service.

The NCAA rules governing recruiting are voluminous. The Commission agrees with University officials who complain that they are cumbersome and laborious. The NCAA rules fail to address standards of behavior, leaving it up to each institution to establish rules governing substance abuse and sexual misconduct. Even proposed reforms from the NCAA's recruiting task force do not address behavioral issues. The Commission observes that the NCAA has adopted rules governing the number of logos a player can wear, yet fails to adopt rules governing more substantial and potentially life-threatening issues such as alcohol use, acquaintance rape and other inappropriate behavior.

David Hansburg, the University's director of football operations, provided the Commission with a detailed description of recruiting under NCAA, Big 12, University and football team rules.[5] The football program, with overall annual expenses of $19 million, spends $315,000 a year on recruiting. The recruiting process begins each February with a paper review of 4,000 to 5,000 high school players. At the end of May, up to seven recruiters at a time (10 coaches per team are allowed to make recruiting trips) are dispatched to their respective geographical areas around the country. They pick up transcripts and film, talk with coaches, teachers and parents, and watch spring practices from the sidelines. Face-to-face contact with a recruit is prohibited, although coaches can make one phone call to a recruit in May. The overall number of prospects is whittled to 400 by the end of May, and the number further narrowed

down over the summer. Official recruiting visits to campus begin in September, and from November to January, coaches can visit a recruit at home.

Each University is allowed up to 62 official visits a year from prospects, and each prospect can visit up to five schools but can make only one official visit to each school.

Once on campus, the bulk of a recruit's time is structured: meetings with academic advisers and assistant coaches; campus and facility tours; and dinner with coaches, players and parents. An Ambassador program, which is being discontinued, paired recruits primarily with female students who escorted them around campus and answered questions about classes, the surrounding community and other topics.

Football players also have been assigned to serve as "hosts" for recruits during their visits to campus. The coaching staff attempted to match hosts and recruits based on common interests. Player-hosts said those interests included whether they liked to party. Hosts often were underclassmen because coaches felt that recruits related better to younger players.

NCAA rules allow a university to provide a recruit up to three meals a day, with no limit on the cost. The University also provides a $30-per-day entertainment stipend to player-hosts to be spent on the recruit for unstructured evening activities such as going to the movies or bowling. Nothing in the NCAA rules expressly forbids players or hosts from providing alcohol to underage recruits or from taking them to bars or strip clubs. Hiring a stripper to appear at a party for recruits would, however, be deemed "excessive entertainment."

Coach Barnett's Player Handbook, Athletic Department policy, verbal briefings by the coach to the team and the "Student Host Form" [6] address hosts responsibilities but do not make it clear that hosts should stop or report recruit misconduct. The head coach helped select hosts, but he did not personally spell out the responsibilities and expectations to them, and some players were too immature, unwilling or ill-trained to take responsibility for their recruits.

Four player-hosts were involved in the events of December 7, 2001, during which alcohol and marijuana were provided to recruits. Their recruits later engaged in sexual activity at Lisa Simpson's apartment. Two of the player-hosts had hosted several times during that recruiting season, more often than any other players. All four player-hosts later pleaded guilty to contributing to the delinquency of a minor. One of them told the court during sentencing:

> "The whole goal is to have top recruits come from all over the nation to your school because that's the future of the team. … (But) recruiting is a thing that we don't volunteer for. We're picked for it. And I feel that the position we're placed in is that we're supposed to take these recruits out, you know, show them a good time." [7]

In their depositions, two player-hosts said they could not control what recruits do, and were not told it was their responsibility to do so. When asked if he thought it was wrong for recruits to engage in group sex and excessive drinking, one answered, "I can't control what they want to do. That's their decision to make. I can't really comment if I thought that was wrong or not. That's their decision to make."

That host described Barnett as a tough disciplinarian who often lectures the team about the evils of alcohol and brings in speakers to talk about rape, sexual assault and acquaintance rape. The coach also tells players to avoid sleeping with women who are drunk. But the host said the only thing coaches say about how to spend free time with their recruits on a Friday or Saturday night is to stay out of trouble.

One of the player-hosts told the court that student-athletes can't be held solely responsible for recruiting failures:

> "The guidelines need to be addressed because I guarantee you that this isn't the first time that this has happened, and it probably won't be the last. But I think it has to stop at the top and go down, starting from the coaches or maybe even the university to the coaches."

Barnett told the Commission that all hosts are empowered to halt inappropriate recruit behavior, but some chose not to in regards to the December 7, 2001, incident. Barnett conceded, however, that if hosts were unclear about expectations and responsibilities, the coaches failed to clearly explain them.

His rule, as explained to players, is that if their mothers would approve, if the recruit's mother would approve, and if they wouldn't mind reading about it in the newspaper, then it's probably OK.

Four current football players appeared before the Commission: Daniel Jolly, Joel Klatt, Dusty Sprague and Sam Wilder. When asked if they would intervene if their recruit was engaged in inappropriate or illegal behavior, two said they would, even though coaches never instructed them to do so. One described it as an "unspoken expectation."

The players also told the panel that during their own recruiting visits to the University they were either not offered alcohol or sex or chose not to drink alcohol if it was present. One player said he wanted to make an unimpaired decision about where to play football.

Based on all of the above information, the Commission makes the following findings and recommendations:

Finding:

1) Troubles with recruiting are well-documented at universities across the nation. At the University of Colorado, alcohol and sex were made available to some recruits when they accompanied player-hosts to private parties late at night. Hosts either felt that providing sex and alcohol was part of showing a recruit a good time, or felt no responsibility or obligation to keep recruits out of trouble or were untrained to do so.

Recommendations:

1-A) Acknowledge the inherent risks involved when 17-year-old recruits are brought to campus and that coaches have a duty to supervise the recruits. Acknowledge that coaches must use care in the selection of football recruits to ensure that recruits will graduate and are unlikely to engage in inappropriate behavior.

1-B) Hold the athletic director and the head coach responsible for implementing and enforcing the recruiting changes announced in March 2004 by President Hoffman and Chancellor Byyny,[8] including: (a) Official recruiting visits occur only after football season ends; (b) campus visits limited to 24 to 36 hours with an 11 p.m. curfew; (c) no private parties or unsupervised time during University-sponsored visits; (d) elimination of "hosts" and "ambassadors;" and (e) recruits receive University tours like all other prospective students.

1-C) Increase faculty participation in recruiting visits as suggested in the Boulder Faculty Assembly report. Include discussions that illustrate the importance of informal learning in an academic community. Emphasize the importance of academics and the help available to student-athletes to develop good study habits and earn degrees that will lead to meaningful employment.

Finding:

2) The NCAA presently defers to individual institutions on numerous matters, including standards of behavior, while including seemingly superfluous sections in its rule book. This creates a patchwork of inconsistent policies and may have contributed to a proliferation of behavioral abuses around the country.

Recommendations:

2-A) Encourage the NCAA to adopt recruiting rules similar to those now being implemented at the University of Colorado.

2-B) Encourage the NCAA to adopt a rule that adds consumption of alcoholic beverages by underage student-athletes as minor infractions that could lead to sanctions.

2-C) Encourage the NCAA to return to a rule that does not allow freshmen to play on varsity athletic squads.

2-D) Encourage the NCAA to adopt the Knight Commission report recommendation that universities be barred from post-season competition unless 50 percent of team members are graduating or completing the year's academic courses.

2-E) Encourage the NCAA to eliminate financial incentives for coaches who win; such incentives undermine academic achievement as primary.

2-F) Encourage the NCAA to adopt rules that hold coaches accountable for off-the-field player behavior.

2-G) Oppose the NCAA's apparent attempts at further professionalizing student athletics, such as adding another playoff-level game pitting the top two teams of the Bowl Championship Series.

AREA OF INQUIRY NO. 2: WERE SEX AND ALCOHOL USED AS RECRUITING TOOLS IN THE FOOTBALL RECRUITING PROGRAM?

Players, parents, coaches and administrators say that many recruiting experiences are innocent and wholesome, free of alcohol and sex. Many former recruits described their evening free time as "boring," where the main activity involved playing PlayStation video games in their host's dorm room or apartment.

Nevertheless, it is common knowledge that sex and alcohol are a pervasive part of the American football recruiting experience. Coach Barnett and Athletic Director Tharp told the Commission that because alcohol is ingrained in the college experience and culture, recruits often are exposed to alcohol during official campus visits.

Therefore, it is reasonable to believe that Barnett and his assistant coaches knew or should have known about the use of sex and alcohol by recruits and hosts and of the potential for harm. The more complicated question is: did administrators and coaches quietly condone the use of alcohol and sex?

Reports to Commissioners suggest that Tharp was heard on more than one occasion saying that coaches had to maintain a façade of "plausible deniability" – a term commonly understood to mean a purposeful lack of documentation or witnesses who could confirm that those in authority had necessary information – with respect to allegations of partying by recruits and hosts. The implication of what one former Athletic Department employee called a "don't ask, don't tell" policy is that Athletic Department leaders did not want to know, because if they didn't know, they could assert that there was no problem.

It is clear, however, that administrators and coaches failed to clearly explain rules, responsibilities and standards of expected behavior to player-hosts. They failed to adequately supervise hosts and recruits. Some hosts felt pressured to impress recruits and resorted to providing alcohol, drugs and sex, including visits to strip clubs and the hiring of strippers.

In his appearance before the Commission, Tharp said the allegation that anyone in the Athletic Department encouraged, condoned, or winked at the use of alcohol or sex as a recruiting tool is false.

Barnett said the accusation that coaches had prior knowledge about inappropriate behavior is absolutely untrue.

Despite claims that hosts clearly understood their responsibilities, the most recent recruiting season provides evidence to the contrary. A high school recruit who visited the University in January 2004 said football players took him to a strip club, where he drank a beer, and then to a party, where he continued drinking and engaged in consensual sex with a female student.

The circumstances surrounding Nathan Maxcey, a football recruiting assistant from June 2002 to July 2003, also raise numerous questions. Maxcey admits to making 15 calls on his University-issued cell phone to a Broomfield call-girl service, but said they only resulted in a single sexual liaison for him. Through their attorneys, three call girls say Maxcey paid at least $2,000 in cash over a 45-day period and arranged sex for other young men at the Omni Hotel. Maxcey's duties included picking up recruits from the airport when they arrived in Colorado and checking them in to the Omni Hotel by their curfew after they had spent the evening with their host. Maxcey denies that he obtained escorts for recruits or players. The Commission expects the special prosecutor will investigate this matter more fully.

Over the weekend of December 6-8, 2001, 10 recruits visited the University. According to deposition testimony, on December 6 at least one recruit had sex with female students at the Omni Hotel, where the recruits were staying. Two other recruits told their host they did not have sex and that CU was "weak" because they hadn't "hooked up" with any girls. One of the girls from the Omni Hotel party and one of the football player-hosts discussed inviting the recruits to a party the following night, December 7.

The partying at Lisa Simpson's apartment began the afternoon of December 7 with a shot-drinking contest. Over in the dormitories, football player-hosts and recruits started partying that evening, smoking marijuana provided by a player and drinking alcohol. The female student from the night before and one of the player-hosts then arranged for the players and their recruits to join the Simpson party. The hosts expected sex would be available at the party for their recruits, suggesting they wanted to do whatever they could to show them a good time.

"These are the top recruits from around the nation," one of the hosts said in his October 30, 2003, deposition. "They're the future of our team."

Recruits engaged in group sex with women at the party, although there is a dispute as to whether the sex was consensual. One of the recruits who had complained the night before about CU being "weak" was later accused of sexually assaulting Simpson at her apartment.

AREA OF INQUIRY NO. 3: WHO KNEW ABOUT MISCONDUCT, & WHAT ACTIONS DID THEY TAKE?

Today's circumstances date directly to December 6, 1997, when a group of local teenage girls arrived at the Harvest House hotel in Boulder. One of the 16-year-old girls was dating a 21-year-old football player and had brought along some friends to party with the player and two football recruits. One girl, age 17, alleged she was sexually assaulted by the recruits in one of the hotel rooms, although the Boulder County District Attorney's Office declined to file sexual-assault charges. Prosecutors did charge the player with contributing to the delinquency of a minor for providing the alcohol, and the University's Office of Judicial Affairs sanctioned him for allowing alcohol and girls in the recruits' hotel rooms.

Chancellor Byyny learned of the Harvest House incident by reading about it in the newspaper five weeks later. Later that day, January 15, 1998, he sent Athletic Director Tharp an e-mail:

> "I worry about the oversight we have of the recruits while they are in our charge. Allegedly the recruits were all drinking beer in their rooms. I realize we don't have control over immature potential students. However, we should clearly spell out our rules, responsibilities and expectations."

At a February 18, 1998, meeting, Boulder County District Attorney Alex Hunter and Assistant District Attorneys Peter Hofstrom and Mary Keenan explained to Byyny, Athletic Director Tharp and Robert Chichester, who at the time worked in the University Counsel's Office and later became an associate athletic director, that sexual-assault charges would not be filed in the Harvest House case. However, in her deposition, Keenan testified that she also told University officials she believed the party was designed to provide sex to the recruits and that she was putting everyone on notice and delivering a message that it needed to stop.

Keenan said she and Hunter advised the University to establish written zero-tolerance policies regarding alcohol use and sexual conduct surrounding recruiting. She said she and Hunter offered to help review old policies and craft new ones and provide sexual-assault and sexual-harassment training.

In his appearance before the Commission and in his deposition, Byyny agreed the meeting was critical because it forced the University to review its policies and procedures. Even before the meeting, Byyny had asked the athletic director to review policies and procedures and set up training sessions for coaches and staff. But Byyny told the Commission he did not recall Keenan mentioning that she believed women were being made available to recruits.

Tharp also disputes that Keenan had clearly put the University on notice. If she had, Tharp asked the Commission, where was the follow-up on her part? He said the meeting was not a seminal moment and such gatherings of University and community leaders "happened all the time."

In his deposition, Chichester concurred with Keenan's recollection of the meeting and criticized Tharp for failing to make changes requested by Byyny (Chichester declined to appear before the Commission). Notes taken during the meeting by Chichester and the executive assistant to the chancellor also support Keenan's version of events.

Exchange of Memos

On April 23, 1998, Byyny sent Tharp a memo confirming his earlier request for new written policies regarding student-athlete behavior, including a zero-tolerance rule for violations that threatened the health, safety, welfare or property of student-athletes and others. Byyny also called for the policy to "address the expected responsibility and accountability of the members of the coaching staffs" who are involved in recruiting, training and the education of student-athletes.

Tharp replied on May 15, 1998, saying that then-Associate Athletic Director of Student Services Rich Cardillo was meeting with coaches and based on their input would draft departmental policies. A letter also would be sent to every recruit prior to an official recruiting visit, outlining standards of behavior, including a prohibition against the use of alcohol or tobacco. However, Tharp wrote he was concerned that creating the additional Athletic Department policies requested by Byyny "would hold our (student-athletes) to a higher standard."

> "The campus Standards of Conduct provides all of the students guidelines for a safe and equitable existence while attending CU. An additional 'code' for student-athletes would result in additional consequences. These consequences affect athletes differently than they do normal students."

The changes made to the recruiting program in 1998 were minor and did not provide player-hosts with specific instructions or training regarding the supervision of recruits, even though newly re-written policies spelled out a prohibition on alcohol and tobacco for recruits. The University should have accepted the district attorney's offer to help craft policies and procedures and provide training. All of these failures contributed to the climate that existed when the events of December 7, 2001, occurred.

The chancellor admitted to the Commission that the changes did not go far enough. The athletic director said in his deposition and to the Commission that he did not believe he was being ordered to make changes. The chancellor said he did want tighter controls, but that he was relying on the athletic director and coaches to implement them. The chancellor also failed to ensure that he and the athletic director agreed on what "zero tolerance" meant and what the discipline for any serious infractions of the new behavioral standards would be.

There is no indication that Byyny actively followed up on his requests to the athletic director. Tharp evaded, resisted and ignored his superior's wishes and perhaps delegated too much responsibility to Cardillo. The chancellor had little control over the Athletic Department, allowing the director to get away with only minor changes. In the end, the chancellor held the ultimate responsibility for effecting change.

Lack of Notice

When Gary Barnett, a former assistant football coach at the University, returned as head coach in 1999, no one informed him about the 1997 Harvest House incident or the February 1998 meeting between University officials and the District Attorney's Office. Byyny acknowledged during his Commission appearance that it was an oversight, and Tharp conceded he now wishes he had told the coach.

These omissions are troubling, especially since Tharp told the Commission he is particularly sensitive to notification issues. The sensitivity stems, in part, from the fact that he was never notified about the Harvest House incident by then-Coach Neuheisel. Tharp said he learned about it five weeks after it happened through the same newspaper account Byyny had read. Tharp said he verbally scolded Neuheisel for failing to immediately notify him. The coach had determined it was not a big deal because no criminal charges were being filed, the athletic director told the Commission.

Tharp said he also was angered that Neuheisel never formally informed hosts, either in writing or verbally, that they were not to allow liquor or women in the recruits' hotel rooms. That Tharp did not put the verbal reprimand in writing or impose additional sanctions points to another failing within the Athletic Department – matters of discipline are not well-documented and not meted out with consistency.

Lack of immediate notification also proved to be a problem in the December 7, 2001, incident at Lisa Simpson's apartment. It took four days before Barnett learned what happened through the media, despite earlier knowledge by some members of his staff. Moreover, it wasn't until after December 7, 2001, that the chancellor and University Counsel's Office notified President Hoffman about the 1997 incident and 1998 meeting with the District Attorney's Office, which may have inhibited her ability to exercise leadership that might have prevented the events of December 7, 2001.

Failures to communicate information up the administrative chain occurred with two other incidents, those involving former student-athlete Katie Hnida and Athletic Department employee "Jane Doe." Those cases are discussed in the next section of this report.

By examining the 1997, 2001, Hnida and Jane Doe incidents, and relying in part on the NCAA's definition of "institutional control," [9] the Commission discovered numerous failings by a variety of personnel, gaps in policies and procedures, and lapses in implementation of those policies. According to the NCAA's Committee on Infractions, institutional control is lacking if policies and procedures are inadequate or are not being monitored and enforced by someone in a position of responsibility, authority and control.

Repeated Requests

After the District Attorney's Office decided not to file sexual-assault charges in connection with the December 7, 2001, incident, Byyny again embarked on a campaign to further revise the recruiting program, an apparent effort to seize control of the situation. After a series of meetings over the next few months with vice chancellors, the athletic director, the football coach and others, Byyny sent a memo to Tharp and Barnett on April 17, 2002:

> "I am directing you to … institute the following improvements:
>
> - Notify student athlete recruits and their parents in writing of our conduct and behavior expectations in advance of their recruiting visits,
> - Establish strict curfews and reporting mechanisms for visiting high school student recruits, as we do for other high school recruits,
> - Increase adult supervision of high school recruits throughout their visits,
> - Only use well-trained upperclassmen to serve as hosts for student recruits, and
> - Prepare well-structured itineraries for campus visits and ensure that the itineraries are followed.
>
> In addition, I expect you to institute an educational program for all current student athletes that emphasizes the high standards of behavior we expect from student-athletes as ambassadors of the university; informs them of the consequences of misbehavior; and underscore their responsibility for setting a positive example for the young student athletes coming after them.
>
> Please prepare a written manual or handbook that outlines the Football Program's recruiting policies and practices in advance of the next academic year. I would like to review this manual at your earliest convenience."

Two months later, in another memo to the athletic director, Byyny again requested changes in policies and procedures, calling for a re-visiting of the principles of the Arizona Accord. The Accord states that it is the duty of sports leadership to promote sportsmanship and foster good character by teaching, enforcing, advocating and modeling six core principles: trustworthiness, respect, responsibility, fairness, caring and good citizenship. The University endorsed the Accord in 2000.

Byyny called for the Athletic Department staff and coaches to:

- Set a standard of excellence and expectations for student-athletes.
- Establish a goals-and-objectives manual called Athletics 2010 that would include a statement advocating character, ethics and sportsmanship.
- Implement the changes in the April 17 memo.
- Work and communicate more closely with the offices of Student Affairs and Judicial Affairs, including notifying Judicial Affairs whenever a student-athlete violates team rules, NCAA rules or the University's Student Code of Conduct.
- Work closely with Student Affairs to develop a Life Skills program for student-athletes; review and improve drug and alcohol awareness programs for student-athletes; implement an "orientation and transition" program to help student-athletes adjust to the campus culture; provide a part-time psychologist from Student Affairs to be in-residence at the Dal Ward Athletic Center.

The memo concluded:

"I have been deeply troubled by some of the incidents of the past year. The time has come to take decisive action to improve our goals, standards, communication and programming.

I am charging you, as Director of the Athletic Department, with responsibility to make the necessary improvements in the Department before the start of the fall semester."

Tharp responded with an August 20, 2002, memo. In it, he said a former prosecutor had addressed the team the previous night about the legal consequences of inappropriate behavior. And on the upcoming Sunday, national sexual-assault-prevention expert and Heisman Trophy runner-up Donald G. McPherson would address all student-athletes and then deliver additional remarks to the football team.

Tharp also noted specific changes to the recruiting program:

- A new 1 a.m. curfew with a hotel check-in procedure.
- Better criteria for player-host selection and direct acknowledgement of behavioral expectations for hosts, including hosts signing a form.
- Copies of letters to be sent individually to recruits, parents and high school coaches.
- Establishment of a new Life Skills coordinator position.

In October 2002, Byyny reiterated his request that only mature upperclassmen serve as hosts for recruits.

These all seemed to be positive steps to avoid repeats of the 1997 and 2001 incidents. But Tharp continued to ignore Byyny's preference for upperclassmen hosts. It wasn't until 2003 that Life Skills classes became mandatory for scholarship student-athletes. The revised "Student Host Form" still did not mention that it was inappropriate to provide alcohol to recruits or expose them to other risky situations. And Barnett remained reluctant to make some changes to the recruiting program, including the imposition of a recruit curfew, saying it would hinder his ability to attract blue-chip recruits because other schools did not impose a curfew.

In his deposition, Chichester testified that Barnett indicated he could not control the actions of recruits and therefore could not be held accountable for those actions. Chichester also testified it was his impression that Barnett felt the December 7, 2001, incident was nothing more than women showing recruits a good time and that it happened all over the country. The coach, Chichester testified, was frustrated at how difficult it was to get recruits admitted because of high University academic standards.

Barnett came to the defense of one of the two recruits who allegedly sexually assaulted Lisa Simpson on December 7, 2001. Other University officials, concerned about campus safety, recommended that Barnett halt his pursuit of the prospect. Barnett refused to do so. He told the Commission he was simply trying to allow due process to run its course and to protect the rights of the recruit.

Barnett also did not assume the responsibility of personally briefing individual hosts about proper behavior. Barnett told the Commission he now wishes he had talked personally with the hosts rather than delegating that authority, but he also said the CEO of an organization cannot micro-manage everything.

All of these matters lead to the conclusion that, at least until March 2004, the University lacked "institutional control" of football recruiting due to inadequate policies and procedures, inadequate

monitoring and communication of existing policies and procedures, and inappropriate delegation of responsibility for supervision of recruits to student-athletes who were not given adequate training or authority to be held responsible for recruit conduct.

The Commission would be remiss if it did not acknowledge the positive steps taken by Barnett after his return to the University in 1999. He created and annually updates a Player Handbook that includes material on alcohol abuse, sexual assault and acquaintance rape. He has handed down 48 suspensions to 34 different players, including revoking spring semester scholarships for the four players involved in the events of December 7, 2001. He also forbade those players from ever hosting again.

In the final analysis, because football programs and athletic departments nationwide are allowed to operate outside an institution's mainstream hierarchical structure, the potential for abuse and misconduct is great. Here, the football coach and athletic director operated with little oversight from the president or chancellor.

In summary:

- Byyny failed to follow through on his directives to increase controls and supervision of recruits first in 1997 and again in 2001. He allowed the Athletic Department to operate autonomously for years, and consequently failed to implement the University's stated goal of putting academics above winning on the playing field. Applying the NCAA's "Principles on Institutional Control," the Commission finds that until recently the chancellor exerted little if any authority or oversight over the Athletic Department.

- Tharp evaded and ignored repeated directives to implement policy changes and failed to place appropriate boundaries around the football coach. The athletic director espoused a philosophy of "plausible deniability" when faced with accusations of misconduct by student-athletes and employees; isolated himself from his staff and has not given his full attention to his responsibilities; contributed to the Athletic Department's isolation from the rest of the campus; and failed to provide adequate sexual-assault and sexual-harassment prevention training for employees and student-athletes.

- Barnett has been widely praised for being a strong leader and a firm disciplinarian. He continues, however, to resist some recruiting changes and demonstrates an unproductive defensive attitude. He and his coaching staff provided insufficient supervision of recruits, and he did not follow proper protocols regarding sexual assault and sexual harassment on at least two occasions.

Dr. DiBiaggio told the Commission that university presidents must regain control in order to restore respectability to intercollegiate athletics. And Myles Brand, the head of the NCAA, believes that coaches must be held accountable for off-the-field behavior of players and recruits.

This Commission endorses both suggestions, and through its finding and recommendations offers guidance on how to achieve those goals.

Findings & Recommendations:

Athletic Department Integration

Finding:

3) The Athletic Department has long been allowed to operate without strong oversight from the chancellor or president. Dating back to 1998, the athletic director and football coaches have largely disregarded or been slow to respond to directives from the chancellor to tighten up the recruiting process.

Recommendations:

3-A) Integrate the administration of the Athletic Department with the University administration. Restructure oversight of the Athletic Department, according to the proposal made by the Boulder Faculty Assembly, with the athletic director reporting directly to the provost, who should work in close cooperation with the vice chancellor for Student Affairs. The president and chancellor should maintain strict supervision over the management of the Athletic Department.

3-B) Create an Athletic Governing Board, as proposed by the Boulder Faculty Assembly, to operate in an advisory capacity to the provost, overseeing all aspects of Athletics Department policy and operations.

3-C) The University's faculty representative to the NCAA should be a regular faculty member. The provost currently serves as the faculty representative.

Student-Athlete Discipline/Notification Protocols

Finding:

4) There is no functional system for notifying upper-level administrators of disciplinary actions or sanctions against student-athletes. Documentation and reporting of student-

athlete disciplinary actions are inconsistent and often untimely. For instance, players involved in the December 7, 2001, incident were allowed to play in the Fiesta Bowl. The Athletic Department also appears not to be following a 2002 chancellor's request that the athletic director notify Judicial Affairs whenever a student-athlete violates team rules, NCAA rules or the University's Code of Conduct.

Recommendations:

4-A) Require all disciplinary matters to be put in writing and resolved in a timely fashion.

4-B) Require coaches to maintain detailed disciplinary records for violations of the Student Code of Conduct. Compile a monthly report for the athletic director, vice chancellor, provost and chancellor. Publish a report at the end of each academic year documenting the number of infractions and their sanctions. The records also must be delivered to each supervisor annually during self-evaluation.

4-C) Require coaches or Athletic Department personnel to report all violations by student-athletes of the Code of Conduct to the Office of Judicial Affairs within 24 hours. Create a system for timely notification of violations of the Code of Conduct to upper-level administrators.

4-D) Develop and implement sanctions for coaches who fail to identify, document and provide appropriate discipline for infractions.

Finding:

5) There are no protocols or guidelines concerning how, when or if student-athletes should notify coaches about contact with law enforcement or when confronted with potential civil penalties.

Recommendation:

5-A) Establish written guidelines regarding the notification of coaches about criminal or civil allegations for inclusion in Player Handbooks and distribution to all players.

CULTURAL INFLUENCES ON THE ATHLETIC DEPARTMENT

In the words of Chancellor Byyny, this is a "teachable moment" that has created an opportunity to inspect, evaluate, transform and improve.

But before change can occur, the University needs a clearer understanding of the scope of sexual assault and alcohol abuse, both on and off the Boulder campus, and of the academic and social culture that exists within the Athletic Department. Campus-wide, the Office of Judicial Affairs issued 2,068 disciplinary sanctions for alcohol use, 327 sanctions for drug use, five for sexual assault and 97 for sexual harassment in 2002-03. The University Police Department also logged 357 alcohol arrests and summonses, 79 drug arrests and summonses, and 22 sex-offense arrests in 2003.

Lisa Simpson's stepfather, Rick Burd, told the Commission that a number of women have told him and his wife that they have been sexually assaulted. In a May 9, 2002, letter to Athletic Director Tharp, the CU Parents Association raised this question: "We know that only a few athletes are involved in this (December 7, 2001) incident, but we now wonder how many other incidents like this there might be that go unnoticed, except by the participants."

Until February 2004, two incidents did go unnoticed.

In the first incident, former place-kicker Katie Hnida, the only woman ever to play football as a Buffalo, alleged in a February *Sports Illustrated* article that she was raped by another player in 2000. Hnida had not reported the allegations to police. Coach Barnett said he was unaware of an assault until the article appeared. Barnett said, however, that he had verbally disciplined a player for calling Hnida a sexually derogatory name and that position coaches also put the player through extra drills.

But by not reporting the harassment to the Office of Sexual Harassment, Barnett violated University sexual harassment policy. The policy states:

> "Any supervisor who experiences, witnesses or receives a written or oral report or complaint of sexual harassment or retaliation shall promptly report it to a campus sexual harassment officer."

The University's Code of Conduct did not require mandatory reporting of the harassment to the Office of Judicial Affairs, although in 2002 Byyny directed the athletic director to report any student-athlete violations of the Conduct Code to Judicial Affairs. In this case, that would have required the coach first to have informed the athletic director, something he did not do.

Barnett's failure to report to the Office of Sexual Harassment demonstrates an inability to differentiate violations of team rules that may be handled internally from misconduct that gives rise to the duty to involve other University authorities. In addition, Barnett's response to a reporter's question at a February 17, 2004, news conference was inappropriate and insensitive:

> "Well, it was obvious Katie was not very good. She was awful. OK. And so guys – you know what guys do? They respect your ability. I mean, you could be 90 years old, but if you can go out and play, they respect you. Well, Katie was a girl. And not only was she a girl, she was terrible. OK. And there is no other way to say it. She couldn't kick the ball through the uprights."

Equally disturbing is an e-mail from Barnett to Tharp earlier that day: "How aggressive should I be re; katie….sexual conquests by her etc." [10] The Commission received a copy of this correspondence after Barnett's April 13, 2004, appearance and was unable to question him about it. The Commission also was unable to ask the coach about the perception that he treats top-performing players with greater leniency than other players.

The second incident involves "Jane Doe," the Athletic Department employee who alleges a player raped her in September 2001. Director of Sports Medicine Steve Willard guided Jane Doe to victim services and tried to accommodate her wishes.

Willard facilitated a meeting with Jane Doe, himself and Barnett. Willard and Barnett say Jane Doe requested the meeting, although Jane Doe disputes that. Regardless, Jane Doe now claims that during the meeting Barnett intimidated her into not pressing charges.[11] Undisputed is the fact that Barnett told Jane Doe he would support the player if the situation turned into a case of "he said, she said."

That neither Willard nor Barnett reported the matter to the athletic director or the Office of Judicial Affairs illustrates a recurring failure in the reporting process. Tharp said he did not learn of this incident until January 2004.

The experiences of Katie Hnida and Jane Doe also indicate that Athletic Department and coaching personnel took greater pains to provide referrals and services to male players, including arranging counseling for Jane Doe's perpetrator, than to victim care and to following proper reporting protocols.

While Barnett is to be praised for his Player Handbook and the material it covers, including alcohol, drugs, acquaintance rape and rape-prevention strategies, the Hnida and Jane Doe incidents underscore the need for ongoing, interactive training by outside professionals both for staff and student-athletes. For example, all acquaintance rapes are "he said, she said" situations and do not warrant a lesser response than stranger rapes. These incidents also highlight how the football program and Athletic Department remain insulated from the many cultural changes happening around them, including advancements in the handling of sexual assault and harassment matters.

Academic & Institutional Isolation

Without question, college football and the 85 scholarships available through the University of Colorado offer many young men an educational opportunity they might otherwise not be able to afford. But over the years, the University's football program and Athletic Department – like so many across the country – have become isolated and cut off from the rest of the institution. They have operated with little oversight or control from the Office of the Chancellor, giving rise to the culture that exists within the department today and also allowing the academic performance of athletes to lag. The football program spends almost $425,000 a year on special academic counseling and tutoring for players.

In recent years, the University's overall graduation rate has been about 67 percent, while the rate for football players has ranged from 36 percent to 53 percent. The football program interprets the data differently, saying that in 2003, 24 of 26 players who exhausted their eligibility graduated, for a rate of 92 percent. In 2004, the rate will be 82 percent, with 14 of 17 players who exhausted their eligibility

graduating. Barnett told the Commission the NCAA has recently named the University as one of the top 20 schools in the country for football-player graduation.

To end the department's segregation and improve academic performance, a University-wide Graduation Committee on Athletics called in June 1998 for more complete integration of student-athletes into the academic fold.[12] It urged the Athletic Department "to place more emphasis on academic successes and the importance of graduating, by developing an internal ethos which places a high value on academic achievement and success."

The committee also recommended that the "Athletic Director's and the coaches' annual evaluations include an assessment of how well they are meeting explicit expectations regarding the academic achievement and graduation rates of student athletes in their programs. At a minimum, student-athletes' graduation rates should be at least as high as those for non-athletes, and it may be reasonable to expect even higher rates in some programs."

Recommendations made this month by the CU-Boulder Faculty Senate Assembly also offer valuable suggestions toward fully integrating athletics into the University.

Alcohol Abuse & Sexual Violence

As noted earlier, alcohol remains a pervasive problem on American college campuses generally and in Boulder specifically. Nearly 63 percent of CU-Boulder students have been classified as "binge drinkers," according to Dr. Robert Maust, chairman of the University's Standing Committee on Substance Abuse, compared with 44 percent nationwide. Sixty bars, night clubs and liquor stores sell alcohol within a one-mile radius of campus, and in some instances, beer is cheaper than water, Dr. Maust told the Commission. Dr. Henry Wechsler, a lead researcher with the Harvard School of Public Health's College Alcohol Study (CAS),[13] says that if a university competes in Division I athletics and has fraternities and sororities, it will probably have a higher incidence of binge drinking. A recent CAS report found that in 90 percent of all college-age sexual assaults, alcohol was involved. Outside the University environment, the figure is closer to 50 percent.

Rape is the most common form of violence on American college campuses today, according to a U.S. Department of Justice study.[14] Ninety percent of college rapes are acquaintance rapes. A separate study estimates 350 sexual assaults a year for every 10,000 women enrolled in a university. CU-Boulder's female student population is 13,700. And as the Commission heard from various experts, only an estimated 5 percent to 35 percent of victims actually report the crime to authorities. Most victims cite fears of being vilified – of being blamed, not believed, embarrassed or publicly shamed – as reasons for not reporting. Many also blame themselves, especially if they were drinking.

Findings & Recommendations:

Sexual Assault/Sexual Harassment

Finding:

6) Athletic Department personnel are not well-versed in current research and practices related to sexual assault, sexual harassment and substance abuse prevention and intervention. Coaches and other staff members are improperly deciding whether sexual assault, sexual harassment or alcohol infractions have occurred. They are making untrained, inconsistent and at times improper decisions about victim and alleged perpetrator interventions and reporting.

Intervention to prevent sexual misconduct is not a broadly accepted part of student culture. Some student-athletes remain inadequately trained when, as bystanders, they witness inappropriate sexual behavior.

Recommendations:

6-A) Solicit specific proposals from the director of the Office of Victim Assistance. The director submitted a comprehensive set of suggestions to the Commission and they are attached.[15]

6-B) University sexual-assault policies and procedures need review and updating, and their implementation needs tighter oversight. Ensure the protocols mirror those for sexual harassment, are consistent from department to department and establish clear procedures for reporting and for victim and perpetrator intervention.

6-C) The Office of Victim Assistance or Office of Sexual Harassment must take the lead on any intervention. No interventions are to occur without their direct involvement.

6-D) Consider modifying sexual-assault reporting protocols to allow for the use of anonymous identifiers in the internal reporting of sexual assaults.

6-E) Direct the chancellor to assign a small team of experienced campus leaders with expertise in sexual assault and sexual harassment to create a comprehensive plan for first response to allegations of sexual assault.

6-F) Provide sophisticated, ongoing and mandatory training to University administrators, faculty and staff, senior Athletic Department officials, all coaches and trainers, and student-athletes in sexual assault, sexual harassment and alcohol abuse awareness and prevention, including bystander education. Use campus resources and external experts to provide the training.

6-G) Introduce the MVP Program (Mentors in Violence Prevention Program) of the National Consortium for Academics and Sports to all student-athletes in celebration of National Student-Athlete Day, an NCAS program that recognizes the leadership of student-athletes and their service to the community.

6-H) To prevent conflicts of interest for the University Counsel's Office, create a separate legal position within the Office of Victim Assistance to advise victims of their legal rights and options.

6-I) Maintain the telephone tip-line established by the Commission to make it easier for victims, witnesses or others with knowledge of misconduct to anonymously report those activities.

Alcohol

Finding:

7) Alcohol and drug use are considered one of the biggest problems facing universities across the country and here in Boulder. At the University, weekend drinking begins on Thursday night because of the lack of classes on Fridays. The Boulder and campus police departments also do not aggressively enforce under-age drinking laws.

Recommendations:

7-A) Implement the new "two strikes" rule for alcohol infractions. Students who receive two alcohol-related citations would be suspended. Parents would be notified after the first offense. Provide a system for appropriate referrals to alcohol treatment when necessary after a first strike.

7-B) Return to an academic schedule that includes substantive class work on Fridays in an effort to end a Thursday night start to the weekend.

7-C) Support more aggressive enforcement of laws prohibiting underage drinking, including sanctions against landlords who regularly rent to students who host large parties where alcohol is available to underage students. Support more aggressive ticketing of underage drinkers.

Academics

Finding:

8) About 73 percent of the football team was admitted to the University with an Index score below the recognized score required of other students. The Index score is based on SAT or ACT scores and high school grade-point average or high school class ranking. NCAA minimum standards for admission are a combined 820 SAT score and 2.5 core curriculum grade-point average.

Recommendations:

8-A) Decrease over time and according to a formula the percentage of football players admitted below the Index-score minimum and through an admissions "window." Explore the use of alternative assessment tools for admission to the University.

8-B) Establish a "floor" Index score for admission of student-athletes that is no greater than 10 percentage points less than the Index score for the general student body. The minimum Index score for admission to the University currently is 103.

8-C) Set a specific goal for graduation of football players and demonstrate progress towards that goal every year.

8-D) Encourage and enable student-athletes to spend more time with other students. Direct the Faculty Athletic Committee to meet regularly with the athletic director and football and basketball coaches. Encourage faculty to include football players in group discussions or social events. Require freshmen football players to attend regular student orientation at the beginning of freshman year. Require Life Skills classes for all freshmen, not just freshmen student-athletes on scholarships. Small-class courses should focus on values clarification, critical thinking and peer culture, and include material and presentations from on-campus sexual-assault and substance-abuse prevention programs.

Finding:

9) Athletic Department compensation does not correspond to the department's stated priorities of education over winning because it fails to reward the athletic director or coaches for academic achievements. In Coach Barnett's 2003 amended employment contract,[16] the only reference to academics is as follows: "Coach Barnett shall … encourag(e), in conjunction with the University faculty and administration, the academic progress of student-athletes towards graduation … " In his August 2003 request to Chancellor Byyny for a performance bonus, Athletic Director Tharp cited nine achievements in 2002-03, and only one referenced academics (improved grade-point averages and graduation rates).[17]

Recommendation:

9-A) Tie performance reviews and compensation for coaches and athletic director to recognized standards for measuring student-athlete retention, graduation rates and academic progress. The recognized standards for measurement of graduation rates are defined by the U.S. Department of Education's National Center for Education Statistics and are reported in the Integrated Postsecondary Education Data System. Academic incentives should be financially equal to incentives for winning.

Gender & Racial Equity

Finding:

10) Based on a review of 2001 and 2003 self-studies of gender-equity issues, many male and female employees believe the Athletic Department atmosphere is less supportive of women than it is of men. Perceptions of discrimination undermine employee morale and student-athletes learn to undervalue the workplace abilities of women. As of September 2003, 77 percent of coaches and 68 percent of Athletic Department administrators were male. Jeannie Dixon, a former Athletic Department employee, told the Commission that Tharp once told her that the department has and always will be run as a "good old boys" network. But Megan Rogers, a recruiting assistant for the football program, said she has been treated with nothing but respect. Anne Kelly, the University's women's golf coach, concurred in a May 5, 2004, letter to the Commission. She said she receives the same salary, budget and benefits as her male counterparts.

Recommendation:

10-A) Set goals to achieve gender equity within the Athletic Department in hiring, pay, promotions and benefits.

Finding:

11) In 2003-04, there were just 85 African-American freshmen on the Boulder campus and 448 African-American undergraduates out of more than 24,000 undergraduates. Forty percent of the football team is composed of African-American players.

Recommendations:

11-A) Encourage campus-wide recruitment of diverse student populations to enhance the educational experience of all students and increase interest in the school by African-Americans and other minorities.

11-B) Recommit to a community-outreach and mentoring program that provides role models for student-athletes in a variety of areas, including law enforcement. Mentors should reflect or be sensitive to the race and ethnicity of student-athletes.

11-C) Require the inclusion of information and material sensitive to issues of race and discrimination in all training programs.

Finding:

12) The University is presently the subject of intense public scrutiny and negative media coverage..

Recommendation:

12-A) Launch a promotional campaign to publicize the positive achievements of students, athletes and faculty.

CONCLUSION

The mandate for change must come from the top. The Board of Regents and the President's Office should take responsibility for setting the direction of the University of Colorado's philosophy of firm institutional control of athletics by reaffirming the Knight Commission Statement of Principles. The Board of Regents should explicitly endorse and reaffirm presidential authority in all matters of athletics governance.

The University is a fine academic institution with a number of highly regarded and sophisticated programs. The Commission recognizes that inadequate public financial support for the University is requiring an extraordinary amount of time and energy on the part of top administrators. But it is time for the administration to exert more institutional control over the Athletic Department.

INDEXES

COMMISSION MEETING DATES & WITNESSES

March 2, 2004
No witnesses at this meeting

March 9, 2004
John DiBiaggio, Special Assistant to University of Colorado President Elizabeth Hoffman
Jane Cracraft, Private Investigator
Fred Ramirez, Private Investigator
Steve Snyder, Private Investigator
Susan Payne, Director, Colorado Crime Stoppers

March 16, 2004
Karen Morrison, University of Colorado Associate Athletic Director/Director of NCAA Compliance
Lindsey Babcock, University of Colorado Assistant Director of Compliance
Robert Maust, chairman, University of Colorado Standing Committee on Substance Abuse

March 23, 2004
Phil DiStefano, University of Colorado Provost and Executive Vice Chancellor for Academic Affairs
Ron Stump, University of Colorado Vice Chancellor for Student Affairs
Matthew Lopez-Phillips, Director, University of Colorado Judicial Affairs
Elease Robbins, University of Colorado Associate Vice Chancellor for Student Affairs, Dean of Students
Anne Munch, Executive Director, Colorado's Ending Violence Against Women Multidisciplinary Training Team
Theresa Wroe, Prevention Education Coordinator, Colorado Coalition Against Sexual Assault

March 30, 2004
Janine D'Anniballe, Executive Director, Moving to End Sexual Assault (MESA)

April 6, 2004
David Hansburg, University of Colorado Director of Football Operations
Mark Beckner, Chief, Boulder Police Department
James Fadenrecht, Chief, University of Colorado Police Department
Joe Pelle, Sheriff, Boulder County
Billi Hazel, former University of Colorado student

April 7, 2004
Brian Cabral, University of Colorado Interim Head Football Coach
Daniel Jolly, freshman football player
Joel Klatt, sophomore football player
Dusty Sprague, freshman football player
Sam Wilder, senior football player

April 12, 2004,
Kathy Redmond, Founder, National Coalition Against Violent Athletes
Ric Porreca, University of Colorado Senior Vice Chancellor and Chief Financial Officer
Jon Burianek, University of Colorado Senior Associate Athletic Director for Business Affairs
Judson Herd, University of Colorado Assistant Vice Chancellor and Controller
Steve Lower, President, Hardbodies Entertainment

April 13, 2004
Gary Barnett, University of Colorado, Head Football Coach

April 19, 2004
Richard Byyny, University of Colorado-Boulder Chancellor
Amy Robertson, University of Colorado Director of Victim Assistance

April 23, 2004
Richard Tharp, University of Colorado Athletic Director
Mark and Ruth Ackermann, parents of football player
Paul Eberhart, parent of football player
Gary Klatt, parent of football player
Patty Klopfenstein, parent of football player
Jodi Mossoni, parent of football player
Nancy Polumbus, parent of football player
Renee Robinson, parent of football player
Dave Tufts, parent of football player
Megan Rogers, Recruiting Assistant, University of Colorado Football Program
Don Spicely, Officer, Boulder Police Department
David Bruno, Attomey to Don Spicely
Steve Willard, Director of Sports Medicine, University of Colorado Athletic Department

April 26, 2004
Elizabeth Hoffman, President, University of Colorado
Sarah Hering, student, Students Advocating for Fair and Equal Treatment (SAFE-T)
Stacey Kellogg, student, Students Advocating for Fair and Equal Treatment (SAFE-T)
Shalini Swaroop, student, Students Advocating for Fair and Equal Treatment (SAFE-T)

May 4, 2004
Karen and Richard Burd, mother and step-father of Lisa Simpson
Jeannie Dixon, former University of Colorado Assistant Athletic Director for Community Relations
Col. Debra Gray, Vice Commandant of Cadets, United States Air Force Academy
Lt. Col. Chris Luedtke, Director, Commander's Action Group, Assistant Professor of Military Strategic Studies, United States Air Force Academy

May 11, 2004
No witnesses

May 14, 2004

DOCUMENTS REVIEWED DURING THE INVESTIGATION

Below is a generalized accounting of documents reviewed by the Commission:

Academics

- Graduation rates for student-athletes
- Life Skills syllabus

Admissions

- Admissions policies for student-athletes

Alcohol and Drugs

- Folsom Field alcohol policy
- Alcohol/drug website materials
- University statements and statistics
- Harvard School of Public Health College Alcohol Studies (1993, 1997, 2000)

Athletic Department

- Ambassador Program rosters and guidelines
- Diversity Report
- Mission Statement and Department Vision
- Annual performance ratings (1996-2003)

Depositions and Exhibits (Lisa Simpson v. University of Colorado)

- William R. Abbott
- Gary Barnett
- Karen D. Burd
- Richard Byyny
- Robert Chichester
- Timothy P. Delaria
- James Fadenrecht
- David Hansburg
- Elizabeth Hoffman
- Michelle Irving
- Mary T. Keenan
- E.J. Kreis III
- James Martin

- Karen Morrison
- Vincent Andrew Okruch
- Redacted
- Redacted
- Redacted
- Redacted
- Redacted
- Redacted
- Redacted
- Redacted
- Elaine Rottinghaus
- Lisa Simpson
- Ronald J. Stump
- Richard A. Tharp
- Mary Jo White
- Brian Winkelbauer

Financial

- Financial and compliance audits of the Athletic Department
- Budgetary summary for Athletics Department
- Internal audits of Athletic Department (1999-present)
- Athletic Department annual budget (2003-04)
- Football program budget (2003-04)
- Budgeted revenue and expenses by sport (2003-04)
- CU Foundation account balances

Football Program

- Recruiting guidelines
- Official recruiting visit itinerary
- Official visits roster (2000-04)
- Player Handbook
- Faculty resignation letters
- Suspensions (1999-2004)
- Self-reported ethnic make-up of football players

Judicial Affairs

- Summary of disciplinary actions against football players

NCAA

- NCAA audit final report
- NCAA general rules and recruiting guidelines
- Big 12 Conference Handbook
- University compliance log
- University violations and waiver chart
- University NCAA compliance manual

Personnel

- Evaluations/performance ratings for Byyny, Tharp and Barnett

Phone Records

- Nathan Maxcey

Sexual Harassment/Sexual Assault

- University Sexual Assault/ Intimate Partner Violence Response Protocol
- Sexual assault statistical report
- Sexual harassment policies and procedures, including Athletic Department protocols
- Sexual harassment statistical report

Travel and Payment Vouchers

- Food, lodging, mileage and entertainment expenses for recruiting visits

University

- Administrative organizational chart
- Ralphie's Guide to Student Life

Other documents included copies of e-mails, hand-written notes, personnel records and policy manuals.

COMMISSIONER BIOGRAPHIES

Co-Chairman Peggy Lamm

Co-Chairman Lamm is the executive director of the Bighorn Center for Public Policy in Denver. Lamm also chairs the Board of Trustees for Adams State College and is the former chair of the Colorado Commission on Higher Education. Lamm is a former member of the Colorado House of Representatives. She earned a Bachelor of Science degree from Emporia State University.

Co-Chairman Joyce Lawrence

Co-Chairman Lawrence served as president of the Pueblo City Council and four terms in the Colorado House of Representatives. Lawrence served on the Health, Environment, Welfare and Institutions, Transportation/Energy, Education and Information & Technology committees, as vice chair of the Judiciary Committee and as chairman of the Capital Development Committee. She graduated from Borgess School of Nursing, earned a B.S.N. from the University of Michigan and an M.B.A. from the University of Phoenix.

Commissioner Jean Dubofsky

Commissioner Dubofsky is an attorney in private practice in Boulder specializing in appellate law. Dubofsky served as a justice of the Colorado Supreme Court from 1979 to 1987. Dubofsky was the lead counsel in the successful challenge against Amendment 2, Colorado's anti-gay constitutional amendment. Dubofsky earned her undergraduate degree at Stanford University and her law degree from Harvard Law School. She has an honorary doctorate from the University of Colorado.

Commissioner Jean McAllister

Commissioner McAllister is the executive director for the Colorado Coalition Against Sexual Assault. McAllister has served on the coalition's board of directors since 1994, including four years as chair of the board from 1996 to 2000. McAllister most recently was the program administrator for the Colorado Department of Human Services' Domestic Abuse Assistance Program. She earned a B.A. from the University of Northern Colorado and a master's degree from the University of Denver.

Commissioner Phillip H. Porter Jr.

Commissioner Porter is a bishop and founder of All Nations Church of God in Christ in Aurora. Porter is the former chairman of the board of Promise Keepers. Porter worked for the Colorado Civil Rights Commission and is active in Seniors Inc., Open Door Youth Gang Alternatives, Citizens Concerned About Minorities in Aurora and several ministerial alliances. He integrated and earned a B.A. from Phillips University and attended the University of Denver, Denver Seminary, and Inter-Denominational Seminary in Atlanta.

Commissioner David D. Powell Jr.
Commissioner Powell is an employment attorney and shareholder with the Denver law firm Brownstein, Hyatt & Farber. He co-chairs the Employment Practice Group. Powell earned a B.A. from the University of Santa Clara and a law degree from the University of California at Los Angeles. Before entering private practice, Powell served as a deputy district attorney in the Denver District Attorney's Office and worked as a law clerk for the Honorable John L. Kane Jr. of the United States District Court in Denver.

Commissioner Luis Rovira
Commissioner Rovira served as a Denver District Court judge from 1976 to 1979 and on the Colorado Supreme Court from 1979 to 1995, the last five years as chief justice. Since retirement, Rovira has been associated with the Judicial Arbiter Group, which specializes in mediation and arbitration cases. He earned undergraduate and law degrees from the University of Colorado.

Commissioner Jacqueline St. Joan
Commissioner St. Joan is an attorney with expertise as a special advocate for children in high-conflict divorce cases. As a former Denver judge, St. Joan also specializes in alternative dispute resolution and conducts family law arbitration and appeals. St. Joan is a part-time instructor at Metro State College and serves on the Colorado Bar Association's Executive Council of the Family Law Section. St. Joan was the first president of Project Safeguard. She earned a law degree from the University of Denver and a master's degree from the University of Colorado.

ACKNOWLEDGEMENTS

The Commission would like to acknowledge the following for their contributions:

- The Commission staff: Charles S. Brown Jr., Evan Dreyer, Andrea Lee, and Becky Lennahan for many long hours of hard work spent furthering the Commission's efforts; Assistant Attomeys General John Sleeman and Nancy Wahl for their sound legal advice; private investigator Steve Snyder for interviewing many people in a short period of time; and editor Michelle P. Fulcher for reviewing the report.

- The city and county of Broomfield, for providing facilities and staff support for Commission meetings.

- Colorado Crime Stoppers Inc., particularly Susan Payne, and the Colorado Department of Public Safety, for helping to establish the Commission's tip-line. International Women's Alliance, COURAGE and Women's Resource Center for posting fliers about the tip-line around campus.

- The law firm of Littler, Mendelson P.C., and particularly J. Daniel Rodriguez, Stacy Hines, and Beth Kellerman for providing invaluable assistance in digesting and managing the significant amount of documentary information that the Commission received.

- The law firm of Lohf, Shaiman, Jacobs, Hyman, & Feiger for providing office space and staff support for the Commission.

- The Commission's contact at the University of Colorado, Jeremy Hueth, for his work in obtaining information requested by the Commission.

DRAFT

A PROPOSAL FOR REFORM OF INTERCOLLEGIATE ATHLETICS AT THE UNIVERSITY OF COLORADO AT BOULDER

Submitted by the Special Committee on Athletics Reform
Boulder Faculty Assembly

May 6, 2004

E. Scott Adler, Associate Professor of Political Science, *Chair*
Elizabeth Bradley, Professor and Chair of Computer Science
Theodore P. Snow, Professor of Astrophysical and Planetary Sciences
Barbara Bintliff, Nicholas Rosenbaum Professor of Law and BFA Chair, *member ex officio*

Preamble

The faculty of the University of Colorado at Boulder recognizes that intercollegiate athletics can play an important and beneficial role in a vibrant educational community. For this to happen, the campus must have an athletic department that advances the mission of the University and shares the faculty's values and priorities for higher education. Unfortunately, intercollegiate athletics has come to operate almost independently of the academic enterprise, and has become dismissive of the primary mission of the institution. This is an intolerable situation. Athletics must be restored to its role as a component of, and not separate from, the academic mission of the university. It is the obligation of the faculty and administration of this university, life-long educators and leaders in academe, to use the recent events highlighting problems within the Athletic Department as an impetus to meaningful and lasting reforms in the management and oversight of intercollegiate athletics. This document is our proposal for such reforms.

By offering this document, we do not pass judgment on the personnel of the UCB Athletic Department or take a position about the allegations made against the department or certain student-athletes. We recognize the underlying problems that have arisen through the allocation of resources and efforts expended to develop a major intercollegiate sports program. We are proposing a new model for oversight of the intercollegiate athletics programs that will integrate the Athletic Department and the student-athletes more fully into the academic life of the campus, while establishing safeguards and controls that will help avoid predicaments such as those we face currently from arising in the future.

The Role of Athletics at the University

The mission of CU-Boulder is:

> to advance and impart knowledge across a comprehensive range of disciplines to benefit the people of Colorado, the nation, and the world by educating undergraduate and graduate students in the accumulated knowledge of humankind, discovering new knowledge through research and creative work, and fostering critical thought, artistic creativity, professional competence, and responsible citizenship.

This mission is primarily carried out through the academic programs of the university, which are and must remain paramount among the many activities and initiatives in which the institution engages.

Participation in athletics can teach teamwork and cooperation; reinforce the importance of self-discipline as learned through practice and repetition; require memorization, and synthesis and analysis of complex information; demand quick decision-making and clear communication; and give focus and structure to the participants' lives. The knowledge and skills learned through participation on an athletic team translate directly to the

academic sphere, and are valuable components of a complete education. Athletics can also be a highly visible outreach program for the university, and can build a sense of community among students, faculty, staff, alumni, and the public.

However, the lessons learned through athletics can only fit within the campus mission and complement academic lessons when the Athletics Department operates like all other campus departments, in a supporting role to the academic endeavor. Any other arrangement will subvert the educational experience of the student-athletes and create the kind of autonomous Athletics Department found at UCB today. The student-athletes will be exploited for their physical abilities and their education will become a subsidiary activity. The welfare of UCB's student-athletes is a matter of great concern to the faculty. We are deeply committed to providing the best educational experience for all our students.

Moreover, what should not be forgotten is that a winning football or basketball program has never and will never boost the academic reputation of a university. To the contrary, it has been proven time and again that excessive emphasis on big-time college athletics may result in misplaced priorities and unethical and even illegal behavior that cause embarrassment, comprise the integrity of often respectable and talented educators, waste untold sums of money, and unnecessarily tarnish the overall reputation of what is otherwise a world-class teaching and research institution.

Dispelling the Myths about College Athletics

The challenges the CU Athletic Department and the University are facing currently are not unique to our program nor are they exclusively confined to athletics. The problems result from a combination of causes, including an over-dependence of athletics on commercial interests and influences, a win-at-all-costs atmosphere, a perceived need to participate in the "arms race" of better facilities and higher coaching salaries as a means of staying competitive, the recruitment of athletes who do not meet the normal academic standards of the institution, and insufficient oversight by the university administration and faculty. All of these issues face nearly every NCAA Division I university.

Dr. James Duderstadt, former president of the University of Michigan and an authority on big-time college athletics, very much supports the belief that the issues and problems plaguing intercollegiate athletics have become extremely damaging to the mission of higher education. He wrote in the new epilogue to his book, Intercollegiate Athletics and the American University:

> "*my growing conviction [is] that big-time college sports do far more damage to the university, to its students and faculty, its leadership, its reputation and credibility, than most realize—or at least are willing to admit.... Far too many of our athletics programs exploit young people, recruiting them with the promise of a college education—or a lucrative professional career—only to have the majority of Division 1-A football and basketball players achieve neither. Scandals in intercollegiate*

athletics have damaged the reputations of many of our colleges and universities. Big time college football and basketball have put inappropriate pressure on university governance, as boosters, politicians, and the media attempt to influence governing boards and university leadership. The impact of intercollegiate athletics on university culture and values has been damaging, with inappropriate behavior of both athletes and coaches, all too frequently tolerated and excused. So too, the commercial culture of the entertainment industry that characterizes college football and basketball is not only orthogonal to academic values, but it was corrosive and corruptive to the academic enterprise."

It is our conviction that the financial pressures, the lure of nationwide exposure, the extraordinary support of ardent boosters, and the perquisites and status of a winning athletic program have, over the years, eroded the once-clear standing of academics as the fundamental purpose of the university and allowed the pursuit of athletic fame to overshadow educational programs.

The fact is that several widely accepted beliefs about the advantages of big-time college sports simply do not comport with reality:

Myth No. 1: Athletic Departments make money for universities.
This is very rarely the case and has never been true at the University of Colorado. At almost every Division I university (and at every university in Divisions II and III), the Athletic Department spends more money that it raises. Only in rare and short-lived instances have major college athletic programs run in the black, and to get there it often requires fancy accounting (i.e., shifting certain athletics-related expenses over to the university's general budget, etc.). It is almost always the case that Athletic Departments require significant annual infusions of funds from either the general budget of the university, student fees, or a direct state allocation.

At CU, the Athletic Department receives close to $1million annually from the Chancellor's budget, over $400,000 from the University president, and over $1.3 million from student fees, accounting for 7 to 10 percent of the Athletic Department's budget. And this does not include other subsidies that athletics receives in the form of licensing fees, infrastructure support such as buildings, campus physical space, and various other services that are not charged back to athletics.

Myth No. 2: Winning athletic programs result in financial contributions to universities.
There is no reliable statistical evidence that demonstrates this is true. In fact, to the contrary, there are a number of studies that show this relationship does not exist at all and that losing programs do not experience any appreciable loss in contributions to the university's general fund (see, for example, Unpaid Professionals, by Andrew Zimbalist – an economics professor at Smith College). There are isolated instances where winning football and basketball programs have resulted in temporary increases in giving specifically to the athletic departments, but that does not benefit the academic mission of the university.

Moreover, an important cost to the university is often overlooked in fundraising around college athletics – namely the "opportunity costs." For every donation that is earmarked for athletics, a potential donor to other programs is removed from the pool. In some instances, when campaigns for athletic fund-raising are directed at alumni who normally give to the general fund of their alma mater, increases in contributions to the Athletic Department actually coincide with decreases in giving to university's general funds.

Myth No. 3: A good athletic department helps the reputation of the university.
While there is some anecdotal evidence that shows that winning athletic programs can increase applications for admissions, this benefit is short-lived, and normally accrues to schools whose athletics reputations were weak prior to some singular success in sports that created increased visibility. Statistical studies have shown that in general, winning sports programs rarely result in a greater number of applications; do not result in any higher quality of applicant; and do not improve the admissions yield (the percent of admitted students who end up enrolling). Most importantly, athletic programs that encounter scandal and NCAA sanctions could very well experience severely damaged reputations, along with decreases in contributions to the academic general fund. We already know of one instance where a unit of CU-Boulder may be missing out on a major donation by a corporation that does not want its reputation tarnished by the football recruiting allegations. (For more complete information, see Zimbalist 2001 or the NCAA's report, "The Empirical Effects of Collegiate Athletics: An Interim Report.")

Proposals for Reform of the CU Department of Intercollegiate Athletics

For a reform effort to work, it must be initiated and guided by the highest levels of authority at CU — the Chancellor, the President, and the Regents. The faculty agrees with President Hoffman and Chancellor Byyny that UCB's athletic reforms should serve as a national model and see the recent football recruiting changes as a step in that direction. When asked how those reforms would affect CU's competitiveness on the playing field, the President and the Chancellor responded that there were higher principles than simply competing for star athletes. We are in agreement with this statement, too. This is precisely the viewpoint that should guide decisions for revamping the Athletic Department. However, meaningful reorganization of athletics at CU requires a wholesale transformation in how we think of the Athletic Department — the way it serves students, its fiscal relationship with the rest of the campus, and its place in fulfilling the educational mission of the university.

In November of 1992 the Regents of the University of Colorado adopted a resolution endorsing the principles of the first Knight Commission on Intercollegiate Athletics. Among those principles were calls for: improved progress toward degree and higher graduation rates of students on athletic scholarships; greater fiscal control of Athletic Departments; and a general increase in institutional authority and accountability over athletic programs. As far as we can tell, very little has actually been done at CU to advance these principles. We cannot simply wait for system-wide rules changes to trickle down from the Big 12 or NCAA before the university reasserts its authority over the

athletic program. The NCAA is an aggregation of its members and thus long-standing and meaningful change must bubble up from the bottom.

Like many other campuses around the country, diffusion of and confusion about duties has led to miscommunications about who is responsible for supervising the behavior of student-athletes and coaches. The result is that those with oversight cannot maintain adequate control, and often are not aware of the specific details of athletics management.

Adhering to academic values will allow UCB to regain control of its athletics program and serve as a model for the nation. Any university can be a leader in athletic reform; most won't because of a lack of will and fear of public reprisals. We at UCB have no choice; we must lead or be judged a failure in the eyes of the entire nation. Therefore, we submit the following proposals for athletic reform.

We propose a two-tiered set of reforms. One tier describes changes that should be made on campus as quickly as possible. The other tier is aimed at a national audience and, to be effective, will require the participation of many other universities, major athletic conferences, and the NCAA. Some of the proposals reinforce many of the positive things already occurring in the CU Athletic Department. Others are meant to reverse negative and disturbing trends.

Tier I Reforms:
Proposals for Immediate Changes

1. Ensure the well-being of all UCB student-athletes.

We must not forget that the students who come to UCB on athletic scholarships are, first and foremost, students. Our purpose is to make sure that the young men and women who enroll at the University of Colorado, athletes or not, attend class and study in a safe environment and leave with the knowledge and skills to prepare them for advanced degrees and/or the competitive work world. We must not bring students here who are not prepared to succeed, and we cannot set them up for failure when they arrive. UCB must do everything it can to ensure that the students who participate in intercollegiate athletics here are as qualified for admissions as all other students, and are able to keep pace with the demanding curriculum and educational requirements of a major research university. We must insist on a safe campus, where each student is respected and mechanisms are provided for peaceful dispute resolution. Student-athletes must be integrated fully into the campus life, to enhance their social and emotional development, which is crucial to a complete education. To this end, we propose the following:

a. Student-athletes must meet the same admissions standards as other students. While the Athletic Department does a very good job most of the time of recruiting students who are able to succeed in the rigorous academic environment of CU, this is not universally the case. Certain teams recruit an excessive number of students who barely meet the minimum standards for admission – these are students who are admitted through the "window." Whereas only about 10-15 percent of the entering class at CU is admitted

in such fashion, "window" admits may consist of more than 75 percent of some athletic teams. This would not be of concern in and of itself if we had evidence that these students were consistently performing and graduating at rates equivalent to the student body as a whole. However, they are not. Therefore, the use of the admissions "window" for athletes must be severely limited to those who have compelling, non-athletic-based qualifications. Students recruited and admitted to UCB with athletic scholarships should reflect the profile of the student body as a whole; that is, athletes should be admitted "through the window" in approximately the same proportion as the entire entering class. This should be calculated by team, not across the entire Athletic Department.

In addition, we recommend a review of the policies governing the use of continuing education courses to maintain athletic eligibility, and suggest that the review be in the context of a more comprehensive evaluation of the use of continuing education courses for matriculated students.

b. Involve faculty more actively in student-athlete recruitment. As admissions requirements are strengthened for athletes, faculty must assist in the recruitment process to help prospective students understand the challenges of university study and to assist the campus in its admissions decisions. We propose a formal collaboration between the Athletics Department, the Admissions Office, and the Boulder Faculty Assembly, in which faculty from each department will participate in the process of recruiting student-athletes. Faculty members will work with head coaches on a regular basis, to arrange meetings with athletic recruits and their parents (in person or by phone) to discuss academic programs, graduation requirements, and other aspects of the educational program.

c. Restrict the number of athletic scholarships and post-season play for teams with poor academic performance and graduation rates. In conjunction with the raising of admission standards for athletic teams, we propose the requirements that individual athletes make appropriate progress toward degree each year and teams graduate their athletes at rates consistent with that of the student body as a whole. Inability to meet these academic standards will result in loss of scholarships and/or ineligibility for post-season play. The NCAA Division I Board of Directors has just adopted a package of reforms that includes these very changes, we urge CU to be out in front on academic reforms by instituting them immediately and unilaterally.

d. Include student-athlete academic performance as a component of coaches' performance evaluations. One of the best ways to encourage strong academic performance by student-athletes, and discourage abuse of them, is to make clear to the coaches the consequences of academic failure. Coaches' yearly performance evaluations should include measurable goals and objectives tied to their teams' academic performance. Minimal standards will be set by the new Athletics Governing Board (see recommendations below) that will be based on the NCAA's new guidelines for evaluating graduation rates and progress toward degree.

e. Require every intercollegiate athletics coach attend one or more specialized academic support programs each year. Coaches have a strong and continuing relationship with the student-athletes in their sports, and are in a position to influence student behavior and attitudes. Coaches engage in teaching activities, both on and off the field, and often can spot a student experiencing academic difficulty before others would notice the problems. They can help the student-athlete to work through issues or encourage him or her to seek help earlier than other professionals. The coaches should be provided with on-going training, possibly through the Boulder Campus Faculty Teaching Excellence Program, in academic support topics. This training would also reinforce in the coaches their unique role in the educational process of student-athletes.

f. Create a handbook for coaches and athletic department personnel. A resource book should be developed for all for coaches and athletic department personnel that: provides information on how to monitor the academic progress of students; lists resources to which students in need can be referred; covers sexual harassment and sexual assault awareness and details responsibilities of campus personnel in reporting suspected cases; describes the organization of the campus and gives contact information for the various departments; and includes other relevant and necessary information. This should improve communications between coaches and student-athletes, and can make the Department more responsive to the needs of its students.

g. Review and revise all student-athlete handbooks.
A thorough review and revision should be undertaken of all student-athlete handbooks for every sport. Content should be standardized for those topics that apply to all student-athletes. In particular, standardized information should be provided that: lists services for students in need of academic, health, or emotional assistance; covers sexual harassment and sexual assault awareness, including listing policies and reporting requirements; describes the organization of the Athletic Department and campus and gives contact information for offices and personnel; explains class attendance policies, and requirements for requesting excused absences for competitions; and includes other relevant and necessary information.

2. Clarify institutional control and accountability

a. Consolidate all responsibility for Boulder Campus intercollegiate athletics in the Office of the Chancellor. The University's Board of Regents' Intercollegiate Athletics Policy 13-C (June 27, 1996) gives oversight responsibility of the Department of Intercollegiate Athletics to the Boulder Chancellor, but delegates representational, media, and public relations functions to the Office of the President. This should be changed. It is confusing, and blurs normal channels of reporting and supervision. It undermines the ability of the Boulder Campus to create and maintain a unified and integrated program of activities that enhance its educational mission. It obscures the role of athletics as that of supporting academics and provides the Athletic Department with an excuse to claim a special status, apart from other campus functions.

b. Integrate academic department administrative functions into general campus administrative procedures. The integration of the Athletic Department's Academic Support Services into the campus Office of Student Affairs has been largely successful. It should serve as a model for the similar incorporation of the Athletic Department's financial services and administration into pre-existing campus structures. We strongly recommend that there be a comprehensive review of all Athletic's Academic Support Services functions, including the use of tutors and other services offered student-athletes, to ensure comparability with the services offered all students.

i. Financial Services. The relationship between the Athletic Department financial and business affairs and the campus must be formalized. We propose that the Senior Associate Athletic Director for Facilities, Development and Business Affairs be subject to the same reporting requirements as all other department budget officers. Effectively, he should become an agent of the Campus' Senior Vice Chancellor/CFO. All aspects of the Athletics Department budget should be subject to the same oversight as the budgets of other departments.

In conjunction with this action, we recommend an immediate and comprehensive review of the entire budget and strategic needs of the Athletics Department. Special attention should be paid to the dependence of the Department on University support, arrangements with coaches regarding outside compensation, the football stadium expansion and financing, and long-range forecasts and planning for the financial future of athletics.

ii. Athletics Administration. To promote better communication and ensure that Athletics Department decision-making is consistent with the educational mission of the campus, we propose that the Director of Intercollegiate Athletics report to the Boulder Campus Provost and Executive Vice Chancellor's Office. The Provost coordinates the activities of almost all units on campus, and reports directly to the Chancellor; it is appropriate that he or she also directly supervise intercollegiate athletics, coordinating with the Vice Chancellors and the proposed Athletics Governing Board (see below) as appropriate. The Athletic Director should be involved in campus policy boards, as appropriate, perhaps as a member of the Council of Deans (in a role similar to the Dean of the Libraries or the Dean of Continuing Education) or other group.

c. Develop and codify responsibility of Athletic Department employees for compliance with all applicable rules and regulations. We propose that the campus faculty and administration develop an athletics "Sarbanes-Oxley Corporate Responsibility" document that outlines authority, responsibility, and accountability for all levels of Athletics Department employees. This document will eliminate confusion over responsibility for NCAA guidelines, Big 12 procedures, state and federal law, and university guidelines. Head coaches will be required to certify that the activities of their student-athletes and assistant coaches comply with the guidelines and rules of the Athletic Department, the University, the conference, and the NCAA, including those regarding recruiting and admissions, academic eligibility, and student conduct. The Athletic Director, Provost, Chancellor, and Board of Regents must review and approve

such certification. Procedures must be developed that specify sanctions where rules infractions or inappropriate certification have occurred.

3. Provide faculty oversight through creation of an Athletics Governing Board

Shared governance is a basic operating principle of the University and the Boulder Campus. Faculty and administration should share policy-making responsibilities and oversight of intercollegiate athletics, similar to other shared oversight responsibilities (for example, over academic programs, building and construction, information technology, budgets, etc.). Accordingly, we propose several changes in athletics governance that allow faculty to play a critical role in athletics decision-making and oversight. These changes coincide very closely with the principles outlined in *Coalition on Intercollegiate Athletics*' memorandum, "Campus Athletics Governance, the Faculty Role: Principles, Proposed Rules, and Guidelines" < http://www.math.umd.edu/~jmc/COIA/Gov.html>.

First, we propose that the duties of the Faculty Athletics Representative (an NCAA-mandated position) conform to principles in the COIA document (currently being considered for adoption by the FAR Association). In particular, we recommend that the position be filled by a regular faculty member. The FAR should be provided with the resources and support to ensure his/her independence from the Athletic Department, and to make certain his/her fair representation of the sentiments and priorities of the faculty at the conference and NCAA levels. Second, we propose the creation of an Athletics Governing Board ("AGB"), which will consist of faculty, academic administrators, athletics department officials, and students; each member will serve a finite term. The AGB must be composed of a majority of faculty and academic administrators. The Faculty Athletics Representative will serve on the AGB, ex officio. The Boulder Faculty Assembly will appoint the majority of the faculty members of the AGB. The AGB will report to and serve in an advisory capacity to the Provost, overseeing all aspects of Athletics Department policy and operations. The AGB will not replace the current BFA Committee on Intercollegiate Athletics, which will be maintained as the faculty's independent advisory body on athletics policies and issues; membership on the AGB and the BFA Committee on Intercollegiate Athletics may overlap. The AGB will be required to provide regular informational reports to the BFA.

The AGB will have specific responsibilities for (among other things): setting admissions standards for student-athletes, which may not conflict with general admissions standards; conducting recruitment and hiring searches for major Athletic Department personnel, including head coaches of each sport and the Athletic Director, and providing input into yearly job performance evaluations and personnel actions; reviewing all long-range strategic and fiscal plans and policies, and making recommendations to the Provost regarding their approval. The composition and duties of this panel generally follow the guidelines laid out in the COIA document.

Tier II Reforms:
Leading a National Debate on the Role of Athletics in Higher Education

Not all necessary reforms are feasible if implemented unilaterally. Many changes not only require alterations in NCAA or conference policies and bylaws, but also a transformation of how our culture regards intercollegiate athletics at its highest levels of competition. We are calling for a national debate on the mission and goals of higher education and how college sports can further those goals; we must have a better perspective on this issue. Of one thing we can be sure: it is not the place of our nation's universities and colleges to serve as high-priced athletic entertainment or development programs for major professional sports leagues.

Moreover, university administrators and governing boards need to take stock of their choices and ask themselves *why* they are spending millions to build or expand a stadium or bring a high profile coach to campus. These are not actions that will improve in any way the academics of their institution, and in the long run place an ever-increasing burden on their athletic departments to raise larger and larger sums of money. Ultimately such choices drain resources away from the teaching and research side of higher education and put their institutions at risk of serious and damaging embarrassment.

We therefore call upon the Board of Regents of the University of Colorado, the University's President, the Boulder Campus Chancellor, and the Boulder Campus' Athletic Director to become a force for change in college sports. We urge them to work within the NCAA and the athletic conferences, the appropriate academic and administrative associations, and with the public to redefine the role of athletics within the setting of higher education and identify necessary changes in the existing system of intercollegiate athletics. Simultaneously, the faculty will work through the Faculty Athletics Representative and their participation in the Coalition on Intercollegiate Athletics to effect these changes.

To begin the debate, the faculty proposes discussion of the following three topics:

1. Putting Academics First

- ***Length of athletic schedules and practice time***

  Athletic schedules and practice time should not place on an undue burden on the lives and academic needs of students. Competition seasons for some sports are far too long and too many games are scheduled mid-week, requiring students to spend excessive amounts of time away from campus. Furthermore, it is quite common for post-season tournaments and championships to run into finals periods, requiring last-minute absences during a crucial time in the academic schedule. Athletic programs often will increase the length of their football schedules in order to generate the needed revenue to feed their ever-expanding budgets. All of these choices come at real costs to the students.

- ***Improving academic standards***

Efforts must be strengthened at all universities to ensure that no compromises are made on admissions, academic standards, and graduation rates for students who participate in intercollegiate athletics – no matter what sport. While the universities themselves must ultimately be accountable for the quality of their students, the best way to achieve both broad improvements in academics and a level playing field for all schools is to institute more rigorous standards by changing policies at the conference or NCAA level. One item that should be up for further consideration is returning to a system of ineligibility for freshmen – this is an idea advocated by former University of North Carolina Basketball Coach Dean Smith, among others.

- ***Alternative avenues to professional sports careers***

Through the NCAA, university administrators and athletic directors should apply pressure on professional sports leagues (particularly the NFL and NBA) to provide more realistic development programs for young men and women who wish to play professional sports but do not wish to attend college.

2. Halting the Athletics "Arms Race"

- ***Getting perspective on athletics spending***

A sense of perspective needs to be reintroduced into the planning and operations of athletic department budgets. Schools need to establish active controls over athletics spending such as those proposed above for CU. Again, this can probably best be achieved by changes in the bylaws of the NCAA requiring universities to take tighter control through incorporation of Athletic Department finances into the general budgetary procedures of the institution. As part of the fiscal reforms, the NCAA should institute a national standard for athletics accounting similar to the "Generally Accepted Accounting Principles." Furthermore, academic administrators and faculty need to discourage the false hope that excessive athletic spending and the building of potentially winning football and basketball programs can somehow propel the academic side of institutions into greatness. Many more schools will fail in this effort than will succeed.

- ***Reconsidering Athletic Scholarships***

There needs to be intensified discussion about the policies and process of awarding athletic grant-in-aid scholarships. This is often one of the major expenditures, if not the largest expenditure, for an athletic program. There should be serious consideration of a number of reform proposals including: reducing the number of football scholarship athletes; eliminating the ability of coaches to unilaterally "pull" scholarships once they are awarded; and moving to a more need-based system of financial aid for athletes.

- ***Coaches salaries***

Coaches' salaries have spiraled out of control. At some institutions, compensation packages for coaches have gone well beyond the $1 million mark, often making athletic coaches the highest paid university employee. Such high salaries can place a

significant strain on athletic department budgets and send an unfortunate signal that athletic victories are valued well beyond academic achievement. Individual universities must make realistic assessments about how coaching salaries and compensation packages fit into both athletic department solvency and university priorities and goals.

3. Reining in the Commercialization of College Sports

Perhaps one of the more fundamental problems facing our major universities with respect to intercollegiate athletics is the over-commercialization of high-profile sports (such as football and basketball) and the undue influence of the sports media and television networks. The fuel that propelled the skyrocketing costs of college athletic programs is the revenue generated from television broadcasts of football and basketball, and the redistribution of revenue from the NCAA for the year-end basketball tournament.

Among the changes that could help in de-emphasizing the commercialization of college sports are: a stronger control by university administrators and faculty on the scheduling of athletic events; tighter limitations on the use of the university name in sports-related commercial endeavors (e.g. summer sports camps, television programs, etc.); a minimization of commercial intrusions in sporting events and venues (with a specific prohibition of alcohol and tobacco advertising); and a prohibition on the use of athletes as vehicles for advertisers.

Student Host Form

INSTRUCTIONS

A student host is required to adhere to the following rules by the State of Colorado, the Athletic Department, the NCAA and the Big XII Conference:

1. You must be enrolled in a full-time program of studies at the University of Colorado-Boulder.

2. A maximum of **$30.00** per day may be provided to cover the entertainment expenses of both yourself and the prospect. You may be provided with an additional **$15.00** per day for each additional prospect entertained by you. The money provided may only be used to entertain you, the prospect, the prospect's parents (legal guardian) or spouse. Other students may assist with the hosting of the prospect but shall pay for their own entertainment. No cash may be given to the prospect or anyone else.

3. You may not use the entertainment funds to purchase, or otherwise provide the prospect with, gifts of value (e.g., souvenirs, clothing, etc.).

4. You may not use any vehicle provided or arranged for by any institution staff member, booster or representative of our athletics interests.

5. You may not transport the prospect or anyone accompanying the prospect more than 30 miles from the campus.

6. You should not allow recruiting conversations to occur, on- or off-campus, between the prospect and a booster of the athletics program. If an unplanned meeting occurs, only an exchange of greetings is permissible.

7. You may receive a complimentary admission to a home athletics contest when accompanying a prospect.

8. Neither you nor the prospect can pay for additional entertainment above and beyond the $30/day provided to you by the Athletic Department.

9. You are responsible for turning in any remaining cash from the funds advanced. State of Colorado fiscal rules require that you provide a receipt for any purchase of $25.00 or greater.

I CERTIFY THAT I HAVE READ THE ABOVE INSTRUCTIONS AND HEREBY ACKNOWLEDGE THE RECEIPT OF $ 60 FOR THE PURPOSE OF HOSTING:

Date

NEW (2004-2005) CU FOOTBALL OFFICIAL VISIT GUIDELINES

The following regulations will be put into effect for official football visits beginning in the 2004-2005 recruiting season.

- Football recruiting visits to campus will occur primarily after completion of the regular football season, with only a few exceptions such as visits by local recruits or other extraordinary circumstances approved by the Office of the Chancellor.
- Since the visits would take place off-season, it provides the coaches more time and energy to spend with the recruits. It will also reduce the amount of disruption to current student-athletes.
- Recruitment visits will be limited to a one night stay, rather than a two-night stay.
- Prospective student-athletes will arrive the late afternoon or evening prior to the recruitment day and depart in the late afternoon or the evening of recruitment day. This limits the amount of unsupervised time while the recruit is visiting.
- We have eliminated the host responsibility for students.
- Recruits will be supervised by their parents or a designated coach during their visit.
- On the night of arrival, curfew will be set at 11:00 p.m. and will be documented by a designated coach.
- Recruitment day will be scheduled and supervised by Athletics Department staff and will include:
    - Breakfast with coaches and players
    - Meetings with faculty members and academic advisors
    - Review of campus academic expectations, support services and sportsmanship issues
    - Review of campus and program policies, processes and expectations regarding alcohol and drug use, sexual and other assault, date rape, sexual harassment and the Student Code of Conduct
    - Meetings with football staff, departmental staff and players, perhaps most important our current student athletes.
    - A mandatory exit interview and protocol for the exit interview with each recruit that visits our campus.
    - Departure for home in the late afternoon or evening of the recruitment day

Additionally, we will continue our existing rules and policies as follows:

- The Head Football Coach will continue to communicate the recruiting expectations to prospective student-athletes.
- Prior to the visits, letters will continue to be sent to student-athletes, parents, and high school coaches explaining expectations and behavioral standards.
- Recruits are prohibited from using alcohol and drugs and engaging in activities that violate team rules, campus policies or laws during the recruitment visit.

Coaches, student athletes and recruits will be required to adhere to all NCAA regulations prior to and during a recruiting visit.

PRINCIPLES OF INSTITUTIONAL CONTROL
AS PREPARED BY THE NCAA COMMITTEE ON INFRACTIONS

A. "CONTROL" IS DEFINED IN COMMON-SENSE TERMS.
In determining whether there has been a lack of institutional control when a violation of NCAA rules has been found it is necessary to ascertain what formal institutional policies and procedures were in place at the time the violation of NCAA rules occurred and whether those policies and procedures, if adequate, were being monitored and enforced. It is important that policies and procedures be established so as to deter violations and not merely to discover their existence after they have taken place. In a case where proper procedures exist and are appropriately enforced, especially when they result in the prompt detection, investigation and reporting of the violations in question, there may be no lack of institutional control although the individual or individuals directly involved may be held responsible.

In a situation in which adequate institutional procedures exist, at least on paper, a practical, common-sense approach is appropriate in determining whether they are adequately monitored and enforced by a person in "control." Obviously, general institutional control is exercised by the chief executive officer of a member institution. However, it is rare that the chief executive officer will make decisions specifically affecting the operations of the institution's athletics program. Instead, the day-to-day duties of operation, including compliance with NCAA rules, will have been delegated to subordinates either by specific action or by the creation of appropriate job descriptions. Moreover, it is usually left to senior subordinates, such as the director of athletics, further to delegate various duties regarding compliance with NCAA rules.

In most institutions, especially those with large and varied athletics programs, such delegations are made to a number of individuals who are expected to exercise control over compliance with regard to specific aspects of the program. The specific obligations of such individuals should be in writing, and not merely an understanding among the senior officials of the university and the athletics department. Not only the director of athletics, but other officials in the athletics department, the faculty athletics representative, the head coaches and the other institutional administrators outside of the athletics department responsible for such matters as the certification of athletes for financial aid, practice and competition, are expected to assume a primary role in ensuring compliance. Even though specific action has been taken to place responsibility elsewhere, these individuals will be assumed to be operating on behalf of the institution with respect to those responsibilities that are logically within the scope of their positions. Their failure to control those matters so as to prevent violations of NCAA rules will be considered the result of a lack of institutional control.

B. VIOLATIONS THAT DO NOT RESULT FROM A LACK OF INSTITUTIONAL CONTROL.
An institution cannot be expected to control the actions of every individual who is in some way connected with its athletics program. The deliberate or inadvertent violation of a rule by an individual who is not in charge of compliance with rules that are violated will not be considered to be due to a lack of institutional control:

- if adequate compliance measures exist;
- if they are appropriately conveyed to those who need to be aware of them;
- if they are monitored to ensure that such measures are being followed; and
- if, on learning that a violation has occurred, the institution takes swift action.

C. ACTS THAT ARE LIKELY TO DEMONSTRATE A LACK OF INSTITUTIONAL CONTROL.
The following examples of a lack of institutional control are not exclusive, but they should provide important guidance to institutions as to the proper control of their NCAA compliance affairs.

1. A person with compliance responsibilities fails to establish a proper system for compliance or fails to monitor the operations of a compliance system appropriately.
When an individual is responsible for ensuring that a particular rule or set of rules is not violated, that person will be considered to be exercising institutional control. That individual must not only ensure that the rules are known by all who need to know them but must also make proper checks to ensure that the rules are being followed.

It is important for institutions to understand that the mere compilation and distribution of rules and regulations, along with written compliance procedures, is not sufficient if no one regularly checks on the actual operations of the system.

2. A person with compliance responsibilities does not take steps to alter the system of compliance when there are indications the system is not working.
If a system of control is in place, a single deviation by a member of the athletics staff or a representative of the institution's athletics interests will not be considered a lack of institutional control. However, if there are a number of violations, even if they all are minor, indicating that the compliance system is not operating effectively, the person(s) responsible cannot ignore the situation, but must take steps to correct the compliance system.

3. A supervisor with overall responsibility for compliance, in assigning duties to subordinates, so divides responsibilities that, as a practical matter, no one is, or appears to be, directly in charge.
The failure to designate who is responsible for ensuring compliance with NCAA rules is a serious breach of the obligations of a university athletics administrator. Individuals are unable to operate appropriately if they are uncertain of their duties and obligations. Moreover, those subordinates who are not in charge must know who is. They need to know the person or persons to whom they can turn for advice before taking an action that may be questionable. They also need to know to whom and how to report violations that come to their attention.

4. Compliance duties are assigned to a subordinate who lacks sufficient authority to have the confidence or respect of others.
A supervisor may be acting in good faith when assigning responsibility for compliance to an athletics department secretary, or a student intern, or to someone who does not have stature in the organization. Nevertheless, that very action often makes it appear that the institution is not serious about compliance. If coaches, alumni, boosters and others do not respect the person responsible, they may well ignore that individual. Violations that occur may then be considered the result of a lack of institutional control.

5. The institution fails to make clear, by its words and its actions, that those personnel who willfully violate NCAA rules, or who are grossly negligent in applying those rules, will be disciplined and made subject to discharge.
Any operating compliance system may be thwarted by an individual who acts secretly in violation of the rules or who fails to ascertain whether a questionable action is or is not permissible. If an institution does not make clear that individual violations of NCAA rules will result in disciplinary action against the involved individual, and if it does not actually discipline those who are found to have violated such rules, it has opened the door to permitting further violations. In such a case, future violations of an individual nature will constitute failures of institutional control.

6. The institution fails to make clear that any individual involved in its intercollegiate athletics program has a duty to report any perceived violations of NCAA rules and can do so without fear of reprisals of any kind.
Compliance is everyone's obligation. Loyalty to one's coworkers, student-athletes, or athletics boosters cannot take precedence over loyalty to the institution and its commitment to comply with NCAA rules. There is a lack of institutional control if individuals are afraid to report violations because they have reason to fear that if they make such a report there will be negative consequences.

7. A director of athletics or any other individual with compliance responsibilities fails to investigate or direct an investigation of a possible significant violation of NCAA rules or fails to report a violation properly.
When a director of athletics or any other individual with compliance responsibilities has been informed of, or learns that there exists a possible significant violation of NCAA rules, and then fails to ensure that the matter is properly investigated, there is a lack of institutional control. Similarly, if an actual violation of NCAA rules comes to the attention of the director of athletics or a person with compliance responsibilities and there is a failure to report the violation through appropriate institutional channels to a conference to which the institution belongs and to the NCAA, such failure constitutes a lack of institutional control.

8. A head coach fails to create and maintain an atmosphere for compliance within the program the coach supervises or fails to monitor the activities of assistant coaches regarding compliance.
A head coach has special obligation to establish a spirit of compliance among the entire team, including assistant coaches, other staff and student-athletes. The head coach must generally observe the activities of assistant coaches

and staff to determine if they are acting in compliance with NCAA rules. Too often, when assistant coaches are involved in a web of serious violations, head coaches profess ignorance, saying that they were too busy to know what was occurring and that they trusted their assistants. Such a failure by head coaches to control their teams, alone or with the assistance of a staff member with compliance responsibilities, is a lack of institutional control.

This is not to imply that every violation by an assistant coach involves a lack of institutional control. If the head coach sets a proper tone of compliance and monitors the activities of all assistant coaches in the sport, the head coach cannot be charged with the secretive activities of an assistant bent on violating NCAA rules.

D. COMPLIANCE MEASURES IN PLACE AT THE TIME OF VIOLATION AS A FACTOR IN DETERMINING WHETHER OR NOT THERE HAS BEEN A LACK OF INSTITUTIONAL CONTROL.

Institutions are eager to learn what measures can be taken to reduce the likelihood that in the event a violation does occur, it will result in a finding of a lack of institutional control. The following are some of the steps that assist an institution in avoiding such a finding. It must be emphasized,
however, that the presence of such measures are not a guarantee against such a finding. The way in which the measures are carried out and the attitude toward compliance within the institution are vital factors.

1. The NCAA rules applicable to each operation are readily available to those persons involved in that operation.

Those individuals involved in recruiting activities should have ready access to the recruiting rules, and those university staff members engaged in determining eligibility for financial aid, practice and competition should have ready access to the NCAA rules governing those matters.

2. Appropriate forms are provided to persons involved in specific operations to ensure that they will properly follow NCAA rules.

With respect to certain operations, specific forms or checklists can be of great help in assuring compliance with NCAA rules. Clerical employees may find the rules themselves daunting. But if they can follow a form, many problems can be obviated. This is certainly true with regard to such matters as ensuring that student-athletes do not receive excessive financial aid individually or by sport, that initial eligibility standards are met, and that continuing eligibility standards are properly enforced.

3. A procedure is established for timely communication among various university offices regarding determinations that affect compliance with NCAA rules.

For example, there should be a method of direct communication between the registrar and the department of athletics so that the latter learns at once if an enrolled student-athlete drops a course that brings that student-athlete below the required number of units for eligibility to participate.

4. Meaningful compliance education programs are provided for personnel engaged in athletically related operations.

It is important that new personnel, both coaches and administrative staff members, receive training regarding NCAA rules that are relevant to their positions shortly after beginning employment. The institution should also continue to educate its staff by conducting compliance sessions on a regular basis for all involved personnel as refresher courses, with an emphasis on changes in NCAA rules. Not infrequently, persons who have been involved in intercollegiate athletics for many years and who violate long-standing rules attempt to excuse their actions on the grounds that they were unaware that their activities constituted a violation. On occasion such personnel rely on long outdated interpretations of legislation that have been eliminated or dramatically altered for a number of years.

Obviously the nature and strength of the compliance education program is of significance. Educational programs run by the NCAA and by various conference offices may, because of the expertise of those involved, be superior to training by in-house personnel.

5. Informational and educational programs are established to inform athletics boosters of the limitations on their activities under NCAA rules and of the penalties that can arise if they are responsible for rule violations.

Distribution of rules education materials (e.g. brochures and articles) to season ticket holders is significant as are special programs for booster organizations.

6. Informational and educational programs are established for student-athletes regarding the rules that they must follow.
All institutions conduct information sessions for student-athletes and obtain the required signed statements from each. However, the extent to which these are truly informative and are taken seriously varies. The extent to which these sessions are made important by the institution is a significant factor.

7. An internal monitoring system is in place to ensure compliance with NCAA rules.
It is of significance if, on a regular basis, a person (or persons) charged with monitoring compliance frequently checks operations throughout the athletics department and related departments of the university. Such a person should make certain that required forms are being utilized and utilized properly. A compliance person should speak with all coaches frequently and regularly to find out if they have any concerns or questions about what they can or cannot do or what they have already done. A compliance person should be aware of what actions have been taken with regard to a variety of areas, including recruitment, awarding of financial aid, practice requirements and travel arrangements.

From time to time the compliance person should meet with student-athletes in the various sports to see if any problems exist. All potential violations must be reported and an investigation must ensue in accordance with appropriate institutional procedures. Other internal monitoring measures are also of significance, including one-on-one meetings between coaches and the athletics director, and meetings of university committees on athletics in which student-athletes and others are involved.

8. An external audit of athletics compliance is undertaken at reasonable intervals.
An important control exists if an independent university or outside unit undertakes audits of the athletics enterprise to determine if there have been violations of NCAA rules and to suggest changes in operating methods and procedures wherever such action could eliminate the danger of future violations.

9. The chief executive officer and other senior administrators make clear that they demand compliance with NCAA rules and that they will not tolerate those who deliberately violate the rules or do so through gross negligence.
It is an important factor when the senior administrators in an institution by word and, when necessary, by action make clear that compliance is vital. The pressure to run a winning program must not overcome the dedication of the institution to ethical conduct in all aspects of its athletics program and to compliance with NCAA regulations.

The institution and its staff members have a long history of self-detecting, self-reporting and self-investigating all potential violations.

Institutional Control at CU – Sample efforts

1. The Chancellor of the Boulder Campus will meet at least once annually with all members of the Athletic Department to emphasize institutional control and adherence to compliance rules and procedures.

2. The Director of Compliance will meet with the Compliance Committee on a bi-monthly basis to discuss compliance issues. The Compliance Committee consists of the Faculty Athletics Representative, Athletic Director, Compliance staff, Registrar, a member of the Faculty Assembly, and a representative of the Chancellor's Office.

3. The Director of Compliance will meet with the Director of Athletics on an "as required" basis as the situation may require.

4. An annual State of Compliance Report will be made to the Compliance Committee and the Chancellor's representative.

5. An annual letter and/or rules summary will be sent to boosters (donors) advising them of their limited role and conveying to them an explanation of rules compliance.

AFFIDAVIT OF ALLISON HERREN LEE

1. I, Allison Herren Lee, am an attorney with the law firm of Sherman & Howard, LLC, Denver, Colorado.

2. I represent the woman who filed police report no. P01-16069 with the Boulder Police Department in September, 2001.

3. I personally observed the woman referred to in paragraph 2 above sign the statement attached hereto as Exhibit A, using the pseudonym of Jane Doe.

Dated this 22nd day of April, 2004.

Allison Herren Lee

STATE OF COLORADO)
) SS.
COUNTY OF DENVER)

The foregoing instrument was acknowledged before me this 22nd day of April, 2004, by Allison Herren Lee.

Notary Public

My Commission Expires:

My Commission Expires 1/2/2006

GRACE M. RUSSELL NOTARY PUBLIC STATE OF COLORADO

Exhibit A to Affidavit of Allison Herren Lee

STATEMENT OF JANE DOE

I am the victim who filed police report no. P01-16069, with the Boulder Police Department in September, 2001 after I was raped by a CU football player. This is my account of what happened to me during the Fall of 2001.

On Friday, September 28, 2001, I was raped by a CU football player. My account of the rape is in the police report. At the time of the rape, I was 19 years old, a student at CU and I also worked in the Athletic Department. I was scheduled to work on Saturday, September 29, and so I went in to work. I was very upset, and my co-workers asked me several times what was wrong. I did not tell them. Later that night, I called a rape crisis center. They told me to go to the hospital, and I did.

On Sunday, I went in to work and told a member of the staff about the rape. He said he would tell my boss Steve Willard, and have him call me. That night, Steve called me at home, and said he did not want to talk about it over the phone, so we agreed to meet in his office early Monday morning (October 1). We did meet on Monday morning in Steve's office. I told him the details about the rape, and I also told him that I had gone to the hospital, gotten a rape kit and talked to the police. Steve seemed very upset and concerned, and worried about me and my well-being. Steve said he really didn't know what to do in a situation like this and that he would get back to me. Steve gave me the number for CU victim assistance, and I called them.

Later that day, Steve asked me if I wanted to meet with Gary Barnett, Brian Winklebauer and him and tell them all what happened to me. The meeting was not my idea or request, but after thinking it over I decided it was good idea for them to hear directly from me what had happened. I was a little nervous, but I thought I needed to do it. We had the meeting in Mr. Barnett's office. Mr. Barnett, Mr. Winklebauer and Steve were there. I have no idea why Mr. Barnett told the Commission that Mr. Winklebauer was not at this meeting. I remember very clearly that he was. My father also remembers that Steve told him that Mr. Winklebauer was at the meeting, and my father wrote that fact down in his calendar when it happened.

At the beginning of the meeting, Mr. Barnett said that he wanted to hear my side of the story. I told the three of them the details of the rape just as I had told the police. Mr. Barnett asked me twice during the meeting if I planned to press charges. I had not made up my mind at that point what I wanted to do, and I told him that I didn't know yet whether I would press charges. He also asked me what kind of evidence I had. I told him I had gotten a rape kit. He told me that if I did press charges my life would change. When he asked me the second time about whether I was going to press charges, I told him again that I didn't know. I asked him what he would do with respect to the player. He told me that he was the player's coach, not his father and he would not punish him. He asked me what I wanted to see happen, and I told him that, at the least, I wanted to see the player get some treatment so that he would not do to someone else what he had

done to me. I did not say to Mr. Barnett, as he said to the Commission and in a press statement, that I did not want the player punished or kicked off the team.

Mr. Barnett apparently had not yet spoken to the player, because he told me that if he spoke to the player, and the player had a different story, he would support the player. He did not say that he would support the player "emotionally," he just said that he would support him. This comment, along with all of the other things that he said in the meeting, did intimidate me and did convince me not to press charges. I believed that I would go through a painful and difficult ordeal, and probably at the end, the player would not be convicted because it would be my word against his and he would have the support of Mr. Barnett and the CU football program behind him.

A week or so after the meeting, Steve asked me if it would help or if it was okay for the player to write me a letter of apology. I told him that would be okay. According to Mr. Barnett's statement to the Commission, he corrected the letter for grammar, but didn't actually read it. I don't know whether Steve read it or not, but Steve is the one who gave the letter to me a few days later.

My decision not to press charges against the player was a difficult one, and since that time my family and I have tried to put these events behind us. I have never filed any lawsuit against CU, and I have never asked for or received any money from CU or anyone else as a result of my rape. For the sake of myself and my family, I wish to remain anonymous to the public so I'm not using my real name or the player's name in this statement. However, CU officials, CU's attorneys and Mr. Barnett, know who I am and they know the name of the player. I have been subpoenaed as a witness in the lawsuit against CU, and at my deposition, I will make these statements under oath.

Although my privacy is important to me, the reason I'm telling my story to the Commission now is not to help or hurt any persons involved, but simply to help myself and other women out there so that this does not keep happening.

Jane Doe

Jane Doe

Date: 4/21/02

May 1, 2004

To: **Independent Investigative Commission**

From: **Amy Robertson, LCSW, Director**
University of Colorado at Boulder Office of Victim Assistance

Introduction

This memorandum is in response to the Commission's request for recommendations from the CU Office of Victim Assistance. Our office also asked several campus and community constituencies for input, although the final recommendations are specifically from our office.

First, we provide the guiding principles that give some background to these recommendations. Second, we provide recommendations for prevention, education, and risk reduction programs for all students including athletes. Third, we provide recommendations for altering existing sexual assault policies and response systems. Forth, we provide recommendations for faculty and staff training. And last, we provide recommendations for campus and athletic department climate change.

I am appending two additional items: a summary of our current Department of Justice Violence Against Women on campus grant initiatives as well as a letter from a colleague in the Boulder community who asked us to pass along her letter.

While this is by no means an exhaustive list of recommended changes or enhancements, we believe it represents the issues of highest priority based on our knowledge of the existing efforts to address violence affecting the University community. We also recognize the concerns surrounding sexual violence exist throughout the university community as well as the larger society.

Guiding Principles

- Leadership within CU-Boulder—and the Athletics Department specifically—need to recognize their ability and responsibility to change an environment that contributes to sexual violence, and make a commitment to doing so. Education and training are ineffective and even counterproductive if authority figures or leaders undermine, devalue or dismiss the messages.

- Effective education, training, and support services concerning sexual violence, whether on an individual or systemic level, must take into account the interrelationship of race, class, gender, ability, and sexual orientation.

- College-aged students are more vulnerable to sexual assault than any other age group. National research demonstrates that only 1 out of 5 sexual assaults are reported and that false reports are rare (less than 5%). When victims receive

effective support, they are more likely to engage with the criminal justice system and other systems of accountability. However, encouraging reporting can be damaging to victims if responders lack training or are unclear about their role, or if response systems are overly convoluted or more focused on institutional liability than on responsiveness to the needs of victims. When a victim's needs are respected and they receive knowledgeable, client-focused support services they are better able to make a clear decision surrounding reporting the incident, which can substantially reduce the development of secondary mental health problems. The basic cause of trauma from violence (sex assault, intimate partner violence, and stalking) is loss of personal safety, control, and trust. Therefore, any successful response to such incidents must factor in the need for survivors to have some understanding and control of the investigative and sanctioning processes they may go through.

Recommendations:

Education/Prevention with all students

- **Mandatory First Year Experience course for all incoming/ transfer students**

Most of the risk reduction and education is limited by time frame currently. One shot educational efforts are not as effective as more sustained venues for continued conversation and skill building. A mandatory "First Year Experience" class could address the many issues that significantly affect students' ability to live and learn in an academic community. In the first year students are at risk when they enter a large institution and attempt to build community through alcohol and drug use and unsupervised extra-academic activities. A smaller class focused on values clarification, critical thinking about peer culture, as well as building community and relationships would significantly build protective factors for students.

- **Separate gender education options**

Research indicates that students learn best about sexual violence and values clarification when they have some opportunity to learn in a single gender environment. Therefore, we recommend creating a position for a professional coordinator focusing on supporting men in learning skills in the area of violence prevention to complement the current education programs.

Best educational practices include attention to teaching bystanders ways to intervene when they see a situation that is risky. Research says that men know who the problem guys are who they "wouldn't want dating their sister," but often they are confused about how to intervene, fear the judgment of peers, or fear of a physical confrontation. Addressing these issues and promoting the idea that they are setting a standard and giving voice to their values helps bystanders overcome inhibitions about speaking out, taking

action, and intervening. This is an important developmental task for college students in learning how to skillfully participate in community.

Education/Prevention for Student-Athletes

- **Institutional support for comprehensive, ongoing training and consultation with a national high credibility person (e.g. Don MacPherson or Jackson Katz) with expertise in sexual violence.** The key to successful training is to contract with someone who has the credibility to work with the coaching and other professional athletic staff. This training should also include development of collaborative connections with campus and local community resources. It would be helpful to build in accountability to have this person communicate with someone outside the Athletic Department.

- **We support the institutionalization of the Life Skills classes for student-athletes;** we recognize that some students, like those involved in revenue generating Division 1 athletic teams have unique pressures which call for specialized education. Attendance should be mandatory.

Sexual Assault Response/Policies

- **Support the process of rewriting campus response protocols to be clearer about reporting requirements, official reporting venues, and processes for Sexual Harassment, Judicial Affairs, and criminal justice system.** This process must balance institutional accountability with the need for victim privacy and control. General response protocols should be easily accessible on the web and well-publicized. Training should be accessible to non-English speaking staff, and the training curriculum must include a cultural sensitivity and competence component. This training will not be geared to make people experts in responding to sexual assault but that everyone should be prepared to make appropriate referrals and fulfill reporting requirements.

- **Create a formal campus review venue (Team Meeting) for sexual assault, domestic violence, and stalking cases for on-campus and campus-related cases.** This collaborative case review would formalize the informal practices that have helped cases to proceed in terms of consistent processes and just outcomes. This team would complement and be somewhat analogous to the model used in the Boulder County District Attorney's office (Sexual Assault/Domestic Violence Prosecution Team), and would include involved community resources like Boulder Police Department, Safehouse, MESA, Social Services, etc. This routine communication system would contribute to early and consistent information sharing (to the degree allowable by law) and collaboration among Sexual Harassment, Judicial Affairs, Housing, Office of Victim Assistance, University PD, Dean of Students, and other involved units within the University.

- **Implement the recommended changes in recruiting policies and practices with the Athletic Department.**

Faculty/Staff Training

Staff and faculty have relationships with students who may view them as trusted resources within the campus community. In turn, professors, teaching assistants, coaches, custodial staff, and administrative support staff must be prepared to appropriately respond to disclosures. When employees are thus empowered, necessary resources and services can be mobilized without delay as well as communicate to appropriate reporting officials (police, sexual harassment officer, or judicial affairs officer).

- **Repeat mandatory training for all staff and faculty (including leadership) on updated reporting and response protocols covering Sexual Harassment Policy, Title IX, and crime reporting obligations.**

- **Performance plan accountability for attendance and compliance with these trainings and policies.** Tenure and promotions for faculty should also include this accountability.

- **Judicial Affairs, Office of Sexual Harassment Policy, and CU Police Department provide feedback/reporting on units to university administration which may have problems in consistent implementation of sexual assault training and response policies and protocols.** Although this communication currently takes place, a clearer and more consistent practice will aid administrators in recommending accountability as well as more intensive training/problem solving for departments or units with repeated reporting/implementation problems.

- **More resources are necessary to implement these additional training and investigative responsibilities as Sexual Harassment, Judicial Affairs, and Victim Assistance are already stretched.**

- **Funding should cover continuing education for all investigators (CUPD, Judicial Affairs, and Sexual Harassment) to continue to demonstrate commitment to best practices in this complicated area of expertise.**

Campus Climate

Sexual assault does not happen in a vacuum. Many people have been harmed in the various situations which bring us to this investigatory commission. As we move forward to create change, intervention must take complex realities into account in order to be credible to students, families, staff, and faculty. Interpersonal violence has different meanings in different communities. For instance, research says that sexual assault is most often prosecuted most vigorously when victims are white women and assailants are

men of color. Women of color may fear that their assaults will not be taken seriously by white dominated systems. Staff may fear that sexual harassment of lower status employees by students will not be treated as seriously, sexual harassment of men by men may be seen as an acceptable form of hazing and less serious etc. In spite of which incidents receive more media attention, the majority of sexual assaults happen between people of the same race. On a predominantly white campus, most assailants reported to our office are white men. It is naïve and destructive to our communities when we do not take the reality of these perceptions/realities into account in attempting to change climates.

Qualified educators must come from a broad variety of life experience and identities and be able to address the complexities of these issues. We are attaching a letter from a professional colleague raising concerns about the lack of inclusion of women of color in addressing the current situation. We share her concern in finding better avenues for more complex dialogue on issues of race, class, and gender as it relates to these serious issues, as well as finding more ways to include women of color experts in violence.

Recommendations:

- **Urge upper administrators to seek continuing education and consultation on best practices in creating sustainable leadership and cultural change on issues of institutional values, violence, and structural inequity.**

- **Follow previously stated recommendations related to prevention/education, staff/faculty training, and response/policies.**

Athletics climate

- **Administrative accountability: athletics should be more directly accountable to Boulder campus leadership.** From our vantage point, based on the public statements by Athletic Department leadership, we have serious concerns about their willingness and commitment to address these issues. We have not seen evidence that Athletics Department leadership has shown an adequate frame of reference to come to grips with the current situation.

- **Reduce isolation of athletics; support new Life Skills Coordinator and other Athletic staff in continuing to increase their collaborations with Student Affairs and using existing campus resources.**

From our experience and national research, all male environments are a risk factor. They can be isolated, enforcing overly narrow images of what it means to be male —they are also a potent context for men to examine assumptions about masculinity and creating a dialogue that will help men take responsibility for positive masculinity. Many university community members are unaware of the subtle ways they support sexually exploitive behavior. Male leadership which is sophisticated about these issues, willing to connect

with other university components, respectful of other university professionals and non-athletes can create a substantial difference in culture.

Note that isolation of a unit is a risk factor—other university units may have similar cultures. When a unit culture is more insular, that unit is less likely to recognize problematic trends and issues. Assess other units needs based on our experiences with the Athletics Department.

Department of Justice Grant to Reduce Violence Against Women on Campus

In October 2001, the University of Colorado at Boulder (UCB) was awarded a $350,000 Grant to Reduce Violence Against Women on Campus.

Below, we provide a brief listing of UCB's project goals/ objectives and the program's achievements as of April 2004.

GOAL 1: CREATE A SAFER, MORE SUPPORTIVE ENVIRONMENT FOR SURVIVORS OF SEXUAL ASSAULT (SA), INTIMATE PARTNER VIOLENCE (IPV), and STALKING.

Objective 1.1: Better coordinate our on-campus and off-campus response with survivors.

- ✓ *Enhanced Existing University Interpersonal Violence Response Network.* 40 active campus and community members coordinated grant efforts, formed task groups to address underserved groups and male inclusion efforts. Hosted the June '03 CALCASA Technical Assistance Institute attended by representatives from 60 universities from across the nation as well as 30 representatives of CU's campus and community partners. The conferences are an opportunity for VAWA grantees to come together and discuss violence against women issues and to share best practices.
- ✓ *Developed Victim Service Delivery Protocols.* Created both general response protocol and several departmental-specific response protocols.
- ✓ *Developed More Victim-Responsive Policies.* Revised Student Code of Conduct through the Office of Judicial Affairs. April 2003 national judicial affairs expert consulted during a two-day on-campus visit.
- ✓ *Produced Better Trained First Responders through "No Wrong Door" Training/Outreach program.* Identified and provided training for 2500 people in over 100 training sessions, including Resident Life staff, mental health professionals, Student Affairs staff, Women's Resource Center staff, local rape crisis center staff/volunteers, academic advisors, and campus-community focused staff and peer staff working with diverse student populations.
- ✓ *Collaborating with community partner SAFEHOUSE to produce a Train the Trainer manual.* This manual will supplement the training for first responders and will contain essential material for an effective and timely response to intimate partner violence situations.

Objective 1.2: Comprehensive services for survivors.

- ✓ *Provided Survivors of Violence Against Women with Safety, Legal/Judicial, Academic, Housing, Financial, and Medical Advocacy.*
- ✓ *Established and Implemented an Emergency Victims' Fund.* Established fund-of-last-resort for emergency housing and sexual assault exam coverage.
- ✓ *Improved Marketing Efforts for Victim Services* (see social marketing campaign).

GOAL 2: STRENGTHEN POLICIES, PROTOCOLS AND COLLABORATIVE EFFORTS TO INCREASE REPORTING AND BETTER HOLD OFFENDERS ACCOUNTABLE.

Objective 2.1: Significantly increase reporting and awareness of reporting options and resources.

- ✓ *Increased Awareness of Reporting Options.* Completed and Distributed VAW anonymous reporting forms to all student services units, see above "No Wrong Door" Responder Training.
- ✓ *Developed Website.* Developed site map and resource/link listing. Phase I of web development completed—website established and basic information on the site. Website to be refined in phase II scheduled to be completed during summer of 2004.

Objective 2.2: Strengthen criminal justice process and campus judicial processes.

- ✓ *Reviewed Student Code of Conduct.* See code revision.
- ✓ *Improved Law Enforcement Investigative Response to VAW.* Created DV/IPV and stalking trainings

with interactive theater project: delivered to CUPD law enforcement officers. Partnered with CUPD to provide a two-day County-wide law enforcement training with national expert Joanne Archambault in June 2003 on non-stranger sexual assault: trained ~60 police officers and advocates.

- ✓ *Significantly Enhanced Training for All Judicial Affairs Staff, Hearing Board Members, and Appeal Readers on All VAW Related Areas.*
- ✓ *Moving to End Sexual Assault (MESA) and Boulder County Safehouse provided numerous trainings within the campus community on sexual offending behaviors, sexual assault risk, and intimate partner violence.*

GOAL 3: CAMPUS CLIMATE – DEVELOP AND ENHANCE PROGRAMS FOR THE CAMPUS COMMUNITY TO CHANGE ATTITUDES, BELIEFS, AND BEHAVIORS TO REDUCE VIOLENCE AGAINST WOMEN.

Objective 3.1: Expand prevention efforts and significantly increase students' knowledge about issues and resources.

- ✓ *Enhanced Student Outreach, Prevention, and Education Initiatives.* Conducted 13 50-minute sessions at each summer orientation mandated for all incoming students on all VAW topics using Interactive Theater. Formed an Interactive Theater Troupe of 12 actors that provided over 50 performances to ~10,000 University community members including same-sex sexual assault scenario. The CU Rape and Gender Education (COURAGE) peer educators provided over 80 presentations to ~4,500 students on grant-related areas. Held monthly forums on VAW on specific topics for staff on campus.
- ✓ *Created Social Marketing Campaign on VAW.* Developing interactive Website. Assisted Colorado Coalition Against Sexual Assault in creating "Stimulate Conversation" sexual assault poster campaign with well-attended press conference release. Expanding poster campaign to include intimate partner violence. Creating several mini-resource centers in diverse locations with VAW materials in multiple languages to raise awareness of resources and services for underrepresented populations on campus.
- ✓ *Offered Subsidy for On-Campus Women's Self-Defense Classes.* Provided trainings which addressed both stranger and non-stranger sexual assault dynamics.

Objective 3.2 and 3.3 Enhanced outreach to diverse, underserved groups and non-traditional students.

- ✓ *Developed Extended Peer Network.* During 1st phase of the grant filled six peer violence prevention and outreach positions to provide resource development and education for diverse constituencies with collaboration among the COURAGE program, Women's Resource Center, Cultural Unity Center, Family Housing (international/non-traditional students), and the Gay, Lesbian, Bisexual, Transgender Resource Center which worked with the above mentioned constituencies. Most of these positions are now being supported by the University in this current phase of the grant. Conducting regular educational workshops for students of color, first generation students, and international students on VAW issues in collaboration with campus partners. In process of coordinating victim outreach and services to our disabled campus constituents.

From: Lisa Calderon, Boulder County Safehouse

I have been very disappointed with the lack of inclusion of women of color's voices in this process or an analysis of the race/class/gender issues at play. This process has reminded me of the book titled. "All of the Women Are White, All of the Blacks are Men, But Some of Us Are Brave" meaning that the only ones who are readily identified as having legitimacy in public discourse about issues of institutional oppression are usually males of color and white women .

There seemed to be a very intentional and appropriate emphasis on including African American men on this panel. Since many of the accused are African American males, it is necessary to have representation from members of the Black community sensitive to the historical implications of rape accusations. Since the allegations involve rape, it is equally important to have experts on violence against women whether they be from the sexual assault or domestic violence identified fields.

However, white women dominate the panel as leaders and experts thereby typically leaving no room for women of color at the table. At least one of these panelists has been challenged by women of color advocates about her perpetuation of racism in the victim services arena. It would have been more appropriate to identify a violence against women's expert who was able to bring expertise about the complexity of how race, class and gender collide with what is or isn't going on at CU.

At least one accuser is a woman of color, at least one CU regent believes racial overtones are at play, at least one Black male has been racially profiled and wrongly accused, and there are many outraged women of color who have been left without a voice on this panel. It is irresponsible to act as if race doesn't matter to this critical dialogue.

Like everyone else concerned about violence in the Boulder community, organizing women of color eagerly await the panels findings and recommendations in the hope they will work to make the campus safer for everyone. However, we will also work to hold those accountable who fail to continue to overlook or tokenize the participation of women of color in the next proposed steps.

Here you go.

NCAA Academic Day
August 12, 2004

Preparation:
Gather materials: lined paper, envelopes, sharpened pencils, copies of question form, attendance sheet
Write abbrev. agenda on board
Write on Easel: Login and password
Cynthia, Jenny and Michelle's email addresses

Agenda:

8:00 am Take attendance
Move students to sit up front
Introduction to players/Discuss services available at Academic Support Center
Building rules and expectations (quiet, other advisors and meetings)
Discuss how representing self, team, family, athletes, freshman class, etc.
Brainstorm behaviors with students and write on board
Mutual respect (listen to others)
Actively participate (contribute, follow directions)
Break students into 2 groups (count off by twos)

A. Half the group do writing assessment
(spread students out)
- free write on goals (academic and football)
- specific questions on worksheet
  - 3 things excited/nervous/unique
- Write an academic, football, or other goal on slip of paper and seal in envelope with their name on it for us to return to them at end of year

B. Half the group to Computer Lab (with Christy S. and Ken B.)
- Onyens and Passwords: auto response questions for forgotten passwords
- Security issues (copyright policy, viruses, etc.)
- Help desk, Resnet
- Student Central: PINS, Registering, stops, grades, schedules (and finding your classes), privacy flags
- Common network problems
- open email, send to Jenny, Michelle & cc: Cynthia

8:30 – 9:30 Session I
5 minute break
9:40 – 10:40 Session II (Switch and repeat with other half of the group)
11:00 – 11:45 Library tour at UL with Lisa N.
Review expectations prior to leaving:
Stay with group
Acting as representing
Listen and stay quiet
Pick up maps at Bookstore
12:00 Players return to Stadium

Guys, please take a quick look at this if you can. I am going to email and mail it out here later today. Let me know if you see any problems.

Rick

City, ST Zip

Dear First,

The past weekend in Chapel Hill has been a great one. We concluded Spring Practice and all of our players and coaches are excited about what we accomplished and about getting ready for a great year in 2005. On Monday night we watched and then celebrated as our Men's basketball team (including our own Jesse Holley and Brooks Foster) won the National Championship. Great week to be a Tar Heel!

In an effort to make your transition from High School to UNC as easy as possible we are trying out a new system of communication this year. Each of you will be receiving this letter via US Mail. Those of you for whom we have email addresses will also be receiving this via email. If you do NOT get the email and would like to be included in our email distribution list, please call me at 919-962-9119 and leave me your email address (preferably both the player's email address and one parent's email address).

As summer school and the 2005 – 2006 academic year approaches, there are three key things we need to make sure you take care of. We also want you to know whom to contact to help you with each:

1 – Carolina Football OnBoarding Paperwork: This included all of the forms that we have previously sent you. For those of you who have completed and returned all of them thank you for getting this done. If you have not completed them and returned them, please do so immediately. If we are still missing any items from you next week, I will mail you an additional copy of each form we are missing. These items include:

1. UNC Freshman Application for Fall 2005 Admission
2. Freshman General Information Form
3. Football Sizing Form
4. UNC Medical History and Immunization Form
5. 2005 Summer School Response Card

If you have any questions regarding these forms please contact me (Rick Steinbacher) at 919-962-9119 or via email at rsteinbacher@uncaa.unc.edu.

2 – Summer School and Fall 2005 Housing Contracts: In the next week Corey Holliday, Assistant Director of Athletics for Football Student Athlete Development, will mail (and email) you a letter and forms that need to be completed for both summer school and Fall 2005 housing. If you have any questions regarding housing, please contact Corey at 919-962-9114 or via email at cholliday@uncaa.unc.edu.

3 – CTOPS (Orientation) and Summer School Registration: Cynthia Reynolds, Associate Director of the Academic Support Program for Student Athletes and Lead Counselor for Football will be helping you handle these two items. All incoming freshman must participate in the two day orientation program called CTOPS. Also, for those of you planning to attend summer school, we must complete your registration for the two classes you will be taking. Cynthia will mail (and email) you a letter in the next ten days outlining this process. If you have any questions regarding CTOPS or Summer School Registration please contact Cynthia at 919-962-9893 or via email at cynthiar@uncaa.unc.edu.

Have a great spring and we look forward to seeing you all in Chapel Hill again soon!

Rick Steinbacher
Director of Football Operations

Subject: CONFIDENTIAL - Draft Schedule for 2005 Football Training Camp

Attach: TEXT.htm; 2005 unc football training camp calendar.rtf; Carolina Football Training Camp 2005-MASTER.xls

---

Attached is a draft calendar and a draft daily schedule for our 2005 training camp. Our coaches are reviewing this this week and we will begin to finalize it Friday and early next week. Please review and let me know of any questions / concerns / suggestions prior to this coming Friday. The daily schedule is an excel file with a tab per day at the bottom.

Also, Coach Bunting wants to have an "all building" meeting on Wednesday, August 3rd to review the final schedule together. Please mark that date and time for that meeting at 8:30 am on the 3rd of August.

Thanks,

Rick

Smart Security Saves Time

Permitted and Prohibited Items

Prohibited items are weapons, explosives, incendiaries, and include items that are seemingly harmless but may be used as weapons—the so-called "dual use" items. You may not bring these items to security checkpoints without authorization.

If you bring a prohibited item to the checkpoint, you may be criminally and/or civilly prosecuted or, at the least, asked to rid yourself of the item. A screener and/or Law Enforcement Officer will make this determination, depending on what the item is and the circumstances. This is because bringing a prohibited item to a security checkpoint—even accidentally—is illegal.

Your prohibited item may be detained for use in an investigation and, if necessary, as evidence in your criminal and/or civil prosecution. If permitted by the screener or Law Enforcement Officer, you may be allowed to: consult with the airlines for possible assistance in placing the prohibited item in checked baggage; withdraw with the item from the screening checkpoint at that time; make other arrangements for the item, such as taking it to your car; or, voluntarily abandon the item. Items that are voluntarily abandoned cannot be recovered and will not be returned to you.

The following chart outlines items that are permitted and items that are prohibited in your carry-on or checked baggage. You should note that some items are allowed in your checked baggage, but not your carry-on. Also pay careful attention to the "Notes" included at the bottom of each section – they contain important information about restrictions.

The prohibited and permitted items chart is not intended to be all-inclusive and is updated as necessary. To ensure everyone's security, the screener may determine that an item not on the prohibited items chart is prohibited. In addition, the screener may also determine that an item on the permitted chart is dangerous and therefore may not be brought through the security checkpoint.

The chart applies to flights originating within the United States. Please check with your airline or travel agent for restrictions at destinations outside of the United States.

For updates and for more information, call our Consumer Response Center toll-free at 1-866-289-9673 or email TellTSA@tsa.dot.gov.

Lacrosse Sticks	No	Yes
Pool Cues	No	Yes
Ski Poles	No	Yes
Spear Guns	No	Yes
Note Any sharp objects in checked baggage should be sheathed or securely wrapped to prevent injury to baggage handlers and security screeners.		

Transportation Security Administration

prepare for takeoff

Smart Security Saves Time

Can I take it?	Carry-on	Checked
Guns and Firearms		
Ammunition Check with your airline or travel agent to see if ammunition is permitted in checked baggage on the airline you are flying. If ammunition is permitted, it must be declared to the airline at check-in. Small arms ammunitions for personal use must be securely packed in fiber, wood or metal boxes, or other packaging specifically designed to carry small amounts of ammunition. Ask about limitations or fees, if any, that apply.	No	Yes
BB guns	No	Yes
Compressed Air Guns	No	Yes
Firearms	No	Yes
Flare Guns	No	No
Gun Lighters	No	No
Gun Powder	No	No
Parts of Guns and Firearms	No	Yes
Pellet Guns	No	Yes
Realistic Replicas of Firearms	No	Yes
Starter Pistols	No	Yes
Note Check with your airline or travel agent to see if firearms are permitted in checked baggage on the airline you are flying. Ask about limitations or fees, if any, that apply. Firearms carried as checked baggage MUST be unloaded, packed in a locked hard-sided gun case, and declared to the airline at check-in. Only you, the passenger, may have the key or combination.		
Tools		
Axes and Hatchets	No	Yes
Cattle Prods	No	Yes
Crowbars	No	Yes
Hammers	No	Yes
Drills (including cordless portable power drills)	No	Yes
Saws (including cordless portable power saws)	No	Yes
Screwdrivers (except those in eyeglass repair kits)	No	Yes
Tools (including but not limited to wrenches and pliers)	No	Yes
Wrenches and Pliers	No	Yes
Note Any sharp objects in checked baggage should be sheathed or securely wrapped to prevent injury to baggage handlers and security screeners.		
Martial Arts/Self Defense Items		
Billy Clubs	No	Yes

Subject: Reminders for the upcoming 2006 NFL Draft

Hi Jackie and Carolyn-

Can you please forward the following information to the CCACA list serve?

The 2006 NFL draft is April 29-30, 2006 and the date by which an early entry candidate must declare is January 15th.

Here are some additional dates with regards to the NFL Draft that may be of assistance:

1. Date of the draft: April 29-30, 2006

2. Date that underclassman would need to declare for the draft: midnight on January 15th

3. Deadline to withdraw from the draft: midnight on January 19th (72 hours from the January 15th deadline)

4. Date of the NFL Combine: Feb 22-28 in Indianapolis, IN

Contact information for the NFL and NFLPA:

Kevin Fernandes, National Football League Manager of Player Personnel: 212-450-2357

Athelia Doggette, NFL Players Association: 202-463-2236

NCAA Bylaw 12.2.4.2.3: An enrolled student-athlete (as opposed to a prospective student-athlete) in Division I-A and I-AA football may enter the National Football League draft one time during his collegiate career without jeopardizing eligibility in that sport, provided the student-athlete is not drafted by any team in that league and the student-athlete declares his intention to resume intercollegiate participation within 72-hours following the National Football League draft declaration date. The student-athlete's declaration of intent shall be in writing to the institution's director of athletics.

---

Coach Bunting is having the whole staff (position coaches, trainers, strength and conditioning staff and academics) evaluate each scholarship student-athlete. Please complete the attached spreadsheet (Auxiliary Player Evaluations) with the appropriate information as it pertains to your area of responsibility. For example:
Rating Scale: Zero (0) / Inadequate(1) / Below Average (2) / Average (3) / Can Win With (4) / Champion (5)

Academic Example:
If the season started today and the S-A is ineligible he would be rated a 1.
If the S-A is eligible but working below his potential he would be rated a 2.

Training Room Example:
If the S-A is never in the training room and you have no contact with him, he would be rated a 5.
Does the S-A show up in the training room with the desired attitude, effort, etc., if so he would be rated a 4.
If the S-A consistently misses treatment, appointments and has a bad attitude in the training room he would be rated a 1.

Additionally:
If the S-A has no redeeming qualities in your area of expertise, he would be rated a 0.
Please also add any comments you feel may be helpful in evaluating the S-A in your area or other area listed on the evaluation form (2006 Player Evaluation Forms).

If you have any questions please let me know as soon as possible. Coach Bunting would like to have all this information returned to Corey Holliday by 5pm on Wednesday, April 5th so it can be compiled for Thursday morning staff meeting.

---

Jen,

Attached is the final schedule. We did not work in the nutritionist meetings as Coach Bunting wants to let them know about that a day or two before.

Thanks!

Rick

Subject: Senior Addresses

Folks,

As in past years, Dick Baddour would like to send a letter to your seniors, asking for their support and leadership in eliminating any hazing, initiation or "right of passage" activities on your team for the upcoming year.

Please send me the names and current addresses of your seniors by July 15, so this letter can be sent to them prior to their return to the University in August.

We will send you a copy of the letter and the UNC Hazing Policy. We also ask that you call your captains prior to their return to campus, to discuss the seriousness of hazing and their leadership role against any hazing activities.....I realize your captains may be seniors and have received the letter from Dick Baddour, but we would like for them to also hear the message from you, as their head coach. If you have not selected your 2008-09 captains, please discuss this important issue with them as soon as they are selected. You should also discuss with your entire team, as soon as possible upon their return, that no form of hazing will be tolerated by the University or Athletic Dept. and could result in dismissal from the team.

If you have any questions, please let me know

Thank you for your assistance with this important issue.

~Beth

Subject: 2009 Football Kick Times

Gentlemen:

Associate Commissioner of the Atlantic Coast Conference, Michael Kelly, just informed me of the following game times:

1. September 5, 2009 ~ CITADEL 6:00 PM (per our decision) ~ no TV, but will be on ESPN 360

2. September 12, 2009 ~ at UConn To Be Determined (either 12:00 Noon or 3:30 PM) as of now, either ESPN, ESPN2, or ESPNU

3. September 19, 2009 ~ EAST CAROLINA 12:00 Noon ~ NATIONAL TV ON ESPN OR ESPN2

This is all that is known at this present time. I shall keep you informed as information regarding our game times becomes available.

Thank you,
Larry

Subject: UNC-Chapel Hill Spring Football Game ~ 2010

Kurt,

I trust all is well!

Coach Davis and our administration has made a final decision that our 2010 Spring Football Game will be on Saturday, April 10th at 3:00 PM Eastern Time. If you should have any questions or concerns, please contact me as soon as possible. We are in our initial planning stages for this event and plan to proceed with this date and game time.

Have a great week!

Take care, and all the best.

Regards,
Larry

Dicky,
Great night tonight. Wonderful having everyone over. Here's what we're thinking for away football:

Sept 11-12 (Springfield and Storrs) - John, Holden, Patti
Sept 25-26 (Atlanta) - Holden and Patti
Nov 20-21 (Boston) - Holden and X (Probably John, but I may bring someone else - just put me down for 2)

(Barbara, please put these down as leaving on Fri at 12 and all day Sat.)

Go Heels!
Holden

Subject: Rutgers Game - Travel Details for Coaches and Primary Support Staff
Attach: TEXT.htm

To all Coaches and Primary Support Staff:

In the e-mail below, I have included the details of the trip to New Jersey. Please read everything carefully and do not hesitate to call or e-mail me with any questions that you may have. Travel packets that include itinerary, bus list, travel squad, etc, will be distributed Thursday afternoon.

FRIDAY:
- When you arrive Friday morning, please park in your regularly assigned parking area. Meetings begin at 9:30 AM followed by practice in Kenan Stadium and then Lunch in the training table. The 3 team buses will depart at 12:30 PM from in Front of the Kenan Football Center.

- We will be flying a Delta Chartered flight from RDU to Newark International Airport (EWR). There will be a snack bag in every seat along with a Gatorade and a Water. I have summarized our flight procedures below. Please read them carefully.

- Once we arrive at EWR airport, We will then go directly to the team hotel (same hotel that we stayed at in 2008) for check-in. We will get to the hotel at approximately 4:00 PM. We will not be going to the Stadium for a walk-thru on Friday.

Team Hotel:
Embassy Suites - Piscataway
121 Centennial Ave
Piscataway, NJ 08854
732-980-0500
http://embassysuites1.hilton.com/en_US/es/hotel/PISNJES-Embassy-Suites-Piscataway-Somerset-New-Jersey/index.do
(http://www.marriott.com/hotels/travel/atlrb-renaissance-waverly-hotel/)

SATURDAY:
- All buses will depart for Rutgers Stadium at 1:15 PM. We will arrive at Rutgers Stadium at 1:30 PM. Post game: the buses will depart for the airport 1 hour after the end of the game.

DRESS CODE:
The dress code for coaches and staff will be 'coat and tie' for the flight on Friday, so please dress in 'Business' attire. The return trip following the game will be casual attire.

FLIGHT PROCEDURES:
Since we will be flying on a Delta Charter Friday morning and Saturday night, please review our flight procedures below:

IDs: MAKE SURE YOU HAVE YOUR DRIVER'S LICENCE WITH YOU FOR THE FLIGHTS!!! IT IS MANDATORY THAT

YOU BRING ONE. IF YOU DO NOT HAVE A DRIVER'S LICENSE MAKE SURE YOU HAVE YOUR UNC ONE CARD AND A SOCIAL SECURITY CARD IF POSSIBLE. (This message is for everyone!)

AIRPORT SCREENING PROCEDURES
As they have done in the past several years, FAA rules require all chartered aircraft passengers to be screened prior to boarding. All carry-on baggage will be thoroughly screened at the airport. Any checked bags (for our charters checked bags are those that are left under the buses and loaded directly into the cargo area of the plane) do NOT have to be screened. The TSA's list of permitted and prohibited items can be found on the following link:
http://www.tsa.gov/travelers/airtravel/prohibited/permitted-prohibited-items.shtm

If you have any questions about our trip or travel procedures please call me (919-843-2572). We look forward to a great trip and Go Heels!

That sounds like a good idea. Somehow, maybe we can find $10,000 in Chapel Hill.

>>> Charlie Adams <cadams1@email.unc.edu> 2/20/2007 10:07 AM >>>
Good morning. I failed to include two items when I emailed you yesterday. To stay in Chapel Hill and cover football and basketball we are going to need at least $10.000.00 more in sponsorship. Obviously, to bring an additional football championship we will need close to $20,000.00 in sponsorship and to bring in two additional football championships it will take close to $40,000.00 in additional sponsorship.This of course will be dependent if we are able to continue to cover indoor track, tennis and swimming if it returns to Chapel Hill.

Give all of this some thought and maybe we can get together in March for further discussion of these issues. I certainly hope we can resolve these issues to the the satisfaction of the NCHSAA and UNC athletics.

Have a good day.

Charlie

PS Good luck with your men and women's winter sports programs.

Subject: Major Donor Function
Attach: TEXT.htm

Hello John:

I'm so glad you were able to join us last night for our Senior Banquet. I hope you enjoyed yourself.

I wanted to check with you to see if you were planning to put together another Football Major Donor Function like the one held this past May. It was a great event. Not only from the perspective of "football", but it also allowed Tammy and me the opportunity to meet some terrific people.

I don't have record of all who were invited, just a listing of those who actually attended. If you are planning another event, I'd appreciate the opportunity to review the invitation list before they are distributed. Additionally, if they were not included last year I would like to include:

. Mercer Reynolds

. Charlie Lowdermilk

. Maurice Koury

As I said, this was a great event and I am hopeful we can do it again this year. Please let me know your thoughts at your earliest possible convenience.

Best regards,

Coach Butch Davis

Subject: Coach Davis - Favor Please

Good Morning Dick:

We have major Junior Recruiting visits with weekend with 25 significantly high profile recruits and their parents coming to Chapel Hill for a Saturday presentation and I need a personal favor from you. Would you please speak to Steve Kirschner . . . there is a small, little auxiliary media box next to our recruit section at the Smith Center that is typically left unused or used for overflow; could we request from Steve those 10-12 seats for these visiting parents? This courtesy would be extremely helpful in our recruiting efforts.

Please let me know as soon as possible if we can have this space. Thanks

very much for your time and consideration.

Secrecy 101

By JILL RIEPENHOFF and TODD JONES
The Columbus (Ohio) Dispatch

Sunday, June 14, 2009 1:52 PM MDT

Across the country, many major-college athletic departments keep their NCAA troubles secret behind a thick veil of black ink or Wite-Out.

Alabama. Cincinnati. Florida. Florida State. Ohio State. Oklahoma. Oregon State. Utah. Wyoming. They all censor information in the name of student privacy, invoking a 35-year-old federal law whose author says it has been twisted and misused by the universities.

Former U.S. Sen. James L. Buckley said it's time for Congress to rein in the Family Educational Rights and Privacy Act, which he crafted to keep academic records from public view.

A six-month Dispatch investigation found that FERPA, as it's commonly called, is a law with many conflicting interpretations. And that makes it virtually impossible to decipher what is going on inside a $5 billion college-sports world that is funded by fans, donors, alumni, television networks and, at most schools, taxpayers.

"Some clarity would be helpful to us," said Ohio State President E. Gordon Gee.

The Dispatch learned of the wildly different legal interpretations by sending public-records requests for athletics-related documents to all 119 colleges in the Football Bowl Subdivision (formerly Division I-A). The goal was to gauge their openness and use of the FERPA law.

The requests sought airplane flight manifests for football-team travel to road games; lists of people designated to receive athletes' complimentary admission to football games; football players' summer-employment documents; and reports of NCAA violations.

The records could help shed light on the inner workings of college-sports programs, including identifying the people who have access to athletes -- some of whom are boosters and agents who, if acting improperly, can bring shame and fines to an entire athletic department.

In some cases, documents were unobtainable because of substantial fees charged by schools. For example, Maryland wanted $35,330 to produce the same documents that more than half the schools provided free.

Of the 69 schools that provided information:

* More than 80 percent released unedited information from ticket lists.

* About half did not censor flight manifests.

* Twenty percent gave full information about summer jobs held by football players.

* Ten percent provided unedited NCAA violations.

The results stunned Buckley, a retired federal judge from Connecticut who, as a U.S. senator, crafted the law to shield students' report cards and transcripts. He can't understand why any information about athletes would be withheld.

"Those examples provide zero harm to the kids," he said.

No one disputes that grades are and should be private.

But today, privacy is extended to athletes who have gambled, accepted payoffs, cheated, cashed in on their notoriety, and even sexually abused others.

It is extended to coaches who have broken recruiting rules or committed academic fraud at a time when the average salary for a head football coach is more than $1 million a year.

It is extended to rogue boosters and even to an ESPN broadcaster named in school records.

"That's not what we intended," Buckley, 86, recently told The Dispatch in a rare interview. "The law needs to be revamped. Institutions are putting their own meaning into the law."

Nebraska, Nevada and West Virginia, for example, refused to release any documents on NCAA violations in the name of student privacy.

Utah State and Texas A&M, however, didn't withhold or censor any information.

Florida blacked out nearly every word of NCAA violations involving its football and basketball teams, but it didn't censor as heavily such details about other sports.

FERPA is the reason the University of Cincinnati said it blacked out every word of an NCAA infraction involving members of its men's basketball team between 2002 and 2004, during Bob Huggins' tenure as coach.

FERPA is the reason the University of Kentucky said it didn't identify any of the men's basketball players who ate free meals last year at a booster's restaurant.

FERPA is the reason Ohio State strips most names from every record -- including its own letterhead on faxes.

"I think we have been transparent. We provided the records. What's been removed was the personally identifiable information of the student," said Jan Neiger, a lawyer in OSU's general counsel's office. "We wouldn't give you the record at all if we wanted to shield something."

Many violations across the country remain unknown to fans, faculty members and the public, diminishing accountability at a time when an NCAA study shows that schools are increasingly using more general-fund money, sometimes including state tax dollars, to pay for athletics as higher-education costs soar.

"Things have gone wild," Buckley said. "These are ridiculous extensions. One likes to think common sense would come into play. Clearly, these days, it isn't true."

Transparency lost

Critics of big-time college athletics say that keeping records secret hides disparities in the treatment of men and women, whites and blacks, star athletes and walk-on players.

Without full disclosure, it's hard to tell how athletes are treated, said Donald Jackson, a Montgomery, Ala., lawyer who has represented athletes, coaches and universities in NCAA matters.

"The extension of the legislation was never intended for [the protection of] Smooth Sonny Johnson, the booster at X University, who slides quarterback Joe Smith $500 for coming to his house to deliver the newspaper," Jackson said. "But that is the practice."

And some universities are covering up criminal behavior in the name of student privacy, say Jackson and other advocates of transparency.

Critics also say that the way athletic rule-breaking is handled is like the fox watching the henhouse, based on the relationship between the NCAA and the universities. The NCAA board comprises college presidents, and colleges are expected to initially investigate themselves.

"It's a way for them to whitewash some pretty serious crimes," said Frank LoMonte, a lawyer and executive director of the Student Press Law Center, an organization based in Washington, D.C., that advocates for student journalists. "What you have is a system that is flawed."

Law bred confusion

The crux of the problem dates to 1974, when Congress passed FERPA to protect "education records."

Over the years, the U.S. Department of Education, which was tapped to oversee student-privacy compliance, has used its broad authority to interpret what can be made public without consent.

"All over the country, there are lawyers who curse the law," said Lawrence White, consultant to university counsel at New Mexico. "FERPA is so clear. We have no discretion."

At New Mexico, flight manifests and ticket lists, for example, are not "education records."

Texas Tech, however, has a different view. It heavily redacted ticket lists and job information but not flight manifests. When asked about the inconsistencies between schools, Texas Tech senior associate general counsel Victor Mellinger said, "They made a mistake. If they've got student names, they're protected by FERPA."

The current interpretation of the law gives schools wide latitude to decide what is and isn't public within nonacademic records. At one school, an "education record" is a document disclosing student grades and coursework, while at another, any document containing a student's name is deemed an "education record."

It's akin to a speeding law that makes it illegal for drivers to exceed the limit but never tells them the limit. So schools, in effect, can decide for themselves how fast or slow they want to go, and many drive slowly.

About a third of the public Bowl Subdivision universities are like Sunday drivers. They interpret the law so cautiously that virtually every record, document or report -- from the mundane to the inflammatory -- is stripped of athletes' names and other key details.

The federal Education Department, however, said there might be problems.

"It sounds like some institutions are using this act to hide things," said Paul Gammill, who recently took over the federal Education Department office that monitors FERPA compliance and interprets its intent. "Our office is as concerned about its use as its misuse."

Schools found to have a "policy or practice" of violating student privacy risk losing federal funding, including student financial aid, which has never happened during the past 35 years.

"If the federal guidance leaves latitude, then you're going to get different institutions interpreting it differently, because some of them want to disclose more and some of them don't," said Ohio Attorney General Richard Cordray. "That kind of guidance isn't very helpful. ... It's more like we're saying we're punting and leaving it up to you."

Cordray has pledged to work with Ohio universities to decide what is and isn't public. He said he also plans to take the issue to the National Association of Attorneys General and to press Congress for a clear definition.

Gee said that while FERPA lacks clarity, "Congress has other problems. It's not the biggest issue facing higher education."

And OSU Registrar Brad Myers questioned whether Congress should get involved in that level of detail.

"We've taken an approach that we think is very thoughtful, very serious," Myers said. "There isn't an exact, magic, definitional answer."

But without clearer definition from the Department of Education or Congress on access to university records, the law remains murky at best.

Scandals cloaked

Open records would help the public better understand the scandals that have rocked some of the most prominent athletics programs in the country in the past decade.

Ohio State has reported its own athletes to the NCAA for receiving money, housing and free dental care from boosters, cashing in on their notoriety, and failing drug tests.

At Oklahoma in 2006, three football players received pay from a booster for jobs never performed.

At Florida State, dozens of athletes from multiple sports, including football and men's basketball, cheated on tests.

Rogue boosters tripped up athletes and recruits at Alabama in 2002. The school faced the NCAA Committee on Infractions again in May because athletes misused the money they received to buy textbooks.

At Illinois in 2003, a booster befriended a recruit who went on to play for the Illini football team. For two years, the booster supplied the athlete with housing, car use and money for a no-work job.

All of those schools deleted names and many details of such violations from public records.

Those violations resulted in financial losses, damaged reputations and, in some cases, forfeiture of athletic victories.

The Final Four banners were removed from Ohio State's Value City Arena because of NCAA rule-breaking. That violation involved former men's basketball coach Jim O'Brien's gift of money to a potential recruit and illegal benefits and academic help given to another player. Those violations cost the school more than $1.3 million in legal fees and NCAA penalties.

Florida State currently is spending about $200,000 to appeal one sanction of its numerous NCAA penalties in the cheating scandal. It is trying to preserve football victories so that Bobby Bowden might retire as the winningest football coach in college history.

"We're never going to fix collegiate athletics unless they lift the veil of secrecy," said David Ridpath, an assistant professor of sport administration at Ohio University and a member of the Drake Group, a national network of college professors who lobby for academic integrity in college athletics. Many of their efforts are hampered by confining and conflicting interpretations of FERPA, they say.

"People need to know the truth," Ridpath said.

Athletes warned

To play college sports, athletes must forfeit some privacy, and most colleges tell them as much from the moment they enroll.

Schools require them to sign an NCAA waiver each fall that says, in part, "you agree to disclosure of your educational records."

Universities use similar waiver forms for various reasons, and they prove handy when the NCAA and universities want to publicly pat backs for academic achievement.

Yet, when it comes to providing information about athletes who have done something embarrassing or costly to their schools, university and NCAA officials are far less forthcoming.

But the NCAA waiver also says this: "Information regarding any infractions matter in which you may be involved may be published or distributed to third parties."

Critics of the broadly interpreted application of FERPA say the waiver allows release of information when an athlete runs afoul of its rules.

"I don't think it does," argued Kevin Lennon, vice president of academic affairs and membership affairs at the NCAA. He said the NCAA says it can speak publicly about an athlete only to clarify inaccurate media reports.

Critics say the NCAA, which is run by a board of college presidents, is the universities and that school officials act as agents of the NCAA when investigating rule-breaking. Universities, for example, investigate

themselves, set their own punishments and then report findings to NCAA officials for approval.

The federal Education Department says the waiver gives only the NCAA -- those who physically work in its Indianapolis headquarters -- permission to release information, if it so chooses. However, the waiver doesn't say that.

"The department's interpretation is flat-out crazy," said LoMonte, of the Student Press Law Center. "Once you have a signed waiver, you can't hide behind FERPA anymore."

Yet, the law seemed irrelevant last month when the NCAA publicly admonished an University of Iowa wrestler by name for shoving an opponent after a match.

Records opened

A university's cloak of privacy last year upended the life of an Ohio native and promising pitcher at Oklahoma State.

The NCAA and Oklahoma State invoked FERPA when they suspended sophomore Andy Oliver last May from the school's baseball team.

Oliver, of northeastern Ohio, hired a sports lawyer to help him decide whether to enter the amateur draft as a senior at Vermilion High School in 2006.

That lawyer sent a letter to the NCAA last May to report that Oliver had broken collegiate amateur rules because he hired an agent.

Oliver hired another lawyer, who asked to see the NCAA investigative file.

"They were claiming FERPA," said Rick Johnson, a Cleveland lawyer. "It's not an education record, but they say it is. And this is Andy asking for his file."

Johnson sued the NCAA in Ohio to restore Oliver's eligibility, and the NCAA wanted all documents filed in the case to be kept confidential.

David Price, NCAA vice president of enforcement, said that airing the case publicly would harm the organization's ability to investigate.

"Many of these sources (a) have requested and have been promised anonymity, and (b) could be adversely affected if their participation was disclosed," Price said in an affidavit. "Without an expectation of confidentiality, individuals are afraid to come forward with relevant information because they fear retaliation, accusations of disloyalty, media scrutiny, litigation, and so on."

An Erie County judge denied the NCAA's request this month, ruling that reports of rule-breaking are not education records.

In February, Judge Tygh Tone ordered Oliver back on the mound.

The incident has left Johnson wondering how many others have had similar NCAA experiences.

"How does the public know if these kids are getting a fair shake?" Johnson said. "Why is the public not allowed to know the athlete was caught cheating? Why is this so secret? It's only secret because they don't want the public to know what they do to these kids."

Whistleblower praised

Former Ohio State athletic director Andy Geiger tried the paternalistic

approach when he learned five years ago that former quarterback Troy Smith had accepted $500 from a booster.

"People don't need to know everything," Geiger told The Dispatch in 2004 when questioned about the allegation.

For days, Geiger and football coach Jim Tressel would not explain the broken rule that led to Smith's suspension from the Alamo Bowl that year.

Then Geoffrey Webster, a Columbus lawyer and Ohio State fan who uncovered the payment, went public.

Before giving money to Smith, booster Robert Q. Baker had tripped up at least two other Ohio State football players. But those problems didn't become public until after the Smith incident.

If not for Webster's intervention, it's impossible to know how many other players might have been approached by Baker, now banned by Ohio State from his luxury suite at Ohio Stadium. Baker was not banned until after public disclosure of the facts.

Smith's acceptance of the cash amounted to an NCAA misdemeanor. Such violations can result in lost playing time and requirements to pay money to a charity.

Schools report hundreds of secondary violations every year. They include cases of athletes gambling (Arizona, Ohio University and Toledo). They include cases of athletes using their scholarship book money to buy supplies for friends (Ball State, Florida State and Georgia). They include athletes providing alcohol to recruits (New Mexico, Ohio State and Texas Tech).

Most athletes involved in those cases were suspended from practice and games as punishment, making clear to observant fans that something was amiss. Coaches often say such players "violated team rules."

Even so, their secrets are safe at some universities because of FERPA.

Good Morning Dickie:

I had a brief conversation last week with Corey touching base about next year's schedule. I wanted to make sure that our one ACC request is that we host a Thursday night game during the fall break, similar to this year and because of the LSU game, we needed to move the William and Mary game to the second half of the season and that this is okay if necessary.

Larry:

Great win last week against Miami. Please pass on my congrats to Butch. I know you have been working with Dave Chambers on the series but I just wanted to know if we are closer to getting the dates on the book. As I indicated to you it would work great for us to have you start the series in Orlando in 2013 and for us to return to Chapel Hill in 2014. I could also look at a series in 2017- 18 starting in Chapel Hill. I would love to wrap this up as soon as we can. Let me know if you have any questions or concerns. All the best.

Subject: 2003-04 GIA on-campus housing

Hi Everyone,

I now have housing contract applications for student-athletes who are currently in Univ. housing, have room as part of their GIA and would like to return next year. Please come by my office to pick them up or let Stacey Harris or me know how many you will need, and we will send them to you. They should NOT sign up on the WEB.

The process is as follows:

1. Coach gives housing contract application to student-athlete
2. Student-athlete completes form and takes it to the Cashier's Office in Bynum Hall to be validated by Mr. Blaise Faint, indicating they are receiving an athletic GIA
3. Student brings validated contract back to coach
4. Coach reviews contract and forwards to Beth Miller for room assignment
5. Due March 7, 2003

Coaches, I also need for you to give me a list of all of your rooming requests, freshmen and returning. Please put these in priority order for room location and indicate roommate preference, if you have one. I will work with you on this as much as possible to meet the requests.

For all returning student-athletes who do not have room as part of their GIA, they must go through the normal housing recontracting process, the same as all other students. Please make sure they know this so they don't miss the deadline. They can sign up on the WEB.

If you have any questions, please let me know.

Thank you,
Beth

Attach: TEXT.htm

Hi Everyone,

Believe it or not, our 2005 summer planning process is underway. I would like for you to provide me with your program's tentative dates, number of rooms, with or with/out linen and any other special requests within the next week. Also, feel free to use this opportunity to provide me with your 04 summer feedback.

Please do not hesitate to call if you should have any questions. Looking forward to working with you this upcoming summer!

Subject: 2007-08 Housing

Attach: Text.htm

Folks,

We now have the housing Residence Hall Application forms for your GIA student-athletes who will live on campus next year. Please come by to pick them up for your team or let Stacey or me know how many you need and we will send them to you. If upperclassmen with room GIA want to be in a GIA room, they should not register online; however, if they do not have room GIA, they MUST register on line with other students.

The process is the same as the past several years....The Residence Hall form will need to be completed by the athlete, taken to the cashier's office for scholarship validation, returned to you and then you will send the completed, validated forms to me. I would like to have these forms by March 23, which is the week after Spring Break.

Also, I need a list of the incoming freshmen you want to help with on campus housing, with PID (if you have it), ASAP. Some of you have already sent your freshmen names, but I do not have PID numbers. I will send this list to housing so they can pull those online applications and not assign them to a random room. It is difficult moving athletes to a GIA room once they are assigned randomly by housing, so I would like to prevent as much of this as possible.

Once again, thank you for your attention and cooperation with this process. If you have any questions, please let me know.

Beth

Subject: Housing for 2008-09

Attach: TEXT.htm

Folks,

I understand some in-coming freshmen have received a mailing from the admissions office that includes housing information.

I wanted to let you know that, as far as I know now, our housing assignment process will be the same as last year:

1. Freshmen complete the online housing application.....you MUST send me a list of the freshmen you want to help with housing location, including PID #, when you get it. If you don't send me the names, housing will assign them a room, rather than us.

2. Send me a list of your incoming freshmen with roommate preferences. The names should be in priority order for housing location.

2. Returning student-athletes, with room as part of his/her GIA, will complete a paper Housing Re-Contract form. I will let you know when I receive these forms, so you can get them and give to your student-athletes.

3. A returning student-athlete who DOES NOT have room as part of his/her GIA, MUST follow the online housing sign-up process, just as all other students.

***Very soon, I will need to give the housing office an estimation of the number of apartments we will need in Ram Village. Please check with your returning student-athletes and let me know how many, with roommates, would like to be in a Ram Village apartment next year. These must be upperclassmen with room as part of their GIA.

If you have any questions, please let me know. I will send further information when I receive it from housing.

Thanks,
~Beth

Subject: Returning Student-Athlete Housing for 2008-09

Attach: TEXT.htm

Folks,

As I mentioned in our Head Coaches' meeting on Tuesday, we have the 2008-09 Housing Re-Contracting forms available. These are for current student-athletes, with room as part of their athletic scholarship, who wish to live on-campus next year. You can let Stacey or me know how many forms you need and we will send them to you, or you can come by my office to pick them up. These forms must be completed for all on-campus housing requests.....residence halls and Ram Village Apts. There is a separate form for athletes who are living off-campus, but want to live on-campus next year. Please specify if you need any of the off-campus to on-campus forms.

The completed forms are due to me by March 19, 2008.

PROCEDURE:

1. Coach obtains housing forms and distributes to athletes

2. Athlete completes form and takes it to the Cashier's Office (2215 SASB North) for GIA validation

3. Athlete returns validated form to coach

4. Coach submits forms to Beth Miller by MARCH 19, 2008

If you have any questions, please let me know.

Thanks,
~Beth

Subject: 2011-12 Housing

Attach: TEXT.htm

Folks,

Below is some information regarding on-campus housing for 2011-12.....as far as I know, the housing assignment process will be the same as last year:

1. The first thing: Please let me know the student-athletes who would like to live in Ram Village, so I can try to accommodate them as much as possible These are only upperclassmen with ROOM as part of their Grant-in-Aid. I need these names by Jan. 28 !!

2. If you have student-athletes who do not have room as part of their GIA and would like to live in Ram Village, they should go through the regular housing sign-up process, which I previously sent to you. You can submit those names to me, also.....but indicate they do not have room GIA. I'll put them on a waiting list to be considered, if they do not receive an apartment through the regular housing process. I will not know until May or June if they can be accommodated, so they should consider other housing alternatives, in case they do not get in Ram Village.

3. The priority for Ram Village will be given to those with room GIA, with preference based on class, ie Sr., Jr., Soph. If spaces are still available, those with GIA that does not include room will be considered, based on class.

4. Freshmen complete the online housing application.....you MUST send me a list of the freshmen you want to help with housing location, including PID #, when you get it. If you don't send me names, the housing office will assign them a room, rather than us.

5. When you send me the list of incoming freshmen, please include roommate preferences. The names should be in priority order for housing location. Feel free to suggest a dorm and I'll locate them accordingly, dependent upon available space.

6. Returning student-athletes, with room as part of GIA, will complete a paper Housing Re-Contract Form. I will let you know when I receive these forms, so you can get them and give to your student-athletes. They will complete the form, take it to the cashier's office for GIA validation, return the form to you and you get it to me.

7. A returning student-athlete who DOES NOT have room as part of his/her GIA, MUST follow the University online housing sign-up process, just as all other students. Please tell them not to miss the housing deadlines, if they want to remain on campus.

If you have any questions regarding this process, please let me know.

Thanks,
~Beth

FYI:

Just wanted to reach out to fellow Tar Heels see if there might be of any seniors with interest for the job below (see word doc.) starting in January. Please pass this on to any interested and have them contact me if they have any questions. They would start with a competitive base $40k+ and basically get paid to get your masters in insurance with out having to go to grad school. They basically are looking for candidates with strong work ethic and quality individuals.

Underwriter Trainee
The Hartford Financial Services Group—FORTUNE 100
Location: San Antonio, TX or Charlotte, NC

WHY JOIN THE HARTFORD?
Founded in 1810, The Hartford Financial Services Group, Inc. is one of the nation's largest investment and insurance companies in the U.S. To millions of our customers -- businesses, groups and individuals -- The Hartford stag logo is a trusted symbol of dependability. As a global leader in insurance, asset management, and financial service products, we offer professionals every possibility for growth. Whether we're helping customers or building careers, we're experts at creating the kind of advantages that help people reach their goals.

WHAT ARE WE LOOKING FOR?
- A bachelor's degree in Risk Management and Insurance, Business Administration, Finance and Accounting, Economics, Marketing, or Liberal Arts with a cumulative GPA of 3.0 or above or an equivalent combination of education and experience is preferred.
- Excellent written and verbal communication with strong sales and marketing skills.
- Strong sales and business acumen.
- High energy self starter, good decision maker with an entrepreneurial spirit.
- Solid time management skills.
- Computer savvy- experience with MS office suite.
- Mobility to relocate is required to San Antonio, TX or Charlotte, NC---relocation assistance provided by The Hartford.

WHAT IS THE COMPENSATION OPPORTUNITY?
At The Hartford, our compensation philosophy is simple: we pay competitive salaries and we reward performance. In addition, you will be eligible to participate in our comprehensive benefits program including medical insurance, a 401(k) Plan, an Employee Stock Purchase Plan and more.

WHAT ARE THE RESPONSIBILITIES OF THE POSITION?
The Commercial Underwriting trainee program is designed to prepare you for the commercial insurance market.

- Trainees complete a formal 16 week training program in San Antonio, TX or Charlotte, NC. This program is the 1st phase of several levels of training that will continue throughout your career in underwriting.
- Achieve standards established for success in the program by completing daily assignments, including reading of text materials, completion of on-line courses, case study work, exams, and general activities.
- Actively participate in class by asking questions, volunteering answers, and assisting teammates as appropriate.
- Participate fully with the other trainees on any group/team activities, as assigned by the training manager.
- Adhere to The Hartford's employment policies and procedures, including attendance and professionalism in the workplace.

Beyond the 16 week training period you will:
- Build and leverage personal relationships with key customers that allow The Hartford to obtain new accounts as well as retain and expand sales to existing accounts. Identify customers needs and demonstrate how The Hartford's products and services can meet those needs.
- Achieve the operating plan objectives via new business production through frequent interaction with assigned agents in order to significantly increase The Hartford's penetration of the agent's existing books of business.
- Review insurance policy submissions and determine appetite to underwrite, underwrite and price new renewal business, and present quotes to the agent.
- Maintain knowledge of the regional office strategic direction and plan, including goals and objectives to achieve profit and growth.
- Become the carrier of choice by communicating, publicizing, and providing training to agents and their staff on new products and programs.
- Plan and prioritize work activities to achieve desired results within necessary time frames.
- Effectively use on-line resources, automation tools, and computer software packages.
- Continuously develop and strengthen the skills required for success in the sales underwriting position to prepare for additional responsibility.

WHAT ELSE CAN YOU TELL ME?

The Hartford's Underwriting Development Program can be the route to a life-long business career in commercial underwriting. Working within an entrepreneurial environment, our development programs will give you technical underwriting skills and knowledge to be and integral part of our world class insurance company.

Hello. My name is Joe Schoeneck and I will be taking over for Thomas Hsiao as the Regional Manager of Recruiting and Training for the E&J Gallo Winery. I wanted to take this opportunity to introduce myself to you as we enter into this semester's recruiting events. I have been with the E&J Gallo Winery for seven years and have held many different positions varying from sales to brand marketing. I was recruited on campus and have graduated from the same Management Development Program that we recruit for on your campus, so I know the importance of the program and everyone involved in the success of it. I am thrilled to be working with each of you and am confident that together we can help graduating students meet their potential in the professional world. I am looking forward to meeting each of you and will be reaching out for you individually over the next week to discuss the past, present, and future of recruiting efforts on your campus. In continuing to offer students and faculty all we can, please do not hesitate to reach out for me if there is anything I can do for you or for your students.

All the Best,

Joe

Coaches:

Please share the attached flyer with all of your seniors.

This internship is through the ACC for ethnic minorities and women who are interested in pursuing a career in sport management. I have attached a flyer describing the internship and a job description for each individual internship.

Advisors, please let me know if you have seniors who you think would be interested as well.

Thanks so much,

Spencer Welborn

ATLANTIC COAST CONFERENCE INTERSHIP!!!

Nominations are Due January 28
(See Spencer by Jan. 5)

What: ACC Futures Internship
When: August 2008 – June 2009 (1 calendar year)
Where: Greensboro, NC: Orlando, FL: Atlanta, GA: or Miami, FL
Who: Minority Males and All Women(Seniors)

The ACC Futures Program

Atlantic Coast Conference, Sunshine Network,
FOX Sports Net South, Disney's Wide World of Sports

PROGRAM DESCRIPTION

In August of 1995, the Atlantic Coast Conference joined with regional sports television networks Home Team Sports, now Comcast (Washington, DC), Sunshine Network (Orlando, FL), and FOX Sports Net South (Atlanta, GA) in a landmark six-year agreement to televise over 350 hours of special ACC programming annually. That agreement was renewed and expanded in 2001. Highlighting the yearly coverage is a live 22-game women's basketball package, 30-game men's basketball package, a live eight-game baseball package, overall coverage of 22 ACC Championship events, and the weekly ACC *Live* magazine highlight show. Cumulatively, the agreement provides the member institutions of the ACC the best broadcast of Olympic-sport television coverage in the country.

In November of 1997, the Atlantic Coast Conference and Disney's Wide World of Sports began their partnership when Disney hosted the 1997 ACC Men's Soccer Tournament. Disney has since hosted the 1998, 1999, and 2000 Baseball Blast, the 1998 ACC Outdoor Track and Field Championships, the 1998 ACC Women's Soccer Tournament, the 1999 ACC Volleyball Championship, and the 2001 ACC Spring Sports Festival.

As an additional aspect of the programming and event relationships, the five entities also committed to develop a special internship program for graduating minority student-athletes at Atlantic Coast Conference universities (currently only five). **Six interns will be selected each year**, with a start date of August 1. Two internships will consist of one year in the ACC Office in Greensboro, NC; one internship will consist of one year with FOX Sports Net South in Atlanta, GA; another internship will consist of one year with the Sunshine Network in Orlando, FL; and the final internship will consist of one year with Disney's Wide World of Sports in Orlando, FL. The intention of the programs is to provide the interns with a strong background in televised sports, athletics administration, or event management. The ultimate goal is to produce qualified candidates for employment in intercollegiate athletics, the television industry, or event management.

Selection of the six interns will be made by administrators from the Atlantic Coast Conference, Sunshine Network, FOX Sports Net South and Disney's Wide World of Sports.

If you are interested in any of the internships listed please contact Spencer Welborn in Academic Services or email him at wellborn@uncaa.unc.edu

BY JANUARY 5

Production Internship

Number of Positions Available: 1
Location: Orlando, FL

Internship Overview

The intern will be involved in all aspects of planning, production, and daily operations for original programs airing on Sun Sports & FSN Florida. The networks' production department creates a wide variety of programming, ranging from live professional and college game coverage, pregame and postgame coverage, and original studio-based shows.

The intern's duties will include:

- Coordination of production information sheets for studio productions
- Research and prepare show topics
- Participate in weekly planning meetings to coordinate event coverage
- Coordinate & prepare content for studio show graphics
- Assist in field production; work with feature producers and camera operators on event coverage and interviews
- Regularly pitch content and segment ideas; help determine questioning and content for planned interviews, features, and shows
- Assist in feature production; log interviews and feature content, making recommendations for stories with feature producers and editors
- Assist in show preparation with studio show producers; work with show rundowns, assist in the control room during live studio shows
- Assist in writing and editing process

The intern will also be given opportunities to observe and participate in live sporting event production.

Company Overview

Sun Sports and **FSN Florida**, part of Fox Sports Net, are two regional sports networks serving fans primarily in the state of Florida. Offering one of the most comprehensive regional sports TV schedules in the country, **FSN Florida** and **Sun Sports** are home to Miami Heat and Orlando Magic basketball, Florida Marlins and Tampa Bay Devil Rays baseball, and Tampa Bay Lightning and Florida Panthers hockey as well as multi-sport coverage featuring the University of Florida, Florida State University, and the University of Miami.

Sun Sports and FSN Florida also produce a variety of original studio shows in Orlando, including extensive live pre and postgame coverage of college football, the Emmy Award winning *Chevy Florida Fishing Report*, the behind-the-scenes series *Under The Lights*, and a Monday night college football talk show, *Tailgate Overtime*. The studio is located on the backlot of Universal Studios Florida, in Orlando.

This environment provides an excellent opportunity for students interested all aspects of sports television to receive hands-on working experience in the industry. The two networks produce over 1000 live events per calendar year.

Qualifications

Sun Sports / FSN Florida aims to provide a positive environment for students to supplement their education with hands-on working experience in the television industry. This experience will prepare interns for a future career in sports television. Sun Sports / FSN Florida works actively with colleges to ensure applicants meet necessary criteria set forth by the student's university.

Student Guidelines

Students will be selected for the internship based on an interview with a representative of Sun Sports / FSN Florida, letters of recommendation, and the student's passion and interest in starting a career in sports television. Our goal is for interns to learn through active participation in the television production process.

Atlantic Coast Conference

Championships Intern Responsibilities

- Assist the ACC Associate Commissioner and the Assistant Director of Championships in the planning and administration of 21 ACC Olympic Sports Championships (11 women's and 10 men's), in the following areas:

    - Preparing and updating championship manuals
    - Producing all neutral site credentials and parking passes
    - Coordinating site logistics such as hospitality, signage, awards and various other duties particular to each championship
    - Preparing officials and medical staff information
    - Communicating with host institutional personnel/neutral site staff
    - Summarizing and filing post-championship surveys
    - Organizing, sorting, packaging and delivering all Championship gifts

- Prepare supplemental material for conference sport committee meetings, as well as produce and distribute minutes from these meetings. *(Please see attached, sample schedule of Committee Meetings from 2008-2009.)*
- Assist in the preparation of the Sport Committee Report and supplemental documents.
- Assist with the research, organization, and charting of information for future ACC Championship endeavors and projects
- Serve as the primary ACC contact to various vendors of championship participant gifts and equipment (prepare charts with contact and shipping information)
- Provide championship and campus information for the official Atlantic Coast Conference website, www.theacc.com.
- Assist with the preparation of regular season policies and procedures guides.
- Update and maintain the Sportsmanship Incident Chart for all Olympic Sports.
- Extensive use of Microsoft Word (charts, memorandums, calendars), Microsoft Excel (budget projects), Microsoft PowerPoint (presentations), Internet Explorer (research) and Adobe InDesign and Acrobat (manuals).
- Travel to all Olympic Sport championships and assist in various capacities. *(Please see the attached, sample Championship schedule from 2008-2009.)*
- Package necessary equipment and signage for use at the Championships.
- Oversee inventory of championship equipment.
- Various other duties as assigned by the Championships department.

DISNEY'S WIDE WORLD OF SPORTS™
Intern Program

The ACC Intern interviews are specifically being recruited for our Sports Event Management Team. The following is a description of the area:

Sports Event Management

- The intern will be mentored by the Sports Event Managers on the Disney Created Team, which creates, owns, and operates sporting events at *Disney's Wide World of Sports*™ complex. They will learn the types of information the Sales Manager collects to determine the value of events, including the importance of both event profitability and strategic considerations, and observe event contract negotiations. The intern will be provided the opportunity to actively participate in the decision making process by assisting the Sports Event Manager in the following areas:
    - Researching existing events, gathering information on event history, merchandise sales, marketing tools, hotel forecasting, and sponsorship opportunities.
    - Conducting venue analysis and preparing logistics plans.
    - Assisting in event budget preparation and reconciliation.

- The intern will also be given the opportunity to observe and participate in the planning, organizing and managing of a variety of events in different sports at Disney Wide World of Sports Complex. The intern will be encouraged to fully participate in the management of events by assisting the Sports Events Managers in the following areas:
    - Interfacing with Facility Management and other Walt Disney World departments to insure that all requirements of the event are met.
    - Participate in client site visits and event itineraries.
    - Plan, implement, and execute events -- including setup, registration, guest communication, equipment inventory/ordering, labor planning, and post event recaps.
    - Hands on guest and client interaction in a high paced atmosphere.

- Candidate should be detail oriented, able to multitask, willing to learn & go the extra mile, energetic, and take ownership of a project from start to finish.

DISNEY'S WIDE WORLD OF SPORTS™
Intern Program

Overview of the Program

Disney's Wide World Sports™ complex at the WALT DISNEY WORLD Resort in Lake Buena Vista, Florida, is "The World's best designed multi-sports venue for athletes and fans alike where the drama and exhilarating fun of sports unfold every single day".

The complex contains seven venues for a variety of sports:

- Fieldhouse
- Baseball Stadium
- Baseball Quadraplex
- Softball Quadraplex
- Tennis Complex
- Youth Baseball Fields
- Track and Field Complex
- Sports Fields
- Cross Country Course

Disney Sports Attractions, Inc. is responsible for the programming, event management, marketing, merchandise, sponsorship and facility operations at *Disney's Wide World of Sports*™ complex and the *Walt Disney World Speedway*™, as well as business planning and development for future growth of the complex and the sports business at the WALT DISNEY WORLD® Resort.

This environment provides the perfect laboratory for students in all aspects of sports to receive an integrated learning and working experience. No other location provides the diversity and magnitude of possibilities.

Number of Positions Available

Each year Disney Sports will choose fifteen to twenty interns for a period of six months to one year. One Sports Event Management position is assigned for our ACC Student each year.

Qualifications

The goals of the Disney Sports Intern Program are to provide an inclusive environment for graduate students and special program students from across the country and the world to supplement their classroom studies with a wide variety of practical learning and working experiences. Disney Sports will work with colleges and universities to choose students based on established criteria and approved by the college.

DISNEY'S WIDE WORLD OF SPORTS™
Intern Program

Student Guidelines
Student interns must be enrolled during the time of the internship in a program with a college or university participating in the Disney Sports Intern Program (see above guidelines for colleges and universities).

Students will be selected based upon the recommendation of their college or university and personal interviews with representatives of Disney Sports. They will be selected for our program based on the following:

* Personal Interview with Disney Sports Representative
* Letters of recommendation
* Desire and passion for the sports industry and for Walt Disney World©
* Community involvement and volunteerism

The program will encourage participation by minorities and women and may provide additional scholarship funds for deserving students to participate in the program if they otherwise would be unable to do so.

The ultimate goal of the program is to provide the student with the kind of real world experience that will make them the top "draft picks" in the job market. This will be done by recruiting the top students from the top colleges and universities, training and developing these students and encouraging organizations with jobs to offer to look at the WDW Intern Program as the training ground for their future employees.

DISNEY'S WIDE WORLD OF SPORTS™
Intern Program

Educational Learning Components

The Disney Sports Intern program will allow the student to learn from professionals in a real-world, work environment by partnering the student with professionals in the chosen disciplines who will serve as their mentor and teacher. The program will also include the educational component of classroom learning, writing assignments, group sharing, on the job learning/training and reading assignments.

Classroom Learning

Students will attend classroom learning presentations at least once a month. Some presentations may be specifically tailored to the students, while others may be part of a combined learning program for all Disney Sports staff members.

Sharing/Teaching Each Other

All interns will meet every month, as a group, for 2 - 4 hours. Students will be asked to share experiences, exchange information, and have opportunities to "teach" one another.

On the Job Learning

All interns will be given the opportunity for hands on learning. Supervisors are instructed to provide constant mentoring and teaching. Interns will be given meaningful work experience.

Reading Assignments

Professionals of all kinds have one thing in common, to keep themselves up to date on the latest innovations in their profession…they read! Interns will be expected to read extensively in their chosen discipline. Interns will be given specific publications and periodicals to read.

CABLE NETWORKS

POSITION DESCRIPTION

TITLE	JOB TYPE #	GRADE
ACC Futures Intern		

DEPT. NAME	JOB GROUP	PAY FREQ.	PAY CLASS	EEO / FLSA
Production				

DIVISION	COMPANY	LOCATION
	Fox Sports Net-South	Atlanta

- Time spent in all other functional units within the business including Programming, Promotions, Public Relations, National Ad Sales, Local Ad Sales, Affiliate Sales, Marketing, and Administration.

Reports to: Producer

Position Scope – The following describes the responsibility or impact of this position in terms of employees supervised, annual budget, and/or potential company revenue (i.e.: sales, scheduling/programming, investing, marketing, new business, etc.).

Number and title of employee(s) position supervises: [x] Non-exempt: _____
[ ] Exempt: _____ [ ] Supv./Mgr./Dir.: _____
Budget amount responsible for: _____
Potential negative financial impact of decision making: _____
Potential revenue and source: _____
Other: The position is paid by the ACC office.

Essential Functions – The following is a list of duties and responsibilities that are required of this position, that answer the question "Why does this position exist?". Other duties may be assigned. A job classification does not and cannot state all the tasks and duties required of an employee for any given job.

	% of time spent	Listed in order of importance:
1.	*80%*	Assist in the production of ACC Programming (ACC All Access & College Basketball Previews)
2.	*10%*	Work with other departments, as an observer.
3.	*5%*	Participate in remote productions, as assigned.
4.	*5%*	Participate in meetings and conference calls related to productions, as required.

TITLE				JOB TYPE #	GRADE
ACC Futures Intern					
DEPT. NAME	JOB GROUP	PAY FREQ.	PAY CLASS	EEO / FLSA	
Production					
DIVISION	COMPANY		LOCATION		
	Fox Sports Net-South		Atlanta		
EFF. DATE	REVISED DATE	DIV. APPROVAL		H.R. APPROVAL	
	3/30/06				

Other Duties (secondary, or non-essential):

- Work with associate producers and outside sources for trade and footage acquisition.
- Log all acquired footage. Tape dubbing, as assigned. Other duties, as assigned.

Qualification Requirements - To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill and/or ability required to satisfactorily perform each essential duty.

Education / Experience - 4-year degree preferred, in Communications, Broadcasting or Radio/TV/Film, or quivalent work experience. Some experience in show production and/or technical operations.

Language / Communication - Excellent written and verbal communication skills needed

Mathematical Skills -

Reasoning Skills -

Other Skills / Requirements –

- Strong organizational skills
- Ability to work without supervision and under pressure
- Computer software: Windows 95, Microsoft Word, Excel, and Outlook
- Creative ability to perform job efficiently and effectively.
- Some familiarity with studio production and remote production facilities.

Physical Demands - The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Occasionally = one-third or less; frequently = one-third to two-thirds; regularly = more than two-thirds time spent.

- Frequently required use of hands and fingers to write, manipulate telephone and computer keyboard. Regularly required to hear, talk and use close vision. Occasionally required to bend and lift up to 30 pounds. Must be able to drive a car. Must be willing to travel often and attend live sports events.

Typical tools, equipment and materials utilized:

- Computer, telephone, printer, calculator, copier, and fax machine. Full use of production equipment, Beta SP or Non linear edit facilities and inner workings of remote production facilities.

Work Environment – The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job.

- This position works primarily in the office and sometimes in the field at live sports venues.

Position: Orange Bowl Committee Assistantship

RESPONSIBILITIES

Executive Operations

- Assist Chief Operating Officer on day-to-day administration, special events and projects including but not limited to correspondence, expense reports, travel arrangements and conference calls.
- Assist Vice President of Executive Administration and Coordinator of Executive Operations on day-to-day administration, special events and projects, as directed by COO.
- Assist the Chief Operating Officer and Vice President of Executive Administration with the research, presentation and management of annual plans and budgets.
- Assist Executive Office with Football Committee administration, including travel preparation, gift administration, meeting preparation and Scout School.
- Assist with coordination of Executive Office events, including but not limited to, Scout School, Selection Sunday party, Commissioners' Retreat and Summer Splash.
- Update and assemble Football Committee Handbook, including updating college football executive database.
- Develop, present and manage event staffing plans.
- Develop, present and manage event operational task lists.
- Develop, present and distribute gift items for various VIP programs.
- Other duties as assigned by Chief Executive Officer, Chief Operating Officer and Vice President of Executive Administration.

FedEx Orange Bowl (January)

- Assist the Executive Office with the coordination and hosting of the FedEx Orange Bowl.
- Assist the Director of Membership Services with the preparation and coordination of the President's Dinner and the Orange Bowl Committee Game-Day Celebration.
- Assist the Executive Assistant to the CEO and the Director of Membership Services with VIP hospitality in the President and CEO's suites at the game.
- Assist with the coordination of the 50th Reunion and serve as staff liaison during the FedEx Orange Bowl Festival.
- Assist in production of a comprehensive Conference Guide for each conference.
- Assist with the coordination of transportation for teams, conferences and VIPs with courtesy cars, limousines and buses.
- Assist Events Department as directed prior to the following events and on event day at the Orange Bowl Sponsors Golf Classic, the Orange Bowl Kickoff Party, the MetroPCS

Orange Bowl Basketball Classic, the Bacardi Rhapsody in Orange, the AvMed Orange Bowl Coaches Luncheon and any additional events in need of support.

BCS Commissioners' Retreat (February) and Summer Splash (Spring/Summer)

- Work with the Marketing Department to develop collateral items for event, including signage, manual covers, itinerary templates, etc.
- Assist with the selection and ordering of gifts.
- Create and produce invitations, manuals and daily itineraries
- Assist with coordination of events, dinners and activities
- Create and maintain staffing plans and task lists.

Orange Bowl Youth Sports Program (Fall)

- Participate in OBYFL programming including but not limited to "Park of the Week" program, Orange Bowl Cheer and Dance Championships, OBYFL Championships.

General

- Must be available to work ALL Orange Bowl Committee events (weekdays and weekends) including but not limited to the Orange Bowl Youth Football League, OBYFL Championships and the Orange bowl Cheer and Dance Championships.
- Position may not hold any other paid employment while working for Orange Bowl Committee.

The Orange Bowl Committee (OBC) was created in 1935. Its mission then was to generate tourism to South Florida through an annual football game and supporting Festival. Since that time, the not-for-profit 329-member, all-volunteer organization has expanded its reach beyond the city to become a foundation of the South Florida community.

Presently, the FedEx Orange Bowl has grown into a month-long calendar of events affectionately known as the Orange Bowl Festival, offering a top-notch college football game, as well as other sports, entertainment and community events. In addition to the football game, the Festival includes events such as the MetroPCS Orange Bowl Basketball Classic at the Bank Atlantic Center, the Washington Mutual Orange Bowl Fan Fest at Margaret Pace Park, the Orange Bowl Youth Football League Championships, the Orange Bowl Cheer and Dance Championships and more. The Orange Bowl festival attracts more than 150,000 visitors to the South Florida community annually.

In January 2009, in addition to the FedEx Orange Bowl, the OBC is hosting the BCS National Championship Game with an additional week-long calendar of events celebrating college football's national title game.

The OBC offices are centrally located in the community of Miami Lakes, in Miami-Dade County close and just south of Broward County. The full-time staff and assistantships surpass 40 nearer to the Festival, while the committee membership exceeds 325. We hire an additional 1,500 volunteers during the Orange Bowl Festival, 20 "Patch Patrol" Street Team members and 10 Junior Hosts for the Festival.

An OBC assistantship position is an excellent opportunity for applicants who desire to make a career in sports entertainment and gain experience working in numerous South Florida sports and entertainment venues. Candidates should be highly motivated, well organized and be able to handle several events at once. Extensive hours required at times. Candidate will need own transportation in Miami and will need to secure housing.

Sun Sports/FSN Florida Marketing Internship

Number of Positions Available: 1
Location: Orlando, FL

Company Overview

Sun Sports and **FSN Florida**, part of Fox Sports, are regional networks that produce over 1000 live events per calendar year serving fans primarily in the state of Florida. Offering one of the most comprehensive regional sports TV schedules in the country, **FSN Florida** and **Sun Sports** are home to Miami HEAT and Orlando Magic basketball, Florida Marlins and Tampa Bay Rays baseball, and Tampa Bay Lightning and Florida Panthers hockey, as well as, multi-sport coverage featuring the University of Florida and Florida State University.

Sun Sports and FSN Florida also produce a variety of original studio shows in Orlando, including extensive live pre and post-game coverage of college football, the Emmy Award winning *Chevy Florida Fishing Report*, the behind-the-scenes series *Under the Lights*, and the college football talk show *Tailgate Overtime*.

This coveted internship provides an excellent environment for students-athletes interested in all aspects of sports television to receive hands-on working experience in the industry, while making numerous contacts via networking opportunities with the college administrators plus executives in the MLB, NBA and NHL.

Job Description

- Working in conjunction with the Director of Marketing/Creative Services on a $1.8M marketing plan to promote both network brands and programming statewide.
- Acting as primary contact (after Director of Marketing) with advertising agencies on execution and fulfillment of the campaigns that properly position the network brands in market via partnerships with media outlets (outdoor, print, and radio) and or third party client opportunities.
- Implementing marketing commitments/elements of professional and collegiate broadcasting/marketing contracts with the HEAT, Magic, Lightning, Panthers, Marlins, Rays, UF and FSU to best position our brands and objectives with our properties including, but not limited to, promotions, presenting game sponsors, signage, special event marketing, on-site activations, promo spot production, joint merchandise opportunities, integrated sales efforts, client functions and community outreach.
- Conceptualize, compose, produce and edit specialty on-air promotions, radio spots, cross promotional materials, contest spots, client commercials, integrated sales marketing promotions and PSAs plus promote network programming through drops, live reads, squeeze backs, studio tickers, elevators and lower thirds.
- Produce and execute promotional spots and/or commercials in conjunction with college and professional properties for branding, charities, and tune in messaging purposes.
- Managing event marketing. Ordering premium items for all network departments; schedule special events and receptions; and coordinate talent appearances.

- Work in conjunction with Affiliate Sales to present promotions and unique marketing opportunities to all cable and satellite systems in the state including bright house networks, Comcast and Direct TV.
- Assists in driving, compiling, and researching ratings for live sports events plus all existing original programming such as Chevy Florida Fishing Report, and Tailgate Overtime via network promotion, brand management, event marketing, on-air elements, spot production and web site exposure.
- Spearhead street and grass roots on-site marketing at FSU and UF football/basketball games plus MLB, NHL, MLB playoff games if necessary.

Requirements

- Good oral and written communication skills are needed.
- Good organizational and project management skills are needed.
- Knowledge of Microsoft Office applications, including Word, Excel, Powerpoint and Outlook is necessary. Knowledge of Photoshop is preferred.
- A working knowledge of sports including college football/basketball, MLB, NBA and NHL.
- The ability to multi-task and work in a fast paced environment is essential.

CAROLINA LEADERSHIP ACADEMY

"Developing World-class Leaders for a Lifetime of Service and Success"

Rising Stars Program Info and Application Form

"Our coaches were clear – the single most important characteristic necessary to build a winning program is *leadership* among the student-athletes."

- Dick Baddour, UNC Director of Athletics

Rising Stars Program Description

Rising Stars is a comprehensive, year-long leadership development program designed to prepare selected UNC sophomore and junior student-athletes to become effective leaders for their teams. The intensive, 10-module program provides UNC student-athletes with the foundational insights and skills necessary to become effective Leaders by Example and Vocal Leaders. Please read over the description of the Rising Stars program and apply if you are interested.

Goals of Rising Stars Program

This program will help emerging leaders:

- clearly understand the responsibilities, risks, and rewards of leadership;
- recognize their personal strengths and areas for improvement as leaders;
- develop skills to be strong Leaders by Example and set the stage for Vocal Leadership;
- support the current Veteran Leaders of the team by word and action;
- assume leadership responsibility for their class and the one(s) below;
- develop a stronger and more trusted relationship/partnership with their coaches; and
- prepare emerging leaders to smoothly succeed outgoing Veteran Leaders

Rising Stars Program Information

- There will be **10 Rising Stars workshops** scheduled on **Monday nights (6:45-8:00pm)** throughout the school year. Consequently, you must schedule your fall and spring classes to not conflict.
- Attendance at all workshops is required unless you are excused because of competition, class meeting/project, or team travel and have provided **advance written notification** to your coach and the Carolina Leadership Academy.
- **Two unexcused absences** and you will be dropped from the program.
- Also, we require that you be physically present at 70% of the workshops: you must attend 7 out of the 10 workshops. **70% attendance policy** allows you to remain in good standing with the program.
- Participation in the **CREED** program is a **pre-requisite** for further involvement in the Carolina Leadership Academy.

APPLICATION

If you would like to apply for the Rising Stars program, please complete this application and return it by **April 1st** to your head coach or to Shelley Johnson (CB 3107) or via email (shelljo@uncaa.unc.edu). Notifications of acceptance will be sent **April 15th**.

Contact Information

Name

Sport

E-Mail Address

Year in School (upcoming)

Eligibility & Availability

Have you satisfactorily completed the CREED program?	yes	no
Are you available on Mondays during the fall and spring semesters from 6:45-8:00pm?	yes	no
Will you be able to attend at least 7 of the 10 workshops throughout the program?	yes	no
Are you aware of the 2 unexcused absence policy?	yes	no

Essay

Why are you interested in becoming a part of the Rising Stars program?

Agreement and Signature

By applying to the Rising Stars program, I commit to attend the workshops, complete the readings/assignments, contribute my comments/questions and learn more about leading myself and others as I prepare to be an effective leader for my team, my school and beyond.

Name (printed)

Signature

Date

Thank you for completing this application form and for your interest in the Rising Stars program.

Subject: Compiling a list of outstanding alums
Attach: TEXT.htm

Hi coaches,
At the suggestion of one of your colleagues, I am compiling a list of outstanding student-athlete alumni for use in recruiting. The thinking is that it would be great to show a broad view of some of the things that former Tar Heel student-athletes from all sports have gone on to do.
To that end, at your earliest convenience please send me 3-5 former student-athletes from your sport who have gone on to interesting, outstanding and/or notable careers. Ideally, we'll have a wide range, everything from CEOs to artists to physicians to members of the military.

This is the info I'm looking for:
Dana Gelin, women's tennis, Head of Surgery at UNC Hospitals
(If you have the years that person competed here, great. Otherwise I can look that up.)

Many thanks for your participation. My hope is that this will be helpful info for everyone -- as soon as I have it compiled, I'll share it with all of you.
If you have any questions, please let me know.

best,
Dana Gelin

Memo

To: Coach Butch Davis, Coach Sylvia Hatchell, Coach Roy Williams
From: Rick Steinbacher Rich
Re: State Board of Education / Department of Public Instruction Public Service Announcements
Date: December 30th, 2008
Cc: Dick Baddour, Lance Markos, Corey Holliday, Greg Law, Jerod Haase, Jones Angell, Ken Cleary

The North Carolina State Board of Education has a subsidiary called the Department of Public Instruction. This agency has been given a financial grant by the state legislature to promote healthy behaviors (eating right, exercising, etc.) among elementary, middle school, and high school students in the state of North Carolina. One idea they have for doing this, is having our athletes and coaches record audio and video public service announcements encouraging North Carolina students to eat right and exercise.

Lance Markos in our compliance office has approved this concept as permissible under NCAA bylaws, and Dick Baddour has approved the concept as well. I think it can be a very positive campaign for our athletic department to have our athletes and coaches sharing these messages across the state of North Carolina on radio, television, and in schools.

The Department of Public Instruction plans to use some of their grant money to purchase air time on our Tar Heel Sports Network to air these public service announcements on the radio during men's and women's basketball games this coming semester. We would also play the video messages on TarHeelBlue.com, and they would put them on their North Carolina Healthy Schools website. They also have a television channel that broadcasts from their offices in Raleigh to every elementary, middle school and high school in the state of North Carolina and would air these messages via that channel.

I want to make you aware of this campaign, answer any concerns you may have, and ask permission to have one of your student athletes participate in the initial messages. With your permission, we would coordinate a time with the student athletes (working with Corey, Greg, Jerod) to record one audio and one video message. It should take at most 15 – 20 minutes of time for the student athletes to do this. We would ask them to dress in their respective team sweat suits and record the audio and then the video message. The student athletes I initially suggest are as follows, but if you would rather us ask someone else, we'll use whomever you wish:

Football:	Ryan Taylor
Women's Basketball:	Rashanda McCants
Men's Basketball:	Marcus Ginyard

Participation in this campaign is completely voluntary for the student athletes and I'll make sure they know that. The scripts they would be reading from for both the audio and video messages are attached.

Once we record the initial student athlete messages, we will be asking head coaches in the department to participate as well, in the same way. If you have an interest in participating in this campaign yourself, please let me know.

The Department of Public Instruction hopes that this campaign will have an impact on the students across North Carolina. They also hope that the campaign attracts the attention of sponsors who would underwrite future messages allowing them to make this campaign larger throughout the state.

Please let me know if you have any questions about the above. Best way to reach me is via cell phone at 919-606-6354.

Exercise

Hi, I'm _____ and I play/coach _____ at Carolina.

Exercise helps you learn, feel better and get in a good mood by balancing the chemicals in your body.

So get some physical activity every day; you will notice a difference!

(from North Carolina Healthy Schools and Department of Instruction)

Physical Education

Hi, I'm _____ and I play/coach _____ at Carolina.

Physical Education taught me stay fit, but also how to use my skills in different games and learn to solve problems.

Please support quality physical education for North Carolina students.

(from North Carolina Healthy Schools and Department of Instruction)

Physical Activity

Hi, I'm _____ and I coach _____ at Carolina.

I remember playing outside after school until supper. Let's encourage our kids to play outside and invite friends over.

Please make time to be physically active at least 60 minutes each day.

(from North Carolina Healthy Schools and Department of Instruction)

Subject: NFL Music
Attach: TEXT.htm; Bucs-Playlist-12-28-2008.pdf

Coach,

We have requested music lists from most NFL teams and have specifically targeted five teams (rated as the five best places for game atmosphere) for follow up calls to get their lists.

1. Packers
2. Steelers
3. Texans
4. Patriots
5. Ravens

All teams have said they will get us their list but as of yet we have only gotten the Tampa Bay Buccaneers. We will stay on the five teams to get their lists as quickly as we can.

The Tampa Bay list is attached. We will review this for ideas to add to our game day list. If you have specific ones you would like to have played let us know.

Thanks!

Rick

Subject: Kenan Football Center Flags
Attach: TEXT.htm

Coach,

Wanted to let you know what the plan is for the flag poles at Kenan Stadium. There are 10 new flag poles on top of the Kenan Football Center and their are 8 more (4 on each side) on the North and South Sides of the Stadium. The plan is as follows:

Kenan Football Center
1 - Interlocking NC Flag (will be ACC Flag for Citadel game if we don't get a new NC Flag in time)
2 - Boston College Flag and Clemson Flag
3 - Florida State Flag and Maryland Flag
4 - NC State Flag and Wake Forest Flag
5 (taller pole) - United States of America Flag
6 (taller pole) - State of North Carolina Flag
7 - Duke Flag and Georgia Tech Flag
8 - Miami Flag and North Carolina Flag (Interlocking NC Flag)
9 - Virginia Flag and Virginia Tech Flag
10 - Interlocking NC Flag (will be ACC Flag for Citadel game if we don't get a new NC Flag in time)

Kenan Stadium North and South Sides Poles 1 - 8
All will be Interlocking NC Flags

Please let me know if you have any questions or concerns.

Thanks,

Rick

Subject: Fwd: Music Update
Attach: TEXT.htm; Broncos_vs_Bears_Playlist.xls; Broncos_vs_Cardinals_Playlist.xls; butch post uconn.mp3

Coach Davis,

NFL Teams are very slow in getting us music lists, we will keep begging for them. I sent you the Tampa Bay Bucs list and attached is the Denver Broncos. Also, we've been in touch with "pro sports deejays" about some unique music that can be played at our games and what is seen in pro sports stadiums. Based on the Tampa and Denver lists and the pro sports deejays, below is a list of new songs we are looking at working in, mainly a mixture of rap and rock.

Motley Crue--Kickstart My Heart
Game Brothers/Lil Wayne--Priceless
Kanye West--Good Morning
Lil Jon--Give It All You Got
Fabulous--Throw it In The Bag

Also, I have attached your post game interview (MP3 file) from the U Conn game with Woody. I have shared this with some folks close to me and just wanted to tell you that your comments about "the lessons playing competitive sports teaches you about life...never quit on anything" were awesome. I am thankful every day for having had the opportunity to learn those lessons playing college football and your comments in that interview summed up for me the number one reason why college athletics and college football are such an awesome thing. Just wanted to let you know how true I thought those comments were.

Good Luck vs. East Carolina,

Rick

Subject: FAQs for Thursday night football game

Listed below are answers to some of the most frequently asked questions about the University of North Carolina's Thursday night football game vs. Florida State, Oct. 22, 2009

What time is the game?
Carolina vs. Florida State will kick off at 8 p.m.

What time do the gates open at Kenan Stadium?
The stadium will open to fans at 6:30 p.m.

What time will the parking lots open to fans with parking permits?
Parking lots will open to vehicles with proper permits at 5:30 p.m. There are no classes that day as the university is on Fall Break, but staff and faculty will be working and will occupy those lots during the day. The lots will be cleared and available for football parking at 5:30 p.m. Limited public parking in the Manning Lot, Jackson Deck and Cardinal Deck also will become available at 5:30 p.m. for $10.

Are there any parking lots that are traditionally used for Saturday games that are not available for the Thursday game?
The only two lots where there will be a change from normal football parking procedures are the Dogwood Deck and the Children's & Women's Hospital Lot, which are located near the hospital on Manning Drive. Rams Club members who normally have parking permits in those areas will receive parking passes in

a new location for the Thursday night game.

Where should people park if they arrive on campus prior to 5:30 p.m.?
Permitted campus lots are scheduled to be available at 5:30 p.m., however Town of Chapel Hill municipal lots will operate under normal conditions. Metered parking spaces and pay parking lots are available in downtown Chapel Hill.

What time will Tar Heel Town open?
Tar Heel Town, located on Polk Place between South Building and Wilson Library, will open at 5:30 p.m.

Will the Carolina football team make the Old Well Walk?
Coach Butch Davis and the Tar Heels will participate in the traditional walk from the Old Well through Tar Heel Town beginning at approximately 5:45 p.m.

Is Tar Heel Express operating and at what times?
Tar Heel Express will operate as normal. Shuttles will begin from University Mall, Friday Center Park and Ride and "Touch DownTown" Lots three hours prior to game time (5 p.m.). Shuttles will begin from Jones Ferry Park and Ride and Southern Village Park and Ride 1.5 Hours prior to game time (6:30 p.m.).

Is the University operating on a normal Thursday schedule?
The University will alter the time at which the work day ends on Oct. 22 to allow all University staff and faculty ample time to leave campus and avoid the expected traffic congestion. On October 22, 2009, the regular work day hours will be changed from 8:00-5:00 pm to 8:00-3:00 PM. By moving the end of the work day to 3:00 pm on this day, those leaving campus at 3:00 pm should encounter significantly less traffic and experience reduced inconvenience.

Will University buses for students and staff be affected?
Campus buses will operate under a normal schedule throughout the day.

Is UNC Hospitals operating on a normal Thursday schedule?
UNC Hospitals will operate as normal, with the exception of campus clinics. In order to help alleviate traffic congestion and provide the best customer service possible, the on campus clinics will close at 3 p.m. on Thursday, October 22nd.

Where should fans with Recreational Vehicles (RVs) park?
RV parking is available at the Friday Center after 4 p.m. on Thursday, Oct. 22. There is no RV parking on campus on Wednesday evening or Thursday.

Will residential streets in Chapel Hill be affected?
To help facilitate the mobility of fire, rescue and police vehicles, several roadways will be restricted from approximately 3 p.m. - 8:30 p.m. and 11 p.m. - 1 a.m. Local residents in the impacted areas will be contacted in advance and provided special instructions. On game night, residents may be asked to show access permits or valid driver's licenses for the restricted access neighborhoods.

Hello Dickie:

Could you please respond to the following:

. How many tickets did we sell to our bowl game?

. How much marketing did we do to bowl game sell tickets?

. Were you disappointed in the bowl game turnout?

. How did the 2008 bowl game compare in the above against our 2009 bowl game?

Thanks much!

Butch Davis

Pam, Coach Davis, and all,

That sounds like something for me to do. Let me make sure that I don't have any conflicts with work or home. I have been tellling Rose and the kids About how nice the UNC campus is. I might just make a College Road Trip out of it and fly them out myself. I will let you know for sure at the beginning of next week if that is OK.

Thanks,

Russ M.

Dear Russell:

It was really great to see you. . I hope something will be worked out regarding our Video needs.

I hope you know how much I respect and admire you. The character and integrity you possess have helped you represent yourself well from the time

you were a freshman to the wonderful husband and father you are today.

I wanted to plant a possible idea in your mind. On Wednesday, July 30th, we will be hosting the Second Annual Night of Champions in Chapel Hill. This is an FCA/Athletes-in-Action kick-off for local high school football players (40+ schools invited), as well as for our team. We try to include Christian-motivated speakers, show highlight films, and feed the kids. If this is something in which you'd consider participating, I'd pay your travel expenses and offer a speaker's fee. Please give me a call and we can discuss the details. I certainly understand if your schedule doesn't permit.

I look forward to hearing from you soon. Please give all my best to Rose!

Warmest regards,

Coach Davis

Jen Ketterly

I hope the second semester is going well for you.

This is an extraordinarily critical time for our football players. It is the period of the year where we're at the highest level of work load that we ask of our players. We have a significant number of players that we're trying to get bigger, stronger, and more powerful. Some we've asked to put on muscle mass, some we've asked to reduce body fat and to lose weight. The dining hall has stopped using the Dot System to identify foods that would greatly benefit our players in identifying their specific needs.

I think it's extremely important that you have a strong presence during the week at breakfasts and dinners to monitor our players, be available for questions, to inquire, and to continue to educate our players. It was brought to my attention that you have not been to Kenan Football Center these first few weeks of the second semester. It's very important for you to have a presence to reinforce good nutrition. I hate to see the strides we started to make in the fall be put on the back-burner and take an insignificant role.

I hope to see you at the Training Table on a regular basis in the very near future. With your help, our team will get bigger, stronger, more powerful and win games!

Coach Davis

Subject: RE: Football Training Table
Attach: TEXT.htm

Coach Davis,

Thank you for your email and for speaking with me directly about your concerns. I can appreciate the importance of this time of year as it relates to next season and recognize that this is the very best time of year for the players to address weight related goals and improve performance.

I hate to hear that you have been given word that I haven't been in the facility this semester or working toward the goals of the program. Just to give you a quick summary, as early as the week of Jan 7th I have been addressing needs for spring training. I've worked with the strength staff and Domo to get our pre- and post-workout supplements in here, talked informally with Coach C and met with Scott T re: players with spring weight goals. I also created tracking sheets for following spring progress (they are posted on the server so that Jeff, Scott and I can share data) and have worked with Gatorade to get some equipment enhancements for the facility. I am currently working with the department of exercise and sport science to secure our use of the bod pod for our upcoming body composition reassessments. In addition, I have seen players at my office in sports medicine as arranged by the sports med staff, and continue to always have Wednesday afternoons devoted to football related administrative duties, player management, or other.

In addition to the work that has been going on, I hear what you are saying about availability at the training table. As of this afternoon I have adjusted my clinical schedule to be able to address this cause. The plan of action includes adding the following:

TUESDAYS 8-9am Breakfast

WEDNESDAYS 5:00-7:00pm Dinner

THURSDAYS 8-9am Breakfast

and reinstating weekly training table management meetings with the Aramark Supervisors while improving the dot system

I hope you feel this is an acceptable short term solution. As you may know,

my current position oversees the needs of all our teams here at UNC and I am doing my best to balance and address those needs. It has become clear over the past couple years that our need has outpaced our resource with regard to sports nutrition. The Sports Medicine administration and I have proposed and requested expanded resources in this area for the upcoming year.

As part of this proposal we have discussed and outlined a long term vision for the services. Justifiably, the football program's needs are at the top of our priority list and have driven many of our discussions. If you have the opportunity to lend a voice of support to the athletic administration and express your interest and the program's need for additional sports nutrition time and resources, it may help reinforce and justify our proposal. We are requesting an additional full time nutritionist for the coming year and I would be interested in talking with you about the possibility of incorporating the nutrition services into the plans for the stadium's endzone renovation project. This proximity to the program could help further expand accessibility and availability.

Thank you again for your continued support and communication.

Sincerely,

Jen

RE: Performance Reviews for SPA Employees

It is once again time to complete the Annual SPA Performance Reviews for the **period ending May 31, 2007**. Work Plans for each employee may also be update during this process. If Work Plans are current and do not need updating, simply submit a copy of the current Plan and write at the top in red ink "Work Plan remains the same for the period to end May 31, 2008". If the Work Plan has changed, please submit a new Work Plan Form (copy attached) for the period ending May 31, 2008. The Performance Review should be completed on the most current form, a copy of which is attached. (**REMINDER**: the Work Plan and Performance Review cycle is June 1 to May 31).

Upon completion of each evaluation and work plan, and in order to satisfy the Office of State Personnel reporting requirements:

1. be sure that the employee, supervisor and next highest level supervisor have signed all forms.
2. give a copy of each to the employee.
3. keep a copy of each for your files.
4. **send the following to our office NO LATER THAN JUNE 1, 2007:**

the original copy of the WORK PLAN for the period ending May 31, 2007.
the original copy of the PERFORMANCE REVIEW.
the original copy of the Work Plan for the period ending May 31, 2008 (if revised), **or** a copy of the current unchanged Work Plan (indicate "Remains unchanged for the period ending May 31, 2008" at the top).

NOTE: employees must be under a work plan for 4 months in order to be evaluated. If you have employees in your work unit hired since the last review cycle, and for whom you have not written a work plan, you **must** do so at this time. If you have questions about this please call Joyce.

Evaluations must be reported to Employee Records and entered into the Payroll system in order for any increases that may be awarded to be recognized in paychecks a current basis. **It is imperative that you complete and return your performance reviews by the aforementioned date. Reviews not received by this deadline will result in the employee not receiving increases for which they may be eligible.**

Please be advised that the Legislature has not yet made any decisions concerning increases for 2007-2008. You will be notified as soon as that information is available.

If you have any questions concerning this process, please call Joyce at 962-7850.

PERFORMANCE REVIEW

Type of Review:	Annual	Interim	Other	Work Planning Period Ending:

Employee's Name: _____ _____
Last First MI PID #

_____ _____
Dept. Name Dept. #

Classification Title: _____ Position Number: _____

Date Appointed To This Position: _____

Supervisor Completing This Form: _____

Date Performance Review was Completed: _____

Instructions

During the Work Planning Period, the supervisor documents in Part I of this form the employee's Actual Performance for each Principal Function. The supervisor records specific results achieved and the "behaviors" (i.e., knowledge, skills, abilities and methods) demonstrated to produce the results. When documenting Actual Performance, describe the quality, quantity or other appropriate measures as described in the Performance Standards.

Throughout the Performance Review process, the supervisor and the employee refer to the Principal Functions and Performance Standards that comprise the employee's Work Plan. To evaluate the employee's performance, the supervisor compares the employee's Actual Performance with the Performance Standards [Performance Indicator(s)] in the Work Plan.

Based on the review of the employee's Actual Performance, the supervisor determines the appropriate Performance Rating for each Principal Function and records that rating under Part I, "Performance Rating," using the North Carolina Rating Scale. (The numbers under Part I, "Principal Function" coincide with the Principal Function numbers shown on the employee's Work Plan.)

The supervisor completes Parts I, II, and III and discusses the employee's performance with the next higher level supervisor. After reaching an agreement on the proposed evaluation, the supervisor conducts the Performance Review Interview with the employee. Proposed performance ratings may be revised based on the supervisor-employee Performance Review Interview.

As part of the Performance Review meeting and discussion, the employee adds comments, if any, in Part V and signs the form. The supervisor gives a copy of the signed and completed form to the employee, retains the original in the department file and informs the employee where the original is filed.

PERFORMANCE REVIEW

Part I – Evaluation of Performance for each Principal Function

For the Work Planning Period Ending: _____

Employee's Name: _____ _____
Last First MI PID#

Use this Part to record information about Actual Performance to be discussed with the employee during the Interim and Annual Performance Reviews. You may add additional rows (or remove rows) to the table below to match the number of principal functions on the employee's Work Plan. Cells will expand as needed.

Principal Function #	Actual Performance	Performance Rating

PERFORMANCE REVIEW

Part II - Supervisor's Summary Evaluation Statement

Part III - Overall Evaluation

Check the Overall Evaluation on the Annual Performance Review. (Assigning an overall evaluation is optional for Interim and other reviews.)

Outstanding Performance	Very Good Performance	Good Performance	Below Good Performance	Unsatisfactory Performance

Part IV - Employee Appeals

An employee may appeal the Overall Evaluation, the rating on one or more principal functions, or explanatory remarks on the Annual Performance Review by completing a "Level A Appeal of Performance Management Decision," and forwarding it to his/her department head within 15 calendar days from the date he/she receives the completed Performance Review. A "Level A Appeal of Performance Management Decision," is available from the Office of Human Resources website or the Employee Services Department. As provided by the General Assembly and rules issued by the Office of State Personnel, an employee also may appeal the non-award of a Performance Increase or Bonus when eligible; or the amount of such award. Interim or other performance reviews are not appealable.

Part V - Employee's Comments (optional)

___ I agree with this evaluation.
___ I do not agree with this evaluation.

Employee Comments (optional)**:**

Part VI - Signatures

(The employee is required to sign this form. The signature indicates only that the performance interview was held, not agreement with the statements or ratings contained in it.)

WORK PLAN
(PRINCIPAL FUNCTIONS AND PERFORMANCE STANDARDS)

This Work Plan is for the Work Planning Period beginning _____ and ending _____

Employee's Name: _____ _____
Last First MI PID #

Department: _____ _____
Dept. Name Dept. #

Classification Title: _____ Position Number: _____

Date Appointed to this Position: _____

Supervisor Completing this Form: _____

Date Work Plan was Completed: _____

Instructions

The Supervisor completes this form prior to the Work Planning Conference and discusses the Work Plan with the employee during the conference. As appropriate, revisions may be made to the Work Plan. The supervisor gives a signed copy to the employee and retains the original for the department file.

Principal Functions and Performance Standards

List Principal Functions for this position, beginning with the most important. Principal Functions can be identified by reviewing previous Work Plans and position descriptions, interviewing employees, or by conducting a job analysis to determine the current major duties and responsibilities of the position.

Under each Principal Function, the Supervisor indicates the Performance Standard(s), the Performance Indicator(s) at the "**Good Performance**" level, and the Source(s) of Data to be used in evaluation.

Space for six Principal Functions has been provided in the following table as a framework for entering this information consistently. You may add or delete table rows as needed. Cells will expand as needed.

Date	Date	Date

WORK PLAN
(PRINCIPAL FUNCTIONS AND PERFORMANCE STANDARDS)

DEVELOPMENT PLAN

Employee's Name: _____ _____
Last First MI PID#

This is for the Work Planning Period beginning _____ and ending _____

Instructions

The Supervisor works with the employee to design a Development Plan to help the employee succeed in his/her job. The Development Plan specifies the actions the employee is to take to acquire knowledge, skills and abilities necessary for successful performance on the present job, or to document any growth opportunities in which the employee is participating. Sample activities include:

- Regularly scheduled on-the-job training sessions to improve skills
- Complete introductory computer course
- Attend Telephone Techniques workshop
- Other self-development activities

When identifying developmental activities, the supervisor should review course or training content for its relevance to the employee's Principal Functions and Performance Standards. Provide the level of detail appropriate for the activity. Target dates for achieving the items in the Development Plan should be listed, along with a brief description of the assistance or support to be provided by the supervisor or others.

The Development Plan is strongly recommended for all employees. A Development Plan is mandatory for an employee whose performance of any expectation is less than the "Good Performance" level as of the Interim Review, the Annual Review, or any other significant time during the cycle. If there are no performance deficiencies or new skills required to maintain performance at or above the "Good Performance" level, an employee may elect not to participate in optional training and development activities. A statement to that effect should be recorded below, and the worksheet initialed and dated as provided.

Have Development Activities been scheduled for this Performance Period?	**YES**	**NO**

Coach Davis,

I apologize for the Fueling Station not being stocked and available as it should have been this morning. I had put one of my staff in charge of this function and they have obviously failed in the consistent execution. I'll address the issue today and ensure that this does not happen again.

Apologies for failing the program in this way.

Sincerely,

Jen

Subject: FORMAL NOTICE: Revisions to SPA Grievance Policy

To: All Permanent Employees
From: Gena Carter, Senior Director, Employee & Management Relations
Office of Human Resources

The State Personnel Commission has approved revisions to the University's SPA Grievance Policy, effective January 1, 2011.

An advance copy of the revised SPA Grievance Policy is available on the Office of Human Resources website at: http://hr.unc.edu/employee-relations/.

MAJOR CHANGES

-- With permission of the grievant or respondent, support persons are allowed to speak on behalf of the grievant or respondent during the opening and/or closing remarks of the Step 2 hearing. Previously, support persons were not allowed to speak.

-- The number of work hours that an employee can apply to working on their grievance has been changed from 12 hours to 8 hours to align with State requirements.

-- Items that can be grieved have been changed to align more closely with State policy. However, the UNC-Chapel Hill policy continues to offer broader coverage under the SPA Grievance Policy than other state agencies or universities. The University also provides alternative dispute resolution programs to address issues that are not grievable.

-- The performance appeals policy has been integrated into the grievance policy and is no longer a separate process.

-- The policy has been streamlined and provides a list of definitions. Forms have been updated and new help documents have been created to assist all participants through the process.

Refer to the policy for more information.

WHAT IS GRIEVABLE?

-- Disciplinary action
-- Harassment
-- Discrimination
-- Retaliation
-- Annual performance appraisal

-- Performance-based pay decision
-- Policy violation
-- Inaccurate or misleading information in personnel file

Refer to the policy for specific requirements.

OVERVIEW OF THE GRIEVANCE PROCESS

STEP 1: The employee ('grievant') has 30 calendar days from the date of the event (or knowledge of the event) being grieved to submit a grievance filing form to Employee & Management Relations (E&MR) in the Office of Human Resources. E&MR will send the grievance to a 'respondent' (usually, the second- or third-level supervisor of the grievant) who has 10 calendar days to submit a written response to E&MR.

STEP 2: The grievant has 10 calendar days from the date of receiving the Step 1 response to submit a Step 2 appeal to E&MR, which will schedule a hearing within a month of the filing. A panel of three volunteer SPA employees will hear statements from the grievant and respondent and will review additional information they submit. The panel submits a report and recommendation to the Chancellor within 10 calendar days of the hearing.

FINAL AGENCY DECISION: The Chancellor has 10 calendar days to review the panel report and recommendation and make a final decision for the University on the issue.

FURTHER APPEAL: For some issues, the Chancellor's decision is final. Other issues may be appealed within 30 calendar days of receiving the Chancellor's decision to the State's Office of Administrative Hearings.

AVAILABLE SUPPORT

The Grievance Coordinator in the Office of Human Resources can assist employees in understanding their rights under the SPA Grievance Policy and help with the filing process.

'Support persons' are volunteer SPA and EPA non-faculty employees of the University trained by the Office of Human Resources who can assist a grievant in completing filing forms, gathering supporting information, attend grievance-related meetings with the grievant, and attend the Step 2 hearing. With their grievant's or respondent's permission, support persons are allowed to speak on their behalf during the opening and/or closing remarks of the Step 2 hearing. The support person cannot represent or serve as an attorney for the grievant. The Grievance Coordinator keeps a list of trained support persons.

Starting January 1, 2011, the Office of Human Resources website will include additional guidance materials that can assist employees with the grievance process.

INFORMATION SESSIONS

The following general information sessions will be held to provide an overview of the grievance policy and related resources. No advance registration is required. Attendance at these sessions can be considered work time with advanced scheduling approval of your supervisor.

HEARING PANELIST AND SUPPORT PERSON TRAINING

If you are interested in serving as a support person and/or grievance hearing panelist, the Office of Human Resources is offering multiple training sessions in January and February. Additional training opportunities will be offered later in the year. You must have your supervisor's approval to participate as a support person or hearing panelist. Additional information about this training will be sent in a separate communication.

QUESTIONS

If you have questions about this policy, please contact Employee & Management Relations in the Office of Human Resources, 104 Airport Drive, Chapel Hill, NC 27599-1045. Phone: 919.843.3444. Email: emr@unc.edu.

2.0 not 3.0.

The working plan is that all first year students stay in school regardless of how they do during their first semester (if they do really poorly, they will be asked to "consult with a member of the academic advising retention team."

The first time a student finds him or herself in trouble - they would be automatically put on probation. Only after a semester of probation would they become ineligible - with the current methods of restoring good standing still in place (summer school, on-line, self-paced studies). I am attaching what looks like the standard hours and gpa requirements. No more review, no more warning.

It's technically possible to be here for three semesters in a row before ending up ineligible.

Bobbi
****

DRAFT:

A student who enters the University after July 1, 2007 must meet the following minimum requirements:

A. a 2.000 cumulative grade point average and 24 academic semester hours passed (cumulative) to begin the third semester-in-residence. Any student who does not have at least a 2.000 cumulative GPA and 9 academic hours passed by the beginning of their second semester in residence will be required to consult with a member of the advising program retention team

B. a 2.000 cumulative grade point average and 36 academic semester hours passed (cumulative) to begin the fourth semester-in-residence;

C. a 2.000 cumulative grade point average and 51 academic semester hours passed (cumulative) to begin the fifth semester-in-residence;

D. a 2.000 cumulative grade point average and 63 academic semester hours passed (cumulative) to begin the sixth semester-in-residence;

E. a 2.000 cumulative grade point average and 78 academic semester hours passed (cumulative) to begin the seventh semester-in-residence;

F. a 2.000 cumulative grade point average and 90 academic semester hours passed (cumulative) to begin the eighth semester-in-residence;

G. a 2.000 cumulative grade point average and 105 academic semester hours passed (cumulative) to begin the ninth semester-in-residence.

/Notes/

Except for degree programs that require enrollment beyond a ninth semester, permission to enroll in a tenth semester or beyond must be secured in advance from the appropriate officials in the college or school in which the student is enrolled. A minimum of 2.000 cumulative GPA is required to enter a 10th semester or beyond.

****

I am also attaching the "Toolbox Revisited Report" which has much of interest. It suggests that course drops without penalty and waivers of

good standing without penalty do little good over the long term as
students do not accept responsibility for their actions.

Tables

Table Number **Page**

Part I: Background

1. From macro to micro: Contraction of the universe of 1988 eighth-graders to the universe subject to analysis in *The Toolbox Revisited* 10
2. For each of four definitions of the universe of students in the NELS:88/2000, percentage distribution by gender, race/ethnicity, socioeconomic status quintile, and second language background 12

Part III: What Is and What Happens Before Matriculation

3. Logistic account of the relationships among major demographic variables and bachelor's degree attainment for 1992 12th-graders who attended a four-year college at any time 24
4. Percentage of 1982 and 1992 12th-graders and 1982 and 1992 12th-graders in academic high school programs whose curriculum fell below selected content and intensity thresholds 29
5. Bachelor's degree attainment rate by highest level of mathematics reached in high school by 1982 and 1992 12th-graders 31
6. Percentage of 1992 12th-graders who attended high schools that offered courses in statistics, trigonometry, and calculus, by race/ethnicity and socioeconomic status quintile 32
7. The math ladder for 1982 and 1992 12th-graders: Odds ratios and parameter estimates of earning a bachelor's degree at each rung, controlling for socioeconomic status quintile 33
8. Percentage of 1982 and 1992 12th-graders who attended a four-year college at any time, by type and amount of remedial courses taken in postsecondary education 34
9. Percentage of on-time 1992 high school graduates who continued their education in any postsecondary institution who earned bachelor's degrees by December 2000, by quintile performance in the three component variables of Academic Resources 36
10. Component weights of the high school Academic Resources variable for 1982 12th-graders and 1992 12th-graders who presented positive values for all three components 37
11. Correlations of major precollege Academic Resources variables and high school graduation status, college entry, and bachelor's degree attainment by December 2000 for 1992 12th-graders 38
12. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time—demographic and high school background, version 1: Using the composite variable for high school Academic Resources 41

Tables (continued) **Page**

Part IV. Matriculation and Beyond: The Features of Postsecondary History

13. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary entry phase 45
14. Percentage of 1992 12th-graders who earned credits in five categories of college-level mathematics courses in the first calendar year of attendance; and among non-incidental students, the percentage who ever earned credits in those five categories, by type of institution first attended 48
15. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: First postsecondary year performance 49
16. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary financing 51
17. Percentage of 1992 12th-graders with complete postsecondary records who persisted in postsecondary education from their first calendar year of enrollment to a second calendar year, by type of institution first attended, and, of those who persisted, percentage with lagging first-year performance 54
18. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, credits earned, and GPA at the end of the second year following initial enrollment in postsecondary education, and extended postsecondary attendance and performance markers, by ultimate bachelor's degree status 56
19. Status drop-out rates at the end of the second year following initial enrollment in postsecondary education of 1992 12th-graders who attended a four-year college at any time, and allied academic performance data 57
20. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, course participation rates by the end of the end of the second year following initial enrollment in postsecondary education, by ultimate degree status 58
21. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, participation rates in lower division course category aggregates and average number of credits earned in each aggregate by the end of the second year following initial enrollment in postsecondary education, by ultimate degree status 60
22. Relationships of GPA in first year of attendance to number of institutions attended by 1992 12th-graders, by type of first institution attended by 1992 12th-graders, by type of first institution attended 63

Tables (continued) **Page**

23. Combinations of institutions attended by 1992 12th-graders who attended a four-year college at any time and who also attended more than one school, and percentage earning bachelor's degrees under each combination 64
24. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary attendance patterns 66
25. Three trends in postsecondary GPA of 1992 12th-graders who attended a four-year college at any time through December 2000 and offered complete postsecondary records, by GPA at three points in time, average undergraduate time, and percentage earning bachelor's degree 69
26. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Extended postsecondary performance 71
27. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Final factors, with complete academic history 75
28. To what extent does the final ratio of undergraduate course withdrawal and no-credit repeat grades reflect the ratio and volume of withdrawal and no-credit repeat grades in the first calendar year of enrollment? Answers from the history of 1992 12th-graders who attended a four-year college at any time 76
29. Seven steps of a logistic regression model with bachelor's degree attainment by age 26 or 27 as the outcome for 1992 12th-graders who attended a four-year college at any time 78

Part V: Closing the Gap

30. Bachelor's degree completion rates for students who began in four-year colleges according to three different national longitudinal studies of the 1990s 87
31. Of 1992 12th-graders who started their postsecondary careers in four-year colleges, percent who earned bachelor's degrees by number of credits earned in summer terms, by race/ethnicity 90
32. Hypothetical cumulative consequences of variables critical to bachelor's degree completion for 1992 12th-graders who earned a standard high school diploma by December 1996, attended a four-year college at any time, and whose postsecondary records were complete, by race/ethnicity 92
33. Percent of credits earned during undergraduate summer terms by African-American 1992 12th-graders in aggregate course categories 94
34. Hypothetical cumulative consequences of variables critical to bachelor's degree completion for 1992 12th-graders from the lowest, middle, and highest socioeconomic status quintiles who earned a standard high school diploma by December 1996, attended a four-year college at any time, and whose postsecondary records were complete 95

Tables (continued) **Page**

history of 1992 12th-graders who attended a four-year college at any time,
version 2: Demographic and high school background using the three components
of Academic Resources as discrete variables

G2. Logistic account of factors associated with earning a bachelor's degree in the. 148
history of 1992 12th-graders who attended a four-year college at any time,
version 3: Demographic and high school background using three proxy variables
for high school academic curriculum intensity

Tables (continued) **Page**

Appendix H

H1. Percentage of 1992 12th-graders who entered postsecondary education and withdrew without completing any credential by December 2000, by timing of withdrawal and institution of first attendance 150
H2. Declining "hazard probabilities" for 12th-graders from the High School Class of 1992 who entered postsecondary education, by calendar year following the first true date of enrollment 151
H3. Reasons for leaving postsecondary education without credentials by timing of exit: 1992 12th-graders who entered postsecondary education by December 1996 152
H4. Mean postsecondary GPAs of 1992 12th-graders who withdrew without completing any credential, by timing of withdrawal, and compared with GPAs of those who had not completed a credential but were still enrolled in 2000, and those who earned bachelor's degrees by December 2000 154

Appendix K

K1. Ordinary least squares regression indicating factors influencing time-to-degree for 1992 12th graders who earned bachelor's degrees by December 2000 162

Appendix L

L1. Percentage of 1988 eighth-graders who graduated from high school, by timing and type of high school diploma (if any), by gender, race/ethnicity and socioeconomic status quintile 165
L2. Percentage distribution of high school graduation status, postsecondary participation and degree completion of students in the1992 NELS:88/2000 survey, by retention-in-grade 166
L3. Percentage distribution of 1992 12th-graders who entered postsecondary education, by selectivity of first institution of attendance, by standard demographics 167
L4. Descriptive relationship of number of credits earned in the first calendar year of attendance by 1992 12th-graders to highest degree earned by December 2000 168
L5. Percentage distribution of enrollment intensity over six years (1995/6–2001). of students who started out in postsecondary education in 1995/96, by age as of December 1995 169
L6. Mean Carnegie unit credits earned in grades 10–12 by (a) all 1992 12th-graders. and (b) by those of known socioeconomic status who attended a four-year college at any time and for whom high school transcript records and senior year test scores were complete 170
L7. Logistic account of the three components of Academic Resources in relation to bachelor's degree attainment for all 1992 12th-graders with complete records for all three components. 170

Tables (continued) **Page**

L8a. First season of postsecondary attendance of NELS:88/2000 students 171
(a) who participated in the 1992 NELS survey and (b) who were 12th-graders in 1992 and subsequently attended a four-year college

L8b. Percentage of two groups of NELS:88/2000 postsecondary students who entered 171
in the fall term: (a) All who participated in the 1992 NELS survey and (b) those who were 12th-graders in 1992 and subsequently attended a four-year college, by race/ethnicity and socioeconomic status quintile

L9. Percentage of 1992 12th-graders earning credits in college-level math courses, ...172
both in the first calendar year of attendance and cumulatively, by number of credits earned in college-level mathematics, and type and selectivity of first institution of attendance

L10. Logistic account of factors associated with bachelor's degree completion for 173
1992 12th-graders who attended a four-year college at any time using second-year cumulative credits and second-year cumulative GPA

L11. Institutional attendance patterns of 1982 and 1992 12th-graders who subsequently. . . 174
earned more than 10 postsecondary credits

L12. Percentage distribution of final (December 2000) education status of 1988 175
eighth -graders, by type and timing of high school diploma (if any), and including those who did not earn high school diplomas

L13. Mean elapsed time to bachelor's degree for all 1992 12th-graders who earned. 176
the degree by December 2000, by demographic, academic background, and attendance pattern characteristics

Glossary

Glossary-1. Percentage of 1995/96 beginning postsecondary students 20 years old and 188
younger who attended a four-year college at any time, and received grants or scholarships in 1995/96, by source and average amount of award, and bachelor's degree attainment rate by 2001

Figures **Page**

1. Values, means, standard deviations, use of variables considered, and step no., if used, in the logistic narrative of *The Toolbox Revisited*, with universe confined to 1992 12th-graders with complete high school records and known socioeconomic status who attended a four-year college at any time through December 2000 20

2. Examples of credits earned at different institutions by 1992 12th-graders who earned standard high school diplomas by December 1996, attended a four-year college at some time, earned a bachelor's degree, and attended three institutions as undergraduates, by type of transfer 82

Acknowledgments

For review of the drafts of *The Toolbox Revisited*, the author is deeply grateful to Laura Horn of MPR Associates, Alisa Cunningham of the Institute for Higher Education Policy, Rosa Aronson of the National Association of Secondary School Principals, Alberto Cabrera of the University of Wisconsin-Madison, six anonymous external reviewers selected by the Office of Vocational and Adult Education (OVAE) of the U.S. Department of Education, and expresses particular appreciation for the meticulous review by Paula Knepper of the Department's National Center for Education Statistics. In the final stages of review and revision, the author is especially appreciative of the efforts and insights of Jeffrey Owings of the National Center for Education Statistics and David Bergeron of the Office of Postsecondary Education, both of the U.S. Department of Education.

While cited in the text, it is appropriate to repeat gratitude for the paths blazed and inspirations offered by Karl Alexander of Johns Hopkins University and Vincent Tinto of Syracuse University. C. Dennis Carroll and Jeffrey Owings, both of the National Center for Education Statistics, are responsible for the data sets used and the way they are used, and for continued support, encouragement, instruction, and tough oversight. All who invoke these national data treasures owe them.

Colleagues in the Policy, Research, and Evaluation Studies group of OVAE—Braden Goetz, Andrew Abrams, Ricardo Hernandez, and Chief of Staff, Jana Toner—are thanked for their management of the review process for this document, for instructive feedback, and for shepherding the penultimate drafts of this document through the Department, while Joan Athen made sure that the community college role in the story of the students traced in this document was appropriately highlighted. The final shape of *The Toolbox Revisited* owes a considerable amount to its ultimate editor, Katherine Devine, and to the support of Jacquelyn Zimmermann, the Department's Director of Editorial Policy and Publications. For the Web version, the author owes much to the skill and dedication of Carol Bryant.

THIS PAGE INTENTIONALLY LEFT BLANK

Executive Summary

The Toolbox Revisited is a data essay that follows a nationally representative cohort of students from high school into postsecondary education, and asks what aspects of their formal schooling contribute to completing a bachelor's degree by their mid-20s. The universe of students is confined to those who attended a four-year college at any time, thus including students who started out in other types of institutions, particularly community colleges.

The core question, data source, and legacy

The core question is not about basic "access" to higher education. It is not about persistence to the second term or the second year following postsecondary entry. It is about completion of academic credentials—the culmination of opportunity, guidance, choice, effort, and commitment.

To answer the question, *The Toolbox Revisited* uses the most recently completed of the national grade-cohort longitudinal studies conducted by the National Center for Education Statistics. This study, known as the NELS:88/2000, began with a national sample of eighth-graders in 1988. They were scheduled to be in the 12th grade and graduate from high school in 1992. They were followed through December 2000. In addition to regular interviews with these students, the data set on which this essay draws includes the critical components of high school and college transcripts, and the transcript data are the principal sources for the academic history observed.

The Toolbox Revisited was designed as a replication of a noted previous study published by the U.S. Department of Education, *Answers in the Tool Box: Academic Intensity, Attendance Patterns, and Bachelor's Degree Attainment* (1999), hereinafter referred to as "the original *Tool Box,*" which based its analysis on a national cohort of high school students who were scheduled to graduate in 1982, and who were followed through 1993. The question naturally arose as to whether the hypotheses and analyses based on that cohort's history would hold up in the story of the slightly overlapping 1992–2000 period.

We have learned a great deal in a very short time from numerous initiatives of states and private foundations to prepare high school students better for higher education, and from major federal stimuli under the *No Child Left Behind* legislation to jump start the process of academic momentum prior to high school. One of the reasons for examining the academic history of the NELS:88/2000 cohort is that its students attended high school after the wave of reforms in the 1980s that followed the critique of U.S. education offered by the seminal report, *A Nation at Risk* (1983), and, hence, may provide some clues as to the likely outcomes of current reform efforts.

Much has changed in other ways, too, since the High School Class of 1982 (the subjects of the original *Tool Box*) moved through their scheduled 12th grade and through postsecondary education. A dramatically higher proportion of high school seniors of all race/ethnicity groups continue their education, though access gaps remain (Wirt et al. 2005, indicator 22). Postsecondary attendance patterns among traditional-age students have become far more

complex, with nearly 60 percent of undergraduates attending more than one institution, and 35 percent of this group crossing state lines in the process; community college transfer rates rising nearly 10 percentage points; one out of eight undergraduates based in four-year institutions using community colleges to fill in pieces of their curriculum, and another eight percent "swirling" back and forth between the four-year and two-year sectors. Dual-enrollment while in high school, credit-by-examination, and use of summer terms all added to the dynamic mix of time and space that marked student pathways in the1990s.

With all this change, we still measure something called "college graduation rates" with anachronistic formulas that do not track students through increasingly complex paths to degrees. As a result, we do not understand what is really going on. The dominant language accompanying analyses bemoaning putatively low graduation rates is a language of "attrition," with students labeled "at risk" or "minimally college-qualified," and leaking out of "pipelines."

This study looks at student histories derived from transcript records in a different way and with a different tone. It follows the student, not the institution, because it is the *student's* success that matters to families—and to the nation. It allows the maximum length of postsecondary time for the High School Class of 1992, 8.5 years, for students to earn degrees no matter how many institutions they attend. It notes that if the history of the Class of 1982 were truncated at 8.5 years, there has been a decent improvement in bachelor's degree attainment among non-incidental students (those who earned more than 10 credits, i.e. "made a go of it") who attended a four-year college at any time (from 60 to 66 percent). It is natural to ask how this happened, to identify the moments and aspects of schooling that may have made a difference, and to reflect on what might make the most difference in the future for narrowing degree-completion gaps by race/ethnicity. In that task, *The Toolbox Revisited* looks for the features of academic history that are realistically subject to change by institutions whose principal business is the generation, preservation, and dissemination of knowledge. While acknowledging that for degree-completion rates to improve, students themselves must respond, and that their response does not occur in a vacuum, the features of student histories that are the domain of this inquiry do not include social and psychological variables attendant on the passage from adolescence to adulthood.

It is important to note that, as was the case for the original *Tool Box*, the student universe for *The Toolbox Revisited* constitutes roughly half who reach the 12th grade (table 1). It does not include students who failed to graduate from high school, those who earned General Education Diplomas (GEDs), those who had not enrolled in any postsecondary institution by the age of 26, and those who entered the postsecondary system but never attended a bachelor's degree-granting institution. The resulting demographics are slightly more female, slightly less minority, less with a second language background, and a higher socioeconomic status distribution than the cohort as a whole (table 2).

Organization

We learned from critiques of the original *Tool Box* to sort the chronology of events with greater care. There are seven steps in the analysis of *The Toolbox Revisited*, each of which involves a

collection of variables that are investigated in terms of the degree to which they help us explain bachelor's degree completion for the population of students under investigation:

Step 1: Demographic background and high school history
Step 2: Postsecondary entrance (timing and type of institution)
Step 3: First postsecondary year history (curriculum and performance)
Step 4: Factors of financing postsecondary education in the early years
Step 5: Postsecondary attendance patterns
Step 6: Extended postsecondary history (curriculum and performance)
Step 7: Final model, with complete academic history

This essay also takes an important pause outside the steps of the core statistical model to consider the characteristics of student progress through the *second* year following postsecondary entry.

As each step of the statistical model of student history is set forth, it is pointed out where the results are similar to the findings of the original *Tool Box* with its earlier population, and where they diverge. All seven steps are subsequently assembled together in one place (table 29) so that the reader can observe the factors that have *consistently* contributed to degree completion.

Principal Stories and Guidance

This executive summary offers themes, highlights, and implications of the data for those who comment on secondary and higher education and make decisions about institutional or system policy—editorial writers, legislators, researchers, education administrators.

Two national longitudinal studies, a decade apart, have told similar stories. When the second story reinforces the first—and sheds even more light—something has to be right, and it behooves us to pay attention. Both of them provide support for current efforts to improve the quality of high school curricula and the participation in those curricula of ever larger proportions of students. Both of them provide guidance for college and community college processes likely to lead students to degree completion.

Some of what was learned from the original *Tool Box* was taken to heart at the secondary school level, and, in some respects, we are seeing positive results in academic curricular participation in high schools. But counting Carnegie units[1] in English or science is not the same as describing and validating what students have learned, and whether that learning links smoothly to the performance expectations of the postsecondary world. *The Toolbox Revisited* says we have more to do, that the bulk of our task lies both after the college matriculation line, and in communication and outreach between postsecondary institutions and high schools. How do we

[1]A Carnegie unit is the basic credit system for U.S. secondary schools. It is generally recognized as representing a full year (36-40 weeks) in a specific class meeting four or five times per week for 40-50 minutes per class session (Martinez and Bray 2002).

learn what we have to do? By following students in the richness and complexity of their postsecondary histories.

Curriculum, starting in high school, and continuing

However complex students' attendance patterns, the principal story line leading to degrees is that of content. What one learns is what one studies, and what one brings to economic and community life. The story starts in high school, but merely crossing the bridge to college or community college doesn't mean the story is over. Furthermore, the bridge is not always aligned with the road on the other side.

The academic intensity of the student's high school curriculum still counts more than anything else in precollegiate history in providing momentum toward completing a bachelor's degree. At the highest level of a 31-level scale describing this academic intensity (see Appendix F), one finds students who, through grade 12 in1992, had accumulated:

3.75 or more Carnegie units of English
3.75 or more Carnegie units of mathematics
highest mathematics of either calculus, precalculus, or trigonometry
2.5 or more Carnegie units of science *or* more than 2.0 Carnegie units of core laboratory science (biology, chemistry, and physics)
more than 2.0 Carnegie Units of foreign languages
more than 2.0 Carnegie Units of history and social studies
1.0 or more Carnegie Units of computer science
more than one Advanced Placement course
no remedial English; no remedial mathematics

These are minimums. In fact, students who reached this level of academic curriculum intensity accumulated much more than these threshold criteria (see table F1), and 95 percent of these students earned bachelor's degrees (41 also percent earned master's, first professional, or doctoral degrees) by December 2000.

Provided that high schools offer these courses, students are encouraged or required to take them, and, in the case of electives, students *choose* to take them, just about everybody could accumulate this portfolio. Unfortunately, not all high schools present adequate opportunity-to-learn, and some groups of students are excluded more than others. Latino students, for example, are far less likely to attend high schools offering trigonometry (let alone calculus) than white or Asian students. Students from the lowest socioeconomic status (SES) quintile attend high schools that are much less likely to offer any math above Algebra 2 than students in the upper SES quintiles (table 6). If we are going to close gaps in preparation—and ultimate degree attainment—the provision of curriculum issue has to be addressed. In recent years, colleges and community colleges have begun to provide these courses to high school students, and distance learning provides additional options if students have access to the technology. The hypothetical

consequences of participating in curriculum configurations approaching that illustrated above for Latino degree completion rates, in particular, are stunning (table 32).

There is a quantitative theme to the curriculum story that illustrates how students cross the bridge onto and through the postsecondary landscape successfully. The highest level of mathematics reached in high school continues to be a key marker in precollegiate momentum, with the tipping point of momentum toward a bachelor's degree now firmly above Algebra 2. But in order for that momentum to pay off, earning credits in truly college-level mathematics on the postsecondary side is *de rigeur*. The world has gone quantitative: business, geography, criminal justice, history, allied health fields—a full range of disciplines and job tasks tells students why math requirements are not just some abstract school exercise. By the end of the second calendar year of enrollment, the gap in credit generation in college-level mathematics between those who eventually earned bachelor's degrees and those who didn't is 71 to 38 percent (table 21). In a previous study, the author found the same magnitude of disparity among community college students in relation to earning a terminal associate degree (Adelman 2005a). The math gap is something we definitely have to fix.

A dominant feature of academic histories that cannot really be assessed until the end of the second year following college entry is the extent to which students successfully completed credits in a range of "gateway" courses. It is at this point that the postsecondary curricular story line fully emerges, with ratios of participation in the "gateways" between those who ultimately earned degrees and those who did not running 6:1 in American literature, 4:1 in general chemistry, and more than 3:1 in precalculus, micro/macroeconomics, introduction to philosophy, and world civilization (table 20). These gaps in curricular participation argue for academic administrators to identify their key gateway courses and regularly monitor participation.

College and community college expectations for their first-year students in those gateway courses—expressed through examinations, paper and laboratory assignments—need to be more public. Examples such as those offered by the American Diploma Project in its report, *Ready or Not: Creating a High School Diploma That Counts* (2004), should be shared with larger audiences than policymakers and others who habitually read such reports. Parents should see those assignments even if they don't understand them; high school teachers should ponder them to assess whether their exiting students are likely to be prepared; and, most importantly, high school students have got to see them as road signs to their next education destination. *The Toolbox Revisited* advocates making these examples part and parcel of admissions packets, publicity brochures, and Web sites. There is risk in this: Some students may be scared away. But there is no better way to enhance articulation and preparedness than to display what students can expect.

Postsecondary benchmarks

In both colleges and community colleges, the curriculum story line intersects attendance patterns and performance in ways that set benchmarks for academic advisement and intervention:

- Less than 20 credits by the end of the first calendar year of enrollment (no matter in what term one started, whether summer, fall, winter, spring) is a serious drag on degree completion. The original *Tool Box* told the same story. It is all the more reason to begin the transition process in high school with expanded dual enrollment programs offering true postsecondary course work so that students enter higher education with a *minimum* of 6 additive credits to help them cross that 20-credit line. Six is good, 9 is better, and 12 is a guarantee of momentum.
- We falsely believe that beginning students drop out of higher education in appalling numbers by the end of their scheduled first academic year of attendance. In fact, about 90 percent of traditional-age beginning students turn up somewhere (maybe not at the first school attended) and at some time (maybe not in the fall term) during the subsequent calendar academic year (which we measure as July 1 through June 30). However impressive this percentage, the *quality* of persistence counts more, and, for a third of these students, the quality of persistence leaves much to be desired (table 17). *The Toolbox Revisited* urges that institutions monitor and report the quality (as much as the fact) of persistence.
- More than 60 percent of the students in the sample under investigation enrolled during summer terms. Undergraduates are not only more geographically mobile, but have shattered observance of the traditional academic calendar. Summer term credits are more than metaphors for high octane persistence: Earning more than 4 credits during those terms held a consistently positive relationship to degree completion, and gave African-American students, in particular, a significant boost in hypothetical graduation rates (table 32). College and community college administrators can be very creative in expanding the use of summer terms.

Student uses of time

The example of summer-term credits, particularly in combination with the complex multi-institutional attendance patterns, underscores another theme of *The Toolbox Revisited*: Student uses of time in undergraduate careers are now more important than their uses of place. In other words, *when* students do something academic has a more significant relationship to degree completion than *where* they do it. For example:

- For the High School Class of 1982 (the subjects of the original *Tool Box)*, timing of entry to postsecondary education never rose to a level of statistical significance in the analysis, whereas variables for the type of institution first entered played inconsistent but positive roles in explaining degree completion. A decade later, with a higher proportion of high school students continuing to college, the situation was reversed (table 13). What this means is that recruitment efforts have to insure that students enter postsecondary education immediately following high school graduation. The longer students wait, the less likely they will finish a degree.

- The only characteristic of the first institution of attendance to be admitted to statistical analysis was selectivity, but it never rose above the threshold of significance. Quite frankly, one isn't worried about degree completion for the 5 percent of traditional-age undergraduates who enter highly selective colleges. One is more concerned with the rest of the river—particularly the 78 percent who start in either nonselective four-year colleges or open-door community colleges.
- The original *Tool Box* study declined to confront part-time status and its effects. If one is using transcripts as evidence, there are a number of problems in determining which students are part-time and when. *The Toolbox Revisited* found a way around these problems to mark whether a student's enrollment intensity *ever* fell into part-time status, i.e., less than 12 credits per semester or its equivalent. Part-time attendance by whatever means, as Carroll (1989) labeled it, proved "hazardous" to degree completion health (table 24; table 29).
- In longitudinal studies extending for as long a period of postsecondary time as does the NELS:88/2000 (8.5 calendar years), a student is allowed stop-out periods totaling one semester or its equivalent (e.g., two quarters), exclusive of summer terms, and still be considered "continuously enrolled." Continuous enrollment is a factor of attendance patterns, and another marker of the student's use of time. It proves to be overpowering: with 16 other variables in play, continuous enrollment increases the probability of degree completion by 43 percent (table 27). The original *Tool Box* offered the same message, arguing for assiduous monitoring of student stop-out periods. Put another way: Keep the student continuously enrolled, even part-time (less damaging than excessive stop-out periods).

Purposeful migration versus "swirling"

The complexity of student postsecondary enrollment patterns, already a notable phenomenon for the population under study in the original *Tool Box*, accelerated in the subsequent cohort. The construction of the NELS:88/2000 postsecondary transcript files took advantage of what we learned from more sophisticated institutional and state system tracking studies of the 1990s; hence, some new attendance pattern variables were available and others (those describing different kinds of multi-institutional attendance) refined.

What we found for the students of the 1992-2000 period was this:

- Formal transfer from a community college to a four-year college and formal transfer from one four-year college to another were positively associated with degree completion, but wandering from one school to another was not.

In fact, the nomadic multi-institutional attendance behavior increasingly known as 'swirling,' held a significant and negative relationship to degree completion (table 24, table 39). These statements are a very simple untangling of complex realities.

The basic question asked of the transcript data—did a student attend only one school or more than one?—begins a process of inquiry to determine *how* the student attended second and third institutions. Given very taut definitions of what transfer means, we are advised to ensure that multi-institutional attendance is purposeful and productive. For that, we require much better student tracking systems than we currently possess, and regular contact with students in motion.

Student academic performance

More than the original *Tool Box*, *The Toolbox Revisited* recognizes that the path of student academic performance, marked by grades, is a reflection of quality of effort, and pays off. It starts in high school: Academic curriculum participation is still the strongest of the precollegiate momentum indicators, but between the 1980s and 1990s, class rank/GPA moved markedly ahead of senior year test score in its contribution to students' overall "Academic Resources" index, a composite indicator of high school curriculum intensity, class rank/GPA, and senior year scores on a 90-minute exam best described as a mini, enhanced SAT (see p. 16 and Glossary).

This story continues on the postsecondary side of the matriculation line:

- Earning grades that place one in the top 40 percent of first-year GPA for the whole cohort is a strong—and positive—contributor to academic momentum, and remains in the account of degree completion throughout the histories of both the class of 1982 and the class of 1992 (table 15).

- The theme of quality-of-student-effort, reflected in grades, is strengthened when the canvas covers the student's entire undergraduate career. In the original *Tool Box*, the variable describing the *trend* in students' GPA had only two reference points: first calendar year and final GPA. For *The Toolbox Revisited*, there are three such points: first calendar year GPA, cumulative GPA for the first two calendar years, and GPA as of the last date of attendance, whether or not a degree was earned. A rising trend in grades fits with attainment (table 25), contributing positively and significantly (table 26).

A story twice told should be a story to which we listen

Both the original *Tool Box* and *The Toolbox Revisited* revealed that one of the most degree-crippling features of undergraduate histories is an excessive volume of courses from which the student withdrew *without penalty* and those the student repeated. We set this up as a ratio, and marked those who withdrew from or repeated 20 percent or more of their course attempts. Doing so cuts the probability of completing a degree in half (table 27)!

The withdrawals counted here are not "drop" grades that apply during standard drop-and-add periods at the beginning of terms. They are the result of institutional policies that allow withdrawals without penalty after the drop-and-add period. No-credit repeats are standard fare

in remedial courses, but when they reach destructive levels the question arises as to how many times an institution allows a student to repeat a course. Think of it this way: Every non-penalty withdrawal and no-credit repeat means that a seat in a course is not available to someone else. Add those seats up, and admission to an institution may not be available to someone else. Excessively lax withdrawal and repeat policy, then, ultimately blocks general access. And in terms of degree completion, such policies do students no favors.

What Does Not Count in The Account of Completion?

- Students' education "anticipations" (the consistency and level of their vision of how far they will get in school) were not significant at any step of the logistic account for the High School Class of 1992. This is a change from the position of the "anticipations" variable in the original *Tool Box*, where it ducked in and out of significance. The new message is more clear: Among students who attend a four-year college at some time, expectations are distinctly secondary to one's uses of academic time and to one's academic performance.

- Whereas grants and student work-study were modestly significant contributors to degree momentum at *early* stages of students' postsecondary careers in the history of the High School Class of 1982, the data on finance mechanisms for the High School Class of 1992 are poor, and the results inconclusive. Analysts are directed instead to the Beginning Postsecondary Students longitudinal studies, which contain detailed financial aid data (but skeletal information on high school histories and postsecondary course work).

- Of student demographic characteristics, only one—socioeconomic status—was significantly associated with degree completion, though in a modest manner. Gender and race/ethnicity were never significant in the logistic narrative, even though some *indirect* effects of these key demographic characteristics would probably be found in other statistical models. When each race/ethnicity group was treated as an independent variable, the basic story did not change.

- Both a dichotomous variable marking any remedial work in the first calendar year of attendance, and an elaborate variable describing types and extent of remediation over the course of a student's entire undergraduate career were employed in the analysis, but to no avail. The same procedure was used in the original *Tool Box*, where the variables were admitted to the statistical model but did not reach the threshold of significance. Sufficient numbers of students who took remedial classes successfully moved through them so that remediation did not make a strategic difference in degree completion.

- Half of the students in the sample for *The Toolbox Revisited* who earned bachelor's degrees changed their major along the way. It was natural to ask whether change-of-major had any influence on degree attainment. It did not,

principally because, with few exceptions, community college transfer students come in to the four-year institution from a general studies program and automatically are classified as "change-of-major" the minute they enter a specific program at the four-year school.

Students as active, responsible participants

The Toolbox Revisited does not treat students as passive creatures whose fate is wholly molded by schools and colleges. It demonstrates that, within the population of traditional-age students who attend a four-year college at any time (obviously including community college transfers), we *can* improve graduation rates and close some of the gaps in completion by race/ethnicity and socioeconomic status. But it also argues that there is a limit to what we can realistically do unless students respond to highly targeted advice and prodding.

The analysis of *The Toolbox Revisited* identifies features of academic history that are most tractable in terms of second party intervention. But there is also something we might dub "first party intervention." Once the modest echoes of socioeconomic status are accounted for, each step of academic history offers *students* a set of decisions that require the commitment of time and effort likely to yield the return of earning a degree. Provided there is opportunity, the choices made by students, beginning with high school curriculum and quality of effort in high school, allow subsequent leverage. Entering a postsecondary institution directly from high school, earning 20 or more credits in the first calendar year of enrollment, and performing well enough in that first calendar year to fall in the top 40 percent of a GPA distribution build on previous academic investments, and are all signs of commitment.

Subsequent choices that may not be reflected in a bounded period of time, such as excessive course withdrawals, prove to be poor decisions with negative returns, breaking accumulated momentum. Other configurations of choice, including summer-term credit generation, meeting the challenge of college-level mathematics, effort required to yield a rising GPA, and most of all, remaining continuously enrolled, all reflect continuing leverage of attainment. This is what academic momentum is all about. While these choices do not take place in a social and psychological vacuum, this is a story about the intersection of student choice with the structures of opportunity offered by institutions whose first order of business is the distribution of knowledge. It is not a story about growing up, although that happens along the way.

Degree Completion: How High Can We Go? How Much Can the Gaps Be Closed?

In Part V of *The Toolbox Revisited*, three different national longitudinal studies conducted during the 1990s are set side-by-side, so as to demonstrate a remarkable degree of agreement on the rate of bachelor's degree completion for students who started out in four-year colleges (granted, that is only part of the broader universe addressed in this essay). Looking at the concordance of these three sources (table 30), it is fair to say that:

- A third of traditional-age students who started in a four-year college earned a bachelor's degree from the same school in the "traditional" four-year period.

- Between 54 and 58 percent earned the degree from the same school in which they began within six years of entry.
- When the option of earning a degree from a different four-year college than the one in which these students commenced study, the six-year completion rates are in the 62–67 percent range.
- Only the NELS:88/2000 extends the time period for earning a degree beyond six years; at 8.5 years, its degree completion rate for students who started in a four-year college approaches 70 percent.

However, it is unfortunate to note that despite increased participation of minority students to postsecondary education over the past quarter century, the gap in bachelor's degree completion between whites and Asians, on the one hand, and Latinos and African-Americans, on the other, remains wide.

What features of academic history might close the gaps, and by how much?

The data-driven exercise in Part V of *The Toolbox Revisited* can be characterized as "reasoned speculation." From the NELS:88/2000, we start with a degree completion gap between whites and Asians vis-a-vis African-Americans of 15 percent; and with reference to Latinos, 22 percent. We go back through our analysis and ask what factors:

(a) consistently contributed to bachelor's degree completion at all stages of the model in which they were "in play," and

(b) were most subject to change by external parties with little-to-modest—but creative—effort that might improve the portrait of degree completion.

Five factors stand out, four of which affect small populations in which minority students are over-represented. Small populations can add up. These factors are:

1. **First-year credit generation**, i.e., the goal of making sure that postsecondary students end their first calendar year of enrollment with 20 or more additive credits.

2. The problem of **excessive no-penalty withdrawals and no-credit repeats**, which affect 10 percent of the cohort. Institutional policy and advising can cut the incidence of withdrawals and repeats in half.

3. **Use of summer terms**. Strategic enrollment management can move more sections of high demand courses into summer terms, offer credit-bearing internships in summer terms, and engage in other creative initiatives that will also smooth out the utilization of institutional resources over what has become an "academic calendar year."

4. **No delay of entry.** This is a matter of recruitment strategy among high school students whose commitment to postsecondary education is less than fervid. The later they show up, the more their postsecondary fate is in jeopardy.

5. **The high school curriculum component of "Academic Resources."** This is not a case of "little-to-modest" effort or a small population. It is a megawork in progress, much of which depends on students' reading skills on entering high school. If students cannot read close to grade level, the biology textbook, the math problems, the history documents, the novel—all will be beyond them. And if high schools are not offering a full academic curriculum, there is little hope.

But with those five factors in mind, and assuming full student response and success, *potential* degree completion rates were hypothesized based on the records of NELS:88/2000 high school graduates by race/ethnicity (table 32) and socioeconomic status quintile (table 34). Virtually every one of these factors contributed to closing degree completion gaps, but none more than high school academic curriculum participation—which, to repeat, is criterion-referenced, hence, open to everyone to rank at or near the top. For African-American students, the combination of moving into the top 40 percent of the high school academic curriculum intensity index plus earning more than four credits during postsecondary summer terms would lower the degree completion gap vis-a-vis white and Asian students from 15 percent to 6 percent. For students from the lowest socioeconomic status quintile, moving into the top 40 percent of the academic curriculum intensity index and entering postsecondary education directly from high school would improve degree completion from 36 to 59 percent. For Latino students, the same steps would improve degree completion from 45 to 69 percent. Does that mean that future degree completion rates will look like those in tables 32 and 34 if everyone meets the criteria on all five counts? No; not everybody will make it. But the tables suggest just where the improvements could be dramatic—and for whom.

Messages to Students and Commentators

Student responsibility (the intersection of choice with opportunity) is a major theme of *The Toolbox Revisited* in a way that was only implicit in the original *Tool Box*. The essay concludes with some recommendations for students, who are partners in their own education fate, who shouldn't wait around for someone else to do something for them, and who are rarely addressed in studies of attainment.

The concluding messages also reflect on the dissonant data of public discourse on high school graduation rates, college attrition rates, and college graduation rates, examples of consequent "scare stories" that do not help us identify and address real problems, and a plea for creativity and cooperation in developing better student tracking systems. These messages also urge a considerable change in the language we use in describing what happens to students from a negative rhetoric that assumes passivity to one that respects students as active players, seeking and discovering paths to their education goals.

A Guide for Reading Tables and Terms

Interchangeable terms

This essay frequently compares the histories of two grade-cohort longitudinal studies carried out by the National Center for Education Statistics (NCES). Each of these studies can be referenced in a number of ways, and all of these references are used.

The following labels for the longitudinal study that began with a national sample of 10th-graders in 1980, the High School and Beyond/Sophomore cohort, are interchangeable:

HS&B/So
High School Class of 1982
class of 1982 (where inter-cohort comparisons of 12th-graders are at issue)

"High School & Beyond/Sophomore cohort" will also be spelled out when the entire longitudinal study, including all its data set components, is the subject.

The following labels for the longitudinal study that began with a national sample of eighth-graders in 1988, the National Education Longitudinal Study of 1988, are interchangeable:

NELS:88/2000
High School Class of 1992
class of 1992 (where inter-cohort comparisons of 12th-graders are at issue)

On reading tables in this study, part 1: Descriptive cross-tabulations

All tables in this study are constructed to meet the statistical standards for table presentation of the National Center for Education Statistics (NCES 2002a). They are stand-alone tables, so that if they are reproduced outside the context of the essay, they tell a complete, self-contained story. To ensure a complete story, the descriptive cross-tabulations in this document include the standard errors of the estimates. The reason for this election—instead of placing tables of standard errors in an appendix—is to enable the reader to judge, on the spot, whether the difference between any two estimates is statistically significant. While the text draws the reader's attention to statistically significant (and insignificant) estimates important to the narrative, it does not comment on all statistically significant estimates. In general, the formula invoked for statistical significance is the simple student's *t* test:

$$t = (P_1 - P_2) \div \overline{(se_1^2 + se_2^2)}$$

where P_1 and P_2 are the percentage estimates to be compared and se_1 and se_2 are the corresponding standard errors. If $t > 1.96$, one has a statistically significant difference at $p < .05$ (which means that the probability that this observation would occur by chance is less than 1 in 20), a standard marker. In the case of multiple comparisons, the critical value for *t* rises.[2]

[2]For technical issues concerning standard errors and multiple comparisons, see Appendix D.

Variances in estimates

The reader will often find that estimates for the same phenomenon will differ somewhat, e.g., in one table a bachelor's degree completion rate is 69.3 percent, in another table, 64.6 percent. These differences are due to the definition of the universe (i.e., who are we counting?) for each table and the weight employed in the calculation.

On reading tables in this study, part 2: Logistic models

The core analytic method employed in *The Toolbox Revisited* is a logistic regression, and there are a baker's dozen tables in both the text and appendices that present the results of logistic models. There are many ways in which researchers have presented these results (Peng, So, St. John, and Stage 2002), and a number of statistics are employed in these representations. *The Toolbox Revisited* employs the following for each row of these tables:

The name of the variable—Variable names were created so that the realities to which they refer are self-evident.

The unadjusted parameter estimate—also known as the log odds, or the natural logarithm of the odds of the outcome of interest happening, e.g., whether a bachelor's degree was earned. The reader should note whether the sign for this estimate indicates a positive or negative relationship to bachelor's degree completion, as well as the magnitude of the estimate (though that alone does not indicate whether the estimate is significant).

The adjusted standard error of measurement for the estimate—Some researchers will say that this statistic is not necessary. The author provides it because, without it, one could not verify the accuracy of the other statistics on the row. We need the adjustment because NCES longitudinal studies are based on complex sampling designs. The adjusted standard error is calculated by multiplying the simple standard error by the Root Design Effect for students who offer non-missing values for all variables in the logistic model at issue (see Appendix D).

The t statistic—This is the measure that opens the gate to the judgment of degree of significance for the variable in question on that row. Again, some researchers will say that this statistic is not necessary because in the next column, the p statistic indicating degree of significance is provided. The author offers the t statistic because a minimum t of 0.765 was selected as a threshold for keeping a variable in the sequence of logistic models, and the reader should see those instances where a variable fails to meet that criterion. Why 0.765? In any statistics textbook, one will find an appendix with a table of relationships between levels of significance (p values) and t-values for two-tailed significance tests according to the number of degrees of freedom (number of variables in a model minus one). If one goes to the column for the lowest level of significance in this standard table ($p < .50$), and scrolls down to the t-value for the smallest number of

variables used in any of the logistic models in *The Toolbox Revisited*, three, one will find it equal to 0.765. This is a very generous threshold.

The *p* statistic—This notation tells us whether the observed relationship would occur by chance, and, if so, at what ratio of chance. A *p* of <.05 says that the odds of the relationship between independent and dependent variables in that model occurring by chance are less than 1 in 20. This is also known as a 95 percent confidence level. In all of the logistic models in *The Toolbox Revisited* there are variables that do not meet the *t* requirements for even a marginal level of significance ($p < .10$). All variables with a *p* of <.10 or better are highlighted in bold.

Delta-p is the critical statistic for telling the story of the association of the parameter estimate with degree completion. It says that every unit change in the independent variable changes the *probability* that X will happen by Y percent—and the Y is indicated by the Delta-p, e.g., 0.1285 would be translated in the text as 12.9 percent. The statement of change in probability is not a linear statement, and is always the result of relationships among the variables in a particular logistic model. It certainly should not be read as a statement of cause or prediction.

Three decision rules

In indicating whether a variable was used in the logistic models of *The Toolbox Revisited*, three criteria were observed:

- Any statistical software package (the Statistical Analysis System, or SAS, was used in this report) allows one to set a threshold of statistical significance for a variable to be admitted to a multivariate model. The default threshold is that 95 percent confidence level, represented as $p < .05$. For both the original *Tool Box* and *The Toolbox Revisited* this threshold was changed to a much more generous .2, i.e., the probability that the variable would be admitted by chance is less than 1 in 5. The purpose of the more generous threshold is to allow more variables to "compete," so to speak, within the boundaries of a statistical model, and then to see which variables survive.
- As noted above, the survival indicator in a model was a *t* value set to 0.765. If a variable failed to exceed that value when utilized in the step of the logistic series in which it was introduced, it was not carried forward to subsequent steps.
- Collinearity—Think of the Venn diagrams you learned in high school mathematics. If each circle in the Venn diagram represents a variable, you don't want a situation where two or more of them overlap to a point approaching an eclipse, for if they do, analysis of either one is impossible. There are special statistics for determining the extent of collinearity, and these were employed to determine when this situation arose. When it arose, one of the variables had to be dropped. This often happens when one variable is a major component of another, e.g., family income in relation to socioeconomic status. The narrative will describe these cases. For further comments on collinearity, see Appendix D.

THIS PAGE INTENTIONALLY LEFT BLANK

Organization of This Data Essay

The following is a brief outline of *The Toolbox Revisited* so the reader knows what to expect.

Part I: Background. The introduction presents the basic question, the data sets invoked, the purposes and statistics of the investigation, and the demography of the subject universe.

Part II: Variables Explored and Used in This Analysis. This short section of the study lists all the independent variables that were considered and provides brief definitions and basic statistical characteristics. A summary figure (pp. 20–21) indicates which of these met the criteria for inclusion in the logistic narrative of Parts III and IV. A more elaborate glossary (pp.179–193) provides details on the construction of these variables, allied data and commentary, and will be of particular interest to researchers.

Part III: What Is and What Happens Before Matriculation. Here we begin the chronological narrative, using both descriptive and multivariate data, of what ultimately made a difference in bachelor's degree attainment by December 2000 for 1992 12th-graders who attended a four-year college at any time. Part III begins with background demographic characteristics, then adds the critical components of high school academic history.

Part IV: Matriculation and Beyond. This section continues the cumulative steps of the logistic narrative, starting with the characteristics of entry to the postsecondary world, and continuing with first calendar year performance, financing considerations, attendance patterns, and extended performance (that is, taking students' entire undergraduate careers into account). It includes a special consideration for the second calendar year of enrollment and concludes its logistic narrative with attention to two very powerful variables: continuous enrollment and the ratio of course withdrawals and repeats to the number of all courses attempted.

Part V: Closing the Gap. Having demonstrated how the universe of independent variables is related to degree completion, *The Toolbox Revisited* then asks two questions: (1) To what extent do the major national data sets agree on "graduation rates"? And (2) Given what we have learned about what makes a difference in degree completion, what variables provide the most promising guidance for closing the gap in graduation rates, by race/ethnicity and socioeconomic status, for students who attend a four-year college at any time?

Part VI: The Missing Element of This Story. A key missing part of the story that is a by-product of the limited features of the NELS:88/2000 is addressed in this section: the content standards of high school and postsecondary course work. Other brief "excursions"—timing and reasons for permanent ("status") drop out from college, and time-to-degree—are placed in Appendices H and K respectively.

Part VII: Messages. Finally, *The Toolbox Revisited* offers some messages—to students and to those who engage in public discourse about the issues we have covered—and highlights the major conclusions of the study.

Appendices: With one exception, appendices are presented in the order in which they are cited in the text. The exception is the last appendix, Appendix L, that contains a variety of reference tables on miscellaneous topics raised in the text.

[THIS PAGE INTENTIONALLY LEFT BLANK]

Part I
Background

This study explores the academic resources and momentum students build through their high school and college careers, and analyzes the relationships between those factors and degree completion rates. It departs from most previous research on attainment by focusing on the details of students' high school and college curricula and academic performance that are available from transcript records. Its principal data are drawn from the National Education Longitudinal Study of 1988 (hereafter referred to as the NELS:88/2000 or just NELS). This longitudinal study followed a national sample of over 12,000 students (representing a weighted 2.9 million students) from the time they were in the eighth grade in 1988 to roughly age 26 or 27 in December 2000.

In round numbers, of the high school graduates in this cohort, 83 percent engaged in some form of postsecondary education by age 26, and 68 percent attended a four-year college at some time. Of those who earned any credits from four-year colleges at any time (which includes a substantial proportion of students who began postsecondary study in community colleges), 66 percent earned a bachelor's degree.

While the 66 percent completion rate sounds impressive for a mass system of higher education, it masks an unhappy differential by race/ethnicity, and more so by socioeconomic status. As we strive to improve high school graduation rates, to invite greater numbers of high school graduates into the postsecondary system, simply to maintain—let alone improve—our completion rates will take a great deal of effort. We need constructive guidance and benchmarks.

This study was designed as a follow-up and replication of a previous attempt to provide that guidance—*Answers in the Tool Box: Academic Intensity, Attendance Patterns, and Bachelor's Degree Attainment* (hereafter referred to as the original *Tool Box*).[3] Since its publication in 1999, the original *Tool Box* has become one of the most frequently cited works in public discussions about—and initiatives to improve—the preparation of students for higher education. Its most visible uses have included the presentations of the Texas "Master Scholars" program (2002), the revisions in entrance requirements for the University of North Carolina system (2000), standards goals set by the Illinois Board of Higher Education (2001), and suggestions of the Education Commission of the States for state high school graduation policies (2001). It was summarized in major litigation addressed to inequities in opportunity-to-learn in high schools (e.g., *Daniel v. California* 1999), and in the research literature, its analyses of both precollegiate preparation and post-matriculation attendance patterns and performance have also been marked (e.g., Horn and Kojaku, 2001; Zucker & Dawson, 2001; Cabrera and La Nasa, 2001) and improved on (DesJardins, McCall, Ahlburg and Moye, 2002; Cabrera, Burkum, and LaNasa 2005).

---

[3]Out of print but available at http://www.ed.gov/students/prep/college/thinkcollege/early/aboutus/edlite-resources.html.

The analyses in the original *Tool Box* were based on the High School & Beyond/Sophomore cohort longitudinal study (hereafter occasionally referred to as the HS&B/So), the second of the U.S. Department of Education's national grade-cohort longitudinal studies,[4] which followed a national sample of 10th-graders from 1980 to1992 in surveys and to September 1993 on postsecondary transcripts. As with all of the grade cohort longitudinal studies carried out by the National Center for Education Statistics,[5] test scores are included in the database, along with surveys of parents, school teachers, and school administrators. The modal high school graduation year for the HS&B/So was 1982, and student age at the conclusion of the study was 29 or 30.

The HS&B/So data, while compelling, are now somewhat dated. There were considerable changes in both the demography and postsecondary entrance behavior of high school seniors in the comparatively short span of the decade between 1982 and 1992. Appendix A highlights contrasts in selected background characteristics of all 12th-graders in the two longitudinal studies cohorts. Some of these changes have been frequently observed (higher proportion of minority students, westward and southward movements of populations, higher proportion of high school seniors entering higher education and planning to earn a bachelor's degree), and some rarely observed (higher proportion who grew up in mixed-ethnicity neighborhoods, and a higher proportion with parents who indicated some postsecondary education). The question naturally arises as to whether the hypotheses and analyses based on the history of the High School & Beyond/Sophomore cohort would hold up in the story of the NELS:88/2000. The NELS history offers a more contemporary account,[6] one that, in terms of secondary school records, may reflect the high school curriculum reforms of the mid- and later-1980s[7] that followed the discussion of the report of the National Commission on Excellence in Education, *A Nation at Risk* (1983). *The Toolbox Revisited* follows the same path of analysis using the NELS:88/2000 as did its predecessor with the HS&B/So. In that sense, it is a replication. It is a modified replication, however, because it introduces new constructs based on critiques of the original *Tool Box* and because it offers a more refined chronology of steps from high school to the end of a student's undergraduate education.

A substantial amount of the analyses and endorsements that followed the original *Tool Box* revived the flagging "seamless" K–16 themes of the 1980s post-*Nation at Risk* reform effort. In an October 2000 policy brief that visited these issues, the Education Commission of the States reminded people of what most of the 1980s reform reports did not address: the fact that K-12 and postsecondary systems are governed in very different ways, even in the public sector of postsecondary, and that there is a consequent "disconnect" of substantial dimensions (Education

[4]The first was the National Longitudinal Study of the High School Class of 1972 (1972–86).

[5]For a description of the grade-cohort studies, see Appendix B.

[6]A fourth-grade-cohort longitudinal study is currently in progress. Called the ELS2002, it began with a national sample of 10th-graders in 2002 and is expected to run at least through 2012. We obviously will have to wait some years before we see its full results.

[7]For an account of changes in high school graduation requirements in the years immediately following issuance of *A Nation at Risk*, see Stedman and Jordan (1986).

Commission of the States 2000). The metaphor of bridges (Venezia, Kirst and Antonio 2003) and the rhetoric of disconnect (e.g., Conley 2003) created a more sophisticated focus of analysis than the reform reports of the 1980s embraced. The major work that sought to build new bridges and connect the disconnects underscored the obligation of the system not merely to assure college "access," but degree completion, with curriculum playing the key role. While "degree completion," in public discourse, refers to the bachelor's degree, the same principles apply to associate degrees granted principally by community colleges as well (Adelman 2005a).

What Did the Original *Tool Box* Say?—And Based on What Kind of Evidence?

In a nutshell, here are the major conclusions of the High School & Beyond/Sophomore-based *Answers in theTool Box* analysis:

1) Of three traditional measures of precollegiate educational history—curriculum configuration, academic performance (on a scale that combines class rank and GPA), and assessed general learned abilities (a senior year mini-SAT)—the intensity and quality of one's secondary school curriculum was the strongest influence not merely on college entrance, but more importantly, on bachelor's degree completion for students who attended a four-year college at any time. The highest level of mathematics the student reached in high school played a significant role in the strength of the curriculum configuration. One of the major contributions of *Tool Box* not only to the literature, but to practice as well, was to change what was understood by the "entry characteristics"of students by digging out and demonstrating the power of the academic intensity of secondary school curriculum over combinations of standardized test scores and grades.

2) By moving into the top two quintiles of the curriculum measure and completing a high school mathematics course beyond Algebra 2, African-American students who started out in a four-year college would hypothetically increase their bachelor's degree attainment rate from 45 percent to 73 percent; Latino students who did the same would hypothetically increase their bachelor's degree attainment rate from 61 percent to 79 percent.[8] These increases were significantly greater than those for white and Asian students under this scenario, and, more importantly, were considerably greater than the influence of moving into the top two quintiles of either test scores or class rank/GPA. In other words, curriculum counts, particularly for minority students.

3) The three traditional precollegiate measures can be combined in a composite measure of "Academic Resources." This measure had continuing, statistically significant relationships with bachelor's degree completion in both linear and (more appropriately and convincingly) logistic regression sequences involving four post-matriculation steps (blocks of variables for financial aid, attendance patterns, first-year performance, and extended postsecondary performance).

---

[8]For African-American students in the HS&B/So who reached the 12th grade and entered postsecondary education, 52.3 percent started in four-year colleges, a percentage that rose to 54.2 in the NELS:88/2000. The comparable percentages for Latino students, who are more likely to start in community colleges, were 38.9 percent for the HS&B/So and 38.6 percent for the NELS:88/2000. For white students, the proportions starting in four-year colleges were 54.3 percent for the HS&B/So and 57.4 percent in the NELS:88/2000.

4) Post-matriculation behaviors and attendance patterns that were strongly and positively associated with bachelor's degree attainment were continuous enrollment, transfer from a community college to a four-year institution after more than 10 credits earned at the community college, and the *trend* in students' grades.

5) Post-matriculation behaviors and attendance patterns that had a strong negative influence on bachelor's degree attainment were the ratio of courses from which the student withdrew or repeated to all courses attempted, and earning less than 20 credits in the first calendar year of postsecondary attendance.

6) Socioeconomic status had a modest and diminishing association with bachelor's degree attainment. Minority status had a modest negative association until performance (first-year performance and continuing performance) was taken into account, at which point it had no effect Gender had no effect at any stage of the model. The only demographic variable to have a strong (and in this case, negative) association with degree completion was becoming a parent by age 20.

The overall message was about academic momentum and what adds to that momentum at each stage of a student's history from secondary school onward. The evidence was archival, was treated in the tradition of quantitative history (Elder, Pavalko, and Clipp 1993; Clubb, Austin and Kirk 1989; Haskins and Jeffrey 1990), and like this essay, did not claim causality.

Why use these data sets?

There are three types of national data sets available to construct longitudinal analyses such as the original *Tool Box* and this replication, but only one type of data set—the NCES transcript-based grade-cohort study—is truly suited to the task. The other two are (1) the Cooperative Institutional Research Project (CIRP) occasional longitudinal follow-ups to its annual survey of entering college freshmen, and (2) the NCES Beginning Postsecondary Students studies (BPS). Each of these has its virtues, and will be revisited in Part V of this study when we compare what three different longitudinal studies of the 1990s say about degree-completion rates. The CIRP produces an enormous amount of information on student attitudes, values, and college experiences, and does so with large samples of (principally) entering four-year college students. Its occasional longitudinal follow-ups involve sufficient history (e.g., six or nine years) to track not only long-term undergraduate completion rates, but also postbaccalaureate education (Astin 1993). The BPS longitudinal studies are shorter (five or six years), not dependent on institutional decisions to participate (as is the CIRP), inclusive of students of all ages at entry, and, as befits their principal population sample (a subset of the triennial National Postsecondary Student Aid Study), contain very strong and reliable financial aid data. The BPS study of 1995/96–2001 will be used at a number of points in this study to expand the range of our observations.

However, in both cases, all features of precollegiate history must be rendered as exogenous variables. The high school histories provided by students in CIRP are retrospective, and the precollegiate histories in the Beginning Postsecondary Students studies derive from a combination of retrospective offerings by students and accounts on the student information

questionnaires for those who took either the Scholastic Assessment Test (SAT) or American College Test (ACT) within the two years prior to the BPS start date (nearly half the students in the BPS studies did *not* take either exam). As Kahn and Nauta (2001) demonstrated, there is an inevitable loss of accuracy in the process of these retrospections.

On the other hand, the very nature of a longitudinal study population assembled in the 10th grade (High School & Beyond/Sophomore cohort) or eighth grade (NELS:88/2000) renders precollegiate history endogenous to analytic models. The transcript-base overrides student accounts and provides far more detail than either paper-and-pencil surveys (used by CIRP) or computer-assisted telephone interviews (used by the BPS studies) can provide.

Every data set sacrifices something. No data set is constructed with the questions a particular researcher may have a decade later, so variables are derived and secondary. The High School & Beyond/Sophomore study and the NELS:88/2000 are wanting in many ways where the other studies are strong: financial aid (BPS), and changes in values and opinions (CIRP). But as stories about the core activities we call education, they are unsurpassed by the others.

Purposes and Statistics of This Monograph

The primary purpose of this monograph is to trace the elements of academic momentum as they played out in the secondary school and college history of the High School Class of 1992 (through December 2000) compared with the parallel history of the High School Class of 1982 that was the foundation for the original *Tool Box* study. In the process, the analysis is enriched by including variables we learned to construct or modify on the basis of commentaries and critiques of *Tool Box*, and by a more accurate chronological order in presentation of those variables. The portrait of academic momentum that emerges is a framework within which more sophisticated analyses can be pursued, and within which ameliorative policies (the tools) can be advocated. This study does not pretend to answer complex questions about indirect effects of home, peer, school, and postsecondary institution interactions, but rather trusts future research to deal with those issues.

A secondary task is to demonstrate the construction of a replication when the two data sources, a decade apart, are presumably parallel, but turn out to be something less (for a key example, see Appendix C). The principal encouragement for the replication is that the bachelor's degree attainment rate for students who attended a four-year college at any time remained the same despite differences in the length of cohort history: 65.6 percent for the HS&B/So over 11 years, and 66.5 percent for the NELS:88/2000 cohort over 8.5 years (Adelman 2004a, table 2.2, p. 21). If the HS&Beyond/So history were truncated at 8.5 years, the bachelor's degree attainment rate would have been 59.7 percent. From this perspective there was a marked improvement in degree completion for traditional age college students over the two decades in question. It is natural to ask how this happened, and if the answers to that question provide any guidance for the future.

In terms of statistical technique, both the original *Tool Box* and *The Toolbox Revisited* use simple logistic regression, not structural equations or other path models that are common to causal inquiries or searches for indirect effects, e.g., of discrete aspects of school or college environments (Dey and Astin 1993). A logistic regression is focused on an event that either happens or it doesn't. The dependent variable is dichotomous: yes or no. The independent variables are judged within each model by the degree to which they contribute to what happened in relation to or controlling for all other independent variables in the model (Hair, Anderson, Tatham, and Black 1995).

There are a number of ways of expressing this "degree." One is by an "odds ratio," which, expressed in a simple way, is a ratio of the odds that X will happen given a unit of change in the independent variable to the odds of X not happening, and ultimately shows the strength of association between the independent and dependent variables—with the closer the odds ratio to 1, the less the strength of the association.[9] This was the measure used in the original *Tool Box*. Another way of expressing the value of the contribution of an independent variable is by a "Delta-p" statistic that says every unit change in the independent variable changes the *probability* that X will happen by Y percent given the values of the other variables in the model (Peterson 1985; Cabrera 1994). The narrative of *The Toolbox Revisited* relies on Delta-p,[10] and the logistic model tables provide Delta-p statistics only for those parameter estimates that are statistically significant since there is no way to determine the statistical significance of the Delta-p itself (Cabrera 1994).[11]

But in this paper there is a major methodological departure from the original *Tool Box* study: there are seven (and not five) steps in the model employed, all driven by the empirical history of the NELS:88/2000 students. Following St. John, Paulsen, and Starkey (1996), the blocks of variables in each step were entered "in a sequence that parallels the order in which students pass through well-established stages of persistence behavior" (p. 194) on their way toward bachelor's degree completion (or not). Each of the seven steps, too, is cumulative. That is, variables in one step that meet the statistical criteria for remaining in the model are carried forward to the next step. This extended accounting, which we will call a "logistic narrative," allows "a meaningful examination of the direct effects of variables on persistence, as well as their interactions with the variables entered in successive steps" (St. John, Paulsen, and Starkey 1996, p. 194).

The reader can already tell that there is a great deal of technical material in this presentation, but it is presented in the spirit of the U.S. Department of Education's goal of building a culture of evidence. The author trusts that reports such as *The Toolbox Revisited* will contribute to the

---

[9] Odds ratios, as Peng, So, Stage, and St. John (2002) remind us, are not odds. Their interpretation is not as transparent as the original *Tool Box* assumed them to be. And while an R^2 statistic is presented in the logistic tables of this study, it cannot be read the way one would interpret an R^2 in a linear regression, i.e., it does not indicate the percent of variance in the dependent variable that is explained by the independent variables (Long, 1997). For that reason, it is called a "pseudo R^2" (Cabrera 1994) and is one of a number of measures of goodness-of-fit. As blocks of variables are added to the model in the stepwise manner followed here, the pseudo R^2 should increase.

[10] For the computation of Delta-p, I am using a shortcut recommended by Paul Allison of the University of Pennsylvania: bp(1-p), where b is the logistic coefficient and p is the probability for the dependent variable in the model. This heuristic produces slightly higher values than the formula advanced by Petersen (1985).

[11] For all technical issues, please see Appendix D.

attainment of that goal. Some of the technical material is placed in appendices so that researchers have access to documentation, and all readers have access to reference material.

Who Are We Talking About? And Who Are We *NOT* Talking About?

As was the case for the original *Tool Box*, the basic universe of analysis in *The Toolbox Revisited* does *not* consist of everybody who started out in the cohort. We have to be very clear about this. The basic question of both studies is:

> What demographic, high school performance, postsecondary entry, and postsecondary history (attendance patterns, academic performance) factors are convincingly associated with bachelor's degree attainment for 12th-graders who subsequently attended a four-year college at any time in their undergraduate careers?

This is not a question about completing high school, completing high school on time, or completing high school on time with a standard diploma (as opposed to a GED or certificate of attendance).[12]

This is not a question about entering the postsecondary system. We are not talking about "access." Nor is it a question about "persistence" to the second term or the second year following entry to postsecondary education. It certainly is not about "retention" in the same institution to the second term or the second year.

This is a question about *completion* of academic credentials—the culmination of opportunity, advisement, choice, effort, and commitment.

The question is carefully worded. The universe does not include people who never reached the 12th grade. In fact, as a consequence of the sampling design and weighting of the two longitudinal studies, both essays include only those students who were in the 12th grade *in the same year*,[13] along with those who graduated from high school. The definition of the universe also requires that we have demographic information, high school transcripts,[14] test scores, and postsecondary transcripts for everybody whose careers are subject to analysis. Not everybody can present all this information, and, with rare exceptions (involving some aspects of high school records, and as explained in Appendix C) both the original *Tool Box* and *The Toolbox Revisited* decline to impute any of this information.

---

[12]For details on the high school graduation status of those who were eighth-graders in 1988, see Appendix L, table L1.

[13]For details on those in the NELS:88/2000 cohort who, though in the 12th grade in 1992 along with others, had previously been held back at least one year in the course of their schooling, see Appendix L, table L2.

[14]Only 21.3 percent (s.e. = 1.17) of the NELS:88/2000 who were in the 12th grade in 1992 were missing high school transcripts, compared with 73.7 percent (s.e. = 2.58) of those who had either dropped out of high school or were not in-grade. Nearly 100 percent of the former group graduated from high school with a standard diploma.

There are two other notable features of the basic question. First, both essays argue that, regardless of what students *say* on a survey about their education expectations, it is what they actually *do* that counts. So the only students we can talk about honestly with respect to bachelor's degree attainment are those who set foot in a bachelor's degree-granting institution at some time. This criterion obviously includes students who started their postsecondary careers in community colleges and other types of sub-baccalaureate institutions. Second, the term used to describe the relationship between the dozens of independent variables describing demography, high school performance, postsecondary entry, and postsecondary history and the dependent variable of bachelor's degree completion is "convincingly associated." Neither essay claims "cause" or "prediction."

To illustrate how these conditions restrict the universe, let us start with 2.93 million 1988 eighth-graders in the NELS:88/2000 cohort. Table 1 lays out the stages of contraction of the basic population until we reach the subject universe of this study.

Table 1. From macro to micro: Contraction of the universe of 1988 eighth-graders to the universe subject to analysis in *The Toolbox Revisited*

Description of Universe	Percent	Descending weighted N[a]
A. Initial universe of 1988 eighth-graders	100.0	2.93M
B. Of (A), those who were in the 12th grade in 1992	83.6 (0.98)	2.45M
C. Of (B), those who continued to postsecondary education at any time through December 2000	81.7 (1.28)	2.0M
D. Of (C), those who presented complete high school transcripts, test scores,[b] complete postsecondary transcript records, and socioeconomic status information	80.5 (1.01)	1.61M
E. Of (D), those who attended a four-year college at any time.	73.5 (1.00)	1.19M
Net percentage of 1988 eighth-graders in the universe	41	1.19M
Net percentage of 1992 12th-graders in the universe	51	1.19M

[a]Like other NCES longitudinal studies, the NELS:88/2000 cohort is a stratified sample, in which each student is assigned a weight to represent other similar students in the cohort (see Curtin, Ingels, Wu, and Heuer 2002).
[b] See definition of SRTSQUIN in Glossary.
NOTES: Standard errors are in parentheses.
SOURCE: National Center for Education Statistics: NELS:88/2000 postsecondary transcript files (NCES 2003-402 and Supplement).

Looking more closely at our universe in terms of the types of schools attended, we find that 20.2 percent (s.e. = 1.13) started in community colleges, and 41.0 percent (s.e. = 1.29) earned credits from community colleges, whether or not they started at community colleges. While we will describe the attendance patterns of the NELS:88/2000 cohort in more detail later, the point is that the universe under analysis is not limited to those who attended *only* four-year institutions, and that the community college plays a significant role in the careers of the group of students under consideration.

To repeat: Our subject universe consists of half the 1992 12th-grade students in the NELS:88/2000 cohort. We are *not* talking about:

- students who did not graduate from high school or those who graduated with something other than a standard diploma (G.E.D. or Certificate of Attendance);
- students for whom we do not have full high school records (transcripts, grades, test scores);
- students for whom socioeconomic status could not be determined;
- students who did not enter any postsecondary institution by December 2000, when they were 26 or 27 years old; and
- students who entered the postsecondary system, but never set foot in a bachelor's degree-granting institution.

That is the other half. Some 22.2 per cent (s.e. = 1.05) of 1992 12th-graders who attended a four-year college at any time are in this "other half" because they are missing key information that excludes them from the universe under analysis. Readers interested in the demographic differences between included and excluded students due to missing data elements are referred to Appendix E.

Comparative demography of the subject universe

Given the strong boundaries drawn around the subject universe, how does its demography compare to less restrictive definitions? Table 2 sets out the major demographic categories, and compares the target subject universe with (a) all 1988 eighth-graders who participated in the last survey of the NELS:88/2000 in 2000, (b) all participants in the 1992 survey, whether or not they were in school or in the 12th grade,[15] and (c) all 1992 12th-graders who attended *any* postsecondary institution by December 2000.

As readers work from left to right across the columns of table 2, they will notice that gender balances are even until the moment of entry to postsecondary education, at which point women pull ahead of men. The same type of observation applies to the race/ethnicity distribution: At the point of entry to postsecondary education, the proportion of African-Americans, Latinos, and American Indians declines, while that of whites and Asians rises. In the universe for this study,

[15]The reader should note that, unlike the High School & Beyond/Sophomore cohort study, the NELS:88/2000 sample was "refreshed" in 1992 to be representative of 12th-graders in that year. The "refreshed" students are included in our analyses.

Table 2. For each of four definitions of the universe of students in the NELS:88/2000, percentage distribution by gender, race/ethnicity, socioeconomic status quintile, and second language background

Demographic variable	1988 eighth-graders	All 1992 survey participants	All 1992 12th-graders who entered postsecondary education	1992 12th-graders who attended a four-year college at any time and met other criteria to be subjects of this study[a]
Gender				
Men	49.7 (1.01)	49.9 (0.83)	46.5 (0.93)	48.8 (1.27)
Women	50.3 (1.01)	50.1 (0.83)	53.5 (0.93)	51.2 (1.27)
Race/ethnicity				
White	71.7 (1.50)	71.5 (1.30)	74.9 (1.29)	78.2 (1.31)
African-American	12.9 (1.26)	12.7 (0.94)	10.3 (0.90)	9.4 (1.03)
Latino	10.5 (0.87)	10.4 (0.84)	9.1 (0.88)	7.0 (0.72)
Asian	3.5 (0.32)	3.7 (0.31)	4.8 (0.43)	4.7 (0.42)
American Indian	1.4 (0.43)	1.7 (0.55)	0.7 (0.23)	0.6 (0.18)
Second language background				
Nonnative speaker of English	8.6 (0.68)	10.1 (0.83)	10.0 (0.90)	7.4 (0.67)
Native speaker of English from a second language household	3.3 (0.33)	2.7 (0.21)	2.4 (0.23)	2.2 (0.28)
Socioeconomic status quintile				
Highest quintile	21.3 (0.92)	21.1 (0.88)	29.1 (1.08)	38.5 (1.52)
2nd quintile	20.8 (0.79)	21.0 (0.69)	25.3 (0.88)	26.4 (1.24)
3rd quintile	20.7 (1.10)	19.8 (0.68)	20.2 (0.73)	17.7 (0.85)
4th quintile	19.6 (0.83)	19.2 (0.66)	15.4 (0.61)	11.7 (0.59)
Lowest quintile	17.6 (0.93)	18.9 (0.85)	10.0 (0.73)	6.8 (0.50)

[a]1992 12th-graders with known socioeconomic status and high school records (transcripts and test scores), who graduated from high school by December 1996, and attended a four-year college at any time.

NOTES: Standard errors are in parentheses. Columns for gender, race/ethnicity, and socioeconomic status quintile may not add to 100.0 percent due to rounding.

SOURCE: National Center for Education Statistics: NELS:88/2000 postsecondary transcript files (NCES 2003-402 and Supplement).

the proportion of whites rises even further, while that of Asians, American Indians, and African-Americans[16] holds steady, and that of Latinos declines. There are no statistically significant differences in the proportion of students who were nonnative speakers of English[17] until the final boundaries are drawn for the universe for this study.

The most dramatic and expected changes in the distributions of table 2 are by socioeconomic status quintile, with quantum leaps in the proportion of students from the top two quintiles as soon as one crosses the postsecondary line, and parallel declines in the proportion of students from the bottom two quintiles. Only the third quintile (the 41st–60th percentile) remains stable until the final contraction of the cohort for the universe used in this study.

What do these demographic changes within the universes of students who might be the subjects for a study mean? *The Toolbox Revisited*—and *Answers in the Tool Box* before it—is a study about students who graduate from high school and go on to college. Given historical data, it is not surprising that this group will evidence a higher SES profile and a lower percentage of under-represented minorities than others in the same grade cohort. Since the 1980s, women have been in the majority in this group.[18] Within our subject universe, demography is not necessarily destiny, as the original *Tool Box* demonstrated. For the comparison group—the other half that either does not graduate from high school, graduates but doesn't continue its education, or graduates and continues but never at a four-year college—*The Toolbox Revisited* says: If we want more people to wind up with at least a bachelor's degree in life, here are some guidelines based on the experience of people who tried.

Summary of Part I

What do *Answers in the Tool Box* and *The Toolbox Revisited* do, and what do they not do? Both studies use the histories of 12th-graders who subsequently attended a four-year college at any time (entered in any term and not just the fall term, entered as part-time as well as full-time students, entered in community colleges as well as four-year institutions) to indicate what factors in those histories are associated with completing a bachelor's degree—not in four years, not in six years, but whenever the longitudinal tracking ended (8.5 years from high school graduation for the class of 1992; 11 years for the class of 1982). They do not ascribe cause or pretend to predict. They recognize that what is associated with degree completion in one generation may not be associated with it in the next, or that the strength of association may change. Conditions and populations change, after all. Rigid prediction is a risky call, and besides, that's not what the data and statistical standards allow one to do.

---

[16]The difference in the African-American proportion of the two universes is not statistically significant.

[17]Nonnative speakers were defined as those who said their first language was not English and, in grade 10 and/or 12 (the 1992 survey) indicated that they spoke to their mothers most or all of the time in their first language.

[18]Though to the extent to which the group includes students who commenced their postsecondary studies in community colleges—and it does—that majority will be a little less.

Part II
Variables Explored and Used in This Analysis

With two major exceptions—high school academic curriculum intensity and the composite high school performance variable we call "Academic Resources," both of which are covered in Part III—the construction and allied information for most of the variables explored in *The Toolbox Revisited* are detailed in the Glossary (starting on p. 179). Whenever the reader asks for details on "How was that defined?" or "How did they get that?" the Glossary is the place to go.

The purpose of this section is to provide the reader with an advance reference list of the variables considered and used in this analysis. The reader should keep in mind that "variables" are *representations* of realities (e.g., first-year college grades) or constructs (e.g., transfer). We use them as a shorthand.

The variables listed and described are presented in the order of the steps of the logistic narrative for which they were considered. The collection represents neither a "fishing expedition" nor a "mind dump," as a majority of the variables considered were determined by the attempt to replicate the original *Tool Box* study with a more recent parallel cohort. A quick summary of their properties can be found in figure1.

Demographic background variables defined

1) NNSE—Nonnative speaker of English. A dichotomous variable marking those students whose first language was not English *and* who, in grade 12, reported that they conversed in that language with their mothers most or all of the time.

2) IMMIG—Parent immigrant status. A dichotomous variable indicating whether the student's parents were immigrants to the United States within the previous 10 years.

3) BROSIS—Number of siblings. A dichotomous variable marking students with three or more siblings, versus those with one, two, or none.

4) FIRSTGEN—First generation postsecondary student. A dichotomous variable indicating students for whom neither father nor mother ever attended a postsecondary institution.

5) FAMINC—Family income. This variable was first set in six bands, then trichotomized to yield upper-, mid-range, and low-income populations.

6) URBAN—A dichotomous variable indicating whether the student's high school was located in an urban area.

7) NEWCHILD—A dichotomous variable to mark students, male or female, who became parents by the time they were 20 years old.

8) RACE—A dichotomous race/ethnicity variable, with under-represented minority (African-American, Latino, and American Indian) = 1 and White and Asian = 0.

9) GENDER—A dichotomous variable in which male = 1 and female = 0.

10) SESQUINT—Socioeconomic status quintile. See Glossary.

High school background variables defined

1) EDUANTIC—Education anticipations. A three-level variable: (a) consistently (in grades 10 and 12) expected to earn a bachelor's degree; (b) raised expectations to the bachelor's degree between grades 10 and 12; and (c) either lowered expectations from the bachelor's level between grades 10 and 12 or never expected to earn a bachelor's degree.

2) CLSSRNKQ—High school class rank/GPA quintile. See Glossary and Appendix C for accounts of construction and limited imputation, respectively.

3) SRTSQUIN—Senior year test score quintile. A test of general learned abilities was administered to NELS high school seniors and the results set out in percentiles. For those who did not take that test but for whom SAT or ACT scores were available, those scores were substituted using an equipercentile concordance methodology, weighted, and set out in quintiles. See Glossary for a more detailed account.

4) HIGHMATH—Highest level of mathematics reached in high school. A five-level variable with calculus and precalculus at the high end and Algebra 1 and prealgebra at the low end. See Glossary.

5) SCIMOM—High school momentum in science and mathematics. A three-level variable combining highest level of mathematics with numbers of credits earned in core laboratory science. See Glossary.

6) FLAN—Number of units of foreign language in high school on a five-level scale.

7) ADVANCE—Number of Advanced Placement (AP) courses. Three values based simply on the number of AP courses recorded: three or more, one or two, and none. See Glossary for a full account of identifying AP course work.

8) HSCURRQ—Academic intensity of high school curriculum, in quintiles. This variable is the core of the analysis of students' precollegiate histories, and, hence, is described in detail in Part III and Appendix F.

9) ACRES—Academic Resources. A quintile index representing a composite of students' pre-collegiate attainment (curriculum plus class rank/GPA plus senior year test score). ACRES is the dominant precollegiate variable in both the original *Tool Box* and *The Toolbox Revisited.* The construction of this variable is described in detail in Part III.

Postsecondary entry variables defined

1) FIRST4—A dichotomous variable indicating whether the first postsecondary institution attended by the student was a four-year college.

2) DOCT—Another dichotomous variable indicating whether the first postsecondary institution attended was a doctoral degree-granting institution.

3) SELECT—A dichotomous variable indicating that the first institution attended by the student was either highly selective or selective.[19] See Glossary for details on selectivity.

4) NODELAY—A dichotomous variable marking students who entered postsecondary education within seven months of high school graduation.

5) ACCELCRD—Acceleration credits. A sum of all college credits earned by both course work prior to high school graduation and by examination. The values of this variable were set at three levels: more than 4 credits, 1–4, and zero.

First-year performance variables defined

1) LOWCRED—A dichotomous variable marking students who earned less than 20 additive credits earned in the first calendar year of attendance. For descriptive data on the relationship between number of credits earned in the first year and highest degree, see Appendix L, table L4.

2) FRSHGRAD—GPA in the first calendar year of attendance. Grade point averages were determined for the first *full calendar year* of postsecondary attendance and were then set out in quintiles. FRSHGRAD is a dichotomous variable that divides the highest two quintiles from the other three.

---

[19]Institutional selectivity in the postsecondary files of all three grade-cohort longitudinal studies conducted by the National Center for Education Statistics has five values: highly selective, selective, nonselective, open-door, and not ratable. The first three of these values were based on the selectivity cells developed by the Cooperative Institutional Research Project (CIRP) at UCLA for its annual survey (since 1966) or entering freshmen. For the distribution of NELS:88/2000 postsecondary students by selectivity of first institution attended, see Appendix L, table L3.

3) FREM—A dichotomous variable indicating any remedial course work in the first calendar year of attendance.

4) FCOLMATH—Another dichotomous variable indicating whether the student earned any credits in college-level mathematics during the calendar year following first enrollment. "College-level mathematics" was defined to include college algebra, finite math, statistics, precalculus, calculus,[20] and a category of "liberal arts mathematics" courses that require the equivalent of high school Algebra 2 as a prerequisite, and include such topics as game theory, basic combinatorics, and foundations of numerical methods.

Financing postsecondary schooling variables

There are three dichotomous financing variables in both *Answers in the Tool Box* and *The Toolbox Revisited*: GRANTS, LOANS, and STUWORK. Each indicates only whether the student used that form of financing during his/her early postsecondary career. The reader is referred to the text of Part IV for elaboration.

Attendance pattern variables defined

1) TRANSFER—community college to four-year. With students going back and forth between community colleges and four-year colleges, it is important to mark transfer as a permanent change of venue, a migration that is formally recognized by system rules. A transfer student is one who (a) started in a community college, (b) earned more than 10 credits from the community college before (c) enrolling in a four-year college and (d) earning more than 10 credits from the four-year college. The only time limit set for these changes of venue and credit accumulation is the length of the longitudinal study. In the case of the NELS:88/2000, that means 8.5 years from the modal high school graduation data of June 1992. This is a dichotomous variable.

2) FOURTRAN—A dichotomous variable indicating transfer from one four-year college to another. The algorithm for classic transfer from a community college to a four-year college was fairly easy to construct. But to distinguish a true four-year-to-four-year college transfer required an indirect route. See Glossary for details.

3) MULTINS—A dichotomous variable indicating that the student attended more than one institution. This is a macro-vision of otherwise multidirectional student behavior.

4) SUMMER—Number of credits earned during summer terms, set in three bands: more than 4, 1–4, and none.

---

[20]The category of "calculus" includes not only the standard sequence but also special "short calculus" or "brief calculus" courses, and specialized introductions to calculus for business, economics, and life science majors.

5) PARTTIME—A dichotomous variable tagging students whose enrollment intensity was *ever* part-time. The construction of this variable involves complex algorithms, and the reader is referred to the Glossary for details. (For an account of enrollment intensity in both the NELS:88/2000 and the Beginning Postsecondary Students longitudinal study of 1995/96–2001, see Appendix L, table L5).

Extended postsecondary performance variables defined

1) TREND—Trend in student's GPA: rising, flat, or falling. Cumulative undergraduate GPA was measured at three points in time—at the end of the first calendar year following initial enrollment, at the end of the first two calendar years following initial enrollment, and at the end of the student's undergraduate career, no matter when that occurred. See Glossary for further elaboration.

2) CUMMATH—Number of credits earned in college-level mathematics: more than 4, 1–4, and 0.

3) CHANMAJ—A dichotomous change-of-major variable. See Glossary for a full description.

Final factors variables defined

1) NOSTOP—In all three NCES postsecondary transcript-based grade-cohort studies, noncontinuous enrollment was defined as *more than* a one semester (or its equivalent, e.g., two quarters) stop-out period. In the dichotomous variable, NOSTOP, the student is considered continuously enrolled even with one semester (or two quarters) off.

2) WRPT Ratio—A dichotomous variable. On one side of the dividing line are students who withdrew from or repeated 20 percent or more of all courses in which they enrolled (ratio of non-penalty withdrawal and no-credit repeat grades to all grades received).

Summary: Locus of Responsibility

Figure 1 presents the basic statistical characteristics for 39 of the major variables described above that were either tested, used in trials, and/or employed in the final logistic narrative of *The Toolbox Revisited.* Seven of these variables describe demographic characteristics, and another three label types of financial aid that ultimately are offshoots of demography. Of the remaining 29 variables, 14 are principally matters of student choice (e.g., changed major), five are indicators of student academic effort (e.g., first-year grades), seven reflect interactions of student choice plus student effort plus opportunity to learn (e.g., highest high school math), two mark interactions of student effort and institutional judgment or guidance (e.g., first-year remediation), and one (education anticipations) reflects student experience, attainment, and self-assessment, along with the encouragement of family and peers. The student is at the center of all these representations. The locus of responsibility for the way each of these variables will tilt lies as much with the student as with external forces. *The Toolbox Revisited* is optimistic that most students can make it all come out right. We will return to this optimism in Part VII.

Figure 1. Values, means, standard deviations, use of variables considered, and step no., if used, in the logistic narrative of *The Toolbox Revisited*, with universe confined to 1992 12th-graders with complete high school records and known socioeconomic status who attended a four-year college at any time through December 2000

Variable	Values	Programming name	Mean	S.D.[a]	Used	Step no.	Relationship to variables in the original *Tool Box*
Nonnative speaker of English	2[b]	NNSE	0.1472	0.3544	No		New

Part III
What Is and What Happens Before Matriculation

There are at least three distinct ways of setting up Step 1 in the progression of multivariate analyses that lead us to appreciate what makes a difference (and how much of a difference) in completing a bachelor's degree for students who attended a four-year college at any time. The first step covers both student demographics and high school performance. Let us cover the demographics first because they do not present complex analytic choices.

What If We Knew Nothing Except Demography?

The demographic background of students is marked as of a set moment in time (in our case, in grade 12). It is what students look like, where they are living, their parents' education(s), occupation(s), and income(s), and other features of the student's family. Demographic characteristics may be subject to special attention in education policy from local to national levels, but, with the exception of the student's marital and parental status, are not subject to change.

Demographic variables are normally considered in the context of other aspects of student experience, behaviors, and attitudes when attainment of any kind (e.g., high school graduation, test scores, grades, college degree) is the dependent variable. Indeed, that is the way this analysis treats demographic characteristics. But to demonstrate what happens to the demographic variables in the analysis, this section opens with a stark presentation. If someone asked us to explain bachelor's degree completion for 1992 12th-graders who subsequently attended a four-year college at any time, and all we knew about them were demographics, what would the various associations of demography with degree attainment look like?

Table 3 presents a logistic exploration that started with nine demographic variables described in Part II above. The socioeconomic status quintile variable is not included, but two of its components (family income and parents' highest level of education) are present to serve as proxies for SES. Two of the nine demographic variables—whether the student was a nonnative speaker of English and family immigrant status—were not accepted into the logistic equation.

Whether there were nine variables or seven, however, this logistic model fails to reach significance as a *model,* regardless of whether independent variables within the model turn out to be significant. The t value for the intercept falls below the threshold of 0.765 this study uses for keeping independent variables under consideration, and the proportion of concordant probabilities predicted at 63 percent is the lowest–by far–of any logistic model in this study.

Of the independent variables within the model, four are significant, even though that significance is undercut by the statistical characteristics of the model as a whole. The most significant ($p < 0.01$) is first generation college status, with a Delta-p statistic that says the probability of completing a bachelor's degree is reduced by roughly 21 percent for first generation students.

Race/ethnicity and gender are significant at $p <.05$, with the messages of the Delta-p that minority status reduces the probability of earning a bachelor's degree by 17 percent, and being male reduces that probability by 11 percent. Falling in the highest third of family income is marginally significant.

Table 3. Logistic account of the relationships among major demographic variables and bachelor's degree attainment for 1992 12th-graders who attended a four-year college at any time

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p
Intercept	0.2250	0.1869	0.69		
Race/ethnicity	**-0.7257**	**0.1434**	**2.90**	**0.05**	**-0.1660**
Gender	**-0.4760**	**0.1072**	**2.54**	**0.05**	**-0.1089**
Parenthood	-1.6285	0.5255	1.77	†	†
Siblings	-0.3619	0.1109	1.87	†	†
Family income	**0.3870**	**0.1111**	**2.00**	**0.10**	**0.0885**
First generation	**-0.9137**	**0.1420**	**3.69**	**0.01**	**-0.2089**
Urban high school	0.1839	0.1217	0.87	†	†

†Variable did not reach the minimum level of significance (p<.10) in a two-tailed test.
NOTES: Statistically significant variables are in bold. $G^2 = 6288.09$; $df=5144$; $G^2/df = 1.222$; $X^2(df) = 413.76(7)$; pseudo $R^2 = .077$. Proportion of concordant probabilities predicted = 63.0. Root design effect = 1.75.
SOURCE: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

But the most important message is the failure of the purely demographic analysis itself. If the statistical model does not reach a convincing level of significance, and all the variables inside the model are basically cut from the same cloth, then even if some of those variables are significant within the model, the cloth is frayed. That failure sets up a hypothesis that will unravel in the course of subsequent steps of the logistic narrative: Among students who attended a four-year college at any time, student demographics and family demographics may have, at best, indirect connections with degree completion. In fact, at the moment high school academic history is included in the multivariate account, demography plays a considerably reduced role at the same time that the logistic model becomes more persuasive.

High School Background and History

This is where the academic momentum story begins, where the major contributions of the original *Tool Box* were most prominent, and where the story continues to be of considerable importance.

There were four core high school background and performance variables in the first step of the logistic inquiry in the original *Tool Box*: senior year test score, a combined index of class rank and GPA, academic curriculum intensity, and the student's education "anticipations." The first three of these variables were combined in a composite index of "Academic Resources" that proved to have lasting positive repercussions through students' postsecondary histories.

Before we examine the results of the Step 1 logistic model, we should (a) revisit education "anticipations," and (b) provide a detailed account of how *The Toolbox Revisited* deals with high school curriculum.

"Anticipations" versus "aspirations"

Both the original *Tool Box* and this study employ a variable that some people will interpret as indicating students' education "aspirations." But this construct is carefully labeled "anticipations," and is *not* based on the student's answer to a question asked only once (for example, in a 12th-grade survey or in a freshman registration line). Rather, "anticipations" is built from sets of questions asked in both the 10th grade and the 12th grade, and describes the *consistency* and *level* of the student's abstract expectations and concrete plans.

Perhaps as a by-product of the national visibility of discussions on secondary-to-postsecondary transitions that followed the release of *A Nation at Risk* in1983, along with a burst in recruitment of minority students by both colleges and professionally-oriented organizations such as the National Action Committee for Minorities in Engineering, the proportion of 12th-graders who *consistently* expected to earn at least a bachelor's degree more than doubled from 22.5 percent (s.e. = 0.58) among 1982 12th-graders to 59.4 percent (s.e. = 1.02) among 1992 12th-graders. Continuing one's education after high school, at some point and "in some form of postsecondary education" is now a norm of expectations among high school graduates: 92.6 percent (s.e. = 0.54) of NELS:88/2000 students who graduated from high school with any kind of diploma, whether "on-time" in 1992 or later, expected to continue their education in a postsecondary setting. That which is a norm of behavior is like breathing in and breathing out. When virtually everyone expects to continue, the serious curricular "disconnect" between K-12 and postsecondary systems eloquently dissected by Venezia, Kirst, and Antonio (2003) is even more fraught with hazards and ironies. "Anticipations," one can surmise, will not play as significant a role in a logistic account of bachelor's degree completion as it did in the original *Tool Box*.[21]

To aspire is an active concept. In our ordinary usage, it means to hope, seek, wish, or yearn. When Kao and Tienda (1998) describe "aspirations" as "a realistic evaluation of likely outcomes" (p. 352), they are not describing "aspirations" as we normally understand the term. Qian and Blair (1999), too, indicate that they use the "aspirations" to describe expectations or plans

[21]Even there, the variable floated in and out of significance over the steps of the logistic model (see Adelman 1999, pp. 80–81).

"rather than a wish" (p. 622). And that's just the point: With these rare exceptions, the literature on education "aspirations" consistently confounds an emotively-laden term applied to motivation, desire, or drive with an assessment of possibility based in experience (Mezias 1988). Underneath the consistency-by-level construct of the educational "anticipations" variable used in both the original *Tool Box* and in this study is what Kao and Tienda (1998) document as a growth from abstract attitudes about a very distant possibility when students are in junior high school to a rational judgment based on both school experience and input from parents and peers as the time draws closer to high school graduation. There is no doubt that the consistency-by-level formulation of our anticipations variable is influenced by what happens to students between grades 10 and 12.

A different interpretation of expectations is implicit in Venezia, Kirst, and Antonio (2003): Expectations become assumptions, more passive than "aspirations." Their principal thesis—that students falsely assume that the momentum inherent in a high school diploma is sufficient not merely to enter a postsecondary environment ("the easy part," in their words) but to complete a credential—is all the more powerful when these assumptions end in less than completion. The principal culprit lies in poorly articulated (secondary-to-postsecondary) curricula (Conley 2005), a topic addressed in Part VI of this essay.

Academic Intensity of Secondary School Curriculum

Think of a series of moving walkways in an airport. Passengers expect that one leads to the next, and don't think too much about what's happening along the way. What the most perceptive of contemporary analysts of the curriculum paths from high schools into colleges of any kind have observed (Venezia, Kirst and Antonio; and Conley) might be described as a disconnect in both the location and speed of these successive moving walkways, so that the passengers stepping mindlessly off the first and heading to the second trip, stumble into the moving hand rail, and desperately grasp at their luggage so that it doesn't get stuck in the space between the two segments. This issue was imperfectly highlighted in the original *Tool Box* and is worth extended preliminary attention here.

The "differential course work" hypothesis, originating in the work of Pallas and Alexander (1983) and Alexander and Pallas (1984) in relation to high school test scores, and validated by *Answers in the Tool Box* with a longer time frame and a bachelor's degree attainment dependent variable, remains the core of the presentation in *The Toolbox Revisited* as well. With these forebears as guidance, we are going to look at the components of the curriculum variable, alternative presentations of those components for multivariate analyses, and some critiques of the measure. In the past decade, a number of short-hand representations of the high school curriculum, e.g., the New Basics as advocated in *A Nation at Risk* (1983), "minimum college-qualified" (Berkner and Chavez 1997), and "track location" (Lucas 1999; Lucas and Berends 2002) have become common in both the research literature and the general press. The New Basics are the best known of these heuristics. The highest level of these "new basics"

—which simply counted Carnegie units[22] (four of English, three each of mathematics, science, and social studies, and two of foreign language)—has been labeled "rigorous" (McCormick 1999), even though three units of mathematics could amount to no more than plane geometry and the science in question could lack any laboratory components. After the publication of the original *Tool Box*, the literature added criteria for highest level of math, core laboratory science, and Advanced Placement course work to the judgment of "rigor," and sought a trichotomous presentation with labels such as "core curriculum or less," "mid-level," and "rigorous" (Horn and Kojaku 2001).

Quite frankly, the word "rigorous" is somewhat of a misnomer since a course requiring a high concentration of intellectual effort can be presented in a relaxed manner with comparatively low standards for success. Put another way, calculus or laboratory chemistry, for example, can be taught in a very laid-back fashion, while an otherwise "ordinary" survey of U.S. history can require the search for, discovery, and cataloguing of original source material, readings in archival methods, and frequent examinations and project presentations with criterion-referenced grading standards. Both the original *Tool Box* and *The Toolbox Revisited* prefer the term, "academic intensity," defend the continuous variable of academic curriculum intensity as a more flexible language of accounting, and decline to invoke labels of "college qualified," "at risk," and others.

The academic curriculum intensity variable is called HSCURRQ. It takes a weighted distribution of NELS:88/2000 students across 31 levels of academic curriculum intensity and quality (there were 40 levels in the records of the High School Class of 1982, the subjects of the original *Tool Box*), and divides the distribution by quintile. Each level of academic curriculum intensity is a distinct configuration of numbers of Carnegie units[23] earned in core academic areas and other distinct notations about students' course of study. For example, in both data sets, at the highest level, one finds students who, between grades 9 and 12, accumulated.[24]

3.75 or more Carnegie units of English;
3.75 or more Carnegie units of mathematics;
highest mathematics of either calculus, precalculus, or trigonometry;
2.5 or more Carnegie units of science *or* more than 2.0 Carnegie units of core laboratory science (biology, chemistry, and physics);
more than 2.0 Carnegie units of foreign languages;
more than 2.0 Carnegie units of history and/or social studies;
more than 1 Advanced Placement course; and
no remedial English; no remedial mathematics.

---

[22]A Carnegie unit is the basic credit system for U.S. secondary schools. It is generally recognized as representing a full year (36–40 weeks) in a specific class meeting four or five times per week for 40–50 minutes per class session (Martinez and Bray 2002).

[23]It is important to note that the Carnegie unit thresholds indicated, e.g., 3.75 units of English, are not determined *a priori*, but rather from the empirical distribution of Carnegie units standardized across the NELS high school transcripts in their edited version. See the descriptive windows for all the high school curriculum variables on the NCES data sets in CD # 2003-402 and its June 2004 Supplement.

[24]For mean numbers of Carnegie units earned in major curriculum areas, see Appendix L, table L6.

These are minimums. In fact, at the highest level of academic curricular intensity, students had accumulated an average of 4.30 Carnegie units of English, 4.34 units of mathematics (94 percent having reached precalculus or calculus), 3.63 units of core laboratory science, 3.76 units of foreign languages, and 3.79 units of history and other social studies, along with an average of three AP courses. That is an impressive portfolio.

To this particular configuration, the NELS:88/2000 version of the highest level of academic curriculum intensity adds any Carnegie units in "computer science," a far more frequent and integrated elective in the high school curriculum by 1990, when the NELS students were in the 10th grade, as opposed to 1980, when the High School & Beyond/So students were in the 10th grade (the mass availability and marketing of PCs began in 1984).

Each subsequent level in a descending logical cascade subtracts something from this configuration (see Appendix F) until a relatively smooth distribution is achieved. Nothing is perfect in these algorithmic adjustments; and whatever lumpiness in distribution remains is assuaged in the quintile version.

In light of recent literature on the effects of AP course-taking versus scores on AP examinations (e.g., Geiser and Santelices 2004; Klopfenstein and Thomas 2005), it is important to note that in both the original *Tool Box* and in this study, AP course work is *not* treated as a discrete variable, rather as *part* of the overall index of academic curricular intensity. However, in a moment we will demonstrate what happens when AP is invoked as a distinct independent variable in alternative constructions of the first step of our core logistic model.

The basic critique of this account of high school curriculum has much merit: Numbers of courses (expressed in Carnegie units) in specific subject areas are not equivalent to high content standards or performance standards in those courses (Barth and Haycock 2004). In the cascading curriculum levels of the Academic Intensity variable, a student could accumulate three units of watered down history and social studies and still have three units. A national transcript accounting has no way of knowing what is demanded in thousands of history and social studies courses offered in 1100 high schools, a point made in the staff research for *A Nation at Risk* (see Adelman 1983). The only domestic examples available for those who argue for test-driven high content standards in individual high school subjects such as U.S. history or chemistry or Algebra 2 are the College Board achievement tests (now called SAT II) and the New York State Regents. Some other states (e.g., Michigan) have tests in place for merit-based scholarships that cover broad areas of the curriculum (e.g., math, science) and language skills (reading, writing) but not specific subjects. In this respect, they are closer to the ACT examination, though at a less demanding level (Bishop 2004). The high school transcripts that serve as our evidence are very inconsistent in entering SAT II subject exam scores, so we have nothing on which to rely for an external validation of content. Getting beyond course titles to content standards is addressed in Part VI of this study.

Altonji's work (1996) offers a second important critique. He would have us control high school curriculum variables for school effects and "quality of courses," but admits that whatever one tries for proxy measures, the results would be "imperfect." Altonji draws our attention to the fact that more than half the variance in the mean number of Carnegie units earned in academic

subjects by the NLS-72 cohort[25] was across schools, indicating disparities in opportunity to learn, teacher quality, and student talents and proclivities. One might put Altonji's conclusion more baldly: Students from higher SES backgrounds attend high schools that serve similar students, schools in which parental expectations and involvement are high, and schools in which curriculum offerings and teacher quality follow SES demands and can afford to do so because the tax base is higher. These students tend to enter college and earn degrees at higher rates than students from "lesser" backgrounds and from schools that accompany those backgrounds, therefore, the influence of the academic intensity of high school curriculum will be overstated.

The implicit response of the original *Tool Box* made explicit in *The Toolbox Revisited* is that there are inequities in opportunity to learn and proclivity to learn that are reflected in the geo-demography of schools, but in a logistic account of bachelor's degree attainment in which the results are reported with the Delta-p statistic, socioeconomic status will modulate some of the effects of curriculum. The message encourages all high schools to offer the requisite curricula, to make sure they have teachers who can deliver that curricula, to believe that their students can all reach higher levels of academic intensity in preparation, and to encourage their students to do so—no matter what students' intentions for subsequent education or work may be. As the principles of the *No Child Left Behind* legislation are applied in high schools, this is a large part of what they mean.

Highest level of mathematics and changes in high school course-taking

In comparing the high school records of the HS&B/So (High School Class of 1982) with those of the NELS:88/200 (High School Class of 1992), and looking only at earned Carnegie units, what we principally witness is an improvement of precollegiate preparation of students in mathematics

Table 4. Percentage of 1982 and 1992 12th-graders in academic high school programs whose high school curriculum fell below selected content and intensity thresholds

	Class of 1982		Class of 1992	
Curriculum markers	**All 12th-graders**	**In academic program**	**All 12th-graders**	**In academic program**
Percent of students with:				
Highest level of mathematics *less than* Algebra 2	60.2 (0.78)	35.4 (1.02)	37.7 (1.11)	24.2 (1.24)
Maximum of one year of core laboratory science	60.1 (0.82)	37.1 (1.04)	34.3 (1.17)	21.0 (1.22)
Maximum of one year of foreign language	28.3 (0.88)	14.3 (0.75)	41.5 (1.30)	28.4 (1.47)

NOTES: "Core laboratory science" is confined to biology, chemistry, and physics. Standard errors are in parentheses. Weighted N for students in academic program: HS&B/So = 1.5M; NELS:88/2000 = 1.8M.
SOURCES: High School & Beyond/Sophomore Cohort (NCES 2000-194) and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

[25]The National Longitudinal Study of the High School Class of 1972, the first, most elaborate, and longest (1972–86) of the NCES grade-cohort longitudinal studies

and science, a change that affects the amount of remediation necessary in four-year colleges, as well as mathematics course-taking at the college-level (Adelman, Daniel, and Berkovits 2003). We also note an unsettling increase in the percentage of students taking a maximum of one year of foreign language course work (though that percentage spread might be mitigated somewhat if we accounted for the increase in bilingual heritage language users between the two cohorts). Table 4 sets forth some basic threshold markers in these curricular areas.

Thresholds are suggestive, but not conclusive, of the shape of change in curricular preparation. By reverse logic, table 4 says only that X percent of students are getting beyond point Q in secondary school study. It does not say how far beyond, and that may make more of a difference in academic momentum. The mathematics analysis in the original *Tool Box* was a proxy for the general metaphor of momentum, and it may be instructive to compare the results of those calculations—a distribution and a logistic—to what emerges from the NELS:88/2000 involving all the rungs on the "math ladder." Tables 5, 6, and 7 do so, confining their universes only to students who were in the 12th grade in the year they were scheduled to be in the 12th grade. They do not restrict the universes to those who entered postsecondary education, let alone to those attended four-year colleges at some time. These are very inclusive groups.

Table 5 confirms other observations in these data sets: The efforts following *A Nation at Risk* to move students further ahead in high school mathematics had positive results. Higher proportions of students were reaching Algebra 2 and higher levels. Bachelor's degree attainment rates for those who moved at least one step beyond Algebra 2 in high school were stable, but declined at every level at or below Algebra 2. Table 5 provides a framework that needs to be validated in a more convincing way, and that is the purpose of table 7. Table 7 presents the results of logistic analyses and does so in odds ratios (departing from the presentation of other logistics in *The Toolbox Revisited*) to match the way in which this table was presented in the original *Tool Box* study.[26]

From the write-ups and presentations of the original *Tool Box* study a principle for high school curriculum guidance arose: "One step beyond Algebra 2 doubles the odds that you will earn a bachelor's degree." What does that mean, i.e., how does one read table 7? An odds ratio indicates that every unit of change in an independent variable (in this case, each step up the math ladder) increases the odds of X happening versus the odds of X *not* happening by Y (the odds ratio). For table 7, the data for the full model—using only highest mathematics and socioeconomic status quintile—are presented first, in bold. In both cohorts, the odds ratio says that every step up the math ladder multiplies the odds of earning a bachelor's degree by roughly 2.5 versus an odds ratio for each step up the socioeconomic status quintile measure of 1.68 (for the class of 1982) and 1.78 (for the class of 1992). These data are statistically significant ($p < .05$ or better).

---

[26]The High School Class of 1982 data in table 7 are slightly different from those in the previous presentation in *Answers in the Tool Box* (table 6, page 17) because a more accurate 12th-grade flag for that data set has been developed to match the NELS:88/2000.

Table 5. Bachelor's degree attainment rate by highest level of mathematics reached in high school by 1982 and 1992 12th-graders

	Class of 1982		Class of 1992	
Level of math	Percentage reaching this level of math	Earned bachelor's	Percentage reaching this level of math	Earned bachelor's
Calculus	5.2 (0.36)	82.1 (2.45)	9.7 (0.54)	83.3 (2.72)
Precalculus	4.8 (0.37)	75.9 (2.43)	10.8 (0.65)	74.6 (2.04)
Trigonometry	9.3 (0.51)	64.7 (2.32)	12.1 (0.81)	60.0 (3.32)
Algebra 2	24.6 (0.75)	46.4 (1.54)	30.0 (1.08)	39.3 (2.31)
Geometry	16.3 (0.65)	31.0 (1.92)	14.2 (0.87)	16.7 (1.87)
Algebra 1	21.8 (0.69)	13.4 (1.33)	16.5 (0.92)	7.0 (1.24)
Pre-algebra	18.0 (0.66)	5.4 (1.19)	6.7 (0.53)	3.9 (1.34)

NOTES: Standard errors are in parentheses. The columns for level of math may not add to 100.0 percent due to rounding.

SOURCES: National Center for Education Statistics: High School & Beyond/Sophomore Cohort (NCES 2000-194) and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The balance of the table takes each level of high school mathematics, and runs a logistic regression *for that level*, with bachelor's degree completion as the dependent variable, and SES quintile as the sole control. For the class of 1982, reaching calculus in high school increased the odds of earning a bachelor's degree by a very impressive 8.18 to 1. For the class of 1992, the odds ratio for calculus was still in the same range at 7.52 to 1. The parameter estimates for the calculus line are almost identical (2.102 versus 2.018). These are consistent results.

When one looks at the columns in table 7 for the class of 1982, one notices that the sign of the parameter estimate moves from negative to positive territory between geometry and Algebra 2, and the value of the parameter estimate rises above 1.0 between Algebra 2 and trigonometry. The odds ratio more than doubles in each of those steps, but only in the step between Algebra 2 and trigonometry (the "one step beyond") is the parameter also positive. For the class of 1992, all those relationships move up one rung on the "math ladder," principally because a higher percentage of this group (than the percentage for the class of 1982) reached precalculus or calculus while a lower percentage failed to get as far as Algebra 2. The critical boundary for math momentum now lies firmly beyond Algebra 2.

But therein lies the rub, for not everyone has the chance to reach beyond Algebra 2. Differential lack of opportunity-to-learn was a major theme in the original *Tool Box* and is just as prominent a theme in this study of a cohort a decade later. Table 6 illustrates this unhappy situation. It asks what proportion of students—by race/ethnicity and socioeconomic status quintile—attended high schools that offered key math courses beyond Algebra 2.

If mathematics momentum is as important as we contend it to be, one can see the ripples of opportunity—or lack of opportunity—that start in high school offerings. In the matter of calculus, Latino students and those from any socioeconomic status quintile other than the highest are at a distinct disadvantage with respect to the opportunity even to confront the subject. African-American students join the other groups in less access to both trigonometry and statistics. While this issue will be revisited, it deserves underscoring here: The task of providing quality secondary school curricula to *everybody*, the *paths* to AP, the *paths* to the kind of learning challenges students will face in higher education, is enormous. If the promise of *No Child Left Behind* is to be realized at the secondary school level, it is first and foremost through the equitable provision of opportunity-to-learn.

Table 6. Percentage of 1992 12th-graders who attended high schools that offered courses[a] in statistics, trigonometry, and calculus, by race/ethnicity and socioeconomic status quintile

	Percent attending high schools that offered:		
Demographic group	Calculus	Trigonometry	Statistics
Race/ethnicity			
White	58.6 (1.67)	76.9 (1.29)	27.7 (1.62)
African-American	50.8 (4.14)	67.0 (3.90)	19.5 (2.71)
Latino	44.6 (4.04)	59.9 (3.55)	18.2 (2.44)
Asian	61.3 (4.31)	71.9 (3.61)	30.1 (3.94)
Socioeonomic status quintile			
Highest quintile	71.6 (1.93)	83.1 (1.64)	34.0 (2.30)
2nd quintile	56.2 (2.32)	73.2 (2.13)	27.1 (2.01)
3rd quintile	54.1 (2.39)	71.4 (2.33)	24.9 (1.92)
4th quintile	49.3 (2.46)	70.3 (2.28)	20.3 (1.80)
Lowest quintile	43.5 (2.86)	63.7 (2.66)	18.5 (2.06)

[a] Responses are based on surveys of school administrators and math teachers of NELS students in 1990. Where the administrator did not answer the question, the math teachers did not indicate that they taught the subject, and students did not earn any credits in the subject, the calculation assumes that the school did not offer the subject. This approach may underestimate the percentage of high school offering the subjects at issue.

NOTES: Standard errors are in parentheses.

SOURCES: National Center for Education Statistics: NELS:88/94 (NCES 96-130), and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402).

Since "highest high school mathematics" is a critical sorting component in the construction of the composite variable describing the academic intensity of a student's secondary school curriculum, the ramifications of more students completing courses beyond Algebra 2, it is hypothesized, will ironically diminish (however modestly) the explanatory power of curriculum and raise the power of academic performance (class rank/GPA). To illustrate with a metaphor: If it was said that a student who reaches precalculus in high school and earns a C has a better chance of finishing a bachelor's degree than a student who gets only as far as Algebra 2 with an A-, we now have to raise the bar for performance in precalculus to at least a B- in order for the prediction to hold.

Table 7. The math ladder for 1982 and 1992 12th-graders: Odds ratios and parameter estimates of earning a bachelor's degree at each rung, controlling for socioeconomic status quintile

	1982 12th-graders				1992 12th-graders			
Variable	Odds ratio	parameter estimate	Adjusted standard error	*p*<	Odds ratio	parameter estimate	Adjusted standard error	*p*<
Highest math	**2.56**	**0.938**	**.0426**	**.01**	**2.50**	**0.918**	**.0467**	**.01**
Socioeconomic status quintile	**1.68**	**0.520**	**.0359**	**.02**	**1.78**	**0.571**	**.0449**	**.05**
By highest level of mathematics:								
Calculus	8.18	2.102	.0426	.01	7.52	2.018	.1936	.05
Precalculus	6.34	1.846	.1895	.05	4.91	1.591	.1592	.05
Trigonometry	3.76	1.352	.1267	.05	3.05	0.860	.1422	.10
Algebra 2	1.82	0.599	.0867	.05	0.89	-0.115	.1030	†
Geometry	0.63	-0.468	.1108	†	0.24	-1.434	.1812	.10
Algebra 1	0.19	-1.666	.1386	.02	0.07	-2.688	.2788	.10
Pre-algebra	0.06	-2.778	.2614	.05	0.05	-3.088	.6684	†

† Variable did not reach the minimum level of significance (p < .10) in a two-tailed test.

NOTES: For both 1982 and 1992 12th-graders, the universe consists of all students for whom highest mathematics in high school could be determined, SES data were available, and highest postsecondary credential at the end of the cohort study period was known. Root design effect for the high school class of 1982 (HS&B/So cohort)=1.59; root design effect for the high school class of 1992 (NELS:88/2000 cohort)=1.98. NELS:88/2000 goodness-of-fit data for the full model: G^2 = 8289.25; *df* = 9135; G^2/df = 0.91; percent concordant probabilities predicted = 84.3. HS&B/So cohort goodness-of-fit data for the full model: G^2 = 8371.74; *df* = 9288; G^2/df = 0.892; percent concordant probabilities predicted = 80.0.

SOURCES: High School & Beyond/Sophomore Cohort (NCES 2000-194); NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The general improvement in the high school curriculum profile of the NELS:88/2000 cohort is reflected, at least among students who subsequently attended a four-year college at any time, in diminished postsecondary remediation for that population. Table 8 sets out the distribution of what in the original *Tool Box* study was called the "remedial problem," a logical cascade that distinguishes not only the amount of remediation a student takes in college, but also the kind of remediation at issue. The logical cascade begins with remedial reading, then sorts out those students whose only remediation consists of one or two courses in mathematics, then divides the balance of the remedial population between those who required more than two remedial courses and those who required only one. The type of remediation at issue for both these residual populations is usually writing, but also includes courses devoted to basic study skills and general developmental work. If the population included students who never attended a four-year college, this distribution would look very different.[27]

Table 8. Percentage of 1982 and 1992 12th-graders who attended a four-year college at any time, by type and amount of remedial courses taken in postsecondary education

Type and amount of remediation	High School Class of 1982	High School Class of 1992
Any remedial reading	10.0 (0.56)	7.8 (0.72)
Remedial math only (1–2 courses)	14.0 (0.65)	9.8 (0.65)
More than 2 remedial courses of any kind other than reading	14.5 (0.72)	8.9 (0.64)
Only 1 remedial course other than reading	9.0 (0.50)	6.5 (0.41)
No remedial courses	52.5 (1.04)	66.9 (1.07)

NOTES: (1) Standard errors are in parentheses. (2) Columns may not add to 100.0 percent due to rounding.
SOURCES: High School & Beyond/Sophomore Cohort (NCES 2000-194) and NELS:88/2000 Postsecondary Transcript Files (2003-402).

[27]Among all NELS:88/2000 students who participated in the 1992 survey and subsequently attended *only* community colleges, 64.5 percent (s.e. = 1.88) took at least one remedial course and 43.7 percent (s.e. = 1.98) took more than one. Among those who attended only sub-baccalaureate trade schools, which often do not require remediation, 32.4 percent (s.e. = 5.89) took at least one remedial course and 21.9 percent (s.e. = 6.07) took more than one. There is a considerable difference between the norms and requirements of community colleges versus those of other sub-baccalaureate institutions in the matter of remediation, and we should not mix the two in analyses of remediation.

Summary of high school curriculum and performance variables

To remind the reader of our tools before heading into Step 1 of the logistic narrative: For the high school curriculum components of the analysis we have a composite variable called HSCURRQ, and four variables set forth in Part II above describing discrete components of HSCURRQ that we can test as proxy measures for the composite—highest level of mathematics, science momentum (a combination of highest math and core laboratory science credits), foreign language credits, and number of Advanced Placement courses. In a moment all these will appear in a correlation matrix that will provide a preview of how they might play out in multivariate analyses.

For our other performance measures, we bring forward from Part II a quintile presentation of the student's high school class rank/GPA, and a quintile presentation of senior year test score.

Academic Resources

The original *Tool Box* advanced a notion explored and developed by Karl Alexander of Johns Hopkins and his associates in numerous exemplary contributions to the research literature: A student's academic background was far more important than demographic variables such as gender, race/ethnicity, family composition, and socioeconomic status in relation to test performance (Alexander and Pallas 1984), entering higher education (Thomas, Alexander, and Eckland 1979), and, in one study, degree completion (Alexander, Riordan, Fennessey and Pallas 1982). How does one reflect a composite idea of "academic background" of students coming out of high school and into postsecondary education? The key measure of Academic Resources (or ACRES, as the original *Tool Box* variable was called in order to elicit the idea of academic cultivation), combined curricular record, academic performance (class rank/GPA) as an indicator of student effort, and an external measure in the form of performance on tests of general learned abilities. These three components, as we have seen, are set out in quintiles. To get a preliminary idea of their relative strength in relation to bachelor's degree completion and to equalize the conditions of judging degree-completion rates by performance quintiles, table 9 takes all on-time high school graduates in 1992 and indicates the percentage who completed a bachelor's degree by December 2000 by quintile of each of the three components of Academic Resources. To be included in table 9, the student's record had to contain positive values for all three components.

Table 9 offers some hints of what multivariate analysis will confirm. Compared to the distributions for academic curriculum intensity and class rank/GPA, the test score quintile variable yields weaker degree completion rates in its highest two quintiles. This is a clear sign that the test score quintile will not have as strong an association with degree completion as the curriculum and performance factors. At first glance, it looks as if class rank/GPA will be fairly dependable, but it has one minor bump. The reader is directed in table 9 to the percentage of eventual bachelor's recipients from the lowest quintile of class rank/GPA (13 percent) compared to the percent of bachelor's degree completers in the lowest quintile of test scores and academic curriculum (about 9 percent in both cases). The differences are statistically significant in a

descriptive account such as that of table 9, but how meaningful they turn out to be must await a multivariate context. In the meantime, one would posit that the class rank/GPA measure may not prove as strong as the curriculum measure.

Table 9. Percentage of on-time 1992 high school graduates who continued their education in any postsecondary institution who completed bachelor's degrees by December 2000, by quintile performance in the three component variables of Academic Resources

	Percent completing bachelor's degree				
Population	Quintiles of Academic Resources components				
	Highest	Second	Third	Fourth	Lowest
All on-time1992 high school graduates who continued to postsecondary education at any time					
Curriculum	81.7 (1.50)	60.5 (2.14)	35.5 (1.93)	23.4 (1.99)	8.7 (1.37)
Class rank/GPA	78.8 (1.47)	59.1 (2.24)	40.3 (2.11)	25.7 (2.16)	13.0 (1.94)
Senior test score	74.9 (1.72)	53.9 (1.92)	37.2 (2.16)	26.7 (2.41)	8.9 (1.31)

NOTES: Standard errors are in parentheses. Weighted N = 1.6M.

A multivariate analysis involving these variables, in fact, confirms our suspicions, and its results are presented in table 10. The model is the foundation for construction of the composite variable, Academic Resources, and is derived from ratios of the standardized beta estimates of the three high school performance indicators produced by a logistic regression with bachelor's degree attainment as the dependent variable and no controls (the logistic regression itself can be found in Appendix L, table L7). The change in these ratios between those for the High School Class of 1982 and those for the High School Class of 1992, while still leaving academic curriculum with the highest weight, narrows the gap between curriculum and performance, and lowers the strength of test scores as a component of Academic Resources. Given the differences in overall participation in the variable, i.e., the proportion of 12th-graders for whom all three components have positive values, some of the change may be an artifice of the NELS:88/2000 data set. But the principal message is one observed when commenting on the change in the distribution of students by highest level of mathematics studied in high school: The higher the average level of mathematics attainment, the more student effort, reflected in grades, will count. This theme will continue to play out when our story crosses the matriculation line into postsecondary education; and it was one of the principal points made by DesJardins, McCall, Ahlburg and Moye (2002) in their critique of the original *Tool Box* study.

When using all three measures—curriculum, class rank, and ACT test score—in a traditional linear analysis predicting first-year college grades, Pike and Saupe (2002) found curriculum to be the strongest, though their curriculum variable was dichotomous (students either meeting or not meeting the entrance specifications for a selective state university), which would naturally increase its power. Even when they introduced indirect effects of high school characteristics —control (private/public), size, mean ACT score of students, and mean proportion of students who attended the university—the parameter estimates for this curriculum variable were significantly greater than those for test scores or class rank. While *The Toolbox Revisited* is not in the business of predicting first-year grades, it is gratifying to note research that has similar respect for the propulsive power of course of study.

Table 10. Component weights of the high school Academic Resources variable for 1982 12th-graders and 1992 12th-graders who presented positive values for all three components

Components of Academic Resources	1982 12th-graders	1992 12th-graders
Academic curriculum intensity	.41	.42
Classrank/GPA	.30	.33
Senior test score	.29	.25

NOTE: Columns will add to 1.00.
SOURCES: High School & Beyond/Sophomore cohort (NCES 2000-194), and NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

A second message bears repeating from its formulation in the original *Tool Box*: Student effort in curriculum participation and performance over the three *years* of high school (grades 10 to 12) reflected in the transcript data is worth considerably more than performance on a three-*hour* test on a Saturday morning. Test scores are a natural consequence of the academic intensity of curriculum and quality of student effort reflected in grades, and the weakening position of the test score variable in the ACRES configuration for the NELS:88/2000 cohort is a natural outcome of improvements in academic curriculum participation of the post-*A Nation at Risk* era.

Correlations

Now that we have all the precollegiate variables explained and in place, the process of bringing zoom and macro lenses of multivariate analysis to bear begins. The first stage sets forth a correlation matrix of precollegiate academic variables including three outcomes: on-time high school graduation, basic postsecondary "access," and bachelor's degree completion. Table 11 presents the Pearson's *r* results. Some of these correlations are weak, suggesting that one or both of the variables in question will not add to the explanatory power of a logistic regression. On-time high school graduation, for the most noted example, is not related to anything (this was also true in the parallel correlation matrix in the original *Tool Box*). Other relationships are not surprising, e.g., Advanced Placement has almost no bearing on entering postsecondary education (96.7 percent [s.e. = 1.48] of NELS 12th-graders with any AP courses entered the postsecondary sphere, versus 75.9 percent [s.e. = 1.01] of those with no AP course work).

Table 11. Correlations of major precollege Academic Resources variables and high school graduation status, college entry, and bachelor's degree attainment by December 2000 for 1992 12th-graders

	Curriculum intensity quintile (CURRQ)	AP courses (APCRS)	Highest math (5 levels) (HMATH)	Science momentum (3 levels) (SCIMOM)	Foreign language (3 levels) (FLAN)	Class rank/GPA quintile (RANK)	Senior test quintile (TEST)	On-time HS grad, standard diploma (ONTIME)	Post-secondary entry (PSENT)
CURRQ	-----	0.368	0.777	0.774	0.645	0.572	0.581	0.167*	0.352
APCRS		-----	0.438	0.366	0.270	0.326	0.317	0.050*	0.111*
HMATH			-----	0.869	0.519	0.618	0.634	0.124*	0.301
SCIMOM				-----	0.489	0.594	0.578	0.118*	0.279
FLAN					-----	0.430	0.510	0.146*	0.338
RANK						----	0.566	0.185*	0.298
TEST							-----	0.138*	0.313
ONTIME								-----	0.168*
PSENT									-----
BACHELOR'S	0.524	0.319	0.538	0.530	0.451	0.493	0.469	0.129*	0.332

NOTE: All estimates except those noted with an asterisk are statistically significant at p<.05 or better.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

True to its position in the construction of the composite academic curriculum intensity variable (abbreviated here as CURRQ), in fact, Advanced Placement does not exhibit as strong a correlation with the composite as do the mathematics, science momentum, and foreign language components. Why? Because AP is invoked as a sorting criterion in only six of those 31 levels of academic curriculum intensity (see Appendix F), while highest mathematics is invoked in 25 levels, foreign languages in 18, and core laboratory science or all science in 30. Common sense says that we will find higher correlations of these other components with the composite curriculum variable.

But among those other components, the correlation between the highest level of mathematics and science momentum (which includes highest math in its definition) is so strong (0.869) as to set off collinearity bells. The clear message is to use only one of them in any multivariate analysis. The highest level of mathematics was dropped because the variable represents only one curricular area, whereas SCIMOM carries two. Likewise, following Pedhazur's (1982) rules of thumb for identifying potential collinearity problems from correlations, table 11 advises that if we use the high school academic curriculum index, we should not invoke either highest level of math or science momentum in the same multivariate model.

The only other observations of the correlation matrix of table 11 worth special attention are:

- When bachelor's degree completion is the reference point, the relative correlations of the curriculum, class rank/GPA, and test score variables are in roughly the same relationship observed in the more complex construction of the composite Academic Resources variable: Curriculum exhibits the strongest correlation, followed by class rank/GPA, followed by test score.
- However, when the referent variable is simply entering postsecondary education, (a) the correlation coefficients are much lower, and (b) the test score variable is slightly stronger than class rank/GPA.

The bottom line of these two conclusions: What counts for completion will be more potent than what counts for mere entrance (the "easy part," in the words of Venezia, Kirst, and Antonio, 2003).

Step 1: The First Logistics

In the commentaries and critiques of these aspects of the original *Tool Box*, two potent questions were raised:

> 1) Is a composite variable such as Academic Resources, a variable that yokes together very different types of measures (a basically qualitative curriculum index, class rank and GPA, test score), as convincing as these measures taken separately in any multivariate account of degree completion (DesJardins, McCall, Ahlburg, and Moye 2002)?
>
> 2) Unlike class rank/GPA and senior test score, the academic curriculum intensity variable is built from components, some of which are high profile in their own right, e.g., Advanced Placement and highest level of mathematics reached in high school. If we substitute the major components for the composite in an account of degree completion, will they be as convincing?

In light of these questions, three distinct ways of setting up the first step in the progression of logistic analyses that lead us to appreciate what makes a difference (and how much of a difference) in completing a bachelor's degree for students who attended a four-year college at any time were explored. The first step covers both student demographics and high school performance.

What happens to all those demographic variables in the "demography only" logistic of table 3 when these three competing approaches were tried out? With the exception of gender, race/ethnicity, and becoming a parent by age 20, the minute the high school performance variables enter, the demographic variables disappear. Taken individually, none of them—first postsecondary generation status, second language dominant, recent immigrant status, family income, number of siblings, and urbanicity of community in which the student's high school was located—meet the statistical criteria for either entering or staying in the logistic models employed in this study. But two of these variables, family income and level of parents' education, play dominant roles in the construct of socioeconomic status, which itself more than qualifies for the logistic treatment.

Repetition of a special note on the components of the high school academic curriculum intensity variable is necessary in the context of this first step in the logistic narrative. With the exception of Klopfenstein and Thomas (2005), a spate of recent reports and commentaries on the Advanced Placement program (e.g., College Board 2005) claim that the original *Tool Box* demonstrated the unique power of AP course work in explaining bachelor's degree completion. To put it gently, this is a misreading. AP is only a *component* of the academic curriculum intensity in both the original *Tool Box* and this replication. But to test the misreadings, AP was tried out as one of three variables that might serve as proxies for curriculum intensity. The other two variables tested as substitutes were a measure of momentum in science (SCIMOM) which includes elements of HIGHMATH and Carnegie units earned in both core laboratory science and all science courses, and number of Carnegie units earned in foreign languages.

So, three distinct approaches to logistic regression models were tried out for Step 1. The first, table 12, keeps the composite variable Academic Resources, and includes nothing else. The second divided Academic Resources into its three components. And the third dropped the high school academic curriculum intensity variable and replaced it with its three proxy components: science momentum, foreign language study, and AP.

Which one of these three versions should be carried forward in the stepwise analysis? In the first version (table 12), maintaining the composite of Academic Resources, only Academic Resources and socioeconomic status quintile are statistically significant (though with a p value of <0.10, SES is a barely influential presence) The Delta-p statistic says that each step up the five-quintile ladder of Academic Resources improves the probability of degree completion by about 15 percent. The Delta-p applied to socioeconomic status quintile says that for each step the probability of degree completion increases by about 7 percent. Expectations do not make a difference, and the demographic variables, while all carrying negative parameter estimates, do not meet the criteria for statistical significance either. Message: At this stage, and in this formulation, the composite representation of student learning in high school, Academic Resources, is a very persuasive construct.

The second and third versions of the Step 1 logistic can be found in Appendix G, and both are far less convincing. In the second version, Academic Resources was divided into its three components: curriculum, performance (class rank/GPA), and test score. The test score component, with a t statistic of 0.35 (far below the threshold requirement of 0.765), disqualifies this version from the logistic narrative. This result also reinforces our previous observation that when both academic curriculum participation and the quality of student effort within that curriculum (grades) improve, test scores will automatically rise and paradoxically become less important with reference to the dependent variable of degree completion.

In the third version of Step 1, of the three proxy variables for high school academic curriculum intensity, only science momentum (that combination of highest level of math and number of Carnegie units in core laboratory science) emerged as statistically significant. Neither Advanced Placement nor foreign language study reached the threshold level of significance, and, with a t statistic of 0.75, foreign language study was on the borderline of disqualification in terms of further consideration. The senior test score quintile variable did not even meet the minimum statistical criterion for entrance. Had we taken this version forward into subsequent stages of student history we would have only one proxy for high school curriculum (science momentum), and no traces of the external measurement of general learned abilities that the senior year test

score quintile conveys. At least the composite index of high school performance, Academic Resources, includes a trace of external assessment.

Table 12. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time—demographic and high school background, version 1: Using the composite variable for high school Academic Resources

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p
Intercept	-4.2762	0.6360	3.10	.05	
Academic Resources quintile	**0.6439**	**0.0662**	**4.48**	**0.01**	**0.14924**
Socioeconomic status quintile	**0.2912**	**0.0621**	**2.16**	**0.10**	**0.06749**
Education expectations	0.6272	0.2065	1.40	†	†
Race/ethnicity	-0.4093	0.1941	0.97	†	†
Gender	-0.4633	0.1485	1.44	†	†
Parenthood	-1.5757	0.4790	1.51	†	†

† Variables did not meet threshold criterion for statistical significance.
NOTES: Statistically significant variables are highlighted in bold. Standard errors adjusted by root design effect = 2.17. $G^2 = 5315.44$; $df = 4919$; $G^2/df = 1.081$; X^2 (df) =1074.9 (6); pseudo $R^2 = 0.204$; percent concordant predicted probabilities = 77.5.

Summary decision: The composite variable, Academic Resources, stays in the logistic narrative; other versions of representing high school performance fail.

THIS PAGE INTENTIONALLY LEFT BLANK

Part IV
Matriculation and Beyond: The Features of Postsecondary History

On reflection, the original *Tool Box* made a mistake in the order and boundaries of the blocks of variables entered in its analysis. Following high school background, and tracking students who ultimately attended a four-year college at any time, it jumped first to financial aid, for which the High School & Beyond/Sophomore data set contained detailed information (including unobtrusive Pell Grant files) covering the first four years of a student's postsecondary history. It then considered a configuration of attendance patterns that covered everything from the timing of entry to postsecondary education to extended aspects of attendance such as whether the student *ever* left his or her first institution of enrollment and *never* returned to that institution. Thirdly, it followed this mixture of time periods with a block of first-year performance indicators. The order and content of these three blocks of variables scrambled time and student history.

The Toolbox Revisited unscrambles that sequence so that momentum can be more clearly observed. We begin with the transition from secondary school to postsecondary matriculation, and focus on timing of entry and type of first institution. We then move on to first-year performance, the importance of which is fully justified by the research literature. Only after accounting for the first year do we confront financial aid (which, in the NELS:88/2000 data set, covers only the first two years of post-high school history, and is the weakest section of the study, by far).[28] Longer-term attendance patterns and extended performance (curriculum and trends in grades) come later, as they should.

In shaping the universe for analysis so that a full history is visible, one minor change to the boundaries will be exercised. The NELS:88/2000 cohort was scheduled to graduate from high school in the spring of 1992. Not all of them did, so the upper boundary for high school graduation will now be set at December 1996. Very few cases are affected,[29] but, as the NELS history ends in December 2000, the point of changing the upper boundary is to allow enough time for late high school graduates to build a postsecondary history.

In entering this sequence, the reader should note that the master program generating the mass of student-level variables included on the restricted NCES data sets of transcript-based files for both the HS&B/So cohort and the NELS:88/2000 was basically the same, hence, there were no

---

[28]Financial aid comes *after* first-year performance because the story line is more interested in the potential relationship of aid to completion among those who are *already enrolled*. If the topic was initial access, then the financial aid package for the first year would be part of the postsecondary entry configuration of variables. The NELS:88/2000 unfortunately does not allow us to distinguish modes of financing postsecondary education in the first year from those of the second year.

[29] Those who earned a high school diploma of any kind *after* December 1996 constituted 2.7 percent of all 1992 12th-graders (s.e. = 0.16) and 0.7 percent of all 1992 12th-graders who subsequently attended a four-year college (s.e.= 0.16).

algorithmic differences that would account for change in student behaviors such as attendance patterns and academic performance. There are minor exceptions, and these will be noted in the narrative.

Step 2: Matriculation

The research literature has long held that where one starts out in higher education has enormous consequences, particularly with reference to completing degrees (Velez 1985). The vast majority (78.7 percent; s.e. = 1.15) of the universe under study here started out in a four-year college. Do any characteristics of that first institution stand out in multivariate analysis?

Only selectivity of the first institution was admitted to the Step 2 logistic model (the fact that the institution was a four-year college was not admitted). To be sure, there are other characteristics of the first institution of attendance. But if the dichotomous "selective" variable turns out to have but modest, if any, significance in the account, it is unlikely that other stock institutional characteristics—size, control, residential/commuter ratio—will have any influence, either. The best of the institutional characteristics variables in the literature is probably Stoecker, Pascarella and Wolfle's (1988) "size." This is not a simple measure, rather a factorial scale that includes total enrollment, student/faculty ratio, and public control. However attractive the concept, institutional size rarely breaks through as a stand-alone factor in literature with large national samples because of student taste—some like it large, some like it small—and taste is too variant. All this does not mean that where one starts out is irrelevant to completion, rather it directs our attention to other features of student academic history. More to the point, with 64.8 percent (s.e. = 1.06) of NELS:88/2000 students who attended a four-year college at some time attending more than one institution, and 26 percent (s.e. = 1.01) attending more than two, the task of ascribing influence to institutional characteristics is daunting (for a discussion of this issue, see pp. 81–84).

In addition to the selectivity variable (SELECT), Step 2 includes NODELAY, a marker for direct entry to postsecondary education following high school graduation. It also includes a new variable, ACCELCRD, made possible by the construction of the NELS:88/2000 postsecondary transcript file to reflect the practice of dual-enrollment that expanded during the period the High School Class of 1992 was attending high school and that has become much more visible since then. ACCELCRD sums all college credits earned by course work prior to high school graduation, along with credits earned by examination—including AP, the College Level Examination Program (CLEP), and institutional challenge exams. Most of these credits were earned either prior to matriculation or during the first term of enrollment, though some were earned at later points in the student's undergraduate career. A previous brief analysis of this phenomenon (Adelman 2004a, pp. 55–56) suggested that acceleration might have a bearing on degree completion since the descriptive data indicated a positive relationship between the number of "acceleration" credits earned and both (a) high school academic curriculum intensity quintile and (b) selectivity of the first institution attended.

Table 13 sets forth the relationships of the variables in play at the postsecondary matriculation stage to bachelor's degree completion for students who attended a four-year college at any time. Academic Resources is still in a commanding position, and the Delta-p statistic indicates that with each step up the quintiles of Academic Resources the probability of completion increases by 12.8 percent. Socioeconomic status quintile is still significant, though again, marginally so. Of all the new variables, no delay of entry alone is statistically significant, and its Delta-p says that students who enter college directly from high school increase the probability of bachelor's degree attainment by 21.2 percent, a very persuasive marker.

Table 13. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary entry phase

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p
Intercept	-4.2124	0.6588	2.02	0.01	
Academic Resources quintile	**0.5541**	**0.0715**	**3.54**	**0.01**	**0.1283**
Socioeconomic status quintile	**0.2859**	**0.0643**	**2.03**	**0.10**	**0.0662**
Education expectations	0.3462	0.2032	0.78	†	†
No delay of entry	**0.9161**	**0.2224**	**1.88**	**0.10**	**0.2121**
Selectivity of first institution	0.4470	0.2301	0.89	†	†
Acceleration credits	0.1904	0.1196	0.73	†	†
Race	-0.4709	0.2130	1.01	†	†
Gender	-0.4627	0.1540	1.37	†	†
Parenthood	-0.9639	0.4597	0.96	†	†

[a] Variables did not meet threshold criterion for statistical significance

NOTES: Statistically significant variables are highlighted in bold. Standard errors adjusted by root design effect = 2.19. G^2 = 5060.17; *df* =4913; G^2/df = 1.030; X^2 (df) = 1101.0 (9); pseudo R^2 = 0.2127; percent concordant predicted probabilities = 78.5.

SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The selectivity of the first institution of attendance, while yielding a positive parameter estimate, does not reach the threshold of significance, and the *t* value for acceleration credits, at 0.73, falls just below the threshold for retention in the overall statistical model. The case of acceleration credits is one for which the author hoped for a better outcome, but once a rule is set, it is observed: The variable is dropped from subsequent steps. The demographic variables are

retained, but don't tell us much. And education expectations barely stays under consideration with a *t* value of 0.78. Beattie's human capital analysis (2002) downplayed education expectations as a central feature of explaining outcomes, particularly in consideration of group differences. It turns out that, even with a more sophisticated variable (our "anticipations") than the customary way of marking "aspirations," Beattie is right.

Step 3: First-Year Performance

Now that we have our universe of 1992 12th-graders in college, no matter where they started out, the most prominent initial marker of progress is a configuration of first-year academic performance indicators—and by "first year" is meant the *first calendar year* following the month in which the student first enrolled in their "true" first postsecondary institution after high school graduation.[30]

Most research on the critical first year of postsecondary education takes as its subjects students who start out in the fall term, and, by custom-and-usage, measures of retention (whether term-to-term or year-to-year) begin with fall enrollments. The transcript data, however, teach us that not all students commence postsecondary study in the fall term, and that there is a modest bias in drawing a universe based on fall term beginners only. For all 1992 12th-graders who entered postsecondary education at any time, 82.1 percent (s.e. = 0.83) started in the fall term, 5.8 percent (s.e. = 0.46) started in the summer term, and 12.1 percent (s.e. = 0.71) began in the winter or spring terms (depending on local academic calendars). While the full data on first term of entrance are presented in Appendix L, tables L8a and L8b, it is important to note here that Latino and African-American students are less likely than white students to commence postsecondary study in the fall term, and the same is true when students from lower socioeconomic status quintiles are compared with students from the highest socioeconomic status quintile. Any measure of retention or completion that confines its universe to students who began their postsecondary careers in the fall term is, to put it gently, grossly incomplete.

The cumulative number of variables qualifying for the logistic narrative increases by 50 percent when our field of vision opens out to first-year performance. The logistic model of the original *Tool Box* included three first-year performance variables, two of which were major contributors to understanding degree completion, and are carried forward: a marker for earning less than 20 credits in the first calendar year and a tag for students whose first calendar year GPA fell in the top 40 percent of the GPA distribution for that period. *The Toolbox Revisited* adds dichotomous variables indicating whether the student took any remedial courses in the first calendar year, and

---

[30]The "true" first institution of attendance excludes (1) colleges and community colleges in which the student was enrolled prior to high school graduation; (2) institutions in which the student was enrolled during the summer immediately following high school graduation and prior to fall term postsecondary entry (unless the institution was the same in both periods); and (3) "false starts," that is, cases in which the student enrolled, but then withdrew during the first term of attendance, only to enroll and complete course work in a different institution at a later point in time (in these cases, the second institution is the "true first institution"). The true first *date* of attendance is the first month of enrollment at the true first institution.

whether the student earned any credits in college-level mathematics during that period. The mathematics variable, identified as potentially potent by Astin and Astin (1993), represents a major departure in the way *The Toolbox Revisited* approaches its subject, for it introduces the potential association of *postsecondary* curriculum with degree completion (the original *Tool Box* did not raise this issue).

The first calendar year of attendance is the year in which students' preparation for postsecondary education is most sorely tested (Pascarella and Terenzini 1991), and in which both remediation and college-level mathematics study serve as indicators of that preparation. The lower division curriculum sets out course "gateways" through which students must pass in both universities (Hanson 1998) and community colleges (Boughan 2001). Every school can identify its list from high enrollment courses[31] and there is no question that most of these gateways require a direct connection to the content of high school curricula that define "readiness." Remediation stalls student momentum toward those gateways; college-level mathematics itself is a gateway.

In a different approach, American College Testing (2004) defines "college readiness" as a remediation-free postsecondary experience, and sets its benchmarks for "readiness" as

> . . . The level of achievement [based on ACT test scores] for students to have a high probability of success (a 75 percent chance of earning a course grade of C or better, a 50 percent chance of earning a B or better) in such credit-bearing college courses as English Composition, [College] Algebra, and Biology. . . (p. 1).

With all due respect to ACT, earning a C—or even a B—in college algebra is not why most students go to school. There are better ways to benchmark, starting with the Academic Resources index of total high school performance in which curriculum (including highest level of mathematics reached in secondary school) dominates and test scores do not. Instead of a grade in a single course, we then acknowledge the proportion of students who completed credits in *any* of five core college-level math courses during the first year of attendance, and, among those who became non-incidental students (i.e., earned at least an adjusted semester's worth of credits), the proportion who *ever* completed credits in those courses. In table 14, one notes right away that among those who start in community colleges and complete college-level math courses in the first year, college algebra is the dominant math course. Among those who start in four-year colleges, it is not the dominant math course, even though it ranks at the top in terms of student participation.[32]

---

[31]Hanson's (1998) list from the University of Texas at Austin ranges from Ecology, Evolution, and Society, to Introduction to U.S. and Texas Government, to General Psychology, to Calculus I and II for Science and Engineering Students.

[32]For more discrete details on credits earned in college-level mathematics, the reader is directed to table L9, Appendix L.

Ironically, the ACT study helps explain why curriculum quality emerges as more influential than test scores in building the Academic Resources composite, and justifies continuing to track curriculum (in this case, using mathematics momentum) across the matriculation line. The test scores are dependent variables that respond directly to increases in the concentration and level of study in each of the major secondary school content areas (see, e.g., Florida Department of Education 2005). The ACT study sees value-added in each step up the math curriculum ladder in terms of scores on the ACT math test. So when the dependent variable is degree completion, it is this curriculum—more than the test score—that sets the value-added tone.

Table 14. Percentage of 1992 12th-graders who earned credits in five categories of college-level mathematics courses in the first calendar year of attendance, and among non-incidental students,[a] the percentage who ever earned credits in those five categories, by type of institution first attended

College-level math category	Percent completing during first calendar year of attendance, starting in:		Among all students earning more than 10 credits, percent who ever earned credits in
	Four-year colleges	Community colleges	
College algebra	21.7 (1.01)	17.0 (1.19)	28.2 (0.92)
Precalculus	18.6 (0.85)	4.9 (0.77)	17.4 (0.69)
Calculus	17.6 (0.96)	1.6 (0.26)	16.8 (0.74)
Finite mathematics	4.6 (0.54)	0.9 (0.30)	6.4 (0.46)
Statistics, probability	5.3 (0.42)	2.3 (0.58)	19.6 (0.82)

[a] A non-incidental student is defined as one who earned more than 10 undergraduate credits.
NOTES: Standard errors are in parentheses. Weighted Ns: four-year college beginners = 1.14M; community college beginners = 789k; all who earned more than 10 credits = 1.84M.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

But does that mean that curriculum continues to have the same influence in a postsecondary setting? The issue comes up twice in the sequence of logistic models, first in table 15, which presents the results of the Step 3 logistic: first-year performance variables. What do we see?

- Earning less than 20 credits in the first calendar year following postsecondary entry is a distinct drag on degree completion. The Delta-p says that falling below the 20-credit threshold lessens the probability of completing a bachelor's degree by a *third*!

- First-year grades, a proxy for both student effort and acclimation to the academic demands of a new environment (Pascarella and Terenzini 1991), move in the opposite direction from low credits: If one's first-year GPA falls in the top two quintiles, the probability of earning a degree increases by nearly 22 percent.

Table 15. Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: First postsecondary year performance

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p

† Variables did not meet threshold criterion for statistical significance

NOTES: Statistically significant variables are highlighted in bold. Standard errors adjusted by root design effect = 1.78. $G^2 = 4411.64$; $df = 4764$; $G^2/df = 0.926$; X^2 (df) = 1516.37(12); pseudo $R^2 = 0.2893$; percent concordant predicted probabilities = 83.3.

SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

- Academic Resources and socioeconomic status are the only other statistically significant variables. The Delta-p story for socioeconomic status quintile remains at roughly the same level: Each step up the SES ladder increases the probability of degree completion for this population by 6 percent or so. The Delta-p strength for Academic Resources, however, falls from 12.8 percent in the postsecondary entry model to 7.5 percent here, a natural consequence of the introduction of other competing curricular and grade-based variables.

- The two new curricular variables for remediation and college-level mathematics produce *t* statistics that justify carrying them forward, but do not reach even a threshold statistical significance level of $p<0.10$.

In the last observation there is a surprise that calls out for explanation. The parameter estimate for remediation in the first year is positive, not negative as conventional wisdom would assume. Students in this group who took any remedial courses in the first year earned bachelor's degrees at a 48.7 percent rate (s.e. = 2.70) compared to 69.9 percent (s.e. = 1.26) of those who did not take remedial courses in the first year (not in table). That is a significant and meaningful difference from which, one might assume, remediation would be a negative. But there are other variables in this model that determine the sign and strength of the parameter estimate and its statistical significance. In a study of the academic careers of traditional-age community college students, the author found that remediation (one dichotomous variable marking any remedial reading, and one multi-level variable based on type and number of remedial courses) did not affect either transfer or (for students who did not transfer) completion of an associate degree (Adelman 2005a). Other recent research, using a very sophisticated targeting of students whose need for remediation may differ according to the school they enter, goes beyond the finding that remediation is not a drag on degree completion to demonstrate that, in terms of persistence, remediation yields decidedly positive results (Bettinger and Long 2005). Two studies do not make for a definitive conclusion, but the evidence that students who successfully pass through remedial course work gain momentum toward degrees is beginning to build.

As for the other variables in the Step 3 model, we note that NODELAY drops out of the statistically significant range with an indirect message of "once a student is in college, their performance counts more than when they arrived." In other words, the ramifications of delayed entry can be overcome, but only with the kind of considerable effort reflected in first-year credit accumulation and first-year grades. The reader will note of table 16, however, that when financial aid variables are part of the logistic model, NODELAY rises back above the significance threshold.

Step 4. Adding Financial Aid to the Equation

There is a major difference between the High School & Beyond/So and NELS:88/2000 data sets in the nature and temporal coverage of financial aid information. For the HS&B/So, an unobtrusive Pell Grant file provided data on at least one type of grant-in-aid. Student reports covered four years (1982–86) of other types of grants-in-aid, loans, and work (including, but not confined to, college work-study from all sources) while enrolled. Three dichotomous variables resulted: GRANT, LOAN, and STUWORK. In the original *Tool Box* study, based on the HS&B/So data, GRANTS and STUWORK were modestly significant contributors to the explanation of bachelor's degree completion in both the financial aid and attendance pattern steps of the model, but fell below the threshold of statistical significance as soon as first-year and extended performance factors were taken into consideration.

The NELS:88/2000 financial aid information covered the period 1992–94 only, i.e., the first two years following the modal high school graduation date for the cohort. In the initial input versions of the data in 1994 (the third NELS follow-up survey), the information was provided by students for each institution attended, and in answer to the question, simply phrased, "besides your previous savings, how are you paying for this?" The options were grants, loans, work, parents, and other forms of aid. For students who attended more than one institution during the 1992–94 period, it is thus possible for different combinations of financial aid types to be attached to the

discrete attendance cases. For our purposes, if a student reported using any one form of financial aid or support (grants, loans, work-study or campus job) at *any* institution attended, a positive entry was recorded for that *type* of financial aid or support for that student.

Table 16: Logistic account of factors associated with earning a bachelor's degree in the history of 1992 12th-graders who attended a four-year college at any time: Postsecondary financing

Variable	Parameter estimate	Adjusted standard error	*t*	*p*	Delta-p

SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

For those who ask about the importance of initial financial aid package offerings to students' choice of where to enter the postsecondary system, the NELS:88/2000 is of little help. The Beginning Postsecondary Students longitudinal study of 1995/96–2001, on the other hand, has the data elements but does not provide convincing guidance: For traditional-age students (i.e., those who began at age 20 or younger)in the BPS95/96–2001, 7 percent (s.e. = 0.7) of those who

started at four-year colleges and had applied to more than one school and 3.4 percent (s.e. = 1.6) of those who started at community colleges and had applied to more than one school said the financial aid package was the principal reason for their selection.[33] Such percentages do not merit further inquiry.

We come to Step 4 of the logistic model, then, with a weak collection of dichotomous financial aid variables, and the results must be judged in that light. As table 16 reveals, only the variable indicating whether the student received College Work-Study funds from any source or held a campus job was even admitted to the *Toolbox Revisited* model, and even then, produced a *t* statistic of 0.66, below the 0.765 required for carrying forward to the next step. Before that next step is taken, though, this narrative needs an important pause.

A Critical Pause for the Second Calendar Year

The literature on postsecondary persistence, retention, and attrition has historically taken its pauses and measures at the end of the student's first academic year. A more constructive notion for plotting the path of academic momentum on the far side of the postsecondary matriculation line may be to give students two full calendar years following the initial date of enrollment before taking their progress pulses, yet the research on this possibility has been surprisingly limited to date (see Smith 1995, and Nora, Barlow and Crisp 2005).[34] Looking backwards from the final degree completion status of our NELS:88/2000 universe to mark cumulative change to the end of the second calendar year following entry on key indicators provides a richer framework for advisement.

"Retention" and its paradoxes

No national database will support the assertion that a quarter of four-year college entrants and half of community college entrants "do not return for their second year" (Kazis 2004, p. 4). Contrary to this negative conventional wisdom, the proportion of students in the universe for this study who "persisted" to the second postsecondary year is substantial. The definition of "persistence" is active and student-centered, marks a calendar academic year as July 1 through the following June 30, and runs as follows:

> Whenever the student first enrolls and earns credits in postsecondary education (summer, fall, winter, spring) marks the first academic calendar year of their postsecondary history.
>
> If the student enrolls and earns credits at *any* time and at *any* institution during the next academic calendar year, that student has "persisted."

---

[33]National Center for Education Statistics, BPS95/96–2001 Data Analysis System; NCES 2003-173.

[34]Nora, Barlow, and Crisp (2005) offer a potentially promising analysis of a cohort at one nonselective four-year institution that is undercut somewhat by lack of data on age distribution and the fact that retention and six-year graduation rates are confined to that institution. But the authors include cumulative GPA to the second year, enrollment intensity, remediation, three core courses (what this study calls "gateways"), and a rough course withdrawal factor—all of which speak in favor of their approach.

"Retention," which puts the student in a passive role vis-a-vis a specific institution, is not the right word to describe this sequence: It's "persistence." There are two important points to underscore: (1) This definition reveals an extremely high rate of persistence, but (2) whether we talk about institutional "retention" or student "persistence," the true measure is not the fact of the event, rather the *quality* of the student's record going forward. The second academic calendar year offers students the opportunity to recapture any lack of momentum of the first. In that respect, the second year may be even more important than the first.

The unhappy paradoxes of retention rates and retention quality[35] are revealed in table 17. The universe for the table is confined to students with complete records. The proportion of students who enrolled sometime, somewhere in the second academic calendar year following entrance to postsecondary education is about 90 percent for all NELS:88/2000 postsecondary students and 96 percent for those with standard high school diplomas who subsequently attended a four-year college at some time (and in this group, just about everybody who started in community colleges). These data ought to destroy the mythologies of low first-to-second year retention (which, by the formulas most commonly applied, include only students who started full-time and in the fall semester and returned to the same school the following fall semester). This account gives students credit for persisting, and gives students who started in sub-baccalaureate trade schools credit for earning a certificate in their first year and then going on their way.[36]

However, this account also shows that, even when one confines the universe to the group being followed in *The Toolbox Revisited*, roughly one out of five entered the second year with low credit momentum, and roughly one out of six carried low first year GPAs. The overlap, too, is considerable: 40 percent of those coming out of their first year with fewer than 20 credits were also in the bottom quintile of first year GPA (not in table). Low credit momentum is also due to the number of courses taken in the first year, with 41.7 percent (s.e. = 2.46) of those who earned less than 20 credits attempting seven or fewer courses—a proxy for part-time status—versus 2 percent (s.e. = 0.27) of those who emerged with 20 or more credits. The reason for counting course attempts and not credit attempts is a by-product of the volume of remedial courses (which do not carry additive credits). Half of the low first-year credit group were tied up in remediation, versus 17 percent of those who reached or exceeded the 20-credit threshold.

---

[35]As Tinto (1987) noted, "The point of retention efforts is not merely that individuals be kept in college, but that they be retained so as to be further educated." (p. 136) Poor retention quality significantly lowers the odds of further education.

[36]The persistence rates for all 1992 12th-graders noted in this paragraph are slightly different from those previously reported (Adelman 2004a, table 3.4, p. 42), where the weight for known postsecondary participants (not the weight for students with complete records) was used.

Table 17. Percentage of 1992 12th-graders with complete postsecondary records who persisted in postsecondary education from their first calendar year of enrollment to a second calendar year, by type of institution first attended, and, of those who persisted, percentage with lagging first-year performance

Student group	Persisted	Earned one-year certificate	Did not persist	Of those who persisted, first-year performance indicators: Less than 20 credits	In lowest GPA quintile
All 12th-graders	89.7 (0.57)	0.9 (0.13)	9.4 (0.55)	33.2 (1.12)	17.4 (0.81)
Type of first institution					
Four-year college	95.2 (0.59)	0.1 (0.03)	4.7 (0.59)	15.9 (0.91)	15.2 (0.86)
Community college	84.0 (1.12)	0.4 (0.10)	15.6 (1.11)	60.7 (1.93)	21.5 (1.76)
Other sub-bacca-laureate	71.5 (3.06)	14.8 (2.52)	13.7 (2.01)	31.4 (5.17)	11.9 (2.70)
All with standard high school diploma by December 1996 who attended a four-year college at any time	95.8 (0.50)	0.1 (0.03)	4.2 (0.50)	21.9 (0.98)	15.5 (0.88)
Type of first institution					
Four-year college	95.2 (0.59)	0.1 (0.03)	4.7 (0.59)	15.9 (0.91)	15.2 (0.86)
Community college	97.9 (0.87)	2.1 (0.87)	#	44.0 (2.93)	15.7 (2.72)
Other sub-bacca-laureate	Low N[a]	Low N[a]	Low N[a]	Low N[a]	Low N[a]

Rounds to zero.
[a] Reporting standard not met.
NOTES: Standard errors are in parentheses. Row totals for the three persistence/retention columns may not add to 100.0 percent due to rounding. Weighted N for all 12th-graders with complete postsecondary records: 1.88M; for all 12th-graders with complete postsecondary records who attended a four-year college at any time and who earned a standard high school diploma by December 1996: 1.38M

Momentum at the end of the second calendar year

First-year background certainly helps explain some of what transpires in student histories by the end of the second year. Tables 18 and 19 offer a skeleton of two-year performance so that future research on the momentum hypothesis can become more sophisticated than this outing. The information is presented in two separate tables to make sure the messages are clear. The most overwhelming phenomenon to note in table 18 is that by the end of the second calendar year, those who never earned their bachelor's degree were already 25 credits behind those who did (57.4 credits earned by those who eventually received a bachelor's degree versus 31.6 for those who did not earn the degree), and for those who were behind, there was no difference between starting in a four-year college and starting in a community college. One set of "culprits" was attendance pattern related: lower percentage full time, lower percentage continuously enrolled, lower percentage getting to and beyond 20 credits in the first calendar year. All these factors decrease the probability of completion.

Credit momentum is clearly in play. For the universe of this study, the mean number of credits earned within two calendar years of the date of entry was 49.5 (s.e. = 0.51). It takes a lot of work in the second calendar year for those whose additive credit totals in the first year were less than 20 to reach that mean, and only 3.6 percent (s.e. = 1.03) did, compared with 77.6 percent (s.e. = 1.02) for those who earned 20 or more credits in the first year.

But a second set of negative vectors is clearly that of academic performance. In table 18 the spread in mean grade point average between those who eventually earned the degree and those who did not is substantial by the end of the second year, and it is not surprising that nearly one in five of those who never earned any credential had already become status dropouts (see table 19). The data remind us of a common sense fact that few analysts or commentators ever acknowledge when writing about student academic careers after high school: A measurable proportion of postsecondary students will not perform well (for GPAs of status dropouts, by timing of permanent departure from postsecondary education, see Appendix H, table H4). Higher education has standards, and some students will, in fact, be placed on academic probation or be formally dismissed for academic reasons, i.e., flunk out. These compressed signals are not as likely to be entered on official records as graduation with honors (*cum laude*, etc.). [37]

[37]Compressed signals are used to mark extremes of academic performance. The American Association of Collegiate Registrars and Admissions Officers has reported that 90 percent of its member institutions enter graduation with honors on transcripts (AACRAO 2002), and, in a 2005 survey of transcript practices , found that 70 percent enter academic probation or dismissal (www.aacrao.org/pro_development/surveys/transcript05.htm).

Table 18. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, credits earned and GPA at the end of the second year following initial enrollment in postsecondary education, and extended postsecondary attendance and performance markers, by ultimate bachelor's degree status

Selected attendance and academic performance markers	Of those who earned bachelor's		Of those who attended a four-year college, but did not earn bachelor's	
Earned 20 or more credits in first year	90.8 (0.79)		46.8 (1.88)	
Always full-time	79.3 (1.04)		37.9 (1.85)	
Continuously enrolled	93.5 (0.58)		45.7 (1.93)	
Cumulative credits and GPA two years from entry				
	average credits	mean GPA	average credits	mean GPA
All students in universe	57.4 (0.35)	2.91 (0.14)	31.6 (0.86)	2.13 (0.36)
Started in four-year college	58.8 (0.30)	2.92 (0.14)	32.1 (0.85)	2.03 (0.39)
Started in community college	49.2 (1.30)	2.84 (0.42)	31.6 (2.20)	2.37 (0.81)
If no remedial courses in first year	58.8 (0.36)	2.97 (0.14)	34.1 (1.13)	2.19 (0.32)

NOTES: Standard errors are in parentheses.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

Table 19 serves another function in the narrative, namely, to look back from the end of the longitudinal study in December 2000, and ask what percentage of postsecondary students were no longer enrolled and had not earned a credential of any kind, by timing of the gap between their first month and last month of enrollment? These students are called "status dropouts" (though they may return to postsecondary education at a later date). While the general subject of timing and reasons for departure is elaborated in Appendix H, table 19 looks at the eventual dropout population only by their status at the end of the second year of attendance. It says, very simply that:

(a) of those who never earned a credential, 23 percent became status dropouts by the end of the second year;

(b) of all those who ultimately became status dropouts over an 8.5 year period, roughly a third did so by the end of the second year;

(c) for those who dropped out in either the first or second year, GPAs were decidedly below thresholds required for degrees, but

(d) when asked why they left without a degree, less than 6 percent cited academic reasons (also see Appendix H, table H2).

Yes, the status dropout rate proves higher during the first year than the second, but by the end of the second year, the loss of academic momentum is very evident.

Table 19. Status dropout rates at the end of the second year following initial enrollment in postsecondary education of 1992 12th-graders who attended a four-year college at any time, and allied academic performance data

Timing of departure	Percent of those who never earned a degree who became status dropouts	Percent of all who ultimately became status dropouts	Mean grade point average at end of enrollment	Percentage of dropouts who said they left for academic reasons
Left postsecondary without credential, never returned:				
during first 11 months	13.1 (1.62)	19.1 (1.33)	1.68 (0.81)	5.9 (1.92)
during months 12–23 after first enrollment	10.3 (1.26)	13.3 (1.56)	1.98 (0.68)	5.6 (1.40)

NOTES: Standard errors are in parentheses. Weighted N for status dropouts in first two years = 103k.

Curriculum gateways

As significant in the panorama of student performance through the end of the second calendar year are rates of participation in specific courses identified as curricular gateways in four-year colleges by Hanson (1998) and in community colleges by Boughan (2001). The taxonomy of postsecondary courses used to code the transcripts for both the High School & Beyond/ Sophomore cohort and the NELS:88/2000 data files includes over 1100 discrete course categories[38] of which 645 were used to answer the following question: "What percentage of students in the *Toolbox Revisited* universe successfully completed credits in each course category between the month they first entered postsecondary education to a point two calendar years later?" Table 20 presents the 25 academic course categories[39] in which the highest percentage of those who eventually earned bachelor's degrees garnered credits during that time span, and for each course category, also presents matching percentages for students who attended a four-year college at any time but who did not complete a bachelor's degree.

[38]The most recent version, *Taxonomy of Postsecondary Courses Based on the National Transcript Samples, 2003*, is available at www.ed.gov/rschstat/research/pubs/empircurr/index.html.

[39]Though their enrollments were substantial, physical education activities, health information, physical conditioning, orientation, and personal development courses were excluded.

Table 20. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, course participation rates by the end of the second year following initial enrollment in postsecondary education, by ultimate degree status

	Percentage of students who earned credits by the end of the second year following initial enrollment	
Course	Earned bachelor's	Did not earn bachelor's
English composition	82.3 (1.03)	53.4 (1.40)
General psychology	61.5 (1.18)	32.2 (1.19)
General biology	35.2 (1.24)	12.4 (0.87)
Introduction to sociology	34.4 (1.12)	19.6 (1.08)
U.S. history surveys	32.6 (1.22)	14.9 (0.97)
Micro/macroeconomics	30.3 (1.14)	9.3 (0.88)
General chemistry	30.1 (1.05)	7.5 (0.74)
College algebra	26.7 (1.20)	13.9 (0.94)
U.S. government	25.3 (1.12)	10.4 (0.74)
Calculus	23.7 (1.11)	3.2 (0.43)
Precalculus	22.4 (0.95)	5.8 (0.68)
Oral communication	20.4 (1.03)	11.0 (0.72)
Introduction to philosophy	18.9 (1.05)	5.0 (0.49)
Literature: general	18.9 (1.03)	5.0 (0.56)
Spanish: intro and intermed	18.8 (1.01)	5.9 (0.61)
Western civilization	17.0 (0.93)	6.5 (0.62)
Introduction to computing[a]	15.8 (0.90)	10.9 (0.81)
Introductory accounting	15.7 (0.81)	7.2 (0.56)
Statistics (mathematics)	14.4 (0.79)	3.7 (0.68)
World civilization	12.1 (0.93)	4.0 (0.50)
General physics	12.1 (0.83)	2.3 (0.42)
Public speaking	11.2 (0.78)	6.2 (0.67)
Music appreciation	10.9 (0.84)	3.8 (0.45)
Drama criticism/history	10.7 (0.73)	2.9 (0.46)
American literature	10.3 (0.71)	1.7 (0.28)

[a] This is not "introduction to computer science."

NOTES: Standard errors are in parentheses. Weighted N for bachelor's recipients = 935k; for those who did not earn bachelor's = 513k. All row estimate comparisons are significant at $p<.05$.

SOURCE: National Center for Education Statistics: NELS:88/2000 postsecondary transcript files (NCES 2003-402 and Supplement).

This is a story that moves curriculum details forward from high school. It is empirically-driven, which is to say that the volume of course participation identifies the gateways for both community college transfer students and those who started in four-year colleges in the NELS:88/2000 cohort. Given the disparity in the number of credits accumulated by the end of the second academic calendar year between those who eventually earned the bachelor's degree and those who did not, the spreads in participation rates in these 25 course categories are not surprising. The ratios of these percentage participation rate contrasts are 7:1 in calculus, 6:1 in American literature, 5:1 in general physics, 4:1 in general chemistry, and more than 3:1 in precalculus, micro/macroeconomics, introduction to philosophy, general literature surveys, statistics, history/criticism of drama, and world civilization. These courses cover the full range of traditional lower-division distribution requirements (akin to pick one from bin A, two from bin C, etc.) in four-year colleges and general studies associate degree requirements (the bulk of the transfer curriculum) in community colleges, with the standard non-remedial English composition and college algebra the most visible gateways for the community college group (Boughan 2001).

The list of 25 discrete categories in table 20 invites aggregation and, with aggregation, the inclusion of other lower division courses that serve gateway roles. For example, there are four college-level mathematics courses among the 25, and they certainly can be aggregated as we have already done in our assessment of first-year performance. General biology is not the only introductory biology course category in the taxonomy used. Some institutions still use a zoology-botany sequence; others open the study of life forms with cellular biology; others, still, offer the option of human biology as a starting point. All of these course categories are in the taxonomy, and joining them with general biology in an aggregate allows a broader and more accurate coverage of participation in gateways to upper division course work requiring a grounding in the biological sciences.

Table 21 takes this alternative approach to describing the curricular participation of students who earned bachelor's degrees and those who did not. Table 21 uses 14 aggregate gateways, two of which are single-course categories repeated from table 20 (general psychology and micro/macroeconomics). While Appendix I provides a listing of all course categories under each aggregate, a few notes are necessary in the text:

- Humanities other than literature covers multidisciplinary introductions to the humanities, introduction to philosophy, ethics, and introduction to religious studies (usually a comparative religions survey). It does not include foreign languages.

- "Foundation business" is included for two reasons. First, business fields have historically claimed the largest percentage of majors among traditional-age bachelor's degree completers and a substantial proportion of associate degrees awarded to traditional-age students by community colleges (Adelman 2004a, tables 5.1, p. 61 and 5.4, p. 65). Secondly, prospective business majors appear to take at least one introductory gateway course in the area during their first two years (introduction to business, business law or business legal environment, and/or introductory accounting).

Table 21 displays not only the percentage of students in the bachelor's and no-bachelor's groups who earned credits in each of the 14 aggregates, but also, for those who earned any credits in the aggregates, the average number of credits earned. The reader will notice first, that the use of aggregates narrows the difference in participation rates between the two groups. For example, in the category of standard English composition, the difference in participation rates between those who eventually earned a bachelor's degree and those who didn't is 82.3 percent to 53.4 percent (table 20); but when the category becomes "college-level writing," and includes technical writing, creative writing, and advanced essay, the participation difference narrows to 84.5 percent to 68.6 percent. That is still a significant gap, though not as severe as others in table 21. For the record, the credits earned in the aggregates of table 21 account for 59 percent of all credits earned by students in this study during their first two years of postsecondary education.

Table 21. Of 1992 12th-graders who earned a standard high school diploma by December 1996 and attended a four-year college at any time, participation rates in lower-division course category aggregates and average number of credits earned in each aggregate by the end of the second year following enrollment in postsecondary education, by ultimate degree status

	Earned bachelor's degree by December 2000		Did not earn bachelor's degree by December 2000	
Course aggregate[a]	Percentage completing credits	Average credits earned	Percentage completing credits	Average credits earned
College-level writing	84.5 (0.95)	4.96 (.046)	68.6 (2.05)	4.83 (.091)
Oral communication	35.6 (1.21)	3.38 (.054)	26.2 (1.59)	3.15 (.080)
Computer-related	24.5 (1.03)	3.42 (.057)	17.2 (1.52)	3.31 (.091)
Intro biological sciences	42.1 (1.25)	5.21 (.088)	22.3 (1.53)	4.96 (.160)
Intro physical sciences	40.2 (1.15)	7.46 (.142)	15.8 (1.33)	5.79 (.223)
College-level mathematics	70.5 (1.20)	6.30 (.103)	37.5 (1.87)	5.34 (.225)
Core history	56.0 (1.27)	3.04 (.132)	34.6 (1.82)	4.13 (.099)
General psychology	61.5 (1.18)	3.33 (.030)	42.0 (1.95)	3.32 (.082)
Micro/macroeconomics	30.3 (1.14)	4.69 (.088)	13.1 (1.35)	3.86 (.112)
Humanities except literature	38.2 (1.24)	4.20 (.140)	19.1 (1.50)	3.55 (.124)
Literature	45.1 (1.30)	4.48 (.087)	19.8 (1.39)	3.84 (.144)
Core social sciences	62.6 (1.27)	4.57 (.080)	42.8 (1.85)	4.22 (.115)
Visual/graphic arts	17.3 (0.96)	5.12 (.230)	10.1 (0.98)	5.47 (.488)
Foundation business	19.9 (0.88)	5.17 (.120)	14.2 (1.41)	4.86 (.227)

[a]For a listing of courses under each aggregate, see Appendix I.

NOTES: Standard errors are in parentheses. Weighted N for those who earned bachelor's degrees: 935k; for those who did not earn bachelor's degrees: 513k.

At the same time—and with few exceptions—the differences in average credits earned in the 14 aggregates are negligible, statistically insignificant, or meaningless—or all three of the above. In other words, when students who did *not* earn a degree took courses in these aggregates, they earned credits at the same rate as those who *did* earn the degree. The problem is still that a much lower percentage of those who did not earn degrees even pass through these gateways.

What does this account of the second calendar year mean?

The sequence of steps of the logistic narrative of what matters in degree completion in *The Toolbox Revisited* moves from first-year performance (with an apostrophe of financial aid considerations) to longer-term vistas of attendance patterns and extended performance. It does not make a distinct stop at the end of the second year. And yet by the end of students' second year, a significant spread in credit generation, academic performance, and curricular participation has opened up between those who eventually completed bachelor's degrees and those who did not. An event history account appropriate to the analysis of withdrawal (e.g., DesJardins, Ahlburg, and McCall 1999) would include a measurement at this point. So as the logistic narrative heads into consideration of attendance patterns (Step 5), the reader might ask what would happen if we took first year-credits and first-year GPA and replaced those variables with *second*-year cumulative measures.

An experimental logistic was constructed in response to that hypothetical question (see Appendix L, table L10). What happened? The Delta-p statistic for the credits variable barely budged and the Delta-p for GPA declined but slightly, i.e., at first glance, it doesn't make a difference whether one uses first- or cumulative second-year measures. At the same time, though, the strength of that cumulative second-year credits substitute[40] wreaked havoc on critical variables that would otherwise be highlighted under attendance patterns, e.g., community college transfer and four-year-to-four-year transfer. As we will note in a moment, disentangling the consequences of different kinds of multi-institutional attendance is more critical to the analysis of degree completion than status at the end of the second year.

What about the gateway lower-division courses taken by the end of the second calendar year? Are any of them key portals to degrees? Beyond college-level writing (a requirement) and college-level mathematics, this is not a fair question, for the answer depends on a student's major and the requirements of the degree-granting department. Consider an English major who took general physics, the introductory micro/macroeconomics sequence, and introduction to design to satisfy distribution requirements. None of these courses (which are gateways to upper-division offerings in other fields) is a portal to completing a degree in English, though one could argue that they provide literature majors with analytic tools, reference points, and contexts that can only

[40]The variable for cumulative credits to the end of the second calendar academic year was constructed in a manner different from the dichotomous presentation of first calendar academic year credits. Cumulative credits is a categorical variable with four levels based on empirical mean credits earned and standard deviation (49 and 19 respectively): 0–29, 30–49, 50–69, and 70 or more.

enrich their interpretive powers. In fact, it could also be argued that the distribution courses gathered in the 14 aggregates of table 21 are secondary in propulsive power to the second level of course work in specific fields. For example, "everybody" takes general psychology, but those who log experimental psychology and developmental psychology are establishing a beachhead in the field, and those courses become the real portals to the degree.

One might use the number of curricular "gateways" through which students had passed by the end of their second calendar academic year as an independent variable, but the national samples with which we work in grade-cohort longitudinal studies would require consensus of academic administrators as to the curricular locations and expected threshold numbers of these gateways, and that consensus is simply not available. In fact, given the variety of presentations of postsecondary curricula across over 3,000 degree-granting institutions, that consensus may be impossible. This is ultimately a matter for local configuration and analysis (for a course cluster approach, see Zhai, Ronco, Feng, and Feiner 2001) as well for future research that would revisit the differential course work hypothesis in *postsecondary* contexts that appeared in the literature a decade ago (e.g., Ratcliff et al. 1995; Kroc, Howard, Hull, and Woodard 1997). As this pause in the narrative of *The Toolbox Revisited* demonstrates, though, those analyses cannot be profitably engaged on the basis of the student's first-year work alone. The second year is just as important.

Step 5: Postsecondary Attendance Patterns

One of the principal contributions of *Answers in the Tool Box* was to document, on a national scale, what college and community college registrars, institutional research officers, and enrollment managers had known for some time: the increasingly complex enrollment patterns of postsecondary students (Hearn 1992; Kearney, Townsend, and Kearney 1995). This complexity has steadily accelerated since the 1970s, when the first high school cohort tracked by the National Center for Education Statistics attended college (for historical comparisons of multi-institutional attendance patterns, see Appendix L, table L11). It is not merely a case of the proportion of non-incidental[41] undergraduates attending more than one school increasing from 47 to 57 percent;[42] it is more a question of *how* they attended more than one school, and in what combinations and order (Adelman 2004a, pp. 45–50).

The most critical distinction on this dynamic landscape is between transfer and multi-institutional attendance. Transfer is a migration that is formally recognized by system rules, a sequential movement from a *de jure* status in one institution to a *de jure* status at a second institution (or third, or fourth). Furthermore, the student's stay at the second institution is not a short visit. So, for example, the beginning community college student who earns 46 credits at the first school and 5 credits at the second is a multi-institutional student not a transfer student. In the context of

---

[41]"Non-incidental" means students who earned more than 10 credits in their undergraduate careers. Those who earned 10 or fewer credits do not accumulate enough history for analysis of attendance patterns.

[42]Kuh et al. (2001) found that 53.2 percent of the 32 thousand seniors who participated in the 2000 National Survey of Student Engagement had attended more than one institution.

a four-year student's history, earning 102 credits at the first school (ultimately, the degree-granting school), 21 credits at a different four-year college and 9 credits at a community college along the way, involves a situation in which *credits* are transferred, not the student. But the student who begins at a community college and earns 44 credits at the community college before attending a four-year college, then earns 55 credits from the four-year college and is still enrolled at the four-year college at the end of our tracking period is a transfer student.

Whether and how students attend more than one school may also depend on student performance in the first calendar year of enrollment. Using the five-year Beginning Postsecondary Students longitudinal study of 1989–94, McCormick (2003) demonstrated that for students who started in four-year institutions, the higher the first-year self-reported GPA, the more likely the student would stay put, whereas for students who started in two-year colleges, a higher GPA was associated with transfer, hence, with multi-institutional attendance. Do these findings hold up in a transcript-based longitudinal study such as the NELS:88/2000? Table 22 outlines the corroboration: For four-year college students, McCormick's observation is unconditionally seconded; for community college students, the difference between attending one school and two schools strongly supports the argument.

Table 22. Relationships of grade point average (GPA) in the first year of attendance to number of institutions attended by 1992 12th-graders, by type of first institution attended

Type and number of institutions	First year GPA
Started in four-year college	
One institution	2.74 (0.03)
Two institutions	2.61 (0.04)
Three or more institutions	2.53 (0.04)
Started in community college	
One institution	2.39 (0.05)
Two institutions	2.59 (0.04)
Three or more institutions	2.45 (0.09)

NOTES: Standard errors are in parentheses.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

The students in the subject universe of this study were even more mobile than the NELS:88/2000 cohort as a whole: 35.9 percent (s.e. = 1.17) attended only one institution, compared with 46.2 percent (s.e. =1.04) of all NELS students who earned any postsecondary credits. And our subjects were more likely to attend *more than two* institutions than the larger universe (25.3 percent (s.e. = 1.15) versus 20 percent (s.e. = 0.81). This higher degree of

mobility invites us to identify the deeper structures of attendance so that we can better sort the relationships between starting point, performance, migration, and degree completion.

For those students who attended more than one school, table 23 lays out some basic patterns. One should be very careful in reading them. The universe consists of the 64 percent of 1992 12th-graders who not only attended a four-year school at any time *but also* attended more than one institution as undergraduates. Institutional mobility is built into the definition. It is not surprising (in fact, it is outrightly redundant) that reverse transfers do not earn bachelor's degrees and that classic community college transfers who earn bachelor's degrees receive them from an institution other than the one first entered.

Those obvious observations aside, the most intriguing students in this configuration are what de los Santos and Wright (1990), Borden (2004), and others have called "swirlers." The basic definition of "swirling" follows a pattern first observed in the High School & Beyond/ Sophomore cohort data and was labeled "alternating sectoral enrollment." In this pattern, the student starts in either a four-year college or a community college, and moves back and forth between them for at least one cycle, accumulating more than 10 credits from both sectors in the process. In the sample isolated in table 23, 63 percent of these cycles began in four-year colleges

Table 23. Combinations of institutions attended by 1992 12th-graders who attended a four-year college at any time who also attended more than one school, and percentage earning bachelor's degrees under each combination

		Earned bachelor's degree	
Institutional combination	Percent attending	Total	From other than first institution
Two or more four-year colleges	31.8 (1.41)	82.3 (1.52)	42.3 (2.57)
Reverse transfer (four-year to community college)	9.7 (1.00)	<0.1 (0.42)	N.A.
Community college to four-year college (including classic transfers)	24.0 (1.37)	58.1 (2.97)	99.7 (0.26)
Alternating sectoral enrollment ("swirling")	15.4 (1.24)	39.1 (3.77)	69.7 (4.55)
Four-year-college-based student attending community colleges for incidental course work	14.3 (1.01)	86.4 (2.32)	24.6 (4.39)
Other combinations	4.7 (0.62)	4.6 (1.42)	45.1 (13.5)

NOTES: Standard errors are in parentheses. Column for attending may not add to 100.0 percent due to rounding. Weighted N=753k.
SOURCE: National Center for Education Statistics: NELS:88/2000 Postsecondary Transcript Files (NCES 2003-402 and Supplement).

and 37 percent in community colleges (s. e. = 3.98; not in table). Furthermore, 57.6 percent of the students engaged in just one cycle of alternating enrollment while 42.4 percent rotated through two or more alternating cycles of attendance (s.e. = 4.05; not in table). Among the major categories of students who attended more than one school in table 23 there is a broad range of bachelor's degree completion rates (39 to 86 percent), and the "swirlers" are at the low end of that range.
