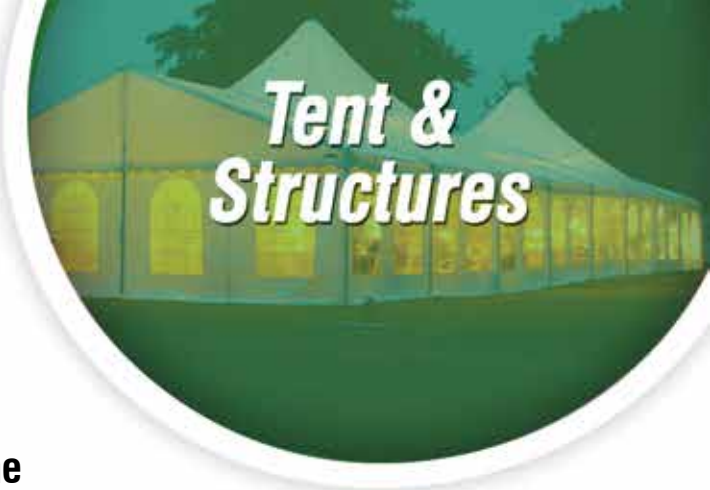
MILLER WELDMASTER®

The First Choice Globally



Spec Extreme

The Spec Extreme Wedge Welder has been designed as a “specific”, single purpose welding machine to accomplish a particular weld style. Choose machine type for either overlap, hem or keder configuration.

- Can weld PVC, PE, PP and many more
- High speed option available
- Provides hands-free, one person operation from a floor or table surface

Spec Extreme Seam Type:

Triad Extreme Shelter

With efficiency in mind, the Triad Extreme Shelter Wedge Welder provides easy adjustment for a wide variety of weld finishes. For use with various coated/ uncoated textiles, the Triad provides versatility and easy quiet operation.

- Our best selling configuration
- Can weld PVC, PE, PP and many more
- Provides hands-free, one person operation from a floor or table surface

Triad Extreme Shelter Seam Type:

T300 Extreme Flex

The T300 Extreme Flex will allow you to seam your panels together, hem the ends, and produce keder for tension sidewalls. The T300 Extreme Flex has the capability of producing a complete tent from start to finish.

- Easy operation with touch screen and 25 memory settings
- Utilizes both hot air and hot wedge technology
- Easy one person operation
- Can weld PVC, PE, PU and many more

T300 Extreme Flex Seam Type:

MILLER WELDMASTER®
The First Choice Globally

T600 Extreme Shelter

The T600 Extreme Shelter is packaged with everything you need to weld all types of shelters from tents to canopies. The T600 Extreme Shelter can be equipped with hot air or hot wedge or both. It is able to seam your panels together as well as finish the edges of your products.

- Long arm of machine allows for easy material maneuvering
- Can weld PVC, PE, PU and many more
- Programmable PLC allows you to keep welding perimeters for different materials and seam types
- Comes configured especially for the shelter manufacturer

T600 Extreme Seam Types:

Impulse Extreme

The Impulse Extreme incorporates an effective thermo-impulse seaming technology with precision controlled welding parameters that will create great looking seams.

- Welds all seam types required to make tents and shelters
- 3M, 4.5M and 6M lengths available
- Automatic hem and pocket operation
- Available in 5 different seam widths

Impulse Extreme Seam Types:

112 Extreme

The 112 Extreme is a hot air welding machine with a larger breadth of production capabilities. The 112 Extreme is built to take production and efficiency to the next level.

- Precision-controlled welding parameters
- Easy recall settings and an ergonomic design
- Built with one man operation in mind
- Welds PVC, PE, PU and many more
- Custom built to various lengths to fit any size application or printer specification
