Supported Models

There are several different hardware and software configurations available to suit a range of models. Different models require varying communication protocols so the hardware and software needed change to suit. If you can't see your model on the list below, please call as additional support is constantly being added!

Hardware/Software Interface Options

EcuTek offer 5x vehicle interface and software options depending on the vehicle, and its age and compatibility:

- Mitsubishi K Line Interface, utilising ProECU software, for early Lancer EVO models only.
- Subaru K Line Interface, utilising Pro ECU software, for early Subaru Turbo models only.
- EVI (EcuTek Vehicle Interface, covering later Subaru K Line & numerous CAN vehicles), utilising ProECU software.
- Bluetooth Connect Option 1, utilising Android or iOS apps (no Pro ECU software or mapping support).
- Bluetooth Connect Option 2, with ProECU dongle, utilising Android/iOS apps AND/OR ProECU software.

Manufacturer	Model / Year	Software	Hardware Compatibility Notes
Ford	Focus ST 2.0T MY16-on	EcoBoost	ProECU EVI Kit, BT Connect Option 2 Only

Manufacturer	Model / Year	Software	Hardware Compatibility Notes
Great Wall	V200 / V400 DiD	Great Wall	ProECU EVI Kit, BT Connect Option 2 Only
