

LinkedIn: Privacy Tips

How to Start

- Click your photo on the toolbar to open a menu

- Choose **Privacy & Settings**.
- Choose one of the three tabs of Settings options

Hide Your Competitors

By default, people who look you up will see who views your profile. This may lead people to competitors.

To change this setting, click on the **Show/Hide "Viewers of this profile also viewed"** box option.

Hide Your Connections

Your contacts can see your connections.

To hide this valuable list from competitors and others, choose **Select who can see your connections**, and pick **Only you**.

Secure Your Account

Help protect your security under the **Account** tab.

Choose **Manage security settings**, and turn on two-step verification.

Hide Your Activity

If you do not want to send out an update to your connections every time you revise your profile, hide your activity. In the Profile privacy tab, you can **Choose whether or not to share your profile edits**.
