

# Important Catalog Updates

6/7/18

As we continue to share our efforts to deliver a clear, simple brand experience with OFS and Carolina, we are updating our services, programs and processes including our specification resources.

We distilled down OFS, First Office, Loewenstein and Highmark to just OFS for a single brand experience to serve workplace, education and hospitality markets. We kept Carolina as our brand dedicated to creating solutions for the healthcare industry.

Effective Monday, June 11th we will be updating our manufacturer and catalog codes to better support our effort in simplifying your experience with OFS.

On Page 2 is a list of what is changing with the OFS Manufacturer and Catalog Codes in relation to specification resources. Depending on what spec tool platform and Dealer Business Operating System you use there will be some codes that you need to update on your end.

### **Dealer Business Operating Systems**

Any dealer business systems that use catalog data internally like Hedberg and Core, you will likely need to update your vendor codes to map to the new Carolina manufacturer code. If on Hedberg, Hedberg Application Support will send instructions to your dealership's Hedberg Administrator.

If you have any questions or run into issues please don't hesitate to reach out to us at [etools@ofs.com](mailto:etools@ofs.com)
