ANSI STANDARDS

"The American National Standards Institute (ANSI) is a private, non-profit organization that administers and coordinate the U.S. voluntary standardization and conformity assessment system." In order to maintain ANSI accreditation, a manufacturer must adhere to a set of requirements or procedures known as the "ANSI Essential Requirements." They are also responsible for writing the voluntary industry standards for OSHA compliance. OSHA does not approve products, but they provide the criteria necessary to meet ANSI standards. www.ansi.org

Goggles, Spectacles, Visors, Helmets
- ANSI Z89.1-2003
Safety Caps
- ANSI S3.19
Hearing
- ANSI Z308.1
First Aid

NVLAP STANDARDS

ASMC is also accredited under the NVLAP, a U.S. Department of Commerce program that examines test facilities, equipment, policies and procedures, calibration protocols, administrative independence, and personnel training.

NIOSH

42CFR84

- Respirators (reference page 24)

MUTCD REQUIREMENTS

MUTCD, the Manual on Uniform Traffic Control Devices defines, the standards used by traffic engineers and project managers nation-wide to install and maintain traffic control devices on streets and highways.

NCHRP-350

As required by the Federal Highway Administration (FHWA), work zone traffic control devices must be crash worthy and qualify as such according to the testing and acceptance guidelines of the National Cooperative Highway Research Program Report 350 (NCHRP-350).

PATENTS

Jackson Welding Helmets and Lenses are covered by one or more of the following U.S. patents: D310,432; D349,588; D353,692; D431,328; 5,208,688; 5,248,880; 5,252,817; 5,347,383; 5,377,032; 5,515,186; 5,519,522; 5,533,206; 5,751,258; 5,959,705; 6,067,129; 6,070,264; 6,151,711; 6,260,197; 6,341,382; and related foreign patents. Other U.S. and foreign patents pending. For additional patent numbers contact Jackson Products, Inc. American Allsafe floor signs are covered by U.S. patent D.395,334 and Canadian design registration No.83761

WARNING

Read this section completely before selecting your Jackson Safety products. Our products are tested to meet the standards of the American National Standards Institute* (ANSI) and other applicable standards. All warning statements, operating instructions and industry standards should be complied with at all times. Please read any and all warning statements attached to or associated with any Jackson Safety product prior to use. Failure to use only Jackson Safety designed, produced and tested components, attachments and replacement parts can adversely affect product performance resulting in serious injury. Installing generic parts or components voids all standards compliances, all guarantees and warranties and makes the installer solely liable for the consequences.

ANSI-ISEA 107-2004 STANDARD:

This standard specifies minimum amounts of retroreflective materials, colors and placement of materials, for items used to enhance the visibility and safety of workers. Performance Class guidelines are identified with corresponding recommendations for selection based on worker risk hazards, such as complex backgrounds, vehicular traffic and speeds encountered. See abbreviated definitions below:

Class 1 - Provides the minimum amount of required material to differentiate the wearer from the work environment.

Class 2 - Provides superior visibility for wearers by the additional coverage of the torso, and is more conspicuous than Performance Class 1.

Class 3 - While the type of garment and the size of the wearer dictate the area of clothing, it is the intention of this standard for Performance Class 3 to offer greater visibility to the wearer in both complex backgrounds and through a full range of body movements. Additionally, visibility is enhanced beyond Performance Class 2 by the enhancement of background and reflective materials to the arms and/or legs. Regardless of the area of materials used, a sleeveless garment or vest alone shall not be considered Performance Class 3.

ASMC IS PROUD TO BE AN ACTIVE MEMBER OF THE SAFETY INDUSTRY COMMUNITY.

YOUR ULTIMATE SAFETY SOLUTION

ALL EYEWEAR MEETS ANSI Z87.1+ IMPACT STANDARD

BASE CURVE:

Base curve is the measurement of a spectacle lens or curvature. The higher the base curve, the greater the sweep of the spectacle. This provides more wrap-around protection, peripheral vision and eliminates the need for side shields.

UV RADIATION BIOLOGIC EFFECTS:

To assess the effect of ultraviolet radiation (UV) on the human eye, the following photo biologic scheme divides the UV spectrum into three bands or regions:

UV-A (320-400 nm):

Unfiltered exposure to high levels (>200J/cm²) of radiation may produce severe reactions to all layers of the cornea.

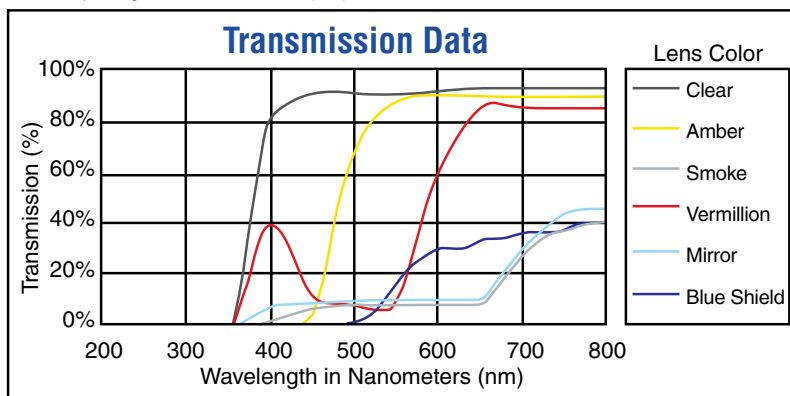

UV-B (290-320 nm):

Unfiltered exposure to twice the threshold of radiant exposure (2 x HL*) may produce permanent cataracts.

UV-C (200-290 nm):

Unfiltered exposure to twice the threshold of radiant exposure (2 x HC*) may produce photokeratitis ("welder's flash").

* L = Lens, C = Cornea. Consult the American Conference of Governmental Industrial Hygienists for the corresponding Threshold Limit Values (TLV).

ANTI-FOG LENS COATING:

We've subjected our lenses to extensive testing. We froze them. Heated them. Soaked them. Cleaned them. We put them through humidity and anti-static tests. No matter what we tried, our FogGard®Plus lenses wouldn't fog up. In fact, these tests, combined with on-the-job field evaluations, indicate the FogGard®Plus coating will eliminate lens fogging in 99% of workplace applications.

The Test	FogGard® Plus	Your Lens
Fog Test: Lens placed in 0° F temperature for 10 minutes, Pulled out to ambient temperature (68-70°F) and held over steam generated by boiling water for 30 seconds.	PASS	PASS <input type="checkbox"/> FAIL <input type="checkbox"/>
Humidity Test: Lens placed in controlled chamber (90°F, 95% R.H.) for 30 minutes.	PASS	PASS <input type="checkbox"/> FAIL <input type="checkbox"/>
Fog Test: Lens placed in 120°F temperature for 10 minutes, pulled out to ambient temperature.	PASS	PASS <input type="checkbox"/> FAIL <input type="checkbox"/>
Anti-Static Test: Lens rubbed 5 times on cotton fabric then held 1" above ash.	PASS	PASS <input type="checkbox"/> FAIL <input type="checkbox"/>
Adhesion Test: Cross hatching 10"x10 1/8" grid pattern placed on lens surfaces and coating pulled with a transparent tape to check for delamination	PASS	PASS <input type="checkbox"/> FAIL <input type="checkbox"/>
Cleaning: Coating resistant to liquid and or tissue-type lens cleaners.	PASS	PASS <input type="checkbox"/> FAIL <input type="checkbox"/>

LENS OPTIONS:

All spectacle lenses are made of polycarbonate material, which provides 99.9% UV protection

LENS COATINGS:

• **Polarized Lens:** Protection from glare reduces eye fatigue • **Hard Coat:** for scratch resistance • **Anti-Fog:** (AF) for humid environments and extreme temperature variances • **Uncoated:** for economical budgets • **Visiclear™:** Prevents flash fogging

STANDARD LENS TINTS: Tints offered on the majority of our eye wear.

- Clear Lens - All purpose no tint lens, for indoor and outdoor use, UV protection
- Smoke Lens - All purpose smoke sunglass, for outdoor use where bright sunlight can cause eyestrain and fatigue, UV protection
- Amber Lens - All purpose yellow lens, for enhanced contrast in low-light areas, excellent for inspection stations, UV protection

SPECIALTY LENS TINTS: Tints only offered on specific glasses

- Copper Blue Block/Blue Shield - filters out blue light for enhanced contrast while providing maximum protection from U.V. light.
- IR 3.0 Lens -- Protects against infrared light. Perfect for cutting and brazing applications
- IR 5.0 Lens -- Protects against infrared light. Perfect for cutting and brazing applications
- Smoke Mirror Lens - Mirrored smoke tint sunglass with outer mirror finish coating, for outdoor use where sunlight can cause eyestrain and fatigue, UV protection
- Silver Mirror Lens - Mirrored smoke tint sunglass with outer silver finish coating, for outdoor use where sunlight can cause eyestrain and fatigue, UV protection
- Blue Mirror Lens - Mirrored smoke tint sunglass with outer blue mirror finish coating, for outdoor use where sunlight can cause eyestrain and fatigue, UV protection
- Gold Mirror Lens - Mirrored smoke tint sunglass with outer gold mirror finish coating, for outdoor use where sunlight can cause eyestrain and fatigue, UV protection
- Red Mirror Lens - Mirrored smoke tint sunglass with outer red mirror finish coating, for outdoor use where sunlight can cause eyestrain and fatigue, UV protection
- Metallic Rainbow Lens - Mirrored smoke tint sunglass with outer rainbow mirror finish coating, for outdoor use where sunlight can cause eyestrain and fatigue, UV protection
- Copper Lens - Helpful in hazy or foggy conditions by enhancing contrast
- Orange Lens - Increases contrast, visibility and detail. Used mostly for cloudy or hazy days.
- Indoor/Outdoor Lens (I/O) - Helps reduce glare outdoors, while still effective in low-light areas
- Blue Lens - Reduces eyestrain and fatigue in facilities using sodium vapor lighting
- Gray Green Lens - All purpose sunglass for outdoor use where sunlight can cause eyestrain and fatigue

Actual lens color may vary according to each style

SCREEN PRINTING NOT AVAILABLE ON READER LENS

- Minimum order 72 spectacles
- In order to provide superior screening, we require camera ready artwork (black on glossy white background or film positive with sharp images)
- A charge will be invoiced for artwork that requires redrawing or typesetting and will add 10-15 business days to lead time
- 15 standard ink colors available, for other colors customer must provide PMS color information
- Delivery of pad printed spectacles will take approximately 5-7 business days upon receipt of distributor approval of final artwork
- A cliché charge reflects the cost of creating the custom cliché. Cliché remains the property of Allsafe Services & Materials
- Lens screening not available on reader lens
- For more information, call customer service at 800-428-8185, or send an email to asmc@jacksonproducts.com

MONOGOGGLE®

The history of our protective goggles started more than 30 years ago with an anti-fog model designed to protect against chemical splash. That model went on to become the staple of millions of safety programs throughout the industry, and is now synonymous with on-the-job eye protection. You can be confident about the protection our goggles provide. Since 1986, independent, non-governmental organizations have been testing our goggles against rigorous performance standards. Today our line meets ANSI Z87.1-2003 performance criteria. Allsafe-SMC's unique anti-fog coating has been scientifically formulated after a series of on-the-job evaluations eliminating lens fogging in 99% of workplace applications.

All lenses are made with optical grade polycarbonate material and provide 99.9% UV protection. All Monogoggles®, with the exception of the MRXV™ and SG, provide hassle-free adjustments and are outfitted at no extra charge.

CHEMICAL SPLASH GOGGLE

Foam Option

CHEMICAL SPLASH GOGGLE

DUST & IMPACT GOGGLE

MONOGOGGLE® 211

- Indirect ventilation
- Soft, pliable plastic nosepiece
- Pantoscopic angle improves vision
- Patented vents increases airflow
- .060 polycarbonate lens
- Standard package 36

MONOGOGGLE® 202

- Unventilated
- Protects from dust, splash & fumes
- .060 polycarbonate lens
- Standard package 36

MONOGOGGLE® 201

- Direct vent with perforated frame
- Ideal for dust & impact protection
- Separate, soft, pliable plastic nosepiece for comfortable seal
- .060 polycarbonate lens
- Standard package 36

MODEL K-10

- Pin-lock headband
- Crown and visor pivot up
- Holds 12" or 15.5" visors
- Visor not included

POLYCARBONATE

- All visors made from polycarbonate (A) material.
- Optical-grade thick polycarbonate from extruded sheets or injection molded resin provide superior secondary impact protection and increased scratch resistance
- Available molded, flat - 15.5"x 8"
- Meets ANSI Z87+

ACETATE

- High-grade cast sheet acetate protects against dust, small particles, and chemical splash
- Available aluminum bound and unbound
- Clear; light green, dark green
- Various sizes from 12" x 6" to 19.5" x 9"
- .060 acetate clear visors meets ANSI Z87+

PETG

- Provides quality impact protection at an economical price
- Ideal for any worker who needs light impact protection and is not exposed to high heat applications
- Offers good scratch resistance and distortion free optics
- Clear; Dark Green
- Meets ANSI Z87

PROPIONATE

- Injection molded, .060" thick propionate offers outstanding impact resistance and distortion-free options
- Clear, dark green
- 12" x 8" and 15-1/2" x 9"
- Meets ANSI Z87+

PAD PRINTING

We've invested in the latest technology to provide you with faster turnaround and superior images. Supplying camera-ready artwork benefits you by avoiding additional fees and longer lead times. The following formats may also be accepted: 3-1/2" diskette (PC only), e-mail, letterhead and business cards. These formats will add lead time and additional cost.

- Images are printed on surface in single or multi-colors
- Conforms to odd-shaped surfaces
- Non-metallic inks show up brilliantly
- Produces fine-line detailing
- Colors available beyond the listed standard colors

1. Camera ready/photo reproducible artwork: black on glossy white background with sharp images.
2. One imprint per color/per location required. Each color to be imprinted requires a separate die or cliché. NOTE: For multi-color logo work, artwork must have individual color separations.
3. Please specify pad printing or hot stamping.
4. Artwork that requires redrawing, i.e., non-photo reproducible, will add lead time and additional cost.

Call AllSafe-SMC Customer Service for more information 1-800-428-8185.

HOT STAMPING

- Images are embedded into surface in single or multi-colors
- Conforms to smooth surfaces
- Metallic colors show up well with this process
- Images without intricate details look best

Light Brown	Orange	Navy Blue
Lime Green	Chum Blue	Dark Green
Red	Yellow	Royal Blue
		Mustard Yellow

NOTE: Approximate colors shown above. Actual colors may vary.

Standard foil colors for hot stamping include:

White	Light Brown
Light Gray	Beige
Green	Purple
Burgundy	Light Blue
Dark Brown	Black
Dark Gray	Also available in metallic silver and metallic gold

TYPES AND CLASSES STANDARDS

Protective helmets are classified according to the specific impact and electrical performance requirements they are designed to meet. All protective helmets in accordance with this standard shall meet either Type I or Type II impact requirements. In addition, all helmets are further classified as meeting Class G, Class E, or Class C electrical requirements.

Impact Types

- Type I: Helmets intended to reduce the force of impact resulting from a blow only to the top of the head.
- Type II: Helmets intended to reduce the force of impact resulting from a blow which may be received off center or to the top of the head.

Electrical Classes

- Class G (General): Class G helmets are intended to reduce the danger of contact exposure to low voltage conductors. Test samples are proof-tested at 2200 volts (phase to ground). However, this voltage is not intended as an indication of the voltage at which the helmet protects the wearer.
- Class E (Electrical): Class E helmets are intended to reduce the danger of exposure to high voltage conductors. Test samples are proof-tested at 20,000 volts (phase to ground). However, this voltage is not intended as an indication of the voltage at which the helmet protects the wearer.
- Class C (Conductive): Class C helmets are not intended to provide protection against contact with electrical conductors.

* For further information see American National Standards Institute Standard Z89.1 for head protection available from American National Standards Institute, 11 W. 42nd, 13th floor, New York, NY 10036.

SUSPENSIONS

- **8 Point Ratchet:** Ratchet headgear provides over 30 adjustments for comfortable fit without removing headgear. One-piece nylon headband with nylon, crown straps, with two crown height adjustments, providing the ultimate degree in comfort and impact protection. Fits sizes 6 1/2 to 8".
- **6 Point Ratchet:** Ratchet headgear provides over 30 adjustments for comfortable fit without removing headgear. One-piece nylon headband with nylon, crown straps, with two crown height adjustments, while providing an additional amount of impact protection. Fits sizes 6 1/2 to 8".
- **4 Point Ratchet:** Ratchet headgear provides over 30 adjustments for comfortable fit without removing headgear. Standard headgear with woven nylon straps. Fits sizes 6 1/2 to 8".
- **4 Point Pin-Lock:** Standard headgear with woven nylon straps. Fits sizes 6 1/2 to 8".
- **4 Point Plastic:** Four-point molded plastic suspension system with cost effective protection. Fits sizes 6 1/2 to 8".

3011832 S&W SUPPRESSOR EAR MUFFS

Allsafe Services & Materials offers hearing protection and high-performance communication that's both comfortable and stylish. Earmuffs are designed in styles that can dampen both intermittent or constant high-frequency noise, while still allowing lower-frequency sounds through. Our earmuffs are designed to offer a competitive noise reduction rating (NRR), a measurement that indicates how much hearing protection a unit offers.

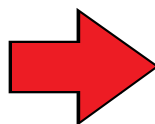

Also included in ASMC's line of hearing protection are convenient, comfortable, reusable and disposable ear plugs, as well as versatile hearing bands designed for easy usage with safety glasses, helmets or other headgear.

FALCON™ WITH ACTIVE LISTENING

- Amplifies low level sounds
- 360° micro-ear generates the most natural sound on the market
- Ultra-low profile cups allow for clearance when working in confined areas
- Ergonomically designed ear cups for maximum comfort and protection
- Operates on only two AAA batteries, providing up to 250 hours of active listening
- Ultra lightweight design - weighs only 10.5 oz
- Dual independent volume knobs for effortless control
- Custom padded headband for remarkable comfort
- Available in Smith and Wesson branded hearing protection

3011115 NRR 22 FALCON
3012563 SMITH AND WESSON ACTIVE LISTENING HEARING PROTECTOR

TECHNICAL DATA

All product packaging provides
attenuation data and NRR (Noise Reduction Rating)

The following definitions are used in the measurement of noise:

- Hertz - A unit of frequency equal to 1 cycle per second.
- Mean attenuation - The average data derived from all tested subjects.
- Standard deviation - The difference in attenuation between the tested subjects or how well the protection "fits" the individual.

OSHA Approval Rules:

1. No agency approves hearing protection.
2. OSHA approves the hearing protector only in accordance to the noise level where it is used. A protector may be approved in one noisy work area but not another because of the level or type (frequency) of noise present.
3. For complete OSHA hearing protection recommendations, see OSHA Occupational Noise Exposure Standard 29 CFR 1910.95.

JAMMER™ AM/FM STEREO RADIO

HEARING PROTECTION WITH A BUILT-IN AM/FM STEREO RADIO

Eliminates the "feel of isolation" and increase productivity by listening to your favorite music, news, weather and sports stations while maintaining protection from harmful noise. Ergonomic design for one-hand operation that's "easy to operate, even with gloves on". A single button for on/off and volume, one AM/FM switch and one for channel selection

- 25NRR over-the-head
- Powered by 2, easy to change AA batteries that provide approximately 300 hours of use
- Frequency range: AM range is 540-1700 kHz and FM range: 88-108 MHz
- High quality sound and reception
- Moisture proof compartment for electronic assembly ideal for use in plants, forestry and yard work
- 12 month manufacturer warranty

FRONTLINE WITH ACTIVE LISTENING

THE HEARING PROTECTOR WITH BUILT-IN "ACTIVE LISTENING"

EPS (Electronic Protection System) earmuffs maximize user wearing time. The Frontline ensures that sound level never exceeds 82 dBA while amplifying normal conversation, warning shouts and alarms up to 16 dBA. You are protected against harmful noise while still communicating with co-workers and aware of your surroundings.

- Digital circuitry & controls with 1 control button that makes on/off adjustments easy and extremely reliable
- Auxiliary input port for Walkman, MP3 player, CD-Player or 2-way radio
- Lifetime battery warranty and 12 month limited warranty on unit
- 4 hour power saving auto shut-off
- Auxiliary input port for Walkman, MP3 player, CD-Player or 2-way radio

LOCAL COMMUNICATIONS WITH A BUILT IN 2-WAY RADIO

Local provides crystal clear communication with high noise protection while using a built-in 2-way radio, which transmits/receives up to 2 miles.

- 462 MHZ - license free operation on free band
- 14 Channels - provides your choice of operation with numerous groups or individuals
- Active Listening - amplifies warning sounds & signals and allows communication in the vicinity without removing your hearing protection
- VOX (Voice activated) for hands free operation or PTT (Push-to-talk) transmission
- Dielectric - no exposed metal parts
- Rechargeable Batteries - save up to \$300 annually. One 8-hour charge provides 40 hours of operation with an NiMH (environmentally friendly) battery
- Connections - connects to other 2-way radios and CD/Walkman radios

Our product line consists of disposable respirators, fully assembled respirators, replacement cartridges and filters and welding respirators. They provide protection from hot, humid, dusty environments to filtering out hazards such as organic vapors, paint spray, pesticides, and multi-gas vapors. NIOSH's 42CFR84 standard for particulate respirators provides for filter efficiency and filter degradation. The efficiency levels are 95%, 99% and 99.97%, which correspond to the numerical designation 95, 99 and 100. Selection of filter efficiency depends on how much filter leakage can be accepted. Resistance to filter degradation is labeled N, R and P. N means the filter is not resistant to oil. R means the filter is oil resistant and the P means the filter is oil-proof. Selection of an N, R or P series filter depends on the presence or absence of oil particles. For environments that contain oils, N, R or P is appropriate. If P is appropriate. If the environment contains oils (or you are not sure), then an R or P filter should be used.

3005847 **28082** LARGE DISPOSABLE RESPIRATOR, NOT NIOSH

3000559 **28083** DISPOSABLE RESPIRATOR

1730 N95 PARTICULATE MASK

- Features durable, latex-free ultrasonically welded head straps to withstand tough use
- Adjustable contoured aluminum nose piece and a soft open cell foam nose cushion helps ensure proper fit
- Inner coating repels moisture that allows workers to breathe easier

1740 N95 PARTICULATE W/VALVE

- A new valve design that helps provide workers a cooler and more comfortable experience
- Easier breathing and less fatigue for your workers means better compliance

2737 N95 PARTICULATE W/ NOSE CUSHION

- Low profile design and sure-fit triangular nose cushion of soft, closed cell foam provides exceptional worker comfort
- Strong, stapled head-straps for long life and comfort

3010941 1730 N95 PARTICULATE RESPIRATOR

3010947 1740 N95 PARTICULATE RESPIRATOR W/ VALVE

3010951 2737 N95 PARTICULATE RESPIR W/NOSE CUSH

2747 N95 PARTICULATE W/VALVE & NOSE CUSHION

- Low profile design and sure-fit triangular nose cushion of soft, closed cell foam provides exceptional worker comfort
- Strong, stapled head-straps for long life and comfort
- Low pressure drop exhalation valve for easy breathing and increased worker comfort

2940 P95 PARTICULATE MASK

- NIOSH P95 approved for all oil and solid particulates
- Low pressure drop exhalation valve for easier breathing and cooler feel
- Moisture-resistant for durability and longer life
- Flame retardant outer shell

2130-B N95 FLAT FOLD PARTICULATE MASK

- Durable, ultrasonically welded non-latex head bands
- Lowest breathing resistance in class

3010952 2747 N95 PARTICULATE RESP W/ VALVE, CUSH

3010956 2940 P95 PARTICULATE RESPIRATOR W/ VALVE

3010953 N95 FLAT FOLD PARTICULATE MASK

2767 N95 PARTICULATE WELDING MASK

- Special depth filter provides a high loading capacity for metal fumes without increasing breathing resistance
- New low pressure drop exhalation valve for easy breathing and increased worker comfort
- Exclusive comfort cushioned foam nose seal

1840 R95 PARTICULATE WELDING MASK

- Special depth filter provides high loading capacity for metal fumes without increasing breathing resistance
- Heavy duty adjustable head-straps and soft, closed cell foam face seal cushion offer increased comfort and fit
- Flame retardant outer shell
- May be used in both oil and non-oil atmospheres

2040 N100 PARTICULATE MASK

- For exposure to OSHA specific particulates, (lead, cadmium, arsenic, methylenedianiline (MDA), plus metal fumes from welding, brazing and metal cutting
- Low pressure drop exhalation valve assures easy breathing and a cool, comfortable experience
- Flame retardant outer shell

BARGARD® PROTECTOR CAPS

DISC-10

- Fits rebar #3-7, 3/8" to 7/8" diameter
- Lightweight and chemical resistant
- Stands up to weather and temperature conditions
- Bright orange for visibility
- Standard package 100

A-5

- Fits rebar 3/8" to 3/4" diameter
- Also fits inside 1" ID pipe
- Standard package 200

A-10

- Fits rebar 3/8" to 1-1/4" diameter
- Also fits inside 1-3/4" ID pipe
- Standard package 100 & 300

A-20

- Fits rebar 1" to 2-1/4" diameter
- Standard package 100

3011839 DISC-10, REBAR CAP

3005547 23704 A-5, REBAR CAP

3005543 23700 A-10, REBAR CAP

3005545 23702 A-20, LIME REBAR CAP
3005546 23703 A-20, WHITE REBAR CAP

WARNING – BARGARD® caps are not designed or intended to provide impact or impalement protection. They are not a substitute for covering vertical reinforcing steel with timber, as recommended by OSHA, and are not recommended for use when protection from falls is required. For additional information on acceptable methods of guarding against impact or impalement, consult OSHA CFR TITLE 29, PART 19120, ANSI A10.9-1983, and your state regulations for specific requirements.

WARNING – DISC-10 BARGARD® PROTECTOR CAPS

DISC-10 meets the testing requirements of CAL OSHA Construction Safety Orders Section 1712 on impalement protection from concrete reinforcing bars (#3-9, 3/8 - 1-1/4") for heights up to 7-1/2" and 250 lbs. (CAL OSHA Approval Code #C-1716-AG) when properly installed. Failure to properly install DISC-10 will significantly decrease any impalement protection that may otherwise be provided by the DISC-10 and may result in injury. If positioning fins are missing or damaged, the DISC-10 must be discarded. For information on the requirements of guarding against impalement, consult OSHA CFR Title 29, Sect. 1928.701 et. seq.

For additional information on fall protection, consult OSHA CFR Title 29, Part 1926 - Safety and Health Regulations for Construction, Subpart M - Fall Protection, and your state regulations for specific requirements.

WINTER LINERS

Through cold and chill, snow, rain and sleet, Allsafe Services & Materials offers the industry's most comprehensive line of thermal winterwear to give workers full protection from the elements. Our cap liners are made from the most technologically advanced fabrics that combine the best of performance features with a number of comfort options.

TEMPERATURE RANGE CODING

45° to 32°F or 8° to 0°C

32° to 0°F or 0° to -20°C

0° to -20°F or -20° to -28°C

The above suggested ranges are to assist in choosing an appropriate liner for various climates.

165

- Lightweight protection
- 100% cotton
- Napped flannel interior
- Liner color may vary due to material availability
- Standard package 12

200

- 100% cotton, denim outer shell with black fastener straps
- Red heavyweight fleece lining
- Standard package 12

225 PLUS

- Blue quilted nylon shell with fastener straps
- Three layers of thick foam
- Standard package 12

250M

- Longer nape covers neck
- 100% cotton, denim outer shell
- Red heavy weight fleece lining
- Standard package 12

3004788 22316 SILVER/NAVY BLUE ARCTIC 2-IN-1 SPORT

IMPORTANT

All models are flame retardant treated unless otherwise noted. Flame retardant treated models meet the Federal NFPA701 Standard. Flame resistance is the fabric's ability to self extinguish when exposed to flame or thermal ignition sources. Flame resistance is meaningful only when applied to specific tests used to measure the characteristic.

16 CFR 1610, Class I: "Textiles meeting these requirements are generally accepted by the trade as having no unusual burning characteristics."
Windgard, Windjammer™ II, IV, 2-N-1 Sport meet 16 CFR 1610, Class I

NOMEX® HOOD

- 100% Nomex knitted hood
- Double-layered with 100% Nomex for extra protection around the face
- Full head & neck coverage with extra-wide collar
- Shoulder-length collar can be tucked into jacket
- Can be worn under a hard hat or welding helmet as protection against flame and electrical arcs
- Flame resistant
- Standard package 12

3000444 22402 NOMEX HOOD

Smith & Wesson®
SAFETY PRODUCTS

SMITH & WESSON SKULL CAP

- Washable flame retardant fabric
- Air cushioned, sweat absorbent insert acts as built-in sweatband
- Athletic mesh lining improves the sweat evaporation process, keeping your head cooler
- Reusable
- One size fits all with tie closer for a secure fit

ROAD WARRIOR ANSI CLASS 3

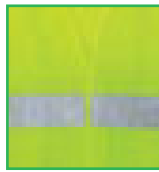

While the type of garment and size of the wearer dictate the area of clothing, it is the intention of this standard for Performance Class 3 to offer greater visibility to the wearer in both complex backgrounds and through a full range of body movements. Additionally, visibility is enhanced beyond Performance Class 2 by the enhancement of background and reflective materials to the arms and/or legs. Regardless of the area of materials used, a sleeveless garment or vest alone shall not be considered Performance Class 3. The retroreflective or combined-performance materials incorporated into the garment shall not be less than 50mm (1.97 in.) wide for Performance Class 3.

SPECIAL FEATURES

CoolDRY™ Moisture Management: CoolDRY™ works through advanced wicking technology that transports moisture away from skin to the fabric's outer surface where it quickly dries, regulating body temperature.

ThermaGARD works through a series of brushed fabrics which use air pockets to trap heat and retain energy, while wicking moisture away from the body.

All Winterwear products are Breathable, Waterproof and Windproof by use of micro-porous coatings, letting out body moisture, while defending you from the elements. Waterproof flexible tape is heat sealed over seams to ensure waterproof capability.

HydroGARD consists of polyester construction tightly woven, lightweight, breathable and waterproof. It gets wet, you stay dry.

ROADWARRIOR PERFORMANCE CLASS 2

provides superior visibility for wearers by the additional coverage of the torso, and is more conspicuous than Performance Class 1. For Performance Class 2, the retroreflective or combined-performance materials incorporated into the garment shall not be less than 35mm (1.38 in.) wide.

ANSI 2-TONE VEST

- 3 Pockets; 2 inside & 1 outside along with shoulder mic/antenna tab
- 4-Inch split fluorescent trim with 2-inch wide super bright silver retroreflective tape
- Adjustable panel-belt system for tailored fit over bulky clothes
- 2 sizes M-XL and 2X-5X
- Soft, lightweight fluorescent polyester fabric and machine washable

BARRICADE LIGHTS

SUNDOWNER®

- Available in 6V or 12V battery configuration
- 3-Way or Flashing models available
- Photocell for automatic on-off by light conditions
- Theft-resistant bolts with custom socket
- 360° lens rotation
- Improved lens for better visibility
- Meets MUTCD requirements
- ITE Certified
- Priced & packed 10 per box/sold in full boxes only

MINI-STROBE

- 3 1/2"H x 4" base diameter
- Weight: 1.5 lbs
- Micro-burst mini-strobe
- Sonic welded unit, completely sealed
- Magnet mount with 12' straight cord and plug, built-in on/off switch
- 3-year warranty, including the bulb
- 60 bright quad flashes per minute
- Blue, red and green lens can be special ordered
- Flash per minute: 60

3008863 2212279 1.5 LB MINI STROBE, PLUGS INTO LIGHTER

ROTATING LIGHT

- 7 1/4"H x 4 3/4" base diameter
- Weight: 3.8 lbs
- Amperage: 5 amps
- Lens: Polycarbonate
- Candlepower: 12,000
- Light Source: Quartz-Halogen Bulb
- Electronics: All Solid State Circuitry
- Operating Range: Outside temperature range between -50°F and 140°F
- Reflector Rotation: 150 r.p.m.
- Rotating reflector is driven by a 12 volt D.C. motor
- All units furnished with magnetic/suction pad base
- Bulb (strobe) stays stationary and the housing (reflector) moves around it
- Permanent mount light available - Call Customer Service for details

3007378 2059419 3.8 LB STROBE WITH MAGNETIC BASE, PLUGS INTO LIGHTER

LOW PROFILE STROBE

- 4 3/8"H x 4 1/4" base diameter
- Weight: 2.5 lbs
- Lens: Polycarbonate
- Light Source: Single hit Xenon Flash Tube
- Electronics: All Solid State Circuitry
- Candlepower: 90,000
- Amperage: 4 amps
- Operating Range: Outside temperature range between -40°F to +122°F
- Flash per minute: 60
- Operating range of 11-15.5 volts
- Offered only with magnetic/suction base design with cigarette lighter plug

3008104 2195380 2.5 LB LOW PROFILE STROBE WITH MAGNETIC BASE, PLUGS INTO LIGHTER

SINGLE FLASH STROBE

- 4 1/2"H x 5 1/2" base diameter
- Weight: 1.5 lbs
- 12/24 V, multi-voltage
- Rubber base for resistance to shock and vibration
- Potted circuit to protect against dirt and moisture
- Versatile and durable, featuring a low profile design
- Bulb life: 1,000 hours
- 2-year warranty (does not apply to bulb)
- Available in magnet mounted with coiled cord and cigarette plug
- Blue, red and green lens can be special ordered

3008862 2212243 1.5 LB SINGLE FLASH STROBE, PLUGS INTO LIGHTER

HEAVY DUTY STROBE

- 7 1/4"H x 4 3/4" base diameter
- Weight: 3.8 lbs
- Lens: Polycarbonate
- Light Source: Double Xenon Flash Tube
- Electronics: All Solid State Circuitry
- Candlepower: 74,000
- Amperage: 5 amps
- Flash per minute: 60
- Operating Range: Outside temperature range between -50°F and 140°F
- Virtually maintenance-free, 10-36 volt range, warning light
- All units furnished with magnetic/suction pad base or permanent mounting hardware

3007306 2057784 3.8 LB HEAVY DUTY STROBE WITH MAGNETIC BASE, PLUGS INTO LIGHTER
3007307 2057796 PERMANENT MOUNT, ATTACHES TO BATTERY
3007475 2078829 XENON REPLACEMENT BULB FOR HEAVY DUTY STROBE

Type I

Type II

PLASTIC TYPE I AND TYPE II BARRICADES*

- NCHRP-350 Certified with and without lights
- Meets MUTCD standards
- Weighs only 15 lbs
- Low profile -- Folded dimensions are 2.5"H x 24"W x 45.5"L
- 12" x 24" top panels and 8" x 24" bottom panels afford maximum panel area for reflective sheeting, logos or stenciling
- Engineer Grade or Hi Intensity reflective sheeting available
- Built-in bracket accommodates barricade light
- Optional plastic Sand Ballast Bar for additional weight
- Closed hinge feature prevents pinched fingers during placement and retrieval

Type II

PLASTIC TYPE III BARRICADES*

- NCHRP-350 Certified with and without lights
- Meets MUTCD standards
- Easy assembly -- simply lower the barricade uprights into the receivers on the base
- Modular design includes upright stand, 63" tall, and 3 - 1" x 8-1/4" deep plastic boards in 48", 72" or 96" lengths
- Lightweight and durable all-plastic construction
- Reinforced boards eliminate bowing
- Accommodates flashing barricade light
- Available with Engineer Grade or Hi Intensity sheeting, single or double sided
- Call Customer Service for lead time

Type III

Unique Dual Use:

A-Frame legs can be put together with hinge pin (included) to use as rigid sign stand

Features waffle inserts for rigidity

SANDBAGS

- Hemmed top polypropylene sandbags
- Tie cord attached
- Available in 14" x 26" or 18" x 27"
- Colors: white or orange
- Orange UV rating - 1,200 hrs
- White UV rating - 500 hrs
- 100 sandbags per bundle
- Mildew resistant

PLASTIC A-FRAME BARRICADE

- NCHRP-350 Certified
- Meets MUTCD standards
- Ideal for use as parade route barricade
- Impact-resistant polypropylene with special additive is weather resistant in extreme conditions
- Made of 30% recycled material
- Accommodates up to two 2" x 8" x 6' or 2" x 8" x 8' plastic rails, sold separately
- Standard package includes one leg - for complete set, order two legs (as shown in picture)
- Barricade can be Type I (single rail) or Type II (2 rails)
- Rails are reinforced to resist bowing in hot weather conditions
- Rails available with Engineer Grade or Hi-Intensity Grade reflective sheeting, one side or both sides
- Lightweight, easy to handle
- Reflective sheeting factory applies for maximum adhesion
- Stenciling available

TrailBoss™

Channelizer Drum

TRAIL BOSS CHANNELIZER DRUM*

- Meets NCHRP-350 requirements with or without barricade lights
- Meets or exceeds all MUTCD specifications
- Five panels available for sheeting
- Accommodates Allsafe-SMC barricade lights
- Patented handle design allows for easy pickup, even with barricade light attached
- Choice of three bases: 25 lb. and 35 lb recycled rubber or plastic snap-on for use with sandbag
- Bases incorporate a waffle pattern on bottom to eliminate 'walking' or 'creeping'
- Anti-Roll foot design
- Tapered design enables nesting for storage or transport
- Accommodates tire ring base
- Dimensions - 39.7"H x 20.5"W at base

1500 MODELS ARE CONSTRUCTED OF LINEAR LOW DENSITY POLYETHYLENE.
1510 MODELS ARE CONSTRUCTED OF HIGH DENSITY POLYETHYLENE.

GRIPTM AND GOTM

- Stackable for confined storage
- Channelizer cone utilizes less space than traditional barrels or drums
- 42" tiered cone design with the easy Grip-N-GoTM handle; 47" to the handle top
- Available in various reflective sheeting with recessed areas for protection when stacking
- Handle accommodates all Allsafe-SMC barricade lights and barrier tape products
- Low density polyethylene with UV inhibitors minimizes fading
- 100% recycled rubber bases available in 2 shapes
- Dimensions of handle: Inside 1-3/4" wide x 3-3/8" high
Outside 3-1/2" wide x 5" high
- Diameter of cone base: 9-7/8"
- Conforms to NCHRP 350 standards
- Meets MUTCD standards for nighttime use

IMPACT RECOVERY DELINEATORS

- Flexible, high-impact delineation devices are designed with energy absorbing mechanics producing a longer lasting traffic control device
- Constructed with a unique reactive spring to give with impact & rebound towards traffic.
- Withstands tested speeds up to 30 mph
- Available in solid white post with two 3" orange reflective collars, or solid orange post with two 3" white reflective collars
- Comes with a "fixed" 8" x 8" base designed for concrete median barriers or road surface application using bolts or epoxy (Post and base sold as single unit. Simple assembly required)

NOW AVAILABLE IN 28" & 36" STYLES

W SERIES: RECESSED CONES*

- Meets MUTCD standards
- One piece wide body design and construction
- Easier stacking - no pinch points with collars
- Increased durability for reflective sheeting; recessed collars resist direct wear
- Protected reflective translates into longer service life lowering overall usage costs

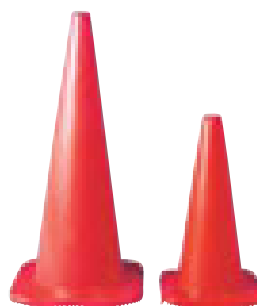

FLUORESCENT LIME*

- Wide body design
- Flow molded, dayglow fluorescent lime with white inner liner
- Differentiates work zone for added measure of safety
- Fluorescent color increases pedestrian and driver awareness

PACK AND POP COLLAPSIBLE CONE

- Meets MUTCD Standards
- Constructed of orange waterproof nylon
- Internal light has two settings: steady burn and flashing
- Cone light endures 100,000 flashes or 36 hours of steady burn
- Collapses flat for easy storage
- Replaceable lithium battery
- Sold in packs of 4 with one carrying bag included
- Carrying bag not sold separately

3012917 PACK & POP 28" INCIDENT SAFETY CONE W/LIGHT
3012918 PACK & POP 18" INCIDENT SAFETY CONE W/LIGHT

CUSTOM IMPRINTING FOR CONES

IMPRINTING AND SILK SCREENING ARE AVAILABLE FOR ALL CONES. 50 CONE MINIMUM ORDER. LEAD TIME REQUIRED. REFER TO ALLSAFE SERVICES & MATERIALS DISTRIBUTOR PRICE LIST FOR SET-UP FEES AND CHARGES. ONLY AVAILABLE IN BLACK INK.

STENCILING:

STENCILING AVAILABLE FOR BOTH THE OUTSIDE OF THE CONE AND THE INSIDE LINER. ONE-TIME STENCIL SET-UP FEE APPLIES. PER CONE ADDITIONAL CHARGE APPLIES FOR INNER AND OUTER STENCIL. STANDARD LEGENDS FOR IMPRINTED CONES REQUIRE NO SET-UP CHARGE AND INCLUDE THE FOLLOWING: WET FLOOR, CAUTION, DANGER, KEEP OUT, NO PARKING, NO SMOKING.

SILK SCREEN:

SILK SCREEN AVAILABLE ON THE OUTSIDE OF CONE ONLY. FILM CHARGE APPLIES FOR SILK SCREEN. CAMERA-READY ARTWORK MUST BE PROVIDED FOR ALL SILK SCREENS. CAMERA-READY ARTWORK IS DEFINED AS "DIGITAL FORM, 1-BIT FORMAT, TRUE BLACK AND WHITE (NO GRAYSCALE). IMAGE MUST BE THE SAME SIZE FOR THE GRAPHIC/LEGEND TO BE PRINTED."

CUSTOM IMPRINTS: AVAILABLE SPACE

SPORT CONES

- Ideal for sporting events, parking lots, festivals and temporary (off highway) traffic delineation
- Made from lightweight and durable injection-molded polyethylene
- Available in 18" with 12" x 12" base (orange also available in 12" size)
- Sold in standard packs of 40 cones for 12" and 25 cones for 18"

3001764	2027193	18" RED SPORT CONE	3001761	2008733	18" ORANGE SPORT CONE

3001767	2027222	18" WHITE SPORT CONE			

CONE STABILIZER

- Prevents cones from blowing over
- Octagon-shaped stabilizer provides easy placement over cone
- Fits all sizes and types of traffic cones
- Weight: 5 lbs.

CONE HOLDER

- Holds approximately (10) 18" cones or (5) 28" cones
- For 18" and 28" cones only
- Mounting plate is 6.75" wide
- Height of unit = 22" from bottom of mounting plate to top of holder

CONE CLIP

- Attaches barrier tape to traffic cones or delineators

3004153	0110130	9 1/2" HOLE, F & FL CONES

Cones sold separately

BARRICONE SYSTEM

- Attaches to 28" or 36" wide body traffic cones
- Offered in 4ft and 6ft lengths with a width of four inches
- Panels are manufactured of bright yellow PVC plastic with yellow steel rings inserted into each end
- Designed to nest together for compact storage
- Offered in both reflective and non-reflective. Reflective 4 ft. model utilizes two 3"x12" engineer grade barricade strips. Reflective 6ft with two 3"x24" strips. On both styles, the reflective strip offset the word "CAUTION"
- Temperature range of up to 140 degrees to -40 degrees^F

MICROLITE FLASHING CONE LIGHT

- Mounts to any style 18", 28" or 36" traffic cone
- Available in yellow case with 360° amber or red lens. Mounting bracket included. (Call customer service for ordering information for red lens)
- Features 6 volt flashing or 6 volt flashing with photo cell circuitry
- Powered by single 6V lantern battery (not included)
- Flash rate of 120 - 150 flashes per minute
- Dimensions: 8" high x 3-1/4" diameter

• Available in 5-7 business days

CUSTOM IMPRINTING FOR SIGNS

ORDER SPECIAL LEGENDS FOR YOUR ROLL-UP SIGNS FOR AN ADDITIONAL FEE. PLEASE ALLOW 2-3 WEEKS LEAD TIME FOR INITIAL ORDERS. CONTACT CUSTOMER SERVICE FOR PRICING AND ORDERING INFORMATION. FILM CHARGE AND MINIMUM ORDER QUANTITY APPLIES.

YOUR DESIGN,
YOUR LOGO,
YOUR MESSAGE,
...OUR PLEASURE.

REFLECTIVE ROLL-UP SIGNS

- Fluorescent roll-up signs that convert non-visible ultra-violet energy into visible light are being used in increasing numbers in traffic control work zones. Fluorescent materials are most effective between dusk and dawn, when natural sources of illumination are reduced. Both Reflexite super bright and 3M Diamond Grade sign materials qualify as fluorescent reflective roll-up signs.
- Silk screened legend and border

**** NOTE** Roll-up signs do not include sign ribs.
See page 26 for available options.

FLUORESCENT ORANGE SUPER BRIGHT

- Fluorescent orange color provides maximum visibility
- Fluorescent orange microprismatic sheeting increases legibility and provides higher retroreflective performance
- Features vinyl-coated nylon pocket design. Lexan pockets available upon request at additional cost

QUADRA FLEX V KITS

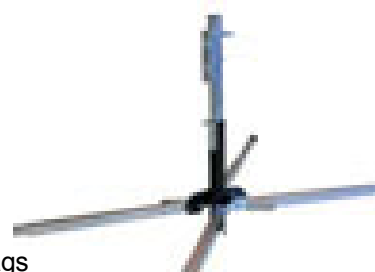

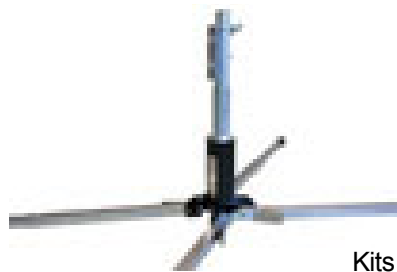

- Spring-loaded QFV sign stands display 36" and 48" roll-up panels a minimum of 14" off the ground
- Patented spring design incorporates anti-rotational device and positive stops to prevent spring over-stress
- Exclusive base, spring and leg design eliminates the need for sandbags and absorbs winds up to 50 mph
- Unique kick lock release lever allows easy leg unfolding and adjusting to uneven terrain
- Durable, lightweight and corrosion-resistant aluminum legs provide longer service life and easier handling without sacrificing strength
- Quick lock mast allows for easy panel set-up/take-down. Velcro strap-on mast prevents panel from windmilling when wrapped around vertical fiberglass rib
- Four steel L-shaped brackets reinforce legs to base. Telescoping aluminum legs provide maximum stability
- Kits include: Base, Mast, Ribs and Flags

UNISPRITM 2000 SIGN

- NCHRP-350 Certified
- Complies with MUTCD standards
- Features versatile, compact single-coil spring
- Ease of use with fast kick release system, locking legs into place when fully extended
- Displays 36" and 48" reflective roll-up signs using ScrewLock™ attachment
- All aluminum and steel construction
- Telescoping aluminum legs with two position height adjustment and anti-skid foot pads. Minimum height from ground to bottom panel: 12" (305 mm)

3006176 0101568

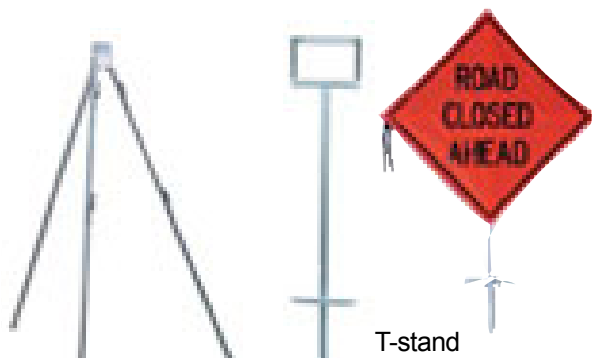

UNISPRITM 2000 SIGN STAND

EMERGENCY RESPONSE FOLD & ROLL™

- Utilizes a compact design for minimal storage space making it easy to transport to and from the work site or emergency scene
- Quick and easy set-up allows work crews and first responders to be productive and safe
- NCHRP-350 compatible and MUTCD compliant
- All aluminum and steel construction
- Sign made from fluorescent pink coral material
- Telescoping aluminum legs with two position height adjustments and anti-skid foot pads
- Kick release system for quick leg deployment
- Dual torsion springs to withstand wind resistance
- Full extension length: 51" each leg
- Open footprint: 92"x 57.5"
- Displays 48" sign with Quick-Locking Stablock™ Sign Holding System

EXPANDABLE: WORKGARD SYSTEM HINGES TOGETHER FOR LARGER WORK AREAS!

SAFETY FENCING

Jackson Safety fences are produced with a material consisting of a U.V. stabilized high density polyethylene (HDPE) with a freezing point of approximately -112F. For added convenience, every item is rolled, labeled, bagged, palletized and stretch-wrapped. We offer fences for a variety of classifications: economy safety fence, mid-grade safety fences, diamond safety fences, specialty safety fences, snow fences and erosion control fences.

GENERAL PURPOSE #9 FENCE

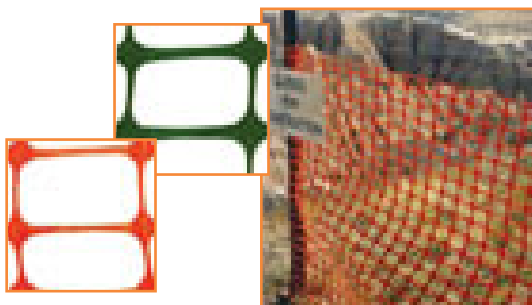

Mono-oriented safety fencing with horizontal oval openings
Size/Color: 4x100 Orange
Weight: 9 lbs
Tensile Strength: MD: 180 lbs/ft TD: 60 lbs/ft
Lower cost alternative to General Purpose #12

3014743 ORANGE 9 LBS.

GENERAL PURPOSE #12 FENCE

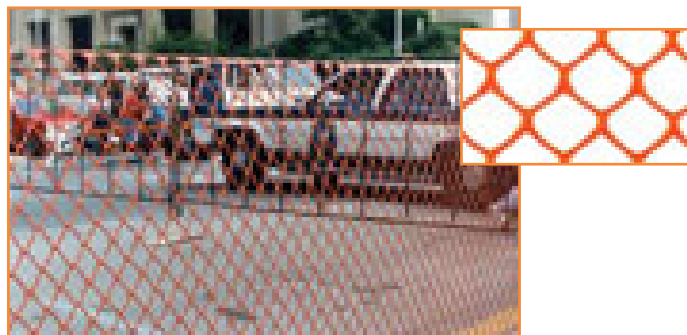

Mono-oriented safety fencing with horizontal openings
Size/Color: 4x100 Orange; 4x100 Green
Weight: 12 lbs
48 rolls per pallet
Tensile Strength: MD: 240 lbs/ft TD: 90 lbs/ft
Heavier and more visible than General Purpose #9

3007305 2057679 ORANGE 12 LBS.
3007813 2180153 GREEN 12 LBS.

LIGHT DUTY DIAMOND FENCE

Diamond mesh safety fence with smooth top and bottom
Size/Color: 4x50 Orange; 4x100 Green
Weight: 4x50/11 lbs; 4x100/23 lbs
4x50/42 rolls per pallet; 4x100/20 rolls per pallet
Tensile Strength: MD: 100 lbs/ft TD: 85 lbs/ft
Lower cost alternative to Mid Grade Diamond Fence

3014744 ORANGE 11 LBS
3014745 ORANGE 23 LBS

MID GRADE DIAMOND FENCE

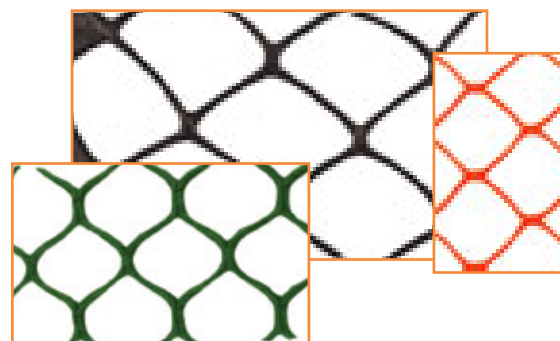

Diamond mesh safety fence with smooth top and bottom
Size/Color: 4x50 Orange; 5x50 Orange
Weight: 4x50/14 lbs; 5x50/18 lbs
30 rolls per pallet
Tensile Strength: MD: 160 lbs/ft TD: 100 lbs/ft
Heavier and more visible than Light Duty Diamond Safety Fence

3007606 2088353 ORANGE 14 LBS
3006612 0110283 ORANGE 23 LBS

HEAVY DUTY DIAMOND FENCE

Diamond mesh safety fence with smooth top and bottom
Size/Color: 4x50 Black; 4x50 Green; 4x50 Orange; 4x100 Orange
Weight: 50'/16 lbs; 100'/32 lbs
48 rolls per pallet
Tensile Strength: MD: 180 lbs/ft TD: 175 lbs/ft
Strongest and heaviest diamond mesh fence

3006609 0110245 BLACK 16 LBS
3006610 0110257 GREEN 16 LBS
3011239 ORANGE 16 LBS
3006607 0110221 ORANGE 32 LBS

ECONOMY FENCE

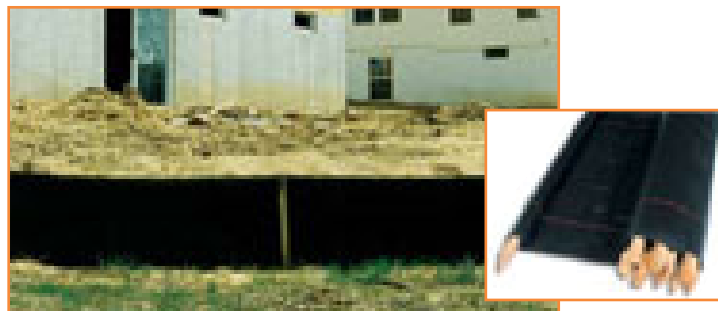

Lightweight safety fence with oval openings
Size/Color: 4x100 Orange
Weight: 8.5 lbs
48 rolls per pallet
Used as a visual barrier for crowd control and around the job sites, etc.

3014742 ORANGE 8.5 LBS

EROSION CONTROL SILT FENCE

100 ft woven silt fence with stakes
Size/Color: 3x100 Black
Weight: 22.5 lbs
25 rolls per pallet
Tensile Strength: MD: 20 lbs/ft TD: 20 lbs/ft
Woven silt fence with 42" hardwood stakes that are spaced 10 ft. apart

3007594 2087651 BLACK 22.5 LBS

SNOW AND WIND FENCE

Mono-oriented safety fence with horizontal openings
Size/Color: 4x100 Orange
Weight: 24 lbs
24 rolls per pallet
Tensile Strength: MD: 565 lbs/ft TD: 190 lbs/ft
Works as a warm-weather safety fence or in situations where both snow control and safety are needed, as well as an efficient windbreak fence

3006614 0110348 ORANGE 24 LBS

- Definition of Camera Ready/Photo Reproducible Artwork: black on glossy white background with sharp images.
- Please Note: photocopies, business cards, drawings, letterhead, decals, etc are not camera-ready and require additional charges.

SAFETY FLOOR SIGNS

The Lamba® 2x4 safety floor sign has helped a large number of corporations control their environments and dramatically reduce their liability programs. Instrumental in these efforts has been Lamba's 2x4™ safety floor sign. Featuring Lockin'Arm™ technology for easy set-up and extra stability, four-sided caution messages display clear warnings from every angle. The 25" high, bright yellow plastic signs fold up quickly and store in spaces as narrow as 3" across.

2X4 FLOOR SIGN

- 25" high, bright yellow plastic signs stand up and stay up when needed, fold up when not
- Message displayed clearly on all four sides provides clear warning from every angle
- Innovative Lockin'Arm™ lets you place sign quickly and easily, locks solidly into place to prevent collapsing
- Folds up quickly to space saving 1-1/2" thickness
