

# digital science online

for home schools

Digital science online is an annual subscription service that enables access to a comprehensive collection of visual teaching tools. Home schoolers are able to access Visual Learning Systems' vast science media library through the web.

primary edition	elementary school edition	middle school edition
58 titles, 10-12 min. over 320 30 over 500 over 250	62 titles, 14-15 min. over 500 200 over 1100 over 500	100 titles, 20 min. over 1600 1000 over 1600 over 700

## video clips

Thousands of colorful video clips bring excitement and meaning to the science classroom

## animations

Vivid 3-D animations make hard-to-teach concepts easily understandable

## images

Hundreds of annotated images add visual significance to at-home learning

## student activities

Assessments, hands-on activities, vocabulary exercises, and reading activities.

The screenshot shows a web browser window with the URL [www.visuallearningsys.com/subscription/](http://www.visuallearningsys.com/subscription/). The page title is "Classifying Animals" under the "digital science online" header. There are navigation tabs for "videos", "animations", "images", and "teachers guides". A "chapters" list on the right includes "Introduction", "What are Animals?", "Classifying Animals", "Sponges and Cnidarians", "Flatworms, Roundworms, and Segmented Worms", and "Mollusks". A central video player shows a yellow and white fish swimming near coral. Below the video are sections for "subjects" (physical, earth, life, integrated, health) and "grade level" (primary, elementary, middle school). A search bar is also visible.
