**No.** AS-1126  
**DATE** 11-15-91  
**FILE IN** Bulletin  
Binder

A new alarm OPTION has been added to the 1992 JEEP Cherokee tailgate lock. Please note that this is an OPTION not all Cherokee's will have this alarm. When servicing the tailgate lock, use lock service package 701715. The 701715 should be used to service the tailgate lock with/without the alarm. If the lock you work on has this alarm and it is damaged, please service the magnet with Part #595455 and the harness magnet sensor with Part #595454. When ordering these parts they are ordered individually. Both the magnet and harness can be snapped into place on the lock. (See diagrams below)
