

A Rare Canadian Experience

Glen Breton Rare Canadian Single Malt Whisky is the only single malt whisky produced in Canada. It is produced by the traditional copper pot stills method using only three ingredients: barley, yeast and water. It cannot be called 'Scotch' unless it is produced in Scotland, hence, *Canadian Single Malt Whisky*.

The Glenora Inn & Distillery is located on a 900 acre site in Glenville, Inverness County, Nova Scotia, Canada.

The distillery and tourism facilities were constructed during the period 1988-1990. The buildings consist of malt storage, grist mill, mash house, still house, warehouses, bottling plant, and a 6 chalet, 9 room inn hospitality facility. The structures were constructed in traditional post and beam style, similar in nature to distilleries found in Scotland. The Architect was David Forsyth.

The 2 copper pot stills were made by Forsyth & Sons of Speyside Scotland. The Glenora Distillery has an annual production licence of 250,000 litres of alcohol; its current production is 50,000 litres which can easily be expanded to 400,000 - 500,000 litres per annum with reasonable additional expenditures.

Glen Breton Rare 10 Year Old

Aged for 10 years with American Oak in traditional warehouses situated within the apple orchard of the Glenora Distillery property in Cape Breton, Nova Scotia.

Tasting notes

Nose: Orange, Spice, Chocolate, Honey, Vanilla, with hints of Tobacco Maple & Cherry
