

Charles Sturt University Medical Radiation Science clinical education day

Medical Radiation Science courses at Charles Sturt University (CSU) have undergone significant changes to their structure and delivery.

Radiography and nuclear medicine professionals interested in the CSU courses, and educators of students in radiology are invited to an information session about these changes.

The clinical education day will be held on:

Saturday 25 February, 2012 at Charles Sturt University, Wagga Wagga Campus.

The event will start at 9am, ending with dinner at 7pm.

The clinical education day will explain the changes to the course structures in our Bachelor, Master and Higher Degree by Research programs, with discussion topics about clinical supervision in medical radiation science fields.

The changes to our degrees will impact on those staff who help supervise CSU students on clinical placement. By attending the clinical education event, you will gain answers to your questions and join in debate about the future of the medical radiation science profession.

Take the opportunity to view our campus, join us for dinner and enjoy the company of others passionate about educating the next generation of medical imaging professionals.

The cost for the event is \$70 per person, including presentations from CSU academics and industry professionals, lunch and refreshments throughout the day, and a three-course dinner.

Registrations will be available from mid-January through the Australian Institute of Radiography (AIR) website: www.air.asn.au
