Table L-3. CSI Divisions 03-10, 31.60.00, 32.10.00, 32.30.00, and 32.90.00 Materials

Fill in all columns with applicable material data for all attempted credits among MR Credits 3.1 and 4-7. Exclude materials included in MR Credit 1.2: Building Reuse - Maintain Nonstructural Components and all mechanical, electrical and plumbing (MEP) components and equipment.

Note: This table will carry material data across MR Credits 3.1 and 4-7 to ensure consistent documentation; however, the summary table in this form only pertains to this credit. For more column information, hover cursor over abbreviated column heading.

Table Indicator:

* Cost, in the case of a salvaged item, can be the actual or replacement value, but must be consistent with the cost used to calculate the total materials cost for the project.

** In lieu of exact distances, estimated distances may be used. If estimated distances are used, upload the manufacturer's letter stating that the material/product was manufactured and/or extracted/recovered/harvested within 500 miles of the project site. For items that are regionally manufactured but only partially regionally extracted, split the material/product into two rows. Determine the cost for each row using the percentage by weight of each regional criterion.

*** Product cutsheets uploaded for documentation of credit compliance should include material data for all applicable credits.

Table MRc3.1-1. Credit Summary for MR Credit 3.1

Sustainable criteria value (\$)	
Total materials cost (\$)	
Value of salvaged, refurbished or reused materials as a percentage of total materials cost (%)	

Note: Must be at least 5% to document 1 point, 10% to document 2 points, 15% to document exemplary performance.
