

# LEED 2009 for Existing Buildings: Operations & Maintenance

## EA CREDIT 6: EMISSIONS REDUCTION REPORTING

All fields and uploads are required unless otherwise noted.

### ALL OPTIONS

This static sample form has been modified for offline access. All sections of the form are visible. Sample forms are for reference only.

Performance period start:

Performance period end:

Provide a summary of actions relating to energy efficiency, renewable energy, and other building energy emissions reductions measures, including reductions from the purchase of renewable energy credits, and estimate the relative contribution of each action.

Total annual greenhouse gas emissions generated:

tons of CO2 equivalent per year

Select one of the following emissions reduction strategies:

- ☐ Emissions are reported through formal participation in a third-party voluntary reporting or certification program.
- ☐ Emissions are reported independently using a technically sound reporting protocol.

### EMISSIONS REPORTED THROUGH THIRD PARTY PROGRAM

- ☐ Through formal participation in a technically sound third party voluntary reporting or certification program, greenhouse gas emissions generated by the project building and associated grounds during the performance period were tracked, recorded and reported. Those emissions include, at a minimum, greenhouse gas emissions resulting from energy consumption in the project building and on the associated grounds.

**Upload EA6-1.** Provide the formal recognition or certification documents generated by the program acknowledging successful reporting and verification under their specified protocols. The documents must identify the project building and quantify its annual greenhouse gas emissions.

Describe the independent third-party program and background information as necessary to demonstrate the technical soundness of the program. Alternatively, provide existing prepared literature on the program in the optional upload area below.

## EMISSIONS ARE REPORTED INDEPENDENTLY

- ☐ Greenhouse gas emissions generated by the project building and associated grounds during the performance period were tracked, recorded and reported in a manner corresponding with the calculation methodology of a technically sound third party voluntary reporting or certification protocol. Those emissions include, at a minimum, greenhouse gas emissions resulting from energy consumption in the project building and on the associated grounds.

**Upload EAc6-2.** Provide completed protocol tools or calculators presenting data for building energy use emissions.

Describe the data sources and describing the process of data collection for each of the protocol tools. Alternatively, provide existing prepared literature on the process in the optional upload area below.

Provide information about the third-party program using one of the following methods:

- ☐ Narrative description
- ☐ Literature upload

Describe the independent third-party program and background information as necessary to demonstrate the technical soundness of the program. Alternatively, provide existing prepared literature on the program in the optional upload area below.

**Upload EAc6-3.** Provide existing prepared literature on the independent third-party program to demonstrate the technical soundness of the program.

ADDITIONAL DETAILS

- ☐ Special circumstances preclude documentation of credit compliance with the submittal requirements outlined in this form.

**SPECIAL CIRCUMSTANCES**

Describe the circumstances limiting the project team's ability to provide the submittals required in this form. Be sure to reference what additional documentation has been provided, if any. Non-standard documentation will be considered upon its merits.

**Upload EAc6-SC.** Provide any additional documentation that supports the claim to special circumstances. (Optional)

- ☐ The project team is using an alternative compliance approach in lieu of standard submittal paths.

ALTERNATIVE COMPLIANCE PATH

Describe the alternative compliance path used by the project team. Include justification that this path meets the credit intent and requirements. Be sure to reference what additional documentation has been provided, if any. Non-standard documentation will be considered upon its merits.

**Upload EAc6-ACP.** Provide any additional documents that support the alternative compliance path approach. (Optional)
