

ARBONNE ESSENTIALS® PROTEIN SHAKE MIX

For Daily Health

Arbonne Essentials Protein Shake Mix has a perfectly balanced blend of vegan protein from pea, rice and cranberry, as well as functional fats, carbohydrates, vitamins, minerals, flax seed, and a unique botanical blend for targeted benefits. Just two scoops contain 20 grams of protein to help you feel satisfied and deliver a 100% amino acid score, an indicator of how efficiently protein will meet amino acid needs, to help support muscles.[§] Clinically tested and certified to have a low glycemic index, the shakes are low enough in sugar to avoid spikes in blood sugar levels.[§] Blend with a variety of fruits and vegetables for an extra nutrient boost. 30 servings, Chocolate #2069; Vanilla #2070; \$69 each. 🇺🇸

Talking Points

- Ideal nutritional choice to support a weight-management regimen.[§]
- Blend with ice and fruits or vegetables to create new shake recipes.
- Ask your Independent Consultant to sample the Protein Shake Mix.
- Use the Arbonne Essentials Protein Shaker Cup to mix shakes.

BENEFITS

- Certified low glycemic index
- Protein contributes to the maintenance of muscle mass[§]
- Contains easy to digest vegan protein
- Contains over 20 vitamins and minerals to support good health[§]
- Chromium contributes to the maintenance of normal blood glucose levels[§]
- Gluten-free
- Dairy-free; ideal for the lactose-intolerant
- No whey or soy proteins
- Kosher-certified
- No saturated fats, trans fats or cholesterol
- No artificial colors, flavors or sweeteners

KEY INGREDIENTS

Pea Protein

- Pea and rice protein blend delivers a complete amino acid score
- Naturally high in amino acids arginine and leucine support muscles[§]
- Unlike soy and whey, has a low allergen potential

Inner G-Plex®

- Kelp, coenzyme Q10, ginseng and alfalfa deliver trace nutrients and antioxidants, and help support energy[§]

FREQUENTLY ASKED QUESTIONS

- Q. Is the sugar content in the Protein Shakes considered high?**
- A.** Clinically tested by a third-party certifier and qualified as having a low glycemic index, the products have minimal impact on blood sugar level. They are low enough in sugar to help prevent blood sugar level spikes and “crashes,” helping retain a healthy blood sugar level. This is especially important for those who need to avoid high-sugar products or are following a weight-management regimen.
- Q. What are the benefits of consuming a high-protein product?**
- A.** Amino acids, including some branched-chain amino acids, are the basic building blocks of proteins, which help support muscle, lean muscle mass, and even bone health. The plant-based blend of pea and rice proteins is comparable to animal-based proteins in providing a 100% amino acid score to efficiently meet a person’s amino acid need. Dairy and soy proteins are considered common allergens, and soy protein can be a source of unwanted phytoestrogenic activity. Those following a vegan diet may need a high-protein product to get the necessary amount of protein, as fruits and vegetables are low in protein.
- Q. Why is there an extra gram of insoluble fiber in the Chocolate Protein Shakes?**
- A.** Insoluble fiber is inherent (naturally occurring) in cocoa powder; this being the case, it contributes an extra gram of insoluble fiber whereas there is none in the Vanilla Shake. We are required to label the amount of fiber in each product, even if the fiber is from other ingredients in the formula and not necessarily added.
