ASPPH SENIOR LEADERSHIP

Allison J. Foster, MBA, CAE
Acting President and CEO

Rita M. Kelliher, MSPH
Senior Director of Education, Practice, and Data

Anthony J. (Tony) Mazzaschi
Senior Director of Policy and Research

Eduardo A. Ruiz
Senior Director of Information Technology
I am honored to have been able to serve as chair of the ASPPH board of directors over the last two years. This has been a transformative period for ASPPH, which has settled into its new identity as an association for public health education. Together, we have navigated a complex legislative environment, vigorously engaged undergraduate public health education, and facilitated the release of new CEPH criteria which will allow for more flexibility in the education of the next generation of public health professionals.

My most distinct pleasure has been the opportunity to work closely with colleague deans and program directors who have consistently been collegial in their willingness to work together for the good of the organization and inspirational in their passion for our common cause. Thank you to all of you for your collegial support and for all that you do for ASPPH and for public health.

I am grateful for the opportunity to have worked with Harrison Spencer who consistently demonstrated deep compassion, wisdom, fairness, and unwavering commitment to the core values of public health. Through his ability to create a culture of excellence and member service, he left the association on a solid foundation to continue its work in advancing excellence in public health education, research, and service.

In March, I will turn the chair of the ASPPH board of directors to the very capable hands of Donna Petersen, dean of the University of South Florida College of Public Health. I know she will open a new chapter for ASPPH and I look forward to a bright future.

Thank you. It has been an honor and highlight of my professional career to serve as your Board Chair.

With best wishes,

Gary E. Raskob, PhD
Chair

2016 will be remembered as one of great loss but also one of great hope. Harrison Spencer was an inspiration to members, staff, and friends of ASPPH. His vision and passion for ASPPH has had a lasting impact and guides us in all we do. Since his passing, we have focused on projects that were of particular importance to him. He would be proud of how our members and staff have shown up not only for each other, but for the Association and academic public health by carrying out the work of ASPPH.

As Harrison often said, ASPPH works best when its members engage thoughtfully. 2016 was an example of how well this philosophy can work. Public health education is changing at an unprecedented pace. There has been tremendous growth in graduate and undergraduate public health education, with a common mission - to seek opportunities to innovate and evolve to meet the needs of the public health workforce. We have also seen a new trend, as public health graduates increasingly find employment in non-traditional public health settings. ASPPH has fostered a meaningful community for our members to address these changes.

This is a wonderful time for a new leader to take the helm at ASPPH. While we have ambitious plans and many challenges ahead of us, we are primed to move public health education forward.

Allison J. Foster, MBA, CAE
Acting President and CEO

Allison J. Foster, MBA, CAE
Acting President and CEO
Dr. Harrison Spencer, our boss, colleague, and friend, passed away on August 10. Harrison was a humble man who made a significant impact on the lives of countless people. His death is a tremendous loss to us and to the world.

In July 2000, Dr. Spencer assumed the newly created position of president and CEO of the Association of Schools of Public Health (ASPH). In August 2013, he led the transformation of ASPH to a new organization, the Association of Schools and Programs of Public Health (ASPPH). His intellect, passion, leadership, andcompelling ethical values were treasured by all in the ASPPH community.

Nationally and internationally recognized for his clinical public health work, research endeavors in infectious disease prevention and control, and authorship of more than 100 publications, Dr. Spencer was uniquely able to speak on both practice and research perspectives. His combined eight years as a dean of two prestigious schools gave him insight into university politics, education, and academic public health.

A member of many committees, boards, and professional societies, including the National Academy of Medicine, Dr. Spencer was most proud of co-founding the Interprofessional Education Collaborative (IPEC) with his medical, nursing, pharmacy, and dentistry peers in 2009, where he had served as chair of the board.

In recent years, Dr. Spencer was frequently called upon to speak to students, both prospective students in public health and those already active in the field he came to love and champion. A reserved man, he dug deep into the many lessons he learned traveling the globe and through his professional and personal experiences, to prepare remarks that could inspire the next generation of public health professionals. He often spoke about the enormous potential of individuals working purposefully, through barriers and across cultures, for the health of the public and the value of each and every person’s potential to make a difference. This quote from a recent speech he gave to students rings true to all of us who knew Dr. Spencer and who wake up every day excited to continue our work to improve the public’s health:

“Public health is filled with heroes, both well known and unknown. They are visible on the national or international stage or they work quietly in communities with families and individuals. When they do their job, they often become invisible.”

Dr. Spencer often summarized his thoughts with the phrase, “at the end of the day.” To quote him, “at the end of the day,” we are left with a deep sadness and a lasting legacy generated by his energy, vision, and passion for doing the right thing, and the recognition of what one person can accomplish for the sake of many.

The January/February 2017 issue of Public Health Reports features a tribute honoring Dr. Harrison C. Spencer.
POLICY AND ADVOCACY

ASPPH Shares Policy Priorities with Presidential Candidates

During the summer, ASPPH developed a 12-page white paper, Academic Public Health’s Priorities for America, intended to inform the Presidential candidates and their transition teams. The document focuses on advancing public health education, science, and practice as the basis of improving population health. ASPPH calls on the new Administration to make public health a national priority and advance the research, training, and other actions necessary to protect and promote health for all our citizens. The paper was authored by the members of the ASPPH Legislative Committee.

Federal Funding Continues as Top Priority for ASPPH

ASPPH’s fiscal year 2016 funding priorities were established by the ASPPH Legislative Committee and shared with Congress during member and staff discussions throughout the year. ASPPH sent numerous standalone and coalition letters to key legislators in support of its legislative agenda. Numerous face-to-face meetings were held with Senators, Representatives, and staff during the Congressional Session. ASPPH sponsored a “Hill Day” in late February that engaged deans and program directors as advocates.

All of ASPPH’s priorities were funded in fiscal year 2016. These programs are:

- **CDC Prevention Research Centers**
  - $25,461,000 (level)

- **CDC Centers for Public Health Preparedness**
  - $8,200,000 (an increase of $0.02 million)

- **CDC NIOSH Education and Research Centers**
  - $28,500,000 (an increase of $1.055 million)

- **CDC NIOSH Agricultural Forestry and Fishing Centers**
  - $25,000,000 (an increase of $1.0 million)

- **HRSA Public Health Training Centers**
  - $9,864,000 (level)

Other Activities

Throughout the year, ASPPH was an active member of the informal Zika coalition, led by the March of Dimes. ASPPH lobbied for the Zika supplemental funding request of the Administration.

ASPPH joined an *amicus* brief to the Supreme Court in favor of the University of Texas, Austin’s position in support of holistic admissions policies. In a June decision, the Supreme Court upheld ASPPH’s position in one of the most important affirmative action cases in years.

**MAY 6:** ASPPH wrote to key FDA leaders in support of the FDA’s final regulations that placed E-cigarettes and other new tobacco products under federal oversight for the first time. ASPPH Chair Gary Raskob (Oklahoma) wrote, “While the arduous and lengthy regulatory process has been frustrating, we are very pleased that the final rule gives paramount consideration to the health of the public and not the commercial interests of manufacturers and vendors. The members of ASPPH appreciate your strong support of the final rule, which we believe will reduce the impact and suffering caused by the use of tobacco products.” ASPPH also wrote to Hill leaders opposing efforts to legislatively overturn the FDA regulations.
ASPPH Advances Prevention Research in the Cancer Moonshot

On March 21, ASPPH organized a letter to Vice President Biden and Congressional leaders, signed by more than 70 deans and directors of schools and programs of public health, expressing concern that the Cancer Moonshot initiative “may be undervaluing the vital role that public health and prevention have played and must continue to play in reducing cancer incidence and mortality.” The academic public health leaders wrote, “We urge you to pay careful attention to the balance between treatment and prevention-related investments. The development of new and innovative therapeutic cancer interventions is vital, but history has shown that the greatest impact in reducing cancer mortality rates has come from preventing cancers. While curative treatments often appear more exciting to the public, investments in public health and prevention research hold even more promise for both short- and long-term reductions in cancer incidence and mortality rates. Developing cancer cures is essential, but controlling cancer is also a policy and public health challenge. We must operate on both fronts.” The letter was published in *Lancet Oncology*.

Population Health Initiatives Expand

Under the leadership of the ASPPH Population Health Leadership Group, ASPPH’s initiatives to promote population health continue to expand. A detailed survey of the membership was completed in September and a set of structured interviews with external stakeholders was completed in October. The results of these initiatives will be released in early 2017. Both initiatives were intended to identify existing capabilities and opportunities for academic public health to advance population health, as well as challenges that may be hindering needed collaborations.
DATA CENTER

Member Data Informs Academic Public Health

ASPPH member data provides guidance to the work of ASPPH and its committees, sections, and forums, and it informs the internal operations for members and academic public health in general. Member data includes multiple data sources, accessible via dashboards on the ASPPH Data Center Member Portal. ASPPH now provides dashboards for SOPHAS Administrators, Undergraduate Public Health and Global Heath Education Network members, and the NBPHE board of directors. Data collection also occurs through ASPPH Data Advisory Committee sanctioned surveys. These surveys may be one-time surveys to inform the immediate work of short-term workgroups or pilot surveys that lead to new data collections. For example, the 2014 ASPPH Graduate Employment Project survey laid the groundwork for adding graduate outcomes data collection to the ASPPH Annual Data Collection in 2016.

Building a Culture of Data-Driven Decision-Making

The ASPPH Data Center expanded efforts to foster a culture of data-driven decision-making among our members in 2016. The inaugural Data Center Skill-Building Workshop was held at the Annual Meeting with 60 members learning how to use ASPPH data to inform decision-making. The ASPPH Data Center Online Community provides data administrators with a forum for peer-to-peer discussions and learning. The Data Center Quarterly newsletter, launched in June, provides information on current data efforts and features the work of member data initiatives and best practices. The ASPPH Data Center also partnered with members to share these culture-building strategies at national conferences, including the 2016 Tableau Conference.

SOPHAS

Apply to schools and programs of public health using ASPPH’s centralized application service, SOPHAS.

SOPHAS continues its remarkable growth since 2006. Brown University School of Public Health and Central New York Master of Public Health Program (SUNY Upstate Medical University/Syracuse University) joined SOPHAS this cycle. SOPHAS continues to evolve in response to the needs of participating schools and programs – all members are welcome to participate in bi-monthly planning calls and semi-annual strategic planning meetings.

RECRUITMENT & STUDENT SERVICES

This year, ASPPH took on new initiatives to support student recruitment and provide professional development for student services staff. In addition to the highlights on this page, staff presented at the Gates Millennium Scholars Program in March, the USA Science & Engineering Festival in April, and the NAAHP Conference in June. ASPPH also revamped the This Is Public Health iPhone App, and launched a new Café Press Store for TIPH merchandise.

**Health Professions Week (September 26-30)**
ASPPH participated in the first annual week dedicated to increasing pathways to health professions.

Preparing the Public Health Workforce

ASPPH, working with federal agencies and a national non-profit foundation, established fellowship programs to train recent graduates and alumni from member institutions. The goal of the ASPPH Fellowship program is to provide a high quality training experience in public health and global health under the guidance of an experienced mentor. Fellows gain experience in areas such as surveillance, program management, evaluation, informatics, statistics, epidemiology, and policy.

www.aspph.org/study/fellowships-and-internships

In 2016, ASPPH worked with three federal partners to offer four different training programs:

| The National Highway Traffic Safety Administration: The ASPPH/NHTSA Public Health Fellowship Program | The U.S. Environmental Protection Agency: The ASPPH/EPA Environmental Health Fellowship Program | The Centers for Disease Control and Prevention: The ASPPH/CDC Allan Rosenfield Global Health Fellowship Program, and the ASPPH/CDC Public Health Fellowship Program |

In 2016, ASPPH embarked on a new partnership with the de Beaumont Foundation, and launched the ASPPH Public Health Philanthropy Fellowship Program. The program trains recent graduates across a range of public health philanthropy activities, including program development, strategic planning, grants review and monitoring, data analysis, and scientific inquiry. The inaugural fellow was placed in July 2016.

296 Applicants for 64 Positions
60 Fellows Placed
65 Fellows Renewed
1 Intern Placed at ASPPH

“One of my most rewarding experiences was giving a presentation about law enforcement officer wellness at the Lifesavers National Conference on Highway Safety Priorities. I had the opportunity to encourage adopting a lifestyle of wellness through strategies to mitigate emerging health issues in the law enforcement community such as drowsy driving, caffeine intake, and pre-workout use.”

Monika Ramnarayan
ASPPH/NHTSA Public Health Fellowship
Emory University Rollins School of Public Health

“One of the most rewarding experiences I’ve had during my ASPPH fellowship is being part of the United States Global Change Research Program’s Climate Change and Human Health Workgroup, which is an interagency workgroup of which the EPA is a member.”

Michael Schmeltz
ASPPH/EPA Environmental Health Fellowship
CUNY School of Public Health

“One of my most rewarding experiences was giving a presentation about law enforcement officer wellness at the Lifesavers National Conference on Highway Safety Priorities. I had the opportunity to encourage adopting a lifestyle of wellness through strategies to mitigate emerging health issues in the law enforcement community such as drowsy driving, caffeine intake, and pre-workout use.”

Joseph Lawrence
ASPPH/CDC Allan Rosenfield Global Health Fellowship
University of Pittsburgh Graduate School of Public Health

“The most rewarding experience of my fellowship are the professionals I’ve been privileged to work with. My mentors are amazing. Every day, I work side-by-side with people who are making real change in their communities.”

Sara Wolicki
ASPPH/CDC Public Health Fellowship
University of South Florida College of Public Health
EDUCATION IN PUBLIC HEALTH

The nearly four year-long *Framing the Future* initiative, which laid the groundwork for a number of exciting changes that are already transforming academic public health, pointed ASPPH towards the need to tackle the implications of technology and education innovations. In response, the ASPPH Education Committee formed two workgroups.

**Innovations in Pedagogy Workgroup**

The workgroup will focus on capturing teaching innovations, professional development activities related to teaching, and the role of teaching in promotion and tenure decisions in our member institutions, both at the undergraduate and graduate teaching levels. The goal is to identify priorities for ASPPH to consider in advancing innovations for schools and programs of public health.

**Baccalaureate/Masters Relationship Workgroup**

The workgroup will explore issues associated with the path from, and the relationship between, undergraduate and master’s degrees in public health. The goal is to provide guidance to schools, programs, and others who are exploring and studying the relationship between undergraduate and master’s-level public health courses and degrees.

**Undergraduate Network for Public Health and Global Health Education Expands**

In an effort to keep members informed and connected, ASPPH created a quarterly newsletter, *Network News*, and the inaugural issue was published in September. The newsletter highlights innovative pedagogy, advocacy and policy information, membership news, and information on upcoming events.

Accreditation

ASPPH continues to engage closely with the Council on Education for Public Health (CEPH) as one of their co-founding corporate sponsors (along with the American Public Health Association). ASPPH advocates for excellence in accreditation standards and works to support criteria that fits school and program interests as well as students’ needs and societal expectations for quality education for public health.

Over the last two years, ASPPH facilitated discussions, in many forms, and hundreds of members provided responses to CEPH on four rounds of the draft criteria. In October, CEPH disseminated a final version of the criteria. As members implement the criteria, ASPPH will highlight their promising practices.

ASPPH Presents Webinars

Webinars featured a wide array of presentations to address relevant and timely issues for member faculty, students, staff, administrators, and practice partners. Webinar topics included CEPH accreditation, student services spotlight series, and the impact of the 2016 elections on academic public health, among others. All webinars were recorded and are available on ASPPH.org.

Interprofessional Partnerships

Building on the work of the Population Health across All Professions Expert Panel, ASPPH continues its involvement in the Design & Health Research Consortium, sponsored by the American Institute of Architects (AIA), the AIA Foundation, and the Association of Collegiate Schools of Architecture (ACSA), to advance university-led research in the area of design and health and to promote and accelerate the translation of research into practice.

Two awardees, funded through an ASPPH cooperative agreement with CDC Academic Partnerships to Improve Health, completed their projects in 2016.

**Morton McMichael Schoolyard: Design and Placemaking as a Strategy to Improve Physical Activity in Elementary School Children**
The Drexel University Dornsife School of Public Health in partnership with the Drexel University Antoinette Westphal College of Media Arts & Design (Drexel University Urban Health and Design Team)

**Access to Healthy Food and Neighborhood Walkability: Insights through Inter-Professional Curricula**
University of Kansas Medical Center Department of Preventive Medicine & Public Health in partnership with the University of Kansas School of Architecture, Design and Planning

IPEC

The Interprofessional Education Collaborative (IPEC) promotes and encourages constituent efforts to advance interprofessional learning experiences that help prepare future health professionals for enhanced team-based care of patients and improved population health outcomes. ASPPH, a founding member of IPEC, is actively engaged in efforts to promote and advance interprofessional learning experiences to improve population health outcomes.

**IPEC Hosted Two Faculty Development Institutes:**
Quality Improvement & Patient Safety (May 4-6) | Building a Framework for Interprofessional Education (October 5-7)

The National Center for Interprofessional Practice and Education (NCIPE) presented the first-ever Pioneer Award to IPEC.

IPEC released an updated version of the Core Competencies for Interprofessional Collaborative Practice.

IPEC approved nine additional members through a new institutional membership category.
Featured Plenary Speakers
Charles E. Cook, Jr., editor and publisher of The Cook Political Report; Freeman A. Hrabowski, president of the University of Maryland Baltimore County; Andy Haines, professor of public health and primary care at the London School of Hygiene and Tropical Medicine; Sonia Angell, dep. commissioner, division of prevention and primary care, NYC Dept. of Health and Mental Hygiene; Joseph Bankman, Ralph M. Parsons Professor of Law, Stanford University Law School; Laurie Garrett, senior fellow for global health, Council on Foreign Relations; and Julio Frenk, president, University of Miami.

The retreat provided attendees an opportunity for meaningful interactions. It featured two plenary speakers as well as time for small group discussions with colleagues.

Michael Tchong, professional speaker on innovation, trends, and technology, began the retreat with an opening plenary presentation focused on “pushing the innovation envelope.”

Nirav R. Shah, senior vice president and chief operating officer for clinical operations at Kaiser Permanente, presented on broader public health issues and challenges and the role of ASPPH Members.
INFORMATION TECHNOLOGY

The Future is NOW!

2016 was a watershed year for ASPPH Information Technology. After three years of modernizing our technology infrastructure, embracing open-source software development, and weaving technical innovation into the fabric of ASPPH member services, we are more nimble, value-driven, and people-focused than ever before.

Our migration to the cloud and adoption of DevOps philosophies have opened a new realm of technical possibilities and increased ASPPH’s capacity to create exceptional digital experiences for our members. Our continued adherence to agile software development processes and IT Service Management (ITSM) best practices allows us to deliver those experiences much faster while at the same time increasing the quality and reliability of our products.

By March 2017, ASPPH’s technology infrastructure will be 100% in the cloud.

DevOps

DevOps is a new approach that helps the IT team deliver more services and products to our members in a shorter amount of time.

It allows ASPPH to:

- Foster Team Collaboration
- Increase Efficiency
- Deploy Software Products More Quickly
2016 Web Development

3 Full Website Redesigns
- Public Health Jobs
- Fellowships and Internships
- Web Application
- ASPPH Intranet

41 Website Improvements

2 New Products
- Salesforce CRM
- Development Portfolio

Total 46 Web Deployments

ASPPH’s Guiding Principles of Software Development

- Enable business value
- Keep the end-user in mind
- Use modern tools & best practices
- Use agile methodologies
- Deploy minimal viable products (MVP)
- Quality assurance testing
- Documentation
- Operations supports development (DevOps)
- Services is a continuum of development (ITSM)
- Aim to innovate

Security

IT security is a high priority for ASPPH. As we collect more and more member data, the need to secure, control, and backup that data becomes paramount to members’ continued trust and confidence in our technology abilities and competence.

ASPPH continually strives to improve IT security by following a three-pronged strategy:

Layered Defense | User Awareness | Rapid Response & Recovery

University of Washington School of Public Health
ASPPH is the parent organization of the National Board of Public Health Examiners (NBPHE). Over 1,100 individuals sat for the CPH exam in 2016, bringing the total number of individuals certified in public health to over 5,500.

The CPH continues to evolve. In 2016, the NBPHE board introduced both instant score results and digital badging.

The use of the CPH exam as an academic assessment tool continues to grow. Ten schools and programs are now requiring the CPH exam.

In July, SAGE Publishing began publishing PHR. “One of the journal’s top goals is modernization of our website and publication technology,” said Dr. Harrison C. Spencer, former President and CEO, ASPPH. “We believe that the new relationship between ASPPH and SAGE Publishing will be a huge step forward for the journal.” The editor in chief of the journal is Dr. Frederic E. Shaw, a senior medical officer at the Centers for Disease Control and Prevention in Atlanta, GA.

The new PublicHealthJobs.org offers streamlined functionality and new features for both job seekers and employers. The goal of Public Health Jobs is to serve as the recommended search engine for public health job opportunities and to continue to highlight the field of public health as a meaningful career choice.
