

Boarding

Dogs stay in a big 4'x6' run, allowing plenty of space to stretch! Cats have their own room for peace and quiet. Because we are not a large facility, we provide a more intimate environment allowing personal attention to each pet. Monitoring your pet's health is critical and our veterinarian evaluates each pet every day while they stay at our hospital.

We provide playtime three to four times a day in a large outdoor enclosed recess area. Our boarding assistants play with each pet on an individual basis to give them the personal attention they deserve while staying at our hospital. We also do not charge an additional fee for medicating pets while boarding here.
