

JULY IS PET I.D. MONTH

WHY MICROCHIP?

In one study, less than half of lost dogs and 1/5 of lost cats had any identification (tags, microchip) when they went missing.

In a recent study of 53 U.S. animal shelters, only 1.8% of stray cats and 21.9% of stray dogs were able to be reunited with their owners.

In the same study, 38.5% of stray cats with registered microchips were reunited (over 20 times more!) and 52.2% of stray dogs with registered microchips were reunited with their owners (over 2.5 times more!).

Implanting a microchip, which is about the size of a grain of rice, is as easy as giving a vaccine. Call us today to have your pet microchipped!

FLEAS, TICKS AND MOSQUITOES.

OH MY!

Fleas, ticks and mosquitoes can not only be pesky, but they can also be harmful to you and your pet. If your pet ingests a flea, they can get tapeworms. Ticks carry diseases like Lyme and Ehrlichia. Mosquitoes carry heartworms, which can infect your cat or dog.

Keep your pet protected this summer with products like Comfortis, Advantix, Frontline Plus, Advantage Multi, Revolution, Sentinel, Interceptor and Heartgard. Ask us which product(s) are right for your pet!

De-shed groom is great for dogs and cats alike!

We are featuring our de-shedding groom service. This service will change your life...and give your vacuum cleaner a break! This service has been proven to reduce shedding up to 90% (when done consistently) and improve the health of your animal's skin and coat. Call today and experience the difference a de-shed can bring to you and your pet.

And remember...we offer professional breed specific grooming, bathing, ear cleaning, nail trims, nail dremmels, nail art and anal sac expression.

Forrest, Dr. Torchia's dog, gets a de-shed groom every month. Come by and ask him about it!
