

## Equine Services

- **State-of-the-Art Surgery Suite and Hospitalization Barn**  
Our facility has large induction, surgery and recovery suites in addition to stalls for hospitalization. Our surgery suite is "next to none" in quality and design. We pride ourselves in providing a sterile and safe surgery plus recovery area.
- **In-hospital Examination Suite**  
For in-clinic exams, we have a large equine treatment suite with easy entry.
- **Digital Radiology**  
Digital radiography provides higher quality images, faster results (even at the farm) and the ability to e-mail the images to specialists if necessary.
- **Endoscopy**  
Our endoscope helps us diagnose and treat upper respiratory problems in the horse.
- **Arthroscopy**  
Arthroscopy gives us the ability to look inside joint capsules and treat orthopedic conditions with a very small incision. This speeds recovery and healing, not to mention that it is less painful for the pet.
- **In-Hospital Laboratory**  
We are able to perform most of our bloodwork in-house with results within 15-20 minutes.

### Coggins results within 24 hours

- **Orthopedic Surgery**  
We offer orthopedic surgery including bone plating and arthroscopy.
- **Farm Calls**  
If you are unable to bring your horse to our facility, we can come to your home or stable to perform examinations and treatments.
- **Dental Care**  
We can provide advanced equine dentistry including bit seats, performance floats, tooth extractions, and incisor leveling.
- **Pharmacy**  
We are able to provide the most current medicines in the veterinary field, including flavored medications and nutraceuticals.
- **Vaccinations**  
Our vaccine guidelines are equivalent to the AAEP for the safety and health of your horse.
- **Retail Products**  
We keep in stock joint supplements and anti-inflammatories such as Cosequin, Corta-flx RX, and Adequan.
- **Reproduction**  
Including semen evaluation, collection, storage (cooled and frozen), vaginal cytology and artificial insemination. Our ultrasound helps us evaluate, treat and diagnose reproduction cases.
- **Additional Services**  
We can perform purchase exams, joint injections, nerve blocks and have a special focus on lameness evaluations and treatment.
