

## Enrichment ~ Continuing your journey to set your puppy up for success!

*Animal Medical Center's Next Steps Puppy Manners classes were created to teach owners how dogs learn. In doing so, they can improve their training skills as well as starting them on the positive path to enrich their lifelong relationship. Puppy Manners classes will teach owners how to use positive, reward based training techniques so they can teach their puppies the skills needed for them to become a well-mannered companion.*

## Animal Medical Center *NEXT STEPS* *PUPPY MANNERS* CLASS

BE proactive and learn the skills needed to train your puppy to have polite, household manners.

Learn to use positive, reward based training techniques to teach:

- ◆ Sit/down
- ◆ Wait/stay
- ◆ Come
- ◆ Loose leash walking

# Puppy Manners ~ The Next Step to the Perfect Puppy!

Our Puppy Manners course will be taught using positive reinforcement training techniques. Skills will be taught on how to "set your puppy up for success" and to train rather than complain. Behaviors that will be covered in class are: sit, down, wait/stay, leave it, give, come when called and loose leash walking. We will introduce targeting, attention/focus games and how to teach a trick for graduation.

The goals for Next Steps is to make training fun and enjoyable for owners and their dog while at the same time giving them the tools needed to train their puppy to be an enjoyable family companion.

## General Information

Puppy Manners will be the NEXT step for the graduates of our First Steps Puppy Socialization classes as well as for puppies that are too old to enroll in First Steps.

Puppy Manners classes are for pups that are 16 weeks to one year of age, at the start of class. Class will meet once a week for 6 weeks and each class is an hour in length. Class size is limited to 6-8 pups, to ensure that all owners and their dogs can get individual attention as needed. Call for class times and openings. 610-489-8982 or email: sthompson@mypetdoc.com.

All pups will need proof of their Rabies vaccination.
