

## AVIAN CHECK-IN QUESTIONNAIRE

Bird's Name \_\_\_\_\_ Age \_\_\_\_\_ Sex : male, female, unknown

Species \_\_\_\_\_

Presenting Complaint ( diarrhoea, weight loss...) \_\_\_\_\_  
\_\_\_\_\_

Is this a post-purchase exam? yes \_\_\_\_\_ no \_\_\_\_\_

If yes:

Date of purchase \_\_\_\_\_

Breeder \_\_\_\_\_

How long has your bird lived with you? \_\_\_\_\_

What does your bird's diet consist of ? ( be specific)  
\_\_\_\_\_  
\_\_\_\_\_

Do you have other bird's? If so, what types? \_\_\_\_\_  
\_\_\_\_\_

Has your bird had any past medical problems not already noted  
in our records? \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Has any bloodwork ever been evaluated? \_\_\_\_\_ What type ?  
\_\_\_\_\_

Unlike dogs and cats, birds are extremely good at hiding signs of disease. Bloodwork and laboratory studies are the only methods available to pick up early signs of problems in birds; therefore it may be necessary to obtain blood or stool samples today. Restraint, using a towel, may be necessary for the safety of your bird and our staff. Be assured we will handle your bird as carefully as we would our own.
