

Appointments

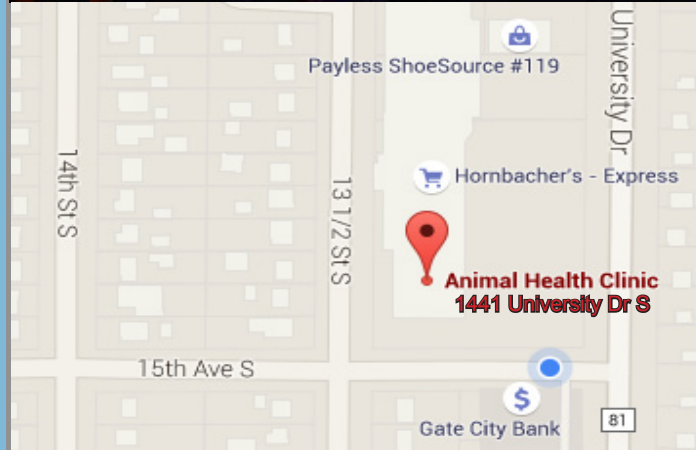

Appointments are designed to provide our veterinary staff adequate time to be thorough in providing patients and owners the best quality care.

- Appointments are required, with the exception of emergency or urgent situations.
- Punctuality and 24-hour advanced notice of cancellations or rescheduling of appointments is greatly appreciated.
- If you wish to see a particular veterinarian, please let the receptionist know when scheduling your appointment. We will do our best to accommodate your request.
- Drop-off appointments are available. Bring your pet in before you go to work and we will keep them in our kennel until their appointment time. We will then call you with the results of the exam to discuss options prior to any needed or recommended treatment.

We accept Visa, Master Card, Discover, Care Credit, Cash, or Check. Payment is due in full at time of service.

The Standard of
Veterinary Excellence

Our Mission

The goals of the Animal Health Clinic are to provide the highest quality veterinary care and the best possible service to our clients. Our clinic's foundation is a caring, dedicated, skilled staff combined with a facility that provides up-to-date surgical, diagnostic, and patient monitoring capabilities in a comfortable, clean, quiet, environment for hospitalized pets.

Accreditation

We have been accredited by the American Animal Hospital Association (AAHA) since 1979, which is a voluntary organization of small animal practitioners dedicated to providing exceptional veterinary care for their patients. Only about 20% of the veterinary hospitals in the USA are qualified by AAHA.

Wellness

We strongly believe in wellness programs for all pets. Regular visits with our veterinarians can aid in disease prevention and early illness detection. Together, we can help keep your pet healthy, happy, and living longer.

Online Pet Portal

Our Vetstreet Pet Portal is a secure, private pet health website that gives you direct access to manage your pet's health 24/7. Features and benefits include:

- Access to your pet's health records
- Medication schedules & vaccination history
- Online appointment requests
- Emailed appointment reminders
- An extensive pet health library

Mobile App

Download AHC Fargo on your device to have instant access to appointment or refill requests, important recalls, emergency info, Pet Pix submissions, and much more!

Client Referrals

The greatest compliment our clients can give us is the referral of family and friends. For each new client you refer to us, you will receive a gift certificate valid towards any service or product!

Lobby and Pet Supplies

We have a spacious lobby for you and your pet to relax in before, during, or after your appointment. We carry a wide array of pet supplies including food, toys, treats, grooming products, and even home candles.

Therapy Laser

The therapeutic laser uses a beam of light to penetrate tissue without damaging it. This light induces a biological response in the cells which results in pain reduction, inflammation reduction, and helps to speed the healing process. We are thrilled to offer this amazing service and have seen great benefits!

In-House Lab

Our comprehensive, in-house laboratory gives us the capability to run blood work and other diagnostic tests quickly and accurately.

Surgery

We have a fully equipped surgical suite with comprehensive monitoring systems. All surgeries are performed by veterinarians, and licensed veterinary technicians monitor your pet from prep to the time they go home, as required by AAHA. We offer a surgical laser option, which results in less blood loss and pain from surgery and a more comfortable recovery for your pet, especially when paired with the therapy laser.

Ultrasound

An ultrasound allows us to see what is going on the inside without a surgical procedure, which may be a useful tool in diagnosing your pet's medical condition.

Digital Radiography

Our digital system allows us to view x-ray images instantaneously. Each of our eight exam rooms are equipped with computers to get you and your pet the feedback you need fast.
