

We have always known our patients can't talk to us. Several years ago a needed shift occurred in preventative veterinary medicine. We started screening our patients *and*, as a result, we started finding problems...early.

We are adding years to our pet's lives because we find problems early and can often intervene to solve them!

These 'wellness' programs put together our best medical care in an affordable way to ensure value for you and thorough, thoughtful care for your dog.

Normally our illness or injury exam fee is \$60 per visit. With these programs you can come in anytime your dog is not feeling well for no additional exam fee. Have the evaluation done. Have your questions answered. Have the security of knowing *all is well*.

Normally imaging with 2 xrays and an in-depth ultrasound is \$425. With the comprehensive program we take an astounding *35 percent off* so imaging costs are only \$265 of that program cost.

Our first priority is your dog's health. Please let us know how we can help you provide great health care for your canine family.
