According to the AVDS, 80 percent of dogs and 70 percent of cats show signs of oral disease by age three, often indicated by bad breath, a change in eating or chewing habits, pawing at the face and mouth and depression.

Besides causing receding gums and tooth loss, bacteria in the mouth can enter the bloodstream, potentially infecting the heart, liver and kidneys, which can be potentially life threatening.

#### ***Some products to help clean your pet's teeth:***

C.E.T Chews- These tasty chews have chlorhexidine coated on them to prevent plaque build up.

Hill's T/D tartar diet- This food can also be used as treats. It is designed to prevent plaque.

Biotene Gel- This is a brushless gel that contains a potent enzyme formula to aid in the treatment of severe oral infections such as stomatitis, gingivitis, and periodontal disease.

Take advantage of the discounts to purchase these products in February.
