

Basic Pre-Surgical Consent

Date: _____

Pet: _____

Owner: _____

Breed: _____

Street: _____

Color: _____

City: _____ State: _____ Zip Code: _____

I, the undersigned, do hereby certify that I am the owner or duly authorized agent for the owner of the above named pet and that I do hereby give Dr. Holbrook, his agents, servants and/or representatives full and complete authority to perform the necessary anesthesia and perform the surgical procedure described as:

Spay/Neuter

Lump/Wart Removal

Other: _____

I understand that my pet will be transported to the county's animal services after 3 days if not picked up on planned departure date and notice is not given as to my change of plans. I understand that abandonment does not excuse me from the cost of this service and that I will be responsible for any fees incurred at Marion Veterinary Hospital as well as at animal services.

*All prices are subject to change without notice. While we make every effort to provide you with the most accurate information and treatment proposals, occasionally, one or more of our prices may not be up to date. We apologize in advance for any inconvenience this may cause.

PRE-ANESTHESIA SCREEN
CONSENT FORM
"Because We Care"

Please Read Carefully And Sign

Your pet is in for anesthesia/surgery and should do fine. We will perform a full physical examination on your pet before administering the anesthesia. However, we highly recommend a pre-op blood profile to be performed for the purpose of insuring your pet to be in low risk category during anesthesia.

By performing this important pre-op blood profile, we will be able to rule out any pre-existing internal problems that may not be evident physically, but could lead to serious complications. There is an additional fee for this important procedure. Please indicate your choice by signing on the line below the appropriate response:

Please complete the recommended blood work prior to surgery on my pet. If abnormalities are found please call and inform me before proceeding.

I have decided to refuse the recommended pre-op blood work on my pet at this time and request that you continue with the surgical procedure.

The latest in technology has enabled us to run blood work within minutes, in-house, safely and accurately before anesthetic induction. As your veterinarian, I am happy to have this technology available to offer you, as well as safe anesthetic medications.

ADDITIONAL SURGICAL PROCEDURES

Please note: These charges are in addition to the treatment proposal we prepared for you. Initial each of the procedures you would like for the doctor to perform on your pet today. The highlighted items are strongly recommended by the doctor.

____ **Pain Management (in-patient)** \$44.50

Pain management that is administered prior to surgery

____ **Pain Management (out-patient)** \$10.00-25.00

Short term pain management that can be given at home as needed, usually for 3-5 days

____ **Nail Trim** \$6.90

Stress free nail trim while under anesthesia

____ **Blood Screen** \$75.70-149.50

***For best value, please schedule lab work to be performed prior to surgery date.*

All patients, not just the old or sick, should have basic pre-anesthetic blood tests performed checking the kidney and liver values, red blood cell count and total protein. Many animals will require more extensive pre-anesthetic blood work. Even in animals under one year old, blood work will occasionally detect abnormalities that could affect anesthesia.

____ **ResQ Microchip** \$55.50

Millions of pets are lost every year. A tiny microchip about the size of a grain of rice fits in a hypodermic needle just like a vaccination and it injected under the skin where it remains safely for the life of your pet. The ResQ Microchip is recognized internationally and has no annual fee.

____ **IV Catheter w/Fluids** \$47.50

Placement of an IV catheter provides the following for your pet: Maintaining adequate BLOOD PRESSURE throughout the procedure, aids in QUICKER RECOVERY, provides proper ELECTROLYTES and corrects and maintains HYDRATION status, allows for ADMINISTRATION of various MEDICATIONS (pain, life saving, antibiotics etc.)

____ **Heart Monitoring** \$44.50

Our advanced Anesthesia Monitoring equipment allows us to take various BLOOD PRESSURE readings throughout the procedure, an electrocardiogram (EKG) to monitor the heart rhythm for arrhythmias, a pulse oximeter to monitor the percentage OXYGENATION of the blood, which should be close to 100%.

____ **Clean & Polish Teeth** \$27.00

Based on in-depth research we understand how important proper dental hygiene is to our pet friends. Periodontal disease is not only locally aggressive on individual teeth, but the impact on the entire body can potentially cause great harm. Periodontal disease increases significantly with age and most pets over the age of 2 have some form of dental disease.

____ **Elizabethan Collar** \$13.10-20.30

Pets can seriously injure themselves by licking and chewing and it is impossible to monitor them 24 hours a day. An E-Collar is a plastic cone-shaped collar that helps prevent your pet from licking or chewing at the incision site.

Marion Veterinary Hospital

Flea & Tick Policy

(Please keep for your records)

Thank you for helping Marion Veterinary Hospital sustain a Flea & Tick free facility. We take pride in maintaining hospital cleanliness as well as promoting animal health and wellbeing. Please know that our staff will carefully inspect your pet(s) upon arrival for external parasites. Rest assured that we will take special precautions and follow strict facility policies to rid your pet of flea and/or tick infestation immediately when identified. Please let us know if you have any questions.

Thank you,
Management

<u>Tick infestation treatments</u>	<u>Cost per treatment</u>
1) De-tick by Technician. We will physically search for and remove all ticks found by hand	\$ 10.30-75.00 – depending on total number of ticks removed
2) Bath with Tick Shampoo add-on	\$ 24.90-43.90 - by weight
3) Frontline topical spray treatment	\$ 21.10
4) Preventic Collar that last for 3 months (optional)	\$ 22.00

We will notify each pet Owner of our findings either by phone or at check-out and we do recommend continuing a preventative product at home. Our veterinarian will be happy to make recommendations and answer any questions you may have.

<u>Flea infestations treatment expense</u>	<u>Cost per treatment</u>
1) Capstar Tablet given orally	\$ 10.30
2) Bath with Flea Shampoo add-on	\$ 24.90-43.90 - by weight
