

Thank you for choosing Eastern Animal Hospital!

Please take a moment to tell us about your pet. A doctor will contact you by telephone shortly to discuss exam findings. They will also determine what tests and/or treatment will best help your pet. A detailed estimate will be provided to you before any action is taken.

- ☐ No
- ☐ Yes

Brand of food: _____

Briefly describe any other concerns and when they began: _____

We recommend yearly diagnostic tests to help us monitor your pet's health. Being tested at an early age will help us determine what care your pet needs as they age. Are you interested in learning about the tests available for your pet?

☐ Yes

☐ No

We recommend year round prevention of fleas, ticks and heartworms. Do you need any Frontline or Sentinel?

☐ Yes

☐ No

We recommend feeding your pet a high quality food such as Verus. We always recommend that cats be fed a canned diet. Would you like more information on what to feed your pet?

☐ Yes

☐ No

We have additional vaccines that can protect your pet from infectious diseases. Please check if you would like to vaccinate your pet against:

- ☐ **Canine Influenza**— This is a newly emerging infectious disease caused by the flu virus. All dogs admitted to our boarding facilities must be vaccinated against this highly contagious disease.
- ☐ **Lyme disease**— Certain tick species carry and transmit the bacteria that causes Lyme disease. If your dog spends time in wooded or grassy areas we recommend to have your pet vaccinated against this disease.
- ☐ **Feline Leukemia**— This virus can be lethal to cats. This virus is transmitted by contact with infected cats. If your cat goes outdoors we recommend having your pet vaccinated against this disease.
