Reasons To Groom Your Pet

Bathing helps remove old hair, dirt and oil from the skin.

Bathing is a good way to find any fleas or ticks that your pet might have.

The physical action of being washed is pleasant to most dogs. When they feel good, they generally act happier!

It may make you aware of a lump or bump that may have appeared or changed suddenly.

Pets with long hair around their face can irritate their eyes and damage the cornea. The groomer can trim the long hair around the face to prevent this.

Walking on long nails can be painful, aggravate arthritis and cause the toes to splay. Long nails can curve around and grow into the pads.
