

Pre-Anesthetic Blood Testing Consent Form

Double Arrow Veterinary Clinic, PC

{CURRENTDATE[SHORT]} {FULLNAME} {NAME} {AGE}

PLEASE READ CAREFULLY AND SIGN

Like you, our greatest concern is the well being of your pet. Your pet is scheduled for anesthesia and/or surgery. Before putting your pet under anesthesia, we will perform a physical examination. However, we recommend a pre-anesthetic blood profile to be performed in order that we may maximize patient safety and alert the doctor to the presence of anemia, dehydration, diabetes, kidney disease, or liver disease which could complicate the procedure. These conditions may not be detected unless a pre-anesthetic profile is performed. These tests are similar to those your own physician would run were you to undergo anesthesia. In addition, the results of these tests may be useful later to develop faster, more accurate diagnoses and treatments in the event that your pet's health changes.

State of the art equipment enables us to perform the pre-anesthetic blood profile within the clinic and we are committed to making this technology available to your pet.

PRE-ANESTHETIC BLOOD PROFILE COST= \$57 Includes: BUN (kidney) ALKP (liver)
Glucose (blood sugar) CBC (anemia/hydration) Electrolytes (metabolic)
ALT (liver) Creatinine (kidney)

COMPREHENSIVE BLOOD PROFILE COST= \$70 Adds: 7 more tests for animals over 7 years of age or special circumstances

Please complete the blood work you recommend prior to surgery on my pet for an additional fee of \$57 or \$70.

If abnormalities are found contact me at {PHONENUMBER} or

Other Phone number

I have elected to **refuse** the recommended pre-anesthetic bloodwork at this time and request that you proceed with anesthesia.

I assume full financial responsibility for this/these animal(s). I understand there are always potential risks when using anesthesia or performing surgery on an animal.
