

GROOMING

Both facilities have a professional pet groomer. The Full Groom package includes bath, blow-out, groom, ear cleaning, anal glands and toe nail trim. Services are available individually as well.

Our groomers coordinate with the on-site veterinarian to address any skin, coat or ear problems. Vaccinations may be given during their visit.

For those clients consistent in getting their loved ones in for a day of pampering, a Maintenance Program is established for discounting.

A current Rabies vaccination is required. Bordetella and DHLPPCV are strongly recommended.

Grantsburg Animal Hospital and Wild River Veterinary Clinic share veterinarians who care for companion animals, bovine, equine and small ruminants.

Both facilities have in-house laboratories that enable us to diagnose your pet's illness more quickly and run pre-surgical blood tests for safer anesthesia. We utilize gas anesthesia for surgeries. Gas anesthesia is safer than other methods and provides a quicker recovery period for your pet.

Grantsburg Animal Hospital has both in-house and portable x-ray and ultrasound machines to allow the doctors to make better diagnoses on your pet.

The hospital was built with a separate isolation area for sick animals. This isolation room has its own separate heating and cooling system to ensure that pets visiting the hospital do not come in contact with or breathe the same air as sick hospital patients.

We have a doctor on call at all times for emergency service. If emergency care is needed, please call and leave a detailed message.

We're pleased to offer our clients CareCredit® Convenient Monthly Payment Plans. With CareCredit you can say "yes" to the best treatment for your pet immediately, and pay for it over time with low monthly payments that fit easily into your budget. Apply online at www.carecredit.com.
