Remember to Bag your Bags!

Do you occasionally see garbage flying out from the top of garbage or recycling trucks and ending up as litter on our streets? Here's what you can do to help prevent this inadvertent littering:

Light-weight materials such as foam-type packing "peanuts", paper, plastic bags, etc., may fly off the garbage truck, causing litter on the street if they are not properly contained. In fact, any materials in the truck, whether they are recyclables or garbage, can potentially fly out of the truck if the items are not well contained.

Help us keep our community clean. **It is very important to bag all your garbage materials securely**, enclosing them in a plastic trash bag. While plastic shopping bags alone are not accepted in the recycling program, you can reuse them by placing your lightweight garbage or recyclables in them prior to disposal. Many retailers also have convenient recycling collection bins for used plastic shopping bags. If we all strive to securely place garbage and recyclables in their respective containers, they will remain in the trucks instead of littering our roadways.

Did You Know

The ECUA payment drop box located at the former Troy University campus at 21 N. New Warrington Road will be removed effective June 1. To find a new convenient way to pay your bill, please visit our website at www.ecua.fl.gov. We offer many options to suit your busy lifestyle!

Call Before You DIG

Underground lines, both on and off your property, can be easily damaged by digging equipment.

To ensure personal and community safety, all area utilities work with a free "line locator" service to help you spot utility lines before you dig. In our area, the number to call for this service is:

1-800-432-4770

It is important to call at least 48 hours in advance so that all of the utility companies potentially affected by your project may be contacted for verification.

Three Great Ways to Re-Use and Recycle Your Bags

1. If you're mailing something fragile, wrap it in plastic bags instead of new bubble wrap.
2. Reuse a plastic bag to line small trash cans, like in the bathroom, instead of buying new plastic can liners. Keep a few underneath the bag in the trash can to make changing the bag easy and quick.
3. Whether you are packing to move or just storing breakables in the attic, wrap them in plastic bags to cushion them against damage.

Spring Cleaning: Easier than Ever!

Did you know that all ECUA Sanitation customers are eligible for **weekly** bulky waste pick-up? This service includes pick-up of furniture and other household items **that are too large** to fit in the automated can for disposal. It is not for items that will fit in your can or household garbage. What's even better, is that **there is no need to call to schedule the pick-up**. Simply place your item(s) at the curb before 5:30 a.m. on your regular collection day. Our Bulk Waste crew will be by to pick it up. What could be simpler?

Leaf the Plastic Behind!

We're excited about our new biosolids composting facility located on-site at our Central Water Reclamation Facility, and we need your help to make it a success. In order to maximize the quality of the mulched yard waste, we recommend that customers use brown compostable paper yard waste bags, or reusable plastic cans designated for yard waste, instead of the traditional plastic yard trash bags.

Paper yard waste bags are easily found in home improvement centers and large retailers, through online sources and in garden centers and nurseries. Plus, if you ask for paper bags at the grocery store (yes, some local stores still offer this choice!), they'll serve double duty when you recycle them into yard trash bags!

It's never too early to start, so the next time you find yourself reaching for that plastic bag, remember to 'leaf the plastic behind' because brown is the new green!

Getting the yard spruced up has also become easier than ever, **with an increased bag and pile limit!** ECUA provides yard waste collection service once weekly to all residential customers. **We gladly collect up to 20 yard trash bags (preferably compostable paper) or cans each week and two piles of cut limbs.** With the recent start-up of our composting program, we need to eliminate or greatly reduce the use of plastic yard trash bags. Read more on this in the sidebar article.

Yard waste, as defined by the ECUA Sanitation program, includes: leaves, weeds, pine straw, grass clippings and small prunings.

Please follow these simple guidelines:

1. Do **not** use your garbage or recycling can for yard trash. Yard waste is collected and processed separately from household garbage.

2. Place your bagged or canned yard trash within two feet of the curb and away from the road.

3. Small yard waste, leaves, pine straw and grass clippings must be contained in standard garbage containers or yard trash bags (**preferably compostable paper**) that do not exceed 32 gallons in size or weigh more than 40 pounds when full.

4. Cut limbs should not exceed six feet in length or 40 pounds in weight. Please arrange loose limbs into manageable piles that do not exceed 6' W x 6' D x 6' H.

Our crews get an early start every day, so it is best to have your yard trash at the curb prior to 5:30 a.m. on your scheduled yard trash collection day.
