

## ABSTRACT

*The research used in this research is the descriptive qualitative method. The purpose of descriptive research is to make research systematic, factual, and precise about the facts and characteristics of a particular population. This study analyzed the students' ability to identify adverbs in the eleventh grade. The subjects of this study were students of class XI SMA PUTERI SION MEDAN in the academic year 2020/2021. It is located on Jalan Jamin Ginting No. 160 Medan. The number of students who were the subjects in this study was 30 students. The researcher asked the students to write a discourse in descriptive text. The converse consists of various adverbs. Adverbs that have been recognizing are adverbs of place, adverbs of time, adverb of manner, adverb of degree, and adverb of frequency. In this study, the highest results and graduated categories started from a score of 70-100 while the lowest score got a score of "60 and below". So the results of the data concluded from the study that students at SMA Puteri Sion Medan in understanding adverbs and writing descriptive texts served "46.67%" (14 students) included in the "enough" category or it could be said to be at the moderate level.*

**Keywords :** *Descriptive Text, Adverbs, Identification.*
