Abstrack

Since 2019, the Covid-19 pandemic has created an emergency status in Indonesia. Regarding Presidential Decree Number 11 of 2020, Indonesia has declared a health emergency status. Various efforts were made to overcome the impact of the Covid-19 pandemic. One of them is vaccination efforts. Therefore, this journal will explain the quality and safety standards of covid-19 vaccination. The purpose of this study was to analyze the development of vaccination before it was distributed and marketed to the public. This research method is a normative juridical method using a review method and a statutory approach. Based on the research that has been carried out, it is concluded that the circulation of Covid-19 vaccination passes through several stages before being circulated with the provisions set by BPOM in accordance with the quality standards of the Covid-19 vaccination in overcoming and reducing the spread of Covid-19. In the midst of circumstances that force everyone to be vaccinated, there are irresponsible individuals who circulate fake Covid-19 vaccines, which are detrimental to many people. Therefore, it is necessary to establish strict regulations regarding the circulation of fake COVID-19 vaccines.
