Kami lakukan ialah mencari tahu pengaruh,menyelidiki dan mendapatkan pengertian atau pemahaman apakah variabel yang di teliti secara bersama-sama ataupun secara individu berdampak pada harga saham perusahaan *Badan Usaha Milik Negara* Periode 2018-2020. Pendekatan kuantitatif yaitu sebuah pendekatan yang di pakai dalam penelitian kami. Jenis penelitian yang kami pakai untuk penelitian ialah penelitian deskriptif , di karenakan berlandaskan kuantiti dan analisis data yang di peroleh dari pengolahan data statistik. Analisis Regresi Linear yaitu metode atau teknik yang di gunakan peneliti mengkaji hasil penelitian kami. Terdapat 50 populasi perusahaan *Badan Usaha Milik Negara* tahun 2018-2020 dengan sampel sebanyak 60 perusahaan *Badan Usaha Milik Negara* periode 2018-2020. Variabel di dalam penelitian ini juga mempengaruhi variabel independen, di satu sisi yang lain secara parsial EPS dan ROE tidak mempunyai pengaruh pada harga saham perusahaan Badan Usaha Milik Negara periode 2018-2020, sedangkan DER punya dampak negative dan signifikan pada harga saham perusahaan Badan Usaha Milik Negara periode 2018-2020. Dari riset yang telah kami lakukan dapat kami ambil kesimpulan bahwa hasil koefisien determinasi R-Squared ( $R^2$ ) sebesar 0,084 atau bernilai sebesar 8,4 % dan sisanya 91,6 % tidak termasuk di riset ini.

**Kata Kunci : Earning Per Share, Return On Equity, Debt to Equity dan Harga Saham**

**ABSTRACT**  
**EFFECT OF EARNING PER SHARE, RETURN ON EQUITY, AND DEBT TO EQUITY ON SHARE PRICES IN STATE-OWNED ENTERPRISE 2018 – 2020 PERIOD**

What we do is find out the influence, investigate and get an understanding or understanding of whether the variables studied jointly or individually have an impact on the stock price of *State-Owned Enterprises* for the 2018-2020 period. Quantitative approach is an approach used in our research. The type of research that we use for research is descriptive research, because it is based on the quantity and analysis of data obtained from statistical data processing. Linear Regression Analysis is a method or technique used by researchers to examine the results of our research. There are 50 population of *State-Owned Enterprises* in 2018-2020 with a sample of 60 *State-Owned Enterprises* for the period 2018-2020. The variables in this study also affect the independent variables, on the other hand, partially EPS and ROE have no effect on the stock prices of state-owned enterprises for the period 2018-2020, while DER has a negative and significant impact on the stock prices of state-owned enterprises. Country for the period 2018-2020. From the research we have done, we can conclude that the coefficient of determination R-Squared ( $R^2$ ) is 0.084 or 8.4% and the remaining 91.6% is not included in this research.
