

ABSTRACT

Covid-19 disease is very easy to attack the elderly and people with comorbidities. The purpose of this study was to determine the relationship between knowledge, attitudes, and Covid-19 prevention measures at the Sei Mencirim Health Center. The method used an observational study with a cross sectional approach, which is used for sampling, Total Sampling. The method of data collection is done by means of questionnaire interviews. Data analysis using univariate and bivariate analysis using chi square test. The results showed that there was a connection between the knowledge variable and the Covid-19 preventive measure (p -value = 0.002) and there was no correlation between the attitude towards the Covid-19 preventive measure (p -value = 0.355). The conclusion of this study is that there is a correlation between knowledge and Covid-19 prevention measures and there is no correlation between attitudes and Covid-19 prevention.

Keywords: Knowledge, Attitude, Covid-19 Precaution

ABSTRAK

HUBUNGAN PENGETAHUAN, SIKAP, DENGAN TINDAKAN PENCEGAHAN COVID-19 DI PUSKESMAS SEI MENCIRIM KABUPATEN DELISERDANG TAHUN 2021

Penyakit Covid-19 sangat mudah menyerang orang tua dan orang-orang dengan komorbiditas. Tujuan penelitian ini adalah untuk mengetahui hubungan pengetahuan, sikap, dengan tindakan pencegahan Covid-19 di Puskesmas Sei Mencirim. Metode yang digunakan adalah penelitian observasional dengan pendekatan *cross sectional*, yang digunakan untuk pengambilan sampel yaitu *Total Sampling*. Metode pengambilan data dilakukan dengan wawancara kuisioner. Analisis data dengan menggunakan analisis univariat dan bivariat menggunakan *uji chi square*. Hasil penelitian menunjukkan ada hubungan variabel pengetahuan terhadap tindakan pencegahan Covid-19 (p-value=0,002) dan yang tidak ada hubungan sikap terhadap tindakan pencegahan Covid-19 (p-value=0,355). Kesimpulan dari penelitian ini adalah ada hubungan pengetahuan dengan tindakan pencegahan Covid-19 dan tidak ada hubungan sikap dengan tindakan pencegahan Covid-19.
