

Abstract

This study aims to determine the value of education in the film Finding Nemo. Researchers chose this film because the film Finding Nemo has educational values that can shape the character of students and this film can also be reached by all groups. The method we use in this study is a qualitative descriptive method with data collection through observation. The results of the study show that the educational values contained in the finding nemo film can shape the character of students through a material lesson plan designed with the educational values found in the finding nemo film.
