Research methods use a quantitative approach. The population of the food and beverage subsector has 68 companies, and samples are showing an outstanding 33 sampling. Analysis techniques are linear bergression methods in which research indicates that a partial return on equity may have an effect on stock prices. While the Current Ratio, Debt to Equity Ratio has no effect and is not significant on the stock price. And simultaneously the Current Ratio, Debt to Equity Ratio, Return on Equity have a significant effect on stock prices. The magnitude of the coefficient of determination is 31.3% while the remaining is 68.7%.
